

associated with AGM-114R could lead to development of countermeasures or exploitation of system vulnerabilities by those obtaining the information.

e. The Hellfire M36E9 Captive Air Training Missiles (CATM) is a flight-training missile that consists of a functional guidance section coupled to an inert missile bus. The M36E9 CATM does not have a functional rocket motor or warhead, and cannot be launched. It functions like a tactical missile (without launch capability) during captive carry on the aircraft, making it suitable for training the aircrew in simulated Hellfire missile target acquisition and lock. The highest level of classified information that could be disclosed by a proposed sale or by testing of the end item is SECRET.

f. The aircraft has an Embedded Global Positioning System/Inertial Navigation System (EGI) plus MultiMode Receiver (MMR), and two EGIs which use internal accelerometers, rate gyro measurements, and external sensor measurements to estimate the aircraft state, provides aircraft flight and position data to aircraft systems. The EGI is a velocity-aided, strap down, ring laser gyro based inertial unit. The EGI unit houses a GPS receiver. Integrated within the EGI is an Inertial Measurement Unit (IMU) for processing functions. Each EGI also houses an MMR to provide for reception of ground based NAVAID signals for instrument aided flight.

g. The AAR-57 Common Missile Warning System (CMWS) detects energy emitted by threat missiles in-flight, evaluates potential false alarm emitters in the environment, declares validity of threat and selects appropriate countermeasures. The CMWS consists of an Electronic Control Unit (ECU), Electro-Optic Missile Sensors (EOMSs), and Sequencer and Improved Countermeasures Dispenser (ICMD). The ECU hardware is classified CONFIDENTIAL; releasable technical manuals for operation and maintenance are classified SECRET.

h. The AN/APR-39 Radar Signal Detecting Set is a system that provides warnings of radar-directed air defense threats and allows appropriate countermeasures. This is the 1553 databus compatible configuration. The hardware is classified CONFIDENTIAL when programmed with threat data; releasable technical manuals for operation and maintenance are classified CONFIDENTIAL; releasable technical data (technical performance) is classified SECRET. The system can be programmed with threat data provided by the purchasing country.

i. The M36E9 Captive Air Training Missile (CATM) is a Hellfire training missile (NonNATO) that consists of a functional guidance section coupled to an inert missile bus. The missile has an operational semi-active laser seeker that can search for and lock-on to laser designated targets for pilot training, but it does not have a warhead or propulsion section and cannot be launched.

j. The Stinger RMP Block I Missile, hardware, embedded software object code and operating documentation contain sensitive technology and are classified CONFIDENTIAL. The highest classification of the Stinger 92H Reprogrammable Micro-Processor (RMP) Block I missile hardware is CONFIDENTIAL, and the highest classification of data and information is SECRET. The guidance section of the missile and tracking head trainer contain highly sensitive technology and are classified CONFIDENTIAL. Missile System hardware components contain sensitive critical technologies. Stinger Block I critical technology is primarily in the area of design and production know-how and not end-items. Information on countermeasures vulnerability to electronic countermeasures, system performance capabilities and effectiveness, simulation and test

data and software source code are classified up to SECRET.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that the Republic of the Philippines can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal have been authorized for release and export to the Republic of the Philippines.

REMEMBERING DAVID MARTIN

● Mrs. HYDE-SMITH. Mr. President, it is with a heavy heart that I honor the life of Mississippi native, William David Martin. A paramedic with American Medical Response, David served his community during the coronavirus pandemic until he passed away due to complications of COVID-19 on April 22, 2020. His dedication to his patients and community represents the best of Mississippi, and I send my deepest sympathies to his family and friends.

Mr. Martin was born in 1967 in McComb, MS, to Joyce F. Martin and the late Billy B. Martin. Mr. Martin was a national registered paramedic with American Medical Response of Southwest Mississippi and worked as a paramedic in Natchez and Gulfport. Throughout his career, Mr. Martin served on the frontlines of Mississippi healthcare, helping care for patients during emergencies and times of great need. When COVID-19 began to spread in the United States, Mr. Martin answered the call and continued to serve and protect his community from this dangerous new virus. Mr. Martin will be known as a hero not only in Mississippi but throughout our Nation. As a symbol of his dedication to his team of paramedics, his coworkers from AMR Southwest Mississippi served as the pallbearers at his funeral.

Mississippi and our Nation have been well-served by the diligence, sacrifice and love provided on a daily basis by paramedics like David Martin. His big heart and dedication to his community will be greatly missed. I offer my condolences and prayers for Mr. Martin's children, his fiancé; and members of his family. I also pray that God will protect his coworkers at AMR and all paramedics in Mississippi, who are still working tirelessly to protect our loved ones throughout this pandemic. They, like so many of our healthcare workers on the frontlines, deserve our support and appreciation during this time.●
