

Just last week, at COP 27, President Biden doubled down on this proposal and announced even more burdensome requirements on U.S. oil and gas sources. Meanwhile, Americans were pumping away their paychecks as prices for gas and home heating skyrocketed.

This administration needs to refocus its priorities by increasing domestic energy production, expediting pipeline permitting, and abandoning burdensome rulemakings that are harming American agriculture.

Let's face facts. America's farm families and consumers have struggled with fractured supply chains, skyrocketing input costs, and historic levels of inflation, economic woes exacerbated by congressional Democrats' excessive spending and the Biden administration's burdensome regulatory agenda. Under this administration, farm production expenses are up nearly \$80 billion, led by an 84 percent, or \$21 billion, increase in fertilizer expenses and a 65 percent increase in fuel expenses.

As the Biden administration's self-inflicted energy crisis surges into a diesel shortage, they continually pass the buck by blaming domestic energy producers.

Further, Biden's regulatory assault destroys any incentive for domestic energy producers to invest in energy infrastructure, which worsens energy market volatility and increases costs for vital farm inputs such as diesel fuel and fertilizer.

In October 2022, EIA reported the distillate fuel oil inventory at 106 million. This is the lowest stock since 2008; the lowest stock for this time of the year since 1982; and, in some regions, the lowest inventory since 1950.

Diesel fuel is used every day to power farm and ranch equipment and deliver goods to the marketplace. This Biden-inflicted diesel crisis further exacerbates record inflation, skyrocketing farm input costs, and consumer prices. The national average price for diesel fuel per gallon is \$5.36 a gallon, an increase of \$1.71, or 50 percent, from this time just last year.

By gambling away American energy and resource independence in the name of climate change, the Biden administration has harmed the very industry, U.S. agriculture, that contributes to 13 percent of the annual greenhouse gas sequestration.

Just this past summer, President Biden went to the Saudis and begged OPEC+ to increase production. Instead of relying on our adversaries and asking them to produce more, we should be focused on the responsible development of America's own abundant natural resources.

Mr. Speaker, Republicans have solutions focused on reversing industry-crushing regulations and market signals, unleashing production of crude oil, streamlining permitting and environmental review processes, and restoring refining capacity.

We must reverse this self-inflicted crisis and unleash our domestic energy production.

DELIVERING STUDENT DEBT RELIEF

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Missouri (Ms. BUSH) for 5 minutes.

Ms. BUSH. Mr. Speaker, St. Louis and I rise today in full support of President Biden's student debt relief plan in the face of Republican efforts to block economic relief for millions of people.

The \$1.9 trillion student debt crisis has cost people more than just money. It has stripped countless people of the opportunity to start a family, buy a home, start a business, or further their education.

My office has been collecting heart-breaking stories from constituents across Missouri's First District about how student debt relief would impact their lives for the better. Here are some of their stories.

Michelle H. writes: "The ongoing gloom and constant worry of student loan debt will lessen significantly. Even if some of the debt I have accumulated through student loans was forgiven, my entire quality of life will drastically increase, and my mental health would also increase. This would be absolutely life-changing."

Amy V. notes: "We will be able to buy a house, my first mortgage. This will allow me to pay off other bills and increase my credit score. I cannot afford the monthly payment of over \$900 per month."

Alison M. writes: "I have been swimming in debt since I graduated college with a degree and a job. At one point, I couldn't even afford to move out of my parents' because my student loans were over \$1,000. Sallie Mae ruined my credit score, and now that I finally have somewhat of a stable income. If this debt relief comes through, I can actually see a light at the end of still a long tunnel. But, before, I never even thought there was such a light."

These are just three of the 43 million borrowers who are depending on transformative student debt relief measures that will change their lives forever.

I share my own personal story of my journey grappling with immense student loan debt. As a single mom of two, working an hourly job that made less than \$10 an hour, even after working there for 10 years, I struggled to provide for my family and myself. I knew I needed a change, a career change, but that meant I would need to go back to school and that I would ultimately incur student debt.

I thought that once I graduated and got a steady job, I would be able to pay it back quickly. So, I enrolled in nursing school, took out loans, and a few years later, I was a registered nurse.

□ 1030

For the most part, everything went as I expected, and it wasn't until I was

faced with that first payment that I realized just how astronomical this debt burden became. Even with a job that paid more money than I had ever made before, it still felt impossible to be able to pay it off.

Ultimately, I was able to pay off my student loans, but it took years. During those years I struggled to pay these loans, I faced multiple eviction notices and was evicted, had difficulty feeding my two babies and affording childcare as I worked long and odd hours as a nurse. It was hard, and at times it felt impossible. I would have welcomed debt relief, and it is why I am pushing so hard to remove that economic burden for current and future generations.

Education should be affordable, equitable, and accessible to absolutely everyone. It should lead to prosperity and opportunity, not debt.

I share these stories with you, my colleagues, and implore us all to continue supporting the Biden administration in backing down the dark money and right-wing attacks on student debt relief and to continue standing with borrowers by extending the payment pause beyond December 31st and using every single legal authority to deliver student debt relief. We have a responsibility and an obligation to cancel student debt now.

WORLD FOOD PROGRAMME AND KANSAS FOOD AID LEGACY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Kansas (Mr. MANN) for 5 minutes.

Mr. MANN. Mr. Speaker, I rise today to thank the American farmer and to deliver the 15th installment of my farm bill impact series.

The United States is the most food-secure country in the world thanks to the strength and determination of American farmers, ranchers, and agriculture producers. With America's robust resources, we have been committed to ensuring food security at home and around the world, and Kansas has been on the cutting edge of that effort for nearly a century.

In September of 1953, Peter O'Brien, a farmer from Cheyenne County, Kansas, stood up at his local county farm bureau meeting to share an idea. He wanted to use Kansas grain to help hungry people around the world. Over the next several months, today's Food for Peace program was crafted. The following year, one of Kansas' favorite sons, President Dwight D. Eisenhower, signed parts of the program into law. That was the beginning of what is now a longstanding Kansas tradition of commitment, care, and leadership in the international effort to address global hunger.

Two weeks ago, I hosted David Beasley, the executive director of the World Food Programme, in Kansas for an event to thank the American farmer. Executive Director Beasley had just been in Egypt, Ethiopia, and Rome, but he came to Kansas because he understands the impact that farmers in my

State have had on international food aid. American farmers use their resources to feed, fuel, and clothe the world, which is no small task. It takes grit, determination, and a strong partnership between the public and private sectors. The World Food Programme won the Nobel Peace Prize in 2020, and it is the world's largest humanitarian organization specializing in using American-grown commodities for international food assistance. It is a great example of what we can accomplish when public-private partnerships thrive.

Now, with the 2023 reauthorization of the farm bill upon us, we see that the Kansas legacy of international food aid is alive and well. Today, our country administers in-kind food assistance primarily through farm bill programs, such as the Bill Emerson Humanitarian Trust and the McGovern-Dole Food for Education Program, just to name two. These programs have an especially strong return on investment because they support American agriculture producers today while greatly reducing the need for conflict or war-related dollars tomorrow. In the long run, these programs save the American taxpayer money. We know that when food rations are accessible in developing countries, conflict decreases. International food aid is, therefore, a way to stop wars before they start.

I have the privilege and responsibility of advocating for Kansas' top priorities in the farm bill. That means protecting crop insurance, promoting trade, and ensuring that any oversight within the bill doesn't needlessly handcuff American producers with red tape. Congress must also ensure that international food aid programs remain strong in the farm bill. Around the world today, hungry people facing starvation in emergency situations rely on American farmers, who have provided nutrition in the place of starvation, created careers of dignity in the place of aimlessness, and secured peace in the place of war.

I will be back on the floor soon to deliver another installment of my farm bill impact series and highlight more programs and titles within the bill that I believe Congress must understand and support to ensure that agriculture thrives in America. The people who feed, fuel, and clothe us all deserve our unwavering support.

RECOGNIZING CHIEF MASTER SERGEANT JOHN JONES

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from New York (Ms. TENNEY) for 5 minutes.

Ms. TENNEY. Mr. Speaker, I rise today to recognize Chief Master Sergeant John Jones of Utica, New York, who retired in October of this year after nearly 30 years of full-time service in the Air National Guard.

Chief Master Sergeant John A. Jones entered the Air Force in August of 1993, serving in ever-increasing positions of

responsibility over the next 29 years, culminating in his most recent position as superintendent of the 174th Maintenance Operations Flight at Hancock Field Air National Guard Base in Syracuse, New York.

Chief Jones started his career at Dover Air Force Base in Delaware as an airlift aircraft maintenance specialist, where he maintained the C-5 Galaxy. He accumulated hundreds of flying hours in both peacetime and combat missions.

He transitioned to the 174th Fighter Wing of the New York Air National Guard in 1997, serving 9 years as an attack controls systems specialist and electronic integrated systems specialist. In those roles, he maintained critical electronic systems of the F-16 Fighting Falcon.

In 2006, Chief Jones moved to the Maintenance Group Quality Assurance office as the avionics inspector, eventually serving as the chief inspector and superintendent.

Chief Jones deployed multiple times to the European and Middle Eastern theaters of operation in service of our country to support Operations Deliberate Force, Southern Watch, Noble Eagle, and Enduring Freedom.

Chief Jones was also instrumental in the modernization of New York's Air National Guard fleet, including playing a pivotal role overseeing the aircraft conversion from the F-16 Fighting Falcon to the MQ-9 Reaper.

I have come to personally know Chief Jones through his dedicated work as the New York Wing commander of the Civil Air Patrol, a program I care deeply about and have consistently supported as a Member of Congress and also as a member of the New York State Assembly. My son, Trey, who is a graduate of the U.S. Naval Academy and a Marine officer, was once a young man in the Civil Air Patrol's cadet program.

I saw firsthand how Civil Air Patrol's educational program and leadership training lit a spark within him that played a role in propelling him to serve our Nation. CAP continues to do the same for young men and women across our country.

I had the opportunity recently to explore just how the Civil Air Patrol's New York Wing conducts disaster relief missions when I joined Chief Jones and his cadets for a training session in Rome, New York. I saw young cadets experience their first flights and was able to ride in a Civil Air Patrol plane myself.

Thank you to Chief Jones for his experience as well as decades of service to our community and our Nation. I wish him the very best in retirement, and I am confident he will continue to find ways to give back to our region and continue to empower and inspire leaders of the next generation.

SUPPORTING DELPHI SALARIED RETIREES

Ms. TENNEY. Mr. Speaker, I rise today to call upon the Senate to quickly pass the Susan Muffley Act, which

you may remember passed this body earlier this year with strong bipartisan support.

Under the Obama administration, the Delphi salaried retirees had their pension benefits slashed, while unionized hourly workers received their full benefits. This was an injustice to the Delphi salaried retirees that must be remedied, and it was the fault of the Pension Benefit Guaranty Corporation, a Federal program.

The Susan Muffley Act, led by Congressman DAN KILDEE and Congressman MIKE TURNER, would fully restore the Delphi salaried retirees' full pension benefits with backpay.

I was honored to support this legislation when it passed the House of Representatives in July. Thank you to all of my colleagues across the aisle and everyone who recognized this grave injustice and supported these hardworking people who deserve these benefits restored.

Now, the Senate must pass this legislation before it expires at the end of this year. The Delphi group has been fighting for almost 15 years to correct this wrong, and it would be a travesty if they lost this battle.

That is why I am calling on Senate leadership and all the Senators to bring the Susan Muffley Act to the floor, to support it, and to include it in their end-of-year work this legislative session. Together, we can make the Delphi employees whole and can right this wrong and this terrible injustice to these hardworking Americans who just did their job and paid into their own pension system and were not able to receive the benefits that were the fruits of their labor.

REMEMBERING DEPUTY JAMES LEE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. WEBER) for 5 minutes.

Mr. WEBER of Texas. Mr. Speaker, I rise today to remember the life of Jefferson County Sheriff's Officer Deputy James Lee, who tragically passed away on July 9, leaving behind a legacy of service to Jefferson County.

Deputy Lee was a marine who started with the Jefferson County Sheriff's Office in 1973 and was 71 years old when he passed away.

He was known as someone who enjoyed going to work to protect his community, who was tough but always showed compassion.

He leaves behind a wife and son, who will follow in his father's footsteps at the sheriff's office. Though he may be gone, I know that Deputy Lee is still watching over his beloved community and family.

Please join me in recognizing the extraordinary life and service of Deputy James Lee.

HONORING PAT HALLISEY

Mr. WEBER of Texas. Mr. Speaker, I rise today to honor the retirement of a local leader and dedicated public servant who I am proud to call a friend, the
