SECTION 12___. ASSISTANCE TO COMBAT TUBERCULOSIS.

(a) SHORT TITLE.—This section may be cited as the ''End Tuberculosis Now Act of 2023''.

(b) FINDINGS.—Congress makes the following findings:

(1) Tuberculosis (referred to in the Act as ''TB'') is a preventable, treatable, and curable disease, yet more than 25 years after the World Health Organization declared it to be a public health emergency and called on countries to make scaling up TB control a priority, TB remains a deadly health threat.

(2) In 2021 alone, an estimated 10,600,000 people became ill with TB, 11 percent of whom were children, and an estimated 1,600,000 of these people died from the illness. In order to achieve by 2035 the goals of the Political Declaration of the High-Level Meeting of the General Assembly on the Fight Against Tuberculosis, adopted by the United Nations General Assembly October 10, 2018, and of the World Health Organization End TB Strategy, adopted by the World Health Assembly in 2014, new and existing tools must be developed and scaled-up.

(3) More than ⅓ of people who become ill with TB may be undiagnosed or misdiagnosed, resulting in unnecessary illness, communicable infections, and increased mortality.

(4) Since March 2020, the COVID–19 pandemic has severely disrupted TB responses in low- and middle-income countries, stalling and reversing years of progress made against TB. According to the World Health Organization, from 2019 to 2020—

(A) global detection of TB dropped by 18 percent;

(B) an estimated 1,300,000 fewer people were diagnosed and enrolled on TB treatment; and

(C) in some countries, TB case notifications dropped by up to 41 percent, setting progress back by up to 12 years.

(5) Failure to properly diagnose and treat TB can lead to death, can exacerbate antimicrobial resistance (a key contributor to rising cases of multi-drug-resistant TB and extensively drug-resistant TB), and can increase the probability of the introduction of resistant TB into new geographic areas.

(6) TB programs have played a central role in responding to COVID–19, including through leveraging the expertise of medical staff with expertise in TB and lung diseases, the repurposing of TB hospitals, and the use of the TB rapid molecular testing platforms and x-ray equipment for multiple purposes, including the treatment of COVID–19.

(7) With sufficient resourcing, TB program expertise, infection control, laboratory capacity, active case finding, and contact investigation can serve as platforms for respiratory pandemic response against existing and new infectious respiratory disease without disrupting ongoing TB programs and activities.

(8) Globally, only about ½ of the $13,000,000,000 required annually, as outlined in the Stop TB Partnership's Global Plan to End TB, is currently available.

(9) According to estimates by the Global Fund for AIDS, Tuberculosis, and Malaria, an additional $3,500,000,000 was needed during 2021 for TB programs in eligible countries in order to recover from the negative impacts of COVID–19.

(10) On September 26, 2018, the United Nations convened the first High-Level Meeting of the General Assembly on the Fight Against Tuberculosis, during which 120 countries—

(A) signed a Political Declaration to accelerate progress against TB, including through commitments to increase funding for TB prevention, diagnosis, treatment, and research and development programs, and to set ambitious goals to successfully treat 40,000,000 people with active TB and prevent at least 30,000,000 from becoming ill with TB between 2018 and 2022; and

(B) committed to ''ending the epidemic in all countries, and pledge[d] to provide leadership and to work together to accelerate our national and global collective actions, investments and innovations urgently to fight this preventable and treatable disease'', as reflected in United Nations General Assembly Resolution 73/3.

(11) The United States Government continues to be a lead funder of global TB research and development, contributing 44 percent of the total $915,000,000 in global funding in 2020, and can catalyze more investments from other countries.

(12) Working with governments and partners around the world, USAID's TB programming has saved an estimated 74,000,000 lives, demonstrating the effectiveness of United States programs and activities against the illness.

(13) On September 26, 2018, the USAID Administrator announced a new performance-based Global Accelerator to End TB, aimed at catalyzing investments to meet the treatment target set by the United Nations High-Level Meeting, further demonstrating the critical role that United States leadership and assistance plays in the fight to eliminate TB.

(14) It is essential to ensure that efforts among United States Government agencies, partner nations, international organizations, nongovernmental organizations, the private sector, and other actors are complementary and not duplicative in order to achieve the goal of ending the TB epidemic in all countries.

(c) UNITED STATES GOVERNMENT ASSISTANCE TO COMBAT TUBERCULOSIS.—Section 104B of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b–3) is amended to read as follows:

''SEC. 104B. ASSISTANCE TO COMBAT TUBERCULOSIS.

(6) There is significant evidence of collusion between criminal gangs and economic and political elites in Haiti, including members of the Haitian National Police, which has resulted in widespread impunity and directly contributed to Haiti's current security crisis.

DIVISION F—DIGITAL PLATFORM COMMISSION ACT OF 2023

SEC. 6001. SHORT TITLE.

This division may be cited as the ''Digital Platform Commission Act of 2023''.

SEC. 6002. FINDINGS; SENSE OF CONGRESS.

(a) FINDINGS.—Congress finds the following:

(1) In the United States and around the world, digital platforms and online services play a central role in modern life by providing new tools for communication, commerce, entrepreneurship, and debate.

(2) The United States takes pride in the success of its technology sector, which leads the world in innovation and dynamism, provides valuable services to the people of the United States, and supports thousands of good-paying jobs in the United States.

(3) In recent years, a few digital platforms have benefitted from the combination of economies of scale, network effects, and unique characteristics of the digital marketplace to achieve vast power over the economy, society, and democracy of the United States.

(4) The last time Congress enacted legislation to meaningfully regulate the technology or telecommunications sector was the Telecommunications Act of 1996 (Public Law 104–104; 110 Stat 56.), years before many of today's largest digital platforms even existed.

(5) Digital platforms remain largely unregulated and are left to write their own rules without meaningful democratic input or accountability.

(6) The unregulated policies and operations of some of the most powerful digital platforms have at times produced demonstrable harm, including—

(A) undercutting small businesses;

(B) abetting the collapse of trusted local journalism;

(C) enabling addiction and other harms to the mental health of the people of the United States, especially minors;

(D) disseminating disinformation and hate speech;

(E) undermining privacy and monetizing the personal data of individuals in the United States without their informed consent;

(F) in some cases, radicalizing individuals to violence; and

(G) perpetuating discriminatory treatment of communities of color and underserved populations.

(7) The development of increasingly powerful algorithmic processes for communication, research, content generation, and decision making, such as generative artificial intelligence, threatens to magnify the harms identified in paragraph (6) without mechanisms for proper oversight and regulation to protect the public interest.

(8) The failure of the United States Government to establish appropriate regulations for digital platforms cedes to foreign competitors the historic role played by the United States in setting reasonable rules of the road and technical standards for emerging technologies.

(9) Throughout the history of the United States, Congress has often responded to the emergence of powerful and complex new sectors of the economy by empowering sector-specific expert Federal regulators.

(10) Throughout the history of the United States, the Federal Government has established reasonable regulation, consistent with the First Amendment to the Constitution of the United States, to promote a diversity of viewpoints, support civic engagement, and preserve the right of citizens to communicate with each other, which is foundational to self-governance.

(11) The unique power and complexity of several digital platforms, combined with the absence of modern Federal regulations, reinforces the need for a new Federal body equipped with the authorities, tools, and expertise to regulate digital platforms to ensure their operations remain consistent, where appropriate, with the public interest.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Federal agency established under this division should—

(1) develop appropriate regulations and policies grounded in the common law principles of the duty of care and the duty to deal, insofar as those principles are relevant and practical; and

(2) adopt, where relevant and practical, a risk management regulatory approach that prioritizes anticipating, limiting, and balancing against other interests the broad economic, societal, and political risks of harm posed by the activities and operations of a person or class of persons.

DIVISION F—TRUTH AND HEALING COMMISSION ON INDIAN BOARDING SCHOOL POLICIES ACT OF 2023

SEC. 6001. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This division may be cited as the ''Truth and Healing Commission on Indian Boarding School Policies Act of 2023''.

(b) TABLE OF CONTENTS.—The table of contents for this division is as follows:

SEC. 6002. FINDINGS.

Congress finds that—

(1) attempts to destroy Native American cultures, religions, and languages through assimilationist practices and policies can be traced to the early 17th century and the founding charters of some of the oldest educational institutions in the United States;

(2) in June 2021, and in light of the long history of the assimilationist policies and practices referred to in paragraph (1) and calls for reform from Native peoples, the Secretary of the Interior directed the Department of the Interior to investigate the role of the Federal Government in supporting those policies and practices and the intergenerational impacts of those policies and practices;

(3) in May 2022, the Department of the Interior published volume 1 of a report entitled ''Federal Indian Boarding School Initiative Investigative Report'' (referred to in this section as the ''Report''), which found that—

(A) as early as 1819, and until 1969, the Federal Government directly or indirectly supported approximately 408 Indian Boarding Schools across 37 States;

(B) American Indian, Alaska Native, and Native Hawaiian children, as young as 3 years old, were forcibly removed from their homes and sent to Indian Boarding Schools located throughout the United States;

(C) Indian Boarding Schools used systematic, violent, and militarized identity-altering methods, such as physical, sexual, and psychological abuse and neglect, to attempt to forcibly assimilate Native children and strip them of their languages, cultures, and social connections;

(D) the violent methods referred to in subparagraph (C) were carried out for the purpose of—

(i) destroying the cultures, languages, and religions of Native peoples; and

(ii) dispossessing Native peoples of their ancestral lands;

(E) many of the children who were taken to Indian Boarding Schools did not survive, and of those who did survive, many never returned to their parents, extended families, or communities;

(F) many of the children who were taken to Indian Boarding Schools and did not survive were interred in cemeteries and unmarked graves; and

(G) American Indian, Alaska Native, and Native Hawaiian communities continue to experience intergenerational trauma and cultural and familial disruption from experiences rooted in Indian Boarding Schools Policies, which divided family structures, damaged cultures and individual identities, and inflicted chronic physical and psychological ramifications on American Indian, Alaska Native, and Native Hawaiian children, families, and communities;

(4) the ethos and rationale for Indian Boarding Schools is infamously expressed in the following quote from the founder of the Carlisle Indian Industrial School, Richard Henry Pratt: ''Kill the Indian in him, and save the man.'';

(5) the children who perished at Indian Boarding Schools or in neighboring hospitals and other institutions were buried in on-campus and off-campus cemeteries and unmarked graves;

(6) parents of children who were forcibly removed from or coerced into leaving their homes and placed in Indian Boarding Schools were prohibited from visiting or engaging in correspondence with their children;

(7) parental resistance to compliance with the harsh, no-contact policy of Indian Boarding Schools resulted in parents being incarcerated or losing access to basic human rights, food rations, and clothing; and

(8) the Federal Government has a responsibility to fully investigate its role in, and the lasting effects of, Indian Boarding School Policies.

SEC. 6003. PURPOSES.

SEC. 594. RESCISSION OF MEDALS OF HONOR AWARDED FOR ACTS AT WOUNDED KNEE CREEK ON DECEMBER 29, 1890.

(a) SHORT TITLE.—This section may be cited as the ''Remove the Stain Act''.

(b) FINDINGS.—Congress makes the following findings:

(1) The Medal of Honor is the highest military award of the United States.

(2) Congress found that to earn the Medal of Honor ''the deed of the person . . . must be so outstanding that it clearly distinguishes his gallantry beyond the call of duty from lesser forms of bravery''.

(3) The actions of Medal of Honor recipients inspire bravery in those currently serving in the Armed Forces and those who will come to serve in the future.

(4) Those listed on the Medal of Honor Roll have come to exemplify the best traits of members of the Armed Forces, a long and proud lineage of those who went beyond the call of service to the United States of America.

(5) To date the Medal of Honor has been awarded only 3,522 times, including only 145 times for the Korean War, 126 times in World War I, 23 times during the Global War on Terror, and 20 times for the massacre at Wounded Knee.

(6) The Medal of Honor is awarded in the name of Congress.

(7) As found in Senate Concurring Resolution 153 of the 101st Congress, on December 29, 1890 the 7th Cavalry of the United States engaged a tribal community ''resulting in the tragic death and injury of approximately 350–375 Indian men, women, and children'' led by Lakota Chief Spotted Elk of the Miniconjou band at ''Cankpe' Opi Wakpa'' or ''Wounded Knee Creek''.

(8) This engagement became known as the ''Wounded Knee Massacre'', and took place between unarmed Native Americans and soldiers, heavily armed with standard issue army rifles as well as four ''Hotchkiss guns'' with five 37 mm barrels capable of firing 43 rounds per minute.

(9) Nearly two-thirds of the Native Americans killed during the Massacre were unarmed women and children who were participating in a ceremony to restore their traditional homelands prior to the arrival of European settlers.

(10) Poor tactical emplacement of the soldiers meant that most of the casualties suffered by the United States troops were inflicted by friendly fire.

(11) On January 1st, 1891, Major General Nelson A. Miles, Commander of the Division of Missouri, telegraphed Major General John M. Schofield, Commander-in-Chief of the Army notifying him that ''[I]t is stated that the disposition of four hundred soldiers and four pieces of artillery was fatally defective and large number of soldiers were killed and wounded by the fire from their own ranks and a very large number of women and children were killed in addition to the Indian men''.

(12) The United States awarded 20 Medals of Honor to soldiers of the U.S. 7th Cavalry following their participation in the Wounded Knee Massacre.

(13) In 2001, the Cheyenne River Sioux Tribe, a member Tribe of the Great Sioux Nation, upon information provided by Lakota elders and by veterans, passed Tribal Council Resolution No. 132–01, requesting that the Federal Government revoke the Medals of Honor from the soldiers of the United States Army, 7th Cavalry issued following the massacre of unarmed men, women, children, and elderly of the Great Sioux Nation on December 29, 1890, on Tribal Lands near Wounded Knee Creek.

(14) The National Congress of American Indians requested in a 2007 Resolution that the Congress ''renounce the issuance of said medals, and/or to proclaim that the medals are null and void, given the atrocities committed upon unarmed men, women, children and elderly of the Great Sioux Nation''.

(15) General Miles contemporaneously stated that a ''[w]holesale massacre occurred and I have never heard of a more brutal, cold-blooded massacre than that at Wounded Knee''.

(16) Allowing any Medal of Honor, the United States highest and most prestigious military decoration, to recognize a member of the Armed Forces for distinguished service for participating in the massacre of hundreds of unarmed Native Americans is a disservice to the integrity of the United States and its citizens, and impinges on the integrity of the award and those who have earned the Medal since.

(c) RESCISSION OF MEDALS OF HONOR AWARDED FOR ACTS AT WOUNDED KNEE CREEK ON DECEMBER 29, 1890.—

(1) IN GENERAL.—Each Medal of Honor awarded for acts at Wounded Knee Creek, Lakota Pine Ridge Indian Reservation, South Dakota, on December 29, 1890, is rescinded.

(2) MEDAL OF HONOR ROLL.—The Secretary concerned shall remove the name of each individual awarded a Medal of Honor for acts described in paragraph (1) from the Army, Navy, Air Force, and Coast Guard Medal of Honor Roll maintained under section 1134a of title 10, United States Code.

(3) RETURN OF MEDAL NOT REQUIRED.—No person may be required to return to the Federal Government a Medal of Honor rescinded under paragraph (1).

(4) NO DENIAL OF BENEFITS.—This section shall not be construed to deny any individual any benefit from the Federal Government.

Subtitle H—Granting Recognition to Accomplished Talented Employees for Unwavering Loyalty Act

SEC. 1091. SHORT TITLE.

This subtitle may be cited as the ''Granting Recognition to Accomplished Talented Employees for Unwavering Loyalty Act'' or ''GRATEFUL Act''.

SEC. 1092. FINDINGS; SENSE OF CONGRESS.

(a) FINDINGS.—Congress makes the following findings:

(1) In 1952, with the enactment of the Immigration and Nationality Act (8 U.S.C. 1101 et seq.), Congress established an immigrant visa program to reward foreign nationals who are United States Government employees for their service to the United States (referred to in this Act as the ''Government Employee Immigrant Visa program'').

(2) For 71 years, the Government Employee Immigrant Visa program has allowed foreign nationals with at least 15 years of exceptional service to the United States to immigrate to the United States with their families.

(3) Such foreign national employees of the United States Government are the bulwark of United States foreign policy, risking their lives year after year through civil unrest, terrorism, natural disasters, and war.

(4) The work of such foreign nationals—

(A) ensures the safety and well-being of United States citizens;

(B) provides security and logistics for visiting delegations; and

(C) supports United States Government operations abroad.

(5) Such foreign nationals include employees of the Department of State, the United States Agency for International Development, the Department of Defense, the Department of Homeland Security, the Department of Justice, the Department of Commerce, and the Department of Agriculture.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the United States should preserve the immigrant visa program for foreign nationals who are employees of the United States Government abroad or of the American Institute in Taiwan, and who have provided exceptional service over a long term to the United States, by providing a dedicated allocation of visas for such employees and their immediate family members when visas are not immediately available in the corresponding visa category.

SEC. 1093. VISA AVAILABILITY FOR GOVERNMENT EMPLOYEE IMMIGRANT VISA PROGRAM.

(a) IN GENERAL.—Beginning in fiscal year 2024, subject to subsection (b), visas shall be made available to a special immigrant described in section 101(a)(27)(D) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(27)(D)) if a visa is not immediately available for issuance to the special immigrant under section 203(b)(4) of that Act (8 U.S.C. 1153(b)(4)).

(b) NUMERICAL LIMITATIONS.—

(1) FISCAL YEAR 2024.—For fiscal year 2024, not more than 3,500 visas shall be made available under subsection (a).

(2) SUBSEQUENT FISCAL YEARS.—For fiscal year 2025 and each fiscal year thereafter, not more than 3,000 visas shall be made available under subsection (a).

(c) TEMPORARY REDUCTION IN DIVERSITY VISAS.—Section 203(d)(2) of the Nicaraguan Adjustment and Central America Relief Act (8 U.S.C. 1151 note; Public Law 105–100) is amended—

(1) by amending paragraph (2) to read as follows:

''(2) In no case shall the reduction under paragraph (1) for a fiscal year exceed the amount by which—

''(A) the sum of—

''(i) one-half of the total number of individuals described in subclauses (I), (II), (III), and (IV) of section 309(c)(5)(C)(i) of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (8 U.S.C. 1101 note; Public Law 104–208) who have adjusted their status to that of aliens lawfully admitted for permanent residence under section 202 of the Nicaraguan Adjustment and Central American Relief Act (Public Law 105–100; 8 U.S.C. 1255 note) as of the end of the previous fiscal year; and

''(ii) the total number of individuals described in section 101(a)(27)(D) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(27)(D)) for whom visas shall be made available for the applicable fiscal year under section 1093(b) of the Granting Recognition to Accomplished Talented Employees for Unwavering Loyalty Act; exceeds

''(B) the total of the reductions in available visas under this subsection for all previous fiscal years.''; and

(2) by adding at the end the following:

''(3)(A) Paragraph (1) shall not apply in a fiscal year following a fiscal year for which the total number of aliens described in subparagraph (B) is zero.

''(B) For a fiscal year, the total number of aliens described in this subparagraph is the total number of individuals described in section 101(a)(27)(D) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(27)(D)) who have been issued visas during the previous fiscal year under the Granting Recognition to Accomplished Talented Employees for Unwavering Loyalty Act.

''(C) Nothing in this paragraph may be construed—

''(i) to repeal, modify, or render permanently inapplicable paragraph (1); or

''(ii) to prevent the offsetting of the number of visas described in that paragraph for the purpose of providing visa availability for aliens described in subparagraph (B).

''(4) In the event that the number of visas available for a fiscal year under section 201(e) of the Immigration and Nationality Act (8 U.S.C. 1151(e)) is reduced to a number fewer than 50,000, not fewer than 3,000 visas shall be made available for individuals described in section 1093(a) of the Granting Recognition to Accomplished Talented Employees for Unwavering Loyalty Act.''.

(d) RULE OF CONSTRUCTION.—Nothing in this section or the amendments made by this section may be construed to modify the number of visas available under section 203(b)(4) of the Immigration and Nationality Act (8 U.S.C. 1153(b)(4)) to special immigrants described in section 101(a)(27)(D) of that Act (8 U.S.C. 1101(a)(27)(D)).

SEC. _____. HASTENING ARMS LIMITATIONS TALKS ACT OF 2023.

(a) SHORT TITLE.—This section may be cited as the ''Hastening Arms Limitations Talks Act of 2023'' or the ''HALT Act of 2023''.

(b) FINDINGS.—Congress makes the following findings:

(1) The use of nuclear weapons poses an existential threat to humanity, a fact that led President Ronald Reagan and Soviet Premier Mikhail Gorbachev to declare in a joint statement in 1987 that a ''nuclear war cannot be won and must never be fought'', a sentiment affirmed by the People's Republic of China, France, the Russian Federation, the United Kingdom, and the United States in January 2022.

(2) On June 12, 1982, an estimated 1,000,000 people attended the largest peace rally in United States history, in support of a movement to freeze and reverse the nuclear arms race, a movement that helped to create the political will necessary for the negotiation of several bilateral arms control treaties between the United States and former Soviet Union, and then the Russian Federation. Those treaties contributed to strategic stability through mutual and verifiable reciprocal nuclear weapons reductions.

(3) Since the advent of nuclear weapons in 1945, millions of people around the world have stood up to demand meaningful, immediate international action to halt, reduce, and eliminate the threats posed by nuclear weapons, nuclear weapons testing, and nuclear war, to humankind and the planet.

(4) In 1970, the Treaty on the Non-Proliferation of Nuclear Weapons done at Washington, London, and Moscow July 1, 1968 (21 UST 483) (commonly referred to as the ''Nuclear Non-Proliferation Treaty'' or the ''NPT''), entered into force, which includes a binding obligation on the 5 nuclear-weapon states (commonly referred to as the ''P5''), among other things, ''to pursue negotiations in good faith on effective measures relating to the cessation of the nuclear arms race . . . and to nuclear disarmament''.

(5) Bipartisan United States global leadership has curbed the growth in the number of countries possessing nuclear weapons and has slowed overall vertical proliferation among countries already possessing nuclear weapons, as is highlighted by a more than 90 percent reduction in the United States nuclear weapons stockpile from its Cold War height of 31,255 in 1967.

(6) The United States testing of nuclear weapons is no longer necessary as a result of the following major technical developments since the Senate's consideration of the Comprehensive Nuclear-Test-Ban Treaty (commonly referred to as the ''CTBT'') in 1999:

(A) The verification architecture of the Comprehensive Nuclear Test-Ban-Treaty Organization (commonly referred to as the ''CTBTO'')—

(i) has made significant advancements, as seen through its network of 300 International Monitoring Stations and its International Data Centre, which together provide for the near instantaneous detection of nuclear explosives tests, including all 6 such tests conducted by North Korea between 2006 and 2017; and

(ii) is operational 24 hours a day, 7 days a week.

(B) Since the United States signed the CTBT, confidence has grown in the science-based Stockpile Stewardship and Management Plan of the Department of Energy, which forms the basis of annual certifications to the President regarding the continual safety, security, and effectiveness of the United States nuclear deterrent in the absence of nuclear testing, leading former Secretary of Energy Ernest Moniz to remark in 2015 that ''lab directors today now state that they certainly understand much more about how nuclear weapons work than during the period of nuclear testing''.

(7) Despite the progress made to reduce the number and role of, and risks posed by, nuclear weapons, and to halt the Cold War-era nuclear arms race, tensions between countries that possess nuclear weapons are on the rise, key nuclear risk reduction treaties are under threat, significant stockpiles of weapons-usable fissile material remain, and a qualitative global nuclear arms race is now underway with each of the countries that possess nuclear weapons spending tens of billions of dollars each year to maintain and improve their arsenals.

(8) The Russian Federation is pursuing the development of destabilizing types of nuclear weapons that are not presently covered under any existing arms control treaty or agreement and the People's Republic of

China, India, Pakistan, and the Democratic People's Republic of Korea have each taken concerning steps to diversify their more modest sized, but nonetheless very deadly, nuclear arsenals.

(9) President Joseph R. Biden's 2022 Nuclear Posture Review was right to label the nuclear-armed sea-launched cruise missile as ''no longer necessary'', as that missile, if deployed, would have the effect of lowering the threshold for nuclear weapons use.

(10) On February 3, 2021, President Joseph R. Biden preserved binding and verifiable limits on the deployed and non-deployed strategic forces of the largest two nuclear weapons powers through the five-year extension of the Treaty between the United States of America and the Russian Federation on Measures for the Further Reduction and Limitation of Strategic Offensive Arms, signed April 8, 2010, and entered into force February 5, 2011 (commonly referred to as the ''New START Treaty'').

(11) In 2013, the report on a nuclear weapons employment strategy of the United States submitted under section 492 of title 10, United States Code, determined that it is possible to ensure the security of the United States and allies and partners of the United States and maintain a strong and credible strategic deterrent while safely pursuing up to a ⅓ reduction in deployed nuclear weapons from the level established in the New START Treaty.

(12) On January 12, 2017, then-Vice President Biden stated, ''[G]iven our non-nuclear capabilities and the nature of today's threats—it's hard to envision a plausible scenario in which the first use of nuclear weapons by the United States would be necessary. Or make sense.''.

(13) In light of moves by the United States and other countries to increase their reliance on nuclear weapons, a global nuclear freeze would seek to halt the new nuclear arms race by seeking conclusion of a comprehensive and verifiable freeze on the testing, deployment, and production of nuclear weapons and delivery vehicles for such weapons.

(14) The reckless and repeated nuclear threats by Russian President Vladimir Putin since the February 2022 invasion of Ukraine by the Russian Federation underscore the need for a global nuclear freeze.

(c) STATEMENT OF POLICY.—The following is the policy of the United States:

(1) The United States should build upon its decades long, bipartisan efforts to reduce the number and salience of nuclear weapons by leading international negotiations on specific arms-reduction measures as part of a 21st century global nuclear freeze movement.

(2) Building on the 2021 extension of the New START Treaty, the United States should engage with all other countries that possess nuclear weapons to seek to negotiate and conclude future multilateral arms control, disarmament, and risk reduction agreements, which should contain some or all of the following provisions:

(A) An agreement by the United States and the Russian Federation on a resumption of on-site inspections and verification measures per the New START Treaty and a follow-on treaty or agreement to the New START Treaty that may lower the central limits of the Treaty and cover new kinds of strategic delivery vehicles or non-strategic nuclear weapons.

(B) An agreement on a verifiable freeze on the testing, production, and further deployment of all nuclear weapons and delivery vehicles for such weapons.

(C) An agreement that establishes a verifiable numerical ceiling on the deployed shorter-range and intermediate-range and strategic delivery systems (as defined by the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Elimination of Their Intermediate- Range and Shorter-Range Missiles signed at Washington December 8, 1987, and entered into force June 1, 1988 (commonly referred to as the ''Intermediate-Range Nuclear Forces Treaty''), and the New START Treaty, respectively) and the nuclear warheads associated with such systems belonging to the P5, and to the extent possible, all countries that possess nuclear weapons, at August 2, 2019, levels.

(D) An agreement by each country to adopt a policy of no first use of nuclear weapons or provide transparency into its nuclear declaratory policy.

(E) An agreement on a proactive United Nations Security Council resolution that expands access by the International Atomic Energy Agency to any country found by the Board of Governors of that Agency to be noncompliant with its obligations under the NPT.

(F) An agreement to refrain from configuring nuclear forces in a ''launch on warning'' or ''launch under warning'' nuclear posture, which may prompt a nuclear armed country to launch a ballistic missile attack in response to detection by an early-warning satellite or sensor of a suspected incoming ballistic missile.

(G) An agreement not to target or interfere in the nuclear command, control, and communications (commonly referred to as ''NC3'') infrastructure of another country through a kinetic attack or a cyberattack.

(H) An agreement on transparency measures or verifiable limits, or both, on hypersonic cruise missiles and glide vehicles that are fired from sea-based, ground, and air platforms.

(I) An agreement to provide a baseline and continuous exchanges detailing the aggregate number of active nuclear weapons and associated systems possessed by each country.

(3) The United States should rejuvenate efforts in the United Nations Conference on Disarmament toward the negotiation of a verifiable Fissile Material Treaty or Fissile Material Cutoff Treaty, or move negotiations to another international body or fora, such as a meeting of the P5. Successful conclusion of such a treaty would verifiably prevent any country's production of highly enriched uranium and plutonium for use in nuclear weapons.

(4) The United States should convene a series of head-of-state level summits on nuclear disarmament modeled on the Nuclear Security Summits process, which saw the elimination of the equivalent of 3,000 nuclear weapons.

(5) The President should seek ratification by the Senate of the CTBT and mobilize all countries covered by Annex 2 of the CTBT to pursue similar action to hasten entry into force of the CTBT. The entry into force of the CTBT, for which ratification by the United States will provide critical momentum, will activate the CTBT's onsite inspection provision to investigate allegations that any country that is a party to the CTBT has conducted a nuclear test of any yield.

(6) The President should make the accession of North Korea to the CTBT a component of any final agreement in fulfilling the pledges the Government of North Korea made in Singapore, as North Korea is reportedly the only country to have conducted a nuclear explosive test since 1998.

(7) The United States should—

(A) refrain from developing any new designs for nuclear warheads or bombs, but especially designs that could add a level of technical uncertainty into the United States stockpile and thus renew calls to resume nuclear explosive testing in order to test that new design; and

(B) seek reciprocal commitments from other countries that possess nuclear weapons.

(d) PROHIBITION ON USE OF FUNDS FOR NUCLEAR TEST EXPLOSIONS.—

(1) IN GENERAL.—None of the funds authorized to be appropriated or otherwise made available for fiscal year 2024 or any fiscal year thereafter, or authorized to be appropriated or otherwise made available for any fiscal year before fiscal year 2024 and available for obligation as of the date of the enactment of this Act, may be obligated or expended to conduct or make preparations for any explosive nuclear weapons test that produces any yield until such time as—

(A) the President submits to Congress an addendum to the report required by section 4205 of the Atomic Energy Defense Act (50 U.S.C. 2525) that details any change to the condition of the United States nuclear weapons stockpile from the report submitted under that section in the preceding year; and

(B) there is enacted into law a joint resolution of Congress that approves the test.

(1) RULE OF CONSTRUCTION.—Paragraph (1) does not limit nuclear stockpile stewardship activities that are consistent with the zero-yield standard and other requirements under law.

SA 344. Mr. MARKEY submitted an amendment intended to be proposed by him to the bill S. 2226, to authorize appropriations for fiscal year 2024 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

At the end of subtitle F of title XII, add the following:

(2) The major routes by which illegal arms are trafficked into Haiti.

(3) The major Haitian seaports, airports, and other border crossings where illegal arms are trafficked.

(4) An accounting of the ways individuals trafficking arms to Haiti evade Haitian and United States law enforcement and customs officials.

At the appropriate place in title XV, insert the following:

SEC. 15____. SMARTER APPROACHES TO NUCLEAR EXPENDITURES ACT.

(a) SHORT TITLE.—This section may be cited as the ''Smarter Approaches to Nuclear Expenditures Act''.

(b) FINDINGS.—Congress makes the following findings:

(1) The United States continues to maintain an excessively large and costly arsenal of nuclear delivery systems and warheads that are a holdover from the Cold War.

(2) The current nuclear arsenal of the United States includes approximately 3,708 total nuclear warheads in its military stockpile, of which approximately 1,744 are deployed with five delivery components: land-based intercontinental ballistic missiles, submarine-launched ballistic missiles, long-range strategic bomber aircraft armed with nuclear gravity bombs, long-range strategic bomber aircraft armed with nuclear-armed air-launched cruise missiles, and short-range fighter aircraft that can deliver nuclear gravity bombs. The strategic bomber fleet of the United States comprises 87 B–52 and 20 B–2 aircraft, over 66 of which contribute to the nuclear mission. The United States also maintains 400 intercontinental ballistic missiles and 14 Ohio-class submarines, up to 12 of which are deployed. Each of those submarines is armed with approximately 90 nuclear warheads.

(3) Between fiscal years 2021 and 2030, the United States will spend an estimated $634,000,000,000 to maintain and recapitalize its nuclear force, according to a January 2019 estimate from the Congressional Budget Office, an increase of $140,000,000,000 from the Congressional Budget Office's 2019 estimate, with 36 percent of that additional cost stemming ''mainly from new plans for modernizing [the Department of Energy's] production facilities and from [the Department of Defense's] modernization programs moving more fully into production''.

(4) Adjusted for inflation, the Congressional Budget Office estimates that the United States will spend $634,000,000,000 between 2021 and 2030 on new nuclear weapons and modernization and infrastructure programs, an estimate that in total is 28 percent higher than the Congressional Budget Office's most recent previous estimate of the 10-year costs of nuclear forces.

(5) Inaccurate budget forecasting is likely to continue to plague the Department of Defense and the Department of Energy, as evidenced by the fiscal year 2023 budget request of the President for the National Nuclear Security Administration ''Weapon Activities'' account, which far exceeded what the National Nuclear Security Administration had projected in previous years.

(6) The projected growth in nuclear weapons spending is coming due as the Department of Defense is seeking to replace large portions of its conventional forces to better compete with the Russian Federation and the People's Republic of China and as internal and external fiscal pressures are likely to limit the growth of, and perhaps reduce, military spending. As then-Air Force Chief of Staff General Dave Goldfein said in 2020, ''I think a debate is that this will be the first time that the nation has tried to simultaneously modernize the nuclear enterprise while it's trying to modernize an aging conventional enterprise. The current budget does not allow you to do both.''.

(7) In 2023, the Government Accountability Office released a report entitled ''Nuclear Weapons: NNSA Does Not Have a Comprehensive Schedule or Cost Estimate for Pit Production Capability'', stating the National Nuclear Security Administration ''had limited assurance that it would be able to produce sufficient numbers of pits in time'' to meet the requirement under section 4219 of the Atomic Energy Defense Act (50 U.S.C. 2538a) that the National Nuclear Security Administration produce 80 plutonium pits by 2030.

(8) According to the Government Accountability Office, the National Nuclear Security Administration has still not factored affordability concerns into its planning as was recommended by the Government Accountability Office in 2017, with the warning that ''it is essential for NNSA to present information to Congress and other key decision makers indicating whether the agency has prioritized certain modernization programs or considered trade-offs (such as deferring or cancelling specific modernization programs)''. Instead, the budget estimate of the Department of Energy for nuclear modernization activities during the period of fiscal years 2021 through 2025 was $81,000,000,000—$15,000,000,000 more than the 2020 budget estimate of the Department for the same period.

(9) A December 2020 Congressional Budget Office analysis showed that the projected costs of nuclear forces over the next decade can be reduced by $12,400,000,000 to $13,600,000,000 by trimming back current plans, while still maintaining a triad of delivery systems. Even larger savings would accrue over the subsequent decade.

(10) The Department of Defense's June 2013 nuclear policy guidance entitled ''Report on Nuclear Employment Strategy of the United States'' found that force levels under the April 2010 Treaty on Measures for the Further Reduction and Limitation of Strategic Offensive Arms between the United States and the Russian Federation (commonly known as the ''New START Treaty'') ''are more than adequate for what the United States needs to fulfill its national security objectives'' and can be reduced by up to ⅓ below levels under the New START Treaty to 1,000 to 1,100 warheads.

(11) Former President Trump expanded the role of, and spending on, nuclear weapons in United States policy at the same time that he withdrew from, unsigned, or otherwise terminated a series of important arms control and nonproliferation agreements.

(c) REDUCTIONS IN NUCLEAR FORCES.—

(1) REDUCTION OF NUCLEAR-ARMED SUBMARINES.—Notwithstanding any other provision of law, none of the funds authorized to be appropriated or otherwise made available for fiscal year 2024 or any fiscal year thereafter for the Department of Defense may be obligated or expended for purchasing more than eight Columbia-class submarines.

(11) LIMITATION ON PLUTONIUM PIT PRODUCTION.—

(A) IN GENERAL.—Notwithstanding any other provision of law, none of the funds authorized to be appropriated or otherwise made available for fiscal year 2024 or any fiscal year thereafter for the Department of Defense or the Department of Energy may be obligated or expended for expanding production of plutonium pits at the Los Alamos National Laboratory, Los Alamos, New Mexico, or the Savannah River Site, South Carolina, until the Administrator for Nuclear Security submits to the appropriate committees of Congress an integrated master schedule and total estimated cost for the National Nuclear Security Administration's overall plutonium pit production effort during the period of 2025 through 2035.

SEC. _____. RESTRICTION ON FIRST-USE NUCLEAR STRIKES.

(a) FINDINGS AND DECLARATION OF POLICY.—

(1) FINDINGS.—Congress finds the following:

(A) The Constitution gives Congress the sole power to declare war.

(B) The framers of the Constitution understood that the monumental decision to go to war, which can result in massive death and the destruction of civilized society, must be made by the representatives of the people and not by a single person.

(C) As stated by section 2(c) of the War Powers Resolution (Public Law 93–148; 50 U.S.C. 1541), ''the constitutional powers of the President as Commander-in-Chief to introduce United States Armed Forces into hostilities, or into situations where imminent involvement in hostilities is clearly indicated by the circumstances, are exercised only pursuant to (1) a declaration of war, (2) specific statutory authorization, or (3) a national emergency created by attack upon the United States, its territories or possessions, or its armed forces''.

(D) Nuclear weapons are uniquely powerful weapons that have the capability to instantly kill millions of people, create long-term health and environmental consequences throughout the world, directly undermine global peace, and put the United States at existential risk from retaliatory nuclear strikes.

(E) A first-use nuclear strike carried out by the United States would constitute a major act of war.

(F) A first-use nuclear strike conducted absent a declaration of war by Congress would violate the Constitution.

(G) The President has the sole authority to authorize the use of nuclear weapons, an order which military officers of the United States must carry out in accordance with their obligations under the Uniform Code of Military Justice.

(H) Given its exclusive power under the Constitution to declare war, Congress must provide meaningful checks and balances to the President's sole authority to authorize the use of a nuclear weapon.

(2) DECLARATION OF POLICY.—It is the policy of the United States that no first-use nuclear strike should be conducted absent a declaration of war by Congress.

(b) PROHIBITION ON CONDUCT OF FIRST-USE NUCLEAR STRIKES.—

(1) PROHIBITION.—No Federal funds may be obligated or expended to conduct a first-use nuclear strike unless such strike is conducted pursuant to a war declared by Congress that expressly authorizes such strike.

(2) FIRST-USE NUCLEAR STRIKE DEFINED.—In this section, the term ''first-use nuclear strike'' means an attack using nuclear weapons against an enemy that is conducted without the Secretary of Defense and the

Chairman of the Joint Chiefs of Staff first confirming to the President that there has been a nuclear strike against the United States, its territories, or its allies (as specified in section 3(b)(2) of the Arms Export Control Act (22 U.S.C. 2753(b)(2))).

(5) The goals set out by the Department's Enterprise Data Council (EDC) as the areas of most critical need for the Department, including Cultivating a Data Culture, Accelerating Decisions through Analytics, Establishing Mission-Driven Data Management, and Enhancing Enterprise Data Governance, are laudable and will remain critical as the Department develops into a data-driven agency.

SEC. 1510. APPLICATION OF TNT EQUIVALENCY TO LAUNCH VEHICLES AND COMPONENTS USING METHANE PROPELLANT.

(a) FINDINGS.—Congress finds the following:

(1) The United States Government supports having a robust space launch services market to support national security, civil, and commercial space activities.

(2) A majority of the new launch vehicles in development, testing, and operation in the United States utilize methane and liquid oxygen as their propellants (LOX/LNG or methalox).

(3) The United States Government has access to data and scientific modeling methods that support a TNT equivalency for methalox that is less than the default 100 percent TNT equivalency that is applied when no scientific data exists to characterize the explosive yield.

(4) The United States Government is not consistently applying data that supports a TNT equivalency of 25 percent at United States Government owned or licensed facilities.

(5) The United States Government has initiated a LOX-Methane Assessment (LMA) working group, however, the working group's methodology is not grounded in launch vehicle designs or test and launch operations. Further, the working group's efforts are expected to take no less than 3 years to complete and cost the United States taxpayer no less than $80,000,000. United States launch operators are incurring significant cost and diminished opportunities to operate as a result of the United States Government's inconsistent policy on methalox.

(6) The People's Republic of China is already launching orbital launch vehicles that utilize liquid oxygen and methane.

(b) INTERIM EQUIVALENCY DETERMINATION.—Effective on the date of the enactment of this Act, the interim determination of TNT equivalency applied to launch vehicles and components of such vehicles using methane as propellant shall not exceed 25 percent for purposes of the explosive siting and hazardous operations for test and operations of such launch vehicles and their components on or from any facility owned or licensed by the Federal Government.

(c) IMPROVED PROCESS FOR YIELD DETERMINATIONS.—Not later than one year after the date of the enactment of this Act, the Secretary of Defense, the Secretary of Transportation, and the Administrator of the National Aeronautics and Space Administration shall establish a process through which scientifically valid TNT equivalency determinations can be assessed for launch vehicles while in flight.

(d) CERTIFICATION AND REPORT.—Not later than 90 days after the completion of the joint assessment process conducted by the LOX-Methane Assessment working group, the Secretary of Defense, the Secretary of Transportation, and the Administrator of the National Aeronautics and Space Administration shall submit to the appropriate congressional committees—

(1) a certification verifying that the Secretaries and the Administrator reviewed the results of such joint assessment process and have agreed upon a new TNT equivalency determination that will be applied by the Federal Government to launch vehicles and components of such vehicles using methane as propellant; and

(2) a report describing how the implementation of that new TNT equivalency determination is expected to affect commercial space launch activities and national security.

(e) SUNSET.—Subsection (b) shall have no force or effect after the expiration of the period of 180 days following the submittal of the certification and report required under subsection (d).

(f) DEFINITIONS.—In this section:

''(II) The total number of prime contractor employees and subcontractor employees, as those terms are defined in section 8701 of title 41, issued credentials allowing access to Executive agency property or computer systems.

''(III) The total number of employees of Federal grant and cooperative agreement recipients, as those legal instruments are described in sections 6304 and 6305 of title 31, respectively, who are issued credentials allowing access to Executive agency property or computer systems.

''(IV) A total count of the workforce of the Executive agency, including employees, prime contractor employees, subcontractor employees, grantee employees, and cooperative agreement employees.

''(ii) The Office of Personnel Management shall compile the data collected under clause (i) and issue, and post on its website, an annual report containing the data.''; and

(2) in paragraph (2), by striking ''paragraph (1)'' and inserting ''paragraph (1)(A)''.

(b) SENSE OF CONGRESS ON EFFECTIVE AND EFFICIENT MANAGEMENT OF THE BLENDED FEDERAL WORKFORCE.—

(1) DEFINITION.—In this subsection, the term ''Executive agency'' has the meaning given the term in section 105 of title 5, United States Code.

(2) FINDINGS.—Congress finds the following:

(A) The implementation of Federal laws and the competent administration of Federal programs require skilled and capable personnel.

(B) Executive agencies depend on a blended workforce that includes Federal employees, employees of prime contractors and subcontractors performing services to Executive agencies, and employees of State or local governments, nonprofit organizations, or institutions of higher education performing services to Executive agencies under the terms of grants and cooperative agreements (in this subsection referred to as ''grantees''), all of whom make essential contributions to achieving the missions of the Government in service to the people of the United States.

(C) Approximately 2,000,000 Federal employees help to execute the laws of the United States, supplemented by an unknown number, estimated to exceed 5,000,000, of employees of prime contractors, subcontractors, and grantees providing services to Executive agencies.

(D) Policymakers, Executive agencies, and observers have often focused on individual components of the blended workforce, such as employees, without considering all components or considering the entire blended workforce and how all 3 components can work most effectively together.

(E) Executive agencies inhibit their own workforce planning and risk making decisions that may reduce the overall efficiency and cost effectiveness of the blended workforce by focusing on only 1 component in isolation.

(F) Establishing artificial limits on headcounts or full-time equivalent positions for Federal employees, administrators, and managerial employees of Executive agencies may discourage the employment of interns or entry-level employees to build a balanced employment pipeline and may inadvertently encourage managers to shift work to contractors and grantees for the purpose of complying with such numerical limits, even if those decisions are not justified by an approach to improve the efficiency or cost effectiveness of the Executive agency's work.

(G) The Government Accountability Office has identified strategic human capital management as a high-risk area for the Federal Government, adding that critical skills gaps ''impede the government from cost-effectively serving the public and achieving results''.

(3) SENSE OF CONGRESS.—It is the sense of Congress that Executive agencies should—

(A) manage the entire Federal blended workforce, including employees, contractors, and grantees, using a comprehensive and holistic approach to advance their missions as effectively and cost efficiently as possible, within appropriated budgets and without using artificial numerical limits on headcounts or full-time-equivalent positions; and

(B) conduct a holistic review of their blended workforce and develop a comprehensive plan to ensure an efficient and cost-effective blended workforce.

(2) In 2022, the United States was more than 50 percent reliant on imports of 12 minerals classified as ''critical'' by the United States Geological Survey, 30 of which sourced from the People's Republic of China.

(3) On March 26, 2014, the World Trade Organization ruled that the People's Republic of China's export restraints on critical minerals violated its obligations under its protocol of accession to the World Trade Organization, thereby harming United States manufacturers and workers.

(4) The Chinese Communist Party has threatened to leverage the People's Republic of China's dominant position in the critical minerals market to ''strike back'' at the United States.

(A) strategic investments in development projects, production technologies, and refining facilities in the United States; or

(B) in partnership with strategic allies of the United States that are reliable trading partners, including members of the Quadrilateral Security Dialogue; and

SEC. _____. CERTIFICATION OF THE ESTABLISHMENT OF THE NUCLEAR CONSULTATIVE GROUP.

(a) FINDINGS.—Congress finds the following:

(1) The United States extended deterrence commitment to the Republic of Korea is ironclad and enduring.

(2) Such extended deterrence relies on the full range of defense capabilities, including conventional and nuclear forces of the United States.

(3) The establishment of the Nuclear Consultative Group (referred to in this section as the ''Group'') between the United States and the Republic of Korea during President Yoon Suk Yeol's visit to the United States on April 26, 2023, reflected a recognition of the accelerating threat posed by the nuclear weapons and missile program of the Democratic People's Republic of Korea and a requirement to adjust the alliances approach to deterring the Democratic People's Republic of Korea.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Group will strengthen the alliance between the governments of the United States and the Republic of Korea by deepening the ability of such governments to plan, consult, and conduct exercises on issues related to nuclear deterrence;

(2) integrated deterrence requires a whole-of-government approach to deter adversaries and assure United States allies; and

(3) the Group should be executed as a 2+2 construct with the Secretary of Defense and the Secretary of State serving as co-leads.

(c) REPORT ON THE IMPLEMENTATION OF THE NUCLEAR CONSULTATIVE GROUP.—

(1) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Secretary of Defense, in coordination with the Secretary of State, shall submit to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives a report that includes a description of each of the following:

(i) has the necessary posture and capabilities to deter conventional and nuclear threats of the Democratic People's Republic of Korea;

(ii) has the necessary posture and capabilities to assure the Government of the Republic of Korea and its people of the effectiveness of extended deterrence; and

(B) that the Federal Government plans fully integrate conventional and nuclear capabilities for the deterrence, and if necessary, the defeat, of aggression by the Democratic People's Republic of Korea.

(2) FORM.—The certification required by paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

Subtitle H—Bolstering the AUKUS Partnership

SEC. 1299L. DEFINITIONS.

In this subtitle:

(1) APPROPRIATE CONGRESSIONAL COMMITTEES.—The term ''appropriate congressional committees'' means—

(A) the Committee on Foreign Relations, the Committee on Appropriations, and the Committee on Armed Services of the Senate; and

(B) the Committee on Foreign Affairs, the Committee on Appropriations, and the Committee on Armed Services of the House of Representatives.

(2) AUKUS; AUKUS PARTNERSHIP.—The terms ''AUKUS'' and ''AUKUS partnership'' means the trilateral security partnership between the United States, the United Kingdom, and Australia, which includes the following two pillars:

(A) Pillar One of AUKUS is focused on developing a pathway for Australia to acquire conventionally armed, nuclear powered submarines.

(B) Pillar Two of AUKUS is focused on enhancing trilateral collaboration on advanced defense capabilities to include hypersonic and counter hypersonic capabilities, quantum technologies, undersea technologies, and artificial intelligence.

(3) AUKUS PARTNER.—The term ''AUKUS partner'' refers to a member of AUKUS.

(4) DEFENSE ARTICLE; DEFENSE SERVICE.—The terms ''defense article'' and ''defense service'' have the meanings given those terms in section 47 of the Arms Export Control Act (22 U.S.C. 2794).

SEC. 1299M. FINDINGS.

Congress makes the following findings:

(1) The United States has entered into a period of intense strategic rivalry with China that includes military competition on a scale unseen in generations.

(2) The perpetuation of a military balance of power in the Indo-Pacific favorable to the United States and its allies and partners can no longer be assumed as China continues to invest massive resources in its military.

(3) China has undertaken a nuclear breakout, fields the world's largest navy, and is fielding a fully modernized air force.

(4) North Korea remains an urgent and gathering threat as it fields an increasingly diverse and advanced nuclear and missile force backed by a massive conventional army.

(5) Iran continues to pursue a nuclear weapons capability while fomenting unrest in the Middle East and beyond.

(6) While China remains the pacing threat for the United States, Russia's unprovoked and brutal invasion of Ukraine makes clear that multiple dissatisfied powers are coalescing into an informal bloc designed to challenge the existing United States-led global order.

(7) United States efforts to help Ukraine defend itself against Russian aggression and strengthen Taiwan's ability to resist the coercion of the Chinese Communist Party have exposed the production constraints inherent in the United States defense industrial base.

(8) The capacity limitations of the United States defense industrial base require urgent remedy to include a renewed examination of burden sharing roles with United States allies.

(9) To meet this comprehensive challenge to American interests, we must act with urgency to expand the resilience and capacity of our defense industrial base. United States allies should be full partners in this effort and the AUKUS partnership is a necessary first step to share the responsibility of perpetuating the existing rules-based order.

(10) The security partnership between Australia, the United Kingdom, and the United States (referred to as the ''AUKUS partnership'') is meant to bolster capability of the United States and allies in the Indo-Pacific and beyond through technology sharing, cooperation, and defense exports.

(11) The AUKUS partnership's focus on conventionally armed nuclear-powered submarines and advanced capabilities, known respectively as Pillars One and Two, rightly centers on cooperation at the highest end of security and geostrategic competition.

(12) Pillar One, while bold, is complex, highly contingent and unlikely to produce additive submarine capability in the Indo-Pacific until the 2030s.

(13) The Pillar One initiative will rely on the expertise developed by the United States and United Kingdom in operating their submarine fleets to bring an Australian capability into service at the earliest achievable date.

(14) Pillar Two proposes that AUKUS partners will also deepen cooperation and integration on advanced defense technologies to include hypersonic missiles, space technology, artificial intelligence, quantum technologies and additional undersea capabilities.

(15) Pillar Two, if executed with the vision described by the three allies in the AUKUS announcement of September 2021, offers the potential to produce meaningful capability and increase industrial capacity during the current decade.

(16) Pillar Two can also expand and build resilience across the supply chain of the AUKUS partners.

(17) However, certain statutory components of the United States export control and regulatory system are overly cumbersome for industries in the United States, Australia, and the United Kingdom.

(18) Australia and the United Kingdom have legal, regulatory, and technology control regimes that are sufficiently comparable to those of the United States.

(19) United States technology controls and export licensing decisions must balance the relatively low risk of compromise that exists across all three AUKUS partners regulatory regimes against the requirements to respond

at the speed of relevance to the rapid military advances made by the Chinese People's Liberation Army.

(20) In order to implement the AUKUS agreement and realize the value of increased cooperation between the United States, the United Kingdom, and Australia, the United States must ensure cooperation is fostered, not inhibited, by the United States regulatory system.

(21) The United States export control system, encompassing both the International Traffic and Arms Regulations and the Export Administration Regulations, is largely based on a bilateral government-to-government relationship rather than being optimized for a trilateral or multilateral defense technology partnership.

(22) The Department of State, in concert with the Department of Defense, the Department of Commerce, and other relevant United States agencies, should clearly communicate to our AUKUS partners any United States requirements to address matters related to the technology security and export control measures of Australia and the United Kingdom.

(23) Further, the Department of State, in concert with the Department of Defense, the Department of Commerce, and other relevant United States agencies, should work to reduce barriers to defense innovation, cooperation, trade, sustainment, co-production, and co-development initiatives with the governments and industry partners of the United Kingdom and Australia.

(24) These barriers include the overuse of ''no foreign nationals'' (NOFORN) and Controlled Unclassified Information (CUI) determinations that inhibit collaboration among AUKUS partners in determining requirements, design, development, acquisition, testing, operation, and sustainment of capabilities designed to be interoperable.

(25) The successful implementation of the AUKUS partnership requires regulatory and licensing changes on the part of all AUKUS partner countries and the continued enhancement of the export control and technology security regimes of all three nations.

(26) If AUKUS realizes its potential, it will set a precedent and incentivize similar agreements with other close United States allies, which will be necessary if we are to prevail in the long-term competition with China, Russia and its partners.

SEC. 1299N. STATEMENT OF POLICY.

It is the policy of the United States—

(1) to support a transformation and expansion of our already close cooperation on a range of defense and security issues with the United Kingdom and Australia, including enhancing cooperation in the development and fielding of advanced commercial and defense capabilities and in pursuing deeper integration of our defense industrial bases and supporting supply chains;

(2) to use AUKUS to enhance trilateral cooperation across the submarine fleets of the partner countries and to support Australian efforts to acquire nuclear-powered submarines for the Royal Australian Navy;

(3) to reassess, and as needed revise, existing regulatory and legal regimes, to include licensing, technology release and contracting procedures to meet the objectives outlined in the September 15, 2021, announcement of the AUKUS partnership;

(4) to reinvigorate burden sharing with United States allies as a key component of adopting a sustainable long-term strategy to compete with China, Russia, and other revanchist powers; and

(5) to modernize the United States export control system to reflect the new era of cooperation with partners and allies, incorporating commercial and defense technology that preserve, and enhance our way of life.

SEC. 715. ACCOUNTABILITY FOR CERTAIN MEMBERS OF THE ARMED FORCES DURING THE INTEGRATED DISABILITY EVALUATION SYSTEM.

(a) FINDINGS.—Congress finds the following:

(1) Members of the Armed Forces are the brave men and women who voluntarily put themselves in harm's way, while fighting the enemies of freedom around the world so that all citizens of the United States and countless citizens of other nations can enjoy the blessings of liberty in peace. We owe those members not only a debt of gratitude, but our willingness to ensure every single member receives excellent health care and just treatment in the medical separation process when they've become ill or injured in the line of duty. This is critically important, not only for the present state of readiness in the Armed Forces, but for potential recruitment of future warfighters as elucidated by President George Washington when he stated, ''The willingness with which our young people are likely to serve in any war, no matter how justified, shall be directly proportional to how they perceive veterans of early wars were treated and appreciated by our nation.''.

(2) Wounded Warriors remain members of an Armed Force under the jurisdiction of the Secretary of a military department and determinations regarding their physical ability is the responsibility of the chain of command of the member, rather than the personnel within or under the direction of the Defense Health Agency. That responsibility through the jurisdiction of the military chain of command is effective during the entirety of the process of the Integrated Disability Evaluation System of the Department of Defense, or successor system, instead of vesting for practical purposes only at the end of such process.

(3) Section 1214 of title 10, United States Code, guarantees that ''[n]o member of the armed forces may be retired or separated for physical disability without a full and fair hearing if he demands it.''.

(4) Section 1216(b) of such title grants the Secretary concerned ''all powers, functions, and duties incident to the determination'' of ''fitness for active duty of any member of an armed force under his jurisdiction.''.

(5) Sections 7013(b), 8013(b), and 9013(b) of such title assigns responsibility for and grants ''the authority necessary to conduct'' the administration of the ''morale and welfare of personnel'' to the Secretary of the Army, the Secretary of the Navy, and the Secretary of the Air Force respectively.

(b) DECLARATION OF POLICY REGARDING ACCOUNTABILITY FOR WOUNDED WARRIORS.—It is the policy of Congress that—

(1) determinations of fitness for duty or physical capability to perform a military occupational specialty of a member of the Armed Forces under the jurisdiction of the Secretary of a military department are the responsibility of such Secretary;

(2) determinations of fitness for a Wounded Warrior may be assessed by medical professionals outside the military department of the Wounded Warrior and may be influenced by precedents across other entities of the Department of Defense, including the Defense Health Agency, but ultimately, such determination remains a decision of the Secretary of the military department concerned;

(3) the full authority for a determination described in paragraph (1) or (2) resides in the military chain of command and not the chain of responsibility of the Defense Health Agency; and

(4) at no point during the medical evaluation of a Wounded Warrior shall the Wounded Warrior be denied the protections, privileges, or right to due process afforded under the laws, regulations, or other applicable guidance of the military department of the Wounded Warrior.

(c) CLARIFICATION OF RESPONSIBILITIES REGARDING THE INTEGRATED DISABILITY EVALUATION SYSTEM.—Subsection (h) of section 1073c of title 10, United States Code, is amended to read as follows:

''(h) AUTHORITIES RESERVED TO SECRETARIES OF THE MILITARY DEPARTMENTS.—(1) Notwithstanding the responsibilities and authorities of the Director of the Defense Health Agency with respect to the administration of military medical treatment facilities under this section, the Secretary of each military department shall maintain authority over and responsibility for any member of the armed forces under the jurisdiction of the military department concerned while the member is being considered by a medical evaluation board or during any other part of the implementation of the Integrated Disability Evaluation System of the Department of Defense, or successor system.

''(2) Responsibility of the Secretary of a military department under paragraph (1) shall include the following:

''(A) Responsibility for administering the morale and welfare of each member of the armed forces under the jurisdiction of such Secretary.

''(B) Responsibility for determinations of fitness for active duty of each such member.

''(C) Complete operational and administrative control of each such member at every stage of the implementation of the Integrated Disability Evaluation System, or successor system, from the beginning of the medical evaluation board to the conclusion of the physical evaluation board, including the authority to pause for a reasonable amount of time or completely withdraw the member from such system if the military commander with jurisdiction over the member finds that any policies, procedures, regulations, or other related guidance has not been followed in the case of the member.''.

(d) OPPORTUNITY FOR DUE PROCESS HEARING IN THE MILITARY CHAIN OF COMMAND.—

(1) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Secretary of Defense shall update the policies and procedures applicable to the implementation of the Integrated Disability Evaluation System of the Department of Defense, or successor system, to ensure that appeals made by Wounded Warriors under the jurisdiction of the Secretary concerned include (if the member demands it) a full and fair hearing on such determination, to be conducted by the Secretary concerned.

(2) CHARACTERIZATION OF APPEAL.—An appeal made under paragraph (1) is separate from and in addition to any appellate options available to a Wounded Warrior under the Integrated Disability Evaluation System of the Department of Defense, or successor system.

(3) TIMELY MANNER.—

(A) IN GENERAL.—Upon request by Wounded Warrior, the military commander with jurisdiction over the Wounded Warrior shall process an appeal under paragraph (1).

(B) ADJUDICATION.—Not later than 90 days after the initiation by a Wounded Warrior of an appeal under paragraph (1) the military commander with jurisdiction over the Wounded Warrior, and every echelon of command all the way up to the general court-martial convening authority if the commander denies the appeal, shall complete adjudication of the appeal.

(1) IN GENERAL.—Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report that includes the following:

(C) A timeline for implementation of the goals included under subparagraph (B).

(D) A forecast of manpower savings as a result of efforts to achieve those goals across the future years defense program.

(E) An identification of any additional resources or authorities necessary to achieve those goals.

(2) LIMITATION.—None of the funds authorized to be appropriated for the civilian workforce for the Department of Defense for fiscal year 2024 or any fiscal year thereafter may be obligated or expended to establish or operate a Department of Defense Civilian Workforce Incentive Fund until 30 days after the date on which the report required by paragraph (1) is submitted under such paragraph.

Subtitle H—Bring Our Heroes Home Act

SEC. 1091. SHORT TITLE.

This subtitle may be cited as the ''Bring Our Heroes Home Act''.

SEC. 1092. FINDINGS, DECLARATIONS, AND PURPOSES.

(a) FINDINGS AND DECLARATIONS.—Congress finds and declares the following:

(1) A vast number of records relating to missing Armed Forces and civilian personnel have not been identified, located, or transferred to the National Archives following review and declassification. Only in the rarest cases is there any legitimate need for continued protection of records pertaining to missing Armed Forces and civilian personnel who have been missing for decades.

(2) There has been insufficient priority placed on identifying, locating, reviewing, or declassifying records relating to missing Armed Forces and civilian personnel and then transferring the records to the National Archives for public access.

(3) Mandates for declassification set forth in multiple Executive orders have been broadly written, loosely interpreted, and often ignored by Federal agencies in possession and control of records related to missing Armed Forces and civilian personnel.

(4) No individual or entity has been tasked with oversight of the identification, collection, review, and declassification of records related to missing Armed Forces and civilian personnel.

(5) The interest, desire, workforce, and funding of Federal agencies to assemble, review, and declassify records relating to missing Armed Forces and civilian personnel have been lacking.

(6) All records of the Federal Government relating to missing Armed Forces and civilian personnel should be preserved for historical and governmental purposes and for public research.

(7) All records of the Federal Government relating to missing Armed Forces and civilian personnel should carry a presumption of declassification, and all such records should be disclosed under this subtitle to enable the fullest possible accounting for missing Armed Forces and civilian personnel.

(8) Legislation is necessary to create an enforceable, independent, and accountable process for the public disclosure of records relating to missing Armed Forces and civilian personnel.

(9) Legislation is necessary because section 552 of title 5, United States Code (commonly known as the ''Freedom of Information Act''), as implemented by Federal agencies, has prevented the timely public disclosure of records relating to missing Armed Forces and civilian personnel.

(b) PURPOSES.—The purposes of this subtitle are—

(1) to provide for the creation of the Missing Armed Forces and Civilian Personnel Records Collection at the National Archives; and

(2) to require the expeditious public transmission to the Archivist and public disclosure of missing Armed Forces and civilian personnel records, subject to narrow exceptions, as set forth in this subtitle.

Subtitle ____—North Korean Human Rights

SEC. 12__1. SHORT TITLE.

This subtitle may be cited as the ''North Korean Human Rights Reauthorization Act of 2023''.

SEC. 12__2. FINDINGS.

Congress makes the following findings:

(1) The North Korean Human Rights Act of 2004 (Public Law 108–333; 22 U.S.C. 7801 et seq.) and subsequent reauthorizations of such Act were the product of broad, bipartisan consensus regarding the promotion of human rights, documentation of human rights violations, transparency in the delivery of humanitarian assistance, and the importance of refugee protection.

(2) The human rights and humanitarian conditions within North Korea remain deplorable and have been intentionally perpetuated against the people of North Korea through policies endorsed and implemented by Kim Jong-un and the Workers' Party of Korea.

(3) According to a 2014 report released by the United Nations Human Rights Council's Commission of Inquiry on Human Rights in the Democratic People's Republic of Korea, between 80,000 and 120,000 children, women, and men were being held in political prison camps in North Korea, where they were subjected to deliberate starvation, forced labor, executions, torture, rape, forced abortion, and infanticide.

(4) North Korea continues to hold a number of South Koreans and Japanese abducted after the signing of the Agreement Concerning a Military Armistice in Korea, signed at Panmunjom July 27, 1953 (commonly referred to as the ''Korean War Armistice Agreement''), and refuses to acknowledge the abduction of more than 100,000 South Koreans during the Korean War in violation of the Geneva Convention.

(5) Human rights violations in North Korea, which include forced starvation, sexual violence against women and children, restrictions on freedom of movement, arbitrary detention, torture, executions, and enforced disappearances, amount to crimes against humanity according to the United Nations Commission of Inquiry on Human Rights in the Democratic People's Republic of Korea.

(6) The effects of the COVID–19 pandemic and North Korea's strict lockdown of its borders and crackdowns on informal market activities and small entrepreneurship have drastically increased food insecurity for its people and given rise to famine conditions in parts of the country.

(7) North Korea's COVID–19 border lockdown measures also include shoot-to-kill orders that have resulted in the killing of—

(A) North Koreans attempting to cross the border; and

(B) at least 1 South Korean citizen in September 2020.

(8) The Chinese Communist Party and the Government of the People's Republic of China are aiding and abetting in crimes against humanity by forcibly repatriating North Korean refugees to North Korea where they are sent to prison camps, harshly interrogated, and tortured or executed.

(9) The forcible repatriation of North Korean refugees violates the People's Republic of China's freely undertaken obligation to uphold the principle of non-refoulement, under the Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (and made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)).

(10) North Korea continues to bar freedom of religion and persecute religious minorities, especially Christians. Eyewitnesses report that Christians in North Korea have been tortured, forcibly detained, and even executed for possessing a Bible or professing Christianity.

(11) United States and international broadcasting operations into North Korea—

(A) serve as a critical source of outside news and information for the North Korean people; and

(B) provide a valuable service for countering regime propaganda and false narratives.

(12) The position of Special Envoy on North Korean Human Rights Issues has been vacant since January 2017, even though the President is required to appoint a Senate-confirmed Special Envoy to fill this position in accordance with section 107 of the North Korean Human Rights Act of 2004 (22 U.S.C. 7817).

SEC. 12__3. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) promoting information access in North Korea continues to be a successful method of countering North Korean propaganda;

(2) the United States Government should continue to support efforts described in paragraph (1), including by enacting and implementing the Otto Warmbier North Korean Censorship and Surveillance Act of 2021, which was introduced by Senator Portman on June 17, 2021;

(3) because refugees among North Koreans fleeing into China face severe punishments upon their forcible return, the United States should urge the Government of the People's Republic of China—

(A) to immediately halt its forcible repatriation of North Koreans;

(B) to allow the United Nations High Commissioner for Refugees (referred to in this section as ''UNHCR'') unimpeded access to North Koreans within China to determine whether they are refugees and require assistance;

(C) to fulfill its obligations under the Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (and made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)) and the Agreement on the upgrading of the UNHCR Mission in the People's Republic of China to UNHCR branch office in the People's Republic of China, done at Geneva December 1, 1995;

(D) to address the concerns of the United Nations Committee Against Torture by incorporating into domestic legislation the principle of non-refoulement; and

(E) to recognize the legal status of North Korean women who marry or have children with Chinese citizens and ensure that all such mothers and children are granted resident status and access to education and other public services in accordance with Chinese law and international standards;

(4) the United States Government should continue to promote the effective and transparent delivery and distribution of any humanitarian aid provided in North Korea to ensure that such aid reaches its intended recipients to the point of consumption or utilization by cooperating closely with the Government of the Republic of Korea and international and nongovernmental organizations;

(5) the Department of State should continue to take steps to increase public awareness about the risks and dangers of travel by United States citizens to North Korea, including by continuing its policy of blocking United States passports from being used to travel to North Korea without a special validation from the Department of State;

(6) the United Nations, which has a significant role to play in promoting and improving human rights in North Korea, should press for access for the United Nations Special Rapporteur and the United Nations High Commissioner for Human Rights on the situation of human rights in North Korea;

(7) the Special Envoy for North Korean Human Rights Issues should be appointed without delay—

(A) to properly promote and coordinate North Korean human rights and humanitarian issues; and

(B) to participate in policy planning and implementation with respect to refugee issues;

(8) the United States should urge North Korea to repeal the Reactionary Thought and Culture Denunciation Law and other draconian laws, regulations, and decrees that manifestly violate the freedom of opinion and expression and the freedom of thought, conscience, and religion;

(9) the United States should urge North Korea to ensure that any restrictions on addressing the COVID–19 pandemic are necessary, proportionate, nondiscriminatory, time-bound, transparent, and allow international staff to operate inside the North Korea to provide international assistance based on independent needs assessments;

(10) the United States should expand the Rewards for Justice program to be open to North Korean officials who can provide evidence of crimes against humanity being committed by North Korean officials;

(11) the United States should continue to seek cooperation from all foreign governments—

(A) to allow the UNHCR access to process North Korean refugees overseas for resettlement; and

(B) to allow United States officials access to process refugees for possible resettlement in the United States; and

(12) the Secretary of State, through diplomacy by senior officials, including United States ambassadors to Asia-Pacific countries, and in close cooperation with South Korea, should make every effort to promote the protection of North Korean refugees, escapees, and defectors.

Subtitle A—Legal Gold and Mining Partnership

SECTION 12__1. SHORT TITLE.

This subtitle may be cited as the ''United States Legal Gold and Mining Partnership Act''.

SEC. 12__2. FINDINGS.

Congress makes the following findings:

(1) The illicit mining, trafficking, and commercialization of gold in the Western Hemisphere—

(A) negatively affects the region's economic and social dynamics;

(B) strengthens transnational criminal organizations and other international illicit actors; and

(C) has a deleterious impact on the environment, indigenous peoples, and food security.

(2) A lack of economic opportunities and the weak rule of law promote illicit activities, such as illicit gold mining, which increases the vulnerability of individuals in mining areas, including indigenous communities, who have been subjected to trafficking in persons, other human rights abuses, and population displacement in relation to mining activity, particularly in the artisanal and small-scale mining sector.

(3) Illicit gold mining in Latin America often involves and benefits transnational criminal organizations, drug trafficking organizations, terrorist groups, and other illegal armed groups that extort miners and enter into illicit partnerships with them in order to gain revenue from the illicit activity.

(4) Illicit gold supply chains are international in nature and frequently involve—

(A) the smuggling of gold and supplies, such as mercury;

(B) trade-based money laundering; and

(C) other cross-border flows of illicit assets.

(5) In Latin America, mineral traders and exporters, local processors, and shell companies linked to transnational criminal networks and illegally armed groups all play a key role in the trafficking, laundering, and commercialization of illicit gold from the region.

(6) According to a report on illegally mined Gold in Latin America by the Global Initiative Against Transnational Organized Crime—

(A) more than 70 percent of the gold mined in several Latin American countries, such as Colombia, Ecuador, and Peru, is mined through illicit means; and

(B) about 80 percent of the gold mined in Venezuela is mined through illicit means and a large percentage of such gold is sold—

(i) to Mibiturven, a joint venture operated by the Maduro regime composed of Minerven, a gold processor that has been designated by the Office of Foreign Assets Control of the Department of the Treasury, pursuant to Executive Order 13850 (relating to blocking property of additional persons contributing to the situation in Venezuela), and Marilyns Proje Yatirim, S.A., a Turkish company; or

(ii) through other trafficking and commercialization networks from which the Maduro regime benefits financially.

(7) Illegal armed groups and foreign terrorist organizations, such as the Ejército de Liberación Nacional (National Liberation Army—ELN), work with transnational criminal organizations in Venezuela that participate in the illicit mining, trafficking, and commercialization of gold.

(8) Transnational criminal organizations based in Venezuela, such as El Tren de Aragua, have expanded their role in the illicit mining, trafficking, and commercialization of gold to increase their criminal profits.

(9) Nicaragua's gold exports during 2021 were valued at an estimated $989,000,000 in value, of which

(A) gold valued at an estimated $898,000,000 was shipped to the United States;

(B) gold valued at an estimated $48,700,000 was shipped to Switzerland;

(C) gold valued at an estimated $39,000,000 was shipped to the United Arab Emirates; and
