1. *Identification:* An extraoral source X-ray system is an AC-powered device that produces X-rays and is used for dental radiographic examination and diagnosis of diseases of the teeth, jaw, and oral structures. The X-ray source (a tube) is located outside the mouth. This generic type of device may include patient and equipment supports and component parts.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that extraoral X-ray source systems be classified into class II because the device directs radiation at the body, and malfunction could result in the patient's exposure to unsafe levels of radiation. Moreover, the electrical design of the device must be regulated to assure electrical safety. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* (a) Exposure to unsafe levels of radiation: Improper shielding of the patient, or improper design or malfunction of the device may result in the unnecessary exposure of the patient to radiation. (b) Electrical shock: Improper electrical design or malfunction of the device could cause

electrical shock to the patient or operator.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that extraoral source X-ray systems be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device. Any standards developed for the device must conform to the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 262 et seq.) and the regulations governing radiation safety promulgated under that act, as well as the electrical safety regulations promulgated under the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.)

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1800, to read as follows:

**§ 872.1800 Extraoral source X-ray system.**

(a) *Identification.* An extraoral source X-ray system is an AC-powered device that produces X-rays and is used for dental radiographic examination and diagnosis of diseases of the teeth, jaw, and oral structures. The X-ray source (a tube) is located outside the mouth. This generic type of device may include patient and equipment supports and component parts.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m. Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39818 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2837]

### Medical Devices; Classification of Intraoral Source X-Ray Systems

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intraoral source X-ray systems into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intraoral source X-ray systems:

1. Identification: An intraoral source X-ray system is an AC-powered device that produces X-rays and is used for dental radiographic examination and diagnosis of diseases of the teeth, jaw, and oral structures. The X-ray source (a tube) is located inside the mouth. This generic type of device may include patient and equipment supports and component parts.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that intraoral source X-ray units be classified into class II because the device directs radiation at the body, and malfunction could result in the patient's exposure to unsafe levels of radiation. Moreover, the electrical design of the device must be regulated to assure electrical safety. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard. The Panel also recommends that because the source of the X-rays is placed inside the mouth, systems should be required to bear special labeling which describes the risks involved in using the device without a radiation shield.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Exposure to unsafe levels of radiation: Improper shielding of the patient, improper design, or malfunction of the device may result in unnecessary exposure of the patient to radiation. (b) Electrical shock: Improper design or malfunction of the device could result in electrical shock to the patient or operator.

### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that

intraoral source X-ray systems be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device. Any standards developed for the device must conform to the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 262 et seq.) and the regulations governing radiation safety promulgated under the act, as well as the electrical safety regulations promulgated under the Occupational Safety and Health Act (29 U.S.C. 651 et seq.).

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names, may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1810, to read as follows:

### § 872.1810 Intraoral source X-ray system.

(a) *Identification.* An intraoral source X-ray system is an electrically-powered device that produces X-ray and is used for dental radiographic examination and diagnosis of diseases of the teeth, jaw, and oral structures. The X-ray source (a tube) is located inside the mouth. This generic type of device may include patient and equipment supports and component parts.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be

submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39819 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2838]

### Medical Devices; Classification of Dental X-Ray Exposure Alignment Device

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental X-ray exposure alignment devices into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying the device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposal regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of a dental X-ray exposure alignment device:

1. Identification: A dental X-ray exposure alignment device is a device used to position and hold X-ray film and to align the examination site with the X-ray beam.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental X-ray exposure alignment devices be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because it is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental X-ray exposure alignment devices in the practice of dentistry.

5. Risks to health: None identified.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that dental X-ray exposure alignment devices be classified into class II (performance standards). The design and function of dental X-ray exposure alignment devices affect the amount of radiation to which patients are exposed. Alteration of the beam size or change in alignment of the beam, both of which could result from improper design or

malfunction of the device, could have an adverse effect on the safety and effectiveness of the device. Also, the agency believes that improper design of the device, resulting in improper beam alignment, would require repeating the X-ray, thus exposing a patient to unnecessary radiation. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that dental X-ray exposure alignment devices should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from premarket notification procedures under section 510(k), records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1820, to read as follows:

### § 872.1820 X-ray beam aligner.

(a) *Identification.* A dental X-ray exposure alignment device is a device used to position X-ray film and to align the examination site with the X-ray beam.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug

Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[Docket No. 78N-2839]

### Medical Devices; Classification of Cephalometers

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cephalometers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation.

The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cephalometers:

1. Identification: A cephalometer is a device used in dentistry during X-ray procedures. The device is used to place and to hold a patient's head in a standard position during dental X-rays.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that cephalometers be classified into class II because a performance standard is necessary to assure that the measuring and positioning functions of the device are sufficiently accurate to prevent misdiagnosis. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Misdiagnosis: Improper design of the device may result in misdiagnosis and subsequent inappropriate therapy.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that cephalometers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device to assure the accuracy of its measuring and positioning functions and because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This

proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1830, to read as follows:

#### § 872.1830 Cephalometer.

(a) *Identification.* A cephalometer is a device used in dentistry during X-ray procedures. The device is used to place and to hold a patient's head in a standard position during dental X-rays.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[Docket No. 78N-2840]

### Medical Devices; Classification of Dental X-Ray Position Indicating Devices

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental X-ray position indicating devices into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II

is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATE:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental X-ray position indicating devices.

1. **Identification:** A dental position indicating device is a device, such as a collimator, cone, or aperture, that is used in dental radiographic examination. The device aligns the examination site with the X-ray beam and also restricts the dimensions of the dental X-ray field by limiting the size of the primary X-ray beam.

2. **Recommended classification:** Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. **Summary of reasons for recommendation:** The panel recommends that dental X-ray position indicating devices be classified into class II because improper design of the device may expose the patient and the operator unnecessarily to radiation. The panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel

members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on a presentation by FDA's Bureau of Radiological Health which described the potential hazards associated with the device (Ref. 1).

5. **Risks to health:** Exposure to unsafe levels of radiation: Improper design of the device may result in unnecessary exposure of the patient and the operator to radiation.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental X-ray position indicating devices be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**Reference**

The following information has been placed on file in the office of the Hearing Clerk (address above) and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Transcript of Dental Device Classification Panel Meeting, Washington, DC, December 5, 1977.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1840, to read as follows:

**§ 872.1840 Dental X-ray position indicating device.**

(a) **Identification.** A dental X-ray position indicating device is a device, such as a collimator, cone, or aperture, that is used in dental radiographic examination. The device aligns the examination site with the X-ray beam and also restricts the dimensions of the dental X-ray field by limiting the size of the primary X-ray beam.

(b) **Classification.** Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2841]

**Medical Devices; Classification of Lead-Lined Position Indicators**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying lead-lined position indicators into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of lead-lined position indicators:

1. Identification: A lead-lined position indicator is a cone-shaped device that is attached to a dental X-ray tube and is used to aid in positioning the tube, to prevent the misfocusing of the X-rays by absorbing divergent radiation, and to prevent leakage of radiation by use of the lead lining.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that lead-lined position indicators be classified into class II because the Panel believes that performance standards are necessary to assure that the X-ray beam is properly controlled by the indicator and, thereby, protects the patient and operator. Faulty design of the cone could cause improper alignment of the X-ray beam at the tip of the cone and, as a result, proper collimation of the X-ray beam (elimination of the divergent portion of the beam) may not occur. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Misdiagnosis and inappropriate treatment: Improper design of the device may result in

inaccurate X-rays and subsequent misdiagnosis and inappropriate treatment. (b) Overexposure to radiation: If the lining of the device has an insufficient lead content, the patient may be exposed to unnecessary radiation.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that lead-lined position indicators be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1850, to read as follows:

**§ 872.1850 Lead-lined position indicator.**

(a) *Identification.* A lead-lined position indicator is a cone-shaped device that is attached to a dental X-ray tube and is used to aid in positioning the tube, to prevent the misfocusing of the X-rays by absorbing divergent radiation, and to prevent leakage of radiation by use of the lead-lining.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be

submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**BILLING CODE 4110-03-M**

**21 CFR Part 872**

[Docket No. 78N-2842]

**Medical Devices; Classification of Dental X-Ray Film Holders**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental X-ray film holders into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the

development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental X-ray film holders:

1. Identification: A dental X-ray film holder is a device used to position and to hold X-ray film inside the mouth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental X-ray film holders be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because the Panel believes that defects in this device are readily apparent to the user.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental X-ray film holders in the practice of dentistry.

5. Risks to health: Infection: If the materials used in the device cannot be properly sterilized, a patient may contract an infection.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that dental X-ray film holders be classified into class II (performance standards). This decision is based on the knowledge that a single dental X-ray film holder may be used for many patients and has the potential for transmitting microorganisms between patients. Therefore, these devices must be constructed of materials that can be properly sterilized. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard

would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that dental X-ray film holders should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel's recommendation that this device be exempt from premarket notification procedures under section 510(k), records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1905, to read as follows:

#### § 872.1905 X-ray film holder.

(a) *Identification.* A dental X-ray film holder is a device used to position and to hold X-ray film inside the mouth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2843]

### Medical Devices; Classification of Amalgam Alloys

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying amalgam alloys into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of amalgam alloys:

1. Identification: An amalgam alloy is a device that consists of a metallic substance that is mixed with mercury to form filling material for dental caries.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a

performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that amalgam alloys be classified into class II because materials used in the device that contact the body should meet a generally accepted and satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Adverse gastric or respiratory response: Ingestion of the powdered alloy or the mixed amalgam may be harmful to the patient's digestive or respiratory tract. (b) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that amalgam alloys be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the advice. A performance standard would provide reasonable assurances of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21

U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 by adding new Subpart C, which is reserved, and adding new Subpart D and § 872.3050, to read as follows:

#### Subpart C—Reserved

#### Subpart D—Prosthetic Devices

##### § 872.305 Amalgam alloy.

(a) *Identification.* An amalgam alloy is a device that consists of a metallic substance that is to be mixed with mercury to form filling material for dental caries.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

#### Medical Devices; Classification of Gold-Based Alloy for Clinical Use

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying gold-based alloy for clinical use into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of gold-based alloy for clinical use:

1. *Identification:* A gold-based alloy for clinical use is a mixture of metals, the major component of which is gold. It may also contain smaller quantities of silver, copper, platinum, or palladium. It is used to fabricate custom-made dental appliances, such as crowns and bridges.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for gold-based alloy for clinical use be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that gold-based alloy for clinical use be classified into class II because the materials used in the device that contact the body should meet a generally accepted and satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* Adverse tissue reaction: If materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that gold-based alloy for clinical use be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3060, to read as follows:

**§ 872.3060 Gold-based alloy for clinical use.**

(a) *Identification.* A gold-based alloy for clinical use is a mixture of metals, the major component of which is gold. It may also contain smaller quantities of silver, copper, platinum, or palladium. It is used to fabricate custom-made dental appliances, such as crowns and bridges.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between

9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**Medical Devices; Classification of Precious Metal Alloys for Clinical Use**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying precious metal alloys for clinical use into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of the classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of precious metal alloys for clinical use:

1. *Identification:* A precious metal alloy for clinical use is a mixture of metals, the major components of which are silver and palladium. It may also

contain smaller quantities of other metals, such as copper, gold, and platinum. It is used to fabricate dental appliances such as crowns and bridges.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for precious metal alloys for clinical use by a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that precious metal alloys for clinical use be classified into class II because the materials used in the device that contact the body should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that precious metal alloys for clinical use be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the

general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3070, to read as follows:

**§ 872.3070 Precious metal alloy for clinical use.**

(a) *Identification.* A precious metal alloy for clinical use is a mixture of metals, the major components of which are silver and palladium. It may also contain smaller quantities of other metals, such as copper, gold, and platinum. It is used to fabricate dental appliances such as crowns and bridges.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2846]

**Medical Devices; Classification of  
Mercury and Alloy Dispensers**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mercury and alloy dispensers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the

safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mercury and alloy dispensers:

1. Identification: A mercury and alloy dispenser is a device used to measure and dispense a predetermined amount of dental mercury in droplet form and a premeasured amount of alloy pellets. The device uses a spring-activated valve to deliver the materials into a mixing capsule.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that mercury and alloy dispensers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel

believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, mercury and alloy dispensers in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that mercury and alloy dispensers be classified into class II (performance standards). Mercury is toxic to humans. For many years, spillage or leakage of mercury has been considered a hazard to dental patients, the dentist, and staff workers. Leakage of mercury from the device may cause acute or chronic mercury toxicity through inhalation of mercury vapors. Failure of the device to dispense an accurate amount of mercury could affect the physical properties of the carie filling material, resulting in early failure of the filling. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that mercury and alloy dispensers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from premarket notification procedures under section 510(k), records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the

former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3080, to read as follows:

**§ 872.3080 Mercury and alloy dispenser.**

(a) *Identification.* A mercury and alloy dispenser is a device used to measure and dispense a predetermined amount of dental mercury in droplet form and a premeasured amount of alloy pellets. The device uses a spring-activated valve to deliver the materials into a mixing capsule.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39828 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2847]

**Medical Devices; Classification of AC-Powered Dental Amalgamators**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered dental amalgamators into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to

provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of AC-powered dental amalgamators:

1. *Identification:* An AC-powered dental amalgamator is an electrically-powered device used to mix, by shaking, amalgam capsules containing mercury and dental alloy particles, such as silver, tin, zinc, and copper. The resulting amalgam material is used for filling dental caries.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for AC-powered dental amalgamators be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that AC-powered dental amalgamators be classified into class II because the electrical design of the device should be controlled to assure that the amalgam will be mixed properly and to assure the electrical safety of the device. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel

members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* (a) Adverse tissue reaction: Improper design of the device, resulting in improper mixing of the amalgam, could cause an adverse tissue reaction in the patient. (b) Electrical shock: Improper electrical design of the device could cause an electrical shock to users.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that AC-powered dental amalgamators be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3100, to read as follows:

**§ 872.3100 AC-powered dental amalgamator.**

(a) *Identification.* An AC-powered dental amalgamator is an electrically-powered device used to mix, by shaking, amalgam capsules containing mercury and dental alloy particles, such as silver, tin, zinc, and copper. The resulting dental amalgam material is used for filling dental caries.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

## 21 CFR Part 872

[Docket No. 78N-2848]

### Medical Devices; Classification of Dental Amalgam Capsules

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental amalgam capsules into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become 78-2448 effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental amalgam capsules:

1. Identification: A dental amalgam capsule is a container device in which silver alloy is mixed with mercury to form dental amalgam.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental amalgam capsules be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with records and reports requirements and the good manufacturing practice regulation because it is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental amalgam capsules in the practice of dentistry.

5. Risks to health: None identified.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that dental amalgam capsules be classified into class II (performance standards). Dental amalgam capsules are used to mix amalgam materials, one component of which is mercury. Mercury is toxic to humans. For many years, spillage or leakage of mercury has been considered a hazard to dental patients, the dentist and staff workers. Leakage of mercury from the device may cause acute or chronic mercury toxicity through inhalation of mercury vapors. The agency believes that a performance

standard is necessary to assure that dental amalgam capsules can safely be used to perform this mixing process without exposing patients and dental care workers to mercury vapors and because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that dental amalgam capsules should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3110, to read as follows:

#### § 872.3110 Dental amalgam capsule.

(a) *Identification.* A dental amalgam capsule is a container device in which silver alloy is mixed with mercury to form dental amalgam.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading

of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2849]

### Medical Devices; Classification of Preformed Anchors

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed anchors into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the

following recommendation regarding the classification of preformed anchors:

1. Identification: A preformed anchor is a prefabricated device made of metal, such as stainless steel or titanium, that is incorporated in to a dental appliance, such as a denture, to help stabilize the appliance in the patient's mouth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that preformed anchors be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed anchors in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that preformed anchors be classified into class II (performance standards). The properties of the materials used to form preformed anchors depend upon the proper composition of these materials. Moreover, preformed, anchors directly contact oral tissue. Altering the composition of the materials used in the device, or contamination of the materials with other substances, may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance

standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed anchors should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3130, to read as follows:

##### § 872.3130 Preformed anchor.

(a) *Identification.* A preformed anchor is a device made of metal, such as stainless steel or titanium, that is incorporated into a dental appliance, such as a denture, to help stabilize the appliance in the patient's mouth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received Comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

[Docket No. 78N-3024]

### Medical Devices; Classification of Resin Applicators

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying resin applicators into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of resin applicators:

1. Identification: A resin applicator is a brushlike device that is used to spread dental resin on a tooth prior to application of tooth shade material.

2. Recommended classification: Class I (general controls). The Panel recommends that there be no exemptions.

3. Summary of reasons for recommendation: The Panel

recommends resin applicators be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, resin applicators in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that resin applicators be classified into class I (general controls) with no exemptions. The agency believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872-3140, to read as follows:

#### § 872.3140 Resin applicator.

(a) *Identification.* A resin applicator is a brushlike device that is used to spread dental resin on a tooth prior to application of tooth shade material.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may

submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

### Medical Devices; Classification of Articulators

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying articulators into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of articulators:

1. Identification: An articulator is a mechanical device used to simulate

movements of a patient's upper and lower jaw. Plaster casts of the patient's teeth and gums are placed in the device to reproduce the occlusion (bite) and articulation of the patient's jaws. An articulator is used to fit dentures or provide orthodontic treatment.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that articulators be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purposes recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, articulators in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that articulators be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel recommendation that manufacturers of articulators be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration,

listing, and premarket notification by manufacturers of articulators, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of articulators be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of articulators be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of articulators having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3150, to read as follows:

#### § 872.3150 Articulator.

(a) *Identification.* An articulator is a mechanical device used to simulate movements of a patient's upper and lower jaw. Plaster casts of the patient's teeth and gums are placed in the device to reproduce the occlusion (bite) and articulation of the patient's jaws. An articulator is used to fit dentures or provide orthodontic treatment.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2851]

#### Medical Devices; Classification of Precision Attachments

AGENCY: Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying precision attachments into class II (performance standards). FDA is also publishing the recommendation of the Dental Service Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendations regarding the classification of precision attachments:

1. Identification: A precision attachment is a device made of cast metal that is used in restorative dentistry in conjunction with removable partial dentures. Various forms of the device are used to connect a lower partial denture, with another lower partial denture to connect an upper partial denture with another upper partial denture, to connect either an upper or lower partial denture to a tooth or a crown, or to connect a fixed bridge to a partial denture.

2. Recommended classification: Class I (general controls). The Panel recommends that precision attachments be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that precision attachments be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, precision attachments in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that precision attachments be classified into class II (performance standards). The properties of the materials used to form precision attachments depend upon the proper composition of these materials. Moreover, precision attachments directly contact oral tissue. Altering the composition of the materials used in the device, or contamination of the materials with other substances, may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that precision attachments should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the

Panel recommendation that this device be exempt from records and reports requirements under section 519 and the good manufacturing practices regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue in the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3165, to read as follows:

**§ 872.3165 Precision attachment.**

(a) *Identification.* A precision attachment is a device made of cast metal that is used in restorative dentistry in conjunction with removable partial dentures. Various forms of the device are used to connect a lower partial denture with another lower partial denture, to connect an upper partial denture with another upper partial denture, to connect either an upper or lower partial denture to a tooth or a crown, or to connect a fixed bridge to a partial denture.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2852]

### Medical Devices; Classification of Preformed Bars

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed bars into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed bars:

1. Identification: A preformed bar is a prefabricated device made of metal, such as heavy wire, wrought metal, or

cast metal, that is incorporated into a dental appliance, such as a denture, to connect the part of the dental appliance.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that preformed bars be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed bars in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that preformed bars be classified into class II (performance standards). The properties of the materials used to form preformed bars depend upon the proper composition of these materials. Moreover, preformed bars directly contact oral tissue. Altering the composition of the materials used in the device, or contamination of the materials with other substances, may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient

information to establish a performance standard for this device.

Because the agency has determined that preformed bars should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3175, to read as follows:

##### § 872.3175 Preformed bar.

(a) *Identification.* A preformed bar is a prefabricated device made of metal, such as heavy wire, wrought metal, or cast metal, incorporated into a dental appliance such as a denture, to connect the parts of a removable denture.

(c) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78-2853]

### Medical Devices; Classification of Resin Tooth Bonding Agents

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying resin tooth bonding agents into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of resin tooth bonding agents:

1. Identification: A resin tooth bonding agent is a device, such as methyl methacrylate, that is painted on the interior of a prepared cavity of a tooth to improve retention of a restoration, such as a filling.

2. Recommended classification: Class I (general controls). The Panel

recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that resin tooth bonding agents be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, resin tooth-bonding agents in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that resin tooth bonding agents be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

FDA disagrees with the Panel recommendation that manufacturers of resin tooth bonding agents be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360j). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508).

In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that

certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel recommendation that manufacturers of resin tooth bonding agents be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of resin tooth bonding agents having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3200, to read as follows:

#### § 872.3200 Resin tooth-bonding agent.

(a) *Identification.* A resin tooth bonding agent is a device, such as methyl methacrylate, that is painted on the interior of a prepared cavity of a tooth to improve retention of a restoration, such as a filling.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981, submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39836 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78-2854]

### Medical Devices; Classification of Facebows

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying facebows into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation.

The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of facebows:

1. Identification: A facebow is a device used in denture fabrication to determine the spatial relationship between the upper and lower jaws. This determination is used to place denture casts accurately into an articulator (a device that holds a set of plaster dental casts and reproduces jaw movements) and, thereby, to aid the correct placement of artificial teeth into the denture base.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that facebows be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel Members' personal knowledge of, and clinical experience with, facebows in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that facebows be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel recommendation that manufacturers of facebows be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under

section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of facebows, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of facebows be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that included records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel recommendation that manufacturers of facebows be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation other than §§ 820.180 and 820.198, is

unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of facebows must be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of facebows must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 7012(a) 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3220, to read as follows:

**§ 872.3220 Facebow.**

(a) *Identification.* A facebow is a device used in denture fabrication to determine the spatial relationship between the upper and lower jaws. This determination is used to place denture casts accurately into an articulator (a device that holds a set of plaster dental casts and reproduces jaw movements) and, thereby, to aid the correct placement of artificial teeth into the denture base.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

**Medical Devices; Classification of  
Dental Burs**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental burs into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFA-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the

development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification following recommendation regarding the classification of dental burs:

1. *Identification:* A dental bur is a rotary cutting device made from carbon steel or tungsten carbide used to cut hard mouth, such as teeth or bone. It is also used to cut hard metals, plastics, porcelains, and similar materials that are used in the fabrication of dental devices.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for dental burs be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that dental burs be classified into class II because materials used in the device should meet mechanical and structural performance standards to prevent breakage and possible tissue damage to patients. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* Tissue damage: Breakage of the bur due to inadequate mechanical or structural properties may cause severe tissue damage to the patient.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental burs be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA

published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3240, to read as follows:

§ 872.3240 **Dental bur.**

(a) *Identification.* A dental bur is a rotary cutting device made from carbon steel or tungsten carbide that is used to cut hard structures in the mouth, such as teeth or bone. It is also used to cut hard metals, plastics, porcelains, and similar materials that are used in the fabrication of dental devices.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39838 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

21 CFR Part 872

[Docket No. 78N-2856]

**Medical Devices; Classification of Calcium Hydroxide Cavity Liners**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying calcium hydroxide cavity

liners into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305, Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of calcium hydroxide cavity liners: 1. Identification: A calcium hydroxide cavity liner is a device material that is applied to the interior of a prepared cavity and provides protection for the pulp of the tooth. The device is applied to the area to be restored prior to the insertion of restorative material, such as amalgam.

2. Recommended classification: Class I (general controls). The panel recommends that calcium hydroxide cavity liners be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)).

3. Summary of reasons for recommendation: The Panel recommends that calcium hydroxide cavity liners be classified into class I because the Panel believes that general controls are sufficient to provide

reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Dental Panel believes that manufacturers should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, calcium hydroxide cavity liners in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that calcium hydroxide cavity liners be classified into class II (performance standards). Calcium hydroxide cavity liners are constructed of a material with certain properties, properties that depend upon the correction composition and purity of the material. Moreover, calcium hydroxide cavity liners directly contact oral tissue. Altering the composition of the material used in the device or contamination of the material with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that calcium hydroxide cavity liners should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26,

1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3250, to read as follows.

**§ 872.3250 Calcium hydroxide cavity liner.**

(a) *Identification.* A calcium hydroxide cavity liner is a device material that is applied to the interior of a prepared cavity and provides protection for the pulp of the tooth. The device is applied to the area to be restored prior to the insertion of restorative material, such as amalgam.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

FR Doc. 80-39839 Filed 12-29-80; 8:45 am

[Docket No. 78N-2857]

**Medical Devices; Classification of  
Cavity Varnishes**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cavity varnishes into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that

the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cavity varnishes:

1. *Identification:* A cavity varnish is a device that consists of a compound used to coat a prepared cavity of a tooth prior to insertion of restorative materials. The varnish prevents penetration of the restorative materials, such as amalgam, into the dentinal tissue.

2. *Recommended classification:* Class I (general controls). The Panel recommends that cavity varnishes be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that cavity varnishes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device

that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, cavity varnishes in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that cavity varnishes be classified into class II (performance standards). Cavity varnishes are composed of materials with certain properties, properties that depend upon the correct composition and purity of these materials. Moreover, cavity varnishes directly contact oral tissues. Altering the composition of the materials used in the device, or contamination of the materials with other substances, may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that cavity varnishes should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names

may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3260, to read as follows:

**§ 872.3260 Cavity varnish.**

(a) *Identification.* A cavity varnish is a device that consists of a compound used to coat the prepared cavity of a tooth prior to insertion of restorative materials. The varnish prevents penetration of the restorative materials, such as amalgam, into the dental tissue.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2858]

**Medical Devices; Classification of Dental Cement**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental cement into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public

comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of dental cement:

1. *Identification:* Dental cement is a device used to affix dental filling materials and dental devices, such as crowns and bridges, to provide a restorative base for the protection of tooth pulp, and to serve as a temporary filling material for caries. The device is composed of materials such as zinc oxide-eugenol.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that dental cement be classified into class II because materials used in the device should meet a generally accepted and satisfactory level of tissue compatibility. Improper phosphoric acid content in the device may irritate or destroy dental pulp. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard. The Panel also recommends that the phosphoric acid content and the need for appropriate pulp protection be stated in the labeling.

4. *Summary of the data on which the recommendation is based:* The Panel

based its recommendation on the Panel members personal knowledge of, and clinical experience with, the device, and on two articles in the dental literature which suggest that dental cement containing polycarboxylate may irritate dental pulp (Refs. 1 and 2).

5. *Risks to health:* (a) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction. (b) Irritation or destruction of dental pulp: Dental pulp may be irritated or destroyed by improper amounts of phosphoric acid in the device.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental cement be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**References**

The following information has been placed in the office of the Hearing Clerk (HFA-305) (address above), and may be seen by interested persons, from 9 a.m. to 4 p.m., Monday through Friday.

1. Plant, C. G., "The Effect of Polycarboxylate Containing Stannous Fluoride on the Pulp," *British Dental Journal*, 135:317, 1973.

2. Spangberg, L., H. Rodriguez, and K. Langeland, "Biologic Effect of Dental Materials," *Oral Surgery*, January, 1974, p. 113.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3275, to read as follows:

**§ 872.3275 Dental cement.**

(a) *Identification.* Dental cement is a device used to affix dental filling materials and dental devices, such as crowns and bridges, to provide a restorative base for the protection of tooth pulp, and to serve as a temporary filling material for caries. The device is composed of materials such as zinc oxide-eugenol.

(b) *Classification.* Class II (performance standards).

Interested persons, may on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**Medical Devices; Classification of  
Preformed Clasps**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed clasps into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken

under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed clasps:

1. Identification: A preformed clasp is a prefabricated device made of cast metal, such as chrome-cobalt, that is incorporated into a dental appliance, such as a partial denture, to help stabilize the appliance in the patient's mouth by fastening the clamp to an adjacent tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that preformed clasps be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when

used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed clasps in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that preformed clasps be classified into class II (performance standards). The properties of the materials used to form preformed clasps depend upon the proper composition of these materials. Moreover, preformed clasps directly contact oral tissue. Altering the composition of the materials used in the device, or contamination of materials with other substances, may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard § is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed clasps should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from premarket notification procedures under section 510(k), records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a) 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority

delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3285, to read as follows:

**§ 872.3285 Preformed clasp.**

(a) *Identification.* A preformed clasp is a prefabricated device made of cast metal, such as chrome-cobalt, that is incorporated into a dental appliance, such as a partial denture, to help stabilize the appliance in the patient's mouth by fastening the appliance to an adjacent tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2860]

**Medical Devices; Classification of Preformed Wire Clasps**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed wire clasps into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation

based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed wire clasps:

1. *Identification:* A preformed wire clasp is a device made of bendable stainless steel wire that is incorporated into a dental appliance, such as an orthodontic retainer, and is used to anchor the appliance to a tooth.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for preformed wire clasps be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that preformed wire clasps be classified into class II because the materials used in the device that contact the body should meet a generally accepted level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device.

5. *Risks to health:* Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that preformed wire clasps be classified into class II (performance standards). The agency believes that a performance

standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). The proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3295, to read as follows.

**§ 872.3295 Preformed wire clasp.**

(a) *Identification.* A preformed wire clasp is a device made of bendable stainless steel wire that is incorporated into a dental appliance, such as an orthodontic retainer, and is used to anchor the appliance to a tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2861]

**Medical Devices; Classification of Hydrophilic Resin Coatings for Dentures****AGENCY:** Food and Drug Administration.**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hydrophilic resin coatings for dentures into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFA-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of hydrophilic resin coatings for dentures:

1. Identification: A hydrophilic resin coating for dentures is a device used to improve denture retention and comfort. The device consists of a water-retaining polymer cream that is applied to the base of a denture before the denture is inserted into the patient's mouth.

2. Recommended classification: Class I (general controls). The Panel

recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that hydrophilic resin coatings for dentures be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommend.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, hydrophilic resin coatings for dentures in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that hydrophilic resin coatings for dentures be classified into class II (performance standards). The properties of the materials used to form hydrophilic resin coatings for dentures depend upon the proper composition of these materials. Moreover, the device directly contacts oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that hydrophilic resin coatings for dentures should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the panel recommendation

that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3300, to read as follows:

**§ 872.3300 Hydrophilic resin coating for dentures.**

(a) *Identification.* A hydrophilic resin coating for dentures is a device used to improve denture retention and comfort. The device consists of a water-retaining polymer cream that is applied to the base of a denture before the denture is inserted into the patient's mouth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39844 Filed 12-29-80; 8:45 am]

**BILLING CODE 4110-03-M**

## 21 CFR Part 872

[Docket No. 78N-2862]

**Medical Devices; Classification of Coating Materials for Resin Fillings**

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying coating materials for resin fillings into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of coating materials for resin fillings:

1. Identification: A coating material for resin fillings is a device that is applied to the surface of a restorative resin dental filling in order to attain a smooth glaze-like finish on the surface of the filling.

2. Recommended classification: Class I (general controls). The Panel recommends that coating materials for

resin fillings be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(i)) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that coating materials for resin fillings be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, coating materials for resin fillings in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that coating materials for resin fillings be classified into class II (performance standards). The properties of the materials used to form coating materials for resin fillings depend upon the proper composition of these materials. Moreover, the device directly contacts oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that coating materials for resin fillings should be classified into class II rather than class I, the agency is not required

to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3310, to read as follows:

**§ 872.3310 Coating material for resin fillings.**

(a) *Identification.* A coating material for resin fillings is a device that is applied to the surface of a restorative resin dental filling in order to attain a smooth glaze-like finish on the surface of the filling.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 10, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2863]

**Medical Devices; Classification of Preformed Crowns****AGENCY:** Food and Drug Administration.**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed crowns into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 310-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed crowns:

1. Identification: A preformed crown is a prefabricated device made of plastic or metal that is affixed temporarily to a tooth after removal of, or breakage of, the natural crown (that portion of the tooth that normally protrudes above the gums). It is used as a functional restoration until a permanent crown is constructed. The device also is used as a functional restoration for a badly

decayed deciduous (baby) tooth until the adult tooth erupts.

2. Recommended classification: Class I (general controls). The Panel recommends that preformed crowns be exempt from premarketed notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)).

3. Summary of reasons for recommendation: The Panel recommends that preformed crowns be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed crowns in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that preformed crowns be classified into class II (performance standards). The properties of the materials used to form preformed crowns depend upon the proper composition of these materials. Moreover, preformed crowns directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed crowns should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from premarket notification procedures under section 510(k), records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue in *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3330, to read as follows:

**§ 872.3330 Preformed crown.**

(a) *Identification.* A preformed crown is a prefabricated device made of plastic or metal that is affixed temporarily to a tooth after removal of, or breakage of, the natural crown (that portion of the tooth that normally protrudes above the gums). It is used as a functional restoration until a permanent crown is constructed. The device also is used to as a functional restoration for a badly decayed deciduous (baby) tooth until the adult tooth erupts.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39846 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2864]

### Medical devices; Classification of Gold and Stainless Steel Cusps

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying gold and stainless steel cusps into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendations regarding the classification of gold and stainless steel cusps:

1. Identification: A gold and stainless steel cusp is a prefabricated device

made of gold and stainless steel that provides a permanent cusp (a projection on the chewing surface of a prosthetic tooth of a denture) and is used to ac occlusal harmony (a proper bite) between the teeth and a removable denture.

2. Recommended classification: Class I (general controls). The Panel recommends that gold and stainless steel cusps be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that gold and stainless steel cusps be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, gold and stainless steel cusps in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that gold and stainless steel cusps be classified into class II (performance standards). The properties of the materials used to form gold and stainless steel cusps depend upon the proper composition of these materials. Moreover, gold and stainless steel cusps directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health

presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that gold and stainless steel cusps should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(K), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3350, to read as follows:

#### § 872.3350 Gold and stainless steel cusp.

(a) *Identification.* A gold and stainless steel cusp is a prefabricated device made of gold and stainless steel that provides a permanent cusp (a project on the chewing surface of a prosthetic tooth of a denture) and is used to achieve occlusal harmony (a proper bite) between the teeth and a removable denture.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading

of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39847 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

[Docket No. 78N-2865]

### Medical Devices; Classification of Preformed Cusps

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed cusps into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the

following recommendation regarding the classification of preformed cusps:

1. Identification: A preformed cusp is a prefabricated device made of plastic that is used as a temporary cusp (a projection on the chewing surface of a tooth) to achieve occlusal harmony (a proper bite) prior to permanent restoration of the tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that preformed cusps be classified into class I (general controls) because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no unreasonable risks to health. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed cusps in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that preformed cusps be classified into class II (performance standards). The properties of the materials used to form preformed cusps are dependent upon the proper composition of these materials.

Moreover, the device directly contacts oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that performed cusps should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3360, to read as follows:

#### § 872.3360 Preformed cusp.

(a) *Identification.* A preformed cusp is a prefabricated device made of plastic that is used as a temporary cusp (a projection on the chewing surface of a tooth) to achieve occlusal harmony (a proper bite) prior to permanent restoration of the tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

## 21 CFR Part 872

[Docket No. 78N-2866]

### Medical Devices; Classification of Acacia and Karaya With Sodium Borate Denture Adhesives

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying acacia and karaya with sodium borate denture adhesives into class III (premarket approval). FDA is also publishing § the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA Proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

## SUPPLEMENTARY INFORMATION:

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of acacia and karaya with sodium borate denture adhesives:

1. Identification: A acacia and karaya with sodium borate denture adhesive is a device composed of acacia, karaya, and sodium borate that is applied to the base of denture before the denture is inserted into the patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that acacia and karaya with sodium borate be classified into class III because the device presents a potential unreasonable risk of illness or injury. Long-term exposure to the borate in the device may cause chronic toxicity in denture wearers. The The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of the device. Premarket approval is necessary for this device to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry and on a report of the Bureau of Drugs OTC Panel on Dentifrices and Dental Care Agents (Ref. 1). This report states that there is a lack of information concerning the safety of adhesives containing sodium borate and a lack of information concerning the effectiveness of acacia in denture adhesives. The report states that the sodium borate concentration of 12 to 20 percent of the adhesive's total weight is equivalent to 2.6 to 5.3 percent boron. Because at least a portion of a denture adhesive is ingested, this amount of boron could cause chronic toxicity in denture wearers (Ref. 2). The Panel agrees that there is a lack of data concerning the safety and effectiveness

of acacia and karaya with sodium borate.

5. Risks to health: (A) Chronic toxicity: The boron in this device may cause chronic toxicity to users. (b) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that acacia and karaya with sodium borate be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury because the boron in the device may cause toxicity, and because there is a lack of information available to determine the safety and effectiveness of acacia and karaya with sodium borate as a denture adhesive. A review of the literature confirmed that little is known about the possible effects of sodium borate in denture adhesives and no effectiveness data are available for acacia. In addition, the device is purported or represented to be for a use (affixing dentures to the gums) that is of substantial importance in preventing impairment of human health. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device, and that insufficient information exists to establish a performance standard for this device.

### References

[Docket No. 78N-2867]

**Medical Devices; Classification of  
Carboxymethylcellulose Sodium (40 to  
100 Percent) Denture Adhesives**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying carboxymethylcellulose sodium (40 to 100 percent) denture adhesives into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be

classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of carboxymethylcellulose sodium (40 to 100 percent) denture adhesives:

1. Identification: A carboxymethylcellulose sodium (40 to 100 percent) denture adhesive is a device containing 40 to 100 percent of carboxymethylcellulose sodium—that is applied to the base of a denture before the denture is inserted in the patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class I (general controls). The Panel recommends that carboxymethylcellulose sodium (40 to 100 percent) denture adhesives be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel

recommends that carboxymethylcellulose sodium (40 to 100 percent) denture adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The device materials that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, carboxymethylcellulose sodium denture adhesives in the practice of dentistry.

5. Risks to health: Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that carboxymethylcellulose sodium (40 to 100 percent) denture adhesives be classified into class II (performance standards). The properties of the materials used to form carboxymethylcellulose sodium denture adhesives depend upon the proper composition of these materials. Moreover, carboxymethylcellulose sodium denture adhesives directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. FDA believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that carboxymethylcellulose sodium (40 to 100 percent) denture adhesive should be classified into class II rather than

class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3410, to read as follows:

**§ 872.3410 Carboxymethylcellulose sodium (40 to 100 percent) denture adhesives.**

(a) *Identification.* A carboxymethylcellulose sodium (40 to 100 percent) denture adhesive is a device containing 40 to 100 percent of carboxymethylcellulose sodium that is applied to the base of a denture before the denture is inserted in the patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2868]

**Medical Devices; Classification of  
Carboxymethylcellulose Sodium and  
Cationic Polyacrylamide Polymer  
Denture Adhesives**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesives into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device to be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of carboxymethylcellulose

sodium and cationic polyacrylamide polymer denture adhesives:

1. *Identification:* A carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive is a device composed of carboxymethylcellulose sodium and cationic polyacrylamide polymer that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

2. *Recommended classification:* Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesives be classified into class III. If the device fails to anchor the denture adequately in its proper position, a change in the distance between the upper and lower jaws occurs which may lead to gum irritation and bone loss due to alteration of biting pressures. Therefore, the device presents a potential unreasonable risk of illness or injury. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also believes that insufficient data exist to establish adequate performance standards to assure the safety and effectiveness of this device, and therefore, premarket approval is necessary for this device.

4. *Summary of data on which the recommendation was based:* The Panel based its recommendation on the lack of information available to demonstrate the effectiveness of carboxymethylcellulose sodium and cationic polyacrylamide in dental adhesives and on a report of the Bureau of Drugs OTC Panel on Dentifrices and Dental Care Agents. According to the report, the belief that carboxymethylcellulose sodium is safe is based, in part, on its widespread use in food products such as milk and ice cream (Ref. 2). Tests of cationic polyacrylamide acute oral toxicity, eye irritation, dermal and inhalation toxicity, and subacute and chronic feeding experiments in animals have been negative. (Ref. 1). Human patch tests also have been negative (Ref. 2). However, no data were submitted to the Panel to demonstrate, and the literature did not establish, the effectiveness of carboxymethylcellulose sodium and cationic polyacrylamide polymer as a denture adhesive.

5. *Risks to health:* Bone loss from lack of effectiveness: If the adhesive fails to anchor the denture in its proper position,

a change in the distance between the upper and lower jaws may occur which may lead to gum irritation and bone loss due to alteration of biting forces.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesives be classified into class III (premarket approval). The agency believes the device presents a potential unreasonable risk of illness or injury because failure of the device to anchor the denture in place may cause a change in the distance between the upper and lower jaw, causing gum irritation and bone loss. Additionally, there is a lack of information necessary to determine the effectiveness of this device as a denture adhesive. In addition, the device is purported or represented to be for a use (affixing dentures to the gums) that is of substantial importance in preventing impairment of human health. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the effectiveness of the device, and that insufficient information exists to establish a performance standard for this device.

#### References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices," by the OTC Panel on Dentifrices and Dental Care Agents, 1978.

2. "GRAS (Generally Recognized as Safe) Food Ingredients—Cellulose and Derivatives," Prepared for the Food and Drug Administration by Informatics, Inc., National Technical Information Service, U.S. Dept. of Commerce, PB 221228, 1972, OTC Volume 080090.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue in *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3420, to read as follows:

#### § 872.3420 Carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive.

(a) *Identification.* A carboxymethylcellulose sodium and cationic polyacrylamide polymer denture adhesive is a device composed of carboxymethylcellulose sodium and cationic polyacrylamide polymer that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. [Docket No. 78N-2869]

#### Medical Devices; Classification of Carboxymethylcellulose Sodium (32 percent) and Ethylene Oxide Homopolymer (13 Percent) Denture Adhesives

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesives into class II (performance standards). FDA is also publishing the recommendation of the Dental Device

Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesives:

1. *Identification:* a Carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesive is a device composed of carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this denture adhesive device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) dental adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials use in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesives in the practice of dentistry.

5. Risks to health: Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing the carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesives be classified into class II (performance standards). The properties of the materials used to form carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesive depend upon the correct composition of these materials. Moreover, this denture adhesive directly contacts oral tissues. Altering the composition of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to

establish a performance standard for this device.

Because the agency has determined that carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesives should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3430, to read as follows:

#### § 872.3430 Carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesive.

(a) *Identification.* A carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) denture adhesive is a device composed of carboxymethylcellulose sodium (32 percent) and ethylene oxide homopolymer (13 percent) that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be

submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for Regulatory Affairs.*

## 21 CFR Part 872

[Docket No. 78N-2870]

### Medical Devices; Classification of Carboxymethylcellulose Sodium (49 Percent) and Ethylene Oxide Homopolymer (21 Percent) Denture Adhesives

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives:

1. Identification: A carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesive is a device composed of carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) that is applied to the base of a denture before the denture is inserted in the patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class I (general controls). The Panel recommends that this denture adhesive device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel recommends that carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, carboxymethylcellulose sodium (49 percent) and ethylene oxide

homopolymer (21 percent) denture adhesives in the practice of dentistry.

5. Risks to health: Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives be classified into class II (performance standards). The properties of the materials used to form carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives depend upon the proper composition of these materials. Moreover, carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesives should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information

regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3440, to read as follows:

#### § 872.3440 Carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesive.

(a) *Identification.* A carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) denture adhesive is a device composed of carboxymethylcellulose sodium (49 percent) and ethylene oxide homopolymer (21 percent) that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards). Interested persons, may on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

#### Medical Devices; Classification of Karaya Denture Adhesives

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying karaya denture adhesives

into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of karaya denture adhesives:

1. Identification: A karaya denture adhesive is a device composed of karaya (a gum from the bark of a tree of the genus *astragalus*) that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.
2. Recommended classification: Class I (general controls). The Panel recommends that this karaya denture adhesive device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).
3. Summary of reasons for recommendation: The Panel recommends that karaya denture

adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, karaya denture adhesives in the practice of dentistry.

5. Risks to health: Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that karaya denture adhesives be classified into class II (performance standards). The properties of the materials used to form karaya denture adhesives depend upon the correct composition of these materials. Moreover, karaya denture adhesives directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that karaya denture adhesives should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3450, to read as follows:

**§ 872.3450 Karaya denture adhesive.**

(a) *Identification.* A karaya denture adhesive is a device composed of karaya (a gum from the bark of a tree of the genus *astragalus*) that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2872]

**Medical Devices; Classification of  
Karaya and Ethylene Oxide  
Homopolymer Denture Adhesives**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying karaya and ethylene oxide homopolymer denture adhesives into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of karaya and ethylene oxide homopolymer denture adhesives:

1. Identification: A karaya and ethylene oxide homopolymer denture adhesive is a device composed of karaya (a gum from the bark of a tree of the genus *astragalus*) and ethylene oxide homopolymer that is applied to the base of a denture before the denture is inserted in the patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class I (general controls). The Panel recommends that karaya and ethylene oxide homopolymer denture adhesives be exempt from premarket notification procedures under section 510(k) of the

Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)).

3. Summary of reasons for recommendation: The Panel recommends that karaya and ethylene oxide homopolymer denture adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, karaya and ethylene oxide homopolymer denture adhesives in the practice of dentistry.

5. Risks to health: Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that karaya and ethylene oxide homopolymer denture adhesives be classified into class II (performance standards). The properties of the materials used to form karaya and ethylene oxide homopolymer denture adhesives depend upon the correct composition of these materials. Moreover, karaya and ethylene oxide homopolymer denture adhesives directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency

also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that karaya and ethylene oxide homopolymer denture adhesives should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3460, to read as follows:

**§ 872.3460 Karaya and ethylene oxide homopolymer denture adhesive.**

(a) *Identification.* A karaya and ethylene oxide homopolymer denture adhesive is a device composed of karaya (a gum from the bark of a tree of the genus *astragalus*) and ethylene oxide homopolymer that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments

may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M §

## 21 CFR Part 872

[Docket No. 78N-2873]

### Medical Devices; Classification of Karaya With Sodium Borate Denture Adhesives

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying karaya with sodium borate denture adhesives into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFA-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of karaya with sodium borate denture adhesives:

1. Identification: A karaya with sodium borate denture adhesive is a device composed of karaya (a gum from the bark of a tree of the genus *astragalus*) and sodium borate that is applied to the base of a denture before the denture is inserted in the patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that karaya with sodium borate denture adhesives be classified into class III because the device presents a potential unreasonable risk of illness or injury. Long-term exposure to borate may cause chronic toxicity in denture wearers. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device, and thus, assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry and on a report of the Bureau of Drugs OTC Panel on Dentifrices and Dental Care Agents (Ref. 1). This report states that sodium borate concentration of 12 to 20 percent of the adhesive's total weight is equivalent to 2.6 to 5.3 percent boron (Ref. 2). Because at least a portion of a denture adhesive is ingested, this amount of boron could cause chronic toxicity in denture wearers.

5. Risks to health: (a) Toxicity: The boron in this device may cause chronic toxicity to users. (b) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that karaya with sodium borate denture adhesives be classified into class III (premarket approval). The agency believes the device presents a potential unreasonable risk of illness or injury

because the boron in the device may cause toxicity, and because there is a lack of information available to determine the safety and effectiveness of karaya with sodium borate as a denture adhesive. A review of the literature confirmed that little is known about the possible effects of sodium borate in denture adhesives. In addition, the device is purported or represented to be for a use (affixing dentures to the gums) that is of substantial importance in preventing impairment of human health. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device, and that insufficient information exists to establish a performance standard for this device.

#### References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices," by the OTC Panel on Dentifrices and Dental Care Agents.
2. Blacow, N.W. (ed.), "Martindale: The Extra Pharmacopeia," The Pharmaceutical Press, London, 1972, p. 1084-1085.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, § 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3470, to read as follows:

#### § 872.3470 Karaya with sodium borate denture adhesive.

(a) *Identification.* A karaya with sodium borate denture adhesive is a device composed of karaya (a gum from the bark of a tree of the genus *astragalus*) and sodium borate that is

applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner, Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2874]

### Medical Devices; Classification of Polyacrylamide Polymer (Modified Cationic Denture Adhesives)

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying polyacrylamide polymer (modified cationic) denture adhesives into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device to be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of polyacrylamide polymer (modified cationic) denture adhesives:

1. Identification: A polyacrylamide polymer (modified cationic) denture adhesive is a device composed of polyacrylamide polymer (modified cationic) that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that polyacrylamide polymer (modified cationic) be classified into class III because the device presents a potential unreasonable risk of illness or injury. If the device fails to anchor a denture in its proper position, a change in the distance the upper and lower jaws may occur which may lead to irritation of the gums and bone loss due to alteration of biting forces. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus, assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, this device, and on a report of the Bureau of Drugs' OTC Panel on Dentifrices and Dental Care agents. Tests of polyacrylamide polymer (modified cationic) for acute oral toxicity, eye irritation, and dermal and

inhalation toxicity in subacute and chronic feeding experiments in animals have been negative (Ref. 1). Human patch tests also have been negative (Ref. 2). However, no data were submitted to the Panel to demonstrate, and the literature did not establish, the effectiveness of polyacrylamide polymer as the sole ingredient of a denture adhesive.

5. Risks to health: (a) Bone loss: If the adhesive fails to anchor the denture in its proper position, and the distance between the upper and lower jaw is changed, then bone loss and gum irritation may occur.

(b) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that polyacrylamide polymer (modified cationic) denture adhesives be classified into class III (premarket approval). The agency believes the device presents a potential unreasonable risk of illness or injury because failure of the device to anchor the denture in place may result in bone loss, and because there is a lack of information to determine the effectiveness of polyacrylamide polymer as the sole ingredient of a denture adhesive. In addition, the device is purported or represented to be for a use (affixing dentures to the gums) that is of substantial importance in preventing impairment of human health. The agency believes that insufficient information exists to determine that general controls provide reasonable assurance of the safety and effectiveness of the device, and that insufficient information exists to establish a performance standard for this device.

#### References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices" by the OTC Panel on Dentifrices and Dental Care Agents, 1978.
2. "GRAS (Generally Recognized as Safe) Food Ingredients—Cellulose and Derivatives," Prepared for the Food and Drug Administration by Informatics, Inc., National Technical Information Service, U.S. Dept. of Commerce, PB 221226, 1972 OTC Vol. 080090.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA

published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3480, to read as follows:

**§ 872.3480 Polyacrylamide polymer (modified cationic) denture adhesive.**

(a) *Identification.* A polyacrylamide polymer (modified cationic) denture adhesive is a device composed of polyacrylamide polymer (modified cationic) to be applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2875]

**Medical Devices; Classification of Polyvinylmethylether Maleic Acid Calcium-Sodium Double Salt Denture Adhesives**

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying polyvinylmethylether maleic acid calcium-sodium double salt denture adhesive into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of polyvinylmethylether maleic acid calcium-sodium double salt denture adhesives:

1. *Identification:* A polyvinylmethylether maleic acid calcium-sodium double salt denture adhesive is a device composed of polyvinylmethylether maleic acid calcium-sodium double salt that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this adhesive be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports

requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that polyvinylmethylether maleic acid calcium-sodium double salt denture adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, polyvinylmethylether maleic acid calcium-sodium double salt denture adhesives in the practice of dentistry.

5. *Risks to health:* Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that polyvinylmethylether maleic acid calcium-sodium double salt denture adhesives be classified into class II (performance standards). The properties of the materials used to form polyvinylmethylether maleic acid calcium-sodium double salt denture adhesives depend upon the proper composition of these materials. Moreover, polyvinylmethylether maleic acid calcium-sodium double salt denture adhesives directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the

device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that polyvinylmethylether maleic acid calcium-sodium double salt denture adhesive should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3490, to read as follows:

**§ 872.3490 Polyvinylmethylether maleic acid calcium-sodium double salt denture adhesive.**

(a) *Identification.* A

polyvinylmethylether maleic acid calcium-sodium double salt denture adhesive is a device composed of polyvinylmethylether maleic acid calcium-sodium double salt that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket

number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[Docket No. 78N-2876]

**Medical Devices; Classification of  
Polyvinylmethylether Maleic  
Anhydride (PVM-MA), Acid Copolymer  
and Carboxymethylcellulose Sodium  
(NACMC) Denture Adhesives**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying polyvinylmethylether maleic anhydride (PVM-MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesives into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of polyvinylmethylether maleic anhydride (PVM-MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesives:

1. *Identification:* A polyvinylmethylether maleic anhydride (PVM-MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesive is a device composed of polyvinylmethylether maleic anhydride, acid copolymer, and carboxymethylcellulose sodium that is applied to the base of a denture before the denture is inserted in a patient's mouth. The device is used to improve denture retention and comfort.

2. *Recommended classification:* Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that polyvinylmethylether maleic anhydride (PVM-MA), acid copolymer and carboxymethylcellulose sodium (NACMC) be classified into class III because the device presents a potential unreasonable risk of illness or injury. The materials used in the device are toxic if ingested; the possible acidity of the device may also cause tissue burns. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus, assure its safety and effectiveness.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device and on a report of the Bureau of Drugs' OTC Panel on Dentifrices and Dental Care Agents. The report states that sufficient data are not available to demonstrate the safety and effectiveness of a combination of PVM-MA and NACMC used as a denture adhesive. (Ref. 1). The Panel also based its recommendation on a publication by Blacow (Ref. 2) which states that the pH and stability of the anhydride and diacid forms may be hazardous due to the possible presence

of an acid pH of 2 to 3, which can burn the tissues in the mouth.

5. Risks to health: (a) Toxicity: Ingestion of the materials in this device may cause chronic toxicity to users. (b) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction. Acidity of the adhesive may burn tissues in the mouth.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that polyvinylmethylether maleic anhydride (PVM-MA), acid copolymer, and carboxymethylcellulose sodium (NACMC) denture adhesives be classified into class III (premarket approval). The agency believes the device presents a potential unreasonable risk of illness or injury because the materials in the device may cause chronic toxicity or oral tissue burns, and because there is a lack of information to determine the safety and effectiveness of the PVM-MA and NACMC combination as a denture adhesive. The literature confirms that little is known about possible effects of long-term use of this material. In addition, the device is purported or represented for a use (affixing dentures to the gums) that is of substantial importance in preventing impairment of human health. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard for this device.

#### References

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesives

1. *Identification:* A polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesive is a device composed of polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium that is applied to the base of a denture before the denture is inserted into a patient's mouth. The device is used to improve denture retention and comfort.

2. Recommended classification: Class I (general controls). The Panel recommends that this adhesive be

exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesives be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because it is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesives in the practice of dentistry.

5. Risks to health: Patient discomfort and poor dental health: If the adhesive fails to anchor the denture in its proper position, the patient may experience discomfort and poor dental health.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesives be classified into class II (performance standards). The properties of the materials used to form polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesives depend upon the proper composition of these materials. Polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose denture adhesives also directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse

tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesives should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3510, to read as follows:

**§ 872.3510 Polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesive.**

(a) *Identification.* A polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium denture adhesive is a device composed of polyvinylmethylether maleic acid calcium-sodium double salt and carboxymethylcellulose sodium that is applied to the base of a denture before the denture is inserted into a patient's

mouth. The device is used to improve denture retention and comfort.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

[Docket No. 78N-2878]

#### Medical Devices; Classification of OTC Denture Cleansers

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying OTC denture cleansers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of OTC denture cleansers:

1. Identification: An OTC denture cleanser is a device that consists of material in the form of a powder, tablet, or paste, that is used to remove debris from removable prosthetic dental appliances, such as bridges or dentures. The dental appliance is removed from the patient's mouth when the appliance is cleaned.

2. Recommended classification: Class I (general controls). The Panel recommends that OTC denture cleansers be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that OTC denture cleansers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, denture cleansers in the practice of dentistry.

5. Risks to health: Oral tissue damage: Denture cleanser residue remaining on dentures may burn oral tissues.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that

OTC denture cleansers be classified into class II (performance standards). Residues of the cleansers that may remain on the dentures have the potential for burning oral tissues. Porous dental plaque frequently accumulates on dentures, preventing the complete removal, by rinsing, of denture cleansers from denture surfaces. Performance standards for denture cleansers would control the cleanser formulations to assure that expected low levels of cleanser residues would not harm users. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risk to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that OTC denture cleansers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and a list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3520, to read as follows:

**§ 872.3520 OTC denture cleanser.**

(a) *Identification.* An OTC denture cleanser is a device that consists of material in the form of a powder, tablet, or paste that is used to remove debris

from removable prosthetic dental appliances, such as bridges or dentures. The dental appliance is removed from the patient's mouth when the appliance is cleaned.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[Docket No. 78N-2879]

**Medical Devices; Classification of  
Mechanical Denture Cleaners**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mechanical denture cleaners into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305).

Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HF-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mechanical denture cleaners:

1. Identification: A mechanical denture cleaner is an AC-powered denture cleaning device that mechanically agitates the denture cleansing solution.

2. Recommended classification: Class I (general controls). The Panel recommends that mechanical denture cleaners be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel recommends that mechanical denture cleaners be classified into class I (general controls) because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purposes recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, mechanical denture cleaners in the practice of dentistry.

5. Risks to health: Pacemaker interference: Operation of mechanical denture cleaners may cause interference

with the proper function of a heart pacemaker.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that mechanical denture cleaners be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. This AC-powered device may interfere with the proper function of a heart pacemaker. In addition, leakage current or a malfunction of the device could result in an electrical shock. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that mechanical denture cleaners should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3530, to read as follows:

**§ 872.3530 Mechanical denture cleaner.**

(a) Identification. A mechanical denture cleaner is an AC-powered denture cleaning device that mechanically agitates the denture cleansing solution.

(b) Classification. Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-2880]

**Medical Devices; Classification of Over-the-Counter (OTC) Denture Cushions**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying over-the-counter (OTC) denture cushions into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of over-the-counter (OTC) denture cushions.

1. **Identification:** An over-the-counter (OTC) denture cushion is a prefabricated or noncustom made device consisting of a material, such as wax or cotton fibers, that is intended to be applied to the entire base or inner surface of a denture before the denture is inserted in a patient's mouth. The device is used to improve temporarily the fit of a loose or uncomfortable denture and can be purchased over-the-counter.

2. **Recommended classification:** Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority.

3. **Summary of reasons for recommendation:** The Panel recommends that over-the-counter (OTC) denture cushions be classified into class III because the device presents a potential unreasonable risk of illness or injury. Use of the device may cause an improper vertical dimension of a denture which may result in increased occlusal (biting) forces and lead to bone loss through resorption (degeneration of the bone through gradual dissolution). The Panel also believes that long-term irritation of oral tissue caused by incorrect vertical dimension could cause the formation of carcinomas. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel also believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, the device. The Panel also based its recommendation on statements by representatives of the Bureau of Drugs that further studies are necessary to determine the safety and effectiveness of this device (Ref. 1).

5. **Risks to health:** (a) Bone degeneration: Use of the device may

cause alteration in the vertical dimension of a denture, resulting in bone degeneration in the upper and lower jaw. (b) Carcinomas: Long-term irritation of oral tissues caused by incorrect vertical dimension may cause formation of carcinomas.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that over-the-counter (OTC) denture cushions be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury because the device may cause a change in the vertical dimension of the denture resulting in bone loss. In addition long term irritation of oral tissue caused by incorrect vertical dimension may cause the formation of carcinomas. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices," by the OTC Panel on Dentifrices and Dental Care Agents, May 22, 1978.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3540, to read as follows:

**§ 872.3540 Over-the-counter (OTC) denture cushion.**

(a) **Identification.** An over-the-counter (OTC) denture cushion is a prefabricated or noncustom made device consisting of a material, such as wax or cotton fibers, that is intended to be applied to the entire base or inner surface of a denture before the denture is inserted in the patient's mouth. The device is used to improve temporarily the fit of a loose or uncomfortable denture and can be purchased over-the-counter.

(b) **Classification.** Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**Medical Devices; Classification of Over-the-Counter (OTC) Denture Pads**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying over-the-counter (OTC) denture pads into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of over-the-counter (OTC) denture pads:

1. Identification: An over-the-counter (OTC) denture pad is a prefabricated or noncustom-made device consisting of a material, such as wax or cotton fibers, that is intended to be applied to a portion of the base or inner surface of a denture before the denture is inserted in a patient's mouth. The device is used to soothe temporarily sore areas of the gums caused by an improperly fitting denture and can be purchased over-the-counter.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that over-the-counter (OTC) denture pads be classified into class III because the device presents a potential unreasonable risk of illness or injury. Use of the device may cause an improper vertical dimension of the denture which may result in increased occlusal (biting) forces and lead to bone loss through resorption (degeneration of the bone through gradual dissolution). The Panel also believes that long-term irritation of oral tissue caused by incorrect vertical dimension could cause formation of carcinomas. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, the device

should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device. The Panel also based its recommendation on statements by representatives of the Bureau of Drugs that further studies are necessary to determine the safety and effectiveness of this device (Ref. 1).

5. Risks to Health: (a) Bone degeneration: Use of the device may cause alteration in the vertical dimension of a denture and result in bone degeneration in the upper and lower jaw. (b) Carcinomas: Long-term irritation of oral tissues caused by incorrect vertical dimension may cause formation of carcinomas.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that over-the-counter (OTC) denture pads be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury because the device may cause a change in the vertical dimension of the jaw, resulting in bone loss. In addition, long-term irritation of oral tissue caused by incorrect vertical dimension may cause the formation of carcinomas. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices," by the OTC Panel on Dentifrices and Dental Care Agents, 1978.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the

former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3550, to read as follows:

**§ 872.3550 Over-the-counter (OTC) denture pad.**

(a) *Identification.* An over-the-counter (OTC) denture pad is a prefabricated or noncustom-made device consisting of a material, such as wax or cotton fibers, that is intended to be applied to a portion of the base or inner surface of a denture before the denture is inserted in a patient's mouth. The device is used to soothe temporarily sore areas of the gums caused by an improperly fitting denture and can be purchased over-the-counter.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. [Docket No. 78N-2882]

**Medical Devices; Classification of Over-the-Counter (OTC) Denture Reliners**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying over-the-counter (OTC)

denture liners into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of over-the-counter (OTC) denture liners:

1. **Identification:** An over-the-counter (OTC) denture reliner is a device consisting of a material, such as plastic resin, that is intended to be applied as a permanent coating or lining on the base or tissue-contacting surface of a denture. The device is used to replace a worn denture lining and can be purchased over-the-counter.

2. **Recommended classification:** Class III (premarket approval). The Panel recommends that the premarket approval of this device be a high priority.

3. **Summary of reasons for recommendation:** The Panel recommends that over-the-counter (OTC) denture liners be classified into class III because the device presents a potential unreasonable risk of illness or injury. Use of the device may cause an improper vertical dimension of the denture which may result in increased occlusal (biting) forces and lead to bone

loss through resorption (degeneration of the bone through gradual dissolution). The Panel also believes that long-term irritation of oral tissue caused by incorrect vertical dimension could cause formation of carcinomas. The Panel believes that general controls would not provide sufficient control over this characteristic. The Panel believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry. The Panel also based its recommendation on statements by representatives of the Bureau of Drugs that further studies are necessary to determine the safety and effectiveness of this device (Ref. 1).

5. **Risks to health:** (a) Bone degeneration: Use of the device may cause an alteration in the vertical dimension of the denture and result in bone degeneration in the upper and lower jaw. (b) Carcinomas: Longterm irritation of oral tissues caused by incorrect vertical dimension may cause formation of carcinomas.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that over-the-counter (OTC) denture liners be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury because the device may cause a change in the vertical dimension of the jaw, resulting in bone loss. In addition, long-term irritation of oral tissues caused by incorrect vertical dimension may cause formation of carcinomas. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices," by the OTC Panel on Dentifrices and Dental Care Agents, 1978.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3560, to read as follows:

**§ 872.3560 Over-the-counter (OTC) denture reliner.**

(a) **Identification.** An over-the-counter (OTC) denture reliner is a device consisting of a material such as plastic resin, that is intended to be applied as a permanent coating or lining on the base or tissue-contacting surface of a denture. The device is used to replace a worn denture lining and can be purchased over-the-counter.

(b) **Classification.** Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 80-39865 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2883]

**Medical Devices; Classification of Over-the-Counter (OTC) Denture Repair Kits****AGENCY:** Food and Drug Administration.**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying over-the-counter (OTC) denture repair kits into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of over-the-counter (OTC) denture repair kits:

1. Identification: An over-the-counter (OTC) denture repair kit is a device consisting of material, such as a resin monomer system of powder and liquid glues, that is intended to be applied permanently to a denture to mend cracks or breaks. The device can be purchased over-the-counter.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that over-the-counter (OTC) denture repair kits be classified into class III because the device presents a potential unreasonable risk of illness or injury. If the repaired denture does not have the same characteristics and fit as the original denture, the repaired denture may cause a change in the vertical dimension of the denture which may result in increased occlusal (biting) forces and lead to bone loss through resorption (degeneration of the bone through gradual dissolution). The Panel also believes that long-term irritation of oral tissue caused by incorrect vertical dimension could cause formation of carcinomas. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel believes that sufficient data do not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the potential hazards associated with the inherent properties of this device and on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry. The Panel also based its recommendation on statements by representatives of the Bureau of Drugs that further studies are necessary to determine the safety and effectiveness of this device (Ref. 1).

5. Risks to health: Bone degeneration: If the repaired denture does not have the same characteristics and fit as the original denture, the repaired denture may cause alteration of the vertical dimension of the patient's jaw and lead to bone degeneration in the jaws. (b) Carcinomas: Long term irritation of oral tissue caused by incorrect vertical dimension may cause formation of carcinomas.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that over-the-counter (OTC) denture repair kits be classified into class III (premarket approval). The agency believes that the device presents a

potential unreasonable risk of illness or injury because the device may cause a change in the vertical dimension of the jaw, resulting in bone loss. In addition, long term irritation of oral tissue caused by incorrect vertical dimension may cause the formation of carcinomas. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard to provide this assurance.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Summary Report on Denture Aids and Plaque Disclosants Transferred to the Bureau of Medical Devices," by the OTC Panel on Dentifrices and Dental Care Agents, 1978.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3570, to read as follows:

**§ 872.3570 Over-the-counter (OTC) denture repair kit.**

(a) *Identification.* An over-the-counter (OTC) denture repair kit is a device consisting of a material, such as a resin monomer system of powder and liquid glues, that is intended to be applied permanently to a denture to mend cracks or breaks. The device can be purchased over-the-counter.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2884]

### Medical Devices; Classification of Preformed Gold Denture Teeth

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed gold denture teeth into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of preformed gold denture teeth:

1. Identification: A preformed gold denture tooth is a device composed principally of gold metal and containing other metals, that is used as a tooth or a portion of a tooth in a fixed or removable partial denture.

2. Recommended classification: Class I (general controls). The Panel recommends that preformed gold denture teeth be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that prefabricated gold denture teeth be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed gold denture teeth in the practice of dentistry.

5. Risks to health: None identified.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that preformed gold denture teeth be classified into class II (performance standards). The properties of the materials used to form preformed gold denture teeth depend upon the correct composition of these materials. Moreover, preformed gold denture teeth directly contact oral tissues. Altering the

composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed gold denture teeth should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3580, to read as follows:

### § 872.3580 Preformed gold denture tooth.

(a) *Identification.* A preformed gold denture tooth is a device composed principally of gold metal and containing other metals, that is used as a tooth or a portion of a tooth in a fixed or removable partial denture.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written

comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

## 21 CFR Part 872

[Docket No. 78N-2885]

### Medical Devices; Classification of Preformed Plastic Denture Teeth

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed plastic denture teeth into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel,

an FDA advisory committee, made the following recommendation regarding the classification of preformed plastic denture teeth:

1. Identification: A preformed plastic denture tooth is a prefabricated device composed of materials, such as methyl methacrylate, that is used as a tooth in a denture.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that plastic denture teeth be classified into class II because the materials used in the device that contact the body should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that preformed plastic denture teeth be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information

regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3590, to read as follows:

#### § 872.3590 Preformed plastic denture teeth.

(a) *Identification.* A preformed plastic denture tooth is a prefabricated device composed of materials, such as methyl methacrylate, that is used as a tooth in a denture.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

## 21 CFR Part 872

[Docket No. 78N-2886]

### Medical Devices; Classification of Partially Fabricated Denture Kits

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying partially fabricated denture kits into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future

regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of partially fabricated denture kits:

1. **Identification:** A partially fabricated denture kit is a device, composed of connected preformed teeth, that is used in the construction of dentures. A denture base is constructed, using the patient's mouth as the mold, by partially polymerizing the resin denture base materials while the materials are in contact with the oral tissues. After the denture base is constructed, the connected preformed teeth are inserted into the base.

2. **Recommended classification:** Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority.

3. **Summary of reasons for recommendation:** The Panel recommends that partially fabricated denture kits be classified into class III because the device presents a potential unreasonable risk of illness or injury. Failure of the device to reproduce accurately the physiological dimensions of the mouth may cause dysfunction of the jaw.

In addition, the necessity of partial polymerization of the materials used in the device while these materials are in contact with oral tissue may cause unnecessary tissue irritation and damage. The Panel believes that use of this device involves a questionable

technique that omits a number of generally accepted steps in the fabrication of denture prostheses. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel also believes that sufficient data does not exist to establish an adequate performance standard to assure the safety and effectiveness of this device because satisfactory performance has never been demonstrated. Therefore, premarket approval is necessary for this device. The Panel further recommends that use of this device be reserved for emergency situations until a conventional denture can be made.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation of the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry. The Panel members believe that the absence of a generally accepted denture construction procedure using this device produces a denture that is not as safe and effective as a prosthesis constructed in a conventional manner.

5. **Risks to health:** (a) **Jaw joint dysfunction:** Jaw joint dysfunction may result from inaccurate reproduction of the physiologic dimensions of the mouth. (b) **Adverse tissue reaction:** Irritation of oral tissues may result from the polymerization of the lining materials while in contact with the tissues of the mouth.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that partially fabricated denture kits be classified into class III (premarket approval). The agency believes that premarket approval is necessary for this device because the device presents a potential unreasonable risk of illness or injury. Failure of the device to reproduce accurately the physiologic dimensions of the mouth may cause jaw joint dysfunction. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of this device, and that insufficient information exists to establish a performance standard to provide this assurance.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation

identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3600 to read as follows:

**§ 872.3600 Partially fabricated denture kit.**

(a) **Identification.** A partially fabricated denture kit is a device, composed of connected preformed teeth, that is used in the construction of dentures. A denture base is constructed using the patient's mouth as the mold, by partially polymerizing the resin denture base materials while the materials are in contact with the oral tissues. After the denture base is constructed, the connected preformed teeth are inserted into the base.

(b) **Classification.** Class III (premarket approval).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39869 Filed 12-29-80; 9:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2887]

**Medical Devices; Classification of Endosseous Implants**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endosseous implants into class III (premarket approval). FDA is

also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-437-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of endosseous implants:

1. Identification: An endosseous implant is a device of a material, such as titanium, that is surgically placed in the bone of the upper or lower jaw arches to provide support for prosthetic devices, such as artificial teeth, and to restore the patient's chewing function.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that endosseous implants be classified into class III because the device is implanted into the human body and because the device presents a potential unreasonable risk of illness or injury. Use of this device involves a risk of abnormal spontaneous pain due to nerve impingement by the implant and a risk of perforation of the lingual and labial bony plates of the upper or lower jaws. The Panel also believes that sufficient data do not exist to establish an adequate performance standard to

provide reasonable assurance of the safety and effectiveness of the device. Therefore, the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and thus assure its safety and effectiveness.

(4) Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, endosseous implants in the practice of dentistry and on a presentation by the Oral Implant Subcommittee (Ref. 1). The Subcommittee presented information regarding adverse conditions and injuries caused by the device, and stated that there is an absence of criteria for determining a successful implant. The Panel believes that further research will be required to obtain this information.

5. Risks to health: (a) Tissue degeneration: Localized tissue degeneration may be caused by endosseous implants due to excessive mobility. (b) Pain: Nerve impingement by the device may cause pain. (c) Bone perforation: Improper design of the device may cause excess mobility of the implant following surgical placement and subsequent perforation of the bony plates of the upper or lower jaws. (d) Infection: Micro-organisms may be harbored between the implant and the gums and cause localized infection.

**Proposed Classification**

FDA has sought additional information and data concerning the use of endosseous implants in dentistry. According to some of the literature, these implants may be engulfed by a fibrous tissue layer when they are not exposed to the oral cavity and show only low-grade chronic inflammation, if any (Ref. 2). However, Natiella, et al. (Ref. 3) assert that there are not adequate data to determine the indications for use of the implants and the response of oral tissues to these devices. Furthermore, the agency is aware, through informal discussions of the Panel, that opinions of investigators differ as to epithelial proliferation, inflammatory infiltration, and response of subperiosteal tissues.

FDA agrees with the Panel recommendation and is proposing that Endosseous Implants be classified into class III (premarket approval). FDA believes that the device presents a potential risk of illness or injury to the patient if there are not adequate data to assure the safe and effective use of the device. In addition, the device is purported or represented to be for a use (support of prosthetic dental devices) that is of substantial importance in

preventing impairment of human health. Furthermore, the device is an implant, which the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c(d)) requires to be classified into class III unless the agency determines that premarket approval is not necessary to provide reasonable assurance of a device's safety and effectiveness. In this case, the agency has determined that premarket approval is necessary for the device because general controls and performance standards are insufficient to provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is insufficient information to establish a standard to provide reasonable assurance of the safety and effectiveness of the device.

**References**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Minutes to the Oral Implant Subcommittee, FDA, Bureau of Medical Devices, July 19, 1976.

2. Langeland, K., and L. Spangberg, "Methodology and Criteria in Evaluation of Dental Endosseous Implants," *Journal of Dental Research*, 54:B158-B165, June 1975.

3. Natiella, J. R., et al., "Current Evaluation of Dental Implants," *Journal of the American Dental Association*, 84:1358, June 1972.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3640, to read as follows:

**§ 872.3640 Endosseous implant.**

(a) *Identification.* An endosseous implant is a device made of a material, such as titanium, that is surgically placed in the bone of the upper or lower

jaw arches to provide support for prosthetic devices, such as artificial teeth, and to restore the patient's chewing function.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

## 21 CFR Part 872

[Docket No. 78N-2888]

### Medical Devices; Classification of Titanium Subperiosteal Implant Materials

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying titanium subperiosteal implant materials into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8657 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of titanium subperiosteal implant materials:

1. Identification: Titanium subperiosteal implant material is a device composed of titanium that is used to construct custom prosthetic devices which are surgically implanted into the lower or upper jaw between the periosteum (connective tissue covering the bone) and supporting bony structures. The device provides support for prostheses, such as dentures.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that titanium subperiosteal implant materials be classified into class II. Although this device is implanted into the human body, the Panel believes that premarket approval is not necessary to assure its safety and effectiveness because it has been used successfully for years as a subperiosteal implant material and sufficient data exist to establish performance standards.

Materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, on the past use of this device in the fabrication of subperiosteal implants, and on the studies of laboratory animals which demonstrate the device's biocompatibility (Ref. 1).

5. Risks to health: (a) Bone loss: Bone loss may result from impingement by the device on the bony ridge of the jaws. (b)

Localized tissue degeneration and infection: Localized tissue degeneration may result from exposure of the tissues to micro-organisms entering the body at the site of the implant, causing infection. (c) Pain: Nerve impingement by the device, as a result of chewing force, may cause pain.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that titanium subperiosteal implant materials be classified into class II (performance standards). FDA has reviewed the literature regarding the use of titanium materials in the fabrication of subperiosteal implants and the research conducted with these materials. Research on the biocompatibility of materials used in the construction of implanted devices has established the properties necessary for acceptable implant materials. Muratori (Ref. 2) specifies that tissue compatibility, hardness, and resistance to fatigue (mechanical failure due to stress over time) are the most important considerations. These findings are supported by Bodine (Ref. 3) who evaluated the success rate of subperiosteal implants. Bodine concludes that a major cause of subperiosteal implant failure is inflammation due to deterioration of the implant material, a deterioration caused by impurities in that material. FDA believes that a performance standard for titanium materials used in subperiosteal implants can be established to detail the properties necessary for a safe and effective implant. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

[Docket No. 78N-2889]

**Medical Devices, Classification of  
Cobalt Chrome Molybdenum  
Subperiosteal Implant Materials**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cobalt chrome molybdenum subperiosteal implant material into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATE:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cobalt chrome molybdenum subperiosteal implant material:

1. Identification: Cobalt chrome molybdenum subperiosteal implant material is a device composed of cobalt chrome molybdenum that is used to construct custom prosthetic devices which are surgically implanted into the lower or upper jaw between the periosteum (connective tissue covering the bone) and supporting bony structures. The device provides support for prostheses, such as dentures.

2. Recommended classification: Class II (performance standards). The Panel

recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that cobalt chrome molybdenum subperiosteal implant materials be classified into class II. Although this device is implanted into the human body, the Panel believes that premarket approval is not necessary to assure its safety and effectiveness because it has been used successfully for years as a subperiosteal implant material and sufficient data exist to establish performance standards. Materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, on the past use of this device in the fabrication of subperiosteal implants, and on the studies of laboratory animals which demonstrate the device's biocompatibility (Ref. 1).

5. Risks to health: (a) Bone loss: Bone loss may result from impingement by the device on the bony ridge of the jaws. (b) Localized tissue degeneration and infection: Localized tissue degeneration may result from exposure of tissues to oral microorganisms which may enter the body at the site of the implant causing infection. (c) Pain: Nerve impingement by the device, as a result of chewing force, may cause pain.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that cobalt chrome molybdenum subperiosteal implant materials be classified into class II (performance standards).

FDA has reviewed the literature regarding the use of cobalt chrome molybdenum materials in the fabrication of subperiosteal implants and the research conducted with these materials. Research on the biocompatibility of materials used in the construction of implanted devices has established the properties necessary for acceptable implant materials. Muratori (Ref. 2) specifies that tissue

compatibility, hardness, and resistance to fatigue (mechanical failure due to stress over time) are the most important considerations. These findings are supported by Bodine (Ref. 3) who evaluated the success rate of subperiosteal implants. Bodine concludes that a major cause of subperiosteal implant failure is inflammation due to deterioration of the implant material, a deterioration caused by impurities in that materials. FDA believes that a performance standard for cobalt chrome molybdenum materials used in subperiosteal implants can be established to detail the properties necessary for a safe and effective implant. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

### Medical Devices; Classification of Impression Materials

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying impression materials into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation

based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of impression materials:

1. *Identification:* Impression material is a device composed of materials, such as alginate or polysulfide, that are placed on a preformed impression tray and used to reproduce the structure of a patient's teeth and gums. The device provides models for study and for production of restorative and prosthetic devices, such as gold inlays and dentures.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that impression materials be classified into class II because the materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The quality of the materials must also be controlled to prevent trauma to surrounding tissues or an allergic response in the patient. The Panel believes that general controls alone would not provide sufficient control over the characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on references in the literature that state that impression materials may cause an allergic reaction or trauma to surrounding tissue (Refs. 1 and 2).

5. Risks to health: (a) Adverse tissue reaction: If the materials of the device are not biocompatible, the patient may have an adverse tissue reaction. (b) Tissue trauma: If the material is not of adequate quality, trauma to the patient's oral tissue may result.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that impression materials be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

#### References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Kaloyannides, T. M. and D. J. Kapari, "Mixtures of Elastomer Impression Materials: II," *Journal of Dental Research*, 54:493, 1975.
2. Glenwright, H. D., "Bone Regeneration Following Damage by Polysulfide Impression Material," *Journal of Clinical Periodontology*, 2:250-252, 1975.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-564 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.3660, to read as follows:

#### § 872.3660 Impression material.

(a) *Identification.* Impression material is a device composed of materials, such as alginate or polysulfide, that are

placed on a preformed impression tray and used to reproduce the structure of a patient's teeth and gums. The device provides models for study and for production of restorative and prosthetic devices, such as gold inlays and dentures.

(b) *Classification.* Class II (performance standard).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in bracket in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Date: November 19, 1980.

## 21 CFR PART 872

[Docket No. 78N-2891]

### Medical Devices; Classification of Resin Impression Tray Material

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying resin impression tray material into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of resin impression tray material:

1. *Identification:* Resin impression tray material is a device used in a two-step dental mold fabricating process. The device consists of a resin material, such as methyl methacrylate, and is used to form a custom impression tray is not suitable, such as in the fabrication of crowns, bridges, or full dentures. A preliminary plaster or stone model of the patient's teeth and gums is made. The resin impression tray material is applied to this preliminary study model to form a custom tray. This tray is then filled with impression material and inserted into the patient's mouth to make an impression, from which a final, more precise, model of the patient's mouth is cast.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that resin impression tray material be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and

clinical experience with, resin impression tray material in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the panel recommendation and is proposing that resin impression tray material be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

FDA disagrees with the Panel's recommendation that manufacturers of resin impression tray material be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of resin impression tray material be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information

about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of resin impression tray material must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of resin impression tray material must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3670, to read as follows:

#### § 870.3670 Resin impression tray material.

(a) *Identification.* Resin impression tray, material is a device used in a two-step dental mold fabricating process. The device consists of a resin material, such as methyl methacrylate, and is used to form a custom impression tray for use in cases in which a preformed impression tray is not suitable, such as in the fabrication of crowns, bridges, or full dentures. A preliminary plaster or stone model of the patient's teeth and gums is made. The resin impression tray material is applied to this preliminary study model to form a custom tray. This tray is then filled with impression

material and inserted into the patient's mouth to make an impression, from which a final, more precise, model of the patient's mouth is cast.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820 with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in bracket in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 80-39874 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2892]

#### Medical Devices; Classification of Polytetrafluoroethylene (PTFE) Vitreous Carbon Materials

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying polytetrafluoroethylene (PTFE) vitreous carbon materials into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of polytetrafluoroethylene (PTFE) vitreous carbon materials:

**1. Identification:**

Polytetrafluoroethylene (PTFE) vitreous carbon material is a device composed of polytetrafluoroethylene (PTFE) vitreous carbon that is used in maxillofacial alveolar ridge augmentation (building up the upper jaw area that contains the sockets in which teeth are rooted) and to coat metal surgical implants in the alveoli (sockets in which the teeth are rooted) and the temporomandibular joints (the joint between the upper and lower jaws).

**2. Recommended classification:** Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

**3. Summary of the reasons for recommendation:** The Panel recommends that polytetrafluoroethylene (PTFE) vitreous carbon materials be classified into class II. Although this device is implanted into the human body, the Panel believes that premarket approval is not necessary to assure its safety and effectiveness. Adverse reactions to this device are minimal and generally, are the result of poor surgical technique rather than material failure. However, Materials used in the device should meet a generally acceptable satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance.

**4. Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel

members' personal knowledge of, and clinical experience with, the device in the practice of dentistry and on presentation by a developer, a manufacturer, and a user of the material which discussed the use and success of polytetrafluoroethylene polymer material in oral surgery (Ref. 1)

**5. Risks to health:** (a) Infection: If the device cannot be sterilized adequately, postsurgical infection may result. (b) Adverse tissue reaction: If the materials of the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that polytetrafluoroethylene vitreous carbon materials be classified into class II (performance standards). Although this device is implanted into the human body, the agency believes that premarket approval is not necessary to assure its safety and effectiveness. The agency believes that a performance standard is necessary for this device because general controls alone are sufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Kent, J. N., C. A. Homsy, and A. Abbott, Presentation, Dental Device Classification Panel, "Proplast Implant Devices," December 5, 1977.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs., 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3680, to read as follows:

**§ 872.3680 polytetrafluoroethylene (PTFE) vitreous carbon materials.**

**(a) Identification.**

polytetrafluoroethylene (PTFE) vitreous carbon material is a device composed of polytetrafluoroethylene (PTFE) vitreous carbon that is used in maxillofacial alveolar ridge augmentation (building up the upper jaw area that contains the sockets in which teeth are rooted) and to coat metal surgical implants in the alveoli (sockets in which the teeth are rooted) and the temporomandibular joints (the joint between the upper and lower jaws).

**(b) Classification.** Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

**[Docket No. 78N-2893]**

**Medical Devices; Classification of Tooth Shade Resin Materials**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying tooth shade resin materials into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final

regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of tooth shade resin materials:

1. Identification: Tooth shade resin material is a device composed of materials such as bisphenol-A and glycidyl methacrylate (Bis-GMA) that is used to restore carious lesions or structural defects in teeth.
2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.
3. Summary of reasons for recommendation: The Panel recommends that tooth shade resin materials be classified into class II because improper chemical composition of the resin may cause roughening of the restorative surface, which results in discoloration of tooth enamel and plaque accumulation on the tooth. The materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on an article by G. L. Lee, M.D., et al., (ref. 1).

The article states that before a composite resin is used for restoration, the tooth enamel is etched with 50 percent phosphoric acid, which may irritate the tooth pulp.

5. Risks to health: (a) Periodontal disease: Discoloration and roughening of a restoration made with this device may cause plaque accumulation and lead to periodontal disease. (b) Pulp damage: Etching with 50 percent phosphoric acid before the restoration is completed may cause tooth pulp damage, unless the pulp is properly protected.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that tooth shade resin materials be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Lee, G. L., J. A. Orlowski, G. C. Schidt, and R. L. Ihsen. "Histological Studies of an Adhesive Paint-on Restorative for Cervical Abrasions," *Australian Dental Journal*, 20:304-308, 1975.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D

by adding new § 872.3690, to read as follows:

**§ 872.3690 Tooth shade resin material.**

(a) *Identification.* Tooth shade resin material is a device composed of materials such as bisphenol-A glycidyl methacrylate (Bis-GMA) that is used to restore carious lesions or structural defects in teeth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1980 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**Medical Devices; Classification of Dental Mercury**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental mercury into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305).

Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental mercury:

1. Identification: Dental mercury is a device composed of mercury that is used as a component of amalgam alloy in the restoration of dental cavities or broken teeth.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that dental mercury be classified into class II because the material in the device should meet a generally accepted satisfactory level of tissue compatibility. Dental mercury is a toxic substance and must be handled properly to control the hazards it presents. The Panel believes that general controls alone would not provide sufficient control over this characteristic.

The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on an article published in the *Journal of the American Dental Association* "An Environmental Study of Mercury Contamination in Dental Offices" (Ref. 1). The article discusses the hazards associated with use of mercury in dentistry and concludes that there is no danger of systemic poisoning for patients whose teeth have been restored with amalgam containing mercury. However, if proper procedures are not followed, there are potential hazards to those who handle mercury.

5. Risks to health: (a) Mercury poisoning: If the device is not handled properly, the user may suffer mercury poisoning from inhalation of mercury vapors. (b) Adverse tissue reaction: If the material in the device is not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental mercury be classified into class II (performance standards).

FDA has reviewed the medical literature on use of dental mercury in dentistry and has found evidence to support the Panel recommendation. Kawahara et al. concluded that the cytotoxicity of the amalgam is related to free mercury available after mixing the alloy and the mercury, but that cytotoxicity was nearly nonexistent after complete setting of the amalgam (Ref. 2). Cataldo and Santis studied the results of implantation of amalgam into the oral tissues (Ref. 3). Encapsulation in connective tissue occurred with the smallest pieces of amalgam without inflammatory response, and larger pieces had connective tissue encapsulation with some macrophage (microorganism) response. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

**References**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "An Environmental Study of Mercury Contamination in Dental Offices," *Journal of the American Dental Association*, Vol. 89, Nov. 1974.

2. Kawahara, H., et al., "Cellular Responses to Dental Amalgam in-Vitro," *Journal of Dentistry Research*, 54(2):394-401, March-April 1975.

3. Cataldo, E., and H. Santis, "Response of the Oral Tissue to Exogenous Foreign Materials," *Journal of Periodontics*, 45(2):93-106, February 1974.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43

FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3700, to read as follows:

**§ 872.3700 Dental mercury.**

(a) *Identification.* Dental mercury is a device composed of mercury that is used as a component of amalgam alloy in the restoration of dental cavities or broken teeth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2895]

**Medical Devices; Classification of Base Metal Alloys**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying base metal alloys into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II

is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of base metal alloys:

1. Identification: A base metal alloy is a device composed of a material, such as a mixture of nickel and chromium, that is used in the fabrication of a custom-made dental device, such as porcelain veneer for a tooth.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a medium priority.

3. Summary of reasons for recommendation: The Panel recommends that base metal alloys be classified into class II because the materials used in the device contact the body and should meet a generally accepted satisfactory level of tissue compatibility. The composition of the materials should also be controlled to prevent toxic reactions to the alloys. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard to provide such assurance.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel

members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction. (b) Toxic reaction: Alloys containing nickel and beryllium may cause a toxic reaction in the patient.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that base metal alloys be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3710, to read as follows:

**§ 872.3710 Base metal alloy.**

(a) *Identification.* A base metal alloy is a device composed of a material, such as a mixture of nickel and chromium, that is used in the fabrication of a custom-made dental device, such as porcelain veneer for a tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four

copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 80-36678 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2897]

**Medical Devices; Classification of Pantographs**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying pantographs into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-406), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of pantographs:

1. Identification: A pantograph is a device that is attached to a patient's head and is used to duplicate lower jaw movements to aid in the construction of restorative and prosthetic dental devices. A marking pen is attached to the lower jaw component of the device and, as the patient's mouth opens, the pen records on graph paper the angle between the upper and lower jaw.

2. Recommended classification: Class I (performance controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that pantographs be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, pantographs in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that pantographs be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of pantographs be exempted from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of

the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of pantographs, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning pantographs. The agency does not at this time anticipate the premarket approval will be required for this device. The agency believes that the semianual updating of device listing under section 510(j)(2) will provide FDA will adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of pantographs be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experiences with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of pantographs be exempt from the device

good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of pantographs must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems from complaint investigation and followup. The agency also believes that manufacturers of pantographs must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3730, to read as follows:

#### § 872.3730 Pantograph.

(a) Identification. A pantograph is a device that is attached to a patient's head and is used to duplicate lower jaw

movements to aid in the construction of restorative and prosthetic dental devices. A marking pen is attached to the lower jaw component of the device and, as the patient's mouth opens, the pen records on graph paper the angle between the upper and lower jaw.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39079 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2898]

### Medical Devices; Classification of Retentive and Splinting Pins

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying retentive and splinting pins into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of retentive and splinting pins:

1. Identification: A retentive and splinting pin is a device made of a material, such as titanium, that is placed permanently in a tooth to provide retention and stabilization for a restoration, such as a crown, or to join two or more teeth together.

2. Recommended classification: Class I (general controls). The Panel recommends that retentive and splinting pins be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel recommends that retentive and splinting pins be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when

used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, retentive and splinting pins in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that retentive and splinting pins be classified into class II (performance standards). The properties of the materials used to form retentive and splinting pins depend upon the correct composition of these materials. Moreover, retentive and splinting pins directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that retentive and splinting pins should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513,

701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3740, to read as follows:

**§ 872.3740 Retentive and splinting pin.**

(a) *Identification.* A retentive and splinting pin is a device made of a material, such as titanium, that is placed permanently in a tooth to provide retention and stabilization for a restoration, such as a crown, or to join two of more teeth together.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2899]

**Medical Devices; Classification of Bracket Adhesive Resin and Tooth Conditioners**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying bracket adhesive resin and tooth conditioners into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of bracket adhesive resin and tooth conditioners:

1. *Identification:* A bracket adhesive resin and tooth conditioner is a device composed of an adhesive compound of polymethyl methacrylate that is used to cement an orthodontic bracket to a tooth surface.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that bracket adhesive resin and tooth conditioners be classified into class II because the device contains an acid that may cause decalcification of the tooth and the development of dental caries if it contacts tooth enamel. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on the Guide to Dental Materials (Ref. 1), which states that little or no tissue reaction has been reported with the use of this device.

5. *Risks to health:* Decalcification: The conditioner in the resin may cause

decalcification of a tooth and the development of dental caries.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that bracket adhesive resin and tooth conditioners be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Guide to Dental Materials and Devices," *American Dental Association*, pp. 143-144, Chicago, Illinois, 1976.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3750, to read as follows:

**§ 872.3750 Bracket adhesive resin and tooth conditioner.**

(a) *Identification.* A bracket adhesive resin and tooth conditioner is a device composed of an adhesive compound of polymethyl methacrylate that is used to cement an orthodontic bracket to a tooth surface.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug

Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2900]

### Medical Devices; Classification of Denture Relining, Repairing, or Rebasement Resin

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying denture relining, repairing, or rebasing resin bases into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATE:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides

background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of denture relining, repairing, or rebasing resin bases:

1. Identification: A denture relining, repairing, or rebasing resin is a device composed of materials, such as methyl methacrylate, that is used to reline a denture surface that contacts tissue, to repair a fractured denture, or to form a new denture base. This device is not available for over-the-counter (OTC) use.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that denture relining, repairing, or rebasing resin be classified into class II because the chemical properties of this device may cause oral tissue irritation. Materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard will provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. Summary of data on which the recommendation is based: The panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Tissue irritation: The materials used in the device may cause oral tissue irritation.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that denture relining, repairing, or rebasing resins be classified into class II (performance standards). FDA believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished

them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3760, to read as follows:

#### § 872.3760 Denture relining, repairing, or rebasing resin.

(a) *Identification.* A denture relining, repairing, or rebasing resin is a device composed of materials, such as methyl methacrylate, that is used to reline a denture surface that contacts tissue, to repair a fractured denture, or to form a new denture base. This device is not available for over-the-counter (OTC) use.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2901]

### Medical Devices; Classification of Pit and Fissure Sealants and Conditioners

AGENCY: Food and Drug Administration.  
ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying pit and fissure sealants and conditioners into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATE:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of pit and fissure sealants and conditioners:

1. Identification: A pit and fissure sealant and conditioner is a device composed of resin, such as polymethyl methacrylate, that is used primarily in young children to seal pit and fissure depressions (faults in tooth enamel) in the biting surfaces of teeth in order to prevent cavities.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that pit and fissure sealants and conditioners be classified into class II because tooth decay may result if the sealant fails to remain in the tooth. Materials used in the device should also meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls

alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on review of the literature (Refs. 1, 2, and 3). The literature review reveals that pit and fissure sealants and conditioners, if applied to areas without caries, are safe and effective.

5. Risks to health: (a) Tooth decay: Acid etchant (removal of tooth enamel coating to enhance resin bonding) may cause decalcification of tooth enamel and lead to tooth decay.

(b) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that pit and fissure sealants and conditioners be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**References**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. "Pit and Fissure Sealants," Council on Dental Materials and Devices, *Journal of the American Dental Association*, 88:390, 1974.

2. Rock, W. P., A. R. Bailey, and R. M.

Brown, "Tissue Reaction to Two Fissure Sealant Reactants," *Journal of Oral Pathology*, 3:224-231, 1974.

3. Handelman, S. L., M. G. Buonocore, P. C. Schoute, "Progress Report on the Effect of a Fissure Sealant on Bacteria in Dental Caries," *Journal of the American Dental Association*, 87:1189-1191, 1973.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA

published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 28, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3765, to read as follows:

**§ 872.3765 Pit and fissure sealant and conditioner.**

(a) *Identification.* A base pit and fissure sealant and conditioner is a device composed of resin, such as polymethylmethacrylate, that is used primarily in young children to seal pit and fissure depressions (faults in tooth enamel) in the biting surfaces of teeth in order to prevent cavities.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for Regulatory Affairs.*

[FR Doc. 80-59883 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2902]

**Medical Devices; Classification of Temporary Crown and Bridge Resins**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation

classifying temporary crown and bridge resins into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Devices Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fisher Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of temporary crown and bridge resins:

1. Identification: A temporary and bridge resin is a device composed of a material, such as polymethylmethacrylate, that is used to make a temporary prosthesis, such as a crown or bridge. The temporary prosthesis is used until a permanent restoration is fabricated.

2. Recommended classification: Class I (general controls). The Panel recommends that temporary crown and bridge resins be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j (f)).

3. Summary of reasons for recommendation: The Panel recommends that temporary crown and bridge resins be classified into class I

because the Panel believes general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, temporary crown and bridge resins in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that temporary crown and bridge resins be classified into class II (performance standards). The properties of the materials used to form temporary crown and bridge resins depend upon the proper composition of these materials. Moreover, temporary crown and bridge resins directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that temporary crown and bridge resins should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in

the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3770, to read as follows:

**§ 872.3770 Temporary crown and bridge resin.**

(a) *Identification.* A temporary crown and bridge resin is a device composed of a material, such as polymethylmethacrylate, that is used to make a temporary prosthesis, such as a crown or bridge. The temporary prosthesis is used until a permanent restoration is fabricated.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39884 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2904]

**Medical Devices; Classification of Root Canal Posts**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying root canal posts into class II

(performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of root canal posts:

1. Identification: A root canal post is a metal device that is cemented into the root canal of a tooth to stabilize and support a restoration.

2. Recommended classification: Class I (general controls). The Panel recommends that root canal posts be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that root canal posts be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device

has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, root canal posts in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that root canal posts be classified into class II (performance standards). The properties of the materials used to form root canal posts depend upon the correct composition of these materials. Moreover, root canal posts directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that root canal posts should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation

identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3810, to read as follows:

**§ 872.3810 Root canal post.**

(a) *Identification.* A root canal post is a metal device that is cemented into the root canal of a tooth to stabilize and support a restoration.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2905]

**Medical Devices; Classification of Root Canal Filling Resins**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying root canal filling resins into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of

the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of root canal filling resins:

1. Identification: A root canal filling resin is a device composed of a material, such as methyl methacrylate, that is used during endodontic therapy to fill the root canal of a tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that root canal filling resins be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that root canal filling resins be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and

the good manufacturing practice regulation because this is a simple device that presents to undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, root canal filling resins in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that root canal filling resins be classified into class II (performance standards). The properties of the materials used to form root canal filling resins depend upon the correct composition of these materials. Moreover, root canal filling resins directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that root canal filling resins should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3820, to read as follows:

**§ 872.3820 Root canal filling resin.**

(a) *Identification.* A root canal filling resin is a device composed of material, such as methylmethacrylate, that is used during endodontic therapy to fill the root canal of a tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39886 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2906]

**Medical Devices; Classification of Endodontic Paper Points**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endodontic paper points into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the

device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendations regarding the classification of endodontic paper points:

1. Identification: A endodontic paper point is a device made of paper that is used during endodontic therapy to dry, or apply medication to, the root canal of a tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the Act (21 U.S.C. 360j), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that endodontic paper points be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, endodontic paper points in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel's recommendation and is proposing that endodontic paper points be classified into class II (performance standards). The properties of the materials used to form endodontic paper points depend upon the proper composition of these materials. Moreover, endodontic paper points directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that endodontic paper points should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3830, to read as follows:

**§ 872.3830 Endodontic paper point.**

(a) *Identification.* An endodontic paper point is a device made of paper that is used during endodontic therapy to dry, or apply medication to, the root canal of a tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2907]

**Medical Devices; Classification of  
Endodontic Silver Points**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endodontic silver points into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device to be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation

based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of endodontic silver points:

1. Identification: An endodontic silver point is a device made of silver that is used during endodontic therapy to fill permanently the root canal of a tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360j), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that endodontic silver points be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, endodontic silver points in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel's recommendation and is proposing that endodontic silver points be classified into class II (performance standards). The properties of the materials used to form endodontic silver points depend upon the proper composition of these materials. Moreover, endodontic silver points directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that endodontic silver points should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3840, to read as follows:

**§ 872.3840 Endodontic silver point.**

(a) *Identification.* An endodontic silver point is a device made of silver that is used during endodontic therapy to fill permanently the root canal of a tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2908]

**Medical Devices; Classification of  
Gutta Percha**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying gutta percha into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of gutta percha:

1. Identification: Gutta percha is a device made from coagulated sap of certain tropical trees that is used during endodontic therapy to fill the root canal of a tooth. The gutta percha is softened by heat and inserted into the root canal, where it hardens as it cools.

2. Recommended classification: Class I (general controls). The Panel recommends that gutta percha be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that gutta percha be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, gutta percha in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that gutta percha be classified into class II (performance standards). The properties of the materials used to form gutta percha depend upon the correct composition of these materials. Moreover, gutta percha directly contacts oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that gutta percha should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3850, to read as follows:

**§ 872.3850 Gutta percha.**

(a) *Identification.* Gutta percha is a device made from coagulated sap of

certain tropical trees that is used to fill the root canal of a tooth. The gutta percha is softened by heat and inserted into the root canal, where it hardens as it cools.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2909]

**Medical Devices; Classification of Endodontic Stabilizing Splints**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endodontic stabilizing splints into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of the classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of endodontic stabilizing splints.

1. Identification: An endodontic stabilizing splint is a device made of a material such as titanium that is used to stabilize a tooth by inserting the device through the root canal and into the upper or lower jaw bone.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that endodontic stabilizing splints be classified into class II because improperly constructed devices may cause infection or adverse tissue reactions. Materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be properly sterilized, postsurgical infection may occur. (b) Fracture of the root: If faulty materials are used to construct the device, the stabilizing splint could break within the root canal, causing fracture of the tooth's root and possible infection. (c) Adverse tissue reaction: If the materials used in construction of the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that endodontic stabilizing splints be classified into class II (performance

standards). The agency believes that endodontic stabilizing splints should be considered implants, because they are designed to be placed within the tissues of the human body and remain for an indefinite period of time. The agency believes that, although the device is an implant, premarket approval is not necessary to assure the safety and effectiveness of the device. Strock and Strock (Ref. 1) report a method for increasing the stability of anterior teeth, the roots of which were shortened or amputated by disease. After the pulp and granulation tissue have been removed from a tooth, a vitallium or tantalum rod is inserted through the crown and into the root. Regeneration of bone occurs around the end of the rod, increasing the stability of the tooth. Linkow, et al. (Ref. 2) state that there is substantial radiographic evidence that endodontic implants are well tolerated by tissue and that bone regeneration occurs around the implant. According to Linkow, because endodontic implants are completely imbedded in tissue and do not protrude into the oral cavity, there is no danger of infection or irritation from chemical reactions caused by substances in the mouth. FDA believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**References**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

**Medical Devices; Classification of Posterior Artificial Teeth With Metal Inserts**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying posterior artificial teeth with metal inserts into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the

safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA Proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of posterior artificial teeth with metal inserts:

1. Identification: A posterior artificial tooth with metal insert is a porcelain device with a metal insert that is used to replace a natural tooth. The device is attached to surrounding teeth by a bridge and provides both an improvement in appearance and a functional occlusion (bite) which improves chewing ability.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that posterior artificial teeth with metal inserts be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The

Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, posterior artificial teeth with metal inserts in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that posterior artificial teeth with metal inserts be classified into class II (performance standards). The properties of the materials used to form posterior artificial teeth with metal inserts depend upon the correct composition of these materials. Moreover, posterior artificial teeth with metal inserts directly contact oral tissues. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that posterior artificial teeth with metal inserts should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation

identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3900, to read as follows:

**§ 872.3900 Posterior artificial tooth with metal insert.**

(a) *Identification.* A posterior artificial tooth with a metal insert is a porcelain device with metal insert that is used to replace a natural tooth. The device is attached to surrounding teeth by a bridge and provides both an improvement in appearance and a functional occlusion (bite) which improves chewing ability.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2911]

**Medical Devices; Classification of Backing and Facing for Artificial Teeth**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying backing and facing for artificial teeth into class II (performance standards). FDA is also publishing the recommendation of the Dental Device

Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA Proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HF-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of backing and facing for artificial teeth:

1. Identification: A backing and facing for an artificial tooth is a device used in the fabrication of a fixed or removable dental appliance, such as a crown or bridge. The backing, which is made of gold, is attached to the dental appliance and supports the tooth-colored facing, which is made of porcelain or plastic.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel recommends that backing and facing for artificial teeth be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and

effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, backing and facing for artificial teeth in the practice of dentistry.

5. Risk to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that backing and facing for artificial teeth be classified into class II (performance standards). The properties of the materials used to form backing and facing for artificial teeth depend upon the proper composition of these materials. Moreover, backing and facing for artificial teeth directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that backing and facing for artificial teeth should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in

the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.3910, to read as follows:

**§ 872.3910 Backing and facing for artificial teeth.**

(a) *Identification.* A backing and facing for an artificial tooth is a device used in the fabrication of a fixed or removable dental appliance, such as a crown or bridge. The backing, which is made of gold, is attached to the dental appliance and supports the tooth-colored facing, which is made of porcelain or plastic.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for Regulatory Affairs.*

[Docket No. 78N-2912]

**Medical Devices; Classification of Porcelain Teeth**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation

classifying porcelain teeth into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of porcelain teeth:

1. Identification: A porcelain tooth is a device made of porcelain powder for clinical use that is used in the construction of both fixed and removable prostheses, such as crowns and partial dentures.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that porcelain teeth be classified into class II because the materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. In addition, the fluorescing agents in the porcelain powder for clinical use that is used to make the porcelain teeth may contain radioactive components which decay, resulting in the production of prosthetic devices that emit radiation. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of

the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Exposure to radiation: The patient may be exposed to radiation emitted by fluorescent agents in the porcelain by prostheses made from porcelain powder for clinical use that contains radioactive ingredients. (b) Adverse tissue reaction: If the materials used in the construction of the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that porcelain teeth be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. Exposure of surrounding tissue to the ionizing radiation emitted by radioactive material that may be present in dental products fabricated from porcelain powder for clinical use may result in acute tissue damage, if the radiation is sufficiently intense, or in neoplastic (abnormal) changes, if radiation is chronically received at lower levels. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3920, to read as follows:

**§ 872.3920 Porcelain teeth.**

(a) *Identification.* A porcelain tooth is a prefabricated device made of porcelain powder for clinical use that is used in the construction of both fixed and removable prostheses, such as crowns and partial dentures.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[FR Doc. 80-39893 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2913]

**Medical Devices; Classification of Zinc Oxide Eugenol**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying zinc oxide eugenol into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of the classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of zinc oxide eugenol:

1. Identification: Zinc oxide eugenol is a device material that is used as a base cement for temporary fillings and as a cementing agent.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that zinc oxide eugenol be classified into class II because the device may cause irritation to tooth pulp. Materials used in the device should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Adverse tissue reaction: If the materials used in the device are biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that zinc oxide eugenol be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are

insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.3980, to read as follows:

**§ 872.3980 Zinc oxide eugenol.**

(a) *Identification.* Zinc oxide eugenol is a device material that is used as a base cement for temporary fillings and as a cementing agent.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980

BILLING CODE 4110-03-M §

**21 CFR Part 872**

[Docket No. 78N-3027]

**Medical Devices; Classification of Endodontic Broaches**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endodontic broaches into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA Proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of endodontic broaches:

1. Identification: An endodontic broach is a hand-held device used to remove the pulp from a tooth during endodontic (root canal) procedures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and the good manufacturing

practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that endodontic broaches be classified into class I because the Panel believes that general controls are sufficient to ensure the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purposes recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, endodontic broaches in the practice of dentistry.

5. Risk to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that endodontic broaches be classified into class II (performance standards). The properties of the materials used to form endodontic broaches depend upon the proper composition of these materials. Moreover, endodontic broaches directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that endodontic broaches should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.4040, to read as follows:

#### § 872.4040 Endodontic broach.

(a) *Identification.* An endodontic broach is a hand-held device used to remove the pulp from a tooth during endodontic (root canal) procedures.

(b) *Classification.* Class II (Performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2914]

#### Medical Devices; Classification of Dental Wax Carvers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation

classifying dental wax carvers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA Proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental wax carvers:

1. *Identification:* A dental wax carver is a device used to shape wax into a mold cavity for casting removable and fixed restorative dental appliances. The device is a hand instrument with a smoothing tip at one end and a carving tip at the opposite end.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that dental wax carvers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The Panel believes that

manufacturers of this device not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because a dental wax carver is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental wax carvers in the practice of dentistry.

5. Risk to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that dental wax carvers be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendations that manufacturers of dental wax carvers be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of dental wax carvers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning dental wax carvers. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of dental wax carvers be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in

part, by section 519. The most extensive of these requirements is found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of dental wax carvers be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of dental wax carvers must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of dental wax carvers must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and

complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4075, to read as follows:

#### § 872.4075 Dental wax carver.

(a) *Identification.* A dental wax carver is a device used to shape wax into a mold cavity for casting removable and fixed restorative dental appliances. The device is a hand instrument with a smoothing tip at one end and a carving tip at the opposite end.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2915

### Medical Devices; Classification of Manual Bone Drill and Wire Drivers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying manual bone drill and wire drivers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of manual bone drill and wire drivers:

1. Identification: A manual bone drill and wire driver is a metal rotary device that is used in reconstructive oral surgery to drill a hole into the upper or lower jaw in preparation for insertion of a wire, pin, or screw.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for manual bone drill and wire drivers be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that manual bone drill and wire drivers be classified into class II because improper design of the device may cause bone damage from unnecessary heat buildup. In addition, the materials used in the device that contact the body should meet a generally accepted satisfactory level of tissue compatibility. The panel believes that general controls alone would not provide sufficient control over these characteristics. The panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be cleaned properly, use of the device could cause an infection. (b) Bone damage: Improper design of the device may cause bone damage from unnecessary heat buildup. (c) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that manual bone drill and wire drivers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information

regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4120, to read as follows:

#### § 872.4120 Manual bone drill and wire driver.

(a) *Identification.* A manual bone drill and wire driver is a metal rotary device that is used in reconstructive oral surgery to drill a hole into the upper or lower jaw in preparation for insertion of a wire, pin, or screw.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2916]

### Medical Devices; Classification of Intraoral Dental Drills

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intraoral dental drills into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to

assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intraoral dental drills:

1. Identification: An intraoral dental drill is a rotary device that is attached to a dental handpiece and is used to drill holes in teeth in order to secure cast or preformed pins used to retain operative dental appliances.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21, U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that intraoral dental drills be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket

notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, intraoral dental drills in the practice of dentistry.

5. Risks to health: Tissue damage: If the device does not have adequate strength and hardness, teeth and underlying tissue may be damaged.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that intraoral dental drills be classified into class II (performance standards). Dental drills are used to cut human tooth structure, and must meet standards of minimum hardness and strength to be able to accomplish this cutting function. The agency also believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency believes that there is sufficient information to establish a standard for this device.

Because the agency has determined that intraoral dental drills should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513,

701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4130, to read as follows:

**§ 872.4130 Intraoral dental drill.**

(a) *Identification.* An intraoral dental drill is a rotary device that is attached to a dental handpiece and is used to drill holes in teeth in order to secure cast or preformed pins used to retain operative dental appliances.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[Docket No. 78N-2917]

**Medical Devices; Classification of  
Powered Bone Drills**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered bone drills into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation

based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered bone drills:

1. Identification: A powered bone drill is an AC-powered rotary device that is used in reconstructive oral surgery to drill a hole into the upper or lower jaw in preparation for insertion of a wire, pin, or screw.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that powered bone drills be classified into class II because improper design of the device may cause bone degeneration from unnecessary heat buildup. The electrical design of the device also must be controlled to ensure electrical safety. Moreover, the materials used in the device that contact the body should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be cleaned properly, use of the device could cause an infection. (b) Bone damage: Improper design of the device may cause bone damage from unnecessary heat buildup. (c) Adverse

tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction. (d) Electrical shock: Faulty electrical design or malfunction of the device may cause an electrical shock to the patient or the user.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that powered bone drills be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4140, to read as follows:

**§ 872.4140 Powered bone drill.**

(a) *Identification.* A powered bone drill is an AC-powered rotary device that is used in reconstructive oral surgery to drill a hole into the upper or lower jaw in preparation for insertion of a wire, pin, or screw.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be

identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3026]

**Medical Devices; Classification of Endodontic Pulp Canal Files**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endodontic pulp canal files into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel,

an FDA advisory committee, made the following recommendation regarding the classification of endodontic pulp canal files:

1. Identification: An endodontic pulp canal file is a hand-held device with a finely serrated surface that is used to smooth, enlarge, and clean the pulp canal during endodontic (root canal) procedures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that this device be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because it is a simple device that presents no undue risks to health when used in a normal manner and for the purposes recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that endodontic pulp canal files be classified into class II (performance standards). The properties of the materials used to form endodontic pulp canal files depend upon the correct composition of these materials. Moreover, endodontic pulp canal files directly contact oral tissue. Alteration of the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. FDA believes that a performance standard is necessary for this device because general controls

alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that endodontic pulp canal files should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 701(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4150, to read as follows:

#### § 872.4150 Endodontic pulp canal file.

(a) *Identification.* An endodontic pulp canal file is a hand-held device with a finely serrated surface that is used to smooth, enlarge and clean the pulp canal during endodontic (root canal) procedures.

(b) *Classification.* Class I (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between

9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-2918]

#### Medical Devices; Classification of Air-Powered Dental Handpieces

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying air-powered dental handpieces into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of air-powered dental handpieces:

1. Identification: An air-powered dental handpiece is a device powered by compressed air that is used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth. A burr or cleaning tip is inserted into the handpiece, which is rotated by the pressure of the compressed air.

2. Recommended classification: Class I (general controls). The Panel recommends that air-powered dental handpieces be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that air-powered dental handpieces be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practices regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members; personal knowledge of, and clinical experience with, air-powered dental handpieces in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that air-powered dental handpieces be classified into class II (performance standards). The device must be capable of sterilization to avoid contamination and transmission of infection between patients. A performance standard also is needed to assure that the device stops immediately upon release of the foot control in order to prevent injury to the patient. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and

effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that air-powered dental handpieces should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4200, to read as follows:

#### § 872.4200 Air-powered dental handpiece.

(a) *Identification.* An air-powered dental handpiece is a device powered by compressed air that is used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth. A burr or cleaning tip is inserted into the handpiece, which is rotated by the pressure of the compressed air.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2919]

#### Medical Devices; Classification of Belt-Driven Dental Handpieces

AGENCY: Food and Drug Administration.  
ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying belt-driven dental handpieces into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of belt-driven dental handpieces:

1. Identification: A belt-driven dental handpiece is a device that is used to prepare dental cavities for restorations,

such as fillings, and for cleaning teeth. A bur or cleaning tip is inserted into the handpiece, which is rotated by a belt running over a series of pulleys.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that belt-driven dental handpieces be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, belt-driven dental handpieces in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that belt-driven dental handpieces be classified into class II (performance standards). The device must be capable of sterilization to avoid contamination and transmission of infection between patients. A performance standard is also needed to control the electrical design of the device in order to prevent electrical shock to the patient or user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that belt-driven dental handpieces should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4220, to read as follows:

#### § 872.4220 Belt-driven dental handpiece.

(a) *Identification.* A belt-driven dental handpiece is a device that is used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth. A bur or cleaning tip is inserted into the handpiece, which is rotated by a belt running over a series of pulleys.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39902 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2920]

#### Medical Devices; Classification Of Rotary Bone-Cutting Handpieces

AGENCY: Food and Drug Administration.  
ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rotary bone-cutting handpieces into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of rotary bone-cutting handpieces:

1. *Identification:* A rotary bone-cutting handpiece is an AC-powered dental device used to cut and shape bone in the oral cavity.

2. *Recommended classification:* Class II (performance standards). The Panel

recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that rotary bone-cutting handpieces be classified into class II because the electrical properties of the device need to be controlled in order to prevent electrical shock to the patient or user. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Bone damage; Improper design of the blade could cause bone damage.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that rotary bone-cutting handpieces be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E

by adding new § 872.4240, to read as follows:

#### § 872.4240 Rotary bone-cutting handpiece.

(a) *Identification.* A rotary bone-cutting handpiece is an AC-powered dental device used to cut and shape bone in the oral cavity.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2921]

#### Medical Devices; Classification of Contra Angle Handpiece Attachments

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying contra angle handpiece attachments into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective

30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of contra angle handpiece attachments:

1. Identification: A contra angle handpiece attachment is an accessory device that is attached to the end of a dental handpiece. The device is bent at an angle to allow easy access to, and movement within, the mouth. It is used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360j), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that contra angle handpiece attachments be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel

members' personal knowledge of, and clinical experience with, contra angle handpiece attachments in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that contra angle handpiece attachments be classified into class II (performance standards). The device must be capable of sterilization to avoid contamination and transmission of infection between patients. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that contra angle handpiece attachments should be classified into class II rather than Class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4260, to read as follows:

#### § 872.4260 Contra angle handpiece attachment.

(a) *Identification.* A contra angle handpiece attachment is an accessory device that is attached to the end of a

dental handpiece. The device is bent at an angle to allow easy access to, and movement within, the mouth. It is used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

#### Medical Devices; Classification of Direct Drive Handpieces

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying direct drive handpieces into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of direct drive handpieces:

1. *Identification:* A direct-drive handpiece is an AC-powered rotary device used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth. The handpiece is powered by a motor without a pulley.

2. *Recommended classification:* Class I (general controls). The Panel recommends that direct drive handpieces be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that direct drive handpieces be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, direct drive handpieces in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that direct drive handpieces be classified into class II (performance standards). The device must be capable of sterilization to avoid contamination and transmission of infection between patients. A performance standard is also needed to control the electrical properties of the device in order to prevent electrical shock to the patient or user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that direct drive handpieces should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4280, to read as follows:

**§ 872.4280 Direct drive handpiece.**

(a) *Identification.* A direct-drive handpiece is an AC-powered rotary device used to prepare dental cavities for restorations, such as fillings, and for

cleaning teeth. The handpiece is powered by a motor without a pulley.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[Docket No. 78N-2923]

**Medical Devices; Classification of Foot Controllers for Handpieces**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying foot controllers for handpieces into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of foot controllers for handpieces:

1. *Identification:* A foot controller for handpieces is a device operated by the user's foot that is used to control the speed and direction of rotation of dental handpieces, such as a dental drill.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that foot controllers for handpieces be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because the Panel believes that the quality of the device is easily discernible and defects are readily apparent to the user.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, foot controllers for handpieces in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA agrees with the Panel's recommendation and is proposing that foot controllers for handpieces be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of foot controllers for handpieces be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that

these manufacturers be subject to registration, device listing and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of foot controllers for handpieces, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections, and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of foot controllers for handpieces be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of foot controllers for handpieces be exempt from the device good

manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of foot controllers for handpieces must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of foot controllers for handpieces must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.4300, to read as follows:

**§ 872.4300 Foot controller for handpieces.**

(a) *Identification.* A foot controller for handpieces is a device operated by the

user's foot that is used to control the speed and direction of rotation of dental handpieces, such as a dental drill.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180 regarding general requirements concerning records, and § 820.198 regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2924]

**Medical Devices; Classification of Water-Powered Handpieces**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying water-powered handpieces into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by (March 2, 1981). FDA proposes that the final regulation based on this proposal become effective

30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HF-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of water-powered handpieces:

1. Identification: A water-powered handpiece is a rotary device used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth. An AC-powered water pump provides water under pressure to the device hand-piece through coaxial (a tube inside a tube) plastic tubing; the pressurized water powers the device.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that water-powered handpieces be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel

based its recommendation on the Panel members' personal knowledge of, and clinical experience with, water-powered handpieces in the practice of dentistry.

5. Risks to health: None identified.

FDA disagrees with the Panel's recommendation and is proposing that water-powered handpieces be classified into class II (performance standards). The device must be capable of sterilization to avoid contamination and transmission of infection between patients. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that water-powered handpieces should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4320, to read as follows:

**§ 872.4320 Water-powered handpiece.**

(a) *Identification.* A water-powered handpiece is a rotary device used to prepare dental cavities for restorations, such as fillings, and for cleaning teeth. An AC-powered water pump provides water under pressure to the device

handpiece through coaxial (a tube inside a tube) plastic tubing; the pressurized water powers the device.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[FR Doc. 80-39907 Filed 12-29-80; 8:45 am]

**BILLING CODE 4110-03-M**

**21 CFR Part 872**

[Docket No. 78N-2925]

**Medical Devices; Classification of Gas-Powered Jet Injectors**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying gas-powered jet injectors into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HF-460), Food and Drug

Administration, 8757 Georgia Ave.,  
Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of gas-powered jet injectors:

1. Identification: A gas-powered jet injector is a syringe device used to administer a local anesthetic. The syringe is powered by a cartridge containing pressurized carbon dioxide which provides the pressure to force the anesthetic out of the syringe.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that gas-powered jet injectors be classified into class II because the Panel believes that a performance standard is necessary to assure that the device is properly designed so as to allow aspiration. By syringe aspiration, the user determines whether a blood vessel has been penetrated during the injection procedure. Penetration of a blood vessel during an injection may cause an adverse reaction in the patient. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Adverse reaction: If the aspiration mechanism of the device is not adequate, the user may not be able to determine whether the anesthetic has been injected directly into a blood vessel; injection into a blood vessel may cause the patient to have an adverse reaction.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that gas-powered jet injectors be classified

into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4465, to read as follows:

##### § 872.4465 Gas-powered jet injector.

(a) *Identification.* A gas-powered jet injector is a syringe device used to administer a local anesthetic. The syringe is powered by a cartridge containing pressurized carbon dioxide which provides the pressure to force the anesthetic out of the syringe.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of spring-powered jet injectors:

1. Identification: A spring-powered jet injector is a syringe device used to administer a local anesthetic. The syringe is powered by a spring mechanism which provides the pressure to force the anesthetic out of the syringe.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that spring-powered jet injectors be classified into class II because the Panel believes that a performance standard is necessary to assure that the device is properly designed as to follow aspiration. By syringe aspiration, the user determines whether a blood vessel has been penetrated during the injection procedure. Penetration of a blood vessel during an injection may cause an adverse reaction in the patient. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Adverse reaction: If the aspiration mechanism of the device is not adequate, the user may not be able to determine whether the anesthetic has been injected directly into a blood vessel; injection into a blood vessel may cause the patient to have an adverse reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that spring-powered jet injectors be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation

identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4475, to read as follows:

#### § 872.4475 Spring-powered jet injector.

(a) *Identification.* A spring-powered jet injector is a syringe device used to administer a local anesthetic. The syringe is powered by a spring mechanism which provides the pressure to force the anesthetic out of the syringe.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2927]

#### Medical Devices; Classification of Hand Instruments for Calculus Removal

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying hand instruments for calculus removal into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II

is to provide for the future development into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of hand instruments for calculus removal:

1. Identification: A hand instrument for calculus removal is a hand-held, metal scraper device used to remove calculus deposits from tooth surfaces.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low a priority.

3. Summary of reasons for recommendation: The Panel recommends that hand instruments for calculus removal be classified into class II because the materials used in the device that contact the body should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Tissue trauma: Improper design of the device may cause unnecessary trauma to gum tissue. (b) Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that hand instruments for calculus removal be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4500, to read as follows:

#### § 872.4500 Hand instrument for calculus removal.

(a) *Identification.* A hand instrument for calculus removal is a hand-held metal scraper device used to remove calculus deposits from tooth surfaces.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be

identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2928]

#### Medical Devices; Classification of Dental Depth Gauge Instruments

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental depth gauge instruments into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

#### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental depth gauge instruments:

1. Identification: A dental depth gauge instrument is a slender metal device that is used in endodontic (root canal) treatment to prepare for placement of a retentive or splinting pin. The device is used to measure the depth of a small hole in a tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental depth gauge instruments be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental depth gauge instruments in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that dental depth gauge instruments be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of dental depth gauge instruments be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510

only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of dental depth gauge instruments, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notifications from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of dental depth gauge instruments be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360j). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of dental depth gauge instruments be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the

adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of dental depth gauge instruments having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4520, to read as follows:

**§ 872.4520 Dental depth gauge instruments.**

(a) *Identification.* A dental depth gauge instrument is a slender metal device that is used in endodontic (root canal) treatment to prepare for placement of a retentive or splinting pin. The device is used to measure the depth of a small hole in a tooth.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**[21 CFR Part 872]**

[Docket No. 78N-2929]

**Medical Devices; Classification of Dental Diamond Instruments**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental diamond instruments into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of dental diamond instruments:

1. *Identification:* A dental diamond instrument is an abrasive device used to smooth tooth surfaces during the fitting of crowns or bridges. The device consists of a shaft which is inserted into a handpiece and a head which has diamond chips imbedded into it. Rotation of the diamond instrument provides an abrasive action when it contacts the tooth.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a

performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that dental diamond instruments be classified into class II because if the abrasive properties of the device are inadequate the device may cause damage to the dental pulp. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: Tissue damage: Inadequate abrasive properties of the device may cause damage to the dental pulp.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that dental diamond instruments be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E

by adding new § 872.4535, to read as follows:

#### § 872.4535 Dental diamond instrument.

(a) *Identification.* A dental diamond instrument is an abrasive device used to smooth tooth surfaces during the fitting of crowns or bridges. The device consists of a shaft which is inserted into a handpiece and a head which has diamond chips imbedded into it. Rotation of the diamond instrument provides an abrasive action when it contacts the tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2930]

#### Medical Devices; Classification of Plastic Dental Filling Instruments

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying plastic dental filling instruments into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective

30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of plastic dental filling instruments:

1. *Identification:* A plastic dental filling instrument is a device made of plastic that is used to carry filling material to the site of a restoration in the oral cavity.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under 520(f) of the act (21 U.S.C. 360(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that plastic dental filling instruments be classified into class I (general controls) because general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The device materials that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, plastic dental filling instruments in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that plastic dental filling instruments be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of plastic dental filling instruments be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of plastic dental filling instruments, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning plastic dental filling instruments. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of plastic dental filling instruments be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive use of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experiences with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device

regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP requirements. The exemption will not extend to two device GMP requirement, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of plastic dental filling instruments be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of plastic dental filling instruments must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of plastic dental filling instruments must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in

the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 361c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4555, to read as follows:

#### § 872.4555 Plastic dental filling instrument.

(a) *Identification.* A plastic dental filling instrument is a device made of plastic that is used to carry filling material to the site of a restoration in the oral cavity.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device is also exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39913 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2931]

#### Medical Devices; Classification of Dental Hand Instruments

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental hand instruments into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the devices be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the devices. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-02, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental hand instruments:

1. Identification: A dental hand instrument is a hand-held device used to perform various tasks in general dentistry and oral surgery procedures. The following devices are included in this generic type device: operative burnisher, operative amalgam carrier, operative dental amalgam carver, surgical bone chisel, operative amalgam and foil condenser, endodontic curette, operative curette, periodontic curette, surgical curette, dental surgical elevator, operative dental excavator, operative explorer, surgical bone file, operative margin finishing file, periodontic file, periodontic probe, surgical rongeur forceps, surgical tooth extractor forceps, surgical hemostat, periodontic hoe, operative matrix contouring instrument, operative cutting instrument, operative margin-finishing knife, periodontic knife, periodontic marker, operative pliers, endodontic root canal plugger, endodontic root canal preparer, surgical biopsy punch, endodontic pulp canal

reamer, crown remover, periodontic scaler, collar and crown scissors, endodontic pulp canal filling material spreader, and surgical osteotome chisel.

2. Recommended classification: Class I (general controls). The Panel recommends that these devices be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental hand instruments be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the devices. These devices have been used in dentistry for many years. The materials used in the devices that contact the body have known and acceptable properties. The Panel believes that manufacturers of these devices should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because they are simple devices that present no undue risks to health when used in a normal manner and for the purposes recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental hand instruments in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental hand instruments be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by these devices.

In response to the Panel's recommendation that manufacturers of dental and hand instruments be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and

premarket notification by manufacturers of dental hand instruments, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspection and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of dental hand instruments be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of dental hand instruments be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of dental hand instruments having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart D by adding new § 872.4565, to read as follows:

**§ 872.4565 Dental hand instrument.**

(a) *Identification.* A dental hand instrument is a hand-held device used to perform various tasks in general dentistry and oral surgery procedures. The following devices are included in this generic type device: operative burnisher, operative amalgam carrier, operative dental amalgam carver, surgical bone chisel, operative amalgam and foil condenser, endodontic curette, operative curette, periodontic curette, surgical curette, dental surgical elevator, operative dental excavator, operator explorer surgical bone file, operative margin finishing file, periodontic file, periodontic probe, surgical rongeur forceps, surgical tooth extractor forceps, surgical hemostat, periodontic hoe, operative matrix contouring instrument, operative cutting instrument, operative marginfinishing periodontic knife, periodontic marker, operative pliers, endodontic root canal plugger, endodontic root canal preparer, surgical biopsy punch, endodontic pulp canal reamer, crown remover, periodontic scaler, collar and crown scissors, endodontic pulp canal filling material spreader, and surgical osteotome chisel.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing

Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2932]

**Medical Devices; Classification of  
Dental Instrument Handles**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental instrument handles into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental instrument handles:

1. Identification: A dental instrument handle is a device made of metal or plastic that is used as a grip for working

tips and mirrors used during dental procedures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: Panel recommends that dental instrument handles be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental instrument handles in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental instrument handles be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of dental instrument handles be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by

manufacturers of dental instrument handles, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning dental instrument handles. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of dental instrument handles be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360f). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of dental hand instrument be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this

device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of dental instrument handles must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of dental instrument handles must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act, (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drug proposes to amend Part 872 in Subpart E by adding new § 872.4575, to read as follows:

**§ 872.4575 Dental instrument handle.**

(a) *Identification.* A dental instrument handle is a device made of metal or plastic that is used as a grip for working tips and mirrors used during dental procedures.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2933]

**Medical Devices; Classification of  
Intraoral Ligature and Wire Locks**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intraoral ligature and wire locks into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTAL INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intraoral ligature and wire locks:

1. Identification: An intraoral ligature and wire lock is a metal device used to constrict fractured bone segments in the oral cavity. The bone segments are stabilized by wrapping the ligature (wire) around the fractured bone segments and locking the ends together.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that intraoral ligature and wire locks be classified into class II because if the device is poorly constructed and the lock breaks, the bone fracture may reopen. Also, the materials used in the device that contact the body should meet a generally accepted satisfactory level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be properly sterilized or is contaminated, an infection may result.

(b) Reopening of the fracture: If the ligature or wire lock breaks as a result of poor construction, the bone fracture may reopen which could lead to infection, requiring additional surgical procedures or administration of antibiotics.

(c) Adverse tissue reaction: If the materials used in the device are not

biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that intraoral ligature and wire locks be classified into class II (performance standards). FDA believes that intraoral ligature and wire locks should be considered implants. This device is designed to be placed within the tissues of the human body for an indefinite period of time. However, the agency believes that premarket approval is not necessary to assure the safety and effectiveness of the device. Intraoral ligature and wire locks are completely imbedded in tissues, and there is no possibility that microorganisms will enter and cause an infection. Moreover, because the device does not protrude into the oral cavity, there is no possibility of irritation caused by chemical reactions from substances in the mouth. The materials used in the construction of the device have been used in dentistry for many years and have demonstrated acceptable biocompatibility characteristics. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4600, to read as follows:

**§ 872.4600 Intraoral ligature and wire lock.**

(a) *Identification.* An intraoral ligature and wire lock is a metal device used to constrict fractured bone segments in the oral cavity. The bone segments are stabilized by wrapping the ligature (wire) around the fractured bone segments and locking the ends together.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the hearing of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Date: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 39916 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2934]

**Medical Devices; Classification of Fiber Optic Dental Lights**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying fiber optic dental lights into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Greg Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of fiber optic dental lights:

1. Identification: A fiber optic dental light is an AC-powered device, usually attached to a dental handpiece, that consists of glass or plastic fibers which have special optical properties. The device is used to illuminate oral structures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that fiber optic dental lights be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, fiber optic dental lights in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that fiber optic dental lights be classified into class II (performance standards). The device must be capable of sterilization to avoid contamination and transmission of infection between patients. A performance standard is needed to control the electrical design of the device in order to prevent electrical shock to the patient or user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that fiber optic dental lights should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4620, to read as follows:

**§ 872.4620 Fiber optic dental light.**

(a) Identification. A fiber optic dental light is an AC-powered device, usually attached to a dental handpiece, that consists of glass or plastic fibers which have special optical properties. The

device is used to illuminate oral structures.

(b) Classification. Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39917 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

[Docket No. 78N-2935]

**Medical Devices; Classification of  
Dental Operating Lights**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental operating lights into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposed become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug

Administration, 8757 Georgia Ave.,  
Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental operating lights:

1. Identification: A dental operating light is an AC-powered device used to illuminate oral structures and operating areas.

2. Recommendation classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that dental operating lights be classified into class II because the design and performance of this device must be controlled in order to prevent photosensitization (abnormal reaction of the skin to light) and burns to the facial area of patients and to ensure electrical safety. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry, and on an article by Russell Paravecchio, M.D. (Ref. 1). This article described a patient who developed facial lesions after exposure to light from a dental operating lamp.

5. Risks to health: (a) Photosensitization: If the device is improperly designed, various wavelengths of ultraviolet light may leak, causing photosensitization.

(b) Burns: If the temperature of the light housing exceeds tolerable levels, contact with the light could burn the patient or user.

(c) Electrical shock: If the electrical design of the device is faulty, the user may receive an electrical shock.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that dental operating lights be classified into

class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

##### Reference

The following information has been placed on file in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Paravecchio, R. "Photosensitization of a Patient with Discoid Lupus Erythematosus by a Dental Operating Light, Report of Case," *Journal of the American Dental Association*, 94:907-909, 1977.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4630, to read as follows:

##### § 872.4630 Dental operating light.

(a) *Identification*: A dental operating light is an AC-powered device used to illuminate oral structures and operating areas.

(b) *Classification*. Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that the individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the

heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2936]

### Medical Devices; Classification of Surgical Headlights

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying surgical headlights into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the

following recommendation regarding the classification of surgical headlights:

1. Identification: A surgical headlight is a device which is attached to the user's head that is used as a supplementary or auxiliary light source to illuminate the patient's oral cavity during surgical procedures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that surgical headlights be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The Panel believes that manufacturers of this device should not be required to comply with the premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, surgical headlights in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that surgical headlights be classified into class II (performance standards). The electrical design of this device must be controlled in order to prevent electrical shock to the user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that surgical headlights should be classified into class II rather than class

I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes amend Part 872 in Subpart E by adding new § 872.4640, to read as follows:

#### § 872.4640 Surgical headlight.

(a) *Identification.* A surgical headlight is a device which is attached to the user's head that is used as a supplementary or auxiliary light source to illuminate the patient's oral cavity during surgical procedures.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2937]

#### Medical Devices; Classification of Dental Injecting Needles

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental injecting needles into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HPK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910. 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental injecting needles:

1. Identification: A dental injecting needle is a slender, hollow metal device with a sharp point that is attached to a syringe and is used to inject local anesthetics and other drugs.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that dental injecting needles be classified into class II because tissue damage may result if the

device is not sufficiently sharp or straight. The needle is used in conjunction with a syringe; the entire apparatus may be hazardous if it is not satisfactorily assembled, maintained, or used. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Tissue trauma: Poorly constructed needles with defective points or the use of inferior materials may cause tissue trauma and require an additional injection. (b) Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that dental injecting needles be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs

proposes to amend Part 872 in Subpart E by adding new § 872.4730, to read as follows:

#### § 872.4730 Dental injecting needle.

(a) *Identification.* A dental injecting needle is a slender, hollow metal device with a sharp point that is attached to a syringe and is used to inject local anesthetics and other drugs.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39920 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2938]

#### Medical Devices; Classification of Bone Plates

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying bone plates into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of bone plates:

1. *Identification:* A bone plate is a metal device used to stabilize fractured bone structures in the oral cavity. The bone segments are attached to the plate with screws to prevent movement of the segments.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that bone plates be classified into class II because faulty construction of the device could result in a reopening of the bone fracture. The materials used in the device that contact the body should meet a generally accepted level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be properly sterilized or is contaminated, an infection may result. (b) Bone damage: If the device is improperly constructed, bone damage may occur. (c) Adverse tissue reaction: If the materials in the device are not biocompatible, the patient may have an adverse tissue reaction.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that bone plates be classified into class II

(performance standards). FDA believes that bone plates should be considered implants. This device is designed to be placed within the tissues of the human body for an indefinite period of time. However, the agency also believes that premarket approval is not necessary to assure the safety and effectiveness of the device. Bone plates are completely imbedded in tissues, and there is no possibility of entry of microorganisms causing infection. Moreover, because the device does not protrude into the oral cavity, there is no possibility of irritation for chemical reactions with substances placed in the mouth. The materials used in the construction of bone plates have been used in dentistry for many years and have demonstrated acceptable biocompatibility characteristics. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4760, to read as follows:

**§ 872.4760 Bone plate.**

(a) *Identification.* A bone plate is a metal device used to stabilize fractured bone structures in the oral cavity. The bone segments are attached to the plate with screws to prevent movement of the segments.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[FR Doc. 80-39921 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2941]

**Medical Devices; Classification of AC-Powered Bone Saws**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying AC-powered bone saws into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides

background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of AC-powered bone saws:

1. *Identification:* An AC-powered bone saw is a device with a serrated edge that is used during oral surgery for cutting and contouring bone.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that AC-powered bone saws be classified into class II because the electrical design of the device should be controlled to prevent electrical shock to the patient or user. The general design of the device should be controlled to prevent bone and tissue trauma. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* (a) Bone and adverse tissue trauma: Improper design of the device may cause trauma to bone and underlying tissue. (b) Electrical shock: Improper electrical design of the device may cause electrical shock to the patient or user.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that AC-powered bone saws be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA

published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4820, to read as follows:

**§ 872.4820 AC-powered bone saw.**

(a) *Identification.* An AC-powered bone saw is a device with a serrated edge used during oral surgery for cutting and contouring bone.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 80-39922 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2942]

**Medical Devices; Classification of Rotary Scalers**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rotary scalers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The

effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981.

FDA proposes that the final regulation based on this proposed become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of rotary scalers:

1. *Identification:* A rotary scaler is an abrasive devices that is attached to a powered handpiece and is used to remove calculus deposits from teeth during dental cleaning and periodontal (gum) therapy.

2. *Recommendation classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for rotary scalers to be a high priority.

3. *Summary of reasons for recommendation:* The Panel recommends that rotary scalers be classified into class II because the abrasive qualities of the device must be controlled to reduce the surface damage to tooth enamel and dental pulp which may be caused by the scouring action and heat from the device during calculus removal. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and

clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* Damage to tooth structures; The scouring action of the device may generate heat. Both the abrasive action and heat may damage the teeth and gums.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that rotary scalers be classified into class II (performance standards). FDA believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. FDA also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4840, to read as follows:

**§ 872.4840 Rotary scaler.**

(a) *Identification.* A rotary scaler is an abrasive device that is attached to a powered handpiece and is used to remove calculus deposits from teeth during dental cleaning and periodontal (gum) therapy.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be

identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

## 21 CFR Part 872

[Docket No. 78N-2943]

### Medical Devices; Classification of Ultrasonic Scalers

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultrasonic scalers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultrasonic scalers:

1. Identification: An ultrasonic scaler is a device used during dental cleaning

and periodontal (gum) therapy to remove calculus deposits from teeth by application of an ultrasonically vibrating scaler tip to the teeth.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that ultrasonic scalers be classified into Class II because standards are needed to control the pulsation strength and frequency and to provide proper cooling for the teeth during cleaning to avoid dental pulp damage. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Pulp destruction: Excessive amplitude of vibration or inadequate cooling may cause damage to dental pulp. (b) Pacemaker interference: Electronic interference may have an adverse effect on heart pacemaker function.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultrasonic scalers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 28, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory

committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4850, to read as follows:

#### § 872.4850 Ultrasonic scaler.

(a) *Identification.* An ultrasonic scaler is a device used during dental cleaning and periodontal (gum) therapy to remove calculus deposits from teeth by application of an ultrasonic vibrating scaler tip to the teeth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2945]

### Medical Devices; Classification of Surgical Tissue Scissors

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying surgical tissue scissors into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a

device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HF-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of surgical tissue scissors:

1. Identification: Surgical tissue scissors are a device used to cut soft tissue of the mouth, such as gums, during surgical procedures. The device has short, slightly curved stainless steel blades which allow easy access to the surgical site.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360j), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that surgical tissue scissors be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and

the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, surgical tissue scissors in the practice of dentistry.

5. Risks to health: None identified. FDA disagrees with the Panel's recommendation and is proposing that surgical tissue scissors be classified into class II (performance standards). The properties of the materials used to form surgical tissue scissors depend upon the proper composition of these materials. Moreover, surgical tissue scissors directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that surgical tissue scissors should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat 1055, 90 Stat. 540-546 (21 U.S.C.

360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend part 872 in Subpart E by adding new § 872.4875, to read as follows:

**§ 872.4875 Surgical tissue scissors.**

(a) *Identification.* Surgical tissue scissors are a device used to cut soft tissue of the mouth, such as gums, during surgical procedures. The device has short, slightly curved stainless steel blades which allow early access to the surgical site.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39925 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2946]

**Medical Devices; Classification of Intraosseous Fixation Screws**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intraosseous fixation screws into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.  
**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation

based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intraosseous fixation screws:

1. Identification: An intraosseous fixation screw is a metal device that is used to stabilize fractured jaw bone segments by inserting it into both bone segments, thereby preventing their movement.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that intraosseous fixation screws be classified into class II because improper design or construction of the device may cause bone degeneration and failure of the bone segments to reunite. The materials used in the device that contact the body should meet a generally accepted level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be sterilized or is contaminated, infection may result.

(b) Bone damage: If the device is improperly designed or constructed, bone damage may occur due to

mechanical trauma or failure of the bone segments to unite.

(c) Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that intraosseous fixation screws be classified into class II (performance standards).

FDA believes that intraosseous fixation screws should be considered implants. This device is designed to be placed within the tissues of the human body for an indefinite period of time. However, the agency also believes that premarket approval is not necessary to assure the safety and effectiveness of the device. Intraosseous fixation screws are completely imbedded in tissue, and there is no possibility of entry of microorganisms causing infection. Moreover, because the device does not protrude into the oral cavity, there is no possibility of irritation caused by chemical reactions from substances put into the mouth. The materials used to construct intraosseous fixation screws have been used in dentistry for many years and have demonstrated acceptable biocompatibility characteristics. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E

by adding new § 872.4880, to read as follows:

**§ 872.4880 Intraosseous fixation screw.**

(a) *Identification.* An intraosseous fixation screw is a metal device that is used to stabilize fractured jaw bone segments by inserting it into both bone segments, thereby preventing their movement.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**[21 CFR Part 872]**

**[Docket No. 78N-2947]**

**Medical Devices; Classification of Dental Electrosurgical Units and Accessories**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental electrosurgical units and accessories into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental electrosurgical units and accessories:

1. Identification: A dental electrosurgical unit and accessories is an AC-powered device consisting of a controlled power source and a set of cutting and coagulating electrodes. This device is used to cut or remove soft tissue or to control bleeding during surgical procedures in the oral cavity. An electrical current passes through the tip of the electrode into the tissue and, depending upon the operating mode selected, cuts through soft tissue or coagulates the tissue.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that dental electrosurgical units and accessories be classified into class II because the electrical properties of the device must be controlled to prevent electrical shock and burns to the patient or user. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Tissue damage: If, due to improper or inadequate performance of the device, the cutting process is prolonged, extensive heat-induced damage may occur in the tissue surrounding the surgical site.

(b) Electrical shock: Improper design of the device may cause electrical shock to the patient or user.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental electrosurgical units and accessories be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identified each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4920, to read as follows:

**§ 872.4920 Dental electrosurgical unit and accessories.**

(a) *Identification.* An electrosurgical unit and accessories is an AC-powered device consisting of a controlled power source and a set of cutting and coagulating electrodes. This device is used to cut or remove soft tissue or to control bleeding during surgical procedures in the oral cavity. An electrical current passes through the tip of the electrode into the tissue and, depending upon the operating mode selected, cuts through soft tissue or coagulates the tissue.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for Regulatory Affairs.*

**BILLING CODE 4110-03-M**

**21 CFR Part 872**

[Docket No. 78N-2948]

**Medical Devices; Classification of Intraosseous Fixation Wires**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intraosseous fixation wires into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after of its publication in the *Federal Register*

**ADDRESS:** Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation.

The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intraosseous fixation wires:

1. Identification: An intraosseous fixation wire is a metal device that is used to stabilize and constrict fractured jaw bone segments by wrapping the wire around the ends of the bone segments.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that intraosseous fixation wires be classified into class II because improper design or construction of the device may cause bone degeneration and failure of the bone segments to reunite. The materials used in the device that contact the body should meet a generally accepted level of tissue compatibility. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Infection: If the device cannot be sterilized or is contaminated, infection may result.

(b) Bone damage: If the device is improperly designed, bone damage may occur.

(c) Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that intraosseous fixation wires be classified into class II (performance standards). FDA believes that intraosseous fixation wires should be considered implants. This device is designed to be placed within the tissues of the human body for an indefinite period of time. However, the agency also believes that premarket approval is not necessary to assure the safety and effectiveness of the device. Intraosseous fixation wires are completely imbedded in tissue, and there is no possibility of entry of microorganisms causing infection.

Moreover, because the device does not protrude into the oral cavity, there is no possibility of irritation caused by chemical reactions from substances put in the mouth. The materials used in the construction of intraosseous fixation wires have been used in dentistry for many years and have demonstrated acceptable biocompatibility characteristics. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.4950, to read as follows:

#### § 872.4950 Intraosseous fixation wires.

(a) *Identification.* An intraosseous fixation wire is a metal device that is used to stabilize and constrict fractured jaw bone segments by wrapping the wire around the ends of the bone segments.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that the individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above

office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2950]

#### Medical Devices; Classification of Orthodontic Elastic Bands

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic elastic bands into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic elastic bands:

1. Identification: An orthodontic elastic band is a device made of rubber that is used with orthodontic appliances to alter the position of teeth by applying pressure on them.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic elastic bands be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic elastic bands in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that orthodontic elastic bands be classified into class II (performance standards). The properties of the materials used to form orthodontic elastic bands depend upon the correct composition of these materials. Moreover, orthodontic elastic bands directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the

device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic elastic bands should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5400, to read as follows:

#### § 872.5400 Orthodontic elastic band.

(a) *Identification.* An orthodontic elastic band is a device made of rubber that is used with orthodontic appliances to alter the position of teeth by applying pressure on them.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 80-39929 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2951]

#### Medical Devices; Classification of Preformed Orthodontic Bands

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment and proposed regulation classifying preformed orthodontic bands into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed orthodontic bands:

1. Identification: A preformed orthodontic band is a prefabricated

device made of metal. In orthodontic treatment, the device is affixed to a tooth to provide a foundation for anchoring orthodontic appliances so that pressure can be exerted on the teeth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(fS) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that preformed orthodontic bands be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed orthodontic bands in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that preformed orthodontic bands be classified into class II (performance standards). The properties of the materials used to form preformed orthodontic bands depend upon the proper composition of these materials. Moreover, preformed orthodontic bands directly contact oral tissue. Altering the composition of materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance

standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed orthodontic bands should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5410, to read as follows:

#### § 872.5410 Preformed orthodontic band.

(a) *Identification.* A preformed orthodontic band is a prefabricated device made of metal. In orthodontic treatment, the device is affixed to a tooth to provide a foundation for anchoring orthodontic appliances so that pressure can be exerted on the teeth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between

9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.  
William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39930 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

[Docket No. 78N-2952]

#### Medical Devices; Classification of Orthodontic Band Drivers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic band drivers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic band drivers:

1. Identification: An orthodontic band driver is a spring-activated hand instrument that is used to place orthodontic bands on teeth. The device drives the band onto the tooth when the spring is released.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360 (k)), records and reports requirements under section 519 of the act (21 U.S.C. 360), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic band drivers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic band drivers in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that orthodontic band drivers be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the panel's recommendation that manufacturers of orthodontic band drivers be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of orthodontic band drivers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct

necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic band drivers be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of orthodontic band drivers be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180

and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of orthodontic band drivers, even when the device is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of orthodontic band drivers must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, can determine whether the manufacturer's corrective actions are adequate, and can determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notice of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5420, to read as follows:

#### § 872.5420 Orthodontic band driver

(a) *Identification*: An orthodontic band driver is a spring-activated hand instrument that is used to place orthodontic bands on teeth. The device drives the band onto the tooth when the spring is released.

(b) *Classification*. Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug

Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39931 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2953]

### Medical Devices; Classification of Orthodontic Band Materials

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic band materials into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic band materials:

1. Identification: Orthodontic band material, such as stainless steel, is a device that is used to construct a custom orthodontic band. The band is placed around a tooth which, because of its size or location, cannot be fitted with a preformed orthodontic band. The band provides a foundation for anchoring orthodontic appliances, so that pressure can be exerted on the teeth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic band materials be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic band materials in the practice of dentistry.

5. Risks to health: None identified.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that orthodontic band materials be classified into class II (performance standards). The properties of the materials used to form orthodontic band materials depend

upon the proper composition of these materials. Moreover, orthodontic band materials directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic band materials should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5430, to read as follows:

### § 872.5430 Orthodontic band material.

(a) *Identification.* Orthodontic band material, such as stainless steel, is a device that is used to construct a custom orthodontic band. The band is placed around a tooth which, because of its size or location, cannot be fitted with a preformed orthodontic band. The band provides a foundation for anchoring

orthodontic appliances, so that pressure can be exerted on the teeth.

(b) *Classification. Class II* (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2954]

### Medical Devices; Classification of Orthodontic Band Pushers

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic band pushers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic band pushers:

1. **Identification:** An orthodontic band pusher is a barlike stainless steel device used in orthodontic treatment to apply pressure on orthodontic bands in order to place the bands on teeth.

2. **Recommended classification:** Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. **Summary of reasons for recommendation:** The Panel recommends that orthodontic band pushers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic band pushers in the practice of dentistry.

5. **Risks to health:** None identified.

### Proposed classification

FDA agrees with the Panel recommendation and is proposing that orthodontic band pushers be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of orthodontic band pushers be exempt

from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of orthodontic band pushers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning orthodontic band pushers. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic band pushers be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experiences with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption

will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of orthodontic band pushers be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of orthodontic band pushers must still be required to comply with the complaint file requirements of § 820.298 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of orthodontic band pushers must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 50 Stat. 540-546 (21

U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5440, to read as follows:

**§ 872.5440 Orthodontic band pusher.**

(a) *Identification.* An orthodontic band pusher is a bar-like stainless steel device used in orthodontic treatment to apply pressure on orthodontic bands in order to place the bands on teeth.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets, in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of orthodontic band setters:

1. *Identification:* An orthodontic band setter is a bar-like device used in orthodontic treatment to position orthodontic bands on teeth.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that orthodontic band setters be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements and the good manufacturing practice regulation, because this is a simple device that presents no undue risk to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel

based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic band setters in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that orthodontic band setters be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of orthodontic band setters be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of orthodontic band setters, the agency cannot make the required findings. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning orthodontic band setters. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic band setters be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot

properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of orthodontic band setters be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of orthodontic band setters must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of orthodontic band setters must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with

new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5450, to read as follows:

#### § 872.5450 Orthodontic band setter.

(a) *Identification.* an orthodontic band setter is a bar-like device used in orthodontic treatment to position orthodontic bands on teeth.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[FR Doc. 80-39934 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2956]

#### Medical Devices; Classification of Orthodontic Metal Brackets

AGENCY: Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic metal brackets into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic metal brackets:

1. Identification: An orthodontic metal bracket is a metal device that is welded to an orthodontic band or bonded to a tooth and that applies pressure from flexible orthodontic wire to the tooth in order to alter the position of the tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under

section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic metal brackets be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic metal brackets in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that orthodontic metal brackets be classified into class II (performance standards). The properties of the materials used to form orthodontic metal brackets depend upon the proper composition of these materials. Moreover, orthodontic metal brackets directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic metal brackets should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the

good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21678) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5460, to read as follows:

**§ 872.5460 Orthodontic metal bracket.**

(a) *Identification.* An orthodontic metal bracket is a metal device that is welded to an orthodontic band or bonded to a tooth and that applies pressure from a flexible orthodontic wire to the tooth in order to alter the position of the tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m. Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[FR Doc. 80-39935 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2957]

**Medical Devices; Classification of Orthodontic Plastic Brackets**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic plastic brackets into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic plastic brackets:

1. Identification: An orthodontic plastic bracket is a plastic device that is bonded to a tooth and that applies pressure from a flexible orthodontic wire to the tooth in order to alter the position of the tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under

section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic plastic brackets be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic plastic brackets in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that orthodontic plastic brackets be classified into class II (performance standards). The properties of the materials used to form orthodontic plastic brackets depend upon the proper composition of these materials. Moreover, orthodontic plastic brackets directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic plastic brackets should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the

good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5470, to read as follows:

**§ 872.5470 Orthodontic plastic bracket.**

(a) *Identification.* An orthodontic plastic bracket is a plastic device that is bonded to a tooth and that applies pressure from a flexible orthodontic wire to the tooth in order to alter the position of the tooth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39936 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2958]

**Medical Devices; Classification of Orthodontic Bracket Aligners**

AGENCY: Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic bracket aligners into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic bracket aligners:

1. Identification: An orthodontic bracket aligner is a plier-like device used to align brackets on orthodontic bands that are affixed to the teeth. To align the brackets, the gauge on the device is set to the desired height and the stop of the device is placed against the bottom edge of the tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic bracket

aligners be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, record and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic bracket aligners in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that orthodontic bracket aligners be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of orthodontic bracket aligners be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of orthodontic bracket aligners, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning orthodontic bracket aligners. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate

notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic bracket aligners be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposed device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of orthodontic bracket aligners be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of orthodontic bracket aligners must still be required to comply with the

complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of orthodontic bracket aligners must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective action are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 23, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5480, to read as follows:

**§ 872.5480 Orthodontic Bracket Aligner.**

(a) *Identification.* An orthodontic bracket aligner is a plier-like device used to align brackets on orthodontic bands that are affixed to the teeth. To align the brackets, the gauge on the device is set to the desired height and the stop of the device is placed against the bottom edge of the tooth.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.  
William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

[FR Doc. 80-39937 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2959]

**Medical Devices; Classification of  
Orthodontic Wire Clamps**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic wire clamps into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic wire clamps:

1. *Identification:* An orthodontic wire clamp is a device that is attached to the arch wire to prevent movement of the arch wire.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that orthodontic wire clamps be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic wire clamps in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that orthodontic wire clamps be classified into class II (performance standards). The properties of the materials used to form orthodontic wire clamps depend upon the proper composition of these materials. Moreover, orthodontic wire clamps directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with

other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic wire clamps should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 [21 U.S.C. 360c, 371(a)]) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5490, to read as follows:

**§ 872.5490 Orthodontic wire clamp.**

(a) *Identification.* An orthodontic wire clamp is a device that is attached to the arch wire to prevent movement of the arch wire when placed in a tube on an orthodontic band.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may

submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39938 filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2960]

**Medical Devices; Classification of  
Extraoral Orthodontic Headgear**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying extraoral orthodontic headgear into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that, the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation.

The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of extraoral orthodontic headgear:

1. *Identification:* An extraoral orthodontic headgear is a device that is used, in conjunction with an orthodontic appliance, to exert pressure on the teeth from outside the mouth. The headgear has a strap that wraps around the patient's neck or head and an inner bow portion that is fastened to the orthodontic appliance in the patient's mouth.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that extraoral orthodontic headgears be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, extraoral orthodontic headgear in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that extraoral orthodontic headgear be classified into class II (performance standards). The properties of the materials used to form extraoral orthodontic headgear depend upon the proper composition of these materials. Moreover, extraoral orthodontic headgear directly contact oral tissue. Altering the composition of the

materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that extraoral orthodontic headgear should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5500, to read as follows:

**§ 872.5500 Extraoral orthodontic headgear.**

(a) *Identification.* An extraoral orthodontic headgear is a device that is used, in conjunction with an orthodontic appliance, to exert pressure on the teeth from outside the mouth. The headgear has a strap that wraps around the patient's neck or head and an inner bow portion that is fastened to the orthodontic appliance in the patient's mouth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2961]

**Medical Devices; Classification of  
Preformed Orthodontic Space  
Maintainers**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed orthodontic space maintainers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug

Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed orthodontic space maintainers:

1. *Identification:* A preformed orthodontic space maintainer is a metal device that is used to preserve the space between teeth. The device is welded to the orthodontic bands affixed to the teeth adjacent to the space, preventing movement of the adjacent teeth into the empty space.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that preformed orthodontic space maintainers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel member's personal knowledge of, and clinical experience with, preformed orthodontic space maintainers in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that preformed orthodontic space maintainers be classified into class II

(performance standards). The properties of the materials used to form preformed orthodontic space maintainers depend upon the proper composition of these materials. Moreover, preformed orthodontic space maintainers directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed orthodontic space maintainers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5510, to read as follows:

**§ 872.5510 Preformed orthodontic space maintainer.**

(a) *Identification.* A preformed orthodontic space maintainer is a metal device that is used to preserve the space between teeth. The device is welded to

the orthodontic bands affixed to the teeth adjacent to the space, preventing movement of the adjacent teeth into the empty space.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39940 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2962]

**Medical Devices; Classification of Orthodontic Pliers**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic pliers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug

Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic pliers:

1. *Identification:* Orthodontic pliers are a device used to shape and to adjust wires and bands used in orthodontic treatment.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that orthodontic pliers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic pliers in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that orthodontic pliers be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by this device.

In response to the Panel's recommendation that manufacturers of orthodontic pliers be exempt from

section 510(k) of the act (21 U.S.C. 360 (k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification manufacturers of orthodontic pliers, the agency cannot make the required findings. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic pliers be exempt from records and reports regulations under section 59 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic pliers be exempt from the good manufacturing practice (GMP)

regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of orthodontic pliers having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5520, to read as follows:

**§ 872.5520 Orthodontic pliers.**

(a) *Identification.* Orthodontic pliers are a device used to shape and to adjust wires and bands used in orthodontic treatment.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3025]

**Medical Devices; Classification of Preformed Tooth Positioners**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed tooth positioners into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed tooth positioners:

1. *Identification:* A preformed tooth positioner is a plastic device used to prevent a patient's teeth from shifting position or to move teeth to a final position after orthodontic appliances (braces) have been removed. The device is an impression of a perfected bite. The patient bites down on the device for several hours a day to force the teeth

into a final position or to maintain the teeth in their corrected position.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that preformed tooth positioners be classified into class I because the Panel believes that general controls are sufficient to ensure the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures and the good manufacturing practice regulation because it is a simple device that presents no undue risks to health when used in a normal manner and for the purposes recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed tooth positioners in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that preformed tooth positioners be classified into class II (performance standards). Preformed tooth positioners are composed of materials with certain properties, properties that depend upon the correct composition of these materials. Moreover, preformed tooth positioners directly contact oral tissue. Altering the composition of the materials used in the device or contaminating the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. Performance standards are necessary to assure that the materials in the device are nontoxic and of adequate strength to prevent movement of teeth and to assure that the device fits properly. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that

there is sufficient information to establish a performance standard for this device.

Because the agency has determined that preformed tooth positioners should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and as new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5575, to read as follows:

#### § 872.5575 Preformed tooth positioner.

(a) *Identification.* A preformed tooth positioner is a plastic device used to prevent a patient's teeth from shifting position or to move teeth to a final position after orthodontic appliances (braces) have been removed. The device in an impression of a perfected bite. The patient bites down on the device for several hours a day to force the teeth into a final position or to maintain the teeth in their corrected position.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between

9 a.m. and 4 p.m., Monday through Friday.

Dated November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2963]

#### Medical Devices; Classification of Orthodontic Expansion Screw Retainers

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic expansion screw retainers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of orthodontic expansion screw retainers:

1. Identification: An orthodontic expansion screw retainer is a device used to exert pressure on the teeth during orthodontic treatment. The retainer has an adjustable screw that, when turned, expands the device laterally and, thereby, enlarges an area of the oral cavity, such as the palate.

2. Recommended classification: Class I (general controls). The Panel recommends that orthodontic expansion screw retainers be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

(3) Summary of reasons for recommendation: The Panel recommends that orthodontic expansion screw retainers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic expansion screw retainers in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that orthodontic expansion screw retainers be classified into class II (performance standards). The properties of the materials used to form orthodontic expansion screw retainers depend upon the proper composition of these materials. Moreover, orthodontic expansion screw retainers directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The

agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device. Because the agency has determined that orthodontic expansion screw retainers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5530, to read as follows:

#### § 872.5530 Orthodontic expansion screw retainer.

(a) *Identification.* An orthodontic expansion screw retainer is a device used to exert pressure on the teeth during orthodontic treatment. The retainer has an adjustable screw that, when turned, expands the device laterally and thereby enlarges an area of the oral cavity, such as the palate.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be

submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.  
William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-2964]

#### Medical Devices; Classification of Orthodontic Springs

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic springs into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the

development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic springs:

1. Identification: An orthodontic wire spring is a metal device that is attached to the orthodontic bands affixed to adjacent teeth and is used to apply pressure to teeth to correct their position.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic springs be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic springs in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that orthodontic springs be classified into class II (performance standards). The properties of the materials used to form orthodontic springs depend upon the proper composition of these materials. Moreover, orthodontic springs directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device

because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic springs should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5540, to read as follows:

#### § 872.5540 Orthodontic spring.

(a) *Identification.* An orthodontic spring is a metal device that is attached to the orthodontic bands affixed to adjacent teeth and is used to apply pressure to teeth to correct their position.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments

may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2965]

#### Medical Devices; Classification of Teething Rings

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying fluid-filled teething rings into class II (performance standards) and classifying nonfluid-filled teething rings into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the fluid-filled teething rings be classified into class I (general controls). The Panel recommendation did not include a recommended classification for nonfluid-filled teething rings. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying teething rings. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, Md 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the

development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of fluid-filled teething rings:

1. Identification: A fluid-filled teething ring is a soft plastic device containing a liquid, such as water. Prior to use, the liquid may be chilled by refrigerating the device. The device is used by infants to soothe the gums during the teething process.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(i)) and from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that fluid-filled teething rings be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The device materials that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, fluid-filled teething rings in the practice of dentistry.

5. Risks to health: Infection: If the fluid in the device becomes contaminated and the teething ring ruptures, the patient may develop an infection.

#### Proposed Classification

With respect to fluid-filled teething rings, FDA disagrees with the Panel recommendation and is proposing that these rings be classified into class II (performance standards). Contamination of the fluid in the device has the potential for causing infection, if the teething ring ruptures. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risk to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the

device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that fluid-filled teething rings should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

FDA has revised the identification of the device to clarify that the regulation applies only to products intended for use as an aid in teething, and to include nonfluid-filled teething rings as well as fluid-filled teething rings. Because nonfluid-filled teething rings do not present a risk of infection due to contaminated fluid, FDA is proposing to classify them into class I. FDA is also proposing to exempt nonfluid-filled teething rings from the premarket notification requirement under section 510(k) of the act and Subpart E of Part 807 of the regulations (21 CFR Part 807, Subpart E) and from most provisions of the GMP regulation under section 520(f) of the act (21 U.S.C. 360j(f)) and Part 820 of the regulations. The agency has determined that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning a nonfluid-filled teething ring. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new types of nonfluid-filled teething rings.

FDA is proposing that a manufacturer of a nonfluid-filled teething ring who does not label or otherwise represent it as sterile be exempt, in the manufacture of the device, from all requirements in the GMP regulation, except § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of a nonfluid-filled teething ring, even when it is not labeled or otherwise represented as sterile, must still be required to comply with the complaint file requirements to ensure that these

manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of nonfluid-filled teething rings must still be required to comply with the general requirements concerning records to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate. A manufacturer of a nonfluid-filled teething ring that it labeled or otherwise represented as sterile is, in the manufacture of this device, subject to the GMP regulation in its entirety.

Teething rings may also be subject to regulation by the Consumer Product Safety Commission under the Federal Hazardous Substances Act (15 U.S.C. 1261-1275).

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5550, to read as follows:

#### § 872.5550 Teething ring.

(a) *Identification.* A teething ring is a device intended for use by infants to soothe the gums during the teething process.

(b) *Classification.* (1) Class I (general controls), if the teething ring does not contain a liquid, such as water. This nonfluid-filled teething ring is exempt from the premarket notification procedures in Subpart E of Part 807. If the nonfluid-filled device is not labeled or otherwise represented as sterile, it also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198,

regarding compliant files. (2) Class II (performance standards), if the teething ring contains a liquid, such as water.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2966]

### Medical Devices; Classification of Orthodontic Tubes

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic tubes into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**  
Gregory Singleton, Bureau of Medical  
Devices (HFK-460), Food and Drug  
Administration, 8757 Georgia Ave.,  
Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic tubes:

1. Identification: An orthodontic tube is a metal device that is used in orthodontics to attach a wire or headgear to bands cemented to the teeth. The tube is welded to a band or bonded to the last tooth and allows insertion of an arch wire or headgear appliance.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic tubes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, record and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic tubes in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that orthodontic tubes be classified into

class II (performance standards). The properties of the materials used to form orthodontic tubes depend upon the correct composition of these materials. Moreover, orthodontic tubes directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance for the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency had determined that orthodontic tubes should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513), 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5560, to read as follows:

##### § 872.5560 Orthodontic tube.

(a) Identification. An orthodontic tube is a metal device that is used in orthodontics to attach a wire or headgear to bands cemented to the teeth. The tube is welded to a band or bonded to the last tooth and allows

insertion of an arch wire or headgear appliance.

(b) *Classification.* Class II (performance standards).

Interested persons may on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of orthodontic ligature tucking instruments:

1. Identification: An orthodontic ligature tucking instrument is a device used to push the end of a ligature under the arch wire so that soft tissues are not irritated by these ends. A ligature is the wire that fastens an orthodontic arch wire to the orthodontic band on a tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that orthodontic ligature tucking instruments be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with orthodontic ligature tucking instruments in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that orthodontic ligature tucking instruments be classified into class I (general controls). The agency believes that

general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of orthodontic ligature tucking instruments be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of orthodontic ligature tucking instruments, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning orthodontic ligature tucking instruments. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semi-annual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of orthodontic ligature tucking instruments be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption

from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of orthodontic ligature tucking instruments be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of orthodontic ligature tucking instruments must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of orthodontic ligature tucking instruments must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667; and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names

may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5570, to read as follows:

**§ 872.5570 Orthodontic ligature tucking instrument.**

(a) *Identification.* An orthodontic ligature tucking instrument is a device used to push the end of a ligature under the arch wire so that soft tissues are not irritated by these ends. A ligature is the wire that fastens an orthodontic arch wire to the orthodontic band on a tooth.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individual may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2968]

**Medical Devices; Classification of  
Orthodontic Wires**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying orthodontic wires into class II (performance standards). FDA is also

publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of orthodontic wires:

1. *Identification:* An orthodontic wire is a device that is incorporated into an orthodontic appliance and is used to exert pressure on teeth in order to alter their position.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that orthodontic wires be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device

has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, orthodontic wires in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that orthodontic wires be classified into class II (performance standards). The properties of the materials used to form orthodontic wires depend upon the proper composition of these materials. Moreover, orthodontic wires directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that orthodontic wires should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation

identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart F by adding new § 872.5580, to read as follows:

#### § 872.580 Orthodontic wire.

(a) *Identification.* An orthodontic wire is a device that is incorporated into an orthodontic appliance and is used to exert pressure on teeth in order to alter their position.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except the individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39948 filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2969]

#### Medical Devices; Classification of Abrasive Disks

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying abrasive disks into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to

assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of abrasive disks:

1. *Identification:* An abrasive disk is a device constructed of various abrasives, such as diamond chips, that are glued to shellac-based paper. The device is used to remove excessive restorative material, such as gold, and to smooth rough surfaces from oral restorations, such as crowns. The device is attached to a shank that is held by a handpiece.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that abrasive disks be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply

with records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, abrasive disks in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that abrasive disks be classified into class II (performance standards). The properties of the materials used to form abrasive disks depend upon the proper composition of these materials. Moreover, abrasive disks directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that abrasive disks should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513,

701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6010, to read as follows:

#### § 872.6010 Abrasive disk.

(a) *Identification.* An abrasive disk is a device constructed of various abrasives, such as diamond chips, that are glued to shellac-based paper. The device is used to remove excessive restorative material, such as gold, and to smooth rough surfaces from oral restorations, such as crowns. The device is attached to a shank that is held by a handpiece.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated, November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

#### Medical Devices; Classification of Abrasive Points

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying abrasive points into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls

applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 104-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of abrasive points:

1. *Identification:* An abrasive point is a device used to remove excessive restorative material, such as gold, and to remove rough surfaces on oral restorations, such as amalgam fillings. The device may be constructed of diamond or silica particles molded into different shapes and fused to a shank that is held by a handpiece.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that abrasive points be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to

health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, abrasive points in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that abrasive points be classified into class II (performance standards). The properties of the materials used to form abrasive points depend upon the proper composition of these materials. Moreover, abrasive points directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that abrasive points should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs

proposes to amend Part 872 in Subpart G by adding new § 872.6020, to read as follows:

#### § 872.6020 Abrasive point.

(a) *Identification.* An abrasive point is a device used to remove excessive restorative material, such as gold, and to remove rough surfaces on oral restorations, such as amalgam fillings. The device may be constructed of diamond or silica particles molded into different shapes and fused to a shank that is held by a handpiece.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2971]

#### Medical Devices; Classification of Oral Cavity Abrasive Polishing Agents

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying oral cavity abrasive polishing agents into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken

under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HPK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of oral cavity abrasive polishing agents:

1. *Identification:* An oral cavity abrasive polishing agent is a device in paste or powder form that contains an abrasive material, such as silica pumice, and is used to remove debris from the teeth. The abrasive polish is applied to the teeth by a handpiece attachment (prophylaxis cup).

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that oral cavity abrasive polishing agents be classified into class I because general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel

based its recommendation on the Panel members' personal knowledge of, and clinical experience with, oral cavity abrasive polishing agents in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that oral cavity abrasive polishing agents be classified into class II (performance standards). The properties of the materials used to form oral cavity abrasive polishing agents depend upon the proper composition of these materials. Moreover, oral cavity abrasive polishing agents directly contact oral tissue. Altering the composition of materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that oral cavity abrasive polishing agents should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble of the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs

proposes to amend Part 872 in Subpart G by adding new § 872.6030, to read as follows:

#### § 872.6030 Oral cavity abrasive polishing agent.

(a) *Identification.* An oral cavity abrasive polishing agent is a device in paste or powder form that contains an abrasive material, such as silica pumice, and is used to remove debris from the teeth. The abrasive polish is applied to the teeth by a handpiece attachment (prophylaxis cup).

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39951 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

### 21 CFR Part 872

[Docket No. 78N-2972]

#### Medical Devices; Classification of Polishing Agent Strips

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying polishing agent strips into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken

under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of polishing agent strips:

1. *Identification:* A polishing agent strip is a device composed of a plastic strip to which an abrasive material is affixed. The device is used to polish restorative materials, such as amalgam or silicate, especially in areas between the teeth.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that polishing agent strips be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and

clinical experience with, polishing agent strips in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that polishing agent strips be classified into class II (performance standards). The properties of the materials used to form polishing agent strips depend upon the correct composition of these materials. Moreover, the polishing agent strips directly contact oral tissue. Altering the composition of the materials used in the device or contamination of the materials with other substances may cause adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that polishing agent strips should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6035, to read as follows:

#### § 872.6035 Polishing agent strip.

(a) *Identification.* A polishing agent strip is a device composed of a plastic strip to which an abrasive material is affixed. The device is used to polish restorative materials, such as amalgam or silicate, especially in areas between the teeth.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk, (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-2973]

#### Medical Devices; Classification of Polishing Wheels

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying polishing wheels into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of polishing wheels:

1. *Identification:* A polishing wheel is a device composed of a material such as hard rubber, that is used to polish restorative materials in readily accessible areas of the oral cavity. The device is held by a dental handpiece.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug and Cosmetic Act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that polishing wheels be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, polishing wheels in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that polishing wheels be classified into Class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

FDA disagrees with the Panel's recommendation that manufacturers of

polishing wheels be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements is found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of polishing wheels be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of polishing wheels must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that

manufacturers of polishing wheels must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667 and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6040, to read as follows:

**§ 872.6040 Polishing wheel.**

(a) *Identification.* A polishing wheel is a device composed of a material such as hard rubber, that is used to polish restorative materials in readily accessible areas of the oral cavity. The device is held by a dental handpiece.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2974]

**Medical Devices; Classification of  
Paper Saliva Absorbers**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying paper saliva absorbers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of paper saliva absorbers:

1. *Identification:* A paper saliva absorber is a device made of paper that is used to absorb moisture from the oral cavity during dental procedures.
2. *Recommended classification:* Class I (general controls). The Panel recommends that paper saliva absorbers be exempt from premarket notification procedures under section 510(k) of the

Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that paper saliva absorbers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, paper saliva absorbers in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that paper saliva absorbers be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of paper saliva absorbers be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of paper saliva absorbers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of

existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of paper saliva absorbers be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel recommendation that manufacturers of paper saliva absorbers be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of paper saliva absorbers having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation

identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6050, to read as follows:

#### § 872.6050 Paper saliva absorber.

(a) *Identification.* A paper saliva absorber is a device made of paper that is used to absorb moisture from the oral cavity during dental procedures.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that the individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2975]

#### Medical Devices; Classification of Ultraviolet Activators for Polymerization

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultraviolet activators for polymerization into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards

to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultraviolet activators for polymerization:

1. Identification: An ultraviolet activator for polymerization is a device that produces ultraviolet radiation which is used to polymerize (set) resinous dental pit and fissure sealants or restorative materials by transmission of the light through a rod.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that ultraviolet activators for polymerization be classified into class II because the amount of ultraviolet light emitted by the device must be controlled to prevent possible eye damage to users. The design and output characteristics of this device should meet a generally acceptable satisfactory level of performance. Also, the electrical properties of the device must be controlled to ensure electrical safety. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a performance standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry. The Panel also based its recommendation on a report published in the *Journal of the American Dental Association* (Ref. 1). The report states the ultraviolet radiation of 320-400 nanometers (nm) is usually innocuous to human skin. However, ultraviolet light radiation in the 320-400 nm range can cause erythema (redness of the skin produced by congestion of the capillaries) and pigmentation in persons naturally susceptible to ultraviolet light and persons ingesting certain drugs or other chemicals that act as photosensitizing agents.

5. Risks to health: (a) Adverse skin reaction: A phototoxic or photoallergic skin reaction (erythema and pigmentation) may occur after moderate to excessive exposure to ultraviolet radiation emitted by the device.

(b) Eye damage: Eye damage may be caused by exposure to ultraviolet radiation emitted by the device.

(c) Electrical shock: Improper electrical design of the device may cause electrical shock to the patient or user.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that ultraviolet activators for polymerization be classified into class II (performance standards). A performance standard for this device would control the exposure of the patient to unnecessary ultraviolet light radiation. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

**Reference**

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Council on Dental Materials and Devices, "Guidelines on the Use of Ultraviolet Radiation in Dentistry," *Journal of the American Dental Association*, Volume 92:775-776, April 1976.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with

new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6070, to read as follows:

**§ 872.6070 Ultraviolet activator for polymerization.**

(a) Identification. An ultraviolet activator for polymerization is a device that produces ultraviolet radiation which is used to polymerize (set) resinous dental pit and fissure sealants or restorative materials by transmission of the light through a rod.

(b) Classification. Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**21 CFR Part 872**

[Docket No. 78N-2976]

**Medical Devices; Classification of Air Brushes**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying air brushes into class III

(premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of air brushes:

1. Identification: An air brush is an AC-powered device used in conjunction with articulation paper. The device uses air-driven particles to roughen the surfaces of dental restorations; uneven areas of the restorations are then identified by use of articulation paper.

2. Recommended classification: Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that air brushes be classified into class III because the device presents a potential unreasonable risk of illness or injury. Use of the device may cause soft and hard tissue damage or cause inhalation or harmful particulate matter by creating excessive abrasive particles in the mouth. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel also believes that sufficient data

do not exist to establish an adequate performance standard for this device because satisfactory performance has never been demonstrated. Therefore, the Panel recommends that the device should be subject to premarket approval to assure that manufacturers demonstrate satisfactory performance of the device and, thus, assure its safety and effectiveness.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Inhalation of particles: Improper design of the device could create excessive abrasive particles which could be inhaled by the patient.

(b) Tissue trauma: The device could cause unnecessary trauma to hard and soft tissue structures of the mouth due to the abrasive nature of the particulates.

(c) Adverse tissue reaction: If the materials used in the device are not biocompatible, the patient may have an adverse tissue reaction.

(d) Electrical shock: Improper design or a malfunction of the device may cause electrical shock to the patient or user.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that air brushes be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury because use of the device to roughen surfaces of dental restorations may cause the patient to inhale harmful particles or to suffer trauma to hard and soft tissues of the mouth. The agency believes that sufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device and that insufficient information exists to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the

general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6080, to read as follows:

**§ 872.6080 Air brush.**

(a) *Identification.* An air brush is an AC-powered device used in conjunction with articulation paper. The device uses air-driven particles to roughen the surfaces of dental restorations. Uneven areas of the restorations are then identified by use of articulation paper.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2977]

**Medical Devices; Classification of  
Anesthetic Warmers**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying anesthetic warmers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These

actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of anesthetic warmers:

1. Identification: An anesthetic warmer is an AC-powered device into which tubes containing anesthetic solution are placed in order to warm them prior to the administration of the anesthetic.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that anesthetic warmers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, anesthetic warmers in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that anesthetic warmers be classified into Class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of anesthetic warmers be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of anesthetic warmers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of anesthetic warmers be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other

persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of anesthetic warmers be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (2 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of anesthetic warmers having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6100, to read as follows:

**§ 872.6100 Anesthetic warmer.**

(a) *Identification.* An anesthetic warmer is an AC-powered device into which tubes containing anesthetic solution are placed in order to warm them prior to the administration of the anesthetic.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug

Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-2978]

### Medical Devices; Classification of Articulation Paper

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying articulation paper into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the

following recommendation regarding the classification of articulation paper:

1. Identification: Articulation paper is a device composed of paper coated with an ink dye that is placed between the patient's upper and lower teeth when the teeth are in the bite position. The articulation paper is used to locate uneven or high areas.

2. Recommended classification: Class I (general controls): The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that articulation paper be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, articulation paper in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that articulation paper be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of articulation paper be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510

only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of articulation paper, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of articulation paper be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360(i)). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of articulation paper be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general

requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of articulation paper must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of articulation paper must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6140, to read as follows:

**§ 872.6140 Articulation paper.**

(a) *Identification.* Articulation paper is a device composed of paper coated with an ink dye that is placed between the patient's upper and lower teeth when the teeth are in the bite position. The articulation paper locates uneven or high areas.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of

§ 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that the individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2979]

**Medical Devices, Classification of  
Base Plate Shellacs**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying base plate shellacs into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**

Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of base plate shellacs:

1. *Identification:* Base plate shellac is a device composed of shellac that is used to rebuild the occlusal rim of full or partial dentures.

2. *Recommend classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that base plate shellacs be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, base plate shellac in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that base plate shellacs be classified into class II (performance standards). The properties of the materials used to form base plate shellacs depend upon the proper composition of these materials. Moreover, base plate shellacs directly

contact oral tissues. Altering the composition of the materials or contamination of the materials with other substances may lead to adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that base plate shellacs should be classified into Class II rather than Class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under Section 519, and the good manufacturing practice regulation under Section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6200, to read as follows:

**§ 872.6200 Base-plate shellac.**

(a) *Identification.* Base plate shellac is a device composed of shellac that is used to rebuild the occlusal rim of full or partial dentures.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four

copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2980]

**Medical Devices; Classification of  
Dental Chairs with Operative Units**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental chairs with operative units into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides

background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental chairs with operative units:

1. *Identification:* A dental chair with operative unit is a device that consists of an AC-powered chair or lounge in which the patient is positioned during dental procedures. Attached to the chair is an AC-powered operative unit that supplies power to, and serves as the base for, dental handpieces, lights, and other devices and that holds syringes for air and water.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)) and records and reports requirements under section 519 of the act (21 U.S.C. 360i).

3. *Summary of reasons for recommendation:* Panel recommends that dental chairs with operative units be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that devices contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures and records and reports requirements because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental chairs with operative units in the practice of dentistry.

5. *Risks to health:* Electrical shock: Improper electrical design of the device may cause electrical shock to the patient.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that dental chairs with operative units be classified into class II (performance standards). This decision is based on the potential for electric shock posed by the power supply of the device. The agency believes that a performance standard is necessary for this device to ensure electrical safety and that general

controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that dental chairs with operative units should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k) and records and reports requirements under section 519 of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 7019(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6250, to read as follows:

**§ 872.6250 Dental chair with operative unit.**

(a) *Identification.* A dental chair with operative unit is a device that consists of an AC-powered chair or lounger in which the patient is positioned during dental procedures. Attached to the chair is an AC-powered operative unit that supplies power to, and serves as the base for, dental handpieces, lights, and other devices and that holds syringes for air and water.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be

identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
*Acting Associate Commissioner for Regulatory Affairs.*

**21 CFR Part 872**

[Docket No. 78N-2981]

**Medical Devices; Classification of Dental Chairs Without Operative Units**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental chairs without operative units into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation.

The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental chairs without operative units:

1. *Identification:* A dental chair without operative unit is a device that consists of an AC-powered chair or lounger in which the patient is positioned during dental procedures. The Chair does not have an operative unit device attached.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that dental chairs without operative units be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with the premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental chairs without operative units in the practice of dentistry.

5. *Risks to health:* Electrical shock: Improper electrical design of the device may cause electrical shock to the patient.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that dental chairs without operative units be classified into class II (performance standards). This decision is based on the potential for electric shock posed by the power supply of the device. The Agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health

presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

Because the agency has determined that dental chairs without operative units should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6260, to read as follows:

**§ 872.6260 Dental chair without operative unit.**

(a) *Identification.* A dental chair without operative unit is a device that consists of an AC-powered chair or lounger in which the patient is positioned during dental procedures. The chair does not have an operative unit device attached.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments

may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2962]

**Medical Devices; Classification of Cotton Rolls**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cotton rolls into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305) Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cotton rolls:

1. *Identification:* A cotton roll is a tube shaped device composed of cotton fibers that is used to absorb moisture in the oral cavity during dental procedures.
2. *Recommended classification:* Class I (general controls). The Panel

recommends that this device be exempt from premarket notification procedures under section 510(dk) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that cotton rolls be classified into class I because the Panel believed that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, cotton rolls in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that cotton rolls be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of cotton rolls be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing and premarket notification by manufacturers of cotton rolls, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from

manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of cotton rolls be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of cotton rolls be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of cotton rolls having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This

proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6280, to read as follows:

**§ 872.6280 Cotton roll.**

(a) *Identification.* A cotton roll is a tube shaped device composed of cotton fibers that is used to absorb moisture in the oral cavity during dental procedures.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.  
William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

**Medical Devices; Classification of Prophylaxis Cups**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying prophylaxis cups into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public

comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of prophylaxis cups:

1. *Identification:* A prophylaxis cup is a device made of rubber that is held by a dental handpiece and used to apply polishing agents during prophylaxis (cleaning). The dental handpiece spins the rubber cup holding the polishing agent and the user applies it to the teeth to remove debris.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that prophylaxis cups be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, prophylaxis cups in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that prophylaxis cups be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

FDA disagrees with the Panel's recommendation that manufacturers of prophylaxis cups be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of prophylaxis cups be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act.

Compliance with the GMP regulation will help prevent production of prophylaxis cups having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). The proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 862 in Subpart G by adding new § 872.6290, to read as follows:

#### § 872.6290 Prophylaxis cup.

(a) *Identification.* A prophylaxis cup is a device made of rubber that is held by a dental handpiece and used to apply polishing agents during prophylaxis (cleaning). The dental handpiece spins the rubber cup holding the polishing agent and the user applies it to the teeth to remove debris.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk, (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

#### Medical Devices; Classification of Rubber Dams

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rubber dams into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of rubber dams:

1. *Identification:* A rubber dam is a device composed of a thin sheet of latex with a hole in the center that is used to isolate a tooth from fluids in the mouth during dental procedures, such as filling a cavity. The device is stretched around a tooth by inserting the tooth through the hole in the center.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good

manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that rubber dams be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, rubber dams in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that rubber dams be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of rubber dams be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing and premarket notification by manufacturers of rubber dams, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of rubber dams be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in

several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of rubber dams be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of rubber dams must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of rubber dams must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to

complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6300, to read as follows:

#### § 872.6300 Rubber dam.

(a) *Identification.* A rubber dam is a device composed of a thin sheet of latex with a hole in the center that is used to isolate a tooth from fluids in the mouth during dental procedures, such as filling a cavity. The device is stretched around a tooth by inserting the tooth through the hole in the center.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated November 19, 1980

[Docket No. 78N-2985]

### Medical Devices; Classification of Rubber Dam Clamps

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rubber dam clamps into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the Office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of rubber dam clamps:

1. Identification: A rubber dam clamp is a device used to anchor a rubber dam (a barrier used to isolate a tooth from fluids in the mouth during dental procedures, such as filling a cavity).

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures

under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that rubber dam clamps be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, rubber dam clamps in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that rubber dam clamps be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of rubber dam clamps be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of rubber dam clamps, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns

of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of rubber dam clamps be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of rubber dam clamps be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of rubber dam clamps must still be required to

comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of rubber dam clamps must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6310, to read as follows:

**§ 872.6310 Rubber dam clamp.**

(a) *Identification.* A rubber dam clamp is a device used to anchor a rubber dam (a barrier used to isolate a tooth from fluids in the mouth during dental procedures, such as filling a cavity).

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket

number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2986]

**Medical Devices; Classification of  
Rubber Dam Frames**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rubber dam frames into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of rubber dam frames:

1. *Identification:* A rubber dam frame is a plastic or metal device used to stretch and apply a rubber dam (a barrier used to isolate a tooth from

fluids in the mouth during procedures, such as filling a cavity).

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that rubber dam frames be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, rubber dam frames in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that rubber dam frames be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel recommendation that manufacturers of rubber dam frames be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of rubber dam frames, the agency cannot make the required finding. In

order to conduct necessary inspections, and, thereby, to protect the public health, the agency must be able to identify the firms manufacturing this device. Likewise, the agency must receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of rubber dam frames be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of rubber dam frames be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the

agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of rubber dam frames must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of rubber dam frames must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about products defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.8320, to read as follows:

**§ 872.8320 Rubber dam frame.**

(a) *Identification.* A rubber dam frame is a plastic or metal device used to stretch and apply a rubber dam (a barrier used to isolate a tooth from fluids in the mouth during dental procedures, such as filling a cavity).

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820 with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers

Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2987]

**Medical Devices, Classification of  
Ultraviolet Detectors**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying ultraviolet detectors into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendations**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation.

The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of ultraviolet detectors:

1. Identification: An ultraviolet detector is a device that provides a source of ultraviolet light which is used to identify otherwise invisible material, such as dental plaque, present in or on teeth.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a high priority.

3. Summary of reasons for recommendation: The Panel recommends that ultraviolet detectors be classified into class II because the amount of ultraviolet light emitted by the device must be controlled to prevent eye damage. The design and output characteristics of this device should meet a generally acceptable satisfactory level of performance. Also, the electrical properties of the device must be controlled to assure electrical safety. The Panel believes that general controls alone would not provide sufficient control over these characteristics. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry. The Panel also based its recommendation on a report published in the *Journal of the American Dental Association* (Ref. 1). The report stated that ultraviolet radiation of 320-400 nanometers (nm) is usually innocuous to human skin. However, ultraviolet light radiation in the 320-400 nm can cause erythema (redness of the skin produced by congestion of the capillaries) and pigmentation in persons naturally susceptible to ultraviolet light and persons ingesting certain drugs or other chemicals that act as photosensitizing agents.

5. Risks to health: (a) Adverse skin reaction: A phototoxic or photoallergic skin reaction (erythema and pigmentation) may occur after moderate to excessive exposure to ultraviolet radiation emitted by the device.

(b) Eye damage: Eye damage may be caused by exposure to ultraviolet radiation emitted by the device.

(c) Electrical shock: Improper electrical design of the device may cause electrical shock to the patient or users.

### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that ultraviolet detectors be classified into Class II (performance standards). A performance standard for this device would control the exposure of the patient to unnecessary ultraviolet light radiation. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

### Reference

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m., to 4 p.m., Monday through Friday.

1. Council on Dental Materials and Devices, "Guidelines on the Use of Ultraviolet Radiation in Dentistry," *Journal of the American Dental Association*, Volume 92:775-776, April 1976.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360, (a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6350, to read as follows:

#### § 872.6350 Ultraviolet detector.

(a) Identification. An ultraviolet detector is a device that provides a source of ultraviolet light which is used to identify otherwise invisible material, such as dental plaque, present in or on teeth.

(b) Classification. Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2988]

#### Medical Devices; Classification of Oral Cavity Evacuators

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying oral cavity evacuators into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides

background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of oral cavity evacuators:

1. Identification: An oral cavity evacuator is a hand-held device that consists of a plastic tube attached to a suction unit and is used to remove fluids from the oral cavity during dental procedures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that oral cavity evacuators be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, oral cavity evacuators in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that oral cavity evacuators be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of oral cavity evacuators be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing and premarket notification under section 510 (a) through (k) of the

act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing and premarket notification by manufacturers of oral cavity evacuators, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of oral cavity evacuators be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposed device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of oral cavity evacuators be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness

and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of oral cavity evacuators having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6370, to read as follows:

#### § 872.6370 Oral cavity evacuator.

(a) *Identification.* An oral cavity evacuator is a hand-held device that consists of a plastic tube attached to a suction unit and is used to remove fluids from the oral cavity during dental procedures.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

## 21 CFR Part 872

[Docket No. 78N-2989]

**Medical Devices; Classification of Dental Floss****AGENCY:** Food and Drug Administration.**ACTION:** Proposed rule

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental floss into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental floss:

1. Identification: Dental floss is a string-like device made of cotton or other fibers that is intended to be used to remove plaque and food particles from between the teeth to reduce tooth decay. The fibers of the device may be coated with wax for easier use.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing

practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental floss be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental floss in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental floss be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of dental floss be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing and premarket notification by manufacturers of dental floss, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of dental floss be exempt from records and reports regulations under section 519 of

the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR § 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of dental floss be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of dental floss having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6390, to read as follows:

§ 872.6390 Dental floss.

(a) *Identification.* Dental floss is a string-like device made of cotton or other fibers that is intended to be used to remove plaque and food particles from between the teeth to reduce tooth decay. The fibers of the device may be coated with wax for easier use.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph

Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

21 CFR Part 872

[Docket No. 78N-2990]

Medical Devices; Classification of  
Forceps for an Articulation Paper

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying forceps for an articulation paper into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981.

FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of forceps for an articulation paper:

1. *Identification:* Forceps for an articulation paper are a device used to hold articulation paper in the proper position between the patient's upper and lower teeth when the teeth are in the bite position. The articulation paper locates uneven or high areas.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that forceps for an articulation paper be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, forceps for an articulation paper in the practice of dentistry.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that forceps for an articulation paper be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of forceps for an articulation paper be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of forceps for an articulation paper, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning forceps for an articulation paper. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of forceps for an articulation paper be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other

regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of forceps for an articulation paper be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of forceps for an articulation paper must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of forceps for an articulation paper must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from

other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6400, to read as follows:

**§ 872.6400 Forceps for an articulation paper.**

(a) *Identification.* Forceps for an articulation paper are a device used to hold articulation paper in the proper position between the patient's upper and lower teeth when the teeth are in the bite position. The articulation paper locates uneven or high areas.

(b) *Classification.* Class I (general controls). The device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested parties may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39970 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2991]

**Medical Devices; Classification of  
Forceps for Dental Dressings**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying forceps for dental dressings into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of forceps for dental dressings:

1. Identification: Forceps for dental dressings are a handheld, tweezer-like device used to apply dressings to areas in the mouth during dental procedures.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures

under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that forceps for dental dressings be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, forceps for dental dressings in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with Panel recommendation and is proposing that forceps for dental dressings be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of forceps for dental dressings be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing of manufacturers of forceps for dental dressings, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary

inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning forceps for dental dressings. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of forceps for dental dressings be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of forceps for a dental dressing be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on manufacture

of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of forceps for dental dressings must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of forceps for dental dressings must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6410, to read as follows:

#### § 872.6410 Forceps for dental dressings.

(a) *Identification.* Forceps for dental dressings are a hand-held, tweezer-like device used to apply dressings to areas in the mouth during dental procedures.

(b) *Classification.* Class I (general controls). The device is exempt from premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk, (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[Docket No. 78N-2992]

### Medical Devices; Classification of Forceps for a Rubber Dam Clamp

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying forceps for a rubber dam clamp into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of forceps for a rubber dam clamp:

1. Identification: Forceps for a rubber dam clamp are a plier-like device that are used to spread a rubber dam clamp (a device used to anchor a rubber dam in place) during insertion and removal of the clamp.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that forceps for a rubber dam clamp be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, forceps for a rubber dam clamp in the practice of dentistry.

5. Risks to health: None identified.

### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that forceps for a rubber dam clamp be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of

forceps for a rubber dam clamp be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of forceps for a rubber dam clamp, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of forceps for a rubber dam clamp be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of

forceps for a rubber dam clamp be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of forceps for a rubber dam clamp must still be required to comply with complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of forceps for a rubber dam clamp must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6420, to read as follows:

**§ 872.6420 Forceps for a rubber dam clamp.**

(a) *Identification.* Forceps for a rubber dam clamp are a plier-like device that are used to spread a rubber dam clamp (a device used to anchor a rubber dam in place) during insertion and removal of the clamp.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that the individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2993]

**Medical Devices; Classification of  
Guards for an Abrasive Disk**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying guards for an abrasive disk into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of guards for abrasive disks:

1. *Identification:* A guard for an abrasive disk is a metal device that clips onto the dental handpiece. The guard shields soft tissue from injury by an abrasive disk when the disk is being used during the construction of a restoration.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedure under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that guards for an abrasive disk be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, the records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, guards for an

abrasive disk in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that guards for an abrasive disk be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of guards for an abrasive disk be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing and premarket notification by manufacturers of guards for an abrasive disk, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of guards for an abrasive disk be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is

proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of guards for an abrasive disk be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of guards for an abrasive disk must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of guards for an abrasive disk must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the

general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6465, to read as follows:

#### § 872.6465 Guard for an abrasive disk.

(a) *Identification.* A guard for an abrasive disk is a metal device that clips onto the dental handpiece. The guard shields soft tissue from injury by an abrasive disk when the disk is being used during the construction of a restoration.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 802.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2994]

#### Medical Devices; Classification of Heat Sources for Bleaching Teeth

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying heat sources for bleaching teeth into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into

class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposed that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of heat sources for bleaching teeth:

1. Identification: A heat source for bleaching teeth is an AC-powered device used to apply heat to a tooth after the tooth is coated with a bleaching agent. The heat source may be either a light or an electric heater.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. Summary of reasons for recommendation: The Panel recommends that heat sources for bleaching teeth be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and

acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, heat sources for bleaching teeth in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that heat sources for bleaching teeth be classified into class II (performance standards). This device directs heat energy at oral tissue. This heat may cause burns to the patient if it is too intense and the device may be ineffective if it does not have sufficient intensity. The electrical properties of the device must also be controlled to prevent electrical shock to the patient or user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that heat sources for bleaching teeth should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names

may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6475, to read as follows:

**§ 872.6475 Heat source for bleaching teeth.**

(a) *Identification.* A heat source for bleaching teeth is an AC-powered device used to apply heat to a tooth after the tooth is coated with a bleaching agent. The heat source may be either a light or an electric heater.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2996]

**Medical Devices; Classification of Oral Irrigation Units**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying oral irrigation units into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a

device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of oral irrigation units:

1. **Identification:** An oral irrigation unit is an AC-powered device intended to be used to remove food particles from between the teeth and promote good periodontal (gum) condition by means of a pressurized water stream.

2. **Recommended classification:** Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. **Summary of reasons for recommendation:** The Panel recommends that oral irrigation units be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and

good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. **Summary of data on which the recommendation is based:** The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, oral irrigation units in the practice of dentistry.

5. **Risks to health:** Infection and tissue trauma: Infection and trauma to soft tissues may result from the pressure of the water stream driving microorganisms into the gum pockets surrounding the user's teeth.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that oral irrigation units be classified into class II (performance standards). The agency believes that the design and performance characteristics of the device which regulate the output pressure of the water stream must be controlled to prevent infection and trauma to soft tissues. Excessive pressure may drive microorganisms and debris into the gum pockets surrounding the user's teeth, causing infection. The agency believes that general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a standard for this device.

Because the agency has determined that oral irrigation units should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the

general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6510, to read as follows:

§ 872.6510 Oral irrigation unit.

(a) **Identification.** An oral irrigation unit is an AC-powered device intended to be used to remove food particles from between the teeth and promote good periodontal (gum) condition by means of a pressurized water stream.

(b) **Classification.** Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-2997]

**Medical Devices; Classification of Dental Matrix Bands**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental matrix bands into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental matrix bands:

1. Identification: A dental matrix band is a device made of stainless steel that is used as a mold and is placed around a tooth to provide support for restorative materials while filling a tooth.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental matrix bands be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simply device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and

clinical experience with, dental matrix bands in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that dental matrix bands be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of dental matrix bands be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of dental matrix bands, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, and to receive premarket notification from manufacturers to conduct necessary inspection to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of dental matrix bands be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements is found in the device good manufacturing practice (GMP) regulation published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is

proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of dental matrix bands be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of dental matrix bands must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of dental matrix bands must still be required to comply with the general requirements concerning records, in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 23, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6550, to read as follows:

§ 872.6550 Dental matrix band.

(a) *Identification.* A dental matrix band is a device made of stainless steel that is used as a mold and is placed around a tooth to provide support for restorative materials while filling a tooth.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820 with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

21 CFR Part 872

[Docket No. 78N-2998]

Medical Devices; Classification of  
Matrix Retainers

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying matrix retainers into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final

regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of matrix retainers:

1. *Identification:* A matrix retainer is a device used to fasten together the ends of a matrix band (a mold placed around a tooth to provide support for restorative materials) and to tighten the matrix band around the tooth during restoration and filling.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that matrix retainers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and report requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to

health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, matrix retainers in the practice of dentistry.

5. *Risks to health:* None identified.

Proposed Classification

FDA agrees with the Panel recommendation and is proposing that matrix retainers be classified into Class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of matrix retainers be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of matrix retainers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections, and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices, for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of matrix retainers be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain

classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of matrix retainers be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of matrix retainers must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of matrix retainers must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the

former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding § 872.6560, to read as follows:

**§ 872.6560 Matrix retainer.**

(a) *Identification.* A matrix retainer is a device used to fasten together the ends of a matrix band (a mold placed around tooth to provide support for restorative materials) and to tighten the matrix band around the tooth during restoration and filling.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practices regulation in Part 820 of this chapter, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-2999]

**Medical Devices; Classification of  
Impression Tubes**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying impression tubes into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The

effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of impression tubes.

1. *Identification:* An impression tube is a device consisting of a hollow copper tube that is used to take an impression of a single tooth. The hollow tube is filled with impression material. One end of the tube is sealed with a softened material, such as wax; the remaining end is slipped over the tooth to make the impression.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that impression tubes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this

device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personnel knowledge of, and clinical experience with, impression tubes in the practice of dentistry.

5. Risks to health. None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that impression tubes be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of impression tubes be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of impression tubes, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of impression tubes be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements is found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In

the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of impression tubes be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of impression tubes must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of impression tubes must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in

the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6570, to read as follows:

#### § 872.6570 Impression tube.

(a) *Identification.* An impression tube is a device consisting of a hollow copper tube that is used to take an impression of a single tooth. The hollow tube is filled with impression material. One end of the tube is sealed with a softened material, such as wax; the remaining end is slipped over the tooth to make the impression.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-3000]

#### Medical Devices; Classification of Mouth Mirrors

AGENCY: Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying mouth mirrors into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of mouth mirrors:

1. Identification: A mouth mirror is a hand-held metal or glass device that is used as a visual aid to reflect oral structures during examination and treatment of the teeth and the oral cavity.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that mouth mirrors be classified into class I because the Panel believes that general controls are sufficient to provide reasonable

assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, mouth mirrors in the practice of dentistry.

5. Risks of health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that mouth mirrors be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of mouth mirrors be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510 (a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of mouth mirrors, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning mouth mirrors. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products with this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of mouth mirrors be exempt from records

and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of mouth mirrors be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of mouth mirrors must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of mouth mirrors must

still be required to comply with the general requirements concerning records in § 820.189 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6600, to read as follows:

**§ 872.6600 Mouth mirror.**

(a) *Identification.* A mouth mirror is a hand-held metal or glass device that is used as a visual aid to reflect oral structures during examination and treatment of the teeth and the oral cavity.

(b) *Classification.* Class I (general controls). This device is exempt from the premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820 with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between

9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**21 CFR Part 872**

[Docket No. 78N-3001]

**Medical Devices; Classification of  
Saliva Ejector Mouthpieces**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying saliva ejector mouthpieces into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of saliva ejector mouthpieces:

1. *Identification:* A saliva ejector mouthpiece is a device consisting of a plastic tube that is used to remove saliva continuously from the oral cavity during dental treatment. The tube is

looped over the patient's lips and is attached to a suction unit.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that saliva ejector mouthpieces be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, saliva ejector mouthpieces in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that saliva ejector mouthpieces be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of saliva ejector mouthpieces be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of saliva ejector mouthpieces, the

agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections, and receive premarket notification from manufacturers to assure that FDA learns of new devices, and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of saliva ejector mouthpieces be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of saliva ejector mouthpieces be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the

agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes that manufacturers of saliva ejector mouthpieces must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency believes that manufacturers of saliva ejector mouthpieces must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6620, to read as follows:

**§ 872.6620 Saliva ejector mouthpiece.**

(a) *Identification.* A saliva ejector mouthpiece is a device consisting of a plastic tube that is used to remove saliva continuously from the oral cavity during dental treatment. The tube is looped over the patient's lips and is attached to a suction unit.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing

Clerk, (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3002]

**Medical Devices; Classification of  
Dental Operative Units**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental operative units into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental operative units:

1. Identification: A dental operative unit is an AC-powered device that supplies power to, and serves as the base for, dental handpieces, lights, or other dental devices and holds syringes for air and water. It can be attached to the dental chair or cabinet or located on a portable cart.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental operative units be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental operative units in the practice of dentistry.

5. Risks to health: None identified.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that dental operative units be classified into class II (performance standards). Dental operative units indirectly contact patients because air and water supplied through the unit are used to clean the operating area of debris. If the unit is

not designed properly, contamination of the air and water may occur, thereby putting the patient at risk of harm. A performance standard is necessary to control the electrical design of the device to prevent electrical shock to the patient or user. The agency believes that performance standards are necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that dental operative units should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that is device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart E by adding new § 872.6640, to read as follows:

#### § 872.6640 Dental operative unit.

(a) *Identification.* A dental operative unit is an AC-powered device that supplies power to, and serves as the base for, dental handpieces, lights, or other dental devices and holds syringes for air and water. It can be attached to the dental chair or cabinet or located on a portable cart.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing

Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated November 19, 1980

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-3003]

#### Medical Devices; Classification of Suction Operative Units

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying suction operative units into class II (performance standards.) FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

### Panel Recommendation

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of suction operative units:

1. Identification: A suction operative unit is an AC-powered device that is attached to a dental operative unit and is used to remove fluids from the oral cavity by suction supplied by tubing to a saliva ejector mouthpiece or an oral cavity evacuator.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that suction operative units be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with the premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, suction operative units in the practice of dentistry.

5. Risks to health: Electrical shock: Improper electrical design of the device may cause electrical shock to the patient or user.

### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that suction operative units be classified into class II (performance standards). The agency believes that the amount of suction generated by the device must be

controlled to prevent injury to soft tissues, and that the electrical design of the device must be controlled to prevent electrical shock to the patient or user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6645, to read as follows:

#### § 872.6645 Suction operative unit.

(a) *Identification.* A suction operative unit is an AC-powered device used to remove fluids from the oral cavity by suction supplied by tubing to a saliva ejector mouthpiece or an oral cavity evacuator.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

### 21 CFR Part 872

[Docket No. 78N-3004]

### Medical Devices; Classification of Massaging Picks

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying massaging picks into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

#### Panel Recommendation

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of massaging picks:

1. Identification: A massaging pick is a pointed device made of wood or plastic that is intended to be used manually to stimulate and massage the gums to promote good periodontal (gum) condition. The end of the pick is placed at the base of the teeth and moved gently.

2. Recommended classification: Class I (general controls). The Panel

recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that massaging picks be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, massaging picks in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that massaging picks be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of massaging picks be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listings and premarket notification by manufacturers of massaging picks, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from

manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of massaging picks be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of massaging picks be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of

massaging picks must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency believes that manufacturers of massaging picks must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6650, to read as follows:

#### § 872.6650 Massaging pick.

(a) *Identification.* A massaging pick is a pointed device made of wood or plastic that is intended to be used manually to stimulate and massage the gums to promote good periodontal (gum) condition. The end of the pick is placed at the base of the teeth and moved gently.

(b) *Classification.* Class I (general controls). The device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.280, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk, (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may

submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39983 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-3005]

### Medical Devices; Classification of Porcelain Powder for Clinical Use

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying porcelain powder for clinical use into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of porcelain powder for clinical use:

1. Identification: Porcelain powder for clinical use is a device consisting of a mixture of kaolin, feldspar, quartz, or other substances that is used in the production of artificial teeth in fixed or removable dentures, of jacket crowns, facings, and veneers. The device is used in restorative dentistry by heating the powder mixture to a high temperature in an oven to produce a hard prosthesis with a glass-like finish.

2. Recommended classification: Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. Summary of reasons for recommendation: The Panel recommends that porcelain powder for clinical use be classified into class II because the composition of the porcelain powder must be controlled. The fluorescing agents in the porcelain powder for clinical use may contain radioactive components which may decay, resulting in the production of prosthetic devices that emit radiation. The Panel believes that general controls alone would not provide sufficient control over this characteristic. The Panel believes that a performance standard would provide reasonable assurance of the safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. Risks to health: (a) Exposure to radiation: The patient may be exposed to radiation emitted by prostheses made from porcelain powder that contains radioactive ingredients. (b) Adverse tissue reaction: If the materials used in the construction of the device are not biocompatible, the patient may have an adverse tissue reaction.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that porcelain powder for clinical use be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. Exposure of surrounding tissue to the ionizing radiation emitted by the radioactive material that may be present in dental products fabricated from porcelain powder for clinical use may

result in acute tissue damage, if the radiation is sufficiently intense, or in neoplastic (abnormal changes), if radiation is chronically received at lower levels. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6660, to read as follows:

#### § 872.6660 Porcelain powder.

(a) *Identification.* Porcelain powder for clinical use is a device consisting of a mixture of kaolin, feldspar, quartz, or other substances that is used in the production of artificial teeth in fixed or removable dentures, of jacket crowns, facings, and veneers. The device is used in restorative dentistry by heating the powder mixture to a high temperature in an oven to produce a hard prosthesis with a glass-like finish.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-3006]

### Medical Devices; Classification of Silicate Protectors

AGENCY: Food and Drug Administration.  
ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying silicate protectors into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of silicate protectors:

1. Identification: A silicate protector is a device made of silicone that is applied with an absorbent tipped applicator to the surface of a new restoration to exclude temporarily fluids from its surface.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt

from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that silicate protectors be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, record and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, silicate protectors in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that silicate protectors be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of silicate protectors be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of silicate protectors, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections, and to receive premarket notification from manufacturers to

assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of silicate protectors be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of silicate protectors be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of silicate

protectors must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of silicate protectors must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding § 872.6670, to read as follows:

**§ 872.6670 Silicate protector.**

(a) *Identification.* A silicate protector is a device made of silicone that is applied with an absorbent tipped applicator to the surface of a new restoration to exclude temporarily fluids from its surface.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820 of this chapter, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading

of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.  
William F. Randolph,  
*Acting Associate Commissioner for Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3007]

**Medical Devices; Classification of Dental Retractors (All Types)**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental retractors (all types) into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.  
**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910; 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the

classification of dental retractors (all types):

1. *Identification:* A dental retractor (any type) is a device used to fold back oral tissues by pulling back the cheeks at the lips to aid operating procedures.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that dental retractors (all types) be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, record and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental retractors in the practice of dentistry.

5. *Risks to health: Infection:* If the materials used in the device cannot be sterilized, infection to the patient may occur.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that dental retractors (all types) be classified into class II (performance standards). Dental retractors may be reused, and therefore, have a potential for transmitting microorganisms between patients. For this reason, the device must be capable of sterilization. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by this device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient

information to establish a performance standard for this device.

Because the agency has determined that dental retractors (all types) should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6680, to read as follows:

**§ 872.6680 Dental retractor (any type).**

(a) *Identification.* A dental retractor (any type) is a device used to fold back oral tissues by pulling back the cheeks at the lips to aid operating procedures.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-3008]

**Medical Devices; Classification of  
Dental Retractor Accessories**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying dental retractor accessories into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of dental retractor accessories:

1. Identification: A dental retractor accessory is a device, such as a spring,

that is used with a dental retractor (a device used to fold back oral tissue during operating procedures) to aid in pulling back the cheek as far as possible.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that dental retractor accessories be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, dental retractor accessories in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that dental retractor accessories be classified into class II (performance standards). Dental retractor accessories may be reused, and therefore, have a potential for transmitting microorganisms between patients. For this reason, the device must be capable of sterilization. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that dental retractor accessories should be classified into class II rather than

class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6690, to read as follows:

**§ 872.6690 Dental retractor accessory.**

(a) *Identification.* A dental retractor accessory is a device, such as a spring, that is used with a dental retractor (a device used to fold back oral tissue during operating procedures) to aid in pulling back the cheek as far as possible.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39987 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3009]

**Medical Devices; Classification of Boiling Water Sterilizers**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying boiling water sterilizers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of boiling water sterilizers:

1. *Identification:* A boiling water sterilizer is an AC-powered device used to sterilize dental and surgical instruments by submersion of the instruments into boiling water.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i)

and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that boiling water sterilizers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, boiling water sterilizers in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that boiling water sterilizers be classified into class II (performance standards). This device is used to sterilize instruments which directly contact the patients' oral tissues. If the water is inadequately heated, the instruments will not be properly sterilized, possibly resulting in the transmission of microorganisms between patients. Also, the electrical design of the device must be controlled to prevent electrical shock to the user. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that boiling water sterilizers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43

FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6710, to read as follows:

**§ 872.6710 Boiling water sterilizer.**

(a) *Identification.* A boiling water sterilizer is an AC-powered device used to sterilize dental and surgical instruments by submersion of the instruments into boiling water.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39988 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3011]

**Medical Devices; Classification of  
Endodontic Dry Heat Sterilizers**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying endodontic dry heat sterilizers into class III (premarket approval). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class III. The effect of

classifying a device into class III is to require each manufacturer of the device to submit to FDA a premarket approval application at a date to be set in a future regulation. Each premarket approval application would include information concerning safety and effectiveness tests for the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of endodontic dry heat sterilizers:

1. *Identification:* An endodontic dry heat sterilizer is a device used to sterilize endodontic and other dental instruments by the application of dry heat. The heat is supplied through glass beads which have been heated by electricity.

2. *Recommended classification:* Class III (premarket approval). The Panel recommends that premarket approval of this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that endodontic dry heat sterilizers be classified into class III because the device presents a potential unreasonable risk of illness or injury. In tests of the device, it has failed to sterilize adequately various endodontic and dental instruments. Such failure may be a result of faulty thermostats which register higher temperatures than those generated within the device or may be caused by the inability of glass beads to sterilize adequately and uniformly despite sufficient heat. The Panel believes that general controls would not provide sufficient control over these characteristics. The Panel

believes that it is not possible to establish an adequate performance standard for this device because satisfactory performance has never been demonstrated. Therefore, the device should be subject to premarket approval to assure that manufacturers of this device demonstrate satisfactory performance of the device and thus assure its safety and effectiveness. The Panel believes that further study is needed to determine the causes of this device's ineffectiveness.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* Infection: The inability of the device to sterilize adequately endodontic and other dental instruments may lead to the transmission of micro-organisms among patients and subsequent spread of infection.

**Proposed Classification**

The agency has sought other information concerning the application of endodontic dry heat sterilizers in dentistry. Some of the literature indicates that endodontic dry heat sterilizers are more effective than other methods of sterilization such as isopropyl alcohol (70 percent), glutaraldehyde solution (buffered to 7.4), or sterile saline solution used with gauze sponges to wipe the instruments (Ref. 1). However, Dayoub, et al., (Ref. 2) found that a large degree of variation occurs among currently marketed endodontic dry heat sterilizers in terms of reaching and maintaining claimed temperature levels. Koehler and Hefferen (Ref. 3) found that large temperature gradients exist within the same endodontic dry heat sterilizer, which causes uneven heat transfer to instruments being sterilized.

FDA agrees with the Panel recommendation and is proposing that endodontic dry heat sterilizers be classified into class III (premarket approval). The agency believes that the device presents a potential unreasonable risk of illness or injury to the patient because the device may fail to sterilize dental instruments adequately. In addition, the device is purported or represented to be for a use (sterilization of endodontic and other dental instruments) that is of substantial importance in preventing impairment of human health. The agency believes that insufficient information exists to determine that general controls would provide reasonable assurance of the safety and effectiveness of the device

and that insufficient information exists to establish a performance standard for this device.

#### References

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. to 4 p.m., Monday through Friday.

1. Hubbard, T. M., et al., "Chairside Decontamination of Endodontic Files," *Oral Surgery*, (40):1, 148-152, July, 1975.
2. Dayoub, M. B., et al., "Endodontic Dry-Heat Sterilizer Effectiveness," *Journal of Endodontics*, (2):11.
3. Koehler, H. M., et al., "The Temperature Relations of Dental Instruments Heated in Root-Canal Instrument Sterilizers," *Journal of Dental Research*, 41:182, Jan.-Feb., 1962.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6730, to read as follows:

#### § 872.6730 Endodontic dry heat sterilizer.

(a) *Identification.* An endodontic dry heat sterilizer is a device used to sterilize endodontic and other dental instruments by the application of dry heat. The heat is supplied through glass beads which have been heated by electricity.

(b) *Classification.* Class III (premarket approval).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4.62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments

may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-3012]

#### Medical Devices; Classification of Air or Water Syringe Units

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying air or water syringe units into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of air or water syringe units:

1. *Identification:* An air or water syringe unit is a device consisting of a tube to deliver air or water to the patient's mouth that is used for the irrigation or drying of tooth or gum

tissue. The device may be attached to a dental operative unit.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that air or water syringe units be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, air or water syringe units in the practice of dentistry.

5. *Risks to health:* None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that air or water syringe units be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of air or water syringe units be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of air or water syringe units, the agency cannot make the required finding. To protect the public health, the agency

needs to be able to identify the firms manufacturing this device, to conduct necessary inspection and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant notifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of air or water syringe units be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirement, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of air or water syringe units be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of air or water syringe units having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with

new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6750, to read as follows:

**§ 872.6750 Air or water syringe unit.**

(a) *Identification.* An air or water syringe unit is a device consisting of a tube to deliver air or water to the patient's mouth that is used for the irrigation or drying of tooth or gum tissue. The device may be attached to a dental operative unit.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3014]

**Medical Devices; Classification of Cartridge Syringes**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying cartridge syringes into class

II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of cartridge syringes:

1. *Identification:* A cartridge syringe is a device used to inject anesthetic agents subcutaneously or intramuscularly. The device consists of a metal syringe body into which a disposable, previously filled, glass carpule (a cylindrical cartridge) containing anesthetic is placed. After attaching a needle to the syringe body and activating the carpule by partially inserting the plunger on the syringe, the device is used to administer an injection to the patient.

2. *Recommended classification Class I (general controls).* The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the food manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that cartridge syringes be

classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, cartridge syringes in the practice of dentistry.

5. Risks to health: Adverse reaction: If the syringe is incapable of being aspirated, the drug may be injected directly into a blood vessel, thus causing an adverse reaction in the patient.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that cartridge syringes be classified into class II (performance standards).

FDA has reviewed the Panel recommendation and has sought other information and data describing the use of cartridge syringes in dentistry. Some of the literature discusses injection of local anesthetic agents used in dentistry into blood vessels. Schiano et al. (Ref. 1) found that 11 percent of mandibular (lower jawbone) blocks, 14.3 percent of sphenopalatine blocks (in the region of the sphenoid and parietal bone), and 15.0 percent of posterior superior alveolar nerve blocks (nerve at the back of the mouth) were positive, or showed presence of blood when aspirated, indicating the needle's, and drug's, entry into blood vessels. Although the incidence of fatalities from this event has been low (less than one death per 1 million administrations of local anesthetic (Refs. 1 and 2)), adverse responses to the anesthetic, such as headaches, nausea, and vomiting, occur in much higher frequency (Ref. 3). The agency believes that the device may present a potential unreasonable risk to the patient's health if the mechanism for aspiration is inadequate. That mechanism enables the practitioner to determine whether a blood vessel has been penetrated during injection procedures. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks

to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that cartridge syringes should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

#### Medical Devices; Classification of Periodontic or Endodontic Irrigating Syringes

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying periodontic or endodontic irrigating syringes into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.  
**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-

62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of periodontic or endodontic irrigating syringes:

1. Identification: A periodontic or endodontic irrigating syringe is a device used for the irrigation of tissues in the mouth such as gums in periodontic therapy and root canals in teeth in endodontic therapy.
2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).
3. Summary of reasons for recommendation: The Panel recommends that periodontic or endodontic irrigating syringes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.
4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, periodontic or endodontic irrigating syringes in the practice of dentistry.
5. Risks to health: None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that periodontic or endodontic irrigating syringes be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of periodontic or endodontic irrigating syringes be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of periodontic or endodontic irrigating syringes, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modification of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of periodontic or endodontic irrigating syringes be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification

regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of periodontic or endodontic irrigating syringes be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of periodontic or endodontic irrigating syringes must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of periodontic or endodontic irrigating syringes must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 2166, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the

general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6800, to read as follows:

**§ 872.6800 Periodontic or endodontic irrigating syringe.**

(a) *Identification.* A periodontic or endodontic irrigating syringe is a device used for the irrigation of tissues in the mouth such as gums in periodontic therapy and root canals in teeth in endodontic therapy.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820 with the exception of § 820.180., regarding general requirements, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[FR Doc. 80-39992 Filed 12-29-80; 8:45 am]  
BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3017]

**Medical Devices; Classification of Restorative or Impression Material Syringes**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying restorative or impression material syringes into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of

classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of restoration or impression material syringes:

1. *Identification:* A restorative or impression material syringe is a device used in the placement of impression material (alginate) or restorative material (amalgam) in the oral cavity. It consists of a hollow tube syringe body with a plunger at one end and a narrow opening at the opposite end, through which the impression or restorative material is forced by the plunger.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that restorative or impression material syringes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device

that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no unreasonable risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, restorative or impression material syringes in the practice of dentistry.

5. *Risks to health:* None identified.

**Proposed Classification**

FDA agrees with the Panel recommendation and is proposing that restorative or impression material syringes be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of restorative or impression material syringes be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of restorative or impression material syringes, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of restorative or impression material syringes be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP)

regulation, published in the **Federal Register** of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of restorative or impression material syringes be exempt from the device food manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of restorative or impression material syringes must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of restorative or impression material syringes must still be required to comply with general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the

manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulations is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the **Federal Register** of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the **Federal Register**.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6810, to read as follows:

**§ 872.6810 Restorative or impression material syringe.**

(a) *Identification.* A restorative or impression material syringe is a device used in the placement of impression material (alginate) or restorative material (amalgam) in the oral cavity. It consists of a hollow tube syringe body with a plunger at one end and a narrow opening at the opposite end, through which the impression or restorative material is forced by the plunger.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3018]

**Medical Devices; Classification of  
Rubber Tips for Oral Hygiene**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying rubber tips for oral hygiene into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the **Federal Register**.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the **Federal Register** provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of rubber tips for oral hygiene:

1. *Identification:* A rubber tip for oral hygiene is a device made of rubber that is intended to be used manually to stimulate and massage the gums to promote good periodontal (gum) condition. It is attached to a metal or plastic handle or to the handle of a toothbrush.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that rubber tips for oral hygiene be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, rubber tips for oral hygiene in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

The agency agrees with the Panel recommendation and is proposing that rubber tips for oral hygiene be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of rubber tips for oral hygiene be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration and device listing under section 510(a) through (j) of the act, but exempt from premarket notification under section 510(k) of the act and Subpart E of Part 807 of the regulations. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration and listing by manufacturers of rubber tips for oral hygiene, the agency cannot make the required finding. To protect the public

health, the agency needs to be able to identify the firms manufacturing this device and to conduct necessary inspections. The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions concerning rubber tips for oral hygiene. The agency does not at this time anticipate that premarket approval will be required for this device. The agency believes that the semiannual updating of device listing under section 510(j)(2) will provide FDA with adequate notice concerning new products within this generic type of device.

FDA disagrees with the Panel's recommendation that manufacturers of rubber tips for oral hygiene be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the *Federal Register* of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of rubber tips for oral hygiene be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general

requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of rubber tips for oral hygiene must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of rubber tips for oral hygiene must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6850, to read as follows:

#### § 872.6850 Rubber tip for oral hygiene.

(a) *Identification.* A rubber tip for oral hygiene is a device made of rubber that is intended to be used manually to stimulate and massage the gums to promote good periodontal (gum) condition. It is attached to a metal or plastic handle or to the handle of a toothbrush.

(b) *Classification.* Class I (general controls). The device is exempt from the

premarket notification procedures in Subpart E of Part 807. The device also is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, with respect to general requirements concerning records, and § 820.198, with respect to complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of manual toothbrushes:

1. Identification: A manual toothbrush is a device that is intended to be used to remove adherent plaque and food debris from the teeth to reduce tooth decay. It is composed of a shaft with either natural or synthetic bristles at one end.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that manual toothbrushes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, manual toothbrushes in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that manual toothbrushes be classified into class I (general controls). The agency believes that general controls are

sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of manual toothbrushes be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510 (a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 520 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of manual toothbrushes, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, to conduct necessary inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers or manual toothbrushes be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21

CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of manual toothbrushes be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of manual toothbrushes must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of manual toothbrushes must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G

by adding new § 872.6855, to read as follows:

**§ 872.6855 Manual toothbrush.**

(a) *Identification.* A manual toothbrush is a device that is intended to be used to remove adherent plaque and food debris from the teeth to reduce tooth decay. It is composed of a shaft with either natural or synthetic bristles at one end.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820, with the exception of § 820.180, regarding general requirements concerning records and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
*Acting Associate Commissioner for  
Regulatory Affairs.*

BILLING CODE 4110-03-M

**21 CFR Part 872**

[Docket No. 78N-3020]

**Medical Devices; Classification of  
Powered Toothbrushes**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying powered toothbrushes into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the

device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of powered toothbrushes:

1. *Identification:* A powered toothbrush is an AC or battery-powered device that is intended to be used to remove plaque and food particles from the teeth to reduce tooth decay. It consists of a handle containing a motor that provides mechanical vibrations to a toothbrush that is inserted in one end.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that powered toothbrushes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation, because this is a simple device that presents no undue risks to

health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel Members' personal knowledge of, and clinical experience with, powered toothbrushes in the practice of dentistry.

5. Risks to health: Electrical shock: Improper electrical design of the device may cause electrical shock to the patient.

#### Proposed Classification

FDA disagrees with the Panel recommendation and is proposing that power toothbrushes be classified into class II (performance standards). The agency believes that a level of vibration must be controlled to prevent injury to soft tissue and excessive abrasion to teeth, and that the electrical design of the device must be controlled to prevent electrical shock. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that powered toothbrushes should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the premarket notification procedures under section 510(k), the records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the

Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6865, to read as follows:

#### § 872.6865 Powered toothbrush.

(a) *Identification.* A powered toothbrush is an AC or battery-powered device that is intended to be used to remove plaque and food particles from the teeth to reduce tooth decay. It consists of a handle containing a motor that provides mechanical vibrations to a toothbrush that is inserted in one end.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

#### 21 CFR Part 872

[Docket No. 78N-3021]

#### Medical Devices; Classification of Disposable Fluoride Trays

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying disposable fluoride trays into class I (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

#### Panel Recommendation

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, and FDA advisory committee, made the following recommendation regarding the classification of disposable fluoride trays:

1. *Identification:* A disposable fluoride tray is a device made of styrofoam that is used for the topical application of fluoride to the teeth. To employ the tray, the patient bites down on the tray which has been filled with a fluoride solution.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that disposable fluoride trays be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, disposable fluoride trays in the practice of dentistry.

5. *Risks to health:* None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that

disposable fluoride trays be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

FDA disagrees with the Panel's recommendation that manufacturers of disposable fluoride trays be exempt from records and reports regulations under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

FDA disagrees with the Panel's recommendation that manufacturers of disposable fluoride trays be exempt from the good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)). The agency believes that compliance with this regulation is necessary to assure the quality of this regulation is necessary to assure the quality of this device and thus its safety, effectiveness, and compliance with the adulteration and misbranding provisions of the act. Compliance with the GMP regulation will help prevent production of disposable fluoride trays having defects that could harm users.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in

the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.6870, to read as follows:

**§ 872.6870 Disposable fluoride tray.**

(a) *Identification.* A disposable fluoride tray is a device made of styrofoam that is used for the topical application of fluoride to the teeth. To employ the tray, the patient bites down on the tray which has been filled with a fluoride solution.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981 submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-3022]

**Medical Devices; Classification of  
Preformed Impression Trays**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying preformed impression trays into class I (general controls). FDA is also publishing the recommendation of

the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of preformed impression trays:

1. *Identification:* A preformed impression tray is a metal or plastic device that is used to hold impression material, such as alginate, during the making of an impression of a patient's teeth or alveolar process (bony tooth sockets). The impression is used to reproduce the structure of a patient's teeth and gums.

2. *Recommended classification:* Class I (general controls). The Panel recommends that this device be exempt from premarket notification procedures under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. *Summary of reasons for recommendation:* The Panel recommends that preformed impression trays be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device

that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with premarket notification procedures, records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, preformed impression trays in the practice of dentistry.

5. Risks to health: None identified.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that preformed impression trays be classified into class I (general controls). The agency believes that general controls are sufficient to control the risks to health presented by the device.

In response to the Panel's recommendation that manufacturers of preformed impression trays be exempt from section 510(k) of the act (21 U.S.C. 360), FDA is proposing that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through (k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of preformed impression trays, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

FDA disagrees with the Panel's recommendation that manufacturers of preformed impression trays be exempt from records and reports regulation under section 519 of the act (21 U.S.C. 360i). The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation, published in the Federal Register of July 21, 1978 (43 FR 31508). In the future, FDA will publish other

regulations under section 519, including regulations requiring reports to FDA of experience with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempt from the requirements, and FDA will issue exemptions that are appropriate. The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from requirements of the device GMP regulation. The exemption will not extend to two device GMP requirements, § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files.

In response to the Panel's recommendation that manufacturers of preformed impression trays be exempt from the device good manufacturing practice (GMP) regulation under section 520(f) of the act (21 U.S.C. 360j(f)), FDA is proposing that a manufacturer of this device be exempt, in the manufacture of the device, from all requirements in the GMP regulation except § 820.180 (21 CFR 820.180), with respect to general requirements concerning records, and § 820.198 (21 CFR 820.198), with respect to complaint files. Based on available information about current practices used in the manufacture of the device and user experience with the device, the agency has determined that application of the GMP regulation, other than §§ 820.180 and 820.198, is unlikely to improve the safety and effectiveness of the device. The agency believes, however, that manufacturers of preformed impression trays must still be required to comply with the complaint file requirements of § 820.198 to ensure that these manufacturers have adequate systems for complaint investigation and followup. The agency also believes that manufacturers of preformed impression trays must still be required to comply with the general requirements concerning records in § 820.180 to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, may determine whether the manufacturer's corrective actions are adequate, and may determine whether the exemption from other sections of the GMP regulation is still appropriate.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart G by adding new § 872.6880, to read as follows:

#### § 872.6880 Preformed impression tray.

(a) *Identification.* A preformed impression tray is a metal or plastic device that is used to hold impression material, such as alginate, during the making of an impression of a patient's teeth or alveolar process (body tooth sockets). The impression is used to reproduce the structure of a patient's teeth and gums.

(b) *Classification.* Class I (general controls). This device is exempt from the good manufacturing practice regulation in Part 820 with the exception of § 820.180, regarding general requirements concerning records, and § 820.198, regarding complaint files.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk Docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

BILLING CODE 4110-03-M

## 21 CFR Part 872

[Docket No. 78N-3023]

**Medical Devices; Classification of Intraoral Dental Waxes****AGENCY:** Food and Drug Administration.**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying intraoral dental waxes into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:****Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of intraoral dental waxes:

1. Identification: Intraoral dental wax is a device made of wax that is used to construct patterns from which custom made metal dental prostheses, such as crowns and bridges, are cast. In orthodontic dentistry, the device is used to make a pattern of the patient's bite so that crowns and bridges have the proper biting surface contact.

2. Recommended classification: Class I (general controls). The Panel

recommends that this device be exempt from records and reports requirements under section 519 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360i) and from the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that intraoral dental waxes be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The device materials that contact the body have known and acceptable properties. The Panel believes that manufacturers of this device should not be required to comply with records and reports requirements and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, intraoral dental waxes in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that intraoral dental waxes be classified into class II (performance standards). The properties of the materials used to form intraoral dental waxes depend upon the proper composition of these materials. Moreover, intraoral dental waxes directly contact oral tissue. Altering the composition of the materials used in the device or the contamination of the materials with other substances may lead to adverse tissue reactions, thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that intraoral dental waxes should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from the records and reports requirements under section 519 and the

food manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371 (a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart C by adding new § 872.6890, to read as follows:

**§ 872.6890 Intraoral dental wax.**

(a) *Identification.* Intraoral dental wax is a device made of wax that is used to construct patterns from which custom made metal dental prostheses, such as crowns and bridges, are cast. In orthodontic dentistry, the device is used to take a pattern of the patient's bite so that crowns and bridges have the proper biting surface contact.

(b) *Classification.* Class II (performance standards).

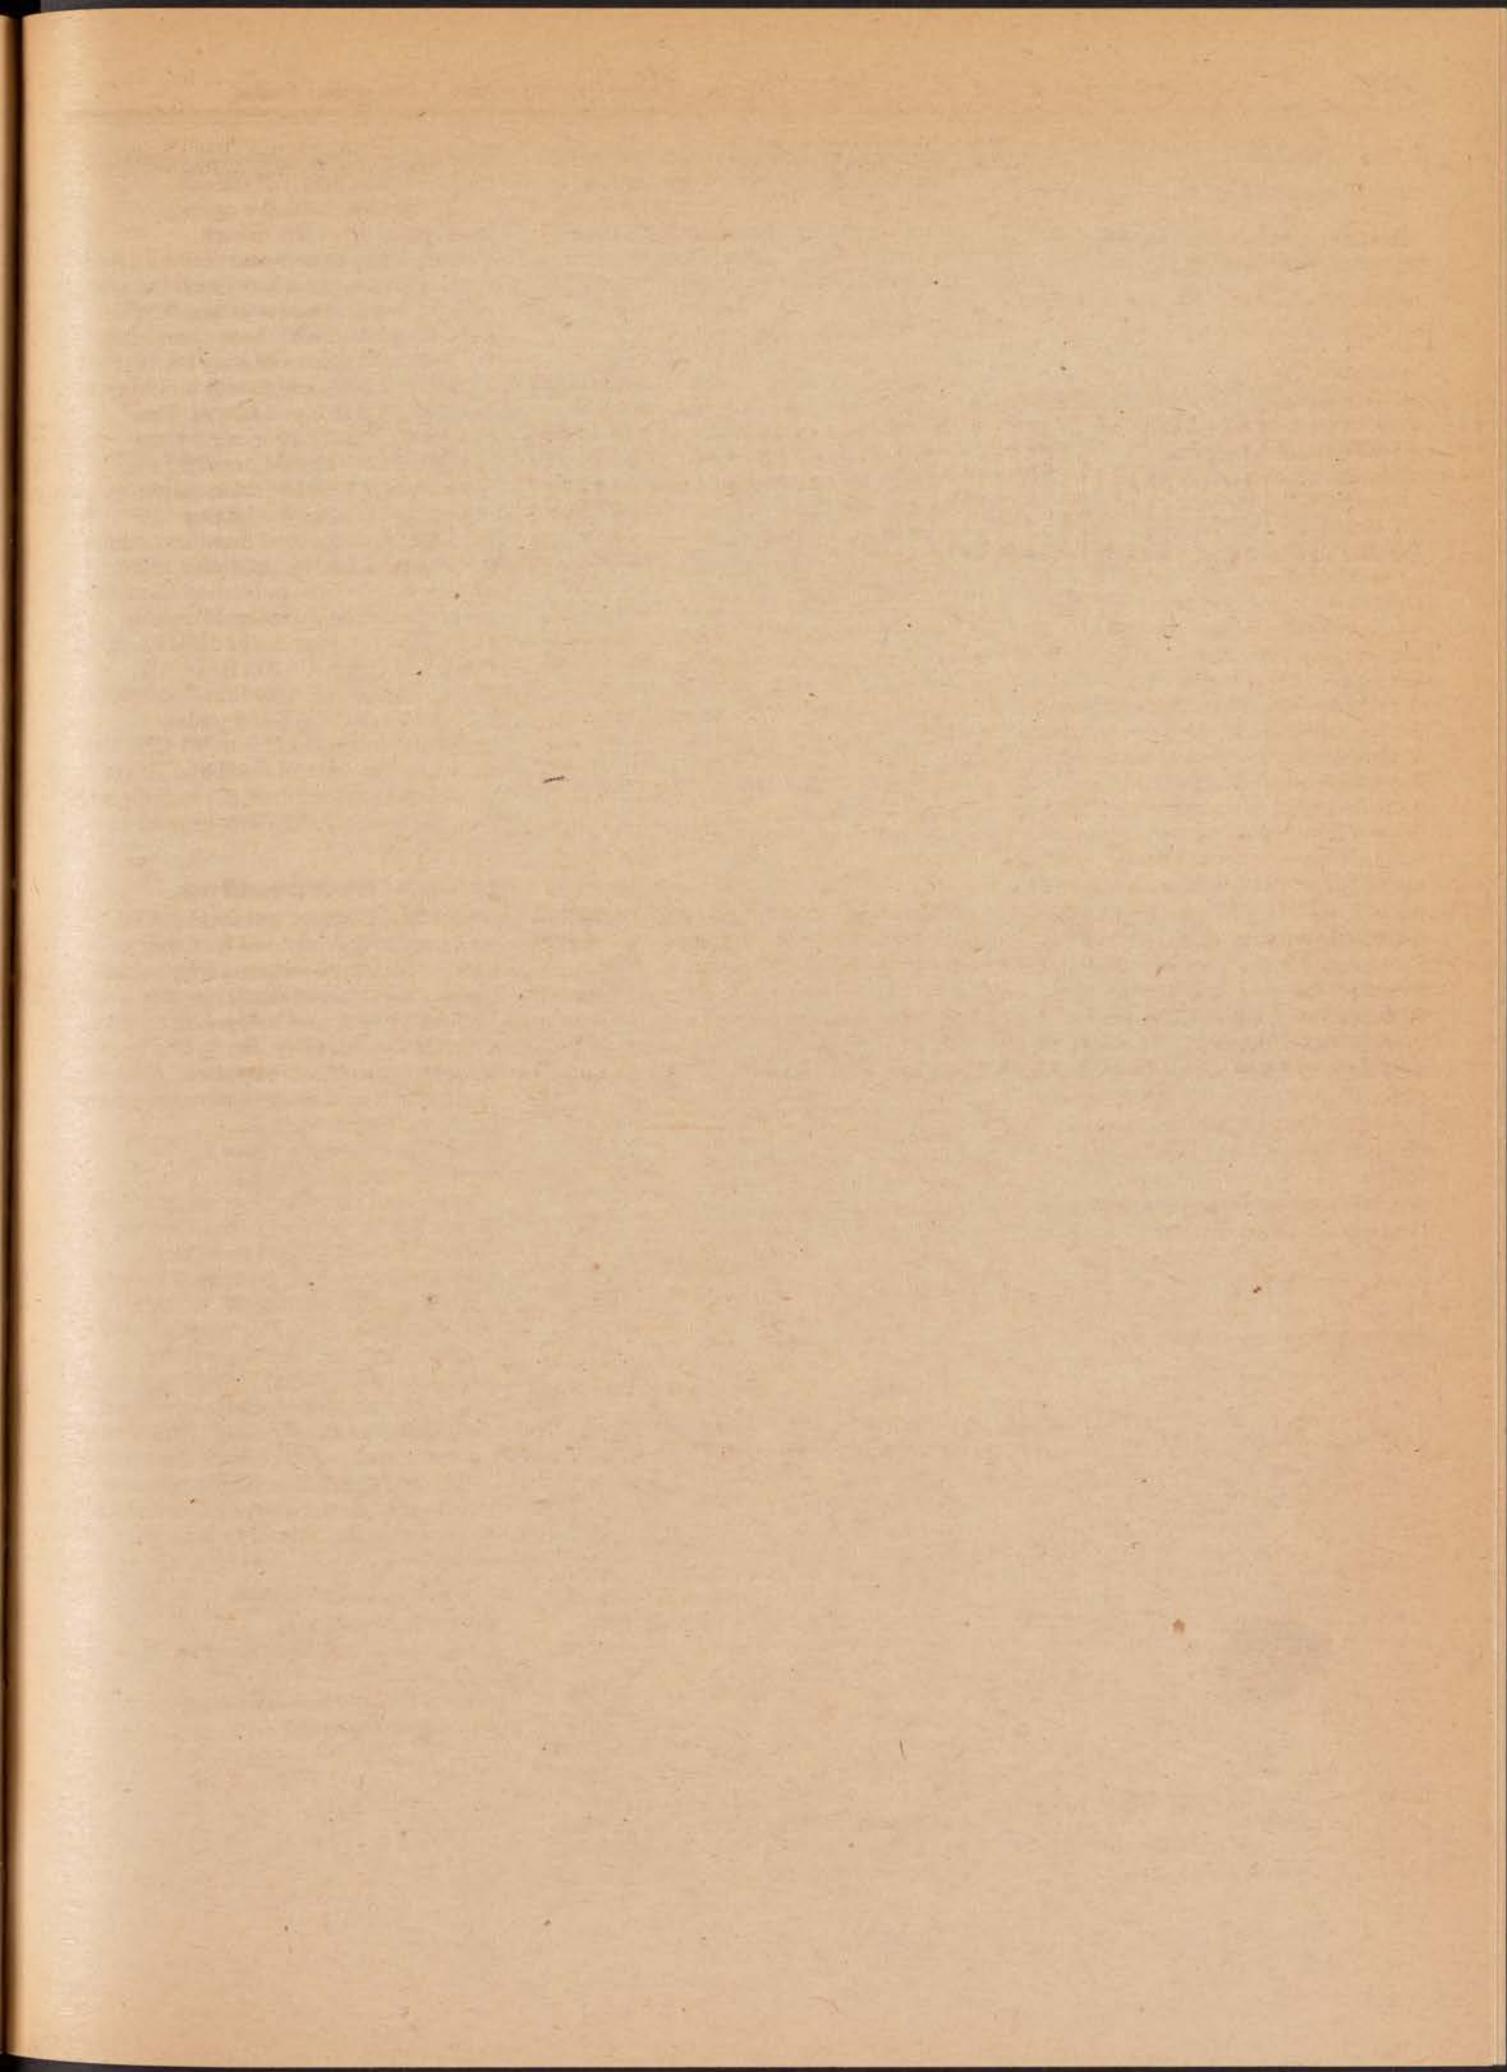

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

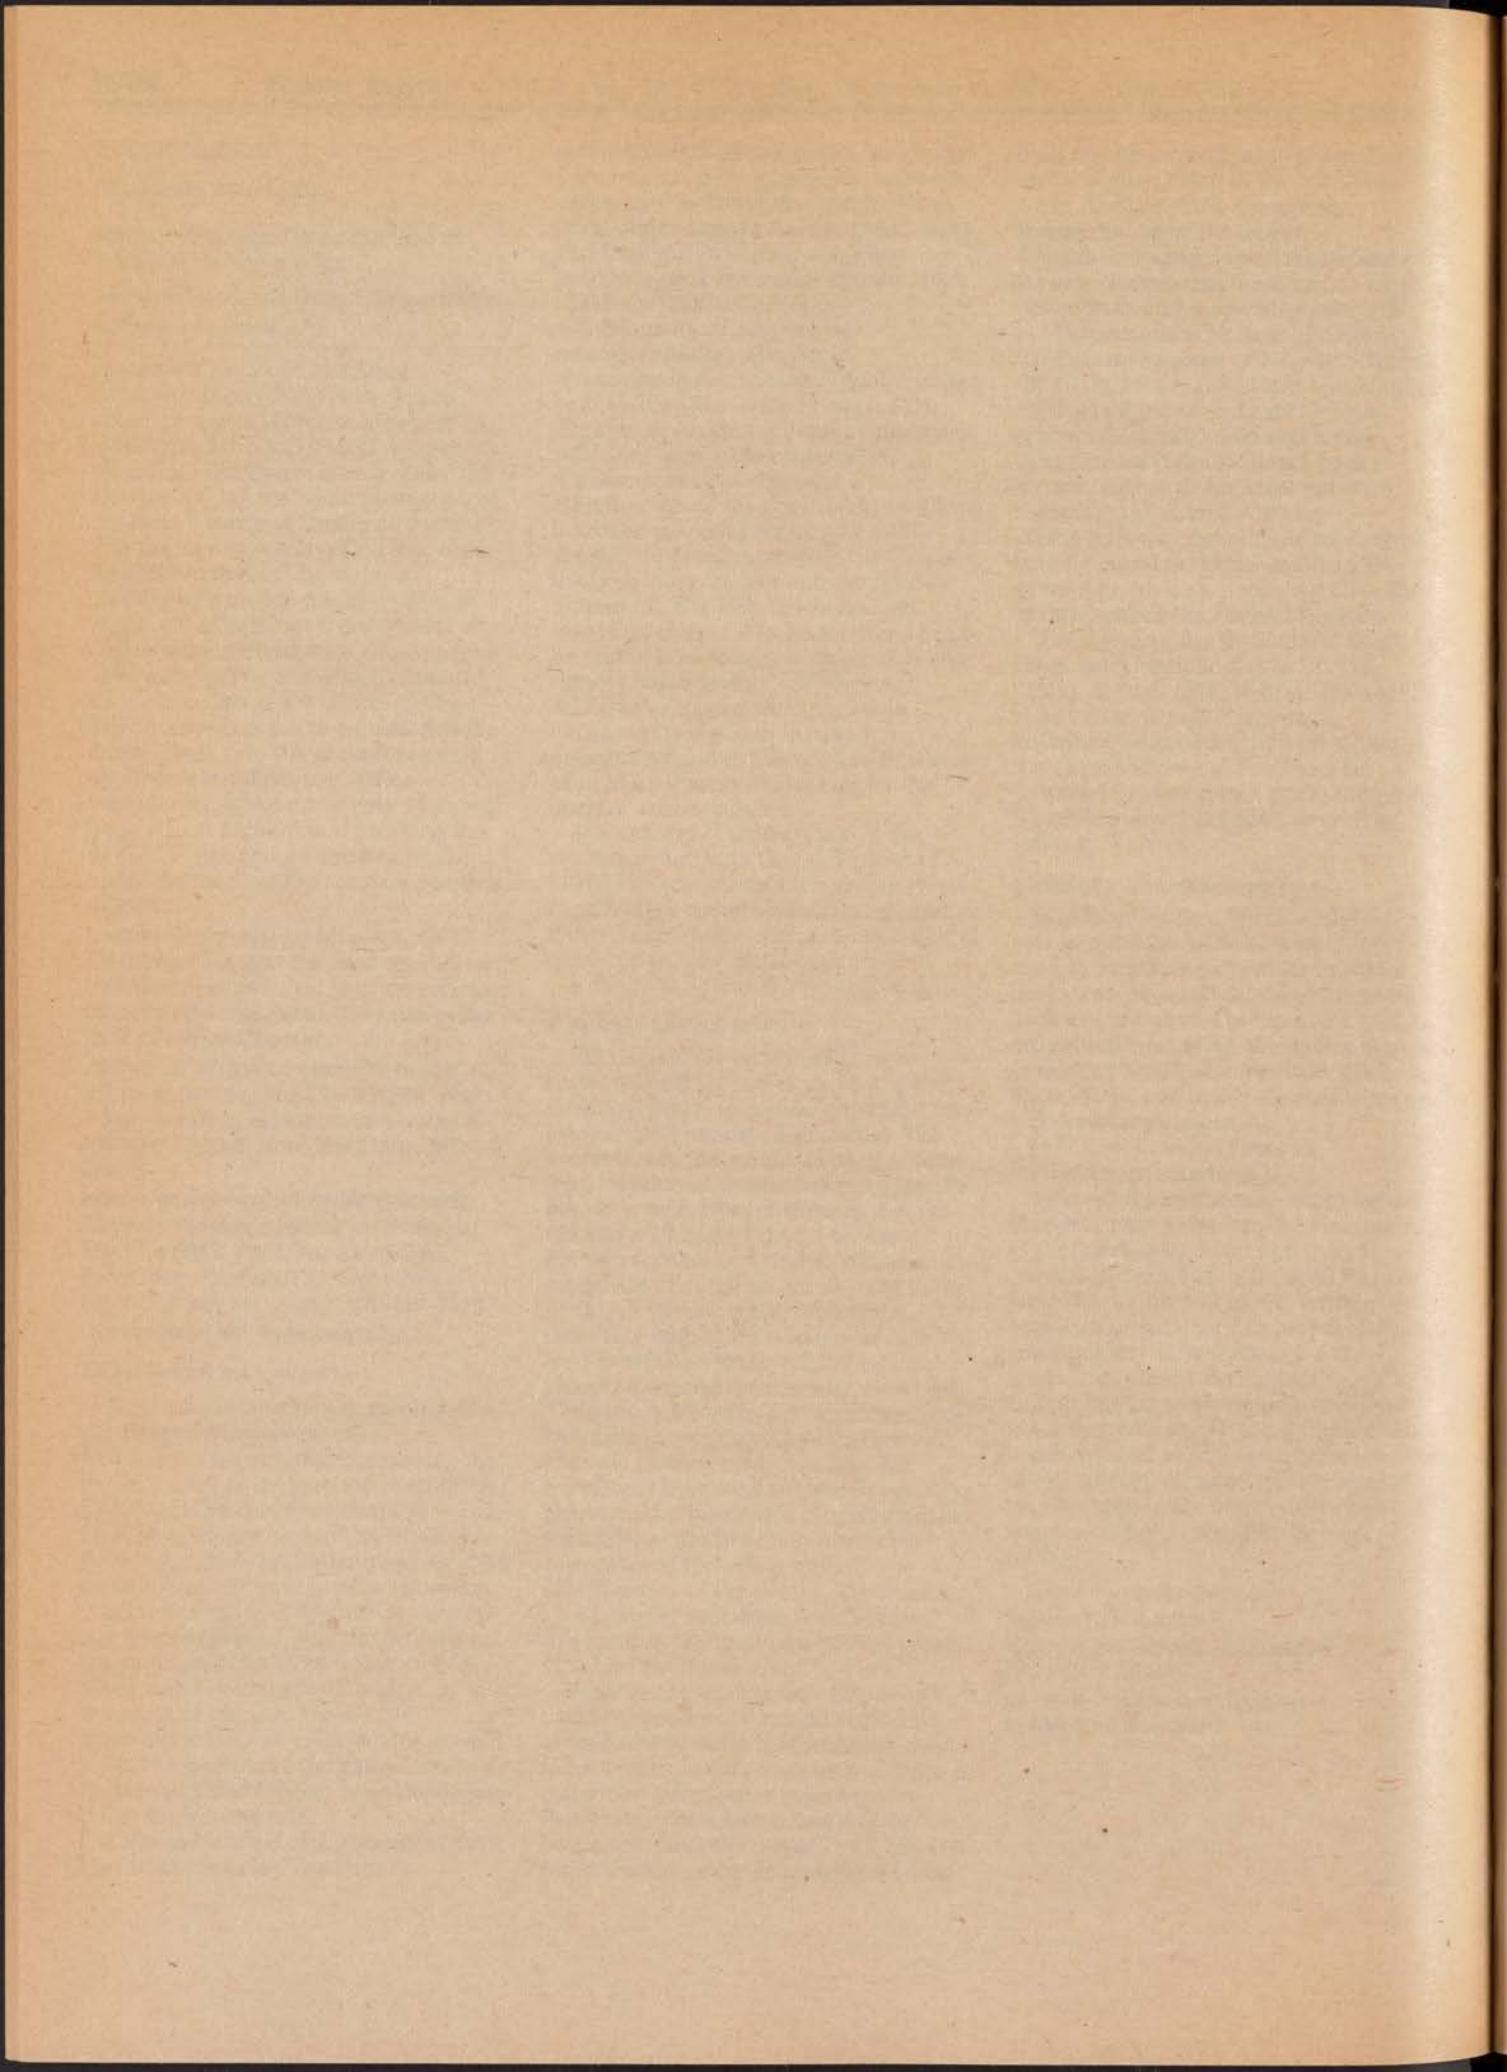

Dated: November 19, 1980.

# Directory of Federal Regional Structure

Revised as of May 1, 1980

The Directory serves as a guide to the regional administrative structure of the departments and agencies of the Federal Government.

Designed to provide the public with practical information about regional offices, the Directory is particularly useful to citizens residing outside the Nation's Capital.

Included in the Directory is a map showing the 10 Standard Federal Regions followed by tables listing the key personnel, addresses, and telephone numbers for agencies with offices in those regions. In addition, maps and tables are provided for those agencies with regional structures other than that of the standard regional system.

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration.

### Department of Labor

Employment Standards Administration,  
Wage and Hour Division

---

Minimum Wages for Federal and  
Federally Assisted Construction; General  
Wage Determination Decisions

## DEPARTMENT OF LABOR

Employment Standards  
Administration, Wage and Hour  
DivisionMinimum Wages for Federal and  
Federally Assisted Construction;  
General Wage Determination  
Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of

publication in the Federal Register without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas  
Decisions to General Wage  
Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the Federal Register without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is

encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

New General Wage Determination  
Decisions

None.

Modifications to General Wage  
Determination Decisions

The numbers of the decisions being modified and their dates of publication in the Federal Register are listed with each State.

### Cancellation of General Wage Determination Decisions

The general wage decisions listed below are cancelled. Agencies with construction projects pending to which one of the cancelled decisions would have been applicable should utilize the project determination procedure by submitting Form SF-308. See Regulations Part 1 (29 CFR), § 1.5. Contracts for which bids have been opened shall not be affected by this notice. Also consistent with 29 CFR 1.7(b)(2), the incorporation of one of the cancelled decisions in contract specifications, the opening of bids is within ten (10) days of this notice, need not be affected.

LA77-4031—Ouachita Parish, Louisiana,  
dated February 18, 1977 in 42 FR 10237—  
Residential Construction

AZ80-5123—Maricopa County, Arizona,  
dated August 1, 1980 in 45 FR 51393—  
Residential Construction

This is to advise all interested parties that the Department of Labor intends to withdraw 14 days from the date of this notice the following general wage determination: AZ80-5124—Pima County, Arizona, dated August 1, 1980, in 45 FR 51388—Residential Construction.

Signed at Washington, D.C., this 19th day of December 1980.

**Affirmative Action Obligations of  
Contractors and Subcontractors for  
Disabled Veterans, Veterans of the  
Vietnam Era, and Handicapped Workers;  
Proposed Rule**

**DEPARTMENT OF LABOR****Office of Federal Contract Compliance Programs**

41 CFR Parts 60-1, 60-250 and 60-741

**Obligations of Contractors and Subcontractors; Affirmative Action Obligations of Contractors and Subcontractors for Disabled Veterans and Veterans of the Vietnam Era and Handicapped Workers****AGENCY:** Office of Federal Contract Compliance Programs, Department of Labor.**ACTION:** Proposed Rule.

**SUMMARY:** These proposed amendments to Department of Labor regulations implementing sections 503 of the Rehabilitation Act of 1973, as amended, and 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974 will conform these regulations to the employment section of the Department of Labor regulations implementing section 504 of the Rehabilitation Act published on October 7, 1980 (45 FR 66706). It also deletes reporting requirements which are not necessary for proper performance under section 402, and it incorporates recent statutory changes in the definitions of disabled and Vietnam era veterans.

**DATES:** Comments are invited from other Federal agencies and the public. They must be received on or before March 2, 1981.

**ADDRESSES:** Comments should be sent to Director, Division of Program Policy, Office of Federal Contract Compliance Programs, 200 Constitution Avenue, NW., Washington, D.C. 20210.

**FOR FURTHER INFORMATION CONTACT:** James Cisco, Acting Director, Division of Program Policy, Office of Federal Contract Compliance Programs, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone (202) 523-9426.

**SUPPLEMENTARY INFORMATION:****Background**

Section 503 of the Rehabilitation Act of 1973, as amended (hereinafter the Act), requires government contractors

and subcontractors to take affirmative action to employ and advance in employment qualified handicapped individuals. Regulations implementing section 503 were published in the Federal Register on June 11, 1974 (39 FR 20566) and amended on April 19, 1976 (41 FR 16148). Section 504 of the Act prohibits discrimination against qualified handicapped individuals in any program or activity receiving Federal financial assistance. On April 28, 1976, the President issued Executive Order 11914, which, in section 1, delegated to the Department of Health, Education and Welfare (HEW) responsibility for coordinating agency implementation of section 504 so that consistent policies, practices and procedures are adopted among all the Federal departments with respect to enforcement of section 504. (Executive Order 11914 has been superseded by Executive Order 12250 which among other things, transferred HEW's lead agency role on section 504 to the Department of Justice.)

Section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974 requires government contractors and subcontractors to take affirmative action to employ and advance in employment disabled and Vietnam era veterans. Regulations implementing Section 402 were published in the Federal Register on June 25, 1976 (41 FR 26386).

Those regulations were written to parallel the preexisting regulations issued pursuant to Section 503. Both regulations are presently identical, except where differences are necessary because of the nature of the protected class or differences in the statutes, to assure that covered contractors are bound to consistent requirements in both programs. Therefore, in an effort to retain consistency and avoid confusion and conflict, it is proposed to amend both regulations simultaneously.

Published as Part IV of this Federal Register are final regulations which consolidate and amend other provisions in the 503 and 402 regulations and generally renumber the various sections of Parts 60-250 and 60-741. Therefore references in this proposal are to the sections as renumbered in the final rule published today. Furthermore, because the purpose of the consolidation is to

integrate the regulations of the various laws OFCCP enforces to the extent clarity permits, the definition changes proposed herein will appear in 41 CFR Part 60-1, when they are finally codified.

Section 2 of Executive Order 11914 required each Federal agency to issue rules, regulations and directives to implement section 504 consistent with the standards and procedures to be established by the Secretary of HEW. The rules, regulations and orders which HEW issued to implement section 504 could not be inconsistent with or duplicative of policies adopted by other Federal agencies relating to the handicapped, including those adopted in accordance with section 503.

HEW issued two sets of regulations under section 504. 45 CFR Part 85 sets forth the guidelines for Federal agency regulations, and 45 CFR Part 84 sets forth HEW's requirements with respect to its own programs of Federal financial assistance. The latter regulations are broader and more detailed than the guidelines for other Federal agencies.

In drafting its own regulations to implement section 504, which were proposed on January 4, 1980 (45 FR 1392), and published in final form on October 7, 1980, the Department of Labor generally followed HEW's guidelines and also incorporated substantial portions of HEW's regulations for its own programs when they were relevant to Department of Labor programs. However, there was some variance from the HEW guidelines and regulations based on the experiences of the handicapped community, employers and the public. Some parts of the existing section 503 and 402 regulations were incorporated in the 504 regulations, such as the requirement to review job qualifications and demonstrate that they are job related and consistent with business necessity. In the area of preemployment medical examinations, the Department of Labor section 504 regulations developed an approach which accomplishes the same objective as the HEW regulations while allowing more flexibility in the timing of the examination. That approach is adopted in these proposed amendments. The more detailed HEW definitions of handicapped individual and reasonable accommodation were included in the

504 regulations and are proposed to be adopted here.

One area in which the DOL regulations under section 504 departed from those under section 503 is the requirement in section 504 that every recipient must have an internal review procedure for handling complaints, and that complainants must utilize that procedure before filing with the Department of Labor. Published as Part VI of this *Federal Register* is a final rule amending the existing internal review procedures (41 CFR 60-741.25(b)) to permit a complainant to veto a referral of his or her complaint to the contractor's internal review procedure. This proposal does not affect that amendment. This distinction between the programs will not impose inconsistent requirements on contractors who are also covered under section 504, since compliance with the section 504 procedures by contractors would not constitute a violation of section 503.

With these proposed amendments to the section 503 regulations, the Department of Labor 503 and 504 regulations will not be inconsistent so that an employer which is both a government contractor and a recipient of Federal financial assistance from the Labor Department would not be subject to conflicting requirements with regards to employment.

The 504 regulations at 29 CFR 32.2(b), (45 FR 66709, Oct. 7, 1980), provide that government contractors who are also recipients and who are in compliance with section 503 shall be deemed in compliance with the employment provisions of section 504. The converse is not necessarily true, however. Section 504 prohibits discrimination against handicapped individuals, whereas section 503 goes beyond passive non-discrimination by mandating affirmative action to employ and advance in employment qualified handicapped individuals. Non-discrimination is just one element of an affirmative action effort.

In addition to amendments proposed to ensure uniformity in the handicapped and veterans enforcement programs, this proposal also deletes the existing obligation in the section 402 regulations for contractors to file quarterly reports of veterans hired with the appropriate local office of the state employment service. Accordingly, Federal contractors no longer need to submit or retain copies of these quarterly reports.

However, elimination of this reporting requirement does not affect the requirement that covered Federal contractors list suitable employment

openings with an appropriate local office of the state employment service.

#### Summary of Proposed Regulations

There are several proposed amendments to the definitions section. The definitions of "disabled veteran" and "veteran of the Vietnam era" are being revised pursuant to recent statutory amendments extending coverage to greater numbers of disabled and Vietnam era veterans. The proposal also amends the definition of "handicapped individual" to conform to the definition under section 504.

This proposed amendment would modify the definitions of "qualified handicapped individual" and "qualified disabled veteran" to add the phrase "essential functions of the job". This would clarify the duty to make reasonable accommodations for handicapped individuals and disabled veterans qualified to perform the primary objectives of a job, but not all of its peripheral duties. Although it is not intended to require employers to conduct a formal job analysis for each job, addition of this phrase obligates employers to give careful consideration to reassignment of specific duties which a handicapped person or disabled veteran cannot perform and making other appropriate accommodations with respect to job functions which cannot reasonably be reassigned.

In applying the definition of qualified handicapped individual, contractors should be aware that the standards used to determine whether an individual is capable of safely and adequately performing the job shall be applied equally to all applicants and employees.

A definition of "reasonable accommodation" has also been added.

The proposal would also amend the affirmative action contract clauses at 41 CFR 60-741.3(a) and 41 CFR 60-250.3 by delineating in greater detail the types of employment activities covered under the regulations.

The proposed amendment would also conform 41 CFR 60-741.5(c) (3) and 41 CFR 60-250.5(c) (3), which deal with pre-employment medical examinations, to the Department's 504 regulations. They would restrict pre-employment inquiries into the medical status of an applicant to that information which is necessary to determine whether the applicant is capable of performing the requirements of the job or jobs for which the individual is applying. Where a number of jobs requiring different skills are available, information could be obtained under this proposal for proper job placement. However, contractors may no longer inquire on application forms into information which is neither job-

related nor designed specifically for affirmative action purposes. Although pre-employment medical examinations may continue to be given if all applicants for the job are subject to them, the proposal would require that a medical examination follow a conditional decision to hire or be the last factor considered in the employment process.

The proposal also defines the role of the examining physician, which is to make an assessment of the employee's or applicant's functional abilities and limitations (e.g. no lifting over 30 pounds; 25 per cent reduction in peripheral vision) rather than to determine whether or not he or she should be hired or placed. The physician may advise and assist the placement officers, but actual decisions on suitability for jobs must be made by persons capable of evaluating physical or mental demands of particular jobs and matching applicants with appropriate jobs based upon those assessments. Because the pre-employment medical examination is a point in the screening process that is particularly susceptible to discrimination against the handicapped, the Department of Labor will scrutinize the practices of employers utilizing pre-employment medical examinations. In particular, the practices of employers which have not traditionally used such exams but institute them for the first time now will be closely examined to ensure that the requirements of these regulations are being carefully followed.

It is important to note that the purpose of conducting a medical examination under this proposal must be to determine an individual's current physical or mental ability, not to speculate about the long term possibility that the condition will progress or lead to inability to work. Thus, although an employer can consider disqualifying a person because his handicap creates a substantial risk of imminent injury, disqualification based on speculation about the risk of injury or speculation about inability to work at some imprecise time in the future is not permissible.

Although these amendments add no reporting requirements, and delete certain existing reporting requirements for veterans, they extend to three years the retention period for records regarding internal complaints. This consistent with the equivalent provision in the section 504 regulations, and will provide more adequate information to investigators regarding contractors' compliance practices.

An appendix is added to the regulations which gives examples of

several types of accommodation. This list is not all-inclusive, because accommodations arise in response to specific needs of particular employees or applicants, and cannot always be anticipated in advance. The entire purpose of accommodation involves matching individual needs with particular jobs at the point when they are needed. This appendix has a section not found in the appendix to the section 504 regulations dealing with architectural access. This section is added in these regulations because the nature of the 503 and 402 program differs from 504 in that they serve only employees and applicants of contractors, not program access for beneficiaries. Thus in section 503 and 402 architectural access is an element of the duty to provide reasonable accommodations rather than an independent obligation. We find this distinction necessary because, unlike section 504, 503 and 402 do not serve the general public. Therefore, they are designed to meet the specific needs of individuals at the time those needs arise. Since potential applicants or employees cannot be anticipated in advance, it would not be appropriate under section 503 and 402 to require costly renovations which might never be utilized. Therefore contractors must only renovate for access when an individual applies and is found qualified who needs architectural alterations. However, since employment offices and the employment process do serve the general public, they must be made accessible even in the absence of present handicapped employees or applicants. New construction and renovations and modifications of buildings must also meet appropriate design standards for access at the time of construction or alteration.

It has been determined that this document does not contain a major proposal requiring preparation of a regulatory analysis under Executive Order 12044 (43 FR 12661) or under the Department's guidelines implementing Executive Order 12044 published at 44 FR 5570 on January 26, 1979.

In consideration of the foregoing, it is proposed to amend Parts 60-1, 60-250 and 60-741 of Chapter 60 of Title 41, Code of Federal Regulations, as set forth below.

Signed at Washington, D.C., this 22nd day of December 1980.

Ray Marshall,  
Secretary.

## PART 60-1—OBLIGATIONS OF CONTRACTORS AND SUBCONTRACTORS

1. The definitions of "Disabled veteran", "Handicapped individual", "Qualified disabled veteran" "Qualified handicapped individual" and "Veteran of the Vietnam era" at § 60-1.3 are revised and a new definition of "Reasonable accommodation" is added to read as follows:

### § 60-1.3 Definitions.

\* \* \* \* \*

"Disabled veteran" means (a) a veteran who is entitled to compensation under laws administered by the Veterans' Administration, or (b) a person who was discharged or released from active duty because of a service-connected disability.

\* \* \* \* \*

"Handicapped individual" (a) "Handicapped individual" means any person who:

- (1) Has a physical or mental impairment which substantially limits one or more major life activities; or
- (2) Has a record of such an impairment; or
- (3) Is regarded as having such an impairment

(b) As used in the preceding paragraph of this section, the phrase:

- (1) "Physical or mental impairment" means
  - (i) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: Neurological; musculoskeletal; special sense organs; respiratory, including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin and endocrine;
  - (ii) Any mental or psychological disorder, such as mental retardation, organic brain syndrome, emotional or mental illness, and specific learning disabilities.
- (2) "substantially limits" means the degree that the impairment affects an individual's employability. A handicapped individual who is likely to experience difficulty in securing, retaining, or advancing in employment would be considered substantially limited.

(3) "Major life activities" means functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning, working, and receiving education or vocational training.

(4) "Has a record of such an impairment" means that the individual has a history of, or has been misclassified as having, a mental or physical impairment that substantially limits one or more major life activity.

(5) "Is regarded as having such an impairment" means that the individual (i) Has a physical or mental impairment that does not substantially limit major life activities but that is treated by a contractor as constituting such a limitation; (ii) Has a physical or mental impairment that substantially limits major life activities only as a result of the attitudes of others toward such impairment; or (iii) Has none of the impairments defined in paragraph (b)(1) of this section but is treated by a contractor as having an impairment.

\* \* \* \* \*

"Qualified disabled veteran" means a disabled veteran as defined in § 60-1.3 who is capable of performing the essential functions of the job or jobs for which he or she is being considered with reasonable accommodation to his or her disability.

"Qualified handicapped individual" means a handicapped individual as defined in § 60-1.3 who is capable of performing the essential functions of the job or jobs for which he or she is being considered with reasonable accommodation to his or her handicap.

"Reasonable accommodation" means the changes and modifications which can be made in the structure of a job or in the manner in which a job is performed unless it would impose an undue hardship on the conduct of the contractor's business. Reasonable accommodation may include:

- (a) Making the facilities used by handicapped employees, including common areas used by all employees such as hallways, restrooms, cafeterias and lounges, readily accessible to and usable by handicapped workers and
- (b) Job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, the provision of readers or interpreters, and other similar actions.

\* \* \* \* \*

"Veteran of the Vietnam era" means a person who (a) served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964 and May 7, 1975, and was discharged or released therefrom with other than a dishonorable discharge, or (b) was discharged or released from active duty for a service-connected

disability if any part of such active duty was performed between August 5, 1964 and May 7, 1975. However, no veteran may be considered to be a veteran of the Vietnam era under this paragraph after December 31, 1991.

(Sec. 503, Pub. L. 93-112, 87 Stat. 393 (20 U.S.C. 793), as amended by sec. 111, Pub. L. 93-516, 88 Stat. 1619 (29 U.S.C. 706) and sec. 112, Pub. L. 95-602, 92 Stat. 2984 (29 U.S.C. 790) and Executive Order 11758. Sec. 503(a), Pub. L. 92-540, 86 Stat. 1097 (38 U.S.C. 2012), as amended by sec. 402, Pub. L. 93-508, 88 Stat. 1593 (38 U.S.C. 2012) and sec. 508 and 509, Pub. L. 96-466, 94 Stat. 2171 (38 U.S.C. 2012))

#### **PART 60-250—AFFIRMATIVE ACTION OBLIGATIONS OF CONTRACTORS AND SUBCONTRACTORS FOR DISABLED VETERANS AND VETERANS OF THE VIETNAM ERA**

2. The authority citation for 41 CFR Part 60-250 is revised to read as follows:

Authority: Sec. 503(a), Pub. L. 92-540, 86 Stat. 1097 (38 U.S.C. 2012), as amended by sec. 508 and 509, Pub. L. 96-466, 94 Stat. 2171 (38 U.S.C. 2012).

3. Section 60-250.1 is revised to read as follows:

##### **§ 60-250.1 Purpose and application.**

The purpose of the regulations in this part is to assure compliance with section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974, which requires government contractors to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era. The regulations in this part apply to all government contracts, including Federal deposit or share insurance, for the furnishing of supplies and services or for the use of personal property (including construction) in the amount of \$10,000 or more. Contractors in compliance with this part which are also recipients of Federal financial assistance from the Department of Labor will be deemed in compliance with the employment provisions of the Department of Labor 504 regulations (see 29 CFR 32.2(b)).

4. Section 60-250.3 is revised to read as follows:

##### **§ 60-250.3 Affirmative action clause.**

Each agency and each contractor shall include the following affirmative action clause in each of its covered Government contracts (and modifications, renewals, or extensions thereof if not included in the original contract):

##### **Affirmative Action for Disabled Veterans and Veterans of the Vietnam Era**

(a) The contractor will not discriminate against any employee or applicant for

employment because he or she is a disabled veteran or veteran of the Vietnam era in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified disabled veterans and veterans of the Vietnam era without discrimination based upon their disability or veterans status in all employment practices such as the following:

(1) Recruitment, advertising and the processing of applications for employment;

(2) Hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff and rehiring;

(3) Rates of pay or any other form of compensation and changes in compensation;

(4) Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;

(5) Leaves of absence, sick leave, or any other leave;

(6) Fringe benefits available by virtue of employment, whether or not administered by the contractor;

(7) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training;

(8) Employer-sponsored activities including social or recreational programs; and

(9) Any other term, condition, or privilege of employment.

(b) The contractor agrees that all suitable employment openings of the contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occurring at an establishment of the contractor other than the one wherein the contract is being performed, but excluding those of independently operated corporate affiliates, shall be listed at an appropriate local office of the state employment service system wherein the opening occurs.

(c) Listings of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruiting source or effort and shall involve the normal obligations which attach to the placing of a bona fide job order, including the acceptance of referrals of veterans and non-veterans. This listing of employment openings does not require the hiring of any particular job applicant or hiring from any particular group of job applicants, and nothing herein is intended to relieve the contractor from any requirements in Executive Orders or regulations regarding nondiscrimination in employment.

(d) Documentation, including personnel records respecting job openings, recruitment and placement shall be made available.

(e) Whenever the contractor becomes contractually bound to the listing provision of this clause, it shall advise the employment service system in each state where it has establishments of the name and location of each hiring location in the state. As long as the contractor is contractually bound to these

provisions and has so advised the state system, there is no need to advise the state system of subsequent contracts. The contractor may advise the state system when it is no longer bound by this contract clause.

(f) This clause does not apply to the listing of employment openings which occur and are filled outside of the 50 states, the District of Columbia, Puerto Rico, Guam and the Virgin Islands.

(g) The provisions of paragraphs (b), (c), (d), and (e) of this clause do not apply to openings which the contractor proposes to fill from within its own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once an employer decides to consider applicants outside of its own organization or employer-union arrangement for that opening.

(h) As used in this clause: (1) "All suitable employment openings" includes, but is not limited to, openings which occur in the following job categories: Production and non-production; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative, and professional openings as are compensated on a salary basis of less than \$25,000 per year. This term includes full-time employment, temporary employment of more than 3 days' duration, and part-time employment. It does not include openings which the contractor proposes to fill from within its own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement nor openings in an educational institution which are restricted to students of that institution. Under the most compelling circumstances an employment opening may not be suitable for listing, including such situations where the needs of the Government cannot reasonably be otherwise supplied, where listing would be contrary to national security, or where the requirement of listing would otherwise not be in the best interest of the Government.

(2) "Appropriate office of the state employment service system" means the local office of the Federal-State national system of public employment offices with assigned responsibility for serving the area where the employment opening is to be filled, including the District of Columbia, Guam, Puerto Rico, and the Virgin Islands.

(3) "Openings which the contractor proposes to fill from within its own organization" means employment openings for which no consideration will be given to persons outside the contractor's organization (including any affiliates, subsidiaries, and the parent companies) and includes any openings which the contractor proposes to fill from regularly established "recall" lists.

(4) "Openings which the contractor proposes to fill pursuant to a customary and traditional employer-union hiring arrangement" means employment openings which the contractor proposes to fill from union halls, which is part of the customary and traditional hiring relationship which exists between the contractor and representatives of its employees.

(i) The contractor agrees to comply with the rules, regulations, and relevant orders of

the Secretary of Labor issued pursuant to the Act.

(j) In the event of the contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(k) The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notice shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era and the rights of applicants and employees.

(1) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement of other contractual understanding, that the contractor is bound by the terms of the Vietnam Era Veterans Readjustment Assistance Act, and is committed to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

(m) The contractor will include the provisions of this clause in every subcontract or purchase order of \$10,000 or more unless exempted by rules, regulations, or orders of the Secretary issued pursuant to the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of the Federal Contract Compliance Programs may direct to enforce such provisions, including action for non-compliance.

5. Paragraphs (a), (c) and (d) of § 60-250.5 are revised to read as follows:

**§ 60-250.5 Affirmative action policy, practices and procedures.**

(a) *General requirements.* Under the affirmative action obligation imposed by section 402 of the Act, contractors are required to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era at all levels of employment, including the executive level. Such action shall apply to all employment practices including, but not limited to, those practices specified in paragraph (a) of the affirmative action clause set forth in §60-250.3.

(c) *Job qualifications.* (1) The contractor shall provide in its affirmative action program, and shall adhere to, a schedule for the review of the appropriateness of all job qualifications to ensure that, to the extent job qualifications tend to exclude qualified disabled veterans because of their disability, they are related to the performance of the job and are

consistent with business necessity and safe performance.

(2) Whenever a contractor applies job qualifications in the selection of applicants or employees for employment or other change in employment status such as promotion, demotion or training, which would tend to exclude qualified disabled veterans because of their disability, the qualifications shall be related to the specific job or jobs for which the individual is being considered and shall be consistent with business necessity and safe performance. The contractor shall have the burden to demonstrate that it has complied with the requirements of this paragraph.

(3) Except as provided in this section, a contractor may not conduct pre-employment medical examinations or make pre-employment inquiry of an applicant as to whether the applicant is a disabled veteran or as to the nature or the severity of a disability. A contractor may, however, make pre-employment inquiry into an applicant's ability to perform job-related functions.

(4) When a contractor is taking remedial action to correct the effects of past discrimination, when a contractor is taking voluntary action to overcome the effects of conditions that resulted in limited employment opportunities for qualified disabled veterans, or when a contractor is taking affirmative action under section 402 and the regulations in this part, the contractor may invite applicants for employment to indicate whether and to what extent they are disabled veterans if:

(i) The contractor states clearly on a written questionnaire used for this purpose or makes clear orally, if no written questionnaire is used, that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts.

(ii) The contractor states clearly that the information is being requested on a voluntary basis, that it will be kept confidential as provided in paragraph (c)(6) of this section, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this part.

(5) A contractor who routinely requires medical examinations as part of the employment selection process must demonstrate that each of the requirements of this subsection are met:

(i) The medical examination shall be performed by a physician qualified to make functional assessments of individuals in a form which will express residual capacity for work or training. Such an assessment does not require clinical determinations of disease or

disability, but shall provide selecting or referring officials sufficient information regarding any functional limitations relevant to proper job placement or referral to appropriate training programs. Factors which may be assessed may include, for example, use of limbs and extremities, mobility and posture, endurance and energy expenditure, ability to withstand various working conditions and environments, use of senses and mental capacity.

(ii) The results of the medical examination shall be specific and objective so as to be susceptible to review by independent medical evaluators and shall be transmitted to the applicant or employee at the same time as the employing official;

(iii) The results of the medical examination shall not be used to screen out qualified applicants and employees but to determine proper placement and reasonable accommodation. The employing official using physical or mental information obtained pursuant to this section should be familiar with physical or mental activities involved in performing the job, and the working conditions and environment in which it is carried out. If the applicant is being considered for a variety of jobs having different requirements or skills, the employing official should make a functional assessment of the physical or mental demands of the jobs in order to match the applicant with the most suitable vacancy;

(iv) All potential employees for the job shall be subject to the medical examination;

(v) The procedures for using medical examinations or the medical information shall be constructed in such a manner that:

(A) A conditional job offer was made or the individual was conditionally placed in a job pool or conditionally placed on an eligibility list prior to the medical examination being performed; or

(B) The results of the medical examination were considered by the employing official only after a conditional decision to make a job offer or the individual had been placed conditionally in a job pool or conditionally placed on an eligibility list; that is, the medical results were the last factor evaluated by the employing official before a final decision to make an offer of employment was made.

(vi) Unless a conditional job offer is made prior to the medical examination, all potential employees for the job shall be informed at the time of the medical examination that:

(A) The results of the medical examination are the last factor

evaluated by the employing official before a final decision to make an offer of employment is made, and

(B) The medical examination results shall be transmitted to the employing official and to the applicant only after a conditional decision to make a job offer has been made.

(6) Information obtained in accordance with this section as to the medical condition or history of the applicant shall be collected and maintained on separate forms that shall be accorded confidentiality as medical records, except that:

(i) Employing officials may obtain the information after making a conditional decision to make a job offer to the applicant or the applicant was placed conditionally in a job pool or placed conditionally on an eligibility list.

(ii) Supervisors and managers may be informed regarding restrictions on the work or duties of disabled veterans and regarding necessary accommodations;

(iii) First aid and safety personnel may be informed, where appropriate, if the condition might require emergency care or treatment; and

(iv) Government officials investigating compliance with the Act shall be provided information upon request.

(d) *Reasonable accommodation.* (1) A contractor shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified disabled veteran unless the contractor demonstrates that the accommodation would impose an undue hardship on the conduct of the contractor's business.

(2) Reasonable accommodation may include:

(i) Making the facilities used by employees readily accessible to and usable by disabled veterans, and,

(ii) Job restructuring, part-time or modified work schedules, acquisition or modification of equipment or devices, the provision of readers or interpreters, and other similar actions.

(3) In determining pursuant to paragraph (d)(1) of this subsection whether an accommodation would impose an undue hardship on the conduct of a contractor's business, factors which may be considered include:

(i) The overall size of the contractor's operation with respect to the number of employees, number and type of facilities, and financial resources;

(ii) The type of the contractor's operation, including the composition and structure of the contractor's workforce; and

(iii) The nature and cost of the accommodation needed.

(4) A contractor may not deny any employment opportunity to a qualified handicapped employee or applicant if the basis for the denial is the need to make reasonable accommodation to the physical or mental limitations of the employee or applicant.

Note.—For further explanation and examples of reasonable accommodations, see Appendix C.

6-7. Section 60-250.31(a) is revised to read as follows:

#### § 60-250.31 Recordkeeping.

(a) Each contractor shall maintain for a period not less than three years records regarding complaints and actions taken thereunder, and such employment or other records as required by the Director or by this part and shall furnish such information in the form required by the Director or as the Director deems necessary for the administration of the Act and regulations in this part.

8. A new Appendix C is added as follows:

#### Appendix C

Accommodations may take many forms based on the type of disability and the needs of the individual. In developing appropriate accommodations, the individual should be consulted as to particular needs.

The following is a list of possible types of accommodations provided for guidance and technical assistance.

#### *Reasonable Accommodations for Employees*

(a) Job restructuring means the procedure which includes:

(1) Identifying the separate tasks that comprise a job or group of jobs;

(2) Developing new position descriptions which retain some of the tasks of the original job; and

(3) Developing a career ladder which builds upward from the new positions which contain the lesser skilled tasks to regular jobs. A restructured job can be clearly different from the original one in terms of skills, knowledge, abilities, and work experience needed to perform the work. Job restructuring is intended to maximize the abilities of the particular handicapped person and is not intended to permit a contractor to under-employ or job-stereotype that person. A restructured job, for example, could be one in which the more highly skilled but physically less demanding duties are retained, e.g. operating controls and switches in a steel mill, and less skilled, physically taxing duties, e.g. lifting, pulling, are reassigned to non-handicapped employees.

(b) Modify job schedules, for example, by allowing for a flexible schedule a few days a week so that an employee may undergo medical treatment or therapy. Work-time may also be altered to permit disabled veterans to travel to and from work during non-rush hours. For employees who become

unable to perform the duties of their positions because of a physical or mental condition, contractors may be required to grant liberal time off or leave without pay when paid sick leave is exhausted and when disability is of a nature that is likely to respond to treatment or hospitalization. See, e.g. 339 Federal Personnel Manual-1-3(b)(1).

(c) Relocate particular offices or jobs so that they are in facilities accessible to and usable by disabled veterans. For example, an employee with a respiratory ailment can be placed in a "nonsmoking" and/or well-ventilated office.

(e) Acquire or modify equipment or devices. For hearing-impaired employees, this may include placing amplifiers on telephone receivers, making telephone equipment compatible with hearing aids, providing flashing lights to supplement telephone rings, or installing telecommunications devices (TDD'S or TTY'S). For blind employees, this may include providing tape recorders or dictating machines for those who cannot type. For wheelchair-users, this may include raising on blocks a desk that is otherwise too low for the employee, rather than purchasing a specially-made desk. A contractor is not obligated to acquire or modify equipment that enables an employee to perform a particular job until after an employee with a need for these modifications is hired.

(f) Provide readers, interpreters, and similar assistance as needed for deaf, blind and other handicapped employees. In most instances, this would not require a full-time assistant.

(g) Decrease reliance solely on one form of communication. For example, for deaf employees this may include supplementing job orientation sessions with written manuals and other visual materials. If appropriate, a visual warning system should be installed. It may also include providing flashing lights to supplement auditory signals such as sirens and alarm bells. For blind employees, this may include making some communications available in braille, enlarged print or cassette recordings. A contractor should tailor the accommodations listed above to the needs of the individual employees who have been hired for a particular job.

(h) Provide human relations-sensitivity training on issues pertaining to discrimination against disabled veterans to all employees.

(i) Conduct ongoing training and planning sessions with supervisors, managers, personnel, technical experts and disabled veterans advocates to implement and evaluate methods of reasonable accommodation.

#### *Accommodation for Applicants*

(a) Announce job vacancies in a form readily understandable by mentally disabled veterans and by persons with impaired vision or hearing, for example, by making the announcement available in braille or on cassette tapes. Contractors shall undertake to explain, as appropriate, job announcements to mentally disabled veterans. For example, this might entail notifying known mentally disabled veterans of openings for positions that they might be able to perform and taking specific steps to explain clearly the nature of the job and its benefits to that individual.

(b) Provide readers, interpreters, and other similar assistance during the application, testing, and interview process.

(c) Appropriately adjust or modify examinations so that the test results accurately reflect the applicant's skills, aptitudes or whatever other factor that test purports to measure, rather than reflecting the applicant's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure). This may require the extension of traditional time deadlines or allowing, for example, a blind person to answer an examination orally.

(d) If necessary, waive traditional tests and permit the applicant to demonstrate his or her skills through alternate techniques and utilization of adapted tools, aids, and devices.

#### Architectural Access

(a) Reasonable accommodation includes the duty to make the employment office, worksite and common areas accessible to handicapped applicants and employees. To the extent possible, employment offices, testing areas, waiting rooms and rest rooms serving the employment office should be accessible. A contractor whose only employment office is inaccessible and cannot reasonably be made accessible must develop an alternative method or sites for obtaining applications, conducting interviews and, where applicable, giving tests to disabled veteran applicants.

(b) When a disabled veteran qualifies for employment, the contractor must make the worksite and other common areas which the employee will use accessible unless such alterations would be unreasonable under the standards of these regulations. Common areas may include hallways, rest rooms, cafeterias, lounges, auditoriums, libraries, parking lots, credit-unions and other facilities generally have an affirmative action duty to ensure that any facilities constructed, acquired by purchase or lease or renovated after the effective date of its affirmative action program must be barrier-free, unless the contractor can establish that no mobility-impaired veteran could work in the affected worksite for reasons of business necessity. However, the business necessity reason which may relieve, for example, a coal mine, shipyard, logging camp or similar facility from the duty to be barrier free will not apply to the contractor's office jobs or other parts of the worksite where mobility-impaired workers may be qualified for jobs.

(d) For purposes of this appendix, newly built, acquired or renovated facilities will be deemed in compliance if they meet the standard for physical accessibility prescribed by the General Services Administration under the Architectural Barriers Act at 41 CFR 101-19.6. For specific employees, the contractor shall make whatever reasonable architectural modifications necessary which will enable the individual disabled veteran to work.

### PART 60-741—AFFIRMATIVE ACTION OBLIGATIONS OF CONTRACTORS AND SUBCONTRACTORS FOR HANDICAPPED WORKERS

9. The authority citation for 41 CFR Part 60-741 is revised to read as follows:

Authority: Sec. 503, Pub. L. 93-112, 87 Stat. 393 (20 U.S.C. 793), as amended by sec. 111, Pub. L. 93-516, 88 Stat. 1619 (29 U.S.C. 706) and Sec. 122, Pub. L. 95-602, 92 Stat. 2984 (29 U.S.C. 790) and Executive Order 11758.

10. Section 60-741.1 is revised to read as follows:

#### § 60-741.1 Purpose and application.

The purpose of the regulations in this part is to assure compliance with section 503 of the Rehabilitation Act of 1973, which requires government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals. The regulations in this part apply to all government contracts and subcontractors, including Federal deposit or share insurance, for the furnishing of supplies and services or for the use of personal property (including construction) in excess of \$2500. Contractors in compliance with this part which are also recipients of Federal financial assistance from the Department of Labor will be deemed in compliance with the employment provisions of the Department of Labor 504 regulations (see 29 CFR 32.2(b)).

11. Paragraph (a) of the affirmative action clause contained in § 60-741.3 is revised to read as follows:

#### § 60-741.3 Affirmative action clause.

\* \* \* \* \*

#### Affirmative Action for Handicapped Workers

(a) The contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified handicapped individuals without discrimination based upon their physical or mental handicap in all employment practices such as the following:

- (1) Recruitment, advertising and the processing of applications for employment;
- (2) Hiring, upgrading, promotion, award of tenure, demotion, transfer, layoff, termination, right of return from layoff and rehiring;
- (3) Rates of pay or any other form of compensation and changes in compensation;
- (4) Job assignments, job classifications, organizational structures, position descriptions, lines of progression, and seniority lists;
- (5) Leaves of absence, sick leave, or any other leave;

(6) Fringe benefits available by virtue of employment, whether or not administered by the contractor;

(7) Selection and financial support for training, including apprenticeship, professional meetings, conferences, and other related activities, and selection for leaves of absence to pursue training;

(8) Employer-sponsored activities including social or recreational programs; and

(9) Any other term, condition, or privilege of employment.

\* \* \* \* \*

12. Paragraphs (a), (b), (c) and (d) of § 60-741.5 are revised to read as follows:

#### § 60-741.5 Affirmative action policy, practices and procedures.

(a) *General requirements.* Under the affirmative action obligation imposed by section 503 of the Act, contractors are required to take affirmative action to employ and advance in employment qualified handicapped individuals at all levels of employment, including the executive level. Such action shall apply to all employment practices including but not limited to those practices specified in paragraph (a) of the affirmative action clause set forth in § 60-741.3.

(b) *Proper consideration of qualifications.* Contractors shall review their personnel processes to determine whether their present procedures assure careful, thorough and systematic consideration of the job qualifications of known handicapped applicants and employees for job vacancies filled either by hiring or promotion, and for all training opportunities offered or available. To the extent that it is necessary to modify their personnel procedures, contractors shall include the development of new procedures for this purpose in their affirmative action program required under this part. These procedures must be designed so as to facilitate a review of the implementation of this requirement by the contractor or the government. (Appendix B attached is an example of an appropriate set of procedures. The procedures in Appendix B are not required and contractors may develop other procedures which are appropriate to their circumstances.)

(c) *Job qualifications.* (1) The contractor shall provide in its affirmative action program, and shall adhere to, a schedule for the review of the appropriateness of all job qualification requirements to ensure that, to the extent job qualifications tend to exclude handicapped individuals because of their handicap they are related to the performance of the job and are consistent with business necessity and safe performance.

(2) Whenever a contractor applies job qualifications in the selection of applicants or employees for employment or other change in employment status such as promotion, demotion or training, which would tend to exclude handicapped individuals because of their handicap, the qualifications shall be related to the specific job or jobs for which the individual is being considered and shall be consistent with business necessity and safe performance. The contractor shall have the burden to demonstrate that it has complied with the requirements of this paragraph.

(3) Except as provided in this section, a contractor may not conduct pre-employment medical examinations or make pre-employment inquiry of an applicant as to whether the applicant is a handicapped person or as to the nature or the severity of a handicap. A contractor may, however, make pre-employment inquiry into an applicant's ability to perform job-related functions.

(4) When a contractor is taking remedial action to correct the effects of past discrimination, when a contractor is taking voluntary action to overcome the effects of conditions that resulted in limited employment opportunities for qualified handicapped individuals, or when a contractor is taking affirmative action under section 503 and the regulations in this part, the contractor may invite employees and applicants for employment to indicate whether and to what extent they are handicapped if:

(i) The contractor states clearly on any written questionnaire used for this purpose or makes clear orally, if no written questionnaire is used, that the information requested is intended for use solely in connection with its remedial action obligations or its voluntary or affirmative action efforts;

(ii) The contractor states clearly that the information is being requested on a voluntary basis, that it will be kept confidential as provided in paragraph (c)(6) of section, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with this part.

(5) A contractor who routinely requires medical examinations as part of the employment selection process must demonstrate that each of the requirements of this subsection are met:

(i) The medical examination shall be performed by a physician qualified to make functional assessments of individuals in a form which will express residual capacity for work or training. Such an assessment does not require clinical determinations of disease or disability, but shall provide selecting or referring officials sufficient information

regarding any functional limitations relevant to proper job placement. Factors which may be assessed may include, for example, use of limbs and extremities, mobility and posture, endurance and energy expenditure, ability to withstand various working conditions and environments, use of senses and mental capacity.

(ii) The results of the medical examination shall be specific and objective so as to be susceptible to review by independent medical evaluators and shall be transmitted to the applicant or employee at the same time as the employing official;

(iii) The results of the medical examination shall not be used to screen out qualified applicants and employees but to determine proper placement and reasonable accommodation. The employing official using physical or mental information obtained pursuant to this section should be familiar with physical or mental activities involved in performing the job, and the working conditions and environment in which it is carried out. If applicant is being considered for a variety of jobs having different requirements or skills, the employing official should make a functional assessment of the physical or mental demands of the jobs in order to match the applicant with the most suitable vacancy;

(iv) All potential employees for the job shall be subjected to the medical examination;

(v) The procedures for using medical examinations or the medical information shall be constructed in such a manner that:

(A) A conditional job offer was made or the individual was conditionally placed in a job pool or conditionally placed on an eligibility list prior to the medical examination being performed; or

(B) The results of the medical examination were considered by the employing official only after a conditional decision to make job offer or the individual had been placed conditionally in a job pool or conditionally placed on an eligibility list; that is, the medical results were the last factor evaluated by the employing official before a final decision to make an offer of employment was made.

(vi) Unless a conditional job offer is made prior to the medical examination, all potential employees for the job shall be informed at the time of the medical examination that:

(A) The results of the medical examination are the last factor evaluated by the employing official before a final decision to make an offer of employment is made, and

(B) The medical examination results shall be transmitted to the employing official and to the applicant only after a conditional decision to make a job offer has been made.

(6) Information obtained in accordance with this section as to the medical condition or history of the applicant shall be collected and maintained on separate forms that shall be accorded confidentiality as medical records, except that:

(i) Employing officials may obtain the information after making a conditional decision to make a job offer to the applicant or the applicant was placed conditionally in a job pool or placed conditionally on an eligibility list.

(ii) Supervisors and managers may be informed regarding restrictions on the work or duties of qualified handicapped persons and regarding necessary accommodations;

(iii) First aid and safety personnel may be informed, where appropriate, if the condition might require emergency treatment; and

(iv) Government officials investigating compliance with the Act shall be provided information upon request.

(d) *Reasonable accommodation.* (1) A contractor shall make reasonable accommodation to the known physical or mental limitations of an otherwise qualified handicapped applicant or employee unless the contractor demonstrates that the accommodation would impose an undue hardship on the conduct of the contractor's business.

(2) In determining pursuant to paragraph (d)(1) of this section whether an accommodation would impose an undue hardship on the conduct of a contractor's business, factors which may be considered include:

(i) The overall size of the contractor's operation with respect to the number of employees, number and type of facilities, and financial resources;

(ii) The type of the contractor's operation, including the composition and structure of the contractor's workforce; and

(iii) The nature and cost of the accommodation needed.

(3) A contractor may not deny any employment opportunity to a qualified handicapped employee or applicant if the basis for the denial is the need to make reasonable accommodation to the physical or mental limitations of the employee or applicant.

*Note.*—For further explanation and examples of accommodations, see Appendix C.

\* \* \* \* \*  
13. Section 60-741.30(a) is revised to read as follows:

**§ 60-741.30 Recordkeeping.**

(a) Each contractor shall maintain for a period not less than three years records regarding complaints and actions taken thereunder and such employment or other records as required by the Director or agency or by this part and shall furnish such information in the form required by the Director or agency or as the Director deems necessary for the administration of the Act and regulations issued under this part.

\* \* \* \* \*

**Appendix A [Removed]; Appendices B and C [Redesignated as Appendices A and B]**

14. Appendix A is removed and Appendices B and C are designated as A and B and a new Appendix C is added as follows:

**Appendix C**

Accommodations may take many forms based on the type of handicap and the needs of the individual. In developing appropriate accommodations, the individual should be consulted as to particular needs.

The following is a list of possible types of accommodations provided for guidance and technical assistance.

*Accommodations for Employees*

(a) Job restructuring means the procedure which includes:

- (1) Identifying the separate tasks that comprise a job or group of jobs;
- (2) Developing new position descriptions which retain some of the tasks of the original job; and
- (3) Developing a career ladder which builds upward from the new positions which contain the lesser skilled tasks to regular jobs. A restructured job can be clearly different from the original one in terms of skills, knowledge, abilities, and work experience needed to perform the work. Job restructuring is intended to maximize the abilities of the particular handicapped person and is not intended to permit a contractor to under-employ or job-stereotype that person. A restructured job, for example, could be one in which the more highly skilled but physically less demanding duties are retained, e.g. operating controls and switches in a steel mill, and less skilled, physically taxing duties, e.g. lifting, pulling, are reassigned to non-handicapped employees.

(b) Modify job schedules, for example, by allowing for a flexible schedule a few days a week so that an employee may undergo medical treatment or therapy. Worktimes may also be altered to permit handicapped individuals to travel to and from work during non-rush hours. For employees who become unable to perform the duties of their positions because of a physical or mental condition, contractors may be required to grant liberal time off or leave without pay when paid sick leave is exhausted and when the disability is of a nature that is likely to respond to treatment or hospitalization. See, e.g. 339 Federal Personnel Manual-1-3(b)(1).

(c) Modify work procedures and training time.

(d) Relocate particular offices or jobs so that they are in facilities accessible to and usable by handicapped persons. For example, an employee with a respiratory ailment can be placed in a "nonsmoking" and/or well-ventilated office.

(e) Acquire or modify equipment or devices. For hearing-impaired employees, this may include placing amplifiers on telephone receivers, making telephone equipment compatible with hearing aids, providing flashing lights to supplement telephone rings or installing telecommunications devices (TTD's or TTY's). For blind employees, this may include providing tape recorders or dictating machines for those who cannot type. For wheelchair-users, this may include raising on blocks a desk that is otherwise too low for the employee, rather than purchasing a specially-made desk. A contractor is not obligated to acquire or modify equipment that enables an employee to perform a particular job until after an employee with a need for these modifications is hired.

(f) Provide readers, interpreters, and similar assistance as needed for deaf, blind and other handicapped employees. In most instances, this would not require a full-time assistant.

(g) Decrease reliance solely on one form of communication. For example, for deaf employees this may include supplementing job orientation sessions with written manuals and other visual materials. If appropriate, a visual warning system should be installed. It may also include providing flashing lights to supplement auditory signals such as sirens and alarm bells. For blind employees, this may include making some communications available in braille, enlarged print or cassette recordings. A contractor should tailor the accommodations listed above to the needs of the individual employees who have been hired for a particular job.

*Accommodation for Applicants*

(a) Announce job vacancies in a form readily understandable by mentally handicapped persons and by persons with impaired vision or hearing, for example, by making the announcement available in braille or on cassette tapes. Contractors shall undertake to explain, as appropriate, job announcements to mentally disabled veterans. For example, this might entail notifying known mentally handicapped employees of openings for positions that they might be able to perform and taking specific steps to explain clearly the nature of the job and its benefits to that individual.

(b) Provide readers, interpreters, and other similar assistance during the application, testing and interview process.

(c) Appropriately adjust or modify examinations so that the test results accurately reflect the applicant's skills, aptitudes or whatever other factor that test purports to measure, rather than reflecting the applicant's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure). This may require the extension of traditional time deadlines or allowing, for example, a blind person to answer an examination orally.

(d) If necessary, waive traditional tests and permit the applicant to demonstrate his or her

skills through alternate techniques and utilization of adapted tools, aids, and devices.

*Architectural Access*

(a) Reasonable accommodation includes the duty to make the employment office, worksite and common areas accessible to handicapped applicants and employees. To the extent possible, employment offices, testing areas, waiting rooms and rest rooms serving the employment office should be accessible. A contractor whose only employment office is inaccessible and cannot reasonably be made accessible must develop an alternative method or sites for obtaining applications, conducting interviews and, where applicable, giving tests to handicapped applicants.

(b) When a handicapped individual qualifies for employment, the contractor must make the worksite and other common areas which the employee will use accessible unless such alterations would be unreasonable under the standards of these regulations. Common areas may include hallways, rest rooms, cafeterias, lounges, auditoriums, libraries, parking lots, credit-unions and other facilities generally available for employee use.

(c) If there are no present handicapped employees or applicants, a contractor is not required to retrofit facilities in the absence of need. However, contractors have an affirmative action duty to ensure that any facilities constructed, acquired by purchase or lease or renovated after the effective date of its affirmative action program must be barrier-free, unless the contractor can establish that no mobility-impaired individual could work in the affected worksite for reasons of business necessity. However, the business necessity reason which may relieve, for example, a coalmine, shipyard, logging camp or similar facility from the duty to be barrier free will not apply to the contractor's office jobs or other parts of the worksite where mobility-impaired workers may be qualified for jobs.

(d) For purposes of this appendix, newly built, acquired or renovated facilities will be deemed in compliance if they meet the standard for physical accessibility prescribed by the General Services Administration under the Architectural Barriers Act at 41 CFR 101-19.6. For specific employees, the contractor shall make whatever reasonable architectural modifications necessary which will enable the handicapped individual to work.

## Department of Labor

Office of Federal Contract Compliance  
Programs

---

Government Contractors; Affirmative  
Action Requirements; Final Rule

## DEPARTMENT OF LABOR

## Office of Federal Contract Compliance Programs

41 CFR Parts 60-1, 60-2, 60-4, 60-20, 60-30, 60-50, 60-60, 60-250, and 60-741

## Government Contractors; Affirmative Action Requirements

AGENCY: Office of Federal Contract Compliance Programs, Labor.

ACTION: Final rule.

**SUMMARY:** The regulations published today amend a limited number of the regulatory provisions under Executive Order 11246, as amended, and under sections 402 and 503 of the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended, and the Rehabilitation Act of 1973, as amended, respectively. This final rule also consolidates and integrates certain portions of the regulations pertaining to sections 402 and 503 into 41 CFR Part 60-1 which, heretofore, has been devoted solely to regulations implementing Executive Order 11246.

**EFFECTIVE DATE:** These regulations, except new reporting and recordkeeping requirements established by this final rule (see discussion following item 49 below), shall take effect January 29, 1981.

**FOR FURTHER INFORMATION CONTACT:** James W. Cisco, Acting Director, Division of Program Policy, Office of Federal Contract Compliance Programs, Room C-3324, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210, Telephone (202) 523-9426.

**SUPPLEMENTARY INFORMATION:** On December 28, 1979, the Office of Federal Contract Compliance Programs (OFCCP), U.S. Department of Labor, published in the *Federal Register* (44 FR 77006) a proposed rule to amend, consolidate, and integrate certain regulatory provisions pertaining to the three programs administered by OFCCP: Executive Order 11246, as amended; section 402 of the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended; and section 503 of the Rehabilitation Act of 1973, as amended. The December 28 publication stated that comments would be received until February 26, 1980. However, the comment deadline was extended until March 24, 1980, by a notice published in the *Federal Register* on February 22, 1980 (45 FR 11856), which also proposed that a new paragraph (g) be added to proposed § 60-1.29, originally published

on December 28, 1979. The December 28, 1979, proposal also stated that nonsubstantive editorial changes would be made on final rulemaking, and that consideration would be given to republishing 41 CFR Chapter 60 in its entirety so that users of the OFCCP regulations would have all parts intact until they could be codified in the Code of Federal Regulations. Some editorial changes have been made in the final rule published today. No changes have been made in Part 60-3, the Uniform Guidelines on Employee Selection Procedures (1978), and Part 60-3 is not being republished today. Three clarifying amendments to Part 60-4, pertaining to construction contractors, were published on October 3, 1980, (45 FR 65976), and became effective on November 3, 1980. Part 60-4, including the November 3, 1980, amendments thereto, is republished in its entirety today so that users of Part 60-4 will have a single document which contains all the construction regulations under Executive Order 11246 until they have been published in codified form. Part 60-40, pertaining to disclosure of documents, presently is being considered for revision as a result of the Supreme Court's opinion in *Chrysler Corporation v. Brown*, 441 U.S. 281, and is not being republished today. Part 60-60 is being deleted from the regulations today. However, some parts of 60-60 have been transferred to Parts 60-1 and 60-2. See discussion of Part 60-60 below. Except as indicated above, 41 CFR Chapter 60 is being republished today. Those parts of Chapter 60 which are not being republished today may be found in the latest edition of 41 CFR Chapter 60. It is not expected that the regulations published today will be codified into 41 CFR Chapter 60 until July 1981, and that revised Title should be available to the public early in 1982.

Since consolidation of the Executive Order program into the Department of Labor, it has been OFCCP's practice to review simultaneously a contractor's compliance with each of the three laws administered by OFCCP. To reflect this unified approach of administering and enforcing the three laws, an effort has been made to consolidate and integrate the regulations of each of the three programs to the extent clarity permits. The regulations published today, therefore, incorporate into Part 60-1 important elements which are common to each of the three laws. Some of these provisions previously appeared in Parts 60-250 (veterans) and 60-741 (handicap). Some rearrangement of specific sections also has been made. In addition, published as the Part V of this *Federal*

*Register* are proposed amendments to Parts 60-250 and 60-741 which are designed to conform these two parts to the Department of Labor's regulations implementing section 504 of the Rehabilitation Act of 1973. The latter regulations were published on October 7, 1980 (45 FR 66706), and the preamble to those regulations stated that such conforming amendments would be proposed.

A total of 602 comments were received on the December 28, 1979, and February 22, 1980, proposals. Comments also were received after the comment period closed. This latter group of comments were reviewed, analyzed and considered but are in addition to the 602 comments.

## Section-by-Section Analysis

1. *Section 60-1.1.* This section describes the purpose and application of the regulations contained in Part 60-1. Presently, Part 60-1 applies only to Executive Order 11246. However, the proposal would amend Part 60-1 by transferring some of the regulations in Part 60-250 (pertaining to section 402 of the Vietnam Era Veterans' Readjustment Assistance Act) and in Part 60-741 (pertaining to section 503 of the Rehabilitation Act of 1973) to Part 60-1. Also, the proposal would amend Part 60-1 to make certain procedures (e.g., show cause notice and preaward reviews), heretofore applicable only to the Executive Order, applicable to sections 402 and 503. In view of these proposed amendments, it was necessary to expand the scope of § 60-1.1 to reflect that Part 60-1, in addition to implementing requirements of the Executive Order, implements requirements of sections 402 and 503.

The comments received on § 60-1.1 assumed that all requirements under the Executive Order program would be applicable to sections 402 and 503 if the proposed amendment were adopted. Specifically, they were concerned that contractors would be required to develop affirmative action programs (AAPs) for Vietnam Era and disabled veterans and handicapped workers pursuant to Executive Order 11246 procedures. One comment also raised questions as to whether sections 402 and 503 were being extended to cover federally assisted construction contracts. Other comments suggested that the proposed amendment was an attempt to evade the Contracts Disputes Act of 1978 (92 Stat. 2383).

The proposed amendment was intended merely to reflect that some of the regulations applicable to the sections 402 and 503 programs were being transferred to Part 60-1 of the

regulations and that some of the regulations already contained in Part 60-1 would be applicable to the Veterans and handicapped programs. The amendment is adopted as proposed.

The Part 60-1 regulations which have been transferred from Parts 60-250 and 60-741 are specifically identified as being applicable only to the veterans and handicapped programs. Regulations already contained in Part 60-1, for the most part, now state whether they are applicable to sections 402 and 503. An expressed statement is not made if the application of the regulation is clear from the context. The definition of "Vietnam era veteran" in § 60-1.3, for example, is not specifically limited to section 402, but that definition has no meaning for Executive Order purposes.

Regulations regarding the development of AAPs for the veterans and handicapped programs are still published in Parts 60-250 and 60-741, respectively. The regulations do not require contractors to follow Executive Order procedures in Part 60-2 in developing AAPs under sections 402 and 503. Neither do sections 402 and 503 apply to federally assisted construction contracts.

Presumably, the sentence in the proposed amendment to § 60-1.1(b) which stated that the regulations in Chapter 60, Title 41 of the Code of Federal Regulations govern a contractor's compliance obligations under the Executive Order and sections 402 and 503, led some persons submitting comments to conclude that the regulations attempt to evade the Contract Disputes Act. The thrust of the statement in § 60-1.1(b) is that with regard to matters of equal employment opportunity, the OFCCP regulations, not the disputes clause in the contract, determine whether the contractor is in compliance. This provision has been in § 60-1.1 since at least 1968 (see 33 FR 7804). The Contract Disputes Act is not in issue. The Department of Labor view of the Contract Disputes Act, however, is that it does not change the obligations of contractors with regard to the programs administered by OFCCP.

2. *Section 60-1.3.* Presently, each of the three OFCCP programs has separate regulations. Each set of regulations contains a definitions section. Because of the similarities among the three programs, certain words and phrases are common to each, and the definitions of such words and phrases are identical. Thus, words like contract, contractor, contracting agency, complaint, and Government, to list a few, are common to each program. Of course, there also are definitions which are peculiar or unique to only one of the three

programs. No useful purpose is served by maintaining separate sections in three different and separate parts of the regulations for definitions. This view makes particular sense because the regulations of all three contract compliance programs have been consolidated into 41 CFR Chapter 60. Prior to 1976, the section 402 regulations appeared in Title 29 of the CFR and the section 503 regulations appeared in Title 20 of the CFR. Accordingly, the December 28, 1979, proposal would amend 41 CFR Chapter 60 by consolidating the definitions relating to the three contract compliance programs into 41 CFR 60-1.3. The major amendment proposed to § 60-1.3 last December related to consolidating the definitions. Modifications of four definitions and the addition of a small number of new definitions also were proposed.

Some definitions were proposed to avoid repetitions throughout the regulations. Where the regulations prohibit certain conduct or describe activities which may result in a violation, for example, the practice has been to state in the regulations that the act or omission is a violation of the Order, the Equal Opportunity clause and the regulations implementing the Order. Similar clauses are used in the sections 402 and 503 regulations. The definition of "Order" therefore was proposed to include Executive Order 11246 and its predecessor executive orders, the equal opportunity clause and the rules, regulations or orders issued pursuant to the Executive Order. Sections 402 and 503 also were defined to make it clear that references to the regulations, for example, were not necessary to bind contractors to their 402 and 503 obligations.

Similarly, the word "contractor" was proposed to be amended to include the word "subcontractor," to avoid the present practice of repeating subcontractor each time contractor is used in the regulations in order to demonstrate that the particular regulation applies to both contractors and subcontractors. The same is true with regard to the words "contract" and "subcontract."

The amendment to the definition section is adopted essentially as proposed. Some changes in the definitions have been made based on the comments, however. We now consider the definitions about which the comments raised specific problems.

*Applicant.* The proposal recognized that this word relates to one who is seeking employment, and in the context of federally assisted construction, one who is seeking financial assistance from

the Government. But the major problem raised by the comments relates to the definition in its employment context. The basic problem perceived by the comments is the breadth of the definition of "applicant for employment." The comments were concerned more about what they characterized as informal applications for employment and related problems which would result in attempting to maintain applicant flow data on telephone inquiries, for example.

In attempting to define an applicant for employment, an effort has been made to provide a workable definition. The Department of Labor's view is that the definition must be sufficiently broad to protect from discrimination all persons who apply for work. It would be easy to limit the term applicant to one who has filed a written application for employment with a contractor. Such a definition, however, would permit a contractor to prescreen too easily those persons who would be given an opportunity to file the formal application. On the other hand, a contractor is certainly in a position to gather more data on a person who submits a formal application and is granted some type of an interview than it is on a person who makes only a casual inquiry about employment. But it is unlikely that any definition of applicant can be constructed with such precision that reasonable people would not disagree about specific factual circumstances fitting within the definition. On balance, the definition provides adequate protection and gives a contractor a fair standard to follow. In the event that disagreements develop with regard to specific factual circumstances, they can be resolved through conciliation and enforcement procedures.

*Complaint.* Except for the addition of the phrase, "former employee," the definition of complaint is adopted as proposed. The addition of this new phrase is technical in nature and is made simply to avoid disputes as to whether a former employee may file complaints. Several comments were submitted on the proposed definition, but they relate more to proposed § 60-1.23 and therefore have been treated in the discussion on that section.

*Establishment.* The proposal attempted to balance the obligation of all contractors subject to 41 CFR 60-1.40 and Part 60-2 to cover all employees with an affirmative action plan with the fact that some establishments are so small that it would not be unreasonable to combine them for affirmative action program purposes. Individuals

submitting comments were primarily concerned with the fact that the term "small locations" was not defined and that almost all physical locations have someone who exercises a degree of personnel authority, even though most decisions are made at some other location. In order to meet those concerns, a revision has been made in the definition adopted today. "Small" has been defined as less than 50 employees, and such locations may be combined regardless of whether some personnel functions are exercised there. However, in order to prevent against possible misuse of the ability of contractors to consolidate establishments, the definition clarifies the fact that they must be in the same SMSA or labor area. In addition, § 60-2.2 has been clarified so that there can be no doubt regarding each covered contractor's obligation to include all its employees in an AAP.

**Handicapped individual.** A change was proposed in this definition. However, no major revisions in the section 503 program were proposed because efforts are underway to conform as much as possible the section 503 and the Department of Labor's section 504 regulations. Therefore any amendment to the 503 regulations will be deferred to that effort.

**Minority group.** No amendment was proposed to this definition; however, it is being deleted from the regulations because it no longer serves a useful purpose. It was added initially to require construction contractors to include at least minority women in their goals efforts. Since May 1978 female utilization goals have been required of construction contractors.

**Prime contractor.** A number of comments objected to this definition and to the definition of "contractor" because they include persons holding, and for purposes of enforcement, persons who have held a contract. The comments expressed the view that whenever the procured goods or services have been delivered in accordance with the contract, the contractor's obligation is terminated. The provisions objected to, however, have been in the regulations since 1968 (see 33 FR 7805), and were not proposed to be amended. The rationale of the provision is that, for example, a contractor which has delivered the goods under the contract may nevertheless be sanctioned if it has not performed the equal employment opportunity obligations of the contract.

3. **Section 60-1.4.** Paragraphs (d), (e) and (f) of this section relating to incorporation by reference, incorporation by operation of the Order and adaptation of language have been

transferred to §§ 60-1.45, 60-1.46 and 60-1.47, respectively. In addition, as part of the consolidation of the regulations, these sections have been amended to include sections 402 and 503 within their ambit, and comparable sections in Parts 60-250 and 60-741 have been deleted.

4. **Section 60-1.5(a).** Generally, contracts for \$10,000 or less are exempt from the requirements of the Order. This exemption has not been applied to financial institutions which are covered by the Order if they act as depositories of Federal funds in any amount or as issuing or paying agents for U.S. savings bonds or savings notes in any amount.

OFCCP believes that Federal deposit and share insurance are contracts within the meaning of the Order and of sections 402 and 503. Such contracts are excluded from the generally applicable \$10,000 and under exemption of the Order. (The jurisdictional amount under section 402 is \$10,000 and must exceed \$2,500 under section 503.) OFCCP's opinion that deposit and share insurance are contracts within the meaning of the Order and sections 402 and 503 is contested by the Federal Deposit Insurance Corporation (FDIC), the National Credit Union Administration (NCUA), the Board of Governors of the Federal Reserve System (FRB) and the Comptroller of the Currency (Comptroller). These financial institutions regulatory agencies believe that deposit and share insurance are not contracts within the meaning of the Order and of sections 402 and 503. These agencies and the Federal Home Loan Bank Board (FHLBB) contend that only the financial institutions regulatory agencies themselves have the authority to debar, deny, suspend or terminate deposit or share insurance.

On February 22, 1980, OFCCP published a clarification, at 45 FR 11856, of its proposal of December 28, 1979. In the clarification, OFCCP indicated that it did not intend to debar financial institutions from deposit or share insurance. Rather, in a proposed addition to § 60-1.29 (Enforcement Proceedings), OFCCP indicated that, where a financial institution which has Federal deposit or share insurance is alleged to have violated the Order, section 402 or section 503, the Department of Labor would pursue one of two options with respect to the insurance relationship—either refer the matter to the appropriate Federal financial institutions regulatory agency for action under that agency's procedures or to the Department of Justice.

While the clarification should relieve public concern that OFCCP would not endanger the accounts of innocent

depositors, the questions remain of whether deposit or share insurance are contracts within the meaning of Executive Order 11246, sections 402 and 503 and whether the financial institutions regulatory agencies have exclusive jurisdiction to deny or terminate deposit or share insurance. All agencies will be free to argue their respective legal positions, if necessary, in any subsequent legal proceedings that may arise.

Under the regulations published today, where financial institutions have contractual relationships with the Federal Government (other than deposit or share insurance), OFCCP may enforce any suspected violations of the Order or of sections 402 or 503 in any manner described in § 60-1.29, including referral of the matter to the appropriate financial institution regulatory agency for enforcement action. See § 60-1.29(i).

In those few instances in which the only nexus between a financial institution and the Federal Government is deposit or share insurance, OFCCP will refer the matter to the Department of Justice under section 209(a)(2) of Executive Order 11246 and § 60-1.29(f) of the regulations for injunctive relief or, if appropriate, exercise its discretion pursuant to section 209(a)(3) of Executive Order 11246 § 60-1.29(h) of these regulations to recommend to the EEOC that proceedings be instituted under Title VII of the Civil Rights Act of 1964. In addition, OFCCP also may refer such matters to financial institutions regulatory agencies.

Regulations for the FHLBB explicitly prohibit employment discrimination. See 12 CFR 528.7 (1979). OFCCP and EEOC encourage the FDIC and NCUA to publish similar regulations.

The proposed amendment to add utilities which comprise part of a State or local government to the list of agencies of such governments which must develop and maintain written affirmative action programs has been adopted.

5. **Section 60-1.7.** This section requires contractors with 50 employees and a contract of \$50,000 to file the EEO-1 report. It also requires contractors to make certain certifications in their bids with regard to AAPs and other aspects of compliance. In addition, prime contractors are required to obtain the same certifications from their subcontractors. The certification requirement has resulted in a major paperwork requirement. Contractors, not knowing precisely when they may be required to make such certifications or require them of their subcontractors, have adopted the practice of requiring on an annual basis such certifications

from their vendors and others which may have or develop a contractual relationship with them.

The proposed amendment, consistent with the proposed amendments to § 60-1.40 and § 60-2.1, would require a contractor with 50 employees and contracts which total \$50,000 to file the EEO-1 report. No amendments were proposed regarding the certification requirements. Nevertheless, the comments raised the paperwork burden argument both with respect to EEO-1 reports and the certification requirements.

The proposed amendment to § 60-1.40 and to § 60-2.1 which would require contractors to accumulate contracts to \$50,000 for purposes of coverage under Revised Order 4 is adopted (see discussion under § 60-1.40 below). Similarly, the proposed amendment to § 60-1.7 to require such contractors to submit EEO-1 reports is adopted.

The certification of the prime contractor to the contracting agency is retained. However, the obligation of prime contractors to obtain certifications from subcontractors is discontinued. In other words, prime contractors will make the certification only to the contracting agency and only with respect to their own practices. They no longer will be required to obtain certifications from their subcontractors.

Finally, paragraph (c) of this section which states that data obtained under § 60-1.7 will be used only in connection with administering the Executive Order and the Civil Rights Act of 1964 was not proposed to be amended. Paragraph (c), however, is viewed as a potential obstacle to sharing information for purposes of enforcing other EEO laws. It is very likely, for example, that OFCCP will share information with Federal agencies which have EEO responsibilities under statutes other than the Civil Rights Act. Therefore, in the regulation adopted today, paragraph (c) has been deleted from § 60-1.7. See discussion of § 60-1.43 below.

6. *Section 60-1.8.* This section requires a certification that the contractor's facilities are not segregated. The proposal would delete the certification but contractors would continue to have an obligation not to maintain facilities on a segregated basis. Contractors also would be required to assure privacy between the sexes in toilet, changing and similar facilities. The regulation is adopted as proposed.

7. *Section 60-1.9.* The regulatory policy of providing for limited union participation in the compliance process under the Executive Order dates back to the days of the President's Committee

on Equal Employment Opportunity. The present regulations continue that policy and provide for hearings and other efforts with regard to employee representatives, to assist in implementing the purposes of the Order. They also provide that collective bargaining representatives shall be given an opportunity to present their views to OFCCP when compliance with the Order necessitates a revision of the labor agreement. In addition, the Director of OFCCP may notify Federal, state and local agencies when unions are violating equal employment laws.

The proposal would restructure § 60-1.9. The proposal also would transfer comparable provisions from the veterans (Part 60-250) and the handicapped (Part 60-741) regulations as part of the general consolidation of the regulations, and delete the corresponding provisions in Parts 60-250 and 60-741. The thrust of the comments was that the proposal would allow union participation in activities which essentially are matters between the Government and contractors, and that such participation should not occur without concomitant duties on the unions.

As pointed out above, the concepts embodied in this regulation have remained consistent since the early 1960s and revisions of those concepts were not proposed. Moreover, this section and the corresponding sections in Parts 60-250 and 60-741 have not generated substantial activity. It also is considered to be essential that unions be allowed to present their views, particularly when a bargaining agreement may require revision, in order to achieve compliance under the three laws administered by OFCCP. This approach is consistent with the concept of conciliation which is a touchstone of all Federal equal employment opportunity laws. Accordingly, this section has been amended to require notification to the union of on site reviews and an invitation to participate in conciliation discussions to the extent those discussions involve proposed changes in the collective bargaining agreement.

Contractors are obligated to advise labor unions and other workers' representative of the contractors' contractual obligations under the Executive Order. The OFCCP also expects contractors to inform unions and other workers' representatives of items disclosed in the compliance review which require changes in a collective bargaining agreement, and initially seek a resolution with the union.

Accordingly, the proposed amendment to § 60-1.9 is adopted as modified. (See discussion of § 60-1.25 relating to show cause notices.)

8. *Section 60-1.20.* This section outlines in broad form the basic procedures for conducting compliance reviews. The proposal would amend § 60-1.20 by consolidating therein all the general procedures relating to compliance reviews except for preaward reviews. The proposal also would transfer certain items relating to compliance reviews to this section from Revised Order 14 (Part 60-60) which today is being deleted from the regulations. Finally, the proposal would amend § 60-1.20 to state that compliance reviews under sections 402 and 503 would be governed by this section also.

Some comments objected to the references to sections 402 and 503 on the grounds that compliance reviews are not authorized under those two statutes. These statutes, of course, provide for broad rulemaking authority. They emphasize complaint processing but nothing in the statutes indicates that compliance is to be achieved only through investigations of complaints. Indeed, if Congress had intended that compliance activity should depend upon receipt of a complaint it could have so provided explicitly. The only reasonable conclusion is that Congress intended that a full complement of enforcement mechanisms be available to achieve compliance with sections 402 and 503.

Some of the comments raised objections to the provision which states that contractors will be notified that commitments in a conciliation agreement do not preclude future determinations of noncompliance based either on a finding that the commitments are inadequate to achieve compliance or on a violation not previously revealed. This concept has been in the regulations since 1968 (see 33 FR 7808). Moreover, it is not unusual for conciliation agreements or even court orders to be modified in order to achieve full compliance. If circumstances do occur where further corrective action is required, it is appropriate to attempt other resolutions to achieve full compliance. In such event, the rule adopted today requires that the contractor be given notice by show cause rather than by the 15-day notice of violations. See § 60-1.25. The comments also raised questions about delegations of authority to conduct compliance reviews. The practice is, as reflected in the proposal, that compliance reviews are conducted under the general supervision of the OFCCP Assistant

Regional Administrators. However, from time-to-time, national office officials also conduct compliance reviews, and the purpose of the delegation is to continue to allow for that possibility.

The section is adopted as proposed. However, small technical word changes have been incorporated into the final rule such as substituting the word "action" for "commitment" in § 60-1.20(c).

9. *Section 60-1.21.* The proposal would add a new section to the regulations which would modify the existing preaward concept. Preawards would also be applied to the veterans and handicapped workers programs. Forty-five days notice from contracting agencies to OFCCP would be required for formally advertised competitive contracts, and 120-days notice would be required for negotiated contracts, in place of the present 30-days notice for all contracts subject to the preaward requirement. Preaward reviews would be mandated only where the proposed contract exceeds \$1 million, and the proposed contract is to be performed at an establishment with 250 or more employees where a compliance review has not been conducted in the previous 24 months. Currently, there is no employee number threshold. The present monetary threshold is "exceeding \$1 million" and the previous compliance review period is 12 months. A new provision would give the Director, OFCCP, discretionary authority to conduct preaward compliance reviews of any contractor even though the establishment has less than 250 employees and a compliance review has been conducted within the last 24 months. If the compliance review is not completed or if the contractor/bidder's alleged noncompliance is not resolved prior to the award date of the contract, the proposal would also permit the Director to request the contracting agency to delay the award of the contract until such time as the contractor is found eligible or ineligible for the contract in accordance with the hearing procedures proposed in § 60-30.38. If the Director requested a delay, the contracting agency would be required to delay award unless it determined that a delay would be contrary to the national security. In all other cases where the preaward review is not completed, clearance would be granted.

Civil rights groups were about evenly split on the proposal with half favoring retention of present thresholds and the remainder favoring the "freed-up resources" to concentrate on target reviews. Contractors favored the

increases in the preaward threshold, but urged extension of the thresholds to \$10 million and 36 months.

Contractors and Federal agencies opposed the provisions requiring 45 days advance notice for competitive contracts and 120 days for negotiated contracts (paragraph c). Both groups stated that the time delay would increase costs and, in many instances, would hamper Federal agencies in their procurement efforts. Most of these comments recommended that the present 30-days notice be retained.

Contractors objected to the delay of award (paragraph (f)) because they viewed such a procedure as a debarment without a hearing, and Federal agencies viewed it as an interference with the procurement process. One comment recommended adding a provision that the contracting agency would be obligated to delay the award only where it was feasible.

Several comments stated that the subsection is not clear, especially the provision which provides that unless a preliminary hearing has been commenced, or would be invoked shortly, the award of the contract shall not be withheld. They said the word "shortly" is indefinite. One contractor recommended that a specific number of days be set.

Some contractors and a Federal agency opposed paragraph (i) which would authorize the Director to direct a preaward review on the basis of a contractor's prior statement that it would no longer contract with the Government. The Federal agency questioned how the Government would know when a contractor has made such a statement. Contractors commented that the paragraph would constitute retaliation against contractors for exercising their freedom of speech.

This section and the entire proposal, consistent with Executive Order 12044, were subject to intensive participation by the public prior to publication in the *Federal Register*. Persons thought to have an interest were directly contacted and a series of open conferences was held. As a result of this public participation, this section went through a number of revisions prior to publication for comment. The suggestions for change made by the various groups in the formal comments reflect the fact that the proposal represents a balancing of interests. While the increase in the thresholds for preawards was not popular with some civil rights groups, others recognized the benefits which will result from the use of "freed-up" resources to concentrate on reviews which may produce greater results. Contractors and contractor

associations agreed with the increased preaward thresholds and recommended even higher thresholds. Neither contractors nor Federal agencies favored the increased timeframes for advance notice for preaward reviews or authority for the Director to request delay of award. Both groups complained of the increased costs and delays that would result from delay of award. Most contractors objected to paragraph (i), which would give the Director discretion to order a preaward review where a contractor has stated that it will not contract with the Government.

The rule adopted today has been modified further to take into account some of the objections raised in the comments. The prime concerns of the Department of Labor are that the interest of groups protected under the three programs be assured and that procedures be designed which accomplish that goal in a fair and uniform way with consideration being given to the resources available to perform the job. The proposal was designed to achieve these goals. The timeframes proposed with regard to notice from contracting agencies, the Department believes, give OFCCP just a bit more flexibility to process preaward requests. However, the 120-day notice proposed for negotiated contracts has been dropped and a flat 45-day preaward notice has been adopted for both advertised and negotiated contracts. The extension of the review threshold to 24 months also assists in that same connection. (For a discussion of the types of problems the present preaward procedures are causing see 44 FR 77006.)

Although the number of reviews mandated under the present preaward procedure will be reduced because of the increased thresholds, discretionary preaward reviews are being authorized so that even if such reviews are not mandated, they will be conducted where warranted.

Paragraph (i) as proposed has not been adopted. The sole idea behind proposed paragraph (i) was that where a contractor discontinues contracting with the Government because of what the contractor perceives as burdens of the contract compliance programs, it was considered to be a fair requirement to determine whether the contractor is complying with equal employment obligations before it resumes a contractual relationship with the Government. After considering all factors, however, paragraph (i), as proposed, is not necessary to achieve this goal. For example, there have been instances where contractors have

accepted debarments rather than comply. Such contractors must come into compliance with the Order and sections 402 and 503 before they may resume Government contracting. Moreover, a noncomplying contractor may be debarred even though it has performed the goods or services aspects of its contract (see discussion above regarding the definition of prime contractor). Also, paragraph (e) of this section as adopted today provides adequate authority to conduct preaward reviews in such situations.

Finally, with regard to requests that awards be delayed so that the preliminary enforcement proceeding be instituted, the word "shortly" has been deleted and the phrase, "15 working days," has been substituted. The concept is that a decision to pursue the hearing route has been made at least preliminarily before the request to the contracting agency is made. Such delays would allow the necessary paperwork and filing procedures to be completed.

A clarification has been added to show that the request applies to all other pending contracts at the establishment which triggered the preaward review. The request would not apply to establishments which are not part of the preaward review.

10. *Section 60-1.22.* No substantive changes were proposed in this section. It would combine present §§ 60-1.21 and 60-1.22. The proposal is adopted.

11. *Section 60-1.23.* The proposed amendment to this section relates to complaints filed by third parties.

All contractors and contractor associations opposed the addition of third party complaints which do not identify the complainant. The female and minority groups which commented upon this section favored the addition of third party complaints.

All contractors which submitted detailed statements on the third party complaint issue were of the opinion that permitting complaints by unidentified third parties would be a denial of due process. Most said the procedure would be unfair and that contractors have the right to know their accusers. Others commented that unidentified third party complaints would lead to contractor harassment; that third party complaints would frequently be frivolous; that such a process constituted an unwarranted fishing expedition; that it would lead to forum shopping; that the process is not needed because persons are protected from intimidation and interference; that unions would be able to file against contractors under this provision which would permit OFCCP to interfere in the collective bargaining process; and that it is not needed as it would apply only to

the small number of persons who would not file themselves or authorize another to file on their behalf. The contractors recommended that the section be deleted or that the complainant be identified. It was also recommended that the contractor receive a copy of the complaint before any investigation. Educational institutions, as a whole, were opposed to inclusion of third party complaints.

The wording of proposed § 60-1.23(a) which states that, "Signed third party complaints will be accepted which do not identify the complainant \* \* \*" is confusing. Obviously, if a complaint is signed, the complainant is identified. The confusion was compounded because the proposal would delete a provision in the existing regulations at § 60-1.23(a) which permits class type complaints that do not identify the discriminatees. The intent was and is to permit a complaint alleging class type discrimination to be filed by third parties regardless of whether the discriminatees are identified. Individual complaints may be filed by the discriminatee or the discriminatee's authorized representative. Third parties would be able to file class type complaints without authorization from the discriminatees.

The drafting problems discussed above have been corrected and the proposal as modified is adopted. Comparable changes have been made in the complaint provisions of the veterans and handicapped regulations (41 CFR 60-250.23 and 41 CFR 60-741.23). The comments regarding due process, etc., are not well founded. A complaint simply precipitates the investigatory process. If the allegations in the complaint are verified by the investigation, then the Department of Labor becomes the accuser and attempts resolution through conciliation. Moreover, it is essential that information regarding employment discrimination be available to the Department. This avenue to employment discrimination information should not be closed because a victim of discrimination is reluctant to make direct contact on his/her own behalf. Indeed, other enforcement programs administered by the Department for many years have observed the practice of accepting anonymous complaints.

12. *Section 60-1.24.* The proposal would permit OFCCP the discretion to "defer," rather than "refer," complaints to EEOC. Deferral would mean that OFCCP would retain jurisdiction over the complaints and could later investigate the complaints if OFCCP chose to do so. The proposal states that

the complainant would be notified of any deferral. Complaints deferred to EEOC and unresolved at the time of a later OFCCP compliance review, as well as those retained at OFCCP, would be investigated and resolved during that compliance review of the contractor against which the complaints are filed.

Nearly all comments were opposed to deferral. Contractors and contractor associations thought the OFCCP should not process complaints, except for broadly based systemic complaints, and should refer all other complaints to EEOC. Others objected that retaining complaints to be resolved during compliance reviews was impractical; that complicated complaints take more time to resolve than is permitted during the compliance review process; that merging complaint resolution with compliance reviews gives OFCCP disproportionate leverage to force settlement; that concentrating on complaints will give a few persons attention at the expense of women and minorities in general; and that deferral was contrary to President Carter's Reorganization Plan. Contractors also recommended that OFCCP notify them of deferrals in the interest of fairness. Most contractors and contractor associations expressed fear that deferral would lead to multiple investigations of the same complaint.

As proposed, § 60-1.24 undoubtedly would expand the number of complaints processed by OFCCP. OFCCP, as a matter of policy and procedure, traditionally has referred most individual complaints to EEOC for investigation and normally retained only class type complaints for investigation. Under proposed paragraph (b), OFCCP would be required to investigate all complaints which it elected to retain and not defer to EEOC. In addition, all class type complaints would be deemed to be retained by OFCCP, even though a copy may have been sent to EEOC. The class or systemic complaints would be required to be investigated and resolved in the next compliance review of the contractor.

In the final regulation, paragraph (b) has been modified to make it clear, consistent with OFCCP past practice, that all systemic and class complaints will be retained, investigated and resolved by OFCCP. However, EEOC, under the final rule adopted today, could request that such class complaints be referred to it in order to avoid duplication and to assure effective law enforcement. In resolving the class complaints referred to EEOC at its request, the two agencies will consult and coordinate with each other to

ensure that the resolution of such complaints comports with the requirements of the two agencies. As modified, the proposal is adopted. In addition, this section has been amended on final rulemaking to state that OFCCP will also investigate and resolve individual complaints, on file with OFCCP at the commencement of a compliance review, against the contractor establishment if resolution of such individual complaints does not unduly delay completion of the compliance review. Also, on final rule making the word "refer" has been substituted for "defer."

With regard to OFFCCP investigating complaints, the Executive Order specifically authorizes complaint investigations. Moreover, all Federal EEO agencies are making every effort to ensure that duplication (in this instance separate investigations by EEOC and OFCCP on the same issue) is eliminated.

Paragraph (c)(5), regarding the authority of the Director to reconsider matters pending in OFCCP has been transferred to 41 CFR 60-1.27 because paragraph (c)(5) has application and implications beyond complaints.

13. *Section 60-1.25.* This amendment was proposed as a new section dealing with show cause notices and notices of violation. Paragraph (a) would set forth the circumstances under which a show cause notice or a notice of violation would be served on the contractor. Paragraph (b) delineates the contents of a show cause notice and when it would be used.

Paragraph (c) would provide the circumstances under which a notice of violation would be used. A notice of violation would be permitted where circumstances do not permit 30 days to resolve the matters under investigation; where there is a serious violation; and where the violation is the subject of a prior conciliation agreement, letter of commitment or consent or other decree.

Paragraph (d) would provide that where a notice to show cause or notice of violation proposes a change in a collective bargaining agreement, the collective bargaining representative would be given notice of the proposed change and invited to participate in conciliation.

Paragraph (a). This paragraph would have provided for a show cause notice in appropriate circumstances if deficiencies revealed in the course of a review or investigation have not been resolved by some form of an agreement. Paragraph (b) would have provided for a show cause notice in appropriate circumstances where the deficiency is not covered by an "existing" agreement. One comment argued that as a result of

the word "existing," paragraph (a) is voided. The contractors recommended that paragraph (b) be eliminated.

Paragraph (b). Several contractors and two construction contractor associations recommended deletion of the last sentence which permits finding a previous conciliation agreement inadequate.

Paragraph (c). An association claimed that the paragraph is vague as to when a notice of violation would be used. An association and two educational institutions further stated that 15 days would be insufficient to conciliate and respond. Further, the association believed that a serious violation would require more, not less, time to resolve.

Paragraph (d). One contractor stated that OFCCP should not get involved in union-management disputes unless there is an impasse. A union commented that there is not enough participation by unions.

The rule adopted today follows the concepts contained in the proposal. However, certain changes have been added to conform this section to other regulations and to take into account problems raised by the comments. Some restructuring of this section has been made in this process.

Under present regulations a show cause notice is not required in all instances. Accordingly, § 60-1.25 has been modified to refer to situations in which a show cause notice is not required to be used. With respect to paragraph (b), the intention was to show that in some circumstances a notification other than a show cause notice must be used. However, the phraseology was confusing. This confusion has been eliminated by cross referencing other sections of the regulations which describe the situations when a notification other than a show cause is required.

With regard to the comments concerning inadequate remedies in conciliation agreements and concerning collective bargaining, see the discussions above relating to compliance reviews (§ 60-1.20) and unions participating in the conciliation process (§ 60-1.9).

14. *Section 60-1.26.* This section would consolidate the regulations dealing with the contents of conciliation agreements. The major amendment proposed was that conciliation agreements would not be entered into after enforcement proceedings have been initiated.

The general tenor of the comments received from contractors is that clarification is needed as to when a letter of commitment would be required. Another comment stated that a complaint is necessary for jurisdiction

under section 503. A contractor stated that a conciliation agreement should be accepted when signed rather than 45 days after receipt by the Director.

On the matter of when a conciliation agreement would be used, paragraph (e) states that a letter of commitment, rather than a conciliation agreement, is to be used for "minor technical deficiencies." The OFCCP manual provides instruction as to when conciliation agreements as opposed to letters of commitment should be used.

The provision that a conciliation agreement will not be entered into after enforcement proceedings have commenced contemplates that subsequent settlements normally will be in the form of consent decrees rather than conciliation agreements. It was not intended to suggest that settlements would not be made after enforcement proceedings commence.

Contractors recommended that conciliation agreements become effective when signed by the Assistant Regional Administrator because otherwise they are uncertain whether the conciliation agreement has been accepted by the Director. However, the 45-day review period is considered to be important at least for the immediate future in order to ensure uniformity and consistency among the regions.

The amendment is adopted as proposed.

15. *Section 60-1.27.* Subsection (a) of this section which presently is section 60-1.25 permits the Director to assume jurisdiction over matters pending in OFCCP. The only substantive change proposed to this section would be to add a reference to sections 402 and 503. The thrust of the comments was that this section was an unnecessary statement of the obvious and recommended that the section be deleted.

This section was designed at a time when compliance responsibilities were assigned to various compliance agencies and was intended to give OFCCP some control, in appropriate circumstances, over cases being processed by the former compliance agencies or which would normally be within the jurisdiction of a particular compliance agency. The present regulations, however, do make specific delegations in certain instances (see 41 CFR 60-1.20(b)). By stating in the regulations that the Director may assume jurisdiction over matters pending in OFCCP, a number of process questions will be avoided which have arisen from time-to-time even after the Executive Order program was consolidated into the Department of Labor. Subsection (b) of this section as adopted today presently is contained in § 60-1.24(c)(5)

and relates to the authority of the Director to reconsider matters. See discussion under § 60-1.24 herein.

16. *Section 60-1.28.* The present regulation prohibits intimidation or interference because an individual participates in compliance activities (e.g., filing a complaint, assisting in an investigation, etc.). The prohibition applies to such participation under Federal and state and local laws. The proposed amendment would transfer comparable provisions in the section 402 and 503 regulations to this section. The proposed amendment also would add a new provision which would prohibit a contractor from intimidating or interfering with an individual because he/she opposed an employment practice under any Federal or state or local law. The latter provision was added to the regulations at the request of the EEOC in consultations with that agency under Executive Order 12067 prior to publication of the December 28, 1979, proposal.

The comments objected to the references to state and local laws. This reference, of course, has been in the regulations for a number of years albeit not in the specific context of the new provisions. The objective of this section is not, as the comments suggest, to enforce a state or local law but to proscribe activities which interfere with a person's exercise of his/her rights under a state or local law. The amendment is adopted as proposed.

17. *Section 60-1.29.* This section sets forth in general outline form the procedures governing legal proceedings to enforce the Order and sections 402 and 503. The proposal would reorganize the present regulation and transfer it from 41 CFR 60-1.26 to 41 CFR 60-1.29. The major additions to the section would be paragraphs (e), (h) and (i). The latter two paragraphs relate, in part, to the issue of Federal deposit and share insurance, and are discussed under § 60-1.5(a).

Paragraph (e) would establish a preliminary enforcement procedure under 41 CFR 60-30.38. The Preliminary enforcement proceeding would be utilized when: (1) The contractor is engaging in unlawful employment practices; (2) the contractor has refused or failed to develop or submit a current AAP; (3) the contractor has failed or refused to supply requested records; (4) the contractor has failed or refused to permit access to its premises, records, or to its employees or witnesses for interviewing; or (5) the contractor has engaged in intimidation or retaliation.

The comments expressed the view that "unlawful employment practices" is too broad a standard upon which to

invoke a preliminary enforcement proceeding suggesting that the procedure will be abused. The prime purpose of a preliminary enforcement proceeding is to obtain results promptly in those circumstance where the issues lend themselves to quick resolution and where a prompt resolution is needed; for example, when there are impediments to completing the review. When such impediments exist, a process should be available to resolve them promptly. Like the expedited hearing procedure, the preliminary enforcement procedure is not to be used for resolution of complex factual issues, including complex issues of affected class relief.

The comments are correct in stating that "unlawful employment practices" is a broad standard on which to invoke the preliminary enforcement procedures. However, the other standards are specific and relatively well defined. It is conceivable that practices could be revealed in an investigation which are not conveniently catalogued under one of the specific standards but which nevertheless could be resolved promptly. The general standard would permit the processing of such practices under the procedure. At the same time, however, it must be acknowledged that the timeframes involved in the preliminary enforcement procedure apply to the Department as well as to the contractor. The timeframes themselves will operate to confine the procedure to circumstances which actually are suitable for prompt resolution. In addition, the word "unlawful" has been deleted and the phrase, "which violate its contractual obligations," has been added to further define "employment practices."

Section 60-1.29 is adopted as proposed with the modifications discussed here and elsewhere in this preamble.

18. *Section 60-1.30.* The present regulation states that no contractor will be debarred without being afforded an opportunity for a hearing. A similar requirement is contained in the section 402 and 503 regulations. The proposal would consolidate the requirements for each program into this section. In addition, the proposal would add the requirement that prime contractors would be notified when contractors are ineligible for subcontracts.

A small number of comments were received on the proposal which focused on the notification of prime contractors requirement. The comments objected to the notification requirement, but also suggested that if there were to be notification of debarments, fair play dictated that comparable notification be provided when reinstatement is ordered.

The amendment is adopted as proposed. In addition, a requirement has been added to § 60-1.31 that notification be provided to prime contractors when reinstatement of a debarred contractor is ordered.

19. *Section 60-1.31.* This section and comparable sections in Parts 60-250 and 60-741 presently provide that a debarred contractor may petition for reinstatement in a letter to the Director, and that the burden will be on the contractor to show that it has established and will carry out policies and practices in compliance with the Order, section 402 and section 503, as appropriate.

The proposal would establish a single reinstatement procedure for each of the OFCCP programs. The contractor would have the burden to demonstrate that it is entitled to reinstatement. The Director could require a compliance review before reinstating the contractor or remand the matter to the Administrative Law Judge before making a final determination on the petition for reinstatement. Also, any party or person who participated in the debarment proceeding would have a right to participate in the reinstatement procedure.

A relatively small number of comments were received on this proposed amendment. The thrust of the comments was that a petition for reinstatement should be granted promptly, and that reinstatement should not be impeded by complex procedures.

The amendment is adopted. However, a requirement has been added that the petition for reinstatement be served on the parties to the original debarment proceeding. If parties to the proceeding are going to be able to participate meaningfully in the reinstatement procedure as they will have a right to do under 41 CFR 60-1.31(e), a copy of the petition is necessary.

In addition, clarifications have been made on final rulemaking with regard to procedures to be followed when the Director remands a matter subsequent to a petition for reinstatement.

The procedures which have been added are based on experience with petitions for reinstatement and the need for a process to gather facts so that the Department may determine whether the contractor will implement and carry out employment practices and policies which are in compliance with the Order and sections 402 and 503, as appropriate. In some instances, a compliance review may be necessary to make that determination and in others a hearing before the Administrative Law Judge may be appropriate. In either situation, the objective is to determine

what the facts are and to provide fair procedures in making these determinations.

20. *Section 60-1.40.* This section presently establishes the dollar volume and employee thresholds for requiring written affirmative action programs under the Executive Order. The proposal would add two new requirements to this section. Contractors with 50 or more employees would be required to aggregate their contracts and would be subject to the written AAP requirement if the total dollar value of the contracts is \$50,000 or more. Also, a construction contractor with 50 noncraft employees and a \$50,000 or more contract or contracts totaling \$50,000 or more would be required to develop and implement a written AAP.

The majority of the comments expressed objection either to the aggregation of the dollar value of contracts or to the expansion of § 60-1.40 to encompass the noncraft workforce of construction contractors.

Some technical language modifications in the proposal have been made. Also paragraph (b) of the section has been amended to clarify that when a contractor becomes subject to § 60-1.40, it must develop and implement a written AAP at each of its establishments within 120 days from the date it is first covered. With these changes, the proposed amendment has been adopted.

A loophole always has existed under the Executive Order program's written AAP requirements with regard to noncraft employees of construction contractors who are not included in the construction affirmative action plans. Section 60-1.40 does not expressly exclude construction contractors in imposing the written AAP requirement. However, § 60-2.1 of Revised Order 4, which provides the guidelines for developing an AAP, specifically limits the application of Revised Order 4 to nonconstruction contractors. Because of the inconsistencies in the language of the two sections, no concerted effort has ever been made to require construction contractors to develop AAPs for their noncraft employees. The noncraft employees include categories such as estimators, project managers, financial personnel, clerks, secretaries and typists. Some nonconstruction contractors also employ the same types of employees and are required to include such job categories in their AAPs. There is no reasonable basis for allowing the loophole to continue to exist with regard to noncraft employees of construction contractors, and the final rule adopted today requires that construction contractors subject to § 60-

1.40 adopt AAPs which include the noncraft positions.

The basic concept behind the aggregation of contracts to reach the \$50,000 volume is that consideration should be given to the total amount of Government business the contractor has in addition to the size of a particular contract.

21. *Section 60-1.43.* This section presently requires access to the contractor's records for inspection and copying. Comparable provisions are contained in the sections 402 and 503 regulations. The proposal would amend the regulations by incorporating the sections 402 and 503 requirements into this section. The proposal also would include the present practice of interviewing employees as part of the compliance review and would add computer tapes and print-outs to the list of specific types of data contractors would be required to produce in the investigation or compliance review.

The comments basically were concerned about data gathered in the investigation, taken off-site and subsequently disclosed pursuant to a request under the Freedom of Information Act. Some comments also were opposed to allowing employee interviews.

The issues raised by the proposal and the comments go to the ability of the Government to conduct its investigation. If the data are not needed for the investigation it should not be gathered in the investigation, and procedures are incorporated into the regulations to allow contractors to obtain rulings with regard to data they believe are not relevant to the investigation. See, e.g., 41 CFR 60-2.4. If they are needed, on the other hand, obtaining copies and making them part of the investigation file should not depend upon whether the Freedom of Information Act may require disclosure if a request is received. Indeed, the provision that information obtained under this section will be used only in connection with the Order and the Civil Rights Act of 1964 was not included in the proposal but is being deleted from this section by the regulation adopted today because, *inter alia*, a representation that the use of the information will be so limited may conflict with the Freedom of Information Act. Nevertheless, the Department of Labor is sensitive to contractor concerns regarding the possible confidentiality of data gathered in compliance reviews and has taken steps to ensure that confidential data is not routinely released. See e.g., the Decision and Administrative Order of the Secretary of Labor *In the matter of U.S. Department of Labor, Office of Federal Contract*

*Compliance and University of California, Berkeley, Case No. 78-OFCCP-7.*

It frequently is necessary to include source documents in the investigation file because of the need for review by supervisory and other personnel, such as lawyers, in the event enforcement procedures are required.

Interviews of employees also are critical to the investigation process, and it is more convenient and saves time and money for interviews to be conducted at the time of the on-site review. This is standard operating procedure in law enforcement programs. Accordingly, the amendment is adopted as proposed and with the deletion mentioned above.

22. *Sections 60-1.44, 60-1.45, 60-1.46 and 60-1.47.* These sections relate to rulings and interpretations; adaptation of language in the equal opportunity clause in the Order and the affirmative action clauses of sections 402 and 503; incorporation by reference; and incorporation by operation of law, respectively. The proposal would simply provide for a single regulation, applicable to each program, on each issue, and would delete the corresponding sections in Parts 60-250 and 60-741. See discussion of § 60-1.4. These sections are adopted as proposed.

23. *Section 60-1.48.* This section presently appears at § 60-1.24(c)(4). The present regulation allows a contractor to comply with the demands of OFCCP and then request a hearing. The proposal requested comments as to whether it should be deleted or retained. The comments supported retaining the regulation. However, because of the way the regulations have been reorganized, it no longer fits properly in § 60-1.24 and has been transferred to § 60-1.48. In addition, a provision has been added to reflect the practice under this provision that hearings normally will be on the record before the Director.

24. *Section 60-2.1.* This section sets forth the purpose and scope of Revised Order 4 (Part 60-2). The purpose of the proposed amendment was to conform § 60-2.1 to the amendment proposed to § 60-1.40 regarding accumulation of contracts for the purpose of meeting the \$50,000 contract volume requirement for written AAPs, the proposed amendments regarding Federal deposit or share insurance and the obligation of construction contractors to develop written AAPs for their noncraft employees. The amendment is adopted as proposed. See the discussion herein of § 60-1.5(a) for a treatment of the deposit or share insurance issue and § 60-1.40 for a treatment of the accumulation of contracts issue.

25. *Section 60-2.2.* This section provided for contractor "pass overs," in certain instances, without a hearing, based on a finding of nonresponsibility. It also provided for determinations of substantial issues of law or fact with regard to the contractor's responsibility. A determination that the contractor's responsibility raised substantial issues of law or fact had the effect of clearing the contractor for award pending a hearing on the issue. The proposal would delete these procedures thereby making the opportunity for a hearing a requirement before a responsive bidder could be denied a contract.

The comments were largely favorable to this proposal and the amendment is adopted as proposed with a few clarifying modifications.

26. *Section 60-2.3.* The proposal would add a new section providing procedures for submitting the AAP and support data. Most of the procedures contained in the section previously appeared in Part 60-60. A new time frame of 15 days, in lieu of the 30 days in the present regulations, would be established for submitting the AAP and support data.

Most of the comments on this section were received from contractors and contractor associations, and these comments primarily focused on issues of confidentiality of data and the 15-day time frame. The confidentiality and disclosure of data issue already has been treated to some degree in the discussion on § 60-1.7 and § 60-1.43, and is further treated in § 60-2.4. With regard to the 15-day time frame, there are strong indications that the current 30-day period is being used routinely to require that the AAP be updated on an annual basis and the 30-day time frame was not designed to allow time for the annual update. The 15 days should be adequate for the ministerial function of forwarding the AAP and also should provide an incentive for contractors to update the AAP in a timely fashion rather than to wait for a request for the AAP before beginning that process. Moreover, it is essential that the AAP be current in the event that a preaward review of the contractor is conducted, and, more importantly, to ensure its implementation.

The section is adopted as proposed with a few clarifying modifications.

26-A. *Section 60-2.4.* This section was not proposed. However, because of the number of concerns raised by contractors regarding the confidentiality of data gathered in compliance reviews, this section has been added. This section continues the procedure presently contained in 41 CFR 60-60.4 for coding data and making determinations of relevancy of data. The

requirement that the confidentiality of data be maintained prior to determination of relevancy also has been retained. As mentioned earlier in this preamble, Part 60-40, pertaining to disclosure of documents, presently is being revised.

26-B. *Part 60-4.* Amendments to the construction regulations were published in the *Federal Register* on October 3, 1980. Part 60-4 is republished today incorporating those amendments. In addition, conforming changes have been made to Part 60-4 to reflect other changes in Part 60-1. See, e.g., § 60-4.7.

27. *Section 60-20.2.* Only minor language changes were proposed for this section. No comments were received on § 60-20.2 and it is adopted as proposed.

27-A. *Section 60-2.3.* No amendment to this section was proposed in the December 28, 1979, notice. Previously, however, an amendment to this section had been proposed and that proposal is still under consideration. On final rulemaking, paragraph (c) has been amended to reflect the dictates of the Supreme Court's opinion in *Los Angeles Department of Water and Power v. Manhart*, 435 U.S. 702 (1978), regarding the equal benefits, equal contributions rule. In addition, a subparagraph (ii) has been reserved to indicate an additional amendment to the fringe benefit regulation.

28. *Section 60-20.4.* As proposed, the section would read: "Where they exist, seniority lines and lists must not be based upon sex. Where such a separation has existed, the contractor must eliminate this distinction and provide appropriate relief." The portion emphasized is the proposed amendment.

The comments focused upon the retrospective aspects of the proposed amendments and argued that the Executive Order was limited to prospective relief. The Department of Labor has required retroactive relief under the contract compliance program since at least 1961 and has outlined its position on the issue in the *Federal Register* and other publications. See, e.g., 41 FR 77000. The section is adopted as proposed.

29. *Section 60-20.5.* As proposed, § 60-20.5(a) would read: "The contractor's wage schedules must not be related to or based on the sex of the employees."

"While the more obvious cases of discrimination exist where employees of different sexes are paid different wages on jobs which require substantially equal skill, effort and responsibility and are performed under similar working conditions, compensation practices with respect to any job where males or females are substantially underutilized will be scrutinized closely to assure that

sex has played no role in the setting of levels of pay." The portion emphasized is the proposed amendment.

The contractor comments stated that the proposal was an attempt to assert jurisdiction over the comparable worth issue, some stating that the proposal was a violation of the Equal Pay Act and Title VII of the Civil Rights Act. All contractor groups were opposed to the proposal. The Congress, courts, and EEOC were variously thought to be the proper authorities to promulgate this doctrine. Other comments suggested that OFCCP should defer its regulations on this issue until it has been accepted by the courts. Women's groups viewed the proposal as an attempt to clarify Executive Order jurisdiction over the comparable worth issue and approved of the proposal.

The Executive Order prohibits discrimination based on sex. The prohibition is broad and does not depend upon characterizations such as comparable worth. OFCCP has conducted investigations which involve the wage discrimination issue. The Department also is involved presently in litigation where wage discrimination is an issue. The proposed amendment simply codifies policies and practices the Department already is following.

30. *Section 60-20.6.* The proposed amendment would not make substantive changes. Rather the paragraphs have been rearranged and small language changes have been made on final rulemaking. This section is adopted.

31. *Section 60-20.7.* The proposed amendment would add a new section to incorporate some of the features of the Pregnancy Discrimination Act of 1978.

A total of nine comments were received on this proposal. The Women's groups were generally supportive of this change but objected to the exclusion of abortion from coverage.

Some very detailed comments from contractor groups stated that the proposal goes beyond the Pregnancy Discrimination Act.

As proposed, this section essentially would have adopted EEOC's Guidelines (29 CFR 1604.10) on the subject, which implement the Pregnancy Discrimination Act (PDA) (see 44 FR 23804, April 20, 1979). The PDA provides, *inter alia*, that the prohibition against sex discrimination contained in Section 701 of the Civil Rights Act of 1964, as amended, includes discrimination "because of or on the basis of pregnancy, childbirth, or related medical conditions." However, under the PDA an employer is not required to provide health insurance benefits for abortion, "except where the life of the mother would be endangered if the fetus were

carried to term, or except where medical complications have arisen from an abortion." Although OFCCP believes that the PDA, including the abortion exemption, applies only to the Civil Rights Act and not to the Executive Order program, the rule adopted today follows the EEOC's Guidelines and the PDA, including the provision relating to benefits for abortion. In addition, the present regulations require a reasonable period of time away from work for childbearing purposes and reinstatement after a reasonable period of time to a similar job without loss of service credits. In adopting the EEOC Guidelines, the final rule eliminates the present regulation. However, as with abortion, OFCCP believes that the PDA applies only to the Civil Rights Act and does not require the change in the Executive Order regulations.

32. *Section 60-20.8.* This is a new proposal designed to protect employees from the sexual advances of persons who are in a position to affect their employment opportunities as well as to prohibit employment decisions based upon sexual favors.

Twenty-eight comments were received on this section from female groups and contractor groups.

Female groups were supportive of the proposed amendment as a recognition of a very serious problem in the workplace. The female groups thought the regulation did not go far enough and should specifically make reference to harassment by coworkers, clients and customers and that a specific reference on the subject should be required in a contractor's policy statement.

Contractors primarily were opposed to the language that liability attaches if the contractor "knows or should have known" of the prohibited activities. Questions were also raised as to the meaning of "official authority." Some thought that OFCCP should not get into this area at all. Finally, it was suggested that the standards enunciated in some court cases should be used.

The rule adopted today has been redrafted and is consistent with EEOC's Guidelines on the subject. A contractor is liable under the rule adopted today for the acts of its officials, managers and supervisors when they engage in sexual advances or favors regardless of whether their specific acts were authorized by the contractor and whether the contractor knew or should have known of their occurrence. Although the rule adopted today also refers to the liability of the contractor for the acts of a contractor's customers and clients as do the EEOC Guidelines.

The rule adopted today also holds a contractor responsible for the sexual

advances and favors of nonsupervisory employees, if the contractor or its agents or supervisory employees should have known of the conduct. This element was not contained in the proposal but is already an Executive Order violation.

33. *Section 60-30.1.* The rule adopted today simply adds references to sections 402 and 503 to reflect that the rules of practice also govern hearings before Administrative Law Judges under these two programs.

34. *Section 60-30.3.* The rule adopted today excludes intermediate Saturdays, Sundays and legal holidays observed by the Federal Government when the time for responding to a matter is less than seven days.

35. *Section 60-30.4.* No substantive changes have been made from the existing regulations.

36. *Section 60-30.5.* The amendment adopted today emphasizes that notice rather than fact pleading obtains under the rules of practice. However, fact pleading is required for preliminary enforcement proceedings under § 60-30.38. Also, the requirement that an amended answer be responded to has been deleted.

37. *Section 60-30.7.* Because contractors have a right to an opportunity for a hearing initiated by an administrative complaint, the requirement that the Administrative Law Judge respond to the request for a hearing has been deleted in the rule adopted today. Also, a requirement has been added that the Administrative Law Judge conduct a final pretrial conference.

38. *Section 60-30.8.* The rule adopted today amends § 60-30.8(b) to require every reasonable effort by the Administrative Law Judge to dispose of all outstanding motions prior to the hearing. A new paragraph (c) has been added requiring counsel to attempt resolution of discovery issues prior to filing motions to compel discovery.

39. *Section 60-30.9.* This section is amended by deleting the references to filing times in order to conform the timeframes to the changes adopted today at 41 CFR 60-30.12(c)(3). Finally, § 60-30.9 is amended to require that discovery documents be filed with the Administrative Law Judge.

40. *Section 60-30.11.* Subsection (c) of this section is adopted to bring the rules for objecting to questions at depositions more closely into conformity with the Federal Rules of Civil Procedure.

41. *Section 60-30.12.* This section is amended by adding a new paragraph (c) which contains mandatory requirements for a final prehearing conference and the exchange of witness lists and hearing exhibits by the parties. In addition, it

provides for concluding discovery at least 30 days prior to the hearing or at such other times as ordered by the Administrative Law Judge.

42. *Section 60-30.15.* This section is amended to add to the Administrative Law Judge's powers the authority (1) to invoke a presumption that answers or actions ordered, if made, would be unfavorable or adverse to the party ordered to answer or act and (2) to issue interlocutory decisions pursuant to the preliminary enforcement proceedings under 41 CFR 60-30.38.

43. *Section 60-30.18.* This section is amended by placing limitations on the introduction of deposition testimony into evidence in lieu of testimony given at the hearing.

44. *Section 60-30.19.* This section is amended by adding a new requirement at the end of paragraph (c) to the effect that an "offer of proof" made during a hearing contain a specific statement regarding the significance of the excluded evidence.

45. *Section 60-30.30.* This section has been amended to provide for final Administrative Orders by the Under Secretary of Labor in the absence of the Secretary or when the Secretary disqualifies himself/herself for some reason. It also mandates compliance with the consultation requirements of Section 209(a)(5) of Executive Order 11246 before an order terminating, suspending, or cancelling contracts becomes effective.

46. *Section 60-30.38.* The amendment adopted today adds a new section containing a new preliminary enforcement procedure. The preliminary enforcement procedure already has been treated in the discussion of § 60-1.29. However, when the procedure was proposed, the preamble stated that the preliminary enforcement procedure would replace the expedited hearing procedure adopted on December 28, 1979. Upon reflection, the two types of hearings serve different purposes and a decision has been made to retain both. However, some timeframes have been changed in the expedited hearing procedure.

47. *Section 60-50.1.* The proposal stated that OFCCP would defer any amendments on religious accommodation until the EEOC Guidelines on the same subject are made final. EEOC has published final Guidelines which are being reviewed by the Department of Labor to determine whether they may be adopted as a final rule without the necessity to publish them as a proposal.

With regard to § 60-50.1(b), the two comments which were received on the proposed amendment raised no

objection to it, and it is adopted as proposed. In addition, some editorial changes such as substituting the word "contractor" for the word "employer" have been made throughout Part 60-50.

48. *Part 60-60.* The proposal would delete this part from the regulations. However, as already discussed herein, some of the sections in Part 60-60 which are regulatory in nature have been transferred to Parts 60-1 and 60-2. Most of Part 60-60 is properly characterized as internal operating procedures. Such procedures should be in the OFCCP contract compliance manual rather than in the regulations. The comments on this part focused primarily on the provisions in § 60-60.4 which provide some degree of confidentiality with regard to data furnished to OFCCP by contractors. The key elements of § 60-60.4 have been adopted in a new § 60-2.4 in response to some of the concerns raised by contractors. Accordingly, Part 60-60 is deleted.

49. *Parts 60-250 and 60-741.* The basic changes in these parts adopted today were made to conform these two parts to the general consolidation of a number of regulations relating to sections 402 and 503 into Part 60-1. Consequently, a number of sections have been transferred from Parts 60-250 and 60-741 and the remaining sections have been renumbered.

The regulations adopted today impose new reporting and recordkeeping requirements. These new requirements have not been cleared by the Office of Management and Budget under the Federal Reports Act, however. The Office of Federal Contract Compliance Programs is in the process of preparing the necessary clearances required under the Federal Reports Act for all its recordkeeping and reporting requirements. Accordingly, the new reporting and recordkeeping requirements adopted in the regulations published today will be held in abeyance until OMB has granted the necessary clearances under the Federal Reports Act. This means that contractors will not be required to keep records or report on items which are adopted for the first time today.

After the new recordkeeping and reporting requirements have been cleared by OMB, appropriate notice of the effective dates of the new reporting and recordkeeping requirements will be published in the *Federal Register*. The new reporting and recordkeeping requirements which will be held in abeyance include those which increase and decrease recordkeeping and reporting requirements.

The new recordkeeping and reporting requirements which will be held in abeyance are:

1. *Section 60-1.7 (a).* This section presently requires contractors with 50 employees and a contract of at least \$50,000 to file the EEO-1 report. The new requirements would expand this reporting requirement to include contractors which have 50 employees and contracts which total \$50,000 in a 12-month period. The new requirement is held in abeyance until OMB clearance and further notice in the *Federal Register*.

(b) The present regulations also require construction contractors performing work at the site of construction to file the EEO-1 report if they have 50 employees and a contract of at least \$50,000. The regulations adopted today would delete this requirement and such contractors would file only the CC-257. However, until the deletion of this requirement is cleared by OMB such contractors must continue to report.

2. *Section 60-1.8.* This section presently requires contractors to maintain nonsegregated facilities and to so certify "in the form approved by the Director" of OFCCP. The quoted language makes the certification subject to the Federal Reports Act. This requirement is deleted from the regulations adopted today. However, it must be continued until approved by OMB.

3. *Section 60-1.40 (a)* This section requires contractors with 50 employees and a contract of at least \$50,000 or Government bills of lading which total \$50,000 in a 12-month period to develop and implement an affirmative action program. Certain recordkeeping and reporting requirements are associated with developing and implementing an AAP. The regulation adopted today would expand the written AAP requirement to those contractors with 50 employees and contracts which total \$50,000. This new requirement, as it relates to reports and recordkeeping, will be held in abeyance until OMB has cleared the new requirement and notice has been published in the *Federal Register*. However, contractors with Government bills of lading which total \$50,000 will continue to keep records and report as in the past. In addition, contractors covered for the first time by the AAP requirement will also be obligated to prepare and implement the AAP although they will not be required to keep any new records or make any new reports.

(b) the written AAP also is being required for the first time of construction contractors with regard to their noncraft

employees if they have 50 such employees and a \$50,000 contract or contracts which total \$50,000 in a 12-month period. The reporting and recordkeeping requirements but not the requirement to develop and implement the AAP is held in abeyance until OMB has cleared the reporting and recordkeeping requirements and until further notice in the *Federal Register*.

4. *Section 60-2.1.* This section repeats the requirements of § 60-1.40. See item 3 above.

5. *Section 60-2.3.* This section requires contractors to submit their AAPs and supporting documentation within 15 days of receipt of a request from OFCCP. The present requirement is 30 days. The 30-day requirement will remain in effect until the new time frame has been cleared by OMB.

It has been determined that this document does not contain a major proposal requiring the preparation of a regulatory analysis under Executive Order 12044 (43 FR 12661) or under the Department of Labor's guidelines implementing Executive Order 12044.

This document was prepared under the direction and control of Weldon J. Rougeau, Director, Office of Federal Contract Compliance Programs.

Accordingly, 41 CFR Chapter 60 is amended by removing Part 60-60 and by revising Parts 60-1, 60-2, 60-4, 60-20, 60-30, 60-50, 60-250 and 60-741 as set forth below.

December 22, 1980.

Ray Marshall,

Secretary of Labor.

**CHAPTER 60—OFFICE OF FEDERAL CONTRACT COMPLIANCE PROGRAMS, EQUAL EMPLOYMENT OPPORTUNITY, DEPARTMENT OF LABOR**

*Part*

- 60-1 Obligations of contractors and subcontractors.
- 60-2 Affirmative action programs.
- 60-3 Guidelines on employee selection procedures.
- 60-4 Construction contractors—affirmative action requirements.
- 60-20 Sex discrimination guidelines.
- 60-30 Rules of practice for administrative proceedings to enforce equal opportunity under Executive Order 11246, Section 402 and Section 503.
- 60-40 Examination and copying of OFCCP documents.
- 60-50 Guidelines on discrimination because of religion or national origin.
- 60-250 Affirmative action obligations of contractors and subcontractors for disabled veterans and veterans of the Vietnam era.
- 60-741 Affirmative action obligations of contractors and subcontractors for handicapped workers.

## PART 60-1—OBLIGATIONS OF CONTRACTORS AND SUBCONTRACTORS

### Subpart A—Preliminary Matters; Equal Opportunity Clause; Compliance Reports

#### Sec.

- 60-1.1 Purpose and application.
- 60-1.2 Administrative responsibility.
- 60-1.3 Definitions.
- 60-1.4 Equal opportunity clause.
- 60-1.5 Exemptions.
- 60-1.6 [Reserved]
- 60-1.7 Reports and other required information.
- 60-1.8 Segregated facilities.
- 60-1.9 Compliance by labor unions and by recruiting and training agencies.
- 60-1.10 Foreign government practices.

### Subpart B—General Enforcement; Compliance review and Complaint Procedure

- 60-1.20 Compliance reviews.
- 60-1.21 Preaward reviews.
- 60-1.22 Filing complaints.
- 60-1.23 Contents of complaint.
- 60-1.24 Processing complaints.
- 60-1.25 Show cause notices and notices of violations.
- 60-1.26 Conciliation agreements.
- 60-1.27 Assumption of jurisdiction by the Director.
- 60-1.28 Intimidation and interference.
- 60-1.29 Enforcement proceedings.
- 60-1.30 Debarment and contract ineligibility list.
- 60-1.31 Petition for reinstatement for debarred contractors.

### Subpart C—Ancillary Matters

- 60-1.40 Affirmative action programs.
- 60-1.41 Solicitations or advertisements for employees.
- 60-1.42 Notices to be posted.
- 60-1.43 Access to records and site of employment.
- 60-1.44 Rulings and interpretations.
- 60-1.45 Adaptation of language.
- 60-1.46 Incorporation by reference.
- 60-1.47 Incorporation by operation of law.
- 60-1.48 Request for hearing after compliance.
- 60-1.49 Existing contracts and subcontracts.
- 60-1.50 Delegation of authority by the Director.

Authority: Sec. 201, 202, 205, 211, 301, 302, 303, 401, E.O. 11246 (30 FR 12319), as amended by E.O. 12086; Sec. 402 of the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended (38 U.S.C. 2012); Sec. 503 of the Rehabilitation Act of 1973, (29 U.S.C. 793), as amended by Sec. 111(a), Pub. L. 93-516, 88 Stat. 1619 (29 U.S.C. 706) and by Sections 119 and 122 of the Rehabilitation Comprehensive Services and Development Disabilities Amendment of 1978, Pub. L. 95-602, 92 Stat. 2955 and Executive Order 11758.

## Subpart A—Preliminary Matters Equal Opportunity Clause; Compliance Reports

### § 60-1.1 Purpose and application.

(a) The purpose of the regulations in this part is to set forth the general obligations of Government contractors and subcontractors (hereinafter referred to simply as contractor; see definition of contractor in § 60-1.3) and of contractors performing on federally assisted construction contracts and subcontracts (hereinafter referred to simply as contract; see definition of contract in § 60-1.3) under Executive Order 11246, and to promote and ensure equal opportunity for all persons, without regard to race, color, religion, sex, or national origin, employed or seeking employment with Government contractors or with contractors performing under federally assisted construction contracts. The regulations in this part also set forth some general obligations which are equally applicable to contractors covered by section 503 of the Rehabilitation Act of 1973, as amended, and section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974. When the regulations in this part implement sections 402 and 503 the regulations expressly indicate that fact. Specific obligations of contractors covered under the three laws are set forth in other parts of the regulations in this chapter.

(b) The regulations in this part apply to all contracting agencies of the Government and to contractors which perform under Government contracts. The regulations in this part also apply to all agencies of the Government administering programs involving Federal financial assistance which results in a construction contract, to applicants seeking or receiving such assistance and to all contractors performing under construction contracts which are related to any such programs. The procedures set forth in the regulations in this chapter govern all disputes relative to a contractor's compliance with its obligations under the three laws regardless of whether its contract contains a "Disputes" clause. Failure of a contractor or applicant to comply with any provision of the regulations in this part shall be grounds for the imposition of any or all the sanctions authorized by the Order or by the regulations implementing sections 402 and 503. The regulations in this chapter do not apply in any action taken to effect compliance with respect to employment practices subject to Title VI of the Civil Rights Act of 1964. The rights and remedies of the Government hereunder are not exclusive and do not

affect rights and remedies provided elsewhere by law, regulation, or contract. Neither do the regulations limit the exercise by the Secretary of powers not herein specifically set forth but granted to him/her by the Order or by sections 402 and 503.

### § 60-1.2 Administrative responsibility.

The Director has been delegated authority and assigned responsibility for carrying out the responsibilities assigned to the Secretary under the Executive Order. All correspondence regarding the Order should be directed to the Director, Office of Federal Contract Compliance Programs, Employment Standards Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

### § 60-1.3 Definitions.

As used in this chapter, "Act" means the Vietnam Era Veterans Readjustment Assistance Act, as amended, (38 U.S.C. 2012), and the Rehabilitation Act, as amended, (29 U.S.C. 793), as applicable.

"Administering agency" means any department, agency or establishment in the executive branch of the Government, including any wholly owned Government corporation, which administers a program involving federally assisted construction contracts.

"Administrative complaint" means the pleading which commences an administrative enforcement proceeding under the Order, section 402 or section 503.

"Administrative law judge" means an administrative law judge appointed as provided in 5 U.S.C. 3105 and subpart B of part 930 of title 5 of the Code of Federal Regulations (see 37 FR 16787) and qualified to preside at hearings under 5 U.S.C. 557.

"Affirmative action clause" means the contract clause set forth at 41 CFR 60-250.3 or at 41 CFR 60-741.3, as applicable.

"Agency" means any contracting or any administering agency of the Government.

"Applicant" means a person applying for Federal assistance involving, or which results in, a construction contract or a person who has received such assistance. "Applicant" also means a person who is seeking employment or who has sought employment with a contractor.

"Assistance Secretary" means the Assistant Secretary of Labor for Employment Standards or his/her designee.

"Complaint" means a charge filed with OFCCP by an employee, former

employee, applicant for employment or by a third party alleging discriminatory employment practices under the Order, or under section 402 or section 503.

"Construction work" means the construction, rehabilitation, alteration, conversion, extension, demolition or repair of buildings, highways, or other changes or improvements to real property, including facilities providing utility services. The term also includes the supervision, inspection, and other onsite functions incidental to the actual construction.

"Contract" means any Government contract or subcontract, and with respect to the Order, any federally-assisted construction contract or subcontract. The regulations in this chapter frequently refer only to contract. The word subcontract is subsumed under the word contract.

"Contracting agency" means any department, agency, establishment, or instrumentality in the executive branch of the Government, including any wholly owned Government corporation, which enters into contracts.

"Contractor" means a Government contractor or subcontractor, and with respect to the Order, a federally-assisted construction contractor or subcontractor. For the purpose of Subpart B of this part and part 60-30 of this chapter the term also includes any person who has held a contract. The regulations in this chapter frequently refer only to contractor. The word subcontractor is subsumed under the word contractor.

"Director" means the Director of the Office of Federal Contract Compliance Programs of the United States Department of Labor or his/her designee.

"Disabled veteran" means a person entitled to disability compensation under laws administered by the Veterans Administration for disability rated at 30 per centum or more, or a person whose discharge or release from active duty was for a disability incurred or aggravated in the line of duty.

"Establishment," except as used in the definition of "administering agency" and "contracting agency" contained in this section, means the location of a contractor's business or operations generally having some component which exercises personnel authority and responsibilities. Small locations (i.e., those having fewer than 50 employees) may be considered to be part of an establishment in a different location if such locations are in the same Standard Metropolitan Statistical Area or labor area and are within the same chain of command.

"Equal opportunity clause" means the contract provisions set forth in section 202 of the Order, and in § 60-1.4(a) or (b), as appropriate.

"Facilities" means buildings, structures, equipment, roads, walks, parking lots or other real or personal property.

"Federally assisted construction contract" means any agreement or modification thereof between any applicant and a person for construction work which is paid for in whole or in part with funds obtained from the Government or borrowed on the credit of the Government pursuant to any Federal program involving a grant, contract, loan, insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant contract, loan, insurance, or guarantee, or any application or modification thereof approved by the Government for a grant, contract, loan insurance, or guarantee under which the applicant itself participates in the construction work.

"Government" means the Government of the United States of America.

"Government contract" means any agreement or modification thereof between any contracting agency and any person for the furnishing of supplies or services or for the use of real or personal property, including lease arrangements. But sections 402 and 503 do not apply to contracts for the use of real property. The term "services", as used in this section includes, but is not limited to the following services: Utility, construction, transportation, research, insurance, and fund depository, irrespective of whether the Government is the purchaser or seller. The term "Government contract" does not include (1) agreements in which the parties stand in the relationship of employer and employee and (2) federally assisted construction contracts.

"Handicapped individual" means any person who (a) has a physical or mental impairment which substantially limits one or more of the person's major life activities; (b) has a record of such impairment; or (c) is regarded as having such an impairment. A handicapped individual is "substantially limited" if he or she is likely to experience difficulty in securing, retaining, or advancing in employment because of a real or perceived handicap. For purposes of this chapter, "major life activities" includes employment or training. "Regarded as" means the employer perceives the individual as having an impairment whether or not there is an impairment.

"Modification" means any alteration in the terms and conditions of a contract, including supplemental

agreements, amendments, and extensions.

"Order," "Executive Order," or "Executive Order 11246" means parts II, III, and IV of Executive Order 11246 dated September 24, 1965 (30 FR 12319), any Executive Order amending such Order, and any other Executive Order superseding such Order. Order specifically includes the equal opportunity clause and the rules, regulations and orders issued pursuant to the Order. The short form reference of Order is used simply to avoid needless repetition of the above phrases.

"Person" means any natural person, corporation, partnership, unincorporated association, state or local government, and any agency, instrumentality, or subdivision of such a government.

"Prime contractor" means any person holding a contract and, for the purposes of Subpart B of this part and 41 CFR Part 60-30, any person who has held a contract subject to the Order or to sections 402 and 503.

"Qualified disabled veteran" means a disabled veteran as defined in this section 60-1.3 who is capable of performing a particular job, with reasonable accommodation to his or her handicap or disability.

"Qualified handicapped individual" means a handicapped individual capable of performing a particular job with reasonable accommodation to his or her handicap or disability.

"Recruiting and training agency" means any person who refers workers to any contractor or who provides for employment by any contractor.

"Rules, regulations, and relevant orders of the Secretary of Labor" used in paragraph (4) of the equal opportunity clause means rules, regulations, and relevant orders of the Secretary of Labor or his/her designee issued pursuant to the Order.

"Secretary" means the Secretary of Labor, U.S. Department of Labor.

"Section 503" means section 503 of the Rehabilitation Act, as amended. The reference, section 503, specifically includes rules and regulations promulgated pursuant to the Act.

"Section 402" means section 402 of the Vietnam Era Veterans' Readjustment Assistant Act, as amended. The reference, section 402, specifically includes rules and regulations promulgated pursuant to the Act.

"Site of construction" means the general physical location of any building, highway, or other change or improvement to real property which is undergoing construction, rehabilitation, alteration, conversion, extension, demolition, or repair and any temporary location or facility at which a contractor

or other participating party meets a demand or performs a function relating to the contract.

"Subcontract" means any agreement or arrangement between a contractor and any person (in which the parties do not stand in the relationship of an employer and an employee):

(1) For the furnishing of supplies or services or for the use of real or personal property, including lease arrangements, which, in whole or in part, is necessary to the performance of any one or more contracts; or

(2) Under which any portion of the contractor's obligation under any one or more contracts is performed, undertaken, or assumed: *Provided*, That sections 402 and 503 do not apply to contracts relating to real property.

"Subcontractor" means any person holding a subcontract and, for the purposes of Subpart B of this part, any person who has held a subcontract subject to the Order. The term "First-tier subcontractor" refers to a subcontractor holding a subcontract with a prime contractor.

"United States" means the several States, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, Guam, the Panama Canal Zone, American Samoa and the Trust Territory of the Pacific Islands.

"Veteran of the Vietnam Era" means a person (a) who (1) served on active duty for a period of more than 180 days, any part of which occurred between August 5, 1964, and May 7, 1975, and was discharged or released therefrom with other than a dishonorable discharge, or (2) was discharged or released from active duty for a service-connected disability if any part of such active duty was performed between August 5, 1964, and May 7, 1975, and (b) who was so discharged or released within 48 months preceding the alleged violation of the Act.

#### § 60-1.4 Equal opportunity clause.

(a) *Government contracts.* Except as otherwise provided, each contracting agency shall include the following equal opportunity clause contained in section 202 of the Order in each of its Government contracts (and modifications thereof if not included in the original contract):

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractors will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, color, religion, sex, or

national origin. Such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer, recruitment or recruitment advertising, layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

(2) The contractor will in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided by the agency contracting officer, advising the labor union or workers' representative of the contractor's commitments under section 202 of Executive Order 11246 of September 24, 1965, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The contractor will furnish all information and reports required by Executive Order 11246 of September 24, 1965, and by the rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations and orders.

(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of such rules, regulations, or orders, this contract may be canceled, terminated or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The contractor will include the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as may be directed by the Secretary of Labor as a means of enforcing such provisions including sanctions for noncompliance: *Provided, however*, that in the event the contractor becomes involved in, or is threatened with litigation with a

subcontractor with litigation with a subcontractor or vendor as a result of such direction, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

(b) *Federally assisted construction contracts.* (1) Except as otherwise provided, each administering agency shall require the inclusion of the following language as a condition of any grant, contract, loan, insurance, or guarantee involving federally assisted construction which is not exempt from the requirements of the equal opportunity clause:

The applicant hereby agrees that it will incorporate or cause to be incorporated into any contract for construction work, or modification thereof, as defined in the regulations of the Secretary of Labor at 41 CFR Chapter 60, which is paid for in whole or in part with funds obtained from the Federal Government or borrowed on the credit of the Federal Government pursuant to a grant, contract, loan insurance, or guarantee, or undertaken pursuant to any Federal program involving such grant, contract, loan, insurance, or guarantee, the following equal opportunity clause:

During the performance of this contract, the contractor agrees as follows:

(1) The contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, sex, or national origin, such action shall include, but not be limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided setting forth the provisions of this nondiscrimination clause.

(2) The contract will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive considerations for employment without regard to race, color, religion, sex, or national origin.

(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice to be provided advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(4) The contractor will comply with all provisions of Executive Order 11246 of September 24, 1965, and of the rules, regulations, and relevant orders of the Secretary of Labor.

(5) The contractor will furnish all information and reports required by

Executive Order 11246 of September 24, 1965, and by rules, regulations, and orders of the Secretary of Labor, or pursuant thereto, and will permit access to his books, records, and accounts by the administering agency and the Secretary of Labor for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be canceled, terminated, or suspended in whole or in part and the contractor may be declared ineligible for further Government contracts or federally assisted construction contracts in accordance with procedures authorized in Executive Order 11246 of September 24, 1965, and such other sanctions may be imposed and remedies invoked as provided in Executive Order 11246 of September 24, 1965, or by rule, regulation, or order of the Secretary of Labor, or as otherwise provided by law.

(7) The contractor will include the portion of the sentence immediately preceding paragraph (1) and the provisions of paragraphs (1) through (7) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the Secretary of Labor issued pursuant to section 204 of Executive Order 11246 of September 24, 1965, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however,* That in the event a contractor becomes involved in or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the contractor may request the United States to enter into such litigation to protect the interests of the United States.

The applicant further agrees that it will be bound by the above equal opportunity clause with respect to its own employment practices when it participates in federally assisted construction work: *Provided,* That if the applicant so participating is a State or local government, the above equal opportunity clause is not applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

The applicant agrees that it will assist and cooperate actively with the administering agency and the Secretary of Labor in obtaining the compliance of contractors and subcontractors with the equal opportunity clause and the rules, regulations, and relevant orders of the Secretary of Labor, that it will furnish the administering agency and the Secretary of Labor such information as they may require for the supervision of such compliance, and that it will otherwise assist the administering agency in the discharge of the agency's primary responsibility for securing compliance.

The applicant further agrees that it will refrain from entering into any contract or contract modification subject to Executive Order 11246 of September 24, 1965, with a

contractor debarred from, or who has not demonstrated eligibility for Government contracts and federally assisted construction contracts pursuant to the Executive order and will carry out such sanctions and penalties for violation of the equal opportunity clause as may be imposed upon contractors and subcontractors by the administering agency or the Secretary of Labor pursuant to Part II, Subpart D of the Executive order. In addition, the applicant agrees that if it fails or refuses to comply with these undertakings, the administering agency may take any or all of the following actions: Cancel, terminate, or suspend in whole or in part this grant (contract, loan, insurance, guarantee), refrain from extending any further assistance to the applicant under the program with respect to which the failure or refund occurred until satisfactory assurance of future compliance has been received from such applicant; and refer the case to the Department of Justice for appropriate legal proceedings.

*(c) Subcontracts.*

Each nonexempt contractor or subcontractor shall include the equal opportunity clause in each of its nonexempt subcontracts.

*Note.*—See, also, § 60-1.46 and § 60-1.47 regarding incorporation by reference and incorporation by operation of law, respectively.

**§ 60-1.5 Exemptions.**

*(a) General.*—(1) *Transactions of \$10,000 or under.* Contracts not exceeding \$10,000, other than (i) Government bills of lading and (ii) contracts with financial institutions which serve as depositories of Government funds in any amount, or which serve as issuing or redeeming agents for U.S. savings bonds and savings notes or which subscribe to Federal deposit or share insurance, are exempt from the requirements of the Order. In determining the applicability of this exemption to any federally assisted construction contract, the amount of such contract rather than the amount of the Federal financial assistance shall govern. No agency or contractor shall procure supplies or services in a manner so as to avoid applicability of the order: *Provided,* That where a contractor has contracts with the Government in any 12-month period which have an aggregate total value (or can reasonably be expected to have an aggregate total value) exceeding \$10,000, the \$10,000 or under exemption does not apply, and the contracts are subject to the order regardless of whether any single contract exceeds \$10,000.

(2) *Contracts for indefinite quantities.* With respect to contracts for indefinite quantities (including, but not limited to, open end contracts, requirement-type contracts, Federal Supply Schedule contracts, "call-type" contracts, and purchase notice agreements), the equal opportunity clause shall be included

unless the purchaser has reason to believe that the amount to be ordered in any year under such contract will not exceed \$10,000. The applicability of the equal opportunity clause shall be determined by the purchaser at the time of award for the first year, and annually thereafter for succeeding years, if any. Notwithstanding the above, the equal opportunity clause shall be applied to such contract whenever the amount of a single order exceeds \$10,000. Once the equal opportunity clause is determined to be applicable, the contract shall continue to be subject to such clause for its duration, regardless of the amounts ordered, or reasonably expected to be ordered in any year.

*(3) Work outside the United States.*

Contracts are exempt from the requirements of the equal opportunity clause with regard to work performed outside of the United States by employees who were not recruited within the United States.

*(4) Contracts with state or local governments.* The Order, and sections 402 and 503, with respect to a contract with a state or local government (or any agency thereof) shall apply only to the agency or agencies of such government which perform on the contract. Agencies, instrumentalities or subdivisions of state or local governments, except educational institutions, utilities, and medical facilities, are exempt from filing the annual compliance report required by § 60-1.7(a)(1) of this part and from maintaining a written affirmative action program prescribed by § 60-1.40 of this part and Part 60-2 of this chapter.

*(5) Contracts with certain educational institutions.* It shall not be a violation of the equal opportunity clause for a school, college, university, or other educational institution or institution of learning to hire and employ employees of a particular religion if such school, college, university, or other educational institution or institution of learning is, in whole or in substantial part, owned, supported, controlled, or managed by a particular religion or by a particular religious corporation, association, or society, or if the curriculum of such school, college, university, or other educational institution or institution of learning is directed toward the propagation of a particular religion. The primary thrust of this provision is directed at religiously oriented church-related colleges and universities and should be so interpreted.

*(6) Work on or near Indian reservations.* It shall not be a violation of the equal opportunity clause for a contractor to extend a publicly announced preference in employment to

Indians living on or near an Indian reservation in connection with employment opportunities on or near an Indian reservation. The use of the word "near" would include all that area where a person seeking employment could reasonably be expected to commute to and from in the course of a work day. Contractors extending such a preference shall not, however, discriminate among Indians on the basis of religion, sex, or tribal affiliation, and the use of such a preference shall not excuse a contractor from complying with the other requirements contained in this chapter.

(b) *Specific contracts and facilities—*

(1) *Specific contracts.* The Director may exempt an agency or any person from requiring the inclusion of any or all of the equal opportunity clause in any specific contract or subcontract when he/she deems that special circumstances in the national interest so require. The Director may also exempt groups or categories of contracts or subcontracts of the same type where he/she finds it impracticable to act upon each request individually or where group exemptions will contribute to convenience in the administration of the Order.

(2) *Facilities not connected with contracts.* The Director may exempt from the requirements of the equal opportunity clause any of a contractor's facilities which he/she finds to be in all respects separate and distinct from activities of the contractor related to the performance of the contract, provided that he/she also finds that such an exemption will not interfere with or impede the effectuation of the Order.

(c) *National security.* Any requirement set forth in the regulations in this part shall not apply to any contract whenever the head of an agency determines that such contract is essential to the national security and that its award without complying with such requirement is necessary to the national security. Upon making such a determination, the head of the agency will notify the Director in writing within 30 days.

(d) *Withdrawal of exemption.* When any contract is of a class exempted under this section, the Director may withdraw the exemption for a specific contract or group of contracts when in his/her judgment such action is necessary or appropriate to achieve the purposes of the Order. Such withdrawal shall not apply to contracts awarded prior to the withdrawal, except that in procurements entered into by formal advertising, or the various forms of restricted formal advertising, such withdrawal shall not apply unless the

withdrawal is made more than 10 calendar days before the date set for the opening of the bids.

§ 60-1.6 [Reserved]

§ 60-1.7 *Reports and other required information.*

(a) *Requirements for contractors.* (1) Each contractor shall file annually, on or before the 31st day of March, complete and accurate reports on Standard Form 100 (EEO-1) promulgated jointly by the Office of Federal Contract Compliance Programs and the Equal Employment Opportunity Commission or such form as may hereafter be promulgated in its place if such contractor (i) has 50 or more employees; and has a contract of \$50,000 or more; or (ii) has contracts which total \$50,000 or more, or which reasonably may be expected to total \$50,000 or more, in any 12-month period; or (iii) is a financial institution which serves as a depository for Government funds in any amount, acts as an issuing or redeeming agent for U.S. savings bonds and notes in any amount, or subscribes to federal deposit or share insurance.

(2) Each contractor required by § 60-1.7(a)(1) to submit reports shall file such report within 30 days after the award to it of a contract unless such contractor has submitted such a report within 12 months preceding the date of the award. Subsequent reports shall be submitted annually in accordance with § 60-1.7(a)(1), or at such other intervals as the Director may require. The Director may extend the time for filing any report.

(3) The Director or the applicant, on their own motions, may require a contractor to keep employment or other records and to furnish, in the form requested, within reasonable limits, such information as the Director or the applicant deems necessary for obtaining compliance under the Order.

(4) Failure to file timely, complete and accurate reports as required constitutes noncompliance with the contractor's obligations under the Order and is ground for the imposition of any sanction authorized by the Order.

(b) *Requirements for bidders or prospective prime contractors* (1) *Certification of compliance with Part 60-2: Affirmative Action Programs.* Each contracting agency shall require each bidder or prospective prime contractor to state in the bid or in writing at the outset of negotiations for the contract: (i) Whether it has developed and has on file at each establishment affirmative action programs pursuant to Part 60-2 of this chapter; (ii) whether it has participated in any previous contract or subcontract subject to the Order; and

(iii) whether it has filed with the Joint Reporting Committee, the Director or the Equal Employment Opportunity Commission all reports due under the applicable filing requirements.

(2) *Additional information.* A bidder or prospective prime contractor shall be required to submit such information as the Director requests prior to the award of the contract. When a determination has been made to award the contract to a specific contractor, such contractor shall be required, prior to award, or after the award, or both, to furnish such other information as the applicant or the Director requests.

§ 60-1.8 *Segregated facilities.*

To comply with its obligations under the Order, a contractor must ensure that facilities provided for employees are provided in such a manner that segregation on the basis of race, color, religion, sex or national origin cannot result. The contractor may neither require such segregated use by written or oral policies nor tolerate such use by employee custom. This obligation extends to all contracts regardless of the amount of the contract. The term "facilities" as used in this section means waiting rooms, work areas, restaurants, and other eating areas, time clocks, restrooms, wash rooms, locker rooms, and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees: *Provided,* That separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

§ 60-1.9 *Compliance by labor unions and by recruiting and training agencies.*

(a) The policy of OFCCP is to use its best efforts, directly and through agencies, contractors, applicants, state and local officials, public and private agencies, and all other available instrumentalities, to cause any labor union, recruiting and training agency or other representative of workers who are or may be engaged in work under contracts to cooperate with, and to comply in the implementation of, the purposes of the Order and of sections 402 and 503.

(b) To effectuate the purposes of paragraph (a) of this section, the Director may hold hearings, public or private, with respect to the practices and policies of any such labor union or recruiting and training agency.

(c)(1) The collective bargaining representatives shall be given written notice of the commencement of any on site investigation of compliance with the

Executive Order or with section 402 or 503 at the same time the contractor is notified.

(2) Whenever compliance with the Order or with section 402 or 503 effects the terms or conditions of employment which are governed by the provisions of a collective bargaining agreement, the collective bargaining representatives shall be given notice and an opportunity to present their positions and supporting evidence to OFCCP and shall be invited to participate in conciliation discussions to the extent those discussions relate to any proposed changes, prior to any resolution or agreement between OFCCP and the contractor relating to such matters. (See 41 CFR 60-1.25(e).)

(d) The Director may notify any Federal, state or local agency of his/her conclusions and recommendations with respect to any such labor organization or recruiting and training agency which in his/her judgment has failed to cooperate with OFCCP, agencies, contractors or applicants in carrying out the purposes of the Order or of sections 402 and 503. The Director also may notify the Equal Employment Opportunity Commission, the Department of Justice, or other appropriate Federal agencies when there is reason to believe that the practices of any such labor organization or agency violate Title VII of the Civil Rights Act of 1964 or other provisions of Federal law.

#### § 60-1.10 Foreign government practices.

Contractors shall not discriminate on the basis of race, color, religion, sex, or national origin when hiring or making employee assignments for work to be performed in the United States or abroad. Contractors are exempted from this obligation only when hiring persons outside of the United States for work to be performed outside of the United States (see 41 CFR 60-1.5(a)(3)). Therefore, a contractor hiring workers in the United States for either Federal or nonfederally connected work shall be in violation of Executive Order 11246, as amended, by refusing to employ or assign any person because of race, color, religion, sex, or national origin regardless of the policies of the country where the work is to be performed or for whom the work will be performed. Should any contractor be unable to acquire a visa of entry for any employee or potential employee to a country in which or with which it is doing business, and which refusal it believes is due to the race, color, religion, sex, or national origin of the employee or potential employee, the contractor must immediately notify the Department of State and the Director of such refusal.

### Subpart B—General Enforcement; Review and Complaint Procedure

#### § 60-1.20 Compliance reviews.

(a) The purpose of a compliance review is to determine if the contractor maintains nondiscriminatory hiring and employment practices and is taking affirmative action to ensure that applicants are employed and that employees are placed, trained, upgraded, promoted, terminated, and otherwise treated during employment without regard to race, color, religion, sex, national origin, veteran status or handicap. It shall consist of a comprehensive analysis and evaluation of each aspect of the aforementioned practices and policies and conditions resulting therefrom. Compliance reviews normally are conducted in three stages (desk audit, on-site review and off-site analysis). The desk audit may be shortened or omitted, however, when an immediate on-site review (e.g., where a preaward compliance review is involved, where intimidation is alleged or other circumstances do not permit a desk audit) is required. (See, 41 CFR 60-1.24(b).)

(b) Compliance reviews generally are conducted under the direction of an OFCCP Assistant Regional Administrator, but the Director is authorized to designate other OFCCP officials for this purpose.

(c) Where deficiencies or violations are found, reasonable efforts shall be made to secure compliance through conciliation and persuasion. Before the contractor can be found to be in compliance with the Order, section 402 or section 503, it must make a specific commitment, in a written conciliation agreement or a letter of commitment, as appropriate, to correct any such deficiencies or violations. Minor technical deficiencies usually may be resolved in a letter of commitment from the contractor. The agreement or letter must include the precise actions to be taken and dates for completion. The time period allotted shall be no longer than the minimum period necessary to effect such changes. Upon approval by OFCCP, the contractor may be considered in compliance, on condition that the actions are faithfully taken. The contractor shall be notified, however, that taking such actions does not preclude future determinations of noncompliance based either on a finding that the actions are not sufficient to achieve compliance or on violations not previously revealed in a compliance review or complaint investigation.

#### § 60-1.21 Preaward reviews.

(a) The purpose of a preaward compliance review is to determine whether a responsive contractor or bidder will be able to comply with the requirements of the Order and with sections 402 and 503.

(b) Each contracting agency shall include in the invitation for bids for each formally advertised nonconstruction contract or state at the outset of negotiations for each negotiated nonconstruction contract, that if the award, when let, should exceed \$1 million, the prospective contractor and known first-tier subcontractors with subcontracts in excess of \$1 million will be subject to a compliance review before the award of the contract.

(c) Prior to the award of any nonconstruction contract in excess of \$1 million, the contracting agency shall give written notice of the proposed award to the OFCCP Assistant Regional Administrator of the Region in which the contract is to be performed as far in advance of the award date as possible. In any event, the notice shall be given no less than 45 days in advance of the award date. The notice shall identify the projected prime contractor and all known first-tier subcontractors or prospective subcontractors projected to receive subcontracts in excess of \$1 million.

(d) If the establishment where the contract or subcontract is to be performed has 250 or more employees and no compliance review of that establishment has been conducted in the 24 months prior to the notification, a compliance review of the establishment shall be commenced on a priority basis.

(e) OFCCP is authorized to conduct preaward compliance reviews of any contractor receiving a contract in excess of \$1 million even though the establishment has less than 250 employees and a compliance review has been conducted within the last 24 months. In determining whether to conduct a preaward review under this paragraph (e), OFCCP may consider, for example, (1) the past EEO performance of the contractor, including its current EEO profile and indications of underutilization; (2) the volume and nature of complaints filed by employees or applicants against the contractor; (3) whether the contractor is in a growth industry; (4) the level of employment or promotional opportunities resulting from the expansion of or turnover in the contractor's work force; (5) the employment opportunities likely to result from the contract in issue; and (6)

whether resources are available to conduct the review.

(f) If, prior to the award date of the contract or subcontract, the contracting agency has not provided the notice required by paragraph (c) of this section, the preaward compliance review has not been completed or the contractor-bidder's alleged noncompliance has not been resolved, the Director may request the contracting agency to delay the award of the contract, until such time as the contractor is found eligible or ineligible for the contract in accordance with the preliminary hearing procedures in 41 CFR 60-30.38 of this chapter. The request shall also be applicable to all other contracts which are then (or become) pending at the establishment where the preaward review which triggered the request was conducted. The request shall not be applicable to contracts pending at other establishments which are not part of the preaward review. If such a request is made, the award of the contract(s) shall be delayed, unless the contracting agency determines that a delay is contrary to the national security of the United States. Written notification of such determination shall be given to the Director within 30 days of the determination (see 41 CFR 60-1.5(c)); *Provided*, That unless the preliminary hearing procedures in 41 CFR 60-30.38 have been invoked or will be invoked within 15 working days, Executive Order, and sections 402 and 503 clearance for award of the contract shall not be withheld.

(g) The preaward review authorized by this section shall be conducted in accordance with the procedures of § 60-1.20 of this part to the extent that those procedures are not inconsistent with the provisions of this section.

(h) If by the award date, the preaward compliance review has not been completed or a decision to invoke the preliminary hearing procedure in 41 CFR 60-30.38 of this chapter has not been made, Executive Order, and sections 402 and 503 clearance for the contract shall be granted, except as provided in paragraph (f) of this section, and the review shall be completed on an expedited basis.

#### § 60-1.22 Filing complaints.

Complaints shall be filed within 180 days of the alleged violation unless the time for filing is extended by the Director for good cause shown. Complaints may be filed with the OFCCP, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, or with any OFCCP regional or area office.

#### § 60-1.23 Contents of complaint.

(a) The complaint shall include the name, address, and telephone number of the complainant, the name and address of the contractor committing the alleged discrimination, a description of the acts considered to be discriminatory, and any other pertinent information which will assist in the investigation and resolution of the complaint. The complaint shall be signed by the complainant or his/her authorized representative. Signed third party complaints which allege class-type discrimination and which do not identify the alleged discriminatees will be accepted, whether or not the third party signing the complaint is an authorized representative, provided that the other information required by this paragraph is included.

(b) If a complaint contains incomplete information, OFCCP shall seek the needed information from the person filing the complaint. In the event such information is not furnished within 60 days of the date of such request, the case may be closed.

#### § 60-1.24 Processing complaints.

(a) *Complaints.* OFCCP may refer individual complaints to the Equal Employment Opportunity Commission (EEOC) for processing under Title VII of the Civil Rights Act of 1964, as amended, in lieu of processing them under the Order. Upon referring a complaint to the EEOC, OFCCP shall promptly notify the complainant. OFCCP also may transmit a copy of any complaint to EEOC and to any state or local agency with jurisdiction over the subject of the complaint.

(b) *Complaint investigations under the Order.* (1) OFCCP will retain and investigate class or systemic complaints. However, where EEOC is about to initiate or is in the process of an investigation of any contractor against which OFCCP has received a class complaint, OFCCP may, at the request of EEOC, refer the complaint to EEOC for processing in order to avoid duplication and to assure effective law enforcement. In resolving such class complaints, the agencies will consult and coordinate with each other to ensure that the resolution of the complaints comports with the law enforcement requirements of each agency.

(2) During a compliance review, OFCCP will investigate and resolve individual complaints on file with OFCCP and unresolved at the commencement of the compliance review; *Provided*, That resolution of such individual complaints does not unduly delay the completion of the compliance review. With regard to

unresolved individual complaints which have been referred to EEOC, OFCCP will consult with EEOC at the commencement of the compliance review to determine whether EEOC or OFCCP will investigate and resolve such complaints.

(c) *Resolution of matters.* (1) If any complaint investigation indicates a violation of the Order, reasonable efforts shall be made to secure compliance through conciliation and persuasion. (2) Where any complaint investigation indicates a violation of the Order and the matter has not been resolved by informal means, the matter may be recommended to the Office of the Solicitor for consideration of legal enforcement proceedings.

#### § 60-1.25 Show cause notices and notices of violation.

(a) *General Rule.* At the conclusion of a compliance review or complaint investigation conducted pursuant to the Order or sections 402 and 503, a notice to show cause or a notice of violation shall be served on the contractor if the deficiencies which were disclosed in the review or investigation have not been corrected through a conciliation agreement, letter of commitment or consent decree. Where appropriate, show cause notices may be used at any other stage of the review.

(b) *Show cause notices—exceptions to the general rule.* A notice to show cause why enforcement proceedings should not be initiated shall be used when an uncorrected deficiency is disclosed in a compliance review or complaint investigation, except when: (1) A notice of violation under paragraph (d) of this section is appropriate; (2) a violation of a conciliation agreement under paragraph (f) of this section is alleged; (3) one or more special violations as discussed in § 60-1.29(d) of this part is alleged; or (4) OFCCP contemplates judicial enforcement under § 60-1.29(f) of this part.

(c) *Show cause notices—contents and timeframes.* (1) A notice to show cause should contain:

(i) An itemization of the sections of the Order, sections 402 and 503, and of the regulations with which the contractor has been found in violation, with a description of the conditions, practices, facts, or circumstances which give rise to each violation;

(ii) A statement of the corrective actions proposed by OFCCP to achieve compliance;

(iii) A request for a written response to the findings, including commitments to corrective actions or the presentation of opposing facts and evidence; and

(iv) A suggested date for the conciliation conference.

(2) The contractor shall be accorded 30 days, or such longer period as may be authorized by the Director or his/her designee, to establish that it is not covered by or is in compliance with the Order and sections 402 and 503, or to enter into a conciliation agreement or letter of commitment.

(d) *Notice of Violation.* (1) A notice of violation may be used where circumstances do not permit 30 days to resolve the matters (e.g. pre-award compliance reviews), and may be used at any time during the compliance review or complaint investigation (e.g. where serious violations such as intimidation, or interference with the orderly process of the review or investigation are alleged). A notice of violation shall contain a short and plain statement of the deficiency adequate to put the contractor on notice of the violation with which it is charged. The notice shall accord the contractor a reasonable period of time (not to exceed 15 days) in which to respond and for conciliation.

(2) A notice of violation also may be used when the compliance review or complaint investigation discloses a violation of a matter which is the subject of a conciliation agreement, letter of commitment or consent or other decree between the contractor and the Department of Labor, the Attorney General acting on behalf of OFCCP, or a former compliance agency (see 41 CFR 60-1.25(b)).

(e) *Participation by collective bargaining representatives.* When a notice to show cause or a notice of violation proposes a change in the terms or conditions of employment which are governed by the provisions of a collective bargaining agreement the collective bargaining representatives shall be given notice of the proposed change and an opportunity to present their positions and supporting evidence to OFCCP and shall be invited to participate in conciliation discussions to the extent those discussions relate to such changes, prior to any resolution or agreement between OFCCP and the contractor relating to such matters.

(f) *Procedure when a conciliation agreement is violated.* When a conciliation agreement has been violated, the following procedures are applicable: (1) A written notice shall be sent to the contractor setting forth the violations alleged and summarizing the supporting evidence. The contractor shall have 15 days from receipt of the notice to respond, except in those cases in which such a delay would result in irreparable injury to the employment

rights of affected employees or applicants.

(2) During the 15-day period the contractor may demonstrate in writing that it has not violated its commitments.

(3) If the contractor is unable to demonstrate that it has not violated its commitments, or if the notice alleges irreparable injury, enforcement proceedings may be initiated immediately without issuing a show cause notice or proceeding through any other requirement contained in this chapter.

#### § 60-1.26 Conciliation agreements.

(a) A conciliation agreement is a written agreement between OFCCP and a contractor by which the contractor undertakes specific obligations to correct or remedy noncompliance with the Order or with sections 402 and 503. A conciliation agreement normally is required where a compliance review, complaint investigation or some other review discloses violations of the Order or of sections 402 and 503, and (1) the contractor is willing to correct the violations or deficiencies and (2) OFCCP determines that a settlement (rather than formal enforcement) is appropriate. The agreement shall provide for the remedial relief necessary to correct the violations or deficiencies, which may include priority rights to hire or promotion, training, back pay, front pay and retroactive seniority, etc., for an affected class or for individuals, as appropriate.

(b) A conciliation agreement shall include (1) A statement of each deficiency or violation; (2) the corresponding precise remedial action to be taken and a timetable for implementation; (3) a requirement for periodic reporting to OFCCP as to implementation of the agreement, if appropriate; and (4) a copy of the notice to show cause or notice of violation when such has been previously issued.

(c) A conciliation agreement is effective when it has been signed by the contractor and the proper Assistant Regional Administrator, OFCCP, unless within 45 days of receipt from the Assistant Regional Administrator, the Director rejects the agreement.

(d) Conciliation agreements shall not be entered into after enforcement proceedings have been initiated. Settlements of enforcement proceedings by the Office of the Solicitor normally will be by consent decree.

(e) Letters of commitment, in lieu of conciliation agreements, are appropriate for resolving minor technical deficiencies.

#### 60-1.27 Assumption of jurisdiction by the Director.

(a) The Director may inquire into the status of any pending matter. Where the Director considers it necessary or appropriate to the achievement of the purposes of the Order or of sections 402 and 503, he/she may assume jurisdiction over the matter and proceed as provided in this chapter. Whenever the Director assumes jurisdiction over any matter, he/she may conduct, or have conducted, such investigation, hold such hearings, including record hearings, and hearings under § 60-1.9(b) of this part, make such findings, issue such recommendations and directives and take such other action as may be necessary or appropriate to achieve the purposes of the Order or of sections 402 and 503.

(b) For reasonable cause shown, the Director may, on his/her own motion or pursuant to a request, reconsider or cause to be reconsidered a matter arising under the Order or under sections 402 and 503 which presently is pending in OFCCP.

#### § 60-1.28 Intimidation and interference.

The sanctions and penalties contained in Subpart D of the Order, and in Parts 60-250 and 60-741 of this chapter may be exercised against any contractor or applicant which fails to take all necessary steps to ensure that no person intimidates, threatens, coerces, or discriminates against any individual for the purpose of interfering with the filing of a complaint, furnishing information, or assisting or participating in any manner in an investigation, compliance review, hearing, or any other activity related to the administration of the Order, sections 402 and 503 or any other Federal, state or local laws requiring equal employment opportunity. Such sanctions and penalties also apply to contractors or applicants which discriminate against a person because he or she has opposed any employment practice unlawful under the Order, sections 402 and 503, Title VII of the Civil Rights Act of 1964, as amended, or any other Federal, state or local laws.

#### § 60-1.29 Enforcement proceedings.

(a) *General.* If, as a result of a compliance review, complaint investigation or some other review, OFCCP believes that the Order or that sections 402 and 503 have been violated, the matter may be referred to the Office of the Solicitor for consideration of legal enforcement proceedings.

(b) *Violations.* Violations may be found based upon, *inter alia*, any of the following: (1) the results of a compliance review or complaint investigation; (2) analysis of an affirmative action

program; (3) the results of an on-site review of the contractor's compliance with the Order or of sections 402 and 503; (4) a contractor's refusal or failure to submit an affirmative action program; (5) a contractor's refusal or failure to permit an on-site compliance review or complaint investigation to be conducted; (6) a contractor's refusal or failure to maintain records and other information, or to supply copies of such records or information required to be maintained or supplied by the Order or by sections 402 and 503; and (7) any substantial or material violation of the contractual provisions of the Order or of the regulations implementing sections 402 and 503.

(c) *Administrative enforcement proceedings.* Administrative enforcement proceedings are brought by the Office of the Solicitor and shall be conducted under the Rules of Practice for Administrative Proceedings to Enforce Equal Opportunity under Executive Order 11246, Section 402 and Section 503 contained in Part 60-30 of this chapter. Administrative enforcement proceedings may be commenced to enjoin violations of the Order or of sections 402 and 503, to seek appropriate relief (which may include back pay, front pay, retroactive seniority, training, priority rights to hire or promotion, etc., for an affected class or for individuals) or to impose sanctions.

(d) *Special violations.* If the contractor refuses or fails to (1) submit an affirmative action program; (2) supply copies of relevant records or other requested information; (3) allow OFCCP access to its premises for an on-site review or investigation; or if the contractor is being charged with intimidation or interference under § 60-1.28 of the part, and if conciliation efforts under this part are unsuccessful, administrative enforcement proceedings may be commenced without serving the contractor with a show cause notice or a notice of violation.

(e) *Preliminary administrative enforcement proceedings.* Preliminary or summary enforcement proceedings under 41 CFR 60-30.38 may be appropriate when the evidence indicates one or more of the following violations of the Order, section 402 or section 503: (1) The contractor is engaging in employment practices which violate its contractual obligations so as to make the contractor not responsible to perform its contractual EEO obligations (such as, where a preaward or other compliance review discloses evidence that the contractor is engaging in prohibited employment practices and

the contractor has failed to change the practices); (2) the contractor has refused or failed to develop or submit a current affirmative action program; (3) the contractor has failed or refused to supply requested records or other information it is required to supply; (4) the contractor has failed or refused to permit access to its premises, to its records for reviewing or copying or to its employees or witnesses for interviewing or questioning during an on-site review or investigation; (5) the contractor has engaged in intimidation or retaliation in violation of § 60-1.28 of this part. Preliminary enforcement proceedings involving one or more such violations may be commenced by the office of the Solicitor, and shall be conducted pursuant to the rules of practice for such proceedings under Part 60-30 of this chapter.

(f) *Judicial enforcement—referrals to the Department of Justice.* (1) Violations of the Order or section 402 or 503 or the threat of violations of the Order or section 402 or 503 may be referred to the Department of Justice for judicial enforcement. There are no procedural prerequisites to a referral to the Department of Justice.

(2) Whenever a matter has been referred to the Department of Justice for consideration of judicial proceedings, the Attorney General may bring a civil action against the contractor or any other person in the appropriate district court of the United States requesting a temporary restraining order, preliminary or permanent injunction, and an order for such additional equitable relief, including back pay, deemed necessary or appropriate to ensure the full enjoyment of the rights secured by the Order or section 402 or 503, or any of the above.

(3) The Attorney General is authorized to conduct such investigation of the facts as he/she may deem necessary or appropriate to carry out his/her responsibilities under these regulations.

(4) Prior to the institution of any judicial proceedings, the Attorney General, on behalf of the Director, is authorized to make reasonable efforts to secure compliance with the contract provisions of the Order. He/she may do so by providing the contractor and any other person with reasonable notice of findings, his/her intent to file suit, and the actions he/she believes necessary to obtain compliance with the contract provisions of the Order without contested litigation, and by offering the contractor and any other person a reasonable opportunity for conference and conciliation, in an effort to obtain

such compliance without contested litigation.

(5) As used in this part, the Attorney General shall mean the Attorney General, the Assistant Attorney General for Civil Rights, or any other person authorized by regulations or practice to act for the Attorney General with respect to the enforcement of equal employment opportunity laws, orders and regulations generally, or in a particular matter or case.

(g) *Recommendations to the Attorney General for investigation and possible suit.* In addition to recommending that suit be instituted upon referral under 41 CFR 60-1.29(f) above, the Department of Labor may recommend that the Attorney General conduct further investigation of a contractor to determine whether there are substantial violations of the Order, section 402, section 503 or other contractual obligations assumed by the contractor that warrant the initiation of a lawsuit. Upon doing so the Department of Labor shall promptly notify the contractor of that recommendation. Upon receipt of such a recommendation the Attorney General is authorized to take any action, with respect to a contractor, which is authorized by a referral under 41 CFR 60-1.29(f) above.

(h) *Referrals to the Equal Employment Opportunity Commission.* The Department of Labor may recommend that the Equal Employment Opportunity Commission institute appropriate proceedings under Title VII of the Civil Rights Act of 1964. In addition, and where appropriate, the Department of Labor will make such recommendations to the EEOC in connection with alleged violations by financial institutions whose only nexus to the Federal Government is Federal deposit or share insurance.

(i) *Referrals to financial institution regulatory agencies.* Where appropriate, the Department of Labor may refer alleged violation of the Order, section 402 or section 503 by financial institutions to the appropriate Federal financial institutions regulatory agency for actions under that agency's procedures. Whenever the Department of Labor refers a violation by a financial institution to the appropriate regulatory agency, the agency, after consultation with the Department of Labor, may take such action, in its sole discretion, as it deems appropriate. These agencies are: (1) Federal Home Loan Bank Board; (2) Federal Deposit Insurance Corporation; (3) Comptroller of the Currency; (4) the Board of Governors of the Federal Reserve System; and (5) the National Credit Union Administration

(j) *Enforcement policy regarding Federal deposit and share insurance.* The Department of Labor will not debar financial institutions (e.g., banks, savings and loan associations and credit unions) from future Federal deposit or share insurance, or cancel, terminate or suspend existing Federal deposit or share insurance. In the event that a financial institution which has Federal deposit or share insurance is alleged to be in violation of its contractual commitments under the Executive Order, section 402 or section 503, the Department of Labor will pursue one of the options mentioned in paragraphs (f), (h) and (i) of this section with respect to the deposit or share insurance relationship. Such recommendations or referrals as described in paragraphs (f), (h) and (i) of this section may take place without or after an administrative hearing in the Department of Labor.

**§60-1.30 Debarment and contract ineligibility list.**

No order for debarment from further Government contracts or subcontracts pursuant to section 209(a)(6) of the Order or pursuant to the regulations implementing sections 402 and 503 shall be made without affording the contractor an opportunity for a hearing, either administrative or judicial. The Director periodically shall distribute a list to all executive departments and agencies giving the names of contractors which have been declared ineligible under the Order or under sections 402 and 503 for further Government contracts and subcontracts. The Director shall promptly notify the Comptroller General of the United States when contracts have been cancelled or terminated or when a contractor has been debarred from further Government contracts under the Order or under sections 402 and 503. The Director shall take appropriate steps to notify prime contractors of the debarred contractor's ineligibility for subcontracts.

**§ 60-1.31 Petition for reinstatement for debarred contractors.**

(a) Any contractor declared ineligible under the Order or under section 402 or 503 for further contracts may petition the Director for reinstatement. A copy of the petition for reinstatement shall be served on the parties to the original proceeding which led to the debarment. The petition for reinstatement shall set forth what actions the contractor has taken to comply, as applicable, with the Order, section 402 or section 503 and in what way the contractor will comply with requirements which may involve future performance. The burden shall be

on the contractor to demonstrate that it is entitled to reinstatement.

(b) Rescission of the debarment order and reinstatement of the contractor's eligibility for further contracts may be conditioned on the contractor satisfying the Director that it has established and will implement personnel and employment policies in compliance with the provisions of the Order or of section 402 or 503. In carrying out his/her responsibilities under this section, the Director may require that compliance reviews be conducted of the contractor's establishments, and that the contractor supply copies of any information relevant to determining its compliance with the Order or with sections 402 or 503. Reinstatement also may be conditioned on a program of compliance which may include meeting requirements not specifically mentioned in the debarment order where meeting these requirements is necessary to achieve compliance under the Order or under section 402 or 503. Where the debarment was based on a determination of the contractor's liability but the extent of the relief or the number or identity of persons entitled to relief has not been determined or where there are other issues appropriate for hearing, the Director may remand the matter to the Administrative Law Judge for a recommended determination of such issues prior to reinstatement. On remand from the Director, the Administrative Law Judge shall follow the procedures in Part 60-30 of this chapter in making his/her recommended determination of the number of identity of the individuals entitled to relief and the amount of relief. Reasonable discovery shall be allowed on those issues. The matter shall then proceed in accordance with §§ 60-30.25 through 60-30.30 of this chapter. Reinstatement by the Director or Secretary, as applicable, may be conditioned on the contractor's satisfying any relief finally determined by the Secretary or Director, as applicable, to be owed.

(c) Any conditions upon which the rescission of the debarment order and reinstatement of the contractor are based shall be set forth by the Director or the Secretary, as appropriate, in an order which shall be filed with the Administrative Law Judge and made a part of the record in the original proceeding from which the debarment resulted. The Administrative Law Judge shall retain jurisdiction, and any subsequent violations involving the same issues which gave rise to the debarment order or which are included in the reinstatement order may be raised by motion in the original proceeding.

(d) The Director's or Secretary's decision on the petition for reinstatement shall constitute a final administrative order.

(e) Any party or person who participated (pursuant to 41 CFR 60-30.24) in the proceeding which gave rise to the debarment order may make submissions opposing or supporting the contractor's petition for reinstatement.

(f) When a debarred contractor is reinstated, the Director shall take prompt action to notify the contractors, Comptroller General and the agencies which received notice of the debarment.

**Subpart C—Ancillary Matters**

**§ 60-1.40 Affirmative action programs.**

(a) *Requirements of programs.* Each nonconstruction contractor which has 50 or more employees and (1) has a contract of \$50,000 or more; or (2) has contracts (including Government bills of lading) which, in any 12-month period total \$50,000 or more, or reasonably may be expected to total \$50,000 or more; or (3) is a financial institution which serves as a depository for Government funds in any amount, acts as an issuing or redeeming agent for U.S. savings bonds and savings notes in any amount, or subscribes to Federal deposit or share insurance, shall develop a written affirmative action program for each of its establishments. Each nonconstruction contractor shall require each subcontractor which has 50 or more employees and (i) has a subcontract of \$50,000 or more; or (ii) has subcontracts (including Government bills of lading) which, in any 12-month period total \$50,000 or more, or reasonably may be expected to total \$50,000 or more; or (iii) is a financial institution which serves as a depository for Government funds in any amount, acts as an issuing or redeeming agent for U.S. savings bonds and savings notes in any amount, or subscribes to Federal deposit or share insurance, to develop a written affirmative action program for each of its establishments. A necessary prerequisite to the development of a satisfactory affirmative action program is the identification and analysis of problem areas inherent in minority and female employment and an evaluation of opportunities for utilization of minority group and female personnel. The contractor's program shall provide in detail for specific steps to guarantee equal employment opportunity keyed to the problems and needs of members of minority groups and women, including, when there is underutilization or other deficiencies, the development of specific goals and timetables for the prompt

achievement of full and equal employment opportunity.

(b) *Maintenance of programs.* Contractors currently subject to this section and Part 60-2 of this chapter must have an affirmative action program in place at each establishment. If a contractor is not currently subject to this section and Part 60-2 it must, within 120 days from the commencement of the contract, develop, implement, and maintain separate affirmative action programs for each of its establishments. A copy of the appropriate affirmative action program shall be maintained at each of the contractor's locations. An affirmative action program shall be part of the staffing and training plans for each new establishment and shall be developed and made available prior to the staffing of such establishment. A report of the results of such program shall be compiled annually and the program shall be updated at that time. This information shall be made available to OFCCP upon request and the contractor's affirmative action program and the results it produces shall be evaluated as part of compliance review activities.

(c) *Application to construction contractors.* The provisions of this section 60-1.40 shall be applicable to the nonconstruction employees of a construction contractor which has 50 or more nonconstruction employees and which has (1) a contract of \$50,000 or more; or (2) contracts (including Government bills of lading) which, in any 12-month period total \$50,000 or more, or reasonably may be expected to total \$50,000 or more.

#### § 60-1.41 Solicitations or advertisements for employees.

In solicitations or advertisements for employees placed by or on behalf of a contractor, the requirements of paragraph (2) of the equal opportunity clause shall be satisfied whenever the contractor complies with any of the following:

(a) States expressly in the solicitations or advertising that all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, or national origin;

(b) Uses display or other advertising, and the advertising includes an appropriate insignia prescribed by the Director. The use of the insignia is considered subject to the provisions of 18 U.S.C. 701;

(c) Uses a single advertisement, and the advertisement is grouped with other advertisements under a caption which clearly states that all employers in the group assure all qualified applicants

equal consideration for employment without regard to race, color, religion, sex, or national origin;

(d) Uses a single advertisement in which appears in clearly distinguishable type the phrase "an equal opportunity employer."

#### § 60-1.42 Notices to be posted.

(a) Unless alternative notices are prescribed by the Director, the notices which contractors are required to post by paragraphs (1) and (3) of the equal opportunity clause will contain the following language in English and Spanish and will be provided by the contracting or administering agencies:

**Equal Employment Opportunity Is the Law—Discrimination Is Prohibited by the Civil Rights Act of 1964 and by Executive Order No. 11246**

#### *Private Industry, State, and Local Government*

Title VII of the Civil Rights Act of 1964, as amended, prohibits job discrimination because of race, color, religion, sex or national origin.

Applicants to and employees of private employers, state/local governments, and public/private educational institutions are protected. Also covered are employment agencies, labor unions and apprenticeship programs. Any person who believes he or she has been discriminated against should contact immediately:

The U.S. Equal Employment Opportunity Commission (EEOC), 2401 E St. N.W., Washington, D.C. 20506.

#### *Federal Contract Employment*

Executive Order 11246, as amended, prohibits job discrimination because of race, color, religion, sex or national origin and requires affirmative action to ensure equality of opportunity in all aspects of employment.

Section 503 of the Rehabilitation Act of 1973 prohibits job discrimination because of handicap and requires affirmative action to employ and advance in employment qualified handicapped workers.

Section 402 of the Vietnam Era Veterans' Readjustment Assistance Act of 1974 prohibits job discrimination and requires affirmative action to employ and advance in employment (1) qualified Vietnam era veterans during the first four years after their discharge and (2) qualified disabled veterans throughout their working life if they have a 30 percent or more disability.

Applicants to and employees of any company with a Federal Government contract or subcontract are protected. Any person who believes a contractor has violated its affirmative action obligations, including nondiscrimination under Executive Order 11246, as amended or under Section 503 of the Rehabilitation Act, or under Section 402 of the Vietnam Era Veterans' Readjustment Assistance Act of 1974 should contact immediately:

The Employment Standards Administration, Office of Federal Contract Compliance Programs (OFCCP), Third and

Constitution Avenue, N.W., Washington, D.C. 20210 or an OFCCP regional office, listed in most telephone directories under U.S. Government, Department of Labor. Complaints specifically under the veterans' law may also be filed directly with the Veterans' Employment Service through local offices of the state employment service.

All complaints must be filed within 180 days from the date of the alleged violation.

(b) The requirements of paragraph (3) of the equal opportunity clause will be satisfied whenever the contractor posts copies of the notification prescribed by or pursuant to paragraph (a) of this section in conspicuous places available to employees, applicants for employment, and representatives of each labor union or other organization representing its employees with which it has a collective-bargaining agreement or other contract or understanding.

#### § 60-1.43 Access to records and site of employment.

Each contractor shall permit access during normal business hours to its premises for the purpose of conducting on-site compliance reviews which include interviewing employees, inspecting, copying and removing off-site copies of such books, records, accounts, and other material such as computer tapes and printouts as may be relevant to the matter under investigation and pertinent to compliance with the Order or with sections 402 and 503.

#### § 60-1.44 Rulings and interpretations.

Rulings under or interpretations of the Order and of sections 402 and 503 shall be made by the Director.

#### § 60-1.45 Adaptation of language.

Such necessary changes in language may be made in the equal opportunity clause of the Order and in the affirmative action clauses of sections 402 and 503 as shall be appropriate to identify properly the parties and their undertakings.

#### § 60-1.46 Incorporation by reference.

The equal opportunity clause and the affirmative action clauses may be incorporated by reference in all Government contracts and subcontracts, including Government bills of lading, transportation requests, contracts for deposit of Government funds, and contracts for issuing and paying U.S. savings bonds and notes, and such other contracts as the Director may designate.

#### § 60-1.47 Incorporation by operation of law.

By operation of the Order and sections 402 and 503, the equal opportunity clause of the Order and the

affirmative action clauses of sections 402 and 503 shall be considered to be a part of every contract and subcontract required by the Order and sections 402 and 503 to include such clauses regardless of whether the clauses are physically incorporated into such contracts and regardless of whether the contract is written.

**§ 60-1.48 Request for hearing after compliance.**

When a contractor, without a hearing, shall have complied with the recommendations or orders of the OFCCP and believes such recommendations or orders to be erroneous, it shall, upon filing a request therefore within 10 days of such compliance, be afforded an opportunity for a hearing and review of the alleged erroneous action. Such hearings normally will be record hearings before the Director.

**§ 60-1.49 Existing contracts.**

All contracts in effect prior to October 24, 1965, which are not subsequently modified shall be administered in accordance with the nondiscrimination provisions of any prior applicable Executive Orders. Any contract or subcontract modified on or after October 24, 1965, shall be subject to Executive Order 11246. Complaints received by and violations coming to the attention of OFCCP regarding contracts and subcontracts which were subject to Executive Orders 10925 and 11114 shall be processed as if they were complaints regarding violations of Executive Order 11246.

**§ 60-1.50 Delegation of authority by the Director.**

The Director is authorized to redelegate the authority given to him/her by the regulations in this chapter. The authority redelegated by the Director pursuant to the regulations in this chapter shall be exercised under his/her general direction and control.

**PART 60-2—AFFIRMATIVE ACTION PROGRAMS**

**Subpart A—General**

Sec.

- 60-2.1 Title, purpose and scope.
- 60-2.2 Requirements for contractors.
- 60-2.3 Submission of affirmative action programs and support data.
- 60-2.4 Confidentiality and relevancy of information.

**Subpart B—Required Contents of Affirmative Action Programs**

- 60-2.10 Purpose of affirmative action program.
- 60-2.11 Required utilization analysis.

Sec.

- 60-2.12 Establishment of goals and timetables.
- 60-2.13 Additional required ingredients of affirmative action programs.
- 60-2.14 Program summary.
- 60-2.15 Compliance status.

**Subpart C—Methods of Implementing the Requirements of Subpart B**

- 60-2.20 Development or reaffirmation of the equal employment opportunity policy.
- 60-2.21 Dissemination of the policy.
- 60-2.22 Responsibility for implementation.
- 60-2.23 Identification of problem areas by organizational units and job groups.
- 60-2.24 Development and execution of programs.
- 60-2.25 Internal audit and reporting systems.
- 60-2.26 Support of action programs.

**Subpart D—Miscellaneous**

- 60-2.30 Use of goals.
- 60-2.31 Preemption.
- 60-2.32 Superseding.

Authority: 5 U.S.C. 553(a)(3)(B); 29 CFR 2.7; section 201, E.O. 11246, 30 FR 12319, and E.O. 11375, 32 FR 14303, as amended by E.O. 12086.

**Subpart A—General**

**§ 60-2.1 Title, purpose and scope.**

(a) The regulations in this part implement provisions of Executive Order 11246 only. This part shall also be known as "Revised Order No. 4" and shall cover nonconstruction contractors. The provisions of this part also shall apply to the nonconstruction employees of a construction contractor with 50 or more nonconstruction employees and one or more contracts which meet the criteria set forth in section 60-1.40 of this chapter. Section 60-1.40 of this chapter, requires that within 120 days from the commencement of a contract each contractor which has 50 or more employees and (1) has a contract of \$50,000 or more; or (2) has contracts (including Government bills of lading) which, in any 12-month period, total or can reasonably be expected to total \$50,000 or more; or (3) which is a financial institution which (i) serves as a depository of Government funds in any amount; (ii) acts as an issuing or redeeming agent for U.S. savings bonds and savings notes in any amount; or (iii) subscribes to Federal deposit or share insurance, shall develop, implement and maintain a written affirmative action program for each of its establishments. This part sets forth guidelines to be used by contractors and the OFCCP in developing and judging written affirmative action programs as well as the good faith effort required to transform these programs from paper commitments to equal employment opportunity.

(b) Relief, including back pay, where appropriate, for members of an affected class or individuals who by virtue of past discrimination continue to suffer the present effects of that discrimination, shall be provided in the conciliation agreement entered into pursuant to 41 CFR 60-1.26 of this chapter. An affected class problem must be remedied before a contractor may be considered in compliance. Section 60-2.2 of this part, pertaining to an acceptable affirmative action program, also is applicable to a contractor's failure to remedy discrimination against members of an affected class.

**§ 60-2.2 Requirements for contractors.**

Any contractor required by 41 CFR 60-1.40 of this chapter to develop an affirmative action program at each of its establishments which has not complied fully with that section is not in compliance with the Order. Until such programs are developed and found to be acceptable in accordance with the standards and guidelines set forth in §§ 60-2.10 through 60-2.32 of this part, the contractor is unable to comply fully with the Order. An affirmative action program shall be deemed to have been accepted by OFCCP at the time the appropriate OFCCP area, regional or national office has accepted such program unless within 45 days thereafter the Director has disapproved such program. The intention of 41 CFR 60-1.40 and this part is that each contractor establishment will be covered by a written affirmative action program and that all the contractor's employees will be included in an affirmative action program regardless of where they work. Contractors may reach agreements with OFCCP on nationwide AAP formats or methodology.

**§ 60-2.3 Submission of affirmative action programs and support data.**

(a) The contractor shall submit the affirmative action program and supporting documentation within 15 days of receipt of a request from OFCCP. The terms "affirmative action program" and "supporting documentation" refer to the required contents of Affirmative Action Programs, as set forth in Subpart B of this part, and Methods of Implementing the Requirements of Subpart B, set forth in Subpart C of this part.

(b) The contractor also shall submit the affirmative action program and supporting documentation upon OFCCP's request when a complaint is being investigated or a preaward compliance review is being conducted.

(c) The contractor in accordance with 41 CFR 60-1.43, shall provide full access to and copies of all additional, relevant information and data for the on-site phase of the review.

(d) The contractor shall provide, for off-site review, all data or information determined by the compliance officer to be necessary to analyze more fully alleged deficiencies or violations before a determination of compliance is made.

(e) If a contractor fails or refuses to submit its affirmative action program and supporting documentation or other information as required by paragraphs (a), (b), (c) and (d) of this section, enforcement proceedings authorized by this chapter may be initiated against the contractor after appropriate conciliation efforts have been attempted, without issuing a show cause notice or notice of violations.

#### § 60-2.4 Confidentiality and relevancy of information.

(a) *Desk audit data.* If the contractor is concerned with the confidentiality of such information as lists of employees, employee names, reasons for termination and pay data, then alphabetic or numeric coding or the use of an index of pay and pay ranges are acceptable for desk audit purposes.

(b) *Data required for off-site analysis.* The contractor must provide all data determined by the compliance officer to be necessary for off-site analysis pursuant to § 60-2.3(d) of this part. Such data may only be coded if the contractor makes the code available to the compliance officer. If the contractor believes that particular information which is to be taken off-site is not relevant to compliance with the Executive Order, the contractor may request a ruling by the OFCCP Area Director. The OFCCP Area Director shall issue a ruling promptly. The contractor may appeal that ruling to the OFCCP Assistant Regional Administrator within 10 days of receipt. The Assistant Regional Administrator shall issue a final ruling promptly. Pending a final ruling, the information in question must be made available to the compliance officer off-site, but OFCCP shall take all necessary precautions to safeguard the confidentiality of such information until a final determination is made. Such information may not be copied and access to the information shall be limited to the compliance officer and personnel involved in the determination of relevancy. Data determined to be not relevant to the investigation will be returned to the contractor immediately.

(c) *Public access to information.* Information obtained from contractors

under this chapter may be subject to public inspection under the Freedom of Information Act, 5 U.S.C. 552. If a contractor believes that information should be withheld from public inspection, it shall, at the time of submission of the information to the agency, clearly mark the materials "subject to a claim of confidentiality." If the agency receives a request from the public for such materials under the Freedom of Information Act, it will notify the contractor of the request and solicit a statement of reasons why the information should be withheld. As to any claim that the information contains trade secrets, or commercial or financial information which is privileged or confidential, the contractor shall set forth, with respect to each reasonably segregable portion of the materials, the manner in which it is claimed that release of the material would cause harm to the competitive position of the contractor. If information to which the contractor has filed an objection to disclosure is determined by OFCCP to be disclosable under 5 U.S.C. 552, the contractor shall be notified of such determination at least ten days prior to disclosure of the information.

#### Subpart B—Required Contents of Affirmative Action Programs

##### § 60-2.10 Purpose of affirmative action program.

An affirmative action program is a set of specific and result-oriented procedures to which a contractor commits itself to apply every good faith effort. The objective of those procedures plus such efforts is equal employment opportunity. Procedures without effort to make them work are meaningless; and effort, undirected by specific and meaningful procedures, is inadequate. An acceptable affirmative action program must include an analysis of areas within which the contractor is deficient in the utilization of minority groups and women, and further, goals and timetables to which the contractor's good faith efforts must be directed to correct the deficiencies and, thus to achieve prompt and full utilization of minorities and women, at all levels and in all segments of its work force where deficiencies exist.

##### § 60-2.11 Required utilization analysis.

Based upon the Government's experience with compliance reviews under the Executive Order program and the contractor reporting system, minority groups are most likely to be underutilized in departments and jobs within departments that fall within the following Employer's Information Report

(EEO-1) designations: Officials and managers, professionals, technicians, sales workers, office and clerical and craftsmen (skilled). As categorized by the EEO-1 designations, women are likely to be underutilized in departments and jobs within departments as follows: Officials and managers, professionals, technicians, sales workers (except over-the-counter sales in certain retail establishments), craftsmen (skilled and semi-skilled). Therefore, the contractor shall direct special attention to such jobs in its analysis and goal setting for minorities and women. Affirmative action programs must contain the following information:

(a) Workforce analysis which is defined as a listing of each job title as it appears in applicable collective bargaining agreements or payroll records (not job group) ranked from the lowest paid to the highest paid within each department or other similar organizational unit, including departmental or unit supervision. If there are separate work units or lines of progression within a department, a separate list must be provided for each such work unit, or line, including unit supervisors. For lines of progression there must be indicated the order of jobs in the line through which an employee could move to the top of the line. Where there are no formal progression lines or usual promotional sequences, job titles should be listed by department, job families, or disciplines, in order of wage rates or salary ranges. For each job title, the total number of incumbents, the total number of male and female incumbents, and the total number of male and female incumbents in each of the following groups must be given: Blacks, Spanish-surnamed Americans, American Indians, and Orientals. The wage rate or salary range for each job title must be given. All job titles, including all managerial job titles, must be listed.

(b) An analysis of all major job groups at the facility, with explanation if minorities or women are currently being underutilized in any one or more job groups ("job groups" herein meaning one or a group of jobs having similar content, wage rates and opportunities). "Underutilization" is defined as having fewer minorities or women in a particular job group than would reasonably be expected by their availability. In making the utilization analysis, the contractor shall conduct such analysis separately for minorities and women.

(1) In determining whether minorities are being underutilized in any job group, the contractor will consider at least all of the following factors:

- (i) The minority population of the labor area surrounding the facility;
- (ii) The size of the minority unemployment force in the labor area surrounding the facility;
- (iii) The percentage of the minority work force as compared with the total work force in the immediate labor area;
- (iv) The general availability of minorities having requisite skills in the immediate labor area;

(v) The availability of minorities having requisite skills in an area in which the contractor can reasonably recruit;

(vi) The availability of promotable and transferable minorities within the contractor's organization;

(vii) The existence of training institutions capable of training persons in the requisite skills; and

(viii) The degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to minorities.

(2) In determining whether women are being underutilized in any job group, the contractor will consider at least all of the following factors:

- (i) The size of the female unemployment force in the labor area surrounding the facility;
- (ii) The percentage of the female workforce as compared with the total workforce in the immediate labor area;
- (iii) The general availability of women having requisite skills in the immediate labor area;
- (iv) The availability of women having requisite skills in an area in which the contractor can reasonably recruit;
- (v) The availability of women seeking employment in the labor or recruitment area of the contractor;
- (vi) The availability of promotable and transferable female employees within the contractor's organization;
- (vii) The existence of training institutions capable of training persons in the requisite skills; and
- (viii) The degree of training which the contractor is reasonably able to undertake as a means of making all job classes available to women.

#### § 60-2.12 Establishment of goals and timetables.

(a) The goals and timetables developed by the contractor should be attainable in terms of the contractor's analysis of its deficiencies and its entire affirmative action program. Thus, in establishing the size of its goals and the length of its timetables, the contractor should consider the results which could reasonably be expected from its putting forth every good faith effort to make its overall affirmative action program work. In determining levels of goals, the

contractor should consider at least the factors listed in § 60-2.11.

(b) Involve personnel relations staff, department and division heads, and local and unit managers in the goal-setting process.

(c) Goals should be significant, measurable, and attainable.

(d) Goals should be specific for planned results, with timetables for completion.

(e) Goals may not be rigid and inflexible quotas which must be met, but must be targets reasonably attainable by means of applying every good faith effort to make all aspects of the entire affirmative action program work.

(f) In establishing timetables to meet goals and commitments, the contractor will consider the anticipated expansion, contraction, and turnover of and in the work force.

(g) Goals, timetables, and affirmative action commitments must be designed to correct any identifiable deficiencies.

(h) Where deficiencies exist and where numbers or percentages are relevant in developing corrective action, the contractor shall establish and set forth specific goals and timetables separately for minorities and women.

(i) Such goals and timetables, with supporting data and the analysis thereof, shall be a part of the contractor's written affirmative action program and shall be maintained at each establishment of the contractor.

(j) A contractor or subcontractor extending a publicly announced preference for Indians as authorized in 41 CFR 60-1.5(a)(6) may reflect in its goals and timetables the permissive employment preference for Indians living on or near an Indian reservation.

(k) Where the contractor has not established a goal, its written affirmative action program must specifically analyze each of the factors listed in § 60-2.11 and must detail its reason for a lack of a goal.

(l) In the event it comes to the attention of the Office of Federal Contract Compliance Programs that there is a substantial disparity in the utilization of a particular minority group or men or women of a particular minority group, OFCCP may require separate goals and timetables for such minority group and may further require, where appropriate, such goals and timetables by sex for such group for such job classifications and organizational units specified by the OFCCP.

(m) Support data for the required analysis and program shall be compiled and maintained as part of the contractor's affirmative action program. This data will include but not be limited

to progression line charts, seniority rosters, applicant flow data, and applicant rejection ratios indicating minority and sex status.

(n) Copies of affirmative action programs and/or copies of support data shall be made available to the Office of Federal Contract Compliance Programs, upon request, for such purposes as may be appropriate to the fulfillment of its responsibilities under Executive Order 11246, as amended.

#### § 60-2.13 Additional required ingredients of affirmative action programs.

Effective affirmative action programs shall contain, but not necessarily be limited to, the following ingredients:

(a) Development or reaffirmation of the contractor's equal employment opportunity policy in all personnel actions.

(b) Formal internal and external dissemination of the contractor's policy.

(c) Establishment of responsibilities for implementation of the contractor's affirmative action program.

(d) Identification of problem areas (deficiencies) by organizational units and job group.

(e) Establishment of goals and objectives by organizational units and job groups, including timetables for completion.

(f) Development and execution of action-oriented programs designed to eliminate problems and further designed to attain established goals and objectives.

(g) Design and implementation of internal audit and reporting systems to measure effectiveness of the total program.

(h) Compliance of personnel policies and practices with the Sex Discrimination Guidelines (41 CFR Part 60-20).

(i) Active support of local and national community action programs and community service programs, designed to improve the employment opportunities of minorities and women.

(j) Consideration of minorities and women not currently in the work force having requisite skills who can be recruited through affirmative action measures.

#### § 60-2.14 Program summary.

The affirmative action program shall be summarized and updated annually. The program summary shall be prepared in a format which shall be prescribed by the Director and published in the Federal Register as a notice before becoming effective. Contractors shall submit the program summary to OFCCP each year on the anniversary date of the affirmative action program.

**§ 60-2.15 Compliance status.**

No contractor's compliance status shall be judged alone by whether or not it reaches its goals and meets its timetables. Rather, each contractor's compliance posture shall be reviewed and determined by reviewing the contents of its program, the extent of its adherence to this program, and its good faith efforts to make its program work toward the realization of the program's goals within the timetables set for completion. There follows an outline of examples of procedures that contractors and OFCCP should use as a guideline for establishing, implementing, and judging an acceptable affirmative action program.

**Subpart C—Methods of Implementing the Requirements of Subpart B****§ 60-2.20 Development or reaffirmation of the equal employment opportunity policy.**

(a) The contractor's policy statement should indicate the chief executive officer's attitude on the subject matter, assign overall responsibility and provide for a reporting and monitoring procedure. Specific items to be mentioned should include, but not be limited to:

(1) Recruit, hire, train, and promote persons in all job titles, without regard to race, color, religion, sex, or national origin, except where sex is a bona fide occupational qualification. (The term "bona fide occupational qualification" has been construed very narrowly under the Civil Rights Act of 1964. Under Executive Order 11246, as amended, and this part, this term will be construed in the same manner.)

(2) Base decisions on employment so as to further the principle of equal employment opportunity.

(3) Ensure that promotion decisions are in accord with principles of equal employment opportunity by imposing only valid requirements for promotional opportunities.

(4) Ensure that all personnel actions such as compensation, benefits, transfers, layoffs, return from layoff, company sponsored training, education, tuition assistance, social and recreation programs, will be administered without regard to race, color, religion, sex, or national origin.

**§ 60-2.21 Dissemination of the policy.**

(a) The contractor should disseminate its policy internally as follows:

(1) Include it in contractor's policy manual.

(2) Publicize it in company newspaper, magazine, annual report, and other media.

(3) Conduct special meetings with executive, management, and supervisory personnel to explain intent of policy and individual responsibility for effective implementation, making clear the chief executive officer's attitude.

(4) Schedule special meetings with all other employees to discuss policy and explain individual employee responsibilities.

(5) Discuss the policy thoroughly in both employee orientation and management training programs.

(6) Meet with union officials to inform them of policy, and request their cooperation.

(7) Include nondiscrimination clauses in all union agreements, and review all contractual provisions to insure they are nondiscriminatory.

(8) Publish articles covering EEO programs, progress reports, promotions, etc., of minority and female employees, in company publications.

(9) Post the policy on company bulletin boards.

(10) When employees are featured in product or consumer advertising, employee handbooks or similar publications both minority and nonminority, men and women should be pictured.

(11) Communicate to employees the existence of the contractor's affirmative action program and make available such elements of its program as will enable such employees to know of and avail themselves of its benefits.

(b) The contractor should disseminate its policy externally as follows:

(1) Inform all recruiting sources verbally and in writing of company policy, stipulating that these sources actively recruit and refer minorities and women for all positions listed.

(2) Incorporate the equal opportunity clause in all purchase orders, leases, contracts, etc., covered by Executive Order 11246, as amended, and its implementing regulations.

(3) Notify minority and women's organizations, community agencies, community leaders, secondary schools, and colleges, of company policy, preferably in writing.

(4) Communicate to prospective employees the existence of the contractor's affirmative action program and make available such elements of its program as will enable such prospective employees to know of and avail themselves of its benefits.

(5) When employees are pictured in consumer or help wanted advertising, both minority and nonminority men and women should be shown.

(6) Send written notification of company policy to all subcontractors,

vendors, and suppliers requesting appropriate action on their part.

**§ 60-2.22 Responsibility for implementation.**

(a) An executive of the contractor should be appointed as director or manager of company equal opportunity programs. Depending upon the size and geographical alignment of the company, this may be his or her sole responsibility. He or she should be given the necessary top management support and staffing to execute the assignment. His or her identity should appear on all internal and external communications on the company's equal opportunity programs. His or her responsibilities should include, but not necessarily be limited to:

(1) Developing policy statements, affirmative action programs, internal and external communication techniques.

(2) Assisting in the identification of problem areas.

(3) Assisting line management in arriving at solutions to problems.

(4) Designing and implementing audit and reporting systems that will:

(i) Measure effectiveness of the contractor's programs.

(ii) Indicate need for remedial action.

(iii) Determine the degree to which the contractor's goals and objectives have been attained.

(5) Serve as liaison between the contractor and enforcement agencies.

(6) Serve as liaison between the contractor and minority organizations, women's organizations and community action groups concerned with employment opportunities of minorities and women.

(7) Keep management informed of latest developments in the entire equal opportunity area.

(b) Line responsibilities should include, but not be limited to the following:

(1) Assistance in the identification of problem areas and establishment of local and unit goals and objectives.

(2) Active involvement with local minority organizations, women's organizations, community action groups and community service programs.

(3) Periodic audit of training programs, hiring and promotion patterns to remove impediments to the attainment of goals and objectives.

(4) Regular discussions with local managers, supervisors, and employees to be certain the contractor's policies are being followed.

(5) Review of the qualifications of all employees to insure that minorities and women are given full opportunities for transfers and promotions.

(6) Career counseling for all employees.

(7) Periodic audit to insure that each location is in compliance in areas such as:

(i) Posters are properly displayed.

(ii) All facilities, including company housing, which the contractor maintains for the use and benefit of its employees, are in fact desegregated, both in policy and use. If the contractor provides facilities such as dormitories, locker rooms and rest rooms, they must be comparable for both sexes.

(iii) Minority and female employees are afforded a full opportunity and are encouraged to participate in all company sponsored educational, training, recreational, and social activities.

(8) Supervisors should be made to understand that their work performance is being evaluated on the basis of their equal employment opportunity efforts and results, as well as other criteria.

(9) It shall be a responsibility of supervisors to take actions to prevent harassment of employees placed through affirmative action efforts.

**§ 60-2.23 Identification of problem areas by organizational units and job groups.**

(a) An in-depth analysis of the following should be made, paying particular attention to trainees and those categories listed in § 60-2.11(b).

(1) Composition of the work force by minority group status and sex.

(2) Composition of applicant flow by minority group status and sex.

(3) The total selection process including position descriptions, position titles, worker specifications, application forms, interview procedures, test administration, test validity, referral procedures, final selection process, and similar factors.

(4) Transfer and promotion practices.

(5) Facilities, company sponsored recreation and social events, and special programs such as educational assistance.

(6) Seniority practices and seniority provisions of union contracts.

(7) Apprenticeship programs.

(8) All company training programs, formal and informal.

(9) Work force attitude.

(10) Technical phases of compliance, such as poster and notification to labor unions, retention of applications, notification to subcontractors, etc.

(b) If any of the following items are found in the analysis, special corrective action should be appropriate.

(1) An "underutilization" of minorities or women in specific job groups.

(2) Lateral and/or vertical movement of minority or female employees

occurring at a lesser rate (compared to work force mix) than that of nonminority or male employees.

(3) The selection process eliminates a significantly higher percentage of minorities or women than nonminorities or men.

(4) Application and related preemployment forms not in compliance with Federal legislation.

(5) Position descriptions inaccurate in relation to actual functions and duties.

(6) Formal or scored selection procedures not validated as required by the OFCCP Uniform Guidelines on Employee Selection Procedures (see 41 CFR Part 60-3).

(7) Test forms not validated by location, work performance and inclusion of minorities and women in sample.

(8) Referral ratio of minorities or women to the hiring supervisor or manager indicates a significantly higher percentage are being rejected as compared to nonminority and male applicants.

(9) Minorities or women are excluded from or are not participating in company sponsored activities or programs.

(10) De facto segregation still exists at some facilities.

(11) Seniority provisions contribute to overt or inadvertent discrimination, i.e., a disparity by minority group status or sex exists between length of service and types of job held.

(12) Nonsupport of company policy by managers, supervisors or employees.

(13) Minorities or women underutilized or significantly underrepresented in training or career improvement programs.

(14) No formal techniques established for evaluating effectiveness of EEO programs.

(15) Lack of access to suitable housing inhibits recruitment efforts and employment of qualified minorities.

(16) Lack of suitable transportation (public or private) to the work place inhibits minority employment.

(17) Labor unions and subcontractors not notified of their responsibilities.

(18) Purchase orders do not contain EEO clause.

(19) Posters not on display.

**§ 60-2.24 Development and execution of programs.**

(a) The contractor should conduct detailed analyses of position descriptions to insure that they accurately reflect position functions, and are consistent for the same position from one location to another.

(b) The contractor should validate worker specifications by division, department location or other

organizational unit and by job title using job performance criteria. Special attention should be given to academic, experience and skill requirements to insure that the requirements in themselves do not constitute inadvertent discrimination. Specifications should be consistent for the same job title in all locations and should be free from bias as regards to race, color, religion, sex (except where sex is a bona fide occupational qualification) or national origin. Where requirements screen out a disproportionate number of minorities or women, such requirements should be professionally validated to job performance.

(c) Approved position descriptions and worker specifications, when used by the contractor, should be made available to all members of management involved in the recruiting, screening, selection, and promotion process. Copies should also be distributed to all recruiting sources.

(d) The contractor should evaluate the total selection process to insure freedom from bias and, thus, aid the attainment of goals and objectives.

(1) All personnel involved in the recruiting, screening, selection, promotion, disciplinary, and related processes should be carefully selected and trained to insure elimination of bias in all personnel actions.

(2) The contractor shall observe the requirements of the OFCCP Uniform Guidelines on Employee Selection Procedures.

(3) Selection techniques other than tests may also be improperly used so as to have the effect of discriminating against minority groups and women. Such techniques include but are not restricted to, unscored interviews, unscored or casual application forms, arrest records, credit checks, considerations of marital status or dependency or minor children. Where there exist data suggesting that such unfair discrimination or exclusion of minorities or women exists, the contractor should analyze its unscored procedures and eliminate them if they are not objectively valid.

(e) Suggested techniques to improve recruitment and increase the flow of minority or female applicants follow:

(1) Certain organizations such as the Urban League, Job Corps, Equal Opportunity Programs, Inc., Concentrated Employment programs, Neighborhood Youth Corps, Secondary Schools, Colleges, and City Colleges with high minority enrollment, the State Employment Service, specialized employment agencies, Aspira, LULAC, SER, the G.I. Forum, the Commonwealth of Puerto Rico are normally prepared to

refer minority applicants. Organizations prepared to refer women with specific skills are: National Organization for Women, Welfare Rights organizations, Women's Equity Action League, Talent Bank from Business and Professional Women (including 26 women's organizations), Professional Women's Caucus, Intercollegiate Association of University Women, Negro Women's sororities and service groups such as Delta Sigma Theta, Alpha Kappa Alpha, and Zeta Phi Beta; National Council of Negro Women, American Association of University Women, YWCA, and sectarian groups such as Jewish Women's Groups, Catholic Women's Groups and Protestant Women's Groups, and women's colleges. In addition, community leaders as individuals shall be added to recruiting sources.

(2) Formal briefing sessions should be held, preferably on company premises, with representatives from these recruiting sources. Plant tours, presentations by minority and female employees, clear and concise explanations of current and future job openings, position descriptions, worker specifications, explanations of the company's selection process, and recruiting literature should be an integral part of the briefings. Formal arrangements should be made for referral of applicants, followup with sources, and feedback on disposition of applicants.

(3) Minority and female employees, using procedures similar to subparagraph (2) of this paragraph, should be actively encouraged to refer applicants.

(4) A special effort should be made to include minorities and women on the Personnel Relations staff.

(5) Minority and female employees should be made available for participation in Career Days, Youth Motivation Programs, and related activities in their communities.

(6) Active participation in "Job Fairs" is desirable. Company representatives so participating should be given authority to make on-the-spot commitments.

(7) Active recruiting programs should be carried out at secondary schools, junior colleges, and colleges with predominant minority or female enrollments.

(8) Recruiting efforts at all schools should incorporate special efforts to reach minorities and women.

(9) Special employment programs should be undertaken whenever possible. Some possible programs are:

(i) Technical and nontechnical co-op programs with predominately Negro and women's colleges.

(ii) "After school" and/or work-study jobs for minority youths, male and female.

(iii) Summer jobs for underprivileged youth, male and female.

(iv) Summer work-study programs for male and female faculty members of the predominantly minority schools and colleges.

(v) Motivation, training and employment programs for the hardcore unemployed, male and female.

(10) When recruiting brochures pictorially present work situations, the minority and female members of the work force should be included, especially when such brochures are used in school and career programs.

(11) Help wanted advertising should be expanded to include the minority news media and women's interest media on a regular basis.

(f) The contractor should insure that minority and female employees are given equal opportunity for promotion. Suggestions for achieving this result include:

(1) Post or otherwise announce promotional opportunities.

(2) Make an inventory of current minority and female employees to determine academic, skill and experience level of individual employees.

(3) Initiate necessary remedial, job training and workstudy programs.

(4) Develop and implement formal employee evaluation programs.

(5) Make certain "worker specifications" have been validated on job performance related criteria. (Neither minority nor female employees should be required to possess higher qualifications than those of the lowest qualified incumbent.)

(6) When apparently qualified minority or female employees are passed over for upgrading, require supervisory personnel to submit written justification.

(7) Establish formal career counseling programs to include attitude development, education aid, job rotation, buddy system and similar programs.

(8) Review seniority practices and seniority clauses in union contracts to ensure that such practices or clauses are nondiscriminatory and do not have a discriminatory effect.

(g) Make certain facilities and company-sponsored social and recreation activities are desegregated. Actively encourage all employees to participate.

(h) Encourage child care, housing and transportation programs appropriately designed to improve the employment opportunities for minorities and women.

#### § 60-2.25 Internal audit and reporting systems.

(a) The contractor should monitor records of referrals, placements, transfers, promotions and terminations at all levels to ensure that nondiscriminatory policy is carried out.

(b) The contractor should require formal reports from unit managers on a schedule scheduled basis as to the degree to which corporate or unit goals are attained and timetables met.

(c) The contractor should review report results with all levels of management.

(d) The contractor should advise top management of program effectiveness and submit recommendations to improve unsatisfactory performance.

#### § 60-2.26 Support of action programs.

(a) The contractor should appoint key members of management to serve on merit employment councils, community relations boards and similar organizations.

(b) The contractor should encourage minority and female employees to participate actively in National Alliance of Businessmen programs for youth motivation.

(c) The contractor should support vocational guidance institutes, vestibule training programs and similar activities.

(d) The contractor should assist secondary schools and colleges in programs designed to enable minority and female graduates of these institutions to compete in the open employment market on a more equitable basis.

(e) The contractor should publicize achievements of minority and female employees in local and minority news media.

(f) The contractor should support programs developed by such organizations as National Alliance of Businessmen, the Urban Coalition and other organizations concerned with employment opportunities for minorities or women.

#### Subpart D—Miscellaneous

##### § 60-2.30 Use of goals.

The purpose of a contractor's establishment and use of goals is to insure that it meet its affirmative action obligation. It is not intended and should not be used to discriminate against any applicant or employee because of race, color, religion, sex, or national origin.

**§ 60-2.31 Preemption.**

To the extent that any state or local laws, regulations or ordinances, including those which grant special benefits to persons on account of sex, are in conflict with Executive Order 11246, as amended, or with the requirements of this part, OFCCP will regard them as preempted under the Executive order.

**§ 60-2.32 Supersedure.**

All orders, instructions, regulations, and memorandums of the Secretary of Labor, other officials of the Department of Labor and contracting agencies are hereby superseded to the extent that they are inconsistent herewith, including a previous "Order No. 4" from this office dated January 30, 1970. Nothing in this part is intended to amend 41 CFR Part 60-3 or 41 CFR Part 60-20.

**PART 60-4—CONSTRUCTION CONTRACTORS—AFFIRMATIVE ACTION REQUIREMENTS****Sec.**

- 60-4.1 Scope and application.
- 60-4.2 Solicitations.
- 60-4.3 Equal opportunity clauses.
- 60-4.4 Affirmative action requirements.
- 60-4.5 Hometown plans.
- 60-4.6 Goals and timetables.
- 60-4.7 Effect on other regulations.
- 60-4.8 Show cause notice.
- 60-4.9 Incorporation by operation of the Order.

Authority: Secs. 201, 202, 205, 211, 301, 302, and 303 of E.O. 11246, as amended, 30 FR 12319; 32 FR 14303, as amended by E.O. 12086.

**§ 60-4.1 Scope and application.**

This part applies to all contractors and subcontractors which hold any Federal or federally assisted construction contract in excess of \$10,000. The regulations in this part are applicable to all of a construction contractor's or subcontractor's construction employees who are engaged in on site construction including those construction employees who work on a non-Federal or nonfederally assisted construction site. This part also establishes procedures which all Federal contracting officers and all applicants, as applicable, shall follow in soliciting for and awarding Federal or federally assisted construction contracts. Procedures also are established which administering agencies shall follow in making any grant, contract, loan, insurance, or guarantee involving federally assisted construction which is not exempt from the requirements of Executive Order 11246, as amended.

In addition, this part applies to construction work performed by

construction contractors and subcontractors for Federal nonconstruction contractors and subcontractors if the construction work is necessary in whole or in part to the performance of a nonconstruction contract or subcontract.

**§ 60-4.2 Solicitations.**

(a) All Federal contracting officers and all applicants shall include the notice set forth in paragraph (d) of this section and the Standard Federal Equal Employment Opportunity Construction Contract Specifications set forth in § 60-4.3 of this part in all solicitations for offers and bids on all Federal and federally assisted construction contracts or subcontracts to be performed in geographical areas designated by the Director pursuant to § 60-4.6 of the part. Administering agencies shall require the inclusion of the notice set forth in paragraph (d) of this section and the specifications set forth in § 60-4.3 of this part as a condition of any grant, contract, subcontract, loan, insurance or guarantee involving federally assisted construction covered by this Part 60-4.

(b) All nonconstruction contractors covered by Executive Order 11246 and the implementing regulations shall include the notice in paragraph (d) of this section in all construction agreements which are necessary in whole or in part to the performance of the covered nonconstruction contract.

(c) Contracting officers, applicants and nonconstruction contractors shall give written notice to the Director within 10 working days of award of a contract subject to these provisions. The notification shall include the name, address and telephone number of the contractor; employer identification number; dollar amount of the contract, estimated starting and completion dates of the contract; the contract number; and geographical area in which the contract is to be performed.

(d) The following notice shall be included in, and shall be a part of, all solicitations for offers and bids on all Federal and federally assisted construction contracts or subcontracts in excess of \$10,000 to be performed in geographical areas designed by the Director pursuant to § 60-4.6 of this part (see 41 CFR 60-4.2(a)):

**Notice of Requirement for Affirmative Action To Ensure Equal Employment Opportunity (Executive Order 11246)**

1. The Offeror's or Bidder's attention is called to the "Equal Opportunity Clause" and the "Standard Federal Equal Employment Opportunity Construction Contract Specifications" set forth herein.

2. The goals and timetables for minority and female participation, expressed in percentage terms for the Contractor's aggregate workforce in each trade on all construction work in the covered area, are as follows:

Timetables	Goals for minority participation for each trade	Goals for female participation in each trade
.....	Insert goals for each year.	Insert goals for each year.

These goals are applicable to all the Contractor's construction work (whether or not it is Federal or federally assisted) performed in the covered area. If the contractor performs construction work in a geographical area located outside of the covered area, it shall apply the goals established for such geographical area where the work is actually performed. With regard to this second area, the contractor also is subject to the goals for both its federally involved and nonfederally involved construction.

The Contractor's compliance with the Executive Order and the regulations in 41 CFR Part 60-4 shall be based on its implementation of the Equal Opportunity Clause, specific affirmative action obligations required by the specifications set forth in 41 CFR 60-4.3(a), and its efforts to meet the goals. The hours of minority and female employment and training must be substantially uniform throughout the length of the contract, and in each trade, and the contractor shall make a good faith effort to employ minorities and women evenly on each of its projects. The transfer of minority or female employees or trainees from Contractor to Contractor or from project to project for the sole purpose of meeting the Contractor's goals shall be a violation of the contract, the Executive Order and the regulations in 41 CFR Part 60-4. Compliance with the goals will be measured against the total work hours performed.

3. The Contractor shall provide written notification to the Director of the Office of Federal Contract Compliance Programs within 10 working days of award of any construction subcontract in excess of \$10,000 at any tier for construction work under the contract resulting from this solicitation. The notification shall list the name, address and telephone number of the subcontractor, employer identification number of the subcontractor; estimated dollar amount of the subcontract; estimated starting and completion dates of the subcontract; and the geographical

area in which the subcontract is to be performed.

4. As used in this Notice, and in the contract resulting from this solicitation, the "covered area" is (insert description of the geographical areas where the contract is to be performed giving the state, county and city, if any).

#### § 60-4.3 Equal opportunity clauses.

(a) The equal opportunity clause published at 41 CFR 60-1.4(a) of this chapter is required to be included in and is part of, all nonexempt Federal contracts and subcontracts, including construction contracts and subcontracts. The equal opportunity clause published at 41 CFR 60-1.4(b) is required to be included in, and is a part of, all nonexempt federally assisted construction contracts and subcontracts. In addition to the clauses described above, all Federal contracting officers, all applicants and all nonconstruction contractors, as applicable, shall include the specifications set forth in this section in all Federal and federally assisted construction contracts in excess of \$10,000 to be performed in geographical areas designated by the Director pursuant to § 60-4.6 of this part and in construction subcontracts in excess of \$10,000 necessary in whole or in part to the performance of nonconstruction Federal contracts and subcontracts covered under the Executive Order.

#### Standard Federal Equal Employment Opportunity Construction Contract Specifications (Executive Order 11246)

1. As used in these specifications:

a. "Covered area" means the geographical area described in the solicitation from which this contract resulted;

b. "Director" means Director, Office of Federal Contract Compliance Programs, United States Department of Labor, or any person to whom the Director delegates authority;

c. "Employer identification number" means the Federal Social Security number used on the Employer's Quarterly Federal Tax Return, U.S. Treasury Department Form 941.

d. "Minority" includes:

(i) Black (all persons having origins in any of the Black African racial groups not of Hispanic origin);

(ii) Hispanic (all persons of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish Culture or origin, regardless of race);

(iii) Asian and Pacific Islander (all persons having origins in any of the original peoples of the Far East, Southeast Asia, the Indian

Subcontinent, or the Pacific Islands); and

(iv) American Indian or Alaskan Native (all persons having origins in any of the original peoples of North America and maintaining identifiable tribal affiliations through membership and participation or community identification).

2. Whenever the Contractor, or any Subcontractor at any tier, subcontracts a portion of the work involving any construction trade, it shall physically include in each subcontract in excess of \$10,000 the provisions of these specifications and the Notice which contains the applicable goals for minority and female participation and which is set forth in the solicitations from which this contract resulted.

3. If the Contractor is participating (pursuant to 41 CFR 60-4.5) in a Hometown Plan approved by the U.S. Department of Labor in the covered area either individually or through an association, its affirmative action obligations on all work in the Plan area (including goals and timetables) shall be in accordance with that Plan for those trades which have unions participating in the Plan. Contractors must be able to demonstrate their participation in and compliance with the provisions of any such Hometown Plan. Each Contractor or Subcontractor participating in an approved Plan is individually required to comply with its obligations under the EEO clause, and to make a good faith effort to achieve each goal under the Plan in each trade in which it has employees. The overall good faith performance by other Contractors or subcontractors toward a goal in an approved Plan does not excuse any covered Contractor's or Subcontractor's failure to take good faith efforts to achieve the Plan goals and timetables.

4. The Contractor shall implement the specific affirmative action standards provided in paragraphs 7 a through p of these specifications. The goals set forth in the solicitation from which this contract resulted are expressed as percentages of the total hours of employment and training of minority and female utilization the Contractor should reasonably be able to achieve in each construction trade in which it has employees in the covered area. Covered construction contractors performing construction work in geographical areas where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed. Goals are published periodically in the Federal Register in notice form, and such notices may be obtained from any

Office of Federal Contract Compliance Programs office or from Federal procurement contracting officers. The Contractor is expected to make substantially uniform progress in meeting its goals in each craft during the period specified.

5. Neither the provisions of any collective bargaining agreement, nor the failure by a union with whom the Contractor has a collective bargaining agreement, to refer either minorities or women shall excuse the Contractor's obligations under these specifications, Executive Order 11246, or the regulations promulgated pursuant thereto.

6. In order for the nonworking training hours of apprentices and trainees to be counted in meeting the goals, such apprentices and trainees must be employed by the Contractor during the training period, and the Contractor must have made a commitment to employ the apprentices and trainees at the completion of their training, subject to the availability of employment opportunities. Trainees must be trained pursuant to training programs approved by the U.S. Department of Labor.

7. The Contractor shall take specific affirmative actions to ensure equal employment opportunity. The evaluation of the Contractor's compliance with these specifications shall be based upon its effort to achieve maximum results from its actions. The Contractor shall document these efforts fully, and shall implement affirmative action steps at least as extensive as the following:

a. Ensure and maintain a working environment free of harassment, intimidation, and coercion at all sites, and in all facilities at which the Contractor's employees are assigned to work. The Contractor, where possible, will assign two or more women to each construction project. The Contractor shall specifically ensure that all foremen, superintendents, and other on-site supervisory personnel are aware of and carry out the Contractor's obligation to maintain such a working environment, with specific attention to minority or female individuals working at such sites or in such facilities.

b. Establish and maintain a current list of minority and female recruitment sources, provide written notification to minority and female recruitment sources and to community organizations when the Contractor or its unions have employment opportunities available, and maintain a record of the organizations' responses.

c. Maintain a current file of the names, addresses and telephone numbers of each minority and female off-the-street applicant and minority or female

referral from a union, a recruitment source or community organization and of what action was taken with respect to each such individual. If such individual was sent to the union hiring hall for referral and was not referred back to the Contractor by the union or, if referred, not employed by the Contractor, this shall be documented in the file with the reason therefor, along with whatever additional actions the Contractor may have taken.

d. Provide immediate written notification to the Director when the union or unions with which the Contractor has a collective bargaining agreement has not referred to the Contractor a minority person or woman sent by the Contractor, or when the Contractor has other information that the union referral process has impeded the Contractor's efforts to meet its obligations.

e. Develop on-the-job training opportunities and/or participate in training programs for the area which expressly include minorities and women, including upgrading programs and apprenticeship and trainee programs relevant to the Contractor's employment needs, especially those programs funded or approved by the Department of Labor. The Contractor shall provide notice of these programs to the sources compiled under 7b above.

f. Disseminate the Contractor's EEO policy by providing notice of the policy to unions and training programs and requesting their cooperation in assisting the Contractor in meeting its EEO obligations; by including it in any policy manual and collective bargaining agreement; by publicizing it in the company newspaper, annual report, etc.; by specific review of the policy with all management personnel and with all minority and female employees at least once a year; and by posting the company EEO policy on bulletin boards accessible to all employees at each location where construction work is performed.

g. Review, at least annually, the company's EEO policy and affirmative action obligations under these specifications with all employees having any responsibility for hiring, assignment, layoff, termination or other employment decisions including specific review of these items with onsite supervisory personnel such as Superintendents, General Foremen, etc., prior to the initiation of construction work at any job site. A written record shall be made and maintained identifying the time and place of these meetings, persons attending, subject matter discussed, and disposition of the subject matter.

h. Disseminate the Contractor's EEO policy externally by including it in any advertising in the news media, specifically including minority and female news media, and providing written notification to and discussing the Contractor's EEO policy with other Contractors and Subcontractors with whom the Contractor does or anticipates doing business.

i. Direct its recruitment efforts, both oral and written, to minority, female and community organizations, to schools with minority and female students and to minority and female recruitment and training organizations serving the Contractor's recruitment area and employment needs. Not later than one month prior to the date for the acceptance of applications for apprenticeship or other training by any recruitment source, the Contractor shall send written notification to organizations such as the above, describing the openings, screening procedures, and tests to be used in the selection process.

j. Encourage present minority and female employees to recruit other minority persons and women and, where reasonable, provide after school, summer and vacation employment to minority and female youth both on the site and in other areas of a Contractor's work force.

k. Validate all tests and other selection requirements where there is an obligation to do so under 41 CFR Part 60-3.

l. Conduct, at least annually, an inventory and evaluation at least of all minority and female personnel for promotional opportunities and encourage these employees to seek or to prepare for, through appropriate training, etc., such opportunities.

m. Ensure that seniority practices, job classifications, work assignments and other personnel practices, do not have a discriminatory effect by continually monitoring all personnel and employment related activities to ensure that the EEO policy and the Contractor's obligations under these specifications are being carried out.

n. Ensure that all facilities and company activities are nonsegregated except that separate or single-user toilet and necessary changing facilities shall be provided to assure privacy between the sexes.

o. Document and maintain a record of all solicitations of offers for subcontracts from minority and female construction contractors and suppliers, including circulation of solicitations to minority and female contractor associations and other business associations.

p. Conduct a review, at least annually, of all supervisors' adherence to and performance under the Contractor's EEO policies and affirmative action obligations.

8. Contractors are encouraged to participate in voluntary associations which assist in fulfilling one or more of their affirmative action obligations (7a through p). The efforts of a contractor association, joint contractor-union, contractor-community, or other similar group of which the contractor is a member and participant, may be asserted as fulfilling any one or more of its obligations under 7a through p of these Specifications provided that the contractor actively participates in the group, makes every effort to assure that the group has a positive impact on the employment of minorities and women in the industry, ensures that the concrete benefits of the program are reflected in the Contractor's minority and female workforce participation, makes a good faith effort to meet its individual goals and timetables, and can provide access to documentation which demonstrates the effectiveness of actions taken on behalf of the Contractor. The obligation to comply, however, is the Contractor's and failure of such a group to fulfill an obligation shall not be a defense for the Contractor's noncompliance.

9. A single goal for minorities and a separate single goal for women have been established. The Contractor, however, is required to provide equal employment opportunity and to take affirmative action for all minority groups, both male and female, and all women, both minority and non-minority. Consequently, the Contractor may be in violation of the Executive Order if a particular group is employed in a substantially disparate manner (for example, even though the Contractor has achieved its goals for women generally, the Contractor may be in violation of the Executive Order if a specific minority group of women is underutilized).

10. The Contractor shall not use the goals and timetables or affirmative action standards to discriminate against any person because of race, color, religion, sex, or national origin.

11. The Contractor shall not enter into any Subcontract with any person or firm debarred from Government contracts pursuant to Executive Order 11246.

12. The Contractor shall carry out such sanctions and penalties for violation of these specifications and of the Equal Opportunity Clause, including suspension, termination and cancellation of existing subcontracts as may be imposed or ordered pursuant to Executive Order 11246, as amended, and

its implementing regulations, by the Office of Federal Contract Compliance Programs. Any Contractor who fails to carry out such sanctions and penalties shall be in violation of these specifications and Executive Order 11246, as amended.

13. The Contractor, in fulfilling its obligations under these specifications, shall implement specific affirmative action steps, at least as extensive as those standards prescribed in paragraph 7 of these specifications, so as to achieve maximum results from its efforts to ensure equal employment opportunity. If the Contractor fails to comply with the requirements of the Executive Order, the implementing regulations, or these specifications, the Director shall proceed in accordance with 41 CFR 60-4.8.

14. The Contractor shall designate a responsible official to monitor all employment related activity to ensure that the company EEO policy is being carried out, to submit reports relating to the provisions hereof as may be required by the Government and to keep records. Records shall at least include for each employee the name, address, telephone numbers, construction trade, union affiliation if any, employee identification number when assigned, social security number, race, sex, status (e.g., mechanic, apprentice trainee, helper, or laborer), dates of changes in status, hours worked per week in the indicated trade, rate of pay, and locations at which the work was performed. Records shall be maintained in any easily understandable and retrievable form; however, to the degree that existing records satisfy this requirement, contractors shall not be required to maintain separate records.

15. Nothing herein provided shall be construed as a limitation upon the application of other laws which establish different standards of compliance or upon the application of requirements for the hiring of local or other area residents (e.g., those under the Public Works Employment Act of 1977 and the Community Development Block Grant Program).

(b) The notice set forth in 41 CFR 60-4.2 and the specifications set forth in 41 CFR 60-4.3 replace the New Form for Federal Equal Employment Opportunity Bid Conditions for Federal and Federally Assisted Construction published at 41 FR 32482 and commonly known as the Model Federal EEO Bid Conditions, and the New Form shall not be used after the regulations in 41 CFR Part 60-4 become effective.

#### § 60-4.4 Affirmative action requirements.

(a) To implement the affirmative action requirements of Executive Order 11246 in the construction industry, the Office of Federal Contract Compliance Programs previously has approved affirmative action programs commonly referred to as "Hometown Plans," has promulgated affirmative action plans referred to as "Imposed Plans" and has approved "Special Bid Conditions" for high impact projects constructed in areas not covered by a Hometown or an Imposed Plan. All solicitations for construction contracts made after the effective date of the regulations in this part shall include the notice specified in § 60-4.2 of this part and the specifications in § 60-4.3 of this part in lieu of the Hometown and Imposed Plans including the Philadelphia Plan and the Special Bid Conditions. Until the Director has issued an order pursuant to § 60-4.6 of this part establishing goals and timetables for minorities in the appropriate geographical areas or for a project covered by Special Bid Conditions, the goals and timetables for minorities to be inserted in the Notice required by 41 CFR 60-4.2 shall be the goals and timetables contained in the Hometown Plan, Imposed Plan or Special Bid Conditions presently covering the respective geographical area or project involved.

(b) Signatories to a Hometown Plan (including heavy highway affirmative action plans) shall have 45 days from the effective day of the regulations in this part to submit under such a Plan (for the director's approval) goals and timetables for women and to include female representation on the Hometown Plan Administrative Committee. Such goals for female representation shall be at least as high as the goals established for female representation in the notice issued pursuant to 41 CFR 60-4.6. Failure of the signatories, within the 45-day period, to include female representation and to submit goals for women or a new plan, as appropriate, shall result in an automatic termination of the Office of Federal Contract Compliance program's approval of the Hometown Plan. At any time the Office of Federal Contract Compliance Programs terminates or withdraws its approval of a Hometown Plan, or when the plan expires and another plan is not approved, the contractors signatory to the plan shall be covered automatically by the specifications set forth in § 60-4.3 of this part and by the goals and timetables established for that geographical area pursuant to § 60-4.6 of this part.

#### § 60-4.5 Hometown plans.

(a) A contractor participating, either individually or through an association, in an approved Hometown Plan (including heavy highway affirmative action plans) shall comply with its affirmative action obligations under Executive Order 11246 by complying with its obligations under the plan: *Provided*, That each contractor or subcontractor participating in an approved plan is individually required to comply with the equal opportunity clause set forth in 41 CFR 60-1.4; to make a good faith effort to achieve the goals for each trade participating in the plan in which it has employees; and that the overall good performance by other contractors or subcontractors toward a goal in an approved plan does not excuse any covered contractor's or subcontractor's failure to take good faith efforts to achieve the plan's goals and timetables. If a contractor is not participating in an approved Hometown Plan it shall comply with the specifications set forth in § 60-4.3 of this part and with the goals and timetables for the appropriate area as listed in the notice required by 41 CFR 60-4.2 with regard to that trade. For the purposes of this Part 60-4, a contractor is not participating in a Hometown Plan for a particular trade if it:

- (1) Ceases to be signatory to a Hometown Plan covering that trade;
- (2) Is signatory to a Hometown Plan for that trade but is not party to a collective bargaining agreement for that trade;
- (3) Is signatory to a Hometown Plan for that trade but is party to a collective bargaining agreement with labor organizations which are not or cease to be signatories to the same Hometown Plan for that trade;
- (4) Is signatory to a Hometown Plan for that trade but is party to a collective bargaining agreement with a labor organization for that trade but the two have not jointly executed a specific commitment to minority and female goals and timetables and incorporated the commitment in the Hometown Plan for that trade;
- (5) Is participating in a Hometown Plan for that trade which is no longer acceptable to the Office of Federal Contract Compliance Programs;
- (6) Is signatory to a Hometown Plan for that trade but is party to a collective bargaining agreement with a labor organization for that trade and the labor organization and the contractor have failed to make a good faith effort to comply with their obligations under the Hometown Plan for that trade.

(b) Contractors participating in Hometown Plans must be able to

demonstrate their participation and document their compliance with the provision of the Hometown Plan.

#### § 60-4.6 Goals and timetables.

The Director, from time to time, shall issue goals and timetables for minority and female utilization which shall be based on appropriate workforce, demographic or other relevant data and which shall cover construction projects or construction contracts performed in specific geographical areas. The goals, which shall be applicable to each construction trade in a covered contractor's or subcontractor's entire workforce which is working in the area covered by the goals and timetables, shall be published as notices in the **Federal Register**, and shall be inserted by the contracting officers and applicants, as applicable, in the Notice required by 41 CFR 60-4.2. Covered construction contractors performing construction work in geographical areas where they do not have a Federal or federally assisted construction contract shall apply the minority and female goals established for the geographical area where the work is being performed.

#### § 60-4.7 Effect on other regulations.

The regulations in this part are in addition to the regulations contained in this chapter which apply to construction contractors and subcontractors generally. See particularly, 41 CFR 60-1.4 (a), (b), and (c); 60-1.5; 60-1.7; 60-1.8; 60-1.28; 60-1.29; 60-1.30; 60-1.31; 60-1.32; 60-1.41; 60-1.42; 60-1.43; 60-1.46; 60-1.47; 60-1.48; and 41 CFR Part 60-3; Part 60-20; Part 60-30; Part 60-40; and Part 60-50.

#### § 60-4.8 Show cause notice.

If an investigation or compliance review reveals that a construction contractor or subcontractor has violated the Executive Order, any contract clause, specifications or the regulations in this chapter and if administrative enforcement is contemplated, the Director shall issue to the contractor or subcontractor a notice to show cause which shall contain the items specified in (i)-(iv) of 41 CFR 60-1.25(c)(1). If the contractor does not show good cause within 30 days, or in the alternative, fails to enter an acceptable conciliation agreement which includes where appropriate, make up goals and timetables, back pay, and seniority relief for affected class members, the OFCCP shall follow the procedure in 41 CFR 60-1.29: *Provided*, That where a conciliation agreement has been violated, no show cause notice is required prior to the initiation of enforcement proceedings.

#### § 60-4.9 Incorporation by operation of the order.

By operation of the Order, the equal opportunity clause contained in § 60-1.4, the Notice of Requirement for Affirmative Action to Ensure Equal Employment Opportunity (Executive Order 11246) contained in § 60-4.2, and the Standard Federal Equal Employment Opportunity Construction Contract Specifications (Executive Order 11246) contained in § 60-4.3 shall be deemed to be a part of every solicitation or of every contract and subcontract, as appropriate, required by the Order and the regulations in this chapter to include such clauses whether or not they are physically incorporated in such solicitation or contract and whether or not the contract is written.

### PART 60-20—SEX DISCRIMINATION GUIDELINES

#### Sec.

- 60-20.1 Title and purpose.
- 60-20.2 Recruitment and advertisement.
- 60-20.3 Job policies and practices.
- 60-20.4 Seniority systems.
- 60-20.5 Discriminatory wages and placements.
- 60-20.6 Affirmative action.
- 60-20.7 Pregnancy, childbirth and related medical conditions.
- 60-20.8 Sexual advances and favors.

Authority: Sec. 201, E. O. 11246, 30 FR 12319, and E. O. 11375, 32 FR 14303, as amended by E. O. 12086.

#### § 60-20.1 Title and purpose.

The purpose of the provisions in this part is to set forth the interpretations and guidelines of the Office of Federal Contract Compliance Programs regarding the implementation of Executive Order 11246, as amended, for the promotion and ensuring of equal opportunities for all persons employed or seeking employment with Government contractors or with contractors performing under federally assisted construction contracts, without regard to sex. Experience has indicated that special problems related to the implementation of the Executive Order require a definitive treatment beyond the terms of the Order itself. These interpretations are to be read in connection with existing regulations, set forth in Parts 60-1 and 60-2 of this chapter.

#### § 60-20.2 Recruitment and advertisement.

- (a) Contractors engaged in recruiting activity shall recruit employees of both sexes for all jobs unless sex is a bona fide occupational qualification.
- (b) Advertisements in newspapers and other media for employment sponsored by or on behalf of contractors shall not depict, express a preference, or

indicate that a particular sex is sought, desired or better suited for a particular job unless sex is a bona fide occupational qualification for the job. The placement of an advertisement in columns headed "Male" or "Female", or similar wording, will be considered an expression of a preference, limitation, specification, or discrimination based on sex.

#### § 60-20.3 Job policies and practices.

(a) Written personnel policies relating to this subject area must expressly indicate that there shall be no discrimination against employees on account of sex. If the contractor deals with a bargaining representative for its employees and there is a written agreement on conditions of employment, such agreement shall not be inconsistent with these guidelines.

(b) Employees of both sexes shall have an equal opportunity to any available job that he or she is qualified to perform, unless sex is a bona fide occupational qualification.

**Note.**—In most Government contract work there are only limited instances where valid reasons can be expected to exist which would justify the exclusion of all men or all women from any given job.

(c)(1) The contractor must not make any distinction based upon sex in employment opportunities, wages, hours or other conditions of employment, including fringe benefits. As the Supreme Court held in *Los Angeles Department of Water and Power v. Manhart*, 435 U.S. 702 (1978), fringe benefits for similarly situated men and women must be equal, notwithstanding that the contractor's contributions for men and women are unequal.

(2) [Reserved.]

(d) Any distinction between married and unmarried persons of one sex that is not made between married and unmarried persons of the opposite sex will be considered to be a distinction made on the basis of sex. Similarly, a contractor must not deny employment to women with young children unless it has the same exclusionary policies for men; or terminate an employee of one sex in a particular job classification upon reaching a certain age unless the same rule is applicable to members of the opposite sex.

(e) The contractor's policies and practices must assure appropriate physical facilities to both sexes. The contractor may not refuse to hire men or women, or deny men or women a particular job because there are no restroom or associated facilities, unless the contractor is able to show that providing the facilities would be

unreasonable for such reasons as excessive expense or lack of space.

(f)(1) A contractor must not deny a female employee the right to any job that she is qualified to perform in reliance upon a state "protective" law. For example, such laws include those which prohibit women from performing in certain types of occupations (e.g., a bartender or a core-maker); from working at jobs requiring more than a certain number of hours; and from working at jobs that require lifting or carrying more than designated weights.

(2) Such legislation was intended to be beneficial, but, instead, has been found to result in restricting employment opportunities for men and/or women. Accordingly, it cannot be used as a basis for denying employment or for establishing sex as a bona fide occupational qualification for the job.

(g) The contractor must not specify any differences for male and female employees on the basis of sex in either mandatory or optional retirement age.

(h) Nothing in these guidelines shall be interpreted to mean that differences in capabilities for job assignments do not exist among individuals and that such distinctions may not be recognized by the contractor in making specific assignments. The purpose of these guidelines is to ensure that such distinctions are not based upon sex.

#### § 60-20.4 Seniority systems.

When they exist, seniority lines and lists must not be based upon sex. Where such a separation has existed, the contractor must eliminate this distinction and provide appropriate relief.

#### § 60-20.5 Discriminatory wages and placements.

(a) *Wages.* The contractor's wage schedules must not be related to or based on the sex of the employees.

While the more obvious cases of discrimination exist where employees of different sexes are paid different wages on jobs which require substantially equal skill, effort and responsibility and are performed under similar working conditions, compensation practices with respect to any jobs where males or females are concentrated will be scrutinized closely to assure that sex has played no role in the setting of levels of pay.

(b) *Placements.* The Contractor may not discriminatorily restrict one sex to certain jobs. In such a situation, the contractor shall provide appropriate relief and shall ensure that all jobs are made available to all qualified employees without regard to sex. (Example: An electrical manufacturing

company may have a production division with three functional units: One (assembly) all female; another (wiring), all male; and a third (circuit boards), also all male. The highest wage attainable in the assembly unit is considerably less than that in the circuit board and wiring units. In such a case the contractor must take steps to provide qualified female employees opportunity for placement in job openings in the other two units with red circling of wages, where appropriate, and without loss of seniority.)

#### § 60-20.6 Affirmative action.

(a) Women typically have not been found in significant numbers in management. In many companies management trainee programs are one of the ladders to management positions. Traditionally, few if any, women have been admitted into these programs. An important element of affirmative action shall be a commitment to include female candidates in such programs.

(b) Distinctions based on sex may not be made in other training programs. Both sexes should have equal access to all training programs and affirmative action programs should demonstrate that such access has been provided.

(c) The contractor shall take affirmative action to recruit women for jobs in which they previously have been excluded or are underrepresented. The contractor also shall take affirmative action to encourage the participation of women in training programs for jobs in which they have been previously excluded or are underrepresented.

*Note.*—This can be done by various methods. Examples include, but are not limited to (1) Including in itineraries of recruiting trips, (i) women's colleges where graduates with skills desired by the contractor can be found, and (ii) female students of coeducational institutions and (2) stating in advertisements that women will be considered equally with men for jobs.

#### § 60-20.7 Pregnancy, childbirth and related medical conditions.

(a) Employees or applicants for employment shall not be denied employment because of pregnancy, childbirth or related medical conditions.

(b) Disabilities caused or contributed to by pregnancy, childbirth, or related medical conditions, for all job-related purposes, shall be treated the same as disabilities caused or contributed to by other medical conditions, under any health or disability insurance or sick leave plan available in connection with employment. Written or unwritten employment policies and practices involving matters such as the commencement and duration of leave, the availability of extensions, the

accrual of seniority and other benefits and privileges, reinstatement, and payment under any health or disability insurance or sick leave plan, formal or informal, shall be applied to disability due to pregnancy, childbirth or related medical conditions on the same terms and conditions as they are applied to other disabilities. Health insurance benefits for abortion, except where the life of the mother would be endangered if the fetus were carried to term or where medical complications have arisen from an abortion, are not required to be paid by the contractor; nothing herein, however, precludes the contractor from providing abortion benefits or otherwise affects bargaining agreements in regard to abortion.

(c) Where the termination of an employee who is temporarily disabled is caused by an employment policy under which insufficient or no leave is available, such a termination violates the Order if it has a disparate impact on employees of one sex and is not justified by business necessity.

(d)(1) Any fringe benefit program, or fund, or insurance program which is in effect on October 31, 1978, which does not treat women affected by pregnancy, childbirth, or related medical conditions the same as other persons not so affected but similar in their ability or inability to work, must be in compliance with the provisions of § 60-20.7(b) by April 29, 1979. In order to come into compliance with the provisions of § 60-20.7(b) there can be no reduction of benefits or compensation which were in effect on October 31, 1978, before October 31, 1979, or the expiration of a collective bargaining agreement in effect on October 31, 1978, whichever is later.

(2) Any fringe benefit program implemented after October 31, 1978, must comply with the provisions of § 60-20.7(b) upon implementation.

#### § 60-20.8 Sexual harassment and favors.

(a) Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature are violations of the Order when (1) submission to such conduct is made either explicitly or implicitly a term or condition of an individual's employment, (2) submission to or rejection of such conduct by an individual is used as the basis for employment decisions affecting such individual, or (3) such conduct has the purpose or effect of "unreasonably" interfering with an individual's work performance or creating an intimidating, hostile or offensive work environment.

(b) A contractor is liable under the Order for the acts of its officials, managers and supervisors when these

individuals engage in the activities described in paragraph (a) of this section, regardless of whether their specific acts were authorized or forbidden by the contractor and regardless of whether the contractor knew or should have known of their occurrence.

(c) With respect to conduct between fellow employees, a contractor is responsible for acts of sexual harassment in the workplace where the contractor (or its officials, managers and supervisors) knows or should have known of the conduct and fails to take immediate and appropriate action.

(d) A contractor also may be responsible for the acts of nonemployees, with respect to sexual harassment of employees in the workplace, where the contractor (or its officials, managers and supervisors) knows or should have known of the conduct and fails to take immediate and appropriate corrective action. In reviewing these cases, OFCCP will consider the extent of the contractor's control and any other legal responsibility which the contractor may have with respect to the conduct of such nonemployees.

(e) Where employment opportunity or benefits are granted because of an individual's submission to the contractor's sexual advances or requests for sexual favors, the contractor may be held liable under the Order for unlawful sex discrimination against other persons who were qualified for but denied that employment opportunity or benefit.

#### **PART 60-30—RULES OF PRACTICE FOR ADMINISTRATIVE PROCEEDINGS TO ENFORCE EQUAL OPPORTUNITY UNDER EXECUTIVE ORDER 11246, SECTION 402, AND SECTION 503**

##### **General Provisions**

###### **Sec.**

- 60-30.1 Applicability of rules.
- 60-30.2 Waiver, modification.
- 60-30.3 Computation of time.
- 60-30.4 Form, filing, service of pleadings and papers.

##### **Prehearing Procedures**

- 60-30.5 Administrative complaint.
- 60-30.6 Answer.
- 60-30.7 Notice of prehearing conference.
- 60-30.8 Motions; disposition of motions.
- 60-30.9 Interrogatories, and admissions as to facts and documents.
- 60-30.10 Production of documents and things and entry upon land for inspection and other purposes.
- 60-30.11 Depositions upon oral examination.
- 60-30.12 Prehearing conferences.
- 60-30.13 Consent findings and order.

##### **Hearings and Related Matters**

###### **Sec.**

- 60-30.14 Designation of Administrative Law Judges.
- 60-30.15 Authority and responsibilities of Administrative Law Judges.
- 60-30.16 Appearances.
- 60-30.17 Appearance of witnesses.
- 60-30.18 Evidence; testimony.
- 60-30.19 Objections; exceptions; offer of proof.
- 60-30.20 Ex Parte communications.
- 60-30.21 Oral argument.
- 60-30.22 Official transcript.
- 60-30.23 Summary judgment.
- 60-30.24 Participation by interested persons.

##### **Post Hearing Procedures**

- 60-30.25 Post hearing briefs.
- 60-30.26 Record for recommended decision.
- 60-30.27 Recommended decision.
- 60-30.28 Exceptions to recommended decisions.
- 60-30.29 Record.
- 60-30.30 Final Administrative Order.

##### **Expedited Hearing Procedures**

- 60-30.31 Expedited hearings—when appropriate.
- 60-30.32 Administrative complaint and answer.
- 60-30.33 Discovery.
- 60-30.34 Conduct of hearing.
- 60-30.35 Recommended decision after hearing.
- 60-30.36 Exceptions to recommendations.
- 60-30.37 Final Administrative Order.
- 60-30.38 Preliminary administrative enforcement proceedings.

**Authority:** Secs. 201, 205, 208, 209, 301, 302(b) and 303(a) of the Executive Order 11246, as amended, 30 FR 12319; 32 FR 14303; § 60-1.26 of Part 60-1 of this chapter (41 CFR Part 60-1), as amended by E.O. 12086.

##### **General Provisions**

###### **§ 60-30.1 Applicability of rules.**

This part provides the rules of practice for all administrative proceedings, instituted to enforce equal employment opportunity under Executive Order 11246, section 402 of the Vietnam Era Veterans Readjustment Assistance Act and section 503 of the Rehabilitation Act. In the absence of a specific provision, procedures shall be in accordance with the Federal Rules of Civil Procedure. This part is not applicable to hearings held by the Director under §§ 60-1.9, 60-1.27, or 60-1.48 of this chapter.

###### **§ 60-30.2 Waiver, modification.**

Upon notice to all parties, the Administrative Law Judge may, with respect to matters pending before him/her modify or waive any rule herein upon a determination that no party will be prejudiced and that the ends of justice will be served thereby.

###### **§ 60-30.3 Computation of time.**

In computing any period of time under the rules in this part or in an order

issued hereunder, the time begins with the day following the act, event, or default, and includes the last day of the period, unless it is a Saturday, Sunday, or legal holiday observed by the Federal Government in which event it includes the next business day. When the period of time allowed is less than seven days, intermediate Saturdays, Sundays and legal holidays observed by the Federal Government shall be excluded from the computation.

###### **§ 60-30.4 Form, filing, service of pleadings and papers.**

(a) *Form.* The original of all pleadings and papers in a proceeding conducted under the regulations in this part shall be filed with the Administrative Law Judge assigned to the case or with the Chief Administrative Law Judge if the case has not been assigned. Every pleading and paper filed in the proceeding shall contain a caption setting forth the title of the action, the case file number assigned by the Administrative Law Judge, and a designation of the pleading or paper (e.g., complaint, motion to dismiss, etc.). The pleading or papers shall be signed and shall contain the address and telephone number of the person representing the party or the person on whose behalf the pleading or paper was filed. Unless the Administrative Law Judge otherwise orders with respect to specific pleadings and papers in a specific case, all such papers and pleadings are public documents.

(b) *Service.* Service upon any party shall be made by the party filing the pleading or document by delivering a copy to the party or by mailing a copy to the party's last known address. When a party is represented by an attorney, service shall be made upon the attorney.

(c) *Proof of service.* A certificate of the person serving the pleading or other document by personal delivery or by mailing, setting forth the manner of service, shall be proof of service.

##### **Prehearing Procedures**

###### **§ 60-30.5 Administrative complaint.**

(a) *Filing.* The Solicitor of Labor, Associate Solicitor for Civil Rights and Regional Solicitors, upon referral from the Office of Federal Contract Compliance Programs, are authorized to institute enforcement proceedings by filing a complaint and serving the complaint upon the contractor which shall be designated as the defendant. The Department of Labor, OFCCP, shall be designated as plaintiff.

(b) *Contents.* The complaint shall contain a concise jurisdictional statement, and a clear and concise statement sufficient to put the defendant

on notice of the acts or practices it is alleged to have committed in violation of the Order, or section 402 or 503. The complaint shall also contain a prayer regarding the relief being sought, a statement of whatever sanctions the Government will seek to impose and the name and address of the attorney who will represent the Government. The notice pleading contemplated by this paragraph (b) shall conform to notice pleading under the Federal Rules of Civil Procedure.

(c) *Amendment.* The complaint may be amended once as a matter of course before an answer is filed, and the defendant may amend its answer once as a matter of course not later than 10 days after the filing of the original answer. Other amendments of the complaint or of the answer to the complaint shall be made only by leave of the Administrative Law Judge or by written consent of the adverse party; and leave shall be freely given where justice so requires. An amended complaint shall be answered within 14 days of its service, or within the time for filing an answer to the original complaint, whichever period is longer. If a response is required to an amended answer, such response shall be made within 14 days of service of the amended answer.

#### § 60-30.6 Answer.

(a) *Filing and service.* Within 20 days after the service of the complaint, the defendant shall file an answer; the answer shall be filed with the Chief Administrative Law Judge if the case has not been assigned to an Administrative Law Judge. The answer shall be signed by the defendant or its attorney, and served on the Government in accordance with § 60-30.4(b).

(b) *Contents; failure to file.* The answer shall (1) contain a statement of the facts which constitute the grounds of defense, and shall specifically admit, explain, or deny, each of the allegations of the complaint unless the defendant is without knowledge, in which case the answer shall so state; or (2) state that the defendant admits all the allegations of the complaint. The answer may contain a waiver of hearing; and if not, a separate paragraph in the answer shall request a hearing. The answer shall contain the name and address of the defendant, or of the attorney representing the defendant. Failure to file an answer or to plead specifically to any allegation of the complaint shall constitute an admission of such allegation.

(c) *Procedure upon admission of facts.* The admission, in the answer or by failure to file an answer, of all the

material allegations of fact contained in the complaint shall constitute a waiver of hearing. Upon such admission, the Administrative Law Judge, without further hearing, may prepare his/her decision in which he/she shall adopt as his/her proposed findings of fact the material facts alleged in the complaint. The parties shall be given an opportunity to file exceptions to the decision and to file briefs in support of the exceptions.

#### § 60-30.7 Notice of prehearing conference.

Within 45 days after the answer is filed, the Administrative Law Judge shall notice the parties for a prehearing conference. The Administrative Law Judge shall conduct a final prehearing conference in accordance with § 60-30.12(c)(1) of this part.

#### § 60-30.8 Motions; disposition of motions.

(a) *Motions.* Motions shall state the relief sought, the authority relied upon and the facts alleged, and shall be filed with the Administrative Law Judge. If made before or after the hearing itself, the motions shall be in writing. If made at the hearing, motions may be stated orally; but the Administrative Law Judge may require that they be reduced to writing and filed and served on all parties in the same manner as a formal motion. Unless otherwise ordered by the Administrative Law Judge, written motion shall be accompanied by a supporting memorandum. Within 10 days after a written motion is served, or such other time period as may be fixed, any party may file a response to a motion.

(b) *Disposition of motions.* The Administrative Law Judge may not grant a written motion prior to expiration of the time for filing responses thereto, except upon consent of the parties or following a hearing, but may overrule or deny such motion without awaiting response. The Administrative Law Judge shall make every reasonable effort to dispose of all outstanding motions prior to the beginning of the hearing. *Provided,* That prehearing conferences, hearings, and decisions need not be delayed pending disposition of motions.

(c) *Motions to compel discovery.* Prior to filing a motion to compel discovery under sections 60-30.9 through 60-30.11 of this part, counsel for the moving party shall communicate with opposing counsel concerning the matter in dispute and attempt to resolve it. Counsel for the moving party shall file with the motion a certificate of compliance with this rule.

#### § 60-30.9 Interrogatories, and admissions as to facts and documents.

(a) *Interrogatories.* Any party may serve upon a party written interrogatories. Each interrogatory shall be answered separately and fully in writing under oath, unless objected to. Answers are to be signed by the person making them and objections are to be signed by the attorney or by whomever is representing the party. Answers and objections shall be filed and served within 25 days of service of the interrogatory. Where the answer to an interrogatory may be derived or ascertained from the business records of the party upon whom the interrogatory has been served or from an examination, audit or inspection of such business records, or from a compilation, abstract or summary based thereon, and the burden of deriving or ascertaining the answer is substantially the same for the party serving the interrogatory as for the party served, it is a sufficient answer to such interrogatory to specify the records from which the answer may be derived or ascertained and to afford to the party serving the interrogatory reasonable opportunity to examine, audit or inspect such records and to make copies, compilations, abstracts or summaries.

(b) *Admissions.* Any party may serve upon a party a written request for the admission of the genuineness and authenticity of any relevant documents described in and exhibited with the request, or for the admission of the truth of any relevant matters of fact stated in the request. Each of the matters as to which an admission is requested shall be deemed admitted, unless within 25 days after service, the party to whom the request is directed serves upon the requesting party a sworn statement either (1) denying specifically the matter as to which an admission is requested, or (2) setting forth in detail the reasons why it cannot truthfully either admit or deny such matters.

(c) *Objections or failures to respond.* The party submitting the interrogatory or request may move for an order with respect to any objection or other failure to respond.

(d) *Filing with Administrative Law Judge.* All interrogatories and requests for admissions, and all responses thereto, shall be filed with the Administrative Law Judge and shall become a part of the record of the case.

#### § 60-30.10 Production of documents and things and entry upon land for inspection and other purposes.

(a) After commencement of the action, any party may serve on any other party a request to produce and/or permit the

party, or someone acting on its behalf, to inspect and copy any unprivileged documents, phonorecords, and other compilations, including computer tapes and printouts, which contain or may lead to relevant information and which are in the possession, custody, or control of the party upon whom the request is served. If necessary, translation of data compilations shall be done by the party furnishing the information.

(b) After commencement of the action, any party may serve on any other party a request to permit entry upon designated property which may be relevant to the issues in the proceeding and which is in the possession or control of the party upon whom the request is served, for the purpose of inspection, measuring, surveying or photographing, testing, or sampling the property or any designated object or area.

(c) Each request shall set forth with reasonable particularity the items to be inspected and shall specify a reasonable time and place for making the inspection and performing the related acts.

(d) The party upon whom the request is served shall respond within 25 days after the service of the request. The response shall state, with respect to each item, that inspection and related activities will be permitted as requested, unless there are objections, in which case the reasons for each objection shall be stated. The party submitting the request may move for an order with respect to any objection or other failure to respond.

**§ 60-30.11 Depositions upon oral examination.**

(a) *Depositions; notice of examination.* After commencement of the action, any party may take the testimony of any person, including a party, having personal or expert knowledge of the matters in issue, by deposition upon oral examination. A party desiring to take a deposition shall give reasonable notice in writing to every other party to the proceeding, and may use an administrative subpoena. The notice shall state the time and place for taking the deposition and the name and address of each person to be examined, if known, and, if the name is not known, a general description sufficient to identify the person or the particular class or group to which the person belongs. The notice shall also set forth the categories of documents the witness is to bring to the deposition, if any. A copy of the notice shall be furnished to the person to be examined unless his/her name is unknown.

(b) *Production of witnesses; obligation of parties; objections.* It shall be the obligation of each party to produce for

examination any person, along with such documents as may be requested, at the time and place, and on the date, set forth in the notice, if that party has control over such person. Each party shall be deemed to have control over its officers, agents, employees, and members. Unless the parties agree otherwise, depositions shall be held within the county in which the witness resides or works. The party or prospective witness may file with the Administrative Law Judge an objection within 5 days after notice of production of such witness is served, stating with particularity the reasons why the party cannot or ought not to produce a requested witness. The party serving the notice may move for an order with respect to such objection or failure to produce a witness. All errors or irregularities in compliance with the provisions of this section shall be deemed waived unless a motion to suppress the deposition or some part thereof is made with reasonable promptness after such defect is or, with due diligence, might have been ascertained.

(c) *Before whom taken; scope of examination; failure to answer.* Depositions may be taken before any officer authorized to administer oaths by the laws of the United States or of the place where the deposition is held. At the time and place specified in the notice, each party shall be permitted to examine and cross-examine the witness under oath upon any matter which is relevant to the subject matter of the proceeding, or which is reasonably calculated to lead to the production of relevant and otherwise admissible evidence.

Errors which might be cured at the taking of the deposition, including errors in the manner of taking the deposition, in the form of the questions or answers, in the oath, or in the conduct of the parties, are waived unless objection is made at the taking of the deposition. All other objections may, in the discretion of the objecting party, be raised at the taking of the deposition or reserved until the hearing. All objections made at the taking of the deposition shall be noted by the officer upon the deposition. Evidence objected to shall be taken subject to the objections. A refusal or failure on the part of any person under the control of a party to answer a question shall operate to create a presumption that the answer, if given, would be unfavorable to the controlling party, unless the question is subsequently ruled improper by the Administrative Law Judge or the Administrative Law Judge rules that

there was valid justification for the witness' failure or refusal to answer the question: *Provided*, That the examining party shall note on the record during the deposition the question which the deponent has failed, or refused to answer, and state his/her intention to invoke the presumption if no answer is forthcoming.

(d) *Subscription; certification; filing.* The testimony shall be reduced to typewriting, either by the officer taking the deposition or under his/her direction, and shall be submitted to the witness for examination and signing. If the deposition is not signed by the witness because he/she is ill, dead, cannot be found, or refuses to sign it, such fact shall be noted in the certificate of the officer and the deposition may then be used as fully as though signed. The officer shall immediately deliver the original copy of the transcript, together with his/her certificate, in person or by mail to the Administrative Law Judge. Copies of the transcript and certificate shall be furnished to all persons desiring them, upon payment of reasonable charges, unless distribution is restricted by order of the Administrative Law Judge for good cause shown.

(e) *Rulings on admissibility; use of deposition.* Subject to the provisions of this section, objection may be made at the hearing or receiving in evidence any deposition or part thereof for any reason which would require the exclusion of the evidence if the witness were then present and testifying. Any part or all of a deposition, so far as admissible in the discretion of the Administrative Law Judge, may be used against any party who was present or represented at the taking of the deposition or who had reasonable notice, in accordance with the following provisions:

(1) Any deposition may be used by any party for the purpose of contradicting or impeaching the testimony of the deponent as a witness.

(2) The deposition of a party or of any one who at the time of taking the deposition was an officer, director, or managing agent, or was designated to testify on behalf of a public or private corporation, partnership, association, or governmental agency which is a party may be used by the adverse party for any purpose.

(3) The deposition of a witness, whether or not a party, may be used by any party for any purpose if the Administrative Law Judge finds: (i) that the witness is dead; or (ii) that the witness is unable to attend or testify because of age, illness, infirmity, or imprisonment; or (iii) that the party offering the deposition has been unable to procure the attendance of the witness

by subpoena; or (iv) upon application and notice, that such exceptional circumstances exist as to make it desirable to allow the deposition to be used.

(4) If only part of a deposition is introduced in evidence by a party, any party may introduce any other parts by way of rebuttal and otherwise.

(f) *Stipulations.* If the parties so stipulate in writing, depositions may be taken before any person at any time or place, upon any notice and in any manner, and when so taken may be used like other depositions.

#### § 60-30.12 Prehearing conferences.

(a) Upon his/her own motion or a motion of a party, the Administrative Law Judge may direct the parties or their counsel to meet with him/her for a conference to consider:

- (1) Simplification of the issues;
- (2) Necessity or desirability of amendments to pleadings for purposes of clarification, simplification, or limitation;
- (3) Stipulation, admissions of fact and contents and authenticity of documents;
- (4) Limitation of the number of witnesses;
- (5) Scheduling dates for the exchange of witness lists and of proposed exhibits; and
- (6) Such other matters as may tend to expedite the disposition of the proceedings.

(b) The record shall show the matters disposed of by order and by agreement in such pretrial conferences. The subsequent course of the proceeding shall be controlled by such action.

(c)(1) A final prehearing conference shall be scheduled by the Administrative Law Judge a reasonable time in advance of the hearing to develop a prehearing order. The prehearing order shall contain any matters described in subparagraph (a) of this section agreed upon by the parties or ordered by the Administrative Law Judge. The prehearing order also shall contain the general factual and legal contentions of the parties.

(2) Witness lists and hearing exhibits shall be exchanged at least 10 days in advance of the hearing, or such other later time as is set by the Administrative Law Judge. Each party shall provide to all other parties copies of all exhibits that it then plans to use at the hearing.

(3) All discovery should be concluded at least 30 days prior to the hearing or by such other later time as ordered by the Administrative Law Judge for good cause shown. Administrative Law Judges, however, shall allow adequate time for discovery.

#### § 60-30.13 Consent findings and order.

(a) *General.* At any time after the issuance of a complaint and prior to or during the reception of evidence in any proceeding, the parties may jointly move to defer the receipt of any evidence for a reasonable time to permit negotiation of an agreement containing consent findings and an order disposing of the whole or any part of the proceeding. The allowance of such deferment and the duration thereof shall be in the discretion of the Administrative Law Judge after consideration of the nature of the proceeding, the requirements of the public interest, the representations of the parties, and the probability of an agreement being reached which will result in a just disposition of the issues involved.

(b) *Content.* Any agreement containing consent findings and an order disposing of a proceeding shall also provide:

- (1) That the order shall have the same force and effect as an order made after full hearing;
- (2) That the entire record on which any order may be based shall consist solely of the complaint and the agreement;
- (3) That any further procedural steps are waived; and
- (4) That any right to challenge or contest the validity of the findings and order entered into in accordance with the agreement is waived.

(c) *Submission.* On or before the expiration of the time granted for negotiations, the parties or their counsel may:

- (1) Submit the proposed agreement to the Administrative Law Judge for his/her consideration;
- (2) Inform the Administrative Law Judge that agreement cannot be reached.

(d) *Disposition.* In the event an agreement containing consent findings and an order is submitted within the time allowed, the Administrative Law Judge, within 30 days, shall accept such agreement by issuing his/her decision based upon the agreed findings, and the decision shall constitute the final Administrative Order.

#### Hearings and Related Matters

##### § 60-30.14 Designation of Administrative Law Judges.

Hearings shall be held before an Administrative Law Judge of the Department of Labor who shall be designated by the Chief Administrative Law Judge of the Department of Labor. After commencement of the proceeding but prior to the designation of an Administrative Law Judge, pleadings

and papers shall be filed with the Chief Administrative Law Judge.

##### § 60-30.15 Authority and responsibilities of Administrative Law Judges.

The Administrative Law Judge shall have the duty to conduct a fair hearing, to take all necessary action to avoid delay, and to maintain order. He/she shall have all powers necessary to those ends, including but not limited to, the power to:

(a) Hold conferences to settle, simplify, or fix the issues in a proceeding, or to consider other matters that may aid in the expeditious disposition of the proceeding by consent of the parties or upon his/her own motion;

(b) Require parties to state their position with respect to the various issues in the proceedings;

(c) Require parties to produce for examination those relevant witnesses and documents under their control; and require parties to answer interrogatories, and requests for admission, in full and produce documents for examination and copying;

(d) Administer oaths;

(e) Rule on motions and other procedural items or matters pending before him/her;

(f) Regulate the course of the hearing and conduct of participants therein;

(g) Examine and cross-examine witnesses and introduce into the record documentary or other evidence;

(h) Receive, rule on, exclude, or limit evidence and limit lines of questioning or testimony which are irrelevant, immaterial, or unduly repetitious;

(i) Fix time limits for submission of written documents in matters before him/her and extend any time limits established by this part upon a determination that no party will be prejudiced and that the ends of justice will be served thereby;

(j) Impose appropriate sanctions against any party or person failing to obey an order under these rules which may include:

(1) Refusing to allow the disobedient party to support or oppose designated claims or defenses, or prohibiting it from introducing designated matters into evidence;

(2) Excluding all testimony of an unresponsive or evasive witness, or determining that the answer of such witness, if given, would be unfavorable to the party having control over him/her;

(3) Expelling any party or person from further participation in the hearing; and

(4) Involving a presumption that the answers or actions ordered if made, would be unfavorable or adverse to the party ordered to answer or act.

(k) Take official notice of any material fact not appearing in evidence in the record, which is among the traditional matters of judicial notice;

(l) Recommend whether the defendant violated the Order, section 402 or section 503, as well as the nature of the relief necessary to ensure the full enjoyment of the rights secured by the Order, section 402 or section 503;

(m) Issue subpoenas;

(n) Render interlocutory decisions for the Department of Labor in preliminary enforcement proceedings under § 60-30.38; and

(o) Take any action authorized by these rules.

#### § 60-30.16 Appearances.

(a) *Representation.* The parties or other persons or organizations participating pursuant to this part 60-30 have the right to be represented by counsel.

(b) *Failure to appear.* In the event that a party appears at the hearing and no party appears for the opposing side, the party who is present shall have an election to present its evidence in whole or such portion thereof sufficient to make a prima facie case before the Administrative Law Judge. Failure to appear at the hearing shall not be deemed to be a waiver of the right to be served with a copy of the Administrative Law Judge's recommended decision and to file exceptions to it.

#### § 60-30.17 Appearance of witnesses.

(a) A party wishing to procure the appearance at the hearing of any person having personal or expert knowledge of the matters in issue shall serve on the prospective witness a notice, which may be accomplished by an administrative subpoena, setting forth the time, date, and place at which he/she is to appear for the purpose of giving testimony. The notice shall also set forth the categories of documents the witness is to bring with him/her to the hearing, if any. A copy of the notice shall be filed with the Administrative Law Judge and additional copies shall be served upon the parties.

(b) It shall be the obligation of each party to produce for examination any person, along with such documents as may be requested, at the time and place, and on the date, set forth in the notice, if that party has control over such person. Each party shall be deemed to have control over its officers, agents, employees, and members. Due regard shall be given to the convenience of witnesses in scheduling their testimony so that they will be detained no longer than reasonably necessary.

(c) The party or prospective witness may file an objection within 5 days after notice of production of such witness is served stating with particularity the reasons why the party cannot produce a requested witness. The party serving the notice may move for an order with respect to such objection or failure to produce a witness.

#### § 60-30.18 Evidence; testimony.

Formal rules of evidence shall not apply, but rules or principles, including the Federal Rules of Evidence, designed to assure production of the most probative evidence available shall be applied. Testimony shall be given orally by witnesses at the hearing. Except as set forth in § 60-30.11(e), depositions may not be introduced into evidence in lieu of testimony given at the hearing. A witness shall be available for cross-examination, and, at the discretion of the Administrative Law Judge, may be cross-examined without regard to the scope of direct examination as to any matter which is relevant and material to the proceeding. The Administrative Law Judge may exclude evidence which is immaterial, irrelevant, or unduly repetitious.

#### § 60-30.19 Objections; exceptions; offer of proof.

(a) *Objections.* If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination or the failure to limit such scope, it shall state briefly the grounds for such objection. Rulings on all objections shall appear in the record. Only objections made on the record may be relied upon subsequently in the proceedings.

(b) *Exceptions.* Formal exception to an adverse ruling is not required. Rulings by the Administrative Law Judge shall not be appealed prior to the transfer of the case to the Secretary. Exceptions to such rulings shall be filed in accordance with 41 CFR 60-30.28.

(c) *Offer of proof.* An offer of proof made in connection with an objection taken to any ruling excluding proffered oral testimony shall consist of a statement of the substance of the evidence which counsel contends would be adduced by such testimony; and, if the excluded evidence consists of evidence in written form or consists of references to documents, a copy of such evidence shall be marked for identification and shall accompany the record as the offer of proof. The offer of proof should clearly and specifically indicate the significance of the excluded evidence, unless the substance is apparent from the context. Allowance of

an offer of proof is within the discretion of the Administrative Law Judge.

#### § 60-30.20 Ex parte communications.

The Administrative Law Judge shall not consult any person, or party, on any fact in issue unless upon notice and opportunity for all parties to participate. No employee or agent of the Federal Government engaged in the investigation and prosecution of this case shall participate or advise in the rendering of the recommended or final decision in the case, except as witness or counsel in the proceeding.

#### § 60-30.21 Oral argument.

Any party shall be entitled upon request to a reasonable period between the close of evidence and termination of the hearing for oral argument. Oral arguments shall be included in the official transcript of the hearing.

#### § 60-30.22 Official transcript.

The official transcripts of testimony taken, together with any exhibits, briefs, or memorandums of law, shall be filed with the Administrative Law Judge. Transcripts of testimony may be obtained from the official reporter by the parties and the public as provided in section 11(a) of the Federal Advisory Committee Act (86 Stat. 770). Upon notice to all parties, the Administrative Law Judge may authorize such corrections to the transcript as are necessary to reflect accurately the testimony.

#### § 60-30.23 Summary judgment.

(a) *For the Government.* At any time after the expiration of 20 days from the commencement of the action, or after service of a motion for summary judgment by the defendant, the Government may move with or without supporting affidavits for a summary judgment upon all claims of any part.

(b) *For defendant.* The defendant may, at any time after commencement of the action, move with or without supporting affidavits for summary judgment in its favor as to all claims or any part.

(c) *Other parties.* Any other party to a formal proceeding under this part may support or oppose motions for summary judgment made by the Government or defendant, in accordance with this section, but may not move for summary judgment in its own behalf.

(d) *Statement of uncontested facts.* All motions for summary judgment shall be accompanied by a "Statement of Uncontested Facts" in which the moving party sets forth all alleged uncontested material facts which shall provide the basis for its motion. At least 5 days prior to the time fixed for hearing on the

motion, any party contending that any material fact regarding the matter covered by the motion is in dispute, shall file a "Statement of Disputed Facts." Failure to file a "Statement of Disputed Facts" shall be deemed as an admission to the "Statement of Uncontested Facts."

(e) *Motion and proceedings.* The motion shall be served upon all parties at least 15 days before the time fixed for the hearing on the motion. The adverse party or parties may serve opposing affidavits prior to the day of hearing. The judgment sought shall be rendered forthwith if the complaint and answer, depositions, and admissions on file, together with the affidavits, if any, show that there is no genuine issue as to any material fact and that the moving party is entitled to a judgment as a matter of law. Summary judgment rendered for or against the Government or the defendant shall constitute the findings and recommendations on the issues involved. Hearings on motions made under this section shall be scheduled by the Administrative Law Judge.

(f) *Case not fully adjudicated on motion.* If on motion under this section judgment is not rendered upon the whole case or for all the relief asked and a final hearing is necessary, the Administrative Law Judge at the hearing of the motion, by examining the notice and answer and the evidence before him/her and by interrogating counsel, shall, if practicable, ascertain what material facts exist without substantial controversy and what material facts are actually and in good faith controverted. He/she shall thereupon make an order specifying the facts that appear without substantial controversy, including the extent to which relief is not in controversy, and directing such further proceedings as are just. At the hearing on the merits, the facts so specified shall be deemed established, and the final hearing shall be conducted accordingly.

#### § 60-30.24 Participation by interested persons.

(a)(1) To the extent that proceedings hereunder involve employment of persons covered by a collective bargaining agreement, and compliance may necessitate a revision of such agreement, any labor organization which is a signatory to the agreement shall have the right to participate as a party.

(2) Other persons or organizations shall have the right to participate as parties if the final Administrative Order could adversely affect them or the class they represent, and such participation may contribute materially to the proper disposition of the proceedings.

(3) Any person or organization wishing to participate as a party under this section shall file with the Administrative Law Judge and serve on all parties a petition within 25 days after the commencement of the action or at such other time as ordered by the Administrative Law Judge, so long as it does not disrupt the proceeding. Such petition shall concisely state: (i) Petitioner's interest in the proceedings; (ii) who will appear for petitioner; (iii) the issues on which petitioner wishes to participate; and (iv) whether petitioner intends to present witnesses.

(4) The Administrative Law Judge shall determine whether each petitioner has the requisite interest in the proceedings and shall permit or deny participation accordingly. Where petitions to participate as parties are made by individuals or groups with common interest, the Administrative Law Judge may request all such petitioners to designate a single representative to represent all such petitioners: *Provided*, That the representative of a labor organization qualifying to participate under paragraph (a)(1) of the section must be permitted to participate in the proceedings. The Administrative Law Judge shall give each petitioner written notice of the decision on its petition; and if the petition is denied, he/she shall briefly state the grounds for denial and shall then treat the petition as a request for participation as *amicus curiae*. The Administrative Law Judge shall give written notice to each party of each petition granted.

(b)(1) Any other interested person or organization wishing to participate as *amicus curiae* shall file a petition before the commencement of the final hearing with the Administrative Law Judge. Such petition shall concisely state: (i) The petitioner's interest in the hearing; (ii) who will represent the petitioner; and (iii) the issues on which petitioner intends to present argument. The Administrative Law Judge may grant the petition if he/she finds that the petitioner has a legitimate interest in the proceedings, and that such participation may contribute materially to the proper disposition of the issues. An *amicus curiae* is not a party but may participate as provided in this section.

(2) An *amicus curiae* may present a brief oral statement at the hearing at the point in the proceeding specified by the Administrative Law Judge. He/she may submit a written statement of position to the Administrative Law Judge prior to the beginning of a hearing and shall serve a copy on each party. He/she may also submit a brief or written statement

at such time as the parties submit briefs and exceptions, and he/she shall serve a copy on each party.

#### Post-Hearing Procedures

##### § 60-30.25 Posthearing briefs.

Each party and *amicus* may file a brief. The time for filing briefs shall be established by the Administrative Law Judge. Such briefs shall be served simultaneously on all parties and *amici*, and a certificate of service shall be furnished to the Administrative Law Judge. Requests for additional time in which to file a brief shall be made in writing, and copies shall be served simultaneously on the other parties. Requests for extensions shall be received not later than 3 days before the date such briefs are due. No reply brief may be filed except by special permission of the Administrative Law Judge.

##### § 60-30.26 Record for recommended decision.

The transcript of testimony, exhibits, and all papers, documents, and requests filed in the proceedings, including briefs, but excepting the correspondence section of the docket, shall constitute the record for decision.

##### § 60-30.27 Recommended decision.

Within a reasonable time after the filing of briefs, the Administrative Law Judge shall recommend findings, conclusions, and a decision. These recommendations shall be certified, together with the record to the Secretary of Labor for a final Administrative Order. The recommended findings, conclusions, and decision shall be served on all parties and *amici* to the proceeding.

##### § 60-30.28 Exceptions to recommended decisions.

Within 30 days after receipt of the recommended findings, conclusions, and decision, any party may submit exceptions to said recommendation. These exceptions may be responded to by other parties within 14 days of their receipt by said parties. All exceptions and responses shall be filed with the Secretary. Service of exceptions and responses shall be made simultaneously on all parties to the proceeding. Requests to the Secretary for additional time in which to file exceptions and responses shall be in writing and copies shall be served simultaneously on other parties. Requests for extensions must be received no later than 3 days before the exceptions are due.

**§ 60-30.29 Record.**

After expiration of the time for filing exceptions and responses, the Secretary shall make a final decision, which shall be the final Administrative Order, on the basis of the record. The record shall consist of the record for recommended decision, the rulings and recommended decision of the Administrative Law Judge and the exceptions and responses filed subsequent to the Administrative Law Judge's decision.

**§ 60-30.30 Final Administrative Order.**

After expiration of the time for filing exceptions, and responses thereto, the Secretary or the Under Secretary, in the absence of the Secretary or if the Secretary disqualifies himself or herself for any reason, shall make a final Administrative Order which shall be served on all parties. If the Secretary concludes that the defendant has violated the Order, section 402 or section 503, an Administrative Order shall be issued which shall enjoin the violations, and require the contractor to provide whatever remedies are appropriate, and which shall impose whatever sanctions are appropriate, or any of the above. In any event, failure to comply with the Administrative Order shall result in the immediate termination and suspension of the defendant's contracts and/or debarment of the defendant from further contracts: *Provided*, That the portion of any order under Executive Order 11246 terminating, cancelling, or suspending contracts shall not become effective until the consultation requirements of section 209(a)(5) of the Order, as amended by Executive Order 12086, have been satisfied.

**Expedited Hearing Procedures****§ 60-30.31 Expedited hearings—when appropriate.**

Expedited Hearings may be used, *inter alia*, when a contractor or subcontractor has violated a conciliation agreement; has not adopted and implemented an acceptable affirmative action program; has refused to give access to or to supply records or other information as required by the equal opportunity clause; or has refused to allow an on-site compliance review to be conducted.

**§ 60-30.32 Administrative complaint and answer.**

(a) Expedited hearings shall be commenced by filing an administrative complaint in accordance with 41 CFR 60-30.5. The complaint shall state that the hearing is subject to these expedited hearing procedures.

(b) The answer shall be filed in accordance with 41 CFR 60-30.6 (a) and (b).

(c) Failure to request a hearing within the 20 days provided by 41 CFR 60-30.6(a) shall constitute a waiver of hearing, and all the material allegations of fact contained in the complaint shall be deemed to be admitted. If a hearing is not requested or is waived, within 25 days of the complaint's filing, the Administrative Law Judge shall adopt as findings of fact the material facts alleged in the complaint, and shall order the appropriate sanctions and/or penalties sought in the complaint. The Administrative Law Judge's findings and order shall constitute a final Administrative Order, unless the Office of the Solicitor, U.S. Department of Labor, files exceptions to the findings and order within 10 days of receipt thereof. If the Office of the Solicitor, U.S. Department of Labor, files exceptions, the matter shall proceed in accordance with § 60-30.36 of this Part.

(d) If a request for a hearing is received within 20 days as provided by 41 CFR 60-30.6(a), the hearing shall be convened within 45 days of receipt of the request and shall be completed within 15 days thereafter, unless more hearing time is required.

**§ 60-30.33 Discovery.**

(a) Any party may serve requests for admissions in accordance with § 60-30.9 (b) and (c).

(b) Witness lists and hearing exhibits will be exchanged at least 10 days in advance of the hearing.

(c) For good cause shown, and upon motion made in accordance with § 60-30.8, the Administrative Law Judge may allow the taking of depositions. Other discovery will not be permitted.

**§ 60-30.34 Conduct of hearing.**

(a) At the hearing, the Government shall be given an opportunity to demonstrate the basis for the request for sanctions and/or remedies, and the contractor shall be given an opportunity to show that the violation complained of did not occur and/or that good cause or good faith efforts excuse the alleged violations. Both parties shall be allowed to present evidence and argument and to cross-examine witnesses.

(b) The hearing shall be informal in nature, and the Administrative Law Judge shall not be bound by formal rules of evidence.

**§ 60-30.35 Recommended decision after hearing.**

Within 30 days after the hearing is concluded, the Administrative Law Judge shall recommend findings,

conclusions, and a decision. The Administrative Law Judge may permit the parties to file written post-hearing briefs within this time period, but the Administrative Law Judge's recommendations shall not be delayed pending receipt of such briefs. These recommendations shall be certified, together with the record, to the Secretary for a final Administrative Order. The recommended decision shall be served on all parties and amici to the proceeding.

**§ 60-30.36 Exceptions to recommendations.**

The provisions of 41 CFR 60-30.28 shall be applicable to exceptions to the Administrative Law Judge's recommendations.

**§ 60-30.37 Final Administrative Order.**

(a) After expiration of the time for filing exceptions, and responses thereto, the Secretary shall issue a final Administrative Order which shall be served on all parties. Unless the Secretary issues a final Administrative Order within 45 days after the expiration of the time for filing exceptions, and responses thereto, the Administrative Law Judge's recommended decision shall become a final Administrative Order which shall become effective on the 46th day after expiration of the time for filing exceptions and responses thereto. Except as to specific time periods required in this subsection, 41 CFR 60-30.30 shall be applicable to this subsection.

**§ 60-30.38 Preliminary administrative enforcement proceedings.**

(a) A preliminary enforcement proceeding is commenced by filing an administrative complaint. (See 41 CFR 60-1.29(e).) An administrative complaint may combine general allegations and prayers for relief and sanctions with a prayer for preliminary relief and sanctions or it may be limited to preliminary relief and sanctions, in the event an administrative complaint seeks preliminary and general enforcement, the allegations relating to preliminary enforcement shall be so designated and stated separately in the complaint.

An administrative complaint which is limited to preliminary relief and sanctions may be amended in accordance with 41 CFR 60-30.5(c) to make general allegations of violations and to request general relief and sanctions.

(b) The administrative complaint, as it relates to preliminary enforcement proceeding issues, shall contain a clear and concise factual statement sufficient

to inform the defendant with reasonable definiteness of the acts and practices it is alleged to have committed which constitute a violation. That is, fact pleading in lieu of notice pleading which applies under § 60-30.5 of this part, shall apply to preliminary enforcement proceeding issues. The complaint also shall contain a statement of any relief being sought and/or any sanctions which are sought to be imposed.

(c) No answer, as required by 41 CFR 60-30.6 of this part, shall be required with respect to the issues in the complaint which seek preliminary enforcement proceedings. However, the Administrative Law Judge shall notify the parties of the time and place of the hearing within 10 days after the complaint is filed.

(d) The plaintiff shall submit with the administrative complaint any affidavits and other documentation and a supporting memorandum. The defendant shall have 15 days after service of the complaint to submit any affidavits and other documentation and supporting memorandum.

(e) The Administrative Law Judge is authorized to conduct any prehearing conferences or procedures to expedite the hearing process.

(f) Discovery with regard to preliminary enforcement issues shall be granted only upon leave of the Administrative Law Judge for compelling reasons.

(g) The preliminary administrative enforcement proceeding is intended to provide a speedy hearing and decision on limited issues, and the Administrative Law Judge shall take all measures consistent with these rules and procedural fairness to achieve this end. The hearing shall commence within 20 days of the date of the notice of hearing specified in 41 CFR 60-30.38(c).

(h) If an administrative complaint is limited to preliminary relief and/or sanctions, the Administrative Law Judge shall follow the procedures in this § 60-30.38. If the Administrative complaint combines general allegations and prayers for relief with a prayer for preliminary relief and sanctions, the Administrative Law Judge shall bifurcate the proceeding. The hearing regarding the preliminary enforcement issues shall proceed in accordance with the procedures in this § 60-30.38. The issues involving the general allegations shall proceed in accordance with the regulations in this part but shall be stayed by the Administrative Law Judge pending his/her resolution of the preliminary enforcement proceeding.

(i) The decision of the Administrative Law Judge regarding the preliminary enforcement hearing issues shall be

issued within 10 working days after the conclusion of the hearing. The decision shall not be delayed to await the preparation of a transcript of posthearing submissions by the parties. The decision shall set forth findings of fact and conclusions of law, including the imposition of sanctions and/or relief, where appropriate, against the contractor.

(j) If the contractor's eligibility as a Government contractor or subcontractor is an issue in the preliminary enforcement proceeding and if, at the conclusion of such proceeding, the Administrative Law Judge determines that the contractor's practices violate the Order or section 402 or 503, the decision and order shall state whether the contractor is eligible or ineligible for the award of Government contracts or subcontracts or under what circumstances the contractor will be eligible for such contracts or subcontracts during the pendency of the proceeding involving the general allegations of the administrative complaint if any were alleged in addition to the preliminary enforcement issues. In addition, it shall state whether existing contracts and subcontracts, if any, are to be cancelled, terminated, or suspended, and if so, under what conditions. Provided, however, that such cancellation termination or suspension is subject to the contracting agency consultation required by Section 209(a)(5) of the Order. Such decision and order, for purposes of judicial review, shall constitute the final administrative decision of the Department of Labor on the preliminary enforcement issues. The decision and order entered at the conclusion of the preliminary enforcement stage of a bifurcated proceeding shall not prejudice either party with regard to the appropriateness of relief and sanctions which may be obtained against the contractor at the conclusion of the hearing on the general allegations in the administrative complaint.

#### PART 60-50—GUIDELINES ON DISCRIMINATION BECAUSE OF RELIGION OR NATIONAL ORIGIN

Sec.

- 60-50.1 Purpose and scope.
- 60-50.2 Equal employment policy.
- 60-50.3 Accommodations to religious observance and practice.
- 60-50.4 Enforcement.
- 60-50.5 Nondiscrimination.

##### § 60-50.1 Purpose and scope.

(a) The purpose of the provisions in this part is to set forth the interpretations and guidelines of the Office of Federal Contract Compliance

Programs regarding the implementation of Executive Order 11246, as amended, for promoting and ensuring equal employment opportunities for all persons employed or seeking employment with Government contractors or with contractors performing under federally assisted construction contracts, without regard to religious or national origin.

(b) Members of various religious and ethnic groups continue to be excluded from executive, middle-management, and other job levels because of discrimination based upon their religion and/or national origin. These guidelines are intended to remedy such unfair treatment.

(c) These guidelines also are intended to clarify the obligations of contractors with respect to accommodating to the religious observances and practices of employees and prospective employees.

(d) The employment problems of blacks, Hispanics, Asians or Pacific Islanders, American Indians or Alaskan natives are treated under Part 60-2 of this chapter and under other regulations and procedures implementing the requirements of Executive Order 11246, as amended. Accordingly, the remedial provisions of § 60-50.2(b) shall not be applicable to the employment problems of these groups.

(e) Nothing contained in this Part 60-50 is intended to supersede or otherwise limit the exemption set forth in § 60-1.5(a)(5) of this chapter for contractors with certain educational institutions.

##### § 60-50.2 Equal employment policy.

(a) *General requirements.* Under the equal opportunity clause contained in section 202 of Executive Order 11246, as amended, contractors are prohibited from discriminating against employees or applicants for employment because of religion or national origin, and must take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their religion or national origin. Such action includes, but is not limited to the following: Employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

(b) *Outreach and positive recruitment.* Contractors shall review their employment practices to determine whether members of the various religious and/or ethnic groups are receiving fair consideration for job opportunities. Special attention shall be directed toward executive and middle-management levels, where employment

problems relating to religion and national origin are most likely to occur. Based upon the findings of such reviews, contractors shall undertake appropriate outreach and positive recruitment activities, such as those listed below, in order to remedy existing deficiencies. It is not contemplated that contractors necessarily will undertake all the listed activities. The scope of the contractor's efforts shall depend upon all the circumstances, including the nature and extent of the contractor's deficiencies and the contractor's size and resources.

(1) Internal communication of the contractor's obligation to provide equal employment opportunity without regard to religion or national origin in such a manner as to foster understanding, acceptance, and support among the contractor's executive, management, supervisory, and all other employees and to encourage such persons to take the necessary action to aid the contractor in meeting this obligation.

(2) Development of reasonable internal procedures to ensure that the contractor's obligation to provide equal employment opportunity without regard to religion or national origin is being fully implemented.

(3) Periodically informing all employees of the contractor's commitment to equal employment opportunity for all persons, without regard to religion or national origin.

(4) Enlisting the assistance and support of all recruitment sources (including employment agencies, college placement directors, and business associates) for the contractor's commitment to provide equal employment opportunity without regard to religion or national origin.

(5) Reviewing employment records to determine the availability of promotable and transferable members of various religious and ethnic groups.

(6) Establishment of meaningful contacts with religious and ethnic organizations and leaders for such purposes as advice, education, technical assistance, and referral of potential employees.

(7) Engaging in significant recruitment activities at educational institutions with substantial enrollments of students from various religious and ethnic groups.

(8) Use of religious and ethnic media for institutional and employment advertising.

#### § 60-50.3 Accommodations to religious observance and practice.

A contractor must accommodate to the religious observances and practices of an employee or prospective employee unless the contractor demonstrates that it is unable to reasonably accommodate

to an employee's or prospective employee's religious observance or practice without undue hardship on the conduct of the contractor's business. As part of this obligation, a contractor must make reasonable accommodations to the religious observances and practices of an employee or prospective employee who regularly observes Friday evening and Saturday, or some other day of the week, as the Sabbath and/or who observes certain religious holidays during the year and who is conscientiously opposed to performing work or engaging in similar activity on such days, when such accommodations can be made without undue hardship on the conduct of the contractor's business. In determining the extent of the contractor's obligations under this section, at least the following factors shall be considered: (a) Business necessity, (b) financial costs and expenses, and (c) resulting personnel problems.

#### 60-50.4 Enforcement.

The provisions of this part are subject to the general enforcement, compliance review, and complaint procedures set forth in Part 60-1 of this chapter.

#### § 60-50.5 Nondiscrimination.

The provisions of this part are not intended and shall not be used to discriminate against any qualified employee or applicant for employment because of race, color, religion, sex, or national origin.

#### PART 60-60—CONTRACTOR EVALUATION PROCEDURES FOR CONTRACTORS FOR SUPPLIES AND SERVICES (REMOVED)

- Appendix A
- Appendix B

Authority: Sec. 503(a), Pub. L. 92-540, 86 Stat. 1097 (38 U.S.C. 2012), as amended by Sec. 402, Pub. L. 93-508, 88 Stat. 1593 (38 U.S.C. 2012).

##### Subpart A—Preliminary Matters, Affirmative Action Clause, Compliance

#### § 60-250.1 Purpose and application.

The purpose of the regulations in this part is to assure compliance with section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974, which requires Government contractors to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era. The regulations in this part apply to all Government contracts, including Federal deposit or share insurance, for the furnishing of supplies or services or for the use of personal property (including construction) for \$10,000 or more.

#### § 60-250.2 Coverage and waivers.

(a) *General.* (1) *Transactions for less than \$10,000.* Contracts and subcontracts for less than \$10,000 are not covered by the Act. No agency or contractor shall procure supplies or services in less than usual quantities to avoid the applicability of the affirmative action clause.

(2) *Contracts for indefinite quantities.* With respect to indefinite delivery-type contracts (including, but not limited to, open end contracts, requirement-type contracts, Federal Supply Schedule contracts, "call-type" contracts, and purchase notice agreements), the affirmative action clause shall be included unless the contracting agency has reason to believe that the amount to be ordered in any year under such contract will be less than \$10,000. The applicability of the affirmative action clause shall be determined at the time of award for the first year, and annually thereafter for succeeding years, if any. Notwithstanding the above, the affirmative action clause shall be applied to such contract whenever the amount of a single order is \$10,000 or more. Once the affirmative action clause is determined to be applicable, the contract shall continue to be subject to such clause for its duration, regardless of the amounts ordered, or reasonably expected to be ordered in any year.

(3) *Work outside of the United States.* The requirements of the affirmative action clause are waived with respect to

contracts with regard to work performed outside of the United States by employees who were not recruited within the United States.

(4) *Contracts with State or local governments.* The requirements of the affirmative action clause in any contract with a State or local government (or any agency, instrumentality or subdivision thereof) shall not be applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

(5) *Facilities not connected with contracts.* The Director may waive the requirements of the affirmative action clause with respect to any of a contractor's facilities which he or she finds to be in all respects separate and distinct from activities of the contractor related to the performance of the contract, provided that he or she also finds that such a waiver will not interfere with or impede the effectuation of the Act. Such waivers shall be considered only upon the request of the contractor.

(b) *Waivers.* (1) *Specific contracts and classes of contracts.* The head of an agency, with the concurrence of the Director, may waive the application to any contract of any part of or all the affirmative action clause when he or she deems that special circumstances in the national interest so require. The agency head, with the concurrence of the Director, may also grant such waivers to groups or categories of contracts of the same type where it is (i) in the national interest, (ii) found impracticable to act upon each request individually, and (iii) where such waiver will substantially contribute to convenience in administration of the Act.

(2) *National security.* Any requirement set forth in the regulations in this Part 60-250 shall not apply to any contract whenever the head of the contracting agency determines that such contract is essential to the national security and that its award without complying with such requirements is necessary to the national security. Upon making such a determination, the head of the agency will notify the Director in writing within 30 days.

(c) *Withdrawal of waiver.* When a waiver has been granted for any class of contracts under this section other than contracts granted waivers under paragraph (b)(2) of this section, the Director may withdraw the waiver for a specific contract or group of contracts to be awarded, when in his or her judgment such action is necessary or appropriate to achieve the purposes of the Act. The withdrawal shall not apply to contracts awarded prior to the

withdrawal, except that in procurement entered into by formal advertising, or the various forms of restricted formal advertising, such withdrawal shall not apply unless the withdrawal is made more than 10 calendar days before the date set for the opening of the bids.

#### § 60-250.3 Affirmative action clause.

Each agency and each contractor shall include the following affirmative action clause in each of its covered Government contracts (and modifications, renewals, or extensions thereof if not included in the original contract):

#### Affirmative Action for Disabled Veterans and Veterans of the Vietnam Era

(a) The contractor will not discriminate against any employee or applicant for employment because he or she is a disabled veteran or veteran of the Vietnam era in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified disabled veterans and veterans of the Vietnam era without discrimination based upon their disability or veterans status in all employment practices such as the following: Employment upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The contractor agrees that all suitable employment openings of the contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occurring at an establishment of the contractor other than the one wherein the contract is being performed but excluding those of independently operated corporate affiliates, shall be listed at an appropriate local office of the State employment service system wherein the opening occurs. The contractor further agrees to provide such reports to such local office regarding employment openings and hires as may be required.

State and local government agencies holding Federal contracts of \$10,000 or more shall also list all the suitable openings with the appropriate office of the State employment service, but are not required to provide those reports set forth in paragraphs (d) and (e).

(c) Listing of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruitment source or effort and shall involve the normal obligations which attach to the placing of a bona fide job order, including the acceptance of referrals of veterans and nonveterans. This listing of employment openings does not require the hiring of any particular job applicant or from any particular group of job applicants, and nothing herein is intended to relieve the contractor from any requirements

in Executive Orders or regulations regarding nondiscrimination in employment.

(d) The reports required by paragraph (b) of this clause shall include, but not be limited to, periodic reports which shall be filed at least quarterly with the appropriate local office or, where the contractor has more than one hiring location in a State, with the central office of that State, employment service. Such reports shall indicate for each hiring location (1) the number of individuals hired during the reporting period, (2) the number of nondisabled veterans of the Vietnam era hired, (3) the number of disabled veterans of the Vietnam era hired, and (4) the total number of disabled veterans hired. The reports should include covered veterans hired for on-the-job training under 38 U.S.C. 1787. The contractor shall submit a report within 30 days after the end of each reporting period wherein any performance is made on this contract identifying data for each hiring location. The contractor shall maintain at each hiring location copies of the reports submitted until the expiration of one year after final payment under the contract, during which time these reports and related documentation shall be made available, upon request, for examination by any authorized representatives of the contracting officer or of the Secretary of Labor. Documentation would include personnel records respecting job openings, recruitment and placement.

(e) Whenever the contractor becomes contractually bound to the listing provisions of this clause, it shall advise the employment service system in each State where it has establishments of the name and location of each hiring location in the State. As long as the contractor is contractually bound to these provisions and has so advised the State system, there is no need to advise the State system of subsequent contracts. The contractor may advise the State system when it is no longer bound by this contract clause.

(f) This clause does not apply to the listing of employment openings which occur and are filled outside of the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

(g) The provisions of paragraphs (b), (c), (d), and (e) of this clause do not apply to openings which the contractor proposes to fill from within its own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once the contractor decides to consider applicants outside of its own organization or employer-union arrangement for that opening.

(h) As used in this clause: (1) "All suitable employment openings" includes, but is not limited to, openings which occur in the following job categories: Production and non-production; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative, and professional openings as are compensated on a salary basis of less than \$25,000 per year. This term includes full-time employment, temporary employment of more than 3 days' duration, and part-time employment. It does not include openings which the contractor proposes to fill from within its own organization or to fill pursuant to a

customary and traditional employer-union hiring arrangement nor openings in an educational institution which are restricted to students of that institution. Under the most compelling circumstances an employment opening may not be suitable for listing, including such situations where the needs of the Government cannot reasonably be otherwise supplied, where listing would be contrary to national security, or where the requirement of listing would otherwise not be for the best interest of the Government.

(2) "Appropriate office of the State employment service system" means the local office of the Federal-State national system of public employment offices with assigned responsibility for serving the area where the employment opening is to be filled, including the District of Columbia, Guam, Puerto Rico, and the Virgin Islands.

(3) "Openings which the contractor proposes to fill from within its own organization" means employment openings for which no consideration will be given to persons outside of the contractor's organization (including any affiliates, subsidiaries, and the parent companies) and includes any openings which the contractor proposes to fill from regularly established "recall" lists.

(4) "Openings which the contractor proposes to fill pursuant to a customary and traditional employer-union hiring arrangement" means employment openings which the contractor proposes to fill from union halls, which is part of the customary and traditional hiring relationship which exists between the contractor and representatives of its employees.

(i) The contractor agrees to comply with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(j) In the event of the contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(k) The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notice shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era for employment, and the rights of applicants and employees.

(l) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding, that the contractor is bound by the terms of the Vietnam Era Veterans Readjustment Assistance Act, and is committed to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

(m) The contractor will include the provisions of this clause in every subcontract or purchase order of \$10,000 or more unless exempted by rules, regulations, or orders of the Secretary issued pursuant to the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor

will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to enforce such provisions including action for noncompliance.

**§ 60-250.4 Applicability of the affirmative action program requirement.**

(a) Within 120 days of the commencement of a contract, every Government contractor which has 50 or more employees and (1) has a contract of \$50,000 or more or (2) has contracts (at least one of which is at least \$10,000) which total \$50,000 or more in any 12-month period shall prepare and maintain an affirmative action program at each establishment which shall set forth the contractor's policies, practices and procedures in accordance with § 60-250.5 of this part. This program may be integrated into or kept separate from other affirmative action programs of the contractor which OFCCP requires it to maintain pursuant to this chapter.

(b) The affirmative action program shall be reviewed and updated annually. If there are any significant changes in procedures, rights or benefits as a result of the annual updating, those changes shall be communicated to employees and applicants for employment.

(c) The contractor shall submit the affirmative action program within 15 days of receipt of a request from OFCCP. The contractor shall also submit the affirmative action program upon OFCCP's request when a complaint is being investigated or a preaward compliance review is being conducted.

(d) The full affirmative action program shall be available to any employee or applicant for employment for inspection upon request. The location and hours during which the program may be obtained shall be posted at each establishment.

(e) The contractor shall invite all disabled veterans and veterans of the Vietnam era who wish to benefit under the affirmative action program to identify themselves to the contractor. The invitation shall state that the information is voluntarily provided, that it will be kept confidential, that refusal to provide it will not subject the applicant or employee to any adverse treatment and that it will be used only in accordance with the Act, and regulations in this part. If an applicant or employee so identifies himself or herself, the contractor should also seek the advice of the applicant or employee regarding proper placement and appropriate accommodation (an acceptable form for such an invitation is set forth in appendix A attached). Nothing in this section shall preclude an employee from informing a contractor at a future time of his or her desire to

benefit from this program. Nothing in this section shall relieve a contractor from liability for discrimination under the Act.

**§ 60-250.5 Affirmative action policy, practices and procedures.**

(a) *General requirements.* Under the affirmative action obligation imposed by the Vietnam Era Veterans Readjustment Assistance Act of 1974, contractors are required to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era at all levels of employment, including the executive level. Such action shall apply to all employment practices, including, but not limited to, the following: hiring, upgrading, demotion or transfer, recruitment, or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship and on-the-job training programs under 38 U.S.C. 1787.

(b) *Proper consideration of qualifications.* Contractors shall review their personnel processes to determine whether their present procedures assure careful, thorough and systematic consideration of the job qualifications of known disabled veteran applicants and Vietnam era veteran applicants for job vacancies filled either by hiring or promotion, and for all training opportunities offered or available. In determining the qualifications of a covered veteran, the contractor shall consider only that portion of the military record, including discharge papers, relevant to the specific job qualifications for which the veteran is being considered. To the extent that it is necessary to modify their personnel procedures, contractors shall include the development of new procedures for this purpose in their affirmative action program required under this part. These procedures must be designed so as to facilitate a review of the implementation of this requirement by the contractor or the Government. (The appendix attached is an example of an appropriate set of procedures. The procedures in appendix B are not required and contractors may develop other procedures which are appropriate to their circumstances.)

(c) *Physical and mental qualifications.* (1) The contractor shall provide in its affirmative action program, and shall adhere to, a schedule for the review of all physical or mental job qualification requirements to ensure that, to the extent qualification requirements tend to screen out qualified disabled veterans, they are job related and are consistent with business necessity and the safe performance of the job.

(2) Whenever a contractor applies physical or mental job qualification requirements in the selection of applicants or employees for employment or other change in employment status such as promotion, demotion, or training, to the extent that qualification requirements tend to screen out qualified disabled veterans, the requirements shall be related to the specific job or jobs for which the individual is being considered and shall be consistent with business necessity and the safe performance of the job. The contractor shall have the burden to demonstrate that it has complied with the requirements of this paragraph.

(3) Nothing in this section shall prohibit a contractor from conducting a comprehensive medical examination prior to employment provided that the results of such an examination shall be used only in accordance with the requirements of this section. Whenever a contractor inquires into an applicant's or employee's physical or mental condition or conducts a medical examination prior to employment or change in employment status information obtained in response to such inquiries or examination shall be kept confidential except that:

(i) Supervisors and managers may be informed regarding restrictions on the work or duties of disabled veterans and regarding accommodations; and

(ii) first aid and safety personnel may be informed, where and to the extent appropriate, if the condition might require emergency treatment; and

(iii) Government officials investigating compliance with the Act shall be informed.

(d) *Accommodation to physical and mental limitations of employees.* A contractor must make a reasonable accommodation to the physical and mental limitations of a disabled veteran unless the contractor can demonstrate that such an accommodation would impose an undue hardship on the conduct of the contractor's business. In determining the extent of a contractor's accommodation obligations, the following factors among others may be considered: (1) Business necessity and (2) financial costs and expenses.

(e) *Compensation.* In offering employment or promotions to disabled veterans, and veterans of the Vietnam era, the contractor may not reduce the amount of compensation offered because of any disability income, pension or other benefit the applicant or employee receives from another source.

(f) *Outreach, positive recruitment, and external dissemination of policy.* Contractors shall review their employment practices to determine whether their personnel programs provide the required affirmative action

for employment and advancement of qualified disabled veterans and veterans of the Vietnam era. Based upon the findings of such reviews, contractors shall undertake appropriate outreach and positive recruitment activities, such as those listed below. It is not contemplated that contractors will necessarily undertake all the listed activities or that their activities will be limited to those listed. The scope of a contractor's efforts shall depend upon all the circumstances, including the contractor's size and resources and the extent to which existing employment practices are adequate.

(1) The contractor should develop internal communication of its obligation to engage in affirmative action efforts to employ qualified disabled veterans and veterans of the Vietnam era in such a manner as to foster understanding, acceptance and support among the contractor's executive, management, supervisory and all other employees and to encourage such persons to take the necessary action to aid the contractor in meeting this obligation.

(2) The contractor should develop reasonable internal procedures to ensure that its obligation to engage in affirmative action to employ and promote qualified disabled veterans and veterans of the Vietnam era is being fully implemented.

(3) The contractor should periodically inform all employees and prospective employees of its commitment to engage in affirmative action to increase employment opportunities for qualified disabled veterans and veterans of the Vietnam era.

(4) The contractor should enlist the assistance and support of all recruiting sources including as follows:

(i) The local Veterans Employment Representative or his or her designee in the State Employment Service Office nearest each establishment where hiring takes place to recruit job ready veterans and to develop on-the-job training opportunities for covered veterans wherever feasible;

(ii) The Veterans Administration Regional Office nearest each establishment to develop on-the-job training opportunities for covered veterans, and to recruit job ready veterans;

(iii) The office of the National Alliance of Businessmen nearest each establishment where hiring takes place in order to cooperate in the Jobs for Veterans' Program;

(iv) The veterans' counselors and coordinators ("Vet-Reps" and "VCIPS") on college campuses for the recruitment of covered veterans;

(v) The service officers of the national veterans groups active in the area of

each establishment where hiring takes place for the recruitment of covered veterans; and

(vi) Local veterans' groups and veterans' service centers in the area of each establishment where employment services are performed near major cities, for the recruitment of covered veterans.

(5) The contractor should establish meaningful contacts with appropriate veterans' service organizations which service disabled veterans or veterans of the Vietnam era, for such purposes as advice, technical assistance and referral of potential employees. Technical assistance from the resources listed in this paragraph may consist of advice on proper placement, recruitment, training and accommodations contractors may undertake, but no such resource providing technical assistance shall have the authority to approve or disapprove the acceptability of affirmative action programs.

(6) The contractor should review employment records to determine the availability of promotable and transferrable qualified known disabled veterans and veterans of the Vietnam era presently employed, and to determine whether their present and potential skills are being fully utilized or developed.

(7) The contractor should send written notification of company policy to all subcontractors, vendors and suppliers, requesting appropriate action on their part.

(8) The contractor should consider all qualified disabled veterans and veterans of the Vietnam era not currently in the workforce having requisite skills who can be recruited through affirmative action measures.

(g) *Internal dissemination of policy.* A strong outreach program will be ineffective without adequate internal support from supervisory and management personnel and other employees. In order to assure greater employee cooperation and participation in the contractor's efforts, the contractor should adopt, implement and disseminate this policy internally as follows:

(1) Include it in the contractor's policy manual.

(2) Publicize it in the company newspaper, magazine, annual report and other media.

(3) Conduct special meetings with executive, management, and supervisory personnel to explain the intent of the policy and individual responsibility for effective implementation, making clear the chief executive officer's attitude.

(4) Schedule special meetings with all employees to discuss policy and explain individual employee responsibilities.

(5) Discuss the policy thoroughly in both employee orientation and management training programs.

(6) Meet with union officials to inform them of the contractor's policy, and request their cooperation.

(7) Include nondiscrimination clauses in all union agreements, and review all contractual provisions to ensure they are nondiscriminatory.

(8) Include articles on accomplishments of disabled veterans and veterans of the Vietnam era in company publications.

(9) Post the policy on company bulletin boards, including a statement that employees and applicants are protected from coercion, intimidation, interference or discrimination for filing a complaint or assisting in an investigation under the Act.

(h) *Responsibility for implementation.* An executive of the contractor should be designated as director or manager of company affirmative action activities under these regulations. His or her identity should appear on all internal and external communications regarding the company's affirmative action programs. This executive should be given necessary top management support and staff to manage the implementation of this program, including the following activities:

(1) Develop policy statements, affirmative action programs, and internal and external communication techniques. The latter techniques should include regular discussions with local managers, supervisors and employees to be certain the contractor's policies are being followed. In addition, supervisors should be advised that:

(i) Their work performance is being evaluated on the basis of their affirmative action efforts and results, as well as other criteria.

(ii) The contractor is obligated to prevent harassment of employees placed through affirmative action efforts, as set forth in 41 CFR 60-1.28.

(2) Identify problem areas in conjunction with line management and known disabled veterans, in the implementation of the affirmative action programs, and develop solutions. This is particularly important for the accommodations requirements.

(3) Design and implement audit and reporting systems that will:

(i) Measure effectiveness of the contractor's programs.

(ii) Indicate need for remedial action.

(iii) Determine the degree to which the contractor's objectives have been attained.

(iv) Determine whether known disabled veterans and veterans of the Vietnam era have had the opportunity to participate in all company sponsored educational, training, recreational and social activities.

(v) Ensure that each location is in compliance with the Act and the regulations in this Part 60-250.

(4) Serve as liaison between the contractor and enforcement agencies.

(5) Serve as liaison between the contractor and organizations of and for disabled veterans and veterans of the Vietnam era, and arrange for the active involvement by company representatives in the community service programs of local organizations of and for disabled veterans and veterans of the Vietnam era.

(6) Keep management informed of the latest developments in the entire affirmative action area.

(7) Arrange for career counseling for known disabled veterans and veterans of the Vietnam era.

(i) *Development and execution of affirmative action programs.* (1) Job qualification requirements reviewed pursuant to paragraph (c) of this section should be made available to all members of management involved in the recruitment, screening, selection, and promotion process.

(2) The contractor should evaluate the total selection process including training and promotion to ensure freedom from stereotyping disabled veterans and veterans of the Vietnam era in a manner which limits their access to all jobs for which they are qualified.

(3) All personnel involved in the recruitment, screening, selection, promotion, disciplinary, and related processes should be carefully selected and trained to ensure that the commitments in its affirmative action program are implemented.

(4) Formal briefing sessions should be held, preferably on company premises, with representatives from recruiting sources. Plant tours, clear and concise explanations of current and future job openings, position descriptions, worker specifications, explanations of the company's selection process, and recruiting literature should be an integral part of the briefings. Formal arrangements should be made for referral of applicants, follow up with sources, and feedback on disposition of applicants.

(5) A special effort should be made to include qualified disabled veterans or veterans of the Vietnam era on the personnel relations staff.

(6) Active participation in veterans "job fairs" is desirable.

(7) Recruiting efforts at all educational institutions should incorporate special efforts to reach disabled veterans and veterans of the Vietnam era.

(8) An effort should be made to participate in workstudy programs with Veterans' Administration rehabilitation

facilities which specialize in training or educating disabled veterans.

(9) The contractor should use all available resources to continue or establish federally assisted apprenticeship and on-the-job training programs under 38 U.S.C. 1787.

#### § 60-250.6 Determination of disability.

Any disabled veteran filing a complaint under this part shall submit documentation from the Veterans Administration or military service from which the person was discharged or released which indicates the disability. Such documentation shall be updated within one year prior to filing the complaint if there has been a major change in the veteran's condition or if the Veterans Administration is reviewing the veteran's case.

### Subpart B—General Enforcement and Complaint Procedure

#### § 60-250.20 Subcontracts.

Each nonexempt contractor shall include the affirmative action clause prescribed in § 60-250.3 in each of its nonexempt subcontracts. The clause may be incorporated by reference in accordance with 41 CFR 60-1.46.

#### § 60-250.21 Duties of agencies.

Each agency shall cooperate with the Director in the performance of his or her responsibilities under the Act. Such cooperation shall include the responsibility to ensure that contractors are fully cognizant of their obligations under the Act and this part, to provide the Director with any information which comes to its attention that the contractor is not in compliance with the Act or this part, and to take such actions for noncompliance as set forth in this chapter as may be ordered by the Director.

#### § 60-250.22 Evaluations by the OFCCP Assistant Regional Administrators.

The Assistant Regional Administrators, OFCCP, shall be primarily responsible for undertaking compliance reviews and investigations of complaints against contractors as may be necessary to assure that the purposes of the Acts are being carried out effectively.

#### § 60-250.23 Complaint procedures.

(a) *Filing complaints.* Complaints shall be filed within 180 days of the alleged violation unless the time for filing is extended for good cause shown.

(b) *Where to file.* Complaints may be filed with the OFCCP, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210, or with any OFCCP regional or area office.

Complaints also may be filed with the Veterans Employment Service of the Department of Labor. Complaints filed with the Veterans Employment Service shall be referred to OFCCP promptly for investigation.

(c) *Contents of complaints.* Complaints must be signed by the complainant or an authorized representative and must contain the following information: (1) name and address (including telephone number) of the complainant; (2) name and address of the contractor who committed the alleged violation; (3) a description of the act or acts considered to be a violation; (4) a statement that the alleged discriminatee is a disabled or Vietnam era veteran; and (5) any other pertinent information available which will assist in the investigation and resolution of the complaint, including the name of any known Federal agency with which the employer has contracted. Complaints alleging class-type violations which do not identify the alleged discriminatee or discriminatees will be accepted provided the other requirements of this paragraph are met. Signed third party complaints which do not identify the alleged discriminatee will be accepted, whether or not the third party signing the complaint is an authorized representative provided that the other information required by this paragraph is included.

(d) *Incomplete information.* If a complaint contains incomplete information, OFCCP shall seek the needed information from the person who filed the complaint. If the information is not furnished within 60 days of the date of the request, the case may be closed.

(e) *Investigations.* The OFCCP shall institute a prompt investigation of each complaint, and shall be responsible for developing a complete case record.

(f) *Referral to contractor.* When a complaint concerns an employee of a contractor and the contractor has an applicable internal review procedure, the complaint may be referred to the contractor for processing under that procedure if the employee gives his/her consent. The contractor shall be informed of the elements of the complaint either by being furnished a copy or a sanitized version. The complaint and all actions taken thereunder shall be kept confidential by the contractor. If the contractor is able to resolve the complaint to the satisfaction of the employee prior to the OFCCP investigation, the contractor shall notify OFCCP of the results in writing within 60 days of the referral. The case will be closed upon verification with the employee.

(g) *Resolution of matters.* (1) If the complaint investigation shows no violation of the Act or regulations, or if the matter is not recommended to the Office of the Solicitor for legal enforcement proceedings, the matter shall be closed and the complainant shall be so notified.

(2) If an investigation indicates that the contractor has not complied with the requirements of the Act, efforts shall be made to secure compliance through conciliation and persuasion within a reasonable time. Before the contractor can be found to be in compliance, it must make a specific commitment in accordance with the procedure in 41 CFR 60-1.26.

(3) If a complaint investigation or compliance review indicates a violation of the Act, and the matter has not been resolved by informal means, OFCCP may refer the matter in accordance with the procedure in 41 CFR 60-1.29(a) for consideration of any action authorized under 41 CFR 60-1.29. After a matter arising under the Act is referred to the Office of the Solicitor, the provisions of 41 CFR 60-1.29 through 60-1.31 shall be applicable to the matter in the same way those provisions apply to a matter arising under Executive Order 11246.

#### Subpart C—Ancillary Matters

##### § 60-250.30 Responsibilities of the Deputy Assistant Secretary for Veterans' Employment.

(a) In accordance with the provisions of 38 U.S.C. 2002A, the Deputy Assistant Secretary for Veterans' Employment (DASVE) has responsibilities in all Department of Labor employment and training programs for veterans. The DASVE is responsible for assuring that the Veterans Employment Service shall monitor and evaluate adherence to the contractor job listing provisions of § 60-250.3 by state employment security agencies. Deficiencies noted by the Veterans Employment Service shall be reported through the DASVE to OFCCP. OFCCP, in coordination with the DASVE, will review contractor compliance with the mandatory job listing requirements in the course of regularly scheduled compliance reviews.

(b) Any job openings listed pursuant to § 60-250.3, which requires contractors to list their job openings with state employment services offices, shall be utilized by state employment security agencies to refer qualified disabled veterans and veterans of the Vietnam era. (See 20 CFR 653.221(a)(7).)

(c) The local offices of the Federal-state employment service shall give priority in referral of disabled veterans and veterans of the Vietnam era to such

employment openings listed by contractors pursuant to this part.

(d) The local state employment service staff shall make appropriate job development contacts with identified contractors to obtain orders for job openings. Information so obtained which is pertinent to determining compliance with the requirements to list job openings and to take affirmative action shall be made available to OFCCP.

##### § 60-250.31 Recordkeeping.

(a) Each contractor shall maintain for a period not less than one year records regarding complaints and actions taken thereunder, and such employment or other records as required by the Director or by this part and shall furnish such information in the form required by the Director or as the Director deems necessary for the administration of the Act.

(b) Failure to maintain complete and accurate records as required under this section or failure to update annually the affirmative action program as required by § 60-250.4(b) constitutes noncompliance with the contractor's obligations under the Act and is a ground for the imposition of appropriate sanctions.

#### Appendix A

This employer is a Government contractor subject to Section 402 of the Vietnam Era Veterans Readjustment Assistance Act of 1974 which require Government contractors to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era. If you are a disabled veteran covered by this program and would like to be considered under the affirmative action program, please tell us. This information is voluntary and refusal to provide it will not subject you to discharge or disciplinary treatment. Information obtained concerning individuals shall be kept confidential, except that (i) supervisors and managers may be informed regarding restrictions on the work or duties of disabled veterans, and regarding necessary accommodations, and (ii) first aid personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment. In order to assure proper placement of all employees, we do request that you answer the following question: If you have a disability which might affect your performance or create a hazard to yourself or others in connection with the job for which you are applying, please state the following: (1) The skills and procedures you use or intend to use to perform the job notwithstanding the disability and (2) the accommodations we could make which would enable you to perform the job properly and safely, including special equipment, changes in the physical layout of the job, elimination of certain duties relating to the job or other accommodations.

**Appendix B**

The following is a set of procedures which contractors may use to meet the requirements of § 60-250.5(b).

(1) The application or personnel form of each known protected veteran should be annotated to identify each vacancy for which he or she was considered, and the form should be quickly retrievable for review by the agency, the Department of Labor and the contractor's personnel officials for use in investigations and internal compliance activities.

(2) The personnel or application records of each known protected veteran should include (i) the identification of each promotion for which he or she was considered, and (ii) the identification of each training program for which he or she was considered.

(3) In each case where a protected veteran is rejected for employment, promotion or training, a statement of the reasons should be appended to the personnel file or application form. This statement should include a comparison of the qualifications of the protected veteran and the person(s) selected, as well as a description of the accommodations considered. This statement should be available to the applicant or employee concerned upon request.

(4) Where applicants or employees are selected for hire, promotion or training and the contractor undertakes any accommodation which makes it possible for the contractor to place a protected veteran on the job, the application form or personnel record should contain a description of that accommodation.

- Appendix B
- Appendix C

Authority: Sec. 503, Pub. L. 93-1112, 87 Stat. 393 (20 U.S.C. 793), as amended by sec. 111, Pub. L. 93-516, 88 Stat. 1619 (29 U.S.C. 706) and Executive Order 11758.

### **Subpart A—Preliminary Matters, Affirmative Action Clause, Compliance**

#### **§ 60-741.1 Purpose and application.**

The purpose of the regulations in this Part 60-741 is to assure compliance with section 503 of the Rehabilitation Act of 1973, which requires Government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals. The regulations in this part apply to all Government contracts, including Federal deposit or share insurance, for the furnishing of supplies or services or for the use of personal property (including construction) in excess of \$2,500. Compliance of a contractor with the provisions of this part will not necessarily determine its compliance with the requirements of section 504 of the Rehabilitation Act of 1973 and compliance with section 504 will not necessarily determine compliance with section 503 and the regulations in this part.

#### **§ 60-741.2 Coverage and waivers.**

(a) *General.*—(1) *Transactions for \$2,500 or less.* Contracts for \$2,500 or less are not covered by the Act. No agency or contractor shall procure supplies or services in less than usual quantities to avoid the applicability of the affirmative action clause.

(2) *Contracts for indefinite quantities.* With respect to indefinite delivery-type contracts (including, but not limited to, open end contracts, requirement-type contracts, Federal Supply Schedule contracts, "call-type" contracts, and purchase notice agreements), the affirmative action clause shall be included unless the contracting agency has reason to believe that the amount to be ordered in any year under such contract will be \$2,500 or less. The applicability of the affirmative action clause shall be determined at the time of award for the first year, and annually thereafter for succeeding years, if any. Notwithstanding the above, the affirmative action clause shall be applied to such contract whenever the amount of a single order is in excess of \$2,500. Once the affirmative action clause is determined to be applicable, the contract shall continue to be subject to such clause for its duration, regardless of the amounts ordered, or reasonably expected to be ordered in any year.

(3) *Work outside of the United States.* The requirements of the affirmative action clause are waived with respect to contracts with regard to work performed outside of the United States by employees who were not recruited within the United States.

(4) *Contracts with state or local governments.* The requirements of the affirmative action clause in any contract with a state or local government (or any agency, instrumentality or subdivision thereof) shall not be applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract.

(5) *Facilities not connected with contracts.* The Director may waive the requirements of the affirmative action clause with respect to any of a contractor's facilities which he or she finds to be in all respects separate and distinct from activities of the contractor related to the performance of the contract, provided that he or she also finds that such a waiver will not interfere with or impede the effectuation of the Act. Such waivers shall be considered only upon the request of the contractor.

(b) *Waivers.* (1) *Specific contracts and classes of contracts.* The head of an agency, with the concurrence of the Director, may waive the application to any contract of any part of or all the affirmative action clause when he or she deems that special circumstances in the national interest so require. The agency head, with the concurrence of the Director, may also grant such waivers to groups or categories of contracts of the same type where it is (i) in the national interest, (ii) found impracticable to act upon each request individually, and (iii) where such waiver will substantially contribute to convenience in administration of section 503 of the Act.

(2) *National security.* Any requirement set forth in the regulations in this Part 60-741 shall not apply to any contract whenever the head of the contracting agency determines that such contract is essential to the national security and that its award without complying with such requirements is necessary to the national security. Upon making such a determination the head of the agency will notify the Director in writing within 30 days.

(c) *Withdrawal of waiver.* When a waiver has been granted for any class of contracts under this section other than contracts granted waivers under paragraph (b)(2) of this section, the Director may withdraw the waiver for a specific contract or group of contracts to be awarded, when in his or her judgment such action is necessary or appropriate to achieve the purposes of the Act. The withdrawal shall not apply to contracts awarded prior to the withdrawal, except that in procurements entered into by formal advertising, or the various forms of restricted formal advertising, such withdrawal shall not

apply unless the withdrawal is made more than 10 calendar days before the date set for the opening of the bids.

**§ 60-741.3 Affirmative action clause.**

Each agency and each contractor and subcontractor shall include the following affirmative action clause in each of its covered Government contracts (and modifications, renewals, or extensions thereof if not included in the original contract).

**Affirmative Action for Handicapped Workers**

(a) The contractor will not discriminate against any employee or applicant for employment because of physical or mental handicap in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment and otherwise treat qualified handicapped individuals without discrimination based upon their physical or mental handicap in all employment practices such as the following: Employment, upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The contractor agrees to comply with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(c) In the event of the contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(d) The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notices shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified handicapped employees and applicants for employment, and the rights of applicants and employees.

(e) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding, that the contractor is bound by the terms of section 503 of the Rehabilitation Act of 1973, and is committed to take affirmative action to employ and advance in employment physically and mentally handicapped individuals.

(f) The contractor will include the provisions of this clause in every subcontract or purchase order in excess of \$2,500 unless exempted by rules, regulations, or orders of the Secretary issued pursuant to section 503 of the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to

enforce such provisions, including action for noncompliance.

**§ 60-741.4 Applicability of the affirmative action program requirement.**

(a) Within 120 days of the commencement of a contract, every Government contractor which has 50 or more employees and (1) has a contract of \$50,000 or more or (2) has contracts (at least one of which exceeds \$2,500) which total \$50,000 or more in any 12-month period shall prepare and maintain an affirmative action program at each establishment which shall set forth the contractor's policies, practices and procedures in accordance with § 60-741.5 of this part. This program may be integrated into or kept separate from other affirmative action programs of the contractor which OFCCP requires it to maintain pursuant to this chapter.

(b) The affirmative action program shall be reviewed and updated annually. If there are any significant changes in procedures, rights or benefits as a result of the annual updating, those changes shall be communicated to employees and applicants for employment.

(c) The contractor shall submit the affirmative action program within 15 days of a request from OFCCP. The contractor shall also submit the affirmative action program upon OFCCP's request when a complaint is being investigated or a preaward compliance review is being conducted.

(d) The full affirmative action program shall be available to any employee or applicant for employment for inspection upon request. The location and hours during which the program may be obtained shall be posted at each establishment.

(e)(1) The contractor shall invite all applicants and employees who believe themselves covered by the Act and who wish to benefit under the affirmative action program to identify themselves to the contractor. The invitation shall state that the information is voluntarily provided, that it will be kept confidential, that refusal to provide it will not subject the applicant or employee to any adverse treatment, and that it will be used only in accordance with the Act and the regulations in this part. If an applicant or employee so identifies himself or herself, the contractor should also seek the advice of the applicant or employee regarding proper placement and appropriate accommodation. (An acceptable form for such an invitation is set forth in Appendix B attached.)

(2) Nothing in this section shall preclude an employee from informing a contractor at any future time of his or her desire to benefit under the program.

(3) Nothing in this section shall relieve a contractor of its obligation to take affirmative action with respect to those applicants or employees of whose handicap the contractor has actual knowledge: *Provided*, That the contractor is not obligated to search the medical files of any applicant or employee to determine the existence of a handicap.

(4) Nothing in this section shall relieve a contractor from liability for discrimination under the Act.

**§ 60-741.5 Affirmative action policy, practices, and procedures.**

(a) *General requirements.* Under the affirmative action obligation imposed by section 503 of the Rehabilitation Act of 1973, contractors are required to take affirmative action to employ and advance in employment qualified handicapped individuals at all levels of employment, including the executive level. Such action shall apply to all employment practices, including, but not limited to, the following: Hiring, upgrading, demotion or transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) *Proper consideration of qualifications.* Contractors shall review their personnel processes to determine whether their present procedures assure careful, thorough and systematic consideration of the job qualifications of known handicapped applicants and employees for job vacancies filled either by hiring or promotion, and for all training opportunities offered or available. To the extent that it is necessary to modify their personnel procedures, contractors shall include the development of new procedures for this purpose in their affirmative action program required under this part. These procedures must be designed so as to facilitate a review of the implementation of this requirement by the contractor or the Government. (Appendix C attached is an example of an appropriate set of procedures. The procedures in Appendix C are not required and contractors may develop other procedures which are appropriate to their circumstances.)

(c) *Physical and mental qualifications.* (1) The contractor shall provide in its affirmative action program, and shall adhere to, a schedule for the review of all physical or mental job qualification requirements to ensure that, to the extent qualification requirements tend to screen out qualified handicapped individuals, they are job related and are consistent with business necessity and the safe performance of the job.

(2) Whenever a contractor applies physical or mental job qualification requirements in the selection of applicants or employees for employment or other change in employment status such as promotion, demotion or training, to the extent that qualification requirements tend to screen out qualified handicapped individuals, the requirements shall be related to the specific job or jobs for which the individual is being considered and shall be consistent with business necessity and the safe performance of the job. The contractor shall have the burden to demonstrate that it has complied with the requirements of this paragraph.

(3) Nothing in this section shall prohibit a contractor from conducting a comprehensive medical examination prior to employment provided that the results of such an examination shall be used only in accordance with the requirements of this section. Whenever a contractor inquires into an applicant's or employee's physical or mental condition or conducts a medical examination prior to employment or change in employment status information obtained in response to such inquiries or examination shall be kept confidential except that:

(i) Supervisors and managers may be informed regarding restrictions on the work or duties of handicapped individuals and regarding accommodations; and

(ii) First aid and safety personnel may be informed, where and to the extent appropriate, if the condition might require emergency treatment; and

(iii) Government officials investigating compliance with the Act shall be informed.

(d) *Accommodation to physical and mental limitations of employees.* A contractor must make a reasonable accommodation to the physical and mental limitations of an employee or applicant unless the contractor can demonstrate that such an accommodation would impose an undue hardship on the conduct of the contractor's business. In determining the extent of a contractor's accommodation obligations, the following factors among others may be considered: (1) business necessity and (2) financial cost and expenses.

(e) *Compensation.* In offering employment or promotions to handicapped individuals, the contractor may not reduce the amount of compensation offered because of any disability income, pension or other benefit the applicant or employee receives from another source.

(f) *Outreach, positive recruitment, and external dissemination of policy.*

Contractors shall review their employment practices to determine whether their personnel programs provide the required affirmative action for employment and advancement of qualified handicapped individuals. Based upon the findings of such reviews, contractors shall undertake appropriate outreach and positive recruitment activities, such as those listed below. It is not contemplated that contractors will necessarily undertake all the listed activities or that their activities will be limited to those listed. The scope of a contractor's efforts shall depend upon all the circumstances, including the contractor's size and resources and the extent to which existing employment practice are adequate.

(1) The contractor should develop internal communication of its obligation to engage in affirmative action efforts to employ qualified handicapped individuals in such a manner as to foster understanding, acceptance and support among the contractor's executive, management, supervisory and all other employees and to encourage such persons to take the necessary action to aid the contractor in meeting this obligation.

(2) The contractor should develop reasonable internal procedures to ensure that its obligation to engage in affirmative action to employ and promote qualified handicapped individuals is being fully implemented.

(3) The contractor should periodically inform all employees and prospective employees of its commitment to engage in affirmative action to increase employment opportunities for qualified handicapped individuals.

(4) The contractor should enlist the assistance and support of recruiting sources (including state employment security agencies, state vocational rehabilitation agencies or facilities, sheltered workshops, college placement officers, state education agencies, labor organizations and organizations of or for handicapped individuals) for the contractor's commitment to provide meaningful employment opportunities to qualified handicapped individuals. (A list of numerous national organizations serving the handicapped, many of which have state or local affiliates, is found in the "Directory of Organizations Interested in the Handicapped" published by the Committee for the Handicapped People-to-People Program, Washington, D.C.)

(5) The contractor should engage in recruitment activities at educational institutions which participate in training of the handicapped, such as schools for the blind, deaf, or retarded.

(6) The contractor should establish meaningful contacts with appropriate social service agencies, organizations of and for handicapped individuals, vocational rehabilitation agencies or facilities, for such purposes as advice, technical assistance and referral of potential employees. Technical assistance from the resources described in this paragraph may consist of advice on proper placement, recruitment, training and accommodations contractors may undertake, but no such resource providing technical assistance shall have the authority to approve or disapprove the acceptability of affirmative action programs.

(7) The contractor should review employment records to determine the availability of promotable and transferable qualified known handicapped individuals presently employed, and to determine whether their present and potential skills are being fully utilized or developed.

(8) The contractor should include handicapped workers when employees are pictured in consumer, promotional or help wanted advertising.

(9) The contractor should send written notification of company policy to all subcontractors, vendors and suppliers, requesting appropriate action on their part.

(10) The contractor should take positive steps to attract qualified handicapped persons not currently in the work force who have requisite skills and can be recruited through affirmative action measures. These persons may be located through the local chapters of organizations of and for handicapped individuals described in paragraph (f)(4) of this section.

(g) *Internal dissemination of policy.* A strong outreach program will be ineffective without adequate internal support from supervisory and management personnel and other employees, who may have had limited contact with handicapped persons in the past. In order to assure greater employee cooperation and participation in the contractor's efforts, the contractor should adopt, implement and disseminate this policy internally as follows:

(1) Include it in the contractor's policy manual.

(2) Publicize it in the company newspaper, magazine, annual report and other media.

(3) Conduct special meetings with executive, management, and supervisory personnel to explain the intent of the policy and individual responsibility for effective implementation, making clear the chief executive officer's attitude.

(4) Schedule special meetings with all employees to discuss policy and explain individual employee responsibilities.

(5) Discuss the policy thoroughly in both employee orientation and management training programs.

(6) Meet with union officials to inform them of the contractor's policy, and request their cooperation.

(7) Include nondiscrimination clauses in all union agreements, and review all contractual provisions to ensure they are nondiscriminatory.

(8) Include articles on accomplishments of handicapped workers in company publications.

(9) Post the policy on company bulletin boards, including a statement that employees and applicants are protected from coercion, intimidation, interference or discrimination for filing a complaint or assisting in an investigation under the Act.

(10) When employees are featured in employee handbooks or similar publications for employees, include handicapped employees.

(h) *Responsibility for implementation.* An executive of the contractor should be designated as director or manager of company affirmative action activities under these regulations. His or her identity should appear on all internal and external communications regarding the company's affirmative action programs. This executive should be given necessary top management support and staff to manage the implementation of this program, including the following activities:

(1) Develop policy statements, affirmative action programs, and internal and external communication techniques. The latter techniques should include regular discussions with local managers, supervisors and employees to be certain the contractor's policies are being followed. In addition, supervisors should be advised that:

(i) Their work performance is being evaluated on the basis of their affirmative action efforts and results, as well as other criteria.

(ii) The contractor is obligated to prevent harassment of employees placed through affirmative action efforts, as set forth in 41 CFR 60-1.28.

(2) Identify problem areas in conjunction with line management and known handicapped employees, in the implementation of the affirmative action programs, and develop solutions. This is particularly important for the accommodations requirements.

(3) Design and implement audit and reporting systems that will:

(i) Measure effectiveness of the contractor's programs.

(ii) Indicate need for remedial action.

(iii) Determine the degree to which the contractor's objectives have been attained.

(iv) Determine whether known handicapped employees have had the opportunity to participate in all company sponsored educational, training, recreational and social activities.

(v) Ensure that each location is in compliance with the Act and the regulations in this part.

(4) Serve as liaison between the contractor and OFCCP.

(5) Serve as liaison between the contractor and organizations of and for handicapped persons, and arrange for the active involvement by company representatives in the community service programs of local organizations of and for the handicapped.

(6) Keep management informed of the latest developments in the entire affirmative action area.

(7) Arrange for career counseling for known handicapped employees.

(i) *Development and execution of affirmative action programs.* (1) Job qualification requirements reviewed pursuant to paragraph (c) of this section should be made available to all members of management involved in the recruitment, screening, selection, and promotion process.

(2) The contractor should evaluate the total selection process including training and promotion to ensure freedom from stereotyping handicapped persons in a manner which limits their access to all jobs for which they are qualified.

(3) All personnel involved in the recruitment, screening, selection, promotion, disciplinary, and related processes should be carefully selected and trained to ensure that the commitments in the contractor's affirmative action program are implemented.

(4) Formal briefing sessions should be held, preferably on company premises, with representatives from recruiting sources. Plant tours, clear and concise explanations of current and future job openings, position, descriptions, worker specifications, explanations of the company's selection process, and recruiting literature should be an integral part of the briefings. Formal arrangements should be made for referral of applicants, follow up with sources, and feedback on disposition of applicants.

(5) A special effort should be made to include qualified handicapped persons on the personnel relations staff.

(6) Handicapped employees should be made available for participation in career days, youth motivation programs,

and related activities in their communities.

(7) Recruiting efforts at all schools should incorporate special efforts to reach handicapped students.

(8) An effort should be made to participate in workstudy programs with rehabilitation facilities and schools which specialize in training or educating handicapped individuals.

(9) The contractor should use all available resources to continue or establish on the job training programs.

(j) *Sheltered workshops.* Contracts with sheltered workshops do not constitute affirmative action in lieu of employment and advancement of qualified handicapped individuals in the contractor's own workforce. Contracts with sheltered workshops may be included within an affirmative action program if the sheltered workshop trains employees for the contractor and the contractor is obligated to hire trainees at full compensation when such trainees become qualified as "qualified handicapped individuals" as defined in this chapter.

#### § 60-741.6 Determination of handicap.

(a) Any handicapped individual filing a complaint with the Director under this part shall submit with his or her complaint a signed statement specifying the handicapping impairment or situation (see 41 CFR 60-1.3 definition of "handicapped individual"). If the Director determines that further documentation is necessary, he or she may require the complainant to provide additional information.

(b) Any contractor requiring a determination of an applicant's or employee's handicap may require the applicant or employee to provide medical documentation of the impairment or, in the alternative, may require the applicant or employee to undergo a medical examination at the contractor's expense.

(c) Any determination of handicap required pursuant to paragraph (b) of this section must meet the requirements of § 60-741.4(c) and must be for the purpose of affirmative action and proper job placement. Information obtained therefrom shall not be used to exclude or otherwise limit the employment opportunities of qualified handicapped individuals.

(d) All medical documentation required under this section shall be based upon the American Medical Association Guides to the Evaluation of Permanent Impairment, provided that the Guides shall be used only to determine the existence of impairment without regard to the degree of impairment.

**§ 60-741.7 Listing of employment openings.**

Contractors should request state employment security agencies to refer qualified handicapped individuals for consideration under their affirmative action programs.

**Subpart B—General Enforcement and Complaint Procedure****§ 60-741.20 Subcontracts.**

Each nonexempt contractor shall include the affirmative action clause prescribed in § 60-741.3 in each of its nonexempt subcontracts. The clause may be incorporated by reference in accordance with 41 CFR 60-1.46.

**§ 60-741.21 Duties of agencies.**

(a) General responsibility. Each agency shall cooperate with the Director in the performance of his or her responsibilities under the Act. Such cooperation shall include the responsibility to ensure that contractors are fully cognizant of their obligations under the Act and this part, to provide the Director with any information which comes to its attention that the contractor is not in compliance with the Act or this part, and to take such actions for noncompliance as set forth in this chapter as may be ordered by the Director.

**§ 60-741.22 Evaluations by the OFCCP Assistant Regional Administrator.**

The Assistant Regional Administrators, OFCCP, shall be primarily responsible for undertaking such investigations of complaints against contractors and conducting compliance reviews as may be necessary to assure that the purposes of the Act are being carried out effectively.

**§ 60-741.23 Complaint procedures.**

(a) *Filing complaints.* Complaints shall be filed within 180 days of the alleged violation unless the time for filing is extended for good cause shown.

(b) *Where to file.* Complaints may be filed with the OFCCP, 200 Constitution Avenue, N.W., Washington, D.C. 20210, or with any OFCCP regional or area office.

(c) *Contents of complaints.* Complaints must be signed by the complainant or an authorized representative and must contain the following information: (1) Name and address (including telephone number) of the complainant; (2) name and address of the contractor who committed the alleged violation; (3) a description of the act or acts considered to be a violation; (4) a statement that the alleged discriminatee is handicapped, has a history of a handicap, has

documentation of impairment, or was regarded by the contractor as having an impairment; and (5) any other pertinent information available which will assist in the investigation and resolution of the complaint, including the name of any known Federal agency with which the employer has contracted. Complaints alleging class-type violations which do not identify the alleged discriminatee or discriminatees will be accepted, provided the other requirements of this paragraph are met. Signed third party complaints which do not identify the alleged discriminatee will be accepted, whether or not the third party signing the complaint is an authorized representative provided that the other information required by this paragraph is included.

(d) *Incomplete information.* If a complaint contains incomplete information, OFCCP shall seek the needed information from the person who filed the complaint. If the information is not furnished within 60 days of the date of the request, the case may be closed.

(e) *Investigations.* The OFCCP shall institute a prompt investigation of each complaint, and shall be responsible for developing a complete case record.

(f) *Referral to contractor.* When a complaint concerns an employee of a contractor and the contractor has an applicable internal review procedure, the complaint may be referred to the contractor for processing under that procedure if the employee gives his/her consent. The contractor shall be informed of the elements of the complaint either by being furnished a copy or a sanitized version. The complaint and all actions taken thereunder shall be kept confidential by the contractor. If the contractor is able to resolve the complaint to the satisfaction of the employee prior to the OFCCP investigation, the contractor shall notify OFCCP of the results in writing within 60 days of the referral. The case will be closed upon verification with the employee.

(g) *Resolution of matters.* (1) If the complaint investigation shows no violation of the Act or regulations in this part, or if the matter is not referred to the Office of the Solicitor for consideration of legal enforcement proceedings, the matter shall be closed and the complainant shall be so notified.

(2) If an investigation indicates that the contractor has not complied with the requirements of the Act, efforts shall be made to secure compliance through conciliation and persuasion within a reasonable time. Before the contractor can be found to be in compliance, it must make a specific commitment in

accordance with the procedure in 41 CFR 60-1.26.

(3) When a complaint investigation or compliance review indicates a violation of the Act, and the matter has not been resolved by informal means, OFCCP may refer the matter in accordance with the procedure in 41 CFR 60-1.29(a) for consideration of any action authorized under 41 CFR 60-1.29. After a matter arising under the Act is referred to the Office of the Solicitor, the provisions of 41 CFR 60-1.29 through 60-1.31 shall be applicable to the matter in the same way those provisions apply to a matter arising under Executive Order 11246.

**Subpart C—Ancillary Matters****§ 60-741.30 Recordkeeping.**

(a) Each contractor shall maintain for a period not less than one year records regarding complaints and actions taken thereunder, and such employment or other records as required by the Director or by this part and shall furnish such information in the form required by the Director or as the Director deems necessary for the administration of the Act.

(b) Failure to maintain complete and accurate records as required under this section or failure to update annually the affirmative action program as required by § 60-741.4(b) constitutes noncompliance with the contractor's obligations under the Act and is a ground for the imposition of appropriate sanctions.

**Appendix A—Guidelines on the Application of the Definition "Handicapped Individual."**

The Rehabilitation Act of 1973, as amended, defines a handicapped individual for the purposes of the program as any person who has a physical or mental impairment which substantially limits one or more of such person's major life activities, has a record of such impairment, or is regarded as having such an impairment.

"Life activities" may be considered to include communication, ambulation, selfcare, socialization, education, vocational training, employment, transportation, adapting to housing, etc. For the purpose of section 503 of the Act, primary attention is given to those life activities that affect employability.

The phrase "substantially limits" means the degree that the impairment affects employability. A handicapped individual who is likely to experience difficulty in securing, retaining, or advancing in employment would be considered substantially limited.

"Has a record of such an impairment" means that an individual may be completely recovered from a previous physical or mental impairment. It is included because the attitude of employers, supervisors, and coworkers toward that previous impairment may result in an individual experiencing difficulty in securing, retaining, or advancing in employment. The mentally restored and

those who, for example, have had heart attacks or cancer often experience such difficulty. Also, this part of the definition would include individuals who may have been erroneously classified and may experience discrimination based on this misclassification. This group may include persons such as those who have been misclassified as mentally retarded or mentally restored.

*"Is regarded as having such an impairment"* refers to those individuals who are perceived as having a handicap, whether an impairment exists or not, but who, because of attitudes or for any other reason, are regarded as handicapped by employers or supervisors who have an effect on the individual securing retaining or advancing in employment.

#### Appendix B

1. This employer is a Government contractor subject to section 503 of the Rehabilitation of Act of 1973, which requires Government contractors to take affirmative action to employ and advance in employment qualified handicapped individuals. If you have such a handicap and would like to be considered under the affirmative action program, please tell us. Submission of this information is voluntary and refusal to provide it will not subject you to discharge or disciplinary treatment. Information obtained concerning individuals shall be kept confidential, except that (i) supervisors and managers may be informed regarding restrictions on the work or duties of handicapped individuals, and regarding necessary accommodations, (ii) first aid and safety personnel may be informed, when and to the extent appropriate, if the condition might require emergency treatment, and (iii) Government officials investigating compliance with the Act shall be informed.

2. If you are handicapped, we would like to include you under the affirmative action program. It would assist us if you tell us about (1) any special methods, skills and procedures which qualify you for positions that you might not otherwise be able to do because of your handicap, so that you will be considered for any positions of that kind, and (2) the accommodations which we could make which would enable you to perform the job properly and safely, including special equipment, changes in the physical layout of the job, elimination of certain duties relating to the job, or other accommodations.

#### Appendix C

The following is a set of procedures which contractors may use to meet the requirement of § 60-741.5(b).

(1) The application or personnel form of each known handicapped applicant should be annotated to identify each vacancy for which the applicant was considered, and the form should be quickly retrievable for review by the Department of Labor and the contractor's personnel officials for use in investigations and internal compliance activities.

(2) The personnel or application records of each known handicapped employee should include (i) the identification of each promotion for which the handicapped employee was considered, and (ii) the

identification of each training program for which the handicapped employee was considered.

(3) In each case where a handicapped employee or applicant is rejected for employment, promotion or training, a statement of the reason should be appended to the personnel file or application form. This statement should include a comparison of the qualifications of the handicapped employee or employee and the person(s) selected, as well as a description of the accommodations considered. This statement should be available to the applicant or employee concerned upon request.

(4) Where applicants or employees are selected for hire, promotion or training and the contractor undertakes any accommodation which makes it possible for the contractor to place a handicapped individual on the job, the application form or personnel record should contain a description of that accommodation.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Food and Drug Administration**

**21 CFR Part 500**

[Docket No. 77N-0245]

**Recycled Animal Waste**

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is revoking its announced policy regarding the use of poultry litter as an animal feed ingredient. This will leave the regulation of the use of recycled animal waste to the individual States.

**EFFECTIVE DATE:** December 29, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5247.

**SUPPLEMENTARY INFORMATION:**

**I. Introduction**

Livestock and poultry producers, including egg-laying operations, accumulate large quantities of animal waste that present ecological and economic problems of disposal. The use of animal waste as a fertilizer is a partial solution to the disposal problem. A great deal of research has established that these animal wastes have nutrient value as an ingredient of certain animal feeds. Information available to FDA shows that edible products derived from animals receiving feeds containing recycled animal waste are indistinguishable from food products derived from animals receiving feeds not containing animal waste.

In the *Federal Register* of September 2, 1967 (32 FR 12714), FDA issued a statement of policy regarding the use of poultry litter as animal feed (21 CFR 500.40). It stated that FDA did not sanction the use of poultry litter as a feed or as a component of feed for animals and that poultry litter offered for animal feed use that was under the jurisdiction of the Federal Food, Drug, and Cosmetic Act would be considered adulterated within the meaning of section 402(a)(1), (a)(2)(C), and/or (a)(3) of the act. Subsequently, FDA adopted this policy for all animal waste with potential for use as an ingredient in animal feeds because the amount of information then available was not considered adequate to provide a basis for concluding that recycled animal waste is safe as a feed ingredient.

In the *Federal Register* of December 27, 1977 (42 FR 64662) (hereinafter cited

as the 1977 notice), FDA issued a request for submission of data, information, and views to provide additional data regarding the use of recycled animal waste as an animal feed ingredient. The notice was in response to a growing interest in the use of animal waste as an animal feed ingredient. The 1977 notice discussed in detail the information then available to FDA including the historical development of the practice of feeding waste to animals, economic and environmental considerations, human health and aesthetics, animal health, and legal considerations.

The initial comment period, which closed June 26, 1978, was subsequently extended by FDA to September 25, 1978 by notice published in the *Federal Register* of July 28, 1978 (43 FR 32867).

Seventy-three responses were received including 28 from university researchers and administrators, 6 from State and Federal departments of agriculture, and 7 from national societies and organizations. Many of the comments included published research and research reports that added substantially to the information previously available to the agency. This information and copies of the comments may be seen in the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857 (Docket Number 77N-0245, Recycled Animal Waste).

Since publication of the agency's policy statement, extensive research has provided a great deal of additional information. The scope of additional information comprises approximately 1,000 publications in the scientific and periodical literature.

The agency concludes from its extensive review that some processing of animal waste intended for use as a feed ingredient is necessary to minimize the possibility of harmful levels of pathogenic microorganisms that may be present in the waste. Procedures that have been used successfully as practical processing methods include dehydration, ensiling, composting, physical fractionation, fermentation, heat treatment, and addition of preservative chemicals such as formaldehyde. These treatment procedures, and the extent to which some processing of waste is mandated by practical considerations (e.g., the requirement for dehydration to reduce handling costs and difficulties and to preserve the quality of dietary components) were discussed in the 1977 notice. FDA recognizes the numerous difficulties in setting microbiological

standards for a nonuniform product subject to differing processing methods. Nevertheless, the agency emphasizes the need for processing for control of pathogens of all animal waste intended for use as a feed ingredient and encourages development by the State feed regulatory bodies of quality standards in this area.

The agency recognizes that there are questions concerning the composition of wastes and effects of processing on animal wastes which research has not yet answered. The development of research efforts to add to the information on the extent to which drug residues and possible drug metabolites are present and biologically available in recycled waste presents formidable research problems. Quantifying drug metabolites and residues would require major expenditures of resources, with the possibility of results being dependent upon variables such as recycling systems, feeding and management practices, processing methods, and animal species. Additional research in this area may or may not strengthen the basis for future judgments concerning safety.

As noted in the summary of the section on human health and aesthetics in the 1977 notice, the data available to FDA as a result of extensive literature review and provided in response to the 1977 notice do not resolve all the questions of safety that are raised by the possible occurrence of residues of drugs and drug metabolites in recycled waste. Moreover, it has become clear that such questions might not be answerable in the foreseeable future even if extensive research efforts were devoted solely to this purpose. Hence, the agency recognizes that it is necessary to weigh associated safety factors such as the levels likely to be fed, the consuming species and production classes of animals, the probability of practical withdrawal periods following feeding, and the overall extent of the practice of recycling animal wastes in this country in order to develop an assessment of the safety impact of such feeding practices. A number of these safety factors were discussed in some detail in the 1977 notice.

Additional relevant information was submitted pertaining to the extent to which animal waste feeding is now being practiced in the United States (Ref. 1). The usage level has been assessed by sending questionnaires to producers and to individuals active in animal waste management in 50 States and Puerto Rico. Other questionnaires were forwarded to the Directors of the Cooperative Extension Services in land-

grant universities. Thirty-seven responses were received, and there were indications that recycled animal waste was being used for feed to some degree in 27 of the 37 states responding. The data presented (Ref. 1), although approximate, indicate that a maximum of slightly more than 1 percent in any category of animals in production are being fed wastes as a part of their ration. The category in which the estimated usage level was approximately 1 percent was the case in which cattle waste was being fed to beef feeder cattle. From this information, it appears that the extent of use in this country of recycled animal waste as feed is very small.

## II. FDA Regulatory Policy

The recycling of animal waste is primarily a local practice. The bulk and weight of the end product are such that shipment to distant places is uneconomic because of transportation costs. Thus, the use of such material is largely a local matter. For this reason, the State feed control agencies have taken the initiative in promulgating standards regarding the use of animal waste as an animal feed ingredient. Indeed, some State agencies have established programs which control the use of such waste more directly and in greater detail than would be feasible from the Federal level.

Because of the local character of animal waste use and because the States have the capacity to effectively regulate this use, FDA has decided to revoke its previous policy statement (§ 500.40 *Use of poultry litter as animal feed* (21 CFR 500.40)). The revocation of the policy statement represents a lessening of Federal regulatory intervention in favor of State control. Although FDA's regulatory action regarding recycled animal waste has been extremely limited and no enforcement actions involving this product have been brought in court, the agency believes its position should be clear. The revocation of the policy statement does not constitute a positive endorsement of the use of recycled animal waste, make any regulatory classification of waste (e.g., generally recognized as safe or food additive), or represent a concession that FDA lacks authority to regulate animal waste in the future if there exists the necessary connection with interstate commerce, e.g., interstate shipment of a component. FDA is merely stepping back from its current regulatory role in the control of animal waste. If, in the future, the agency determines that the use of recycled animal waste as a feed ingredient has ceased being largely a

local activity and that this practice presents risks to the health of animals or humans that are not controlled by State agencies, FDA will take an active role in the regulatory control of recycled animal waste.

The foregoing policy will not preclude FDA's taking regulatory action on an ad hoc basis against a particular shipment of animal waste that clearly presents a health hazard. Such action would likely be taken only if the State(s) involved were unable to take necessary action.

Comments from several States and the Association of American Feed Control Officials (AAFCO) argued persuasively for control at the State level and have expressed a willingness to superintend the commerce of animal waste used as a feed ingredient in a manner similar to that used for traditional feed ingredients. AAFCO has developed a Model Regulation for processed animal wastes and adopted this regulation in 1979 (Ref. 2). AAFCO's model regulation will enhance control at the State level to the extent that the regulation and its provisions are adopted by States where the feeding of animal wastes is practiced. In addition, regulatory uniformity will be enhanced. State feed control agencies have authority to impose various sanctions against violative feed products. For example, such products may be seized and other sanctions may be imposed by a State's refusing to permit further registration or shipment of a product. Moreover, the model regulation contains a provision that requires recordkeeping for each day's production or other identifiable lot for a period of 2 years including information on the source of the animal waste, quantity produced, sales and distribution, and assay records of testing. By monitoring these records, State feed control agencies will be able to judge the degree of acceptance and volume of use of animal waste as a commercial product.

Valuable cumulative data on the quality and composition of processed animal waste products sold commercially in California have recently been made available (Ref. 3). This publication documents California's experience since 1974 in administering that State's commercial feed license regulations regarding the sale of processed animal waste products for feed. The publication describes the procedures whereby the processing methods, quality standards, and product safety have been controlled by the State.

The AAFCO model regulation and the States with specific regulations governing animal waste usage have recognized two categories of animal

wastes: (1) those that are collected from animals that have been fed drugs, or have been tested and found to contain drug residues; and (2) those that are collected from animals that have not been fed drugs, or have been tested and found to be free of drug residues. FDA recommends that this distinction between the types of animal wastes be maintained for maximum safety. FDA encourages application of future research and State-level emphasis on testing for possible drug residues in animal waste because the agency views the use of animal waste that contains possible drug residues or metabolites with greater concern than the use of that which does not. Present consideration and future research should be directed toward the presence, accumulation, and depletion of such drugs or residues including (1) whether these substances are present in the waste products, (2) whether they are in sufficient levels to be considered unsafe or transmitted to food, and (3) if present, how processing and proper management can ensure the safety of such food products.

## III. Comments

1. Several comments opposed the continued use of recycled animal waste as a feed ingredient, asserting that animal waste may contain drug residues, microorganisms that could increase transmission of disease, excessive amounts of minerals, or possibly toxic end products of metabolism.

The agency recognizes that animal waste, while also a source of nutritional value, shares the other characteristics of more traditional feed ingredients in that waste may be contaminated by undesirable microorganisms through spoilage or improper processing, or may occasionally contain elevated levels of minerals or toxic contaminants. Thus, as is true for other feed ingredients, animal waste must be monitored for contaminants as well as for nutritional values. Potential contamination problems due to industrial chemicals or pesticides, for example, would be common to both the well-known animal feed ingredients such as corn and soybean meal and the less well-known byproduct feeds and animal wastes.

2. One comment (Ref. 4) provided mineral element profiles of animal wastes and of edible tissues from cattle fed animal wastes. Samples of waste from broilers, caged layers, cattle, and swine from several regions in the United States were analyzed. Broiler litter arsenic and copper values were 54 and 441 parts per million, respectively. Dried poultry waste contained variable levels of ash, crude protein, cadmium, and

selenium. Aluminum, cadmium, and copper levels of cattle waste were higher than values reported in the literature.

Only a small amount of data on mineral content of wastes was available at the time the 1977 notice was published. The data provided by the comment are significant because they present values from a wider range of sampling than previously available. The data are directly related to and support the discussion in the 1977 notice. In that discussion, the occurrence of traces of toxic mineral elements in conventional feed constituents was described and compared with the present and potential bioaccumulation in recycled animal waste.

Excessive intake of some minerals by livestock occurs under many natural circumstances and the effect of ingestion at higher levels on tissue mineral content is variable. Levels of some minerals may be elevated in cattle waste and broiler litter when soil is incidentally included when the animal waste is collected. It has been reported that cattle may consume substantial quantities of mineral-containing soil during normal grazing, especially when grazing areas with sparse herbage (Ref. 5). The analytical level of minerals in feeds and the degree of biological absorption often do not correspond, so quantitative mineral data on feeds are often misleading in regard to extent of absorption or toxicity (Ref. 6). Information submitted in a separate comment (Ref. 7) presented evidence that the mineral content of animal waste-containing diets was not a potential hazard unless the feedstuff to which the animal waste was added contained excessive levels.

Thus, the effects on animals and edible tissues of ingestion of minerals from feeding animal waste do not appear to differ from the results of ingestion of minerals contained in other feedstuffs.

3. One comment stated that an outbreak of disease in cattle in Israel in 1977 resulted from feeding poultry litter and that *Clostridium botulinum* was the suspected cause. References from Refuah Veterinarith submitted with the comment report on the followup examination of this incident in Israel, but do not conclude that the poultry litter or faulty processing of the poultry litter was the cause of the deaths (Ref. 8). Another comment explained that the botulinum microorganism is endemic in that country, especially in southern Israel, and that this is a recurring problem with all feed ingredients, the poultry wastes presenting no more of a problem than other feeds (Ref. 8).

In Israel, animals in some places are periodically vaccinated to prevent botulism outbreaks. A large amount of controlled testing has been carried out with animal wastes in Israel. Sterilization by heat treatment and ensiling are extensively used for processing. The officially sanctioned use of animal wastes in feedmills began in 1972. At the time of the botulism outbreak in 1977, it has been estimated that 15,000 to 18,000 tons of heat sterilized waste and 3 to 4 times this amount of ensiled and other types of poultry waste were being fed annually. After the outbreak of botulism and followup investigations, the feeding of wastes to cattle in Israel was resumed.

4. One comment submitted extensive information on the presence and survival of *Leptospire*s in animal waste (Ref. 9). *Leptospirosis* is a contagious disease of animals and man due to infection with *Leptospira spp.* Following acute infections, the organisms localize in the kidney and may be excreted in the urine for months or years. If infected shedder animals are introduced into a herd which has been free of the disease, leptospirosis is rapidly disseminated through physical contact or, by the most common mode, from contact with urine or contaminated feed or water. Control is usually achieved by fencing the herd from surface waters, by rodent depopulation, or by vaccination of animals.

Studies have been conducted on leptospiral survival in cattle manure and the possibilities of an animal health problem from this source (Ref. 9). Specifically, information using a model oxidation ditch treatment system has been reported. In this model, hamsters susceptible to leptospiral infection were exposed to aerosols from aerated cattle manure under oxidation ditch conditions and also fed recycled feed which had been suspended in a contaminated slurry. Hamsters exposed to the ambient air of the oxidation ditch and hamsters fed the recycled feed were serologically and culturally negative to leptospiral infection. However, *Leptospire*s were detected surviving in the model oxidation ditch for at least 136 days. *Leptospire*s isolated from the slurry of the model oxidation ditch 17 days after seeding lost measurable virulence, so there is a possibility that the disease-transmission factor or virulence is reduced by the aerobic slurry environment.

The effects of treatment systems other than oxidation ditch methods on leptospiral pathogens are not available. Investigators are considering methods to efficiently and economically process

animal wastes for disease control. For example, ensiling, deep-stacking, heat treatment, and use of chemicals have been investigated (Ref. 10). As this problem becomes better defined, it may be possible to determine the extent to which the feeding of recycled waste contributes to the transmission of this pathogen and the extent to which transmission may differ from that accepted for land application or other means of waste disposal.

The oxidation ditch method of enhancing the protein quality of waste has been used very little, and then primarily for experimental purposes. Most pathogenic organisms do not compete effectively in an oxidation ditch (Ref. 10), and few have been observed as health problems. Price increases of electrical power for mechanically aerated liquid manure as in the oxidation ditch method have reduced interest in the aerobic treatment of livestock manure (Ref. 11).

5. A comment stated that further studies should be made of the male hormone content of animal waste products and of the possible adverse or beneficial effects of feeding animal waste to other animals (Ref. 12). The comment cited research published during the years 1947 to 1956 showing that dried manure from female ruminant animals induced an androgenic response when fed to chicks. The authors suggested that progesterone might be converted by microorganisms in the rumen into androgens, since fecal androgenic activity seemed to be related to endogenous and exogenous progesterone metabolism. Parallel studies have been conducted (Ref. 13) to determine the kind and amount of hormonal activity present in poultry excreta processed for use as livestock feed. These more recent studies indicated that caged laying hen excreta under certain processing conditions contained androgenic activity that ranged from 2.2 to 7.4 micrograms of testosterone equivalents per gram of dried excreta. This activity was not present in fresh excreta. The information reported suggests that a metabolite may be converted to androgens by bacteria in the manure, and that the androgenic activity is not eliminated by subsequent heating.

In the years since the early work was reported there has been very little information on the subject of hormonal activity in waste, and no additional information was supplied by the comments submitted in response to the agency's request for data, information, and views. Hormonal activity was not, however, identified as a problem in

reviews of the health aspects of feeding animal waste (Refs. 14 and 15) or in the numerous research articles received by the agency during the comment period. The early research has apparently not been confirmed with regard to practical significance. The agency is unable to conclude from the information in this comment or from the information submitted to the agency that there is a safety problem due to androgenic activity in waste.

6. A comment expressed concern that avian tuberculosis could be transmitted to swine as a result of swine coming into contact with chicken excreta (Ref. 16). The comment referenced supporting documentation (Ref. 17) printed since publication of the agency's 1977 notice. The supporting documentation did not specifically refer to poultry waste, but to the general subject of disease transfer to swine.

Relevant information on disease-producing bacteria in animal waste was discussed in the 1977 notice. Limited information concerning processing that would inactivate mycobacteria was referenced. In addition, the general discussion in the 1977 notice of microbiological contamination as related to human health is applicable. The concerns of the agency in regard to proper processing of animal waste that may be recycled were expressed as a part of that discussion.

Information recently received by the agency from the United States Department of Agriculture (Meat and Poultry Inspection, Food Safety and Quality Service) indicates that the rate of condemnation due to avian tuberculosis in mature poultry (includes both heavy and light hens) has been 0.01 percent or less in recent years; the disease has therefore practically been eradicated from national flocks. Lesions of this disease are not found at all in broiler chickens which constitute by far the largest portion of commercial flocks in this country.

In any event, as explained in the 1977 notice, the feeding of waste from chickens to swine would typically never occur, or occur only rarely, since the uric acid nitrogen in the chicken waste is not useable by swine. Because of the high fiber content and the nonprotein nitrogen in poultry waste, the material can readily be used by ruminants, but not by nonruminants. Swine, as nonruminants, require a source of preformed protein for efficient utilization of feed ingredients.

The agency concludes that the potential for infection of swine with mycobacteria from properly processed chicken waste is small. Research projects are underway, however, to

investigate the degree of freedom from microbiological contamination that can be achieved by ensiling and other processing methods (Ref. 18).

7. One comment stated that there were questions concerning transfer of R-plasmids in enteric microorganisms when animal waste was recycled (Ref. 19).

Experimental studies which relate the effect of recycling animal waste to antibiotic resistance in enteric bacteria are not known to the agency. Animal wastes may contain antibiotics, as described in FDA's 1977 notice, because a large percentage of all animal feeds contain antibiotics which are included to increase the rate of weight gain and to improve feed efficiency.

It is recognized that plasmid-mediated or R-factor resistance is the most significant form of antibiotic resistance. In the 1977 notice, the agency did not discuss R-factor resistance in relation to antibiotics in animal wastes because the circumstance of antibiotic resistance appears to involve the entire spectrum of animal feeding as well as human and animal therapeutic treatment. It was not, therefore, considered to be particularly related to animal waste utilization.

No information has been received since 1977 which would lead the agency to conclude that the presence of such antibiotics or possibly antibiotic-resistant bacteria in animal waste would present any more of a problem than is usual in mixed feeds for animals, which may contain similar amounts of antibiotics and antibiotic-resistant organisms (Refs. 20 and 21).

8. One comment noted that there was an incorrect entry on page 64669 of the 1977 notice, that the statement, "data collected indicated that treatment of cattle waste with 0.74 percent formaldehyde solution destroys microbial activity and prevents mold growth for a minimum of 3 months" should read " \* \* \* prevents mold growth for up to 3 months."

The agency agrees with the comment which is supported by reference number 5 cited in the 1977 notice. Because the statement as published in the *Federal Register* was only one of many in the broad discussion of numerous preservation and treatment techniques, it would not materially alter the general nature of the discussion or any subsequent agency conclusions concerning the subject.

#### IV. Environmental Impact

The agency has determined pursuant to 21 CFR 25.24 (b)(5) and (b)(11) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

#### § 500.40 [Removed]

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 402(a) (1), (2)(C), and (3) and 701(a), 52 Stat. 1046 as amended, 52 Stat. 1055 (21 U.S.C. 342(a) (1), (2)(C), and (3) and 371(a))) and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 500 is amended by removing § 500.40 *Use of poultry litter as animal feed*.

*Effective date.* This revocation is effective December 29, 1980.

(Secs. 402(a) (1), (2)(C), and (3) and 701(a), 52 Stat. 1046 as amended, 52 Stat. 1055 (21 U.S.C. 342(a) (1), (2)(C), and (3) and 371(a)))

Dated: December 17, 1980.

Jere E. Goyan,

Commissioner of Food and Drugs.

**Pressure Sensitive Tape and Label  
Surface Coating Operations; Standards of  
Performance for New Stationary Sources;  
Public Hearing and Proposed Rulemaking**

**ENVIRONMENTAL PROTECTION  
AGENCY**
**40 CFR Part 60**

[AD-FRC 1533-8]

**Standards of Performance for New  
Stationary Sources; Pressure Sensitive  
Tape and Label Surface Coating  
Operations**
**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed Rule and Notice of Public Hearing.

**SUMMARY:** Standards of performance are proposed to limit the emission of volatile organic compounds (VOC) from new, modified, or reconstructed pressure sensitive tape and label (PSTL) manufacturing facilities. Emissions would be limited to 0.20 kilograms of VOC per kilogram of coating solids applied for each affected coating line as measured by Reference Methods 24 and 25 (promulgated in the Federal Register on October 3, 1980 45 FR 65956). As an alternative, the owner or operator may demonstrate either a 90 percent overall VOC emission reduction or an overall percent emission reduction which is equivalent to the 0.20 kilograms per kilogram of coating solids applied level, whichever is less stringent. This overall reduction is based on the amount of solvent applied with the coating solids.

The proposed standards implement Section 111 of the Clean Air Act and are based on the Administrator's determination that industrial paper coating facilities contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. Pressure sensitive tape and label manufacturing is one of the largest contributors to air pollution in the industrial paper coating category. The intended effect of this proposal is to require new, modified, and reconstructed pressure sensitive tape or label manufacturing facilities to use the best demonstrated system of continuous emission reduction, considering costs, nonair quality health, and environmental and energy impacts.

A public hearing will be held to provide interested persons an opportunity for oral presentation of data, views, or arguments concerning the proposed standards.

**DATES:** *Comments.* Comments must be received on or before March 2, 1981.

*Public Hearing.* A public hearing will be held on January 30, 1981 (about 30 days after proposal) beginning at 9 a.m.

*Request to Speak at Hearing.* Persons wishing to present oral testimony should contact EPA by January 23, 1981.

**ADDRESSES:** *Comments.* Comments should be submitted (in duplicate if possible) to: Central Docket Section (A-130), Attention: Docket Number A-79-38, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

*Public Hearing.* The public hearing will be held at OA Auditorium EPA, R.T.P. North Carolina. Persons wishing to present oral testimony should notify Mrs. Naomi Durkee, Standards Development Branch (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-5331.

*Background Information Document.* The Background Information Document (BID) for the proposed standards may be obtained from the U.S. EPA Library (MD-35), Research Triangle Park, North Carolina 27711, telephone number (919) 541-2777. Please refer to "Pressure Sensitive Tape and Label Surface Coating Industry, Background Information Document for Proposed Standards," EPA-450/3-80-003a.

*Docket.* Docket Number A-79-38, containing supporting information used in developing the proposed standards, is available for public inspection and copying between 8 a.m. and 4 p.m., Monday through Friday, at EPA's Central Docket Section, Room 2902, Waterside Mall, 401 M Street SW., Washington, D.C. 20460. A reasonable fee may be charged for copying.

**FOR FURTHER INFORMATION CONTACT:** Mr. Gene W. Smith, Standards Development Branch, Emission Standards and Engineering Division (M-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-5421.

**SUPPLEMENTARY INFORMATION:**
**Proposed Standards**

The proposed standards would apply to new, modified, and reconstructed adhesive, release, and precoat coating lines used in the manufacture of PSTL. The emission of VOC would be limited to 0.20 kilograms per kilogram of coating solids applied. As an alternative, the owner or operator may demonstrate either a 90 percent overall VOC emission reduction or an overall percent emission reduction which is equivalent to the 0.20 kilograms per kilogram of coatings solids applied level, whichever is less stringent. Compliance will be determined over a calendar month averaging period by Reference Method 24. Reference Method 25 will be used to

performance test coating lines controlled by incineration systems. Coating lines which emit no more than 125 kilograms of VOC per day and 15 megagrams of VOC per year are not subject to the emission limits of the proposed standard. If either the daily or yearly limit is exceeded, the coating line will become subject to the proposed emission limit of 0.20 kg VOC per kg coating solids applied. If the daily or yearly limits are not exceeded an affected facility is only subject to the recordkeeping and reporting requirements of the proposed standard.

The proposed standards are based on an overall VOC emission reduction. The overall reduction is calculated by multiplying the operational efficiency of the control device (carbon adsorbers or incinerators) by the operational efficiency of the vapor capture system (hooding or enclosures). The resultant efficiency is the overall VOC emission reduction achievable by a coating facility.

The proposed standard allows for compliance by using either low-solvent coatings or add-on control equipment. Carbon adsorption and thermal incineration control systems are capable of meeting the proposed standard. Generally, hot melt and waterborne adhesive coatings and 100 percent solid and waterborne release coatings would comply with the proposed standard because they would contain less than 0.20 kilograms of VOC per kilogram of coating solids applied.

**Summary of Environmental, Energy, and Economic Impacts**

The environmental, energy, and economic impacts of a new source performance standard (NSPS) are expressed as incremental differences between the impacts for facilities complying with the proposed standard and for those complying with a typical State Implementation Plan (SIP) emission standard. Most existing PSTL surface coating operations are located in areas which are considered nonattainment areas for purposes of achieving the National Ambient Air Quality Standard (NAAQS) for ozone. New facilities are expected to locate in similar areas. For the purpose of this analysis it is assumed that states have adopted or will adopt the recommended guidelines in the control techniques guideline (CTG) document, "Control of Volatile Organic Emissions from Existing Stationary Sources—Volume II: Surface Coating of Cans, Coil, Paper, Fabrics, Automobiles and Light-Duty Trucks" (EPA-450/2-77-008 [CTG]). The States, however, are not legally bound to adopt the recommended emission

limits of the CTG document. In this analysis the CTG limits were used as a comparison baseline because they reflect the control level most likely to be instituted in the states' air pollution control regulations (State Implementation Plans).

Compared to emission control levels recommended in the CTG document, the proposed standards of performance would further reduce emissions of VOC from new, modified, or reconstructed pressure sensitive tapes and labels manufacturing operations by about 16 percent in 1985. National emissions of VOC would be reduced by about 4,300 megagrams (metric tons) per year in 1985.

National wastewater discharges would be 13 percent greater than those occurring from plants controlled to the CTG level. National discharges of wastewater would increase in 1985 by about 2.5 million liters (661,000 gallons) as a result of the 13 percent change. This increase is reasonable in light of the nationwide reduction in VOC emissions being achieved.

The solid waste impact of the proposed standards would be small compared to the amount of solid waste generated by the daily production operations of a PSTL coating facility. A coating facility can generate large quantities of solid waste consisting of flawed coated products, imperfect face stock, substandard release paper, empty cartons, and spools. The only additional solid waste from a controlled facility is spent activated carbon from carbon adsorption units. In 1985 the maximum expected increase in national solid waste as a direct result of the NSPS would be about 55 megagrams (metric tons). The proposed standard is reasonable despite this solid waste increase.

The national energy impact would be dependent on whether the majority of new solvent-based coating lines used incineration, carbon adsorption, or low-solvent coatings for VOC control purposes. Because the Agency is unable to predict with certainty the fraction of new facilities which will use each of these technologies, this analysis is performed on the two technologies—carbon adsorption and incineration—which would result in the extreme impacts. The best case energy situation would result if all lines used carbon adsorption. If, in 1985, all solvent-based lines used carbon adsorption controls, a potential net national energy savings equivalent to 27,100 barrels (4.3 million liters) of crude oil per year is projected. A savings is possible because of the large credit received for usable recovered solvent. The worst case

energy situation would occur if all solvent-based coating lines used incinerators to control VOC emissions. All solvent would be destructed and no recovery value could be obtained. A potential national energy demand of 31,000 barrels (4.9 million liters) of crude oil for VOC control is estimated. The proposed standard is reasonable even taking into account the worst case energy estimate.

The proposed standards would have minimal economic impact on the PSTL industry. The maximum expected price increase necessary to offset the impact of the proposed standards would be 0.9 percent. Nationwide in 1985, the anticipated incremental annualized cost of compliance, including depreciation and interest, would be \$2.6 million. Effects on growth, industry structure, and profitability would not cause significant inflationary impacts or market withdrawals.

In addition to emission reductions beyond those achieved by a typical SIP, standards of performance have other benefits. They establish a degree of national uniformity to avoid situations in which some States may attract industries by relaxing air pollution standards relative to other States. Further, standards of performance improve the efficiency of case-by-case determinations of best available control technology (BACT) for facilities located in attainment areas, and lowest achievable emission rates (LAER) for facilities located in nonattainment areas, by providing a starting point for these determinations. This results from the process for developing a standard of performance, which involves a comprehensive analysis of regulatory alternatives. Detailed cost and economic analyses of various regulatory alternatives are presented in the supporting documents for the proposed standards.

#### Rationale

##### *Selection of Source*

The "Priority List and Additions to the List of Categories of Stationary Sources for New Source Performance Standards under the Clean Air Act Amendments of 1977", promulgated at 44 FR 49222 on August 21, 1979, ranked sources according to the impact that the standards promulgated in 1980 would have on emissions and public health in 1990. The paper coating industry ranked fourth on this list of 59 sources to be controlled for air pollutants. The manufacture of pressure sensitive tapes and labels is the largest organic solvent-using segment of the paper coating industry.

Approximately 80 percent of all pressure sensitive tapes and labels are coated with organic solvent-based coatings. All but a very small percentage of this solvent is emitted during the manufacturing process. The pressure sensitive tape and label surface coating source consists of any rollcoating operation which applies pressure sensitive adhesives, release coatings or precoats on a continuous web material. Decals and adhesive specialty products are included in the definition of pressure sensitive tapes and labels because plant visits and industry literature showed that the manufacturing operations and coating formulations for all of these products are similar.

In 1978 nationwide emissions of VOC from the pressure sensitive tape and label industry were estimated at 600,000 megagrams (metric tons). This estimate was based on PSTL industry production data and typical formulation data. Very few of these emissions were controlled by State regulations.

##### *Selection of Pollutants and Affected Facilities*

VOC are the primary air pollutants emitted from pressure sensitive tape and label surface coating operations. VOC along with nitrogen oxides are precursors to the formation of ozone and oxygenated organic aerosols (photochemical smog). Ozone and oxygenated organic aerosols result in a variety of adverse impacts on health and welfare, including impaired respiratory function, eye irritation, deterioration of materials such as rubber, and necrosis of plant tissue. Further information on these effects can be found in the April 1978 EPA document "Air Quality Criteria for Ozone and Other Photochemical Oxidants", EPA-600/8-78-004. This document can be obtained from the EPA Library (MD-35), Research Triangle Park, North Carolina 27711, telephone number (919) 541-2777.

Solvent drying ovens are potentially a source of pollutants other than VOC (for example NO<sub>x</sub>, SO<sub>x</sub>, and particulates). The drying ovens are operated with electricity, indirect heat sources, or direct-fired burners. The electrical ovens do not add to the pollutants expected at the source. The indirect-heated ovens are usually steam-tube heaters with an on-site steam boiler. Control of the boiler emissions is being examined by EPA in a separate study of industrial boilers.

Generally, natural gas or liquid petroleum gas is used in the direct-fired heaters. Coal and fuel oil are not used because fly ash material in the oven gases can adversely affect the expected

tape or label quality. The SO<sub>2</sub> emissions rate from the combustion of natural gas is very low. Also, the relatively low temperature environments in the direct-fired burners would result in low NO<sub>x</sub> emissions.

Based on their overall volume magnitude and their severity as an air pollutant problem, VOC emissions would be the only pollutants regulated by this standard.

For the purposes of this standard, a single coating line, consisting primarily of an adhesive, release, or precoat head, a drying/curing oven, and the flashoff area between the coating head and oven, if defined as the affected facility. For systems which have tandem coating facilities, each individual coating line would be considered as an affected facility. A tandem coating facility is one which coats releases and adhesives in series on one line.

The choice of the affected facility for this standard is based on the Agency's interpretation of Section 111 of the Act, and judicial construction of its meaning.\* Under Section 111, the NSPS must apply to "new sources"; "source" is defined as "any building, structure, facility, or installation which emits or may emit any air pollutant" (Section 111(a)(3)). Most industrial plants, however, consist of numerous pieces or groups of equipment which emit air pollutants, and which might be viewed as "sources." EPA therefore uses the term "affected facility" to designate the equipment, within a particular kind of plant, which is chosen as the "source" covered by a given standard.

In choosing the affected facility, EPA must decide which pieces or groups of equipment are the appropriate units for separate emission standards in the particular industrial context involved. The Agency must do this by examining the situation in light of the terms and purpose of Section 111. One major consideration in this examination is that the use of a narrower definition results in bringing replacement equipment under the NSPS sooner; if, for example, an entire plant were designated as the affected facility, no part of the plant would be covered by the standard unless the plant as a whole is "modified." If, on the other hand, each piece of equipment is designated as the affected facility, then as each piece is replaced, the replacement piece will be a new source subject to the standard. Since the purpose of Section 111 is to minimize emissions by the application of the best demonstrated control technology (considering cost, other

health and environmental effects, and energy requirements) at all new and modified sources, there is a presumption that a narrower designation of the affected facility if proper. This ensures that new emission sources within plants will be brought under the coverage of the standards as they are installed. This presumption can be overcome, however, if the Agency concludes that the relevant statutory factors (technical feasibility, cost, energy, and other environmental impacts) point to a broader definition. The application of these factors is discussed below.

Designation of the entire coating operation from unwind to rewind as an affected facility was also considered. Such a designation would allow those sources that achieve highly effective control on some coating sections (of a single coating line) to provide less control on other sections, so long as the aggregate emissions from the coating line are less than or equal to those allowed under the proposed standard. The proponents of a broader designation of affected facility (as the operation from unwind to rewind) believe it would provide additional incentive to industry for the innovative use of low-solvent technology in processes where it is not currently available.

Based on currently available information, EPA believes that the cost and energy savings already associated with using low solvent technology are so great that any additional incentive derived through the use of the broader designation of affected facility will have little or no impact on the rate of innovation. If this is true, the proposed designation of affected facility would give more total emission reduction than the alternative broader designation because the low-solvent materials would be used regardless and the other sections of the coating line would still have to be fully controlled with a capture system and a control device.

In order to promulgate the broader designation, EPA would have to find that it would achieve greater total emission reductions or equivalent total reductions with significant other benefits such as reduced costs, energy consumption or other environmental impacts. EPA solicits comments on this issue.

Persons urging consideration of the alternative broader designation should specifically address the issue of how much additional incentive (or disincentive) the designation of affected facility is likely to provide for an owner or operator's decision to use low-solvent coatings. Where possible the comments should present an economic and

environmental analysis to support the position taken.

New coating lines which do not discharge into the atmosphere more than 125 kilograms of VOC per day or 15 megagrams of VOC per year would not be subject to the emission limits of the proposed new source standard. A major factor influencing the institution of these limits was PSTL industry comment concerning the treatment of research and development (R&D) coating lines. The industry felt that R&D lines should not be subject to the same emission limits as a production facility. Upon examination of these operations, the EPA determined that: the cost to control R&D emissions would be high, the achievable emissions reduction would be minimal, and normal production coating lines would operate well above the stated daily and yearly limits. For these reasons the exemption limits were developed. The limits were based on industry information concerning R&D operations. The exemption limits, however, apply to all new, modified, or reconstructed coating lines, and not just to R&D facilities. If either the daily or yearly limit is exceeded, the coating line would be subject to all the requirements of the proposed standard. If the exemption limits are not exceeded, the owner or operator must only record solvent usage at the coating line and report it to the Administrator.

The daily and yearly exemption limits are based on data received from tape and label companies on their R&D facilities and on the model plant analysis in Chapter 6 of the BID Manufacturers in the tape and label industry have indicated that 61 cm (24 in) coaters are very popular for use in R&D projects. This size corresponds to the small size model plant in the BID analysis. Industry sources also stated that R&D coaters, when used, only run about two hours a day. The model plant analysis determined that a 61 cm coater will use, on the average, about 29 kg (64 lb) of solvent per hour. A typical PSTL facility will then consume about 58 kg (128 lb) of solvent per day for R&D purposes. Taken on an annual basis, this translates to about 15 megagrams of solvent for a facility operating 6000 hours a year. The EPA feels this number is reasonable because industry sources proposed exemption emission limits of 5 to 10 megagrams per year for R&D coating lines.

Manufacturers also indicated that R&D projects are run for more than two hours a day in some cases. These cases occur when larger quantities of material are needed for quality testing and marketing purposes. Industry sources

\*The most important case is *ASARCO, Inc. v. EPA*, 578 F.2d 319 (D.C. Cir. 1978).

estimated that one-half a day or 4 hours is usually sufficient for these R&D coating situations. Based on this information and the model plant figures, the daily emission limit of 125 kg (275 lb) was calculated and determined to be reasonable. The level of the daily limit allows coating firms greater flexibility in their R&D operations.

The affected facility was chosen to incorporate the primary sources of VOC emissions from PSTL coating. The drying/curing oven represents the major source of VOC emissions within the affected facility. The coated web is heated in the oven where 80 to 95 percent of the solvent is evaporated and vented either to the atmosphere or to a control device. These oven emissions can be effectively controlled by ducting them so they discharge to the atmosphere through either a carbon adsorption or a thermal incineration system. One to eighteen percent of the total applied solvent escapes as fugitive emissions and zero to five percent ends up trapped in the final coated product. The area from the coating head to the entrance of the oven is potentially the highest source of fugitive VOC emissions. Hoods or enclosures can be used in this area to effectively capture fugitive emissions. Once captured the fugitives may be ducted to either the oven or to a control device.

Other equipment such as wind and rewind stations are a part of the affected coating line, but are not VOC emission sources. VOC emissions from formulation, storage, and cleanup operations are not included in this regulation. These emissions are not being regulated at this time because: (1) Formulation emissions are already controlled to low levels due to occupational safety reasons and (2) the solvent cleanup emissions are generally low concentration, low volume sources which are very difficult to capture and control.

#### *Selection of Basis of Proposed Standards*

This section describes the emission control technology applicable to the PSTL industry and the regulatory alternatives considered by EPA in the development of this standard. Included is a summary of the environmental, energy, and economic impacts, and nonair quality health impacts of the alternatives and a description of the basis of the proposed standards.

*Control Technologies.* Available control technologies for reducing VOC emissions from PSTL facilities include the use of low-solvent coatings or an emission capture and control system. Low-solvent coatings provide the best

environmental alternative for reducing VOC emissions. By 1985, it is estimated that 80 percent of all pressure sensitive coatings will be low-solvent-type coatings. These alternative coatings are available for both adhesives and releases and can be purchased as waterborne, emulsion, or 100 percent solids formulations. Advantages of these coatings include low cost, low energy use, good viscosity even at a high solids content, and negligible air pollution, toxicity, or fire hazards. However, low-solvent coatings are not technologically advanced to the point where they can be interchanged with all solvent-based formulations. Major technical problem areas for low-solvent coatings include cohesive strength, solvent resistance, UV degradation, wettability, and dimensional stability. The added difficulty of total customer acceptance further reduces the range of product substitutability for low-solvent coatings. Because low-solvent coatings cannot be applied in all cases, they cannot be used as the sole basis for the proposed standard.

Carbon adsorption and thermal incineration used in conjunction with emission capture systems have both been used as control devices to reduce VOC emissions from pressure sensitive tape and label coating facilities. Available performance data indicate that the two devices are equivalent in reducing VOC emissions. Although both control devices have experienced operating problems, it has been demonstrated that they can be successfully used. Two of the problems are: (1) Poor control performance on low VOC concentration gas streams and (2) plugging or fouling problems resulting from volatilization of oligomeric adhesive and release materials. Both of these problems can be reduced or eliminated through proper design and operation of drying ovens and the control devices to the extent that a facility will comply with the proposed standard.

A thermal incinerator is an effective VOC emission control device for all types of solvents. Thermal incinerators operating at temperatures greater than 760°C (1400°F) have demonstrated the ability to achieve at least 95 percent reduction of all VOC in the incinerator feed. The EPA document, "Control of Volatile Organic Emissions from Existing Stationary Sources—Volume I: Control Methods for Surface Coating Operations" (EPA-450/2-76-028), verifies that this level of reduction is achievable. Catalytic incineration has also been demonstrated, in the same EPA document, to be capable of

achieving at least 95 percent efficiency in reducing VOC from an inlet feed stream. Chapter 4 of the BID examines the use of catalytic incineration for PSTL plants. However, the primary incineration focus in this rationale was devoted to thermal incineration, because no catalytic incineration was found in use in PSTL facilities for VOC emissions control.

Thermal incineration is most cost effective when heat exchange equipment is used to recover the heat from the combustion of the solvent and any additional fuels. At 40 percent of the lower explosive limit (LEL), the implementation of primary (preheating of the incinerator feed gases) and secondary heat recovery could supply the primary and secondary heat requirements for one coating line and the secondary requirements for another line. At the very least, primary heat recovery should be included in new incinerator design. Additional heat can be easily recovered and used as heat energy for work area space heating.

The question of LEL is important for safety and economic reasons. The LEL is the lowest vapor concentration in air, expressed as volume percent, at which the mixture would support a flame or explosion at temperatures below 121°C (250°F). Insurance safety regulations require normal operation at less than about 25 percent of the LEL. Operation up to 50 to 60 percent of the LEL is permitted when continuous vapor monitoring systems are employed to control the vapor concentration in the air. The operation of an incinerator at higher LEL values is cost effective because less supplemental fuel is required. While optimal, operating at high LEL levels is not always possible in every coating facility. Factors such as poor coating line design, operation at slow line speeds, and stream dilution by excess ventilation air may limit the achievable LEL. Occupational Safety and Health Administration (OSHA) rules may require excess ventilation air in some facilities to meet certain maximum solvent concentrations in the worker area.

Heat exchanger fouling has been one of the greatest problems with incineration systems. This is especially true in silicone release and adhesive systems. The silicone monomers which volatilize are oxidized in the incinerator and coat the heat exchanger surfaces as a silica material. Operating experience has indicated that routine heat exchanger surface cleanup is required for proper incinerator operation. The experience of one manufacturer with this type of system and these operating

problems is detailed in Chapter 4 of the BID.

The second means of effectively controlling VOC emissions from pressure sensitive tape and label coating lines is carbon adsorption. Several plants in the industry presently use this technology with success. Test data from PSTL plants and self-monitoring data supplied by PSTL manufacturers have indicated that operational efficiency levels of at least 95 percent or greater are attainable with carbon adsorbers. For the purposes of this analysis, carbon adsorbers were assumed to be 95 percent efficient in reducing VOC emissions. This efficiency level has been attained in PSTL facilities despite the occurrence of problems such as: bed fires, carbon fouling, freeze damage, corrosion, and low LEL inlet streams. Carbon adsorption systems are generally regenerated with steam, although any hot, non-reactive gas can be used to strip the beds. If steam is used, the carbon adsorption system is generally limited to solvents which are not water soluble (unless the operator uses add-on distillation or separation processes). All systems currently operating on PSTL coating lines in the United States use steam for carbon bed regeneration. Fouling of the carbon beds by volatilized adhesives and releases is a recurring operational problem. This problem can be adequately reduced by filtering the feed gas before it enters the carbon beds. Again silicone materials are a greater problem than the adhesive resins. Generally carbon beds on silicone coating lines are changed twice as often as beds on rubber or acrylic resin coating lines.

Low VOC concentration gas streams (less than 10 percent LEL) are a problem for both carbon adsorption and incineration VOC control equipment. In incinerators the low concentration gas stream will require much more fuel to incinerate the same amount of solvent gases as in a high concentration stream. The higher fuel usage will mean higher operating costs. Data from existing PSTL facilities demonstrate that the attainment of a 90 percent overall VOC emission reduction, on a monthly basis, is possible at less than 10 percent LEL.

For carbon adsorption systems, the low VOC concentration means poor bed performance. The beds are usually designed for a certain maximum VOC concentration based on a desired outlet VOC concentration. Operating experience has shown that at low solvent concentrations the performance of the bed decreases resulting in a lower overall VOC reduction. Higher gas stream, VOC concentrations can be

maintained through design of drying ovens with high turn down ratios and air tight gas ducting systems. Operators can also minimize the low VOC concentration problem by, whenever possible, coating products with similar solvent loadings on the same coating line.

The use of hoods or enclosures can be an effective means for capturing fugitive solvent emissions around the coater area. Fugitive solvent is that solvent which is emitted from the coating applicator and flashoff areas. The hood can be located directly over the web to capture vapors released from the coated surface. In small lines the time interval between when the web is coated and when it enters the oven is about two to five seconds. In large and medium lines the interval is two seconds or less. Since most solvents are heavier than air, floor seeps and hooding under the web can also be used to effectively capture emissions. The ideal situation is to totally enclose the coater and get an effective 100 percent VOC capture. When a hood or enclosure is used, all of the captured fugitive solvent emissions should be ducted back into the system and the control device. If the captured gases are used as makeup air to the ovens, the dilution of the oven gases is minimized.

Presently no total enclosure structures are used in the pressure sensitive tape and label industry. However, when surveyed, firms engaged in similar coating operations (for example, zinc oxide paper coating) responded favorably concerning the use of totally enclosed coatiers. No problems related to enclosure use were given. In addition to environmental benefits, occupational safety concerns were also given as a reason for enclosure use. Enclosures were useful in reducing VOC levels along the floor and in the general work area around the coater, thereby lessening any potential explosion hazards.

In the tape and label industry one firm does operate a total building air evacuation system. This system removes all air from the coating building and sends it to a carbon adsorber. In effect the plant operates a total building enclosure. Calculations on the overall efficiency of this system indicate that a solvent capture efficiency of 95 percent is being obtained.

The best controlled coating operating examined in the tape and label manufacturing industry has four coating lines controlled by one carbon adsorption unit. Three of the lines are 0.71 meters (28 inches) wide and one line is 1.4 meters (56 inches) wide. The company produces a wide variety of

label stock materials. Their operations are typified by short products runs (less than four hours), varied line speeds, and varied solvent-adhesive mixtures. These operating conditions make this facility a more difficult control situation than operations which run on a continuous basis. Over a four week period this system has shown an overall solvent recovery efficiency of slightly greater than 93 percent. During that time the company performed 140 runs and used such solvents as toluene, acetone, hexane, ethyl acetate, methyl ethyl ketone, rubber solvent, heptane, xylene, ethyl alcohol, isopropanol and recovered solvents. The coating lines use hoods to capture VOC emissions over the freshly coated web. The hoods are ducted into the ovens. The oven makeup air is pulled from the coater room with the ovens running at a slightly negative pressure with respect to the room. The overall effect is to draw all fugitive emissions into the oven with their eventual discharge through the carbon adsorption system. This plant demonstrated that high VOC reductions can be achieved even with low VOC concentration streams. During this four week recovery period the LEL in the system was less than ten percent.

A second tape coating facility with a carbon adsorption control system has a near 90 percent overall reduction. This system has hoods over the coating areas; however, all hood gases are vented directly to the atmosphere. Test data indicate that if the solvent vapors captured by the hoods are ducted back into the ovens the system would show a greater than 90 percent overall VOC reduction. Further data from this plant indicated an average overall VOC reduction of 90 percent for the entire year of 1979. The overall reduction for most of the calendar months was 90 percent or more. In the latter part of the year the overall reduction dropped below 90 percent on a monthly basis. This drop occurred because the carbon life of the control device had been exceeded by several months. With the installation of new carbon the overall reduction efficiency once again reached 90 percent or more. Through April of 1980 an average overall VOC reduction of about 94 percent has been attained.

*Regulatory alternatives.* The regulatory alternatives considered in developing the standard are based on the methods available to control the VOC emissions from the PSTL industry. In this industry the two primary emission sources are the oven exhausts and fugitives, with the oven exhausts being the more significant source. Therefore, the regulatory alternatives

are designed to control: (1) The oven emissions only or (2) the oven and fugitive emissions together.

Regulatory Alternative I is a no additional regulation alternative. This alternative represents what could happen if no NSPS were written and new sources were regulated by the SIP regulations. The recommended guideline for the SIP regulations represents a system which captures 90 percent of all volatilized solvents and then destroys or recovers 90 percent of those emissions. The overall reduction of VOC emissions from all affected facilities would be about 80 percent. The Alternative I control level is the baseline of comparison for the other regulatory alternatives. Regulatory Alternative I control could be achieved by the use of carbon adsorption, incineration, or low-solvent coatings.

Regulatory Alternative II is based on the control of oven emissions only. This regulatory alternative is very similar to Alternative I except that the efficiency of the add-on control device is selected as 95 percent rather than the 90 percent control level because it is more indicative of current control system operations. Therefore, with a capture efficiency of 90 percent, the overall VOC reduction for this control system is approximately 85 percent. Carbon adsorption, incineration, or low-solvent coatings could be used to control emissions under this alternative.

Regulatory Alternative III is based on the control of both oven and fugitive VOC emissions. To obtain a high degree of fugitive capture a fugitive control device (such as a hood or a complete enclosure of the coating area) is used between the coater and the oven. The captured fugitive VOC emissions are ducted into the oven or the add-on control device. The recommended method of ducting is to use the captured gases containing fugitive VOC as makeup air to the drying oven. Control of the fugitives results in a higher VOC capture. In this case, 95 percent of the applied solvent that is volatilized is captured. Under Alternative III the control device reduces 95 percent of the captured emissions, and an overall VOC reduction of 90 percent or greater is achieved. Data from existing well-designed pressure sensitive tape and label coating facilities indicate that up to 93 percent overall VOC reduction can be achieved. Chapter 4 and Appendix C of the BID examine data from well-controlled facilities in greater detail.

#### *Environmental, Energy, and Economic Impacts*

The environmental, energy, and economic impacts of the NSPS are based

on a comparison of the expected impacts of Regulatory Alternatives II and III to Regulatory Alternative I. The overall impacts of the regulatory alternatives are heavily influenced by the predicted decline in the use of organic solvent-based systems. Currently, 80 to 85 percent of all pressure sensitive tape and label coatings are applied with organic solvent formulations. By the year 1990 it is predicted that organic solvent coating will only constitute 10 percent of PSTL all coatings. Based on total solvent use these numbers represent approximately 600,000 megagrams (metric tons) of solvent used in 1978 while only 91,000 megagrams (metric tons) are expected in 1990. The use of organic solvent coatings will decline because of: (1) The increasing availability of alternative low-solvent coatings, (2) the high cost and lessened supply of organic solvents, and (3) increasing environmental regulations relating to solvent use.

*Environmental Impacts.* An analysis was made to compare the estimated national impacts of VOC emissions, wastewater effluents, solid waste generation, and energy use associated with the regulatory alternatives. The impacts in 1978 are based only on Regulatory Alternative I which represents no NSPS action and SIP adoption of the CTG recommended emission limit. For all environmental parameters the impacts decrease due to the predicted dramatic increase in the use of energy-efficient, low-solvent coating technology. In 1985 the expected increases in adverse environmental impacts from Regulatory Alternatives II and III are not major.

By 1985 it is predicted that the PSTL industry will use 125,000 megagrams (metric tons) of solvents. Regulatory Alternative I (no NSPS with SIP control only) would result in expected total VOC emissions of 27,400 megagrams (metric tons) per year. If Regulatory Alternative II is applied these emissions are expected to be reduced by 2,600 megagrams (metric tons) to 24,800 megagrams (metric tons) per year. This represents a 9.5 percent reduction in emissions. If Alternative III control is exercised the total VOC emissions are expected to be 23,100 megagrams (metric tons) per year. This represents a 16 percent reduction in total emissions over the projected baseline control level.

Wastewater discharge from PSTL coating operations increases with the use of carbon adsorption systems for VOC control. The additional wastewater comes from steam condensate which is separated from the

recovered solvent. Generally this water is routed into local waste treatment systems or is emitted directly to the environment. If one assumes that all VOC emissions from PSTL coating facilities are controlled by carbon adsorption units (worst case estimate), the resulting wastewater flow for Alternative III is 13 percent greater than that expected from systems required to meet the Alternative I control level. In 1985, if all the solvent-based coating facilities used carbon adsorption, the total amount of wastewater would be about 20 million liters per year. The amount of VOC potentially in this volume of water is about 10 megagrams (metric tons). Even in the worst case situation the proposed standard is reasonable.

The solid waste impact from the addition of VOC controls in the PSTL industry is expected to be small. The use of carbon adsorption systems produces waste activated carbon. The carbon must be replaced every one to six years depending on performance. The waste carbon can be landfilled, burned as a solid fuel, or sold to firms which reactivate the carbon. The landfill operation represents the greatest potential adverse environmental problem. This problem can be minimized by proper design, construction, and operation of the landfill site. In 1985 the estimated national incremental carbon solid waste production from PSTL facilities is approximately 55 megagrams (metric tons). This waste load would occur under Regulatory Alternative III control. The solid waste impact is reasonable when compared to the total nationwide VOC reduction being achieved.

*Energy Impact.* The total industry-wide use of electricity and fossil fuels is expected to decline in the next ten years. The primary reasons for this decline is the greater use of more fuel efficient, low-solvent systems, such as hot melts and waterborne adhesives and 100 percent solids and waterborne releases. The low-solvent systems eliminate the need for large, full-consuming solvent drying ovens.

For an individual coating facility, the supplement energy use is higher for a solvent-type coating line with an add-on VOC control device than a line with no controls at all. More electrical energy is needed to power an increased number of fans and fans with higher capacities. For coating lines controlled by carbon adsorption units, fossil fuels must be used to run the steam boilers. Coating lines controlled by incineration would have fuel requirements that are dependent on the concentration of the

incinerator feed gases. If the concentration can be maintained near 40 percent LEL, fuel requirements will be low.

There is a potential in the PSTL industry for a net national energy savings. This savings would be possible if many or all solvent-based coating lines used solvent recovery control systems. The recovered solvent more than offsets the supplemental energy needed to operate the systems. The net recovered solvent could be translated into barrels of oil, consequently equaling barrels of oil that would not then have to be imported.

In 1985, Regulatory Alternative II would have an increased energy requirement of about 7,900 barrels (1.26 million liters) of crude oil per year above that required by Regulatory Alternative I. If all solvent-based coating lines were controlled by carbon adsorption to the Alternative II level, a best case, gross energy savings of about 23,600 barrels (3.75 million liters) of crude oil is estimated. By deducting the required energy for controls, a potential net national energy savings of 15,700 barrels (2.5 million liters) of crude oil exists.

Under Regulatory Alternative III an incremental (above Alternative I) energy demand of approximately 12,000 barrels (1.9 million liters) of crude oil is projected. Assuming all controls are carbon adsorption units, a gross national energy savings of about 39,100 barrels (6.2 million liters) of crude oil is predicted. This gross savings equates to a potential net national energy savings of 27,100 barrels (4.3 million liters) of crude oil for Alternative III. This estimate reflects the best case energy impact.

If all solvent-based coating lines were controlled by incineration the worst case national energy impacts result. Because no solvent is recovered, there are no credits to offset the increased energy used by the VOC control systems. For Alternative II control an annual 17,700 barrels (2.8 million liters) of crude oil may be consumed by the PSTL industry over that required under Alternative I. Under Alternative III incinerations controls would require approximately 31,000 barrels (4.9 million liters) of crude oil per year.

Neither total carbon adsorption nor total incineration control is anticipated in this industry. The actual use of the two control devices will be determined by the availability and price of solvent, the applicability of alternative fuels, the rapidity with which low-solvent technologies replace solvent-based ones, and the stringency of environmental regulations.

**Economic Impact.** The economic impacts of all three regulatory alternatives are minimal. In cases where they can be used, owners or operators will invest in low-solvent coating methods such as 100 percent solids or waterborne coatings. If technological constraints prevent the use of waterborne and 100 percent solid technologies, the regulatory alternatives will have a small impact on the industry. Based on the net present value (NPV) analysis, the large lines will generally experience a greater impact than the medium and small lines. Industry-wide, it is estimated that a price increase of 0.0 to 0.9 percent would be required to offset the impact of the NSPS.

The economic impact of the NSPS was evaluated through the costing of model facilities. These model facilities are based on sizes and flow-rates which represent typical new coating facilities. For this study, three line widths (0.61 m, 0.9 m and 1.5 m) and three line speeds (0.13 m/sec, 0.30m/sec, and 1.2 m/sec) were examined. The large width and high speed were combined in one case to represent a facility which is a large volume (39 million m<sup>2</sup>/year) producer. The medium and small widths and slower speeds were combined to represent facilities which are small volume (1.7 million m<sup>2</sup>/year and 5.8 million m<sup>2</sup>/year) coating operations. The adhesive coating cases were examined separately from the silicone release coating operations. Tandem coating facilities were also analyzed during the economic study.

In the impact analysis, alternative low-solvent technologies are used to give a comparison for the systems which required add-on VOC controls. These alternative systems include hot melt and waterborne adhesives and 100 percent solid and waterborne silicone releases.

Detailed cost data were developed for the adhesive and silicone release model plants. All cost data were based on model plants that would be operating for 6,000 hours per year. The model plant costs were used in an economic model to assess the economic impact of the proposed standard. Both control equipment and coating line costs were developed. A discount rate of 16 percent and capacity utilization rates of 75 and 100 percent were used in the analysis. Inputs on different company structures were also used in the economic model. The model takes all the inputs and analyzes the various alternatives to rate them on net present value (NPV). The alternatives with the highest NPV's are considered as the best alternatives. High NPV's are advantageous because they represent the highest annual cash flows

generated by an investment. All impacts represent the situation in 1985.

An economic analysis was not performed for the precoat coating lines because the physical and operational characteristics of a precoat line are very similar to those of release coat lines. To avoid duplications of effort and information, only release coat lines were examined in the economic analysis. Conclusions determined for release coat lines would apply to precoat coating lines.

To adequately represent the alternatives available to a coating operation the economic analysis is done from two perspective cases. In the unconstrained case, it is assumed that both low-solvent and high-solvent technologies can be used as identical product substitutes. This means that the 100 percent solid and waterborne formulations will produce a product equal to that of the solvent systems. In the constrained case, it is assumed that neither waterborne nor 100 percent solids coatings can be used as solvent-based product substitutes. A firm may only use solvent-based technology (with controls) to produce a tape or label product.

In the unconstrained cases, Regulatory Alternative II and III would have no impacts on the pressure sensitive tapes and labels industry. Waterborne and 100 percent solids coatings are available that meet the control requirements of these alternatives. Because low-solvent systems are more profitable than solvent-based ones, firms in the PSTL industry would have an economic incentive to adopt them even in the absence of an NSPS based on Alternatives II or III. The regulatory alternatives would not force firms to change the type of coating line they would build in the absence of any regulatory alternatives.

In the constrained cases, Regulatory Alternatives II and III would have minor impacts. Under Alternative II control, a product price increase of 0.0 to 0.4 percent would result if all costs for controls were passed on to the consumer. If all costs were absorbed by the manufacturer, an industry-wide decrease in return on investment (ROI) of 0.0 to 0.6 percent would result. Under Alternative III control, a product price increase of 0.0 to 0.9 percent is predicted. Full cost absorption by the manufacturer would reduce the ROI by 0.0 to 1.0 percent. With both regulatory alternatives, the large coating lines would be slightly more impacted than the medium and small lines.

The regulatory alternatives would have little or no impact on the industry's

growth rate and structure. The availability of low-solvent technologies and the small price and ROI impacts on the conventional solvent-based systems imply that the regulatory alternatives would not deter new investment and adversely affect growth. Although the large facilities would be affected more than the medium and small facilities, the difference is not great enough to put the large facilities at a competitive disadvantage. Thus, the regulatory alternatives would not cause any significant changes in the structure of the industry.

#### *Best System of Emission Reduction*

Based on the environmental, energy, and economic impacts, Regulatory Alternative III is selected as the best system of continuous emission reduction. This alternative is considered affordable and the impacts reasonable. Although this alternative is based on the use of a control device operated in conjunction with a well-designed VOC capture system, it is recognized that low-solvent coatings are available for some applications and are just as effective in reducing VOC emissions.

The control device may be either a carbon adsorber or incinerator. Both control devices have been determined to be capable of at least 95 percent efficiency in reducing VOC emissions. The attainable efficiency of VOC capture systems has been estimated based on PSTL facilities' overall VOC emission reduction data and control device efficiencies for these systems. Based on these calculations the best hooding and enclosure systems are 95 percent efficient in capturing all VOC emissions from a coating operation. The remaining five percent of total emissions are trapped in the coated product or are lost as fugitive emissions. The continuous overall emission reduction achievable by the best system is 90 percent. After consideration, the Administrator has determined that under normal operating conditions all affected facilities could achieve the level of the proposed standard using the best system.

#### *Selection of Format of Proposed Standard*

The formats were examined based on their effectiveness in ensuring overall VOC control. The criteria for choosing the format are effectiveness, compatibility with existing coatings and control systems, complexity of compliance testing, and ease of application in the industry.

The formats considered for the pressure sensitive tape and label industry were: (1) Total concentration of

emissions from all exhaust gases discharged to the atmosphere, (2) kilograms of emissions per unit of production, (3) control efficiency, and (4) kilograms of emissions per unit weight or volume of coating solids. The following paragraphs discuss the advantages and disadvantages of the regulatory formats.

An allowable concentration of emissions in the exhaust gases discharged to the atmosphere is the easiest standard to enforce. Direct emission measurements can be made using Reference Method 25 on a single effluent stream. The major disadvantage of this format is its poor effectiveness in identifying overall VOC control. The level of fugitive emissions capture cannot be determined with a single point measurement. Such a determination requires either absolute containment or material balance testing of all potential points. As stated earlier, fugitives may amount to 18 percent of the total applied solvent. Another disadvantage is that it does not promote efficient oven energy use. In order to reduce oven energy consumption, the operator generally tries to increase the concentration of solvent in the oven exhaust gases. Therefore, more solvent leaves in a smaller volume of gas. This means lower energy consumption because energy use is approximately proportional to oven exhaust gas flow rate. With the higher concentration the operator is required to get a higher percent VOC reduction than an operator with less efficient ovens. In fact, concentration limits allow an operator to emit twice as much solvent by simply doubling the amount of dilution air drawn through the ovens. The overall effect is to promote higher energy consumption, while allowing greater total VOC emissions.

A format of kilograms of emissions per unit of production relates emissions to individual plant production on a direct basis. This type of standard would be inequitable for different types of coatings. In the PSTL industry, adhesive coatings vary in thickness and in kilograms of VOC coated per unit area of production. This is further complicated by the inclusion of solvent silicone release and precoat coatings. These coatings tend to be much thinner and contain less VOC per unit area of production than adhesive coatings. Therefore, if a single value for the standard was used, some solvent coatings would require no additional controls while others would require a very high level of control.

The control efficiency standard would be developed from two viewpoints. The

first would be to set a control level across the add-on control device. This form would provide a good means for reducing oven emissions but would not insure the control of fugitive emissions. The second viewpoint would require an overall VOC reduction based on the total amount of solvent in the formulated coating before application. This would include both fugitive VOC emissions and oven emissions. Compliance testing for this situation would require a material balance-type test which is a problem for any standard.

A regulatory format which would relate total allowable mass of VOC emissions to the amount of coating applied would be a very effective standard. For the PSTL industry, this form was examined for mass of VOC emissions with respect to volume of coating, volume of coating solids, and weight of coating solids. Weight of coating solids was chosen as the best of these forms because most formulations are derived on a weight basis. Generally, resin density is constant. Therefore, the weight basis is easy to calculate from formulation data.

The format of the proposed standard is a combination of the percent overall VOC reduction and the mass of VOC emissions per mass of coating solids formats. The percent overall VOC reduction would provide an effective means of requiring an overall VOC control, while not being prohibitive for high-solvent coatings. The mass emission per weight of coating solids would allow the use of low-solvent coatings without the need for all-on VOC control devices. This combination would permit add-on VOC controls for nearly all solvent-based coating systems and promote the development and use of low-solvent coatings.

#### *Selection of Emission Limits*

Section 111(a)(1) requires the emission limits to reflect "application of the best technological system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated." Section 111(a)(1). The "best technological system" defined by Section 111(a)(1) is one that is not "exorbitantly costly." *Essex Chemical Corp. v. Ruckleshaus*, 486 F. 2d 427, 433 (D.C. Cir. 1973).

Application of the "best technological system" results in a two-step standard: for coatings with VOC contents of 2 kg/kg of coating solids or less, the standard is 0.2 kg/kg; for coatings with greater

than 2 kg/kg VOC content, the standard is a 90 percent reduction in VOC emissions.

As discussed earlier, VOC reductions of 90 percent are achievable by systems of capture and control. However, the cost and energy requirements of achieving VOC emission reductions vary according to the VOC content of the coating being controlled. The lower the VOC content of the coating, the higher are the cost and energy requirements of achieving a given reduction in emissions. This is for two reasons. First, a given percent control of lower VOC coatings generally requires capture and control systems of at least the same size and cost as the same percent control of higher-VOC coatings, but it achieves less mass emission reduction because there is less VOC to be controlled. Second, the cost and energy requirements of controlling lower-VOC coatings in incinerators are further increased by the need to use additional supplemental fuel to operate the incinerator.

In the Administrator's judgment, the cost and energy requirements of a capture and control system that achieves 90 percent reduction are reasonable on coatings with VOC contents of 2.0 kg/kg and greater. Such a control system is therefore the "best technological system," and the standard for such high VOC coatings is 90 percent reduction.

For coatings with lower VOC contents, the "best technological system" is one that can achieve 0.2 kg/kg. In the Administrator's judgment, the cost and energy requirements of achieving significantly greater emission reduction on such lower VOC coatings would be exorbitant. Therefore, the standard for such coatings is 0.2 kg/kg. This can be achieved by all sources at reasonable cost and energy requirements.

The effect of solvent retention in the final tape of label product and its impact on the achievability of a 90 percent overall emission reduction were considered. Test data obtained during this study indicate that the amount of solvent retained in the product does not affect the ability of a facility to achieve the proposed standard. A well-controlled PSTL facility has demonstrated a four-week overall VOC emission reduction of 93 percent. This overall reduction includes the amount of solvent that was retained in the product. During this period the facility coated 18 different adhesives with varying amounts of retained solvent. Neither the four week period nor the many varied adhesive products coated (i.e., varied amounts of retained solvent) affected the plant's ability to achieve the

proposed standard. Therefore EPA believes that 90 percent overall emission reduction efficiency can be achieved under all solvent retention conditions.

#### *Selection of Compliance Procedures*

After the required initial performance test, compliance with the proposed standard will be determined on a calendar month basis. Every calendar month will be considered a performance test for carbon adsorption-controlled coating lines, for incinerator-controlled coating lines, and for coating lines using low-solvent coating technology. The owner or operator will report to the Administrator within ten days following the end of a calendar month only if an affected facility exceeded the proposed standard for that calendar month being reported.

The variability of operation of the PSTL industry makes it well-suited to a monthly compliance period. Many products are produced in this industry using hundreds of different coatings. Operating parameters such as line speed, line width, length of a coating run, product solvent retention, and control device solvent hold-up vary substantially within this industry on a daily basis. The combination of these factors influences the quantity of emissions and the ability to meet a standard. Compliance with the proposed standard on a monthly basis would allow enough time for coating system fluctuations to average out.

To determine compliance with the proposed standard, an owner or operator of an affected facility using low-solvent coatings must calculate the weighted average of the mass of VOC (solvent) used per mass of coating solids applied each calendar month. The mass of VOC per mass of coating solids applied can be obtained by using a modified version of Reference Method 24 or coating manufacturer's formulation data. At any time the Administrator may require a Reference Method 24 test to verify the VOC content. The reference method must be performed so that mass per mass units are obtained and not mass per volume units as the method is currently written. The mass per mass modification actually simplifies the method. If the calculated weighted average is less than or equal to 0.20 kg VOC per kg of coating solids applied, compliance with the proposed standard would be demonstrated. Affected facilities with weighted averages greater than 0.20 would have to install add-on control devices to achieve compliance with the proposed standard. For enforcement purposes Reference Method 24 and not manufacturer's formulation data would be used.

Every affected facility using add-on control devices to achieve compliance with the proposed standard, must determine the weighted average of the mass of VOC used per mass of coating solids applied each calendar month. The weighted average VOC content would be compared to the 0.20 kg limit each month to determine the required level of overall VOC reduction. The maximum required overall VOC reduction is 90 percent.

Affected facilities controlled by carbon adsorption will determine monthly compliance using a solvent inventory test. The total mass of solvent used every calendar month will be divided by the total mass of solvent recovered by the carbon adsorber every month to determine the overall VOC emission reduction obtained. If the overall VOC emission reduction obtained is greater than or equal to the required overall reduction, compliance with the proposed standard is demonstrated.

Affected facilities controlled by incineration will determine monthly compliance by comparing the required overall VOC emission reduction of each calendar month to the overall VOC emission reduction demonstrated during the most recent performance test which complied with the proposed standard. If the required monthly reduction is less than or equal to the performance test reduction, the affected facility is in compliance with the proposed standard.

#### *Modification and Reconstruction*

Facilities which are modified or reconstructed as defined in 40 CFR 60.14 and 60.15 after the date of proposal of this standard are subject to the standard. In the case of PSTL facilities, a modification, and thus an increase in VOC emissions, will most likely be related to an increase in production. Production increases contributing to emission increases can result from changes in web width, line speed, or hours of operation. An increase in the hours of operation is specifically excluded from new source performance standards. If changes in line speed and line width are part of the existing equipment capability and do not require capital expenditures, they are also excluded from new source performance standards.

Production increases, however, may require capital expenditures, although this is not expected to be a frequent occurrence. A coating line with a drying oven is usually designed for a maximum solvent vaporization loading. The limiting factor is the LEL level allowed in the ovens. Line speed and line width can often be readily changed as long as

the production is kept under the maximum design of the oven. If production is increased above the maximum designed for the oven, a significant capital expenditure will be made for larger exhaust fans and possibly larger recirculation fans, and larger drive motors for the coater and wind and unwind equipment. If there is an increase in VOC emissions the facility will be a modification and will have to comply with the proposed standard. All control procedures previously discussed are applicable to modified PSTL facilities, therefore, the proposed standard is determined to be reasonable for such facilities. 111 Reconstructed facilities are also a potential occurrence in this industry. Existing control technologies would be applicable to the VOC emissions from such facilities. Because the emissions from reconstructed facilities can be controlled to the level specified in Regulatory Alternative III, the proposed standard would be reasonable for these types of facilities.

#### *Selection of Monitoring Requirements*

Monitoring requirements are included in the proposed standard to ensure good operation and maintenance of the VOC emission control equipment. Monitoring procedures for the proposed standard were chosen based on three factors: Reasonable cost, ease of execution, and utility of the resulting data to both the owner and to EPA for assuring continued proper operation.

Affected facilities controlled by incineration must monitor the temperature of the incinerator exhaust gases. The average temperature is being monitored to determine the occurrence of improper incinerator operation. The temperature drops stated below shall be indications of improper incinerator operation. For thermal incinerators the exhaust gas temperature must be continuously monitored and recorded. Any three hour period (during actual coating operations) during which the average temperature of the device is more than 28°C (50°F) less than the average temperature of the device during the most recent performance test complying with the proposed standard shall be reported to the Administrator. For catalytic incinerators the gas temperature upstream and downstream of the catalyst bed must be monitored. Any three hour period (during actual coating operations) during which the average temperature of the device immediately before the catalyst bed is more than 28°C (50°F) less than the average temperature of the device during the most recent performance test complying with the proposed standard,

or any three hour period during which the average temperature difference across the catalyst bed is less than 80 percent of the average temperature difference of the device during the most recent performance test complying with the proposed standard shall be reported to the Administrator.

Temperature monitoring equipment is usually a standard feature on most incinerators. For this reason, the requirement to monitor temperature should not be an additional cost burden on the industry. If it is not included, the cost to purchase and install an accurate temperature measurement device and recorder is estimated at \$1,200.

Any affected facility which use incinerators to comply with the proposed standard and which uses a hood or enclosure to capture fugitive VOC emissions, must operate a monitoring device which continuously indicates that the hood or enclosure is operating. Examples of such devices include fan amperage meters and flow meters in ducts. No continuous monitoring will be required if the hood or enclosure system is interlocked with the affected facility's oven air recirculation system.

#### *Selection of Performance Tests Methods*

Performance test methods are used to determine the solvent content in the coating and the overall control efficiency of the add-on control system. Furthermore, the test method for determining control efficiency differs depending on whether carbon adsorption or incineration is used.

The proposed method for measuring the solvent content in the coating is Reference Method 24 promulgated at October 3, 1980 45 FR 65956 "Determination of Volatile Matter Content, Water Content, Density, Volume Solids, and Weight Solids of Surface Coatings." This method combines several ASTM standard methods to determine the volatile matter content, density of the coating, volume of solid, and water content of the paint, varnish, lacquer, and related surface coatings. From this information, the mass of volatile organic compounds (VOC) per unit volume of solids is calculated.

Because the proposed PSTL regulation for coating is in units of mass of volatile organic compounds per mass of coating solids, Reference Method 24 must be modified so its results are in the same units as the standard. This actually shortens the test method by eliminating several steps because only the non-aqueous volatile content needs to be determined. For non-aqueous coatings, the procedure to be used is ASTM D

2369-73, "Standard Test Method for Volatile Content of Paints." For coatings with water, the previously mentioned procedure (ASTM D 2369-73) is combined with another procedure which determines the water content of the coating. There are two acceptable procedures for this: (1) ASTM D 3792, "Standard Test Method for Water in Water Reducible Paint by Direct Injection into a Gas Chromatograph," and (2) an ASTM draft "Standard Test Method for Water in Paint or Related Coatings by the Karl Fischer Titration Method." The results from these procedures are the nonaqueous volatile content of the coating (as a weight fraction) and the water content (as a weight fraction). The weight fraction solids content in the coating can also be determined from these procedures. The VOC content in the coating, in mass of VOC per mass of coating solids applied, may be determined by dividing the weight fraction of non-aqueous volatiles by the weight fraction of solids.

The estimated cost of analysis per coating sample is \$50 for the total volatile content procedure (ASTM D 2369-73). For aqueous coatings, there is an additional \$100 per sample for water content determination. Since the testing equipment is standard laboratory apparatus, no additional purchasing costs are expected.

In certain cases, for the proposed PSTL standard, the density of a particular coating may be required. The density may be determined from the coating manufacturer's formulation data or from a procedure that is a part of Reference Method 24. The procedure in Method 24 is ASTM D 1475-60, "Standard Test Method for Density of Paint, Varnish, Lacquer, and Related Products." The analysis of a coating sample would cost about \$25. Testing can be performed with standard laboratory equipment.

If the amount of solvent in the coating exceeds 0.20 kg per kg of coating solids applied, then the efficiency of the vapor control system must be determined. The overall efficiency is determined by comparing the amount of solvent controlled (either recovered or destroyed) to the potential amount of solvent emitted with no controls. For the proposed standard two different performance test methods were selected. The method to use depends upon the type of add-on control device being installed. In the PSTL industry, only two types of control devices are expected: carbon adsorbers and incinerators.

For carbon adsorbers, performance is demonstrated by comparing the solvent used versus the solvent recovered. In

using a solvent inventory system, it is necessary to monitor two things: The amount used of each coating, and the amount of solvent recovered by the carbon adsorption system.

The performance test will consist of a one calendar month solvent inventory as opposed to the three test runs method specified in § 60.8(f). Compliance in the months following the performance test will also be determined on a calendar month basis.

To determine the efficiency of the carbon adsorber system, these data would be collected over a period of one calendar month. This time interval allows the test to be conducted using a representative variety of coatings and products, as well as reducing the impact of variations in the process that would otherwise affect the representativeness of a short-term test. It should be noted that this procedure determines the overall control efficiency based on the original amount of solvent used, not on the amount entering the carbon adsorber, and fugitive emissions are allowed as long as the overall control efficiency meets the standard.

The cost of such a performance test should be minimal since the solvent inventory data would be part of normal operating equipment in the plant. If not, the estimated purchase cost of two accurate liquid weight meters is \$1,400.

Because incinerators destroy the solvent rather than recover it, a different type of performance test is used. The proposed procedure measures the mass of VOC (as carbon) in the incinerator system vents (incinerator inlet, incinerator outlet, and fugitive emission vents), and determines the incinerator system's overall control efficiency. There are important differences between the carbon adsorber and incinerator test procedures that should be noted. The test procedure for the carbon adsorber system relates the original amount of solvent used at the coating head to the amount of solvent controlled, i.e. recovered, by the adsorber. It is possible to compare the two amounts because the same measurement method is used (liquid solvent used versus liquid solvent recovered). However, for incinerator systems, the amount of solvent used should not be directly related to the amount of solvent controlled, i.e. destroyed, because different measurement procedures are used, (liquid solvent used in the coating is measured as mass of solvent, while the gaseous emissions destroyed are measured as mass of carbon). Thus, for incinerators, the amount controlled or destroyed is determined by using the amount of solvent measured in the inlet

vent versus the outlet vent. The overall incinerator system control efficiency is determined by relating the amount destroyed to all the potential emissions.

To make the incinerator test procedure equivalent to the carbon adsorber test procedure, one must be able to measure all the potential emissions, both fugitive emissions and oven emissions ducted into the incinerator. That is, all fugitive VOC emissions from the web coating area must be captured and vented through stacks suitable for testing. Prior to the performance test for incineration-controlled affected facilities, the owner or operator will be required to construct a temporary total enclosure around the coating line for the purpose of capturing fugitive VOC emissions. A total enclosure is defined as any structure or building around the coating applicator and flashoff area or the entire coating line for the purpose of confining and totally capturing fugitive VOC emissions. If a permanent total enclosure exists on the line prior to the performance test, and the enforcing agency is satisfied that the enclosure is totally capturing fugitive emissions; the construction of a temporary enclosure is not required.

The concentration of VOC (as carbon) in the incinerator vent system is measured by Reference Method 25, "Determination of Total Gaseous Nonmethane Organic Emissions as Carbon (TGNMO)." The results of this method combined with the results of Reference Methods 1 through 4 yields the mass of VOC (as carbon) in the vent.

Three one-hour runs of Reference Method 25 are required for a complete test, with Reference Methods 2, 3 and 4 being performed at least twice during that period. Measurements at the inlet, outlet and fugitive emission vents should be performed simultaneously. The total time required for one complete performance test is estimated at 8 hours, with an estimated overall cost \$4,000, plus \$2,000 for each fugitive vent measured.

The TGNMO method (Reference Method 25) was selected to measure the VOC concentration in incinerators for certain reasons. It is simple to use, especially in explosive atmospheres or when sampling high-temperature, moist streams. Also because the detector used in Reference Method 25 measures all the non-methane organics as methane, all carbon atoms give an equivalent instrument response. Therefore, the problem of varying response ratios for different organic compounds (typical of all flame ionization units) is avoided.

The decision to propose two different performance test methods was made

after considering several factors. It is usually preferable to have the same performance test method regardless of the type of control device. In this case, the stack sampling procedure described for incinerators is also applicable to carbon adsorbers. However, the solvent inventory method is a far more practical and accurate procedure. It is very inexpensive, requires no special technical sampling and analytical procedures, and has a test period of one month, so that a representative variety of coatings can be tested. Unfortunately, an inventory-type method cannot be applied to incinerators. The one-day TGNMO inlet and outlet stack test procedure is the best method for testing incinerators, but this method would become exorbitantly expensive and impractical if a longer test period were required. The advantages of the solvent inventory-type test for carbon adsorbers outweigh the disadvantages of having two different performance test methods.

#### Reports Impact Analysis

The reporting requirements necessitated by the proposed standard are authorized in Section 114 of the Clean Air Act. The proposed standard would require the preparation of three types of reports. First, the general provisions (Subpart A of 40 CFR Part 60) would require notification reports which inform the agency of facilities subject to new source performance standards (NSPS). These reports include notification of construction, anticipated start-up, actual start-up, and physical or operational changes. Second, reports of performance test results and performance evaluations of the continuous monitoring systems would be required. These reports show whether a facility is initially meeting the level of the standard. Third, monthly reports explaining whether an affected facility is in or out of compliance with the standard would be required.

The respondent group to the reporting requirements of the proposed standard would be the pressure sensitive tapes and labels (PSTL) industry. It is estimated that through the fifth year of standard applicability, approximately 290 new PSTL sources will have been established which would have to comply with the reporting requirements of the proposed standard. This number of sources includes adhesive, release, and precoat coating facilities. To implement the reporting requirements of the proposed standard, through the first five years of applicability, the PSTL industry would incur a manpower demand of about 12 man-years. Comments are invited on any of the reporting requirements of the proposed standard.

Section 60.447 of the proposed standard explains specific reporting requirements in further detail.

#### Public Hearing

A public hearing will be held to discuss the proposed standards in accordance with Section 307(d)(5) of the Clean Air Act. Persons wishing to make oral presentations should contact EPA at the address given in the ADDRESSES section of this preamble. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement before, during, or within 30 days after the hearing. Written statements should be addressed to the Central Docket Section address given in the ADDRESSES section of this preamble.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at EPA's Central Docket Section in Washington, D.C. (see ADDRESSES section of this preamble).

#### Docket

The docket is an organized and complete file of all the information submitted to or otherwise considered in the development of this proposed rulemaking. The principal purposes of the docket are (1) to allow interested parties to readily identify and locate documents so that they can intelligently and effectively participate in the rulemaking process, and (2) to serve as the record in case of judicial review.

#### Miscellaneous

As prescribed by Section 111, establishment of standards of performance for the manufacture of pressure sensitive tapes and labels was preceded by the Administrator's determination (40 CFR 60.16, 44 FR 49222, dated August 21, 1979) that these sources contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. In accordance with Section 117 of the Act, publication of this proposal was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies. The Administrator will welcome comments on all aspects of the proposed regulation, including economic and technological issues, and on the proposed test methods.

Comments are specifically invited from small PSTL companies on the definition of the affected facility. Larger companies in this industry have objected to the present definition. They feel the affected facility should be defined as a coating line from initial

unwind to final wind. Any comments submitted to the Administrator on this issue should contain specific information and data pertinent to an evaluation of the affected facility definition. Alternative courses of action should be suggested.

It should be noted that standards of performance for new sources established under Section 111 of the Clean Air Act reflect:

\*\*\* application of the best technological system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated (Section 111(a)(1)).

Although there may be emission control available that can reduce emissions below those levels required to comply with standards of performance, this technology might not be selected as the basis of standards of performance due to costs associated with its use. Accordingly, standards of performance should not be viewed as the ultimate in achievable emissions control. In fact, the Act requires (or has the potential for requiring) the imposition of a more stringent emission standard in several situations.

For example, applicable costs do not necessarily play as prominent a role in determining the "lowest achievable emission rate" for new or modified sources located in nonattainment areas, i.e., those areas where statutorily-mandated health and welfare standards are being violated. In this respect, Section 173 of the Act requires that new or modified sources constructed in an area which exceeds the National Ambient Air Quality Standard (NAAQS) must reduce emissions to the level which reflects the "lowest achievable emission rate" (LAER), as defined in Section 171(3) for such category of source. The statute defines LAER as that rate of emissions based on the following, whichever is more stringent:

(A) The most stringent emission limitation which is contained in the implementation plan of any State for such class of category of source, unless the owner or operator of the proposed source demonstrates that such limitations are not achievable, or

(B) The most stringent emission limitation which is achieved in practice by such class of category of source.

In no event can the emission rate exceed any applicable new source performance standard (Section 171(3)).

A similar situation may arise under the prevention of significant deterioration of air quality provisions of the Act (Part C). These provisions require that certain sources (referred to

in Section 169(1)) employ "best available control technology" (BACT) as defined in Section 169(3) for all pollutants regulated under the Act. Best available control technology must be determined on a case-by-case basis, taking energy, environmental and economic impacts and other costs into account. In no event may the application of BACT result in emissions of any pollutants which will exceed the emissions allowed by an applicable standard established pursuant to Section 111 (or 112) of the Act.

In all events, State Implementation Plans (SIP's) approved or promulgated under Section 110 of the Act must provide for the attainment and maintenance of NAAQS designed to protect public health and welfare. For this purpose, SIP's must in some cases require greater emission reduction than those required by standards of performance for new sources.

Finally, States are free under Section 116 of the Act to establish even more stringent emission limits than those established under Section 111 or those necessary to attain or maintain the NAAQS under Section 110. Accordingly, new sources may in some cases be subject to limitations more stringent than standards of performance under Section 111, and prospective owners and operators of new sources should be aware of this possibility in planning for such facilities.

This regulation will be reviewed four years from the date of promulgation. This review will include an assessment of such factors as the need for integration with other programs, the existence of alternative methods, enforceability, and improvements in emission control technology, and reporting requirements. The reporting requirements in this regulation will be reviewed as required under EPA's sunset policy for reporting requirements in regulations.

Section 317 of the Clean Air Act requires the Administrator to prepare an economic impact assessment for any new source standard of performance under Section 111(b) of the Act. An economic impact assessment was prepared for the proposed regulations and for other regulatory alternatives. All aspects of the assessment were considered in the formulation of the proposed standards to insure that the proposed standards would represent the best system of emission reduction considering costs. The economic impact assessment is included in the Background Information Document.

Dated: December 22, 1980.

Douglas M. Costle,  
Administrator.

It is proposed that 40 CFR Part 60 be amended by adding a new Subpart RR as follows:

**Subpart RR—Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations**

Sec.

- 60.440 Applicability and designation of affected facility.
- 60.441 Definitions and symbols.
- 60.442 Standard for volatile organic compounds.
- 60.443 Compliance provisions.
- 60.444 Performance test procedures.
- 60.445 Monitoring of operations and recordkeeping.
- 60.446 Test methods and procedures.
- 60.447 Reporting requirements.

Authority: Sec. 111, 301(a) of the Clean Air Act as amended (42 U.S.C. 7411, 7601(a)), and additional authority as noted below.

**Subpart RR—Standards of Performance for Pressure Sensitive Tape and Label Surface Coating Operations**

**§ 60.440 Applicability and designation of affected facility.**

(a) The affected facility to which the provisions of this subpart apply is each pressure sensitive adhesive coating line, each release coating line, and each precoat coating line used in the manufacture of pressure sensitive materials.

(b) This subpart applies to any affected facility which begins construction, modification, or reconstruction after [— date of publication in Federal Register].

**§ 60.441 Definitions and symbols.**

(a) Except as otherwise required by the context, terms used in this subpart are defined in the Act, in Subpart A of this part, or in this section as follows:

"Coating applicator" means an apparatus used to apply a surface coating to a continuous web.

"Coating line" means a coating applicator, flashoff area, and oven.

"Coating solids applied" means the solids content of the coated adhesive, release, or precoat as defined by Reference Method 24.

"Flashoff area" means the portion of a coating line after the coating applicator and usually before the oven entrance.

"Fugitive volatile organic compounds" means any volatile organic compounds which are emitted from the coating applicator and flashoff areas and are not emitted in the oven.

"Hood or enclosure" means any device used to capture fugitive volatile organic compounds.

"Oven" means a chamber which uses heat or irradiation to bake cure, polymerize, or dry a surface coating.

"Precoat" means a coating operation in which a primer, lacquer, or tackifying coating (or their equivalent) is applied to a surface as a precursor to the production of a pressure sensitive or release product.

"Pressure sensitive tape and label surface coating operation" means any coating line which coats a continuous web with either pressure sensitive adhesive, release or precoat coatings associated with pressure sensitive products.

"Solvent applied in the coating" means all organic solvent contained in the adhesive, release, and precoat formulations that is metered into the coating applicator from the formulation area.

"Total enclosure" means a structure or building around the coating applicator and flashoff area or the entire coating line for the purpose of confining and totally capturing fugitive VOC emissions.

"Volatile organic compound (VOC)" means any organic compound which is measured by Reference Methods 24 or 25.

(b) All symbols used in this subpart not defined below are given meaning in the Act or in Subpart A of this part.

"a" means the gas stream vents exiting the emission control device.

"b" means the gas stream vents entering the emission control device.

"C<sub>aj</sub>" means the concentration of VOC (carbon equivalent) in each gas stream (j) exiting the emission control device, in parts per million by volume.

"C<sub>bi</sub>" means the concentration of VOC (carbon equivalent) in each gas stream (i) entering the emission control device, in parts per million by volume.

"C<sub>ek</sub>" means the concentration of VOC (carbon equivalent) in each gas stream (k) emitted directly to the atmosphere, in parts per million by volume.

"G" means the calculated weighted average mass (kg) of VOC per mass (kg) of coating solids applied each calendar month.

"M<sub>oi</sub>" means the mass (kg) of VOC per mass (kg) of coating solids applied in each coating (i) used in the calendar month.

"M<sub>r</sub>" means the total mass (kg) of solvent recovered for a calendar month.

"M<sub>si</sub>" means the mass (kg) of coating solids applied in each coating (i) used in the calendar month as measured by the reference method specified in § 60.446(a) or by the coating manufacturer's formulation data.

"Q<sub>ai</sub>" means the volumetric flow rate

of each effluent gas stream (j) exiting the emission control device, in dry standard cubic meters per second.

"Q<sub>bi</sub>" means the volumetric flow rate of each effluent gas stream (i) entering the emission control device, in dry standard cubic meters per second.

"Q<sub>ek</sub>" means the volumetric flow rate of each effluent gas stream (k) emitted to the atmosphere, in dry standard cubic meters per second.

"R" means the overall VOC emission reduction achieved for a calendar month (in percent).

"R<sub>a</sub>" means the required overall VOC emission reduction (in percent).

**§ 60.442 Standard for volatile organic compounds.**

(a) On and after the date on which the performance test required by § 60.8 has been completed each owner or operator subject to this subpart shall—

(1) Cause the discharge into the atmosphere from an affected facility not more than 0.20 kg VOC/kg of coating solids applied as calculated on a weighted average basis for one calendar month; or

(2) Demonstrate for each affected facility:

(i) A 90 percent overall VOC emission reduction as calculated over a calendar month; or

(ii) The percent overall VOC emission reduction specified in § 60.443(b) as calculated over a calendar month.

(b) Any coating line which causes the discharge into the atmosphere of not more than 125 kilograms of VOC per day and 15 megagrams of VOC per year is not considered an affected facility and is not therefore subject to the emission limits of § 60.442(a). If either the 125 kilogram per day limit or the 15 megagram per year limit are exceeded, the coating line shall become an affected facility and will be subject to § 60.442(a) and all its associated subparts.

**§ 60.443 Compliance provisions.**

(a) To determine compliance with § 60.442(1), the owner or operator of the affected facility shall calculate a weighted average of the mass of solvent used per mass of coating solids applied for a one calendar month period according to the following procedures:

(1) Measure the VOC content (kg VOC/kg coating solids applied) of all coatings applied using the reference method specified in § 60.446(a) of this subpart or by using the coating manufacturer's formulation data.

(2) Compute the weighted average by the following equation:

$$G = \frac{\sum_{i=1}^n (M_{oi} \times M_{si})}{\sum_{i=1}^n M_{si}}$$

(3) For each affected facility where the value of G is less than or equal to 0.20 kg VOC per kg of coating solids applied, the affected facility is in compliance with § 60.442(a)(1).

(b) To determine compliance with § 60.442(a)(2), the owner or operator shall calculate the required overall VOC emission reduction according to the following equation:

$$R_q = \left( \frac{G - 0.20}{G} \right) \times 100$$

If  $R_q$  is less than or equal to 90 percent, then the required overall VOC emission reduction is  $R_q$ . If  $R_q$  is greater than 90 percent, then the required overall VOC emission reduction is 90 percent.

(c) Where compliance with the emission limits specified in § 60.442(a)(2) is achieved through the use of a solvent recovery system, the owner or operator shall determine the overall VOC emission reduction for a one calendar month period by the following equation:

$$R = \left[ \frac{M_r}{\sum_{i=1}^n (M_{oi} \times M_{si})} \right] \times 100$$

If the R value is equal to or greater than the  $R_q$  value specified in § 60.443(b), then compliance with § 60.442(a)(2) is demonstrated.

(d) Where compliance with the emission limit specified in § 60.442(a)(2) is achieved through the use of a solvent destruction device, the owner or operator shall determine calendar

monthly compliance by comparing the monthly required overall VOC emission reduction specified in § 60.443(b) to the overall VOC emission reduction demonstrated in the most recent performance test which complied with § 60.442(a)(2). If the monthly required overall VOC emission reduction is less than or equal to the overall VOC reduction of the most recent performance test, the affected facility is in compliance with § 60.442(a)(2).

(e) Where compliance with § 60.442(a)(2) is achieved through the use of a solvent destruction device, the owner or operator shall continuously record the destruction device combustion temperature during coating operations for thermal incineration destruction devices or the gas temperature upstream and downstream of the incinerator catalyst bed during coating operations for catalytic incineration destruction devices. For thermal incineration destruction devices the owner or operator shall report all three hour periods (during actual coating operations) during which the average temperature of the device is more than 28°C (50°F) below the average temperature of the device during the most recent performance test complying with § 60.442(a)(2). For catalytic incineration destruction devices, the owner or operator shall report all three hour periods (during actual coating operations) during which the average temperature of the device immediately before the catalyst bed is more than 28°C (50°F) below the average temperature of the device during the most recent performance test complying with § 60.442(a)(2), and all three hour periods (during actual coating operations) during which the average temperature difference across the catalyst bed is less than 80 percent of the average temperature difference of the device during the most recent performance test complying with § 60.442(a)(2).

(f) After the initial performance test required for all affected facilities under § 60.8, compliance with the VOC emission limitation and percentage reduction requirements under § 60.442 is based on the average emission reduction for one calendar month. A separate performance test is completed at the end of each calendar month after the initial

performance test, and a new calendar month's average VOC emission reduction is calculated to show compliance with the standard.

(g) If a common emission control device is used to recover or destruct solvent from more than one affected facility, the performance of that control device is assumed to be equal for each of the affected facilities. Compliance with § 60.442(a)(2) is determined by the methods specified in § 60.443(c) and § 60.443(e) and is performed simultaneously on all affected facilities.

(h) If a common emission control device is used to recover solvent from an existing facility (or facilities) as well as from an affected facility (or facilities), the overall VOC emission reduction for the affected facility (or facilities), for the purpose of compliance, shall be determined by the following procedures:

(1) The owner or operator of the existing facility (or facilities) shall determine the mass of solvent recovered for a calendar month period from the existing facility (or facilities) prior to the connection of the affected facility (or facilities) to the emission control device.

(2) The affected facility (or facilities) shall then be connected to the emission control device.

(3) The owner or operator shall determine the total mass of solvent recovered from both the existing and affected facilities over a calendar month period. The mass of solvent determined in paragraph (h) (1) of this section from the existing facility shall be subtracted from the total mass of recovered solvent to obtain the mass of solvent recovered from the affected facility (or facilities). The overall VOC emission reduction of the affected facility (or facilities) can then be determined as specified in § 60.443(c).

(i) If a common emission control device is used to destruct solvent from an existing facility (or facilities) as well as from an affected facility (or facilities), the overall VOC emission reduction for the affected facility (or facilities), for the purpose of compliance, shall be determined by the following procedures:

(1) The owner or operator shall operate the emission control device with both the existing and affected facilities connected.

(2) The concentration of VOC (in parts per million by volume) after the common emission control device shall be determined as specified in § 60.444(c). This concentration is used in the calculation of compliance for both the existing and affected facilities.

(3) The volumetric flow out of the common control device attributable to the affected facility (or facilities) shall be calculated as a weighted average of the volumetric flows into the control device from the affected facility (or facilities) and the existing facility (or facilities). Compliance is determined by the use of the equation specified in § 60.444(c).

#### § 60.444 Performance test procedures.

(a) The performance test for affected facilities complying with § 60.442(a) without the use of add-on controls shall be identical to the procedures specified in 60.443(a).

(b) The performance test for affected facilities controlled by a solvent recovery device shall be conducted as follows:

(1) The performance test will consist of one calendar month run and not the average of three runs as specified in § 60.8(f).

(2) The weighted average mass of VOC per mass of coating solids applied for a one calendar month period shall be determined as specified in § 60.443(a)(1) and § 60.443(a)(2).

(3) Calculate the required overall VOC emission reduction as specified in § 60.443(b).

(4) Inventory solvent usage and solvent recovery for a one calendar month period.

(5) Determine the performance of the solvent recovery device as specified in § 60.443(c).

(c) The performance test for affected facilities controlled by a solvent destruction device shall be conducted as follows:

(1) The weighted average mass of VOC per mass of coating solids applied for a one calendar month period shall be determined as specified in § 60.443(a)(1) and § 60.443(a)(2).

(2) Calculate the required overall VOC emission reduction as specified in § 60.443(b).

(3) Determine the performance of the solvent destruction device by the following procedures:

$$R = \frac{\sum_{i=1}^n (Q_{bi} \times C_{bi}) - \sum_{j=1}^m (Q_{aj} \times C_{aj})}{\sum_{i=1}^n (Q_{bi} \times C_{bi}) + \sum_{k=1}^k (Q_{fk} \times C_{fk})} \times 100$$

(i) The owner or operator of the affected facility shall construct the overall VOC emission reduction system so that all volumetric flow rates and total VOC emissions can be accurately determined by the applicable test methods and procedures specified in § 60.446(b).

(ii) The owner or operator of an affected facility shall construct a temporary total enclosure around the coating line applicator and flashoff area during the performance test for the purpose of capturing fugitive VOC emissions. If a permanent total enclosure exists in the affected facility prior to the performance test and the Administrator is satisfied that the enclosure is totally capturing fugitive VOC emissions, then no additional total enclosure will be required for the performance test.

(iii) For each affected facility where the value of R is greater than or equal to the value of  $R_a$  calculated in § 60.443(b), compliance with § 60.442(a)(2) is demonstrated.

(iv) The performance of the solvent destruction device shall be determined by averaging the results of three runs as specified in § 60.8(f).

(Sec. 114 of the Clean Air Act as amended (42 U.S.C. 7414))

#### § 60.445 Monitoring of operations and recordkeeping.

(a) The owner or operator of an affected facility subject to this subpart shall maintain a calendar month record of all coatings used and the results of the reference test method specified in § 60.446(a) or the manufacturer's formulation data used for determining the VOC content of those coatings.

(b) The owner or operator of an affected facility controlled by a solvent

recovery device shall maintain a calendar month record of the amount of solvent applied in the coating at each affected facility.

(c) The owner or operator of an affected facility controlled by a solvent recovery device shall install, calibrate, maintain, and operate a monitoring device for indicating the cumulative amount of solvent recovered by the device over a calendar month period. The monitoring device shall be accurate within  $\pm 2.0$  percent. The owner or operator shall maintain a calendar month record of the amount of solvent recovered by the device.

(d) The owner or operator of a coating line operating at the conditions specified in § 60.442(b) shall maintain a daily and yearly record of the amount of solvent applied in the coating at the facility.

(e) The owner or operator of an affected facility controlled by a thermal incineration solvent destruction device shall install, calibrate, maintain, and operate a monitoring device which continuously indicates and records the temperature of the solvent destruction device's exhaust gases. The monitoring device shall have an accuracy of the greater of  $\pm 0.75$  percent of the temperature being measured expressed in degrees Celsius or  $\pm 2.5^\circ\text{C}$ .

(f) The owner or operator of an affected facility controlled by a catalytic incineration solvent destruction device shall install, calibrate, maintain, and operate a monitoring device which continuously indicates and records the gas temperature both upstream and downstream of the catalyst bed.

(g) The owner or operator of an affected facility controlled by a solvent destruction device which uses a hood or enclosure to capture fugitive VOC emissions shall install, calibrate, maintain, and operate a monitoring device which continuously indicates that the hood or enclosure is operating. No continuous monitor shall be required if the owner or operator can demonstrate that the hood or enclosure system is interlocked with the affected facility's oven recirculation air system.

(Sec. 114 of the Clean Air Act as amended (42 U.S.C. 7414))

**§ 60.446 Test methods and procedures.**

(a) The VOC content per unit of coating solids applied and compliance with § 60.442(a)(1) shall be measured by either Reference Method 24 or manufacturers' formulation data. In the event of any inconsistency between a Method 24 test and manufacturers' formulation data, the Method 24 test will govern. The Administrator may require an owner or operator to perform Method 24 tests during such months as he deems appropriate.

(1) For Reference Method 24, the coating sample must be a one liter sample taken at a point which will be representative of the coating applied to the web substrate. The one liter sample is to be divided into three aliquots for triplicate analyses.

(b) Reference Method 25 shall be used to determine the VOC concentration, in parts per million by volume, of each effluent gas stream entering and exiting the solvent destruction device or its equivalent, and each effluent gas stream emitted directly to the atmosphere. Reference Methods 1, 2, 3, and 4 shall be used to determine the sampling location, volumetric flow rate, molecular weight, and moisture of all sampled gas streams. For Reference Method 25, the sampling time for each of three runs must be at least one hour. The minimum sampling volume must be 0.003 dscm except that shorter sampling times or smaller volumes, when necessitated by process variables or other factors, may be approved by the Administrator.

(c) If the owner or operator can demonstrate to the Administrator's satisfaction that testing of representative stacks yields results comparable to those that would be obtained by testing all stacks, the Administrator will approve testing of representative stacks on a case-by-case basis.

(Sec. 114 of the Clean Air Act as amended (42 U.S.C. 7414))

**§ 60.447 Reporting requirements.**

(a) For all affected facilities, the performance test data from the initial performance test are submitted to the Administrator.

(b) The owner or operator of a coating line operated at the conditions specified in § 60.442(b) shall report the total

amount of the solvent applied in the coating for each operating day. Every fourth quarter the yearly amount of solvent applied in the coating shall be reported.

(c) For affected facilities complying with § 60.442 without solvent recovery or solvent destruction devices the weighted average VOC content for each calendar month as specified in § 60.443(a)(2) shall be reported to the Administrator.

(d) For all affected facilities complying with § 60.442 by using a solvent recovery device, the following information shall be reported to the Administrator for each calendar month.

(1) The required overall emission reduction specified in § 60.443(b).

(2) The demonstrated overall emission reduction as specified in § 60.443(c).

(e) For all affected facilities complying with § 60.442 by using a solvent destruction device, the following information shall be reported to the Administrator for each calendar month.

(1) The required overall emission reduction specified in § 60.443(b).

(2) The overall emission reduction demonstrated during the most recent performance test which complied with § 60.442.

(3) All periods of temperature drop as defined under § 60.443(f).

(f) The owner or operator of an affected facility shall submit the written reports required under paragraphs (a) and (b) of this section to the Administrator for every calendar quarter. All quarterly reports shall be postmarked by the 30th day following the end of each calendar quarter.

(g) The owner or operator of an affected facility shall submit the written reports required under paragraphs (c), (d), and (e) of this section to the Administrator within ten days following the end of the calendar month being reported only if:

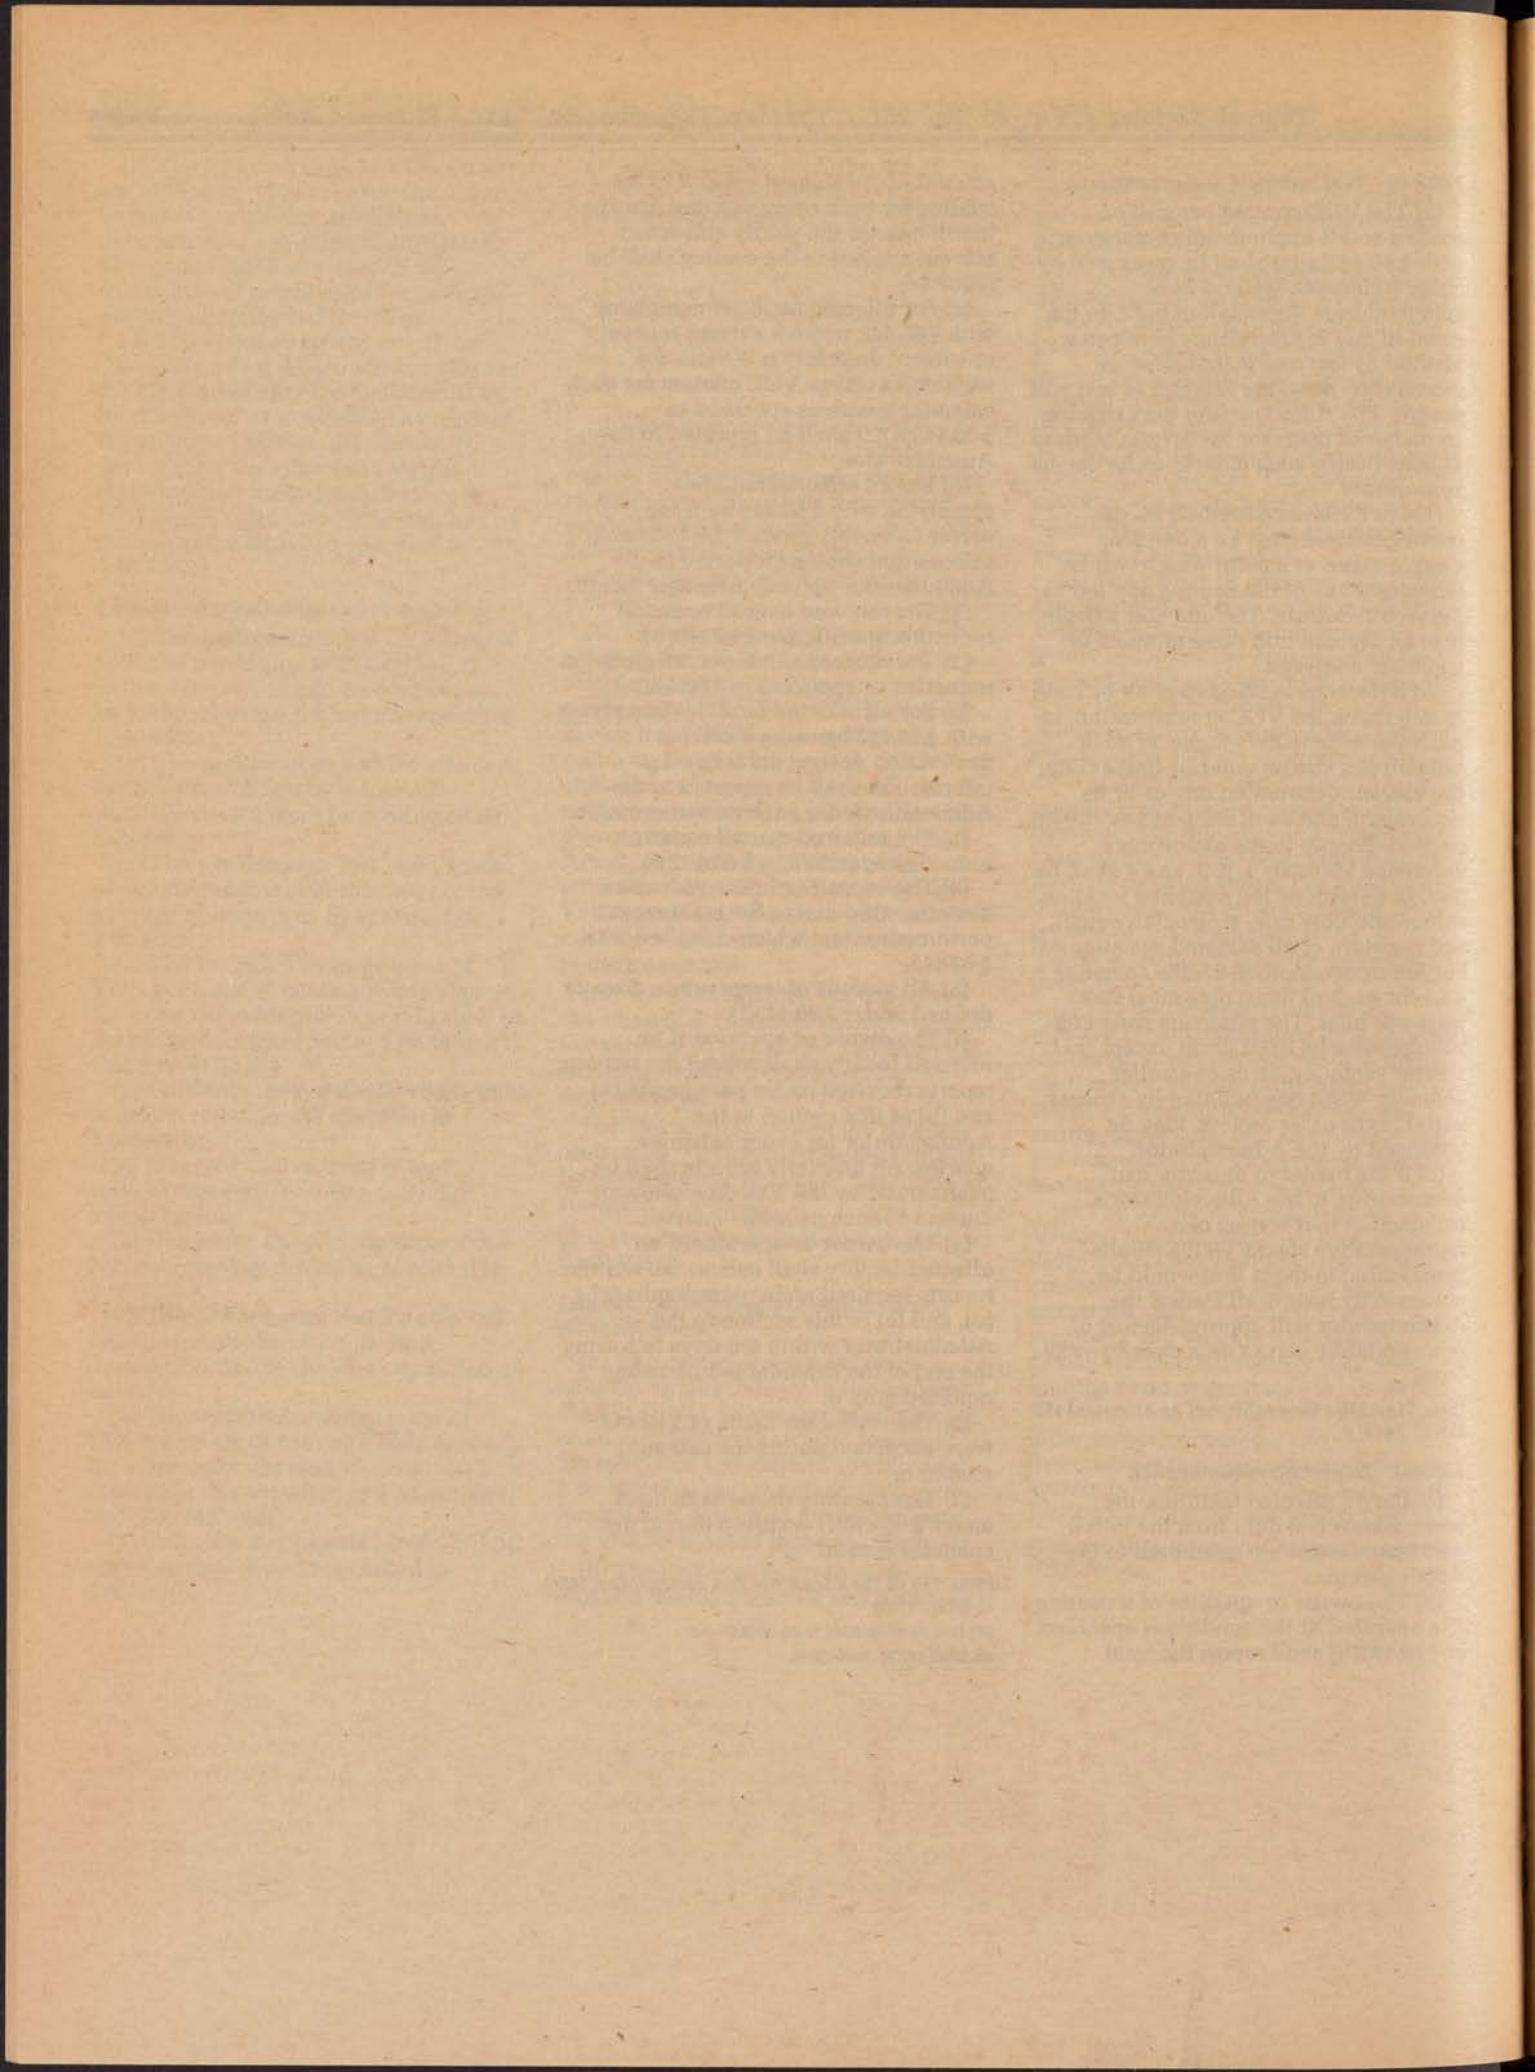

(1) The emissions limits of § 60.442 were exceeded during the calendar month; or

(2) Temperature drops as defined under § 60.443(f) occurred during the calendar month.

(Sec. 114 of the Clean Air Act as amended (42 U.S.C. 7414))

Nomenclature and Technical Amendments

## DEPARTMENT OF EDUCATION

## Office of the Secretary

34 CFR Subtitle A and Subtitle B,  
Chapters I-VIINomenclature and Technical  
Amendments

AGENCY: Department of Education.

ACTION: Final regulations.

**SUMMARY:** This document makes nomenclature and technical amendments in regulations transferred to Title 34 of the Code of Federal Regulations. These changes are necessary to update the Code of Federal Regulations to reflect the shift of responsibility for these programs to the Department of Education.

EFFECTIVE DATE: December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** A. Neal Shedd, Director, Division of Regulations Management, 400 Maryland Avenue, S.W., Room 2129, Washington, D.C. 20202. Telephone: (202) 245-7091.

**SUPPLEMENTARY INFORMATION:** The Department of Education (ED) published on November 21, 1980, at 45 FR 77368, a final rule for the transfer and redesignation of ED regulations in Title 34 of the Code of Federal Regulations.

This final rule makes the specific and general nomenclature and technical amendments necessary in the regulations redesignated on November 21, 1980, as well as specific amendments correcting Part 106, published on May 9, 1980 at 45 FR 30955. Specific changes are listed before general changes. All changes are made in the order that they appear in the list. Unless otherwise specified, general changes apply to 34 CFR Parts 75 through 796 inclusive.

The publication of this document as a proposed rule for public comment is unnecessary because it contains only the nomenclature and technical amendments described above. No substantive changes are made in the regulations.

(Department of Education Organization Act, Pub. L. 96-88, Oct. 17, 1979, 93 Stat. 668 (20 U.S.C. 3401 *et. seq.*))

(Catalog of Federal Domestic Assistance, Number not applicable.)

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

Accordingly, 34 CFR Parts 75 through 796 inclusive are amended as follows:

1. Title 34 CFR, Subtitle A is amended by adding the following note after each of the following sections: 75.734, 75.741, 76.101, 76.103, 76.301, 76.401, 76.705, 76.706, 76.734, 76.741, 76.783, and 99.1: (Note: This section is based on a provision in the General Education Provisions Act (GEPA). Section 427 of the Department of Education Organization Act (DEOA), 20 U.S.C. 3487, provides that except to the extent inconsistent with the DEOA, the GEPA "shall apply to functions transferred by this Act to the extent applicable on the day preceding the effective date of this Act." Although standardized nomenclature is used in this section to reflect the creation of the Department of Education, there is no intent to extent the coverage of the GEPA beyond that authorized under Section 427 or other applicable law.)

1a. The undesignated introductory material preceding Part 75 is removed.

2. Wherever they appear in 34 CFR Part 75, the following terms are changed to "the Secretary" in the order listed:

*Old nomenclature—New nomenclature*

Each appropriate official of the Education Division—the Secretary  
The Appropriate official of the Education Division—the Secretary  
The Appropriate official—the Secretary  
The official—the Secretary.

2a. The following table lists the part number for Title 34 of the Code of Federal Regulations, the prior Catalog of Federal Domestic Assistance (CFDA) number, and the new CFDA number effective on September 15, 1980. The part numbers are listed in order by the ED Staff Offices. Parts 75 and 76 are amended by changing all references to the old CFDA numbers in accordance with the table.

**PART 75—DIRECT PROTECT GRANT  
AND CONTRACT PROGRAMS**

**§ 75.100 [Amended]**

3. Section 75.100 is amended by removing the note following the citation of authority for the section.

4. Section 75.220 is amended by revising paragraph (b)(3) to read as follows:

**§ 75.220 Procedures the Department uses under § 75.219(a).**

\* \* \* \* \*

(b) \* \* \*

(3) A Department employee who is not a program officer of the program but who is qualified to evaluate the application.

\* \* \* \* \*

5. Section 75.221 is amended by revising paragraph (b)(1)(iii) to read as follows:

**§ 75.221 Procedures the Department uses under § 75.219(b).**

\* \* \* \* \*

(b) \* \* \*

(1) \* \* \*

(iii) A Department employee who is not a program officer for any of the programs under which the applicant wants funds but who is qualified to review the application.

\* \* \* \* \*

6. Section 75.59 is revised to read as follows:

**§ 75.591 Federal evaluation—cooperation by a grantee.**

A grantee shall cooperate in any evaluation of the program by the Secretary.

(20 U.S.C. 1226c, 1231a)

7. Section 75.620 is amended by revising paragraph (b) to read as follows:

**§ 75.620 General conditions on publication.**

\* \* \* \* \*

(b) *Required Statement.* The grantee shall ensure that any publication that contains project materials also contains the following statements:

"The contents of this (insert type of publication; e.g., book, report, film) were developed under a grant from the Department of Education. However, those contents do not necessarily represent the policy of the Department of Education, and you should not assume endorsement by the Federal Government."

(20 U.S.C. 3474)

8. Section 75.626 is amended by revising paragraph (a) to read as follows:

**§ 75.626 Show Federal support; give papers to vest title.**

(a) Any patent application filed by a grantee for an invention made under a grant must include the following statement in the first paragraph:

"The invention described in this application was made under a grant from the Department of Education."

\* \* \* \* \*

9. Section 75.720 is amended by revising paragraph (b) to read as follows:

**§ 75.720 Financial and performance reports.**

\* \* \* \* \*

(b) A grantee shall submit these reports annually, unless the Secretary allows less frequent reporting. However, the Secretary may require a grantee of the National Institute of Education to submit performance reports more often than annually.

\* \* \* \* \*

10. Section 75.901 is amended by removing and reserving paragraph (a), removing paragraph (c), and revising paragraph (b) to read as follows:

**§ 75.901 Suspension and termination.**

(a) [Reserved]

(b) The Secretary may use the Education Appeal Board to resolve disputes that are not subject to other procedures. Cross-reference: See the following sections in Part 74:

- (1) Section 74.113 (Violation of terms).
- (2) Section 74.114 (Suspension).
- (3) Section 74.115 (Termination).
- (4) The last sentence of § 74.73(c) (Financial reporting after a termination).
- (5) Section 74.112 (Amounts payable to the Federal Government).

(20 U.S.C. 1221e-3(a)(1))

**§ 75.902 [Removed]**

- 11. Section 75.902 is removed.
- 12. Section 75.903 is amended by revising paragraph (c) to read as follows:

**§ 75.903 Effective date of termination.**

(c) The date of a final decision of the Secretary under Part 78 of this title.

(20 U.S.C. 3474)

**PART 76—STATE-ADMINISTERED PROGRAMS**

- 13. Section 76.591 is revised to read as follows:

**§ 76.591 Federal evaluation—cooperation by a grantee.**

A State and subgrantee shall cooperate in any evaluation of a program by the Secretary.

(20 U.S.C. 1226c, 1231a, 3474)

- 14. Section 76.600 is amended by revising paragraph (b) to read as follows:

**§ 76.600 Where to find construction regulations.**

(b) The State shall perform the functions that the Secretary performs under §§ 75.602 (Preservation of historic sites) and 75.605 (Approval of drawings and specifications) of this title.

- 15. The title of Part 77 is revised to read as follows:

**PART 77—DEFINITIONS THAT APPLY TO DEPARTMENT REGULATIONS**

16. Section 77.1 is amended by removing and reserving paragraph (a), removing the definition of "HEW" from paragraph (b) and the definitions of "Appropriate official of the Education Division," "Assistant Secretary," "Commissioner," and "Education Division" from paragraph (c), and revising the introductory text and indicated terms in paragraphs (b) and (c) to read as follows:

**§ 77.1 Definitions that apply to all Department programs.**

- (a) [Reserved]
- (b) Unless a statute or regulation provides otherwise, the following

definitions in Part 74 of this title apply to the regulations in Title 34 of the Code of Federal Regulations. The section of Part 74 that contains the definition is given in parentheses.

(c) Unless a statute or regulation provides otherwise, the following definitions also apply to the regulations in this title:

"Department" means the U.S. Department of Education.

"ED" means the U.S. Department of Education.

"EDGAR" means the Education Department General Administrative Regulations (34 CFR Parts 74, 75, 76, 77, and 78).

"Secretary" means the Secretary of the Department of Education or an official or employee of the Department acting for the Secretary under a delegation of authority.

**§ 77.2 [Removed]**

- 17. Section 77.2 is removed.

**PART 106—NONDISCRIMINATION ON THE BASIS OF SEX IN EDUCATION PROGRAMS AND ACTIVITIES RECEIVING OR BENEFITING FROM FEDERAL FINANCIAL ASSISTANCE**

**§ 106.4 [Amended]**

(a) In § 106.4 paragraph (a) is revised by changing the reference "\$86.3(a)" to read "\$ 106.3(a)".

- 18. Section 106.11 is revised to read as follows:

**§ 106.11 Application.**

Except as provided in this subpart, this Part 106 applies to every recipient and to each education program or activity operated by such recipient which receives or benefits from Federal financial assistance.

(Secs. 901, 902, Education Amendments of 1972, 86 Stat. 373, 374; 20 U.S.C. 1681, 1682)

- 19. Section 106.15 is amended by revising paragraph (b) to read as follows:

**§ 106.15 Admissions.**

(b) *Administratively separate units.* For the purposes only of this section, §§ 106.16 and 106.17, and Subpart C, each administratively separate unit shall be deemed to be an educational institution.

20. Section 200.1 is amended by revising paragraph (b) to read as follows:

**PART 200—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES AND STATE AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF EDUCATIONALLY DEPRIVED, HANDICAPPED, MIGRANT, AND NEGLECTED AND DELINQUENT CHILDREN—GENERAL PROVISIONS**

**§ 200.1 Applicability.**

(b) *Education Department General Administrative Regulations.* Assistance provided under this part is subject to Parts 76 and 77 of this title.

**§ 200.2 [Amended]**

21. In § 200.2 paragraph (b) is amended by removing the word "Commissioner" from the list of terms.

- 22. Section 201.1 is amended by revising paragraph (b) to read as follows:

**PART 201—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF EDUCATIONALLY DEPRIVED AND NEGLECTED AND DELINQUENT CHILDREN**

**§ 201.1 Applicability.**

(b) Assistance under this part is subject to the Educational Department General Administrative Regulations in Parts 76 and 77 of this title.

**PART 204—GRANTS TO STATE EDUCATIONAL AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF MIGRATORY CHILDREN**

- 23. Section 204.12 is amended by revising paragraph (b)(12) to read as follows:

**§ 204.12 What provisions are required in a State's annual program plan?**

(b) \* \* \* (12) *Monitoring and enforcement.* An SEA shall include in its plan a monitoring and enforcement plan (in the format prescribed by the Secretary) or an appropriate reference to a currently approved plan on file with the Secretary.

- 24. In § 208.4 paragraph (b) is amended by removing "Commissioner" from the list of defined terms.

25. Section 208.10 is amended by revising paragraph (e) to read as follows:

**PART 208—STRENGTHENING STATE EDUCATIONAL AGENCY MANAGEMENT**

§ 208.10 State plan.

(e) The SEA may submit amendments to its title V-B State plan so long as they conform to the requirements for amendments in Parts 75 or 76 of this title, whichever is applicable.

(20 U.S.C. 3162 and 30984 (a)(12))

**PART 209—ADMINISTRATION OF EDUCATION PROGRAMS AND DUTIES OF THE STATE EDUCATIONAL AGENCY**

26. In § 209.4 paragraph (b) is amended by removing "Commissioner" from the list of defined terms.

27. Section 219.1 is amended by revising paragraph (c) to read as follows:

**PART 219—SCHOOL CONSTRUCTION ASSISTANCE IN CASES OF CERTAIN DISASTERS**

§ 219.1 Definitions.

(c) "Disaster review team" means a group comprised of representatives of the Department, Office of Facilities Engineering and Property Management, the State educational agency (when available), and local educational agencies.

(20 U.S.C. 646)

**PART 220—ASSISTANCE FOR CURRENT SCHOOL EXPENDITURES IN CASES OF CERTAIN DISASTERS**

27a. Section 220.1 is amended by revising paragraph (d) to read as follows:

§ 220.1 Definitions.

(d) "Disaster review team" means a group comprised of representatives of the Department, Office of Facilities Engineering and Property Management, the State educational agency (when available), and local educational agencies.

(20 U.S.C. 2141-1(a))

**PART 221—ASSISTANCE FOR SCHOOL CONSTRUCTION IN AREAS AFFECTED BY FEDERAL ACTIVITIES**

28. Section 221.64 is amended by revising paragraph (b) to read as follows:

§ 221.64 Disposal of federally owned temporary school facilities provided under section 9.

(b) The Secretary may, as appropriate, declare temporary school facilities surplus to the needs of the local educational agency and may dispose of the facilities.

(20 U.S.C. 639)

29. Part 221, Appendix A, paragraph (a)(1) of section 2.7 is amended by removing the words "of the Department of Health, Education, and Welfare".

**PART 222—ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES AND ARRANGEMENTS FOR EDUCATION OF CHILDREN WHERE LOCAL EDUCATIONAL AGENCIES CANNOT PROVIDE SUITABLE FREE PUBLIC EDUCATION**

§ 222.70 [Amended]

29a. Section 222.70 is amended by revising the references in paragraph (a) as follows:

Change "45 CFR Part 84 ff" to "34 CFR Part 104 ff".

Change "45 CFR Part 121 ff" to "34 CFR Part 300 ff".

Change "45 CFR Part 116" to "34 CFR Part 200".

30. Section 222.83 is amended by revising paragraph (c) to read as follows:

§ 222.83 Monitoring.

(c) If the Department has already audited an applicant's section 5(e) program or project, it is not expected that the State educational agency would audit the same program or project.

31. In Parts 361, 362, 369, and 370 the phrase "Rehabilitation Services Administration" is changed to "Department", except in sections 361.86(c)(2) and 370.2(a).

**PART 361—THE STATE VOCATIONAL REHABILITATION PROGRAM**

§ 361.1 [Amended]

32. Section 361.1 is amended by removing paragraphs (e), (v), and (hh).

§ 361.15 [Amended]

33. Section 361.15(b) is amended by changing the references to "Part 70 of

this title" to "45 CFR Part 70" and "§ 70.4 of this title" to "45 CFR 70.4".

§ 361.151 [Amended]

34. Section 361.151(f) is amended by changing the reference to "Part 46 of this title" to "45 CFR Part 46".

**PART 362—PROJECT GRANTS AND OTHER ASSISTANCE IN VOCATIONAL REHABILITATION**

§ 362.1 [Amended]

35. In § 362.1 paragraph (a) is amended by removing "Commissioner", "Department", and "Secretary" from the list of defined terms.

§ 362.14 [Removed]

36. Section 362.14 is removed.

§ 362.19 [Amended]

37. Section 362.19 is amended by changing "Assistant Secretary for Health, Department of Health, Education, and Welfare" to "Secretary".

§ 362.24 [Amended]

38. Section 362.24 is amended by changing the reference to "Part 46 of this title" to "45 CFR Part 46."

**PART 369—VENDING FACILITY PROGRAM FOR THE BLIND ON FEDERAL AND OTHER PROPERTY**

§ 369.1 [Amended]

39. Section 369.1 is amended by removing and reserving paragraphs (e) and (r).

40. Section 526.612 is amended by revising paragraph (b) to read as follows:

§ 526.612 Eligible programs.

(b) In-service and developmental programs designed to enable instructional and ancillary personnel to continue to improve their qualifications while participating in bilingual vocational training programs; fellowships or traineeships for persons engaged in activities described in paragraphs (a) and (b) of this section are an allowable cost. A fellowship is an award to an individual student made by the Department. A traineeship is an award to an institution for student support (stipends or allowances) and for institutional support (either in a predetermined amount or based on actual costs).

(Secs. 186, 187; 20 U.S.C. 2416, 2417)

**PART 537—INDOCHINA REFUGEE CHILDREN ASSISTANCE****§ 537.3 [Amended]**

41. In § 537.3 paragraph (b) is amended by removing "Commissioner" from the list of defined terms.

42. Section 537.4 is amended by revising paragraph (b) to read as follows:

**§ 537.4 How does a State apply for funds?**

(b) A State application, as required by section 205(a) of the Act and by Part 76 of this title.

(20 U.S.C. 1232d)

43. Section 603.4 is revised to read as follows:

**PART 603—COMMISSIONER'S RECOGNITION PROCEDURES FOR NATIONAL ACCREDITING BODIES AND STATE AGENCIES****§ 603.4 Inclusion on list.**

Any accrediting agency or association which desires to be listed by the Secretary as meeting the criteria set forth in § 603.6 should apply in writing to the Director, Division of Eligibility and Agency Evaluation, Office of Postsecondary Education, Department of Education, Washington, D.C. 20202.

(20 U.S.C. 1141(a))

44. Section 603.22 is revised to read as follows:

**§ 603.22 Inclusion on list.**

Any State agency which desires to be listed by the Secretary as meeting the criteria set forth in § 603.24 should apply in writing to the Director, Division of Eligibility and Agency Evaluation, Office of Postsecondary Education, Department of Education, Washington, D.C. 20202.

(20 U.S.C. 1087-1(b))

**PART 614—COLLEGE HOUSING PROGRAMS ADMINISTERED BY THE DEPARTMENT OF EDUCATION****§ 614.1 [Amended]**

45. Section 614.1 is amended by removing paragraph (g) and redesignating paragraph (h) as paragraph (g).

46. Section 614.4 is amended by revising paragraph (a) to read as follows:

**§ 614.4 Applications.**

(a) Applications will be received periodically and considered concurrently for both the direct loan and grant subsidy programs. In order to maintain flexibility in the allocation of

available funds, ED reserves the option to approve either a direct loan or a grant to a particular applicant.

**§ 614.60 [Amended]**

47. Section 614.60 is amended by removing the definition of "Field Office".

**§ 614.62 [Amended]**

48. Section 614.62 is amended by changing "the appropriate HUD Field Office" and "the appropriate Field Office" to "ED" wherever they appear.

49. Part 614 is amended by removing and reserving Subparts B and C, reserving Subpart D, and by changing "HUD" to "ED" wherever it appears in Subparts A, E, and F.

50. Part 655, Appendix, Chapter II, paragraph (a) of section 1.2 is amended by changing the words "Office" to "Department" and "Bureau" to "Office".

**PART 655—MODERN FOREIGN LANGUAGE AND AREA STUDIES**

51. Part 655, Appendix, Chapter V, section 1.1 is amended by changing the reference to "41 CFR 3-4.5202-1(b)" to "41 CFR 34-4.5202-1(b)".

**PART 675—COLLEGE WORK-STUDY AND JOB LOCATION AND DEVELOPMENT PROGRAM**

52. Part 675, Appendix B is amended by changing "Department of Health, Education, and Welfare" to "Department of Education" wherever it appears.

**PART 682—GUARANTEED STUDENT LOAN PROGRAM****§ 682.200 [Amended]**

53. Section 682.200 is amended by removing the definitions of "Commissioner", "Nonprofit institution", and "State".

54. Section 682.600 is amended by revising paragraph (a)(1) to read as follows:

**§ 682.600 Participation agreement between an eligible school and the Secretary.**

(a) \* \* \*

(1) Establish its basic eligibility as an institution of higher education or vocational school, as defined in § 682.200, through certification by the Division of Eligibility and Agency Evaluation, Office of Postsecondary Education, Department of Education; and

55. Section 695.8 is revised to read as follows:

**PART 695—INCENTIVE GRANTS FOR STATE STUDENT FINANCIAL ASSISTANCE TRAINING PROGRAM****§ 695.8 State matching requirements.**

The Federal funds expended under this part must be matched by an equal amount of State funds. In satisfying this matching requirement, the State is subject to Part 74 of this title. The matching must be from non-federal sources and may be cash or in kind. The State shall maintain supporting records to indicate the amount and sources of such matching.

(20 U.S.C. 1088b-3)

**PART 700—GENERAL****§ 700.1 [Amended]**

56. Section 700.1 is amended by removing the definitions of "Director" and "Institute".

57. Section 700.2 is amended by revising paragraph (a)(2) to read as follows:

**§ 700.2 Regulations that apply to programs of the National Institute of Education.**

(a) \* \* \*

(2) The regulations in this Chapter VII.

58. Section 726.03 is amended by removing the definition of "Administrator."

59. Part 726 is amended by changing the term "Administrator" to "Secretary" wherever it appears.

60. Section 730.1 is revised to read as follows:

**PART 730—SUPPORT FOR IMPROVEMENT OF POSTSECONDARY EDUCATION****§ 730.1 Purpose.**

The purpose of the regulations in this part is to implement the provisions of Title X of the Higher Education Act of 1965, which provides for grants to, and contracts with, institutions of postsecondary education and other public and private educational institutions and agencies to improve postsecondary educational opportunities. The program is administered by the Fund for the Improvement of Postsecondary Education, a unit within the Office of the Assistant Secretary for Educational Research and Improvement of the Department of Education, with the advice of a Board of Advisors.

(20 U.S.C. 1135)

**PART 770—LIBRARY SERVICES,  
PUBLIC LIBRARY CONSTRUCTION,  
AND INTERLIBRARY COOPERATION**

**§ 770.3 [Amended]**

60a. Section 770.3 is amended by removing "Commissioner" from the list of defined terms.

61. Section 795.1 is amended by revising paragraph (a)(2) to read as follows:

**PART 795—STATE DISSEMINATION  
GRANTS PROGRAM**

**§ 795.1 Regulations that apply to the State  
Dissemination Grants Program.**

(a) \*\*\*

(2) The general provisions for NIE grants in 34 CFR Parts 700-702.

62. Section 795.5 is amended by revising paragraphs (a)(7) and (b)(2) to read as follows:

**§ 795.5 Types of awards; funding  
requirements.**

(a) \*\*\*

(7) Each application must show an SEA contribution, in funds or in kind, to be included from the commencement of the project, in accordance with 34 CFR Part 74.

(b) \*\*\*

(2) Salary cost of regular SEA staff properly attributable to the carrying out of the project will be considered an in kind SEA contribution to the project, in accordance with Part 74 of this title.

63. Wherever they appear in the Parts 75 through 796 inclusive, excluding Parts 99, 100, 101, 104, and 106, the terms listed are changed as follows:

*Old nomenclature—New nomenclature*

U.S. Office of Education—Department

U.S.O.E.—ED

OE—ED

O.E.—ED

An Education Division—a Department

An Office of Education—a Department

Education Division General Administrative

Regulations—Education Department

General Administrative Regulations

Education Division—Department

Secretary of Health, Education, and

Welfare—Secretary

Secretary of the Department of Health,

Education, and Welfare—Secretary

Assistant Secretary for Education—Secretary

U.S. Commissioner of Education—Secretary

United States Commissioner of Education—

Secretary

41 CFR Chapters 1 and 3—41 CFR Chapters 1 and 34.

64. Wherever they appear in 34 CFR Parts 700, 701, 702, 703, 705, 708, 710, 714, 716, 718, 720, and 795 the terms listed are changed as follows:

*Old nomenclature—New nomenclature*

Director—Secretary

Institute—Department

NIE—ED

National Institute of Education—Department.

65. Wherever it appears in Parts 75 through 796 inclusive, excluding Parts 99, 100, 101, 104, and 106, the term "Office of Education" is changed to "Department," except in: the *Comment* following § 300.303, § 662.12(d), § 662.22(d), § 662.32(c), § 662.42(c), Appendix D to Part 674, and the Appendix to Part 793.

66. Wherever it appears in Parts 75 through 796 inclusive, excluding Parts 99, 100, 101, 104, and 106, the term "Commissioner" is changed to "Secretary", except in the Appendix to Part 793.

67. Wherever it appears in Parts 75 through 796 inclusive, excluding Parts 99, 100, 101, 104, and 106, the term "HEW" is changed to "ED", except in § 215.2 where it is changed to "HHS".

68. Wherever it appears in the Parts 75 through 796 inclusive, excluding Parts 99, 100, 101, 104, and 106, the term "Commissioner of Education" is changed to "Secretary", except in the *Comment* following § 300.307.

69. The sections in former 45 CFR Part 105 which were redesignated as 34 CFR Parts 408, 525, 526, and 527 at 45 FR 77368 (November 21, 1980) are renumbered as follows:

*Old sections—New sections*

105.1-105.504 (Appendices A, B)—408.1-

408.504 (Appendices A, B)

105.601-105.607—525.601-525.607

105.611-105.617—526.611-526.617

105.621-105.627—527.621-527.627.

70. An authority citation for 34 CFR Parts 525, 526, and 527 is added to read as follows:

Authority: Secs. 101-195 of Title II of Pub. L. 94-482 as further amended by Pub. L. 95-40 (20 U.S.C. 2301 to 2461), unless otherwise noted.

**PART 525—BILINGUAL VOCATIONAL  
TRAINING PROGRAM**

71. Section 525.601 is revised to read as follows:

**§ 525.601 Purpose.**

The purpose of the bilingual vocational training program is to prepare persons of limited English-speaking ability to perform adequately in an environment requiring English language skills and to fill the critical need for more and better trained persons in occupational categories vital to both the persons and the economy. Funds available to the Secretary pursuant to section 183 of Part B of Title

I of the Vocational Education Act of 1963, as amended by section 202 of Title II of the Education Amendments of 1976, Pub. L. 94-482 (referred to as "the Act") may be used for making grants or contracts for bilingual vocational training programs.

(Sec. 181; 20 U.S.C. 2411; Conf. Rept. No. 94-1701, p. 228)

72. Section 526.611 is revised to read as follows:

**PART 526—BILINGUAL VOCATIONAL  
INSTRUCTOR TRAINING PROGRAM**

**§ 526.611 Purpose.**

The purpose of the bilingual vocational instructor training program is to provide training programs to meet the critical shortage of instructors possessing both the job knowledge and skills and the dual language capabilities required for adequate instruction of persons handicapped by their limited English-speaking ability. Funds available to the Secretary pursuant to section 183 of Part B of Title I of the Vocational Education Act of 1963, as amended by section 202 of Title II of the Education Amendments of 1976, Pub. L. 94-482 (referred to as "the Act") may be used for making grants or contracts for bilingual vocational instructor training programs.

(Sec. 186; 20 U.S.C. 2416)

73. Section 527.621 is revised to read as follows:

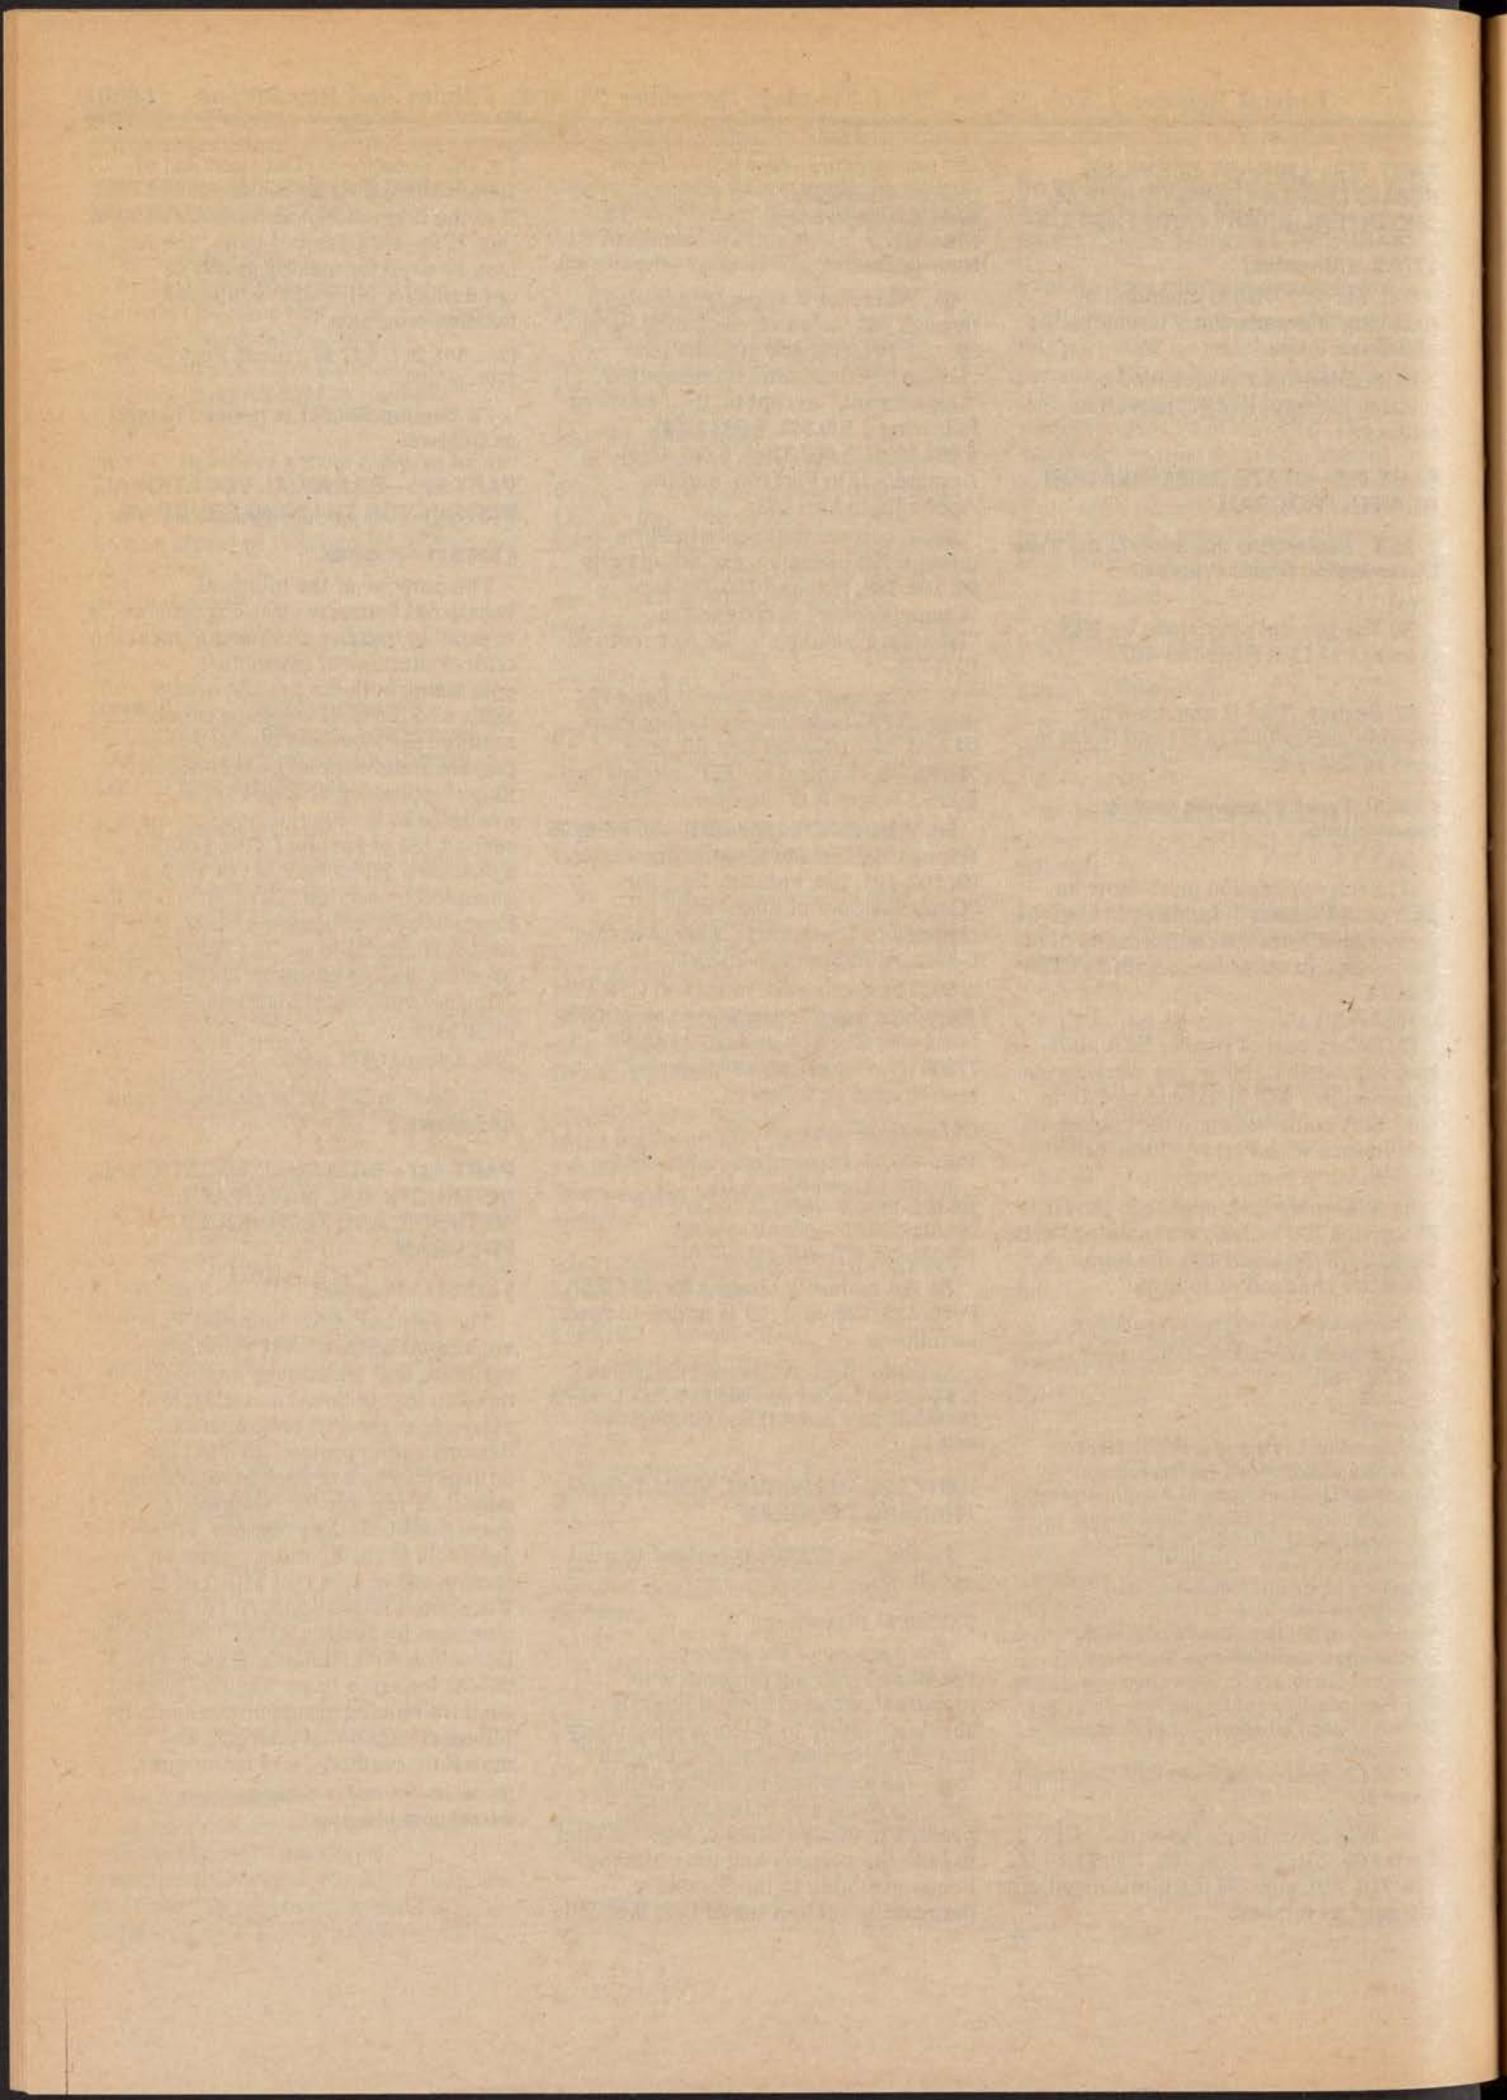

**PART 527—BILINGUAL VOCATIONAL  
INSTRUCTIONAL MATERIALS,  
METHODS, AND TECHNIQUES  
PROGRAM**

**§ 527.621 Purpose.**

The purpose of the bilingual vocational instructional materials, methods, and techniques program is to develop instructional materials and encourage research programs and demonstration projects to meet the critical shortage of such instructional materials suitable for bilingual vocational training programs. Funds available to the Secretary pursuant to section 183 of Part B of Title I of the Vocational Educational Act of 1963, as amended by section 202 of Title II of the Education Amendments of 1976, Pub. L. 94-482 (referred to as "the Act") may be used for making grants or contracts for bilingual vocational instructional materials, methods, and techniques.

**Educational Programs; Proposed  
Regulations**

## DEPARTMENT OF EDUCATION

## 34 CFR Part 692

## State Student Incentive Grant Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

**SUMMARY:** These regulations simplify existing rules for the State Student Incentive Grant Program and incorporate statutory changes made by the Education Amendments of 1980.

**DATES:** All comments must be received on or before February 13, 1981.

**ADDRESSES:** Any comments on these proposed regulations should be addressed to Lanora G. Smith, Acting Chief, State Student Incentive Grant Program, Regional Office Building 3, Room 4004, 7th and D Streets, S.W., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:**

Lanora G. Smith, telephone (202) 472-4265.

**SUPPLEMENTARY INFORMATION:** On September 14, 1977, final regulations for the State Student Incentive Grant Program were published in the Federal Register (45 CFR Part 192). The regulations were amended April 3, 1980 (45 FR 22542). On November 21, 1980, 45 CFR Part 192 was redesignated as 34 CFR Part 692. The Department proposes to simplify the language and requirements of the existing regulations, telescope initial and continuation awards into a single program, and otherwise conform the regulations to changes made by the Education Amendments of 1980 (Pub. L. 96-374). The following table shows where the existing regulations have been incorporated into the proposed regulations.

Existing Regulations	Proposed Regulations
(34 CFR Part 692—Formerly 45 CFR Part 192).	
§ 692.1.	692.1, 692.10.
692.1-1.	692.3.
692.2 (Definitions of "continuation award", "cost of education", "dependent student", "expected family contribution of a dependent student", "expected family contribution of an independent or self-supporting student", "half-time student", "independent student", "initial award", "National of the United States", "undergraduate student")	Deleted.

## Existing Regulations

## Proposed Regulations

692.2 (All other definitions).	692.4.
692.3.	Deleted (covered by the statute).
692.4(a)-(c), (e)-(h), (j).	692.21.
692.4(d).	692.40.
692.4(i).	Deleted (covered by section 1203 of the Act).
692.5.	692.20(b).
692.6.	692.40.
692.7.	Deleted—See proposed 692.41.
692.8.	Deleted.
692.9.	692.21(h).
692.10.	692.21(g).

## Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. In developing final regulations for this program, the Department will consider all comments received on or before the 45th day after publication of this document.

All written comments submitted in response to the proposed regulations will be available for inspection, both during and after the comment period, in Room 4004, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Saturdays, Sundays, and Federal holidays.

## Assessment of Educational Impact

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

## Citation of Legal Authority

The reader will find a citation of statutory or other legal authority in parentheses on the line following each substantive provision.

Dated: December 22, 1980.  
(Catalog of Federal Domestic Assistance Number 84.069: State Student Incentive Grant Program)

Shirley M. Hufstедler,  
Secretary of Education.

The Secretary proposes to revise Part 692 of Title 34 of the Code of Federal Regulations to read as follows:

## PART 692—STATE STUDENT INCENTIVE GRANT PROGRAM

## Subpart A—General

## Sec.

- 692.1 What is the State Student Incentive Grant Program?  
692.2 Who is eligible to participate in the State Student Incentive Grant Program?  
692.3 What regulations apply to the State Student Incentive Grant Program?  
692.4 What definitions apply to the State Student Incentive Grant Program?

## Subpart B—What Does the Department Assist Under This Program?

- 692.10 For what purposes may a State use its payments under this program?

## Subpart C—How Does a State Apply to Participate in This Program?

- 692.20 What agreement must a State have with the Secretary?  
692.21 What requirements must be met by a State program?

## Subpart D [Reserved]

## Subpart E—How Does a State Select Students for Grants?

- 692.40 What are the requirements for student eligibility?  
692.41 What standards may a State use to determine substantial financial need?

**AUTHORITY:** Secs. 415A-415D of Title IV of the Higher Education Act of 1965, as amended, 86 Stat. 255, 90 Stat. 2094, 91 Stat. 218, 94 Stat. 1406-1407 (20 U.S.C. 1070c-1070c-3), unless otherwise noted.

## Subpart A—General

## § 692.1 What is the State Student Incentive Grant Program?

The State Student Incentive Grant Program assists States that provide grants to eligible students who attend institutions of higher education and have substantial financial need.

(20 U.S.C. 1070c-1070c-3)

## § 692.2 Who is eligible to participate in the State Student Incentive Grant Program?

(a) *State participation.* A State that meets the requirements in §§ 692.20-692.21 is eligible to receive payments under this program.

(b) *Student participation.* A student who meets the requirements of § 692.40 is eligible to receive a grant from a State under this program.

(20 U.S.C. 1070c-1)

## § 692.3 What regulations apply to the State Student Incentive Grant Program?

The following regulations apply to the State Student Incentive Grant Program:

(a) The Education Department General Administrative Regulations (EDGAR) in Part 76 (State-Administered Programs) and Part 77 (Definitions).

(b) The regulations in Part 604 that implement section 1203 of the Act (Federal-State Agreement).

## (c) The regulations in this Part 692.

(20 U.S.C. 1070c)

**§ 692.4 What definitions apply to the State Student Incentive Grant Program?**

The following definitions apply to the regulations in this part:

(a) *Definitions in EDGAR.* The following terms used in this part are defined in Part 77:

Nonprofit  
Secretary  
State

(b) *Definition in Part 668.* The following definition in Part 668 of this title applies to the regulations in this part:

Institution of higher education  
(§ 668.1(a)(2)(i))

(c) *Other definitions that apply to this part.* The following additional definitions apply to this part:

"Academic year" means a period of time during which a full-time student is expected to complete the equivalent of one of the following:

- (1) Two semesters.
- (2) Two trimesters.
- (3) Three quarters.
- (4) Nine hundred clock hours of instruction.

"Act" means the Higher Education Act of 1965, as amended. "Clock hour" means a period of time that is equivalent to—

- (1) A 50- to 60-minute class, lecture, or recitation; or
- (2) A 50- to 60-minute faculty-supervised laboratory, ship training, or internship.

"Full-time student" means a student carrying a full-time academic workload—other than by correspondence—as measured by both of the following:

- (1) Coursework or other required activities, as determined by the institution that the student attends or by the State.
- (2) The tuition and fees normally charged for full-time study by that institution.

(20 U.S.C. 1070c-1070c-3, 1088)

**Subpart B—What Does the Department Assist Under This Program?****§ 692.10 For what purposes may a State use its payments under this program?**

A State may use its payments under the State Student Incentive Grant Program to—

- (a) Make grants to students under new student grant programs; or
- (b) Expand grants under existing student grant programs by—
  - (1) Making grants to additional eligible students; or

## (2) Increasing the size of grants.

(20 U.S.C. 1070c)

**Subpart C—How Does a State Apply to Participate in This Program?****§ 692.20 What agreement must a State have with the Secretary?**

To participate in the State Student Incentive Grant Program, a State must—

- (a) Enter into an agreement with the Secretary under section 1203 of the Act (Federal-State Agreement); and
- (b) For each fiscal year that it wishes to participate, submit an application that contains information that shows that the State's student grant program meets the requirements in § 692.21.

(20 U.S.C. 1070c-2(a))

(Cross-reference: See 34 CFR Part 604, Federal-State Agreements.)

**§ 692.21 What requirements must be met by a State program?**

To receive a payment under this program for any fiscal year, a State must have a program that—

- (a) Is administered by a single State agency in accordance with the Federal-State Agreement under section 1203 of the Act;
- (b) Awards grants only to students who meet the eligibility requirements in § 692.40;
- (c) Provides that a grant to a full-time student will not be more than \$2,000 for each academic year;
- (d) Provides for the selection of students to receive grants on the basis of substantial financial need determined annually by the State on the basis of standards that the State establishes and the Secretary approves. Cross-reference: See § 692.41.
- (e) Provides that all nonprofit institutions of higher education in the State are eligible to participate unless that participation is in violation of—
  - (1) The constitution of the State; or
  - (2) A State statute that was enacted before October 1, 1978.
- (f) Provides that, with the approval of the State agency, an institution of higher education may use any proportion of the payments under this program for grants to students who are not carrying or planning to carry at least one-half the normal full-time workload;

(g) Provides that—

- (1) The State will pay at least 50 percent of each grant; and
- (2) The amount that the State expends during a fiscal year for grants under this program represents an additional amount for grants to students attending institutions of higher education over the amount expended by the State for that purpose during the second fiscal year

before the fiscal year in which the State first received funds under this program;

(h) Provides for State expenditures under the State program of an amount that is not less than—

- (1) The average annual aggregate expenditures for the preceding three fiscal years; or
- (2) The average annual expenditure per full-time equivalent student for those years; and
  - (i) Provides for reports to the Secretary that are necessary to carry out the Secretary's functions under this part.

(20 U.S.C. 1070c-2)

**Subpart D—[Reserved]****Subpart E—How Does a State Select Students for Grants?****§ 692.40 What are the requirements for student eligibility?**

(a) To be eligible for a grant and to receive payments under the grant, a student must—

- (1)(i) Be a United States citizen or National;
- (ii) Be a permanent resident of the United States;
- (iii) Provides evidence from the Immigration and Naturalization Service that the student is in the United States for other than a temporary purpose with the intention of becoming a permanent resident of the United States; or
- (iv) Be a permanent resident of the Trust Territory of the Pacific Islands or of the Northern Mariana Islands;
- (2) Be enrolled or accepted for enrollment at an institution of higher education;
- (3) Have substantial financial need as determined annually in accordance with the State's criteria approved by the Secretary;
- (4) In accordance with the standards and practices of the institution at which the student is enrolled, maintain satisfactory progress in a course of study;

(5)(i) Not owe a refund on a grant received for attendance at that institution under the Pell Grant, Supplemental Educational Opportunity Grant, or State Student Incentive Grant programs;

(ii) Not be in default on a loan made by the institution under the National Defense Student Loan or National Direct Student Loan programs unless the student has made arrangements, satisfactory to the institution, to repay the loan; and

(iii) Not be in default on a loan insured under the Guaranteed Student Loan or the Parent Loans for Undergraduate Students (PLUS) program unless the Secretary (for a

federally insured loan) or a guarantee agency (for a loan insured by that guarantee agency) determines that the student has made satisfactory arrangements to repay the loan; and

(6) File with the institution (or with the lender, in the case of a loan or a loan guarantee) a statement that the money attributable to the grant, loan, or loan guarantee will be used solely for expenses related to attendance or continued attendance at the institution.

(b) The Secretary does not consider a National Defense Student Loan, a National Direct Student Loan, or a Guaranteed Student Loan that is discharged in bankruptcy to be in default for purposes of this section.

(20 U.S.C. 1070c-2, 1091)

**§ 692.41 What standards may a State use to determine substantial financial need?**

A State may determine substantial financial need by using—

(a) The State's own needs analysis system, if approved by the Secretary;

(b) The criteria and standards for determining need promulgated by the Secretary under section 482 of the Act; or

(c) A combination of these systems.

(20 U.S.C. 1070c-2, 1089)

[FR Doc. 80-40413 Filed 12-29-80; 8:45 am]

BILLING CODE 4000-01-M

**34 CFR Parts 201 and 774**

**Title I and Title IV of the Elementary and Secondary Education Act—Financial Assistance to Local Educational Agencies for Children With Special Educational Needs (Title I) and Grants to State Educational Agencies for Educational Improvement, Resources, and Support (Title IV)**

**AGENCY:** Department of Education.

**ACTION:** Proposed regulations.

**SUMMARY:** The Secretary issues proposed regulations for Title I and Title IV of the Elementary and Secondary Education Act (ESEA). These proposed regulations contain procedures for the submission of written objections and show cause hearings, when the Secretary proposes to implement a by-pass to provide equitable services for private school children. These proposed regulations contain specific timelines and procedures to ensure that an expeditious and fair decision is made on whether a by-pass is implemented.

**DATE:** All comments on these proposed regulations must be received on or before March 2, 1981.

**ADDRESS:** Comments should be addressed to Mr. Stephen Freid, Office of General Counsel, Department of Education, 400 Maryland Avenue, SW., Room 4091, Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Mr. Stephen Freid, Telephone (202) 426-6300.

**SUPPLEMENTARY INFORMATION:** Under Title I and Title IV of ESEA, local educational agencies (LEAs) are required to provide equitable services and programs for children attending private schools (20 U.S.C. 2740, 3086). The specific requirements relating to the services and programs that must be provided for private school children are contained in the Title I and Title IV statutes, and the regulations that have been issued to implement these statutes (34 CFR Parts 201, 774).

The Education Division General Administrative Regulations (EDGAR), which were published in the Federal Register in final form on April 3, 1980 (45 FR 22494-22631), contain additional requirements on the participation of private school children that are applicable to the Title I program, but not to the Title IV program.

In some instances LEAs have been unable or unwilling to provide the required services and programs for private school children. This situation occurs sometimes as a result of State laws that limit the types of services that LEAs can provide for private school children.

Because LEAs may be unable or unwilling to provide equitable services and programs for private school children under Title I or Title IV, the Secretary is authorized to provide these services through a by-pass. Under a by-pass, the Secretary waives the LEA's responsibility for providing services for private school children under the affected program, and arranges for the provision of equitable services for the private school children. The Secretary normally hires a contractor to provide these services for the private school children and pays for the services from the appropriate allocations of the affected LEA and State educational agency (SEA). Title I and Title IV by-passes are presently in operation in number of States and LEAs.

Before a by-pass can be implemented under Title I or Title IV, the Secretary must provide both the affected LEA and SEA an opportunity to submit written objections and an opportunity to appear before the Secretary, or the Secretary's designee, to show cause why the by-pass should not be implemented. Presently, the Title I and Title IV regulations do not contain any

provisions governing the submission of written objections or the show cause hearing.

These proposed regulations contain specific procedures and timelines so that the submission of written objections and the show cause hearing are handled in a fair and expeditious manner. Opportunity is provided to all concerned parties—the LEA, the SEA, and representatives of the private school children—to present their views on whether the by-pass should be implemented.

In addition, the proposed regulations for Title IV contain a section on the procedures the Secretary uses in making the initial decision to implement a by-pass (§ 774.83). The notice of proposed rulemaking for Title I that was published in the Federal Register on June 11, 1980 (45 FR 39712) already contains these procedures in § 116a.95. Those procedures are not repeated in these proposed regulations for Title I, but are cross-referenced as § 201.91 rather than § 116a.95 to correspond to the numbering system that will be used in the final Title I regulations.

**Invitation to Comment**

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before the 60th day after publication of this document will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 4091, 400 Maryland Avenue, SW., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

**Citation of Legal Authority**

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

Dated: December 22, 1980.

Shirley M. Hufstedler,  
Secretary of Education.

(Catalog of Federal Domestic Assistance Nos. 84.010, Educationally Deprived Children—Local Educational Agencies; 84.088, Instructional Materials and School Library Resources;

The Secretary amends Parts 201 and 774 of Title 34 of the Code of Federal Regulations to read as follows:

**PART 201—FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF EDUCATIONALLY DEPRIVED AND NEGLECTED AND DELINQUENT CHILDREN**

(1) The following sections are added to the table of contents under Subpart F of Part 201:

**Subpart F—Evaluation**

Sec.

201.58-201.91 [Reserved]  
201.92 Submission of written objections to the proposed by-pass.  
201.93 Show cause hearing.

Authority: Sec. 130 of Title I of the Elementary and Secondary Act, as amended by Pub. L. 95-561 (20 U.S.C. 2740; 92 Stat. 2171-2172).

(2) The following two sections are added to Subpart F of Part 201:

**§ 201.92 Submission of written objections to the proposed by-pass.**

(a) If an LEA or SEA submits written objections to the proposed by-pass in accordance with § 201.91(a)(2)(i), the Secretary—

(1) Sends a copy of the written objections to appropriate representatives of the private school children in the affected LEA; and

(2) Allows the representatives of the private school children 30 days to submit written comments on whether a by-pass should be implemented in the affected LEA.

(b) After the close of the 30 day period for the submission of written comments by the representatives of the private school children, the Secretary—

(1) Makes a final decision concerning whether a by-pass should be implemented; or

(2) Determines that further proceedings should be conducted under § 201.93.

(Sec. 130(b)(4)(A); 20 U.S.C. 2740(b)(4)(A))

**§ 201.93 Show cause hearing.**

(a) If an LEA or SEA requests an opportunity for a hearing to show cause why a proposed by-pass should not be implemented in accordance with § 201.91(a)(2)(ii), or if the Secretary determines that further proceedings should be conducted under § 201.92(b)(2), the Secretary—

(1) Notifies appropriate representatives of the private school children in the affected LEA that a show cause hearing will be held, and that they may participate in the hearing; and

(2) Designates a hearing officer.

(b) The Secretary may combine show cause hearings that involve similar legal or factual issues.

(c) The hearing officer notifies the LEA, SEA, and the representatives of the private school children of the time and place of the hearing.

(d) The LEA, SEA, and the representatives of the private school children each may be represented by legal counsel.

(e) The hearing officer does not have authority to—

- (1) Issue subpoenas;
- (2) Require or conduct discovery; or
- (3) Rule on the validity of any statute or regulation, including these procedures.

(f) At the show cause hearing—

- (1) A transcript is taken; and
- (2) The LEA, SEA, and representatives of the private school children each may submit oral or written evidence and arguments.

(g) At the close of the hearing, or within 10 days thereafter, the hearing officer—

- (1) Requests further information from the LEA, SEA, representatives of the private school children or appropriate Department of Education officials, to be filed within 30 days; or
- (2) Indicates that a decision will be issued on the basis of the existing record.

(h) After the hearing, the hearing officer—

- (1) Issues a written decision on whether the LEA and SEA have demonstrated that the proposed by-pass should not be implemented; and
- (2) Sends copies of the decision to the LEA, SEA, representatives of the private school children, and the Secretary.

(i) The LEA, SEA, and representatives of the private school children have 10 days from receipt of the hearing officer's decision to submit written comments on the decision to the Secretary.

(j) The Secretary adopts, reverses, or modifies the hearing officer's decision within 45 days of the close of the comment period stated in paragraph (i) of this section.

(Sec. 130(b)(4)(A); 20 U.S.C. 2740(b)(4)(A))

**PART 774—GRANTS TO STATE EDUCATIONAL AGENCIES FOR EDUCATIONAL IMPROVEMENT, RESOURCES, AND SUPPORT**

(1) The following sections are added to the table of contents under Subpart I of Part 774:

**Subpart I—Section 406 Compliance Procedures**

774.83 Secretary's procedures for by-pass actions.

774.84 Submission of written objections to the proposed by-pass.

774.85 Show cause hearing.

Authority: Sec. 406 of Title IV of the Elementary and Secondary Education Act, as amended by Pub. L. 95-561 (20 U.S.C. 3086; 92 Stat. 2234-2236).

(2) The following three sections are added to Part 774:

**§ 774.83 Secretary's procedures for by-pass actions.**

Before taking any final by-pass action under § 774.81 and § 774.82, the Secretary provides the LEA and SEA with—

(a) Written notice of the Secretary's intent to by-pass the LEA. This notice—

(1) Indicates the reasons for the by-pass;

(2) Advises the LEA and SEA that, within 45 days, they may—

(i) Submit written objections to the proposed by-pass; and

(ii) Request in writing the opportunity for a hearing to show cause why the by-pass should not be implemented; and

(3) Is sent by certified mail with a return receipt requested; and

(b) An opportunity to appear at a hearing before the Secretary, or the Secretary's designee, to show cause why the by-pass should not be implemented.

(Sec. 406(h); 20 U.S.C. 3086(h))

**§ 774.84 Submission of written objections to the proposed by-pass.**

(a) If an LEA or SEA submits written objections to the proposed by-pass in accordance with § 774.83(a)(2)(i), the Secretary—

(1) Sends a copy of the written objections to appropriate representatives of the private school children in the affected LEA; and

(2) Allows the representatives of the private school children 30 days to submit written comments on whether a by-pass should be implemented in the affected LEA.

(b) After the close of the 30 day period for the submission of written comments by the representatives of the private school children, the Secretary—

(1) Makes a final decision concerning whether a by-pass should be implemented; or

(2) Determines that further proceedings should be conducted under § 774.85.

(Sec. 406(h); 20 U.S.C. 3086(h))

**§ 774.85 Show cause hearing.**

(a) If an LEA or SEA requests an opportunity for a hearing to show cause why a proposed by-pass should not be implemented in accordance with § 774.83(a)(2)(ii), or if the Secretary determines that further proceedings should be conducted under § 774.84(b)(2), the Secretary—

(1) Notifies appropriate representatives of the private school children in the affected LEA that a show cause hearing will be held, and that they may participate in the hearing; and

(2) Designates a hearing officer.

(b) The Secretary may combine show cause hearings that involve similar legal or factual issues.

(c) The hearing officer notifies the LEA, SEA, and the representatives of the private school children of the time and place of the hearing.

(d) The LEA, SEA, and the representatives of the private school children each may be represented by legal counsel.

(e) The hearing officer does not have authority to—

(1) Issue subpoenas;

(2) Require or conduct discovery; or

(3) Rule on the validity of any statute or regulation, including these procedures.

(f) At the show cause hearing—

(1) A transcript is taken; and

(2) The LEA, SEA, and representatives of the private school children each may submit oral or written evidence and arguments.

(g) At the close of the hearing, or within 10 days thereafter, the hearing officer—

(1) Requests further information from the LEA, SEA, representatives of the private school children, or appropriate Department of Education officials, to be filed within 30 days; or

(2) Indicates that a decision will be issued on the basis of the existing record.

(h) After the hearing, the hearing officer—

(1) Issues a written decision on whether the LEA and SEA have demonstrated that the proposed by-pass should not be implemented; and

(2) Sends copies of the decision to the LEA, SEA, representatives of the private school children, and the Secretary.

(i) The LEA, SEA, and representatives of the private school children have 10 days from receipt of the hearing officer's decision to submit written comments on the decision to the Secretary.

(j) The Secretary adopts, reverses, or modifies the hearing officer's decision within 45 days of the close of the comment period stated in paragraph (i) of this section.

(Sec. 406(h); 20 U.S.C. 3086(h))

BILLING CODE 4000-01-M

### 34 CFR Part 605

#### Continuing Education Outreach—State-Administered Program

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Secretary is issuing proposed regulations for the Continuing Education Outreach—State-Administered Program. The proposed regulations are being issued to reflect the statutory changes resulting from the Education Amendments of 1980. Activities previously carried out under the Community Service and Continuing Education Program, the Education Information Centers Program, and the State Planning Commissions Program have been consolidated into a single program and revised. The proposed regulations will govern a comprehensive program of planning, information services, and continuing education projects. Institutions of higher education, public and private organizations, community based educational institutions, business, industry, and labor are eligible to receive subgrants and contracts.

**DATES:** Comments must be received on or before March 2, 1981.

Public meetings are planned to take comments on these proposed regulations. A notice giving the city, time, and location will be published later in the *Federal Register*.

**ADDRESSES:** Comments should be addressed to Mr. Charles I. Griffith, Office of Postsecondary Education, U.S. Department of Education, (Room 3717, ROB-3), 400 Maryland Avenue, SW., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Mr. John E. Donahue, Office of Postsecondary Education, U.S. Department of Education, (Room 3717, ROB-3), 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone (202) 245-9868.

#### SUPPLEMENTARY INFORMATION:

##### Assessment of Educational Impact

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

##### Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given in this preamble. All

comments received on or before the 60th day after publication of this document will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3717, ROB-3, 7th and D Streets, SW., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

#### Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

(Catalog of Federal Domestic Assistance Number not yet assigned)

#### PART 610—[REMOVED]

The Secretary proposes to (1) remove Part 610, and (2) revise Part 605 of Title 34 of the Code of Federal Regulations to read as follows:

#### PART 605—CONTINUING EDUCATION OUTREACH—STATE-ADMINISTERED PROGRAM

##### Subpart A—General

###### Sec.

- 605.1 Continuing Education Outreach—State-Administered Program.
- 605.2 Eligible parties.
- 605.3 Regulations that apply to the Continuing Education Outreach—State-Administered Program.
- 605.4 Definitions that apply to the Continuing Education Outreach—State-Administered Program.

##### Subpart B—[Reserved]

##### Subpart C—How Does the Secretary Make a Grant to a State?

- 605.20 How does the secretary initially allot programs funds?
- 605.21 What are the requirements for subsequent allotments?
- 605.22 How does a State determine the amount of funds to be used for comprehensive statewide planning?
- 605.23 How does a State determine the amount of funds to be used for information services?
- 605.24 How does a State determine the amount of funds to be used for continuing education?

##### Subpart D [Reserved]

##### Subpart E [Reserved]

##### Subpart F—What Conditions Must be Met by a State?

- 605.50 Coordination.
- 605.51 Limitation on payments to the States.

**Subpart G—What Are the Administrative Responsibilities of a State and Its Subgrantees and Contractors?**

- 605.60 Annual report.  
605.61 Child care project restrictions.  
605.62 Administrative funds.

Authority: Sections 111 through 115 of the Higher Education Act of 1965, as amended by Pub. L. 96-374 (20 U.S.C. 1011-1015).

**Subpart A—General**

**§ 605.1 Continuing Education Outreach—State-Administered Program.**

(a) *General description.* The Continuing Education Outreach—State-Administered Program provides Federal financial assistance primarily to increase access to programs of continuing education for adults whose educational needs have been inadequately served. Recipients shall use this assistance to help traditional and non-traditional learners through—

- (1) Comprehensive statewide planning;
- (2) Information services; and
- (3) Continuing education.

(20 U.S.C. 1011-1015)

(b) *Comprehensive statewide planning.* (1) Each State shall use the funds available for comprehensive statewide planning to support planning, and related studies, designed to achieve—

- (i) Improved access to programs of postsecondary education for traditional and non-traditional learners;
- (ii) Improved retention of traditional and non-traditional learners in programs of postsecondary education;
- (iii) Effective coordination of educational occupational information and counseling services for youths and adults; and
- (iv) More effective use of resources available for continuing education.

(2) Comprehensive statewide planning funds may also be used to prepare the annual report described in § 605.60.

(20 U.S.C. 1013(a))

(c) *Information services.* Each State shall use the funds available for information services to develop and coordinate new and existing—

- (1) Postsecondary education information and counseling services for traditional and non-traditional learners; and
  - (2) Occupational information and counseling services for youth and adults.
- (20 U.S.C. 1014(a)).

(d) *Continuing education.* (1) Each State shall use the funds available for continuing education to make subgrants and award contracts for—

- (i) Promoting access to and retention in postsecondary educational programs

for adults whose educational needs have been inadequately served;

(ii) Expanding and improving postsecondary educational programs that help adults develop their occupational potential and prepare for transitions between education and work;

(iii) Eliminating barriers—posed by previous education or training, age, sex, race, handicap, national origin, rural isolation, or economic circumstance—that may place adults at a disadvantage in seeking postsecondary educational opportunities;

(iv) Strengthening statewide and other mechanisms of information, counseling, and referral that provide access to postsecondary education and serve the special needs of adults; and

(v) Developing strategies to promote the financial self-sufficiency of postsecondary educational programs initiated under this part.

(2) Eligible continuing education projects include such activities as:

- (i) Creation or expansion of labor education, training, and technical assistance programs;
- (ii) Development of cooperative relationships between State and local labor organizations and institutions and agencies that provide opportunities for continuing education;
- (iii) Removal of barriers to continuing education caused by rural isolation or other rural-related factors;
- (iv) Preretirement continuing education programs related to legal, vocational, and health services available to older adults;
- (v) Promotion of sharing resources for innovative uses of technology on an inter-state or intra-state basis, including telecommunications, to overcome barriers to postsecondary educational opportunities;
- (vi) Educational and occupational information and counseling services designed to meet the special needs of adult women, particularly homemakers, and to assist their entry or re-entry into postsecondary education and the labor force;
- (vii) Collection and dissemination of information, including the creation of data banks, on sources of student financial assistance and information designed to assist individuals to make choices among postsecondary institutions, programs, and other educational opportunities;
- (viii) Community education activities, consistent with the purposes of this part, for adults in rural areas;
- (ix) Postsecondary educational programs suited to individuals whose educational needs have been inadequately served, especially the

handicapped, older individuals, migrant and seasonal farm workers, individuals who can participate in programs only on a part-time basis, and individuals who otherwise would be unlikely to continue their education beyond high school;

(x) Child care services to assist individuals desiring to participate in continuing education programs in order to enter or re-enter the field of postsecondary education and the labor force; and

(xi) Promotion or delivery of postsecondary education services to women at the places of their employment or in conjunction with their employment.

(20 U.S.C. 1015)

§ 605.2 Eligible parties.

(a) States that have entered into a Federal-State relationship agreement with the Secretary as specified in 34 CFR Part 604 are eligible to receive grants for Statewide planning, information services, and continuing education.

(20 U.S.C. 1012-1015, 1143)

(b) Institutions of higher education and public and private organizations—including business, industry, labor, and community based educational institution—are eligible to receive subgrants and contracts from the States for information and counseling services and continuing education projects.

(20 U.S.C. 1014(c), 1015(b))

§ 605.3 Regulations that apply to the Continuing Education Outreach—State-Administered Program.

The following regulations apply to the Continuing Education Outreach—State-Administered Program:

- (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 76 (State-Administered Programs) and 34 CFR 77 (General);
- (b) The regulations in this part 605; and
- (c) The regulations in 34 CFR Part 604.

§ 605.4 Definitions that apply to the Continuing Education Outreach—State-Administered Program.

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77:

- Contract
- Fiscal year
- Grant
- Private Project
- Public Secretary
- State Subgrant
- Subgrantee

(b) *Definitions that apply to this part.* The following definitions apply to this part.

"Adults whose educational needs have been inadequately served" means individuals 18 years of age or older who—because of circumstances of age, sex, low income, handicap, minority status, rural isolation, status of employment or underemployment, lack of education, or other significant barriers—have been discouraged from obtaining equal educational opportunities.

"Continuing education" means postsecondary instruction and support services designed to meet the educational needs of adults, including the expansion of available learning opportunities for adults whose educational needs are inadequately served by current educational offerings in their communities.

"Act" means the Higher Education Act of 1965, as amended.

"Adult population" means the population eighteen years of age and older.

"Youth" means an individual between 16 and 18 years of age who is seeking, or considering seeking, employment.

"Planning for continuing education" means planning to improve access to programs of postsecondary education for adults in a State, particularly those who have been inadequately served, and to promote more effective and efficient use of available resources, including efforts to ensure equal treatment of applicants in the evaluation of subgrant proposals.

(20 U.S.C. 1013(c); 1018)

#### Subpart B (Reserved)

#### Subpart C—How Does the Secretary Make a Grant to a State?

##### § 605.20 How does the Secretary initially allot program funds?

The Secretary makes the initial allotment of program funds after a State has consummated an agreement with the Secretary as required in 34 CFR Part 604. The allotment is made according to the formula in section 112 (a)(1) of the Act.

(20 U.S.C. 1012)

##### § 605.21 What are the requirements for subsequent allotments?

The Secretary makes an allotment to a State in subsequent fiscal years after the Secretary receives a satisfactory annual report as provided for in § 605.60.

(20 U.S.C. 1012, 1013)

##### § 605.22 How does a State determine the amount of funds to be used for comprehensive statewide planning?

(a) The amount of funds available for planning depends on the amount of the total annual appropriation for the Continuing Education Outreach Program.

(1) In a fiscal year in which the appropriation is less than \$18,500,000, the State shall use at least 15 percent but not more than 20 percent of its allotment for comprehensive statewide planning.

(2) In a fiscal year in which the appropriation is at least \$18,500,000 but not more than \$23,999,999, the State may use from ten to fifteen percent of its allotment for comprehensive statewide planning.

(3) In a fiscal year in which the appropriation is \$24,000,000 or more, the State shall use up to 10 percent of its allotment for comprehensive statewide planning.

(b) If the State does not wish to receive comprehensive planning funds in a particular fiscal year, the State must so notify the Secretary of this prior to the beginning of that fiscal year, so that funds can be reallocated to the other States.

(c) A State may use up to 50 percent of the funds available to it for comprehensive statewide planning for the purpose of supporting continuing education projects.

(d) A State shall use 50 percent of the funds remaining for comprehensive statewide planning—after implementing the set-aside in paragraph (c), if any—for planning for continuing education, unless a waiver is granted.

(e) On application from a State, the Secretary grants a waiver of the requirement in paragraph (d) if the State satisfactorily demonstrates that—

(1) Planning for postsecondary continuing education has been an integral part of its existing planning process;

(2) It regularly collects data related to adult learners, including those who are being inadequately served;

(3) It periodically assesses the statewide postsecondary educational needs of adults; and

(4) It consults with public advisory groups composed of persons knowledgeable about the postsecondary educational needs of adults.

(20 U.S.C. 1013(a)(c); S. Rept. 96-733 at 8)

##### § 605.23 How does a State determine the amount of funds to be used for information services?

A State shall use not less than \$50,000 nor more than 12 percent of its

allotment, whichever is greater, to provide information services.

(20 U.S.C. 1014(a))

##### § 605.24 How does a State determine the amount of funds to be used for continuing education?

A State shall use the funds remaining from its allotments—after reserving the amounts required for comprehensive statewide planning and information services—for subgrants and contracts for continuing education projects.

(20 U.S.C. 1015)

#### Subpart D (Reserved)

#### Subpart E (Reserved)

#### Subpart F—What Conditions Must Be Met by a State?

##### § 605.50 Coordination

A State shall coordinate its comprehensive statewide planning and information services activities to the maximum extent feasible with Federal, State, and local planning and information services being done under the following programs:

(a) Subpart 4 of Part A of Title IV of the Higher Education Act (Special Programs for Students from Disadvantaged Backgrounds).

(b) Part B of Title IV of the Higher Education Act (Guaranteed and Insured Student Loans).

(c) Section 485 of the Higher Education Act (Institutional and Financial Assistance Information for Students).

(d) The Vocational Education Act.

(e) The Comprehensive Employment and Training Act.

(f) The Older Americans Act of 1965.

(g) The Rehabilitation Act of 1973.

(h) The Career Education Incentive Act.

(i) The Adult Education Act.

(j) The Veterans Readjustment Assistance Act.

(k) Other Federal, State, and local programs that provide educational outreach, guidance, counseling, and information.

(20 U.S.C. 1013(d), 1014(b))

##### § 605.51 Limitation on payments to the States.

(a) The Secretary does not make payments to the States in excess of two-thirds of the total costs of the State's program under this part.

(b) The State may not use funds from other Federal programs for matching.

(20 U.S.C. 1019)

### Subpart G—What Are the Administrative Responsibilities of a State and Its Subgrantees and Contractors?

#### § 605.60 Annual report.

(a) In addition to the requirements of EDGAR, 34 CFR 76.720, a State that receives funds under this program shall submit to the Secretary at the end of each fiscal year a report on each aspect of its Continuing Education Outreach Program. This report shall include the following:

(1) A list of each activity supported, including the amount of Federal and non-Federal funds allocated to planning, information services, and continuing education programs.

(2) A description of each activity supported.

(3) A detailed analysis of the relationship between the activities carried out and the priorities established by the comprehensive statewide planning process. This shall include:

(i) An evaluation of the fiscal year's activities; and

(ii) A projection of the types of activities the State plans to support in the next fiscal year.

(b)(1) The State entity responsible for comprehensive planning under this part shall be responsible for submission of the annual report.

(2) If a State does not receive funds for statewide planning, the State shall designate the State entity that shall be responsible for the report.

(20 U.S.C. 1013(b))

#### § 605.61 Child care project restrictions.

A State may not award grants or contracts for the provision of child care services for the benefit of persons participating in continuing education projects unless—

(a) The State entity responsible for comprehensive statewide postsecondary education planning has established a cooperative agreement with the State agency responsible for coordinating child care services; and

(b) The grantee or contractor is licensed by the State to provide child care services, or is in the process of renewing its license and is likely to have that renewal approved.

(20 U.S.C. 1015(c))

#### § 605.62 Administrative funds.

A State may use up to five percent of the funds available for continuing education, or \$40,000, whichever is greater, for the administration of continuing education activities or the direct operation of continuing education projects.

(20 U.S.C. 1015(d))

### Office of Elementary and Secondary Education

#### 34 CFR Part 222

#### School Assistance in Federally Affected Areas—Special Impact Aid Program for Refugees

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed regulations.

**SUMMARY:** The Secretary of Education proposes regulations to implement the Special Impact Aid Program for Refugees under the authority of the Education Amendments of 1980. This program authorizes Federal financial assistance to local educational agencies (LEAs) which experience in any school year an enrollment increase of at least 20 students who have fled from Cambodia, Vietnam, Laos, Cuba, or Haiti.

**DATES:** Comments on these proposed regulations must be received (on or before 60 days after publication in the Federal Register).

**ADDRESSES:** Written comments should be addressed to Mr. Carrol U. Dexter, Department of Education, 300 Independence Avenue, S.W., Room G660, Washington, D.C. 20201. Telephone (202) 472-4014.

**FOR INFORMATION CONTACT:** Carroll U. Dexter. Telephone: (202) 472-4014

#### SUPPLEMENTARY INFORMATION:

##### Background

This program is designed to provide Federal financial assistance to local educational agencies (LEAs) which experience an enrollment increase of at least twenty students from Cambodia, Vietnam, Laos, Cuba, or Haiti.

An eligible LEA is authorized to receive for FY 1981 an amount equal to the product of the number of eligible children in excess of 20 in average daily attendance in the LEA multiplied by the current local expenditure rate per pupil of that LEA, plus \$200 for each eligible child in excess of 20.

For example, if the LEA had an increase of 23 eligible children and a local expenditure rate of \$1,000 per child, the entitlement would be calculated as follows: the number of eligible children in excess of 20 multiplied by the local expenditure rate ( $3 \times \$1,000$ ) plus \$200 for each eligible child in excess of 20 ( $3 \times 200$ ). This LEA would be entitled to \$3,600.

### Invitation to Comment

Interested parties are invited to submit comments and recommendations on these proposed regulations. Written comments may be sent to Mr. Carroll U. Dexter, 300 Independence Avenue, S.W., Room G660, Washington, D.C. 20202. All comments received on or before 60 days after publication of these proposed regulations will be considered in the development of the final regulations.

Comments submitted in response to these proposed regulations will be available for public inspection during and after the comment period in Room G660, 300 Independence Avenue, S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

### Information Requirements

The Department particularly requests comments on whether the program requirements in this document would require transmission of information that is already being gathered by or is available for any other agency or Department of the United States.

### Citation of Legal Authority

The reader will find a citation of statutory or other legal authority in parentheses on the line following each substantive section of these proposed regulations.

Dated: December 22, 1980.

Shirley M. Hufstetler,

Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.041, School Assistance in Federally Affected Areas—Maintenance and Operation)

The Secretary amends 34 CFR Part 222 to add a new Subpart K to read as follows:

#### PART 222—ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES AND ARRANGEMENT FOR EDUCATION OF CHILDREN WHERE LOCAL EDUCATION AGENCIES CANNOT PROVIDE SUITABLE FREE PUBLIC EDUCATION

\* \* \* \* \*

#### Subpart K—Special Impact Aid Program for Refugees

Sec.

222.130 What is the special impact aid program for refugees?

222.131 What regulations apply to the special impact aid program for refugees?

222.132 What definitions apply to the special impact aid program for refugees?

222.133 What documents must an LEA submit to receive a grant?

## Sec.

222.134 How does an LEA count "eligible children?"

222.135 How does the LEA compute the current local expenditure rate?

222.136 How does the secretary determine the size of a grant to an LEA?

222.137 What records must a grantee maintain?

Authority: Education Amendments of 1980, Pub. L. 96-374, 20 U.S.C. 239a.

### Subpart K—Special Impact Aid Program for Refugees

#### § 222.130 What is the special impact aid program for refugees?

This program authorizes Federal financial assistance to any local educational agency (LEA) which experiences in any school year an enrollment increase of at least 20 eligible students who either—

(a) Fled from Cambodia, Vietnam, or Laos and were admitted into the United States on or after January 1, 1979; or

(b) Fled from Cuba or Haiti and were admitted into the United States on or after November 1, 1979.

(20 U.S.C. 239a)

#### § 222.131 What regulations apply to the special impact aid program for refugees?

The following regulations apply to the Special Impact Aid Program for Refugees:

(a) The regulations in this Part 222.

(b) The definitions in the Education Division General Administrative Regulations (EDGAR) in 34 CFR Part 77 (General).

(20 U.S.C. 239a, 1221e-3(2)(1))

#### § 222.132 What definitions apply to the special impact aid program for refugees?

(a) The following terms used in this part are defined in EDGAR (34 CFR Part 77):

Applicant  
Application

(20 U.S.C. 239a, 1221e-3(a)(1))

(b) *Definitions that apply to this part.*

The following definitions apply specifically to this part:

"Act" means the Education Amendments of 1980 (Pub. L. 96-374).

"Eligible children" means—

(i) Aliens who fled from Cambodia, Vietnam, or Laos, and who, on or after January 1, 1979—

(i) Were admitted into the United States as refugees under section 207 of the Immigration and Nationality Act;

(ii) Are applicants for asylum or have been granted asylum in the United States; or

(iii) Were paroled into the United States as refugees under section 212(d)(5) of the Immigration and Nationality Act; or

(2) Aliens who fled from Cuba or Haiti and who, on or after November 1, 1979—

(i) Were admitted into the United States as refugees under section 207 of the Immigration and Nationality Act;

(ii) Are applicants for asylum or have been granted asylum in the United States;

(iii) Are paroled into the United States as refugees under section 212(d)(5) of the Immigration and Nationality Act; or

(iv) Are Cuban or Haitian entrants (status pending) who entered the United States on or after that date.

(20 U.S.C. 239a)

#### § 222.133 What documents must an LEA submit to receive a grant?

(a) To apply for assistance under the Act, the applicant LEA shall file an application with the Secretary which includes—

(1) An accurate count of the total number of eligible children;

(2) The current local expenditure rate of the applicant LEA stated in § 222.135.

(3) An assurance that no eligible child counted for purposes of this section shall be counted for payments made under any other provision of Pub. L. 81-874.

(4) Any other information and assurances the Secretary considers as necessary to make appropriate decisions and ensure that the applicant complies with the Act and regulations.

(20 U.S.C. 239a)

#### § 222.134 How does the LEA count eligible children?

The applicant LEA shall conduct a survey to determine the number of eligible children in average daily attendance (ADA). For each eligible child the LEA shall establish in its survey—

(a) The country from which the child migrated to the United States;

(b) The date of the child's entry into the United States;

(c) That the child is in the United States under one of the provisions referred to in paragraphs (1) (i), (ii) or (iii), or (2) (i), (ii), (iii) or (iv) of the definition of "eligible children" in § 222.132(b); and

(d) The date that the child originally enrolled in the applicant LEA.

#### § 222.135 How does the LEA compute the current local expenditure rate?

(a) The current local expenditure rate is the amount of funds per child that the applicant derives and expends from State and local sources of revenue for free public education.

(b) The current local expenditure rate does not include amounts of funds made

available to the applicant by the Federal Government.

(c) The current local expenditure rate shall be based upon the most recent year for which the applicant LEA has data.

(20 U.S.C. 239a)

#### § 222.136 How does the Secretary determine the size of a grant to an LEA?

(a) To determine the size of a grant, the Secretary multiplies the number of eligible children in excess of 20 in the applicant LEA by the current local expenditure rate of the LEA, and adds \$200 for each eligible child in excess of 20.

(b) In the event that the appropriation is not large enough to fully fund all eligible LEAs in accordance with paragraph (a) of this section, the Secretary proportionately reduces the entitlement for each eligible LEA.

(20 U.S.C. 239a)

#### § 222.137 What records must a grantee maintain?

The grantee shall maintain, and make available to the Secretary upon request, adequate written records to substantiate its entitlement to funds under the Special Impact Aid Program for Refugees.

(20 U.S.C. 239a)

BILLING CODE 4000-01-M

### 34 CFR Part 777

#### Library Research and Demonstration Program (Title II-B HEA)

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

**SUMMARY:** The Secretary proposes to amend the regulations for the Library Research and Demonstration Program. The regulations are being amended to reflect the statutory changes contained in the Education Amendments of 1980, to incorporate the general selection criteria in the Education Division General Administrative Regulations (EDGAR), and to reflect administrative experience.

**DATES:** Comments must be received on or before January 29, 1981.

**ADDRESSES:** Comments should be addressed to Mr. Henry Drennan, Library Research and Demonstration Branch, U.S. Department of Education, Room 3319-A, ROB-3, 400 Maryland Avenue, S.W., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Library Research and Demonstration Branch, U.S. Department of Education, Room 3319-A, ROB-3, 400 Maryland

Avenue, S.W., Washington, D.C. 20202.  
Telephone No. (202) 245-2993.

**SUPPLEMENTARY INFORMATION:** The Library Research and Demonstration Program awards and administers grants and contracts for research and demonstration projects to improve libraries, including the promotion of economical and efficient information delivery, cooperative efforts related to librarianship, and developmental projects; to improve training in librarianship; to improve information technology; and to disseminate information that is derived from Library Research and Demonstration Program projects.

The revisions to these regulations reflect: The Education Amendments of 1980, Pub. L. 96-374, the Education Division General Administrative Regulations (EDGAR), and administrative experience.

The most significant revisions to the proposed regulations are the following:

(a) The selection criteria for judging applications is changed to place more emphasis on the plan of operation, quality of key personnel, and significance of the proposed project.

(b) The purpose of the program has been expanded to include the promotion of economical and efficient information delivery, the promotion of cooperative efforts related to librarianship, the support of developmental projects, and the improvement of information technology.

(c) Eligibility for grants and contracts is expanded to include profit making organizations, agencies, and institutions.

These regulations will be codified in Title 34 of the Code of Federal Regulations along with other Department of Education programs.

#### Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before the 30th day after publication of this document will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3319-A, ROB-3, 7th and D Streets, S.W.,

Washington, D.C. between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

#### Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

(Catalog of Federal Domestic Assistance No. 84.039, Library Research and Demonstration Program. Part I of OMB Circular A-95 does not apply to this program)

The Secretary proposes to amend Part 777 of 34 CFR to read as follows:

### PART 777—LIBRARY RESEARCH AND DEMONSTRATION PROGRAM

#### Subpart A—General

Sec.

777.1 Description of the Library Research and Demonstration Program.

777.2 Eligible parties.

777.3 Regulations that apply to grants.

777.4 Regulations that apply to contracts.

777.5 Definitions that apply to the Library Research and Demonstration Program.

#### Subpart B—Kinds of Projects for Which Grants and Contracts are Made

777.10 Program elements.

#### Subpart C—How to Apply for a Grant

777.20 Application requirements.

#### Subpart D—How a Grant is Made

777.30 How the Secretary judges applications.

777.31 Selection criteria for evaluating applications.

#### Subpart E—Conditions that Must be Met by a Grantee

777.40 Coordination with other groups.

#### Subpart F—The Administrative Responsibilities of a Grantee

777.50 Performance reports.

**Authority:** Part B of Title II of the Higher Education Act of 1965, as amended by Section 201 of the Education Amendments of 1980, 94 Stat. 1383 [20 U.S.C. 1021 et seq.].

#### Subpart A—General

##### § 777.1 Description of the Library Research and Demonstration Program.

The purpose of the Library Research and Demonstration Program is to encourage research and development relating to—

(a) The improvement of libraries, including:

(1) the promotion of economical and efficient information delivery,

(2) cooperative efforts related to librarianship, and

(3) developmental projects;  
(b) Training in librarianship; and  
(c) The improvement of information technology.

(Section 201, 223 of the Act; 20 U.S.C. 1021, 1033)

##### § 777.2 Eligible parties.

Applications for grants and contracts may be submitted by—

(a) An institution of higher education; or

(b) A public or private agency, institution or organization.

(Section 223 of the Act; 20 U.S.C. 1033)

##### § 777.3 Regulations that apply to grants.

The following regulations apply to grants under the Library Research and Demonstration Program:

(a) The Education Division General Administration Regulations (EDGAR) 34 CFR 75 and 34 CFR 77.

(b) The regulations in this Part 777.

(20 U.S.C. 3474)

##### § 777.4 Regulations that apply to contracts.

The regulations in this part do not govern the award of contracts under the Library Research and Demonstration Program. Contracts under this part are governed by—

(a) Federal and Department procurement regulations in 41 CFR Chapters 1 and 34; and

(b) The requests for proposals for the procurement, if any, referenced in the Commerce Business Daily.

(20 U.S.C. 3474)

##### § 777.5 Definitions that apply to the Library Research and Demonstration Program.

(a) Definitions in EDGAR. The following terms used in this part are defined in 34 CFR Part 77:

Applicant	Grant
Application	Grantee
Award	Nonprofit
Budget	Private
Contract	Project
Department	Public
Equipment	Secretary
Facilities	Supplies

(b) Definitions that apply to this Part. The following definitions apply to this Part:

"Act" means the Higher Education Act of 1965, as amended.

"Institution of higher education" means such an institution as defined by Section 1201 of the Act.

"Librarianship" means the principles and practices of the library and information science, including the acquisition, organization, storage, retrieval and dissemination of information, and reference and research

use of library and other information resources,

(20 U.S.C. 3474)

### Subpart B—Kinds of Projects for Which Grants and Contracts are Made

#### § 777.10 Authorized activities.

(a) The Secretary may award a grant or contract to support a research and demonstration project that will

(1) Improve—

(i) Libraries;

(ii) Training in librarianship; or

(iii) Information technology; and

(2) Disseminate information that is derived from a project funded under this Part.

(b) A project that includes any one or more of the activities described in § 777.10(a) may be supported under this Part.

(Section 201, 223 of the Act; 20 U.S.C. 1021 and 1033)

### Subpart C—How to Apply for a Grant

#### § 777.20 Application requirements.

An applicant must demonstrate, on the application form furnished by the Secretary, that the proposed project meets the requirements of the Act and all applicable regulations. The applicant must address each of the Selection Criteria for Evaluating Applications in Subpart D.

(Section 223 of the Act; 20 U.S.C. 1033)

### Subpart D—How a Grant is Made

#### § 777.30 How the Secretary judges applications.

(a) The Secretary evaluates an application on the basis of the criteria in § 777.31 and awards up to 100 points for these criteria.

(b) The maximum possible score for each complete criterion is indicated in parentheses next to the heading of that criterion.

(20 U.S.C. 3474)

#### § 777.31 Selection criteria for evaluating applications.

(a) *Plan of operation* (25 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that ensures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(i) Members of racial or ethnic minority groups;

(ii) Women;

(iii) Handicapped persons; and

(iv) The elderly.

(b) *Quality of key personnel* (15 points)

(1) The Secretary reviews each application for information that shows the qualifications of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(1) and (2) of this section will commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as, members of racial or ethnic minority groups, women, handicapped persons, and the elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness* (10 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan* (10 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project, and, to the extent possible, are

objective and produce data that are quantifiable.

(e) *Adequacy of resources* (5 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(f) *Significance of proposed project* (30 points)

The Secretary reviews each application for information that shows the extent to which—

(1) The proposed project—

(i) Addresses an important library or information problem;

(ii) Is likely to improve operations or service in a significant number of libraries; or

(iii) Is likely to fulfill unmet informational, educational or cultural needs related to libraries and information science.

(2) The applicant demonstrates and understanding of the nature and magnitude of the needs to be addressed as well as the success or failure of related research and development activity, and

(3) The proposed project addresses any priorities established for this program.

(g) *Dissemination* (5 points)

The Secretary reviews each application for information that shows—

(i) Results of the project will be adequately disseminated, and

(ii) To the extent possible, the project will be continued or replicated after the termination of Federal funding.

(Section 223 of the Act; 20 U.S.C. 1033)

### Subpart E—Conditions That Must be Met by a Grantee

#### § 777.40 Coordination with other groups.

Each institution of higher education that receives a grant under this part shall annually inform the State agency, designated under Section 1203 of the Act, of its project activities.

(Section 202 of the Act; 20 U.S.C. 1022)

### Subpart F—The Administrative Responsibilities of a Grantee

#### § 777.50 Performance reports.

The grantee shall submit the performance report required under 34 CFR Part 74, Subpart J, on a quarterly basis.

(Section 223 of the Act; 20 U.S.C. 1033)  
 [FR Doc. 80-40423 Filed 12-29-80; 8:45 am]  
 BILLING CODE 4000-01-M

### 34 CFR Parts 385, 386, 387, 388, 389, and 390

#### Rehabilitation Training Program

**AGENCY:** Department of Education.

**ACTION:** Notice of Proposed Rulemaking; Cross-reference.

**SUMMARY:** The Secretary proposes regulations for the Rehabilitation Training Program in Title 34 of the Code of Federal Regulations:

- (a) Rehabilitation Training—General (Part 385)
- (b) Rehabilitation Long-Term Training (Part 386)
- (c) Experimental and Innovative Training (Part 387)
- (d) State Vocational Rehabilitation Unit In-Service Training (Part 388)
- (e) Rehabilitation Continuing Education Programs (Part 389)
- (f) Rehabilitation Short-Term Training (Part 390).

The Secretary invites comments on these proposed regulations.

The texts of the regulations on which the Secretary invites comments are published in the Rules and Regulations section of this issue of the Federal Register. They have been adopted as final regulations and will govern these programs until the Secretary issues new regulations based on public comment.

**DATES:** All comments, suggestions, or objections must be received on or before.

**ADDRESSES:** Comments should be addressed to: Mr. Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Office of Special Education and Rehabilitative Services, Room 3321, Mary E. Switzer Building, 330 C Street, S.W., Washington, D.C. 20201.

**FOR FURTHER INFORMATION CONTACT:** Mr. Harold F. Shay, Telephone: (202) 245-0079.

**INVITATION TO COMMENT:** For additional details on how to comment, see the Preamble of the final regulations for these programs published in this issue of the Federal Register.

(Catalog of Federal Domestic Assistance Number 84.129, Rehabilitation Training)

Dated: December 22, 1980.

Shirley M. Hufstедler,  
 Secretary of Education.

 BILLING CODE 4000-01-M

### 34 CFR Part 606

#### Continuing Education Outreach—Special Projects

**AGENCY:** Department of Education.

**ACTION:** Notice of Proposed Rulemaking.

**SUMMARY:** The Secretary proposes regulations for the Continuing Education Outreach—Special Projects program for the first time. The regulations are proposed to reflect statutory changes in the Education Amendments of 1980. The proposed regulations will govern the administration of a program primarily designed to demonstrate the effectiveness of alternative providers and approaches which serve the postsecondary education needs of underserved adults. The proposed regulations will ensure that a wide range of applicants, including institutions of higher education, public and private organizations, States, business, industry, and labor, will be eligible to participate in the program.

**DATES:** Comments must be received on or before March 2, 1981. Public meetings are planned to take comments on these proposed regulations. A notice giving the city, time, and location will be published later in the Federal Register.

**ADDRESSES:** Comments should be addressed to Mr. Charles I. Griffith, Office of Postsecondary Education, U.S. Department of Education, (Room 3717, ROB-3), 400 Maryland Avenue, S.W., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Mr. John E. Donahue, Office of Postsecondary Education, U.S. Department of Education, (Room 3717, ROB-3), 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone (202) 245-9868.

**SUPPLEMENTARY INFORMATION:** The Continuing Education Outreach—Special Projects Program is the successor to the Community Service and Continuing Education—Special Projects program. The primary focus has been changed from assisting in the solution of national and regional problems to expanding access to continuing educational opportunities for underserved adults. Eligibility for grants has been expanded to include institutions of higher education, public and private organization community-based educational institutions, States, business, industry, and labor.

Invitation To Comment: Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given earlier in this

preamble. All comments received on or before March 2, 1981, will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3717, ROB-3, 7th and D Streets, S.W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

**Citation of Legal Authority:** A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance Number not yet assigned)

Dated: December 22, 1980.

Shirley M. Hufstедler,  
 Secretary of Education.

The Secretary proposes to amend Part 606 of Title 34 of the Code of Federal Regulations to read as follows:

#### PART 606—CONTINUING EDUCATION OUTREACH—SPECIAL PROJECTS PROGRAM

##### Subpart A—General

Sec.

- 606.1 Continuing Education Outreach—Special Projects Program.
- 606.2 Eligible grantees.
- 606.3 Regulations that apply to the Continuing Education Outreach—Special Projects Program.
- 606.4 Definitions that apply to the Continuing Education Outreach—Special Projects Program.

##### Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

- 606.10 Eligible activities.
- 606.11 Funding priorities.

##### Subpart C—How Does One Apply for a Grant?

- 606.20 How to apply for funds.

##### Subpart D—How Does the Secretary Make a Grant?

- 606.30 Procedures for evaluating applications.
- 606.31 Criteria for evaluating applications.
- 606.32 Project length.

##### Subpart E—What Condition Must Be Met by a Grantee?

- 606.40 Matching requirement.

Authority: Title I of the Higher Education Act of 1965, as amended by Pub. L. 96-374 (20 U.S.C. 1016), unless otherwise noted.

### Subpart A—General

#### § 606.1 Continuing Education Outreach—Special Projects.

The Continuing Education Outreach—Special Projects program provides Federal financial assistance for projects designed to demonstrate the effectiveness of alternative providers and approaches in increasing access to postsecondary continuing educational opportunities for underserved adult learners.

(20 U.S.C. 1016)

#### § 606.2 Eligible grantees.

The following parties are eligible to receive grants under this program:

- (a) Institutions of higher education.
- (b) Public and private institutions and organizations, including business, industrial, and labor organizations.
- (c) States.
- (d) Any combination of these institutions, organizations, or States.

(20 U.S.C. 1016)

#### § 606.3 Regulations that apply to the Continuing Education Outreach—Special Projects Program.

The following regulations apply to Continuing Education Outreach—Special Projects:

- (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs) and 34 CFR Part 77 (General).
- (b) The regulations in this Part 606.

(20 U.S.C. 1016; 20 U.S.C. 1221e-3(a)(1))

#### § 606.4 Applicable definitions that apply to the Continuing Education Outreach—Special Projects Program.

(a) *Definitions in EDGAR.* The following terms used in this part as defined in 34 CFR Part 77:

Applicant	Private
Application	Project
Budget period	Project period
Contract	Public
Fiscal year	Secretary
Grant	State
Grantee	

(b) *Definitions that apply to this part.* The following definitions apply to this part:

“Act” means Title XII of the Higher Education Act of 1965, as amended.

“Adults whose educational needs have been inadequately served” means individuals 18 years of age or older who—because of circumstances of age, sex, low income, handicap, minority status, rural isolation, status of unemployment, lack of education, or

other significant barriers—have been discouraged from obtaining equal educational opportunities.

“Continuing education” means postsecondary instruction and support services designed to meet the educational needs of adults, including the expansion of available learning opportunities for adults whose educational needs are inadequately served by current educational offerings in their communities.

(20 U.S.C. 1018)

### Subpart B—What Kinds of Projects Does the Secretary Assist Under This Program?

#### § 606.10 Eligible activities.

The Secretary makes grants for projects that:

- (a) Develop and evaluate innovative delivery systems, particularly those involving alternative providers, that increase access to postsecondary education for adults;
- (b) Expand the range of educational and community resources that meet the needs of underserved adults for continuing education;
- (c) Promote the development of interstate educational delivery systems, cooperative and consortial arrangements, and programs—including telecommunications—that more effectively address regional needs for continuing education;
- (d) Stimulate and evaluate creative approaches to the problems of access for adults inadequately served by existing educational offerings;
- (e) Develop statewide, regional, or national programs to coordinate educational and occupational information, including information on student financial assistance, through creation and expansion of data banks for the more effective coordination and dissemination of such information;
- (f) Assist States to perform more effectively their functions of accrediting institutions of higher education in their State;
- (g) Provide preservice and inservice training to personnel involved in child-care, including the recruitment and training of low-income parents for positions in childcare;
- (h) Provide specialized training in early childhood education;
- (i) Develop improved teacher certification criteria for child-care programs.

(20 U.S.C. 1016)

- (j) Provide preservice and inservice training to personnel involved in child-care, including the recruitment and training of low-income parents for positions in childcare;
- (k) Provide specialized training in early childhood education;
- (l) Develop improved teacher certification criteria for child-care programs.

(20 U.S.C. 1016)

#### § 606.11 Funding priorities.

(a) For any fiscal year the Secretary establishes priorities for the funding of proposed projects. The priorities shall

be consistent with the objectives listed in § 606.10 and shall be announced in the Federal Register.

(b) To be eligible for funding a proposed project must respond to one of the priorities established by the Secretary.

(20 U.S.C. 1016)

### Subpart C—How Does One Apply For a Grant?

#### § 606.20 How to apply for funds.

(a) An applicant requesting funds under this part shall use the following procedures:

- (1) The procedures contained in EDGAR (34 CFR Part 75, Subpart C); and
- (2) The following special application procedures:

(i) On or before the deadline date for submitting its application to the Secretary, the applicant shall submit a copy of its application, with a letter asking for comment, to the State agency responsible for comprehensive postsecondary education planning under section 1203 of the Act (Federal-State agreements).

(ii) The applicant shall attach to its application to the Secretary a copy of its letter requesting the State agency to comment on the application.

(b) An applicant shall apply for a grant that extends from 18 to 30 months in duration.

(20 U.S.C. 1016)

### Subpart D—How Does the Secretary Make a Grant?

#### § 606.30 Procedure for evaluating applications.

(a) The Secretary evaluates an application on the basis of the criteria in § 606.31.

(b) The Secretary awards up to 100 points for these criteria.

(c) The maximum score for each criterion is indicated in parentheses.

(d) The Secretary considers the rank order of applications in selecting projects to be awarded grants.

(20 U.S.C. 1016)

#### § 606.31 Criteria for evaluating applications.

(a) *Plan of Operation.* (10 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the projects;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(b) *Quality of key personnel.* (7 points)

(1) The Secretary reviews each application for information that shows the quality of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualification of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section plans to commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of racial or ethnic minority groups, women, handicapped persons, and the elderly.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (5 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the projects.

(d) *Evaluation plan.* (12 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project. (See 34 CFR 75.590—Evaluation by the grantee.)

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the

project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (3 points)

The Secretary looks for information that shows—

(1) The facilities that the applicant plans to use are adequate; and

(2) The equipment and supplies that the applicant plans to use are adequate.

(f) *Innovation.* (10 points)

The Secretary reviews each application to determine the extent to which the proposed project duplicates current or past projects in the field of postsecondary continuing education.

(g) *Responsiveness to priorities.* (14 points)

The Secretary reviews each application to determine the extent to which the proposed project is responsive to one of the priorities established under § 606.11 for the fiscal year in which the application is submitted.

(h) *Replicability.* (12 points)

The Secretary reviews each application for information that describes the methods the applicant plans to use to disseminate the results of the proposed project to the general public and to professionals in the field of continuing education.

(i) *Dissemination.* (12 points)

The Secretary reviews each application for information that describes the methods the applicant plans to use to disseminate the results of the project to the general public and to professionals in the field of continuing education.

(j) *Value to the field of continuing education.* (15 points)

The Secretary reviews each application to assess the degree to which the proposed project would employ, or result in the development of, new approaches, methods, or materials of value in increasing the effectiveness of continuing education programs.

(20 U.S.C. 1016)

#### § 606.32 Project length.

(a) The Secretary funds projects that are designed to be from eighteen to thirty months in length.

(1) The Secretary may issue a grant for a budget period of up to 12 months.

(2) The grantee may apply for a continuation grant on a noncompetitive basis contingent upon satisfactory performance and the availability of funds.

(20 U.S.C. 1016)

#### Subpart E—What Condition Must Be Met by a Grantee?

##### § 606.40 Matching requirement

A grantee shall pay from non-federal funds at least one-third of the cost of its project funded under this part.

(20 U.S.C. 1019)

[FR Doc 80-40425 Filed 12-29-80; 8:45 am]

BILLING CODE 4000-01-M

#### 34 CFR Parts 350, 351, 352, 353, 354, 355, and 356

#### National Institute of Handicapped Research

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

**SUMMARY:** The Secretary is proposing regulations to implement the new and revised research authorities contained in Title II of the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Public Law 95-602). These include revisions to existing grant authorities under which the scope of permissible research activity and the class of eligible applicants has been broadened. The regulations also cover a number of new special purpose grants and other assistance programs, a new research fellowship program, and requirements governing the peer review of all applications for grant assistance, all authorized by the 1978 Amendments.

**DATE:** Interested persons are invited to submit comments or suggestions regarding the proposed regulations on or before March 2, 1981.

**ADDRESS:** All written comments and suggestions should be sent to Nathan Ed Acree, National Institute of Handicapped Research, Department of Education, Switzer Office Building 3511, Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Nathan Ed Acree, National Institute of Handicapped Research, Room 3428, Switzer Office Building, 330 C Street, S.W., Washington, D.C. 20202, Area Code (202) 472-5248 or TTY (202) 245-0591.

**SUPPLEMENTARY INFORMATION:** The Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 located within a single title, Title II, all of the rehabilitation research authorities and established a National Institute of Handicapped Research within the Department of Health, Education, and Welfare to administer these programs. All functions of the National Institute of Handicapped Research were subsequently transferred to the

Department of Education under section 301(a)(4)(c) of the Department of Education Organization Act (Public Law 96-88).

#### Statutory Changes

The 1978 Amendments authorized a number of new Federal grant and other assistance programs to support the conducting of rehabilitation research. These include:

(1) A program under section 204(b)(6) of the Act to conduct research concerning the use of existing telecommunication systems which have the potential for substantially improving service delivery methods;

(2) A program under section 204(b)(7) of the Act to conduct joint projects with the National Institutes of Health, the Health Services Administration, the Administration on Aging, the National Science Foundation, the Veterans' Administration, the Office of Education, the National Aeronautics and Space Administration, other Federal agencies, and private industry in areas of joint interest involving rehabilitation;

(3) A program under section 204(b)(8) of the Act to conduct research related to the rehabilitation of handicapped children and of handicapped individuals who are aged sixty or older;

(4) A program under section 204(b)(9) of the Act to conduct research to develop and demonstrate innovative methods of attracting and retaining professionals to serve in rural areas;

(5) A model research and demonstration project under section 204(b)(10) of the Act to assess the feasibility of establishing a center for producing and distributing to deaf individuals captioned video cassettes providing a broad range of educational, cultural, scientific, and vocational programming;

(6) A model research and demonstration program under section 204(b)(11) of the Act to develop innovative methods of providing services to preschool age handicapped children;

(7) A model research and training program under section 204(b)(12) of the Act to establish model training centers to develop and use more advanced and effective methods of evaluating and developing the employment potential of handicapped individuals; and

(8) A fellowship program under section 202(d) of the Act to procure the assistance of highly qualified research fellows from the United States and foreign countries.

The 1978 Amendments also revised existing grant authorities by:

(1) Expanding the class of applicants eligible for grant assistance under all

research programs to include private profitmaking agencies and organizations. Previously, eligibility was limited to States and public or nonprofit agencies and organizations;

(2) Broadening the scope of research activity under the general research and demonstrations authority of section 204(a) of the Act from a purely vocational or employment focus to encompass all rehabilitation problems encountered by handicapped individuals in their daily activities. Research under this authority now includes "basic research where related to rehabilitation techniques or services" and research related to psychiatric factors affecting rehabilitation; and

(3) Requiring Rehabilitation Research and Training Centers under section 204(b)(1) of the Act to conduct research based on the particular needs of handicapped individuals in the geographic area that the Center serves.

The 1978 Amendments also expanded, under certain of the new specialized research programs, the group of handicapped persons intended to benefit from research findings. Although the primary beneficiaries of the Institute's research programs continue to be State vocational rehabilitation agency clients, there are newly authorized grant programs that focus on the needs of preschool age handicapped children, other handicapped children, deaf persons, and handicapped individuals who are aged sixty or older.

#### Format and Content of the Proposed Regulations

Organizationally, the proposed regulations are divided into seven parts: a general part (Part 350) that contains provisions common to all of the research programs; five parts (Parts 351, 352, 353, 354, and 355) devoted to separate and distinct research grant programs; and a final part (Part 356) related to the research fellowship program.

Although section 204 of the Act contains 13 different authorities for making research grants, an administrative decision was made to organize these 13 authorities into five distinct research grant programs to correspond with the annual budget categories used by Congress in appropriating funds for these programs.

#### Part 350

Part 350, the general part, contains a statement of the purposes of the various rehabilitation research programs and a list of the various agencies and organizations eligible for grant assistance. It identifies the regulations and definitions that are applicable to these programs. Part 350 also contains

grant application procedures, peer review, confidentiality, non-Federal matching requirements, and selection criteria to be used in reviewing and evaluating all applications for grant assistance.

The selection criteria proposed for the rehabilitation research programs are based primarily on the selection criteria set forth in the Education Division General Administrative Regulations (EDGAR) located in 34 CFR 75.202-206. Four additional selection criteria have been developed, however, that cover important elements of an effective research project that are not addressed by the EDGAR criteria. These are: project concept or national need (34 CFR 350.36(a)); research design (34 CFR 350.36(b)); research utilization plan (34 CFR 350.36(g)); and literature review (34 CFR 350.36(i)).

#### Specialized Research Grant Programs

Parts 351, 352, 353, 354, and 355 contain all of the specific requirements that apply to the direct grant programs established in section 204 of the Act.

Part 351, the Research and Demonstrations Projects Program, consists of all project activities except those related to technology and engineering, knowledge dissemination and utilization, and those activities specifically conducted by Research and Training Centers, Engineering Centers, and Model Training Centers. This includes a majority of the research activities authorized by section 204(a) of the Act as well as specialized projects under sections 204(b)(3), 204(b)(4), 204(b)(5), 204(b)(7), 204(b)(8), 204(b)(9), and 204(b)(11) of the Act.

Part 352 contains provisions related to the conduct of research and training activities by Rehabilitation Research and Training Centers authorized under section 204(b)(1) of the Act.

Part 353, the Rehabilitation Engineering Program, contains provisions related to research activities conducted by Rehabilitation Engineering Research Centers authorized by section 204(b)(2) of the Act. It also contains provisions related to specialized research activities that have an engineering focus under sections 204(b)(6) (telecommunications systems) and 204(b)(10) (video cassettes for deaf) of the Act.

Part 354 consists of regulations governing Model Training Centers authorized under section 204(b)(12) of the Act.

Part 355, the Knowledge Dissemination and Utilization Program, consists of project activities concerned with the development of practical applications for research findings,

statistical studies, and information dissemination. These activities are considered to be research "related activities which bear directly on the development of methods, procedures, and devices to assist in the provision of vocational and other rehabilitation services to handicapped individuals" authorized under section 204(a) of the Act. Projects supported under this part assist the Director of the National Institute of Handicapped Research in carrying out the knowledge dissemination functions mandated under 202(b) of the Act.

#### Research Fellowship Program

Part 356 contains requirements that apply to the Research Fellowship Program authorized by section 202(d) of the Act. Under this program assistance will be provided to individual researchers to engage in activities related to the solution of specific rehabilitation problems encountered by handicapped persons.

#### Assessment of Educational Impact

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

#### Citation of Legal Authority

A citation of statutory authority is placed in parenthesis on the line following each substantive provision of the proposed regulations. The first citation is the appropriate section of the Rehabilitation Act of 1973, as amended, and it is followed by a citation to the same provision in the United States Code.

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

(Catalog of Federal Domestic Assistance Number 84.133, National Institute of Handicapped Research)

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 350 to read as follows:

### Part 350—HANDICAPPED RESEARCH: GENERAL PROVISIONS

#### Subpart A—General

- Sec.
- 350.1 Handicapped Research.
- 350.2 Who is eligible for assistance under these programs?
- 350.3 What regulations apply to these programs?
- 350.4 What definitions apply to these programs?

#### Subpart B—Reserved

#### Subpart C—How Does One Apply for a Grant?

- 350.20 What are the application procedures for these programs?
- 350.21 How does an applicant inform the Secretary of its participation in the support of a project or center?

#### Subpart D—How Does the Secretary Make a Grant?

- 350.30 To whom does the Secretary refer an application?
- 350.31 What is the purpose of a peer review?
- 350.32 What is the composition of peer review panel?
- 350.35 How does the Secretary evaluate an application?
- 350.36 What selection criteria does the Secretary use in reviewing a grant application?

#### Subpart E—What Conditions Apply to a Grantee?

- 350.40 What are the matching requirements?

#### Subpart F—What are the Administrative Responsibilities of a Grantee or Fellow?

- 350.50 What are the requirements with respect to protection, use, and release of personal information?

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93-112), as amended by Public Law 95-602 (29 U.S.C. 760-762; 92 Stat. 2962-2966).

#### Subpart A—General

##### § 350.1 Handicapped research.

- (a) The Secretary provides financial assistance to—
- (1) Support the conduct of research, demonstration projects and related activities for the rehabilitation of handicapped individuals, including programs designed to train persons who provide rehabilitation services and persons who conduct research;
  - (2) Facilitate the distribution of information concerning developments in rehabilitation procedures, methods, and devices;
  - (3) Improve the distribution of technological devices and equipment; and
  - (4) Increase the scientific and technological information presently available in the field of rehabilitation.
- (b) The Secretary awards financial assistance through six types of programs—
- (1) Research and demonstration projects (34 CFR Part 351);
  - (2) Research grants for establishment and operation or rehabilitation research and training centers (34 CFR Part 352);
  - (3) Research grants for establishment and operation of rehabilitation engineering programs (34 CFR Part 353);

(4) Research grants for establishment and operation of model training centers (34 CFR Part 354);

(5) Knowledge dissemination and research utilization projects (34 CFR Part 355); and

(6) Research fellowships (34 CFR Part 356).

(Section 200 and 204; 29 U.S.C. 760 and 762)

##### § 350.2 Who is eligible for assistance under these programs?

The following agencies and organizations are eligible for grants or contracts as appropriate under these programs:

- (a) State and public agencies or organizations;
- (b) Private agencies or organizations; and
- (c) Institutions of higher education.

(Section 204; 29 U.S.C. 762)

##### § 350.3 What regulations apply to these programs?

The following regulations apply to grants under the Handicapped Research Programs—

- (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs).
- (b) The EDGAR regulations in 34 CFR Part 77 (Definitions);
- (c) The regulations in this Part, 34 CFR Part 350;
- (d) The regulations in 34 CFR Parts 351, 352, 353, 354, 355, or 356, as appropriate; and
- (e) 45 CFR Part 46 (Protection of Human Subjects).

(Sections 202 and 204; 29 U.S.C. 761a, 762)

##### § 350.4 What definitions apply to these programs?

(a) The following definitions in 34 CFR Part 77 apply to the programs under Handicapped Research—

Applicant	Preschool
Application	Private
Award	Project
Budget Period	Project Period
Department	Public
Grant Period	Secretary
Nonprofit	State
Nonpublic	

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

(b) The following definitions also apply to programs under Handicapped Research.

"Act" means the Rehabilitation Act of 1973 (Public Law 93-112), as amended.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"Core area" means a program of research in which the entire activity is planned so as to contribute in a sequential or complementary way to a centralized body of knowledge of manageable scope.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Demonstration*" means the application of results derived from previous research, testing, or practice for purposes of establishing the reliability, furthering the validity, or determining the cost effectiveness of new rehabilitation procedures.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Development*" means the systematic use of knowledge and understanding gained from research, directed toward creating useful materials, devices, systems, or methods, including design and development of prototypes and processes.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Director*" means Director of the National Institute of Handicapped Research.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Fellowship*" means a financial award to procure the assistance of highly qualified research fellows from the United States and foreign countries. It is not a grant.

(Section 202(d); 29 U.S.C. 761a(d))

"*Handicapped individual*" means any individual who (i) has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment; and (ii) can reasonably be expected to benefit in terms of employability from the provision of vocational rehabilitation services.

(Section 7(7)A; 29 U.S.C. 706(7)(A))

"*Institute*" means the National Institute of Handicapped Research.

(Section 202(a); 29 U.S.C. 761a(a))

"*Project concept*" means a statement of the purpose, scope, and objectives of a project.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Research*" means intensive systematic study directed toward new or fuller scientific knowledge or understanding of the subject or problem studied. Research is classified as basic or applied.

(i) "*Basic research*" is research in which the investigator is concerned primarily with gaining new knowledge or understanding of the subject under study.

(ii) "*Applied research*" is research in which the investigator is primarily interested in a practical use of well established basic information for the purpose of meeting a recognized need.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Research utilization*" means activities seeking to link research

findings to practical applications in planning, policy-making, program administration, and service practice in the delivery of services to handicapped persons.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*State rehabilitation agency*" means the sole State agency designated to administer (or supervise local administration of) the State plan for vocational rehabilitation services. The term includes the State agency for the blind, if designated as the State agency with respect to that part of the plan relating to the vocational rehabilitation of blind individuals.

(Section 101(a)(1)(A); 29 U.S.C. 721(a)(1)(A))

"*Target population*" means the group of individuals, organizations, or other entities which would be affected by the results of research and to whom results would ordinarily be communicated. More than one target group may be involved since research results may affect those who receive services, provide services, or administer services.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

"*Training*" means a planned and systematic sequence of instruction under competent supervision which is designed to impart predetermined skills and knowledge.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

#### Subpart B—[Reserved]

#### Subpart C—How Does One Apply for a Grant?

##### § 350.20 What are the application procedures for these programs?

An applicant for assistance under 34 CFR Parts 351, 352, 353, 354, or 355 shall submit a copy of the application to the State rehabilitation agency for comment in accordance with the procedures in EDGAR §§ 75.155-75.159.

(Sections 204c, 306(i); 29 U.S.C. 762(c), 776(i))

##### § 350.21 How does an applicant inform the Secretary of its participation in the support of a project or center?

With the exception of 34 CFR Part 356 (Fellowships), an applicant shall identify in the application the financial contribution it proposes to make to support the proposed project or center.

(Section 204; 29 U.S.C. 762)

#### Subpart D—How Does the Secretary Make a Grant?

##### § 350.30 To whom does the Secretary refer an application?

(a) The Secretary refers each application for a grant under the

Handicapped Research Programs to a peer review panel established by the Secretary. The procedures for review by a group of experts under EDGAR § 75.217 (a) and (b) do not apply.

(b) The peer review panel reviews the application for the Secretary on the basis of the criteria described in § 350.36.

(Section 202(e); 29 U.S.C. 761a(e))

##### § 350.31 What is the purpose of peer review?

The purpose of peer review is to insure that those activities supported by the Institute are of the highest scientific, administrative, or technical quality and that the results may be widely applied to appropriate population groups and situations.

(Section 202(e); 29 U.S.C. 761a(e))

##### § 350.32 What is the composition of a peer review panel?

(a) The Secretary selects as members of a peer review panel non-Federal scientists and other experts qualified by training and experience in particular scientific, administrative, or technical fields to give expert advice on the scientific or technical merit of grant applications.

(b) In selecting an individual for membership on a peer review panel, the Secretary takes into account, among other factors, the following:

(1) The level of formal scientific or technical education completed by the individual;

(2) The extent to which the individual has engaged in scientific, technical, or administrative activities appropriate to the category of applications that the panel will consider, the role of the individual in those activities, and the quality of those activities; and

(3) The recognition received by the individual as reflected by awards and other honors from scientific and professional agencies and organizations outside the Department.

(Section 202(e); 29 U.S.C. 761a(e))

##### § 350.35 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application under 34 CFR Parts 351, 352, 353, 354, and 355 on the basis of the criteria in § 350.36, except as set forth in § 355.31(b).

(b) The Secretary awards up to 100 possible points for these criteria.

(c) The maximum possible score for each criterion is indicated in parentheses after the descriptive title of the criterion. For two of the criteria there is also a designation of the maximum score assigned to each of the component elements of those criteria.

(Section 202e; 29 U.S.C. 761a(e))

**§ 350.36 What selection criteria does the Secretary use in reviewing a grant application?**

(a) *Project concept or national need* (5 points).

(1) The Secretary reviews each application for information that shows the quality of the "project concept" or "national need" statement.

(2) The Secretary looks for information that shows—

(i) For any application that is addressing a specific project concept published by the Secretary in a Federal Register Application Notice, how well the project would contribute to its achievement.

(ii) For any application not addressed to a specific project concept (but responding to an Application Notice published in the Federal Register asking for field designed proposals), what national need the application will address, how clearly this need is described, how important the need is, and how well the project will meet the need.

(b) *Research design* (35 points).

(1) The Secretary reviews each application for information that shows the quality of the research design of the project.

(2) The Secretary looks for information that shows—

(i) Clearness and achievability of the project objectives (10 of the 35 points);

(ii) Soundness of the procedures to be utilized in achieving each objective (5 of the 35 points);

(iii) Precise definitions of terms where necessary (5 of the 35 points);

(iv) Description of subject population and appropriateness of sample size (5 of the 35 points);

(v) Appropriateness of statistical and other instruments to be used (5 of the 35 points); and

Adequacy of data analysis and basis for the conclusions reached (5 of the 35 points).

(c) *Plan of operation* (15 points).

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the operational design of the project (3 of the 15 points);

(ii) An effective plan of management that insures proper and efficient administration of the project (3 of the 15 points);

(iii) A clear description of how the objectives of the project relate to the purpose of the program (3 of the 15 points);

(iv) The way the applicant plans to use its resources and personnel to achieve each objective (3 of the 15 points);

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Handicapped persons;

(B) The elderly;

(C) Women; and

(D) Members of racial or ethnic minority groups (3 of the 15 points).

(d) *Evaluation plan* (10 points).

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective, and produce data that are quantifiable.

(e) *Quality of key personnel* (10 points).

(1) The Secretary reviews each application for information that shows the quality of key personnel proposed for the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented such as—

(A) Handicapped persons;

(B) The elderly;

(C) Women; and

(D) Members of racial or ethnic minority groups.

(3) To determine personnel qualifications, the Secretary considers the experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(f) *Adequacy of resources* (5 Points).

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(g) *Research utilization plan* (10 points).

(1) The Secretary reviews each application for information that shows the quality of the research utilization plan.

(2) The Secretary looks for information that show—

(i) What will be delivered to the Department;

(ii) The format in which the results, products, or outcomes will be delivered to the Department;

(iii) The way in which results, products, or outcomes will be developed or provided for dissemination purposes to specified target populations; and

(iv) The procedures to be used in disseminating the results, products, or outcomes at the local, State, or national levels.

(h) *Budget and cost effectiveness* (5 points).

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(i) *Literature review* (5 Points).

(1) The Secretary reviews each application for information that shows the quality of the literature review.

(2) The Secretary looks for information that shows—

(i) A description of what has been done previously to alleviate the problem; and

(ii) An identification of the gaps that may be alleviated by the proposed project.

(34 CFR 75.201 through 75.206)

(Section 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761a(i)(1))

**Subpart E—What Conditions Apply to a Grantee?**

**§ 350.40 What are the matching requirements?**

(a) Research and demonstration projects which bear directly on the development of procedures, methods, and devices to assist in the provision of vocational and other rehabilitation services can only be partially funded by the Secretary. It is expected that the grantee will participate in the costs of such projects. No specific percentage of

matching is required. Generally 10 percent is considered adequate.

(b) Grants may be made to pay for part or all of the costs or the following activities: Rehabilitation Research and Training Centers; Rehabilitation Engineering Centers; model training centers; and research projects on spinal cord injury, end-stage renal disease, telecommunications, joint projects with other Federal agencies and private industry, rehabilitation of handicapped children and handicapped individuals who are aged sixty or older, attraction and retention of professional workers in rural areas, captioned video cassettes for deaf individuals, and services for preschool handicapped children and their parents. The Secretary will determine at the time of the award whether the grantee must pay a portion of the project costs.

(Section 204; 29 U.S.C. 762)

#### **Subpart F—What are the Administrative Responsibilities of a Grantee or Fellow?**

##### **§ 350.50 What are the requirements with respect to protection, use, and release of personal information?**

(a) All personal information about individuals served or participating in any project under these parts, including lists of names, addresses, photographs, and records of evaluation, must be held confidential.

(b) The use of information and records concerning individuals must be limited only to purposes directly connected with the project, including project evaluation activities. This information may not be disclosed, directly or indirectly, other than in the administration of the project unless the consent of the agency providing the information and the consent of the individual to whom the information applies, or his or her representative, have been obtained in writing. The Secretary and other Federal or State officials responsible for enforcing legal requirements have access to this information without written consent being obtained. The final product of the project may not reveal any personal identifying information without written consent of the individual or his or her representative.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 351 to read as follows:

### **PART 351—HANDICAPPED RESEARCH: RESEARCH AND DEMONSTRATION PROJECTS**

#### **Subpart A—General**

Sec.

351.1 What is the Research and Demonstration Projects Program?

351.2 Who is eligible for assistance under this program?

351.3 What regulations apply to this program?

351.4 What definitions apply to this program?

#### **Subpart B—What Kinds of Activities Does the Department Support Under This Program?**

351.10 What types of projects are authorized under this program?

#### **Subpart C—[Reserved]**

#### **Subpart D—How Does the Secretary Make a Grant?**

351.30 How is peer review conducted under this program?

351.31 What selection criteria are used under this program?

351.32 What are the priorities for funding under this program?

#### **Subpart E—What Conditions Apply to a Grantee Under This Program?**

351.40 What are the allowable costs?

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93-112) as amended by Public Law 95-602 (29 U.S.C. 760-762; 92 Stat. 2962-2966).

#### **Subpart A—General**

##### **§ 351.1 What is the Research and Demonstration Projects Program?**

A research project under this program is designed—

(a) To assist in the provision of vocational and other rehabilitation services to handicapped individuals, especially the most severely handicapped, through planning and conducting of research, demonstration, and specialized research activities;

(b) To cooperate with and assist in developing and sharing information found useful in other nations in the rehabilitation of handicapped individuals; or

(c) To assist in development of solutions to problems encountered by handicapped individuals in their daily activities, especially problems related to employment.

(Sections 202(g)(1); 204; 29 U.S.C. 761a(g)(1), 762)

##### **§ 351.2 Who is eligible for assistance under this program?**

Those agencies and organizations eligible to apply under this program are described in 34 CFR 350.2.

(Section 204; 29 U.S.C. 762)

##### **§ 351.3 What regulations apply to this program?**

The regulations referenced in 34 CFR 350.3 apply to this program.

(Sections 202 and 204; 29 U.S.C. 761a, 762)

##### **§ 351.4 What definitions apply to this program?**

The definitions listed in 34 CFR 350.4 apply to this program.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

#### **Subpart B—What Kinds of Activities Does the Department Support Under This Program?**

##### **§ 351.10 What types of projects are authorized under this program?**

The Research and Demonstration Projects Program provides financial assistance for the following types of projects—

(a) Medical and other scientific, technical, methodological, and other investigations into the nature of disability, methods of analyzing it, restorative techniques, including basic research where related to rehabilitation techniques or services; studies and analyses of industrial, vocational, social, psychiatric, psychological, economic and other factors affecting rehabilitation of handicapped individuals; special problems of homebound and institutionalized individuals; and other research related to problems encountered by handicapped individuals in their daily activities, especially problems related to employment.

(b) Specialized research activities as follows—

(1) Spinal cord injury research and demonstrations;

(2) End-stage renal disease research and demonstrations;

(3) International research, demonstrations, training, and exchange of experts and technical assistance;

(4) Joint projects with other Federal agencies and private industry;

(5) Research related to handicapped children and handicapped individuals aged 60 years and older;

(6) Special research and demonstration projects designed to develop and demonstrate methods to attract and retain professionals to serve in rural areas in the rehabilitation of handicapped individuals; and

(7) Research and demonstration projects related to the provision of services to handicapped preschool children.

(Sections 204(a), 204(b)(3)-(5), 204(b)(7)-(9), 204(b)(11); 29 U.S.C. 762(a), 762(b)(3)-(5), 762(b)(7)-(9), 762(b)(11))

**Subpart C—Reserved****Subpart D—How Does the Secretary Make a Grant?****§ 351.30 How is peer review conducted under this program?**

Peer review is conducted under this program in accordance with 34 CFR 350.30–350.32.

(Section 202(e); 29 U.S.C. 761a(e))

**§ 351.31 What selection criteria are used under this program?**

The selection criteria for this program are established and described in 34 CFR 350.36, with the weighted scores distributed as follows:

- (a) Project concept or national need (5 Points).
- (b) Research design (35 Points).
- (c) Plan of operation (15 Points).
- (d) Evaluation plan (10 Points).
- (e) Quality of key personnel (10 Points).
- (f) Adequacy of resources (5 Points).
- (g) Research utilization (10 Points).
- (h) Budget and cost effectiveness (5 Points).
- (i) Literature review (5 Points).

(Sections 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761a(i)(1))

**§ 351.32 What are the priorities for funding under this program?**

(a) The Secretary may from time to time reserve funds to support some or all of the types of projects listed in § 350.10.

(b) The Secretary advises the public of these priorities through an Application Notice published in the Federal Register.

(Sections 202(g), 204; 29 U.S.C. 761a(g), 762)

**Subpart E—What Conditions Apply to a Grantee Under This Program?****§ 351.40 What are the allowable costs?**

(a) In addition to those allowable costs set forth in EDGAR §§ 75.530–75.534, the following items are allowable under end-stage renal disease projects:

- (1) Medical and technical expenses pursuant to treatment for end-stage renal disease;
- (2) Purchase or rental or renal dialysis and other machines and supplies necessary for the treatment of end-stage renal disease, when such machines and supplies are not available under other Federal, State, or other program resources;
- (3) Costs incident to the training of a patient with end-stage renal disease or members of the family in the use of renal dialysis and related equipment and in other aspects of end-stage renal disease care, including the use of home aides;

(4) Costs incident to necessary modification of a patient's living quarters;

(5) Hospital and related medical expenses for a donor of a kidney;

(6) Laboratory fees; and

(7) Tissue matching.

(b) If an individual selected to participate in an end-stage renal disease research project under this Part is eligible for and is receiving services for the treatment of end-stage renal disease under any other Federal, State, or other programs, the costs of these services shall not be attributed to a grant under this Part.

(Section 204(b)(4); 29 U.S.C. 762(b)(4))

The Secretary proposes to amend Title 34 of the code of Federal Regulations by adding a new Part 352 to read as follows:

**PART 352—HANDICAPPED RESEARCH: REHABILITATION RESEARCH AND TRAINING CENTERS**

**Subpart A—General****Sec.**

352.1 What is the Rehabilitation Research and Training Centers Program?

352.2 Who is eligible for assistance under this program?

352.3 What regulations apply to this program?

352.4 What definitions apply to this program?

**Subpart B—What Kinds of Activities Does the Department Assist Under This Program?**

352.10 What types of centers are authorized under this program?

**Subpart C—Reserved****Subpart D—How Does the Secretary Make a Grant?**

352.30 How is peer review conducted under this program?

352.31 What selection criteria are used under this program?

352.32 What are the priorities for funding under this program?

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93–112), as amended by Public Law 95–602 (29 U.S.C. 760–762; 92 Stat. 2962–2966).

**Subpart A—General****§ 352.1 What is the Rehabilitation Research and Training Centers Program?**

This program is designed to support—

- (a) The conduct of coordinated and advanced programs of research in rehabilitation;
- (b) The dissemination and active promotion of the utilization of findings resulting from such research; and
- (c) The conduct of training programs (including graduate training) to assist individuals to more effectively provide

rehabilitation services and to provide training (including graduate training) for rehabilitation research and other rehabilitation personnel.

(Section 204(b)(1); 29 U.S.C. 762(b)(1))

**§ 352.2 Who is eligible for assistance under this program?**

Those agencies and organizations eligible to apply under this program are described in 34 CFR 350.2

(Section 204; 29 U.S.C. 762)

**§ 352.3 What regulations apply to this program?**

The regulations referenced in 34 CFR 350.3 apply to this program.

(Sections 202 and 204; 29 U.S.C. 761a, 762)

**§ 352.4 What definitions apply to this program?**

The definitions listed in 34 CFR 350.4 apply to this program.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

**Subpart B—What Kinds of Activities Does the Department Assist Under This Program?****§ 352.10 What types of centers are authorized under this program?**

Rehabilitation research and training centers are established and supported under this program. Within each center three types of activities are prescribed as follows:

- (a) The research to be conducted at each center shall be determined on the basis of the particular needs of handicapped individuals by utilizing the geographic area served by the center as one source for identifying those problems which are national in scope. It may include basic research, where related to identifiable rehabilitation techniques or services, applied medical rehabilitation research, research regarding the psychological and social aspects of rehabilitation, and research related to vocational rehabilitation, independent living, and the rehabilitation of handicapped children and handicapped individuals aged 60 or older. The center shall develop practical applications for the findings of its research. Each separate study or investigation shall have a reasonable relationship to a central topic or research core area and shall contribute cumulatively to a coherent body of knowledge for the resolution of rehabilitation problems.
- (b) Training programs at a center shall endeavor to: widely disseminate and actively promote utilization of new knowledge resulting from research; incorporate rehabilitation education into all rehabilitation related University undergraduate and graduate curricula;

and provide short-term, in-service and continuing education to improve the skills of professionals, paraprofessionals, consumers, parents, and other personnel involved in rehabilitation with respect to new knowledge generated through research findings.

(c) Service program components shall be developed to achieve the integration of services, research, and training necessary to—

(1) Provide direct knowledge and awareness of the needs of handicapped persons;

(2) Provide the linkage and structure to enable a center to more adequately and realistically assess these needs; and

(3) Provide a laboratory for the development, testing, implementation and demonstration of methods, techniques, procedures, and systems, to respond to these needs. Grants may include funds for services rendered by the center to handicapped individuals in connection with research and training activities.

(d) The three major activities—research, training, and services—are expected to be mutually supportive. Specifically, this concept calls for research needs to derive from service delivery problems; for research results to be assessed and applied in service delivery settings; and for research results to be disseminated through training.

(Section 204(b)(1); 29 U.S.C. 762(b)(1))

#### Subpart C—[Reserved]

#### Subpart D—How Does the Secretary Make a Grant?

##### § 352.30 How is peer review conducted under this program?

Peer review is conducted under this program in accordance with 34 CFR 350.30–350.32.

(Section 202(e); 29 U.S.C. 761a(e))

##### § 352.31 What selection criteria are used under this program?

The selection criteria for this program are established and described in 34 CFR 350.36 with the weighted points distributed as follows:

(a) Project concept or national need (5 Points).

(b) Research design (35 Points).

(c) Plan of operation (15 Points).

(d) Evaluation plan (10 Points).

(e) Quality of key personnel (10 Points).

(f) Adequacy of resources (5 Points).

(g) Research utilization plan (10 Points).

(h) Budget and cost effectiveness (5 Points).

(i) Literature review (5 Points).

(Sections 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761a(i)(1))

##### § 352.32 What are the priorities for funding under this program?

(a) The Secretary may from time to time reserve funds to support some or all of the types of research projects listed in 34 CFR 352.10.

(b) The Secretary advises the public of these priorities through an Application Notice in the *Federal Register*.

(Sections 202(g) and 204; 29 U.S.C. 761a(g) and 762)

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 353 to read as follows:

#### PART 353—HANDICAPPED RESEARCH: REHABILITATION ENGINEERING PROGRAM

##### Subpart A—General

Sec.

353.1 What is the Rehabilitation Engineering Program?

353.2 Who is eligible for assistance under this program?

353.3 What regulations apply to this program?

353.4 What definitions apply to this program?

##### Subpart B—What Kinds of Activities Does the Department Support Under This Program?

353.10 What kinds of centers and projects are authorized under this program?

##### Subpart C—[Reserved]

##### Subpart D—How Does the Secretary Make a Grant?

353.30 How is peer review conducted under this program?

353.31 What selection criteria are used under this program?

353.32 What are the priorities for funding under this program?

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93-112), as amended by Public Law 95-602 (29 U.S.C. 760-762; 92 Stat. 2962-2966).

##### Subpart A—General

##### § 353.1 What is the Rehabilitation Engineering Program?

This program is designed to support—

(a) Development of innovative methods of applying advanced medical technology, scientific achievement, and psychiatric, psychological, and social knowledge to solve rehabilitation problems;

(b) Development of systems of technical and engineering information exchange and coordination; and

(c) Improvement in the distribution of technological devices and equipment to handicapped individuals.

(Sections 200(3), 204(b)(2); 29 U.S.C. 760(3), 762(b)(2))

##### § 353.2 Who is eligible for assistance under this program?

Those agencies and organizations eligible to apply under this program are set forth in 34 CFR 350.2.

(Section 204; 29 U.S.C. 762)

##### § 353.3 What regulations apply to this program?

The regulations referenced in 34 CFR 350.3 apply to this program.

(Sections 202 and 204; 29 U.S.C. 761a and 762)

##### § 353.4 What definitions apply to this program?

The definitions listed in 34 CFR 350.4 apply to this program.

(Section 202(i)(1); 29 U.S.C. 761a(i)(1))

#### Subpart B—What Kinds of Activities Does the Department Support Under This Program?

##### § 353.10 What types of projects are authorized under this program?

The Rehabilitation Engineering Research program provides financial assistance for—

(a) Rehabilitation Engineering Research Centers.

(i) Each Rehabilitation Engineering Research Center must be developed around one or more research core areas, each of which must be explored in depth to solve the problems in rehabilitation of handicapped individuals through the combined efforts of medical, engineering, and related sciences;

(ii) Each center must be located in a clinical rehabilitation setting which provides an environment for cooperative research and the transfer of research findings to rehabilitation practice at a reasonable cost.

(iii) Centers may emphasize the medical-technological management of disabling conditions, the adjustment to limitations of function of the individual and to the environment, service delivery systems, or other core areas, utilizing the application of new and innovative technology, and other areas as approved by the Secretary.

(iv) Centers must cooperate with State and other appropriate agencies in developing systems of information exchange and coordination to insure the prompt utilization of research findings.

(b) Research and demonstration projects as follows—

(i) Research and demonstration projects including basic research when related to rehabilitation techniques or services;

(ii) Studies, analyses, and demonstrations of architectural and

engineering design and reductions of environmental barriers adapted to meet the special needs of handicapped individuals;

(iii) Cooperative projects with public or private agencies and organizations;

(iv) Projects concerning existing telecommunication systems;

(v) International research, demonstrations, training and exchange of experts and technical assistance related to technology and engineering;

(vi) A project to assess the feasibility of establishing a center to produce and distribute captioned video cassettes to deaf individuals; and

(vii) Joint project with other Federal agencies and with private industry, including stimulation of private industry in the development and distribution of devices and systems to solve problems of handicapped individuals; and

(viii) Projects of manpower training in Rehabilitation Engineering.

(Sections 204(b)(2), 204(a), 204(b)(5)-(7), 204(b)(10); 29 U.S.C. 762(b)(2), 762(a), 762(b)(5)-(7), 762(b)(10))

#### Subpart C—[Reserved]

#### Subpart D—How Does the Secretary Make a Grant?

##### § 353.30 How is peer review conducted under this program?

Peer review is conducted under this program in accordance with 34 CFR 350.30-350.32.

(Section 202(e); 29 U.S.C. 761a(e))

##### § 353.31 What selection criteria are used under this program?

The selection criteria for this program are established and described in 34 CFR 350.36 with the weighted points distributed as follows:

(a) Project concept or national need (5 Points).

(b) Research design (35 Points).

(c) Plan of operation (15 Points).

(d) Evaluation plan (10 Points).

(e) Quality of key personnel (10 Points).

(f) Adequacy of resources (5 Points).

(g) Research utilization plan (10 Points).

(h) Budget and cost effectiveness (5 Points).

(i) Literature review (5 Points).

(Sections 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761a(i)(1))

##### § 353.32 What are the priorities for funding under this program?

(a) The Secretary may from time to time reserve funds to support some or all of the types of research projects listed in 34 CFR 353.10.

(b) The Secretary advises the public of these priorities through an Application Notice published in the Federal Register.

(Section 202(g); U.S.C. 761a(g))

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 354 to read as follows:

### PART 354—HANDICAPPED RESEARCH: MODEL RESEARCH AND TRAINING PROGRAM

#### Subpart A—General

Sec.

354.1 What is the Model Research and Training Program?

354.2 Who is eligible for assistance under this program?

354.3 What regulations apply to this program?

354.4 What definitions apply to this program?

#### Subpart B—What Kinds of Activities Does the Department Support Under This Program?

354.10 What types of centers are authorized under this program?

#### Subpart C—[Reserved]

#### Subpart D—How Does the Secretary Make a Grant?

354.30 How is peer review conducted under this program?

354.31 What selection criteria are used under this program?

354.32 What are the priorities for funding under this program?

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93-112), as amended by Public Law 95-602 (29 U.S.C. 760-762; 92 Stat. 2962-2966).

#### Subpart A—General

##### § 354.1 What is the Model Research and Training Program?

This program is designed to develop and utilize more advanced and effective methods of evaluating and developing the employment potential of handicapped individuals.

(Section 204(b)(12); 29 U.S.C. 762(b)(12))

##### § 354.2 Who is eligible for assistance under this program?

Those agencies and organizations eligible to apply under this program are set forth in 34 CFR 350.2.

(Section 204; 29 U.S.C. 762)

##### § 354.3 What regulations apply to this program?

The regulations referenced in 34 CFR 350.3 apply to this program.

(Sections 202 and 204; 29 U.S.C. 761a and 762)

##### § 354.4 What definitions apply to this program?

The definitions listed in 34 CFR 350.4 apply to this program.

(Sections 202(i)(1); 29 U.S.C. 761a(i)(1))

#### Subpart B—What Kinds of Activities Does the Department Support Under This Program?

##### § 354.10 What types of centers are authorized under this program?

The model research and training program provides financial assistance for part or all of the costs of establishing and operating model training centers.

(a) Each model training center must be developed around one or more research core areas, each of which must be explored in depth. Each separate study or investigation within a core area shall contribute cumulatively to a coherent body of knowledge for the resolution of a rehabilitation problem. It must be undertaken on the basis of a predetermined plan that reflects what is already known about the topic. The development of a core area must involve a review of the literature; development of one or more hypotheses; selection or development of data gathering instruments; a series of demonstrations, experiments, surveys, or studies to test the hypotheses; the refinement of one or more hypotheses into a theory; and further validation studies and consultation with the prospective target population during the entire process.

(b) Each center must be located in a rehabilitation setting which provides an environment for cooperative research and the transfer of research findings to rehabilitation practice at a reasonable cost.

(c) The following categories of activities may be undertaken within model training centers;

(1) Training and continuing education for personnel involved with employment of handicapped individuals;

(2) Model procedures for testing and evaluating the employment potential of handicapped individuals;

(3) Model training programs to teach handicapped individuals skills which will lead to appropriate employment;

(4) New approaches for job placement of handicapped individuals, including new follow-up procedures relating to such placement; and

(5) Information services regarding education, training, employment and job placement for handicapped individuals.

(Section 204(b)(12); 29 U.S.C. 762(b)(12))

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?****§ 354.30 How is peer review conducted under this program?**

Peer review is conducted under this program in accordance with 34 CFR 350.30–350.32.

(Section 202(e); 29 U.S.C. 761a(e))

**§ 354.31 What selection criteria are used under this program?**

The selection criteria for this program are established and described in 34 CFR 350.36 with the weighted points distributed as follows:

- (a) Project concept or national need (5 Points).
- (b) Research design (35 Points).
- (c) Plan of operation (15 Points).
- (d) Evaluation plan (10 Points).
- (e) Quality of key personnel (10 Points).
- (f) Adequacy of resources (5 Points).
- (g) Research utilization plan (10 Points).
- (h) Budget and cost effectiveness (5 Points).
- (i) Literature review (5 Points).

(Sections 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761(i)(1))

**§ 354.32 What are the priorities for funding under this program?**

(a) The Secretary may from time to time reserve funds to support some or all of the types of research activities listed in 34 CFR 354.10(c).

(b) The Secretary advises the public of these priorities through an Application Notice published in the Federal Register.

(Section 202(g); 29 U.S.C. 761a(g))

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 355 to read as follows:

**PART 355—HANDICAPPED RESEARCH: KNOWLEDGE DISSEMINATION AND UTILIZATION****Subpart A—General**

Sec.

355.1 What is the Knowledge Dissemination and Utilization Program?

355.2 Who is eligible for assistance under this program?

355.3 What regulations apply to this program?

355.4 What definitions apply to this program?

**Subpart B—What Kinds of Activities Does the Department Support Under This Program?**

355.10 What types of activities are authorized under this program?

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?**

Sec.

355.30 How is peer review conducted under this program?

355.31 What selection criteria are used in this program?

355.32 What are the priorities for funding under this program?

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93-112), as amended by Public Law 95-602 (29 U.S.C. 760-762; 92 Stat. 2962-2966).

**Subpart A—General****§ 355.1 What is the Knowledge Dissemination and Utilization Program?**

This program is designed to assist in developing and implementing activities that will insure that rehabilitation knowledge generated from projects and centers funded by the Institute and from other sources is fully utilized to improve the lives of handicapped persons.

(Sections 202 and 204(a); 29 U.S.C. 761a and 762(a))

**§ 355.2 Who is eligible for assistance under this program?**

Those agencies and organizations eligible to apply under this program are described in 34 CFR 350.2

(Section 204; 29 U.S.C. 762)

**§ 355.3 What regulations apply to this program?**

The regulations referenced in 34 CFR 350.3 apply to this program.

(Sections 202 and 204; 29 U.S.C. 761a and 762)

**§ 355.4 What definitions apply to this program?**

The definitions listed in 34 CFR 350.4 apply to this program.

(Section 202(i)(1); 29 U.S.C. 761(i)(1))

**Subpart B—What Kinds of Activities Does the Department Support Under This Program?****§ 355.10 What types of activities are authorized under this program?**

The knowledge dissemination and utilization program provides financial assistance for the following types of projects—

- (a) Research utilization;
- (b) Research on the process of research utilization;
- (c) Information dissemination activities;
- (d) Building public awareness about ways of rehabilitating handicapped persons;
- (e) Demographic studies of handicapped individuals.

(Sections 200(2), 202(b)(4)–(6)(8), 204(a), 204(b)(7); 29 U.S.C. 761a(b)(2), 761a(b)(4)–(6)(8), 762(a), 762(b)(7))

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?****§ 355.30 How is peer review conducted under this program?**

Peer review is conducted under this program in accordance with 34 CFR 350.30–350.32.

(Section 202e; 29 U.S.C. 761a(e))

**§ 355.31 What selection criteria are used under this program?**

(a) The selection criteria for projects described in § 355.10(b) and (e) (research on the process of research utilization and demographic studies) are established in § 350.36 with the weighted points distributed as follows:

- (1) Project concept or national need (5 Points).
- (2) Research design (35 Points).
- (3) Plan of operation (15 Points).
- (4) Evaluation plan (10 Points).
- (5) Quality of key personnel (10 Points).
- (6) Adequacy of resources (5 Points).
- (7) Research utilization plan (10 Points).
- (8) Budget and cost effectiveness (5 Points).
- (9) Literature review (5 Points).

(b) The selection criteria for projects described in § 355.10(a), (c) and (d) are:

- (1) Project concept or national need (5 Points). See § 350.36(a).
- (2) Project design (40 Points).
- (i) The Secretary reviews each application for information that shows the quality of the project design.
- (ii) The Secretary looks for information that shows—

- (A) Description of linkage system to prospective target populations (10 of the 40 Points);
- (B) Need assessment procedures (10 of the 40 Points);
- (C) That rehabilitation knowledge or devices will be adapted or modified to facilitate greater understanding and use by the rehabilitation community (10 of the 40 Points); and
- (D) Procedures for disseminating the rehabilitation knowledge or devices referred to in paragraph (C) (10 of the 40 Points).

(3) Plan of operation (15 Points). See § 350.36(c).

(4) Evaluation plan (15 Points). See § 350.36(d).

(5) Quality of key personnel (10 Points). See § 350.36(e).

(6) Adequacy of resources (5 Points). See § 350.36(f).

(7) Budget and cost effectiveness (5 Points). See § 350.36(h).

(8) Literature review (5 Points). See § 350.36(i).

(Section 202(e) and 202(i)(1); 29 U.S.C. 761a(e) and 761a(i))

**§ 355.32 What are the priorities for funding under this program?**

(a) The Secretary may from time to time reserve funds to support some or all of the types of projects listed in 34 CFR 355.10.

(b) The Secretary advises the public of these priorities through an Application Notice published in the Federal Register.

(Section 204; 29 U.S.C. 762)

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding a new Part 356 to read as follows:

**PART 356—HANDICAPPED RESEARCH: RESEARCH FELLOWSHIPS**

**Subpart A—General**

Sec.

356.1 What is the Research Fellowship Program?

356.2 Who is eligible for assistance under this program?

356.3 What regulations apply to this program?

356.4 What definitions apply to this program?

**Subpart B—What Kinds of Activities Does the Department Support Under This Program?**

356.10 What types of activities are authorized?

356.11 What types of problems may be researched under the fellowship program?

**Subpart C—How Does One Apply for Assistance Under This Program?**

356.20 What are the application procedures under this Part?

356.21 What is the fellowship review process?

**Subpart D—How Does the Secretary Select a Fellow?**

356.30 What selection criteria are used for this program?

**Subpart E—What Conditions Have to be Met by a Fellow?**

356.40 What is the length of a fellowship award?

356.41 Employment during fellowship period.

356.42 What acknowledgement of support is required?

**Subpart F—What are the Administrative Responsibilities of a Fellow?**

356.50 What kinds of payments are allowed under this program?

356.51 What programmatic reports are required of fellows?

**Subpart G—May Fellowships Be Terminated?**

356.60 Termination of fellowships.

Authority: Title II of the Rehabilitation Act of 1973 (Public Law 93-112) as amended by

Public Law 95-602 (29 U.S.C. 760-762; 92 Stat. 2962-2966).

**Subpart A—General**

**§ 356.1 What is the Research Fellowships Program?**

The purpose of this program is to procure the assistance of highly qualified individuals in the research program of the Institute.

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.2 Who is eligible for assistance under this program?**

Any person is eligible for assistance under this program who has training and experience that indicate a potential for engaging in scientific research related to the solution of rehabilitation problems of handicapped persons.

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.3 What regulations apply to this program?**

The following regulations apply to this program:

(a) The peer review and confidentiality requirements contained in 34 CFR 350.31-350.32 and 350.50.

(b) The regulations in this part—34 CFR Part 356; and

(c) 45 CFR Part 46 (Protection of Human Subjects).

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.4 What definitions apply to this program?**

The definitions listed in 34 CFR 350.4 apply to this program.

(Sec. 202(i)(1); 29 U.S.C. 761a(i)(1))

**Subpart B—What Kinds of Activities Does the Department Support Under This Program?**

**§ 356.10 What type of activities are authorized?**

Research fellowships provide awards of Federal assistance to enable individuals to carry out discrete research activities which have been identified in Application Notices published in the Federal Register.

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.11 What types of problems may be researched under the fellowship program?**

Problems encountered by handicapped persons in their daily lives that are due to the presence of a handicapping condition, problems associated with the provision of rehabilitation services to handicapped persons, and problems connected with the conduct of handicapped research may be addressed under this program.

(Sec. 202(d), 202(g)(1), 204; 29 U.S.C. 761a(d), 761a(g)(1), 762)

**Subpart C—How Does One Apply for Assistance Under This Program?**

**§ 356.20 What are the application procedures under this Part?**

From time to time the Secretary will publish in the Federal Register an Application Notice that announces the availability of fellowship assistance under this Part.

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.21 What is the fellowship review process?**

Fellowship applications will be reviewed in accordance with the peer review requirements governing grants in 34 CFR 350.30-350.32.

(Sec. 202(d); 29 U.S.C. 761a(d))

**Subpart D—How Does the Secretary Select a Fellow?**

**§ 356.30 What selection criteria are used for this program?**

Individuals applying for a research fellowship will be evaluated on the basis of—

(a) Quality and level of formal education received;

(b) Work experience;

(c) Recommendations of former or present supervisors or colleagues and other independent evidence that indicate an ability to work creatively in scientific research;

(Sec. 202(d); 29 U.S.C. 761a(d))

**Subpart E—What Conditions Have to be Met by a Fellow?**

**§ 356.40 What is the length of a fellowship award?**

Fellowships may be approved for a maximum of 48 months. The initial award may be for any period not to exceed one year. Upon a finding of satisfactory progress toward accomplishment of the purposes of the fellowship the Secretary may make one or more continuation awards of 12 months in duration, not to exceed a total of 48 months support for any one fellowship.

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.41 Employment during fellowship period.**

Fellows are engaged fulltime in the activities authorized by the award and shall not engage in other employment, unless approved by the Secretary.

(Sec. 202(d); 29 U.S.C. 761a(d))

**§ 356.42 What acknowledgement of support is required?**

Publication, distribution, and disposition of all manuscripts and other materials resulting from a fellowship

awarded under this Part must acknowledge that assistance was received from the Department and the Institute. Three copies of these publications or other materials must be furnished to the Secretary.

(Sec. 202(d); 29 U.S.C. 761a(d))

#### Subpart F—What are the Administrative Responsibilities of a Fellow?

##### § 356.50 What kinds of payments are allowed under this program?

(a) A fellowship award may include the following payments:

(1) A stipend in an amount authorized by the Secretary.

(2) A health insurance allowance.

(3) A travel and transportation allowance.

(i) Round trip travel, for the fellow only, from place of residence to the location of fellowship activity.

(ii) No allowance will be granted for shipping personal effects or household goods.

(iii) No allowance will be granted for transporting dependents, except as authorized by the Secretary for travel undertaken by dependents to join a fellow who is located during the period of fellowship activity in a country other than his or her country of residence.

"Dependent" means the spouse or dependent children of a fellow.

(4) Other allowances.

The Secretary may authorize allowances for payment of the following expenses—tuition, fees, equipment, supplies, attendance at meetings required to carry out the purpose of the fellowship, or other related expenses of the fellowship.

(Sec. 202(d); 29 U.S.C. 761a(d))

##### § 356.51 What programmatic reports are required?

Fellows are required to submit annual and final reports (along with work plans for the next fellowship period if applicable). Each report must contain as a minimum an analysis of the significance of the project and an assessment of the degree to which the objectives of the project have been achieved.

(Sec. 202(d); 29 U.S.C. 761a(d))

#### Subpart G—May Fellowships Be Terminated?

##### § 356.60 Termination of fellowships.

(a) The Secretary may terminate a fellowship upon receipt from the fellow of a written request for termination. The Secretary shall terminate any fellowship prior to the date it would otherwise expire if it is determined that the

fellow's performance is unsatisfactory or that the fellow is unable to carry out the purpose of the fellowship. The fellow shall be notified in writing of any termination.

(b) When a fellowship is terminated prior to the end of the fellowship period, all remaining unexpended funds must be returned to the Secretary.

(Sec. 202(d); 29 U.S.C. 761a(d))

BILLING CODE 4000-01-M

#### 34 CFR Part 629

##### Veterans' Cost-of-Instruction Payments Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Rulemaking.

**SUMMARY:** The Secretary proposes to amend the regulations for the Veterans' Cost-of-Instruction Payments (VCIP) Program. The regulations are being amended to reflect the statutory changes in the Education Amendments of 1980 and to reflect several administrative policy decisions. The proposed changes affect the eligibility criteria, the requirements of each grantee, and the payment process. The regulations have also been completely reorganized for the purposes of simplification and clarification.

**DATES:** Comments must be received on or before March 2, 1981.

**ADDRESSES:** Comments should be addressed to Stanley B. Patterson, Office of Postsecondary Education, Office of Institutional Support, U.S. Department of Education (Room 3514, ROB-3), 400 Maryland Avenue, S.W., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Stanley B. Patterson. Telephone: (202) 245-2806.

**SUPPLEMENTARY INFORMATION:** The Veterans' Cost-of-Instruction Payments Program began in 1973 as a formula grant program which assists institutions of higher education in the provision of educational services to veterans. Grants support full-time offices of veterans' affairs which provide outreach, recruitment, counseling and tutorial services, and special programs for *educationally disadvantaged veterans*.

The proposed text of the revised regulations governing the VCIP program is printed following this preamble. The proposed changes in the regulations reflect the following administrative policy decisions:

(1) An amendment is proposed in Section 629.31(d) to give institutions their entire grant in one payment at the beginning of the academic year. The

amount of the payment would be based on veteran enrollment on April 16. This single-payment system would replace the three-payment system now in use. This new system would ease the reporting requirements of grantees and enable an institution to plan its program activities more effectively.

(2) An amendment is proposed to delete as unnecessary the section entitled, Criteria for assessing the adequacy of veterans' programs, presently found in 34 CFR Section 629.16. Many of these criteria are already covered in Section 629.11 of the proposed regulations.

(3) An amendment is proposed to modify the definitions of "institution of higher education", "student", and "undergraduate" to bring the VCIP regulations into conformity with standard Education Department definitions.

The current regulations are also being amended to reflect the statutory changes in the Education Amendments of 1980. These revisions include:

(1) The eligibility criteria are amended so that a renewal applicant will no longer be eligible if it merely maintains its undergraduate veteran enrollment. It will be eligible, however, if its veteran enrollment increases by 10 percent, or if it meets the requirements of one of the other methods by which a renewal applicant can establish eligibility.

(2) An institution accepting a grant must now make an adequate effort to carry out outreach activities with a special emphasis on service-connected disabled veterans, other disabled or handicapped veterans, and incarcerated veterans in addition to educationally disadvantaged veterans.

(3) Institutions are required to make an adequate effort to coordinate their activities with the readjustment counseling program authorized under section 620 of title 38, and with the veterans employment and training initiatives authorized under the Comprehensive Employment and Training Act and under chapters 41 and 42 of title 38, in order to assist in serving the readjustment, rehabilitation, personal counseling and employment needs of veterans.

(4) The enrollment ceiling of 2500 undergraduate students below which an institution can enter a consortium arrangement is deleted. This deletion does not pertain to the ceiling of 2500 undergraduate students below which an institution need only maintain a full-time office of veterans's affairs and provide recruitment and counseling services.

(5) The second category of veterans for which an institution will receive a

payment is broadened to cover veterans who have a service-connected disability or who are disabled.

(6) The maximum grant to any institution is lowered from \$135,000 to \$75,000.

(7) The percentage of funds which an institution must use to carry out the required services of the program is increased from 75 percent to 90 percent.

#### Invitation To Comment:

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before March 2, 1981, will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3514, ROB-3, 7th and D Streets, S.W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

#### Assessment of Educational Impact

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

#### Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance No. 84.540, Higher Education Veterans' Cost-of-Instruction Program (VCIP))

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

The Secretary amends Title 34 Part 629 of the Code of Federal Regulations to read as follows:

### PART 629—VETERANS' COST-OF-INSTRUCTION PAYMENTS TO INSTITUTIONS OF HIGHER EDUCATION

Sec.

#### Subpart A—General

629.1 Veterans' Cost-of-Instruction Payment program.

629.2 Eligible parties.

629.3 Ineligible parties.

Sec.

629.4 Regulations that apply to the Veterans' Cost-of-Instruction Payments program.

629.5 Definitions that apply to the Veterans' Cost-of-Instruction Payments program.

#### Subpart B—What Kinds of Activities Does the Department Assist under This Program?

629.11 Required activities.

#### Subpart C—How Does One Apply for a Grant?

629.21 Application requirements.

#### Subpart D—How Does the Secretary Make a Grant?

629.31 Calculation of cost-of-instruction payments.

#### Subpart E—What Conditions Must Be Kept by a Grantee?

629.41 Expenditure requirements.

Authority: Section 420, Higher Education Act of 1965, as amended (20 U.S.C. 1070e-1), unless otherwise noted.

#### Subpart A—General

##### § 629.1 Veterans' Cost-of-Instruction Payment program.

This program provides funds to institutions of higher education for the educational needs of veterans. Funds are used to establish and maintain a full-time Office of Veterans' Affairs which provides outreach and recruitment activities, counseling and tutorial services, and special programs for educationally disadvantaged veterans.

(20 U.S.C. 1070e-1)

##### § 629.2 Eligible parties.

(a) *Criteria for initial eligibility.* An institution of higher education is eligible to receive payments under this part if the number of qualified undergraduate veteran students who are receiving benefits under chapter 31 or chapter 34 of title 38, United States Code (or who have received benefits under subchapter V or subchapter VI of chapter 34 while attending the institution during the academic year) equals at least 25 in number and at least one of the following:

(1) 110 percent of the number of such qualified undergraduate veteran students in attendance on April 16 of the preceding academic year.

(2) 10 percent of the total number of undergraduate students in attendance at the institution during the current academic year, if this number does not constitute a percentage of its undergraduate students which is less than the percentage for the preceding academic year.

(b) *Criteria for continuing eligibility.* An institution of higher education which is applying for assistance during an

academic year following one during which it has received assistance under this part will be eligible to receive payments under this part if—

(1) The applicant meets the criteria for initial eligibility as defined in paragraph (a) of this section;

(2) The applicant has a percentage decline in the number of undergraduate veteran students receiving benefits under chapter 31 or chapter 34 of title 38, United States Code, no greater than the national percentage decline in the number of undergraduate veteran students enrolled in all institutions of higher education since the applicant's initial year of eligibility;

(3) The Secretary determines that the applicant is making a reasonable effort to recruit, enroll, and provide necessary services to veterans, taking into consideration the extent to which the number of persons referred to in paragraph (a) of this section falls short of meeting the ratio criteria set forth in that paragraph.

(c) *Criteria for renewed eligibility.* An applicant which has qualified for payment during any preceding fiscal year, but subsequently became ineligible, is eligible to receive payments under this part if—

(1) The applicant would have been eligible had paragraph (b) of this section been in effect when the applicant became ineligible;

(2) The applicant has had a full-time office of veterans' affairs since its last year of participation in the program; and

(3) The appropriations made available during the fiscal year in which the award would be made are in excess of—(i) \$14,380,000, or (ii) the amount requested in the President's budget, whichever is greater, by an amount sufficient to make payments to all institutions meeting the requirements of paragraphs (c)(1) and (c)(2) of this section.

(20 U.S.C. 1070e-1)

##### § 629.3 Ineligible parties.

School or departments of divinity and proprietary institutions are not eligible to receive assistance under this part.

(20 U.S.C. 1070e-1)

##### § 629.4 Regulations that apply to the Veterans' Cost-of-Instruction Payments program.

The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs) and 34 CFR Part 77 (Definitions), and the regulations in this part 629 apply to the Veterans' Cost-of-Instruction Payments program.

(20 U.S.C. 1070e-1, 1088, 1141)

**§ 629.5 Definitions that apply to the Veterans' Cost-of-Instruction Payments program.**

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77:

Applicant  
Application  
Award  
Department  
Fiscal Year  
Grant  
Grant Period  
Secretary  
State

(b) *Definitions that apply to this part.* The following definitions apply to this part:

"Academic year" means a period beginning on July 1 and ending the following June 30.

"Cost-of-Instruction payment," or "payment," means an amount calculated with respect to an institution of higher education for an academic year on the basis of eligible undergraduate veteran student enrollment.

"Counseling" means professional assistance available to veterans for consultation on personal, family, educational, and career problems.

"Full-time" with respect to an Office of Veterans' Affairs, means that the Office of Veterans' Affairs: (1) is staffed by at least one person who is employed by an institution on a full-time basis and whose sole institutional responsibility is that of coordinating the activities of the office and (2) provides services at times and places convenient to the veterans being served. An institution described in § 629.11(c) may employ part-time employees for this purpose who together assume the responsibility of at least one full-time employee.

"Institution of higher education" is defined in the Higher Education Act of 1965, as amended, Pub. L. 89-329, Section 1201(a).

"Instructional expenses in academically related programs" means the expenditures of instructional departments of an institution of higher education for salaries, office expenses, equipment and research.

"Outreach" means an extensive coordinated, community-wide program of reaching veterans, with special emphasis on educationally disadvantaged veterans, service-connected disabled veterans, other disabled or handicapped veterans, and incarcerated veterans within the institution's service area to determine their needs and to make appropriate referral and follow-up arrangements with relevant service agencies.

"Qualified undergraduate veteran student" means an undergraduate

veteran student who is in attendance at the institution on April 16 of the academic year in which the institution is applying, or when this date falls between academic terms of the institution, the end of the previous academic term.

"Recruitment" means a concerted effort to interest veterans in taking advantage of opportunities for a wide variety of post-secondary training experiences at the institution or other agencies providing educational programs.

"School or department of divinity" is defined in the Higher Education Act of 1965, as amended, Pub. L. 89-329, Section 1201(l).

"Special education programs" means specially designed remedial, tutorial, and motivational programs designed to promote success in the postsecondary experience.

"Student" means a person in attendance as at least a half-time student at an institution of higher education. The term is further defined as follows:

(1) "Full-time student" means a student who is enrolled for the equivalent of not less than 12 semester hours and is being charged on the basis of the institution's full-time fee schedule.

(2) "Three-quarter-time student" means an enrolled student who is carrying a three-quarter-time academic work load as determined by the institution and which amounts to at least three-quarters of the course-load of a full-time student.

(3) "Half-time student" means an enrolled student who is carrying a half-time academic work load as determined by the institution and which amounts to at least one-half the course-load of a full-time student.

"Undergraduate student" means a student enrolled in an undergraduate course of study at an institution of higher education who (1) has not been awarded a baccalaureate or first professional degree, (2) is pursuing a program of studies at a two-year institution leading to a certificate, degree, or diploma, or (3) is receiving or has received educational assistance under subchapter V or subchapter VI of chapter 34 of title 38, United States Code.

"Veteran" means a person receiving benefits under chapter 31 or chapter 34 of title 38, United States Code, or who, if enrolled in an institution of higher education, would be eligible for such benefits.

(20 U.S.C. 1070e-1, 1088, 1141)

**Subpart B—What Kinds of Activities Does the Department Assist Under This Program?**

**§ 629.11 Required activities.**

(a) A grantee must maintain a full-time office of veterans' affairs which has responsibility for veterans' outreach, recruitment, and special education programs, and which provides educational, vocational, and personal counseling for veterans.

(b) A grantee must also make an adequate effort to—

(1) Provide programs designed to prepare educationally disadvantaged veterans for study at an institution of higher education (i) under subchapter V of chapter 34 of title 38, United States Code; and (ii) in the case of any institution located near a military installation, under subchapter VI of chapter 34 of title 38;

(2) Provide active outreach services with special emphasis on service-connected disabled veterans, handicapped veterans, incarcerated veterans, and educationally disadvantaged veterans, recruiting, and counseling activities through the use of funds available under federally assisted work/study programs (with special emphasis on the veterans-student services program under section 1685 of title 38, United States Code);

(3) Provide an active tutorial assistance program, including dissemination of information regarding such programs, in order to make maximum use of the benefits available under section 1692 of title 38, United States Code; and

(4) Coordinate activities provided under this part with the readjustment counseling program authorized under section 620 of title 38, United States Code, and with the veterans' employment and training initiatives authorized under the Comprehensive Employment and Training Act, and under chapters 41 and 42 of title 38, United States Code, in order to assist in serving the readjustment, rehabilitation, personal counseling and employment needs of veterans.

(c) A grantee with less than 2500 undergraduate students in attendance on April 16 of the academic year in which the institution applies (or, when this date falls between academic terms of the institution, the end of the previous academic term) need only maintain a full-time office of veterans' affairs which provides recruitment and counseling services.

(d) If a grantee cannot reasonably be expected to carry out all of the required functions by itself, the Secretary may permit one or more of the required

functions to be carried out under a consortium agreement between the institution and one or more such institutions located within a reasonable commuting distance.

(e) All services must be readily accessible to all veterans served by the project.

(20 U.S.C. 1070e-1)

#### Subpart C—How Does One Apply for a Grant?

##### § 629.21 Application requirements.

(a) Each application must contain the following information:

(a) Data showing that the institution is eligible for assistance.

(b) Information that shows the amount of the payment to the applicant would be entitled.

(c) An assurance that the institution will expend during the award period for all academically-related programs of the institution, in terms of either total or per student expenditure, at least the average amount expended during the preceding three academic years.

(20 U.S.C. 1070e-1)

#### Subpart D—How Does the Secretary Make A Grant?

##### § 629.31 Calculation of cost-of-instruction payments.

(a) The Secretary determines a grantee's cost-of-instruction payment based on the following institutional data:

(1) the number of qualified undergraduate veteran students who are receiving vocational rehabilitation subsistence under chapter 31 of title 38, United States Code, or educational assistance under chapter 34 of title 38, United States Code, and to whom services required under the terms of a grant will be reasonably accessible.

For students meeting this requirement, a grantee will receive the following payments:

(i) \$300 per full-time student.

(ii) \$225 per three-quarter-time student.

(iii) \$150 per half-time student.

(2) The number of qualified undergraduate veteran students who have ever received educational assistance under subchapter V or subchapter VI of chapter 34 of title 38 or who have a service-connected disability as defined in Section 101(16) of title 38, United States Code, and to whom the services required under the terms of a grant will be reasonably accessible. For students meeting this requirement, a grantee will receive the following payments:

(i) \$150 per full-time student.

(ii) \$112.50 per three-quarter-time student.

(iii) \$75 per half-time student.

(b) No payments will be made to grantees for students who are not full-time, three-quarter-time, or half-time students.

(c) The maximum payment in any fiscal year to any institution of higher education, or any branch thereof located in a different community is \$75,000.

(d) Funds which become available as a result of the limitation on payments described in paragraph (b) of this section shall be apportioned so that all institutions to which VCIP payments are to be made will receive a minimum of \$9,000, and then in excess of \$9,000, to the extent that funds remain available. No grantee shall receive funds in excess of the amounts calculated according to paragraph (a) of this section.

(e) Funds appropriated will be apportioned so that each grantee will receive one payment based on the grantee's enrollment data.

(f) Funds obligated to an individual institution which are later deobligated shall be reallocated proportionately to grantee institutions at a later date.

(20 U.S.C. 1070e-1)

#### Subpart E—What Conditions Must Be Met by a Grantee?

##### § 629.41 Expenditure requirements.

(a) At least (1) 90 percent of the funds awarded to an institution or (2) the amount of funds needed to implement the required services, whichever is greater, shall be used by the institution to implement these services. Any remaining awarded funds must be used solely to defray instructional expenses in academically related programs.

(b) The grantee must engage in all activities listed in § 629.11, except as provided in § 629.11(c) and (d).

(c) VCIP funds may be used to pay for travel expenditures only if such expenditures are incurred by the grantee in connection with recruitment and outreach activities, attendance at Department-sponsored meetings providing technical assistance, and attendance at Department approved professional meetings.

(d) A proposed budget for the operation of the Office of Veterans' Affairs must be submitted to the Department within 90 days of receipt of the Notice of Award specifying the institution's share of funds in any fiscal year.

(20 U.S.C. 1070e-1)

BILLING CODE 4000-01-M

#### 34 CFR Part 651

##### Training in the Legal Profession

**AGENCY:** Department of Education.

**ACTION:** Notice of Proposed Rulemaking.

**SUMMARY:** The Secretary of Education issues proposed regulations for the Legal Profession Training Program. The proposed regulations authorize awards to assist individuals from disadvantaged backgrounds to undertake training for the legal profession. The proposed regulations cover eligible activities and costs under the program.

**DATES:** Interested persons are invited to submit comments, suggestions, or objections regarding the proposed regulations on or before March 2, 1981.

**ADDRESSES:** Written comments should be addressed to Donald Bigelow, Chief, Graduate Training Branch, U.S. Department of Education, 400 Maryland Avenue, S.W., (Room 3060, ROB-3), Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Donald M. Bigelow, Telephone: (202) 245-2347.

**SUPPLEMENTARY INFORMATION:** The Legal Profession Training Program is designed to help admit to accredited law schools disadvantaged students who, but for the program, would not have been admitted and to assist these students in obtaining a legal education and law degree. The program funds preliminary training to prepare students for law school, counseling and related services, and stipends to help support the students during both their preliminary and law school training.

Since its inception, the program has been carried out through a non-competitive award to the Council on Legal Educational Opportunity (CLEO), a non-profit private agency. With substantial funding from other sources, CLEO started the program before it was authorized in the Higher Education Act. The program has been popularly known as the "CLEO Program."

The proposed regulations authorize the Secretary to continue to carry out the program through an award to CLEO, consistent with the legislative history of the statute. [H.R. Rep. No. 96-520, 96th Cong. 1st Sess. 55 (1979); S. Rep. No. 96-733, 96th Cong. 2d Sess. 72 (1980)]. As called for by the statute, the proposed regulations also supply criteria for identifying eligible individuals from disadvantaged backgrounds and provisions on eligible activities.

**Invitation to Comment:**

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before (the 60th day after publication of this document) will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3060 ROB-3, 7th Street, S.W., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

**Assessment of Educational Impact:**

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

**Citation of Legal Authority:**

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

The Secretary of Education proposes to amend Title 34 by adding a new Part 651 to read as follows:

**PART 651—TRAINING IN THE LEGAL PROFESSION****Subpart A—General**

Sec.

- 651.1 Training in the Legal Profession.
- 651.2 Eligible parties.
- 651.3 Regulations that apply to this program.
- 651.4 Definitions.

**Subpart B—What Kinds of Activities Does the Secretary Support Under This Program?**

- 651.10 What kinds of support does the program provide?
- 651.11 What activities are eligible for support?

**Subpart C—[Reserved]****Subpart D—How Is an Award Made?**

- 651.20 How does the Secretary select an award recipient?

**Subpart E—What Conditions Must Be Met by an Award Recipient?**

- 651.30 What are the limitations on allowable costs?

Authority: Part D of Title IX of the Higher Education Act of 1965, as amended by Sec. 904 of Pub. L. 96-374, 94 Stat. 1486-87 (20 U.S.C. 1134).

**Subpart A—General****§ 651.1 Training in the Legal Profession.**

(a) The Legal Profession Training Program assists individuals from disadvantaged backgrounds to undertake training for the legal profession.

(b) The program is designed to help admit to accredited law schools disadvantaged students who, but for the program, would not have been admitted, and to assist these students in obtaining a legal education and law degree.

(20 U.S.C. 1134)

**§ 651.2 Eligible parties.**

(a) Public and private agencies and organizations other than institutions of higher education may receive grants or contracts under these regulations.

(b) The Secretary may implement this program through the award of a single grant or contract.

(c) Unless the Secretary implements the program through one or more procurement contracts or through a single noncompetitive grant, applications will be invited annually through an application notice published in the *Federal Register*.

(20 U.S.C. 1134(a))

**§ 651.3 Regulations that apply to this program.**

(a) *Regulations for procurement contracts.* The following regulations apply to any procurement contract under the Legal Profession Training Program:

(1) Federal and U.S. Department of Education procurement regulations in 41 CFR Chapters 1 and 34; and

(2) The regulations in this Part 651.

(b) *Regulations for grants.* The following regulations apply to any grants under the Legal Profession Training Program:

(1) The Education Division General Administrative Regulations (EDGAR) in Part 75 (Direct Grant Program) and Part 77 (General).

(2) The regulations in this Part 651.

(20 U.S.C. 1221e-3)

**§ 651.4 Definitions.**

As used in these regulations—

(a) "Act" means the Higher Education Act of 1965, as amended.

(20 U.S.C. 1221e-3)

(b) "Disadvantaged Backgrounds" are backgrounds that hinder individuals from gaining admission to law school

and completing a course of legal study, including:

(1) Family income dependent in whole or in part on public assistance or inadequate to provide for needs beyond basic necessities such as food, housing and clothing;

(2) Rural isolation;

(3) Limited English proficiency as defined in section 703(a)(1) of the Bilingual Education Act (20 U.S.C. 880b-1(a)(1)); or

(4) Attendance at a minority group isolated school, as defined for purposes of the Emergency School Aid Act in § 185.02(g) of this chapter; or

(5) Other cultural or educational deprivations resulting from an environment that failed to develop skills and understandings that would enable an individual to gain admission to law school and complete a legal course of study.

(20 U.S.C. 1221e-3)

**Subpart B—What Kinds of Activities Does the Secretary Support Under this Program?****§ 651.10 What kinds of support does the program provide?**

The program provides financial support for activities that assist individuals from disadvantaged backgrounds in obtaining a legal education.

(20 U.S.C. 1134(a))

**§ 651.11 What activities are eligible for support?**

The following activities are eligible for support under a grant or contract awarded under these regulations:

(a) Selecting individuals from disadvantaged backgrounds for training for the legal profession, including disseminating information about the program to eligible students;

(b) Making arrangements with accredited law schools to arrange entry of participating students into these schools;

(c) Providing counseling and related services—both prior to and during law school training—designed to assist participating students in preparing for and completing law school training;

(d) Providing preliminary legal education training for participating students to prepare them for law school.

(1) Preliminary training may include, but need not be limited to, orientation of students to the legal process, the epistemology of law, and law school learning methods; evaluation of the law school potential of students; and development of students' legal reading, research, and writing skills.

(2) Preliminary training may be provided for participating students not more than six months prior to their commencement of law school courses; and

(e) Stipends to participating students for any period of preliminary training and for the period of law school training, as provided in § 651.30.

(20 U.S.C. 1134l(b))

#### Subpart C—[Reserved]

#### Subpart D—How is an Award Made?

##### § 651.20 How does the Secretary select an award recipient?

(a) The Secretary decides to make one or more awards and selects the award recipient(s) based on a judgment of what arrangements most effectively contribute to the purposes of Title IX-D of the Act.

(b) The Secretary may decide to make a non-competitive award to implement the program if—in the Secretary's judgment—there is one eligible organization that is exclusively or predominantly qualified to carry out effectively the purposes of Title IX-D of the Act in the light of its legislative history. If a noncompetitive contract award is made, the decision will be made in accordance with 41 CFR Chapter 34.

(20 U.S.C. 1221e-3; 1134l)

#### Subpart E—What Conditions Must Be Met By an Award Recipient?

##### § 651.30 What are the limitations on allowable costs?

(a) Allowable costs under an award are direct and indirect costs incurred by the award recipient in carrying out the approved project.

(b) Allowable costs include, but are not limited to:

(1) Administrative costs of the award recipient in carrying out the eligible activities described in § 651.11.

(2)(i) Stipends for participating students, including allowances for travel and for dependents of participating students—during any period of preliminary training—or for the period of law school training during which the student maintains satisfactory academic progress, as determined by the Secretary.

(ii) The Secretary annually may set limits on the amount of stipends.

(20 U.S.C. 1134l(b))

##### Pell Grant Program

**AGENCY:** Department of Education.

**ACTION:** Notice of Proposed Rulemaking; Cross-reference.

**SUMMARY:** The Secretary proposes regulations for the Pell Grant Program in Title 34 of the Code of Federal Regulations.

The text of the regulations on which the Secretary invites comments are published in the Rules and Regulations section of this issue of the Federal Register. They have been adopted as final regulations and will govern this program until the Secretary issues new regulations based on public comment.

**DATES:** All comments, suggestions, or objections must be received on or before March 2, 1981.

**ADDRESSES:** Comments should be addressed to: William L. Moran, Chief of the Policy Section, Basic Grant Branch, and Division of Policy and Program Development, U.S. Department of Education, 400 Maryland Avenue SW. (Room 4318, ROB-3), Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Mr. William L. Moran, Telephone: (202) 472-4300.

**INVITATION TO COMMENT:** For additional details on how to comment, see the Preamble of the final regulations for these programs published in this issue of the Federal Register.

(Catalog of Federal Domestic Assistance Numbers 84.063, Pell Grant Program)

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

##### Special Educational Programs for Students Whose Families Are Engaged in Migrant and Other Seasonal Farmwork—High School Equivalency Program and College Assistance Migrant Program

**AGENCY:** Department of Education.

**ACTION:** Proposed regulations.

**SUMMARY:** The Secretary proposes regulations to govern grants under the High School Equivalency Program (HEP) and the College Assistance Migrant Program (CAMP). These programs provide grants to institutions of higher education for projects of educational and supporting services designed to assist students—whose families are

engaged in migrant and other seasonal farmwork—in obtaining the equivalent of a secondary school diploma and in successfully adjusting to postsecondary school. These programs implement Title IV, Section 418A, of the Higher Education Act (HEA), as amended by the Education Amendments of 1980.

**DATES:** Comments must be received on or before March 2, 1981.

**ADDRESSES:** Comments should be addressed to Mr. Vidal A. Rivera, Jr., Deputy Assistant Secretary for Migrant Education, Office of Migrant Education, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue SW. (ROB-3, Room 3608), Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Mr. Vidal A. Rivera, Jr. Telephone No. (202) 245-2222.

##### SUPPLEMENTARY INFORMATION:

###### Background

The High School Equivalency Program (HEP) and the College Assistance Migrant Program (CAMP) were previously authorized under Title III, section 303(c)(2), of the Comprehensive Employment and Training Act (CETA) (Pub. L. 93-203), and were administered by the Department of Labor. However, the Department of Education Reorganization Act (Pub. L. 96-88) transferred the authority for the administration of HEP and CAMP to the Department of Education (ED).

On October 3, 1980, the Education Amendments of 1980 (Pub. L. 96-374) became law. These amendments provide a new Title IV of the Higher Education Act (Pub. L. 89-329), entitled "Student Assistance." Title IV, HEA, now includes a new Part A, Subpart 5, entitled "Student Assistance." Title IV, HEA, now includes a new Part A, Subpart 5, entitled "Special Programs For Students Whose Families Are Engaged In Migrant and Seasonal Farmwork," which authorizes the HEP and CAMP programs.

In summary, these proposed regulations—

(a) Describe the types of projects that may be funded under HEP and CAMP;

(b) Describe the types of services that may be provided by a project;

(c) Describe the evaluation process for grant proposals and the selection criteria that the Secretary uses in that evaluation process;

(d) Describe conditions and requirements that must be met by a grantee; and

(e) Define the eligibility requirements for students to participate in a project.

### How To Review These Proposed Regulations

These proposed regulations (34 CFR Part 206) contain only those requirements that are proposed to apply solely to HEP and CAMP. These proposed regulations do not contain certain types of general requirements that are covered in the Education Division General Administrative Regulations, which are found in 34 CFR Parts 75-77. EDGAR contains requirements that apply to all ED programs, including by incorporation the Grants Administration regulations, 34 CFR Part 74, that apply to all ED programs.

### Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments that are received on or before March 2, 1981, will be considered in developing the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Regional Office Building 3, Room 3608, 7th and D Streets, S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

### Information Requirements

The Department particularly requests comments on whether the program requirements in this document would require transmission of information that is already being gathered by or is available from any other agency or Department of the United States.

### Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations. References to "sec." in these citations refer to sections of the Higher Education Act of 1965, as amended by the Education Amendments of 1980.

(Catalog of Federal Domestic Assistance No. 84.144; Migrant Education Program—High School Equivalency Program and College Assistance Migrant Program)

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by adding Part 206 to read as follows:

## PART 206—SPECIAL EDUCATIONAL PROGRAMS FOR STUDENTS WHOSE FAMILIES ARE ENGAGED IN MIGRANT AND OTHER SEASONAL FARMWORK—HIGH SCHOOL EQUIVALENCY PROGRAM AND COLLEGE ASSISTANCE MIGRANT PROGRAM

### Subpart A—General

#### Sec.

206.1 What are the special educational programs for students whose families are engaged in migrant and other seasonal farmwork?

206.2 Who is eligible to participate as a grantee?

206.3 What regulations apply to these programs?

206.4 What definitions apply to these programs?

206.5-206.9 [Reserved]

### Subpart B—What Kinds of Activities Does the Secretary Assist Under these Programs?

206.10 What types may be provided?

206.11-206.19 [Reserved]

### Subpart C—How Does One Apply for a Grant?

206.20 What must be included in an application?

206.21-206.29 [Reserved]

### Subpart D—How Is a Grant Made to an Applicant?

206.30 How does the Secretary evaluate an application?

206.31 What selection criteria does the Secretary use to evaluate an application?

206.32-206.39 [Reserved]

### Subpart E—What Conditions Must be Met by a Grantee?

206.40 What is the special population to be served?

206.41 What is the requirement for maintaining participant records?

206.42 What restrictions are there on expenditures?

206.43-206.49 [Reserved]

Authority: Subpart 5, Part A, of Title IV of the Higher Education Act of 1965 (Pub. L. 89-329), as amended by the Education Amendments of 1980 (Pub. L. 96-374)(20 U.S.C. 1070d-2).

### Subpart A—General

§ 206.1 What are the special educational programs for students whose families are engaged in migrant and other seasonal farmwork?

(a) The High School Equivalency Program (HEP) is designed to assist students—whose families are engaged in migrant and other seasonal farmwork—to obtain the equivalent of a secondary school diploma and to subsequently gain employment or be placed in an institution of higher education (IHE).

(b) The College Assistance Migrant Program (CAMP) is designed to assist students—whose families are engaged in migrant and other seasonal farmwork—who are enrolled on a full-time basis in the first academic year at an IHE.

(Sec. 418A(a); 20 U.S.C. 107d-2)

§ 206.2 Who is eligible to participate as a grantee?

An institution of higher education may apply for a grant to operate a HEP or a CAMP project.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

§ 206.3 What regulations apply to these programs?

The following regulations apply to HEP and CAMP:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs) and 34 CFR Part 77 (General).

(b) The regulations in this Part 206.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

§ 206.4 What definitions apply to these programs?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77 (EDGAR, General):

Applicant  
Application  
Department  
Elementary school  
Facilities  
Project  
Secondary school  
Secretary  
State

(b) *Definitions in the Grants Administration Regulations.*

The following terms used in this part are defined in 34 CFR Part 74 (Administration of Grants):

Budget  
Equipment  
Grant  
Grantee  
Supplies

(c) *Program definitions.* The following additional definitions apply specifically to the HEP and CAMP programs:

(1) "Act" means the Higher Education Act of 1965, as amended by the Education Amendments of 1980.

(2) "Agricultural activity" means—

(i) Any activity directly related to the production of crops, dairy products, poultry, or livestock;

(ii) Any activity directly related to the cultivation or harvesting of trees; or

(iii) Any activity directly related to fish farms.

(3) "Farmwork" means any agricultural activity, performed for

either wages or personal subsistence, on a farm, ranch, or similar establishment.

(4) "Full-time," with respect to an individual, means a student who is carrying a full-time academic workload, as defined in 34 CFR Part 690 (Basic Educational Opportunity Grant Program Regulations).

(5) "Institution of higher education" means an educational institution that—

- (i) Is in a State;
- (ii) Is authorized by that State to provide a program of education beyond secondary school;
- (iii) Is a public or nonprofit institution;
- (iv) Admits as a regular student only a person who—

(A) Has a secondary school diploma;

(B) Has the recognized equivalent of a secondary school diploma; or

(C) Is beyond the age of compulsory school attendance in that State and has the ability to benefit from the training offered by the institution;

(v) Provides—

(A) An educational program for which it awards a bachelor's degree; or

(B) At least a two-year program that is acceptable for full credit toward a bachelor's degree;

(vi)(A) Is accredited by a nationally recognized accrediting agency or association;

(B) Has satisfactorily assured the Secretary that it will meet the accreditation standards of a nationally recognized accrediting agency or within a reasonable time considering the resources available to the institution, the period of time, if any, it has operated, and its effort to meet accreditation standards; or

(C) Has its credits accepted on transfer by at least three accredited institutions on the same basis as those institutions accept transfer credits from fully accredited institutions.

(6) "Migrant farmworker" means a seasonal farmworker—as defined in paragraph (c)(7) of this section—whose employment required travel such that the farmworker was unable to return to his or her domicile (permanent place of residence) within the same day.

(7) "Seasonal farmworker" means a person who, within the past 24 months, was employed for at least 100 days in farmwork, and whose primary employment was in farmwork on a temporary or seasonal basis (that is, not a constant year-round activity).

(Sec. 418A(a); 20 U.S.C. 1070d-2)

### Subpart B—What Kinds of Activities Does the Secretary Assist Under these Programs?

#### § 206.10 What types of services may be provided?

(a) *General.* A grantee may use funds to support approved projects designed to provide educational and supporting services to students whose families are engaged in migrant and other seasonal farmwork.

(b) *Types of services.* (1) *HEP projects.* A HEP project may provide the following types of services to assist participants in obtaining the equivalent of a secondary school diploma and as needed to ensure the success of the participants in meeting the project's objectives and in succeeding at the secondary school level and beyond:

- (i) Recruitment services for enrolling project participants.
- (ii) Institutional services in academic subject areas such as reading, writing, oral language skills, and mathematics, and in related areas such as study skills.
- (iii) Special academic, career, and personal guidance, counseling, and testing services.
- (iv) Housing support or on-campus residential programs during the operation of the project.

(v) Services designed to acquaint participants with the range of career options available to them—including appropriate career-oriented work study activities.

(vi) Services designed to expose participants to academic institutions and programs, cultural events, and other activities not usually available to the participants and supportive of their intellectual, cultural, social, and personal development.

(vii) Appropriate in-service training activities for project staff members.

(viii) Other essential supporting services that have been approved by the Secretary as needed to ensure the success of the participants in meeting the project's objectives and in succeeding at the secondary school level and beyond.

(2) *CAMP projects.* A CAMP project may provide the following types of services to assist the participants in meeting the project's objectives and in succeeding in postsecondary school:

- (i) The services described in items (i) and (iii) through (vii), inclusive, of paragraph (b)(1) of this section.
- (ii) Tutoring and supplementary instructional services in the following areas:

- (A) Basic skills.
- (B) Subject areas in which the participants are enrolled.
- (C) Related areas such as study skills.

(iii) Other essential supporting services that have been approved by the Secretary as needed to ensure the success of the participants in meeting the project's objectives and in completing postsecondary school.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

### Subpart C—How Does One Apply for a Grant?

#### § 206.20 What must be included in an application?

In applying for a grant, an applicant shall—

(a) Follow the procedures and meet the requirements stated in Subpart C of 45 CFR Part 75 (EDGAR-Direct Grant Programs); and

(b) Provide the following assurances:

(1) The grantee will develop and implement a plan for identifying, informing, and recruiting eligible participants who need the assistance provided by the project.

(2) The grantee will develop and implement a plan for identifying and using the resources of the IHE and the community to supplement and enhance the services provided by the project.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

### Subpart D—How Is a Grant Made to an Applicant?

#### § 206.30 How does the Secretary evaluate an application?

(a) The Secretary evaluates an application under HEP or CAMP on the basis of the selection criteria listed in § 206.31 of these regulations.

(b) The Secretary awards up to 100 possible points for meeting these criteria.

(c) The maximum number of points possible for meeting each individual criterion is indicated in parentheses after the heading for that criterion.

(Sec. 418A(a); 20 U.S.C. 1221e-3(a)(1))

#### § 206.31 What selection criteria does the Secretary use to evaluate an application?

(a) *Plan of operation.* (40 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows the following:

- (i) High quality in the design of the project.
- (ii) An effective plan of management that assures proper and efficient administration of the project.
- (iii) A clear description of how the objectives of the project relate to the purpose of the program.
- (iv) A clear description of the way that the applicant plans to use its

resources and personnel to achieve each objective of the project.

(v) A clear description of how the applicant will provide equal access and treatment for eligible participants who are members of groups that have been traditionally underrepresented, such as—

- (A) Members of racial or ethnic minority groups;
- (B) Women;
- (C) Handicapped persons; and
- (D) The elderly.

(b) *Quality of key personnel.* (15 points)

(1) The Secretary reviews each application for information that shows adequate qualifications for the key personnel the applicant plans to use in the project.

(2) The Secretary looks for information that shows the following:

- (i) The qualifications of the project director (if one is to be used).
- (ii) The qualifications of each of the other key personnel to be used in the project.

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section plans to commit to the project.

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

- (A) Members of racial or ethnic minority groups;
- (B) Women;
- (C) Handicapped persons; and
- (D) The elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training—in fields related to the objectives of the project—as well as other information that the applicant provides.

(c) *Budget and cost-effectiveness.* (10 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows the following:

- (i) The budget for the project is adequate to support the project activities.
- (ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (20 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.

(2) The Secretary looks for information that shows methods of

evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows the following:

- (i) The facilities that the applicant plans to use are adequate.
- (ii) The equipment and supplies that the applicant plans to use are adequate.

(f) *Recruitment.* (10 points)

(1) The Secretary reviews each application for information that shows the quality of the recruitment plan for the project.

(2) The Secretary looks for information that shows that the applicant has adequate plans for identifying, informing, and recruiting eligible participants who are most in need of the assistance provided by the project.

(20 U.S.C. 1221e-3(a)(1))

#### Subpart E—What Conditions Must Be Met by a Grantee?

§ 206.40 What is the special population to be served?

(a) *General.* To be eligible to participate in a HEP or CAMP project, an individual must be a migrant or other seasonally-employed farmworker (or a dependent of a migrant or other seasonally-employed farmworker), as defined in § 206.4(c) of these regulations.

(b) *Special HEP qualifications.* To be eligible to participate in a HEP project, a migrant or other seasonally-employed farmworker (or dependent) must—

- (1) Not have earned a secondary school diploma or its equivalent;
- (2) Not be currently enrolled in an elementary or secondary school;
- (3) Be above the age of compulsory school attendance in the State where the project is located; and

(4) Be determined by the grantee to need the financial and academic services provided by the project in order to attain the equivalent of a secondary school diploma.

(c) *Special CAMP qualifications.* To be eligible to participate in CAMP, a migrant or other seasonally-employed farmworker (or dependent) must—

- (1) Be enrolled as a full-time student at the IHE that is serving as the grantee;
- (2) Not be beyond the first academic year of a program of study at the participating IHE, as determined under the standards of the IHE; and

(3) Be determined by the grantee to need the financial and academic

services provided by the project in order to complete an academic program of study at the IHE.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

§ 206.41 What is the requirement for maintaining participant records?

(a) *General.* A grantee shall develop and implement a system that provides accurate and accessible records on participants.

(b) *Contents.* To document the progress of each participant, each record must include at least the following:

(1) Information used to determine the participant's eligibility, as stated in § 206.4(c) of these regulations.

(2) The criteria used to identify the participant as needing the financial and academic services provided by the project.

(3) A statement of the participant's academic needs at the time of entering into the project.

(4) A description of the individual program designed to assist the participant in meeting the project's objectives.

(5) A brief summary of the actual services the participant received including both educational and education-support services.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

§ 206.44 What restrictions are there on expenditures?

Funds provided under HEP or CAMP may not be used for construction of facilities or remodeling.

(Sec. 418A(a); 20 U.S.C. 1070d-2)

[FR Doc. 80-40430 Filed 12-29-80; 8:45 am]

BILLING CODE 4000-01-M

### 34 CFR Part 703

#### Experimental Program for Opportunities in Advanced Study and Research in Education

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

**SUMMARY:** The Secretary proposes to amend the regulations that apply to grants administered under the National Institute of Education's Experimental Program for Opportunities in Advanced Study and Research in Education. This amendment does not change the program objectives. The changes include revised language and format necessary to make the regulations conform with administrative directives to improve the quality of all regulations. These regulations, previously designated as Part 1430 of Title 45 CFR Chapter XIV, are now included under Title 34 CFR Chapter VII, and as revised are redesignated as Part 703.

**DATES:** Public comments must be received on or before January 29, 1981.

**ADDRESSES:** Comments should be addressed to Mr. Frank Z. Alejandro, U.S. Department of Education, National Institute of Education, Room 609, 1200 19th Street, N.W., Washington, D.C. 20208.

**FOR FURTHER INFORMATION CONTACT:** Mr. Frank Z. Alejandro, Telephone number (202) 254-8827.

**SUPPLEMENTARY INFORMATION:**

**A. Background of the Program**

In 1978, the National Institute of Education (NIE) established an experimental program to improve opportunities for minorities and women emphasizing such opportunities for advanced study and research on problems in educational research and development. Grants for institutional projects as well as for special projects were awarded in order to enable the Federal government to utilize the existing capabilities of institutions and organizations that have a record of success in recruiting and training minorities and women in educational research, and in advancing the careers of those traditionally underrepresented persons.

**B. Changes in the Regulations**

(1) The Education Department General Administrative Regulations (EDGAR) were published on April 3, 1980 (45 FR 22494) and, at the same time, amendments to these program regulations were published in the Federal Register (45 FR 22544) to make them conform with EDGAR in all respects other than the selection criteria. Those selection criteria did not change.

(2) Inasmuch as EDGAR applies to this program, the amended program regulations do not repeat certain types of requirements that are covered in EDGAR. These include

- Subpart C, How to apply for a grant;
- Subpart D, How grants are made;
- Subpart D, How grants are made;
- Subpart E, What conditions must be met by a grantee;
- Subpart F, What are the administrative responsibilities of a grantee;
- Subpart C, What procedures does the Secretary use to assure compliance.

(3) the following changes are made in order to make these program regulations comply with current policies and

practices of the Department of Education:

- (i) § 703.1 makes for-profit organizations eligible for grants;
- (ii) § 703.4 limits the effective period for these regulations;
- (iii) § 703.14 specifies activities which are ineligible for support under this program;
- (iv) § 703.31(d) provides for a balanced distribution of awards based upon geographic considerations;
- (v) § 703.32 (f) and (g) are restatements of the criteria which previously appear in these regulations.
- (vi) § 703.32(e) adds a criterion which is required by EDGAR;
- (vii) § 703.32 (a) through (g) assign new weight values to each selection criterion;
- (viii) § 703.43 places certain financial restrictions on a profit-type grantee.

**Effective Period of These Regulations**

These regulations apply only to awards made prior to December 31, 1981.

**Classification and Regulatory Analysis**

The Department of Education has determined that these regulations will not impose an unnecessary burden on the economy or on individuals and, therefore, are not significant for the purpose of Executive Order 12044 (Improving Government Regulations). Further, a regulatory analysis is not required for this particular rulemaking process.

**Application Information**

An application notice, containing the closing date for receipt of applications under this program, is being published in the Federal Register concurrently with the publication of this Notice of Proposed Rulemaking. To obtain the program announcement, which supplements the information of the application notice, please contact Mr. Frank Z. Alejandro, at telephone number (202) 254-8827.

**Invitation To Comment**

Interested persons are invited to submit comments and recommendations regarding these proposed amendments. Written comments and recommendations may be sent to the address given in this preamble. All comments received by the date that public comments are due will be considered in the development of the final regulations. All comments submitted will be available for public inspection during and after the comment period in Room 609, 1200 19th Street, N.W., Washington, D.C., between the

hours of 8:30 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

**Citation of Legal Authority**

A citation of statutory or other legal authority appears in parentheses in each section of these regulations.

(Catalog of Federal Domestic Assistance Number 84.117, Education Research and Development, formerly 13.950)

December 23, 1980.

Shirley M. Hufstедler,  
*Secretary of Education.*

Title 34 of the Code of Federal Regulations adds a new Part 703 to read as follows:

**PART 703—EXPERIMENTAL PROGRAM FOR OPPORTUNITIES IN ADVANCED STUDY AND RESEARCH IN EDUCATION**

**Subpart A—General**

- Sec. 703.1 Purpose of the experimental program for opportunities in advanced study and research in education.
- 703.2 Eligible parties.
- 703.3 Regulations that apply to this program.
- 703.4 Effective period of these regulations.
- 703.5 Definitions that apply to this program.

**Subpart B—What Types of Projects are Assisted Under this Program?**

- 703.11 Types of projects and general requirements.
- 703.12 Additional requirements for Institutional projects.
- 703.13 Additional requirements for Special projects.
- 703.14 Projects and activities that are ineligible for support.

**Subpart C—How Does One Apply for a Grant?**

- 703.21 Application procedures.

**Subpart D—How Does the Secretary Make a Grant?**

- 703.31 How does the Secretary evaluate an application?
- 703.32 What selection criteria does the Secretary use?

**Subpart E—What Conditions Must be Met by a Grantee?**

- 703.41 Restrictions on the use of grant funds.
- 703.42 Allowable costs.
- 703.43 Restrictions on for-profit type grantees.

Authority.—Section 405 of the General Education Provisions Act, Sec. 301(a)(2) of Pub. L. 92-318, 86 Stat. 328, 332, as amended (20 U.S.C. 1221e).

**Subpart A—General**

§ 703.1 Purpose of the experimental program for opportunities in advanced study and research in education.

This Program supports experimental activities that demonstrate effective

ways of increasing the participation of minorities and women in the field of education and educational research. These activities are expected to be used to—

(a) Enhance equality of opportunity within the educational research workforce;

(b) Increase the relevance and credibility of educational research through greater inclusion of contributions and perspectives of minorities and women; and

(c) Improve the overall quality of educational research by drawing upon those talented minorities and women who currently are engaged in research other than educational research or are non-research professionals who are capable of making a significant contribution to educational research.

(20 U.S.C. 1221e(b)(2))

#### § 703.2 Eligible parties.

A college, university, State or local educational agency, other public or private non-profit or for-profit agency or organization, or any combination of these, is eligible to receive a grant. (20 U.S.C. 1221e(e)(1))

#### § 703.3 Regulations that apply to this program.

The following regulations apply to this program:

(a) In addition to the regulations in this part, the Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs) and 34 CFR Part 77 (General) apply, except sections 75.130 through 75.134 which concern preapplications.

(b) Administration of Grants in 34 CFR Part 74, as republished in the Federal Register on May 9, 1980. (45 FR 30856).

#### § 703.4 Effective period of these regulations.

These regulations apply only to awards made prior to December 31, 1981.

(20 U.S.C. 3474)

#### § 703.5 Definitions that apply to this program.

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77:

Applicant  
Application  
Award  
Local Educational Agency  
Non-profit  
Public  
Project  
Secretary  
State Educational Agency.

#### (b) *Specific program definitions:*

Other definitions used in this part are:

"Educational research" means research (basic and applied), planning, surveys, evaluation, investigations, experiments, developments, or demonstrations in the field of education.

"Minorities" means individuals who compose the following groups: Black, Hispanic, American Indian, Asian, Pacific Islander, or Alaskan Native.

"Experienced professional" means a person with a year or more of graduate level education that is relevant to educational research and at least one more year of related professional work experience.

(20 U.S.C. 3474)

#### Subpart B—What Types of Projects are Assisted Under This Program?

##### § 703.11 Types of projects and general requirements.

The Secretary awards grants for two types of projects: Institutional Projects and Special projects. Each project must satisfy one or more of the following general requirements:

(a) Develop and demonstrate effective ways to overcome barriers to the employment and advancement of minorities and women in educational research;

(b) Provide advanced study opportunities needed especially by minorities and women who are preparing for employment in educational research or who are seeking ways to improve utilization of their educational research capabilities. Such advanced study is to occur only in conjunction with research under the grant;

(c) Furnish information about such advanced study opportunities provided by others;

(d) Make arrangements for obtaining advice from experts on the application of concepts and methods from relevant fields and disciplines to research or other project activities;

(e) Engage persons to serve as mentors and role models. One function of such persons is to advise minorities and women about means for gaining access to essential communication channels in educational research;

(f) Assist well-qualified minorities and women to participate at an advanced level in educational research and related work;

(g) Ensure the participation of minorities and women in planning for and advising on the conduct of the project; or

(h) Coordinate the planning and conduct of the project with organizations, associations, or

institutions which represent minorities or women.

##### § 703.12 Additional requirements for Institutional Projects.

Each Institutional Project must meet the following additional requirements:

(a) Support opportunities for individuals engaged in post-doctoral studies or for experienced professionals to conceive and conduct educational research that reflects concerns and perspectives of minorities and women. (Full-time predoctoral graduate work is not a priority, and support is not provided for this activity without the prior approval of the Secretary.)

(b) Develop and implement a set of policies and procedures for increasing the involvement and professional growth and the opportunities for advancement, of minorities and women within one or more units of the grantee organization.

(c) These projects are funded for an initial period of 12 months and if an application is for a multi-year project, the project may be continued for additional periods provided the project does not exceed 36 months.

##### § 703.13 Additional requirements for special projects.

Each Special Project must meet one or more of the following additional requirements:

(a) Provide short-term advanced study opportunities, including, but not limited to, workshops, seminars, short courses, or brief residential programs directed toward the specific needs of minorities and women who are preparing for, entering, or advancing within educational research careers;

(b) Furnish information about such short-term advanced study opportunities which are provided by others;

(c) Develop and demonstrate replicable, short-term activities intended to accomplish one or more of the following objectives:

(1) Increase the involvement of minorities and women in communication networks by providing information about, or access to, groups or individuals who informally share knowledge of training and employment opportunities, funding sources, and substantive educational research results;

(2) Assist mid-career entry and re-entry of minorities and women into educational research by using methods that:

(i) Stimulate the interest of non-educational researchers to enter the educational research field or

(ii) Attract to the educational research field those non-research persons who

have appropriate academic backgrounds and experience;

(3) Identify and promote non-traditional research in areas, on approaches, or on topics associated with the needs and status of minorities and women in education.

(4) Provide for the development of specific skills needed in educational research. These include statistical skills and skills needed to conduct syntheses and transformations of knowledge.

(5) Enhance the potential for publication and dissemination of the results of significant educational research performed by minorities and women by providing information and training concerning research techniques, report writing, and publishing processes.

(d) These projects are funded for an initial period of 12 months and if an application is for a multi-year project, the project may be continued for additional periods provided the project does not exceed 36 months and provided also that the project offers a sequence of short-term activities that are recurring or intermittent.

#### § 703.14 Projects and activities that are ineligible for support.

Grants will not be awarded in support of the following:

(a) Pre-college or undergraduate programs of any type.

(b) Course work or other education or training that is not adapted specifically to the requirements of this program.

(c) Research that is not part of an Institutional Project as described in these regulations.

(d) Activities that do not emphasize the increasing or strengthening of participation by minorities and women in educational research.

(20 U.S.C. 1221e(e)(1), 3474)

#### Subpart C—How Does One Apply for a Grant?

##### § 703.21 Application procedures.

One applies for a grant under the procedures of EDGAR sections 75.100 through 75.129.

(20 U.S.C. 3474)

#### Subpart D—How Does the Secretary Make a Grant?

##### § 703.31 How Does the Secretary Evaluate an Application?

(a) The Secretary evaluates an application on the basis of the selection criteria in section 703.32.

(b) The Secretary awards up to 100 total points based upon the degree to which each of these criteria is satisfied.

(c) The maximum possible score for each criterion is indicated in parenthesis

following the identification of each selection criterion.

(d) The Secretary decides whether or not to fund a meritorious application, based on its rank order as determined by the independent review process and on whether the funding of the proposed project will contribute to the widest possible distribution of projects throughout the United States.

(20 U.S.C. 3474)

##### § 703.32 What selection criteria does the Secretary use?

(a) *Plan of operation.* (20 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that ensures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(b) *Quality of key personnel.* (15 points)

(1) The Secretary reviews each application for information that shows the qualifications of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each key person will commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) In determining the qualifications of key personnel, the Secretary considers evidence of past experience and training in fields related to the objectives of the program as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (5 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation Plan.* (10 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows that the facilities, equipment, and supplies planned to be used are adequate.

(f) *Significance of the proposed project in meeting the purpose of the program.* (25 points)

The Secretary looks for information that shows the significance of the proposed project in terms of the potential for developing methods for removing barriers to the participation of minorities and women in educational research and in advancing careers for minorities and women in educational research.

(g) *Commitment of the applicant to the purpose of the program.* (20 points)

(1) The Secretary reviews each application for information that shows the extent to which the applicant is committed to meeting the purpose of the program.

(2) The Secretary looks for information that shows the commitment of the applicant to—

(i) The adoption of successful methods which are developed under the project; or

(ii) The continuation of exemplary practices initiated under the project.

(20 U.S.C. 3474)

### Subpart E—What Conditions Must be Met by a Grantee?

#### § 703.41 Restrictions on the use of grant funds.

No grant funds may be used for construction, repair, modeling, or alteration of facilities or sites.

(20 U.S.C. 3474)

#### § 703.42 Allowable costs.

(a) Allowable direct costs for each grant under this program may not exceed the amount set forth in the grant award document.

(b) Assistance for Special projects may be provided at \$30 for each full day of participation, but may not exceed \$150 a week.

(230 U.S.C. 3474)

#### § 703.43 Restriction on for-profit type grantees.

A for-profit type grantee is required to forgo profits and to cost-share to the same extent that is required of a non-profit grantee.

(20 U.S.C. 3474)

[FR Doc. 80-40431 Filed 12-29-80; 6:45 am]

BILLING CODE 4000-01-M

### 34 CFR Parts 617, 618, 619, 620, and 621

#### Financial Assistance for Construction, Reconstruction, and Renovation of Higher Education Facilities

**AGENCY:** Department of Education.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** The Secretary proposes to amend the regulations for the programs of Financial Assistance for Construction, Reconstruction, and Renovation of Higher Education Facilities to reflect statutory changes contained in the Education Amendments of 1980. The proposed regulations revise certain selection criteria for grants and loans in order to focus applications for Federal financial assistance on special purposes specified in the amended statute.

**DATES:** All comments, suggestions, or objections must be received on or before March 2, 1981.

**ADDRESSES:** Comments should be addressed to Thomas F. McAnallen, Office of Institutional Support, Office of Postsecondary Education, U.S. Department of Education, (Room 3716, ROB-3), 400 Maryland Avenue, S.W., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** Thomas F. McAnallen. Telephone No. (202) 245-3235.

**SUPPLEMENTARY INFORMATION:** The Education Amendments of 1980 amended Title VII of the Higher Education Act. That title authorizes programs of grants and loans to public and private institutions of higher education for the construction, reconstruction, and renovation of higher education academic facilities. The amended statute repeals the general purpose of providing Federal financial assistance to meet the expansion of student enrollment capacity and provides, instead, specified purposes for which funds under this law may be expended.

Funds appropriated under the Act may now be used to enable institutions—

(a) To economize on the use of energy resources;

(b) To improve their research facilities, including libraries, and to acquire special research equipment;

(c) To construct, reconstruct, or renovate facilities to meet unusual increases in enrollments;

(d) To remove architectural barriers to the handicapped in order to comply with the Architectural Barriers Act of 1968 and Section 504 of the Rehabilitation Act of 1973;

(e) To bring facilities into conformity with environmental protection or health and safety laws enacted subsequent to the date of construction; and

(f) To detect, remove, or contain asbestos hazards in academic or other facilities used by students.

#### Summary of Proposed Changes

(a) The proposed regulations are simplified in language and divided into five separate regulations: one containing general provisions common to all or most of the four other parts, and the other four governing, respectively, procedures for obtaining—

(1) Grants for undergraduate facilities;

(2) Grants for graduate facilities;

(3) Loans for undergraduate or graduate facilities; and

(4) Annual interest grants for undergraduate or graduate facilities.

(b) The proposed regulations contain the following provisions to reflect changes made by the Education Amendments of 1980:

(1) Definitions are provided for new terms in the Act, such as "research facilities, including libraries," "usual increases in enrollment," and "other facilities used by students" in relation to removal of asbestos hazards.

(2) Through the assignment of maximum possible points for individual criteria used in the selection of grant and loan recipients, the proposed

regulations emphasize certain aspects of the special purposes:

(i) For energy conservation projects, the Secretary proposes to give greater consideration to projects proposing to use one or more of: coal, solar energy, and renewable resources.

(ii) For projects to remove architectural barriers, the Secretary proposes to give greater consideration to projects that hold promise of accomplishing exemplary programs of compliance with Section 504 that would be helpful to other institutions around the country and would not likely be carried out in the absence of Federal funds.

(iii) For projects to improve research facilities, the Secretary proposes to give greater consideration to projects that hold promise of having the greatest impact on the up-grading of institutions' research facilities.

(iv) For projects to accommodate unusual increases in student enrollment, the Secretary proposes to give greater consideration to projects that serve otherwise underserved student populations.

(v) For projects relating to asbestos hazards, the Secretary proposes to give greater consideration to projects addressing conditions of critical need.

(c) The proposed regulations provide that in any year in which the Congress appropriates funds for fewer than all of the special purposes, the Secretary will announce the congressional priorities or priorities through a notice in the *Federal Register*. If the Congress appropriates funds without specification, no special purpose will be given priority by the Secretary.

(d) The proposed regulations omit a previous provision in the definitions establishing a "period of Federal interest" in facilities *renovated or reconstructed* for a special purpose. The statutory provision on which this was based was repealed. However, in the case of facilities *constructed* with Federal assistance, the proposed regulations retain the "period of Federal interest" for 20 years after construction, since this provision was reenacted by the Education Amendments of 1980.

(e) The proposed regulations incorporate a change made by the Secretary in response to comments on interim final provisions of the regulations for Title VII published on April 29, 1980 (45 FR 28666-28683).

*Comment.* Several commenters felt that the "threshold cost" requirement for eligibility for assistance to remove architectural barriers unduly reduced the number of eligible applicants.

*Response.* A change has been made. The Secretary has omitted the

"threshold cost" requirement from these proposed regulations.

These proposed regulations also contain, in §§ 618.60 through 618.62, provisions for which there is no statutory authority. Before it was amended by the Education Amendments of 1980, Title VII of the Higher Education Act provided for allocation to the States of funds for construction of undergraduate facilities and a State plan for ranking applications, but it also provided for the awarding of grants by the Secretary.

In order to continue orderly administration of the program, a technical amendment to restore the authority of the Secretary to make the awards is being presented to the Congress. If the Congress enacts the technical amendment, these provisions will be part of the final regulations. The public is invited to comment on the appropriate course of action for the Department if the Congress does not enact the technical amendment.

#### Assessment of Educational Impact

The Department particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

#### Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments submitted on or before (the 60th day after publication of this document) will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3716, ROB-3, 7th and D Streets S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

#### Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

Dated: December 22, 1980.

Shirley M. Hufstедler,

Secretary of Education.

The Secretary proposes to revise Part 617 of Title 34 of the Code of Federal Regulations to read as follows:

### PART 617—FINANCIAL ASSISTANCE FOR CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF ACADEMIC FACILITIES: GENERAL

#### Subpart A—General

Sec.

- 617.1 Financial assistance for construction, reconstruction, and renovation of academic facilities.
- 617.2 Eligible parties: Grants for the construction, reconstruction, and renovation of undergraduate academic facilities.
- 617.3 Eligible parties: Grants for the construction, reconstruction, and renovation of graduate academic facilities.
- 617.4 Eligible parties: Loans for the construction, reconstruction, and renovation of academic facilities.
- 617.5 Eligible parties: Annual interest grants for the construction, reconstruction, and renovation of academic facilities.
- 617.6 Regulations that apply to programs of financial assistance for construction, reconstruction, and renovation of academic facilities.
- 617.7 Definitions that apply to programs of financial assistance for construction, reconstruction, and renovation of academic facilities.

#### Subpart B—What Kinds of Projects Does the Department of Education Assist Under These Programs?

- 617.10 Grants and loans for academic facilities and special research equipment.
- 617.11 Types of projects the secretary considers for assistance.

#### Subpart C—[Reserved]

#### Subpart D—How Does the Secretary Make a Grant?

- 617.30 Determination of costs eligible for Federal assistance: general.
- 617.31 Conditions for grant approval and determination of costs eligible for Federal assistance: projects related to energy conservation, architectural barriers, environmental protection, health and safety, or asbestos hazards.
- 617.32 Determination of costs eligible for Federal assistance: projects related to research facilities, special research equipment, or unusual increases in enrollment.
- 617.33 Avoidance of duplication of facilities and programs.

#### Subpart E—What Conditions Must Be Met by an Applicant?

- 617.40 Cost requirements.

Authority: Secs. 701-742 of Pub. L. 96-374, Title VII of the Higher Education Act, as amended (20 U.S.C. 1132a-1132e-1) unless otherwise noted.

#### Subpart A—General

##### § 617.1 Financial assistance for construction, reconstruction, and renovation of academic facilities.

The Secretary awards financial assistance to institutions of higher education for the construction, reconstruction, and renovation of academic facilities through four programs:

(a) Grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities (34 CFR Part 618).

(b) Grants for the Construction, Reconstruction, and Renovation of Graduate Academic Facilities (34 CFR Part 619).

(c) Loans for the Construction, Reconstruction, and Renovation of Academic Facilities (34 CFR Part 620).

(d) Annual Interest Grants for the Construction, Reconstruction, and Renovation of Academic Facilities (34 CFR Part 621).

(20 U.S.C. 1132a-1132e-1)

##### § 617.2 Eligible parties: Grants for the construction, reconstruction, and renovation of undergraduate academic facilities.

The following two categories of institutions (paragraphs (a) and (b) of this section) are eligible to apply for grants for the construction, reconstruction, and renovation of undergraduate facilities:

(a)(1) Under section 713(b) of the Act (allotment of funds for grants to public community colleges and public technical institutes)—

- (i) Public community colleges;
- (ii) Public technical institutes; and
- (iii) Branch campuses of other types of institutions of higher education.

(20 U.S.C. 1132e-1 (6))

(2) An institution qualifies for grants under Section 713(b) of the Act if—

(i) The Secretary determines that the institution meets the requirements of both of the following definitions in the Act:

(A) Section 742(6) of the Act (definition of "public community college and public technical institute").

(B) Section 1201(a) of the Act (definition of "institution of higher education"); and

(ii) The State commission has found that—

(A) The institution is organized principally to provide two-year academic programs of the types specified in Section 742(6) of the Act; and

(B) More than 50 percent of the institution's full-time equivalent student enrollment is in those types of programs.

(20 U.S.C. 1132b-2; 1132e-1(6))

(b)(1) Under section 713(c) of the Act (allotment of funds for grants to all institutions of higher education other than public community colleges and public technical institutes), all other institutions of higher education.

(2) An institution qualifies for grants under Section 713(c) of the Act if the Secretary determines that the institution does not meet the requirements of Section 742(6) of the Act (definition of "public community college and public technical institute") but does meet the requirement of Section 1201(a) of the Act (definition of "institution of higher education").

(20 U.S.C. 1132b-2, 1141(a))

**§ 617.3 Eligible parties: Grants for the construction, reconstruction, and renovation of graduate academic facilities.**

(a) Institutions of higher education are eligible to apply to grants for the construction, reconstruction, and renovation of graduate academic facilities.

(20 U.S.C. 1132c)

(b) For a construction, reconstruction, or renovation project involving combined graduate and undergraduate facilities, an otherwise eligible applicant shall apply for a grant under 34 CFR Part 618 (Grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities).

(20 U.S.C. 1132b(g))

**§ 617.4 Eligible parties: Loans for the construction, reconstruction, and renovation of academic facilities.**

The following are eligible to apply for loans for the construction, reconstruction, and renovation of academic facilities:

- (a) Institutions of higher education.
- (b) Higher education building agencies.

(20 U.S.C. 1132d(a))

**§ 617.5 Eligible parties: Annual interest grants for construction, reconstruction, and renovation of academic facilities.**

The following are eligible to apply for annual interest grants for the construction, reconstruction, and renovation of academic facilities:

- (a) Institutions of higher education.
- (b) Higher education building agencies.

(20 U.S.C. 1132d-3(a))

**§ 617.6 Regulations that apply to programs of financial assistance for construction, reconstruction, and renovation of academic facilities.**

The following regulations apply to programs of Financial Assistance for

**Construction, Reconstruction, and Renovation of Academic Facilities:**

(a) For grants for the construction, reconstruction and renovation of undergraduate or graduate academic facilities (34 CFR Parts 618 and 619):

(1) The Education Division General Administrative Regulations (EDGAR), 34 CFR Part 75, with the following exceptions:

(i) Section 75.107: Applications for new grants under a discretionary grant program.

(ii) Sections 75.150 through 75.154, regarding State approval procedures.

(iii) Sections 75.155 through 75.160, regarding State comment procedures.

(iv) Sections 75.200 through 75.206, regarding selection of new projects.

(v) Sections 75.215 through 75.222, regarding selection procedures.

(vi) Section 75.232: The cost analysis; basis for grant amount.

(vii) Section 75.233: Setting the amount of the grant.

(viii) Sections 75.580 and 75.581, regarding coordination.

(b) Assistance under 34 CFR Part 620 (loans) and 34 CFR Part 621 (annual interest grants) is subject to the provisions of EDGAR relating to construction, 34 CFR 75.600 through 75.615.

(c) EDGAR, 34 CFR Part 75 (General).

(d) The regulations in this Part 617.

(e) The regulations in 34 CFR Parts 618, 619, 620, or 621 as applicable.

(20 U.S.C. 1232)

**§ 617.7 Definitions that apply to programs of financial assistance for construction, reconstruction, and renovation of academic facilities.**

(a) Definitions in EDGAR. The following terms used in this part are defined in 34 CFR Part 77:

Applicant  
Application  
Award  
Budget  
Department  
EDGAR  
Facilities  
Fiscal Year  
Grant  
Grantee  
Nonprofit  
Private  
Public  
Recipient  
Supplies  
Secretary  
Work of art.

(b) The following definitions apply to this part: "Academic facilities," as defined in section 742(1)(A) of the Act, are further defined and subdivided into the following categories:

(1) "Instructional and library facilities" means—

(i) All rooms or areas used regularly for instruction of students, for faculty offices, or for library purposes; and

(ii) Service areas that adjoin and are used in connection with the rooms or areas referred to in paragraph (a)(1) of this definition.

(2) "Instruction-related facilities" means—

(i) All rooms or areas—other than instructional and library facilities—used for purposes related to the instruction of students, for research, or for the general administration of the educational or research programs of an institution of higher education; and

(ii) Service areas that adjoin and are used in conjunction with the rooms or areas referred to in paragraph (2)(i) of this definition.

(3) "Health-care facilities," as authorized under Parts A and C of Title VII of the Act, means—

(i) Infirmaries and all other rooms or areas used for medical examination or treatment of students and institutional personnel; and

(ii) Service areas that directly serve the rooms or areas referred to in paragraph (3)(i) of this definition.

(20 U.S.C. 1132e-1(1)(A))

(4) "Public health facilities" means facilities as defined in section 742(1)(B)(v) of the Act (Definitions) if—

(i) These facilities are owned, operated, and maintained by the institution of higher education requesting the approval of a project authorized under section 701(I) of the Act (funds to enable an institution to economize on energy);

(ii) Funds available for the project are used solely for conversion or modernization to economize on the use of energy resources; and

(iii) The project is not limited to facilities described in section 742(1)(B)(v) of the Act (facilities excluded from the definition of academic facilities).

(20 U.S.C. 1132e-1(1)(B)(v))

(5) "Related supporting facilities" means all other areas and facilities necessary for the use, operation, and maintenance of instructional and library facilities, instruction-related facilities, or health-care facilities. This term includes building service and circulation areas and central maintenance and utility facilities that serve more than one building, to the degree that these central facilities are used to serve academic facilities eligible under Title VII of the Act.

(20 U.S.C. 1132e-1(1)(A))

"Acquisition" means taking ownership of property through purchase.

(20 U.S.C. 1132e-1(3)(A))

"Act" means the Higher Education Act of 1965 (Pub. L. 89-329), as amended. Unless otherwise indicated, title references are to titles of the Act.

"Assignable areas"—

(1) Means square footage of floor space in facilities designed and available for assignment to specific functional purposes—such as instruction, research, and administration—and including purposes that are ineligible for assistance under Title VII—such as students' sleeping rooms, apartments, or chapels; but

(2) Does not mean—

- (i) Areas used for general circulation within a building;
- (ii) Areas for public washrooms;
- (iii) Areas for building maintenance or custodial services; or
- (iv) Areas in central maintenance and utility facilities that exist only to support the operation and use of other structures on the campus and that are not available for assignment to specific functional purposes as illustrated in paragraph (1) of this definition.

(20 U.S.C. 1132e-1(1)(A))

"Brach campus" means, an institution of higher education, in a unit that—

- (a) Is separately organized;
- (b) Is located apart from the parent institution; and

(c) Meets in its own right the definition of an institution of higher education as defined in the Act.

(20 U.S.C. 1132e-1(6))

"Capacity/enrollment ratio."

(1) This term means the ratio of (i) the square feet of assignable area of instructional and library facilities to (ii) the total student clock-hour enrollment at the campus of an institution.

(2) For purposes of this definition, "student clock-hour enrollment" means the aggregate clock hours (sometimes called contact hours) per week in classes or supervised laboratory or shop work for which all resident students—i.e., students enrolled for credit courses on the campus—are enrolled as of a particular date.

(3) A campus having a formally established independent study program or programs may include systematically determined equivalents of class or laboratory hours.

(20 U.S.C. 1132a (4))

"Equipment"—other than special research equipment—means a manufactured item that has an extended useful life, is not consumed in use, and has an identity and function that are not lost through incorporation into a different or more complex unit of

substance. Equipment is further subdivided into two categories—built-in equipment and initial equipment—defined as follows:

(1) "Built-in equipment" means equipment that is a permanent part of a structure.

(2) "Initial equipment" means equipment—other than built-in equipment—necessary and appropriate for the initial functioning of a particular academic facility for that facility's specific purpose.

(20 U.S.C. 1132e-1(2)(A) and (B))

"Full-time-equivalent number of students" means the following:

(1)(i) For purposes of determining State allotments—

(A) The number of full-time students enrolled in programs that consist wholly or principally of studies normally creditable toward a bachelor's or higher degree;

(B) One third of the number of part-time students enrolled in the programs referred to in paragraph (1)(i)(A) of this definition;

(C) Forty percent of the number of students enrolled in programs that are not normally creditable toward a bachelor's or higher degree; and

(D) Twenty-eight percent of the remaining number of the students referred to in paragraph (1)(i)(C) of this definition.

(ii) For the purposes of this computation, student enrollment figures for each fiscal year will be those in the most recent U.S. Department of Education survey containing data on opening fall enrollment in higher education.

(2)(i) For purposes of reporting undergraduate enrollment trends and projections in connection with an application for financial assistance for an individual institution under 34 CFR Part 618, the "full-time equivalent number of students" may be defined by each State commission through a specific provision in its State plan.

(ii) If a State plan does not define the term, "full-time-equivalent number of students"—for application purposes—means the total number of full-time students plus one-third of the number of part-time students.

(3) For the purpose of the definition of "full-time-equivalent number of students," full-time students are those carrying at least 75 percent of a normal student-hour load.

(20 U.S.C. 1132b-2(c))

"Higher education building agency" means any public or nonprofit entity—other than the applicant institution—legally established for the purpose of

providing or financing the construction, reconstruction, or renovation of academic facilities for the applicant institution.

(20 U.S.C. 1132e-1(5))

"Institution" or "institutions of higher education" means that part of an educational institution that meets the requirements in section 1201(a) of the Act. The term "educational institution" is limited to an institution at which teaching is conducted.

(20 U.S.C. 1141(a))

"Other facilities used by students" means, in connection with projects relating to asbestos hazards, any facilities that are normally used by students on campus, even if those facilities are otherwise ineligible for Federal assistance under Title VII of the Act.

(20 U.S.C. 1132a(5))

"Project" means all or a portion of one or more structures—

- (1) That are eligible for grant or loan assistance under Title VII;
- (2) For which grant or loan assistance is requested in a single application; and
- (3) That are part of a unified construction, reconstruction or renovation activity on the same campus.

(20 U.S.C. 1132e-1(2))

"Reconstruction or renovation project under section 701 (1), (2), and (5) of the Act" means a reconstruction or renovation project designed primarily to enable an institution to—

(1) Economize on the use of energy resources;

(2) Bring its facilities into conformity with the requirements of Pub. L. 90-480, commonly known as the Architectural Barriers Act of 1968, as amended by Pub. L. 91-205;

(3) Bring its facilities into conformity with the requirements of Section 504 of the Rehabilitation Act of 1973 (Pub. L. 93-112, as amended);

(4) Bring its academic facilities into conformity with environmental protection or health and safety programs mandated by Federal, State, or local law, if those requirements were not in effect at the time the facilities were constructed; or

(5) Detect, remove, or contain asbestos hazards in academic or other facilities used by students.

(20 U.S.C. 1132a (1), (2), and (5))

"Research facilities, including libraries."

(1) This term means facilities used in connection with research at institutions of higher education that have been

defined and classified as research universities by the Carnegie Council on Policy Studies in Higher Education.

(2) No distinction is made with regard to the type of research.

(20 U.S.C. 1132a(3))

"Special research equipment."

(1) This term means equipment used in connection with research at institutions of higher education that have been defined and classified as research universities by the Carnegie Council on Policy Studies in Higher Education.

(20 U.S.C. 1132a(3))

(2) No distinction is made with regard to the type of research equipment.

(3) However, books or other library materials are excluded from this definition.

"Section 504" means Section 504 of the Rehabilitation Act of 1973 (Pub. L. 93-112, as amended) and its implementing regulations (34 CFR Part 104).

"State commission" means, in each State, the agency designated or established by that State—in its agreement with the Secretary under section 1203 of the Act—to administer a program of construction, reconstruction, and renovation of undergraduate academic facilities.

(20 U.S.C. 1132b; 1143)

"State plan" means the document—submitted by a State and approved by the Secretary of Education—that describes the standards, methods, and administrative procedures the State commission uses to—

(1) Review each project proposed by an applicant in its State for a Federal grant for the construction, reconstruction, and renovation of undergraduate academic facilities;

(2) Determine and recommend the relative priority of that project; and

(3) Determine and recommend for that project the Federal share of the costs eligible for Federal financial assistance.

(20 U.S.C. 1132b)

"Unusual increase in enrollment" means, at institutions of higher education listed in paragraphs (1) through (3) of this definition, an average increase in student enrollment of more than 10 percent per year, over a period of three years going back to the fall term beginning three years prior to the filing date for applications. The institutions to which this definition applies are those that—

(1) Enroll traditionally underserved populations;

(2) Have been successful in their access and outreach efforts; and

(3) Now find themselves with increasing enrollments and limited facilities.

(20 U.S.C. 1132a(4); House Report 96-520, page 53)

#### Subpart B—What Kinds of Projects Does the Department of Education Assist Under These Programs?

##### § 617.10 Grants and loans for academic facilities and special research equipment.

These programs provide grants and loans for the construction, reconstruction, and renovation of academic facilities and the acquisition of special research equipment if the primary purpose of an applicant's proposed project is to achieve one or more of the following—

(a) Economize on the use of energy resources. The Secretary gives priority consideration to a project that includes the use of one or more of the following: coal, solar energy, and renewable resources;

(b) Bring the applicant's academic facilities into conformity with the requirements of—

(1) Pub. L. 90-480, commonly known as the Architectural Barriers Act of 1968, as amended by Pub. L. 91-205; or

(2) Section 504 of the Rehabilitation Act of 1973 (Pub. L. 93-112), as amended;

(c) Bring the applicant's academic facilities into conformity with the requirements of environmental protection or health and safety programs mandated by Federal, State, or local law, if those requirements were not in effect at the time the facilities were constructed;

(d) Detect, remove, or contain asbestos hazards in academic or other facilities used by students;

(e) Construct, reconstruct, or renovate the applicant's research facilities, including libraries, and acquire special research equipment; or

(f) Construct, reconstruct, or renovate the applicant's facilities to provide for unusual increases in enrollment.

(20 U.S.C. 1132b-1132d-4)

##### § 617.11 Types of projects the Secretary considers for assistance.

(a) The Secretary may announce the specific project purpose or purposes— from among those listed in § 617.10—that the Secretary will consider for assistance in any given fiscal year.

(b) The Secretary makes the announcement referred to in paragraph (a) of this section through a notice published in the Federal Register.

(c) The Secretary makes this announcement based on the purpose or purposes for which the Congress has appropriated funds for that year.

(20 U.S.C. 1132a-1132e-1 House Report 96-520, page 54)

#### Subpart C—[Reserved]

#### Subpart D—How Does the Secretary Make a Grant?

##### § 617.30 Determination of costs eligible for Federal assistance: general.

The Secretary determines separately for each proposed project the costs eligible for Federal assistance.

The Secretary bases the determination on—

(a) The factors in § 617.31 or § 617.32, as applicable;

(b) The factors in § 617.33, if applicable; and

(c) The following:

(1) The date on which the applicant incurred or contracted for a given cost.

(2) Whether the cost is an allowable development cost, as defined in section 742(3) of the Act (Definitions).

(3) Whether the applicant has incurred that cost in accordance with these regulations.

(4) That portion of the facility eligible under the type of assistance for which the applicant has submitted the application.

(5) The amount of any other Federal financial assistance the applicant has obtained or is assured of obtaining for the project.

##### § 617.31 Conditions for grant approval and determination of costs eligible for Federal assistance: projects related to energy conservation, architectural barriers, environmental protection, health and safety, or asbestos hazards.

(a) The conditions in paragraphs (b) through (c) of this section apply to an application for assistance for—

(1) A construction, reconstruction, or renovation project related to energy conservation; or

(2) A reconstruction or renovation project related to—

(i) Bringing facilities into conformity with the Architectural Barriers Act of 1968 or Section 504 of the Rehabilitation Act of 1973;

(ii) Bringing facilities into conformity with environmental protection or health and safety programs mandated by law; or

(iii) The detection and control of asbestos hazards.

(b) The Secretary approves an application only if it contains sufficient information to demonstrate that the applicant's proposed project meets the following requirements:

(1) For assistance for energy conservation, the applicant—

(i) Must have accomplished minimum energy conservation measures required by the Secretary; and

(ii) Must have demonstrated that the proposed project will result in significant savings in energy consumption or related costs;

(iii) To receive priority consideration by the Secretary, must include in the proposed project the use of one or more of the following: coal, solar energy, and renewable resources.

(2) For assistance for the removal of architectural barriers for the handicapped, the proposed project must—

(i) Be deemed necessary to provide program accessibility under Section 504; and

(ii) Conform to the requirements of Pub. L. 90-480 commonly known as the Architectural Barriers Act of 1968;

(iii) Meet the most recently published standards of the American National Standards Institute (ANSI Standards); and

(iv) To receive priority consideration by the Secretary, hold promise of accomplishing an exemplary program of compliance with Section 504 that would be helpful to similar institutions around the country and would not likely be carried out in the absence of Federal funds.

(House Report 96-520, page 54)

(3) For assistance in meeting environmental or health and safety requirements, the proposed project must be required by local, State, or Federal law provided—in the case of a reconstruction or renovation project—those requirements were not in effect at the time the facilities were constructed.

(4) For projects relating to asbestos hazards, the applicant must justify to the satisfaction of the Secretary that the proposed project is urgently needed to detect, remove or contain asbestos hazards in academic or other facilities used by students.

(5)(i) An application involving a combination of two or more of the purposes in paragraphs (b)(1), (2), (3), or (4) of this section must satisfy each of the specific requirements.

(ii) Any portion of an application not meeting the applicable requirements is ineligible for assistance, except as permitted under paragraph (d)(2)(ii) of this section.

(c) The Secretary considers a project only if it has a total eligible cost, as specified in paragraph (c) of this section, of at least \$10,000.

(d)(1) The Secretary bases the determination of costs eligible for Federal assistance on a review of each application.

(2)(i) The Secretary considers as eligible only those costs specifically related to one—or a combination—of the reconstruction or renovation purposes specified in the definition of "Reconstruction or renovation project under section 701 (1), (2), and (5) of the Act."

(ii) However, the Secretary may approve costs not specifically related to the purposes in that definition to the extent that they do not exceed 10 percent of costs that are specifically related, if the Secretary finds that the costs not specifically related are part of the project for which Federal assistance is requested.

(e) The Secretary awards a grant or loan on condition that the recipient award the contract or begin on-site work within 18 months from the date of loan approval or the date of grant approval or—in the case of a recipient having both a grant and a loan—the earlier of the date of loan approval or the date of grant approval.

(20 U.S.C. 1132a (1), (2), (5); 20 U.S.C. 1132e-1(3))

**§ 617.32 Determination of costs eligible for Federal assistance: projects related to research facilities, research equipment, or unusual increases in enrollment.**

(a) The conditions in paragraphs (b) and (c) of this section apply to an application for assistance for a construction, reconstruction, or renovation project related to—

- (i) Research facilities;
- (ii) The acquisition of special research equipment; or
- (iii) An unusual increase in enrollment.

(b) The Secretary approves the development cost of a proposed project only if the application contains sufficient information to demonstrate that the applicant's proposed project meets the following requirements:

(1) For assistance to construct, reconstruct, or renovate research facilities, including libraries, or to acquire special research equipment, the applicant must have demonstrated that the proposed project is necessary for the up-grading of the research facilities at the institution.

(2) For assistance to construct, reconstruct, or renovate academic facilities to increase student enrollment capacity, the applicant must have demonstrated that the institution has experienced an unusual increase in enrollment as defined in § 617.7(b).

(c) The Secretary bases the determination of costs eligible for Federal assistance on a review of each application.

**§ 617.33 Avoidance of duplication of facilities and programs.**

(a) In addition to other eligibility requirements in the Act and these regulations, a project proposed by a public institution of higher education must—in order to avoid duplication of facilities and programs—meet the requirements of urgency as described in paragraph (b) of this section.

(b)(1) The Secretary bases the determination of urgency of need under paragraph (a) of this section on whether—

(i) The applicant has a history of not serving persons of a particular race, color, or national origin; or

(ii) There are within the geographic area the applicant serves one or more other public institutions of higher education that have a history of not serving persons of a particular race, color, or national origin.

(2) If either condition described in paragraph (b)(1) of this section is present, the Secretary determines—or the State commission, in the case of an application for a grant for undergraduate academic facilities shall determine—that urgency of need does not exist unless the applicant provides evidence satisfactory to the Secretary—or to the commission, if appropriate—that the proposed project and the proposed use of the facilities to be constructed, reconstructed, or renovated under the project will not—

(i) Establish or increase the identifiability of any of the institutions on the basis of race, color, or national origin; or

(ii) Impede the elimination of the identifiability of any of the institutions on the basis of race, color, or national origin.

(20 U.S.C. 1132a; 1132b—1132d-3; Shannon vs. HUD, 436 F. 2d 809)

**Subpart E—What Conditions Must Be Met by an Applicant?**

**§ 617.40 Cost requirements.**

(a) If, under the Act, an applicant files for assistance for a proposed project for the first time on or after the effective date of these regulations, the Secretary excludes the following from eligible development costs:

(1) Any cost for land incurred more than two years before the applicant files the application.

(2) Any cost for land in connection with an application for reconstruction or renovation.

(3) Any cost for the acquisition of a structure incurred more than one year before the applicant files the application.

(4) Any cost for the acquisition of a structure in connection with an application for reconstruction or renovation.

(5) Any cost for initial equipment incurred before the date the applicant files the application.

(6) Any cost for construction, reconstruction, renovation, or built-in equipment if the contract was entered into—

(i) Before the date the applicant filed the application; and

(ii) Before the Secretary concurred in the awarding of the contract.

(b) A grantee must obtain from the Secretary a determination of eligible costs—

(1) Before advertising for or soliciting bids; and

(2) Before awarding any contract for construction, reconstruction, or renovation under the Act.

(c) The Secretary approves costs only after the Secretary or the appropriate official of another Federal agency has approved Federal assistance for the construction, reconstruction, or renovation of the facility.

(20 U.S.C. 1132e-1(3))

The Secretary proposes to add a new Part 618 to Title 34 of the Code of Federal Regulations to read as follows:

**Part 618—GRANTS FOR THE CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF UNDERGRADUATE ACADEMIC FACILITIES**

**Subpart A—General**

Sec.

618.1 Grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities.

618.2 Eligible parties.

618.3 Regulations that apply to grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities.

618.4 Definitions that apply to grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities.

**Subpart B—How Does a State Apply To Participate?**

618.10 State plan.

618.11 Continuation of State plan.

618.12 Amendment to State plan.

618.13 Standards for determining the Federal share of eligible projects.

**Subpart C—How Does the Secretary Approve a State Plan?**

618.20 Approval of a State plan.

**Subpart D—How Does an Applicant Apply to a State for a Grant?**

618.30 Submission of application to State commission.

618.31 Application closing dates.

Sec.

618.32 Invitation for bids.

618.33 Documents a State commission must submit to the Secretary.

618.34 Notification of an applicant.

618.35 Disposition of all applications not recommended for a grant.

618.36 Amendment to an application.

618.37 Project changes.

618.38 Supplemental application.

**Subpart E—How Does a State Rank Applications and Recommend Them for Approval by the Secretary?**

618.40 Standards and methods for ranking proposed projects.

618.41 Selection criteria: general.

618.42 Selection criteria: projects based on unusual increases in enrollment.

618.43 Selection criteria: projects dealing with research facilities, including libraries, and the acquisition of special research equipment.

618.44 Selection criteria: projects based on energy conservation.

618.45 Selection criteria: projects to remove architectural barriers.

618.46 Selection criteria: projects to meet environmental protection or health and safety programs mandated by law.

618.47 Selection criteria: projects to detect, remove, or contain asbestos hazards.

618.48 Selection criteria: projects directed to two or more purposes.

618.49 Selection criteria: additional criteria.

618.50 Verification of application data and institutional and project eligibility.

618.51 Determination of relative priorities and Federal shares.

618.52 Procedures if funds are insufficient.

618.53 Apportionment of State allotment among closing dates.

618.54 Procedures if State allotment is apportioned or not apportioned among closing dates.

618.55 Offer of a partial Federal share.

**Subpart F—How Does the Secretary Make a Grant?**

618.60 Conditions for grant approval.

618.61 Grant award.

618.62 Adjustment in the amount of the Federal share.

Authority.—Secs. 701-742 of Pub. L. 96-374, title VII, the Higher Education Act, as amended, (20 U.S.C. 1132a-1132e-1) unless otherwise noted.

**Subpart A—General**

**§ 618.1 Grants for the construction, reconstruction, and renovation of undergraduate academic facilities.**

This State-administered program provides grants for the construction, reconstruction, and renovation of undergraduate academic facilities if the primary purpose of an applicant's proposed project is to achieve one or more of the objectives listed in 34 CFR 617.10.

(20 U.S.C. 1132b)

**§ 618.2 Eligible parties.**

(a) The two categories of parties eligible to apply for grants for

construction, reconstruction, and renovation of undergraduate facilities are listed in 34 CFR 617.2. (20 U.S.C. 1132(b) and (c))

(b) An applicant shall apply under this part for a project involving combined graduate and undergraduate facilities.

(20 U.S.C. 1132b-2(g))

**§ 618.3 Regulations that apply to grants for the construction, reconstruction, and renovation of undergraduate academic facilities.**

The following regulations apply to this program:

(a) The regulations in 34 CFR 617.6.

(b) The regulations in this Part 618.

(c) The regulations in 34 CFR Part 604, which implements section 1203 of the Act (Federal-State agreement).

(20 U.S.C. 1132)

**§ 618.4 Definitions that apply to grants for the construction, reconstruction, and renovation of undergraduate academic facilities.**

The definitions in 34 CFR 617.7 apply to this program.

**Subpart B—How Does a State Apply to Participate?**

**§ 618.10 State plan.**

(a) A State that desires to participate in the program of Grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities shall—

(1) Have an agreement with the Secretary under section 1203 of the Act; and

(2) Submit annually, through its State commission, a State plan.

(b) The Secretary—

(1) Determines the form in which the State submits its plan;

(2) Specifies the type of information that the State shall supply; and

(3) Specifies criteria the State plan must include for determining relative priorities of proposed projects (as explained in § 618.40).

(c) The plan may include a definition of "full-time-equivalent number of students" other than the definition in 34 CFR 617.7(b).

(d) The Secretary must receive the plan at least 60 days prior to the first closing date contained in the plan.

(20 U.S.C. 1132b; 1143)

**§ 618.11 Continuation of State plan.**

If a State intends to continue its existing plan for the following fiscal year, the Secretary must receive notification of this in writing from the State at least 60 days before the first closing date of that next fiscal year.

**§ 618.12 Amendment to State plan.**

(a) A State may at any time submit a proposed amendment to its State plan.

(b) The Secretary determines the form in which the State submits the proposed amendment.

(c) If the Secretary approves the amendment, the State shall uniformly apply that amendment to all applications received by the first closing date following the approval.

(d) Unless otherwise specified in the State plan, an amendment becomes effective immediately when the Secretary approves it.

(e) Paragraph (d) of this section does not apply to an amendment that—

(1) Affects the standards and methods for determining priorities;

(2) Alters the Federal share; or

(3) Changes a closing date.

(f) The types of amendments referred to in paragraph (e) of this section become effective—

(1) No sooner than 60 days after the Secretary receives them; and

(2) In any event, no sooner than 30 days after the Secretary approves them.

(g) If an amendment to the State plan is required by legislation or new or revised regulations, that amendment may be effective immediately after the Secretary approves it.

(20 U.S.C. 1132b)

**§ 618.13 Standards for determining the Federal share of eligible projects.**

(a) A State plan must—

(1) Specify as a uniform percentage the Federal share of the costs eligible for Federal financial assistance; or

(2) Prescribe the standards or methods by which the State commission determines the Federal share of the costs.

(20 U.S.C. 1132b(a)(2)(B))

(b) The Federal share of a project's costs may not exceed 50 percent of the eligible development costs.

(20 U.S.C. 1132b-1(a)(3); 1132-1(4))

(c) Standards and methods for determining the Federal share of eligible costs must—

(1) Be objective and simple to apply;

(2) Be based on the data that an applicant is required to include in its application; and

(3) Be consistent with the standards in the State plan for determining relative priorities.

(20 U.S.C. 1132b(a)(2)(B))

**Subpart C—How Does the Secretary Approve a State Plan?****§ 618.20 Approval of a State plan.**

The Secretary approves a State plan if the Secretary is satisfied it meets the

requirements of section 711 of the Act (State plan).

(20 U.S.C. 1132b)

**Subpart D—How Does an Applicant Apply to a State for a Grant?****§ 618.30 Submission of application to State commission.**

(a) An applicant shall submit directly to its State commission—

(1) Its application; and

(2) Any supplemental information the commission may require.

(b) The commission shall officially record the date of receipt of the application.

(20 U.S.C. 1132b(a)(4))

**§ 618.31 Application closing dates.**

(a) In its State plan a State shall establish closing dates for submission of applications for funds allotted under section 713(b) and 713(c) of the Act (allotment for grants to public community colleges and public technical institutes; allotment for grants to all other institutions of higher education).

(b) The State plan shall provide at least two closing dates during a Federal fiscal year for each of the two categories of institutions referred to in 34 CFR 617.2.

(c)(1) All closing dates established in the State plan must be between October 31 and May 15.

(2) The first closing date must be prior to January 1.

(d) If the Secretary permits, after determining the presence of unusual circumstances—

(i) The State commission may waive a closing date if the commission gives reasonable prior notice of waiver to the institutions that may be affected by that date.

(ii) In that case an applicant may file an application before the next closing date established by the State commission for that fiscal year;

(2) The State plan may provide for a closing date after May 15; or

(3) Both paragraphs (d)(1) and (2) of this section.

(20 U.S.C. 1132b-2(b) and (c))

**§ 618.32 Invitation for bids.**

(a) An applicant may not invite bids for construction, reconstruction, or renovation under its proposed project before submitting its initial application to the State commission.

(b)(1) However, paragraph (a) of this section does not apply if an agency of the United States has already approved assistance for the project under Title VII or some other Federal construction program.

(2) In that case the commission shall consider the application at only those closing dates that occur no later than 12 months after the applicant has begun the construction, reconstruction, or renovation.

(20 U.S.C. 1132b-2 (b) and (c))

**§ 618.33 Documents a State commission must submit to the Secretary.**

On completing its consideration of applications for each closing date, but no later than 45 days after each closing date, a State commission shall forward the following to the Secretary:

(a) A current application summary report, in a form prescribed by the Secretary, for each category of applicants. The commission shall list in its report—

(1) Each application received for that closing date, including those carried over from the previous closing date;

(2) Each application returned to an applicant and the reason for the return of that application; and

(3) The priority and Federal share—determined according to the State plan—for each project recommended for Federal assistance.

(b) For each project to which the commission has assigned a priority high enough to enable that project to qualify for a Federal grant within the amount of funds available in the allotment for the State, the application form and exhibits in the number of copies the Secretary requests.

(20 U.S.C. 1132b(a)(2); 1132b-2(e))

**§ 618.34 Notification of an applicant.**

A State commission shall—

(a) Promptly notify an applicant of the results of all determinations regarding its application as of each closing date; and

(b) On request and according to procedures that the commission has established, give an applicant access to the records of official proceedings on the basis of which the commission determined relative priorities and Federal shares of all applications.

**§ 618.35 Disposition of all applications not recommended for a grant.**

(a) A State commission shall notify all unsuccessful applicants when funds are no longer available in the State allotments for that fiscal year.

(b) The commission may retain until the end of the fiscal year an application that it does not recommend for a grant.

(c) The commission may reconsider for the following fiscal year an application that it has not recommended for a grant if the applicant requests the commission, in writing, to reconsider its application in that subsequent year.

(d) If the commission carries over an application from one closing date to the next, the applicant—if necessary—shall amend those portions of the application requiring data on enrollments and available instructional and library or health care facilities or both—as appropriate—to reflect most recent fall term data.

(20 U.S.C. 132b(a))

**§ 618.36 Amendments to an application.**

(a) Any time prior to a closing date for which an applicant asks its State commission to consider its application, the applicant may make changes in the application by informing the commission, in writing, of those changes.

(b) After the closing date the commission may not permit changes in the application except for corrections or the submission of additional data the commission requests.

(20 U.S.C. 1132b-1)

**§ 618.37 Project changes.**

After a State commission has forwarded a recommended project to the Secretary, the Secretary does not approve any substantial changes in the nature or scope of the project unless the Secretary determines that those changes would not have affected the commission's original recommendation of the project for a grant.

(20 U.S.C. 1132b-1)

**§ 618.38 Supplemental application.**

(a) If an applicant has received approval of a grant for undergraduate academic facilities but has not received the maximum Federal share allowable under the Act or the applicable State plan, the applicant may file a supplemental application.

(b) A supplemental application—

(1) Must be in the form of a written request to the State commission; and  
(2) Must contain all amended application data necessary to enable the commission to assign a priority to the application and to calculate a revised eligible development cost of the project, if applicable.

(c) However, the commission may not consider a supplemental application for—

(1) A closing date that is more than 12 months after the applicant has started construction, reconstruction, or renovation; or

(2) A closing date that is after the date the applicant has substantially completed the project.

(20 U.S.C. 1132b-1)

**Subpart E—How Does a State Rank Applications and Recommend Them for Approval by the Secretary?**

**§ 618.40 Standards and methods for ranking proposed projects.**

The following requirements govern the standards and methods for ranking proposed projects under a State plan:

(a) In its plan a State shall specify criteria and methods for assessing and ranking proposed projects for the construction, reconstruction, and renovation of undergraduate academic facilities. The State shall specify these criteria and methods separately for—

(1) Public community colleges and public technical institutes; and  
(2) Other institutions of higher education.

(b) For all proposed projects under this program, the State plan must include—

(1) The selection criteria in § 618.41; and

(2) As applicable, the selection criteria in §§ 618.42, 618.43, 618.44, 618.45, 618.46, 618.47, or 618.48.

(c) (1) The State plan may include additional criteria—worth up to 40 percent of the total possible point score—for assessing and ranking proposed projects as long as none of those criteria is inconsistent with the criteria specified in §§ 618.41 through 618.48.

(2) The State commission may apply the additional criteria referred to in paragraph (c)(1) of this section if those criteria are approved by the Secretary.

(d) (1) The State commission shall assign points to each criterion according to an objective method contained in the State plan.

(2) In determining relative priorities among applicants, the commission shall apply each criterion uniformly.

(e) The State shall develop its criteria and methods for determining relative priorities on the basis of—

(1) Information to be included by the applicant in the application form that the Secretary prescribes;

(2) Supplemental information requested from all applicants by the State commission; and

(3) Data on file with the State commission, including public reports or publications.

(f) In its plan the State shall specify criteria and methods for determining priority between or among applications receiving identical scores.

(g) The State plan may not consider adverse to the ranking of an application an institution's readiness to admit out-of-State students.

(h) The State plan may not consider any of the following as a priority either

in favor of or adverse to the ranking of an application:

(1) The type of control or sponsorship of the applicant institution.

(2) The fact that the project had commenced before the date of the application.

(3) The fact that part of the cost of the project had been incurred prior to, or under a contract entered into before, the date of the application.

(i) The commission shall insure that all potential applicants are informed about the forms, definitions, and supplementary data sources that the commission uses—

(1) In applying the required and optional criteria in the State plan; and

(2) In determining relative priorities.

(20 U.S.C. 1132b(a)(2)(A))

**§ 618.41 Selection criteria: general.**

Among its criteria for determining relative priorities for institutions and branch campuses under this program, the State shall include the following:

(a) *Use of existing facilities.* (1) One or more criteria shall deal with the effective use of existing academic facilities.

(2) The commission shall assign at least 10 percent of the total possible point score to this criterion.

(b) *Enrollment of low-income students.* (1) A criterion shall deal with the extent of the applicant's commitment to the enrollment of a substantial number of students from low-income families.

(2) The commission shall assign at least five percent of the total possible point score to this criterion.

(c) *Enrollment of disabled veterans.* (1) A criterion shall deal with the extent of the applicant's commitment to the enrollment of a substantial number of disabled veterans.

(2) The commission shall assign at least five percent of the total possible point score to this criterion.

(20 U.S.C. 1132b)

**§ 618.42 Selection criteria: projects based on unusual increases in enrollment.**

For construction, reconstruction, or renovation projects based on unusual increases in enrollment (section 701(4) of the Act), the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria:

(a) *Increase in enrollment.* (1) One or more criteria shall deal with the extent of the actual numerical or percentage increase, or both, in full-time-equivalent student enrollment at the campus at which the construction, reconstruction, or renovation is to take place.

(2) The increase shall be measured by covering three years separately, starting

with the year that began three years preceding the closing date for which the application is being considered.

(3) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(b) *Increase in capacity.* (1) One or more criteria shall deal with the amount or percentage, or both, by which the proposed project will increase the assignable area at that campus.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(20 U.S.C. 1132b-1; 1132a(4))

**§ 618.43 Selection criteria: projects dealing with research facilities, including libraries, and the acquisition of special research equipment.**

For construction, reconstruction, or renovation projects dealing with research facilities, including libraries, and the acquisition of special research facilities (section 701(3) of the Act), the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria:

(a) *Amount of research space to be upgraded.* (1) One or more criteria shall deal with the amount of research space to be upgraded by the proposed project.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(b) *Percentage of research space to be upgraded.* (1) One or more criteria shall deal with the percentage of the applicant's research space—on that campus—that is to be upgraded by the proposed project.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(20 U.S.C. 1132b-1; 1132a(3))

**§ 618.44 Selection criteria: projects based on energy conservation.**

For construction, reconstruction, or renovation projects based on energy conservation (section 701(1) of the Act), the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria:

(a) *Use of coal, solar, and renewable resources.* (1) One or more criteria shall deal with the extent to which an institution proposes to use one or more of the following: coal, solar energy, and renewable resources.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(b) *Estimated savings in annual operating costs.* (1) One or more criteria shall deal with the extent to which the proposed project is likely to enable the institution to economize on the use of

energy resources, based on an estimate of savings in annual operating costs.

(2) The estimated savings, if any, in annual operating costs are the difference between—

(i) The average routine operating expenses for the previous three years; and

(ii) Future annual operating expenses based on the current prices of fuel supplies and related services.

(3) The commission shall assign at least 20 percent of the total possible score to this criterion.

(20 U.S.C. 1132b-1; 1132a(1))

**§ 618.45 Selection criteria: projects to remove architectural barriers.**

For construction or renovation projects to remove architectural barriers (section 701(2) (A) and (B) of the Act), the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria:

(a) *Exemplary program of compliance with Section 504.*

(1) One or more criteria shall deal with the extent to which a proposed project holds promise of accomplishing an exemplary program of compliance with Section 504 that would be helpful to similar institutions around the country and that would not likely be carried out in the absence of Federal funds.

(2) The commission shall assign at least 10 percent of the total possible point score to this criterion. (House Report 96-520, page 54)

(b) *Amount of assignable square feet of academic facilities to be made accessible by the proposed project.* (1) One or more criteria shall deal with the amount of assignable square feet of academic facilities to be made accessible to the handicapped by the proposed project.

(2) The commission shall assign at least 10 percent of the total possible point score to this criterion.

(c) *Percentage of assignable square feet of academic facilities to be made accessible by the proposed project.* (1) One or more criteria shall deal with the percentage of assignable square feet of academic space—on the applicant's campus—to be made accessible to the handicapped by the proposed project.

(2) The commission shall assign at least 10 percent of the total possible point score to this criterion.

(d) *Costs required by Section 504 per full-time-equivalent student enrollment.*

(1) One or more criteria shall deal with the costs required by Section 504 per full-time-equivalent student enrollment.

(2) The commission shall assign at least 10 percent of the total possible point score to this criterion.

**§ 618.46 Selection criteria: projects to meet environmental protection or health and safety programs mandated by law.**

For reconstruction or renovation projects to meet environmental protection or health and safety programs mandated by Federal, State or local law (section 701(2)(C) of the Act), the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria:

(a) *Campuswide cost per full-time-equivalent student.* (1) One or more criteria shall deal with the campuswide cost—per full-time-equivalent student—of complying with the law.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(b) *Campuswide cost per square foot of assignable space.* (1) One or more criteria shall deal with the campuswide cost—per square foot of assignable space—of complying with the law.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(20 U.S.C. 1132b-1; 1132a(2)(c))

**§ 618.47 Selection criteria: projects to detect, remove, or contain asbestos hazards.**

For reconstruction or renovation projects to detect, remove, or contain asbestos hazards (section 701(5) of the Act), the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria:

(a) *Amount of gross square feet of facilities space with known or suspected asbestos hazards.* (1) One or more criteria shall deal with the amount of gross square feet of facilities space with known or suspected asbestos hazards.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(b) *Estimated cost of detecting, removing, or containing asbestos hazards.* (1) One or more criteria shall deal with the estimated cost—per campuswide assignable square foot—of one or more of the following: detecting, removing, or containing asbestos hazards.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(20 U.S.C. 1132b-1; 1132a(5))

**§ 618.48 Selection criteria: project directed to two or more purposes.**

If a proposed project is directed to a combination of two or more of the purposes under section 701 of the Act, the State plan shall, in addition to the criteria in § 618.41, include at least the following criteria in place of the criteria in §§ 618.42 through 618.47:

(a) *Readiness to commence project.*  
(1) One of more criteria shall deal with the timeliness by which an applicant can start its project.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

(b) *The cost of the project as a percentage of the applicant's average annual educational and general expenditures.* (1) One or more criteria shall deal with the cost of the project as a percentage of the applicant's average annual educational and general expenditures, as reported in the annual NCES Survey "Financial Statistics of Institutions of Higher Education" for the three most recent institutional fiscal years.

(2) The commission shall assign at least 20 percent of the total possible point score to this criterion.

**§ 618.49 Selection criteria: additional criteria.**

For any types of projects under this program, a State commission may uniformly apply additional criteria—as described in § 618.40(d)—worth up to 40 percent of the total possible point score.

(20 U.S.C. 1132b-1)

**§ 618.50 Verification of application data and institutional and project eligibility.**

(a) Before determining the relative priority or Federal share for any application under this program, the State commission shall determine that—

(1) The data in the application are valid; and

(2) The institution and the project meet basic eligibility requirements of the Act and the regulations governing the administration of the Act.

(b)(1) If, in the opinion of the commission, the eligibility of an institution is questionable, the commission shall promptly forward a copy of the application to the Secretary for a clarification of the eligibility.

(2) In that case the commission shall—

(i) Continue to process and rank the application as if that application were eligible; and

(ii) Delay final action on that application until the Secretary notifies the commission regarding the applicant's eligibility.

(20 U.S.C. 1132b-2)

**§ 618.51 Determination of relative priorities and Federal shares.**

A State commission shall—

(a) Consider each eligible application received by each specified closing date together with all other applications in the same category of eligible applicants (34 CFR 617.2); and

(b) Assign to that application, in accordance with the provisions of the State plan, its—

(1) Relative priority; and

(2) Recommended Federal share.

(20 U.S.C. 1132b(a)(2))

**§ 618.52 Procedure if funds are insufficient.**

(a) If, under a State's allotment, funds are insufficient to cover all eligible applications that the state commission considers in a particular category as of a particular closing date, the commission shall follow the procedures in paragraph (b) of this section.

(b) The commission shall determine—according to the State plan—the full Federal share for each project, in order of relative priority, until the remaining funds are insufficient to provide the full Federal share for the next project in order of priority.

(20 U.S.C. 1132b(a)(2)(B))

**§ 618.53 Apportionment of State allotment among closing dates.**

(a) A State plan may provide for apportionment of the State's allotment among closing dates during the same fiscal year.

(b) If the State plan provides for the apportionment described in paragraph (a) of this section, the plan may also provide for the commission to make available immediately—from funds apportioned to later closing dates, if any, in the same fiscal year—funds sufficient to provide a full Federal share, as initially calculated, for the first project for which only part of the Federal share would otherwise have been available.

(20 U.S.C. 1132b-1(a)(1))

**§ 618.54 Procedures if State allotment is apportioned or not apportioned among closing dates.**

(a) If a State plan contains the provision described in both paragraphs (a) and (b) of 618.53, the commission shall—

(1) Make available immediately funds sufficient to provide a full Federal share, as initially calculated, for the first project for which only part of the Federal share would otherwise have been available; and

(2) Carry over to any subsequent closing dates in the same fiscal year all other eligible but unfunded applications in that category without requiring the applicants to submit new applications for those projects for that fiscal year.

(b) If the State plan contains the provision described in paragraph (a) of § 618.53 but does not contain the provision described in paragraph (b) of § 618.53, the commission—

(1) Shall carry over to any subsequent closing dates in the same fiscal year all eligible applications for which a full Federal share is not available; and

(2) Is prohibited from requiring those applicants to submit new applications for those projects for the same fiscal year.

(c) However, if the State plan does not apportion the State's allotment among closing dates or if the closing date is the last closing date in a fiscal year, the commission shall offer the remaining Federal funds as a partial Federal share for the first project—in order of relative priority—for which less than the full Federal share, as calculated, is available.

(20 U.S.C. 1132b(a))

**§ 618.55 Offer of a partial Federal share.**

(a) A State commission or the applicant may not regard an offer and acceptance of a partial Federal share as diminishing the scope of the project for which the partial share is accepted.

(b) The commission shall give the applicant that agrees to accept a partial federal share the option to submit a supplemental application, as provided in § 618.38.

(c) If an applicant declines to accept the commission's offer of a partial Federal share, the commission shall carry over to the next closing date, if any, in the same fiscal year—

(1) The remaining funds; and

(2) The application for which an applicant declined the partial Federal share.

(20 U.S.C. 1132b(a))

**Subpart F—How Does the Secretary Make a Grant?**

**§ 618.60 Conditions for grant approval.**

The Secretary approves the development costs under this program only if the Secretary is satisfied, on the basis of information submitted with the application, that—

(a) The facilities included in the proposed project are intended predominately for—

(1) Programs of undergraduate instruction or programs of graduate instruction if the project involves combined undergraduate and graduate facilities;

(2) Health care to students or personnel of the institution; or

(3) Both; and

(b) The application meets all of the requirements of the Act regarding the submission and contents of applications.

**§ 618.61 Grant award.**

For an application that meets all eligibility requirements for an award of

funds under this program and has been recommended by the State commission, the Secretary—

- (a) Approves the development costs contained in the application;
- (b) Reserves for the project proposed in the application Federal funds from the appropriate State allotment; and
- (c) Prepares and sends to the applicant a grant award that contains the pertinent terms and conditions of the grant.

**§ 618.62 Adjustment in the amount of the Federal share.**

(a) If the Secretary finds that the costs eligible for Federal assistance in a project are less than those provided for in the grant award, the Secretary redetermines the amount of the Federal share.

(b) The Secretary bases the amount of the revised grant on—

(1) The lesser eligible costs, using the State plan provisions that were in effect at the time the State commission recommended the project for a grant; and

(2) The assumption that sufficient funds were available in the State allotment at that time to provide the maximum Federal share.

(c)(1) If the Secretary finds that the redetermined share is less than the maximum amount authorized by the grant, the Secretary reduces the grant accordingly.

(2) If the Secretary finds that there has been an overpayment of Federal funds, the grantee shall immediately remit that overpayment to the Secretary.

(3) If the Secretary finds that the redetermined Federal share is equal to or greater than the maximum amount authorized by the grant, the amount of the grant shall be the Federal share.

The Secretary proposes to add a new Part 619 to Title 34 of the Code of Federal Regulations to read as follows:

**PART 619—GRANTS FOR THE CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF GRADUATE ACADEMIC FACILITIES**

**Subpart A—General**

Sec.

- 619.1 Grants for the Construction, Reconstruction, and Renovation of Graduate Academic Facilities.
- 619.2 Eligible parties.
- 619.3 Regulations that apply to Grants for the Construction, Reconstruction, and Renovation of Graduate Academic Facilities.
- 619.4 Definitions that apply to Grants for the Construction, Reconstruction, and Renovation of Graduate Academic Facilities.

**Subpart B—What Kinds of Projects Does the Department of Education Assist under This Program?**

Sec.

- 619.10 Projects for which grants may be used.

**Subpart C—How Does One Apply for a Grant?**

- 619.20 Submission of application.
- 619.21 Invitation for bids.

**Subpart D—How Does the Secretary Make a Grant?**

- 619.30 Facilities panel reviews applications.
- 619.31 Selection criteria for evaluating proposed projects.
- 619.32 Selection criteria: general.
- 619.33 Selection criteria: projects based on unusual increases in enrollment.
- 619.34 Selection criteria: projects dealing with research facilities, including libraries, and the acquisition of special research equipment.
- 619.35 Selection criteria: projects based on energy conservation.
- 619.36 Selection criteria: projects to remove architectural barriers.
- 619.37 Selection criteria: projects to meet environmental protection or health and safety programs mandated by law.
- 619.38 Selection criteria: projects to detect, remove, or contain asbestos hazards.
- 619.39 Selection criteria: projects directed to two or more purposes.
- 619.40 Ranking applications with identical scores.

**Authority:** Secs. 701–742 of Pub. L. 96–374, Title VII, of the Higher Education Act, as amended (20 U.S.C. 1132a–1132e–1) unless otherwise noted.

**Subpart A—General**

**§ 619.1 Grants for the construction, reconstruction, and renovation of graduate academic facilities.**

This program provides grants for the construction, reconstruction, and renovation of graduate academic facilities.

(20 U.S.C. 1132c)

**§ 619.2 Eligible parties.**

Institutions of higher education are eligible to apply for grants for the construction, reconstruction, and renovation of graduate academic facilities.

(20 U.S.C. 1132e)

**§ 619.3 Regulations that apply to grants for the construction, reconstruction, and renovation of graduate academic facilities.**

The following regulations apply to this program:

- (a) The regulations in 34 CFR 617.6.
- (b) The regulations in this Part 619.

(20 U.S.C. 1132c)

**§ 619.4 Definitions that apply to grants for the construction, reconstruction, and renovation of graduate academic facilities.**

The definitions in 34 CFR 617.7 apply to this program.

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

**§ 619.10 Projects for which grants may be used.**

This program provides grants for the construction, reconstruction, or renovation of graduate academic facilities if the primary purpose of an applicant's proposed project is to achieve one or more of the objectives listed in 34 CFR 617.10.

(20 U.S.C. 1132c; 1132a)

**Subpart C—How Does One Apply for a Grant?**

**§ 619.20 Submission of application.**

(a) An applicant shall submit its application for construction, reconstruction or renovation of graduate facilities to the Secretary in response to an application notice published in the **Federal Register**.

(20 U.S.C. 1132c)

(b) For a construction, reconstruction, or renovation project involving combined graduate and undergraduate facilities, an otherwise eligible applicant shall submit its application under 34 CFR Part 618 (Grants for the Construction, Reconstruction, and Renovation of Undergraduate Academic Facilities).

(20 U.S.C. 1132b–2(g))

**§ 619.21 Invitation for bids.**

(a) An applicant may not invite bids for construction, reconstruction, or renovation under its proposed project before submitting its application to the Secretary.

(b)(1) However, paragraph (a) of this section does not apply if—

(i) The Secretary has already approved assistance for the project under Title VII; or

(ii) Some other agency of the United States has already approved assistance for the project under some other Federal construction program.

(2) In that case, the Secretary considers the application only if the applicant submits it in response to an application notice or State plan closing date occurring no later than 12 months after the applicant has begun the construction, reconstruction, or renovation.

(20 U.S.C. 1132c)

### Subpart D—How Does the Secretary Make a Grant?

#### § 619.30 Facilities panel reviews applications.

(a) The Secretary considers an application for a grant for construction, reconstruction, or renovation of graduate academic facilities only after obtaining the advice and recommendation of a panel of specialists who are not regular full-time employees of the Federal Government and who are competent to evaluate the application.

(b) The panel—referred to in this Part 619 as a facilities panel—

(1) Reviews the application in terms of the applicable criteria listed in § 619.31; and

(2) Makes a recommendation to the Secretary for the approval or disapproval—in whole or in part—of the application.

(20 U.S.C. 1132c(b))

#### § 619.31 Selection criteria for evaluation proposed projects.

In determining relative priorities for recommending to the Secretary applications for grants for the construction, reconstruction, or renovation of graduate academic facilities, a facilities panel takes into consideration—

(a) The criteria in § 619.32, worth up to 60 possible points; and

(b) As applicable, the criteria in §§ 619.33, 619.34, 619.35, 619.36, 619.37, 619.38 or 619.39, worth up to 40 possible points.

#### § 619.32 Selection criteria: general.

Among its criteria for determining relative priorities for graduate institutions under this program, a facilities panel takes into consideration the following:

(a) *Use of existing facilities.* (1) The extent to which an applicant makes effective use of its existing facilities.

(2) The Secretary awards up to a maximum of 15 points for this criterion.

(b) *The need to upgrade the applicant's existing academic facilities.*

(1) The extent of the applicant's need to upgrade its existing academic facilities with respect to the demand made on those facilities and the demands that can reasonably be expected to be made on them in the foreseeable future.

(2) The Secretary awards up to a maximum of 15 points for this criterion.

(c) *The quality of the applicant's graduate programs.* (1) The quality of the applicant's graduate programs, in particular those programs that are housed or are to be housed in the

facilities for which assistance is being requested.

(2) The Secretary awards up to a maximum of 15 points for this criterion.

(d) *The extent to which the proposed project is likely to preserve and enhance the applicant's programs.* (1) The extent to which the proposed project is likely to preserve and enhance the applicant's graduate programs, in particular those programs that are housed or to be housed in the facilities that are to be constructed, reconstructed, or renovated.

(2) The Secretary awards up to a maximum of 15 points for this criterion.

#### § 619.33 Selection criteria: projects based on unusual increases in enrollment.

For construction, reconstruction, or renovation projects based on unusual increases in enrollment (section 701(4) of the Act), the facilities panel applies the following criteria in addition to the criteria in § 619.32:

(a) *Increase in enrollment.* (1) The extent of the actual numerical or percentage increase, or both, in full-time-equivalent student enrollment at the campus at which the construction, reconstruction, or renovation is to take place.

(2) The increase is measured by covering three years separately, starting with the year that began three years preceding the closing date for which the application is being considered.

(3) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *Increase in capacity.* (1) The amount or percentage, or both, by which the proposed project will increase the assignable area at that campus.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

#### § 619.34 Selection criteria: projects dealing with research facilities, including libraries, and the acquisition of special research equipment.

For construction, reconstruction, or renovation projects dealing with research facilities, including libraries, and the acquisition of special research facilities (section 701(3) of the Act), the facilities panel in addition to the criteria in § 619.32:

(a) *Amount of research space to be upgraded.* (1) The amount of research space to be upgraded by the proposed project.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *Percentage of research space to be upgraded.* (1) The percentage of the applicant's research space—on that campus—that is to be upgraded by the proposed project.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(20 U.S.C. 1132c(b), 1132a(3))

#### § 619.35 Selection criteria: projects based on energy conservation.

For construction, reconstruction, or renovation projects based on energy conservation (section 701(1) of the Act), the facilities panel applies the following criteria in addition to the criteria in § 619.32:

(a) *Use of coal, solar energy, and renewable resources.* (1) The extent to which an institution proposes to use one or more of the following: coal, solar energy, and renewable resources.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *Estimated savings in annual operating costs.* (1) The extent to which the proposed project is likely to enable the institution to economize on the use of energy resources, based on an estimate of savings in annual operating costs.

(2) The estimated savings, if any, in annual operating costs are the difference between—

(i) The average routine operating expenses for the previous three years; and

(ii) Future annual operating expenses based on the current prices of fuel supplies and related services.

(3) The Secretary awards up to a maximum of 20 points for this criterion.

#### § 619.36 Selection criteria: projects to remove architectural barriers.

For reconstruction or renovation projects to remove architectural barriers (section 701(2) (A) and (B) of the Act), the facilities panel applies the following criteria in addition to the criteria in § 619.32:

(a) *Exemplary program of compliance with Section 504.*

(1) The extent to which a proposed project holds promise of accomplishing an exemplary program of compliance with Section 504 that would be helpful to similar institutions around the country and that would not likely be carried out in the absence of Federal funds.

(2) The Secretary awards up to a maximum of 10 points for this criterion.

(House Report 96-520, page 54)

(b) *Amount of assignable square feet of academic facilities to be made accessible by the proposed project.* (1) The amount of assignable square feet of academic facilities to be made accessible to the handicapped by the proposed project.

(2) The Secretary awards up to a maximum of 10 points for this criterion.

(c) *Percentage of assignable square feet of academic facilities to be made accessible by the proposed project.* (1)

The percentage of assignable square feet of academic space—on the applicant's campus—to be made accessible to the handicapped by the proposed project.

(2) The Secretary awards up to a maximum of 10 points for this criterion.

(d) Costs required by Section 504 per full-time-equivalent student enrollment.

(1) The costs required by Section 504 per full-time-equivalent student enrollment.

(2) The Secretary awards up to a maximum of 10 points for this criterion.

(20 U.S.C. 1132c(b); 1132a(2)(A) and (B))

**§ 619.37 Selection criteria: projects to meet environmental protection or health and safety programs mandated by law.**

For reconstruction or renovation projects to meet environmental protection or health and safety programs mandated by Federal, State, or local law (section 701(2)(C) of the Act), the facilities panel applies the following criteria in addition to the criteria in § 619.32:

(a) *Campus-wide cost per full-time-equivalent student.* (1) The campus-wide cost—per full-time-equivalent student—of complying with the law.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *Campus-wide cost per square foot of assignable space.* (1) The campus-wide cost—per square foot of assignable space—of complying with the law.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(20 U.S.C. 1132c(b); 1132a(2) (A) and (B))

**§ 619.38 Selection criteria: projects to detect, remove, or contain asbestos hazards.**

For reconstruction or renovation projects to detect, remove, or contain asbestos hazards (section 701(5) of the Act), the facilities panel applies the following criteria in addition to the criteria in § 619.32:

(a) *Amount of gross square feet of facilities space with known or suspected asbestos hazards.* (1) The amount of gross square feet of facilities space with known or suspected asbestos hazards.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *Estimated cost of detecting, removing, or containing asbestos hazards.* (1) The estimated cost of one or more of the following: detecting, removing, or containing asbestos hazards.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(20 U.S.C. 1132c(b); 1132(a)(5))

**§ 619.39 Selection criteria: projects directed to two or more purposes.**

If a project is directed to a combination of two or more of the purposes under section 701 of the Act, the facilities panel in addition to applying the criteria in § 619.32, applies the following criteria in place of the criteria in 619.33–619.38:

(a) *Readiness to commence project.*

(1) The timeliness by which an applicant can state its project.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *The cost of the project as a percentage of the applicant's average annual educational and general expenditures.* (1) The cost of the project as a percentage of the applicant's average annual educational and general expenditures, as reported in the annual NCES Survey "Financial Statistics of Institutions of Higher Education," for the three most recent institutional fiscal years.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(20 U.S.C. 1132c(b); 1132a)

**§ 619.40 Applications with identical scores.**

If the facilities panel assigns identical total scores to two or more applications, the Secretary assigns priority on the basis of the projected date for the start of construction, reconstruction, or renovation, with the project having the earliest date receiving the highest priority.

(20 U.S.C. 1132c)

The Secretary proposes to add a new Part 620 to Title 34 of the Code of Federal Regulations to read as follows:

**PART 620—LOANS FOR THE CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF ACADEMIC FACILITIES**

**Subpart A—General**

Sec.

620.1 Loans for the Construction, Reconstruction, and Renovation of Academic Facilities.

620.2 Eligible parties.

620.3 Regulations that apply to Loans for the Construction, Reconstruction, and Renovation of Academic Facilities.

620.4 Definitions that apply to Loans for the Construction, Reconstruction, and Renovation of Academic Facilities.

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

620–10 Projects for which loans may be used.

**Subpart C—How Does One Apply for a Loan?**

620.20 Submission of applications.

Sec.

620.21 Special application procedures.

620.22 Special terms and conditions.

620.23 Opinion of bond counsel.

620.24 Invitation for bids.

**Subpart D—How Does the Secretary Make a Loan?**

620.30 Selection criteria for evaluating a proposed project.

620.31 Selection criterion: general.

620.32 Selection criteria: projects based on unusual increases in enrollment.

620.33 Selection criteria: projects dealing with research facilities, including libraries, and the acquisition of special research equipment.

620.34 Selection criteria: projects based on energy conservation.

620.35 Selection criteria: projects to remove architectural barriers.

620.36 Selection criteria: projects to meet environmental protection or health and safety programs mandated by law.

620.37 Selection criteria: projects to detect, remove, or contain asbestos hazards.

620.38 Selection criteria: projects directed to two or more purposes.

620.39 Ranking applications with identical scores.

620.40 Determination of non-availability of equally-as-favorable terms and conditions.

620.41 Loan offer.

620.42 Loan agreement.

620.43 Security for loan.

620.44 Evidence of approved debt instrument.

620.45 Loan closing.

620.46 Interim financing.

**Subpart E—What Conditions Must Be Met by a Borrower?**

620.50 Length and maturity of loan.

620.51 Construction fund.

620.52 Investment of idle construction funds.

620.53 Disposal of balance remaining in the construction fund.

620.54 Moratorium on principal or interest payments on a loan.

Authority: Secs. 701–742 of Pub. L. 96–374, Title VII of the Higher Education Act, as amended, (20 U.S.C. 1132a–1132e–1) unless otherwise noted.

**Subpart A—General**

**§ 620.1 Loans for the construction, reconstruction, and renovation of academic facilities.**

This program provides loans for the construction, reconstruction, and renovation of academic facilities.

(20 U.S.C. 1132d–1132d–2)

**§ 620.2 Eligible parties.**

The following are eligible to apply for loans for the construction, reconstruction, and renovation of academic facilities:

(a) Institutions of higher education.

(b) Higher education building agencies.

(20 U.S.C. 1132d(a))

**§ 620.3 Regulations that apply to loans for the construction, reconstruction, and renovation of academic facilities.**

The following regulations apply to this program:

- (a) The regulations in 34 CFR 617.6 (b) through (e), as appropriate.  
 (b) The regulations in this Part 620.

(20 U.S.C. 1232)

**§ 620.4 Definitions that apply to loans for the construction, reconstruction, and renovation of academic facilities.**

The definitions in 34 CFR 617.7 apply to this program.

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

**§ 620.10 Projects for which loans may be used.**

This program provides loans for the construction, reconstruction, and renovation of graduate and undergraduate academic facilities if the primary purpose of an applicant's proposed project is to achieve one or more of the objectives listed in 34 CFR 617.10.

(20 U.S.C. 1132d; 1132a)

**Subpart C—How Does One Apply for a Loan?**

**§ 620.20 Submission of application.**

An applicant for a loan shall submit its application at the time, in the manner, and containing the information that the Secretary specifies.

(20 U.S.C. 1132d)

**§ 620.21 Special application procedures.**

(a) An applicant shall send a copy of its application to its State commission before submitting the application to the Secretary.

(b) The commission shall review and evaluate the application and provide comments to the Secretary regarding—

- (1) Use of space;  
 (2) Enrollment data; and  
 (3) The overall need for the facility—or for the reconstruction or renovation of the facility—for which the applicant has requested assistance.

(c) Following its review, the commission shall furnish its evaluation to the applicant.

(d) If the applicant does not agree with the evaluation, the applicant may include with its application to the Secretary a statement supporting its position.

(e) The commission shall submit the application to the Secretary together with all State clearinghouse comments required by OMB Circular A-95.

(20 U.S.C. 1132d(a))

**§ 620.22 Special terms and conditions.**

The applicant shall submit to the Secretary, together with its application, the following evidence and assurances:

(a) Satisfactory evidence that the applicant has or will have a full title or interest in the site, including right of access, that is sufficient to insure the applicant's undisturbed use and possession of the facilities for not less than the useful life of the facilities or 50 years, whichever is longer.

(b) Satisfactory assurance that if the Secretary grants the loan and the applicant accepts the loan, the applicant will comply with the appropriate terms and conditions for repayment of the loan.

(c) Satisfactory assurance that the applicant will secure the loan in a manner the Secretary finds will reasonably assure repayment. The security may be one or a combination of the items listed in § 620.34.

(d) Satisfactory evidence that the applicant has the necessary legal authority to—

- (1) Finance; construct, reconstruct, or renovate, and maintain the proposed facilities;  
 (2) Apply for and receive the proposed loan; and  
 (3) Pledge or mortgage any assets or revenues to be given as security for the proposed loan.

(e) Satisfactory assurance that the applicant will not, without the consent of the Secretary, mortgage to others during the life of the loan the facility constructed, reconstructed, or renovated with the aid of the loan.

(f)(1) Satisfactory assurance that the applicant will finance not less than 20 percent of the development cost of the facility from non-Federal sources.

(2) However, the Secretary waives this assurance for an institution that is eligible for assistance under Title III of the Act.

(20 U.S.C. 1132d(a))

**§ 620.23 Opinion of bond counsel.**

(a) At appropriate stages in a loan application and development procedure, an applicant shall submit—or arrange to have submitted—to the Secretary opinions of bond counsel—or of legal counsel, as provided in paragraph (d) of this section—with respect to—

- (1) The legality of the bond or note issue that the applicant proposes to offer to secure the loan;  
 (2) The legal authority of the applicant to offer the issues and secure it by the proposed collateral; and  
 (3) The legality of the issue on delivery.

(b) As used in this section, "bond counsel" means a law firm or individual lawyer—

(1) Who is thoroughly experienced in the financing of construction, reconstruction, and renovation projects by the issuance of bonds;

(2) Whose approving opinions have previously been accepted by purchasers of bonds offered at public sales; and

(3) Who, if the borrower is a public institution or agency, is a recognized bond counsel in the municipal field.

(c) In each case the applicant shall present the following:

(1) A memorandum by the counsel, submitted with the loan application—

(i) Stating that the applicant has or will have authority to—

(A) Finance, construct, and maintain the project;

(B) Issue the proposed obligations; and

(C) Pledge or mortgage the assets or revenues that the applicant is offering to secure the loan; and

(ii) Citing the basis for the authority referred to in paragraph (C)(1)(i) of this section.

(2) A preliminary approving opinion of the counsel—submitted at the time the applicant proposes to advertise for bids for construction, reconstruction, or renovation—to the effect that when the bonds or notes described in the loan agreement are sold and delivered, they will—

(i) Comply with the applicable provisions of the loan agreement; and  
 (ii) Be valid and binding obligations of the issuer payable in accordance with their terms.

(3) A final approving opinion of the counsel—delivered at the same time as the delivery of the bonds or notes—stating that the bonds or notes—

(i) Are those described in the loan agreement and the authorizing proceedings;

(ii) Have been duly authorized, sold, and delivered to the Secretary; and

(iii) Constitute the valid and binding obligations of the issuer payable in accordance with their terms.

(d)(1) The Secretary may accept the opinion of legal counsel, other than a bond counsel as defined in paragraph (b) of this section, after considering such factors as—

(i) The amount, term, and security for the loan; and

(ii) The legal or financial complexity of the transaction.

(2) As used in paragraph (d)(1) of this section, "Legal counsel" means a law firm or individual lawyer—

(i) Having experience in the financing of construction, reconstruction, and renovation projects; and

(ii) Whose opinions with regard to that type of financing have been previously accepted by responsible lenders of lending institutions.

(20 U.S.C. 1132d-1(b)(1))

**§ 620.24 Invitation for bids.**

(a) An applicant may not invite bids for construction, reconstruction, or renovation under its proposed project before submitting its application to the Secretary.

(b)(1) However, paragraph (a) of this section does not apply if—

(i) The Secretary has already approved assistance for the project under Title VII; or

(ii) Some other agency of the United States has already approved assistance for the project under some other Federal assistance program.

(2) In that case the Secretary considers the application only if the applicant submits it in response to an application notice occurring no later than 12 months after the applicant has begun the construction, reconstruction, or renovation.

(20 U.S.C. 1132d-1(b)(1))

**Subpart D—How Does the Secretary Make a Loan?**

**§ 620.30 Selection criteria for evaluating proposed projects.**

In evaluating a proposed project for which an applicant has applied for a loan under this program, the Secretary takes into consideration—

(a) The criterion in 620.31, worth up to 20 possible points; and

(b) As applicable, the criteria in §§ 620.32, 620.33, 620.34, 620.35, 620.36, 620.37, or 620.38, worth up to 80 possible points.

**§ 620.31 Selection criterion: general.**

(a) Among the criteria for evaluating a proposed project under this program, the Secretary considers the extent to which the applicant makes effective use of its existing facilities.

(b) The Secretary awards up to a maximum of 20 points for this criterion.

(20 U.S.C. 1132d; 1132a)

**§ 620.32 Selection criteria: projects based on unusual increases in enrollment.**

For construction, reconstruction, or renovation projects dealing with unusual increases in enrollment (section 701(4) of the Act), the Secretary applies the following criteria in addition to the criterion in § 620.31:

(a) *Increase in enrollment.*

(1) The extent of the actual numerical or percentage increase, or both, in full-time-equivalent student enrollment at the campus at which the construction,

reconstruction, or renovation is to take place.

(2) The Increase is measured by covering three years separately, starting with the year that began three years preceding the closing date for which the application is being considered.

(3) The Secretary awards up to a maximum of 40 points for this criterion.

(b) *Increase in capacity.*

(1) The amount of percentage, or both, by which the proposed project will increase the assignable area at that campus.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(20 U.S.C. 1132d; 1132a(4))

**§ 620.33 Selection criteria: projects dealing with research facilities, including libraries, and the acquisition of special research equipment.**

For construction, reconstruction, or renovation projects dealing with research facilities, including libraries, and the acquisition of special research equipment (section 701 (3) of the Act), the Secretary applies the following criteria in addition to the criterion in § 620.31:

(a) *Amount of research space to be upgraded.* (1) The amount of research space to be upgraded by the proposed project.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(b) *Percentage of research space to be upgraded.* (1) The percentage of the applicant's research space—on that campus—that is to be upgraded by the proposed project.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(20 U.S.C. 1132d; 1132a(3))

**§ 620.34 Selection criteria: projects based on energy conservation.**

For construction, reconstruction, or renovation projects dealing with energy conservation (section 701(1) of the Act), the Secretary applies the following criteria in addition to the criterion in § 620.31:

(a) *Use of coal, solar energy, and renewable resources.* (1) The extent to which an institution proposes to use one or more of the following: coal, solar energy, and renewable resources.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(b) *Estimated savings in annual operating costs.* The extent to which the proposed project is likely to enable the institution to economize on the use of energy resources, based on an estimate of savings in annual operating costs.

(2) The estimated savings, if any, in annual operating costs are the difference between—

(i) The average routine operating expenses for the previous three years; and

(ii) Future annual operating expenses based on the current prices of fuel supplies and related services.

(3) The Secretary awards up to a maximum of 40 points for this criterion.

(20 U.S.C. 1132d; 1132a(1))

**§ 620.35 Selection criteria: projects to remove architectural barriers.**

For reconstruction or renovation projects to remove architectural barriers (section 701(2)(A) and (B) of the Act), the Secretary applies the following criteria in addition to the criterion in § 620.31:

(a) *Exemplary program of compliance with Section 504.* The extent to which a proposed project holds promise of accomplishing an exemplary program of compliance with Section 504 that would be helpful to similar institutions around the country and that would not likely be carried out in the absence of Federal funds.

(House Report 96-520, page 54)

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(b) *Amount of assignable square feet of academic facilities to be made accessible by the proposed project.*

(1) The amount of assignable square feet of academic facilities to be made accessible to the handicapped by the proposed project.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(c) *Percentage of assignable square feet of academic facilities to be made accessible by the proposed project.*

(1) The percentage of assignable square feet of academic space—on the applicant's campus—to be made accessible to the handicapped by the proposed project.

(2) The Secretary awards up to a maximum of 20 points for this criterion.

(d) *Costs required by Section 504 per full-time-equivalent student enrollment.*

(1) The costs required by Section 504 per full-time-equivalent student enrollment.

(2) The Secretary awards up to a maximum of 20 points this criterion.

(20 U.S.C. 1132d; 1132a(2)(A) and (B))

**§ 620.36 Selection criteria: projects to meet environmental protection or health and safety programs mandated by law.**

For reconstruction or renovation projects to meet environmental protection or health and safety programs mandated by Federal, State, or local law (section 701(2)(C) of the Act), the Secretary applies the following criteria in addition to the criterion in § 620.31:

(a) *Campuswide cost per full-time-equivalent student.* (1) The campuswide cost—per full-time-equivalent student—of complying with the law.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(b) *Campuswide cost per square foot of assignable space.* (1) The campuswide cost—per square foot of assignable space—of complying with the law.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

**§ 620.37 Selection criteria: projects to detect, remove, or contain asbestos hazards.**

For reconstruction or renovation projects to detect, remove, or contain asbestos hazards (section 701(5) of the Act), the Secretary applies the following criteria in addition to the criterion in § 620.31:

(a) *Amount of gross square feet of facilities space with known or suspected asbestos hazards.* (1) The amount of gross square feet of facilities space with known or suspected asbestos hazards.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(b) *Estimated cost of detecting, removing, or containing asbestos hazards.* (1) The estimated cost—per campuswide assignable square foot—of one or more of the following: detecting, removing, or containing asbestos hazards.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

**§ 620.38 Selection criteria: projects directed to two or more purposes.**

If a project is directed to a combination of two or more of the purposes under section 701 of the Act, the Secretary, in addition to applying the criterion in § 620.30, applies the following criterion in place of the criteria in §§ 620.31–630.37:

(a) *Readiness to commence project.* (1) The timeliness by which an applicant can start its project.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(b) *The cost of the project as a percentage of the applicant's average annual educational and general expenditures.* The cost of the project as a percentage of the applicant's average annual educational and general expenditures, as reported in the annual NCES Survey "Financial Statistics of Institutions of Higher Education," for the three most recent institutional fiscal years.

(2) The Secretary awards up to a maximum of 40 points for this criterion.

(20 U.S.C. 1132d; 1132a)

**§ 620.39 Ranking applications with identical scores.**

If two or more applications receive equal total scores, the Secretary gives priority consideration to the following types of applicants in this order:

(a) An institution eligible for assistance under Title III of the Act.

(b) An institution with the earliest date for the start of construction, reconstruction, or renovation.

(20 U.S.C. 1132d-1(b)(1))

**§ 620.40 Determination of non-availability of equally-as-favorable terms and conditions.**

(a) The Secretary considers making a loan only if the Secretary finds that the applicant is unable to secure from other sources a loan with terms and conditions equally as favorable as the terms and conditions applicable to loans under this part.

(b) In order to assist the Secretary in making this determination, the applicant shall comply with any procedures the Secretary may establish, including public advertising for bids.

(20 U.S.C. 1132d(a)(2))

**§ 620.41 Loan offer.**

(a) The Secretary prepares and sends a loan offer to an applicant if—

(1) The application meets all requirements of the Act and the regulations governing administration of the Act; and

(2) The Secretary approves the project and reserves funds for it.

(b) The loan offer—

(1) Contains the terms and conditions for the loan; and

(2) Is conditioned on the fulfillment of these terms and conditions.

(20 U.S.C. 1132d(a))

**§ 620.41 Loan agreement.**

The accepted loan offer constitutes the loan agreement between the Secretary and the applicant for the partial financing of the construction, reconstruction, or renovation of the approved project.

(20 U.S.C. 1132d(a))

**§ 620.42 Security for loan.**

At the time of accepting a loan offer, a borrower shall secure the loan in a manner the Secretary finds will reasonably assure repayment. The security may be one or a combination of the following:

(a) A first mortgage on the facilities and site of those facilities.

(b) Negotiable stocks or bonds of a quality and value acceptable to the Secretary.

(c) A pledge of unrestricted and unencumbered income from an

endowment or other trust fund acceptable to the Secretary.

(d) A pledge of a specified portion of the applicant's annual general or special revenues acceptable to the Secretary.

(e) General obligations issued by a State or local public body on behalf of the applicant.

(f) Other types of security that the Secretary finds acceptable in specific instances.

(20 U.S.C. 1132d-1(b)(6))

**§ 620.44 Evidence of approved debt instrument.**

(a) After signifying to the Secretary its acceptance of a loan offer, a borrower shall furnish to the Secretary the approved debt instrument in the form the Secretary prescribes in the loan agreement and in the terms and conditions of the loan agreement.

(b) The approved debt instrument referred to in paragraph (a) of this section shall include—

(1) A recorded copy of the executed trust indenture between the borrower and the trustee institution or other paying agent; and

(2) The bond, note, or other security approved by the Secretary.

(20 U.S.C. 1132d-(b)(1))

**§ 620.45 Loan closing.**

Loan closing occurs at a time determined by the Secretary.

(20 U.S.C. 1132d-1(b)(1))

**§ 620.46 Interim financing.**

(a) If necessary, an applicant shall arrange for interim financing, subject to the approval of the Secretary, to cover the cost of construction, reconstruction, or renovation pending the loan closing.

(b) If the Secretary finds that the applicant is unable to secure necessary interim financing on reasonable terms, the Secretary may provide for advances against the approved loan.

(20 U.S.C. 1132d-1(b)(1))

**Subpart E—What Conditions Must Be Met by a Borrower?**

**§ 620.50 Length and maturity of loan.**

(a) The maximum repayment period for a loan under this program shall be 30 years, unless the Secretary finds that a longer repayment period required.

(b) In no case may a loan repayment period exceed the estimated useful life of the facilities to be constructed, reconstructed, or renovated with the aid of the loan.

(c) Unless the Secretary authorizes otherwise, the borrower shall repay the loan in substantially level annual installments of principal and interest.

(d) The Secretary may approve a loan that does not mature serially if that type of loan is necessary to be compatible with an applicant's total financial planning.

(20 U.S.C. 1132d(b))

**§ 620.51 Construction funds.**

(a)(1) A borrower shall deposit in a separate bank account—

(i) The proceeds of the sale of the bonds or notes;

(ii) Any interim advances against the approved loans; and

(iii) All other money that the borrower will use in paying for the construction, reconstruction, or renovation of the approved project.

(2) The separate account shall be known as the construction fund.

(3) The borrower shall keep this account in a bank of its choice.

(4) The borrower shall make all expenditures for the construction, reconstruction, or renovation from this fund.

(5) Accounting for this fund shall be in accordance with accepted accounting principles.

(b)(1) If necessary and appropriate, the Secretary may approve other arrangements for—

(i) The deposit of construction funds; and

(ii) The accounting for those funds.

(2) Those other arrangements must provide adequate accountability for all receipts to and expenditures from the funds.

(20 U.S.C. 1132d-1(b)(1))

**§ 620.52 Investment of idle construction funds.**

(a) If the money on deposit in the construction fund exceeds the estimated disbursements for the project for the next 90 days, the Secretary encourages the borrower—if permitted by State or local law—to invest those excess funds.

(b) If the borrower chooses to invest the funds referred to in paragraph (a) of this section, the borrower—unless otherwise prohibited by State or local law—shall invest those funds in—

(1) Direct obligations of the U.S. Government; or

(2) Obligations whose principal and interest are guaranteed by the U.S. Government.

(c) An investment made in accordance with paragraph (b) of this section shall be in obligations that will mature not later than 18 months from the date of the investment.

(20 U.S.C. 1132d-1(b)(1))

**§ 620.53 Disposal of balance remaining in the construction fund.**

Upon full settlement with all contractors, suppliers, and the other parties to whom it has incurred obligations under the project, the borrower shall dispose of any money remaining in the construction fund in accordance with the provisions of the loan agreement.

(20 U.S.C. 1132d-1(b)(1))

**§ 620.54 Moratorium on principal or interest payments on a loan.**

A borrower may request—and the Secretary may approve—a moratorium on the repayment of principal and interest installments on a loan if the borrower—

(a) Can demonstrate a temporary inability to make those payments without undue financial hardship; and

(b) Furnishes, in a plan acceptable to the Secretary, a specific schedule for repayment of the amounts in arrears. However, the Secretary may permit the borrower to defer submission of the plan if the borrower—

(1) Clearly demonstrates that it cannot reasonably project a specific repayment schedule due to circumstances beyond its control; and

(2) Satisfactorily assures the Secretary that it will develop a repayment schedule for consideration at a future date that the Secretary designates.

(20 U.S.C. 1132d-1(b)(5))

The Secretary proposes to add a new Part 621 to Title 34 of the Code of Federal Regulations to read as follows:

**PART 621—ANNUAL INTEREST GRANTS FOR THE CONSTRUCTION, RECONSTRUCTION, AND RENOVATION OF ACADEMIC FACILITIES**

**Subpart A—General**

Sec.

621.1 Annual Interest Grants for the Construction, Reconstruction, and Renovation of Academic Facilities.

621.2 Eligible parties.

621.3 Regulations that apply to Annual Interest Grants for the Construction, Reconstruction, and Renovation of Academic Facilities.

621.4 Definitions that apply to Annual Interest Grants for the Construction, Reconstruction, and Renovation of Academic Facilities.

**Subpart B—What Kinds of Projects Does the Department of Education Assist under This Program?**

621.10 Projects for which annual interest grants may be used.

**Subpart C—How Does One Apply for an Annual Interest Grant?**

621.20 Application dates.

621.21 Submission of application.  
621.22 Special application procedures.  
621.23 Approvable financing plan.  
621.24 Evidence of lowest possible cost of loan.  
621.25 Invitation for bids.

**Subpart D—How Does the Secretary Make an Annual Interest Grant?**

621.30 Selection criteria for evaluating a proposed project.

621.31 Conditions for approval of annual interest grants.

621.32 Conditions for making an annual interest grant.

621.33 Annual interest grant agreement.

621.34 Amount of annual interest grant.

621.35 Limits of Federal assistance.

621.36 Payment of annual interest grant.

621.37 Provisions not exhaustive of authority of the Secretary.

**Subpart E—What Conditions Must Be Met by a Grantee?**

621.40 Reduction of grant if refinancing produces lower costs.

Authority: Secs. 701-742 of Pub. L. 96-374, Title VII of the Higher Education Act, as amended (20 U.S.C. 1132a-1132e-1) unless otherwise noted.

**Subpart A—General**

**§ 621.1 Annual interest grants for the construction, reconstruction, and renovation of academic facilities.**

This program provides annual interest grants to reduce the cost of borrowing funds—other than those available under 34 CFR Part 620—for the construction, reconstruction, and renovation of academic facilities.

(20 U.S.C. 1132d-3)

**§ 621.2 Eligible parties.**

(a) The following are eligible to apply for annual interest grants for the construction, reconstruction, and renovation of academic facilities:

(1) Institutions of higher education.

(2) Higher education building agencies.

(20 U.S.C. 1132d-3(a))

**§ 621.3 Regulations that apply to annual interest grants for the construction, reconstruction, and renovation of academic facilities.**

The following regulations apply to this program:

(a) The regulations in 34 CFR 617.5(b) through (e), as appropriate.

(b) The regulations in 34 CFR 620.31 through 620.39.

(c) The regulations in this Part 621.

(20 U.S.C. 1232)

**§ 621.4 Definitions that apply to annual interest grants for the construction, reconstruction, and renovation of academic facilities.**

The definitions in 34 CFR 617.7 apply to this program.

### Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

#### § 621.10 Projects for which annual interest grants may be used.

This program provides annual interest grants to reduce the cost of borrowing funds—other than those available under 34 CFR Part 620—for the construction, reconstruction, or renovation of academic facilities if the primary purpose of an applicant's proposed project is to achieve one or more of the objectives listed in 34 CFR 617.10.

(20 U.S.C. 1132d-3)

### Subpart C—How Does One Apply for an Annual Interest Grant?

#### § 621.20 Application dates.

The Secretary publishes an application notice in the *Federal Register* establishing the date for submission of applications for annual interest grants.

(20 U.S.C. 1132d-3)

#### § 621.21 Submission of application.

An applicant for an annual interest grant shall submit its application at the time, in the manner, and containing the information that the Secretary specifies.

#### § 621.22 Special application procedure.

(a) An applicant shall send a copy of its application to its State commission before submitting the application to the Secretary.

(b) The commission shall review and evaluate the application and provide comments to the Secretary regarding—

- (1) Use of space;
  - (2) Enrollment data; and
  - (3) The overall need for the facility—
- or for the reconstruction or renovation of the facility for which the applicant has requested assistance.

(c) Following its review the commission shall furnish its evaluation to the applicant.

(d) If the applicant does not agree with the evaluation, the applicant may include with its application to the Secretary a statement supporting its position.

(e) The commission shall submit the application to the Secretary, together with all State clearinghouse comments required by OMB Circular A-95.

(f) The applicant may not invite bids under the project before submitting its application to the Secretary.

(20 U.S.C. 1132d-3)

#### § 621.23 Approvable financing plan.

(a) Except as provided in paragraph (b) of this section, in order to be approved by the Secretary, a financing

plan submitted under this program must—

(1) Provide that the terms of the loan for which the applicant requests an annual interest grant does not exceed the lesser of—

- (i) Thirty years; or
- (ii) The useful life of the facilities that the applicant proposes to construct, reconstruct, or renovate with the help of the loan;

(2) Provide that the borrower is to repay the loan in substantially level annual installments of interest and principal over the term of the loan, except that the borrower may pay interest only for an initial period not exceeding five years; and

(3) Contain other provisions that will assure the Secretary that the support provided by the Secretary over the term of the loan is no more than is necessary to carry out the purposes of this program.

(b)(1) If the Secretary finds that unusual circumstances warrant an exception, the Secretary may accept a financing plan related to a loan for which—

- (i) The term is longer than 30 years;
- (ii) The annual installments of interest and principal are not substantially level; or
- (iii) Both.

(2) However, the term of a loan otherwise eligible for assistance under this subpart may not exceed 40 years.

(20 U.S.C. 1132d-3(a))

#### § 621.24 Evidence of lowest possible cost of loan.

(a) An applicant shall demonstrate to the satisfaction of the Secretary that the loan it proposes to obtain is at the lowest possible net interest cost.

(b)(1) If an applicant proposes to issue tax-exempt bonds to finance the construction, reconstruction, or renovation of academic facilities, the Secretary considers the applicant to meet the requirement in paragraph (a) of this section if the applicant proposes to sell those securities after publicly advertising for bids for the securities in an advertising medium acceptable to the Secretary.

(2) Before advertising these bonds for sale, the applicant shall submit for the Secretary's approval—

- (i) A draft of the notice of sale; and
- (ii) A statement of essential facts concerning the sale.

(c)(1) An applicant proposing to issue securities that are not tax-exempt shall submit to the Secretary offers from at least three lending institutions normally engaged in making long-term construction, reconstruction, and renovation loans.

(2) The applicant shall have given each of those institutions the information necessary to enable it to specify in its offer the—

- (i) Amount of the loan;
- (ii) Interest rate;
- (iii) Maturity period;
- (iv) Security provisions; and
- (v) Repayment provisions.

(d) The applicant—whether proposing to issue tax-exempt bonds or proposing to issue securities that are not tax-exempt—may not enter into a firm and binding agreement with a lender before the Secretary has approved the loan offer.

(20 U.S.C. 1132d-3(c))

#### § 621.25 Invitation for bids.

(a) An applicant may not invite bids for construction, reconstruction, or renovation under its proposed project before submitting its application to the Secretary.

(b)(1) However, paragraph (a) of this section does not apply if—

- (i) The Secretary has already approved assistance for the project under Title VII; or
- (ii) Some other agency of the United States has already approved assistance for the project under some other Federal assistance program.

(2) In that case the Secretary considers the application only if the applicant submits it in response to an application notice occurring no later than 12 months after the applicant has begun the construction, reconstruction, or renovation.

(20 U.S.C. 1132d-3)

### Subpart D.—How Does the Secretary Make an Annual Interest Grant?

#### § 621.30 Selection criteria for evaluating a proposed project.

(a) In evaluating a proposed project for which an applicant has applied for an annual interest grant under this program, the Secretary applies—

- (1) The criterion in 34 CFR 620.31, worth up to 20 possible points;
- (2) As applicable, the criteria in 34 CFR 620.32, 620.33, 620.34, 620.35, 620.36, 620.37, or 620.38, worth up to 80 possible points; and
- (3) For ranking applications with identical scores, the priority considerations in 34 CFR 620.39.

(b) In applying the criteria referred to in paragraph (a) of this section, the Secretary awards the same maximum possible points as those contained in 34 CFR 620.31 through 620.38.

(20 U.S.C. 1132d-3)

**§ 621.31 Conditions for approval of annual interest grants.**

The Secretary approves an application for annual interest grants only if the Secretary is satisfied that—

(a) The applicant will have available, as required, funds to pay the total development cost of the facilities;

(b) The applicant has or will have a full title or interest in the site, including right of access, that is sufficient to insure the applicant's undisturbed use and possession of the facilities for not less than the useful life of the facilities or 50 years, whichever is longer;

(c) The applicant has the necessary legal authority to—

(1) Finance; construct, reconstruct, or renovate; and maintain the proposed facilities;

(2) Apply for and receive the proposed loan and annual interest grants; and

(3) Pledge or mortgage any assets or revenues to be given as security for the proposed loan; and

(d) The applicant's financing plan meets the conditions of § 621.22 and is otherwise practicable and feasible.

(20 U.S.C. 1132d-3)

**§ 621.32 Conditions for making an annual interest grant.**

(a)(1) The Secretary considers making an annual interest grant only if the applicant is unable to secure from other sources a loan—up to the amount the Secretary may subsidize under the law—with an interest rate equally as favorable as the rate applicable to direct Federal loans under section 734 of the Act.

(2) In order to assist the Secretary in making this determination, the applicant shall comply with any procedures the Secretary may establish, including public advertising for bids.

(b) The Secretary does not make an annual interest grant for a loan if a borrower is legally obligated under that loan before it has filed an application under this program.

(20 U.S.C. 1132d-3(d)(2))

**§ 621.33 Annual interest grant agreement.**

(a)(1) After approving an application for an annual interest grant, the Secretary prepares and sends to the applicant a proposed agreement containing the terms and conditions of the grant.

(2) The Secretary enters into this agreement for the benefit of the applicant institution only.

(b) The proposed agreement provides that the Secretary does not make any grant payments under the agreement unless the Secretary concurs in the rate of interest and other terms and conditions of the loan.

(c)(1) The applicant may not enter into the agreement—

(i) For the benefit of third parties; or

(ii) To induce—

(A) The making of loans by third parties; or

(B) The sale of bonds to third parties;

(2) The Secretary does not entertain grievances or claims of third parties with respect to the agreement between the Secretary and the applicant institution.

(20 U.S.C. 1132d-3)

**§ 621.34 Amount of annual interest grant.**

(a) Each interest grant that the Secretary makes is approximately equal to, but not more than, the difference between—

(1) The average annual debt service that the borrower is required to pay on the amount borrowed from private sources for the project covered by the application; and

(2) An average annual debt service on the same amount at an interest rate of four percent.

(b) The Secretary may amend the amount of the annual interest grant stipulated in the agreement to reflect changes in the amount or terms of the loan.

(c)(1) If the borrower increases its loan, it may request of the Secretary an increase in the amount of its annual interest grant.

(2) The borrower must make this request—

(i) Not later than 12 months after it has begun construction, reconstruction, or renovation; and

(ii) By submitting to the Secretary an amended application.

(3) The Secretary considers the request subject to the availability of funds.

(d) If, at the time the borrower becomes legally obligated under a loan, there has been a change in the rate of interest or the terms of the loan, the borrower may request of the Secretary an increase in the amount of its annual interest grant.

(20 U.S.C. 1132d-2(a))

**§ 621.35 Limits of Federal assistance.**

(a) The principal amount of a loan—or portion of a loan—on which the Secretary approves an annual interest grant, together with the amount of any other Federal financial assistance the applicant has obtained or is assured of obtaining under any other Federal program, may not exceed 90 percent of the eligible development costs.

(20 U.S.C. 1132d-3(d)(1))

(b) The aggregate principal amount of loans—or portions of loans—on which

the Secretary approves annual interest grants does not exceed \$5 million per campus for a Federal fiscal year.

(20 U.S.C. 1132d-3)

**§ 621.36 Payment of annual interest grant.**

(a) The Secretary makes payments under an annual interest grant agreement once a year.

(b) The date of payment coincides as closely as possible with—

(1) The anniversary date of the loan; or

(2) The date when debt service requirement related to the loan is greatest.

(c) The payment date remains fixed for the duration of the loan.

(d) The Secretary pays an annual interest grant—

(1) Directly to the grantee; or  
(2) To a trustee, paying agent, or lender to whom the grantee assigns the payment with the permission of the Secretary.

(20 U.S.C. 1132d-3)

**§ 621.37 Preceding provisions not exhaustive of authority of the Secretary.**

The provisions of this Subpart D do not exhaust the authority of the Secretary to impose, at any time the Secretary considers appropriate, additional limitations with regard to—

(a) The amount of an annual interest grant; or

(b) The amount on which that grant is based.

(20 U.S.C. 1132d-3)

**Subpart E—What Conditions Must Be Met by a Grantee?****§ 621.40 Reduction of grant if refinancing produces lower costs.**

If the Secretary finds that a grantee could have accelerated repayment of an outstanding loan or obtained a new loan that would have resulted in a net savings in the cost of the loan, the Secretary may recompute the amount of the annual interest grant as though the grantee had undertaken that refinancing.

**Infant Formula Quality Control  
Procedures; Proposed Rule**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Food and Drug Administration**

**21 CFR Part 106**

[Docket No. 80N-0025]

**Infant Formula Quality Control Procedures**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** In accordance with the Infant Formula Act of 1980 (Pub. L. 96-359; 94 Stat. 1190), the Food and Drug Administration (FDA) is proposing to establish a new Part 106 (21 CFR Part 106) that requires quality control procedures for the manufacture of infant formula products. The proposed regulations specify a systematic procedure of sampling, testing, analyses, and recordkeeping for in-process and finished formulas and require manufacturers to establish the following: an acceptance protocol for ingredients assuring that they conform to strict specifications for composition and purity; and in-process operational control program of ingredient addition, blending, homogenization, and standardization; and a finished product evaluation system that specifies sampling frequency and an analytical format that defines product release ranges at which the product may be shipped. This proposal ensures that infant formula products contain the necessary nutrients at the specified levels as required by the Infant Formula Act of 1980.

**DATES:** Comments by March 2, 1981. Proposed compliance date for all affected products initially introduced or initially delivered for introduction in interstate commerce or prepared from raw materials shipped in interstate commerce is 180 days after date of publication of the final regulation.

**ADDRESS:** Written comments to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fisher Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** F. Edward Scarbrough, Bureau of Foods (HFF-204), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-3117.

**SUPPLEMENTARY INFORMATION:** In 1978 a major manufacturer of soy protein-based infant formulas reformulated two of its products. The reformulation resulted in products containing an inadequate amount of the essential

nutrient, chloride. By 1979 a substantial number of cases concerning a medical disorder, known as hypochloremic metabolic alkalosis, were reported. This serious medical condition is most frequently characterized by the infant's failure to thrive. These cases of infant illness were found to be associated with prolonged exclusive use of the chloride-deficient soy formulas. This incident made it clear that greater regulatory control over the formulation and processing of infant formulas was necessary.

In response to the chloride-deficient soy formula occurrence, the Commissioner of Food and Drugs contacted members of the infant formula industry requesting information concerning quality assurance and quality control procedures and nutrient analytical methodology. After the submission of these data, the agency, held an open public meeting and an informal public hearing on the general issues of infant formula processing, testing, composition, and safety (see the *Federal Register* of January 29, 1980; 45 FR 6702). The meeting was conducted in Washington, DC on February 19, 1980, to obtain public comment on the issues of open date labeling, quality control and quality assurance practices, and clinical testing needs for infant formulas. The hearing, also in Washington, DC, was conducted on March 12, 1980, and gathered public comment on the adequacy of the current nutrient composition of infant formulas and whether revision of FDA's infant formula nutritional labeling regulation, 21 CFR 105.65, was necessary. The comments relevant to the proposed quality control procedure regulations which were received in response to these public proceedings are on file with the Dockets Management Branch under the docket number set forth above.

The Congress was also quick in recognizing the need for more stringent government control over these vital food products. As early as November 8, 1979, several legislative proposals, each entitled the Infant Formula Act of 1980, were introduced by various members of the U.S. House of Representatives, most notably by Messrs. Gore, Mottl, and Carter, and were referred to the House Subcommittee on Health and the Environment (Subcommittee). These proposals were intended to require a broad range regulatory scheme for infant formula products which included periodic testing, a statutory nutrient table, and recordkeeping requirements for assuring their safety and nutritional quality. Hearings on these proposals were conducted by the Subcommittee in

February and March 1980. The final House bill, H.R. 6940, was considered by the Committee on Interstate and Foreign Commerce on April 16, 1980, and ordered reported by unanimous vote (see H.R. Rept. No. 96-936, 96th Cong., 2d Sess., p. 4 (May 12, 1980)).

Similar legislation to tighten regulatory control over infant formulas was introduced in the U.S. Senate by Messrs. Metzenbaum, Baucus, and Leahy on March 27, 1980. The Senate bill, S. 2490, was referred to the Committee on Labor and Human Resources (Committee). Hearings on the legislation were conducted by the Subcommittee on Health and Scientific Research on June 12 and August 5, 1980, and it adopted and accepted the House companion bill, H.R. 6940, with one amendment. On August 21, 1980, S. 2490 was ordered reported by the full Committee (see S. Rept. No. 96-916, 96th Cong., 2d Sess., p. 2 (August 26, 1980)).

Thereafter, this bill was passed by both Houses of Congress. On September 26, 1980, the President signed into law the Infant Formula Act of 1980 (Pub. L. 96-359, 94 Stat. 1190). This amendment to the Federal Food, Drug, and Cosmetic Act (the act) establishes a new section 412 (21 U.S.C. 350a) and creates a separate category of food designated as "infant formula." It requires that infant formulas meet specified standards of quality and safety. Section 412(g) of the act provides that an infant formula shall contain nutrients at specified levels in accordance with a table set forth therein. If a formula product, except for a special formula as defined in section 412(f) of the act, fails to contain the nutrients in the specified amounts, it is deemed adulterated under new section 412(a)(1)(A). In addition, if a formula, except for one defined in section 412(f), does not meet certain quality factor requirements (section 412(a)(1)(B)) or if a formula is not manufactured or processed in compliance with certain quality control procedures (section 412(a)(1)(C)), it is also deemed adulterated.

Section 412(a)(2)(D) of the new law gives the Secretary of Health and Human Services the authority to promulgate regulations\* establishing:

Such quality control procedures \* \* \* necessary to assure that an infant formula provides nutrients in accordance with this section and establish requirements respecting the retention of records of procedures required under this clause (including maintaining necessary nutrient testing records) \* \* \*. Quality control procedures prescribed by the Secretary shall include the

\* This authority is delegated to the Commissioner of Food and Drugs, 21 CFR 5.1(a)(1).

periodic testing of infant formulas to determine whether they are in compliance with this section.

The legislative history describes the anticipated infant formula "quality control procedure" regulations in terms which encompass the entire manufacturing process:

\*\*\* Quality control procedures are those procedures which would assure proper manufacturing of formula products.

Quality control procedures are not limited to those "good manufacturing practices" applicable to food. Quality control procedures are intended to insure that the safety and nutritional potency of a formula is built into the manufacturing process. This authority is necessary as the absence of quality control mechanisms was a major factor in the production and subsequent sale last year of two formula products critically deficient in chloride. Existing statutory authority in this area is inadequate as it is limited to assurances that infant formula is filth free and is manufactured in a sanitary facility. S. Rept. No. 96-916, 96th Cong., 2d Sess., pp. 5-6 (August 26, 1980); H.R. Rept. No. 96-936, 96th Cong., 2d Sess., pp. 6-7 (May 12, 1980).

It is therefore clear that such procedures for infant formulas are to be in addition to those procedures currently codified under the good manufacturing practice (GMP) regulations applicable to food sanitation (21 CFR Part 110) and the GMP requirements for low-acid canned foods (21 CFR Part 113).

Until the agency promulgates infant formula quality control procedure regulations, the new law requires manufacturers to test their formula products to assure their nutritional quality and safety and report to FDA every 90 days that their formulas provide nutrients required by the table in section 412(g) (see section 412(b)(1) of the act).

The Congress expected FDA to move expeditiously in proposing, promulgating, and establishing quality control procedures for the manufacturing of infant formulas. S. Rept. No. 96-916, 96th Cong., 2d Sess., p. 6 (August 26, 1980). Thus, the agency is now proposing to establish new Part 106 (21 CFR Part 106) specifying the infant formula quality control procedures. These procedures are applicable to the entire infant formula manufacturing process, from the receipt of ingredients until the finished infant formula is released for shipping.

A total quality control program for the manufacture of infant formulas is necessary to ensure that each batch of the formula is uniform in its composition and conforms to the requirements of section 412 of the act. These proposed regulations constitute a planned and systematic procedure of sampling,

testing, and analysis which requires (1) an acceptance protocol for ingredients assuring that they conform to strict specifications for composition and purity; (2) an in-process operational control program of ingredient addition, blending, homogenization, and standardization; and, (3) a finished product evaluation system that specifies sampling frequency and an analytical format that defines the product release ranges at which the product may be shipped. These procedures necessarily include requirements for establishing and maintaining adequate quality control records to document that each formula meets the testing and nutrient requirements of section 412 of the act. In addition, the agency is including as a subpart to this proposal the notification format to be followed by manufacturers in reporting to FDA under those situations set forth at sections 412(b) and 412(c) of the act. Notice of these reporting procedures was published in the Federal Register of November 21, 1980 (45 FR 77136) and do not require public comment. The instruction to promptly notify FDA of a suspected adulteration or misbranding of an infant formula has been modified to provide for telephone notification (see § 106.130(d)) of either the Director of the appropriate FDA district office or the Emergency and Epidemiological Operations Branch in headquarters.

#### Status and Applicability of Quality Control Procedure Regulations

Proposed § 106.1 (21 CFR 106.1) states that the criteria set forth in proposed §§ 106.20, 106.25, 106.30, and 106.100 shall apply in determining whether the controls used in the manufacture, processing, and packing of infant formula products meet the requirements of section 412 of the act as to safety, quality, and nutritional composition. (See sections 412(a)(1)(C) and 412(a)(2)(D) of the act.) A manufacturer's failure to comply with the applicable requirements of these regulations after their effective date shall render the infant formula product adulterated under section 412(a)(1)(C) of the act, and such formula as well as the person who is responsible for the failure to comply may be subject to regulatory action. Thus, these regulations, after promulgation, will have the full force and effect of law. See *Weinberger v. Hynson, Wescott & Dunning, Inc.*, 412 U.S. 609 (1973); *United States v. Nova Scotia Food Products Corp.*, 568 F.2d 240 (2d Cir. 1977); *National Nutritional Foods Ass'n v. Weinberger*, 512 F.2d 688 (2d Cir. 1975).

#### Definitions

Proposed section 106.3 (21 CFR 106.3) incorporates the definitions and interpretations contained in section 201 of the act (21 U.S.C. 321), when such terms are used in these proposed regulations. Other more technical terms are defined in this proposed regulation and are based on FDA's experience in regulating foods and common usage in the infant formula industry.

#### Quality Control Requirements

*Receipt of ingredients.* Proposed § 106.20 (21 CFR 106.20) describes those procedures applicable to the receipt of infant formula ingredients which are essential for assuring that each ingredient meets its stated specifications and, therefore, assuring that the finished product conforms to section 412(g) of the act. To assure that ingredients, which contain nutrients likely to be affected by shipping, storage, or other conditions (such as an error in the mixing of nutrients by the supplier), conform to their specifications, each lot of ingredient which may be affected must be analyzed for such nutrients, or if appropriate, an indicator nutrient. An indicator nutrient is one, usually a label ingredient of a premix, the concentration of which is measured at several stages during the production of the infant formula product because it is most likely to be affected by the process. If ingredients, including nutrients and nutrient premixes, are not certified or guaranteed by the supplier or labeled as meeting prescribed standards, an extensive sampling and testing plan must be employed utilizing a statistically random sampling followed by confirmatory quantitative analysis for each nutrient required by section 412(g) of the act. The proposed section requires that an identifying number or code be used in recording the disposition of each nutrient ingredient, as examples, when they are rejected to the supplier or when they are added to a premix or batch.

#### In-Process Control

Proposed § 106.25 (21 CFR 106.25) describes the requirements for infant formula in-process control. Each distinct processing operation shall be entered on a batch record and its satisfactory completion recorded by the operator. A designated supervisor shall check and sign each batch record. A second person shall confirm the addition of each ingredient. Sampling the in-process batch after various additions of nutrients, analyzing the composition for uniformity and indicator nutrients, and standardizing the completed batch

assures the formula's conformity to the nutritional requirements of section 412(g) of the act.

#### Base Blend

Production of an in-process batch usually begins with the formulation of a base blend, generally from either milk or soy ingredients, or other sources of protein, as well as other sources of fat or carbohydrate. The base blend may also contain various electrolytes, emulsifiers, stabilizers, and other functional ingredients. FDA is proposing in § 106.25(b) that each base blend be sampled after thorough mixing and analyzed for protein, fat, ash, moisture, and carbohydrate to confirm the levels of the major components in the base blend.

#### Premixes

Certain infant formula ingredients such as vitamins, minerals, and amino acids are sometimes added to the in-process batch as premixes. Commonly used premixes for infant formula production generally include an oil-soluble premix and one or more water-soluble premixes. FDA is proposing in § 106.25(c) that a premix which is made from individual nutrient components by the infant formula manufacturer shall be analyzed for each nutrient prior to its addition to the base blend, unless analyses for each nutrient contributed by the premix are performed on the contents of the holding tank(s) as prescribed in proposed § 106.25(e). When a premix is analyzed for each nutrient as set forth in proposed § 106.25(c), FDA is proposing that the in-process batch be analyzed for the appropriate indicator nutrient as provided by § 106.25(d). After the addition of premixes to the base blend, the proper quantity of each premix in an in-process batch may be verified (proposed in paragraph (d)) by analyzing each in-process batch for one or more of the indicator nutrients of each of the premixes used. Unless analyses for each nutrient contributed by a premix are performed in-process, such analyses must be performed on the contents of the holding tank(s). If the indicator nutrient is within the prescribed limit of specification, the other component nutrients are expected to be in the in-process batch within specification. However, selected batches of finished product in containers are to be analyzed for all nutrients specified in section 412(g) of the act (proposed in § 106.30(a), (b), and (c)).

When a nutrient ingredient is not suitable for use in the preparation of a uniform, stable premix, that nutrient is sometimes added separately to the in-

process batch. FDA is proposing in § 106.25(d) to require that the presence of the proper quantity of that nutrient be verified by analysis of each in-process batch for that nutrient, unless the analysis is later performed on samples from the holding tank(s) as prescribed in proposed § 106.25(e). After the addition of premixes and nutrients added individually, proposed § 106.25(f) requires the in-process batch to be adjusted as necessary to conform to the batch formula.

#### Product in Holding Tanks

One or more in-process batches may be accumulated in a holding tank(s) to form a filling batch which then is standardized prior to further processing. FDA is proposing in § 106.25(e) to require the testing of samples from each holding tank of the product for solids, homogeneity, osmolality, and sedimentation as indicators of nutrient dispersal and consequent product uniformity. Testing for other physical attributes of infant formulas is not included in this proposed regulation because most physical attributes normally are used as a measure of the organoleptic properties of the product and do not aid in determining that nutrient levels in the product are being maintained. FDA is also proposing in § 106.25(e)(1) to (5) to require that samples taken from the holding tank be analyzed for major nutrients (protein, fat, and carbohydrate); for indicator nutrients in premixes; for each nutrient in a premix made from individual nutrient components by the infant formula manufacturer unless analyzed prior to use; and for nutrients added independently of premixes during formulation of the product, unless analyzed in the in-process batch.

The level of testing and analyses proposed for the product in the holding tank, together with the previously discussed requirements for the sampling and analysis of ingredients and in-process product, provides the manufacturer with an increased ability to detect and correct product compositional defects prior to heat sterilization or dehydration and packaging into individual containers. For those nutrients that are heat-labile, appropriate indicator nutrients shall be checked after heat processing or dehydration to assure their adequacy in the finished product (proposed in § 106.30(b)(1)(ii)). In this manner, an increased level of assurance of finished product integrity is attained at the earliest possible time in the process, thus averting expensive finished product rework or recall if distributed. At the same time, a decreased level and

frequency of sampling and analysis of finished product after processing and packaging is required.

#### Release of Product for Heat Sterilization or Dehydration

FDA proposes in § 106.25(f) that if the product in each holding tank conforms to its specifications, it may be released for subsequent heat sterilization or dehydration and packaging. Otherwise, it shall be adjusted and reanalyzed to verify the efficacy of standardization.

#### Finished Product Analyses Prior to Shipment

FDA proposes in § 106.30 (21 CFR 106.30) that random samples of product taken after heat sterilization or dehydration and packaging be tested for physical attributes and analyzed for indicator nutrients that measure possible product damage before the product is released from the manufacturer's control. FDA is proposing product analysis for indicator nutrients that measure possible damage because certain nutrients that are sensitive to heat, light, oxygen, pH, or a combination thereof may be affected by the manufacturing processes. Trace minerals, such as copper and iron, and enzymes may catalyze these effects. Heating and/or the presence of reducing sugars may degrade protein quality by decreasing the biological availability of certain essential amino acids of the protein. The indicator nutrient(s) selected to measure process damage in any formulation must be the nutrient(s) most susceptible to process damage.

When two or more nutrients are equally suitable to fulfill an indicator role, the complexity and cost of the analytical methods for these nutrients are additional factors affecting the selection decision. In addition, the same nutrient may be adequate to fulfill more than one indicator role, simplifying part of the control process. Thus, vitamin A may serve as an indicator of the oil-soluble premix addition to the in-process batch and as a measure of process damage in the finished product.

When the history of nutrient stability gathered during product development indicates that a satisfactory indicator nutrient level gives assurance of proper levels of nutrients similar to the indicator, the product may be shipped if the result of that analysis is satisfactory.

#### Finished Product Analyses of Selected Batches

FDA proposes in § 106.30(b) a three-tiered staggered analyses program for finished formula products. While samples of the finished product must be monitored for all nutrients required by

section 412(g) of the act and those claimed on the label, the timeframe for analyses is not uniform for all nutrients. FDA believes that less frequent analyses for certain nutrients are reasonable; many require a longer time to analyze than other nutrients that can satisfactorily serve as indicators. There are no documented cases of deficiencies in normal infants of biotin, choline, and inositol. Vitamins D and K are well retained in the human body; vitamin D also is highly stable in infant formulas, while vitamin K intake in infants other than newborns is usually augmented by intestinal bacterial production of this vitamin. The vegetable oils now used as fat sources are rich in linoleic acid. Protein efficiency ratio (PER) and tryptophan (the content of which may be used in meeting the niacin requirement in section 412(g) of the act) are not expected to vary unless there is a change in the protein ingredients or processing procedures, at which time an analysis of these components is required.

Although thickening and stabilizing agents may be added to infant formulas to maintain the consistency and to prolong the stability of the product over its shelf life, there may be some changes in consistency and nutritional qualities during storage. Therefore, FDA is proposing in § 106.30(b)(3) that samples from selected filling batches be checked at 3 month intervals throughout the shelf life of the product to ascertain its stability and nutritional adequacy. Scheduling a bioanalysis of vitamin D and the biological evaluation of PER to occur over a 6-month cycle rather than every 3 months is considered appropriate because of the length of time required to complete the bioanalysis.

#### Criteria for accepting and rejecting a product

FDA is proposing in § 106.30(c) that the ranges of nutrient composition in the finished product shall be such that their lower limits do not fall below, and their upper limits do not exceed, the minimum and maximum levels, respectively, specified in section 412(g) of the act and that the composition shall be consistent with label declarations. To assure that the upper and lower levels of the listed nutrients in the act are met, proposed § 106.30(d) requires the establishment of an appropriate finished product acceptance/rejection system based on statistical quality control criteria. The proposal further requires that when the results of testing three consecutive filling batches show a trend in deviations from specified ranges in one or more nutrients, the product shall be

evaluated to ascertain and implement steps that need to be taken to maintain the product in conformity with section 412(g) of the act.

#### Changes in Ingredients or Processes

FDA proposes in § 106.30(e) that an infant formula manufactured after changes in the formulation or processing has occurred must be controlled more stringently than products manufactured without such changes. To assure the adequacy of the nutrient composition of formulas manufactured after a change in formulation or processing has occurred, FDA is proposing that a manufacturer be required to evaluate the effects of changes in ingredients or processing conditions in the first and last of the first 10 filling-batches together with product from any 2 of the other 8 filling batches. As set forth in proposed § 106.30(e)(1), if the changes in formula are minor (e.g., changing ingredients from one supplier to another whose products differ only in minor aspects from those previously used), composite samples are to be analyzed for all nutrients changed and for those nutrients affected by the change. As set forth in proposed § 106.30(e)(2), if the changes in formulation are major (e.g., changing type of ingredients, such as soy flour to soy isolate, or replacing a heat exchanger with a steam injector-vapor tank system), a complete analysis of all required nutrients and of PER is to be performed on the 1st and 10th filling batches as well as on any two of the other eight filling batches, except that analyses for linoleic acids, vitamin D, vitamin K, choline, inositol, biotin, PER, and tryptophan (if necessary as part of the declaration of niacin equivalents) need be made only on the 1st and 10th batches if they meet specifications. These detailed analyses are necessary to further assure nutritional adequacy, i.e., that the premix system is functioning as intended, and that no unexpected losses of nutrients are occurring during processing.

#### Coding

The coding of food products is necessary and important in ascertaining positive lot identification. Positive lot identification facilitates the identification, the segregation, and the traceability of contaminated products or products that may be otherwise unfit for their intended use. Congress has recognized the utility of this type of product coding, as have many members of the food industry, who have developed guidelines for their segments of the industry. The courts too recognized the self-evident rationality of the coding of food products. See

*National Confectioner Ass'n v. Califano*, 569 F.2d 690, 695 (D.C. Cir. 1978).

In addition, Congress has reemphasized in the Infant Formula Act of 1980 the importance of the concepts of coding and traceability for infant formulas by requiring each infant formula manufacturer to make and retain necessary records respecting the distribution of the infant formula through any establishment owned or operated by such manufacturer as may be necessary to effect and monitor a recall of the formula. (See section 412(e)(1) of the act). Accordingly, FDA is proposing in § 106.90 (21 CFR 106.90) to require the manufacturer to place permanent and conspicuous legible coding marks on each infant formula package delivered or displayed to purchasers, so that such code marks can be easily seen on the unopened package. The marks must identify at a minimum, the establishment where the formula is packed, the product that is contained therein, the year and day and product that is packed, and the period during which, the product is packed. Further, FDA is proposing that the packing period code be changed with sufficient frequency to enable the identification of a period of time when certain personnel were on duty and in-plant conditions were relatively constant.

#### Records and Reports

The Infant Formula Act of 1980 expanded the agency's inspectional authority in section 704 of the act (21 U.S.C. 374), by permitting duly authorized FDA employees to have access to and to copy and verify any records bearing on whether any infant formula meets the requirements of section 412 of the act. Thus, FDA is proposing in § 106.100 (21 CFR 106.100) that infant formula manufacturers maintain: (a) Records of the results of examinations or copies of supplier guarantees or certifications verifying that the raw materials, packing materials, and infant formulas comply with section 412 of the act and with FDA regulations, guidelines, or action levels, and (b) those quality control procedure records, including in-process and finished product testing records, necessary to show that the nutrient content of infant formulas meets the requirements of section 412 of the act. FDA proposes that these records be kept for a period of time that meets or exceeds the shelf life of the product.

#### Notification

FDA is including as subpart D to the proposed quality control procedure regulations (proposed §§ 106.120, 106.122, and 106.130; 21 CFR 106.120,

106.122, and 106.130) the notification procedures and format to be followed by manufacturers in reporting to FDA as required by sections 412(b) and 412(c) of the act. Notice of these reporting procedures was published in the Federal Register of November 21, 1980 (45 FR 77136) to advise manufacturers of the reporting requirements in new section 412 of the act and to inform them of how to notify the agency and which offices at FDA to submit the required reports.

In that notice, the agency included the reporting requirement of section 412(b)(1) of the act, which directs manufacturers to notify FDA within 90 days following the date of enactment of the Infant Formula Act and on each 90th day thereafter, that each "existing" infant formula produced by a manufacturer provides nutrients required by section 412(g) of the act. Because this reporting requirement expires on the effective date of these proposed quality control procedure regulations, the agency is not including the format for the section 412(b)(1) reporting requirement herein. In addition, the reporting format in § 106.122 for reformulations as required by section 412(b)(3) of the act, has been modified to include a short description of the change(s) in formulation; and the telephone notification in § 106.130(d) has been modified to give the manufacturer the option of contacting either the appropriate FDA District Director or the FDA Emergency and Epidemiological Operations Branch. However, all other reporting formats required by section 412(b) and (c) of the act will continue to be applicable and are therefore being included in these proposed regulations. Because these notification requirements are not substantive and reflect only a statutory interpretation of section 412(b) and (c), public comment is not required.

#### Clinical Testing

FDA recognizes that premarket clinical evaluation in humans may be appropriate whenever certain changes affecting the nutritional profile of an infant formula are made, particularly in the case of new or reformulated products. FDA also recognizes that the degree and complexity of clinical testing would vary according to the extent of the changes in the formula. The testimony that was received during the February 19, 1980, public meeting was supportive of the need for clinical trials in appropriate situations and indicated that the infant formula industry now makes ad hoc decisions to clinically evaluate formulas based upon recommendations of physicians and nutritionists. However, the discussion

provided at the public meeting was not sufficiently specific to constitute a basis for the development of an FDA policy on clinical testing of infant formulas. A copy of the testimony received at the public meeting concerning infant formula clinical testing is on file with the Dockets Management Branch under the docket number set forth above.

FDA also requested recommendations from the Committee on Nutrition of the American Academy of Pediatrics (CON/AAP) on clinical testing of infant formulas. In a statement on June 23, 1980, CON/AAP reported to FDA that clinical testing of new and reformulated products is considered advisable from time to time, and is now carried out in established clinical research centers with the collaboration of technical experts, nutrition scientists, and pediatricians. CON/AAP recommended that, in view of the existing practices governing nutrient content and manufacturing procedures, no regulations be devised for infant formula clinical testing. This recommendation was based on three reasons: (1) Problems with the manufacture of infant formulas have been exceptionally rare in the past; (2) future modifications of infant formulas that are justified nutritionally or economically cannot be wholly predicted, and no simple code can govern all anticipated eventualities; and, (3) future clinical trials will have to be adapted to the evolving ethical codes governing research on infants. A copy of the CON/AAP statement with accompanying background information on infant formula regulations is also on file with the Dockets Management Branch.

Considering the complexities surrounding clinical testing of infant formulas in infants and the fact that such testing is currently an integral part of the manufacturer's development of new formulas, FDA is not now proposing regulations on clinical testing of infant formulas. However, the agency is soliciting public comment on the need for establishing a policy or regulation on clinical testing of infant formulas. Answers to the following questions are essential to the development of an agency policy, and comments thereon are requested: (1) What constitutes a new infant formula, and what constitutes major reformulations of existing formulas that would require clinical testing; (2) what constitutes adequate metabolic testing, growth and development studies, or acceptance and tolerance tests, and in what situations are each of these types of testing appropriate; and (3) what criteria should be used to evaluate the results of tests

or to measure the effectiveness (performance) of an infant formula? Although responses to these specific questions are especially desired, comments on any aspect of clinical testing of infant formulas are welcomed. All comments received will be considered by FDA in determining its future course of action with respect to clinical testing of infant formulas.

FDA proposes that all affected products initially introduced into, or initially delivered for introduction into, interstate commerce or prepared from raw materials shipped in interstate commerce on or after 180 days after date of publication in the Federal Register of any final regulation adopted on the basis of this proposal, shall comply with that regulation.

The agency has determined under 21 CFR 25.24(d)(13) (proposed December 11, 1979 (44 FR 71742)) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 412, 701(a), 52 Stat. 1055 as amended, 94 Stat. 1190 (21 U.S.C. 350a, 371(a))), and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), it is proposed that Chapter I of Title 21 of the Code of Federal Regulations be amended by adding new Part 106 to read as follows:

### PART 106—INFANT FORMULA QUALITY CONTROL PROCEDURES

#### Subpart A—General Provisions

- Sec.  
106.1 Status and applicability of the quality control procedure regulations.  
106.3 Definitions.

#### Subpart B—Quality Control Procedures for Assuring Nutrient Content of Infant Formulas

- 106.20 Ingredients receipt.  
106.25 In-process control.  
106.30 Finished product evaluation.  
106.90 Coding.

#### Subpart C—Records and Reports

- 106.100 Records.

#### Subpart D—Notification Requirements

- 106.120 New formulations.  
106.122 Reformulations.  
106.130 Notification format.

Authority: Secs. 412, 701(a), 52 Stat. 1055 as amended, 94 Stat. 1190 (21 U.S.C. 350a, 371(a)).

**Subpart A—General Provisions****§ 106.1 Status and applicability of the quality control procedure regulations.**

(a) The criteria set forth in §§ 106.20, 106.25, 106.30, 106.90, and 106.100 shall apply in determining whether the controls used in the manufacturing, processing, and packing of infant formula products meet the requirements of section 412 of the act as to safety, quality, and nutritional composition.

(b) The failure to comply with any regulation set forth in §§ 106.20, 106.25, 106.30, 106.90, and 106.100 applicable to the manufacturing, processing, and packing of an infant formula shall render such formula adulterated under section 412(a)(1)(C) of the act, and such formula, as well as the person who is responsible for the failure to comply, may be subject to regulatory action.

(c) The requirements set forth in this part are to be implemented and followed by any person who is a manufacturer of an infant formula.

(d) If a person engages in only some operations subject to the regulations in this part and not others, that person need only comply with those regulations applicable to the operations in which he or she is engaged.

**§ 106.3 Definitions.**

The definitions and interpretations contained in section 201 of the act are applicable to such terms when used in this part. The following definitions shall also apply:

(a) *Filling batch.* A filling batch is one or more in-process batches combined in a holding tank(s) and standardized for filling into finished product containers over a prescribed filling time.

(b) *Ingredients.* Ingredients are all substances, including the required nutrients specified in section 412(g) of the act, which are necessary for the manufacture of an infant formula product.

(c) *Indicator nutrient.* An indicator nutrient is a nutrient, usually one ingredient of a premix, the concentration of which is measured at several stages during the manufacturing of the infant formula product to confirm one or both of the following characteristics or operations:

(1) Proper addition and proper distribution of premix in the in-process batch and in the holding tank; and

(2) Stability of labile nutrients during production, e.g., vitamin A, vitamin C.

(d) *In-process batch.* An in-process batch is a combination of ingredients, including the base blend, premixer and other nutrients in accordance with a manufacturing order at any point in the process prior to packaging.

(e) *Manufacturer.* A manufacturer is a person that prepares, reconstitutes, or otherwise changes the physical or chemical characteristics of an infant formula as defined in section 201(aa) of the act and packages the product in a container for distribution.

(f) *Nutrient.* A nutrient is any vitamin, mineral, or other substance required by section 412(g) of the act.

(g) *Nutrient premix.* A nutrient premix is a combination of two or more nutrients which is added as a single ingredient during processing.

**Subpart B—Quality Control Procedures For Assuring Nutrient Content of Infant Formulas****§ 106.20 Ingredients**

(a) Manufacturers shall ensure that incoming ingredients are not used in the manufacture of infant formulas if they have visible shipping damage or other defects or their label does not comport with order specifications. An identifying number or code shall be used in recording the disposition of each nutrient ingredient.

(b) Ingredients, other than nutrient premixes, which are generally stable in shipping and storage, and which are received under a supplier's guarantee or certification, or are labeled as having compositions complying with specifications in the U.S. Pharmacopeia, the National Formulary, the Food Chemicals Codex, or other similar recognized standards, may be forwarded without analysis for manufacturer use.

(c) When the nutrient(s) in an ingredient is likely to be affected by shipping or storage conditions, it shall be sampled and analyzed by the manufacturer. The ingredients shall be sampled by taking statistically randomized subsamples and a composite of the subsamples shall be analyzed quantitatively for each such nutrient or nutrients.

(d) Nutrient premixes which have been guaranteed or certified by the supplier shall be sampled and analyzed by the manufacturer. Such a premix shall be sampled by taking statistically randomized subsamples, and a composite of the subsamples shall be analyzed quantitatively for an indicator nutrient.

(e) Where ingredients, including individual nutrients or nutrient premixes, are without a supplier's guarantee or certification, or are not labeled as complying with prescribed standards, each lot shall be sampled and analyzed by the manufacturer. Each lot shall be sampled by taking statistically randomized subsamples to

give a composite sample for confirmatory quantitative analysis for each nutrient. The samples shall be analyzed by recognized methods, such as those in the current "Official Methods of Analysis of the Association of Official Analytical Chemists," including a chemical method for vitamin D unless otherwise specified in this regulation. If found to be within specifications, the ingredients may be forwarded for manufacturing use.

(f) Lots that are not within specifications shall be conspicuously marked by the manufacturer that they have been rejected and shall be removed to a restricted area pending disposition.

**§ 106.25 In-process control.**

(a) An appropriate formula based on the composition of the ingredients and prepared for each in-process batch shall be checked and signed by a quality control supervisor. Each ingredient of the batch, and the amount and place of entry of the ingredient into the process, shall be listed on a batch record. Operators shall initial each entry of an ingredient into the process and record nutrient ingredient identification numbers on the batch record. This record shall accompany the batch while in-process and each entry on it shall be initialed by a second person for verification of the kind and the amount of the ingredient. The batch record shall be filed with all processing control records associated with the batch.

(b) A base blend, prepared by mixing the appropriate ingredients, including sources of protein, fat, and carbohydrate with filtered, potable water of quality mandated by the local Public Health Agency shall be thoroughly mixed and sampled by the manufacturer. A proximate analysis for protein, fat, ash, moisture, and carbohydrate shall be performed by the manufacturer on samples from each base blend.

(c) A premix that is made from individual nutrients by the infant formula manufacturer shall be analyzed by such manufacturer for each nutrient prior to its addition to the base blend, unless analyses for each nutrient contributed by the premix are performed on the contents of the holding tank(s) as prescribed in paragraph (e) of this section.

(d) After the addition of the nutrient premixes to the base blend, and homogenization, when appropriate, the in-process batch may be sampled and analyzed for the appropriate indicator nutrient of each premix (e.g., vitamin A for the oil-soluble premix, vitamin C for the water-soluble vitamin premix, and manganese for the mineral premix). If a

nutrient is not suitable for use in the preparation of a uniform, stable premix, or if the composition of the nutrient is altered significantly with ensuing processing, it may be added separately at the most advantageous point in the manufacturing process to ensure its presence in prescribed amounts in the finished product. After the addition of such nutrient, the in-process batch may be analyzed for each individual added nutrient. Unless specified nutrient analyses are performed in-process, they shall be performed on the contents of the holding tank(s) as prescribed in paragraph (e) of this section.

(e) The manufacturer shall accumulate in-process batches in the holding tank(s) from which each filling batch is to be drawn. Each filling batch shall be held in storage until the nutrient composition of the contents of each holding tank is verified. After mixing, samples from each holding tank shall be analyzed by the manufacturer for the following physical attributes and nutrients:

(1) Solids, homogeneity, osmolality, and sedimentation.

(2) Protein, fat, and carbohydrate.

(3) Indicator nutrient(s) for premixes.

(4) Each nutrient in a premix made from individual nutrient components by the infant formula manufacturer and not analyzed in the in-process batch.

(5) Nutrients added independently of premixes during formulation of the product if not analyzed in the in-process batch.

(f) If the formula product in each holding tank conforms to its specifications, it may be released for heat sterilization or dehydration and packaging; otherwise it shall be adjusted as required and reanalyzed to verify the efficacy of standardization.

#### § 106.30 Finished product evaluation.

(a) The manufacturer shall take random samples of the finished formula product from each packaging line after heat sterilization or dehydration and packaging, to represent the entire filling batch (i.e., from the start of the first holding tank to the end of the last holding tank).

(b) A sufficient number of containers shall be taken by the manufacturer to provide adequate product for the following types of testing:

(1) *Immediate analysis.* A composite sample of three containers taken randomly over each 2-hour period at each packaging line for each filling batch shall be analyzed before shipping for:

(i) Solids, homogeneity, osmolality, and sedimentation.

(ii) Indicator nutrients to assess process damage, such as vitamin A, vitamin B<sub>1</sub>, vitamin B<sub>6</sub>, and vitamin C.

(2) *Extended analysis.* Replicate samples of containers for the immediate analyses, as described in paragraph (b)(1) of this section, are to be taken from the first of every 10 filling batches or taken semi-monthly, whichever comes first. These samples shall be analyzed for the content of reducing sugar and all nutrients specified in section 412(g) of the act and declared on the label, except linoleic acid, vitamin D, vitamin K, choline, inositol, biotin, tryptophan (if necessary as part of the declaration of niacin equivalents), and those which were tested in the immediate analyses.

(3) *Progressive analysis.* Using replicates of the samples collected from one filling batch as specified in paragraph (b)(2) of this section, and beginning 3 months after their packaging, progressive analysis shall be initiated on a new filling batch every 3 months. These samples shall be analyzed every 3 months throughout the shelf life of the product for physical attributes (i.e., solids, homogeneity, osmolality, and sedimentation), and for all nutrients declared on the label. Vitamin D may be determined by chemical methods, except that it and the protein efficiency ration (PER) shall be determined by the appropriate AOAC bioassay method of analysis once every 6 months throughout the shelf life of the product.

(i) The rat bioassay method for determining vitamin D shall be the method prescribed in "Official Methods of Analysis of the Association of Official Analytical Chemists," 13th ed. (1980), secs. 43.195-43.208 "Vitamin D (30)—Official Final Action,"<sup>1</sup> which is incorporated by reference.

(ii) The method for determining biological quality of protein in terms of PER shall be the method prescribed "Official Methods of Analysis of the Association of Official Analytical Chemists," 13th ed. (1980), sections 43.212-43.216 "Biological Evaluation of Protein Quality (Protein Efficiency Ratio) (32)—Official Final Action,"<sup>1</sup> which is incorporated by reference.

(c) Solids, homogeneity, osmolality, and sedimentation shall conform to release ranges established by the manufacturer. Ranges of the nutrient composition in the finished product shall be such that their lower limits do not fall below, and their upper limits do not

exceed, the minimum and maximum levels, respectively, specified in section 412(g) of the act, and the composition shall be consistent with label declarations.

(d) To ensure that the infant formula product contains those nutrients and levels of nutrients set forth in section 412(g) of the act, the manufacturer shall establish controls which shall include the implementation of scientifically sound and appropriate specifications, standards, sampling plans, and test procedures based upon the design and capability of the manufacturing process. The manufacturer shall also establish acceptance criteria for sampling and testing to ensure that batches of infant formula meet nutrient specifications and appropriate statistical quality control criteria as a condition for their approval and release. The statistical quality control criteria shall include appropriate acceptance, warning, and rejection ranges.

(1) The acceptance ranges lie within the upper and lower control limits of a statistical process average having two standard deviations as the limit boundaries. Where a nutrient level is between the second and third standard deviation, corrective measures shall be taken to bring the product into the acceptance range.

(2) If in any composite sample, any nutrient level lies below the three standard deviation limit, or the level of any nutrient having a maximum allowable concentration specified in section 412(g) of the act is above the three standard deviation limit, the filling batch shall be rejected and disposed of unless it is reconditioned and brought within specifications.

(3) When the results of testing three consecutive filling batches show a trend in deviations from specified ranges in one or more nutrients, the product shall be evaluated to ascertain the steps needed to be taken to maintain the product in conformity with section 412(g) of the act.

(e) The manufacturer shall perform analyses for evaluation of the effect of changes in ingredients or processing conditions which could affect the physical attributes or nutrient levels as indicated in paragraph (e)(1) and (2) of this section. Three samples (each consisting of a composite sample representing the beginning, the middle, and the end of the filling batch) shall be taken from each of the first 10 filling batches for evaluation prior to shipment of finished products to determine the effects of such changes which include, but are not limited to:

(1) Minor changes in ingredients (e.g., changing one or more ingredient levels

<sup>1</sup> Copies may be obtained from the Association of Official Analytical Chemists, P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044, or examined at the Office of the Federal Register Library.

to bring the ranges of nutrient concentration more closely within prescribed release limits; changing ingredients from one supplier to another whose products differ only in minor aspects from those previously used; changing the water source). The composite samples from the first and tenth filling batches and from two additional filling batches chosen from filling batches two through nine shall be analyzed by the manufacturer for all nutrients changed and those affected by the change.

(2) Major changes of ingredients more significant than those described in paragraph (e)(1) if this section, or changes in processes involving equipment or conditions such that physical attributes will be affected or labile nutrients will degrade beyond previously experienced ranges (e.g., changing type of ingredients, such as soy flour to soy isolate; replacing a heat exchanger with a steam injector-vapor tank system; changing time-temperature conditions of preheating during formulation of product; changing mixing times or mixing temperatures; or changing holding times and temperatures of sterilization). A complete analysis of all nutrients required by section 412(g) of the act and of PER shall be performed by the manufacturer on the composite samples from the first and tenth filling batches; analyses of all such nutrients and PER also shall be made on the composite samples from two additional filling batches chosen from filling batches two through nine, except that analyses for linoleic acid, vitamin D, vitamin K, choline, inositol, biotin, PER, and tryptophan (if necessary as part of the requirement of niacin) need not be made if they are within specification in filling batches 1 and 10.

#### § 106.90 Coding.

The manufacturer shall mark each container of a finished infant formula with a conspicuous, permanent, and legible identifying code. Code marks shall be visible to purchasers on unopened packages. The required code shall identify the establishment where packed, the product contained therein, the year packed, the day packed, and the period during which packed. The packing period code shall not extend over a period of more than one personnel shift.

### Subpart C—Records and Reports

#### § 106.100 Records.

(a) Records of results of examinations and copies of suppliers' guarantees or certifications that verify compliance

with FDA regulations, guidelines, or action levels for raw materials, food-packaging materials, and infant formulas shall be maintained by the manufacturer.

(b) Quality control procedure records necessary to ensure nutrient content of infant formulas, including periodic nutrient testing, shall be maintained by the manufacturer and shall contain sufficient information to permit a public health evaluation of any batch of infant formula.

(c) The records required by paragraphs (a) and (b) of this section shall be retained for a period of time that meets or exceeds the shelf life of the infant formula.

### Subpart D—Notification Requirements

#### § 106.120 New formulations.

The manufacturer shall notify FDA, not later than the 90th day before the first processing of any new infant formula for commercial or charitable distribution for human consumption, that the new infant formula provides the nutrients required by section 412(g) of the act and that the processing meets the quality control procedure requirements prescribed by the Food and Drug Administration and that the infant formula is not adulterated or misbranded within the meaning of the act.

#### § 106.122 Reformulations.

The manufacturer, before the first processing of any infant formula produced for commercial or charitable distribution for human consumption, when the manufacturer determines that a change in its formulation or a change (as described in section 412(b)(3) of the act) may affect whether the formula is adulterated, shall notify FDA of such changes, including a description of the changes, and that the reformulated formula provides the nutrients required by section 412(g) of the act.

#### § 106.130 Notification format.

(a) The notification requirements prescribed in §§ 106.120 and 106.122 of this subpart are to be submitted to FDA in the following format:

Please Type or Print all Entries

1. Enter the name of the product: \_\_\_\_\_
2. Check whether the identified infant formula is a "new formulation" \_\_\_\_\_ or a "reformulation" \_\_\_\_\_

If the identified formula is a reformulation, provide: a. A description of the change(s) in the formulation and/or processing.

- b. How this (these) change(s) may affect whether the formula is adulterated.

3. Enter establishment name and address. \_\_\_\_\_

Name: \_\_\_\_\_

Address: \_\_\_\_\_

(City) (State) (Zip Code)

4. If establishment has a parent company, enter parent company name and address. If not applicable, check N/A.

Name: \_\_\_\_\_

Address: \_\_\_\_\_

(city) (State) (Zip Code)

N/A: \_\_\_\_\_

5. Notification Statement of the Quality of the Identified Infant Formula:

"I hereby notify FDA that the infant formula identified above meets the nutritional requirements of section 412(g) of the Federal Food, Drug, and Cosmetic Act, that the processing of the infant formula meets the quality control procedure requirements prescribed by the Food and Drug Administration and that the infant formula is not adulterated or misbranded within the meaning of said act.

Signed: \_\_\_\_\_

Date: \_\_\_\_\_

(This notification shall be signed and dated by a responsible official.)

(b) The notification requirements prescribed in paragraph (a) of this section shall be submitted to Chief, Regulatory Affairs Staff (HFF-204), Bureau of Foods, Food and Drug Administration, 200 C St., SW., Washington, D.C. 20204.

(c)(1) The manufacturer shall submit to FDA one label for each infant formula produced for commercial or charitable distribution for human consumption with its submission for new formulations and reformulations.

(2) All labels are to be submitted to Chief, Regulatory Affairs Staff (HFF-204), and in accordance with the due dates established in §§ 106.120 and 106.122.

(d) The manufacturer shall promptly notify FDA when there is an infant formula in the marketplace which may not provide the nutrients required by section 412(g) of the act or when there is an infant formula otherwise adulterated or misbranded within the meaning of the act and presents a risk to human health. Descriptions of the known or suspected adulteration or misbranding must be provided. This notification shall be made, by telephone, either to the Director of the appropriate FDA district office specified in 21 CFR 5.115 or to FDA's Emergency and Epidemiological Operations Branch at 301-443-4667. After normal business hours (8 a.m. to 4:30 p.m.) the FDA emergency number, 202-737-0448, shall be used. This telephone notification shall be followed promptly by written confirmation which is to be sent to the Division of Regulatory Guidance (HFA-310), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, and to the

appropriate FDA district office specified in 21 CFR 5.115.

Interested persons may, on or before March 2, 1981, submit to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Orders 12044, as amended by Executive Order 12221, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Dockets Management Branch, Food and Drug Administration.

Dated: December 22, 1980.

Joseph P. Hile,

*Associate Commissioner for Regulatory Affairs.*

**Part XII**

**Department of  
Education**

---

**Pre-College Teacher Development in  
Science Program**

## DEPARTMENT OF EDUCATION

## 34 CFR Part 797

## Pre-College Teacher Development in Science Program

AGENCY: Department of Education.

ACTION: Final regulations.

**SUMMARY:** The Secretary issues final regulations for the Pre-College Teacher Development in Science Program. This program provides support to colleges and universities and certain nonprofit institutions for the continuing education of preschool and elementary school teachers in mathematics, engineering, and the natural and social sciences.

**EFFECTIVE DATE:** These final regulations are expected to take effect 45 days after they are transmitted to Congress. Regulations are usually transmitted to Congress several days before they are published in the Federal Register. The effective date is changed if Congress takes certain adjournments. If you want to know the effective dates of these final regulations, call or write the Department of Education contact person.

**FOR FURTHER INFORMATION CONTACT:** Mary G. Lewis, Pre-College Teacher Development in Science Program, U.S. Department of Education, 1832 M Street, N.W. (Room 819 Riviere Building, Washington, D.C. 20236. Telephone (202) 653-5839.

**SUPPLEMENTARY INFORMATION:** This program was transferred from the National Science Foundation to the Education Department by the Department of Education Organization Act of 1979, Pub. L. 96-88, Section 304. The current Education Department Program was part of the National Science Foundation's Pre-College Teacher Development in Science Program, which also included training opportunities for secondary school teachers. This NSF program was reestablished in fiscal year 1977 by Congress through Public Law 94-378. With the transfer of the preschool and elementary school portion of the program to the Education Department on May 4, 1980, the program for these grades is now subject to the General Education Provisions Act which requires publication of regulations in the Federal Register. (20 U.S.C. 3474(b))

The final rule, like the proposed regulations, essentially implement the operational guidelines of the program as administered by the National Science Foundation. For the initial administration of the program by the Education Department, no major changes have been made in accordance with the Congressional intent that the science education programs be

transferred intact. S. Rep. No. 96-49, 96th Cong., 1st Sess. 50 (1979)

The provisions of these final regulations are substantially the same as the provisions of the notice of proposed rulemaking (NPRM) published in the Federal Register on August 13, 1980. Interest persons were given 30 days to comment on the NPRM. Seven persons submitted comments which generally supported the provisions established in the notice.

The paragraphs below summarize the comments and the Secretary's response to them. The comments and responses are presented in the order of the sections to which they pertain. Changes have been made in the final regulations in response to the comments, in addition to the corrections of minor technical and typographical errors.

#### § 797.2 Eligible institutions.

**Comment.** Several commenters recommended expanding eligibility to receive grants under the program to include State educational agencies (SEAs), local educational agencies (LEAs), junior and community colleges, and teacher associations. One commenter suggested that the regulations be more specific on the rule of the LEAs in project planning.

**Response.** No change has been made. While the Secretary recognizes the effectiveness of SEAs, LEAs and other organizations in providing inservice teacher training, the Secretary views this program as an alternate form of continuing education for teachers which supplements other inservice efforts. During its initial administration by the Education Department, the program will retain the same general operating procedures which governed it previously at the National Science Foundation. No change is made to expand the eligible applicants to include LEAs, SEAs, and two-year colleges.

Many four year colleges and universities are active in pre-service teacher training. Their eligibility under this program strengthens the link between pre-service teacher training activities and the inservice training sponsored by this program. In addition, four year colleges and universities, but not two year institutions, can offer graduate credit to teachers, thereby providing an incentive for their participation. Since a further objective of the program is part to encourage cooperative relationships between scientists at colleges, universities and other eligible scientific institutions and preschool and elementary teachers. These institutions are essential to involve in the program.

With respect to the role of LEAs in project planning, § 797.31(f) stipulates that teachers and other appropriate individuals be consulted during the needs assessment phase of the project development. LEAs are encouraged to participate with eligible institutions in project planning. Local school systems may, and often do, initiate a project developed in conjunction with and sponsored by an eligible college or university, so the role of LEAs in the program is an important one.

#### § 797.4 Definitions that apply to the Pre-College Teacher Development in Science Program.

**Comment.** One commenter suggested that a definition of "elementary school teacher" be included in the regulations, while two other commenters requested clarification as to whether middle schools are considered part of elementary education.

**Response.** No change has been made. The provisions of the Education Division General Administrative Regulations (EDGAR) are applicable to the program. Section 77.1(c) of EDGAR allows each State to determine the scope of the term elementary education. This decision was considered preferable to imposing an inflexible Federal limitation on the eligible participants in the program. It is therefore impossible to provide a uniform definition of an elementary school teacher, or to determine whether middle schools fall within the scope of elementary education since grade levels of elementary education may vary from State to State. Applicants with questions concerning this issue are urged to contact the appropriate State educational agency for guidance.

A clarification has been made in the final regulations by adding preschool teachers to provisions regarding program scope and participants. While the proposed rule referred only to elementary school teachers, ED had no intention to exclude teachers of educational levels below the elementary level. Since Congress transferred responsibility for both the preschool and elementary school portion of the program to the Education Department, the final rule clarifies the full range of activities and participants under the program. (S. Rept. No. 96-326, 96th Cong. 1st Sess. 50 (1979).

#### § 797.10 What is the purpose of the program?

**Comment.** One commenter expressed concern that the regulations placed too much emphasis on knowledge of subject matter and instructional strategies, thereby ignoring the development of

science process and critical thinking skills.

*Response.* No change is needed. A broad definition of subject matter of science and mathematics is intended, including science processes and associated critical thinking skills, as well as science concepts and theories.

§ 797.31 *What selection criteria does the Secretary use?*

*Comment.* A commenter noted that while the preamble to the regulations stated that participating teachers are expected to carry out further inservice training of teacher colleagues in order to multiply the effect of the project, no provision for this was included in the regulations.

*Response.* No change has been made. While the Secretary encourages participating teachers to carry out further inservice training of their colleagues, the Secretary realizes the difficulty of evaluating the likelihood of achieving this objective. Therefore, while applicants are encouraged to develop plans to further the impact of the project, they will not be required to document these plans in their proposal. Further, the failure to include provisions for this in an application will not adversely affect the evaluation of an application.

*Comment.* One commenter suggested that the values assigned to the selection criteria be revised in order to emphasize the importance of training teachers to increase the participation of women, minorities, and the handicapped in science.

*Response.* No change has been made. Equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented in science is considered in Section 797.31 (a) and (b).

The purpose of the program, as stated in Section 797.10, is to promote the offering of quality science, mathematics, and social studies instruction to the Nation's elementary school students through inservice teacher training. To change the values of the selection criteria to emphasize the participation of traditionally underrepresented groups would be inconsistent with the purpose of the program, which is to serve all teachers.

*Comment.* One commenter asked whether the needs assessment requirement in Section 797.31(f) referred exclusively to surveys or whether surveys are given preference over other methods of identifying needs. The commenter suggested that if a survey must be used in order to receive maximum points under the criterion, this should be specified in the regulations.

*Response.* No change has been made. In order to provide applicants with maximum flexibility in meeting the requirements of the regulations, no single method of conducting a needs assessment is stipulated in the regulations.

Applicants may satisfy the requirements of this section in a variety of ways including but not limited to a formal survey of teachers and/or administrators, meeting with teachers and other school personnel, a review of the literature, etc.

A new section has been added to Subpart E—What Conditions Must Be Met by a Grantee?—to clarify the applicable provisions governing costs under this program. Section 797.41 references the section of the Education Division General Administration Regulations (EDGAR) which apply to the Pre-College Teacher Development in Science Program. The statement in the Guide for Preparation of Proposals and Project and Award Management concerning use of the indirect cost rate for educational training projects has been revised in accordance with this new section to permit use of the negotiated rate for projects funded under this program.

**CITATION OF LEGAL AUTHORITY:** A citation of statutory or other legal authority has been placed in parentheses on the line following each provision.

Dated: December 22, 1980.

(Catalog of Federal Domestic Assistance No. 84119, Pre-College Teacher Development in Science Program)

Shirley M. Hufstедler,  
Secretary of Education.

The Secretary adds a new Part 797 to Title 34 of the Code of Federal Regulations as follows:

## **PART 797—PRE-COLLEGE TEACHER DEVELOPMENT IN SCIENCE PROGRAM**

### **Subpart A—General**

- Sec.  
797.1 Description of the Pre-College Teacher Development in Science Program.  
797.2 Eligible institutions.  
797.3 Regulations that apply to the Pre-College Teacher Development in Science Program.  
797.4 Definitions that apply to the Pre-College Teacher Development in Science Program.

### **Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

- 797.10 What is the purpose of the program?  
797.11 What are the general characteristics of the projects?

797.12 What types of projects are supported?

### **Subpart C—How Does One Apply for a Grant? [Reserved]**

### **Subpart D—How Is a Grant Made?**

- 797.30 How does the Secretary evaluate an application?  
797.31 What selection criteria does the Secretary use?

### **Subpart E—What Conditions Must Be Met by a Grantee?**

- 797.40 Who may participate in the projects?  
797.41 What cost principles apply to this program?

Authority: Pub. L. 81-507; Pub. L. 94-378; Pub. L. 96-88; 42 U.S.C. 1862; 20 U.S.C. 3444.

### **Subpart A—General**

#### **§ 797.1 Description of Pre-College Teacher Development in Science Program.**

The Pre-College Teacher Development in Science Program offers continuing education in science, to provide inservice training for preschool and elementary school teachers.

(42 U.S.C. 1862)

#### **§ 797.2 Eligible institutions.**

The following institutions are eligible to receive grants:

(a) Institutions of higher education that offer at least a baccalaureate degree in science.

(b) Nonprofit private, non-academic institutions having both the scientific research staff and the facilities necessary to provide a quality science education program for pre-college teachers. This may include institutions such as, scientific research laboratories, field stations, museums, or planetariums.

(42 U.S.C. 1862)

#### **§ 797.3 Regulations that apply to the Pre-College Teacher Development in Science Program.**

The following regulations apply to the Pre-College Teacher Development in Science Program:

(a) The Education Division General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs) and 34 CFR Part 77 (General).

(b) The regulations in this Part 797.  
(42 U.S.C. 1862; 20 U.S.C. 3444)

#### **§ 797.4 Definitions that apply to the Pre-College Teacher Development in Science Program.**

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77:

Applicant	Fiscal year
Application	Nonprofit
Award	Preschool
Department	Project
Elementary school	Secretary

(20 U.S.C. 1221e-3(a)(1))

(b) *Definitions that apply to this Part.*  
The following definitions apply to this part:

"Science" means the mathematical, biological, physical, engineering, and social sciences.

(42 U.S.C. 1862)

#### Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

##### § 797.10 What is the purpose of the program?

The major objective of the Pre-College Teacher Development in Science Program is to promote the offering of quality science, social sciences, mathematics, and engineering instruction to the Nation's preschool and elementary school students. This is accomplished by—

(a) Improving preschool and elementary school teachers' knowledge of the subject matter of science and mathematics and their awareness of accompanying appropriate instructional strategies;

(b) Developing and maintaining cooperation and communication between preschool and elementary school teachers and scientists at institutions of higher education and certain other scientific institutions.

(c) Aiding teachers in the identification and use of resources which are appropriate to their level of instruction, and which will aid in their teaching of scientific concepts.

(42 U.S.C. 1862)

##### § 797.11 What are the general characteristics of the projects?

(a) Projects supported in this program may involve a group of preschool and elementary school teachers engaged in a learning experience sponsored by the grantee institution and staffed by its faculty members or others selected for their expertise.

(b) Project staff site visits for individual consultation, with participants and group meetings devoted to classroom teaching strategies may be used to augment the instructional phase.

(c) Consistent with the needs of an identified group of teachers, projects provide: (1) instruction on general concepts of science and mathematics, (2) instruction on basic elements and concepts of a particular discipline, or (3) more advanced training in specific disciplines. The instruction may also illustrate appropriate materials and instructional teaching strategies for classroom use, as well as local

resources that are applicable to classroom instruction.

(42 U.S.C. 1862)

##### § 797.12 What types of projects are supported?

The types of projects supported under this program include but are not limited to:

(a) Academic Year Seminars—Part-time study offered at a central location for teachers within commuting distance, with sessions during the academic year.

(b) Summer Seminars—Part-time study offered during the summer at a central location for teachers within commuting distance with follow-up sessions during the academic year.

(c) Summer Workshops—Full-time projects offered during the summer, generally for 1 to 4 weeks. These projects normally will be regional and intended for more advanced training in specific disciplines. A limited follow-up activity may take place during the academic year.

(42 U.S.C. 1862)

#### Subpart C—How Does One Apply for a Grant? [Reserved]

#### Subpart D—How Is a Grant Made?

##### § 797.30 How does the Secretary evaluate an application?

(a) The Secretary evaluates each application on the basis of the criteria in § 797.31.

(b) The Secretary assigns a maximum of 70 points that an application may receive under all the criteria.

(c) Each criterion is evaluated using a scale of 1-7.

(d) The weight assigned to each complete criterion is indicated in parenthesis following each criterion.

(e) For applications of substantially equal quality, the Secretary gives priority to projects that, nationwide, contribute to achieving overall balance among projects funded under this program in the following categories:

- (1) Grade level.
- (2) Academic discipline.
- (3) Institutional type.
- (4) Geographic location.

(42 U.S.C. 1862; 20 U.S.C. 1221e-3(a)(1))

##### § 797.31 What selection criteria does the Secretary use?

(a) *Plan of operation.* (10 percent)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(b) *Quality of key personnel.* (10 percent)

(1) The Secretary reviews each application for information that shows the quality of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section plans to commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as members of racial or ethnic minority groups, women, and handicapped persons.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (5 percent)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to be objectives of the project.

(d) *Evaluation plan.* (5 percent)

(1) The Secretary reviews each application for information that shows

the quality of the evaluation plan for the project. (See 34 CFR 75.590—Evaluation by the grantee.)

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (10 percent)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and  
(ii) The equipment and supplies that the applicant plans to use are adequate.  
(iii) Evidence is presented of long term support and institutional commitment to pre-college science education from the host institution. (20 U.S.C. 1221(e)-3(a)(1))

(f) *Need for the project.* (20 percent)

(1) The Secretary reviews each application for information that shows a well-established need for the project.

(2) The Secretary looks for information that shows—

(i) An adequate needs assessment has been carried out;  
(ii) Appropriate individuals, especially representative teachers, have been consulted in the needs assessment; and  
(iii) Instructional needs have been clearly identified and stated.

(g) *Cooperative relationships.* (10 percent)

(1) The Secretary reviews each application for information that shows the extent to which cooperative teaching relationships will be established between preschool and elementary teachers and college and university faculty or other scientists.

(2) The Secretary looks for information that shows the extent to which the project will advance the long-term program objective of promoting useful relationships between preschool and elementary science teachers and college and university or other scientists beyond the term of the grant.

(h) *Subject matter emphasis.* (20 percent)

(1) The Secretary reviews each application for information that shows the extent to which subject matter in science is emphasized.

(2) The Secretary looks for information that shows—

(i) The extent to which a central focus on science curriculum is intergrated with appropriate teaching strategies; and  
(ii) The appropriateness of the content for the designated teacher group.

(i) *Participant selection.* (10 percent)

(1) The Secretary reviews each application for information that shows the appropriateness of the participant selection process.

(2) The Secretary looks for information that shows—

(i) Adequacy of plans to recruit participants; and  
(ii) Suitability of participant evaluation and selection procedures.

(42 U.S.C. 1862)

#### Subpart E—What Conditions Must Be Met by a Grantee?

##### § 797.40. Who may participate in the projects?

(a) The program is designed for the continuing education of preschool and elementary school teachers.

(b) Other school leaders such as principals, assistant superintendents, or resource teachers, may team with one or two teachers to represent a school or system.

(42 U.S.C. 1862)

##### § 797.41 What cost principles apply to this program?

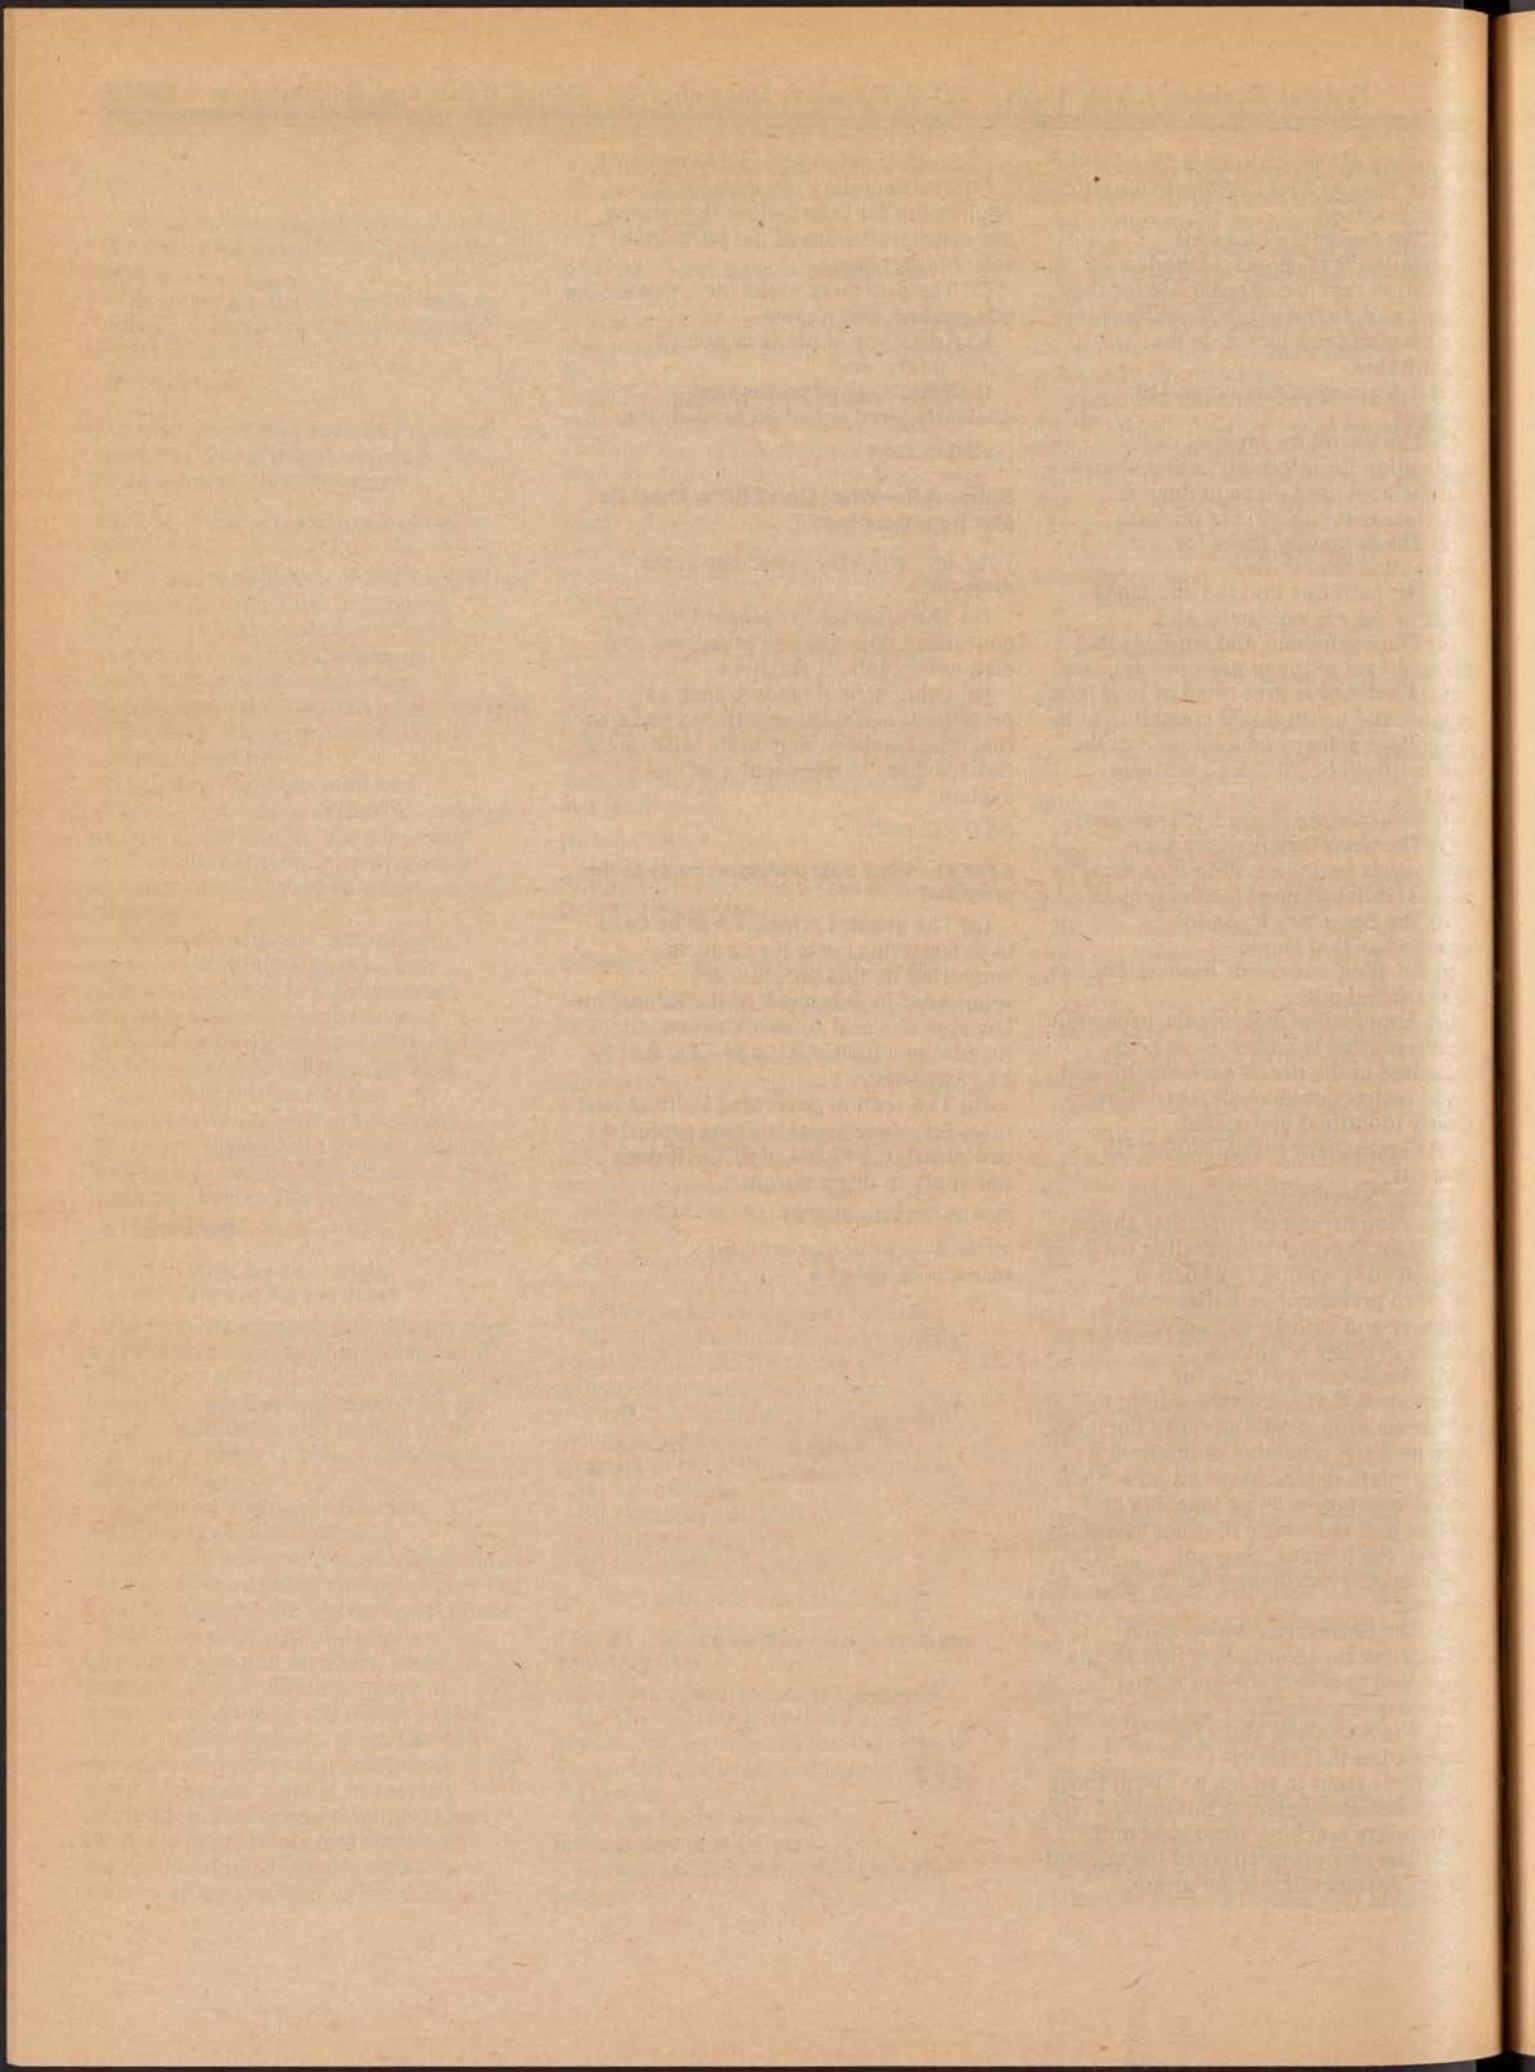

(a) The general principles to be used in determining costs for projects supported by this program are referenced in Subpart E of the Education Division General Administration Regulations (EDGAR) in 34 CFR Part 75 §§ 75.530-568.

(b) The section governing indirect cost rates for educational training projects contained in § 75.562 of EDGAR does not apply to this program.

(20 U.S.C. 1221e-3(a)(1))

Rehabilitation Training; Final Rules With  
Invitation To Comment

**DEPARTMENT OF EDUCATION****34 CFR Parts 385, 386, 387, 388, 389, and 390****Rehabilitation Training: Final Regulations With Invitation To Comment****AGENCY:** Department of Education.**ACTION:** Final regulations with invitation to comment.

**SUMMARY:** The Secretary adopts regulations for the purpose of implementing the Rehabilitation Act of 1973, as amended by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Pub. L. 95-602). These regulations include the requirements for Rehabilitation Long-Term Training, Experimental and Innovative Training, State Vocational Rehabilitation Unit In-Service Training, Rehabilitation Continuing Education Programs, and Rehabilitation Short-Term Training.

**DATE:** These regulations are expected to be effective forty-five days after they are transmitted to Congress. Regulations are usually transmitted to Congress several days before they are published in the *Federal Register*. The effective date is changed if the Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

**DATES:** Comments must be received on or before March 2, 1981.

**ADDRESS:** Comments should be addressed to Harold F. Shay, Director, Division of Manpower Development, Rehabilitation Services Administration, Office of Special Education and Rehabilitative Services, Department of Education, Room 3321, Mary E. Switzer Building, 330 C Street, SW., Washington, D.C. 20201, Telephone: (202) 245-0079 or TTY (202) 245-0591.

**SUPPLEMENTARY INFORMATION:****Waiver of Proposed Rulemaking Procedures Affecting Selection Criteria**

The Secretary of Health, Education, and Welfare published a Notice of Proposed Rulemaking in the *Federal Register* on November 29, 1979 that covered all new vocational rehabilitation and independent living rehabilitation authorities contained in the Rehabilitation, Comprehensive Services and Developmental Disabilities Amendments of 1978 (Pub. L. 95-602). Proposed regulations for the Rehabilitation Training Program were included in this Notice of Proposed Rulemaking.

On May 4, 1980, the Department of Education was established and the

Rehabilitation Services Administration became part of the Office of Special Education and Rehabilitative Services within this new Department. As a result, the publication of regulations under the Rehabilitation Act of 1973, as amended, is now subject to the provisions of Section 431 of the General Education Provisions Act and other requirements in effect in the Department of Education. It has become necessary therefore to revise the proposed regulations for the Rehabilitation Training Program in order to make them conform with requirements affecting Department of Education programs, including the selection criteria to be used in the evaluation of applications submitted for grant assistance. These selection criteria had not been included in the previously published Notice of Proposed Rulemaking.

In accordance with Section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)), it is the practice of the Department of Education to offer interested parties the opportunity to comment on all proposed regulations, including the selection criteria to be used in discretionary grant programs such as the Rehabilitation Training Program. The publication of an additional proposed rulemaking covering the selection criteria for this program would be impracticable and contrary to the public interest under 5 U.S.C. 553(b) if grants are to be made in a timely manner in FY 1981, however, and the selection criteria are therefore being published as final regulations in this document.

Although the selection criteria for the Rehabilitation Training Program have been previously identified in Application Notices published in the *Federal Register*, it is recognized that there has not been an opportunity for the public to comment specifically on their appropriateness for these programs. Interested parties are invited therefore to submit comments and suggestions on the selection criteria to be used in the awarding of grants in future fiscal years. All comments and suggestions must be received no later than March 2, 1981.

**Summary of Changes**

Some comments were received in response to the Notice of Proposed Rulemaking provisions covering the Rehabilitation Training Program and changes are also being made in these revised regulations in response to these comments. A Summary of Comments and Responses to the proposed regulations is included in Appendix A.

The Notice of Proposed Rulemaking had included proposed regulations for

the Rehabilitation Research Fellowship Program. Regulations for the Rehabilitation Research Fellowship Program are not included in these interim regulations since the National Institute of Handicapped Research has announced that it will be administering a Rehabilitation Research Fellowship Program in the future and, as a result, the Rehabilitation Services Administration will no longer be awarding Rehabilitation Research Fellowships.

**References to EDGAR**

Readers will note that reference to the Education Division General Administrative Regulations (EDGAR) cite Title 34 of the Code of Federal Regulations. EDGAR was transferred to Title 34 through final regulations published in the *Federal Register* on November 21, 1980 (45 FR 77368).

However, EDGAR was initially published in the *Federal Register* on April 3, 1980 (45 FR 22494) under Title 45 of the Code of Federal Regulations (CFR). For readers wishing to refer to that EDGAR document, the following cross-references will be helpful:

- 45 CFR Part 74 is now 34 CFR Part 74.
- 45 CFR Part 100a is now 34 CFR Part 75.
- 45 CFR Part 100b is now 34 CFR Part 76.
- 45 CFR Part 100c is now 34 CFR Part 77.

**Invitation To Comment**

Interested persons are invited to submit comments and recommendations regarding these regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before March 2, 1981 will be considered in any future revisions of the final regulations.

All comments submitted in response to these final regulations will be available for public inspection during and after the comment period in Room 3321, Mary E. Switzer Building, 330 C Street, S.W., Washington, D.C. between 8:30 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

The Department also requests comments on whether the regulations in this document would require submission of information that is already being gathered by or is available from any other agency or authority of the United States.

**Citation of Legal Authority**

A citation of statutory authority is placed in parentheses on the line following each substantive provision of the interim regulations. The first citation

is the appropriate section of the Rehabilitation Act of 1973, as amended, and it is followed by a citation to the same provision in the United States Code.

Dated: December 22, 1980.

Shirley M. Hufstедler,  
Secretary of Education.

(Catalog of Federal Domestic Assistance Program Number 84.129 Rehabilitation Training)

Accordingly, the Secretary amends Title 34 of the Code of Federal Regulations by adding 34 Part 385 to read as follows:

## PART 385—REHABILITATION TRAINING

### Subpart A—General

Sec.

385.1 What is the Rehabilitation Training Program?

385.2 Who is eligible for assistance under these programs?

385.3 What regulations apply to these programs?

385.4 What definitions apply to these programs?

### Subpart B—[Reserved]

### Subpart C—How Does One Apply For a Grant?

385.20 What are the application procedures for these programs?

### Subpart D—How Does the Secretary Make a Grant?

385.30 [Reserved]

385.31 How does the Secretary evaluate an application?

385.32 What general selection criteria does the Secretary use in reviewing an application?

385.33 What other factors does the Secretary consider in reviewing an application?

### Subpart E—What Conditions Must Be Met by a Grantee?

385.40 What are the requirements pertaining to the membership of a project advisory committee?

385.41 What are the requirements affecting the collection of data from State agencies?

385.42 What are the requirements affecting the dissemination of training materials?

Authority: Secs. 12(c), 304 and 306, Rehabilitation Act of 1973, as amended [29 U.S.C. 711(c), 744 and 776]

### Subpart A—General

#### § 385.1 What is the Rehabilitation Training Program?

(a) The Rehabilitation Training Program is designed to—

(1) Increase the supply of personnel available for employment in public and private agencies and institutions involved in the vocational rehabilitation

and independent living rehabilitation of physically and mentally handicapped individuals, especially those individuals with the most severe handicaps; and

(2) Maintain and upgrade basic skills and knowledge of personnel employed as providers of vocational, medical, social or psychological rehabilitation services.

(b) The Secretary awards financial assistance through five categories of training programs—

(1) Rehabilitation Long-Term Training (Part 386);

(2) Experimental and Innovative Training (Part 387);

(3) State Vocational Rehabilitation Unit In-Service Training (Part 388);

(4) Rehabilitation Continuing Education Programs (Part 389); and

(5) Rehabilitation Short-Term Training (Part 390).

(Section 304 of the Act; 29 U.S.C. 774)

#### § 385.2 Who is eligible for assistance under these programs?

State agencies and other public or nonprofit agencies and organizations, including institutions of higher education, are eligible for assistance under the Rehabilitation Training Program.

(Section 304 of the Act; 29 U.S.C. 774)

#### § 385.3 What regulations apply to these programs?

The following regulations apply to the Rehabilitation Training Program—

(a) The Education Division General Administrative Regulations (EDGAR) in 34 CFR Part 75 (Direct Grant Programs);

(b) The regulations in EDGAR, 34 CFR Part 77 (General);

(c) The regulations in this Part 385; and

(d) The regulations in Parts 386, 387, 388, 389, and 390, as appropriate.

(Sections 12(c) and 304 of the Act; 29 U.S.C. 711(c) and 774)

#### § 385.4 What definitions apply to these programs?

(a) The following definitions in 34 CFR Part 77 apply to the programs under the Rehabilitation Training Program—

"Applicant"

"Application"

"Award"

"Budget Period"

"Department"

"EDGAR"

"Nonprofit"

"Private"

"Project"

"Project Period"

"Public"

"Secretary"

(Section 12(c) of the Act; 29 U.S.C. 711(c))

(b) The following definitions also apply to programs under the Rehabilitation Training program—

"Act" means the Rehabilitation Act of 1973 (29 U.S.C. 701 et seq.) as amended by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978 (Pub. L. 95-602).

(Section 12(c) of the Act; 29 U.S.C. 711(c))

"Handicapped individual" means an individual—

(1) Who has a physical or mental disability which for that individual constitutes or results in a substantial handicap to employment; and

(2) Who can reasonably be expected to benefit in terms of employability from the provision of vocational rehabilitation services, or for whom an extended evaluation of vocational rehabilitation potential is necessary to determine whether he or she might reasonably be expected to benefit in terms of employability from the provision of vocational rehabilitation services.

(Section 7(7)(A) of the Act; 29 U.S.C. 706(7)(A))

"Independent living rehabilitation services" or "independent living services means."

(1) Counseling services, including psychological counseling, psychotherapeutic counseling, peer counseling, advocacy services and related services;

(2) Housing incidental to the provision of any independent living rehabilitation services, and including appropriate accommodations to, and modifications of any space utilized to serve severely handicapped individuals;

(3) Physical and mental restoration services;

(4) Attendant care;

(5) Transportation;

(6) Interpreter services for deaf individuals, including tactile interpretation for deaf-blind individuals;

(7) Reading services, rehabilitation teaching services, and orientation and mobility services for blind individuals;

(8) Recreational activities;

(9) Services to members of a severely handicapped individual's family when necessary for improving the individual's ability to engage or continue in employment;

(10) Vocational and other training services, including personal and vocational adjustment when necessary for improving a severely handicapped individual's ability to live and function more independently, or to engage or continue in employment;

(11) Job placement services;

(12) Referral services;

(13) Telecommunications, sensory and other technological aids and devices;

(14) Services for children of pre-school age including physical therapy, development of language and communication skills, and child development services;

(15) Any other vocational rehabilitation services available under the State plan for vocational rehabilitation services which are appropriate to the independent living rehabilitation needs of a severely handicapped individual; and

(16) Any appropriate preventive services necessary to decrease the future needs of a severely handicapped individual.

(Section 702(b) of the Act; 29 U.S.C. 796(b))

"Physical or mental disability" means a physical or mental condition which materially limits, contributes to limiting or, if not corrected, will probably result in limiting an individual's employment activities or vocational functioning.

(Section 7(7)(a)(i) of the Act; 29 U.S.C. 706(7)(A)(i))

"Physical and mental restoration services means—

(1) Medical or corrective surgical treatment;

(2) Diagnosis and treatment for mental or emotional disorders by a physician skilled in the diagnosis and treatment of such disorders or by a psychologist licensed or certified in accordance with State laws and regulations;

(3) Dentistry;

(4) Nursing services;

(5) Necessary hospitalization (either inpatient or outpatient care) in connection with surgery or treatment and clinic services;

(6) Convalescent or nursing home care;

(7) Drugs and supplies;

(8) Prosthetic, orthotic or other assistive devices including hearing aids, essential to obtaining or retaining employment;

(9) Eyeglasses and visual services, including visual training, and the examination and services necessary for the prescription and provision of eyeglasses, contact lenses, microscopic lenses, telescopic lenses, and other special visual aids, prescribed by a physician skilled in diseases of the eye or by an optometrist, whichever the individual may select;

(10) Podiatry;

(11) Physical therapy;

(12) Speech or hearing therapy;

(13) Psychological services;

(14) Therapeutic recreation services;

(15) Medical or medically related social work services;

(16) Treatment of either acute or chronic medical complications and emergencies which are associated with or arise out of the provision of physical and mental restoration services; or which are inherent in the condition under treatment;

(17) Special services for the treatment of individuals suffering from end-stage renal disease, including transplantation, dialysis, artificial kidneys, and supplies; and

(18) Other medical or medically related rehabilitation services including art therapy, dance therapy, music therapy and psychodrama.

(Section 103(a)(4) of the Act; 29 U.S.C. 723(a)(4))

"State agency" means the sole State agency designated to administer (or supervise local administration of) the State plan for vocational rehabilitation services. The term includes the State agency for the blind, if designated as the sole State agency with respect to that part of the plan relating to the vocational rehabilitation of blind individuals.

(Section 101(a)(1)(A) of the Act; 29 U.S.C. 721(a)(1)(A))

"State unit" or "State vocational rehabilitation unit" means either—

(1) The State agency vocational rehabilitation bureau, division, or other organizational unit which is primarily concerned with vocational rehabilitation or vocational and other rehabilitation of handicapped individuals and which is responsible for the administration of the vocational rehabilitation program of the State agency; or

(2) The independent State commission, board, or other agency which has vocational rehabilitation, or vocational and other rehabilitation as its primary function.

(Section 7(3) of the Act; 29 U.S.C. 706(3))

"Stipend" means financial assistance on behalf of individuals in support of their training, as opposed to salary payment for services provided within the project.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

"Vocational rehabilitation services" means—

(1) Evaluation of vocational rehabilitation potential, including diagnostic and related services incidental to the determination of eligibility for, and the nature and scope of services to be provided;

(2) Counseling and guidance, including personal adjustment counseling, to maintain a counseling relationship throughout a handicapped individual's program of services, and referral

necessary to help handicapped individuals secure needed services from other agencies;

(3) Physical and mental restoration services; necessary to correct or substantially modify a physical or mental condition which is stable or slowly progressive;

(4) Vocational and other training services, including personal and vocational adjustment, books, tools, and other training materials;

(5) Maintenance;

(6) Transportation;

(7) Services to members of a handicapped individual's family when necessary to the vocational rehabilitation of the handicapped individual;

(8) Interpreter services for the deaf, including tactile interpreting for deaf-blind individuals;

(9) Reader services, rehabilitation teaching services, and orientation and mobility services for the blind;

(10) Telecommunications, sensory and other technological aids and devices;

(11) Recruitment and training services to provide new employment opportunities in the fields of rehabilitation, health, welfare, public safety, law enforcement and other appropriate public service employment;

(12) Placement in suitable employment;

(13) Post-employment services necessary to maintain suitable employment;

(14) Occupational licenses; and

(15) Other goods and services which can reasonably be expected to benefit a handicapped individual in terms of employability.

(Section 103(a) of the Act; 29 U.S.C. 723(a))

## Subpart B—[Reserved]

## Subpart C—How Does One Apply for a Grant?

### § 385.20 What are the application procedures for these programs?

The Secretary gives the State vocational rehabilitation unit an opportunity to review and comment on applications submitted from within the State that it serves. The procedures to be followed by the applicant and the State are in EDGAR §§ 75.155-75.159.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

## Subpart D—How Does the Secretary Make a Grant?

### § 385.30 [Reserved]

### § 385.31 How does the Secretary evaluate an application?

(a) The Secretary evaluates each application on the basis of general

selection criteria identified in § 385.32 and specific selection criteria identified in Parts 386, 387, 388, 389 and 390. The maximum possible score for each complete criterion under each category of training is stated in parentheses in § 386.31, § 387.31, § 388.31, § 389.31, and § 390.31. The number of points awarded each criterion depends on how well the application meets all the elements under that criterion.

(b) The Secretary awards up to 100 possible points for these selection criteria.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**§ 385.32 What general selection criteria does the Secretary use in reviewing an application?**

(a) *Plan of operation.* (1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Handicapped persons;

(B) The elderly;

(C) Women; and

(D) Members of racial or ethnic minority groups.

(b) *Quality of key personnel.* (1) The Secretary reviews each application for information that shows the quality of key personnel proposed for the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Handicapped persons;

(B) The elderly;

(C) Women; and

(D) Members of racial or ethnic minority groups.

(3) To determine personnel qualifications, the Secretary considers experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities;

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (1) *The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.*

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project, and to the extent possible, are objective, and produce data that are quantifiable.

(e) *Adequacy of resources.* (1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the application plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(Sections 12(c) and 304 of the Act; 29 U.S.C. 711(c) and 774)

**§ 385.33 What other factors does the Secretary consider in reviewing an application?**

In addition to the selection criteria listed in § 385.32 and Parts 386 through 390, the Secretary, in making awards under this program, considers such factors as—

(a) The geographical distribution of projects in each Rehabilitation Training Program category throughout the country; and

(b) The past performance of the applicant in carrying out similar training activities under previously awarded grants, as indicated by such factors as compliance with grant conditions, soundness of programmatic and financial management practices and attainment of established project objectives.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**Subpart E—What Conditions Must Be Met by a Grantee?**

**§ 385.40 What are the requirements pertaining to the membership of a project advisory committee?**

When a project funded under Parts 386 through 390 establishes an advisory committee, its membership must include handicapped persons or other representatives of handicapped individuals, trainees, and providers of vocational rehabilitation and independent living rehabilitation services.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**§ 385.41 What are the requirements affecting the collection of data from State agencies?**

When the collection of data is necessary from handicapped individuals being served by two or more State agencies or from employees of two or more of these agencies, the project director must submit requests for the data to appropriate representatives of the affected agencies, as determined by the Secretary. This requirement also applies to employed project staff and individuals enrolled in courses of study supported under these programs.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**§ 385.42 What are the requirements affecting the dissemination of training materials?**

A set of any training materials developed under the Rehabilitation Training Program must be submitted to any information clearinghouse designated by the Secretary.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

The Secretary amends Title 34 of the Code of Federal Regulations by redesignating Subpart E of Part 362 as 34 CFR Part 386 and revises the regulations to read as follows:

**PART 386—REHABILITATION TRAINING: REHABILITATION LONG-TERM TRAINING**

**Subpart A—General**

Sec.

386.1 What is the Rehabilitation Long-Term Training Program?

386.2 Who is eligible for assistance under this program?

386.3 What regulations apply to this program?

386.4 What definitions apply to this program?

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

386.10 What types of projects are authorized under this program?

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?**

386.30 What selection criteria are used under this program?

**Subpart E—What Conditions Must Be Met by a Grantee?**

386.40 What are the matching requirements?

386.41 What are allowable costs?

386.42 What are the special requirements affecting the awarding of traineeships?

Authority: Secs. 12(c) and 304, Rehabilitation Act of 1973 (29 U.S.C. 711(c) and 774).

**Subpart A—General****§ 386.1 What is the Rehabilitation Long-Term Training Program?**

This program is designed to provide a balanced program of academic and non-academic training activities in the fields of—

- (a) rehabilitation medicine;
  - (b) rehabilitation nursing;
  - (c) rehabilitation counseling;
  - (d) rehabilitation social work;
  - (e) rehabilitation psychiatry;
  - (f) rehabilitation psychology;
  - (g) physical therapy;
  - (h) occupational therapy;
  - (i) speech-language pathology and audiology;
  - (j) rehabilitation facility administration;
  - (k) vocational evaluation and work adjustment;
  - (l) prosthetics and orthotic;
  - (m) rehabilitation of the blind;
  - (n) rehabilitation of the deaf;
  - (o) rehabilitation of the mentally ill;
  - (p) rehabilitation job placement and job development;
  - (q) therapeutic recreation;
  - (r) undergraduate education in the rehabilitation services;
  - (s) rehabilitation administration;
  - (t) rehabilitation dentistry; and
  - (u) other fields that contribute to the rehabilitation of handicapped individuals, including homebound and institutionalized individuals and individuals with limited English-speaking ability.
- (Section 304(b) of the Act; 29 U.S.C. 774(b))

**§ 386.2 Who is eligible for assistance under this program?**

Those agencies and organizations eligible for assistance under this program are described in 34 CFR § 385.2. (Section 304(a) of the Act; 29 U.S.C. 774(a))

**§ 386.3 What regulations apply to this program?**

The following regulations apply to this program:

- (a) 34 CFR Part 385 (Rehabilitation Training); and
- (b) The regulations in this Part 386. (Section 304 of the Act; 29 U.S.C. 774)

**§ 386.4 What definitions apply to this program?**

The definitions in 34 CFR Part 385 apply to this program.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?****§ 386.10 What types of projects are authorized under this program?**

The Rehabilitation Long-Term Training Program provides financial assistance for—

(a) Projects that provide basic or advanced training leading to an academic degree in one of those fields of study identified in § 386.1.

(b) Projects that provide a number of interrelated training activities designed to improve the professional competence of employed rehabilitation workers in one of those fields of study identified in § 386.1 but not directly related to the awarding of an academic degree.

(c) Projects that provide undergraduate medical students an orientation to the concepts and techniques of rehabilitation medicine.

(d) Projects that provide support for medical residents enrolled in residency training programs in the specialty of physical medicine and rehabilitation. (Section 304(b) of the Act; 29 U.S.C. 774(b))

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make A Grant?****§ 386.30 What selection criteria are used under this program?**

(a) *Plan of operation.* (30 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(a).

(b) *Quality of key personnel.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(b).

(c) *Budget and cost effectiveness.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(c).

(d) *Evaluation plan.* (5 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(d).

(e) *Adequacy of resources.* (5 points)

The Secretary evaluates each application on the basis of criterion in § 385.32(e).

(f) *Evidence of need.* (10 points)

(1) The Secretary reviews each application for information that shows

that the need for the training project has been adequately justified.

(2) The Secretary looks for information that shows that the need for the training project has been established in terms of rehabilitation manpower supply and demand and includes an assessment of the potential of existing programs within the geographical area to meet the employment needs in the specific rehabilitation field for which grant support is sought.

(g) *Relevance to State-Federal rehabilitation service program.* (10 points)

(1) The Secretary reviews each application for information that shows that the proposed project appropriately relates to the mission of the State/Federal rehabilitation service program.

(2) The Secretary looks for information that shows that the project can be expected either to increase the supply of trained personnel available to State and other public or nonprofit agencies involved in the rehabilitation of physically or mentally handicapped individuals, or to maintain and improve the skills and quality of professional personnel in the rehabilitation field in which the training is to be provided.

(h) *Nature and scope of curriculum.* (20 points)

(1) The Secretary reviews each application for information that demonstrates the adequacy of the proposed curriculum.

(2) The Secretary looks for information that shows—

(i) The scope and nature of the coursework reflect content that can be expected to enable the achievement of the established project objectives;

(ii) The curriculum and teaching methods provide for an integration of theory and practice relevant to the educational objectives of the program;

(iii) There is evidence of educationally focused practical and other field experiences in settings that assure student involvement in the provision of vocational rehabilitation or independent living rehabilitation services to physically and mentally handicapped persons, especially those who are severely handicapped;

(iv) The didactic coursework includes student exposure to vocational rehabilitation or independent living rehabilitation processes, concepts, programs, and services; and

(v) There is evidence of current professional accreditation by the designated accrediting agency in the professional field in which grant support is being requested.

(Sections 12(c) and 304 of the Act; 29 U.S.C. 711(c) and 774)

**Subpart E—What Conditions Must Be Met by a Grantee?****§ 386.40 What are the matching requirements?**

(a) A grantee must contribute to the cost of a project under this program in an amount satisfactory to the Secretary. The part of the costs to be borne by the grantee is determined by the Secretary at the time of the award.

(b) The grantee is expected to furnish as large a part of the total project cost as possible. In the case of academic training projects with a multi-year project period, the grantee's share of the teaching costs is expected to increase progressively in each succeeding year so that total personnel costs are fully absorbed by the grantee at the termination of the project period.

(Sec. 12(c) and 304 of the Act; 29 U.S.C. 711(c) and 774 (a))

**§ 386.41 What are allowable costs?**

In addition to those allowable costs established in EDGAR §§ 75.530-75.562, the following items are allowable under long-term training projects.

- (a) Student stipends;
- (b) Tuition and fees; and
- (c) Student travel in conjunction with training assignments.

(Sec. 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774 (a))

**§ 386.42 What are the special requirements affecting the awarding of traineeships?**

(a) A candidate for a rehabilitation traineeship must—

(1) Be a citizen of the United States or a foreign national lawfully admitted to the United States for permanent residence;

(2) Take the training at the educational institution or agency designated in the traineeship award;

(3) Not be an employee of the Federal government;

(4) Not concurrently receiving educational allowances from any other Federal, State or local public or voluntary agency when that allowance is conditioned on a conflicting employment obligation incurred by the trainee, except for federally assisted student loans, or educational allowances or benefits payable under Chapters 34, 35 and 36 of Title 38, U.S.C. as limited by Section 213 of the Veterans Educational and Training Amendments Act of 1972, or educational allowances or benefits payable under any State or local program;

(5) Be enrolled for non-academic study in the grantee institution;

(6) Express interest in a career in clinical practice, administration,

supervision, teaching, or research in the vocational rehabilitation or independent living rehabilitation of physically or mentally handicapped persons, especially those with the most severe handicaps; and

(7) Indicate an expectation to seek employment in a State vocational rehabilitation agency or in another rehabilitation agency or facility from which the State agency secures services.

(b) No training or instruction may be provided to an individual for any one course of study extending for a period in excess of four years.

(Sections 12(c) and 304(b) of the Act; 29 U.S.C. 711(c) and 774 (b))

The Secretary amends Title 34 of the Code of Federal Regulations by adding 34 CFR Part 387 to read as follows:

**PART 387—EXPERIMENTAL AND INNOVATIVE TRAINING****Subpart A—General**

Sec.

387.1 What is the Experimental and Innovative Training Program?

387.2 Who is eligible for assistance under this program?

387.3 What regulations apply to this program?

387.4 What definitions apply to this program?

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

387.10 What types of projects are authorized under this program?

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?**

387.30 What selection criteria are used under this program?

**Subpart E—What Conditions Must Be Met by a Grantee?**

387.40 What are the matching requirements?

387.41 What are the allowable costs?

Authority: Sections 12(c) and 304 of the Rehabilitation Act of 1973 (29 U.S.C. 711(c) and 774).

**Subpart A—General****§ 387.1 What is the Experimental and Innovative Training Program?**

This program is designed—

(a) To develop new types of rehabilitation personnel, and to demonstrate the effectiveness of these new types of personnel in providing rehabilitation services to severely handicapped persons; and

(b) To develop new and improved methods of training rehabilitation personnel so that there may be a more effective delivery of rehabilitation

services by State and other rehabilitation agencies.

(Section 304 of the Act; 29 U.S.C. 774)

**§ 387.2 Who is eligible for assistance under this program?**

Those agencies and organizations eligible for assistance under this program are described in 34 CFR § 385.2.

(Section 304(a) of the Act; 29 U.S.C. 774(a))

**§ 387.3 What regulations apply to this program?**

(a) 34 CFR Part 385 (Rehabilitation Training); and

(b) The regulations in this Part 387. (Section 304 of the Act; 29 U.S.C. 774)

**§ 387.4 What definitions apply to this program?**

The definitions in 34 CFR Part 385 apply to this program.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?****§ 387.10 What types of projects are authorized under this program?**

The Experimental and Innovative Training Program supports time-limited pilot projects through which new types of rehabilitation workers may be trained or through which innovative methods of training rehabilitation workers may be demonstrated.

(Section 304(b) of the Act; 29 U.S.C. 744(b))

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?****§ 387.30 What selection criteria are used under this program?**

(a) *Plan of operation.* (25 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(a).

(b) *Quality of key personnel.* (15 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(b).

(c) *Budget and cost effectiveness.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(c).

(d) *Evaluation plan.* (15 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(d).

(e) *Adequacy of resources.* (5 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(e).

(f) *Evidence of need.* (10 points)

The Secretary reviews each application for information that shows that the need for the training project has been adequately justified.

(2) The Secretary looks for information that shows that—

(i) The proposed project represents an experimental or innovative approach to the training of rehabilitation workers and provides for the training of new types of rehabilitation workers or the development of innovative training methodologies; and

(ii) The need for the training program has been justified and includes an assessment of the potential of existing training programs of a traditional nature to meet the personnel needs in the rehabilitation field for which support is sought.

(g) *Relevance to State-Federal rehabilitation service program.* (10 points)

(1) The Secretary reviews each application for information that shows that the proposed project appropriately relates to the mission of the State-Federal rehabilitation service program.

(2) The Secretary looks for information that shows that the project can be expected either to increase the supply of trained personnel available to public and private agencies involved in the rehabilitation of physically or mentally handicapped individuals or maintain and improve the skills and quality of rehabilitation workers.

(h) *Nature and scope of curriculum.* (10 points)

(1) The Secretary reviews each application for information that demonstrates the adequacy and scope of the proposed curriculum.

(2) The Secretary looks for information that shows that—

(i) The scope and nature of the training content can be expected to enable the achievement of the established project objectives of the training project;

(ii) The curriculum and teaching methods provide for an integration of theory and practice relevant to the educational objectives of the program;

(iii) There is evidence of educationally focused practicum or other field experiences in settings that assure student involvement in the provision of vocational rehabilitation or independent living rehabilitation services to physically and mentally handicapped persons, especially those who are severely handicapped; and

(iv) The didactic coursework includes student exposure to vocational rehabilitation or independent living rehabilitation processes, concepts, programs, and services.

(Section 12(c) and 304 of the Act; 29 U.S.C. 711(c) and 774)

#### Subpart E—What Conditions Must Be Met by a Grantee?

##### § 387.40 What are the matching requirements?

A grantee must contribute to the cost of a project under this program in an amount satisfactory to the Secretary. The part of the costs to be borne by the grantee is determined by the Secretary at the time of the grant award.

(Section 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774(a))

##### § 387.41 What are allowable costs?

In addition to those allowable costs established under EDGAR §§ 75.530–75.562, the following items are allowable under experimental and innovative training projects—

- (a) Student stipends;
- (b) Tuition and fees; and
- (c) Student travel in conjunction with training assignments.

(Section 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774(a))

The Secretary amends Title 34 of the Code of Federal Regulations by adding 34 CFR 388 to read as follows:

#### Part 388—State Vocational Rehabilitation Unit In-Service Training

##### Subpart A—General

Sec.

388.1 What is the State Vocational Rehabilitation Unit In-Service Training Program?

388.2 Who is eligible for assistance under this program?

388.3 What regulations apply to this program?

388.4 What definitions apply to this program?

##### Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

388.10 What types of projects are authorized under this program?

388.11 What specific activities may be supported under this program?

##### Subpart C—[Reserved]

##### Subpart D—How Does the Secretary Make a Grant?

388.30 What selection criteria does the Secretary use in this program?

##### Subpart E—What Conditions Must Be Met by a Grantee?

388.40 What are the matching requirements?

388.41 What are allowable costs?

Authority: Sections 12(c) and 304 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 711(c) and 774)

#### Subpart A—General

##### § 388.1 What is the State Vocational Rehabilitation Unit In-Service Training Program?

This program is designed to support special projects for training State vocational rehabilitation unit personnel in program areas essential to the effective management of the unit's program of vocational rehabilitation services or in skill areas which will enable staff personnel to improve their ability to provide vocational rehabilitation services to severely handicapped individuals.

(Section 304 of the Act; 29 U.S.C. 774)

##### § 388.2 Who is eligible for assistance under this program?

Those agencies and organizations eligible for assistance under this program are described in 34 CFR § 385.2.

(Section 304(a) of the Act; 29 U.S.C. 744(a))

##### § 388.3 What regulations apply to this program?

The following regulations apply to this program:

- (a) 34 CFR Part 385 (Rehabilitation Training); and
- (b) The regulations in this Part 388.

(Section 304 of the Act; 29 U.S.C. 744)

##### § 388.4 What definitions apply to this program?

The definitions in 34 CFR Part 385 apply to this program.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

#### Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

##### § 388.10 What types of projects are authorized under this program?

State vocational rehabilitation unit in-service training projects are concerned with the staff development and training of State vocational rehabilitation unit personnel in order to assure an improved level of competence in serving State unit clients and to assist in expanding and improving vocational rehabilitation services for handicapped individuals, especially those with the most severe handicaps.

(Section 304(b) of the Act; 29 U.S.C. 774(b))

##### § 388.11 What specific activities may be supported under this program?

(a) Training activities supported under a State vocational rehabilitation unit in-service training grant focus primarily on program areas that are essential to the State unit's operation, or on skill areas that will enable staff personnel to improve their ability to function on their job, or prepare for positions of greater

responsibility within the unit, or to correct deficiencies identified in the State program.

(b) Training methods may include—

(1) The development of State unit training institutes concerned with special aspects of State unit administration or service provision;

(2) Attendance for individual employees or groups of employees at special courses conducted in cooperation with an educational institution;

(3) Individualized directed study in priority areas of State unit service or practice; and

(4) Maintenance of agency instructional library resources for books, films, tapes and other resources.

(Section 304(b) of the Act; 29 U.S.C. 744(b))

#### Subpart C—[Reserved]

#### Subpart D—How Does the Secretary Make a Grant?

##### § 388.30 What selection criteria does the Secretary use in this program?

(a) *Plan of operation.* (25 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(a).

(b) *Quality of key personnel.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(b).

(c) *Budget and cost effectiveness.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(c).

(d) *Evaluation plan.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(d).

(e) *Adequacy of resources.* (5 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(e).

(f) *Evidence of need.* (15 points)

(1) The Secretary reviews each application for information that shows the need for the in-service training has been adequately justified.

(2) The Secretary looks for information that shows—

(i) The State unit has conducted a needs assessment of the in-service training needs of State unit employees; and

(ii) The State unit in-service training plan responds to needs identified on the basis of the training needs assessment.

(g) *Relevance to State/Federal rehabilitation service program.* (10 points)

(1) The Secretary reviews each application for information that shows

that the proposed project appropriately relates to the mission of the State/Federal rehabilitation service program.

(2) The Secretary looks for information that shows the proposed project can be expected to improve the competence of State vocational rehabilitation unit personnel in providing vocational rehabilitation services to handicapped individuals or in otherwise contributing to the more effective management of the State unit program.

(h) *Nature and scope of training program.* (15 points)

(1) The Secretary reviews each application for information that demonstrates the adequacy and scope of the proposed training program content.

(2) The Secretary looks for information that shows—

(i) The scope and nature of the training activities reflect content that can be expected to enable the achievement of the established project objectives;

(ii) The program primarily includes an integrated sequence of—

(a) workshops, seminars, and other special courses for counselors and other classes of State unit personnel concerned with State unit procedures;

(b) concentrated training activities focusing on improving State unit staff skills in working with specific groups of severely handicapped persons; and

(c) directed individualized or group staff development activities designed to enable selected staff to acquire special skills.

(Section 12(c) and 304 of the Act; 29 U.S.C. 711(c) and 774)

#### Subpart E—What Conditions Must Be Met by a Grantee?

##### § 388.40 What are the matching requirements?

The Secretary may make grants for paying part of the costs of projects under this program. The grantee must provide at least 10 percent of the total costs of the project.

(Section 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 744(a))

##### § 388.41 What are the allowable costs?

In addition to those allowable costs established in EDGAR §§ 75.530-75.562, the following items are allowable under State vocational rehabilitation unit in-service training projects:

(a) Trainee per diem costs;

(b) Trainee travel in connection with a training course; and

(c) Trainee tuition and fees.

(Section 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774(a))

The Secretary amends Title 34 of the Code of Federal Regulations by adding 34 CFR Part 389 to read as follows:

#### Part 389—Rehabilitation Continuing Education Programs

##### Subpart A—General

Sec.

389.1 What is the Rehabilitation Continuing Education Program?

389.2 Who is eligible for assistance under this program?

389.3 What regulations apply to this program?

389.4 What definitions apply to this program?

##### Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

389.10 What types of projects are authorized under this program?

##### Subpart C—[Reserved]

##### Subpart D—How Does the Secretary Make a Grant?

389.30 What selection criteria does the Secretary use in this program?

##### Subpart E—What Conditions Must Be Met by a Grantee?

389.40 What are the matching requirements?

389.41 What are allowable costs?

Authority: Sections 12(c) and 304 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 711(c) and 774)

##### Subpart A—General

##### § 389.1 What is the Rehabilitation Continuing Education Program?

This program is designed to support training centers that serve either a Federal region or another geographical area and provide for a broad integrated sequence of training activities that focus on meeting recurrent and common training needs of employed rehabilitation personnel throughout a multi-State geographical area.

(Section 304 of the Act; 29 U.S.C. 774)

##### § 389.2 Who is eligible for assistance under this program?

Those agencies and organizations eligible for assistance under this program are described in 34 CFR § 385.2.

(Section 304(a) of the Act; 29 U.S.C. 774(a))

##### § 389.3 What regulations apply to this program?

The following regulations apply to this program—

(a) 34 CFR Part 385 (Rehabilitation Training); and

(b) The regulations in this Part 389.

(Section 304 of the Act; 29 U.S.C. 774)

**§ 389.4 What definitions apply to this program?**

The definitions in 34 CFR Part 385 apply to this program.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?****§ 389.10 What types of projects are authorized under this program?**

Rehabilitation Continuing Education Programs—

(a) Train newly employed State agency staff at the administrative, supervisory, professional, subprofessional, or clerical levels in order to develop needs skills for effective agency performance;

(b) Provide training opportunities for experienced State agency personnel at all levels of State agency practice to upgrade their skills and to develop mastery of new program developments dealing with significant issues, priorities and legislative thrusts of the State/Federal vocational rehabilitation program; and

(c) Develop and conduct training programs for staff of private rehabilitation agencies and facilities which cooperate with State vocational rehabilitation units in providing vocational rehabilitation and other rehabilitation services.

(Section 304(b) of the Act; 29 U.S.C. 774(b))

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?****§ 389.30 What selection criteria does the Secretary use in this program?**

(a) *Plan of operation.* (25 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(a).

(b) *Quality of key personnel.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(b).

(c) *Budget and cost effectiveness.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(c).

(d) *Evaluation plan.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(d).

(e) *Adequacy of resources.* (5 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(e).

(f) *Evidence of need.* (15 points)

(1) The Secretary reviews each application for information that shows

the need for the Rehabilitation Continuing Education Program has been adequately justified.

(2) The Secretary looks for information that shows the need for the training program has been justified and includes an assessment of the potential of existing programs within the geographical area (including State vocational rehabilitation unit in-service training) to meet the needs for which support is sought.

(g) *Relevance to State/Federal rehabilitation service program.* (10 points)

(1) The Secretary reviews each application for information that shows the proposed project appropriately relates to the mission of the State/Federal rehabilitation service program.

(2) The Secretary looks for information that the proposed project can be expected to improve the competence of professional and other personnel employed in the rehabilitation agencies serving severely physically and mentally disabled individuals.

(h) *Nature and scope of training program.* (15 points)

(1) The Secretary reviews each application for information that demonstrates the adequacy and scope of the proposed training program content.

(2) The Secretary looks for information that shows—

(i) The scope and nature of the training activities reflect content that can be expected to enable the achievement of the established project objectives of the training project.

(ii) The program and teaching methods provide for an integration of theory and practice relevant to the educational objectives of the program.

(iii) The program includes a broad integrated sequence of training activities for employed rehabilitation workers.

(iv) The program primarily includes coursework which can be expected to be needed on a recurrent basis throughout the multi-State geographical area to be served.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**Subpart E—What Conditions Must Be Met by a Grantee?****§ 389.40 What are the matching requirements?**

A grantee must contribute to the cost of a project under this program in an amount satisfactory to the Secretary. The part of the cost to be borne by the grantee is determined by the Secretary at the time of the grant award.

(Sections 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774(a))

**§ 389.41 What are allowable costs?**

In addition to those allowable costs established under EDGAR §§ 75.530–75.562, the following items are allowable under Rehabilitation Continuing Education programs—

- (a) Trainee per diem costs;
- (b) Trainee travel in connection with a training course;
- (c) Trainee tuition and fees; and
- (d) Special accommodations for handicapped trainees.

(Sections 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774(a))

The Secretary amends Title 34 of the Code of Federal Regulations by adding 34 CFR Part 390 to read as follows:

**PART 390—REHABILITATION SHORT-TERM TRAINING****Subpart A—General**

Sec.

390.1 What is the Rehabilitation Short-Term Training Program?

390.2 Who is eligible for assistance under this program?

390.3 What regulations apply to this program?

390.4 What definitions apply to this program?

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

390.10 What types of projects are authorized under this program?

**Subpart C—[Reserved]****Subpart D—How Does the Secretary Make a Grant?**

390.30 What selection criteria does the Secretary use in this program?

**Subpart E—What Conditions Must Be Met by a Grantee?**

390.40 What are the matching requirements?

390.41 What are allowable costs?

Authority: Sections 12(c) and 304 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 711(c) and 774).

**Subpart A—General****§ 390.1 What is the Rehabilitation Short-Term Training Program?**

This program is designed for the support of special seminars, institutes, workshops and other short-term courses in technical matters relating to the delivery of vocational, medical, social, and psychological rehabilitation services.

(Sections 21(a)(2) and 304(a) of the Act; 29 U.S.C. 711(a)(2) and 774(a))

**§ 390.2 Who is eligible for assistance under this program?**

Those agencies and organizations eligible for assistance under this program are described in 34 CFR § 385.2.

(Section 304(a) of the Act; 29 U.S.C. 774(a))

**§ 390.3 What regulations apply to this program?**

- (a) 34 CFR Part 385 (Rehabilitation Training); and  
(b) The regulations in this Part 390.

(Section 304 of the Act; 29 U.S.C. 774)

**§ 390.4 What definitions apply to this program?**

The definitions in 34 CFR Part 385 apply to this program.

(Section 12(c) of the Act; 29 U.S.C. 711(c))

**Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?**

**§ 390.10 What types of projects are authorized under this program?**

(a) Projects under this program are designed to provide short-term training and technical instruction in areas of special significance to the delivery of vocational, medical, social, and psychological rehabilitation services.

(b) Short-term training projects may be of regional or national scope.

(c) Conferences and meetings in which training is not the primary focus may not be supported under this program.

(Section 12(a)(2) and 304 of the Act; 29 U.S.C. 711(a)(2) and 774)

**Subpart C—[Reserved]**

**Subpart D—How Does the Secretary Make a Grant?**

**§ 390.30 What selection criteria does the Secretary use in this program?**

(a) *Plan of operation.* (25 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(a).

(b) *Quality of key personnel.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(b).

(c) *Budget and cost effectiveness.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(c).

(d) *Evaluation plan.* (5 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(d).

(e) *Adequacy of resources.* (10 points)

The Secretary evaluates each application on the basis of the criterion in § 385.32(e).

(f) *Evidence of need.* (15 points)

(1) The Secretary reviews each application for information that shows the need for the training project has been adequately justified.

(2) The Secretary looks for information that shows the need for the training project that has been established and validated in terms of its potential impact on the rehabilitation service delivery system.

(g) *Relevance to State/Federal rehabilitation service program.* (10 points)

(1) The Secretary reviews each application for information that shows the proposed project appropriately relates to the mission of the State/Federal rehabilitation service program.

(2) The Secretary looks for information that shows the proposed project relates to the mission of the State/Federal rehabilitation service program and can be expected to improve the skills and competence of personnel engaged in the administration or delivery of rehabilitation services, and others with an interest in the delivery of rehabilitation services.

(h) *Nature and scope of training program content.* (15 points)

(1) The Secretary reviews each application for information that demonstrates the adequacy and scope of the proposed training program content.

(2) The Secretary reviews each application for information that shows that—

(i) The educational objectives are clearly defined, measurable and achievable; and

(ii) The proposed course content and methodology to develop and implement the training can be expected to achieve the stated educational objectives.

**Subpart E—What Conditions Must Be Met by a Grantee?**

**§ 390.40 What are the matching requirements?**

A grantee must contribute to the cost of a project under this program in an amount satisfactory to the Secretary. The part of the costs to be borne by the grantee is determined by the Secretary at the time of the award.

(Sections 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 774(a))

**§ 390.41 What are allowable costs?**

(a) In addition to those allowable costs established in EDGAR §§ 75.530–75.562, the following items are allowable under short-term training projects:

- (1) Trainee per diem costs;
- (2) Trainee travel in connection with a training course;
- (3) Trainee registration fees; and
- (4) Special accommodations for handicapped trainees.

(b) The preparation of training materials may not be supported under a short-term training grant unless the

materials are essential for the conduct of the seminar, institute, workshop or other short course for which the grant support has been provided.

(Sections 12(c) and 304(a) of the Act; 29 U.S.C. 711(c) and 744(a))

**Appendix A—Summary of Comments and Responses To Notice of Proposed Rulemaking Published in Federal Register of November 29, 1979**

**§ 385.40 What are the requirements pertaining to the membership of project advisory committees? (formerly 1362.10)**

*Comment.* Under the previous proposed regulations, the membership of any advisory committee established in connection with a Rehabilitation Services Administration supported project was required to include "handicapped individuals." Since the term "handicapped individual" is a term defined under the Rehabilitation Act to refer generally to an individual who is eligible for vocational rehabilitation services and a client of a State vocational rehabilitation unit and since the scope of projects supported under the Rehabilitation Act may extend far beyond the provision of vocational rehabilitation services, it was suggested that the use of this term was not fully appropriate in this section.

*Response.* This section has been revised to ensure that advisory committees include "handicapped persons or other representatives of handicapped individuals" but not necessarily current clients of State units.

*Comment.* Some comments were received requesting that the majority of the members of any advisory committee established under this section be handicapped persons. It was suggested that at least 51 percent of the membership of any project advisory committee should themselves be handicapped.

*Response.* No change has been made in this section in this regard. The scope of discretionary projects authorized under the Rehabilitation Act includes service delivery, rehabilitation facility assistance, training of professional personnel, and other special purposes. The membership of any project advisory committee is based on the qualifications of each individual in terms of the purpose of the project. To require that an advisory committee have a majority of membership of physically or mentally handicapped persons might not only minimize the need for the most efficient and effective achievement of project objectives but might arbitrarily minimize the contribution of so very many other qualified persons in the rehabilitation community.

*Comment.* Comments associated with the specific learning disability issue under the overall Rehabilitation Act proposed regulations requested that the proposed section be revised to require that the membership of each project include "handicapped individuals" and in the case of projects which involve school-age students, representatives from educational agencies.

*Response.* No change has been made in this section in this regard. It is noted that the proposed section already required handicapped individuals and their representatives to be included in the membership of project advisory committees. Since vocational rehabilitation programs are intended for handicapped persons who are or near working age, parents are only one type of representative appropriate for participation in these advisory committees.

The suggestion that educational agency representation be required in project advisory committees was also not accepted. Projects funded under the Rehabilitation Act may cover a broad range of cooperative program service areas and to emphasize one area of cooperative programming at the expense of others would be inconsistent with the traditional flexibility of Rehabilitation Act programming. On the basis of experience it is clear that when an advisory committee is established for any special project which involves educational services, educational agencies are represented on the project advisory committee.

**§ 386.1 What is the Rehabilitation Long-Term Training Program? (formerly 1362.70)**

*Comment.* A few commenters suggested that this section be revised to include the area of rehabilitation administration within the scope of the long-term training program. Other commenters asked that the field of rehabilitation dentistry be similarly identified.

*Response.* A change has been made in this section. Training in the areas of rehabilitation administration and rehabilitation dentistry have long been supported under the rehabilitation long-term training program, but these areas have never been identified in either the Act or the regulations. The guidelines for the rehabilitation training grant program have reflected the full scope of the program, however, and have identified these areas within the scope of the rehabilitation training grant program.

Since training in rehabilitation administration and rehabilitation dentistry have both been supported for

so very long a period of time, the section is being revised to include coverage of both general training for rehabilitation administrative personnel and the specialized training related to the provision of dental services to severely physically and mentally disabled individuals.

**§ 390.10 What types of projects are authorized under this program? (formerly 1362.73)**

*Comment.* As part of the comment received in connection with the specific learning disability issue under the State vocational rehabilitation service regulations, it was suggested that this section be revised to ensure special attention "to addressing the training needs of rehabilitation personnel in the area of development and implementation of cooperative activities with educational agencies, parents and clients."

*Response.* No change has been made in this section in this regard. It is noted that short-term training priorities under the rehabilitation short-term training program are identified each year and are included within an annual General Plan for Rehabilitation Short-Term Training. This General Plan is prepared with the advice of agencies and organizations knowledgeable about the training needs of employed rehabilitation personnel. Since short-term training needs fall into so many diverse areas and since short-term training needs change.

*Response.* No change has been made in this section in this regard. It is noted that short-term training priorities under the rehabilitation short-term training program are identified each year and are included within an annual General Plan for Rehabilitation Short-Term Training. This General Plan is prepared with the advice of agencies and organizations knowledgeable about the training needs of employed rehabilitation personnel. Since short-term training needs fall into so many diverse areas and since short-term training needs change extensively from year to year, it would not be appropriate to identify a single area of short-term training as a continuing priority under these regulations.

**§ 390.41 What are allowable costs? (formerly 1362.73)**

*Comment.* It was suggested that this section be revised to clarify that Federal grant funds may be used to provide special accommodations for handicapped persons attending short-term training seminars, institutes, and workshops conducted under the

rehabilitation short-term training program.

*Response.* A change has been made in this section to specify that special accommodations for handicapped trainees may be included in grant costs to provide for such assistance as readers for blind persons, interpreters for deaf persons, attendants for trainees with severe mobility impairments and other accommodations which may be required to ensure the full participation of handicapped trainees in short-term training courses.

**Federal Assistance to States for  
Education of Handicapped Children**

## DEPARTMENT OF EDUCATION

Office of Special Education

Office for Civil Rights

## 34 CFR Part 104 and 300

## Nondiscrimination on the Basis of Handicap in Programs and Activities Receiving or Benefiting From Federal Financial Assistance; and Assistance to States for Education of Handicapped Children

AGENCY: Department of Education.

ACTION: Notice of Interpretation.

**SUMMARY:** The Secretary of Education interprets Part B of the Education of the Handicapped Act, as amended, and Section 504 of the Rehabilitation Act of 1973, as amended, concerning the use of parents' insurance proceeds to pay for required services. It is the Secretary's interpretation that these statutes and their implementing regulations do not permit an educational agency responsible for the education of a handicapped child to require the parents of that child to use private insurance proceeds to pay for required services where the parents would incur financial loss. This interpretation is issued in response to public inquiries regarding Departmental policy on the matter.

**EFFECTIVE DATE:** This interpretation is expected to take effect 45 days after it is transmitted to Congress. Interpretations are usually transmitted to Congress several days before they are published in the *Federal Register*. The effective date of interpretations that are subject to the transmittal requirement is changed if Congress takes certain adjournments. Although the interpretation of Section 504 is not subject to this requirement, the Secretary has decided to set its effective date for the same day that the interpretation of Part B of the Education of the Handicapped Act becomes effective. If you want to know the effective date of this interpretation, call or write the Department of Education contact persons.

**FOR FURTHER INFORMATION CONTACT:**

Ms. Shirley A. Jones, Office of Special Education, Department of Education, Donohoe Building, Room 4030, 400 Maryland Ave. S.W., Washington, D.C. 20202, telephone: (202) 472-7921. Mr. Edward A. Stutman, Office for Civil Rights, Department of Education, Switzer Building, Room 5430, 300 C St., S.W., Washington, D.C. 20202, telephone: (202) 245-0781.

## SUPPLEMENTARY INFORMATION:

*The Issue*

The issue is whether Part B of the Education of the Handicapped Act, as amended, ("Part B"; 20 U.S.C. 1411-1420) and its regulations (34 CFR Part 300; formerly 45 CFR Part 121a) and Section 504 of the Rehabilitation Act of 1973, as amended ("Section 504"; 29 U.S.C. 794) and its regulations (34 CFR Part 104; formerly 45 CFR Part 84) permit an educational agency responsible for the education of a handicapped child to require the child's parents to file insurance claims and use the proceeds to pay for services that must be provided to the child under Part B and Section 504.

*The Interpretation*

Both Part B and Section 504 prohibit a public agency from requiring parents, where they would incur a financial cost, to use insurance proceeds to pay for services that must be provided to a handicapped child under the "free appropriate public education" requirements of those statutes. The use of parents' insurance proceeds to pay for services in these circumstances must be voluntary on the part of the parents.

*Discussion*

Under Section 612(2)(B) of Part B (20 U.S.C. 1412(2)(B)), each participating State must make available to all handicapped children within specified ages a free appropriate public education. "Free appropriate public education" is defined in Section 602(18) of the Education of the Handicapped Act, as amended, (20 U.S.C. 1401(18)) as "special education and related services which are provided at public expense, under public supervision and direction, and without charge. . . ." The requirement to provide these services is implemented in 34 CFR 300.300 *et seq.*

Similarly, the Department's regulations implementing Section 504 require any recipient of Federal financial assistance that operates a public elementary or secondary education program to "provide a free appropriate public education to each qualified handicapped person who is in the recipient's jurisdiction, regardless of the nature or severity of the person's handicap." 34 CFR 104.33(a). The provision of a free education is defined as "the provision of educational and related services without cost to the handicapped person or to his or her parents or guardian, except for those fees that are imposed on non-

handicapped persons or their parents or guardian." 34 CFR 104.33(c).

The Secretary interprets the requirements that a free appropriate public education be provided "without charge" or "without cost" to mean that an agency may not compel parents to file an insurance claim when filing the claim would pose a realistic threat that the parents of handicapped children would suffer a financial loss not incurred by similarly situated parents of non-handicapped children. Financial losses include, but are not limited to, the following:

(1) A decrease in available lifetime coverage or any other benefit under an insurance policy;

(2) An increase in premiums or the discontinuation of the policy; or

(3) An out-of-pocket expense such as the payment of a deductible amount incurred in filing a claim.

Financial losses do not include incidental costs such as the time needed to file an insurance claim or the postage needed to mail the claim.

The statutory and regulatory provisions relating to a free appropriate public education guarantee freedom only from financial loss as described above. Therefore, when the educational agency pays the financial costs related to filing a claim and no other cost (such as those listed above) is imposed, the parent suffers no financial loss. In addition, an agency may insist that parents file a claim when they would incur only minor incidental costs such as the time required to complete the form. The agency may require the parents to file a claim if it ensures that parents do not have to bear even a short-term financial loss. For example, if benefits begin only after a \$50.00 deductible, the agency may insist that the parents file a claim if it pays for the services and the deductible in advance. (20 U.S.C. 1401, 1411-1420; 29 U.S.C. 794)

The responsibility to make available a free appropriate public education does not mean that a public educational agency must use only its own funds for that purpose. An agency may use whatever State, local, Federal, and private sources of support are available to pay for required services. See 34 CFR 300.301(a) and 34 CFR 104.33(c)(1). Moreover, nothing in the Part B or Section 504 regulations relieves an insurer or similar third party from an otherwise valid obligation to provide or pay for services to a handicapped child. See 34 CFR 300.301(b) and 34 CFR 104.33(c).

*Call for Public Comment*

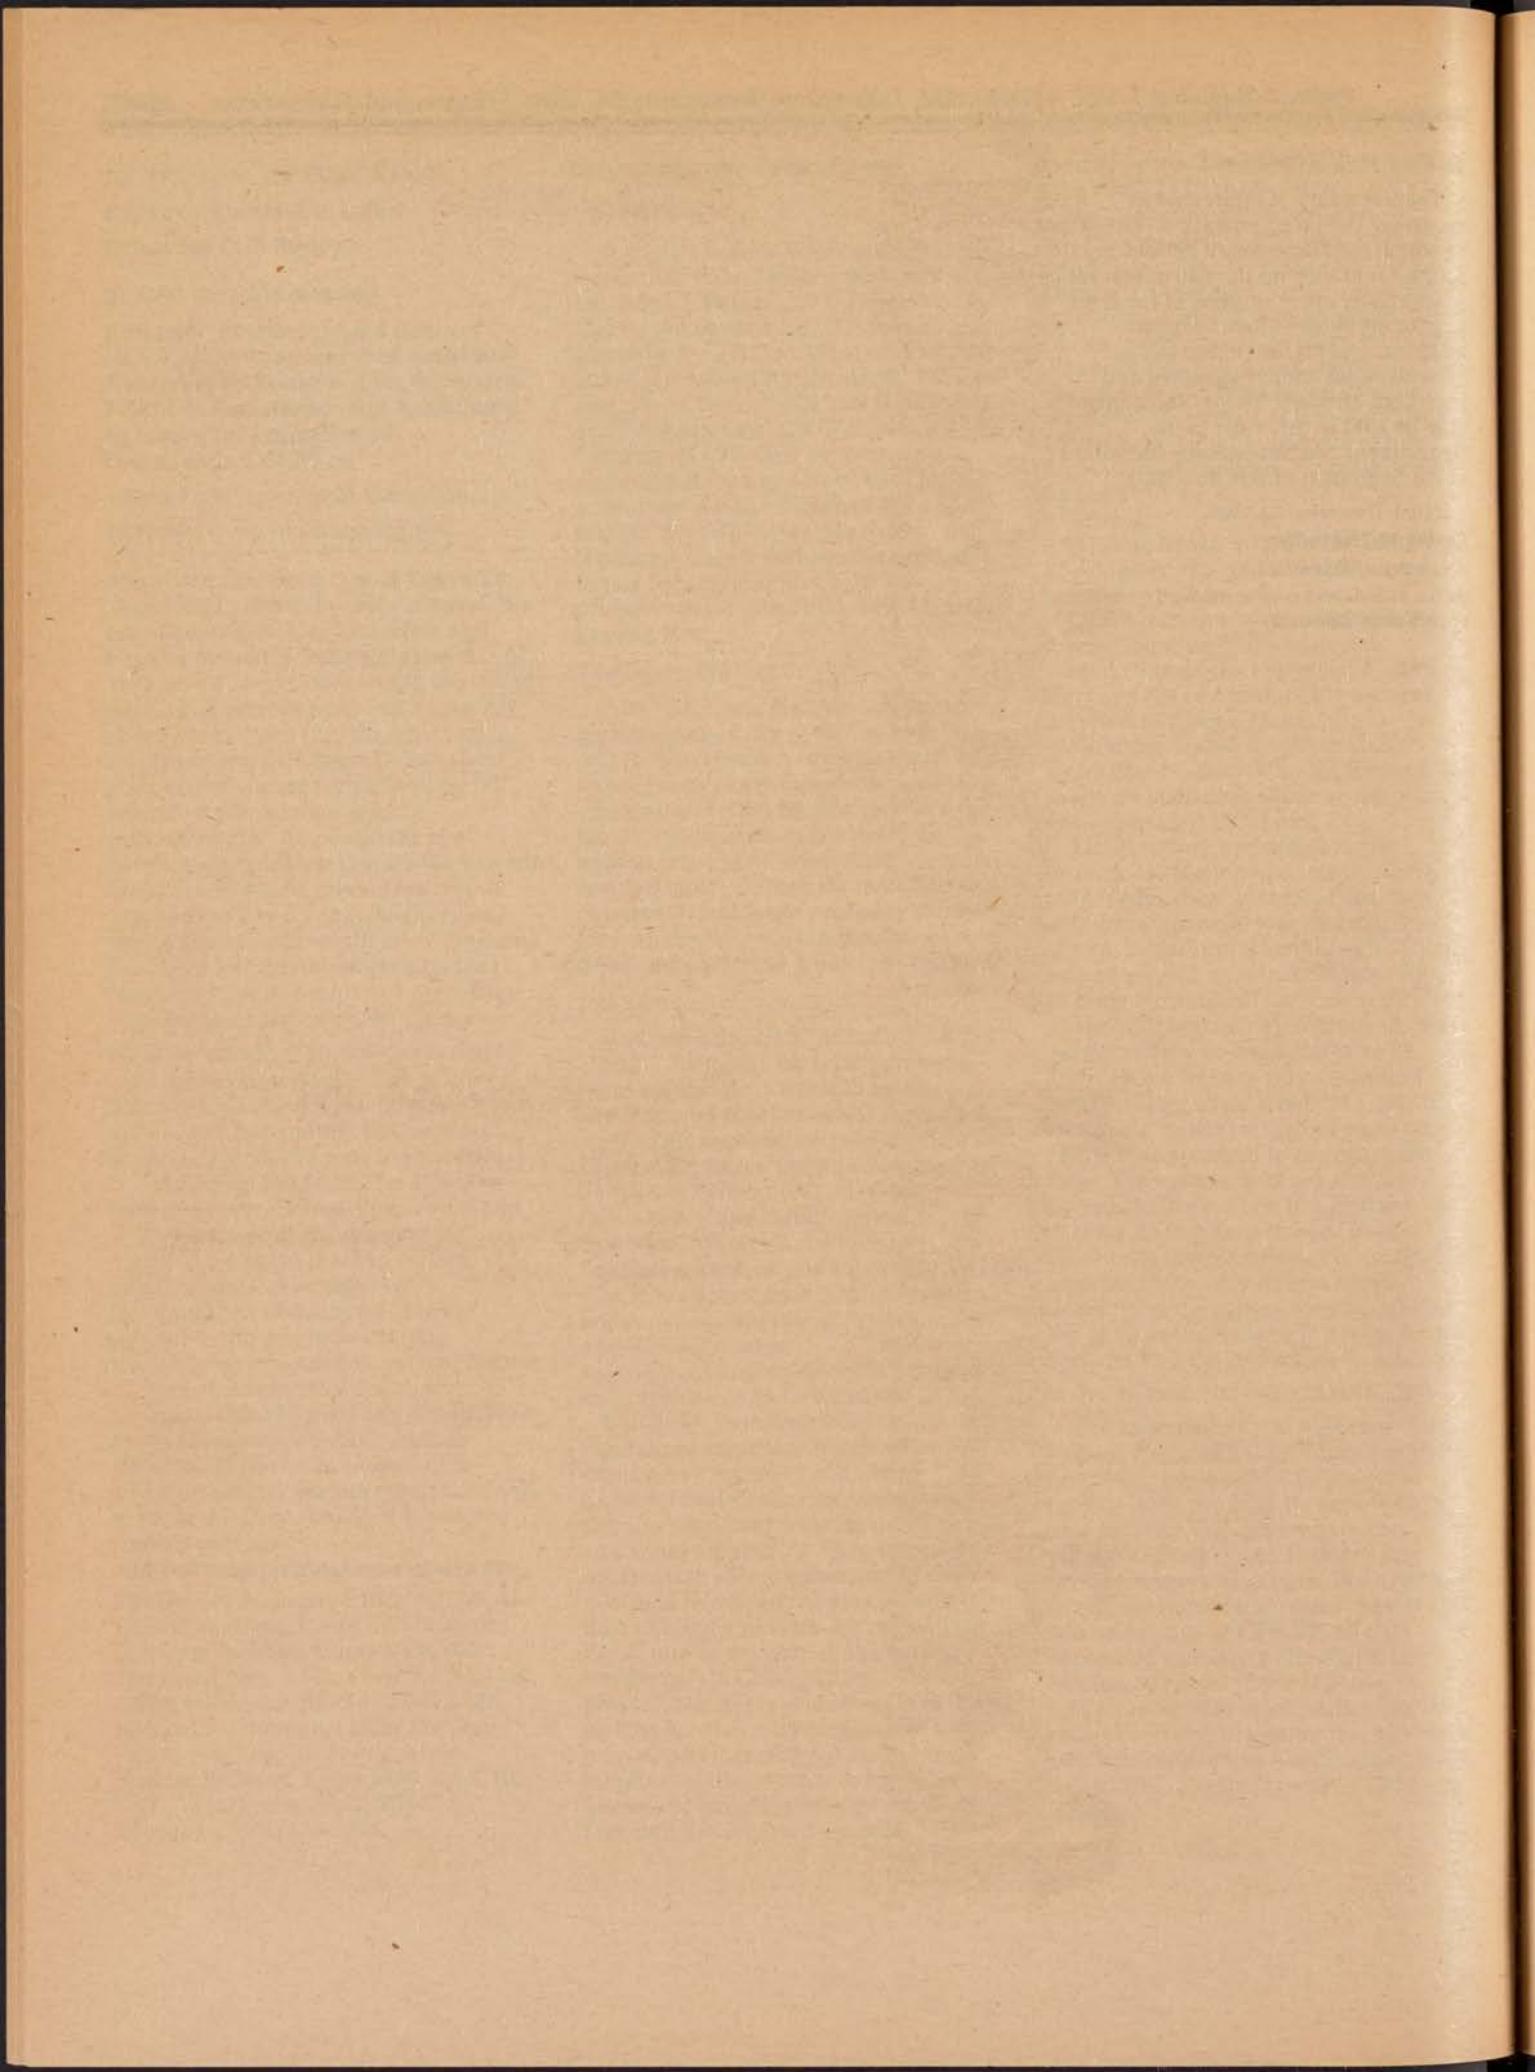

The Secretary is interested in receiving public comments on the extent to which the Department should provide further guidance on the use of insurance proceeds or other sources of funds to pay for services to handicapped children, and on the relationship between educational agencies and insurance carriers. These comments may be sent at any time to the Department contact persons identified in the beginning of this document.

Dated: December 22, 1980.

Shirley M. Hufstедler,

**Pell Grant Program; Final Rules With  
Comments Invited**

## DEPARTMENT OF EDUCATION

## 34 CFR Part 690

## Pell Grant Program

**AGENCY:** Department of Education.

**ACTION:** Final regulations with comments invited.

**SUMMARY:** The Secretary is issuing regulations for the Pell Grant Program (formerly the Basic Educational Opportunity Grant Program). These regulations are being amended to implement the statutory changes contained in the Education Amendments of 1980, Pub. L. 96-374.

**DATES:** These regulations are expected to take effect 45 days after they are transmitted to Congress. Regulations are usually transmitted to the Congress several days before they are published in the *Federal Register*. The effective date is changed by statute if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

Comments must be received on or before March 2, 1981.

**ADDRESSES:** Comments should be addressed to William L. Moran, Office of Postsecondary Education, Office of Student Financial Assistance, U.S. Department of Education, (Room 4318, ROB-3) 400 Maryland Avenue, S.W., Washington, D.C. 20202.

**FOR FURTHER INFORMATION CONTACT:** William L. Moran, Telephone (202) 472-4300.

**SUPPLEMENTARY INFORMATION:** On October 3, 1980, the Education Amendments of 1980, Pub. L. 96-374, were enacted into law reauthorizing the Pell Grant Program (formerly the Basic Educational Opportunity Grant Program) through the 1985-86 award year.

Most of the statutory changes contained in the new law which affect the administration of the Pell Grant Program are primarily minor or technical in nature. Therefore, in order to facilitate the administration of the program, regulations implementing these changes are being issued in final form.

The Education Amendments of 1980 repealed the existing statutory provisions concerning calculation of a student's cost of attendance for the Pell Grant program. The new law revised the definition of "cost of attendance" and made it applicable to all student financial assistance programs authorized by Title IV of the Higher Education Act. Therefore, the changes to be made to the "cost of attendance" portion of the Pell Grant regulation, Subpart E, will be published separately as a notice of proposed rulemaking.

The Education Amendments of 1980 also mandate a common need analysis system for the Pell Grant and campus-based programs, Supplemental Educational Opportunity Grant, College Work-Study and National Direct Student Loan, beginning with the 1982-83 award year. The new law provides that a separate notice of proposed rulemaking for this system will be published in the *Federal Register* and submitted to Congress for review by July 1, 1981.

The changes required by the new law are outlined in the following summary. In addition to these changes, terminology in these regulations is being updated to reflect the creation of the Department of Education and the change in the name of the Basic Educational Opportunity Grant Program to the Pell Grant Program. Also, other minor technical changes were made to facilitate program administration.

1. The Education Amendments of 1980 increase the maximum Pell grant amount in steps from \$1,900 in the 1981-82 award year to \$2,600 in 1985-86. In addition, the previous limitation of a student's Pell Grant to 50 percent of his or her cost of attendance has been modified in the new law so that the maximum cost of attendance percentage that may be covered by a Pell Grant in future years increases as the size of the maximum grant increases.

2. Under previous legislation, student eligibility was limited to four years (in some cases, five years) of full-time Basic Grant assistance. The new law provides that a student is eligible to receive Pell Grants during the period required to complete his or her first undergraduate baccalaureate course of study.

Although the four-year eligibility limitation is no longer applicable, the definition of "undergraduate student" in § 690.2 retains the concept that an undergraduate course of study for purposes of the Pell Grant Program is one which usually does not exceed four academic years or is a five academic year program designed to lead to a first degree. A student enrolled in any other length program is considered to be an undergraduate only while taking the academic requirements to complete the first four academic years of the program. This concept does not restrict a student to only four Pell Grant awards since it is possible for a student to take longer than four academic years to complete the academic requirements of his or her undergraduate program or undergraduate portion of the program.

3. The source of the administrative cost allowance of \$10 per year for each student who receives a Pell Grant at an institution in an award year was

changed in the new law from a separate appropriation to a reserve from the program appropriation. This allowance must be used to offset the institution's costs of administering the Pell Grant and campus-based programs. The priority for expenditure of this allowance for student consumer information which was contained in the previous legislation has been deleted.

4. The schedule of Pell Grant reductions provided in the new law for use at less-than-full funding gives the maximum protection to the lowest income students. For example, no reduction is required for a student whose expected family contribution is less than \$601.

For the first time, the reduction schedule appears in the text of the regulations. Previously, the regulations referenced the appropriate section of the law. The inclusion of the reduction schedule in these regulations is an attempt to provide a more complete, self-contained set of procedural regulations from which institutions can administer the Pell Grant Program.

Several provisions have been deleted from the previous program regulations because they have been codified in the Student Assistance General Provisions. These include, for example, the definition of an institution of higher education in the former § 190.2a, as well as other terms defined in that section, plus the definition of a recognized equivalent of a high school diploma.

#### *Waiver of Notice of Proposed Rulemaking*

The regulatory changes merely reflect the statutory changes made by the Education Amendments of 1980 and a few minor programmatic revisions. In addition, the Secretary wishes to give the higher education community as much advance notice as possible of these changes.

Accordingly, the Secretary finds that the publication of a proposed rule in this instance would be unnecessary, impracticable and contrary to the public interest within the meaning of 5 U.S.C. 553(b), and is publishing these rules as final regulations.

#### *Invitation to Comment*

Although notice and comment is not required, the Secretary believes that public comment may be valuable both on the changes made to reflect statutory changes and on other changes that could be made to improve the regulations. The public is particularly invited to comment on the following:

(1) The definitions of undergraduate student, full-time student and of half-time student in § 690.2.

(2) Ways of reducing any regulatory burdens imposed by these regulations.

(3) Whether a comprehensive general part should be prepared containing common provisions from all student aid programs.

#### *Educational Assessment Impact*

On November 14, 1980, the Secretary published a notice in the *Federal Register* of the Department's intent to publish regulations necessary to implement the Education Amendments of 1980. In that notice, the Department listed the existing regulations affected by the new law and requested comments whether those regulations required information that is already being gathered by or is available from any other agency or authority of the United States. The regulations in this document are based on regulations listed in the November 14, 1980 notice. Based on any comments received and the Department's own review, it has been determined that the regulations in this document do not require information that is already being gathered by or is available from any other agency or authority of the United States.

Interested persons are invited to submit comments and recommendations regarding these regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble.

All comments submitted in response to these regulations will be available for public inspection, during and after the comment period, in Room 4318, ROB-3, 7th and D Streets, SW., Washington, D.C. between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

**CITATION OF LEGAL AUTHORITY:** A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

(Catalogue of Federal Domestic Assistance Numbers: Pell Grant Program, 84.063)

Dated: December 22, 1980.

Shirley M. Hufstедler,  
*Secretary of Education.*

Part 690 of Title 34 of the Code of Federal Regulations is amended as follows:

### **PART 690—PELL GRANT PROGRAM**

#### **Subpart A—Scope, Purpose and General Definitions**

- Sec.
- 690.1 Scope and purpose.
  - 690.2 General definitions.
  - 690.3 Special terms.
  - 690.4 Eligible student.
  - 690.5 Duration of student eligibility.

- 690.6 Pell Grant payments from more than one institution.
- 690.7 Institutional eligibility.
- 690.8 Consortium agreements.
- 690.9 Determination of enrollment status under special circumstances.
- 690.10 Administrative cost allowance to participating schools.

#### **Subpart B—Application Procedures for Determining Expected Family Contribution**

- 690.11 Application.
- 690.12 Certification of information.
- 690.13 Deadline for filing applications.
- 690.14 Notification of expected family contribution.
- 690.15 Applicant's request for recomputation of expected family contribution because of clerical or arithmetic error.
- 690.16 Request for recomputation of expected family contribution because of extraordinary circumstances.

#### **Subpart C—Expected Family Contribution**

#### **Subpart D—Expected Family Contribution for Independent Students**

#### **Subpart E—Cost of Attendance**

#### **Subpart F—Determination of Pell Grant Awards**

- 690.61 Submission process and deadline for Student Eligibility Report.
- 690.62 Calculation of a Scheduled Pell Grant at full funding.
- 690.63 Calculation of a Scheduled Pell Grant at less than full funding.
- 690.64 Maximum Pell Grant as percentage cost of attendance.
- 690.65 Calculation of a Pell Grant for a payment period.
- 690.66 Calculation of a Pell Grant for a term which occurs in two award periods.
- 690.67 Transfer student: attendance at more than one institution during an award period.
- 690.68 Correspondence study.

#### **Subpart G—Administration of Grant Payments—Regular Disbursement System**

- 690.71 Scope.
- 690.72 Institutional agreement—Regular Disbursement System.
- 690.73 Termination of agreement—Regular Disbursement System.
- 690.74 Advancement of funds to institutions.
- 690.75 Determination of eligibility for payment.
- 690.76 Frequency of payment.
- 690.77 Verification of information on the SER—withholding of payments.
- 690.78 Method of disbursement—by check or credit to student's account.
- 690.79 Educational purpose statement.
- 690.80 Recovery of overpayments.
- 690.81 Recalculation of a Pell Grant award.
- 690.82 Fiscal control and fund accounting procedures.
- 690.83 Maintenance and retention of records.
- 690.84 Submission of reports.
- 690.85 Audit and examination.

#### **Subpart H—Administration of Grant Payments—Alternate Disbursement System**

- 690.91 Scope.

- 690.92 Institutional agreement—Alternate Disbursement System (ADS).
  - 690.93 Change in ownership and change to the Regular Disbursement System (RDS).
  - 690.94 Calculation and disbursement of awards by the Secretary of Education.
  - 690.95 Termination of enrollment and refund.
  - 690.96 Maintenance and retention of records; access for purpose of audit.
- Authority:** Section 411 of the Higher Education Act of 1965 as added by Section 131(b) of Public Law 92-318, 86 Stat. 247-251 as amended (20 U.S.C. 1070a), unless otherwise noted.

1. Subpart A is revised to read as follows:

#### **Subpart A—Scope, Purpose and General Definitions**

##### **§ 690.1 Scope and purpose.**

The Pell Grant Program awards grants to help financially needy students meet their costs of postsecondary education. (20 U.S.C. 1070a)

##### **§ 690.2 General definitions.**

The following definitions are set forth in Subpart A of the Student Assistance General Provisions, 34 CFR Part 668, Subpart A:

*Ability to Benefit; Institution of higher education (including Public or Private nonprofit institution of higher education, proprietary institution of higher education, and postsecondary vocational institution); one-year training program; recognized equivalent of a high school diploma; and six-month training program.*

Other definitions used in this part are:  
*Academic year:* (1) A period of time in which a full-time student is expected to complete the equivalent of at least 2 semesters, 2 trimesters or 3 quarters at institutions using credit hours; or (2) At least 900 clock hours of training for each program at institutions using clock hours.

(20 U.S.C. 1088)

*Act:* Title IV-A-1 of the Higher Education Act (HEA) of 1965, as amended.

*Award year:* The period of time between July 1 of one year and June 30 of the following year.

*Clock hour:* The equivalent of—  
(1) A 50 to 60 minute class, lecture or recitation; or

(2) A 50 to 60 minute faculty supervised laboratory, shop training, or internship.

*College Work-Study (CW-S) Program:* The program of part-time employment authorized by Title IV-C of the Higher Education Act.

*Eligibility index:* Expected family contribution.

**Enrolled:** Completion of registration requirements at the institution a student is attending.

**Enrollment status:** At those institutions using semesters, trimesters, quarters, or other academic terms and measuring progress by credit hours, enrollment status equals a student's credit hour work load categorized as either full-time, three-quarter-time, or half-time.

**Full-time student:** An enrolled student who is carrying a full-time academic work load (other than by correspondence) as determined by the institution and which is applicable to all students enrolled in a particular program. However, the institution's full-time standard must equal or exceed one of the following minimum requirements:

(1) 12 semester hours or 12 quarter hours per academic term in those institutions using standard semester, trimester or quarter hour systems;

(2) 24 semester hours or 36 quarter hours per academic year for institutions using credit hours to measure progress but not using semester, trimester or quarter systems, or the prorated equivalent for programs of less than one academic year;

(3) 24 clock hours per week for institutions using clock hours;

(4) In those institutions using both credit and clock hours, if the sum of the following fractions is equal to or greater than one:

number of credit hours per term divided by 12  
plus number of clock hours per week  
divided by 24

(5) A series of courses or seminars which equals 12 semester hours or 12 quarter hours in a maximum of 18 weeks; or

(6) The work portion of a cooperative education program in which the amount of work performed is equivalent to the academic work-load of a full-time student.

(20 U.S.C. 1088(c)(2))

**Guaranteed Student Loan (GSL) Program:** The student loan program authorized by title IV-B of the Higher Education Act.

**Half-time student.** (1) An enrolled student who is carrying a half-time academic work load—as determined by the institution—which amounts to at least half the work load of the appropriate minimum requirement outlined in the definition of a full-time student. (See definition of full-time student.)

(2) A student enrolled solely in a program of study by correspondence who is carrying a work load of at least 12 hours or preparation of work per

week. However, regardless of the work load, no student enrolled solely in correspondence study will be considered more than a half-time student.

**National Defense Student Loan (NDSL) Program:** The student loan program authorized by Title II of the National Defense Education Act.

**National Direct Student Loan (NDSL) Program:** The student loan program authorized by Title IV-E of the Higher Education Act.

**Parent Loans for Undergraduate Students (PLUS):** The Parent Loan Program authorized by Title IV-B of the Higher Education Act.

**Payment schedule:** (1) A table showing a full-time student's Scheduled Pell Grant for a given award year. This table, published by the Secretary, is based on—

(i) The Expected Family Contribution.  
(ii) Attendance costs as defined in Subpart E; and

(iii) The amount of funds available for making Pell Grants.

(2) The Payment Schedule also includes the Disbursement Schedules which are tables showing the grant amounts three-quarter and half-time students would receive for an academic year.

**Scheduled Pell Grant:** The amount of a Pell Grant which would be paid to a full-time student for a full academic year.

**Secretary:** The Secretary of the Department of Education or an official or employee of the Department acting for the Secretary under a delegation of authority.

**State Student Incentive Grant (SSIG) Program:** The grant program authorized by Title IV-A-3 of the Higher Education Act.

**Student Eligibility Report (SER):** A report provided to an applicant showing the amount of his or her expected family contribution.

**Supplemental Educational Opportunity Grant (SEOG) Program:** The grant program authorized by Title IV-A-2 of the Higher Education Act.

**Three-quarter-time student:** An enrolled student who is carrying a three-quarter-time academic work load—as determined by the institution—which amounts to at least three quarters of the work load of the appropriate minimum requirement outlined in the definition of a full-time student. (See definition of full-time student.)

**Undergraduate student:** A student enrolled in an undergraduate course of study at an institution of higher education who:

(1) Has not been awarded a baccalaureate or first professional degree; and

(2) Is in an undergraduate course of study which usually does not exceed 4 academic years, or is enrolled in a 5 academic year program designed to lead to a first degree. A student enrolled in a program of any other length is considered an undergraduate student for only the first 4 academic years of that program.

(20 U.S.C. 1070a unless otherwise noted.)

#### § 690.3 Special terms.

(a) Eligible program: An undergraduate program of education or training which—

(1) Admits as regular students only persons who—

(i) Have a high school diploma.  
(ii) Have a General Education Development Certificate (G.E.D) or a State certificate received after passing a State-authorized examination which the State recognizes as the equivalent of a high school diploma, or

(iii) Are beyond the age of compulsory school attendance in the State in which the institution is located, and have the ability to benefit from the education or training offered; and

(2)(i) Leads to a bachelor, associate or undergraduate professional degree,

(ii) Is at least a two-year program which is acceptable for full credit toward a bachelor degree,

(iii) Is at least a 1 year program leading to a certificate or degree, which prepares students for gainful employment in a recognized occupation. (A 1-year program is defined in 34 CFR Part 668, Subpart A), or

(iv) Is, for a proprietary or postsecondary vocational institution, at least a six-month program leading to a certificate or degree, which prepares students for gainful employment in a recognized occupation. (A six-month program is defined in 34 CFR Part 668, Subpart A).

(b) An eligible program of study by correspondence: An undergraduate program of education or training which must be designed to require at least 12 hours of preparation a week.

(c) Regular student: A person who enrolls in an eligible program at an institution of higher education for the purpose of obtaining a degree or certificate.

(d) Payment period for an institution that uses the Regular Disbursement System but does not use academic terms.

(1) An institution participating in the Pell Grant program under the Regular Disbursement System (RDS institution) that does not use semesters, trimesters,

quarters, or other academic terms must have at least two payment periods for each academic year, or for each program which is less than an academic year.

(2) For a full-time student whose educational program is one academic year—

(i) The first payment period is the period of time in which the student completes the first half of his or her academic year (in credit or clock hours), and

(ii) The second payment period is the period of time in which the student completes the second half of that academic year.

(3) For a full-time student whose educational program is more than one academic year, the first and second payment periods shall be calculated under paragraph (d)(2) of this section. For subsequent academic years, or fractions of academic years, each payment period shall be the period of time in which the student completes—

(i) One-half of the academic year, or

(ii) The remaining hours in the student's educational program, whichever is to be completed first.

(4) For a full-time student whose educational program is LESS than an academic year—

(i) The first payment period is the period of time in which the student completes the first half of his or her educational program (in credit or clock hours), and

(ii) The second payment period is the period of time in which the student completes the second half of that educational program.

(5) The payment period for an eligible part-time student shall be calculated as follows:

(i) Determine the length of time it would take a full-time student in the program to complete one academic year or a program of less than one academic year, as appropriate.

(ii) The first payment period is the period of time in which the part-time student completes half the work (in credit or clock hours) he or she is scheduled to complete in the period referred to in paragraph (d)(5)(i) of this section.

(iii) The second payment period begins when the first payment period ends and ends when the student completes the other half of the work that he or she was scheduled to complete in the period referred to in paragraph (d)(5)(i) of this section.

(iv) Each subsequent payment period begins when the previous period ends and ends when the part-time student completes—

(A) Half the work he or she is scheduled to complete during the period

of time referred to in paragraph (d)(5)(i) of this section, or

(B) The remaining hours of his or her educational program whichever is completed first.

(6) If an RDS institution chooses to have more than two payment periods in an academic year or in a program of less than an academic year, the rules set forth in paragraphs (d)(2) through (d)(5) of this section shall be modified to reflect the number of payment periods. For example, if an institution chooses to have three payment periods for an academic year, each payment period shall correspond, for a full-time student, to one-third of the academic year.

(e) *Payment period for an institution using the Regular Disbursement System that uses academic terms.*

(1) For an RDS institution that uses semesters, trimesters, quarters or other academic terms, the payment period is the semester, trimester, quarter or other academic term.

(2) If a student's progress is measured in clock hours, a student may not be paid for a subsequent payment period until he or she finishes the hours of the previous payment period for which the student has already been paid.

(f) *Payment period for an institution using the Alternate Disbursement System.* A payment period for an institution participating in the Pell Grant program under the Alternate Disbursement System (ADS institution) shall be calculated as follows:

(1) If an ADS institution uses semesters, trimesters, quarters or other academic terms and measures progress in credit hours, the payment period is the semester, trimester, quarter or other academic term.

(2) If an ADS institution measures progress in clock hours, or measures progress in credit hours but does not use academic terms, it shall have at least two payment periods. The payment periods shall be calculated as follows:

(i) If the student's academic year is within one award year and the student's educational program is at least one academic year—

(A) The first payment period is the period of time in which the student completes the first half of his or her academic year, and

(B) The second payment period is the period of time in which the student completes the second half of his or her academic year.

(ii) If the student's academic year is NOT within one award year or the student's educational program is LESS than a full academic year—

(A) The first payment period is the period of time in which the student completes the first half of the hours he

or she is scheduled to complete within the award year, and

(B) The second payment period begins when the first payment period ends and ends when the student completes all hours he or she was scheduled to complete between the beginning of the second payment period and June 30.

(iii) A student with incompleting hours for the second payment period of any award year may complete them during the following award year. In this case, if the student's educational program is more than an academic year, the first payment period of the new award year begins when the student finishes all carried over hours for which he or she was paid.

(20 U.S.C. 1070a)

#### § 690.4 Eligible student.

(a) A student is eligible to receive a Pell Grant if the student—

- (1) Is a regular student.
- (2) Is enrolled as at least a half-time undergraduate student at an institution of higher education;
- (3) Is enrolled in an eligible program as a regular student, as defined in § 690.3; and
- (4)(i) Is a U.S. citizen or National,
- (ii) Is a permanent resident of the U.S.,
- (iii) Provides evidence from the Immigration and Naturalization Service that he or she is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident, or
- (iv) Is a permanent resident of the Trust Territory of the Pacific Islands, or the Northern Mariana Islands.

(b) A member of a religious order, community, society, agency or organization who is pursuing a course of study in an institution of higher education will be considered as having an expected family contribution of at least \$2,401 if that religious order—

- (1) Has a primary objective the promotion of ideals and beliefs regarding a Supreme Being;
- (2) Requires its members to forego monetary or other support substantially beyond the support it provides; and
- (3)(i) Has directed the member to pursue the course of study, or
- (ii) Provides subsistence support to its members.

(20 U.S.C. 1070a)

#### § 690.5 Duration of student eligibility.

A student is eligible to receive a Pell Grant for the period of time required to complete the first undergraduate baccalaureate course of study being pursued by that student.

(20 U.S.C. 1070a.)

**§ 690.6 Pell Grant payments from more than one institution.**

A student will not be entitled to receive Pell Grant payments concurrently from more than one institution or from the Secretary and an institution.

(20 U.S.C. 1070a.)

**§ 690.7 Institutional eligibility.**

(a)(1) An institution of higher education is eligible to participate in the Pell Grant Program if it—

- (i) Meets the appropriate definition set forth in 34 CFR 668, Subpart A,
- (ii) Enters into a program participation agreement with the Secretary, and
- (iii) Complies with that agreement and with the applicable provisions of 34 CFR Part 668 of this title, "Student Assistance General Provisions."

(2) If an institution becomes eligible during an award year, a student enrolled and attending that institution will be eligible to receive a Pell Grant for the payment period during which the institution became eligible and any subsequent payment period.

(b)(1) An institution of higher education becomes ineligible to participate in the Pell Grant Program if it no longer meets the applicable definition set forth in Part 668 of this title, or if its eligibility is terminated under the procedures set forth for terminating institutions in Part 668 of this title.

(2) If an institution becomes ineligible during an award year, an eligible student who was attending the institution and who submitted a valid SER to the institution, or to the Secretary if the institution participates under the Alternate Disbursement System (ADS), before the date the institution became ineligible, will be paid a Pell Grant for that award year for—

(i) The payment period that the student completed before the institution became ineligible, and

(ii) The payment period in which the institution became ineligible.

(c) An institution participating in the program under ADS which becomes ineligible must provide the Secretary with the name and enrollment status of each student who applied for and was determined eligible for a Pell Grant who was attending the institution when its eligibility was terminated.

(d) An institution participating in the program under the Regular Disbursement System which becomes ineligible must supply to the Secretary—

(1) The name and enrollment status of each eligible student who, during the award year, submitted a valid SER to the institution before it became ineligible.

(2) The amount of funds paid to each Pell Grant recipient for that award year.

(3) The amount due to each student eligible to receive a Pell Grant through the end of the payment period; and

(4) An accounting of the Pell Grant expenditures for that award year to the date of termination.

(20 U.S.C. 1070a.)

**§ 690.8 Consortium Agreements.**

(a) A consortium agreement is a written agreement between at least two institutions which enables an enrolled student in an eligible program at one institution to take courses at other institutions which apply towards his or her certificate or degree at the first institution.

(b) If two eligible institutions have entered into a consortium agreement, the institution at which the student is enrolled and expects to receive a degree or certificate calculates and pays the student's Pell Grant. However, if the student is attending an institution *other* than the institution at which he or she is enrolled and expects to receive a degree, the institution at which the student is actually in attendance may pay the student's Pell Grant if both institutions agree in writing to that arrangement.

(c) The institution which calculates and pays the student a Pell Grant must take into account courses taken by the student at both institutions in determining the student's enrollment status and cost of attendance.

(20 U.S.C. 1070a.)

**§ 690.9 Determination of enrollment status under special circumstances.**

(a) Non-credit remedial courses.

(1) When calculating a student's enrollment status, neither the institution nor the Secretary may count any course in a program of instruction leading to a high school diploma or the recognized equivalent of a high school diploma, even if the course is necessary to enable the student to complete the degree or certificate program.

(2) Except as provided in paragraph (a)(1) of this section, in determining a student's enrollment status, the institution and Secretary will include any non-credit remedial course in which the student is enrolled. If a non-credit remedial course is not measured by clock or credit hours, the institution must determine the equivalent number of clock or credit hours which should be included for that work. A non-credit remedial course is a course of study for which no credit is given toward a certificate or degree and which is designed to increase the ability of the student to pursue an undergraduate

course of study leading to that certificate or degree.

(b) Combination of regular and correspondence study.

(1) If—in addition to regular coursework—an eligible student takes correspondence courses from either his or her own institution or another institution under a consortium agreement with the student's institution, the correspondence work may be included in determining the student's enrollment status.

(2) Except as noted in subparagraph (3), the correspondence work that will be included is that amount of work which—

(i) Applies toward the student's degree or certificate or is remedial work necessary for the student to proceed in his or her course of study;

(ii) Is completed within the period of time required for regular course work; and

(iii) Does not exceed the amount of the student's regular course work.

(3) Notwithstanding subparagraph (b)(2)(iii), a student who would be a half-time student based solely on his or her correspondence work will be considered a half-time student unless the calculation in subparagraph (b)(2) indicates a greater status.

(20 U.S.C. 1070a.)

**§ 690.10 Administrative cost allowance to participating schools.**

(a) The Secretary will pay to each participating institution an amount equal to \$10 per award year for each student who receives a Pell Grant at that institution for that year.

(b) All funds an institution receives under this section must be used solely for the institution's costs of administering the Pell Grant, Supplemental Educational Opportunity Grant, College Work-Study and National Direct Student Loan programs.

(20 U.S.C. 1096)

2. Subpart B is revised to read as follows:

**Subpart B—Application Procedures for Determining Expected Family Contribution****§ 690.11 Application.**

(a) As the first step to receiving a Pell Grant, a student applies on an approved form to the Secretary to have his or her expected family contribution determined. Facsimile copies of this form are not acceptable.

(b) The student, and where relevant, the student's parents or spouse, must submit information that is accurate and

complete as of the date the application is signed.

(c) The address provided by the student must be his or her residence and not the address of the school, unless the student resides at the school.

(20 U.S.C. 1070a)

**§ 690.12 Certification of information.**

(a) The applicant, and where relevant the applicant's parents or spouse, must provide (if requested by either the Secretary or the school) information or documents, including a copy of Federal Income Tax Returns, necessary to verify the accuracy of the information provided.

(b) Failure to provide the requested documentation may make the applicant ineligible to receive a Pell Grant.

(20 U.S.C. 1070a)

**§ 690.13 Deadline for filing applications.**

For each award year the Secretary will establish application filing deadlines for determining expected family contributions.

(20 U.S.C. 1070a)

**§ 690.14 Notification of expected family contribution.**

The Secretary will send to each eligible applicant a "Student Eligibility Report" (SER) which states the amount of the applicant's expected family contribution and information used in that computation.

(20 U.S.C. 1070a)

**§ 690.15 Applicant's request for recomputation of expected family contribution because of clerical or arithmetic error.**

(a) An applicant may request a recomputation of his or her expected family contribution if he or she believes a clerical or arithmetic error has occurred, or if the information submitted was inaccurate when the application was signed.

(b) A request for recomputation must be made on an approved form and must be received by the Secretary no later than the annual deadline unless the recomputation is necessary because of a request made by the Secretary to verify information.

(20 U.S.C. 1070a)

**§ 690.16 Request for recomputation of expected family contribution because of extraordinary circumstances.**

In filing an application to have an expected family contribution determined, an applicant may provide

financial information relating to the tax year immediately following the base year if the conditions in §§ 690.39 or 690.48 apply.

(20 U.S.C. 1070a)

3. Subpart F is amended to read as follows:

**Subpart F—Determination of Pell Grant Awards**

**§ 690.61 Submission process and deadline for student eligibility report.**

(a)(1) A student applies for a Pell Grant by submitting a valid "Student Eligibility Report" (SER) to his or her institution or to the Secretary, if that institution is participating in the Pell Grant Program under the Alternate Disbursement System (ADS).

(2) The SER is considered valid only if all information used in the calculation of the eligibility index is complete and accurate when the application was signed. Institutions are entitled to rely on SER information except under conditions set forth in § 690.77.

(b) Except as noted in § 690.77, to receive a Pell Grant, a student who enrolls before May 1 of an award year must submit the SER to his or her institution on or before May 31 of that award year.

A student who enrolls for the first time in the award year on or after May 1 of that award year may submit the SER to the institution on or before June 30 of that award year.

(c) A student attending an institution participating in the Pell Grant Program under the ADS has an additional ten days to submit the SER to the Secretary: June 10 for those who enroll before May 1, and July 10 for those who enroll on or after May 1.

(d) A student who submits an SER to an institution when he or she is no longer enrolled and eligible for payment at that institution may not be paid a Pell Grant.

(20 U.S.C. 1070a)

**§ 690.62 Calculation of a Scheduled Pell Grant at full-funding.**

(a) When funds are available to satisfy all payments, the Secretary will pay each eligible, full-time student for a complete academic year a Scheduled Pell Grant which is the lowest of:

- (1) In award year 1981-82,
  - (i) the difference between \$1,900 and the expected family contribution stated on his or her SER; or

(ii) 50 percent of his or her cost of attendance; or

(iii) the difference between his or her cost of attendance and expected family contribution.

(2) In award year 1982-83,

(i) the difference between \$2,100 and the expected family contribution stated on his or her SER; or

(ii) 60 percent of his or her cost of attendance; or

(iii) the difference between his or her cost of attendance and expected family contribution.

(3) In award year 1983-84,

(i) the difference between \$2,300 and the expected family contribution stated on his or her SER; or

(ii) 65 percent of his or her cost of attendance; or

(iii) the difference between his or her cost of attendance and expected family contribution.

(4) In award year 1984-85,

(i) the difference between \$2,500 and his or her expected family contribution stated on his or her SER; or

(ii) 65 percent of his or her cost of attendance; or

(iii) the difference between his or her cost of attendance and expected family contribution.

(5) In award year 1985-86,

(i) the difference between \$2,600 and the expected family contribution stated on his or her SER; or

(ii) 70 percent of his or her cost of attendance; or

(iii) the difference between his or her cost of attendance and expected family contribution.

(b) Notwithstanding paragraph (a) of this section, no payment will be made if the student's Scheduled Pell Grant is less than \$200.

(20 U.S.C. 1070a(a)(2).)

**§ 690.63 Calculation of a Scheduled Pell Grant at less than full funding.**

(a) When funds are not available to satisfy all payments, the Secretary calculates a Scheduled Pell Grant at less than full funding by—

- (1) Determining the maximum grant award at full funding for that award year. The maximum grant award is the maximum Pell Grant authorized for the award year without regard to an applicant's expected family contribution or cost of attendance;

(2) Subtracting from that amount, the applicant's expected family contribution; and

(3) Reducing the remainder, based on the applicant's expected family contribution, according to the table in paragraph (b) of this section.

*The amount calculated in paragraph (a) of this section is reduced by:*

<i>(b) If the applicant's expected family contribution is:</i>	<i>reduced by:</i>
\$0 to \$600.....	0
\$601 to \$800.....	10
\$801 to \$1,000.....	20
\$1,001 to \$1,200.....	30
\$1,201 to \$1,600.....	40
\$1,601 or more.....	50

(c) If the amount appropriated for an award year exceeds the amount needed for making payments under paragraph (a) of this section, the Secretary shall pay the excess to each eligible student in proportion to the degree that the student's award was reduced in accordance with paragraph (b) of this section.

(d) If the amount appropriated for an award year is less than the amount needed for making grants under paragraph (a) of this section, the Secretary shall reduce each amount determined under paragraph (a) of this section according to the following formula:

Scheduled Pell Grant at Pro-Rata Reduction equals amount determined in paragraph (a) of this section times appropriations available for Pell Grants divided by appropriation needed to fund Pell Grants under paragraph (a) of this section.

(e) At less than full funding, the Secretary will pay a Pell Grant to a full time student for a full academic year in an amount which is the lowest of:

(1) The amount calculated in paragraph (a), (c) or (d) of this section, as appropriate;

(2) The appropriate cost of attendance limitation; or

(3) The difference between the student's cost of attendance and expected family contribution.

(f) Notwithstanding paragraph (e) of this section, no payment may be made if

(1) The student's award is less than \$50; or

(2) The student's Scheduled Pell Grant at full funding is less than \$200.

(20 U.S.C. 1070a)

#### § 690.64 Maximum Pell Grant as percentage of cost of attendance.

Notwithstanding § 690.62 and § 690.63, in any award year—

(a) If the maximum grant for that award year is \$1,900 or less, no grant

may exceed 50 percent of the recipient's cost of attendance;

(b) If the maximum grant for that award year is at least \$1,901 but not more than \$2,099, no grant may exceed 55 percent of the recipient's cost of attendance;

(c) If the maximum grant for that award year is at least \$2,100 but not more than \$2,299, no grant may exceed 60 percent of the recipient's cost of attendance; and

(d) If the maximum grant for any award year is at least \$2,300 but not more than \$2,599, no grant may exceed 65 percent of the recipient's cost of attendance.

(20 U.S.C. 1070a)

#### § 690.65 Calculation of a Pell Grant for a payment period.

(a) At those institutions using semesters, trimesters, quarters, or other academic terms and measuring progress by credit hours, a student's Pell Grant for each payment period is calculated as follows:

(1) Determine his or her enrollment status for the term.

(2) Based upon that enrollment status, determine his or her annual award from the Payment Schedule (full-time students), or one of the Disbursement Schedules (part-time students), as appropriate.

(3) Divide the amount determined in subparagraph (2) by the number of terms in an academic year if those terms are of equal length.

(4) If those terms are not of equal length, determine that portion of the award derived in subparagraph (2) which reflects the proportion of the academic year represented by that term. However, a payment for any term may not exceed 50 percent of the award determined in subparagraph (2). To insure this, payments for unequal terms must be adjusted if necessary.

(b) At those institutions which measure progress by clock hours or which measure progress by credit hours or units but do not use semesters, trimesters, quarters or other academic terms, a student's Pell Grant for each payment period is calculated by:

(1) Determining the student's Scheduled Pell Grant; and

(2) Multiplying the Scheduled Pell Grant by:

The number of credit or clock hours the student is expected to take in a payment period divided by the number of credit or clock hours that a full-time student would take in an academic year.

(b) Notwithstanding paragraphs (a) and (b) of this section—

(1) A student may not receive a Pell Grant if the amount which the student

would receive, projected on the basis of a full academic year, would be less than either \$200 at full funding or \$50 at less than full funding; and

(2) The amount of a student's award for an award period may not exceed his or her Scheduled Pell Grant award for that award year.

(20 U.S.C. 1070a)

#### § 690.66 Calculation of a Pell Grant for a payment period which occurs in two award periods.

A student who enrolls in a payment period which is scheduled to occur in two award years shall be paid in accordance with the following rules—

(a)(1) The entire payment period will be considered to occur within one award year.

(2) The institution will determine the award year in which the payment period will be placed.

(3) The determination made in paragraph (a)(2) of this section must be the same for all Pell Grant recipients for all payment periods (in a program) which begin on the same day.

(4) If the institution places the payment period in the first award year, it must pay the student with funds from the first award year.

(5) If the institution places the payment period in the second award year, it must pay the student with funds from the second award year.

(b) The institution may not make a payment which will result in the student receiving more than his or her Scheduled Pell Grant award for that award year.

(c)(1) If a term-based institution offers a series of mini-sessions which occurs in two award years, the combined sessions will be treated as one term. A student may not receive more than one term's award for completing any combination of these sessions.

(2) For such mini-sessions, a term-based institution must determine the student's enrollment status for the entire term. That enrollment status will be based upon—

(i) The total number of credits enrolled for in all sessions if that number is known when the award is calculated, or

(ii) A projected number of credits based upon the credits enrolled for in the first session, if the number of credits to be taken in subsequent sessions is unknown when the award is calculated.

(20 U.S.C. 1070a)

#### § 690.67 Transfer student: attendance at more than one institution during an award period.

(a) If a Pell Grant recipient withdraws from one institution and enrolls at a

second in the same award year, the student must submit an SER to the second institution or to the Secretary for an institution participating in the program under ADS.

(b) The second institution (or the Secretary for ADS schools) calculates the student's award according to § 690.65.

(c) The second institution (or the Secretary for ADS schools) pays a Pell Grant for only that portion of the award year in which the student is enrolled at that institution. The grant must be adjusted to ensure that the student does not exceed the Scheduled Pell Grant for that award year.

(d) A transfer student must repay any amount received in an award year which exceeds the Scheduled Pell Grant. (20 U.S.C. 1070a)

#### § 690.68 Correspondence study.

A student, enrolled in a program of study by correspondence will be paid according to the following procedures:

(a) The institution prepares a written schedule for submission of lessons. This schedule must reflect a work load of at least 12 hours of preparation per week. It is used to determine the length of the program.

(b) The student's Pell Grant for an award year is calculated by:

(1) Determining the Scheduled Pell Grant according to §§ 690.62 or 690.63, whichever is appropriate, taking into account § 690.64, and

(2) Multiplying the Scheduled Pell Grant by the lesser of the following fractions:

$\frac{1}{2}$  or the hours of preparation in the award year divided by the hours of preparation in the academic year.

(This procedure insures that students in a program of study by correspondence are paid as half-time students.)

(d) A student will receive two equal payments for an award year. The first payment will be made after the student has submitted 25 percent of the lessons scheduled for the award year.

(e) The final payment will be made after the student has submitted 75 percent of the lessons scheduled for the award year.

(20 U.S.C. 1070a)

4. Subpart G is amended to read as follows:

#### Subpart G—Administration of Grant Payments—Regular Disbursement System

##### § 690.71 Scope.

This subpart deals with program administration by an institution of higher education that has entered into

an agreement with the Secretary to calculate and pay Pell Grant awards.

(20 U.S.C. 1070a)

##### § 690.72 Institutional agreement—regular disbursement system (RDS).

(a) The Secretary may enter into an agreement with an institution of higher education under which the institution will calculate and pay Pell Grants to its students. The agreement will be on a standard form provided by the Secretary and will contain the necessary terms to carry out this part.

(b) The Secretary will send a Payment Schedule for each award year to an institution that has entered into an agreement under paragraph (a) of this section.

(20 U.S.C. 1070a)

##### § 690.73 Termination of agreement—regular disbursement system.

(a) Termination by the Secretary. The Secretary may terminate the agreement with an institution by giving—

(1) 30 days written notice; or  
(2) Less than 30 days written notice if it is necessary to prevent the likelihood of a substantial loss of funds to the Federal government or to students.

(b) Information provided. The institution must provide the following information to the Secretary if the Secretary terminates the agreement:

(1) The name and enrollment status of each eligible student who submitted a valid SER to the institution before the termination date;

(2) The amount of funds the institution paid to Pell Grant recipients for the award year in which the agreement is terminated;

(3) The amount due to each student eligible to receive a Pell Grant through the end of the award year; and

(4) An accounting of Pell Grant expenditures to the date of termination.

(c) Termination by the institution. The institution may terminate the agreement by giving the Secretary written notice. The termination becomes effective on June 30 of that award year. The institution must carry out the agreement for the remainder of the award year.

(d) Termination because of a change in ownership which results in a change of control. The agreement automatically terminates when an institution changes ownership which results in a change of control. The Secretary will enter into an agreement with the new owner if the institution complies with requirements set forth in Subpart B of the Student Assistance General Provisions (34 CFR Part 668).

(e) If an agreement is terminated, the institution's eligibility as discussed in § 690.7 is not terminated but the

Secretary will pay and institution's students ONLY if the institution enters into an ADS agreement (See § 690.92.).

(20 U.S.C. 1070a)

##### § 690.74 Advancement of funds to institutions.

The Secretary will advance funds for each award year, from time to time, to RDS institutions, based on his or her estimate of the institution's need for funds to pay Pell Grants to its students.

(20 U.S.C. 1070a)

##### § 690.75 Determination of eligibility for payment.

(a) An institution may pay a Pell Grant to a student only after it determines that the student—

(1) Meets the eligibility requirements set forth in § 690.4;

(2) Is maintaining satisfactory progress in his or her course of study;

(3) Is not in default on any National Defense/Direct Student Loan made by that institution or on any Guaranteed Student Loan or Parent Loan for Undergraduate Students (PLUS) received to meet the cost of attendance at that institution; and

(4) Does not owe a refund on a Pell Grant, a Supplemental Grant or a State Student Incentive Grant received to meet the cost of attending that institution.

(b)(1) Before making any payment to a student, the institution must confirm that he or she continues to meet the criteria set forth in paragraph (a) of this section.

(2) However, if an eligible student submits an SER to the institution and becomes ineligible before receiving a payment, the institution must pay the student only the amount which it determines could have been used for educational purposes before the student became ineligible.

(c) If an institution determines at the beginning of a payment period that a student is not maintaining satisfactory progress, but reverses itself BEFORE the end of the payment period, the institution may pay a Pell Grant to the student for the entire payment period.

(d) If an institution determines at the beginning of a payment period that a student is not maintaining satisfactory progress, but reverses itself AFTER the end of the payment period, the institution may neither pay the student a Pell Grant for that payment period nor make adjustments in subsequent Pell Grant payments to compensate for the loss of aid for that period.

(e) Conditions under which students who are overpaid grants may continue to receive Pell Grants are as follows:

(1) Overpayment of a Pell Grant. If an institution makes an overpayment of a

Pell Grant to a student, it may continue to make Pell Grant payments to that student if (i) the student is otherwise eligible; and (ii) it can eliminate the overpayment in the award year in which it occurred by adjusting the subsequent Pell Grant payments for that award year.

(2) Overpayment of a Pell Grant due to institutional error. In addition to the exception provided in paragraph (e)(1) of this section, if the institution makes an overpayment of Pell Grant to a student as a result of its own error, it may continue to make payments to that student if:

(i) The student is otherwise eligible, and

(ii) The student acknowledges in writing the amount of overpayment and agrees to repay it in a reasonable period of time.

(3) Overpayment on a Supplemental Grant. An institution may continue to make Pell Grant payments to a student who receives an overpayment on a Supplemental Grant if:

(i) The student is otherwise eligible, and

(ii) It can eliminate the overpayment by adjusting subsequent financial aid payments (other than Pell Grants) in the same award year in which it occurred.

(f) An institution, in determining whether a student is in default on a loan made under the Guaranteed Student Loan Program or the PLUS Program, may rely upon the student's written statement that he or she is not in default unless the institution has information to the contrary.

(g) Conditions under which students who are in default on loans made for attendance at that institution may receive Pell Grants are as follows:

(1) Guaranteed Student Loans and Parent Loans for Undergraduate Student (PLUS). An institution may pay a Pell Grant to a student who is in default on a Guaranteed Student Loan or a PLUS Loan if the Secretary (for federally insured loans) or a guaranteed agency (for a loan insured by that guarantee agency) determines that the student has made satisfactory arrangements to repay the defaulted loan.

(2) National Defense/Direct Student Loan. An institution may pay a Pell Grant to a student who is in default on a National Defense/Direct Student Loan made at that institution, if the student has made arrangements, satisfactory to the institution, to repay the loan.

(3) The Secretary considers a National Defense Student Loan, a National Direct Student Loan, a Guaranteed Student Loan, or a PLUS Loan which is discharged in bankruptcy to be in default for purposes of this section.

(h) For purposes of this section, an overpayment of a grant means that a student received payment of a grant greater than the amount he or she was entitled to receive.

(20 U.S.C. 1070a)

#### § 690.76 Frequency of payment.

(a) In each payment period, an institution may pay a student at such times and in such installments as it determines will best meet the student's needs.

(b) Only one payment is required if a portion of an academic year occurring within one award year is less than three months.

(c) The institution may pay funds due a student for any completed period in one lump sum. The student's enrollment status will be determined according to work already completed.

(20 U.S.C. 1070a)

#### § 690.77 Verification of information on the SER—withholding of payments.

(a)(1) The Secretary may require that a student verify the information submitted on the application and included on the SER, by submitting appropriate documentation to the institution or to the Secretary.

(2) The Secretary may also require that the institution withhold payment of a student's grant until the institution or the Secretary determines that the student has supplied the correct information.

(b) If an institution believes that any information on the SER used in calculating the student's expected family contribution is inaccurate, or if the application is chosen by the Secretary for verification, the institution must request that the student verify the information on the SER.

(c) The Secretary will establish and publish—

(1) Procedures to be used in verifying information for selected students ("Validation Procedures"), and

(2) The conditions under which payments will be made for these students.

(d)(1) If a student makes a correction which results in a change in his or her expected family contribution, the student must submit the SER to the institution, and the institution must recalculate the student's award based on the verified SER. Any overpayment must be repaid by the student.

(2) If the documentation requested by the institution under this section does not verify the information on the SER, or if the student does not correct the SER, the institution must forward the student's name, social security number and other relevant information to the

Secretary in accordance with the procedures referenced in paragraph (c) of this section.

(e) A student corrects an SER by—

(1) Providing accurate information on the SER;

(2) Getting the appropriate signatures on the SER; and

(3) Re-submitting the SER to the Secretary.

(f) If an institution has documentation which indicates that the information used to calculate the student's expected family contribution on the SER is inaccurate, it may not pay a Pell Grant for any award year until the student corrects the error or verifies the data.

(g) If an institution believes, but cannot document, that inaccuracies exist on the SER, it may not withhold payments unless authorized by the Secretary. These cases must be forwarded to the Secretary.

(h)(1) If the Secretary requests documentation, the student must comply within a time period set by the Secretary.

(2)(i) If the student provides the requested documentation on time, he or she will be eligible for Pell Grant payments based upon the verified SER.

(ii) If the verified SER is submitted to the institution after the appropriate deadline as specified in § 690.61, but within an established time period to be determined by the Secretary, the student may be paid only up to the amount withheld because of the verification process.

(3) If the student does not provide the requested documentation within the established time period—

(i) The student will forfeit the Pell Grant for the award year.

(ii) Any grant payments received must be returned to the Secretary, and

(iii) No further Pell Grant applications will be processed for that student until documentation has been provided or the Secretary decides there is no longer need for documentation.

(20 U.S.C. 1070a.)

#### § 690.78 Method of disbursement—by check or credit to student's account.

(a) The institution may pay a student either directly by check or by crediting his or her account with the institution. The institution must notify the student of the amount of money he or she can expect to receive, and how he or she will be paid.

(b)(1) The institution may not make a payment to a student for a payment period until the student is registered for that period.

(2) The earliest an institution can directly pay a registered student is 10

days before the first day of classes of a payment period.

(3) The earliest an institution can credit a registered student's account is 3 weeks before the first day of classes of a payment period.

(c) The institution must return to the Pell Grant account any funds paid to a student who, before the first day of classes—

(1) Officially or unofficially withdraws, or

(2) Is expelled.

(d)(1) If an institution pays a student directly, it must notify him or her when it will pay the Pell Grant award.

(2) If the student has not picked up the check at the end of the 15 day period, the institution may credit the student's account for any amount owed to it for the award year.

(3) If a student does not pick up the check on time, the institution must keep that check for 15 days after the date the student's enrollment for that award year ends.

(4) A student forfeits the right to receive the proceeds of the check if he or she does not pick up the check by the end of the 15 day period.

(5) Notwithstanding paragraph (d)(4) of this section, the institution may, if it chooses, pay a student who did not pick up the check, through the next payment period.

(20 U.S.C. 1070a.)

#### § 690.79 Educational purpose statement.

(a) An institution may not pay a Pell Grant unless the student files a statement of educational purpose with the institution in which the student declares that he or she will use Pell Grant funds solely for educational expenses connected with attendance at the institution.

(b) The Secretary considers the following statement as satisfying this requirement.

#### Statement of Educational Purpose

I declare that I will use any funds I receive under the Pell Grant program solely for expenses connected with attendance at

(Name of Institution) \_\_\_\_\_

(Date) \_\_\_\_\_

(Signature) \_\_\_\_\_

(20 U.S.C. 1090)

#### § 690.80 Recovery of overpayments.

(a)(1) The student is liable for any overpayment made to him or her.

(2) Also, the institution is liable for an overpayment it makes to a student if the regulations indicate that the payment should not have been made. The institution must restore those funds to

the Pell Grant account even if it cannot collect the overpayment from the student.

(b) If an institution makes an overpayment for which it is not liable, it must help the Secretary recover the overpayment by—

(1) Making a reasonable effort to contact the student and recover the overpayment; and, if successful,

(2) Providing the Secretary with the student's name, social security number, amount of overpayment, and other relevant information.

(20 U.S.C. 1070a.)

#### § 690.81 Recalculation of a Pell Grant award.

(a) Change in expected family contribution. (1) If the student's expected family contribution changes the institution must recalculate the Pell Grant Award.

(2) Except as provided in § 690.77(h)(ii), the institution must adjust the award and pay the student the amount he or she is entitled to for the award year if the expected family contribution is recalculated because of—

(i) A clerical or arithmetic error under § 690.15, or

(ii) Extraordinary circumstances which affect the expected family contribution under § 690.39 and § 690.48.

(3) If a student's expected family contribution is recalculated because of a correction of the information requested under § 690.12 or § 690.77, the student's Pell Grant for the award year must be adjusted. Where possible, the adjustment must be made within the same award year.

(4) If the recalculation takes place in a subsequent award year, the student will be

(i) Eligible to receive payment unless prohibited under the provisions of § 690.77(h) and

(ii) Required to return any overpayment at the time of recalculation.

(b) Change in enrollment status.

(1) If an institution decides that a student's enrollment status has changed during a payment period, it may (but is not required to) establish a policy under which the student's award may be recalculated.

(2) If such a policy is established, it must apply to all students.

(3) If a student's award is recalculated, the institution determines the total amount the student is entitled to for the entire payment period by taking into account—

(i) The portion of the payment period at the original enrollment status;

(ii) The portion of the payment period at the new enrollment status; and

(iii) Any change in the student's cost of attendance.

(20 U.S.C. 1070a.)

#### § 690.82 Fiscal control and fund accounting procedures.

(a)(1)(i) An institution must receive and process all Pell Grant funds through one identifiable bank account.

(ii) This account may be an existing one (preferably one maintained for Federal funds) if the institution maintains adequate accounting records to account for the Pell Grants funds separately from the other funds in that account.

(iii) At no time may the Pell Grant funds in this bank account be less than the balance indicated in the institution's accounting records for these funds.

(2) The institution must account for the receipt and expenditure of Pell Grant funds in accordance with generally accepted accounting principles.

(b) A separate bank account for Pell Grant funds is not required. However, the institution must notify any bank in which it deposits Pell Grant funds of all accounts in that bank in which it deposits Federal funds. This notice can be given by either:

(i) Including in the name of the account the fact that Federal funds are deposited therein; or

(ii) Sending a letter to the bank listing the accounts in which Federal funds will be deposited. A copy of this letter must be retained in the institution's files.

(c) Except for funds received under § 690.10, funds received by an institution under this part are held in trust for the intended student beneficiaries and may not be used or hypothecated for any other purpose.

(20 U.S.C. 1070a.)

#### § 690.83 Maintenance and retention of records.

(a) Each institution must maintain adequate records which include the fiscal and accounting records that are required under § 690.82 and records indicating—

(1) The eligibility of all enrolled students who have submitted a valid SER to the institution;

(2) The name, social security number, and amount paid to each recipient;

(3) The amount and date of each payment;

(4) The amount and date of any overpayment that has been restored to the program account;

(5) The "Student Eligibility Report" for each student;

(6) The student's cost of attendance;

(7) How the student's full or part-time enrollment status was determined; and  
(8) The student's enrollment period.

(b)(1) The institution must make the records listed in paragraph (a) available for inspection by the Secretary's authorized representative at any reasonable time in the institution's offices. It must keep these records for five years after it submits an accounting of each award year's funds to the Secretary.

(2) An accounting of each award year's funds occurs when the institution submits to the Secretary the June 30 Progress Report for that award year. The June 30 Progress Report (ED Form 255-3) is the report on which an institution reports to the Secretary the total amount of money it has expended in the Pell Grant Program during an award year and the total number of Basic Grant recipients at that institution during that award year.

(c) The institution must keep records involved in any claim or expenditure questioned by Federal audit until resolution of any audit questions.

(d) An institution may substitute microfilm copies in lieu of original records in meeting the requirements of this section.

(20 U.S.C. 1070a.)

#### § 690.84 Submission of reports.

The institution must submit the reports and information the Secretary requires in connection with the funds advanced to it and must comply with the procedures the Secretary finds necessary to ensure that the reports are correct.

(20 U.S.C. 1070a.)

#### § 690.85 Audit and examination.

(a) Federal audits. The institution must give the Secretary, the Comptroller General of the United States, or their duly authorized representatives, access to the records specified in § 690.82 and § 690.83 and to any other pertinent books, documents, papers, and records.

(b) Non-Federal audits. The institution must audit or have audited under its direction all Pell Grant Program transactions to determine at a minimum—

(1) The fiscal integrity of financial transactions and reports; and

(2) If such transactions are in compliance with the applicable laws and regulations. Such audits will be performed in accordance with the Department of Education's "Audit Guide" for the Pell Grant Program.

(3) The institution must have an audit performed at least once every two years.

(c) The institution must submit audit reports to the institution's local regional office of the Department of Education's Audit Agency. It must give the Audit Agency and the Secretary access to records or other documents necessary to the audit's review.

(20 U.S.C. 1070a.)

5. Subpart H is amended to read as follows:

#### Subpart H—Administration of Grant Payments—Alternate Disbursement System

##### § 690.91 Scope.

This subpart deals with program administration by an institution of higher education under the Alternate Disbursement System (ADS). Under the ADS, the Secretary calculates and pays the Pell Grant awards.

(20 U.S.C. 1070a.)

##### § 690.92 Institutional agreement—Alternate Disbursement System (ADS).

(a) Under ADS, the Secretary will calculate and pay Pell Grant awards to students enrolled in an institution which has entered into an agreement to carry out this subpart.

(b) Under this agreement, the institution agrees to:

(1) Complete ED Form 304 for each eligible student as specified in § 690.94; and

(2) Maintain and keep records as specified in § 690.90.

(20 U.S.C. 1070a.)

##### § 690.93 Change in ownership and change to the Regular Disbursement System (RDS).

(a) Change to RDS. The Secretary may enter into an agreement with an ADS institution which wishes to participate in the program under the Regular Disbursement System. However, the agreement will go into effect July 1 of the succeeding award year.

(b) Termination because of a change in ownership that results in a change in control.

(1) An ADS agreement terminates when an institution changes ownership that results in a change in control.

(2) The Secretary may enter into an agreement with the new owner if the institution complies with the requirements set forth in Subpart B of the Student Assistance General Provisions (34 CFR Part 668).

(20 U.S.C. 1070a.)

##### § 690.94 Calculation and disbursement of awards by the Secretary of Education.

(a) An eligible student enrolled in an institution participating in the Pell Grant Program under the ADS applies to the

Secretary for a Pell Grant according to the following procedures:

(1) The student submits an SER to his or her institution and obtains an ED Form 304 from the institution;

(2) The student completes the ED Form 304, including the statement of educational purpose described in § 690.79, and submits it to the institution;

(3) On the ED Form 304 the institution certifies that the student—

(i) Meets eligibility requirements of § 690.4,

(ii) Is maintaining satisfactory progress in his or her course of study,

(iii) Does not owe a refund on grants received for attendance at that institution under the Pell Grant, the Supplemental Grant, or the State Student Incentive Grant Programs, and

(iv) Is not in default on any National Defense/Direct Student Loan made by the institution or on any Guaranteed Student Loan received for attendance at that institution. (In determining whether a student is in default on a GSL, the institution may rely on a written statement provided by the student unless the institution has information to the contrary); and

(4) The institution returns the SER and ED Form 304 to the student, who then submits these documents to the Secretary. Both documents must be received by the Secretary on or before the deadline dates described in § 690.61.

(b) If an institution believes that the information on an SER may be in error, the institution must notify the student and request documentation or correction. Any case not resolved by the institution should be reported to the Secretary.

(c) The Secretary will calculate a student's award in accordance with Subpart F of this part and will pay the student once every payment period.

(20 U.S.C. 1070a.)

##### § 690.95 Termination of enrollment and refund.

(a) The institution must inform the Secretary of the date when a student officially or unofficially withdraws or is expelled during a payment period for which that student was paid.

(b) A student who officially or unofficially withdraws or is expelled from an institution before completion of 50 percent of a payment period for which he or she has been paid, will refund a prorated portion of the payment as determined by the Secretary.

(20 U.S.C. 1070a.)

§ 690.96 Maintenance and retention of records.

(a) An institution under the ADS must establish and maintain for each award year—

(1) Records relating to each Pell Grant recipient's enrollment status, and attendance costs at the institution; and

(2) Records showing when each recipient was enrolled.

(b) The institution must make these records available at the geographic location where the student will receive his or her degree or certificate of course completion, and must keep them for five years from the end of the award year.

(c) The institution will make available to the Secretary, the Comptroller General of the United States, and their authorized representatives, pertinent books, documents, papers, and records for audit and examination during the five year retention period.

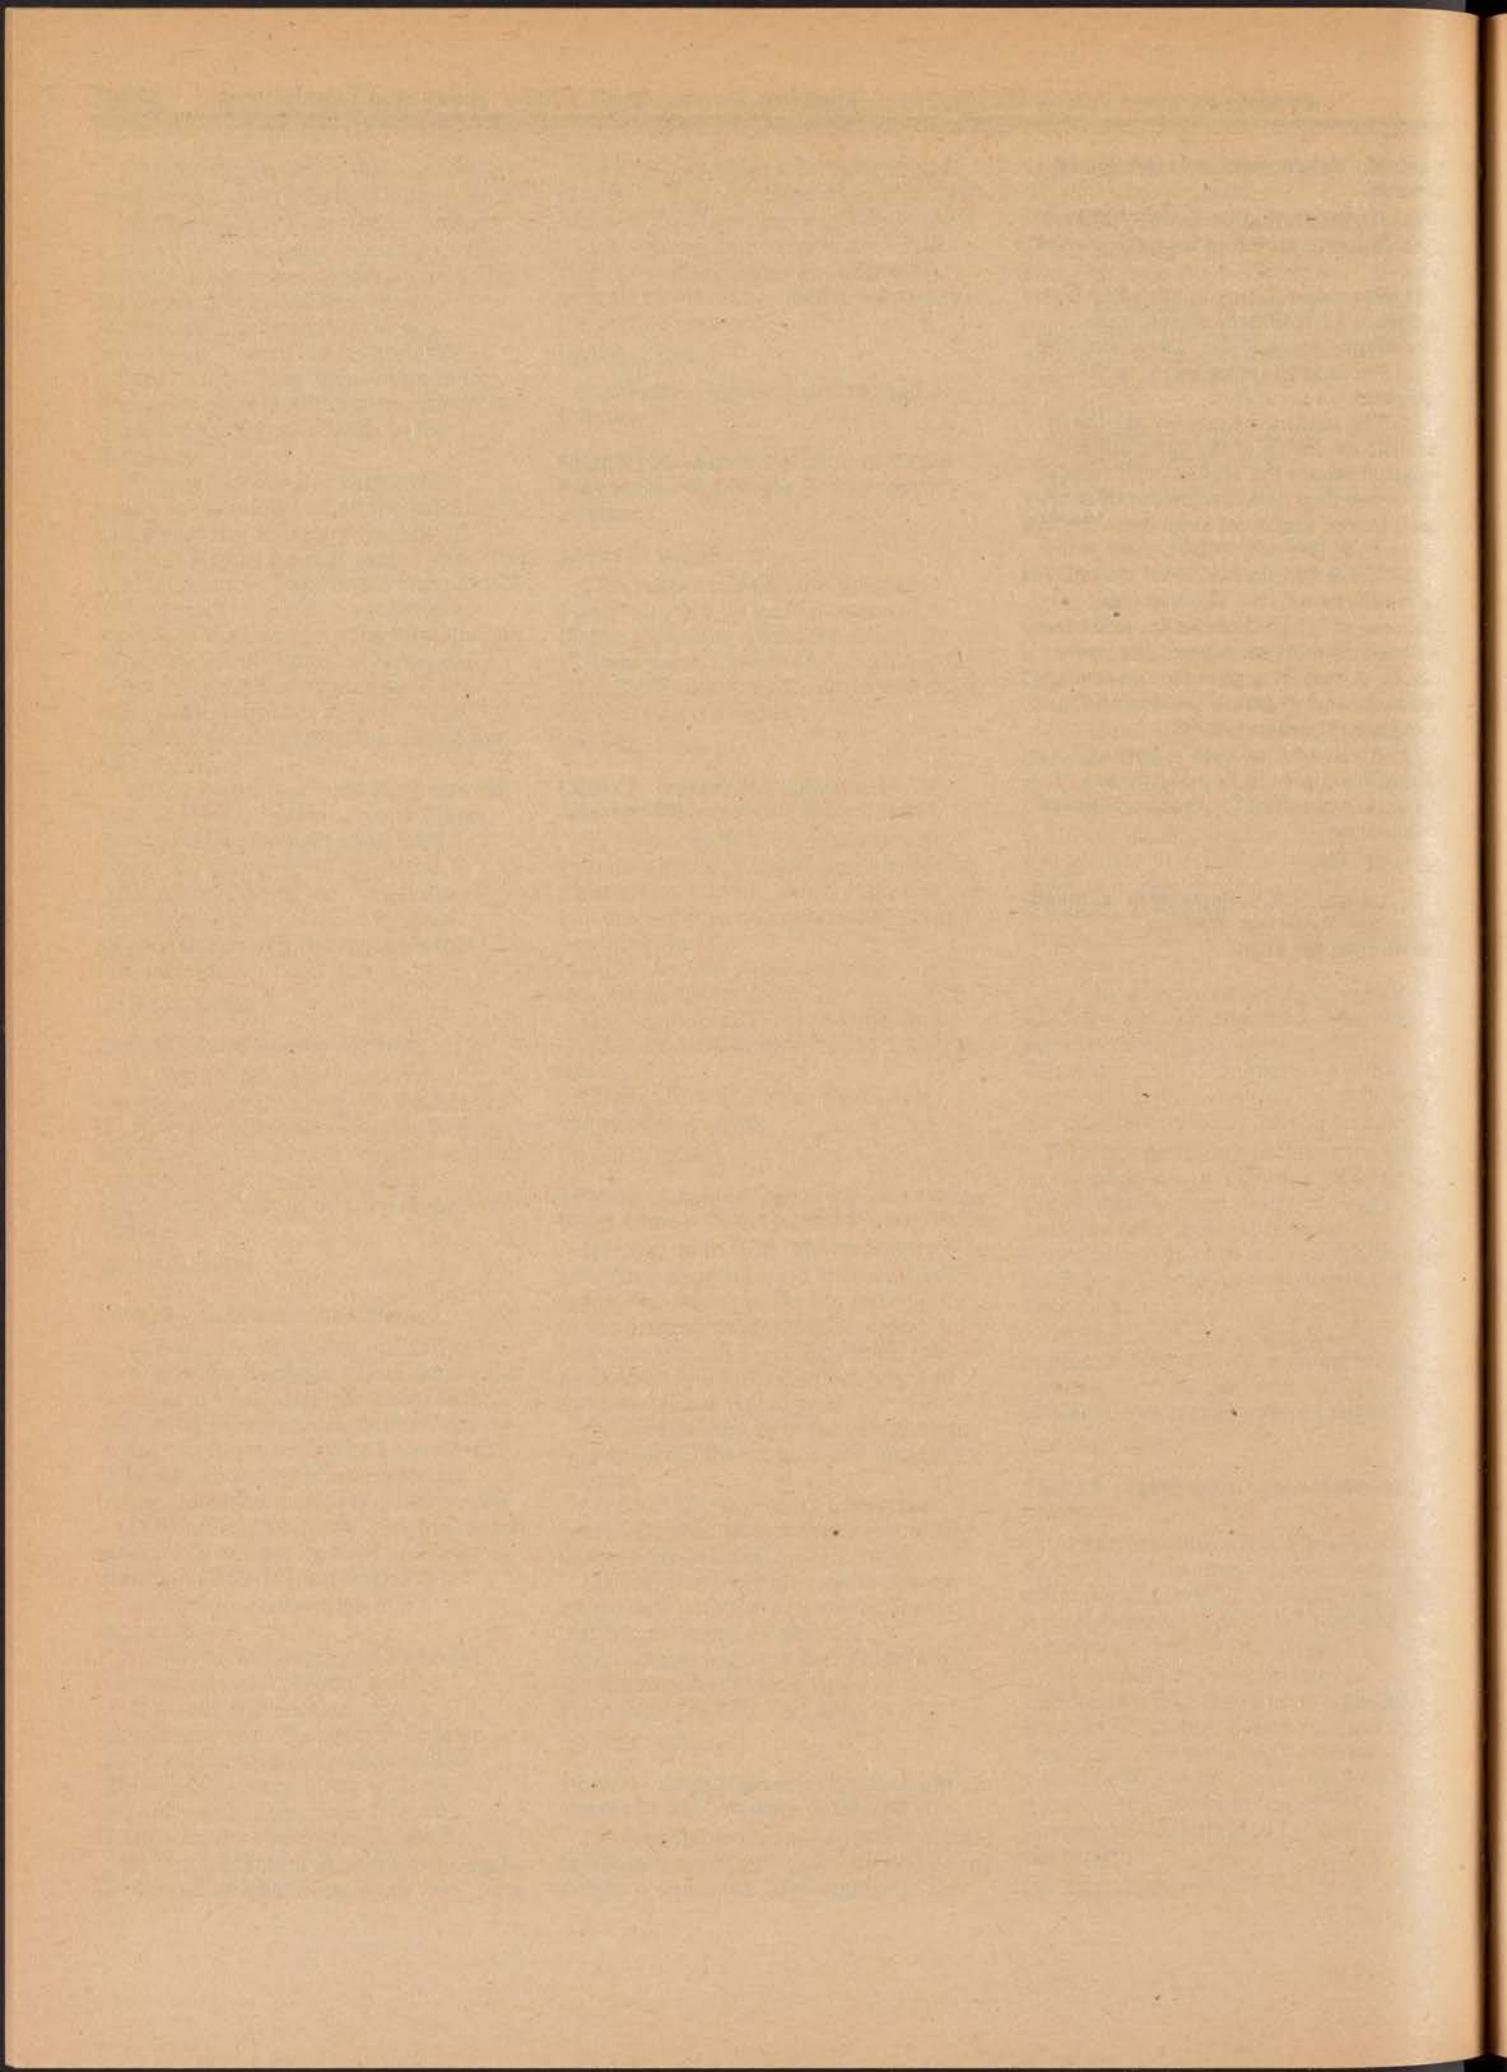

(d) An institution may substitute microfilm copies in lieu of original records in meeting the requirements of this section.

(20 U.S.C. 1070)

6. Appendix A to Part 960 is removed.
