California (Ms. PORTER) each will control 30 minutes.

The Chair recognizes the gentleman from Minnesota (Mr. STAUBER).

## GENERAL LEAVE

Mr. STAUBER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material on H.R. 3195.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. STAUBER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 3195, the Superior National Forest Restoration Act of 2024.

The district I am proud to represent, Minnesota’s Eighth Congressional District, is blessed with an abundance of mineral wealth that would allow America to lead in the 21st century.

We are home to the Duluth Complex, one of the largest undeveloped mineral deposits in the world, which includes an estimated 8 billion tons of copper, nickel, cobalt, and other platinum group metals. In fact, this deposit is the world’s second largest copper deposit, with 34 percent of the United States’ total reserves and the world’s third largest nickel deposit with 95 percent of United States’ total reserves.

These minerals are experiencing large upswings in demand due to their use in battery storage, electric vehicles, and other rapidly expanding sectors. Domestic production of these minerals is critical to our national security and our supply chain security.

The deposits in northern Minnesota could provide enough copper for over 70 million electric vehicles and nickel for 3.5 million battery packs.

The Duluth Complex and its abundant resources lies under the Superior National Forest and throughout the iron range. The Superior National Forest is a working industrial forest where timber harvesting and mining are desirable activities.

Regrettably, in January of 2022, the Biden administration caved to radical antijobs, antimining activists by canceling two-decade-old mineral leases held by Twin Metals Minnesota in the Superior National Forest.

At the same time, the Biden administration began the withdrawal process on nearly a quarter million acres of land in the region. The finalized withdrawal of 225,504 acres went into effect in January of 2023 and prohibits the extraction of any mineral, including copper, nickel, cobalt, platinum, and iron ore for the next 20 years.

Northern Minnesota, home to the historic iron range, has been mining iron ore, a critical component in steelmaking, for over 140 years. This is the iron ore that provided the military might to the United States and our Allies to fight and win World War II. The iron ore mined in the region accounts for over 80 percent of America’s domestically produced steel. Now, the Biden
