STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mrs. FEINSTEIN (for herself and Mr. BLUMENTHAL):

S. 3155. A bill to ban the use of ortho-phthalate chemicals as food contact substances; to the Committee on Health, Education, Labor, and Pensions.

Mrs. FEINSTEIN. Mr. President, I rise today to introduce the Protect Our Food From Phthalate Contamination Act. This bill would ban chemicals called ortho-phthalates from materials that come in contact with our food, because these phthalates have been found to actually leach into what we eat.

Phthalates have been known to interfere with the body's hormones, leading to a range of health concerns including reproductive harm. These chemicals have also been linked to learning and behavior problems in children and insulin resistance in adolescents and adults.

According to a recent study, individuals who regularly eat out had 30 percent higher phthalate levels. The findings for teenagers are particularly troubling, where testing showed phthalate levels 55 percent higher than people who ate at home. Enjoying a meal out or using packaged food to prepare meals on a busy schedule shouldn't come with the cost of chemical exposure that can cause harm.

We've already banned certain phthalates from children's toys due to serious health concerns, and now we need to remove the exposure through the food we eat. Phthalates can be found throughout the food supply chain, from the plastic gloves worn to handle food to the containers and wrappings used for packaging.

This legislation would specifically ban the type of phthalates, ortho-phthalates, currently being used in some food production and packaging, and require that any substance used as a replacement is also safe. The bill would implement the ban over the course of two years, so that companies have time to phase out these harmful chemicals.

This bill is supported by several health and consumer organizations, including the American Academy of Pediatrics, Breast Cancer Prevention Partners, Earthjustice, Environmental Defense Fund, Environmental Health Strategy Center, Environmental Working Group, and Safer Chemicals, Healthy Families.

I appreciate the support of my colleague, Senator BLUMENTHAL, who is an original cosponsor of the bill. I look forward to working with my colleagues on this important issue. Thank you Mr. President and I yield the floor.

By Ms. COLLINS (for herself, Mr. CARDIN, Mr. WICKER, Mr. KING, and Ms. STABENOW):

S. 3160. A bill to amend title XVIII of the Social Security Act to improve access to, and utilization of, bone mass measurement benefits under part B of the Medicare program by establishing a minimum payment amount under such part for bone mass measurement; to the Committee on Finance.

Mr. CARDIN. Mr. President, I rise today to introduce legislation with my colleague from Maryland, Senator BEN CARDIN, which would increase access to preventive bone density screenings and improve osteoporosis diagnosis and treatment in the process. We are pleased to have Senators WICKER, KING, and STABENOW as cosponsors.

The public health risk of osteoporosis cannot be understated. Today, approximately 54 million Americans either have osteoporosis or low bone mass,

which places them at increased risk for osteoporosis. Women are disproportionately affected, accounting for 71 percent of osteoporotic fractures and 75 percent of costs. Osteoporosis is often called "the silent disease" because bone loss usually occurs gradually over the years without symptoms.

As the NIH Osteoporosis and Related Bone Disease National Resource Center observes, falls are especially dangerous for people who are unaware that they have low bone density. If the patient and the doctor fail to connect the broken bone to osteoporosis, the chance to make a diagnosis with a bone density test and begin a prevention or treatment program is lost.

Early diagnosis and treatment of osteoporosis are proven to dramatically reduce fracture rates, and appropriate reimbursement for tests that measure bone mass and predict fracture risk are necessary to maintain patient access to care, particularly in rural or underserved areas. Our legislation, the Increasing Access to Osteoporosis Testing for Medicare Beneficiaries Act of 2018, tackles a proven barrier to proper screening by creating a floor reimbursement rate under Medicare for the dual energy X-ray absorptiometry (DXA) test, the "gold standard" for osteoporosis diagnosis.

Congress has twice recognized the importance of reversing Medicare cuts to DXA reimbursement in order to maintain patient access, yet the Medicare reimbursement rate for DXA tests administered in a doctor's office has declined from \$140 in 2006 to only \$42 in 2018—a dramatic 70 percent decline. The National Osteoporosis Foundation has found that declining reimbursement rates have created a 26 percent decline in physicians performing DXA tests since 2008, resulting in a corresponding 22 percent decline in diagnoses since 2009.

Regrettably, as a result of reduced screenings due to declining reimbursements, it is estimated that more than 40,000 additional hip fractures occur each year, resulting in nearly 10,000 additional hip fracture-related deaths. As osteoporosis is already under-diagnosed in the Medicare population, it is clear that we must change this trajectory.

This legislation is endorsed by the American Association of Clinical Endocrinologists, the National Osteoporosis Foundation, and more than forty additional national medical societies and patient advocate organizations. I thank Senator CARDIN for joining me in this effort to increase patient access to osteoporosis screening and diagnosis, while lowering costs and consequences resulting from a lack of diagnosis. I encourage my colleagues to support its adoption.
