(2) it is therefore essential to the safety of the United States and the people of the United States to ensure that the United States Government makes every effort to prevent sensitive personal data from falling into the hands of malign foreign actors; and

(3) because allies of the United States face similar challenges, in implementing this Act, the United States Government should explore the establishment of a shared zone of mutual trust with respect to sensitive personal data.

SEC. _____. SENSE OF CONGRESS ON THE EXPIRATION OF THE UNITED STATES-CHINA AGREEMENT ON COOPERATION IN SCIENCE AND TECHNOLOGY.

(a) FINDINGS.—Congress finds the following:

(1) In 1979, the United States and the People's Republic of China signed the Agreement Between the Government of the United States of America and the Government of the People's Republic of China on Cooperation in Science and Technology, signed at Washington (referred to in this section as the ''Agreement'').

(2) The purpose of the Agreement is to promote greater collaboration on civilian research in the fields of agriculture, energy, space, health, environment, earth sciences, engineering, and other such areas of science and technology.

(3) In line with a drive to achieve self-sufficiency across a variety of sectors for national security purposes, including agriculture, health, and environmental technologies, the Communist Party of China has sponsored or allowed widespread predatory economic practices, such as intellectual property theft and forced technology transfer, in all such sectors.

(4) Such predatory economic practices lead to significant costs for United States businesses and the innovation ecosystem of the United States.

(5) In 2019, the Federal Bureau of Investigation estimated that the cost of theft of trade secrets, counterfeit goods, and pirated software could be as much as $600,000,000 per year.

(6) Intellectual property theft and forced technology transfer severely undermine the value of the Agreement and hurting the national security and economic interests of the United States.

(7) The Communist Party of China actively practices a policy of military-civil fusion, which was first documented as a guiding principle for the Communist Party of China in 2007.

(8) According to the Department of State, the goal of military-civil fusion is to ''eliminate barriers between China's civilian research and commercial sectors, and its military and defense industrial sectors... to develop the People's Liberation Army into a world class military by 2049''.

(9) The Agreement has been renewed several times and is set to expire on August 27, 2023, unless the President takes action to renew it.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) due to the standing policy of military-civilian fusion of the Communist Party of China and the history of anticompetitive economic practices of the People's Republic of China, collaborative research conducted under the Agreement could be used—

(A) to support the modernization of the People's Liberation Army; and

(B) through the theft of technology, trade secrets, and other economic information, to exploit economic advantages of the United States; and

(2) allowing the Agreement to expire on August 27, 2023, is a step toward protecting intellectual property and strengthening the national security of the United States.

SA 586. Mr. SCOTT of South Carolina submitted an amendment intended to be proposed by him to the bill S. 2226, to authorize appropriations for fiscal year 2024 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for

At the appropriate place in subtitle D of title XII, insert the following:

SEC. _____. REPORT ON VISA VETTING FOR STUDENTS FROM SEVEN SONS OF NATIONAL DEFENSE UNIVERSITIES AND OTHER ACADEMIC INSTITUTIONS OF THE PEOPLE'S REPUBLIC OF CHINA.

(2) The Federal Bureau of Investigation estimates that the annual cost to the United States economy of counterfeit goods, pirated software, and theft of trade secrets is between $225,000,000,000 and $600,000,000,000.

(3) The Government of the People's Republic of China recruits students, mostly postgraduate students and postdoctoral researchers studying science, technology, engineering, and mathematics, as collectors of intellectual property to benefit academic institutions, businesses, and defense industries in the People's Republic of China.

(4) The students or graduates of the universities may visit the United States on an exchange program or for postgraduate education and then return to the People's Republic of China to contribute to the military modernization of the country.

(5) In 2022, four Chinese nationals were indicted by the Department of Justice for participation in an intelligence campaign aimed to convert United States citizens into agents of the People's Republic of China.

(6) The four Chinese nationals operated through an academic institute at Ocean University of China, one of the academic institutes identified by the Department of Defense in accordance with section 1286(c)(8) of the John S. McCain National Defense Authorization Act of 2019 (Public Law 115–232; 10 U.S.C. 2358 note).

(7) The Seven Sons of National Defense are the 7 top-ranked universities administered by Ministry of Industry and Information Technology of the People's Republic of China.

(8) The primary purpose of the universities, commonly referred to as ''military academies'', is to support defense research and development and the defense industrial base of the People's Republic of China.

(9) Approximately 75 percent of the graduates of such universities are recruited by state defense industries of the People's Republic of China.

(b) REPORT.—Not more than 180 days after the date of the enactment of this Act, the Secretary of State, in consultation with the Secretary of Homeland Security, shall submit to the appropriate congressional committees a report that includes—

(3) a confirmation of the number of visas approved and the number of visas denied by the Department of State for students from the People's Republic of China in science, technology, engineering, and mathematics fields, including the number of such students who are pursuing an advanced degree or repeating a degree in such fields.

SEC. _____. INVESTING IN CURES BEFORE MISSILES ACT OF 2023.

(a) SHORT TITLE.—This section may be cited as the ''Investing in Cures Before Missiles Act of 2023'' or the ''ICBM Act''.

(b) FINDINGS.—Congress finds the following:

(1) According to the Congressional Budget Office, the projected cost to sustain and modernize the United States nuclear arsenal, as of 2017, ''is $1.2 trillion in 2017 dollars over the 2017–2046 period: more than $800 billion to operate and sustain (that is, incrementally upgrade) nuclear forces and about $400 billion to modernize them''. With inflation, the cost rises to $1,700,000,000,000 and does not include the cost of the additional nuclear capabilities proposed in the 2018 Nuclear Posture Review.

(2) The Government Accountability Office found in July 2020 that the Department of Defense and the National Nuclear Security Administration have still not taken meaningful steps to address affordability concerns or heeded the Government Accountability Office's recommendation to consider ''deferring the start of or cancelling specific modernization programs'', including the W87–1 warhead modification program, to address increases in the weapons activities budget requests of the National Nuclear Security Administration.

(3) The LGM-35A Sentinel weapon system (formerly known as the Ground Based Strategic Deterrent) is expected to cost between $93,100,000,000 and $95,800,000,000, which does not include the cost of the W87–1 warhead modification program or the cost to produce new plutonium pits for the warhead. The total estimated life cycle cost of the LGM-35A Sentinel weapon system is $264,000,000,000, and the program is intended to replace 400 deployed Minuteman III missiles with more than 600 new missiles, to allow for test flights and spares.

(4) The Air Force awarded a sole-source contract to Northrop Grumman for the engineering and manufacturing component of the LGM-35A Sentinel weapon system in September 2020, raising concerns that the absence of competition for the award may result in higher than projected costs to United States taxpayers.

(5) The National Nuclear Security Administration is also in the early stages of developing a replacement intercontinental ballistic missile warhead, the W87–1, and expanding plutonium pit production to build new warhead cores, costing at least $12,000,000,000 and $9,000,000,000, respectively, to meet the modernization needs of the LGM-35A Sentinel weapon system.

(6) Maintaining and updating the current Minuteman III missiles is possible for multiple decades and, according to the Congressional Budget Office, through 2036, this would cost $37,000,000,000 less in 2017 dollars than developing and deploying the LGM-35A Sentinel weapon system. The Congressional Budget Office estimates that between 2021 and 2030, the United States has budgeted $82,000,000,000 for intercontinental ballistic missiles.

(7) A public opinion poll conducted from October 12 to 28, 2020, by ReThink Media and the Federation of American Scientists found that only 26 percent of registered voters in the United States preferred replacing the Minuteman III intercontinental ballistic missile with the LGM-35A Sentinel weapon system, as compared to 60 percent of registered voters who opposed replacing the Minuteman III missile.

(8) On April 3, 2019, Lieutenant General Richard M. Clark, then-Air Force Deputy Chief of Staff for Strategic Deterrence and Nuclear Integration, noted in testimony before the Committee on Armed Services of the House of Representatives that we have ''one more opportunity'' to conduct life extension on the Minuteman III intercontinental ballistic missile, indicating the technical feasibility of extending the Minuteman III missile despite his stated preference for the LGM-35A Sentinel weapon system.

(9) Even in the absence of an intercontinental ballistic missile leg of the triad, the 2018 Nuclear Posture Review signaled that the United States would have an assured retaliatory capability in the form of several ballistic missile submarines, which are, ''at present, virtually undetectable, and there are no known, near-term credible threats to

the survivability of the [ballistic missile submarine] force'', a benefit that will be enhanced as the Department of Defense moves to replace the Ohio class ballistic submarine fleet with the new Columbia class ballistic missile fleet.

(10) While intercontinental ballistic missiles had historically been the most responsive leg of the United States nuclear triad, advances in ballistic missile submarine communications to allow for the dissemination of emergency action messages in wartime have negated that advantage.

(11) Intercontinental ballistic missiles cannot be recalled, leaving decision makers with mere minutes to decide whether to launch the missiles before they are destroyed, known as a posture of ''launch on warning'' or ''launch under attack'' in the face of a perceived nuclear attack, greatly increasing the risk of a national leader initiating a nuclear war by mistake.

(12) In 1983, Stanislav Petrov, a former lieutenant colonel of the Soviet Air Defense Forces correctly identified a false warning in an early warning system that showed several United States incoming nuclear missiles, preventing Soviet leaders from launching a retaliatory response, earning Colonel Petrov the nickname ''the man who saved the world''.

(13) Former Secretary of Defense William Perry, who once briefed President Bill Clinton on a suspected Russian first nuclear strike, wrote that the ground-based leg of the nuclear triad is ''destabilizing because it invites an attack'' and intercontinental ballistic missiles are ''some of the most dangerous weapons in the world'' and ''could even trigger an accidental nuclear war''.

(14) General James Cartwright, former vice chair of the Joint Chiefs of Staff and former Commander of the United States Strategic Command, wrote, with Secretary Perry, ''[T]he greatest danger is not a Russian bolt but a US blunder—that we might accidentally stumble into nuclear war. As we make decisions about which weapons to buy, we should use this simple rule: If a nuclear weapon increases the risk of accidental war and is not needed to deter an intentional attack, we should not build it. . . . Certain nuclear weapons, such as . . . the [intercontinental ballistic missile], carry higher risks of accidental war that, fortunately, we no longer need to bear. We are safer without these expensive weapons, and it would be foolish to replace them.''.

(15) General George Lee Butler, the former Commander-in-Chief of the Strategic Air Command and subsequently Commander-in-Chief of the United States Strategic Command, said, ''I would have removed land-based missiles from our arsenal a long time ago. I'd be happy to put that mission on the submarines. So, with a significant fraction of bombers having a nuclear weapons capability that can be restored to alert very quickly, and with even a small component of Trident submarines—with all those missiles and all those warheads on patrol—it's hard to imagine we couldn't get by.''.

(16) While a sudden ''bolt from the blue'' first strike from a near-peer nuclear adversary is a highly unlikely scenario, extending the Minuteman III would maintain the purported role of the intercontinental ballistic missile leg of the triad to absorb such an attack.

(c) STATEMENT OF POLICY ON EXTENSION OF LIFESPAN OF MINUTEMAN III AND DEVELOPING A VACCINE OF MASS PREVENTION.—It is the policy of the United States that—

(1) the operational life of the Minuteman III missiles can be safely extended until at least 2050; and

(2) investments in developing a universal coronavirus vaccine and efforts to save lives from other types of infectious diseases are a better use of United States taxpayer resources than building a new and unnecessary intercontinental ballistic missile.

(d) AVAILABILITY OF FUNDS FOR VACCINES INSTEAD OF MISSILES.—

(1) TRANSFER FROM DEPARTMENT OF DEFENSE.—Of the unobligated balances of appropriations made available for the Department of Defense for the research, development, test, and evaluation of the LGM-35A Sentinel weapon system, the Secretary of Defense shall transfer $1,000,000,000 to the National Institute of Allergy and Infectious Diseases to conduct or support comprehensive research for the development of a universal coronavirus vaccine.

(2) TRANSFER FROM NATIONAL NUCLEAR SECURITY ADMINISTRATION.—The Secretary of Energy shall transfer all unobligated balances of appropriations made available for the National Nuclear Security Administration for the W87–1 warhead modification program to the Centers for Disease Control and Prevention to research and combat emerging and zoonotic infectious diseases.

(e) PROHIBITION ON USE OF FUNDS FOR LGM-35A SENTINEL WEAPON SYSTEM AND W87–1 WARHEAD MODIFICATION PROGRAM.—None of the funds authorized to be appropriated or otherwise made available for fiscal year 2024 may be obligated or expended for the LGM-35A Sentinel weapon system or the W87–1 warhead modification program.

(f) INDEPENDENT STUDY ON EXTENSION OF MINUTEMAN III INTERCONTINENTAL BALLISTIC MISSILES.—

(1) INDEPENDENT STUDY.—Not later than 30 days after the date of the enactment of this Act, the Secretary of Defense shall seek to enter into a contract with the National Academy of Sciences to conduct a study on extending the life of Minuteman III intercontinental ballistic missiles to 2050.

(2) MATTERS INCLUDED.—The study under paragraph (1) shall include the following:

(A) A comparison of the costs through 2050 of—

(i) extending the life of Minuteman III intercontinental ballistic missiles; and

(ii) deploying the LGM-35A Sentinel weapon system.

(B) An analysis of opportunities to incorporate technologies into the Minuteman III intercontinental ballistic missile program as part of a service life extension program that could also be incorporated in the future LGM-35A Sentinel weapon system, including, at a minimum, opportunities to increase the resilience against adversary missile defenses.

(C) An analysis of the benefits and risks of incorporating sensors and nondestructive testing methods and technologies to reduce destructive testing requirements and increase the service life and number of Minuteman III missiles through 2050.

(D) An analysis and validation of the methods used to estimate the operational service life of Minuteman II and Minuteman III motors, taking into account the test and launch experience of motors retired after the operational service life of such motors in the rocket systems launch program.

(E) An analysis of the risks and benefits of alternative methods of estimating the operational service life of Minuteman III motors, such as those methods based on fundamental physical and chemical processes and nondestructive measurements of individual motor properties.

(F) An analysis of risks, benefits, and costs of configuring a Trident II D5 submarine launched ballistic missile for deployment in a Minuteman III silo.

(G) An analysis of the impacts of the estimated service life of the Minuteman III force associated with decreasing the deployed intercontinental ballistic missiles delivery vehicle force from 400 to 300.

(H) An assessment on the degree to which the Columbia class ballistic missile submarines will possess features that will enhance the current invulnerability of ballistic missile submarines of the United States to future antisubmarine warfare threats.

(I) An analysis of the degree to which an extension of the Minuteman III would impact the decision of Russian Federation to target intercontinental ballistic missiles of the United States in a crisis, as compared to proceeding with the LGM-35A Sentinel weapon system.

(J) A best case estimate of what percentage of the strategic forces of the United States would survive a counterforce strike from the Russian Federation, broken down by intercontinental ballistic missiles, ballistic missile submarines, and heavy bomber aircraft.

(K) The benefits, risks, and costs of relying on the W–78 warhead for either the Minuteman III or a new LGM-35A Sentinel weapon system missile as compared to proceeding with the W–87 life extension.

(L) The benefits, risks, and costs of adding additional launchers or uploading submarine-launched ballistic missiles with additional warheads to compensate for a reduced deployment of intercontinental ballistic missiles of the United States.

(3) SUBMISSION TO DEPARTMENT OF DEFENSE.—Not later than 180 days after the date of the enactment of this Act, the National Academy of Sciences shall submit to the Secretary a report containing the study conducted under paragraph (1).

(4) SUBMISSION TO CONGRESS.—Not later than 210 days after the date of the enactment of this Act, the Secretary shall transmit to the appropriate congressional committees the report required by paragraph (3), without change.

(5) FORM.—The report required by paragraph (3) shall be submitted in unclassified form, but may include a classified annex.

(4) It is estimated that 30 percent of public safety officers develop behavioral health conditions at some point in their lifetimes, including depression and post-traumatic stress disorder, in comparison to 20 percent of the general population that develops such conditions.

(5) Victims of post-traumatic stress disorder and acute stress disorder are at a higher risk of dying by suicide.

(6) Firefighters have been reported to have higher suicide attempt and ideation rates than the general population.

(7) It is estimated that between 125 and 300 police officers die by suicide every year.

(8) In 2019, pursuant to section 2(b) of the Law Enforcement Mental Health and Wellness Act of 2017 (Public Law 115–113; 131 Stat. 2276), the Director of the Office of Community Oriented Policing Services of the Department of Justice developed a report (referred to in this section as the ''LEMHWA report'') that expressed that many law enforcement agencies do not have the capacity or local access to the mental health professionals necessary for treating their law enforcement officers.

(9) The LEMHWA report recommended methods for establishing remote access or regional mental health check programs at the State or Federal level.

(10) Individual police and fire departments generally do not have the resources to employ full-time mental health experts who are able to treat public safety officers with state-of-the-art techniques for the purpose of treating job-related post-traumatic stress disorder and acute stress disorder.

(b) PROGRAMMING FOR POST-TRAUMATIC STRESS DISORDER.—

(1) DEFINITIONS.—In this subsection:

(A) not fewer than 1 proposed program, if the Attorney General determines it appropriate and feasible to do so, to be administered by the Department of Justice for making state-of-the-art treatments or preventative care available to public safety officers and public safety telecommunicators with regard to job-related post-traumatic stress disorder or acute stress disorder by providing public safety officers and public safety telecommunicators access to evidence-based trauma-informed care, peer support, counselor services, and family supports for the purpose of treating or preventing post-traumatic stress disorder or acute stress disorder;

(B) a draft of any necessary grant conditions required to ensure that confidentiality is afforded to public safety officers on account of seeking the care or services described in subparagraph (A) under the proposed program;

SEC. 1083. PREVENTING CHILD SEX ABUSE.

(a) SHORT TITLE.—This section may be cited as the ''Preventing Child Sex Abuse Act of 2023''.

(b) SENSE OF CONGRESS.—The sense of Congress is the following:

(1) The safety of children should be a top priority for public officials and communities in the United States.

(2) According to the Rape, Abuse & Incest National Network, an individual in the United States is sexually assaulted every 68 seconds. And every 9 minutes, that victim is a child. Meanwhile, only 25 out of every 1,000 perpetrators will end up in prison.

(3) The effects of child sexual abuse can be long-lasting and affect the victim's mental health.

(4) Victims are more likely than non-victims to experience the following mental health challenges:

(A) Victims are about 4 times more likely to develop symptoms of drug abuse.

(B) Victims are about 4 times more likely to experience post-traumatic stress disorder as adults.

(C) Victims are about 3 times more likely to experience a major depressive episode as adults.

(5) The criminal justice system should and has acted as an important line of defense to protect children and hold perpetrators accountable.

(6) However, the horrific crimes perpetuated by Larry Nassar demonstrate firsthand the loopholes that still exist in the criminal justice system. While Larry Nassar was found guilty of several State-level offenses, he was not charged federally for his illicit sexual contact with minors, despite crossing State and international borders to commit this conduct.

(7) The Department of Justice has also identified a growing trend of Americans who use charitable or missionary work in a foreign country as a cover for sexual abuse of children.

(8) It is the intent of Congress to prohibit Americans from engaging in sexual abuse or exploitation of minors under the guise of work, including volunteer work, with an organization that affects interstate or foreign commerce, such as an international charity.

(9) Federal law does not require that an abuser's intention to engage in sexual abuse be a primary, significant, dominant, or motivating purpose of the travel.

(10) Child sexual abuse does not require physical contact between the abuser and the child. This is especially true as perpetrators turn increasingly to internet platforms, online chat rooms, and webcams to commit child sexual abuse.

(11) However, a decision of the United States Court of Appeals for the Seventh Circuit found the use of a webcam to engage in sexually provocative activity with a minor did not qualify as ''sexual activity''.

(12) Congress can address this issue by amending the definition of the term ''sexual activity'' to clarify that it does not require interpersonal, physical contact.

(13) It is the duty of Congress to provide clearer guidance to ensure that those who commit crimes against children are prosecuted to the fullest extent of the law.

(c) INTERSTATE CHILD SEXUAL ABUSE.—Section 2423 of title 18, United States Code, is amended—

(1) in subsection (b), by striking ''with a motivating purpose of engaging in any illicit sexual conduct with another person'' and inserting ''with intent to engage in any illicit sexual conduct with another person'';

(2) by redesignating subsections (d), (e), (f), and (g) as subsections (e), (f), (g), and (i), respectively;

(3) in subsection (e), as so redesignated, by striking ''with a motivating purpose of engaging in any illicit sexual conduct'' and inserting ''with intent to engage in any illicit sexual conduct''; and

(4) by inserting after subsection (g), as so redesignated, the following:

''(h) RULE OF CONSTRUCTION.—As used in this section, the term 'intent' shall be construed as any intention to engage in illicit sexual conduct at the time of the travel.''.

(d) ABUSE UNDER THE GUISE OF CHARITY.—Section 2423 of title 18, United States Code, as amended by subsection (c) of this section, is amended—

(1) by inserting after subsection (c) the following:

''(d) ILLICIT SEXUAL CONDUCT IN CONNECTION WITH CERTAIN ORGANIZATIONS.—Any citizen of the United States or alien admitted for permanent residence who—

''(1) is an officer, director, employee, or agent of an organization that affects interstate or foreign commerce;

''(2) makes use of the mails or any means or instrumentality of interstate or foreign commerce through the connection or affiliation of the person with such organization; and

''(3) commits an act in furtherance of illicit sexual conduct through the connection or affiliation of the person with such organization, shall be fined under this title, imprisoned for not more than 30 years, or both.'';

(2) in subsection (f), as so redesignated, by striking ''or (d)'' and inserting ''(d), or (e)''; and

(3) in subsection (i), as so redesignated, by striking ''(f)(2)'' and inserting ''(g)(2)''.

(e) SEXUAL ACTIVITY WITH MINORS.—Section 2427 of title 18, United States Code, is amended by inserting ''does not require interpersonal physical contact, and'' before ''includes''.

TITLE XLV—KEWEENAW BAY INDIAN COMMUNITY LAND CLAIMS SETTLEMENT

SEC. 6501. FINDINGS.

Congress finds that—

(1) the Keweenaw Bay Indian Community is a federally recognized Indian Tribe residing on the L'Anse Indian Reservation in Baraga County in the Upper Peninsula of the State of Michigan;

(2) the Community is a successor in interest to the Treaty with the Chippewa Indians of the Mississippi and Lake Superior, made and concluded at La Pointe of Lake Superior October 4, 1842 (7 Stat. 591) (referred to in this section as the ''1842 Treaty''), which, among other things, guaranteed the usufructuary rights of the Community over a large area of land that was ceded to the United States, until such time that those usufructuary rights were properly and legally extinguished;

(3) the Community is also a successor in interest to the Treaty with the Chippewa Indians of Lake Superior and the Mississippi, made and concluded at La Pointe September 30, 1854 (10 Stat. 1109) (referred to in this section as the ''1854 Treaty'');

(4) article 2, paragraph 1 of the 1854 Treaty created the L'Anse Indian Reservation as a permanent reservation;

(5) pursuant to article 13 of the 1854 Treaty, the 1854 Treaty became ''obligatory on the contracting parties'' when ratified by the President and the Senate on January 10, 1855;

(6) in 1850, Congress enacted the Act of September 28, 1850 (commonly known and referred to in this section as the ''Swamp Land Act'') (9 Stat. 519, chapter 84), which authorized the State of Arkansas and other States, including the State of Michigan, to ''construct the necessary levees and drains to reclaim'' certain unsold ''swamp and overflowed lands, made unfit thereby for cultivation'' and stating that those lands ''shall remain unsold at the passage of this act . . .'';

(7) following enactment of the Swamp Land Act, the State claimed thousands of acres of swamp land in the State pursuant to that Act;

(8) between 1893 and 1937, the General Land Office patented 2,743 acres of land to the State that were located within the exterior boundaries of the Reservation (referred to in this section as ''Reservation Swamp Lands'');

(9) the right of the Community to use and occupy the unsold land within the Reservation had not been extinguished when the United States patented the Reservation Swamp Lands to the State;

(10) in 1852, Congress enacted the Act of August 26, 1852 (10 Stat. 35, chapter 92) (referred to in this section as the ''Canal Land Act''), to facilitate the building of the Sault Ste. Marie Canal at the Falls of the St. Mary's River, to connect Lake Superior to Lake Huron;

(11) pursuant to the Canal Land Act, the United States granted the State the right to select 750,000 acres of unsold public land within the State to defray the cost of construction of the Sault Ste. Marie Canal;

(12) the State identified and selected, among other land, a minimum of 1,333.25 and up to 2,720 acres within the exterior boundaries of the Reservation (referred to in this section as the ''Reservation Canal Lands'');

(13) the Department of the Interior approved the land selections of the State, including the Reservation Canal Lands, after ratification of the 1854 Treaty;

(14) the Secretary noted that the approval described in paragraph (13) was ''subject to any valid interfering rights'';

(15) the 1854 Treaty set apart from the public domain all unsold land within the Reservation to the Community as of September 30, 1854, which preceded the date on which the State established legally effective title to the Reservation Canal Lands;

(16) the Community made claims to the Department of the Interior with respect to the Reservation Swamp Lands and the Reservation Canal Lands, providing legal analysis and ethnohistorical support for those claims;

(17) in December 2021, the Department of the Interior stated that ''We have carefully reviewed pertinent documents, including the Tribe's expert reports, and have determined that the Tribe's claims to the Swamp Lands and Canal Lands have merit'';

(18) the United States, through the actions of the General Land Office, deprived the Community of the exclusive use and occupancy of the Reservation Swamp Lands and the Reservation Canal Lands within the Reservation, without just compensation as required under the Takings Clause of the Fifth Amendment to the Constitution of the United States;

(19) the loss of the Reservation Swamp Lands and the Reservation Canal Lands without just compensation has—

(A) impacted the exercise by the Community of cultural, religious, and subsistence rights on the land;

(B) caused a harmful disconnect between the Community and its land;

(C) impacted the ability of the Community to fully exercise its economy within the Reservation; and

(D) had a negative economic impact on the development of the economy of the Community;

(20) certain non-Indian individuals, entities, and local governments occupy land within the boundaries of the Reservation—

(A) acquired ownership interests in the Reservation Swamp Lands and the Reservation Canal Lands in good faith; and

(B) have an interest in possessing clear title to that land;

(21) this title allows the United States—

(A) to secure a fair and equitable settlement of past inequities suffered by the Community as a result of the actions of the United States that caused the taking of the Reservation Swamp Lands and the Reservation Canal Lands without just compensation; and

(B) to ensure protection of the ownership of the Reservation Swamp Lands and the Reservation Canal Lands by non-Indian occupants of the Reservation, through the settlement of the claims of the Community to that land, and through that action, the relief of any clouds on title;

(22) a settlement will allow the Community to receive just compensation and the local landowners to obtain clear title to land, without long and protracted litigation that would be both costly and detrimental to all involved; and

(23) this title achieves both justice for the Community and security for current landowners through a restorative and nonconfrontational process.

DIVISION _____—VIEQUES RECOVERY AND REDEVELOPMENT

SEC. _____01. SHORT TITLE.

This division may be cited as the ''Vieques Recovery and Redevelopment Act''.

SEC. _____02. FINDINGS.

The Congress finds the following:

(1) Vieques is an island municipality of Puerto Rico, measuring approximately 21 miles long by 4 miles wide, and located approximately 8 miles east of the main island of Puerto Rico.

(2) Prior to Hurricane Maria, residents of Vieques were served by an urgent medical care facility, the Susana Centeno Family Health Center, and residents had to travel off-island to obtain medical services, including most types of emergency care because the facility did not have the basic use of x-ray machines, CT machines, EKG machines, ultrasounds, or PET scans.

(3) The predominant means of transporting passengers and goods between Vieques and the main island of Puerto Rico is by ferry boat service, and over the years, the efficiency of this service has frequently been disrupted, unreliable, and difficult for cancer patients to endure to receive treatment. Each trip to Ceiba, Puerto Rico, for the cancer patient is an additional out-of-pocket expense ranging from $120 to $200.

(4) The United States Military maintained a presence on the eastern and western portions of Vieques for close to 60 years, and used parts of the island as a training range during those years, dropping over 80 million tons of ordnance and other weaponry available to the United States military since World War II.

(5) The unintended, unknown, and unavoidable consequences of these exercises were to expose Americans living on the islands to the residue of that weaponry which includes heavy metals and many other chemicals now known to harm human health.

(6) According to Government and independent documentation, the island of Vieques has high levels of heavy metals and has been exposed to chemical weapons and toxic chemicals. Since the military activity in Vieques, island residents have suffered from the health impacts from long-term exposure to environmental contamination as a result of 62 years of military operations, and have experienced higher rates of certain diseases among residents, including cancer, cirrhosis, hypertension, diabetes, heavy metal diseases, along with many unnamed and uncategorized illnesses. These toxic residues have caused the American residents of Vieques to develop illnesses due to ongoing exposure.

(7) In 2017, Vieques was hit by Hurricane Maria, an unusually destructive storm that devastated Puerto Rico and intensified the existing humanitarian crisis on the island by destroying existing medical facilities.

(8) The medical systems in place prior to Hurricane Maria were unable to properly handle the health crisis that existed due to the toxic residue left on the island by the military's activities.

(9) After Maria, the medical facility was closed due to damage and continues to be unable to perform even the few basic services that it did provide. Vieques needs a medical facility that can treat and address the critical and urgent need to get life-saving medical services to its residents. Due to legal restrictions, the Federal Emergency Management Agency (in this division referred to as ''FEMA'') is unable to provide a hospital where its capabilities exceed the abilities of the facility that existed prior to Maria; therefore Vieques needs assistance to build a facility to manage the vast health needs of its residents.

(10) Every American has benefitted from the sacrifices of those Americans who have lived and are living on Vieques and it is our intent to acknowledge that sacrifice and to treat those Americans with the same respect and appreciation that other Americans enjoy.

(11) In 2012, the residents of Vieques were denied the ability to address their needs in Court due to sovereign immunity, Sanchez v. United States, No. 3:09–cv–01260–DRD (D.P.R.). However, the United States Court of Appeals for the First Circuit referred the issue to Congress and urged it to address the humanitarian crisis. This bill attempts to satisfy that request such that Americans living on Vieques have a remedy for the suffering they have endured.

(ii) the number of principal aliens provided special immigrant visas under this section during the given fiscal year.

(C) MAXIMUM NUMBER OF VISAS.—The total number of aliens who may be provided special immigrant visas under this section shall not exceed 10,000.

(D) DURATION OF AUTHORITY.—The authority to issue visas under this section shall—

(5) OTHER ELIGIBILITY FOR IMMIGRANT STATUS.—No alien shall be denied the opportunity to apply for admission under this section, or an amendment made by this section, solely because the alien qualifies as an immediate relative or is eligible for any other immigrant classification.

(6) RESETTLEMENT SUPPORT.—A citizen or national of Afghanistan who is admitted to the United States as a special immigrant under this section or an amendment made by this section shall be eligible for resettlement assistance, entitlement programs, and other benefits available to refugees admitted under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157) to the same extent, and for the same periods of time, as such refugees.

SEC. 1097. SUPPORT FOR ALLIES SEEKING RESETTLEMENT IN THE UNITED STATES.

Notwithstanding any other provision of law, during Operation Allies Welcome, Enduring Welcome, and any successor operation, the Secretary of Homeland Security and the Secretary of State may waive any fee or surcharge or exempt individuals from the payment of any fee or surcharge collected by the Department of Homeland Security and the Department of State, respectively, in connection with a petition or application for, or issuance of, an immigrant visa to a national of Afghanistan under section 201(b)(2)(A)(i) or 203(a) of the Immigration and Nationality Act, 8 U.S.C. 1101(b)(2)(A)(i) and 1153(a), respectively.

SEC. 1098. PAROLE REFORM.

(a) IN GENERAL.—Section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)) is amended to read as follows:

''(5)(A) Except as provided in subparagraphs (B) and (C) and section 214(f), the Secretary of Homeland Security, in the discretion of the Secretary, may temporarily parole into the United States any alien applying for admission to the United States who is not present in the United States, under such conditions as the Secretary may prescribe, on a case-by-case basis, and not according to eligibility criteria describing an entire class of potential parole recipients, for urgent humanitarian reasons or significant public benefit. Parole granted under this subparagraph may not be regarded as an admission of the alien. When the purposes of such parole have been served in the opinion of the Secretary, the alien shall immediately return or be returned to the custody from which the alien was paroled. After such return, the case of the alien shall be dealt with in the same manner as the case of any other applicant for admission to the United States.

''(B) The Secretary of Homeland Security may grant parole to any alien who—

''(i) is present in the United States without lawful immigration status;

''(ii) is the beneficiary of an approved petition under section 203(a);

''(iii) is not otherwise inadmissible or removable; and

''(iv) is the spouse or child of a member of the Armed Forces serving on active duty.

''(C) The Secretary of Homeland Security may grant parole to any alien—

''(i) who is a national of the Republic of Cuba and is living in the Republic of Cuba;

''(ii) who is the beneficiary of an approved petition under section 203(a);

''(iii) for whom an immigrant visa is not immediately available;

''(iv) who meets all eligibility requirements for an immigrant visa;

''(v) who is not otherwise inadmissible; and

''(vi) who is receiving a grant of parole in furtherance of the commitment of the United States to the minimum level of annual legal migration of Cuban nationals to the United States specified in the U.S.–Cuba Joint Communiqué on Migration, done at New York September 9, 1994, and reaffirmed in the Cuba-United States: Joint Statement on Normalization of Migration, Building on the Agreement of September 9, 1994, done at New York May 2, 1995.

''(D) For purposes of determining an alien's eligibility for parole under subparagraph (A), an urgent humanitarian reason shall be limited to circumstances in which the alien establishes that—

''(i)(I) the alien has a medical emergency; and

''(II)(aa) the alien cannot obtain necessary treatment in the foreign state in which the alien is residing; or

''(bb) the medical emergency is life-threatening and there is insufficient time for the alien to be admitted through the normal visa process;

''(ii) the alien is the parent or legal guardian of an alien described in clause (i) and the alien described in clause (i) is a minor;

''(iii) the alien is needed in the United States in order to donate an organ or other tissue for transplant and there is insufficient time for the alien to be admitted through the normal visa process;

''(iv) the alien has a close family member in the United States whose death is imminent and the alien could not arrive in the United States in time to see such family member alive if the alien were to be admitted through the normal visa process;

''(v) the alien is seeking to attend the funeral of a close family member and the alien could not arrive in the United States in time to attend such funeral if the alien were to be admitted through the normal visa process;

''(vi) the alien is an adopted child with an urgent medical condition who is in the legal custody of the petitioner for a final adoption-related visa and whose medical treatment is required before the expected award of a final adoption-related visa; or

''(vii) the alien is a lawful applicant for adjustment of status under section 245 and is returning to the United States after temporary travel abroad.

''(E) For purposes of determining an alien's eligibility for parole under subparagraph (A), a significant public benefit may be determined to result from the parole of an alien only if—

''(i) the alien has assisted (or will assist, whether knowingly or not) the United States Government in a law enforcement matter;

''(ii) the alien's presence is required by the Government in furtherance of such law enforcement matter; and

''(iii) the alien is inadmissible, does not satisfy the eligibility requirements for admission as a nonimmigrant, or there is insufficient time for the alien to be admitted through the normal visa process.

''(F) For purposes of determining an alien's eligibility for parole under subparagraph (A), the term 'case-by-case basis' means that the facts in each individual case are considered and parole is not granted based on membership in a defined class of aliens to be granted parole. The fact that aliens are considered for or granted parole one-by-one and not as a group is not sufficient to establish that the parole decision is made on a 'case-by-case basis'.

''(G) The Secretary of Homeland Security may not use the parole authority under this paragraph to parole an alien into the United States for any reason or purpose other than those described in subparagraphs (B), (C), (D), and (E).

''(H) An alien granted parole may not accept employment, except that an alien granted parole pursuant to subparagraph (B) or (C) is authorized to accept employment for the duration of the parole, as evidenced by an employment authorization document issued by the Secretary of Homeland Security.

''(I) Parole granted after a departure from the United States shall not be regarded as an admission of the alien. An alien granted parole, whether as an initial grant of parole or parole upon reentry into the United States, is not eligible to adjust status to lawful permanent residence or for any other immigration benefit if the immigration status the alien had at the time of departure did not authorize the alien to adjust status or to be eligible for such benefit.

''(J)(i) Except as provided in clauses (ii) and (iii), parole shall be granted to an alien under this paragraph for the shorter of—

''(I) a period of sufficient length to accomplish the activity described in subparagraph (D) or (E) for which the alien was granted parole; or

''(II) 1 year.

''(ii) Grants of parole pursuant to subparagraph (A) may be extended once, in the discretion of the Secretary, for an additional period that is the shorter of—

''(I) the period that is necessary to accomplish the activity described in subparagraph (D) or (E) for which the alien was granted parole; or

''(II) 1 year.

''(iii) Aliens who have a pending application to adjust status to permanent residence under section 245 may request extensions of parole under this paragraph, in 1-year increments, until the application for adjustment has been adjudicated. Such parole shall terminate immediately upon the denial of such adjustment application.

''(K) Not later than 90 days after the last day of each fiscal year, the Secretary of Homeland Security shall submit to the Committee on the Judiciary of the Senate and the Committee on the Judiciary of the House of Representatives and make available to the public, a report—

''(i) identifying the total number of aliens paroled into the United States under this paragraph during the previous fiscal year; and

''(ii) containing information and data regarding all aliens paroled during such fiscal year, including—

''(I) the duration of parole;

''(II) the type of parole; and

''(III) the current status of the aliens so paroled.''.

(b) IMPLEMENTATION.—

(1) IN GENERAL.—Except as provided in paragraph (2), this section and the amendments made by this section shall take effect on the date that is 30 days after the date of the enactment of this Act.

(2) EXCEPTIONS.—Notwithstanding paragraph (1)—

(A) any application for parole or advance parole filed by an alien before the date of the enactment of this Act shall be adjudicated under the law that was in effect on the date on which the application was properly filed and any approved advance parole shall remain valid under the law that was in effect on the date on which the advance parole was approved;

(B) section 212(d)(5)(I) of the Immigration and Nationality Act, as added by subsection (a), shall take effect on the date of the enactment of this Act; and

(C) aliens who were paroled into the United States pursuant to section 212(d)(5)(A) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)(A)) before January 1, 2023, shall continue to be subject to the terms of parole that were in effect on the date on which their respective parole was approved.

(c) CAUSE OF ACTION.—Any person, State, or local government that experiences financial harm in excess of $1,000 due to a failure of the Federal Government to lawfully apply the provisions of this section or the amendments made by this section shall have standing to bring a civil action against the Federal Government in an appropriate district court of the United States.

DIVISION F—GLOBAL RESPECT ACT OF 2023

SEC. 6001. SHORT TITLE.

This division may be cited as the ''Global Respect Act of 2023''.

SEC. 6002. FINDINGS.

Congress makes the following findings:

(1) The dignity, freedom, and equality of all human beings are fundamental to a thriving global community.

(2) An alarming trend of violence directed at lesbian, gay, bisexual, transgender, and intersex (commonly referred to as ''LGBTI'') individuals around the world continues.

(3) Approximately ⅓ of all countries have laws criminalizing consensual same-sex relations, and many have enacted policies or laws that would further target LGBTI individuals.

(4) Every year, thousands of individuals around the world are targeted for harassment, attack, arrest, and murder on the basis of their sexual orientation or gender identity.

(5) Those who commit crimes against LGBTI individuals often do so with impunity, and are not held accountable for their crimes.

(6) In many instances, police, prison, military, and civilian government authorities have been directly complicit in abuses aimed at LGBTI citizens, including arbitrary arrest, torture, and sexual abuse.

(7) Laws criminalizing consensual same-sex relations severely hinder access to HIV/AIDS treatment, information, and preventive measures for LGBTI individuals and families.

(8) Many countries are making positive developments in the protection of the basic human rights of LGBTI individuals.

SEC. 6003. DEFINITIONS.

SEC. _____. PROTECTING AND ENHANCING PUBLIC ACCESS TO CODES.

(a) FINDINGS.—Congress finds the following:

(1) Congress, the executive branch, and State and local governments have long recognized that the people of the United States benefit greatly from the work of private standards development organizations with expertise in highly specialized areas.

(2) The organizations described in paragraph (1) create technical standards and voluntary consensus standards through a process requiring openness, balance, consensus, and due process to ensure all interested parties have an opportunity to participate in standards development.

(3) The standards that result from the process described in paragraph (2) are used by private industry, academia, the Federal Government, and State and local governments that incorporate those standards by reference into laws and regulations.

(4) The standards described in paragraph (3) further innovation, commerce, and public safety, all without cost to governments or taxpayers because standards development organizations fund the process described in paragraph (2) through the sale and licensing of their standards.

(5) Congress and the executive branch have repeatedly declared that, wherever possible, governments should rely on voluntary consensus standards and have set forth policies and procedures by which those standards are incorporated by reference into laws and regulations and that balance the interests of access with protection for copyright.

(6) Circular A-119 of the Office of Management and Budget entitled ''Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity Assessment Activities'', issued in revised form on January 27, 2016, recognizes the benefits of voluntary consensus standards and incorporation by reference, stating that ''[i]f a standard is used and published in an agency document, your agency must observe and protect the rights of the copyright holder and meet any other similar obligations.''.

(7) Federal agencies have relied extensively on the incorporation by reference system to leverage the value of technical standards and voluntary consensus standards for the benefit of the public, resulting in more than 23,000 sections in the Code of Federal Regulations that incorporate by reference technical and voluntary consensus standards.

(8) State and local governments have also recognized that technical standards and voluntary consensus standards are critical to

protecting public health and safety, which has resulted in many such governments—

(A) incorporating those standards by reference into their laws and regulations; or

(B) entering into license agreements with standards development organizations to use the standards created by those organizations.

(9) Standards development organizations rely on copyright protection to generate the revenues necessary to fund the voluntary consensus process and to continue creating and updating these important standards.

(10) The people of the United States have a strong interest in—

(A) ensuring that standards development organizations continue to utilize a voluntary consensus process—

(i) in which all interested parties can participate; and

(ii) that continues to create and update standards in a timely manner to—

(I) account for technological advances;

(II) address new threats to public health and safety; and

(III) improve the usefulness of those standards; and

(B) the provision of access that allows people to read technical and voluntary consensus standards that are incorporated by reference into laws and regulations.

(11) As of the date of enactment of this Act, many standards development organizations make their standards available to the public free of charge online in a manner that does not substantially disrupt the ability of those organizations to earn revenue from the industries and professionals that purchase copies and subscription-access to those standards (such as through read-only access), which ensures that the public may read the current, accurate version of such a standard without significantly interfering with the revenue model that has long supported those organizations and their creation of, and investment in, new standards.

(12) Through this section, and the amendments made by this section, Congress intends to balance the goals of furthering the creation of standards and ensuring public access to standards that are incorporated by reference into law or regulation.

(b) WORKS INCORPORATED BY REFERENCE INTO LAW.—

(1) IN GENERAL.—Chapter 1 of title 17, United States Code, is amended by adding at the end the following:

''(5) PUBLICLY ACCESSIBLE ONLINE.—

''(A) IN GENERAL.—The term 'publicly accessible online', with respect to material, means that the material is displayed for review in a readily accessible manner on a public website.

''(B) RULE OF CONSTRUCTION.—If a user is required to create an account or agree to the terms of service of a website or organization in order to access material online, that requirement shall not be construed to render the material not publicly accessible online for the purposes of subparagraph (A), if there is no monetary cost to the user to access that material.

''(b) STANDARDS INCORPORATED BY REFERENCE INTO LAW OR REGULATION.—A standard to which copyright protection subsists under section 102(a) at the time of its fixation shall retain such protection, notwithstanding that the standard is incorporated by reference, if the applicable standards development organization, within a reasonable period of time after obtaining actual or constructive notice that the standard has been incorporated by reference, makes all portions of the standard so incorporated publicly accessible online at no monetary cost.

''(c) BURDEN OF PROOF.—In any proceeding in which a party asserts that a standards development organization has failed to comply with the requirements under subsection (b) for retaining copyright protection with respect to a standard, the burden of proof shall be on the party making that assertion to prove that the standards development organization has failed to comply with those requirements.''.

Subtitle B—Improving Digital Identity Act of 2023

SEC. 6031. SHORT TITLE.

This Act may be cited as the ''Improving Digital Identity Act of 2023''.

SEC. 6032. FINDINGS.

Congress finds the following:

(1) The lack of an easy, affordable, reliable, and secure way for organizations, businesses, and government agencies to identify whether an individual is who they claim to be online creates an attack vector that is widely exploited by adversaries in cyberspace and precludes many high-value transactions from being available online.

(2) Incidents of identity theft and identity fraud continue to rise in the United States, where more than 293,000,000 people were impacted by data breaches in 2021.

(3) Since 2017, losses resulting from identity fraud have increased by 333 percent, and, in 2020, those losses totaled $56,000,000,000.

(4) The Director of the Financial Crimes Enforcement Network of the Department of the Treasury has stated that the abuse of personally identifiable information and other building blocks of identity is a key enabler behind much of the fraud and cybercrime affecting the United States today.

(5) The inadequacy of current digital identity solutions degrades security and privacy for all people in the United States, and next generation solutions are needed that improve security, privacy, equity, and accessibility.

(6) Government entities, as authoritative issuers of identity in the United States, are uniquely positioned to deliver critical components that address deficiencies in the digital identity infrastructure of the United States and augment private sector digital identity and authentication solutions.

(7) State governments are particularly well-suited to play a role in enhancing digital identity solutions used by both the public and private sectors, given the role of State governments as the issuers of driver's licenses and other identity documents commonly used today.

(8) The public and private sectors should collaborate to deliver solutions that promote confidence, privacy, choice, equity, accessibility, and innovation. The private sector drives much of the innovation around digital identity in the United States and has an important role to play in delivering digital identity solutions.

(9) The bipartisan Commission on Enhancing National Cybersecurity has called for the Federal Government to ''create an interagency task force directed to find secure, user-friendly, privacy-centric ways in which agencies can serve as 1 authoritative source to validate identity attributes in the broader identity market. This action would enable Government agencies and the private sector to drive significant risk out of new account openings and other high-risk, high-value online services, and it would help all citizens more easily and securely engage in transactions online.''.

(10) It should be the policy of the Federal Government to use the authorities and capabilities of the Federal Government, in coordination with State, local, Tribal, and territorial partners and private sector innovators, to enhance the security, reliability, privacy, equity, accessibility, and convenience of consent-based digital identity solutions that support and protect transactions between individuals, government entities, and businesses, and that enable people in the United States to prove who they are online.

SEC. 1083. CONDUCT OF WINTER SEASON RECONNAISSANCE OF ATMOSPHERIC RIVERS IN THE WESTERN UNITED STATES.

(a) FINDINGS.—Congress finds the following:

(1) Every year, storms threaten lives and property and cause significant disruptions to travel and commerce.

(2) During the cool season from October through April, the western United States and other regions around the United States are significantly impacted by atmospheric rivers.

(3) For key regions across the western United States, 70 to 90 percent of days on which the National Weather Service issued either watches, warnings, or advisories for any hazard type were associated with landfalling atmospheric rivers.

(4) Atmospheric rivers are relatively long, narrow regions in the atmosphere, below 10,000 feet, that behave like rivers of water vapor pushed along by strong winds. Outside the tropics, atmospheric rivers are responsible for more than 90 percent of the horizontal movement of water vapor. Atmospheric rivers shift locations following large-scale weather patterns, carrying an amount of water vapor on average equivalent to roughly 15 to 25 times the average flow of water at the mouth of the Mississippi River.

(5) Precipitation and flooding in the western United States from high-impact storms are largely controlled by characteristics of land-falling atmospheric rivers, accounting for up to 50 percent of annual precipitation and more than 90 percent of major flood events.

(6) Conducting atmospheric river reconnaissance during the winter season in the United States significantly enhances storm observations and improves forecasts of storm landfall and intensity.

(7) The National Winter Season Operations Plan, the goal of which is to improve the accuracy and timeliness of severe winter season storm forecasting and warning services provided by the National Oceanic and Atmospheric Administration, the Air Force, and the Navy, coordinates Federal efforts to provide enhanced weather observations of extreme winter season storms that impact the United States and calls for atmospheric river reconnaissance to be conducted annually off the West Coast of the United States.

(8) The National Winter Season Operations Plan coordinates requirements for winter season reconnaissance observations provided by the 53rd Weather Reconnaissance Squadron of the Air Force Reserve Command and the Aircraft Operations Center of the National Oceanic and Atmospheric Administration.

(9) The 2021 report of the Science Advisory Board of the National Oceanic and Atmospheric Administration entitled, ''Priorities for Weather Research'' recommended that the Federal Government, ''Leverage and expand atmospheric river (AR) observations to improve flood and drought prediction and to enable forecast-informed reservoir operations. Water and emergency managers often cope with too much or too little water and require better information on storms that produce extreme precipitation. However, precipitation prediction skill has not improved substantially in the last 20 years. The multi-agency, OSTP-led Earth System Prediction Roadmap (2020) identified expanded research, observations and communication needed to better anticipate and mitigate water cycle extremes and their cascading impacts, including atmospheric river type storms.''.

(b) CONDUCT OF RECONNAISSANCE.—

(1) IN GENERAL.—Subject to the availability of appropriations, the 53rd Weather Reconnaissance Squadron of the Air Force Reserve Command and the National Oceanic and Atmospheric Administration shall provide aircraft, personnel, and equipment necessary to meet the mission requirements for winter season atmospheric river reconnaissance in the western United States annually from November 1 through March 31.

(2) ACTIVITIES.—In carrying out paragraph (1), the 53rd Weather Reconnaissance Squadron of the Air Force Reserve Command, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, shall—

(A) improve the accuracy and timeliness of atmospheric river forecasts and warning services in the western United States;

(B) collect data in sensitive oceanic regions where conventional, upper-air observations are lacking and satellites are unable to effectively resolve the position and vertical structure of an atmospheric river and of other nearby essential atmospheric structures offshore;

(C) support water management decisions and flood forecasting through the execution of targeted airborne dropsonde and buoy observations over the eastern, central, and western north Pacific Ocean to improve forecasts of the landfall and impacts of atmospheric rivers for civil authorities and military decision makers;

(D) participate in the research and operations partnership that guides flight planning and uses research methods to improve and expand the capabilities and effectiveness of atmospheric river reconnaissance over time; and

(E) undertake such other additional activities as the 53rd Weather Reconnaissance Squadron considers appropriate to further the atmospheric river reconnaissance mission.

(c) REPORTS.—

(1) AIR FORCE.—

(A) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Secretary of the Air Force, in consultation with the Administrator of the National Oceanic and Atmospheric Administration, shall submit to the appropriate committees of Congress a comprehensive report on the resources necessary for the 53rd Weather Reconnaissance Squadron of the Air Force Reserve Command to continue to support, through December 31, 2035—

(i) the National Hurricane Operations Plan;

(ii) the National Winter Season Operations Plan; and

(iii) any other operational requirements relating to weather reconnaissance, to include annual support from November 1 through March 31 for atmospheric river reconnaissance in the western United States.

(B) APPROPRIATE COMMITTEES OF CONGRESS.—In this paragraph, the term ''appropriate committees of Congress'' means—

(i) the Committee on Armed Services of the Senate;

(ii) the Subcommittee on Defense of the Committee on Appropriations of the Senate;

(iii) the Committee on Armed Services of the House of Representatives; and

(iv) the Subcommittee on Defense of the Committee on Appropriations of the House of Representatives.

(2) COMMERCE.—Not later than 90 days after the date of the enactment of this Act, the Secretary of Commerce shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science, Space, and Technology of the House of Representatives a comprehensive report on the resources necessary for the National Oceanic and Atmospheric Administration to continue to support, through December 31, 2035—

(A) the National Hurricane Operations Plan;

(B) the National Winter Season Operations Plan; and

(C) any other operational requirements relating to weather reconnaissance, to include annual support from November 1 through March 31 for atmospheric river reconnaissance in the western United States.

SEC. 1269. PROMOTING A RESOLUTION TO THE TIBET-CHINA CONFLICT.

(a) SHORT TITLE.—This section may be cited as the ''Promoting a Resolution to the Tibet-China Conflict Act''.

(b) FINDINGS.—Congress finds the following:

(1) It has been the longstanding policy of the United States to encourage meaningful and direct dialogue between People's Republic of China authorities and the Dalai Lama or his representatives, without preconditions, to seek a settlement that resolves differences.

(2) Ten rounds of dialogue held between 2002 and 2010 between the People's Republic of China authorities and the 14th Dalai Lama's representatives failed to produce a settlement that resolved differences, and the two sides have not met since January 2010.

(3) An obstacle to further dialogue is that the Government of the People's Republic of China continues to impose conditions on His Holiness the Dalai Lama for a resumption of dialogue, including a demand that he say that Tibet has been part of China since ancient times, which the Dalai Lama has refused to do because it is false.

(4) United States Government statements that the United States considers Tibet a part of the People's Republic of China have reflected the reality on the ground that the Government of the People's Republic of China has exerted effective control over Tibet.

(5) The United States Government has never taken the position that Tibet was a part of China since ancient times or that the means by which the Government of the People's Republic of China came to exert effective control over Tibet was consistent with international law or included the free or meaningful consent of the Tibetan people.

(6) United States Government documents dated January 9, 1919, June 1, 1944, June 17, 1949, April 4, 1951, December 3, 1951, March 23, 1961, and February 14, 1963, listed Tibet as an entity separate and distinct from China.

(7) Article 1 of the International Covenant on Civil and Political Rights and Article 1 of the International Covenant on Economic, Social and Cultural Rights provide that ''All peoples have the right of self-determination. By virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development.''.

(8) Under international law, including United Nations General Assembly Resolution 2625, the right to self-determination is the right of a people to determine its own destiny and the exercise of this right can result in a variety of outcomes ranging from independence, federation, protection, some form of autonomy, or full integration within a state.

(9) United Nations General Assembly Resolution 1723, adopted on December 20, 1961, called for the ''cessation of practices which deprive the Tibetan people of their fundamental human rights and freedoms, including their right to self-determination''.

(10) In a December 30, 1950, note to the Governments of the United Kingdom and India, the Secretary of State wrote that ''The United States, which was one of the early supporters of the principle of self-determination of peoples, believes that the Tibetan people has the same inherent right as any other to have the determining voice in its political destiny. It is believed further that, should developments warrant, consideration could be given to recognition of Tibet as an independent State.''.

(11) In a June 2, 1951, telegram to the United States Embassy in New Delhi, the State Department wrote that Tibet should not ''be compelled by duress [to] accept [the] violation [of] its autonomy'' and that the Tibetan people should ''enjoy certain rights [of] self-determination, commensurate with [the] autonomy Tibet has maintained since [the] Chinese revolution.''.

(12) Secretary of State Antony Blinken, in a May 26, 2022, speech entitled ''The Administration's Approach to the People's Republic of China'', said that the rules-based international order's ''founding documents include the UN Charter and the Universal Declaration of Human Rights, which enshrined concepts like self-determination, sovereignty, the peaceful settlement of disputes. These are not Western constructs. They are reflections of the world's shared aspirations.''.

(13) The Tibetan Policy Act of 2002 (Public Law 107–228; 22 U.S.C. 6901 note), in directing the United States Government ''to promote the human rights and distinct religious, cultural, linguistic, and historical identity of the Tibetan people'', acknowledges that the Tibetan people possess a distinct religious, cultural, linguistic, and historical identity.

(14) Department of State reports on human rights and religious freedom have consistently documented repression by the People's Republic of China authorities against Tibetans as well as acts of defiance and resistance by Tibetan people against the People's Republic of China policies.

(15) Section 355 of the Foreign Relations Authorization Act, Fiscal Years 1992 and 1993 (Public Law 102–138; 105 Stat. 713) stated that it is the sense of Congress that—

(A) ''Tibet, including those areas incorporated into the Chinese provinces of Sichuan, Yunnan, Gansu, and Qinghai, is an occupied country under the established principles of international law'';

(B) ''Tibet's true representatives are the Dalai Lama and the Tibetan Government in exile as recognized by the Tibetan people'';

(C) ''Tibet has maintained throughout its history a distinctive and sovereign national, cultural, and religious identity separate from that of China and, except during periods of illegal Chinese occupation, has maintained a separate and sovereign political and territorial identity'';

(D) ''historical evidence of this separate identity may be found in Chinese archival documents and traditional dynastic histories, in United States recognition of Tibetan neutrality during World War II, and in the fact that a number of countries including the United States, Mongolia, Bhutan, Sikkim, Nepal, India, Japan, Great Britain, and Russia recognized Tibet as an independent nation or dealt with Tibet independently of any Chinese government'';

(E) from''1949–1950, China launched an armed invasion of Tibet in contravention of international law'';

(F) ''it is the policy of the United States to oppose aggression and other illegal uses of force by one country against the sovereignty of another as a manner of acquiring territory, and to condemn violations of international law, including the illegal occupation of one country by another''; and

(G) ''numerous United States declarations since the Chinese invasion have recognized Tibet's right to self-determination and the illegality of China's occupation of Tibet''.

(16) The joint explanatory statement to accompany division K of the Consolidated Appropriations Act for Fiscal Year 2023 (Public Law 117–328) states that ''Funds appropriated by the Act shall not be used to produce or disseminate documents, maps, or other materials that recognize or identify Tibet, including the Tibet Autonomous Region and other Tibetan autonomous counties and prefectures, as part of the People's Republic of China until the Secretary of State reports to the appropriate congressional committees that the Government of the People's Republic of China has reached a final negotiated agreement on Tibet with the Dalai Lama or his representatives or with democratically elected leaders of the Tibetan people.''.

(c) STATEMENT OF POLICY.—It is the policy of the United States that—

(1) the Tibetan people are a people entitled to the right of self-determination under international law, including the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social and Cultural Rights and that their ability to exercise this right is precluded by the current policies of the People's Republic of China; and

(2) the conflict between Tibet and the People's Republic of China is unresolved, and that the legal status of Tibet remains to be determined in accordance with international law.

(d) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) claims made by officials of the People's Republic of China and the Chinese Communist Party that Tibet has been a part of China since ancient times are historically false;

(2) the Government of the People's Republic of China has failed to meet the expectations of the United States to engage in meaningful dialogue with the Dalai Lama or his representatives toward a peaceful settlement of the unresolved conflict between Tibet and the People's Republic of China; and

(3) United States public diplomacy efforts should counter disinformation about Tibet from the Government of the People's Republic of China and the Chinese Communist Party, including disinformation about the history of Tibet, the Tibetan people, and Tibetan institutions including that of the Dalai Lama.

(e) MODIFICATIONS TO THE TIBETAN POLICY ACT OF 2002.—

(1) TIBET NEGOTIATIONS.—Section 613(b) of the Tibetan Policy Act of 2002 (Public Law 107–228; 22 U.S.C. 6901 note) is amended—

(A) in paragraph (2), by striking ''and'' at the end;

(B) in paragraph (3), by striking the period at the end and inserting ''; and''; and

(C) by adding at the end the following:

''(4) efforts to counter disinformation about Tibet from the Government of the People's Republic of China and the Chinese Communist Party, including disinformation about the history of Tibet, the Tibetan people, and Tibetan institutions including that of the Dalai Lama.''.

(2) UNITED STATES SPECIAL COORDINATOR FOR TIBETAN ISSUES.—Section 621(d) of the Tibetan Policy Act of 2002 (Public Law 107–228; 22 U.S.C. 6901 note) is amended—

(A) by redesignating paragraphs (6), (7), and (8) as paragraphs (7), (8), and (9), respectively; and

(B) by inserting after paragraph (5) the following:

''(6) work to ensure that United States Government statements and documents counter, as appropriate, disinformation about Tibet from the Government of the People's Republic of China and the Chinese Communist Party, including disinformation about the history of Tibet, the Tibetan people, and Tibetan institutions including that of the Dalai Lama;''.

(3) GEOGRAPHIC DEFINITION OF TIBET.—The Tibetan Policy Act of 2002 (Public Law 107–228; 22 U.S.C. 6901 note) is amended by adding at the end the following:

''SEC. 622. GEOGRAPHIC DEFINITION OF TIBET.

''In this Act and in implementing policies relating to the Tibetan people under other provisions of law, the term 'Tibet', unless otherwise specified, means—

''(1) the Tibet Autonomous Region; and

''(2) the Tibetan areas of Qinghai, Sichuan, Gansu, and Yunnan provinces.''.

(f) AVAILABILITY OF AMOUNTS TO COUNTER DISINFORMATION ABOUT TIBET.—Amounts authorized to be appropriated or otherwise made available to carry out section 201(c) of the Asia Reassurance Initiative Act of 2018 (22 U.S.C. 2292 et seq.) are authorized to be made available to counter disinformation about Tibet from the Government of the People's Republic of China and the Chinese Communist Party, including disinformation about the history of Tibet, the Tibetan people, and Tibetan institutions, including that of the Dalai Lama.

SEC. 1282. REPORT ON PARTNER FORCES UTILIZING UNITED STATES SECURITY ASSISTANCE IDENTIFIED AS USING HUNGER AS A WEAPON OF WAR.

(2) Congress recognizes and condemns the role of nefarious security actors, including state and non-state armed groups, who have utilized hunger as a weapon of war, including through the unanimous adoption of House of Representatives Resolution 922 and Senate Resolution 669 relating to ''[c]ondemning the use of hunger as a weapon of war and recognizing the effect of conflict on global food security and famine'';

(3) United Nations Security Council Resolution 2417 articulates principles that should serve as important framework for holding perpetrators that use hunger as a weapon of war accountable; and

DIVISION F—REFORMING DISASTER RECOVERY ACT

SEC. 6001. SHORT TITLE.

This division may be cited as the ''Reforming Disaster Recovery Act''.

SEC. 6002. FINDINGS.

Congress finds that—

(1) following a major disaster declared by the President under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170), the subset of communities that are most impacted and distressed as a result of the disaster face critical social, economic, and environmental obstacles to recovery, including insufficient public and private resources to address disaster-related housing and community development needs for lower income households and distressed communities;

(2) unmet disaster recovery needs, including housing assistance needs, can be especially widespread among persons with extremely low-, low-, and moderate-incomes;

(3) economic, social, and housing hardships that affect communities before disasters are exacerbated during crises and can delay and complicate long-term recovery, especially after catastrophic major disasters;

(4) States, units of local government, and Indian Tribes within the most impacted and distressed areas resulting from major disasters benefit from flexibility to design programs that meet local needs, but face inadequate financial, technical, and staffing capacity to plan and carry out sustained recovery, restoration, and mitigation activities;

(5) the speed and effectiveness considerations of long-term recovery from catastrophic major disasters is improved by predictable investments that support disaster relief, long-term recovery, restoration of housing and infrastructure, and economic revitalization, primarily for the benefit of low- and moderate-income persons;

(6) undertaking activities that mitigate the effects of future natural disasters and extreme weather and increase the stock of affordable housing, including affordable rental housing, as part of long-term recovery can significantly reduce future fiscal and social costs, especially within high-risk areas, and can help to address outstanding housing and community development needs by creating jobs and providing other economic and social benefits within communities that further promote recovery and resilience; and

(7) the general welfare and security of the United States and the health and living standards of its people require targeted resources to support State and local governments in carrying out their responsibilities in disaster recovery and mitigation through interim and long-term housing and community development activities that primarily benefit low- and moderate-income persons.

SEC. 6003. DEFINITIONS.

''(2) GRANT AWARDS.—Grants shall be awarded under this section to States, units of general local government, and Indian tribes based on capacity and the concentration of damage, as determined by the Secretary, to support the efficient and effective administration of funds.

''(4) FEDERAL REGISTER NOTICE.—

''(A) IN GENERAL.—Not later than 30 days after the date of enactment of this section, the Secretary shall issue a notice in the Federal Register containing the latest formula allocation methodologies used to determine the total estimate of unmet needs related to housing, economic revitalization, and infrastructure in the most impacted and distressed areas resulting from a catastrophic major disaster.

''(B) PUBLIC COMMENT.—If the Secretary has not already requested public comment on the formula described in the notice required by subparagraph (A), the Secretary shall solicit public comments on—

''(ii) include a methodology for identifying most impacted and distressed areas, which shall consider unmet serious needs related to housing, economic revitalization, and infrastructure;

''(iii) include an allocation calculation that considers the unmet serious needs resulting from the catastrophic major disaster and an additional amount up to 30 percent for activities to reduce risks of loss resulting from other natural disasters in the most impacted and distressed area, primarily for the benefit of low- and moderate-income persons, with particular focus on activities that reduce repetitive loss of property and critical infrastructure; and

''(ii) if the best available data is insufficient to make the determination required under clause (i) within the 90-day period described in that clause, the Secretary shall determine whether the major disaster qualifies when sufficient data becomes available, but in no case shall the Secretary make the determination later than 120 days after the declaration of the major disaster.

''(B) ANNOUNCEMENT OF ALLOCATION.—If amounts are available in the Fund at the time the Secretary determines that the major disaster is catastrophic and qualifies for assistance under the formula described in paragraph (4) or (5), the Secretary shall immediately announce an allocation for a grant under this section.

''(C) ADDITIONAL AMOUNTS.—If additional amounts are appropriated to the Fund after amounts are allocated under subparagraph (B), the Secretary shall announce an allocation or additional allocation (if a prior allocation under subparagraph (B) was less than the formula calculation) within 15 days of any such appropriation.

''(7) PRELIMINARY FUNDING.—

''(A) IN GENERAL.—To speed recovery, the Secretary is authorized to allocate and award preliminary grants from the Fund before making a determination under paragraph (6)(A) if the Secretary projects, based on a preliminary assessment of impact and distress, that a major disaster is catastrophic and would likely qualify for funding under the formula described in paragraph (4) or (5).

''(ii) may include evaluating the interim housing, permanent housing, and supportive service needs of the disaster impacted community, with special attention to vulnerable populations, such as homeless and low- to moderate-income households, to inform the grantee action plan required under subsection (c).

''(D) CONSIDERATION OF FUNDING.—Preliminary funding awarded under subparagraph (A)—

''(i) is not subject to the certification requirements of subsection (h)(1); and

''(ii) shall not be considered when calculating the amount of the grant used for administrative costs, technical assistance, and planning activities that are subject to the requirements under subsection (f)(2).

''(H) how uses of funds are proportional to unmet needs, as required under paragraph (6);

''(I) for State grantees that plan to distribute grant amounts to units of general local government, a description of the method of distribution; and

''(J) such other information as may be determined by the Secretary in regulation.

''(C) prolong the life of housing and infrastructure;

''(D) use cost-effective means of preventing harm to people and property and incorporate protective features, redundancies, and energy savings; and

''(E) other measures that will assure the continuation of critical services during future disasters.

''(A) IN GENERAL.—A grantee under this section shall allocate grant funds proportional to unmet needs between housing activities, economic revitalization, and infrastructure, unless the Secretary—

''(i) specifically finds that—

''(I) there is a compelling need for a disproportional allocation among those unmet needs; and

''(II) the disproportional allocation described in subclause (I) is not inconsistent with the requirements under paragraph (4); and

''(ii) issues a waiver and alternative requirement pursuant to subsection (i) to allow for the disproportional allocation described in clause (i)(I).

generated content, and it is in the United States national security interest to ensure that these technologies are not misused by foreign malign actors to enhance influence operations abroad;

(3) the ability to identify, track, and label original text, audio, and visual content is becoming increasingly vital to United States national interests as sophisticated AI-generated content creation becomes increasingly available to the public at low costs;

(4) coalitions such as the Content Authenticity Initiative (CAI) and the Coalition for Content Provenance and Authority (C2PA) play important roles in establishing open industry standards for content authenticity and digital content provenance, which will become increasingly vulnerable to manipulation and distortion through AI-powered tools; and

(5) the Department, as the lead agency for United States public diplomacy, should work within the interagency process to develop a common approach to United States international engagement on issues related to AI-enabled disinformation.

(b) STATEMENT OF POLICY.—It shall be the policy of the United States—

(1) to share knowledge with allies and partners of instances when foreign state actors have leveraged generative AI to augment disinformation campaigns or propaganda;

(2) to work with private industry and academia to mitigate the risks associated with public research on generative AI technologies; and

(3) to support efforts in developing digital content provenance detection techniques and technologies in line with United States national security interests.

(c) ESTABLISHMENT OF COUNTERING AI-ENABLED DISINFORMATION TASK FORCE.—

(B) work closely with private industry and academia to identify and coordinate efforts in developing digital content provenance detection techniques and technologies;

(C) develop the Department's internal coordination across regional and functional bureaus on the issue of AI-enabled disinformation;

(D) develop a unified approach to international coordination on—

(i) establishing standards around digital content provenance techniques and technologies, specifically as it relates to countering AI-enabled disinformation campaign; and

Subtitle ____—Transnational Repression

SECTION 12__1. SHORT TITLE.

This subtitle may be cited as the ''Transnational Repression Policy Act''.

SEC. 12__2. FINDINGS.

Congress finds the following:

(1) Transnational repression against individuals who live outside their countries of origin, prominent or vocal anti-regime figures, and persons who provide aid and support to dissidents—

(A) is a human rights violation that seeks to stifle dissent and enhance control over exile, activist, emigrant, and diaspora communities; and

(B) can take the form of—

(i) extrajudicial killings;

(ii) physical assaults and intimidation;

(iii) unlawful detentions;

(iv) unlawful renditions;

(v) unlawful deportations;

(vi) unexplained or enforced disappearances;

(vii) physical or online surveillance or stalking;

(viii) unwarranted passport cancellation or control over other identification documents;

(ix) INTERPOL abuse;

(x) intimidation by diplomatic personnel, government officials, or proxies;

(xi) unlawful asset freezes;

(xii) digital threats, such as cyberattacks, targeted surveillance and spyware, online harassment, and intimidation;

(xiii) coercion by proxy, such as harassment of, or threats or harm to, family and associates of such private individuals who remain in the country of origin; and

(xiv) slander and libel to discredit individuals.

(2) Governments perpetrating transnational repression often pressure host countries, especially—

(A) through threats to condition foreign assistance or other pressure campaigns on lawmakers in host countries, such as threats—

(i) to withdraw foreign students from their universities; and

(ii) to induce them to enact policies that repress emigrant and diaspora communities; and

(B) by offering financial and material assistance to host countries to harass and intimidate emigrant and diaspora communities.

(3) Transnational repression is a threat to individuals, democratic institutions, the exercise of rights and freedoms, and national security and sovereignty.

(4) Authoritarian governments increasingly rely on transnational repression as their consolidation of control at home pushes dissidents abroad.

(5) The spread of digital technologies provides new tools for censoring, surveilling, and targeting individuals deemed to be threats across international borders, especially dissidents pushed abroad who themselves rely on communications technology to amplify their messages, which can often lead to physical attacks and coercion by proxy.

(6) Many acts of transnational repression are undertaken through cooperation of, or cooperation with, authorities in the host country, most notably by taking advantage of other States' concerns about terrorism to accuse the targeted individual of terrorism or extremism.

(7) Authoritarian actors routinely attempt to deter and silence the voices of dissident and exile communities at international fora, as documented by the United Nations Assistant Secretary-General for Human Rights in the Secretary-General's annual report on reprisals to the United Nations Human Rights Council.

(8) The principle of non-refoulement, which is explicitly included in the Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment, done at New York December 10, 1984—

(A) forms an essential protection under international law; and

(B) prohibits countries from expelling or returning an individual to another country where the individual's life or freedom would be threatened on account of the individual's race, religion, nationality, membership in a particular social group, or political opinion, or due to substantial grounds for believing that the individual would be at risk of torture.

SEC. 12__3. STATEMENT OF POLICY.

It is the policy of the United States—

(1) to protect persons in the United States and United States persons outside of the United States from undue foreign harassment, intimidation, coercion, and surveillance in accordance with section 6 of the Arms Export Control Act (22 U.S.C. 2756);

(2) to pursue criminal prosecutions, as appropriate, and carry out other steps, such as facilitating mutual legal assistance and other forms of international cooperation with like-minded partners, in accordance with United States law, to hold foreign governments and individuals accountable when they stalk, publish false narratives online with the intent to unlawfully intimidate, harass, coerce, or assault people in the United States or United States persons outside of the United States or collect information while acting as a foreign agent in the United States without notifying United States authorities; and

(3) to prohibit the arrest or seizure of assets of any individual based solely on an INTERPOL Red Notice or Diffusion issued by another INTERPOL member country for such individual because such notices do not meet the requirements of the Fourth Amendment to the Constitution of the United States.

Subtitle ____—Veteran Education Empowerment

SEC. 5___. SHORT TITLE.

This subtitle may be cited as the ''Veteran Education Empowerment Act''.

SEC. 5___. FINDINGS.

Congress finds the following:

(1) More than 1,000,000 veterans attend institutions of higher education each year.

(2) Veterans face unique challenges in transitioning from the battlefield to the classroom and eventually to the workforce, including: age differences, family obligations, significant time away from academic life, and service-related disabilities.

(3) The National Education Association found that student veterans can feel lonely and vulnerable on campus and that ''connecting student veterans can effectively ease this isolation'' by bringing together new student veterans with those who have already successfully navigated the first few semesters of college.

(4) According to Mission United—a United Way program that helps veterans re-acclimate to civilian life—it is often ''essential'' for student veterans to be mentored by ''another veteran who understands their mindset and experience''.

(5) Student Veteran Centers are recognized as an institutional best practice by Student Veterans of America.

(6) The American Council on Education, which represents more than 1,700 institutions of higher education across the United States, has called having a dedicated space for veterans on campus ''a promising way for colleges and universities to better serve veterans on campus'' and a ''critical'' component of many colleges' efforts to serve their student veterans.

(7) The Department of Education included as one of its 8 Keys to Veterans' Success that colleges and universities should ''coordinate and centralize campus efforts for all veterans, together with the creation of a designated space for them''.

(8) Budget constraints often make it difficult or impossible for institutions of higher education to dedicate space to veteran offices, lounges, or student centers.

(9) The 110th Congress authorized the funding of Student Veteran Centers through the Centers of Excellence for Veteran Student Success under part T of title VIII of the Higher Education Act of 1965 (20 U.S.C. 1161t). Congress also chose to appropriate funding for this program for fiscal year 2015 under the Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113–235).

(10) According to the Department of Education, federally funded Student Veteran Centers and staff have generated improved recruitment, retention, and graduation rates, have helped student veterans feel better connected across campus, and have directly contributed to the successful academic outcomes of student veterans.

TITLE LXXX—SECURING SEMICONDUCTOR SUPPLY CHAINS ACT OF 2023

SEC. 8001. SHORT TITLE.

This title may be cited as the ''Securing Semiconductor Supply Chains Act of 2023''.

SEC. 8002. SELECTUSA DEFINED.

In this title, the term ''SelectUSA'' means the SelectUSA program of the Department of Commerce established by Executive Order 13577 (76 Fed. Reg. 35,715).

SEC. 8003. FINDINGS.

Congress makes the following findings:

(1) Semiconductors underpin the United States and global economies, including manufacturing sectors. Semiconductors are also essential to the national security of the United States.

(2) A shortage of semiconductors, brought about by the COVID–19 pandemic and other complex factors impacting the overall supply chain, has threatened the economic recovery of the United States and industries that employ millions of United States citizens.

(3) Addressing current challenges and building resilience against future risks requires ensuring a secure and stable supply chain for semiconductors that will support the economic and national security needs of the United States and its allies.

(4) The supply chain for semiconductors is complex and global. While the United States plays a leading role in certain segments of the semiconductor industry, securing the supply chain requires onshoring, reshoring, or diversifying vulnerable segments, such as for—

(A) fabrication;

(B) advanced packaging; and

(C) materials and equipment used to manufacture semiconductor products.

(5) The Federal Government can leverage foreign direct investment and private dollars to grow the domestic manufacturing and production capacity of the United States for vulnerable segments of the semiconductor supply chain.

(6) The SelectUSA program of the Department of Commerce, in coordination with other Federal agencies and State-level economic development organizations, is positioned to boost foreign direct investment in domestic manufacturing and to help secure the semiconductor supply chain of the United States.

SEC. 8004. COORDINATION WITH STATE-LEVEL ECONOMIC DEVELOPMENT ORGANIZATIONS.

Not later than 180 days after the date of the enactment of this Act, the Executive Director of SelectUSA shall solicit comments from State-level economic development organizations—

(1) to review—

(A) what efforts the Federal Government can take to support increased foreign direct investment in any segment of semiconductor-related production;

(B) what barriers to such investment may exist and how to amplify State efforts to attract such investment;

(C) public opportunities those organizations have identified to attract foreign direct investment to help increase investment described in subparagraph (A); and

(D) resource gaps or other challenges that prevent those organizations from increasing such investment; and

(2) to develop recommendations for—

(A) how SelectUSA can increase such investment independently or through partnership with those organizations; and

(B) working with countries that are allies or partners of the United States to ensure that foreign adversaries (as defined in section 8(c)(2) of the Secure and Trusted Communications Networks Act of 2019 (47 U.S.C. 1607(c)(2))) do not benefit from United States efforts to increase such investment.

SEC. 8005. REPORT ON INCREASING FOREIGN DIRECT INVESTMENT IN SEMICONDUCTOR-RELATED MANUFACTURING AND PRODUCTION.

Not later than 2 years after the date of the enactment of this Act, the Executive Director of SelectUSA, in coordination with the Federal Interagency Investment Working Group established by Executive Order 13577 (76 Fed. Reg. 35,715; relating to establishment of the SelectUSA Initiative), shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Energy and Commerce of the House of Representatives a report that includes—

(1) a review of the comments SelectUSA received from State-level economic development organizations under section 8004;

(2) a description of activities SelectUSA is engaged in to increase foreign direct investment in semiconductor-related manufacturing and production; and

(3) an assessment of strategies SelectUSA may implement to achieve an increase in such investment and to help secure the United States supply chain for semiconductors, including by—

(A) working with other relevant Federal agencies; and

(B) working with State-level economic development organizations and implementing any strategies or recommendations SelectUSA received from those organizations.

SEC. 8006. NO ADDITIONAL FUNDS.

No additional funds are authorized to be appropriated for the purpose of carrying out this title. The Executive Director of SelectUSA shall carry out this title using amounts otherwise available to the Executive Director for such purposes.

TITLE __—UNIDENTIFIED ANOMALOUS PHENOMENA DISCLOSURE

SEC. ___01. SHORT TITLE.

SEC. ___02. FINDINGS, DECLARATIONS, AND PURPOSES.

(a) FINDINGS AND DECLARATIONS.—Congress finds and declares the following:

(1) All Federal Government records related to unidentified anomalous phenomena should be preserved and centralized for historical and Federal Government purposes.

(2) All Federal Government records concerning unidentified anomalous phenomena should carry a presumption of immediate disclosure and all records should be eventually disclosed to enable the public to become fully informed about the history of the Federal Government's knowledge and involvement surrounding unidentified anomalous phenomena.

(3) Legislation is necessary to create an enforceable, independent, and accountable process for the public disclosure of such records.

(4) Legislation is necessary because credible evidence and testimony indicates that Federal Government unidentified anomalous phenomena records exist that have not been declassified or subject to mandatory declassification review as set forth in Executive Order 13526 (50 U.S.C. 3161 note; relating to classified national security information) due in part to exemptions under the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.), as well as an over-broad interpretation of ''transclassified foreign nuclear information'', which is also exempt from mandatory declassification, thereby preventing public disclosure under existing provisions of law.

(5) Legislation is necessary because section 552 of title 5, United States Code (commonly referred to as the ''Freedom of Information Act''), as implemented by the Executive branch of the Federal Government, has proven inadequate in achieving the timely public disclosure of Government unidentified anomalous phenomena records that are subject to mandatory declassification review.

(6) Legislation is necessary to restore proper oversight over unidentified anomalous phenomena records by elected officials in both the executive and legislative branches of the Federal Government that has otherwise been lacking as of the enactment of this Act.

(7) Legislation is necessary to afford complete and timely access to all knowledge gained by the Federal Government concerning unidentified anomalous phenomena in furtherance of comprehensive open scientific and technological research and development essential to avoiding or mitigating potential technological surprise in furtherance of urgent national security concerns and the public interest.
