solving clause and insert the part printed in italic and with an amendment to strike the preamble and insert the part printed in italic, as follows:

Whereas, in 2020, an estimated 155,000,000 people experienced crisis levels of food insecurity (Integrated Food Security Phase Classification phase 3 or above), with nearly 100,000,000 people living in environments where conflict was the main driver of hunger, and the COVID-19 pandemic has exacerbated rising levels of global food insecurity;

Whereas conflict acutely impacts vulnerable populations such as women and children, persons with disabilities, refugees, and internally displaced persons;

Whereas the impacts of conflict on food security can be direct, such as displacement from land, destruction of livestock grazing areas and fishing grounds, or destruction of food stocks and agricultural assets, or indirect, such as disruptions to food systems, leading to increased food prices or decreased household purchasing power, or decreased access to supplies that are necessary for food production and preparation, including agricultural inputs, water, and fuel;

Whereas conflict disrupts the distribution and buying and selling of food within a food system, including by creating shortages in production, increasing real and perceived risks for travel and transport, enabling the formation of illegal distribution channels and markets, and contributing to the breakdown of a government's ability to enforce regulations or perform its judiciary functions;

Whereas aerial bombing campaigns targeting agricultural heartlands, and the use of scorched earth methods of warfare, landmines, and other explosive devices have direct impacts on the ability of vulnerable populations to feed themselves;

Whereas effective humanitarian response in conflict, including in response to the threat of conflict-induced famine and food insecurity, requires respect for international humanitarian law by all parties to such conflict, and allowing and facilitating the rapid and unimpeded movement of humanitarian relief to all those in need;

Whereas efforts to restrict humanitarian aid and the operational integrity and impartiality of humanitarian aid works and distribution efforts, including through the imposition of blockades, security impediments, or irregular bureaucratic requirements, are another means by which combatants employ starvation and food deprivation as a weapon of war; and

Whereas the United States Government has multiple tools to fight global hunger, protect lifesaving assistance, and promote the prevention of conflict, including through the Global Fragility Act of 2019 (title V of division J of Public Law 116-94), the Global Food Security Act of 2016 (Public Law 114-195), and the Agriculture Improvement Act of 2018 (Public Law 115-334), and has the potential to hold accountable those using hunger as a weapon of war through the Global Magnitsky Human Rights Accountability Act (subtitle F of title XII of Public Law 114-328): Now, therefore, be it

Resolved,
That the Senate—

CHIPS ACT

Mr. PORTMAN. Mr. President, I come to the Senate floor today to correct the record, really. Some of my colleagues in the Chamber voted yesterday to begin consideration of this chips package that we have talked about a lot because they believed it included legislation called Safeguarding American Innovation Act, or SAIA, the bipartisan, Senate-passed, White-House supported, essential legislation to protect taxpayer-funded research and intellectual property from being taken, stolen, by China and other adversaries and then used against us.

It is understandable people thought that because the SAIA research security provisions were in the broader USICA bill that passed the Senate last year. In fact, as the coauthors of USICA know, it was the reason I was one of the then-original Republican cosponsors of USICA and only because of that. At that time, we needed Republican cosponsors. And it is understandable because, this week, all Republican offices were emailed a list of items by the lead Republican on this bill which included chips-plus legislation, including SAIA.

So Republicans, when they voted yesterday, thought SAIA was part of it. Even today, Democrats and Republicans alike have come up to me and said they thought SAIA was in this bill.

By the way, they want it in this bill, but it is not. It was stripped out of this USICA. I filed an amendment to get it back into this package because it is so crucial to the goal of the overall effort, which is, of course, to improve our country's competitiveness, especially with regard to China. To do that, we must not only invest in more American research and innovation, which I support, but we have to protect that taxpayer-funded research and intellectual property from being stolen by our adversaries and used against us.

Given the current realities, without such protections, I believe this chips-plus bill, with significantly increased levels of Federal funding for research, may well become a giveaway to Beijing.

China's made no secret of its goal to supplant the United States as the global economic leader, and China has been willing to use every tool at its disposal to be able to do that. As FBI Director Christopher Wray has warned:

The greatest long-term threat to our nation's information and intellectual property, and to our economic vitality, is the counterintelligence and economic espionage threat from China.
