

it was then. If ever there were a time in our history to heed the better angels of our nature, it is now.

How can we answer Lincoln's call to our better angels? Over the last several months, I have devoted significant time and resources to answering this question. In a series of essays and floor speeches, I have sought to put flesh on the bones of Lincoln's appeal. These writings provide a blueprint for fixing our broken politics. They include: an essay on civility—the indispensable political norm—and how to restore it to the public discourse; a speech entitled “A Tale of Two Cities,” which draws from the tragedies of Charlottesville and Houston in the summer of 2017 to issue a call for unity and strength; a well-reasoned critique of identity politics, specifically, the threat it poses to the American experiment and how we can heal age-old divisions by embracing the politics of ideas, not identity; a discourse on the invaluable worth of the individual and how affirming this worth can help us curb the suicide epidemic among LGBTQ youth and create a stronger, more civil society; a proposal to establish Geneva Conventions for the culture wars, a new set of norms that can ease partisan tensions and help us contain the worst excesses of political warfare; and finally, an op-ed on pluralism and how embracing this forgotten virtue can help us overcome tribal tolerance and effect meaningful change.

These writings appeal to the humanity, grace, and inherent goodness in each of us. The purpose of this project is to remind readers of the singularity of the American experiment and how we can preserve this great Nation only by heeding the higher virtues within us.

As a parting gift, I plan to share a copy of this compilation with each of my Senate colleagues, as well as our friends in the House and leaders in the executive branch. I sincerely ask that each of you take the time to study these writings. Please, ponder their words and ask yourself how we can apply these ideas to restore our Nation's civic health.

When we heed our better angels—when we hearken to the voices of civility and reason native to our very nature—we can transcend our tribal instincts and preserve our democracy for future generations. That we may do so is my humble prayer.

#### THE UNITED STATES-UNITED KINGDOM FULBRIGHT COMMISSION

Mr. LEAHY. Mr. President, as a member of the British-American Parliamentary Group, I would like to take a moment to recognize the 70th anniversary of the creation of the United States-United Kingdom Fulbright Commission.

In the aftermath of the Second World War, Congress took steps aimed at creating a more peaceful and prosperous world. The Fulbright Program, along

with the World Bank and the IMF, are reminders of the importance of collective action for the common good. Since 1946, the Fulbright Program has fostered bilateral relationships through educational exchanges with postgraduate and postdoctoral scholarships. In the words of Senator J. William Fulbright, “the vital mortar to seal the bricks of world order is education across international boundaries, not with the expectation that knowledge would make us love each other, but in the hope that it would encourage empathy between nations . . . .” Those words are as relevant today as they were back then.

Over the last 70 years, thousands of students from the United States and the United Kingdom have crossed the Atlantic to deepen their understanding of each other's countries and cultures. Fulbright scholarships have not only been the catalysts for great artists, journalists, scientists, lawyers, independent scholars, and many others; they have cemented friendships around the globe for generations.

I invite my fellow Senators to celebrate the many Fulbright scholars and emerging leaders who have worked in countless ways to foster tolerance and understanding in their communities, countries, and around the world. In my 44 years in the Senate, I cannot think of a time when those attributes were more needed than they are today.

#### OPIOID EPIDEMIC

Mr. GRASSLEY. Mr. President, last night was a great moment for the Senate.

We have been able to pass a broad legislative package that will address the opioid epidemic in many ways.

As we all know, the opioid crisis is not nearing its end.

We are seeing more and more Americans abuse opioid drugs every year.

In 2016, there were 64,000 overdose deaths, and this number rose to a staggering 72,000 deaths in 2017.

Right now, more than 115 people in the United States die from opioid overdoses every day.

In Iowa last year, more than 200 people died from opioid misuse.

If there is one thing we have learned, it is that no segment of society has been left untouched.

The crisis has affected people all over this country. Communities throughout the United States are desperate for answers.

While overcoming this crisis cannot be accomplished overnight, the passage of the Opioid Crisis Response Act is a huge step in the right direction.

This legislation is a collection of more than 70 proposals from four different committees here in the Senate, including Judiciary, where I led six different bills through committee.

It is important to highlight how well we worked together on both sides of the aisle—and across the aisle—to get to this point. This was a massive bipartisan effort.

On behalf of Judiciary, not a single bill passed through committee without wide bipartisan support. The Judiciary Committee contributed six separate bills—each with different sponsors, to this larger piece of legislation.

I worked with my Judiciary colleagues to get near-unanimous backing for each of the bills. That takes a lot of time and hard work. It takes some compromise. But we were able to get it done.

Several of the bills relate to Drug Enforcement Administration authorities. Those bills will help empower DEA to better identify and stop suspicious orders, gather more information when setting annual quotas for opioids, and facilitate the flow of information among drug manufacturers and distributors to enable better reporting decisions to warn DEA of potential problems.

I teamed up with my fellow Iowan, Senator ERNST, to promote higher participation in drug take-back programs so that unused, forgotten opioids don't find their way from the medicine cabinet into unauthorized hands.

Another bill successfully reported out of the Judiciary Committee reauthorizes the Office of National Drug Control Policy. ONDCP directs, crafts, and coordinates the drug policy strategy for the entire Nation.

Its reauthorization sends a message to other Federal agencies and the country that we will continue to have strong leadership guiding us through this crisis.

Yet another bill closes a loophole addressing illegal actors peddling synthetic drugs, allowing law enforcement to better investigate and prosecute cases involving synthetics.

Outside of the Judiciary Committee legislation, this bill also includes several priorities of mine, including requiring drug manufacturers to publicly disclose payments made to nurse practitioners and physician assistants, just like doctors; increasing access to substance abuse treatment in rural areas via telehealth; and better data collection to make sure taxpayer dollars are spent helping people who need help and not lining the pockets of crooks who take advantage of common people.

While I cosponsored a number of bills in the opioid package, it is important to remember that this legislation is a team effort.

The combination of bills from the Judiciary Committee, Commerce Committee, Finance Committee, and the HELP Committee broadly address the multiple facets of the epidemic.

As we have learned through several Judiciary Committee hearings, we can't focus on single issues as we combat this drug crisis.

Rather, this legislation looks at the epidemic as a whole.

From prevention, treatment, recovery, and enforcement efforts, the bill runs the gamut. It contains provisions on transparency in opioid prescribing, family-focused residential treatment

options, education on drug abuse for youth, and tools for prosecuting peddlers of synthetic drugs.

The Opioid Crisis Response Act addresses the front end of the problem through education and prevention and also tackles the back end through treatment and law enforcement solutions.

I would like to recognize my colleagues and thank them for their cooperative spirit and determined efforts to help develop and move this legislation forward.

Without reaching across the aisle and working together, we wouldn't be here.

In particular, I would like to thank Senator ALEXANDER and his staff for their leadership in making this happen.

I am proud of the work we have done so far and look forward to continuing our bipartisan effort.

Hopefully, this bill crosses the finish line, and we get the President's signature on a major piece of legislation.

We certainly haven't solved all of our drug problems, but I will continue to work hard to look for more ways that Congress can help, but for today, we can take a brief moment to recognize what we have done in passing this bill.

It is truly an important step in the right direction. This bill will serve Iowans and all Americans in our continued fight against the opioid crisis.

#### OPERATION TWIN LINKS

Mr. NELSON. Mr. President, on the 11th of November 2018, the world celebrates the 100th anniversary of the end of World War I. America entered the Great War 2 years, 8 months, and 9 days after it started, but with our allies and through great sacrifice, defeated the Central Powers.

In honor of the Great War centennial, two men have served as thankful ambassadors from our oldest ally: France. Mr. Christophe de Goulaine and Mr. Pierre Lauvergeat have undertaken a historic effort named Operation Twin Links. In tribute to American World War I veterans and their families, the two men traveled almost 5,000 miles of American countryside on a fully restored 1918 Harley Davidson 1000 18-J motorcycle. This is the very model our servicemembers rode throughout the Western Front. It is also the same model that Corporal Roy Holtz of Chippewa Falls, WI, rode into Germany on November 12, 1918, in the famous photograph titled, "The first Yank and Harley to enter Germany." The motorcycle is named Bony, after the French commune which is home to Somme American Cemetery and Memorial, the final resting place for 1,844 American soldiers.

Operation Twin Link's historic journey of remembrance and thanks began at Fort Caroline National Memorial in Jacksonville, FL, which shares a special linkage as twin city to Nantes, France. From there, Bony traveled to the Harley Davidson Headquarters in Milwaukee, WI, then to Las Vegas, NV.

Along the way, these ambassadors made numerous stops, thanking Americans for their support during those dark times in history and reminding us all of the links shared between our two great nations. Bony's trip concluded on September 10, 2018, in Jacksonville, FL, where Mr. de Goulaine's ancestor, French explorer Rene de Goulaine de Laudonniere, founded the first European settlement in America.

As we near the 100th anniversary of the end of World War I, I invite all Americans to remember the sacrifice of our great generation and our enduring allies in Europe. Furthermore, it is with gratitude and appreciation that I thank Mr. de Goulaine and Mr. Lauvergeat for reminding us of the deep friendship of the people of France and for undertaking this feat to bring home a symbol of American ingenuity, steadfastness, and resolve from World War I.

#### RECOGNIZING THE TRANSIENT REACTOR TEST FACILITY RESTART

Mr. CRAPO. Mr. President, along with my colleagues Senator JAMES RISCH and Representative MIKE SIMPSON, today I wish to call attention to an important event taking place today at the U.S. Department of Energy's, DOE, 890-square-mile site in Idaho. Today, Idaho National Laboratory, INL, personnel ran the first experiments in the Transient Reactor Test, TREAT, facility in nearly a quarter century.

Idaho National Laboratory is our Nation's lead nuclear energy research, development, and demonstration laboratory, the place where 52 original nuclear reactors were constructed and demonstrated. One of those reactors was the TREAT facility, which operated from 1959–1994, and remained fully fueled while on standby status. Transient testing focuses upon testing nuclear fuel under accident conditions. TREAT is one of the most capable and flexible transient test reactors in the world.

Following the accident at the Fukushima-Daiichi Power Plant in Japan 7 years ago, Congress directed the DOE to develop reactor fuels that could better withstand accident conditions. During TREAT's 35 operating years, the reactor performed 6,604 reactor startups and 2,884 transient irradiations. Given this history, it made more sense to restart the facility than build a new reactor. That decision paid off when, on August 31, 2017, the Resumption of Transient Testing Program was completed more than 1 year ahead of schedule and approximately \$17 million under budget.

This highly successful restart at the TREAT facility was recognized in August, when a joint DOE-INL team won the Secretary of Energy Award. This award recognizes DOE employees or contractors who accomplish significant achievements. It is the highest non-monetary internal recognition that can

be achieved at the DOE. U.S. Secretary of Energy Rick Perry highlighted the TREAT restart team's effort and efficiency, and recognized the importance of the facility to nuclear energy scientists and engineers as they work to develop advanced nuclear fuels and reactor technologies.

Congratulations, INL and DOE, on the TREAT restart and for bringing back online an important national asset in the effort to develop the advanced nuclear reactors so vital to our economy, environment, and national security.

#### ADDITIONAL STATEMENTS

##### TRIBUTE TO CALEB FRARE

• Mr. DAINES. Mr. President, this week I have the honor of recognizing Caleb Frare of Custer County for becoming the most recent Montanan to play Major League Baseball.

Born in Billings, MT, Caleb, like most boys, dreamt of becoming a professional baseball player. Throughout his adolescent life, Caleb advanced in all levels of baseball. As a standout of the Miles City Outlaws baseball club, Caleb was on track to a promising career in baseball.

After graduation from Custer County High School in 2012, Caleb was drafted by the New York Yankees in the 11th round. Caleb was recently traded by the New York Yankees to the Chicago White Sox, where he played on their triple-A team out of Charlotte, NC. Caleb received the phone call he had so patiently been awaiting his whole life. The White Sox had called him up for his first Major League debut. In his debut, Caleb pitched a perfect inning in the Chicago White Sox's 8–0 win over the Boston Red Sox.

I congratulate Caleb on such a tremendous achievement and look forward to the many more milestones he will complete during his baseball career. •

##### TRIBUTE TO GARY JOHNSON

• Mr. INHOFE. Mr. President, I am pleased to recognize Mr. Gary Johnson on the occasion of his retirement. Gary has served as the airport director for the city of Stillwater Regional Airport, SWO for the past 32 years and has a lifelong dedication to the aviation community. Under his steady leadership, Stillwater Regional Airport has grown into one of Oklahoma's best general aviation and commercial airports. Earlier this year, Stillwater Regional Airport celebrated its 100,000th commercial passenger in less than 2 years—made possible because Gary brought regular commercial service back to the airport.

Gary began his career in aviation by graduating from Southeastern Oklahoma State University with a bachelor's of science in professional aviation-business. In addition to being a pilot, he started his own fixed based operator, the Stillwater Flight Center,
