

hardy and loyal fans. Every Packers game since 1960 has been sold out, and the season ticket waiting list is so long that it is estimated that a fan who puts his or her name on the waitlist today would first be able to purchase tickets in 2966. It is common for season tickets to be passed down to future generations as a precious inheritance. The willingness of Wisconsin “cheeseheads” to endure harsh Wisconsin winters to watch their beloved team is also legendary. The stands were still full on December 31, 1967, with 16 seconds left, when Green Bay future Hall of Fame quarterback Bart Starr dove into the end zone to beat the warm-weather Dallas Cowboys 21–17 to claim their third consecutive NFL title. The temperature on the field at the end of the now-famous “Ice Bowl” was a frigid 18 degrees below 0.

The trials and successes of the Green Bay Packers are woven into the fabric of Wisconsin culture. Generations of hard-working Wisconsinites have grown up cheering for the “Green and Gold.” I am honored to count myself among the team’s loyal fans who will celebrate their 100th anniversary this year and who look forward to many more hard-fought victories in the years to come. “Go Pack Go!”

ADDITIONAL STATEMENTS

TRIBUTE TO ADRIENNE ARSHT

• Mr. BLUNT. Mr. President, I take this opportunity to honor the work of Ms. Adrienne Arsht on the occasion of the 5-year anniversary of the Adrienne Arsht Latin America Center at the Atlantic Council. Throughout her career, Ms. Arsht has worked in and called home New York, Miami, and Washington, DC. Today, she tirelessly dedicates herself to promoting artistic, business, and civic growth in these three cities.

In 2013, Ms. Arsht founded the Adrienne Arsht Latin America Center at the Atlantic Council to broaden the understanding of regional transformations with a focus on high-impact work that shapes the conversation among policymakers, the business community, and civil society. The center focuses on Latin America’s strategic role in a global context with a priority on pressing political, economic, and social issues that will define the trajectory of the region now and in the years ahead. Its work provides an essential forum for navigating the dramatic economic and political changes defining the 21st century by informing and galvanizing its uniquely influential network of global leaders.

In 2013, the Ambassador of Spain to the United States presented her with the prestigious Spanish diplomatic honor, Order of the Cross of Isabella the Catholic, for her contributions toward Spanish-speaking countries. Earlier this year, Ms. Arsht was awarded the distinguished Order of San Carlos

of Colombia by direction of President Juan Manuel Santos to recognize her deep commitment and support of Colombia.

Ms. Arsht serves as executive vice chair of the Atlantic Council. In 2017, she founded the Adrienne Arsht Center for Resilience to explore the intersection between people and the geopolitical events that affect them. From natural disasters and displacement, to global pandemics and terrorism, the Center for Resilience helps individuals, communities, and societies navigate the global changes that define the 21st century.

Ms. Arsht has also been an ambassador for the arts in the United States. She has contributed to the preservation and sustainability of multiple artistic institutions in the cities she calls home. In Miami, she secured the financial footing of the city’s performing arts center, prompting its board to rename it the Adrienne Arsht Center for the Performing Arts of Miami-Dade County in 2008. Her contributions to the Lincoln Center in New York City were recognized with the dedication of the Adrienne Arsht Stage in Alice Tully Hall in 2012. In Washington, DC, she created the Adrienne Arsht Theater Fund at the Kennedy Center to support a wide variety of musical productions. Ms. Arsht was awarded the Carnegie Hall 2017 Medal of Excellence, recognizing her visionary and outstanding contributions to cultural and nonprofit institutions nationally.

Adrienne Arsht is a philanthropist at heart and an extraordinary business leader who serves our country and advances international understanding.●

RECOGNIZING THE GAY AND LESBIAN COMMUNITY CENTER OF SOUTHERN NEVADA

Ms. CORTEZ MASTO. Mr. President, for 25 years the Gay and Lesbian Community Center, “the Center,” of Southern Nevada has served as a vital resource for the LGBTQ community and their allies in and around Las Vegas. The Center offers essential services such as comprehensive sex education and college and career readiness, all while fighting to end discrimination against and further the well-being of the lesbian, gay, bisexual, transgender, and queer community.

In 1993, the Gay and Lesbian Community Center of Southern Nevada purchased a building and opened its doors, becoming the first safe public space in Las Vegas for LGBTQ people. That year, the Nevada Legislature repealed sodomy laws and the Center hosted its first LGBTQ rights celebration.

Since then, the Center has continued to grow with the city and has hosted many more events, including to celebrate the Supreme Court decision instituting marriage equality nationwide. The Center also celebrated the opening of a new building in 2013 named after Las Vegas philanthropist Robert

Forbuss. The Center has increased its services, outreach, and membership throughout the years and has formed valuable community partnerships with government entities, private companies, and other nonprofits in order to maintain its no-cost community programming.

For two and a half decades, the Center has been unwavering in its commitment to the people of southern Nevada. The Center will continue to be on the leading edge of advocacy for the human rights of gay, lesbian, bisexual, transgender, and queer individuals. I ask my colleagues to join me in thanking the Gay and Lesbian Center of Southern Nevada for its dedication to ensuring all Nevadans are treated equally and for its service to the community over the past 25 years.

TRIBUTE TO LAURA LANDERMAN-GARBER

• Ms. HASSAN. Mr. President, I am proud to recognize Laura Landerman-Garber of Hollis, NH, who truly embodies our State’s all-hands-on-deck spirit, as September’s Granite Stater of the Month.

One holiday season years ago, Laura read a story about the importance of remembering servicemembers away from home during the holidays. So during a holiday dinner, she set out cards and told her family and guests that she would start serving turkey dinner after they each wrote a card to a servicemember. This tradition continued and grew last year when a family friend was stationed on an aircraft carrier, the U.S.S. *Theodore Roosevelt*, inspiring Laura to try to send a card to each member of the crew—or 5,000 cards.

To accomplish this task, Laura mobilized her community. She reached out to churches, synagogues, scout troops, and schools. She also talked to the local media and public officials. Instead of receiving 5,000 cards, Laura received 17,000 cards for members of the Navy in just 6 weeks.

As Laura says, New Hampshire may be small in size, but we are mighty in heart. She has decided to continue her mission to honor our heroes serving in the Armed Forces and says she draws particular inspiration to carry on her tradition after meeting a Vietnam war veteran who described a card he had framed on the wall of his house, written to him by a boy he has never met.

This year, Laura has formed a nonprofit organization to help with the postage and has expanded her goals; she aims to collect 5,000 cards for each branch of our military, 25,000 total. Already, Laura has said the outpouring of support from the entire New Hampshire community has been incredible, reinforcing that, from preschoolers to seniors, the people of New Hampshire exhibit a remarkable generosity of heart and spirit. Laura is confident that, this year, she will once again meet her goal.

For her dedication to our servicemembers and for her work to

bring Granite Starters together, I am proud of to recognize Laura as our September Granite Stater of the Month.●

TRIBUTE TO RED ARNDT

● Mr. THUNE. Mr. President, today I recognize Red Arndt for his many years of service to the Lewis & Clark Regional Water System, as well as his lifetime commitment to bringing safe and reliable water to the rural corners of this country.

Born Lennis Arndt on May 1, 1948, he earned the nickname, "Red," while in grade school from his full head of red hair. The name stuck, and most people only know him today as Red Arndt.

Red grew up in Springfield, MN, about 90 minutes from his current hometown, Luverne, where he first started working in 1989 as their public utilities director. Shortly after beginning his new position, Red heard about a proposal to bring water from the Missouri River in South Dakota to the surrounding States. A major undertaking with more people doubting the idea than supporting, Red saw the opportunity and potential, recommending to the mayor and city council that Luverne join and become one of the first members of the corporation that would later become the Lewis & Clark Regional Water System.

Seeing Lewis & Clark develop from conception to construction was a labor of love for Red and a mission he fought hard to achieve. Red, one of only two original directors from 1990 still on the board, held a shovel when the ground was first broke in 2003. He has probably made over 60 trips to Washington, DC, and many more to the State capitals and attended countless county, city, and community meetings.

Fighting to get Lewis & Clark off the ground was just a starting point for Red. He has worked tirelessly on behalf of the project, serving as the vice chairman of the board beginning in 1994, until becoming the board chairman in 2006, a position he still holds. Lewis & Clark has experienced ups and downs during those years; yet under Red's leadership, over 200 miles of pipeline have been laid in the ground currently delivering much needed water to 14 member communities and rural water projects, reaching over 300,000 people across South Dakota, Minnesota, and Iowa. He has seen over \$470 million in funding to Lewis & Clark, including \$57 million in advance funding from the three States.

Red's indisputable dedication was demonstrated when he participated in the ribbon-cutting ceremony for the water treatment plant in August 2012, a mere 2 weeks after having open heart surgery. His fellow directors surprised him at the ceremony by presenting him with the Lewis & Clark Trailblazer Award, which is the organization's highest honor.

In May 2016, Luverne was finally able to celebrate their connection to Lewis & Clark, with Red reveling in taking

the first swig of water. It was at this ceremony that the meter building in Luverne was dedicated in Red's honor. Red will be the first to acknowledge that this endeavor, benefiting generations to come in the tristate area, has been a true team effort. But, there is no question Red's vision for the future, dogged dedication, and strong leadership have been a driving force through the years.

When he is not dedicating his time to Lewis & Clark, Red is a proud father of three boys—all sharing his red hair—and grandfather of three red-headed little girls. His family is his pride and joy. You will often find Red wearing a pin honoring his son who served in the U.S. Air Force.

As a dessert first type of guy, Red lives life to the fullest, enjoying travel, fishing and numerous other outdoor activities in his free time, as well as hanging out in his "man cave." I am grateful for his commitment to public service, his hard work on behalf of Lewis & Clark, and, more importantly, I am proud to call him a friend.

I commend Red Arndt for his many great contributions and wish him the best as he continues to make the most out of the life God has given.●

TRIBUTE TO STAMATIOS "TOM" KRIMIGIS

● Mr. VAN HOLLEN. Mr. President, today I wish to recognize Stamatios "Tom" Krimigis on the occasion of his 80th birthday and 50th anniversary of service to the Johns Hopkins Applied Physics Laboratory.

Dr. Krimigis is one of our Nation's brightest minds in the field of space science, and I and countless others rely on his knowledge and good counsel. He has had an amazing journey from humble beginnings on the Greek island of Chios to become one of the world's most brilliant and renowned space scientists.

The launch of Sputnik in 1957 drew his eye to the sky and inspired him to study physics and space science, so he came to the United States at the age of 18 to enroll at the University of Minnesota.

Upon finishing college, he went to the University of Iowa to work for James Van Allen, who had been the principal investigator on Explorer 1, which was the U.S. first satellite. In 1968, he joined Johns Hopkins Applied Physics Laboratory. He was the head of the space department from 1991 to 2004 and has been the emeritus head and principal staff scientist since then.

Dr. Krimigis has led pioneering research into the Earth's environment, its magnetosphere, the Sun, the interplanetary medium, and the magnetospheres of the planets. He was critical in helping NASA shape its approach to planetary exploration and has published more than 600 articles in scientific journals and books. He remains the only scientist to lead investigations of every planet in our solar

system. In 1999, the International Astronomical Union named the asteroid 8323 Krimigis, previously 1979 UH, in his honor.

In addition to being a brilliant scientist in his own right, Dr. Krimigis has mentored countless scientists, engineers, and staff at the Applied Physics Lab, showing extraordinary generosity with his time to develop new generations of leaders. He is always willing to share his insights and provide thoughtful guidance. I am lucky to have Tom as a friend and adviser who has provided insights and infectious enthusiasm for the work being done by he and his colleagues at the Applied Physics Lab. I was thrilled to join Tom to witness some of his major successes, like the Near Earth Asteroid Rendezvous in 1998 and the Pluto fly-by in 2015.

Dr. Tom Krimigis has a special ability to help people understand the value of investing in our ability to explore our planets and peer into the depths of space, both to maintain America's technological edge and to help answer basic universal questions about our place in the universe. I am honored to recognize him today and to wish him a happy 80th birthday.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Pate, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The messages received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE RECEIVED DURING ADJOURNMENT

ENROLLED BILLS SIGNED

Under the authority of the order of the Senate of January 3, 2017, the Secretary of the Senate, on September 20, 2018, during the adjournment of the Senate, received a message from the House of Representatives announcing that the Speaker pro tempore (Mr. MESSER) had signed the following enrolled bills:

S. 97. An act to enable civilian research and development of advanced nuclear energy technologies by private and public institutions, to expand theoretical and practical knowledge of nuclear physics, chemistry, and materials science, and for other purposes.

S. 2946. An act to amend title 18, United States Code, to clarify the meaning of the terms "act of war" and "blocked asset", and for other purposes.

MESSAGE FROM THE HOUSE

At 3:02 p.m., a message from the House of Representatives, delivered by
