

here today to strongly urge the Biden administration to prioritize securing his release and the State Department to designate him as “wrongfully detained.”

The unjust imprisonment of Marc Fogel has gone on far too long. Now, we must do everything in our power to ensure this innocent American is reunited with his loved ones, so he can spend his next birthday—and many after—surrounded by family.

Happy Birthday, Marc. We will keep working to get you home.

TRIBUTE TO MORGAN CASHWELL

Mr. KING. Mr. President, today I want to take a moment to recognize a dear friend and devoted advocate for Maine, my legislative director, Morgan Cashwell. She proudly served my office and the people of Maine for more than 8 years. Years filled with sleepless nights of vote-a-ramas, preparation for committee hearings, and long negotiations. She has been an extraordinary leader, an effective policymaker, and a wonderful colleague and mentor to so many.

There is never an “easy” time to work in Congress, but certainly, there have been few times more challenging or unpredictable than during the COVID-19 pandemic. Taking over as legislative director amid regularly shifting public health guidance, Morgan was able to maintain a successful and efficient legislative team, all while keeping morale high and putting Maine people first. This leadership—rooted in kindness—has made her beloved by everyone in the office and all those who are lucky enough to know her.

You never want staff who will just tell you what you want to hear; that was never Morgan. In fact, Morgan embodies the Maine spirit of “calling ‘em like you see ‘em” and providing her honest advice in even the toughest situations. I valued her counsel and knew it was always guided by an unshakable moral compass and a true compassion for others.

Not only is Morgan among the best staffers I have had the privilege of working with; you could not find a more effective legislative director in Congress. During her time working for Maine, it is not an exaggeration to say that Morgan’s steady hand has helped shape some of our most important recent bills. Her impact can be found across generational investments in the great outdoors, the country’s most significant piece of climate legislation, and a historic expansion of broadband infrastructure.

To cite just one example of many: When Maine’s vital and iconic lobster industry came under threat last year, Morgan led the successful effort to defend the livelihood of thousands of men and women who responsibly work the water against an otherwise certain economic death sentence. Thanks to her fierce advocacy, the Maine delegation was able to include protection for our

State’s lobstering communities in the 2023 omnibus appropriations legislation, a last-minute addition that might not have happened without her dedication, selfless nature, and tireless determination to do what was right.

While I am truly sad to see her go, I wish Morgan all the best as she enters this next chapter of her career and profoundly thank her and her supportive family: husband Keith and her children Rory and Reese.

Morgan, I will be forever grateful for your service. Maine, my staff, and the entire country are all better for it.

ADDITIONAL STATEMENTS

RECOGNIZING GROWING HOPE GLOBALLY

• Mr. BROWN. Mr. President, I rise today to congratulate the board, staff, and supporters of Growing Hope Globally as they celebrate their commitment to putting their Christian faith into practice by helping end hunger globally.

Every day, Growing Hope Globally implements grassroots solutions to hunger that link rural communities in the U.S. with smallholder farmers in developing countries. Specifically, farmers in the United States tithe a portion of their crops to combatting global hunger. Their work makes a difference for so many people, both in the United States and around the world.

This small nonprofit with big ambitions began with the compassion of two Ohio farmers and their friends who wanted to put their faith into action and help build a better world. Over the past 25 years, Growing Hope Globally has expanded from just one project in Stryker, OH, started by Vernon and Carol Sloan, to supporting projects in 21 different States that have served more than 2.2 million people. Vernon and Carol’s idea was simple but powerful: fund agricultural development programs that support small farmers and rural communities through grassroots farmer-to-farmer assistance.

I am inspired by the farmers in Ohio and across the Nation who invest their profits in agricultural development projects that support small farmers in countries facing hunger and food insecurity. Just last year, Growing Hope Globally hosted 130 U.S. projects. They oversaw 47 agricultural development programs in 30 countries, and they helped more than 200,000 people find lasting solutions to hunger.

I am sure my Senate colleagues join me in congratulating Growing Hope Globally’s 25-year journey. I look forward to supporting this important organization, and seeing all you will accomplish in the next 25 years.●

TRIBUTE TO DAVID STAMEY

• Mr. DAINES. Mr. President, today I have the distinct honor of recognizing David Stamey, chief of emergency

services for Stillwater County, MT, for his dedication to keeping his community safe, no matter what disaster may ensue.

David has served Stillwater County as the chief of emergency services for nearly a year and a half, and since assuming his position in April of 2022, he has managed several disasters that few county DES coordinators would see in a lifetime.

Just 2 months after stepping into his role, David was tasked with responding to historic 500-year flooding throughout the region. When the substantial amount of snow and heavy rainfall from earlier that spring met the rapidly rising temperatures in June, the snowmelt and water runoff sparked immediate flooding throughout the Yellowstone Valley. Agricultural land, homes, roads, bridges, and critical infrastructure took a significant hit. The Sibanye-Stillwater Mine in Nye, the world’s only viable platinum and palladium mining operation outside South Africa and Russia, was forced to suspend operations for roughly 6 weeks due to a road that provided entry to the mine being washed out. David continued to work tirelessly with local, State, and Federal partners to ensure the road would be restored in a timely manner and that his community at large remained on a swift path to recovery.

Most recently, a portion of a train headed westbound near Reed Point derailed while crossing a bridge over the Yellowstone River. Thankfully, there were no reported injuries, but there were multiple railcars submerged in the river releasing asphalt downstream. About a week later, all of the railcars involved in the derailment were removed from the scene, and after just 28 days post outage, the bridge was newly constructed, allowing the first train to cross over safely as crews continue to work diligently to remove remaining asphalt from the river. Thanks to David’s effective leadership and coordination within the Unified Command structure, train service was restored while never compromising anyone’s health or safety.

It is my distinct honor to recognize David Stamey for his unwavering commitment to keeping residents of Stillwater County safe. He has selflessly dedicated 30 years of his life to disaster and emergency services, and I am confident his passion and expertise in this field will benefit folks in Stillwater County and across the State of Montana for years to come. Thank you for your continued efforts to keep Montanans safe, David. You make Montana proud.●

TRIBUTE TO BILLINGS HIGH SCHOOL CLASS OF 1973

• Mr. DAINES. Mr. President, today I have the honor of congratulating the Billings High School class of 1973. These graduates grew up in the shadow of the Cold War, they all remember the

day that President Kennedy was shot, and they came of age during a turbulent and restless period of our country. They saw protests over Vietnam, civil rights, and social unrest. They lived through the space race, listening on transistor radios as rockets launched into space. They memorized the names of all the Mercury astronauts, saw men land and walk on the moon. Some veterans in the class served through four wars, countless interventions, and many shows of force. They saw phones go from rotary dials with party lines, to cell phones and smart watches that can access almost any piece of information with the touch of a button. They saw television go from black and white boxes to 85-inch flat screen TVs streaming color events live via satellite around the world. They saw the dawn of computers, survived Y2K, and lived to see the birth of artificial intelligence. They have lived through two different centuries, and they saw and embraced more new technology than any previous generation. Now in their late 60s, they have children, grandchildren, and great-grandchildren who will lead the country into the next millennia.

It is my distinct honor to recognize the Billings High School class of 1973 for their incredible legacy. They have etched their name on those majestic sandstone rim rocks that grace their town.●

150TH ANNIVERSARY OF THE U.S. ARMY CORPS OF ENGINEERS VICKSBURG DISTRICT

● Mrs. HYDE-SMITH. Mr. President, I am pleased to recognize the Vicksburg District of the U.S. Army Corps of Engineers—USACE—for 150 years of exceptional service to the people of Mississippi and our Nation.

Founded in 1873 when Captain William Henry Harrison Benyaure created a USACE office in Monroe, LA, the Vicksburg District now covers 68,000 square miles in Mississippi, Arkansas, and Louisiana; nine major river basins; 278 miles of the Mississippi River; and 460 miles of mainline Mississippi River levees. In 1884, the first permanent Vicksburg office was formed by Captain Eric Bergland. Vicksburg National Military Park was largely constructed by the Vicksburg District in the early 1900s. In response to the Great Mississippi Flood of 1927 and as directed by the Flood Control Act of 1928, the Vicksburg District designed and implemented an extensive flood control program, commonly referred to as the Mississippi Rivers and Tributaries—MR&T—project, which continues to serve the people of Mississippi to this day.

The benefits the Vicksburg District brings to Mississippians and the Nation are hard to quantify, but should not be taken for granted. The average annual benefits of the MR&T project alone are valued at \$1.46 billion, but the positive impacts associated with the many wa-

tersheds, ports, locks and dams, reservoirs, and flood control structures the district manages go far beyond any dollar amount.

The Vicksburg District continues to boast some of the brightest engineering minds in the world as it designs, constructs, and maintains premier civil works projects. In addition to fulfilling its mission of flood control, it also excels in its other mission areas, including navigation, hydro-power, recreation, water supply, emergency operations, and environmental restoration. I am grateful for its important work to protect the people, economy, and natural resources of Mississippi, and I look forward seeing what the Vicksburg District accomplishes in the future.●

TRIBUTE TO RON CUNNINGHAM

● Ms. LUMMIS. Mr. President, it is my privilege to welcome Ron Cunningham of Lander, WY, to the Wyoming Agriculture Hall of Fame. This induction is held during the week of the Wyoming State Fair in Douglas, and it is truly one of the highest honors to receive during one of the best annual events Wyoming has to offer.

To be inducted into the Hall of Fame is truly an honor, no matter what profession you are in. When it comes to sports, the Hall of Fame is traditionally reserved for those who were among the best at their positions, were an exemplary teammate, treated the game with respect, and created a lasting legacy for future generations of fans to admire. While the Wyoming Agriculture Hall of Fame does not take into account how well an individual may run, hit, throw, catch, or tackle, it instead considers an individual's commitment and dedication to agriculture in Wyoming and what they have done to help improve and grow this essential industry in our State. Needless to say, Ron Cunningham checks all of those boxes and then some.

Ron has spent his entire lifetime in the industry, beginning with his early years growing up on a farm in Fremont County. This exposure to agriculture led Ron to pursue further academic endeavors at Casper College and ultimately the University of Wyoming. He then discovered that he had a passion for sharing his knowledge and experience with others and moved to Nebraska to teach agriculture at a high school. Fortunately for all of us in Wyoming, Ron decided he wanted to come home and took a position on a ranch in Ten Sleep. He later accepted a supervisor position with Weed and Pest. After a couple of years, Ron took a job with the University of Wyoming Extension in Fremont County, a position he held for 38 years.

Once Ron was back in Wyoming, he became even more involved in so many ag-related activities that it really would be impossible to name them all. He left his impression on just about every person he came across, whether

it was with 4-H and FFA, planning and organizing Fremont County Farm and Ranch Days, or serving on numerous State boards and local civic organizations. He takes such pride in his work and his efforts will help ensure Wyoming agriculture continues to thrive for years to come.

With his decades of service to our State, as well as the numerous accolades and accomplishments that he has received, it goes without saying that he is absolutely worthy of the honor of being inducted into the Wyoming Agriculture Hall of Fame. I am so pleased that Ron will be joining the likes of so many others who have done so much for agriculture in our state. His legacy is something to behold and appreciate. I tip my hat to him.●

TRIBUTE TO JOHN W. KENNEDY

● Mr. MENENDEZ. Mr. President, I rise today to recognize the tireless efforts of one man to protect and defend the beating heart of the American economy: our manufacturing industry. Over a long career of service, Mr. John W. Kennedy of Madison, NJ, has advocated for greater prosperity and economic security in the Garden State. In particular, I want to thank Mr. Kennedy's outstanding work at the New Jersey Manufacturing Extension Program, or NJMEP.

Since 2012, Mr. Kennedy has led NJMEP, first as chief operating officer and then as chief executive officer, working to advance their mission of providing U.S. manufacturers with the resources they need to succeed. Supported by the National Institute of Standards and Technology, NJMEP has spread innovative technologies and best practices across New Jersey, boosting operational excellence, innovation and growth, and workforce development.

Studies have shown that for every dollar invested into NJMEP, they have in turn generated over \$13 of added value. This remarkable return on investment goes hand in hand with the mission-oriented focus of the program which seeks to serve those who serve others. Today, Garden State residents can thank NJMEP for creating hundreds of thousands of highly skilled manufacturing jobs and contributing more than \$7 billion in economic value.

Make no mistake, NJMEP has been able to succeed thanks to Mr. Kennedy's shining leadership. When his colleagues speak of him, the first thing they mention is his signature emails fired off every morning at 5:30 AM. This unflagging work ethic and unbridled passion for improving the lives of those around him is an inspiration to us all. He is the reason that NJMEP was able to grow from a 12-person operation to a well-oiled machine of more than 50 employees, catapulting it as the top-rated manufacturing extension program in the country.

Three years ago, when the first COVID wave reached our shores, John
