SUBMITTED RESOLUTIONS

SENATE RESOLUTION 780—DESIGNATING NOVEMBER 2020 AS “NATIONAL LUNG CANCER AWARENESS MONTH” AND EXPRESSING SUPPORT FOR THE EARLY DETECTION OF LUNG CANCER

Ms. SMITH (for herself, Mr. RUBIO, Mr. BOOZMAN, Mr. VAN HOLLEN, Mr. SCOTT of South Carolina, and Mrs. CAPITO) submitted the following resolution; which was considered and agreed to:

S. RES. 780

Whereas lung cancer is the leading cause of cancer-related death among men and women in the United States, accounting for more deaths than colon cancer, breast cancer, and prostate cancer combined;

Whereas lung cancer is the second most common cancer in the United States;

Whereas it is estimated that 1 in 15 men and 1 in 17 women in the United States will develop lung cancer during their lifetime;

Whereas it is estimated that in 2020, 228,820 individuals in the United States will be diagnosed with lung cancer, and 135,720 individuals will die from the disease;

Whereas the 5-year survival rate for localized lung cancer is around 59 percent, yet

only about 17 percent of lung cancers are diagnosed at this stage;

Whereas screening individuals at high risk of lung cancer using low-dose computed tomography can detect lung cancer earlier than other forms of screening and ultimately save lives;

Whereas lung cancer screening can effectively reduce lung cancer mortality, yet only 3.9 to 8.6 percent of individuals in the United States at high risk of lung cancer undergo lung cancer screening with low-dose computed tomography; and

Whereas educational efforts can increase awareness of lung cancer and lung cancer screening among the general public, patients and their families, and health care workers, thereby increasing the early detection of lung cancer: Now, therefore, be it

Resolved, That the Senate—

(1) designates November 2020 as “National Lung Cancer Awareness Month”;

(2) supports the goals and ideals of National Lung Cancer Awareness Month;

(3) promotes efforts to increase awareness of, and education about, lung cancer and lung cancer screening among individuals in the United States;

(4) recognizes the need for research on the early diagnosis, screening, and treatment of lung cancer; and

(5) encourages the people of the United States to observe National Lung Cancer Awareness Month with appropriate awareness and educational activities.

SENATE RESOLUTION 781—SUPPORTING THE GOALS OF WORLD AIDS DAY

Mr. BOOKER (for himself and Mr. SULLIVAN) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 781

Whereas, as of the end of 2019, an estimated 38,000,000 people were living with human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS), including 1,800,000 children;

Whereas, in the United States, more than 770,000 people with HIV/AIDS have died since the beginning of the HIV/AIDS epidemic, including nearly 16,000 deaths among people with diagnosed HIV in 2018, with the disease disproportionately affecting certain populations;

Whereas each year nearly 40,000 people become newly diagnosed with HIV in the United States;

Whereas communities of color are disproportionately affected by the spread of HIV in the United States;

Whereas, in order to address the HIV epidemic in the United States, on August 18, 1990, Congress enacted the Ryan White Comprehensive AIDS Resources Emergency Act of 1990 (Public Law 101-381; commonly referred to as the “Ryan White CARE Act”) to provide primary medical care and essential support services for people living with HIV who would benefit from these services;

Whereas the Ryan White HIV/AIDS Program provides services and support for over half of all people diagnosed with HIV in the United States;

Whereas, to further focus attention on the HIV/AIDS epidemic among minority communities in the United States, in 1998, the Minority AIDS Initiative was established to provide funds to State and local institutions and organizations to best serve the health care costs and support the needs of racial and ethnic minorities living with HIV;

Whereas the United Nations Sustainable Development Goals established a global tar-

get to end AIDS as a public health threat by 2030;

Whereas, in order to further address the global HIV/AIDS epidemic, in 2003, Congress and the White House created the President's Emergency Plan for AIDS Relief (PEPFAR);

Whereas the PEPFAR program remains the largest commitment in history by any country to combat a single disease;

Whereas, as of 2019, PEPFAR has supported treatment for approximately 15,700,000 people, including by providing antiretroviral drugs to 2,600,000 pregnant women living with HIV to prevent the transmission of HIV from mother to child during birth;

Whereas, in fiscal year 2019, PEPFAR directly supported HIV testing and counseling for nearly 79,600,000 people;

Whereas the Global Fund to Fight AIDS, Tuberculosis and Malaria, launched in 2002, has helped provide antiretroviral therapy to approximately 20,100,000 people living with HIV/AIDS and to 718,000 pregnant women to prevent the transmission of HIV/AIDS to their children, saving an estimated 38,000,000 lives, as of 2019;

Whereas the United States is the largest donor to the Global Fund to Fight AIDS, Tuberculosis and Malaria, and every \$1 contributed by the United States leverages an additional \$2 from other donors, as required by law;

Whereas considerable progress has been made in the fight against HIV/AIDS, including a 23-percent reduction in new HIV infections, over a 40-percent reduction in new HIV infections among children, and over a 30-percent reduction in the number of AIDS-related deaths between 2010 and 2019;

Whereas approximately 25,400,000 people had access to antiretroviral therapy in 2019, compared to only 7,800,000 people who had access to such therapy in 2010;

Whereas research funded by the National Institutes of Health found that HIV treatment not only saves the lives of people living with HIV, but people living with HIV on effective antiretroviral therapy and who are durably virally suppressed cannot sexually transmit HIV, proving that HIV treatment is prevention;

Whereas it is estimated that, without treatment, half of all infants living with HIV will die before their second birthday;

Whereas, despite the remarkable progress in combating HIV, significant challenges remain;

Whereas there were approximately 1,700,000 new HIV infections in 2019 globally, structural barriers continue to make testing and treatment programs inaccessible to highly vulnerable populations, and an estimated 7,100,000 people living with HIV globally still do not know their HIV status;

Whereas the Centers for Disease Control and Prevention reports that more than 37,000 people were diagnosed with HIV in the United States in 2018 and 14 percent of the 1,200,000 in the United States living with HIV are not aware of their HIV status;

Whereas men who have sex with men (MSM), particularly young MSM of color, are the population most affected by HIV in the United States;

Whereas southern areas of the United States bear the greatest burden of HIV, accounting for 51 percent of new infections in 2018;

Whereas people living with HIV are frequently susceptible to comorbidities, such as hepatitis B and C and tuberculosis;

Whereas the opioid and heroin epidemics have led to increased numbers of new HIV infections among people who inject drugs;

Whereas the crisis has disproportionately affected nonurban areas, where HIV prevalence rates have been low historically and have limited services for HIV prevention and
