

along the coast are passionate about keeping our sparkling waters pristine and our beaches pure.

This year we had an untold number of kids that participated and showed up for the community cleanup. This impact was immeasurable. Seeing our youngsters, our students, and our children participate in environmental cleanups, we are setting ourselves up for success in the Lowcountry and our future by educating our kids who have a passion and love for the Lowcountry, who love our ecosystems, and want to keep them clean. We love seeing our students serving in their community.

RECOGNIZING THE THREAT OF EXTREME HEAT

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from New Jersey (Mrs. WATSON COLEMAN) for 5 minutes.

Mrs. WATSON COLEMAN. Mr. Speaker, I rise today to recognize the threat of extreme heat in the United States and applaud the action of President Biden in mobilizing an all-of-government effort to protect our vulnerable populations from this increasingly common disaster.

Climate change threatens everyone on this planet, and it will continue to do so for generations. While some regions will experience scorching droughts and wildfires, others will experience catastrophic hurricanes and flooding.

Environmental activist Wendell Berry said, "The world is not given by our fathers, but borrowed from our children." The consequences of our past and present decisions are creating a dismal and desolate future for our children and for our children's children.

Unfortunately, even if we rapidly reduce our carbon emissions today, our planet will continue to warm for some time.

Heat threatens the lives of children, the elderly, outdoor workers, and more, as prolonged exposure leads to health risks, such as heat cramps, heat stroke, and of course death.

This summer we experienced this new, hotter than normal heat across this country. In late June, the Pacific Northwest region experienced an abnormal heat wave that led to unprecedented numbers of deaths and hospitalization.

July was the Earth's hottest month on record.

In early August, over 80 million people across 20 States, from Washington to Florida, were under excessive heat warnings and advisories. Simultaneously, States along the East Coast experienced triple-digit heat indexes as a combination of heat and humidity created hazardous and deadly situations.

Most recently, following Hurricane Ida, 10 people died from heat in New Orleans after vulnerable residents lost power, and temperatures climbed to over 90 degrees.

Disadvantaged communities suffer the most from these frequent heat occurrences. Communities of color and low-income communities disproportionately experience higher temperatures than their White and wealthier counterparts.

Decades of discriminate urban planning, like reducing tree cover or increasing hard surfaces, have led to temperature disparities in our most vulnerable communities.

Moreover, in many of these communities residents struggle with significant preexisting and chronic illnesses, like heart disease, diabetes, and high blood pressure, which become fatal in extreme heat.

For some Americans, higher temperatures are not merely a nuisance, they can be deadly. I applaud President Biden's recent decision to address extreme heat.

From protecting outdoor workers by establishing OSHA standards to expanding cooling centers and cooling assistance amidst heat waves, President Biden's commitment to the health and safety of the American population is vital to ensure that fewer lives will be lost to increasing temperatures.

Earlier this year I was proud to introduce the SHADE Act, which aligns with the ambitious goals of President Biden's extreme heat initiatives and addresses the heat disparity experienced in disadvantaged communities. The SHADE Act would create a grant program to plant trees in formerly redlined districts and overburdened communities.

Thanks to the research of Dr. Jeremy Hoffman, Dr. Vivek Shandas, and Nicholas Pendleton, we now know that historical discriminatory housing policies have long-lasting consequences, making formerly redlined neighborhoods hotter than non-redlined neighborhoods.

Climate change is not a distant or slow moving threat. It is here now, and many Americans are battling the consequences of it alone. Too many are losing that battle.

While efforts to combat climate change must be a priority, we must also mitigate the impacts we are already facing. We must ensure that all Americans can adapt and can survive in this new normal.

RECOGNIZING AGNES MAY MEYER DRISCOLL

The SPEAKER pro tempore. The Chair recognizes the gentleman from Virginia (Mr. CLINE) for 5 minutes.

Mr. CLINE. Mr. Speaker, I rise today to recognize one of the greatest code breakers in American history, Agnes May Meyer Driscoll.

At the age of 29 Driscoll enlisted in the United States Navy in 1918 and was assigned to the code and signals section. While in this unit, she helped develop the machine called CM, later a standard enciphering device for the Navy in the 1920s.

She continued her work into World War II, where she was a vital part in breaking the Japanese Navy's JN-25b code, which gave Admiral Nimitz a crucial advantage at the Battle of Midway, a turning point in the war in the Pacific.

Nicknamed Miss Aggie and Madame X, Driscoll retired in 1959 at the age of 70. When she passed away in 1971, she was buried amongst fellow American heroes in Arlington National Cemetery.

Driscoll forever changed the field of cryptology and was rightfully inducted into the National Security Agency Hall of Honor in 2000.

It is a pleasure to recognize her service on behalf of the Colonel Thomas Hughart Chapter of the Daughters of the American Revolution and her great nephew, retired U.S. Navy Captain Victor Meyer, who resides in Staunton, Virginia.

Our country is immensely grateful for Miss Aggie's service.

WAKE UP, AMERICA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Wisconsin (Mr. GROTHMAN) for 5 minutes.

Mr. GROTHMAN. Mr. Speaker, I would like to address the most immediate, but still underpublicized, crisis facing America today.

No country can afford unlimited immigration.

In 2018, 830,000 people were sworn in as new citizens, as they spent years in America proving they were the moral citizens John Adams said were necessary to keep our Republic.

Now record numbers of unvetted immigrants, including, we believe, over 10,000 Haitians at the border, are flooding in our country. We have been processing over 200,000 immigrants at the border each of the last 2 months, many of which are turned around; but in July over 100,000 immigrants were let in. That is in comparison to 8,000 immigrants being let in a year earlier. It appears in August we will be at another 90,000 people coming in.

Because of the flood of refugees, the Border Patrol must do paperwork so that 224 miles of the Texan border is largely unguarded. People I talk to in Border Patrol believe that the official number of 31,000 got-aways is probably understated.

□ 1100

It is hard not to conclude that this is happening by design. Recently, the Biden administration extended temporary protective status, causing drug cartels to inform people all around the world that the border is open.

I should point out, by the way, when people talk about the Haitians, these are not people who are coming here from Haiti. These are Spanish-speaking people who already were in places like Chile, for example. They are not coming here because they have nowhere

else to go; they have somewhere else to go. They are coming here because they received a message from the Biden administration that we are not guarding our borders.

It is apparent they feel the over 800,000 legally vetted immigrants are not enough. It is kind of amazing.

I don't know where the press is in this. The press ought to wake up. Joe Biden and KAMALA HARRIS, other than her 1-day photo op, have largely ignored the border. Wouldn't you think they would be getting nothing but questions as far as what is going on, on the border? Why aren't you down there? Why aren't you seeing what is going on? This will destroy America. America must wake up.

Two weeks ago in the Education and Labor Committee, apparently in an effort to further increase illegal immigration, all 28 Democrats voted specifically to give Pell grants, which is free college, to illegal immigrants—it is unbelievable—while the middle-class families in America are forced to go tens of thousands of dollars in debt to get their college.

We are specifically saying that if you come here illegally, we will give you free college—unbelievable—in addition to promises of free healthcare. It is no wonder that so many people are flooding across our border.

By the way, I want to give our President something to think of. When we appear so weak at the border, I think it tells other countries around the world that we are weak, as well. I don't know what President wants to be known as the weak President, but you don't think that other countries like Iran, groups like the Taliban, Russia, are observing this and taking the measure of what Joe Biden is as he lets people flood across the border?

By the way, we are also finally at a point at which 90,000 Americans are dying every year of illegal drug overdoses. My local law enforcement, who have to deal with the families of the people who die largely because of fentanyl coming across the southern border, wonder why more isn't being done down there. But again, it seems to be, well, middle-class Americans dying of drug overdoses, that is not the priority. So we continue to allow floods coming across the border.

It has been well-publicized that illegal immigrants are coming into America with COVID and other diseases, further causing me to wonder about the sincerity of some of the things that President Biden has said.

I do wonder whether or not the vaccine mandates at the very time that tens of thousands of people are flooding across the border every month, and I do have to wonder about this bizarre bill on Friday, which is certainly going to get headlines as the majority of the House of Representatives votes to legalize abortion until birth, is it an effort to cause the press and even our supposedly conservative news outlets to avert their eyes from the border, as

they have to focus on vaccine mandates and 8½-month abortions?

In any event, I am calling on America to wake up. I realize there is not an election now, but you better make your voice heard, or we are going to lose the border.

RECOGNIZING JOYCE "CLARK" SCHRAM ON HER 90TH BIRTHDAY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Nebraska (Mr. BACON) for 5 minutes.

Mr. BACON. Mr. Speaker, I rise today to recognize one of our great constituents and a great friend of mine, Joyce "Clark" Schram, who celebrated her 90th birthday on June 24. Joyce grew up on a farm, raising cows for milk and butter and chickens for eggs.

To this day, Joyce remembers the winter day in 1936 that her father told them they had to give up their family farm. Joyce compares that day to a funeral. They loaded up and moved to a new farm near Council Bluffs owned by a wealthy man who knew nothing about farming. The Clark family lived on that farm for about 3 years until they moved to another farm east of Crescent, Iowa.

On December 7, 1941, Joyce remembers celebrating her Uncle Leonard's birthday when his father-in-law, who was listening to the radio, shouted from across the big dining room table: "We are at war." The room became silent. A few hours later, the family learned of the bombing of Pearl Harbor. Months after this, Joyce recalls occasionally hearing the air raid sirens from Omaha and how they had to turn off their lights in their houses until an all-clear signal was given.

Because her family had recently moved, Joyce had a 2-mile trek to her new school. She recalls her father making a path through the timber so she could complete the journey on her pony. Joyce's family moved once again to Council Bluffs, where she attended Thomas Jefferson High School and graduated in 1949. Although she graduated with a scholarship, she sacrificed going to college so that her family would not struggle financially.

Joyce then went to work at Omaha Standard Truck Body for a short time before working at an insurance company. In 1952, she quit and moved back to help out at her family's farm, which was devastated by a flood. After helping her parents for a month, Joyce was offered a job at Mutual of Omaha as a claims auditor. During this time, men were hired more than women, but many men were serving in the Korean war, and Joyce had the skills needed to fill this job role.

That fall, Joyce met her future husband, Conrad "Connie" Schram, shortly before he was deployed to Korea. When he returned a year later, he and Joyce began their courtship, married in 1955, and moved to a farm south of Valley, Nebraska.

In 1956, their son John was born, and in 1957, their daughter Kathleen was born but tragically passed a month later. In 1960, they had a son, but he also, sadly, died at birth. Despite their losses, Joyce and her husband had more children, twin boys, Tim and Tom, who are both friends, and daughter Mary.

Staying in the family business of farming, Joyce and her husband moved from a hill farm in Papillion, Nebraska, to the Hickey farm, which is on ground west of Joyce's house in the Platte River, Iowa, area. They lived there until 1976 when they built their house that Joyce lives in today.

Joyce's husband unexpectedly passed in 1980, leaving Joyce to raise four children. While her twin boys were away at college, her older son John took over the family farm. Joyce said that it was a miracle that the family was able to survive through these tough times after her husband's passing. Joyce credits her children, her sister, Evelyn, and brother-in-law, Norman, for keeping her strong through those tough months.

Joyce went back to school briefly before working for the Sarpy County Election Commission, where she has worked for 12 years to include as the Sarpy County Election Commissioner. In 1996, she was honored and selected as an electoral college member and has been active in the Republican Party for 35 years.

Joyce Schram has lived an eventful, blessed, and full life surrounded by her family and many friends who love and adore her. It should be noted that to this day, Sunday dinner prepared by Joyce has been a staple in her home as long as anyone can remember, and of course, everyone is welcome for dinner.

On behalf of the U.S. House of Representatives, we wish Joyce all the best and congratulate her as she celebrates 90 years of life.

BETTER EQUIPPING FIREFIGHTERS

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. VALADAO) for 5 minutes.

Mr. VALADAO. Mr. Speaker, last year, California set a record for the most acres burned in a single year, 4.1 million acres.

Already in 2021, devastating fires have burned through 1.6 million acres of our State. Hundreds, if not thousands, of residents are currently under evacuation orders, uncertain if they will have a home to return to once the orders are lifted.

With another heat wave on its way, fighting the flames will be even more challenging, and the risks are even greater.

Each year, California wildfires destroy our communities and put first responders and our firefighters in danger. As these men and women sacrifice their safety, it is imperative we provide firefighters with the latest and
