

thousands of businesses, and altered life as we know it.

Yet, here we stand, almost a month later, and we are still no closer to a House investigation, not even a hearing to get to the bottom of what happened.

The simple fact of the matter is that the Chinese Communist Party is an adversary, and they have not been truthful or honest about anything, especially not their role in covering up the origins of COVID-19.

Since the very beginning, the Chinese Communist Party has blocked American scientists from participating in a full-scope investigation, refused access to reporters from Wuhan, manipulated the World Health Organization's report on the origins of the virus, and strong-armed anyone who disagreed with the narrative they invented.

It is infuriating that Speaker PELOSI and House Democrats are willing to cover for the Chinese Communist Party and let them off the hook for this disaster, simply to achieve a political end.

We cannot and should not accept anything less than absolute certainty about the origins of COVID-19. We must investigate, hold China accountable, and ensure nothing like this ever happens again.

OUR NUCLEAR LEGACY IN THE MARSHALL ISLANDS

(Ms. PORTER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. PORTER. Mr. Speaker, July marks the 75th anniversary of the first U.S. nuclear test in the Marshall Islands, a tragedy that continues today.

Orange County is proud to be home to one of the oldest Marshallese-American communities. But why the Marshallese came to the United States is a disgraceful chapter in our Nation's history. From 1946 to 1958, the United States conducted 67 nuclear tests in the Marshall Islands.

We deceived the Marshallese, using them as guinea pigs to study the effects of radiation. We turned ancestral lands into dumping grounds for nuclear waste.

We still haven't done the bare minimum to make this right. We established a tribunal for compensation but provided less than 10 percent of the money owed. We don't even translate environmental studies into Marshallese.

Our nuclear legacy in the Marshall Islands is at the nexus of President Biden's top priorities: racial justice, healthcare, climate change, U.S. global reputation, and countering China through diplomacy. We must commit across party lines to make this right.

REQUEST TO CONSIDER H.R. 18, NO TAXPAYER FUNDING FOR ABORTION ACT

(Mrs. HARTZLER asked and was given permission to address the House for 1 minute.)

Mrs. HARTZLER. Mr. Speaker, I rise today in solidarity with the 2 million lives saved by the Hyde amendment.

For decades, Presidents of both parties, including Presidents Clinton and Obama, have worked across the aisle to include the Hyde amendment in the Federal budget, which is a temporary protection barring the use of taxpayer funds to pay for abortions.

However, this year, while calling for unity, the President is pushing for a \$6 trillion budget with no protections for the unborn or for the taxpayer who will foot the bill. This is an action where everyone loses.

Instead of callously endangering the lives of millions of women and children at taxpayer expense, we should be fighting tooth and nail for their protections.

By making the Hyde amendment permanent, that is exactly what H.R. 18 will do.

That is why I ask unanimous consent that the Committees on Energy and Commerce, Ways and Means, and the Judiciary be discharged from further consideration of H.R. 18 and ask for its immediate consideration in the House.

The SPEAKER pro tempore (Mr. NEGUSE). Under guidelines consistently issued by successive Speakers, as recorded in section 956 of the House Rules and Manual, the Chair is constrained not to entertain the request unless it has been cleared by the bipartisan floor and committee leaderships.

173 DAYS OF ACCOMPLISHMENTS

(Ms. DEAN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. DEAN. Mr. Speaker, today is day 173 of this Congress and the 150th of the Biden administration. These days have been spent governing to repair our global standing, to accelerate our vaccination program, and to boost a struggling economy.

With the American Rescue Plan, we have governed to build back better for red districts, for blue districts, for all districts.

In my district alone, here are some of the ways we have begun to build back better: with over \$87 million for our school districts, \$137 million for local governments, \$1.5 million for Head Start programs, and the child tax credit will send an average of \$2,400 to 37,000 families.

The Commonwealth of Pennsylvania has received \$7.3 billion, a transformative amount, that must address educational and opportunity inequities.

In these 100 days, we have proven we can live up to a responsibility to govern. As we begin to emerge from this pandemic, we are at a turning point where we can build on the success of the American Rescue Plan, find infrastructure investments, and look toward a stronger, more compassionate future.

ALZHEIMER'S AND BRAIN AWARENESS MONTH

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I rise today to recognize June as Alzheimer's and Brain Awareness Month.

With more than 6 million Americans living with Alzheimer's and nearly 50 million people living with Alzheimer's and other dementias worldwide, it is important to raise awareness. The more we know about Alzheimer's, the more action we can inspire.

Alzheimer's is the sixth leading cause of death in the United States, and it is the only one of the top ten causes of death without any methods for preventing, curing, or slowing it down. Alzheimer's related deaths increased by 16 percent during the COVID-19 pandemic.

The diagnosis of Alzheimer's is not only devastating to those who are diagnosed, but also to their caregivers and loved ones. My own mom lived with Alzheimer's for 10 years. It stole her memories and finally stole her life.

In 2021, Alzheimer's care will cost our Nation \$355 billion, and by 2050, costs are expected to rise to more than \$1.1 trillion.

Currently, over 11 million Americans provide unpaid care to family and friends living with Alzheimer's and other dementias.

Mr. Speaker, the time to act is now. Let's join the fight. Let's take the pledge to raise awareness about Alzheimer's disease and to never stop searching for a cure.

URGENT NEED TO CURB METHANE EMISSIONS

(Ms. SCHAKOWSKY asked and was given permission to address the House for 1 minute.)

Ms. SCHAKOWSKY. Mr. Speaker, methane emissions are accelerating climate change and harming our communities, and we are moving in the wrong direction.

After the Trump administration repealed limitations on emissions of methane, we saw the largest yearly increase of methane emissions on record in 2020. We must get back on track.

It is urgent that we restore regulations to limit methane emissions. Methane is 80 times more potent than carbon dioxide. We cannot move quickly enough. We have to act now.

I urge my colleagues to vote "yes" on the legislation that we will be considering today, to curb these dangerous emissions and protect our communities.

NATIONAL POST-TRAUMATIC STRESS DISORDER AWARENESS DAY

(Mrs. MILLER-MEEKS asked and was given permission to address the

House for 1 minute and to revise and extend her remarks.)

Mrs. MILLER-MEEKS. Mr. Speaker, Sunday is National Post-Traumatic Stress Disorder Awareness Day, a day to bring attention to a disorder that affects countless of my fellow veterans.

PTSD is a disorder that tens of thousands of Americans are diagnosed with every year. Sadly, our veterans and Active Duty servicemembers are among those that face the toughest challenge.

As a 24-year Army veteran, and as a member of the House Veterans' Affairs Committee, I was proud to work together with my colleagues across the aisle in addressing PTSD by introducing two pieces of legislation to help veterans get the mental healthcare they both deserve and need. The Sgt. Ketchum Rural Veterans Mental Health Act will expand VA mental healthcare for veterans in rural areas. It passed the House last month and unanimously passed the Senate last night.

I am now proud to cosponsor the recently reintroduced Brandon Act, which will make it easier for veterans and servicemembers to seek confidential mental health resources.

We, as Members of Congress, have the ability to take action, and I urge all of my colleagues to support the mental health of our veterans and our servicemembers through passing the Brandon Act.

AMERICA SHOULD REDUCE DEPENDENCY ON CHINA

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, China, led by the Chinese Communist Party, has inflicted more damage and suffering on the world and even its own people than is even calculable.

Accountability for its action, or timely inactions, on the Wuhan virus is necessary. Transparency in how research labs conduct business is essential in holding those responsible that allowed the leak of extremely dangerous byproducts that have cost multitudes of lives and inflicted many trillions in economic harm upon the world.

The U.S. must zero out its dependence on China for so much of what we use and need in everyday life. We must produce our own pharmaceutical products, our own rare-earth products from our own mines, our own manufacturing.

We must prohibit the gain-of-function research that likely led to the Wuhan virus being unleashed on the world.

Overhaul the World Health Organization and our relationship with it.

Prohibit National Institutes of Health funding to those who don't have the United States and American peoples' best interests and wellness at heart.

Reimpose visa sanctions on China.

And, certainly, why give China a legitimate stage to the world via the Olympics?

The Olympics rightly should be rebid and moved in time for 2022 to countries that respect and revere human rights and right to basic freedoms from oppression. Otherwise, we give it all a green light and a tacit stamp of approval.

PROVIDING FOR CONGRESSIONAL DISAPPROVAL OF THE RULE SUBMITTED BY THE ENVIRONMENTAL PROTECTION AGENCY RELATING TO "OIL AND NATURAL GAS SECTOR: EMISSION STANDARDS FOR NEW, RECONSTRUCTED, AND MODIFIED SOURCES REVIEW"

Mr. PALLONE. Mr. Speaker, pursuant to House Resolution 486, I call up the joint resolution (S.J. Res. 14) providing for congressional disapproval under chapter 8 of title 5, United States Code, of the rule submitted by the Environmental Protection Agency relating to "Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources Review", and ask for its immediate consideration in the House.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Pursuant to House Resolution 486, the joint resolution is considered read.

The text of the joint resolution is as follows:

S.J. RES. 14

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That Congress disapproves the rule submitted by the Administrator of the Environmental Protection Agency relating to "Oil and Natural Gas Sector: Emission Standards for New, Reconstructed, and Modified Sources Review" (85 Fed. Reg. 57018 (September 14, 2020)), and such rule shall have no force or effect.

The SPEAKER pro tempore. The joint resolution shall be debatable for one hour, equally divided and controlled by the Chair and the ranking minority member of the Committee on Energy and Commerce or their respective designees.

The gentleman from New Jersey (Mr. PALLONE) and the gentlewoman from Washington (Mrs. RODGERS) each will control 30 minutes.

The Chair recognizes the gentleman from New Jersey.

GENERAL LEAVE

Mr. PALLONE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on S.J. Res. 14.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PALLONE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today, we are here to consider S.J. Res. 14, a joint resolution providing for congressional disapproval of the Environmental Protection Agency's 2020 methane rescission rule. This Trump EPA action removed direct Federal limits on methane pollution from new and modified oil and gas facilities, essentially increasing pollution and exacerbating the climate crisis.

While we are voting on the Senate version of this joint resolution today, I want to thank my colleagues, Representatives DEGETTE, PETERS, and LAMB, for leading this effort in the House. The House version of this resolution advanced out of the Energy and Commerce Committee earlier this month.

Mr. Speaker, methane is a potent climate-disrupting greenhouse gas that is responsible for approximately one-third of our warming and resulting climate disruption. Addressing methane is an urgent and essential step to mitigate climate change.

The greatest and most cost-effective way to curb methane pollution over the next decade is through the fossil fuel sector, which is the largest industrial source of methane emissions in the United States.

Under the Clean Air Act, the EPA has a responsibility and obligation to protect public health and welfare from dangerous climate pollution like methane. But because of the Trump rescission rule, there are now no clean air protections in place to curb dangerous methane pollution from the oil and gas sector.

What is more, the Trump rule created massive regulatory loopholes that shield the vast majority of climate pollution produced by the oil and gas industry from critical Federal standards for years to come.

The Trump action was a thinly veiled attempt to block regulation of the worst oil and gas industry actors at the expense of our health, our safety, and our planet; and it came at a time when we need these protections more than ever.

Mr. Speaker, without bold action to curb emissions from the hundreds of thousands of sources in the oil and gas sector, methane pollution will continue to cause significant harm to public health, threaten the stability of our economy, and compromise the well-being of future generations and the planet.

That is why this joint resolution disapproving of the rescission rule and reinstating the 2016 Obama-era methane standards is so important.

Ambitiously addressing methane can yield tremendous climate, public health, and financial benefits across the country. It is why we see an outpouring of support from business and consumer groups, State and Tribal officials, local government officials, outdoor recreation and tourism leaders, environmental and conservation groups, and health and faith leaders. We even have significant support from within the oil and gas industry itself.
