SEC. _____. SENSE OF THE SENATE REGARDING FISCAL YEAR 2027 FUNDING DISPARITIES AND DOMESTIC NEEDS.

(a) FINDINGS.—The Senate finds the following:

(1) The National Defense Authorization Act for Fiscal Year 2027 reported by the Committee on Armed Services of the Senate authorizes an unprecedented $1,150,000,000,000 for national defense programs, reinforcing a continuous and disproportionate escalation in military spending.

(2) The United States is currently facing a severe affordability crisis, with millions of people in the United States and working families struggling with the skyrocketing costs of basic necessities, including food, housing, and healthcare.

(3) On July 4, 2025, the enactment of the Act entitled ''An Act to provide for reconciliation pursuant to title II of H. Con. Res. 14'', approved July 4, 2025 (Public Law 119–21; 139 Stat. 72) (commonly known as, and in this section referred to as, the ''One Big Beautiful Bill Act''), mandated deep and devastating structural cuts to essential nondefense safety net programs.

(4) The cuts and administrative hurdles mandated by the One Big Beautiful Bill Act are projected to slash over $1,000,000,000,000 in funding for the Medicaid program under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.) (in this section referred to as ''Medicaid'') and the Patient Protection and Affordable Care Act (Public Law 111–148; 124 Stat. 119) over the next decade, ripping health care coverage away from 15,000,000 people in the United States, and putting over 750 hospitals, nursing homes, and clinics at risk of closure.

(5) Concurrently, sweeping rollbacks and funding restrictions have severely impacted access to the supplemental nutrition assistance program established under the Food and Nutrition Act of 2008 (7 U.S.C. 2011 et seq.) (in this section referred to as ''SNAP''), a vital lifeline that millions of women and children depend on to prevent food insecurity and hunger.

(6) National security depends not only on military readiness, but also on the economic well-being, health, and stability of the people of the United States.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the massive funding disparity between defense expenditures and domestic nondefense investments for fiscal year 2027 is unacceptable;

(2) it is unconscionable to authorize over $1,100,000,000,000 in defense spending while at the same time forcing deep cuts to programs like SNAP and Medicaid that millions of people in the United States rely on to survive;

(3) this spending gap will only grow with the proposed plans for an additional $350,000,000,000 of defense spending through budget reconciliation and upwards of $80,000,000,000 or more in supplemental defense spending requested to cover operational shortfalls due to the unauthorized war with Iran; and

(4) Congress must reject this imbalanced approach to Federal spending and commit to a budget strategy that balances national security obligations with the urgent, fundamental human needs of everyday people in the United States.

SA 6025. Mr. CRAPO (for himself and Mrs. SHAHEEN) submitted an amendment intended to be proposed by him to the bill S. 4784, to authorize appropriations for fiscal year 2027 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place in subtitle G of title X, insert the following:

(A) for the purpose of preventing a veteran from employment;

(1) information about addiction services, suicide prevention services, mental health services, and other related services provided by the Department of Veterans Affairs; and

(2) information on the use and application of covered medications.

(f) REPORT.—

(1) IN GENERAL.—Not later than 30 days before the completion of the pilot program under this section, the Secretary shall submit to Congress a report on the pilot program.

(2) ELEMENTS.—The report required by paragraph (1) shall include the following:

(A) The number of veterans who received a covered medication under the pilot program, disaggregated by those enrolled in the system of annual patient enrollment of the Department of Veterans Affairs under section 1705(a) of title 38, United States Code, and those not enrolled in such system.

(B) An assessment of the feasibility of expanding the pilot program to provide covered medications to immediate family members of veterans.

(C) Any considerations associated with continuing, expanding, or making permanent the pilot program.

(D) Any other recommendations of the Secretary with respect to modifying or continuing the pilot program.

(g) DEFINITIONS.—In this section:

(1) COVERED MEDICATION.—The term ''covered medication'' means any opioid overdose rescue medication, such as naloxone.

SEC. 1702. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) artificial intelligence models owned by United States private sector entities are essential for advancing economic and national security interests of the United States;

(2) many of the most advanced artificial intelligence models owned by United States entities are ‘‘closed-source models’’ whose unique technical characteristics are not openly shared or published;

(3) the unauthorized acquisition of model capabilities, such as model weights, model architectures, and other technical characteristics of closed-source artificial intelligence models, by persons of concern through model

extraction attacks represents a threat to the national security and foreign policy interests of the United States, as well as the intellectual property rights and economic competitiveness of United States entities;

(4) the United States Government, in cooperation with private owners of closed-source artificial intelligence models, should take steps to identify, punish, and deter model extraction attacks on the protected capabilities of closed-source artificial intelligence models by persons of concern;

(5) model extraction attacks against United States closed-source artificial intelligence models allow foreign adversaries a short cut to acquiring advanced artificial intelligence capabilities; and

(6) authorized model training practices that adhere to the terms of service or are otherwise consistent with contractual terms set by the owners of closed-source artificial intelligence models are a legitimate research method that play an important role in artificial intelligence research and are fundamentally distinct from model extraction attacks addressed by this title.

SEC. 1703. DEFINITIONS.

(B) EXCEPTION.—For purposes of subparagraph (A), an entity that creates or transmits location information to enable persons within countries of concern to access the internet for purposes of freedom of expression is not, on the basis of that activity alone, a fraudulent account network provider.

(7) MODEL EXTRACTION ATTACK.—

(A) IN GENERAL.—The term ''model extraction attack'' means the unauthorized extracting of the capabilities of a closed-source artificial intelligence model to replicate, develop, train, or improve another artificial intelligence model, if such extraction—

(6) in 1850, Congress enacted the Act of September 28, 1850 (sections 2479 through 2481 of the Revised Statutes (43 U.S.C. 982 through 984)) (commonly known and referred to in this subsection as the ''Swamp Land Act''), which authorized the State of Arkansas and other States, including the State of Michigan, to ''construct the necessary levees and drains to reclaim'' certain unsold ''swamp and overflowed lands, made unfit thereby for cultivation'' and stating that those lands ''shall remain unsold at the passage of this act'';

(7) following enactment of the Swamp Land Act, the State claimed thousands of acres of swamp land in the State pursuant to that Act;

(8) between 1893 and 1937, the General Land Office patented 2,743 acres of land to the State that were located within the exterior boundaries of the Reservation;

(9) the right of the Community to use and occupy the unsold land within the Reservation had not been extinguished when the United States patented the Reservation Swamp Lands to the State;

(10) in 1852, Congress enacted the Act of August 26, 1852 (10 Stat. 35, chapter 92) (referred to in this subsection as the ''Canal Land Act''), to facilitate the building of the Sault Ste. Marie Canal at the Falls of the St. Mary's River, to connect Lake Superior to Lake Huron;

(11) pursuant to the Canal Land Act, the United States granted the State the right to select 750,000 acres of unsold public land within the State to defray the cost of construction of the Sault Ste. Marie Canal;

(12) the State identified and selected, among other land, a minimum of 1,333.25 and up to 2,720 acres within the exterior boundaries of the Reservation;

(14) the Secretary noted that the approval described in paragraph (13) was ''subject to any valid interfering rights'';

(15) the 1854 Treaty set apart from the public domain all unsold land within the Reservation to the Community as of September 30, 1854, which preceded the date on which the State established legally effective title to the Reservation Canal Lands;

(17) in December 2021, the Department of the Interior stated that ''We have carefully reviewed pertinent documents, including the Tribe's expert reports, and have determined that the Tribe's claims to the Swamp Lands and Canal Lands have merit'';

(18) the United States, through the actions of the General Land Office, deprived the Community of the exclusive use and occupancy of the Reservation Swamp Lands and the Reservation Canal Lands within the Reservation, without just compensation as required under the Takings Clause of the Fifth Amendment to the Constitution of the United States;

(19) the loss of the Reservation Swamp Lands and the Reservation Canal Lands without just compensation has—

(A) impacted the exercise by the Community of cultural, religious, and subsistence rights on the land;

(B) caused a harmful disconnect between the Community and its land;

(C) impacted the ability of the Community to fully exercise its economy within the Reservation; and

(D) had a negative economic impact on the development of the economy of the Community;

(20) certain non-Indian individuals, entities, and local governments occupy land within the boundaries of the Reservation—

(B) to ensure protection of the ownership of the Reservation Swamp Lands and the Reservation Canal Lands by non-Indian occupants of the Reservation, through the settlement of the claims of the Community to that land, and through that action, the relief of any clouds on title;

(22) a settlement will allow the Community to receive just compensation and the local landowners to obtain clear title to land, without long and protracted litigation that would be both costly and detrimental to all involved; and

(23) this section achieves both justice for the Community and security for current landowners through a restorative and nonconfrontational process.

Subtitle H—Chip Security Act

SEC. 1094. SHORT TITLE.

This subtitle may be cited as the ‘‘Chip Security Act’’.

SEC. 1095. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) technology developed in the United States should serve as the foundation for the global ecosystem of artificial intelligence to advance the foreign policy and national security objectives of the United States and allies and partners of the United States;

(2) the United States can foster goodwill, strengthen relationships, and support innovative research around the world by providing allies and partners of the United States with advanced computing capabilities;

(3) advanced integrated circuits and computing hardware that is exported from the United States must be protected from diversion, theft, and other unauthorized use or exploitation in order to bolster the competitiveness of the United States and protect the national security of the United States;

(4) illegal diversion of advanced integrated circuits and computing hardware, particularly illegal diversion to the People's Republic of China and the Russian Federation, is a significant and growing issue that undermines the United States' export controls and threatens the United States' national security;

(5) implementing chip security mechanisms will improve enforcement of export control laws of the United States, assist allies and partners with guarding computing hardware, and enhance protections from bad actors looking to access, divert, or tamper with advanced integrated circuits and computing hardware; and

(6) implementing chip security mechanisms may help with the detection of smuggling or exploitation of advanced integrated circuits and computing hardware, thereby allowing for increased flexibility in export controls and opening the door for more international partners to receive streamlined and larger shipments of advanced computing hardware.

SEC. ___. SENATOR PAUL SIMON STUDY ABROAD PROGRAM.

(a) FINDINGS.—Congress makes the following findings:

(1) To prepare students for success in the modern global economy, opportunities for study abroad should be included as part of a well-rounded education.

(2) Study abroad programs provide students with unparalleled access to international knowledge, an unmatched opportunity to learn world languages, and a unique environment for developing a better understanding of other societies, all of which are knowledge and skills needed in today's global economy.

(3) Only 10 percent of United States college students study abroad before they graduate, leaving 90 percent of graduates entering the workforce without the international skills, knowledge, and experiences afforded by study abroad programs that will position them for success in careers that advance United States interests abroad.

(4) According to Open Doors 2025, published by the Institute of International Education in partnership with the Department of State, of the nearly 300,000 United States college students who studied abroad for credit during the 2023–2024 academic year, 34 percent were men, 11 percent had a disability, and fewer than 2 percent attended a community college in the United States.

(5) Congress authorized the establishment of the Commission on the Abraham Lincoln Study Abroad Fellowship Program (referred to in this section as the ''Lincoln Commission'') under section 104 of the Miscellaneous Appropriations and Offsets Act, 2004 (division H of Public Law 108–199). Pursuant to its mandate, the Lincoln Commission submitted a report to Congress and to the President containing its recommendations for greatly expanding the opportunity for students at institutions of higher education in the United States to study abroad, with special emphasis on studying in developing nations.

(6) According to the Lincoln Commission, ''[e]xperience shows that leadership from administrators and faculty will drive the number of study abroad participants higher and improve the quality of programs. Such leadership is the only way that study abroad will become an integral part of the undergraduate experience.'' A competitive grant program is necessary to encourage and support such leadership.

(7) Student health, safety, and security while studying abroad is, and must continue to be, a priority for institutions of higher education and study abroad programs.

(8) According to Open Doors, study abroad participation at colleges and universities in the United States plummeted by 91 percent during the 2020–2021 academic year due to the COVID–19 pandemic. While study abroad numbers have rebounded, according to the latest Open Doors data, participation remains 14 percent below pre-pandemic levels.

(9) In today's global society, increasing access to study abroad for students at institutions of higher education across the United States is critical to ensuring that those students gain the skills, knowledge, and experiences necessary to maintain the leadership and security of the United States in tackling international challenges that affect the American people.

(b) PURPOSES.—The purposes of this section are—

(1) to ensure that significantly more students have access to quality study abroad opportunities, especially among students receiving Federal financial aid;

(2) to ensure that study abroad participation reflects all types of students and institutions of higher education in the United States;

(3) to expand study abroad opportunities to more destinations, as recommended by the Lincoln Commission; and

(4) to encourage a greater commitment by United States institutions of higher education to expand study abroad opportunities.

TITLE ______—DISRUPT EXPLICIT FORGED IMAGES AND NON-CONSENSUAL EDITS ACT OF 2026

SEC. ___01. SHORT TITLE.

This title may be cited as the ''Disrupt Explicit Forged Images And Non-Consensual Edits Act of 2026'' or the ''DEFIANCE Act of 2026''.

SEC. ___02. FINDINGS.

Congress finds the following:

(1) Digital forgeries, often called deepfakes, are synthetic images and videos that look realistic. The technology to create digital forgeries is now ubiquitous and easy to use. Hundreds of apps are available that can quickly generate digital forgeries without the need for any technical expertise.

(2) Digital forgeries can be wholly fictitious but can also manipulate images of real people to depict sexually intimate conduct that did not occur. For example, some digital forgeries will paste the face of an individual onto the body of a real or fictitious individual who is nude or who is engaging in sexual activity. Another example is a photograph of an individual that is manipulated to digitally remove the clothing of the individual so that the person appears to be nude.

(3) The individuals depicted in such digital forgeries are profoundly harmed when the content is produced with intent to disclose, disclosed, or obtained without the consent of those individuals. These harms are not mitigated through labels or other information that indicates that the depiction is fake.

(4) It can be destabilizing to victims whenever those victims are depicted in intimate digital forgeries against their will, as the privacy of those victims is violated and the victims lose control over their likeness and identity.

(5) Victims can feel helpless because the victims—

(A) may not be able to determine who has created the content; and

(B) do not know how to prevent further disclosure of the intimate digital forgery or how to prevent more forgeries from being made.

(6) Victims may be fearful of being in public out of concern that individuals the victims encounter have seen the digital forgeries. This leads to social rupture through the loss of the ability to trust, stigmatization, and isolation.

(7) Victims of non-consensual, sexually intimate digital forgeries may experience depression, anxiety, and suicidal ideation. These victims may also experience the ''silencing effect'' in which the victims withdraw from online spaces and public discourse to avoid further abuse.

(8) Digital forgeries are often used to—

(A) harass victims, interfering with their employment, education, reputation, or sense of safety; or

(B) commit extortion, sexual assault, domestic violence, and other crimes.

(9) Because of the harms caused by non-consensual, sexually intimate digital forgeries, such digital forgeries are considered to be a form of image-based sexual abuse.

(3) in addition to being legally required, compliance with the law of war reinforces military effectiveness, helps maintain public support and political legitimacy, and can encourage reciprocal adherence by the adversary or adherence by adversaries in future conflicts;

(4) obligations under the law of war include those that address the protection of civilians, including, among other things—

(A) prohibitions on attacks directed at civilians and civilian objects, indiscriminate attacks, and attacks expected to cause excessive harm to civilians relative to the anticipated military advantage;

(B) the requirement to take all feasible precautions to avoid, or in any event minimize, harm to civilians; and

(C) the presumption in cases of doubt as to whether a person is a civilian, that such person shall be considered a civilian;

(5) the protection of civilians is fundamentally consistent with the effective, efficient, and decisive use of force in pursuit of United States national interests;

(6) minimizing civilian casualties can further mission objectives, help maintain the support of partner governments and vulnerable populations, and enhance the legitimacy and sustainability of United States operations critical to national security; and

(7) the United States therefore routinely imposes certain heightened policy standards that are more protective than the requirements of the law of war that relate to the protection of civilians.

SA 6164. Mr. DURBIN submitted an amendment intended to be proposed by him to the bill S. 4784, to authorize appropriations for fiscal year 2027 for military activities of the Department of Defense, for military construction,

and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

Subtitle ____—Runaway and Homeless Youth

SEC. ____. SHORT TITLE.

This subtitle may be cited as the ''Runaway and Homeless Youth and Trafficking Prevention Act of 2026''.

SEC. ____. FINDINGS.

Section 302 of the Runaway and Homeless Youth Act (34 U.S.C. 11201) is amended to read as follows:

''SEC. 302. FINDINGS.

''Congress finds that—

''(1) youth who have become homeless or who leave and remain away from home without parental permission are at risk of developing, and have a disproportionate share of, trauma, substance use disorders, and serious health, behavioral, social, and emotional challenges because they lack sufficient resources to obtain care and may live on the street for extended periods of time, thereby endangering themselves;

''(2) many such young people, because of their age and situation, are urgently in need of temporary shelter and services, including services that consider their age, gender, and social and developmental needs, are culturally and linguistically appropriate, and acknowledge the environment of youth seeking these services;

''(3) research has documented the fluid experiences of homelessness of youth, where many youth experience 2 or more different types of homelessness, including couch surfing, living in motels, and staying on the streets;

''(4) research has documented that persons who are members of historically marginalized and underserved communities of color, LGBTQ youth, youth who do not complete high school or achieve a high school equivalency, youth involved in the child welfare system, youth who have been involved with the criminal justice system, and pregnant and parenting youth are most likely to experience homelessness in the United States while unaccompanied by a parent or adult;

''(5) services to such young people should be developed and provided using a positive youth development approach that ensures a young person a sense of—

''(A) safety and structure;

''(B) belonging and membership;

''(C) self-worth, empowerment, voice, and choice;

''(D) independence and control over one's life; and

''(E) closeness in interpersonal relationships;

''(6) in view of the interstate nature of the problem, it is the responsibility of the Federal Government to develop an accurate national reporting system to report the prevalence of youth homelessness, and to assist in the development of an effective system of care (including prevention services and aftercare services, short-term housing with services, extended housing with supportive services, and street outreach services) outside the welfare system and the law enforcement system, in collaboration with public assistance systems, the education system, and the child welfare system;

''(7) to make a successful transition to adulthood, youth who run away, youth experiencing homelessness, and youth living in the street need a safe and stable place to live, connections to caring adults, and opportunities to complete high school or earn a general equivalency degree, learn job skills, and obtain employment;

''(8) improved coordination and collaboration at the Federal level between programs that serve runaway and homeless youth are necessary for the development of a long-term strategy for responding to the needs of this population;

''(9) runaway and homeless youth are at a high risk of substance use disorders and becoming victims of sexual exploitation and trafficking;

''(10) since research has shown that the prevalence of homelessness among youth is similar in rural and urban communities, runaway and homeless youth programs, such as those funded under this title, are integral services that every community should provide, regardless of the size of the community; and

''(11) runaway and homeless youth programs, such as those funded under this title—

''(A) are expert adolescent service providers and integral community partners for the child welfare and juvenile justice systems as many youth exit these systems to homelessness; and

''(B) work to reunify youth with their family when safe and appropriate.''.

Congress finds that—

(1) critical minerals and materials are essential to the ongoing economic and national security of the United States, playing a vital role in the manufacturing, transportation, medical, technology, defense, and energy sectors;

(2) the global demand for critical minerals and materials has been rapidly increasing due to advancements in technology, whether defense, dual-use, or commercial, and the increasing adoption of renewable energy sources and next-generation automotive systems, all of which rely heavily on critical minerals and materials for the production of batteries, solar panels, wind turbines, high-speed computing, advanced magnetic systems, and other high-tech applications;

(3) the People's Republic of China—

(A) currently controls a significant portion of the global supply chain for critical minerals and materials through extensive mining, integrated midstream operations, significant domestic subsidies and incentives, and strategic investments in resource-rich countries, dominating the global market infrastructure for critical minerals and materials and enhancing the ability of the People's Republic of China to manipulate pricing to the detriment of competitors;

(B) centrally controls its dominant market share across multiple critical mineral vertical markets, preventing fair competition and hindering the ability of United States firms and firms in partner countries to innovate and scale production;

(C) predatorily leverages its position as sponsor or consumer, as applicable, over mining projects globally, resulting in a dearth of feedstocks to the great detriment of downstream industries, regions, and countries, including the United States;

(D) operates integrated supply chains that are subservient to the Chinese state and are calibrated to weaponize influence over prices and volumes in the contest for access to critical minerals and materials, as well as the end-use components and applications produced from critical minerals and materials; and

(E) acts to undercut efforts in the United States and partner countries to develop alternative sources of supply;

(4) producers of critical minerals and materials in the United States often face artificially low prices set by supply chains controlled by the People's Republic of China, discouraging private investment in domestic extraction and processing;

(5) the lack of transparent, competitive, and market-driven pricing mechanisms for critical minerals and materials outside of the People's Republic of China compounds market problems, creating systemic risk and limiting the viability of an independent supply chain for critical minerals and materials in the United States;

(6) the United States is heavily reliant on imports for many of the most critical minerals and materials, including rare earth elements, making the United States vulnerable to supply disruptions, geopolitical tensions, and economic manipulation by countries that dominate the market, specifically the People's Republic of China;

(7) the vulnerabilities to the United States defense industrial base posed by reliance on imports of critical minerals and materials are significant, and given the long lead times for investments in both mining and processing of critical minerals, domestic critical

minerals production projects are particularly susceptible to price shocks induced by the People's Republic of China, which can depress critical mineral prices for an extended period;

(8) increasing domestic primary feedstock production, processing, conversion, recycling, reuse, and repurposing to advanced materials and products, as well as increasing alternative market supply in partner countries, are imperative to reduce the impact of market manipulation by foreign state actors, such as the People's Republic of China;

(9) the United States must ensure that a stable and secure supply chain of essential resources is available to our domestic innovation and manufacturing ecosystems;

(10) sustainable and responsible corporate behavior in the direct operations of companies and across their global value chains is important to ensuring a resilient domestic critical minerals supply;

(11) investments in domestic extraction and processing infrastructure, as well as reuse, repurposing, and recycling, are necessary to build a resilient and diversified supply chain for critical minerals and materials, supporting the economic growth and national security interests of the United States; and

(12) government support to develop and ensure the integrity of Western and partner country markets for critical minerals and materials as a countermeasure against the anti-competitive tactics of the People's Republic of China and the supply chain co-collaborators of the People's Republic of China will fill the most acute strategic gap, which cannot be otherwise achieved by private industry participants acting alone.

Subtitle F—U.S.-South Africa Bilateral Relations Review Act

SEC. 1281. SHORT TITLE.

This subtitle may be cited as the ''U.S.-South Africa Bilateral Relations Review Act''.

SEC. 1282. FINDINGS.

Congress finds the following:

(1) The actions of the African National Congress (ANC), which since 1994 has held a governing majority and controlled South Africa's executive branch, are inconsistent with its publicly stated policy of nonalignment in international affairs.

(2) In contrast to its stated stance of nonalignment, the Government of South Africa has a history of siding with malign actors, including Hamas, a United States-designated Foreign Terrorist Organization and a proxy of the Iranian regime, and continues to pursue closer ties with the People's Republic of China (PRC) and the Russian Federation.

(3) The Government of South Africa's support of Hamas dates back to 1994, when the ANC first came into power, taking a hardline stance of consistently accusing Israel of practicing apartheid.

(4) Following Hamas' unprovoked and unprecedented horrendous attack on Israel on October 7, 2023, where Hamas terrorists killed and kidnapped hundreds of Israelis, members of the Government of South Africa and leaders of the ANC have delivered a variety of antisemitic and anti-Israel-related statements and actions, including—

(A) on October 7, 2023, South Africa's Foreign Ministry released a statement expressing concern of ''escalating violence'', urging Israel's restraint in response, and implicitly blaming Israel for provoking the attack through ''continued illegal occupation of Palestine land, continued settlement expansion, desecration of the Al Aqsa Mosque and Christian holy sites, and ongoing oppression of the Palestinian people'';

(B) on October 8, 2023, the ANC's national spokesperson, Mahlengi Bhengu-Motsiri, said of the devastating Hamas attack, ''the decision by Palestinians to respond to the brutality of the settler Israeli apartheid regime is unsurprising'';

(C) on October 14, 2023, President Cyril Ramaphosa of South Africa accused Israel of ''genocide'' in statements during a pro-Palestinian rally;

(D) on October 17, 2023, South African Foreign Minister Naledi Pandor accepted a call with Hamas Leader Ismail Haniyeh;

(E) on October 22, 2023, South African Foreign Minister Naledi Pandor visited Tehran and met with President Raisi of the Islamic Republic of Iran, which is actively funding Hamas;

(F) on November 7, 2023, in a parliamentary address Foreign Minister Pandor called for the International Criminal Court to charge Israeli Prime Minister Benjamin Netanyahu with war crimes;

(G) on November 17, 2023, South Africa, along with 4 other countries, submitted a joint request to the International Criminal Court for an investigation into war crimes being committed in the Palestinian territories;

(H) on December 5, 2023, the ANC hosted three members of Hamas in Pretoria, including Khaled Qaddoumi, Hamas's representative to Iran, and Bassem Naim, a member of Hamas's political bureau in Gaza;

(I) on December 29, 2023, South Africa filed a politically motivated suit in the International Court of Justice wrongfully accusing Israel of committing genocide;

(J) South African Foreign Minister Pandor, who—

(i) was quoted in March 2024 as saying that South Africa will arrest Israeli-South Africans who are fighting in the Israeli Defense

Forces upon their return home and could strip them of their South African citizenship; and

(ii) has implicitly encouraged protests outside of the United States Embassy;

(K) on October 7, 2024, the ANC commemorated only the Palestinian lives lost to Israel, while accusing Israel of genocide;

(L) in October 2024, South Africa filed its Memorial to the International Court of Justice, accusing Israel of genocidal actions to depopulate Gaza through mass death and displacement;

(M) in November 2024, South Africa appointed Ebrahim Rasool as their Ambassador to the United States, who previously hosted senior Hamas officials to South Africa when he was the Premier of the Western Cape and, in 2020, was a speaker at an annual event hosted by the Iranian regime to celebrate Hezbollah's resist ance against Israel; and

(N) the ANC's ongoing attempt to rename the street that the United States Consulate in Johannesburg is located on as ''Leila Khaled Drive'', including a quote from ANC first Deputy Secretary General Nomvula Mokonyane stating, ''We want the United States of America embassy to change their letterhead to Number 1 Leila Khaled Drive.''.

(5) The Government of South Africa has pursued increasingly close relations with the Government of the Russian Federation, which has been accused of perpetrating war crimes in Ukraine and indiscriminately undermines human rights. South Africa's robust relationship with Russia spans the military and political space, including—

(A) allowing a United States-sanctioned Russian cargo ship, the Lady R, to dock and transfer arms at a South African naval base in December 2022;

(B) hosting offshore naval exercises, entitled ''Operation Mosi II'', carried out jointly with the PRC and Russia, between February 17 and 27, 2023, corresponding with the 1-year anniversary of Russia's unjustified and unprovoked invasion of Ukraine;

(C) authorizing a United States-sanctioned Russian military cargo airplane to land at a South African Air Force Base;

(D) reneging on its initial call for the Russian Federation to immediately withdraw its forces from Ukraine and actively seeking improved relations with Moscow since February 2022;

(E) dispatching multiple high-level official delegations to Russia to further political, intelligence, and military cooperation;

(F) United States sanctioned oligarch Viktor Vekselberg donating $826,000 to the ANC in 2022; and

(G) the ANC publishing an article in their newspaper, ANC Today, in October 2024 promoting Russian propaganda about the war in Ukraine.

(6) Interactions between the Governments of South Africa the People's Republic of China and ANC interactions with the Chinese Communist Party (CCP), who are committing gross violations of human rights in the Xinjiang province and implement economically coercive tactics around the globe, undermine South Africa's democratic constitutional system of governance, as exemplified in—

(A) ongoing ANC and CCP inter-party cooperation, especially with the fundamental incompatibility between the civil and democratic rights guaranteed in South Africa's Constitution and the CCP's routine suppression of free expression and individual rights;

(B) the recruitment of former United States and NATO fighter pilots to train Chinese People's Liberation Army pilots at the Test Flying Academy of South Africa, which the Department of Commerce added to the Entity List on June 12, 2023;

(C) South Africa's hosting of 6 PRC Government-backed and CCP-linked Confucius Institutes, a type of entity that a CCP official characterized as an ''important part of the CCP's external propaganda structure'', the most of any country in Africa;

(D) South Africa's participation in a political training school opened in Tanzania funded by the Chinese Communist Party where it trains political members of the ruling liberation movements in six Southern African countries. The school instills CCP ideology into the next-generation of African leaders and attempts to export the CCP's system of party-run authoritarian governance to the African continent;

(E) cooperation with the PRC under the PRC's global Belt and Road Initiative which, while trade and infrastructure-focused, is designed to expand PRC global economic, political, and security sector-related influence;

(F) the widespread presence in South Africa's media and technology sectors of PRC state linked firms that the United States has restricted due to threats to national security, including Huawei Technologies, ZTE and Hikvision, which place South African sovereignty at risk and facilitate the CCP's export of its model of digitally aided authoritarian governance underpinned by cyber controls, social monitoring, propaganda, and surveillance; and

(G) the Government of South Africa's clear appeasement to the CCP in demanding that Taiwan relocate its representative office out of Pretoria and downgrade its status to that of a trade office.

(7) The ANC-led Government of South Africa has a history of substantially mismanaging a range of state resources and has often proven incapable of effectively delivering public services, threatening the South African people and the South African economy, as illustrated by—

(A) President Cyril Ramaphosa's February 9, 2023, declaration of a national state of disaster over the worsening, multi-year power crisis caused by the ANC's chronic mismanagement of the state-owned power company Eskom, resulting from endemic, high-level corruption;

(B) the persistence of South African state-owned railway company Transnet's insufficient capacity, which has disrupted rail operations and hindered mining companies' export of iron ore, coal, and other commodities, in part due to malfeasance and corruption by former Transnet officials;

(C) an on-going outbreak of cholera, the worst in 15 years, which is due in part to the Government of South Africa's disease prevention failures, as President Ramaphosa admitted on June 9, 2023, including a failure to provide clean water to households; and

(D) rampant state capture, that emerged and grew during the administration of former President Jacob Zuma and has damaged South Africa's international standing and profoundly undermined the rule of law, continues to negatively impact the economic development prospects and living standards of the South African people while deeply damaging public trust in state governance.

(8) In November 2024, South Africa appointed Ebrahim Rasool as Ambassador to the United States. Rasool had previously made public comments describing President Trump as ''extreme'' and in March 2025, Mr. Rasool characterized President Trump as ''a white supremacist''. Secretary of State Marco Rubio subsequently declared Mr. Rasool as persona non grata in the United States.

SEC. 1283. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) it is in the national security interest of the United States to deter strategic political and security cooperation and information sharing with the PRC and the Russian Federation, particularly any form of cooperation that may aid or abet Russia's illegal war of aggression in Ukraine or its international standing or influence; and

(2) the ANC's foreign policy actions have long ceased to reflect its stated stance of nonalignment, and now directly favor the PRC, the Russian Federation, and Hamas, a known proxy of Iran, and thereby undermine United States national security and foreign policy interests.

SEC. 1284. FULL REVIEW OF THE BILATERAL RELATIONSHIP.

The President, in consultation with the Secretary of State, the Secretary of Defense, the United States Ambassador to South Africa, and the heads of other departments and agencies that play a substantial role in United States relations with South Africa, shall conduct a comprehensive review of the bilateral relationship between the United States and South Africa.

At the appropriate place in title XII, insert the following:

SEC. _____. SENSE OF THE CONGRESS URGING THE EXECUTIVE BRANCH AND LEADERS OF THE G7 AND THE EUROPEAN UNION TO SEIZE SOVEREIGN ASSETS OF THE RUSSIAN FEDERATION.

(a) FINDING.—Congress finds the following:

(1) Since the illegal invasion of Ukraine by the Russian Federation, the Russian Federation has committed widespread attacks on civilians amounting to crimes against humanity, including—

(A) widespread, systemic, and deliberate targeting of civilians by drones where civilians have been targeted for attack while going about their daily lives outside, and ambulances were struck while attempting to provide medical assistance;

(B) documented war crimes, including extrajudicial killings and torture of civilians and prisoners of war that are systemic and widespread throughout areas controlled by the Russian Federation;

(C) rape and sexual violence committed by Russian soldiers against male and female civilians and prisoners of war; and

(D) the illegal transfer of Ukrainian children to at least 210 different facilities inside the Russian Federation or areas controlled by the Russian Federation where the children are subjected to re-education and militarization.

(2) The humanitarian costs of the invasion of Ukraine have been enormous, including—

(A) approximately 14,000 documented deaths of civilians, and more than 35,458 documented civilian casualties, including 700 children killed and 2,200 children injured since the start of the war;

(B) an estimated 120,000 Ukrainian soldiers killed or missing in action;

(C) displacement of more than 10,000,000 people, with 3,600,000 displaced within Ukraine and 6,900,000 seeking refuge abroad; and

(D) indiscriminate shelling and bombing in population centers leading to the destruction of critical civilian infrastructure that will cost an estimated $524,000,000,000 to rebuild.

(3) The conduct of the Russian Federation has not only harmed Ukraine but violates Article 2(4) of the United Nations Charter requiring states to refrain from the use of force against the territorial integrity or political independence of any state.

(4) The principle of state responsibility under international law holds that a state committing an internationally wrongful act is obligated to make full reparation for the injury caused.

(5) The legal doctrine of countermeasures under customary international law permits targeted and proportionate responses to serious breaches of international obligations, including the use of seized sovereign assets to repair harm caused by such breaches.

(6) In response to the illegal aggression by the Russian Federation, members of the G7 imposed sanctions and froze Russian sovereign assets but have fallen short of confiscating such assets.

(7) The continued passive freezing of Russian sovereign assets without a clear mechanism for permanent seizure and repurposing fails to uphold the principle of accountability and undermines the deterrent value of economic sanctions.

(8) In 2024, Congress passed the Rebuilding Economic Prosperity and Opportunity for Ukrainians Act (22 U.S.C. 9521 note; Public Law 118–50)(commonly known as the ''REPO for Ukrainians Act'') to establish a domestic legal framework for the seizure and transfer of Russian sovereign assets.

(9) The United States, every member of the European Union, and all but one member of the G7 are participating states of the Organization for Security and Co-operation in Europe.

(10) On July 3, 2025, the Parliamentary Assembly of the Organization for Security and Co-operation in Europe adopted unanimously in plenary session the Porto Declaration, which ''[c]alls on OSCE participating States to unlock the full value of an estimated [$300,000,000,000 United States dollars] in Russian sovereign assets frozen across the region by repurposing the underlying principal, in sizeable increments and on a regular and timely schedule, for Ukraine until the Russian Federation ends its aggression and agrees to compensate Ukraine for damages directly resulting from the war''.

(11) The implementation of such seizure requires robust coordination with international partners to mitigate legal, diplomatic, and financial risks and to maximize legitimacy and effectiveness.

(12) Allied hesitation and lack of harmonized frameworks have impeded progress toward the actual transfer of such assets.

(13) It is in the strategic and moral interest of the United States to lead an international coalition in converting immobilized Russian sovereign assets into a funding mechanism for the recovery and global security of Ukraine.

(b) SENSE OF CONGRESS.—It is the sense of Congress that Congress—

(1) determines that the Russian Federation bears full financial responsibility for the harm caused by its unlawful war of aggression against Ukraine, and the assets of the Russian Federation should be used to satisfy that responsibility;

(2) remains steadfast in its support for the sovereignty, independence, and right to self-defense of Ukraine, and believes all available diplomatic, legal, and economic tools should be leveraged to hold the Russian Federation accountable;

(3) recommends that the executive branch advocate internationally that—

(A) the violation of international law by the Russian Federation removes its entitlement to sovereign immunity protections over assets located abroad, under the doctrine of countermeasures;

(B) international law and precedent provide a legal basis for permanent confiscation of state-owned assets in response to grave violations of the international order; and

(C) the seizure of assets is a legitimate means of supporting the reconstruction of Ukraine and deterring future acts of aggression by other states;

(4) strongly urges all countries with sovereign assets of the Russian Federation under their jurisdiction—

(A) to pursue harmonization of domestic legal authorities to provide their governments with seizure powers equivalent to the powers granted by the Rebuilding Economic Prosperity and Opportunity for Ukrainians Act (22 U.S.C. 9521 note; Public Law 118–50);

(B) to partner with the United States to develop and implement a multilateral sovereign asset repurposing fund that facilitates the lawful seizure and repurposing of Russian sovereign assets for the benefit of Ukraine; and

(C) to confiscate such assets and allocate them to Ukraine in tranches of not less than $10,000,000,000 United States dollars per month until the funds are expended to support the defense of Ukraine against the Russian Federation; and

(5) calls on the President, the Secretary of State, and the Secretary of Defense to pressure any country with sovereign assets of the Russian Federation within their jurisdiction to confiscate such assets by—

(A) prioritizing the sale of United States weapons to countries that are found to have sovereign assets of the Russian Federation within their jurisdiction, and which have seized and distributed the assets to a fund for Ukraine; and

(B) deprioritizing the sale of United States weapons to countries that are found to have sovereign assets of the Russian Federation within their jurisdiction and have not seized and distributed the assets to a fund for Ukraine.
