

at base station. Today, under the direction of current owner Wayne Presby, most locomotives are powered by state-of-the-art biodiesel technology. The new trains are faster, quieter, cleaner, and more efficient, but the Cog Railway still uses a couple of steam locomotives for those who want to experience the trip as it was years ago.

While the locomotives may change with the times, one feature of the Cog Railway has remained a constant: Personnel must maintain a resilient system capable of withstanding extreme and unpredictable weather. Winters come early and leave late atop the Northeast's highest peak, often burying the mountain in several feet of snow. Mount Washington is famous as the site of one of the fastest recorded wind speeds in history: 231 miles per hour in 1934. The Cog Railway weathers torrential rain, heavy snow, blustering winds, and even hurricanes. A severe hurricane battered the mountain in 1938 and destroyed Jacob's Ladder, a steep, curving trestle near the top of the mountain. It was quickly rebuilt with the help of Dartmouth College.

The White Mountains are a majestic site, and there are few better places to behold this beauty than the Mount Washington Cog Railway. It offers spectacular views and brings you to a summit where you can see up to five States and into Canada on a clear day. Moreover, riding the Cog Railway is an experience that ties riders to Sylvester Marsh and a century and a half of steam, steel, and many unforgettable memories.

On behalf of the people of New Hampshire, we ask our colleagues and all Americans to join us in congratulating the Mount Washington Cog Railway on 150 years of service and wishing its staff and many supporters all the best in the coming years.●
