

There are serious water shortages in some regions of the country and the prospects that sustained water shortages due to regional growth and climate factors may make it necessary to develop alternative sources for water intended for human and agricultural uses.

If we can harness the technology to convert ocean water into fresh water the future of cities and rural communities that depend on water can be much brighter.

Amendment 190 requires a report to be submitted to Congress within 240 days following enactment on the risks posed by debris in low earth orbit and to make recommendations on remediation of risks and outline plans to reduce the incident of space debris.

Man-made objects in Earth's orbit that may no longer serve a useful function can include nonfunctional spacecraft, abandoned launch

vehicle stages, mission-related debris and fragmentation debris.

Space debris travels at speeds up to 17,500 miles per hour is fast enough for a small piece of man-made debris to damage to a satellite or a spacecraft.

There are 500,000 pieces of debris the size of a marble or larger.

There are many millions of pieces of debris that are so small they can't be tracked.

The Jackson Lee Amendment seeks a report from the Secretary of Defense on the risks posed by man-made space debris, solutions for reducing risks and strategies for reducing the incidence of more man-made space debris being introduced into space.

Amendment 193 condemns the actions of Boko Haram and directs that the Secretary of State, in consultation with the Secretary of Defense and the Attorney General, submit a report on efforts to combat Boko Haram.
