#### STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PADILLA (for himself, Ms. WARREN, and Mr. WYDEN):

S. 4727. A bill to establish a grant program to incentivize the energy resilience of air carrier airports to acquire or install solar photovoltaic panels, battery storage systems, microgrids, and related electric infrastructure for on-site renewable energy generation and storage, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. PADILLA. Mr. President, I rise to speak in support of the Airport Energy Resiliency and Renewable Energy Act, which I introduced today.

While some airports are already using renewable energy systems to enhance the energy efficiency of their power sources, our Nation's airports still have incredible opportunities to lower emissions and improve energy resiliency by further investing in renewable energy sources and energy storage solutions.

For example, commercial solar panels are bigger and more efficient than residential ones and can generate substantially more power without presenting a threat to aviation operations.

Furthermore, battery storage and microgrids would allow energy to be stored and used later during peak demand, when it is most needed. In the event of a power disruption or outage as a result of a natural disaster or other emergency, deploying solar generation coupled with battery storage would allow airports to power essential facilities using renewable resources instead of generators, which often run on fossil fuels.
