## ARMS SALES NOTIFICATION

Mr. RISCH. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of certain proposed arms sales as defined by that statute. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Senate Foreign Relations Committee.

In keeping with the committee's intention to see that relevant information is still available to the full Senate, I ask unanimous consent to have printed in the RECORD the notifications that have been received. If the cover letter references a classified annex, then such an annex is available to all Senators in the office of the Foreign Relations Committee, room SD-423.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF STATE,  
Washington, DC.

## POLICY JUSTIFICATION

Denmark—Joint Air-to-Surface Standoff Missiles with Extended Range

The Government of Denmark has requested to buy two hundred (200) AGM-158 Joint Air-to-Surface Standoff Missiles with Extended Range (JASSM-ER). The following non-major defense equipment items will also be included: JASSM test and support equipment, and containers; spare parts, consumables, accessories, and repair and return support; weapon system support; precise positioning Global Positioning System; classified and unclassified software delivery and support; classified and unclassified publications and technical documentation; site surveys; transportation support; U.S. Government and contractor engineering, technical, and logistics support services; and other related elements of logistics and program support. The estimated total cost is \$842 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Denmark's capability to meet current and future threats by providing the Royal Danish Air Force (RDAF) with the ability to conduct long-range precision strikes, strengthening RDAF F-35 aircraft capabilities. Denmark will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, located in Orlando, FL. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Denmark.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 26-73

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The AGM-158 Joint Air-to-Surface Standoff Missile with Extended Range (JASSM-ER) All Up Round is a low-observable, highly-survivable, subsonic cruise missile designed to penetrate next-generation air defense systems enroute to target. The JASSM-ER is designed to kill hard, medium-hardened, soft, and area type targets. The

extended range over the baseline was obtained by going from a turbo jet to a turbofan engine and by reconfiguring the fuel tanks for added capacity. Precise positioning is provided by either selective availability anti-spoofing module or M-Code.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Denmark can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Denmark.

#### POLICY JUSTIFICATION

Italy—Assault Amphibious Vehicles

The Government of Italy has requested to buy three (3) Assault Amphibious Vehicles (AAVs), Command Variant (AAVC-7A1); and four (4) Assault Amphibious Vehicles, Recovery Variant (AAVR-7A1). The following non-MDE items will also be included: support equipment; radar-scattering camouflage netting kits; unclassified technical manuals; and other related elements of program and logistics support. The estimated total cost is \$30.6 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a NATO Ally that is a force for political stability and economic progress in Europe.

The proposed sale will improve Italy's capability to meet current and future threats by modernizing and ensuring Italy's continued expeditionary capability to counter regional threats. Italy will have no difficulty absorbing these articles and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The AAVs will be transferred from United States Marine Corps stock. At this time, the U.S. Government is not aware of any offset agreement proposed in connection with this potential sale. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Italy.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The Assault Amphibious Vehicle (AAV) is a fully tracked amphibious landing vehicle used to maneuver surface assault elements of the landing force. Its equipment from assault shipping during amphibious operations to inland objectives and to conduct mechanized operations and related combat support in subsequent operations ashore.

2. The AAVC-7A1 family of vehicles includes the Command Variant, which is an armored assault amphibious full-tracked landing vehicle. The vehicle provides a mobile task force communication center in amphibious operations from ship to shore through surf zone to inland objectives.

3. The AAVR-7A1 family of vehicles includes the Recovery Variant, which is an armored assault amphibious full-tracked vehicle. The vehicle is designed to recover vehicles and provide field support maintenance.

4. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that Italy can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Italy.
