- 85736 Cotton Dust Exposure** Labor/OSHA enunciates respirator use enforcement policy for the provisions of the cotton dust standard with respect to the period of use; effective 1-19-81
- 86362 Infants** HHS/FDA proposes requirements for quality control procedures for the manufacture of infant formula products

CONTINUED INSIDE

**FEDERAL REGISTER** Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers, free of postage, for \$75.00 per year, or \$45.00 for six months, payable in advance. The charge for individual copies is \$1.00 for each issue, or \$1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

## Highlights

- 85962 Medical Devices** HHS/FDA proposes regulations applicable to the classification of all dental devices; comments by 3-2-81 (186 documents) (Part III of this issue)
- 86296, 86304, 86372, 86378, 86390, 86394 Grant Programs—Education** ED rules and proposes to rule on various program regulations; varying comment and effective dates (Parts IX, X and XII-XV of this issue)
- 85815 Grant Programs—Education** ED revokes 1-6-81 closing date for submittal of preapplications for major grants under the Grants for Research on Knowledge Use and School Improvement program
- 86278 Environmental Protection** EPA proposes standards of performance to limit emissions of volatile organic compounds (VOC) from new, modified, or reconstructed pressure sensitive tape and label manufacturing facilities; comments by 3-2-81; hearing on 1-30-81 (Part VIII of this issue)
- 85815 Grant Programs—Handicapped** ED invites applicants for the noncompeting continuation projects under the National Institute of Handicapped Research
- 86216 Government Contractors** Labor/FCCPO releases rules regarding affirmative action requirements; effective 1-29-81 with certain exceptions (Part VI of this issue)
- 86206 Government Contractors** Labor/FCCPO proposes rules addressing affirmative action obligations as it pertains to Veterans of the Vietnam Era and handicapped workers; comments by 3-2-81 (Part V of this issue)
- 85864 Sunshine Act Meetings**

 Authority delegations by Secretary and General Offices  
 85696 Marketing and Transportation Services, Assistant Secretary, and Animal and Plant Health Inspection Service Administrator; Swine Health Protection Act provisions
- Animal and Plant Health Inspection Service**  
**RULES**  
 Animal and poultry import restrictions:  
 85720 Cattle; Harry S. Truman Animal Import Center; quarantine space allotment procedures  
 Livestock and poultry quarantine:  
 85718 Brucellosis  
**PROPOSED RULES**  
 Animal exports:  
 85767 Swine; pseudorabies testing
- Antitrust Division**  
**NOTICES**  
 Competitive impact statements and proposed consent judgments:  
 85837 B.F. Goodrich Co.  
 85840 Hercules Inc.
- Census Bureau**  
**NOTICES**  
 85804 Neighborhood statistics program; application deadline
- Civil Aeronautics Board**  
**NOTICES**  
 Hearings, etc.:  
 85803 Alaska International Air, Inc.; service mail rates investigation  
 85803 Mississippi Valley Airlines, Inc.
- Commerce Department**  
*See also* Census Bureau; Economic Development Administration; International Trade Administration; Minority Business Development Agency; National Bureau of Standards; National Oceanic and Atmospheric Administration; National Technical Information Service; National Telecommunications and Information Administration.  
**NOTICES**  
 Senior Executive Service:  
 85804 Bonus award schedule
- Commodity Credit Corporation**  
**NOTICES**  
 85801 Loan and payment programs; 1981 determinations; cotton
- Consumer Product Safety Commission**  
**PROPOSED RULES**  
 85777 Architectural glazing materials; safety standards; bathtub and shower doors, etc.; interpretation  
 85772 Safety standards; methodology for Commission consideration of findings
- Customs Service**  
**PROPOSED RULES**  
 85781 Merchandise; quotas, statistical information, and immediate delivery procedure  
 Merchandise, imported; transportation in bond and merchandise in transit:  
 85780 Assessment of liquidated damages under carriers bonds
- Defense Department**  
**NOTICES**  
 Meetings:  
 85812, 85813 Electron Devices Advisory Group (5 documents)
- Drug Enforcement Administration**  
**NOTICES**  
 Registration applications, etc.; controlled substances:  
 85844 Gold Drugs, Inc.  
 85844 Oddo, Dennis Stephen, D.D.S.  
 85845 Tuck, Marshall S., M.D.  
 Schedules of controlled substances; production quotas:  
 85843 Schedules I and II, 1981, aggregate
- Economic Development Administration**  
**NOTICES**  
 Senior Executive Service:  
 85804 Bonus award schedule
- Economic Regulatory Administration**  
**NOTICES**  
 Consent orders:  
 85817 Mapco, Inc.  
 85817 Petroleum import adjustment program; mandatory oil import license fees

**Education Department****RULES**

- 86390 Handicapped children education, assistance to States; interpretation
- 86296 Nomenclature changes and technical amendments
- 86394 Pell grant program; final rule and request for comments
- 86372 Pre-college teacher development in science program
- 86378 Rehabilitation training; final rule and request for comments
- PROPOSED RULES**
- 86315 Continuing education outreach—special projects program
- 86308 Continuing education outreach—State-administered program
- 86336 Experimental program for opportunities in advanced study and research in education
- Financial assistance to local and State agencies for children with special educational needs, etc.:
- 86306 By-pass implementation; written objection submission and show cause hearing procedures
- 86317 Handicapped research; special purpose grants and other assistance programs, etc.
- 86340 Higher education facilities, construction, reconstruction, and renovation financial assistance programs
- 86331 Legal profession training program
- 86312 Library and research and demonstration program
- 86333 Migrant and other seasonal farmwork, students whose families are engaged in; special educational programs; high school equivalency and college assistance migrant programs
- 86333 Pell grant program; cross-reference
- 86311 Refugees, special impact aid program
- 86315 Rehabilitation training program; cross-reference
- 86304 State student incentive grant program
- 86328 Veterans' cost-of-instruction payments program
- NOTICES**
- Education Appeal Board hearings:
- 85813 Maryland et al.
- 85814 Pennsylvania et al.
- Grant applications and proposals, closing dates:
- 85815 Handicapped; noncompeting continuation projects
- 85815 Knowledge use and school improvement research

**Employment and Training Administration****NOTICES**

- 85846 Labor surplus area classifications; annual list additions (2 documents)

**Employment Standards Administration****NOTICES**

- 86172 Minimum wages for Federal and federally-assisted construction; general wage determination decisions, modifications, and supersedeas decisions (Ala., Ark., Ariz., Fla., Ky., La., Me., Miss., Mont., N.J., N.Y., N.C., N. Dak., Pa., and S.C.)

**Energy Department**

See also Economic Regulatory Administration; Energy Research Office; Federal Energy Regulatory Commission.

**NOTICES****Meetings:**

- 85816 International Energy Agency Industry Advisory Board

**Energy Research Office****NOTICES****Meetings:**

- 85816 Energy Research Advisory Board

**Environmental Protection Agency****RULES**

Air quality implementation plans; approval and promulgation; various States, etc.:

- 85744 Alaska
- 85748 Virginia; correction

**PROPOSED RULES**

Air pollution; standards of performance for new stationary sources:

- 86278 Pressure sensitive tape and label manufacturing facilities; volatile organic compound (VOC) emissions

**Pesticide programs:**

- 85800 Biological control agents, exemption; notification to Secretary of Agriculture

**NOTICES**

Air pollution; standards of performance for new stationary sources, etc.:

- 85824 North Carolina; authority delegation

Grants; State and local assistance:

- 85826 Clean Air Act program grant; Oregon

Pesticides; experimental use permit applications:

- 85826 Merck & Co., Inc.

Toxic and hazardous substances control:

- 85823 Confidential information and data transfer to contractor

- 85825 Premanufacture notification requirements; test marketing exemption approvals

**Federal Contract Compliance Programs Office****RULES**

- 85750 Affirmative action requirements for government contractors

- 86216 Construction contractors; affirmative action requirements; coverage clarification; reporting requirements effective date stayed and female utilization goals extended

- 85862 Radiological emergency planning and preparedness, criteria and evaluation; memorandum of understanding with NRC

**Federal Energy Regulatory Commission****PROPOSED RULES**

Natural Gas Policy Act of 1978:

- 85779 Ceiling prices; high-cost natural gas produced from tight formations; Texas

**NOTICES**

Hearings, etc.:

- 85818 Chittenden Falls Hydro Power, Inc.
- 85819 Duke Power Co. (2 documents)
- 85820 El Paso Natural Gas Co.
- 85820 Lower Valley Power & Light, Inc.
- 85821 Missouri Utilities Co.
- 85821 Mitchell Energy Co., Inc.
- 85822 Rauniker, Inc.
- 85823 Vermont Electric Power Co., Inc.

- 85823 Western Gas Interstate Co.
- Federal Financial Institutions Examination Council**  
NOTICES
- 85827 Small business loans from depository institutions; compilation and disclosure of information; inquiry
- Fish and Wildlife Service**  
RULES  
Fishing:
- 85765 Big Stone National Wildlife Refuge, Minn., et al.
- Food and Drug Administration**  
RULES  
Animal drugs, feeds, and related products:
- 86272 Recycled animal waste, State regulation of; use of poultry litter as animal feed ingredient revoked
- 85727 Sponsor name change from Formica Laboratories to Mountaire Feeds & Vitamin Premixes
- Biological products:
- 85727 Blood and blood products; transfusion services and clinical laboratories approved for Medicare reimbursement; registration exemption
- Color additives:
- 85725 Lead acetate; closing date postponed
- Food additives:
- 85726 Antistatic and/or antifogging agents in food-packaging materials; sodium *n*-alkylsulfonate
- 85726 Hydroxyethylidene-1,1-diphosphonic acid
- Hearings, public, before advisory committees; establishment or termination, etc.:
- 85725 Open session meetings; annual reports elimination
- PROPOSED RULES**  
Biological products:
- 85785 Shipping temperature requirements
- 86362 Infant formula qualify control procedures
- 85962 Medical devices, dental; classification (86 documents; see preamble of first document for complete listing)
- NOTICES**  
Human drugs:
- 85829 Methadone treatment programs, medical standards; memorandum of understanding with National Institute on Drug Abuse
- Food and Nutrition Service**  
RULES
- 85699 Food stamp and distribution programs; payment of administrative costs of State agencies
- Food stamp program:
- 85697 Complaint procedures
- Forest Service**  
NOTICES  
Meetings:
- 85803 National Forest System Advisory Committee

Federal Register

Vol. 45, No. 251

Tuesday, December 30, 1980

## INFORMATION AND ASSISTANCE

### PUBLICATIONS

#### Code of Federal Regulations

CFR Unit	202-523-3419
General information, index, and finding aids	523-3517
Incorporation by reference	523-5227
Printing schedules and pricing information	523-4534

#### Federal Register

Corrections	523-5237
Daily Issue Unit	523-5237
General information, index, and finding aids	523-5227
Public Inspection Desk	633-6930
Scheduling of documents	523-3187

#### Laws

Indexes	523-5282
Law numbers and dates	523-5282
Slip law orders (GPO)	275-3030

#### Presidential Documents

Executive orders and proclamations	523-5233
Public Papers of the President	523-5235
Weekly Compilation of Presidential Documents	523-5235

#### Privacy Act Compilation

United States Government Manual	523-5230
---------------------------------	----------

#### SERVICES

Agency services	523-3408
Automation	523-3408
Dial-a-Reg	
Chicago, Ill.	312-663-0884
Los Angeles, Calif.	213-688-6694
Washington, D.C.	202-523-5022
Magnetic tapes of FR issues and CFR volumes (GPO)	275-2867
Public briefings: "The Federal Register—What It Is and How To Use It"	523-5235
Public Inspection Desk	633-6930
Regulations Writing Seminar	523-5240
Special Projects	523-4534
Subscription orders and problems (GPO)	783-3238
TTY for the deaf	523-5239

## FEDERAL REGISTER PAGES AND DATES, DECEMBER

## AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

**NOTE: As of September 2, 1980, documents from the Animal and Plant Health Inspection Service, Department of Agriculture, will no longer be assigned to the Tuesday/Friday publication schedule.**

## REMINDERS

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

## Rules Going Into Effect Today

Note: There were no items eligible for inclusion in the list of Rules Going Into Effect Today.

## List of Public Laws

Last Listing December 30, 1980

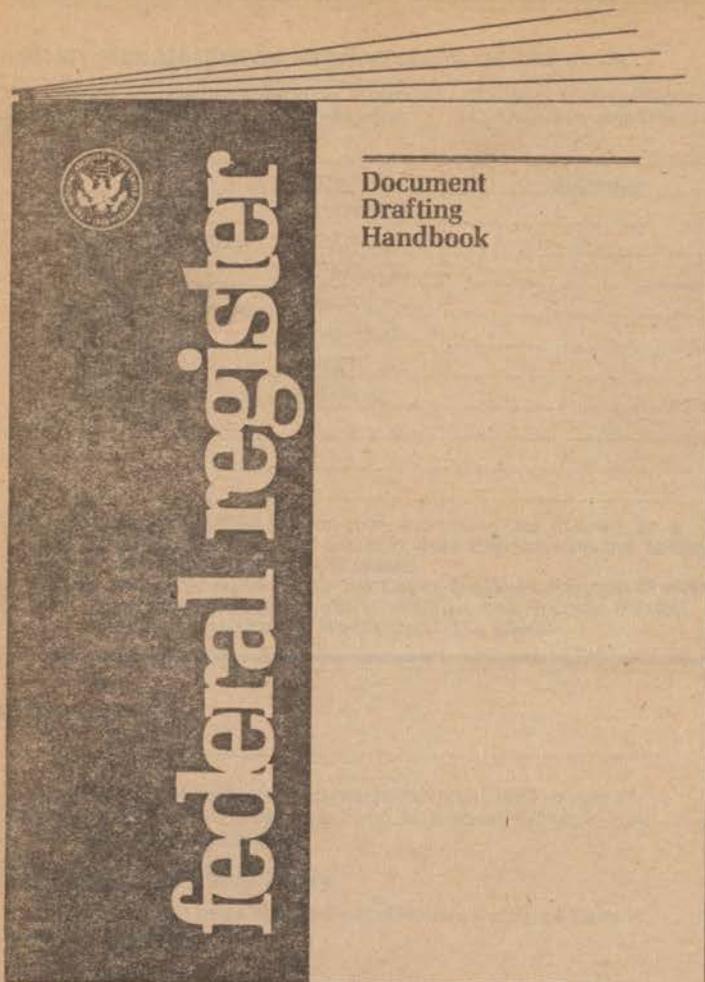

This is a continuing listing of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202-275-3030).

- H.J. Res. 615 / Pub. L. 96-563** Providing for appointment of David C. Acheson as a citizen regent of the Board of Regents of the Smithsonian Institution (December 22, 1980; 94 Stat. 3304) Price \$1.

# Rules and Regulations

Federal Register

Vol. 45, No. 251

Tuesday, December 30, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

## OFFICE OF PERSONNEL MANAGEMENT

### 5 CFR Parts 330 and 351

#### Recruitment, Selection, and Placement (General); Reduction in Force

**AGENCY:** Office of Personnel  
Management.

**ACTION:** Final regulations.

**SUMMARY:** These regulations clarify OPM's policies concerning the establishment and maintenance of reemployment priority lists. Also, these regulations clarify how agencies make appointments from reemployment priority lists. These changes were developed in response to requests by agencies that OPM clarify its material covering the operation of agency reemployment priority lists.

**EFFECTIVE DATE:** January 29, 1981.

**FOR FURTHER INFORMATION CONTACT:**  
Ted Dow or Tom Glennon, (202) 632-4422.

#### SUPPLEMENTARY INFORMATION:

##### Background

On July 22, 1980, OPM published proposed regulations in the Federal Register (45 FR 48904) that would amend Parts 330 and 351 of this title to clarify how agencies establish, maintain, and make appointments from reemployment priority lists. The proposed regulations were derived from Section 15 of the Veterans Preference Act of 1944, as presently codified in 5 U.S.C. 3315. Subpart J of Part 351 of this title covers the establishment and maintenance of reemployment priority lists, while Subpart B of Part 330 of this title covers appointment from reemployment priority lists. Additional material that implements the reemployment priority list is contained in Federal Personnel Manual (FPM) Chapters 330 and 351.

The 60-day period for interested parties to submit written comments ended on September 22, 1980.

#### Discussion of Comments

Fourteen comments were received concerning the proposed regulations: twelve from agencies and two from unions. Five agencies had no objection to the proposed regulations while the other seven agencies and both of the unions suggested specific revisions to the material.

One agency suggested that we clarify in Part 330 of this title that appointments from the reemployment priority list are made in subgroup order. We agree that this revision would be helpful in explaining how agencies make appointments from the reemployment priority list. Accordingly, we have revised § 330.201(c) to explain that, in selecting persons from a reemployment priority list, an appointing officer follows subgroup order without regard to the order of retention standing within the subgroup.

Three agencies and one of the unions were concerned that proposed § 330.201(f) might unnecessarily limit agency efforts to reemploy persons who were separated because of reduction in force. For reference, proposed § 330.201(f) provided that agencies, in making appointments from reemployment priority lists, would consider full-time employees for full-time positions, and other-than-full-time employees for other-than-full-time positions. Specifically, these respondents believed that agencies should be able to have increased flexibility in making appointments from reemployment priority lists and to thus minimize any hardship to separated employees.

Our purpose in drafting § 330.201(f) was to ensure that other-than-full-time employees who have received reduction in force separation notices must receive first consideration for appointment from the reemployment priority list to other-than-full-time positions. After consideration of these comments, we have revised § 330.201(f) to include provisions which permit an agency, at its discretion, to consider full-time employees for appointment from the reemployment priority list to other-than-full-time positions if there are no other-than-full-time employees on the list who are qualified and available for the

positions. Similarly, we have revised § 330.201(f) to also provide that an agency, again at its discretion, may consider other-than-full-time employees for appointment from the reemployment priority list to full-time positions if there are no full-time employees on the list who are qualified and available for the positions. We believe that the revised § 330.201(f) will achieve our original goal while allowing agencies additional flexibility in making appointments from the reemployment priority list and improving reemployment opportunities for separated employees.

In a further effort to clarify how the reemployment priority list operates, we have included new § 330.201(g) in the final regulations. Specifically, § 330.201(g) states, for reference, that Subpart J of Part 351 of this title covers the establishment and maintenance of the reemployment priority list. New § 330.201(g) is intended to serve the same purpose as proposed § 351.1002(c) which states, for reference, that Subpart B of Part 330 of this title covers appointment from the reemployment priority list.

Although we did not receive any specific written comments on the subject, we did receive several telephone inquiries asking about the relationship of the reemployment priority list to mandatory material presently contained in Section B-2a of Appendix B of FPM Chapter 351. Specifically, Section B-2a of Appendix B, in part, contains longstanding provisions that require agencies to advise employees who have received specific reduction in force notices of their right to priority consideration under the reemployment priority list and the Displaced Employee Program. (For reference, the Displaced Employee Program is covered in Subpart C of Part 330 of this title.)

After consideration of the material in Section B-2a of Appendix B, we found that there was a need to properly implement these mandatory provisions through Part 351 of this title. Accordingly, we have added a new § 351.808 which provides that each employee who receives a specific notice of separation under Part 351 of this title must be given information concerning his or her right to priority consideration for reemployment under the provisions of Subparts B and C of Part 330 of this title.

Two agencies suggested that we further clarify the conditions under which employees become eligible to be entered on the reemployment priority list. We agree that further clarification would be useful since we generally receive a significant number of inquiries asking for this information. Accordingly, we have revised proposed § 351.1002(a) to state that each group I or group II employee who receives a specific notice of separation from a competitive position under Part 351 of this title is entered on the reemployment priority list. We also clarify that the reemployment priority list only includes employees separated from competitive, as distinguished from excepted, positions. To further clarify the conditions under which the names of employees are entered on the reemployment priority list, we subdivided certain material set forth in proposed § 351.1003 (a) and (b) into new paragraphs § 351.1003(a)(1)-(4) and § 351.1003(b)(1)-(5).

One agency suggested that we revise proposed § 351.1003(b) to provide that an other-than-full-time employee would be entered on the reemployment priority list if the employee declined assignment under Subpart G of Part 351 of this title to a position with the same type of work schedule (e.g., part-time, intermittent, or seasonal). The same agency recommended that we revise proposed §§ 351.1003(b) and 351.1004(d)(2) to provide that the eligibility of an other-than-full-time employee to be entered or maintained on the reemployment priority list would not be based upon the employee's regularly scheduled administrative workweek. For reference, our proposed §§ 351.1003(b) and 351.1004(b)(2) both made reference to the regularly scheduled administrative workweek, but not the type of work schedule, of an other-than-full-time employee.

After consideration of the agency's suggestions, we have revised § 351.1003(b) to provide, in § 351.1003(b)(1), that a group I or group II other-than-full-time employee is entered on the reemployment priority list unless he or she has declined assignment to a position that is of the same type work schedule as the position from which the employee was separated. However, we also believe that the reemployment priority list should include an other-than-full-time employee who has declined assignment to a position with a regularly scheduled administrative workweek that is lower than that of the position from which the employee was separated. Therefore, we did not delete the references to

"regularly scheduled administrative workweek" that were set forth in §§ 351.1003(b) and 351.1004(b)(2).

One agency suggested that we revise proposed § 351.1005(a) to clarify that the name of a group I or group II employee who receives a notice of separation under Part 351 of this title from a competitive position located in Alaska or overseas, except in certain circumstances, is entered on the reemployment priority list for the area in which the position from which the employee was separated is located. We agree that a further revision of this material would be useful and have accordingly clarified the material.

One union suggested that we revise proposed § 351.1004(a) to provide that a group II employee remains on the reemployment priority list for two years from the date he or she is separated under Part 351 of this title. For reference, OPM's present provisions in § 351.1001(a) covering the establishment and maintenance of the reemployment priority list provide that the name of a group I employee remains on the reemployment priority list for two years, and the name of a group II employee remains on the list for one year.

After consideration of this union's suggestion, we have decided not to revise § 351.1004(a) to change the duration of eligibility for an employee in group II. The provisions in proposed § 351.1004(a) reflect longstanding OPM policy, and are based upon the principle that an employee in group I has permanent status and is thus entitled to additional consideration for reemployment over that given to an employee in group II.

The same union and one agency also noted that the reemployment priority list only covers positions in any agency within a particularly commuting area. The union suggested that OPM develop regulations providing for an agency-wide reemployment priority list while the agency suggested that OPM permit agencies to place employees on the reemployment priority list in any locations for which the employee is available.

At present we see no need to require agencies to extend the coverage of the reemployment priority list beyond the commuting area of a particular agency. However, certain agencies, such as the Department of Defense, have developed extensive placement programs and systems. OPM is available to assist any agencies who wish to extend the scope of their placement programs beyond that required under Subparts B and C of Part 330 of this title, and Subpart J of Part 351 of this title.

## Explanation of Final Regulations

The following changes in Title 5, Code of Federal Regulations, are now made final:

(1) Section 330.201(c) is revised to clarify that, in making appointments from the reemployment priority list, the appointing officer may select persons in a subgroup without regard to the order of retention standing within the subgroup.

(2) Section 330.201(f) is added. Section 330.201(f)(1) provides that, in making appointments from the reemployment priority list, an agency considers full-time employees only for full-time positions, and other-than-full-time employees only for other-than-full-time positions, except as provided in § 330.201(f)(2).

Section 330.201(f)(2) provides that an agency, at its discretion, may adopt administrative assignment provisions to consider employees for selection from the reemployment priority list under the following conditions:

(a) Full-time employees may be considered for other-than-full-time positions if there are no other-than-full-time employees on the reemployment priority list who are qualified and available; and

(b) Other-than-full-time employees may be considered for full-time positions if there are no full-time employees on the reemployment priority list who are qualified and available.

(3) Section 330.201(g) is added for reference. Specifically, § 330.201(g) explains that Subpart J of Part 351 of this title covers the establishment and maintenance of the reemployment priority list.

(4) Section 351.808 is added. Section 351.808 provides that an employee who receives a specific notice of separation under Part 351 of this title must be given information concerning his or her right to consideration for reemployment under the provisions of Subparts B and C of Part 330 of this title. The information concerning consideration for reemployment should be included in or with the specific reduction in force notice; otherwise, a separate supplemental notice containing this information is given to the employee.

(5) Subpart J of Part 351 is revised. Subpart J formerly consisted of § 351.1001 (a) and (b). The new § 351.1001 reorganizes material formerly contained in § 351.1001(a) to clarify agency responsibility for the establishment and maintenance of the reemployment priority list.

(6) Section 351.1002 (a), (b), and (c) are added. Section 351.1002 (a) and (b)

reorganize and clarify material formerly contained in § 351.1001(a). In addition, § 351.1002(a) now clearly provides that the name of each group I and group II employee who receives a specific reduction in force notice of separation from a competitive service position is entered on the reemployment priority list.

Section 351.1002(c) explains that Subpart B of Part 330 of this title covers appointment from the reemployment priority list. This change is being proposed in response to requests by agencies that OPM provide a reference to Subpart B of Part 330 of this title in Subpart I of Part 351.

(7) Section 351.1003 (a) and (b) are added. Section 351.1003(a) reorganizes and clarifies material formerly contained in § 351.1001(a). In addition, § 351.1003(a) contains new material clarifying that an employee's eligibility to be placed on the reemployment priority list is, in part, based upon an offer of assignment under Subpart G of this part. This proposed change reflects present policy, and clarifies the purpose and applicability of the reemployment priority list.

Section 351.1003(b) contains new material clarifying that an other-than-full-time employee's eligibility to be placed on the reemployment priority list is also, in part, based upon an offer of assignment under Subpart G of this part. Again, this proposed change reflects current policy, and clarifies the purpose and applicability of the reemployment priority list.

Final § 351.1003(b) also provides that the name of an other-than-full-time employee is entered on the reemployment priority list unless the employee, in part, declined assignment to an other-than-full-time position that is of the same type work schedule (i.e., part-time, intermittent, or seasonal) as the position from which the employee was separated. This provision was developed from comments received concerning the proposed regulations published on July 22, 1980, and is another effort to ensure that other-than-full-time employees have the same rights under Part 351 as full-time employees.

(8) Section 351.1004 (a), (b), (c), and (d) are added. Section 351.1004 reorganizes and clarifies material formerly contained in § 351.1001(a).

(9) Section 351.1005 (a), (b), and (c) are added. Section 351.1005 reorganizes and clarifies material formerly contained in § 351.1001(b).

#### Information Concerning Other Recent Changes to Part 351 of This Title

On August 27, 1980, OPM issued FPM Bulletin 351-18, which listed all of the

proposed and final changes to the regulations in Part 351 of this title that were published in the **Federal Register** in 1979 and to that date in 1980. As noted in the FPM Bulletin, OPM plans to publish the revised Part 351 of this title in the **Federal Register** after these regulations covering the reemployment priority list become final. Agencies will then have access to all of the substantive changes in Part 351 of this title with a minimum of delay.

OPM has determined that this is a significant regulation for the purposes of E.O. 12044.

Office of Personnel Management.

Beverly M. Jones,

*Issuance System Manager.*

Accordingly, Title 5, Code of Federal Regulations, is amended as follows:

#### PART 330 RECRUITMENT, SELECTION, AND PLACEMENT (GENERAL)

1) In § 330.201 paragraph (c) is revised and paragraphs (f) and (g) added to read as follows:

##### § 330.201 Priority in filling vacancies.

(c) In selection from a reemployment priority list, an agency shall give preference to tenure group I employees over tenure group II employees, and to qualified preference eligibles over nonpreference eligibles within each tenure group. An appointing officer may select persons in a subgroup without regard to order of retention standing within the subgroup.

(f)(1) In selection from a reemployment priority list, an agency considers full-time employees only for full-time positions, and other-than-full-time employees only for other-than-full-time positions, except as provided in subparagraph (2) of this section.

(2) An agency, at its discretion, may adopt administrative provisions to consider employees for selection from a reemployment priority list under the following conditions:

(i) Full-time employees may be considered for other-than-full-time positions if there are no other-than-full-time employees on the reemployment priority list who are qualified and available; and

(ii) Other-than-full-time employees may be considered for full-time positions if there are no full-time employees on the reemployment priority list who are qualified and available.

(g) Subpart J of Part 351 of this title covers the establishment and maintenance of the reemployment priority list.

(5 U.S.C. 3315)

2) Section 351.808 is added to read as follows:

#### § 351.808 Notice concerning consideration for reemployment.

An employee who receives a specific notice of separation under this part must be given information concerning his or her right to consideration for reemployment under the provisions of Subparts B and C of Part 330 of this title. This information is in addition to that specified in § 351.802. The information concerning consideration for reemployment should be included in or with the specific reduction in force notice; otherwise, a separate supplemental notice covering this information must be given to the employee.

#### PART 351—REDUCTION IN FORCE

3) Subpart J of Part 351 is revised to read as follows:

##### Subpart J—Reemployment Priority List

Sec.

351.1001 Establishment and maintenance of the reemployment priority list.

351.1002 Persons covered.

351.1003 Employee eligibility.

351.1004 Duration of eligibility.

351.1005 Operation of the list in Alaska or overseas.

Authority: 5 U.S.C. 1302, 3315.

##### Subpart J—Reemployment Priority List

§ 351.1001 Establishment and maintenance of the reemployment priority list.

Each agency shall establish and maintain a reemployment priority list for each commuting area in which it separates group I or group II employees from competitive positions under this part.

§ 351.1002 Persons covered.

(a) The name of each group I or group II employee who receives a specific notice of separation from a competitive position (as distinguished from an excepted position) under this part is entered on the reemployment priority list.

(b) This priority extends to all competitive positions in the commuting area for which the employee is qualified and available, except as provided in § 351.1005.

(c) Subpart B of Part 330 of this title covers appointment from the reemployment priority list.

§ 351.1003 Employee eligibility.

(a) A full-time group I or group II employee is entered on the

reemployment priority list unless he or she has declined assignment under Subpart G of this part to a position that:

- (1) Is full-time;
- (2) Is competitive;
- (3) Is nontemporary; and

(4) Has a representative rate no lower than that of the position from which the employee was separated.

(b) An other-than-full-time group I or group II employee is entered on the reemployment priority list unless he or she has declined assignment under Subpart G of this part to an other-than-full-time position that:

(1) Is of the same type work schedule (i.e., part-time, intermittent, or seasonal) as the position from which the employee was separated;

- (2) Is competitive;
- (3) Is nontemporary;

(4) Has a representative rate no lower than that of the position from which the employee was separated; and

(5) Has a regularly scheduled administrative workweek no lower than that of the position from which the employee was separated.

#### § 351.1004 Duration of eligibility.

(a) The name of a group I employee remains on the reemployment priority list for 2 years, and a group II employee's name for 1 year, from the date he or she was separated.

(b) An employee's name is deleted from the reemployment priority list when the employee submits a written request to the agency asking that his or her name be deleted.

(c) A full-time employee's name is also deleted from the reemployment priority list when the employee:

(1) Accepts a non-temporary, full-time, competitive position; or

(2) Declines under this subpart a full-time, nontemporary, competitive position with a representative rate the same as, or higher than, that of the position from which he or she was separated under this part.

(d) An other-than-full-time employee's name is also deleted from the reemployment priority list when the employee:

(1) Accepts a nontemporary competitive position; or

(2) Declines under this subpart a nontemporary, competitive position with a representative rate, and regularly scheduled administrative workweek, the same as or higher than that of the position from which the employee was separated under this part.

#### § 351.1005 Operation of the list in Alaska and overseas.

(a) The name of each group I or group II employee who receives a notice of

separation under this part from a competitive position in Alaska or overseas is entered on the reemployment priority list for the area in which the position from which separated is located, except when:

(1) The employee leaves that area; or  
(2) The agency has a general program for rotating employees between overseas areas and the United States and the employee's immediately preceding overseas services or residence, combined with prospective overseas service under available appointments, exceeds the maximum duration of an overseas duty tour in the agency's rotation program.

(b) Upon his or her written request, the name of an employee who leaves the area is entered on the agency's reemployment priority list for:

(1) The commuting area from which he or she was employed for Alaskan or overseas service; or

(2) Another area, except in Alaska or overseas, that is mutually acceptable to the employee and the agency.

(c) In addition to any of the reasons, as appropriate, in § 351.1004(b), (c), or (d), for deleting an employee's name from the reemployment priority list, the name of an employee is deleted from an Alaskan or overseas reemployment priority list when the employee:

(1) Leaves the area covered by that list; or

(2) Becomes disqualified for overseas appointment because of his or her previous service or residence.

(5 U.S.C. 1902, 3315)

BILLING CODE 6325-01-M

### 5 CFR Part 536

#### Grade and Pay Retention

**AGENCY:** Office of Personnel Management.

**ACTION:** Final rule.

**SUMMARY:** The Office of Personnel Management (OPM) is issuing final regulations to implement the grade and pay retention provisions of the Civil Service Reform Act of 1978.

**EFFECTIVE DATE:** January 29, 1981.

**FOR FURTHER INFORMATION CONTACT:** Larry Holman, 202-632-6127, or Jan Karicher, 202-632-4634.

**SUPPLEMENTARY INFORMATION:** Interim regulations, effective on the first day of the first applicable pay period beginning on or after January 11, 1979, were published in the *Federal Register* on March 2, 1979 (44 FR 117741). OPM proposed final regulations in this area which were published in the *Federal*

*Register* for a 60-day comment period on June 17, 1980 (45 FR 40990). Based on comments received from Federal agencies, several labor organization representatives and individuals, OPM has made several revisions to the proposed regulations.

#### Subpart A

With only two exceptions, the intent of the proposed regulations to redelegate authority to agency heads to determine circumstances under which grade or pay retention should be extended was acceptable to the respondents. Those opposed felt the redelegation was too vague and open to inconsistent application. We have clarified the language pertinent to the redelegation. The term, "management-initiated action," has been dropped from § 536.102, 536.103, and 536.206. With regard to grade retention, the language was simplified to show that management's authority is limited to downgrades during reorganizations and reclassifications. The term, "reorganization," has been defined to further identify the bounds of the redelegation. More important, the redelegation still better recognizes the necessity for agency heads to decide what circumstances, outside those prescribed by the law, warrant grade or pay retention in order to promote the efficiency of their operations.

In response to several separate comments, § 536.104 has been extended to include several specific circumstances warranting pay retention. The first calls for pay retention when an employee is downgraded in a reduction in force or reclassification but does not meet the eligibility requirements for grade retention. This extension was included in the interim regulations. The second extends pay retention to an employee whose basic pay is a special rate moved by management to a lesser special rate position or to a non-special rate position. This circumstance was covered in the interim regulations under § 536.212(a)(2). " \* \* \* reassignment to a position in a different pay schedule."

Some concern was expressed with the term "placement" in the extension of pay retention. The concern was that any movement by an employee in the specified circumstances would warrant coverage. In fact, in any potential entitlement to grade or pay retention, the limitations of the exclusions in § 536.105, especially, "is reduced in grade or pay . . . at the employee's request," means that the placement must be caused or influenced by management. This implies that the movement is beyond the employee's control and/or to further the mission of the agency.

Similarly an individual commented that OPM should not extend pay retention to prevailing rate employees who move from a high to lower wage area. This extension, like the others, is generally for an action which is caused or influenced by management and is not strictly "at the employee's request." Furthermore, it recognizes the needs of management to sometimes move employees to promote an efficient organization without adversely affecting employees. The extension is, therefore, still included.

Several changes or additions have been made to § 536.102 other than the addition of "reorganization." "Rate of basic pay" has been amended to show that the night and environmental differentials for prevailing rate employees are not included in basic pay protected by grade or pay retention. "Representative rate" now includes the representative rate for a Senior Executive Service employee. "Rate schedule" has been added here and where appropriate throughout Part 536 for use in situations where the movement is not between pay schedules but between rates within a schedule, e.g., special rate movement.

"Temporary reassignment" in both § 536.102 and 536.105 was questioned by a commenter as unnecessary because reassignment implies no promotion or demotion. While this is generally correct, these reassignments can result in pay adjustments, e.g., reassignment to a special rate position or to a higher or lower wage area. The result could be a pay discrepancy which might raise questions of entitlement and, therefore, create the necessity for its use. A suggestion to define "covered pay system" was not adopted because the term was not used in these regulations.

In § 536.105, the most significant change was the altering of the exclusion of non-appropriated fund employees. The only non-appropriated fund employees now excluded are those covered under § 2105(c) of title 5, United States Code, i.e., those in Department of Defense and Coast Guard nonprevailing rate positions. Non-appropriated fund employees, other than those in DOD and the Coast Guard, are covered for most benefit purposes. It is, therefore, consistent to cover them for grade and pay retention.

Several comments suggested we increase the scope of coverage beyond reorganizations and reclassifications for grade retention and to change eligibility requirements from the position being classified for 1 year to the employee being in the position for 1 year. OPM has not adopted these because our ability to regulate this benefit does not allow us to

change the intent of the law. We have also not included a restatement of the law or of sections 5337 and 5345 of title 5, which were repealed, because we feel the soon to be released Federal Personnel Manual guidance on grade and pay retention will provide the necessary background. This guidance should also provide information on movements between agencies creating grade retention entitlements and further explain the 52-week/1 year eligibility requirements, both of which raised questions.

A significant question was raised regarding potential entitlement to pay retention when an employee waives grade retention or when an employee requests a demotion for ill health or similar circumstances. In the former case, OPM's position is that once an employee waives grade retention, the employee removes management's influence over the particular action against the employee. Any ensuing loss of pay would be as a result of an employee request and no pay retention could be granted even under the agency's authority. In the latter case these demotions are also at the employee's request unless the agency has already informed the employee that action to downgrade will be taken for non-disciplinary reasons of ill health and the agency offers another position. The agency could then grant pay retention under its authority.

#### Subpart B

Section 536.202(a) of the proposed regulations has been made a separate section, § 536.201. This reflects the fact that this method of comparing grades and rates is necessary not only for determining grade retention entitlement but also whether the 52-week/1 year at a higher grade requirement has been met, whether a demotion has occurred, or whether an employee has declined an offer at, or been placed in, a grade equal to or greater than the retained grade. This change required renumbering the sections of the entire subpart.

Several changes were made to the section on determining the rate of basic pay. The language of the section was clarified to show what rate of basic pay, including a special rate under 5 U.S.C. 5303, is used to determine pay retention entitlement. The language change also reflects the fact that we will issue regulations shortly as Part 532 for setting pay in the Federal Wage System, when grade and pay retention entitlement terminates.

A paragraph has been added to show that any employee on pay retention receives only 50 percent of the annual comparability increase. This paragraph

also demonstrates that this rule only applied to employees on pay retention and only affects increases in the scheduled rates of a position.

Section 536.204(c) of the proposed regulations has been changed as the result of several comments to place an employee who is on pay retention at the maximum rate of the range of the new position when, after receiving only 50 percent of increases in scheduled rates, the employee's pay can be found within the rate range of the new position. This was the rule of the interim regulations. This 50 percent rule is designed only to move the employee into the rate range of the new position and not to adversely affect the employee any more than is necessary.

Several changes have been made to the section describing the criteria for a reasonable offer. The employee must now be informed of his or her right to appeal to OPM the reasonableness of the offer. This provision is similar to other regulations which require an agency to inform employees of their appeal rights. The language has also been changed to show that the offered position must be at least equal in tenure to the position the grade or pay of which is being protected. This change protects the employee who moves during a period of grade or pay retention but is not offered a position whose tenure is equal to or higher than the position which created the entitlement.

OPM has removed the necessity that the employee meets the qualification requirements of the offered position. This is in keeping with regulations regarding reductions in force which allow agencies to waive qualifications in order to place employees. Staffing guidance in the Federal Personnel Manual will reflect the fact that qualifications may be waived when grade or pay retention is involved.

"Commuting area" was not defined because we believe that the current language allows the affected employee the maximum possible protection in an appeal. Designating a specific radius does not fully take into account other transportation circumstances which may affect the reasonableness of an offer.

Several issues were raised concerning the factors for terminating eligibility and/or entitlement to grade and pay retention. Specifically at issue was the extent of the priority placement program provision in grade retention situations. The provision has been extended to include an employee who does not fully comply with written agency requirements of a priority placement program. These requirements can range from formally placing one's name in the program to actively participating in the

program, e.g., filing SF-171's. This ensures maximum effort by the employee to return as quickly as possible to a proper grade or pay level position. This balances management's requirement under § 536.301 to establish placement and classification plans. This prompt return to the proper level recognizes the intent of the law. A similar provision was not added to pay retention situations because of OPM's lack of authority in this area, e.g., restrictions imposed by the statutory construction of section 5363 of title 5, U.S. Code. These restrictions also prevent significant changes in the cessation factors imposed by the law.

These cessation factors for grade retention have also been amended to show that an employee is not declining a reasonable offer when the employee requests a lower graded position than the reduction-in-force position rather than displace another employee. This change avoids harmful and widespread displacement and is in keeping with the intent of the delegation of this authority to agency heads.

#### Subpart C

The section reserved for grade and pay retention under the merit pay system was determined unnecessary because merit pay employees will be treated the same as General Schedule employees for grade and pay retention purposes. In its place is a section establishing a legal basis for OPM requiring agencies with affected employees to have classification and placement plans. Again, these plans promote the intent of the law, i.e., to return the employee to the proper grade or pay level as quickly as possible.

OPM has adjusted the time period for filing an appeal of the termination of benefits because of the employee's declination of a reasonable offer. It will now be 20 calendar days to conform to the appeal period used by the Merit Systems Protection Board. We decided not to include under this appeal right the termination of benefits due to an employee's failure to fully participate in a priority placement program. These disputes will be based on detailed agency policy and can be better settled within the affected agency through the internal agency grievance procedures or procedures negotiated in labor contracts.

Throughout the regulations several small nonsubstantive changes were made in language to clarify issues and alleviate confusion raised in the comments. Several comments were not accepted for changes in the regulations themselves because we feel the guidance soon to be issued in the

Federal Personnel Manual will take these comments into account and clarify issues in this area.

OPM has determined that these are significant regulations for the purposes of E.O. 12044.

Office of Personnel Management.

JoAnn B. Platter,

Assistant Issuance System Manager.

Accordingly, the Office of Personnel Management is revising Part 536 of Title 5, Code of Federal Regulations, to read as follows:

### PART 536—GRADE AND PAY RETENTION

#### Subpart A—Definitions, Coverage and Applicability

Sec.

- 536.101 General.
- 536.102 Definitions.
- 536.103 Coverage and applicability of grade retention.
- 536.104 Coverage and applicability of pay retention.
- 536.105 Exclusions.

#### Subpart B—Determination of Retained Grade and Rate of Basic Pay; Loss of, or Termination of Eligibility

- 536.201 Comparison of grades in different pay schedules or pay systems.
- 536.202 Period of grade retention.
- 536.203 Determination of retained grade.
- 536.204 Determination of applicable rate schedule.
- 536.205 Determination of rate of basic pay.
- 536.206 Criteria for a "reasonable offer."
- 536.207 Loss of eligibility for grade retention.
- 536.208 Termination of grade retention.
- 536.209 Loss of eligibility for, or termination of, pay retention.

#### Subpart C—Miscellaneous Provisions

- 536.301 Placement and classification plans.
- 536.302 Appeal of termination of benefits because of reasonable offer.
- 536.303 Documentation.
- 536.304 Issuance of employee letters.
- 536.305 Effect of grade retention on quota spaces.
- 536.306 Retroactive entitlement.

Authority: 5 U.S.C. 5361-5366, Pub. L. 95-454.

#### Subpart A—Definitions; Coverage and Applicability

##### § 536.101 General.

(a) Title VIII of Pub. L. 95-454 (The Civil Service Reform Act of 1978) provides that an employee who is placed in a lower grade as a result of reduction-in-force procedures, or whose position is reduced in grade as a result of reclassification of the position, is entitled to retain for a period of 2 years the grade held immediately before that placement or reduction. It also provides the authority for granting an employee

indefinite pay retention. In addition to specifying criteria and conditions for the application of the grade and pay retention provisions, the law authorizes the Office of Personnel Management to extend the application of these provisions to other individuals and situations to which they would not otherwise apply.

(b) This part contains the regulations—including extensions, conditions, criteria, and procedures—which the Office of Personnel Management has prescribed for the administration of grade and pay retention. This part supplements and implements the provisions of 5 U.S.C. 5361-5366, and section 801(b) of Pub. L. 95-454, and must be read together with those sections of law.

##### § 536.102 Definitions.

For the purposes of this part: "Demotion at an employee's request" means a reduction in grade:

- (1) Which is initiated by the employee for his or her benefit, convenience or personal advantage, including consent to a demotion in lieu of one for personal cause, and
- (2) Which is not caused or influenced by a management action.

"Demotion for personal cause" means a reduction in grade based on the conduct, character, or unacceptable performance of an employee.

"Employee" means an employee as defined in 5 U.S.C. 5361 and also an individual who is moved from a position which is not under a covered pay schedule to a position which is under a covered pay schedule provided that the individual's employment immediately prior to the move was on other than a temporary or term basis.

"Employment on a temporary or term basis" means employment under an appointment having a definite time limitation or designated as temporary or term.

"Rate of basic pay" means, for any pay system, the rate of pay fixed by law or administrative action for the position held by an employee before any deductions and exclusive of additional pay or any kind such as night or environmental differentials in the case of a prevailing rate employee.

"Rate schedule" means a specific set of rates within a pay schedule.

"Reorganization" means the planned elimination, addition or redistribution of functions or duties either wholly within an agency or between agencies.

"Representative rate" means:

- (1) The fourth rate of the grade in the case of a position under the General Schedule including the fourth rate of the corresponding grade of the General

Schedule in the case of a position under the merit pay system established by chapter 54 of title 5, United States Code, the single rate of GS-18; or the individual's rate under the Senior Executive Service;

(2) The second rate of the grade of a position under a regular prevailing rate schedule established under subchapter IV of chapter 53 of title 5, United States Code, or in the case of a position with a single rate, the single rate of that position; or

(3) The rate designated as representative of the position by the agency responsible for establishing and adjusting the schedule in the case of a position under a schedule different from those covered in paragraph (1) or (2) of this section.

"Temporary promotion" means a promotion with a definite time limitation, and one which the individual is informed in advance is temporary and would normally require that the individual return to his or her permanent position at the expiration of that promotion.

"Temporary reassignment" means a reassignment with a definite time limitation, and one which the individual is informed in advance is temporary and would normally require that the individual return to his or her permanent position at the expiration of that reassignment.

#### § 536.103 Coverage and applicability of grade retention.

(a) Grade retention shall apply to an employee who moves to a position in a covered pay schedule which is lower graded than the position held immediately prior to the demotion in the following circumstances:

(1) As a result of reduction-in-force procedures; or

(2) As a result of a reclassification process.

(b) Except as otherwise covered in paragraph (a) of this section, the head of the agency may offer grade retention to eligible employees who are or might be reduced in grade as the result of a reorganization or reclassification decision announced by management in writing. When an employee is offered a position with grade retention in anticipation of a reduction in grade, the agency shall inform the employee in writing that acceptance of the position is not required and that declination of the offer has no effect on the employee's entitlement to grade retention under paragraph (a) of this section if he or she is actually moved to a lower graded position.

(c)(1) An employee who, immediately prior to being placed in a lower graded

position as a result of reduction-in-force procedures, is in a position under a covered pay schedule, is eligible for grade retention only if the employee has served for 52 consecutive weeks or more in position(s) under a covered pay schedule at a grade(s) higher than the position in which the employee is placed.

(2) An employee is eligible for grade retention when his or her position has been reclassified at a lower grade only if the position which is being reduced had been classified at a higher grade(s) for a continuous period of at least 1 year immediately before the reduction.

(3) In situations other than those covered in paragraphs (c)(1) and (c)(2) of this section, an employee is eligible for grade retention if he or she, immediately prior to being placed in the lower grade, has served in a position in any pay schedule for 52 consecutive weeks or more provided that the service was in an agency as defined in 5 U.S.C. 5102 at a grade(s) higher than the position in which the employee is placed.

#### § 536.104 Coverage and applicability of pay retention.

(a) Pay retention shall apply to any employee whose rate of basic pay would otherwise be reduced:

(1) As the result of the expiration of the 2-year period of grade retention; or

(2) As a result of reduction-in-force or reclassification when the employee does not meet the eligibility requirement for grade retention; or

(3) As a result of the reduction or elimination of scheduled rates, except those reflecting a decrease in the level of prevailing rates as determined by a wage survey, or as a result of the reduction or elimination of special schedules or special rates; or

(4) As a result of the placement of an employee into a non-special rate position or into a lower special rate position from a special rate position; or

(5) As a result of the placement of an employee in a position in a lower wage area or in a position in a different pay schedule; or

(6) As a result of the placement of the employee in a formal employee development program generally utilized Governmentwide: Upward Mobility, Apprenticeship, and Career Intern Programs.

(b) Except as otherwise covered in paragraph (a) of this section, the head of the agency may provide pay retention to eligible employees whose rates of basic pay would otherwise be reduced as the result of a management action.

#### § 536.105 Exclusions

(a) Grade and pay retention shall not apply to an employee who:

(1) Moves from a position which is not in an agency as defined in 5 U.S.C. 5102; or

(2) Is identified under 5 U.S.C. 2105(c) except prevailing rate employees included under 5 U.S.C. 5361; or

(3) Is reduced in grade or pay for personal cause or at the employee's request; or

(4) Does not satisfactorily complete the probationary period prescribed by 5 U.S.C. 3321(a)(2), and, as a result, is removed from a supervisory or managerial position.

(b) An employee's entitlement to grade or pay retention is not affected by a temporary promotion or temporary reassignment. However, an employee serving under a temporary promotion or temporary reassignment may not retain a grade or rate of basic pay held during the temporary promotion or temporary reassignment.

#### Subpart B—Determination of Retained Grade and Rate of Basic Pay; Loss of, or Termination of Eligibility

##### § 536.201 Comparison of grades in different pay schedules or pay systems.

For the purpose of determining whether the grade of a position is equal to, higher than, or lower than the grade of another position in movements between pay schedules or pay systems, the representative rates of the positions will be compared.

##### § 536.202 Period of grade retention.

(a) An employee entitled to grade retention is entitled to retain that grade for 2 years beginning on the date the employee is placed in the lower graded position.

(b) If, during a 2-year period of grade retention, an employee is further reduced in grade under circumstances also entitling the employee to grade retention, the employee shall continue to retain the previous retained grade for the remainder of the previous 2-year retention period. At the end of that period, the employee shall be entitled to retain the grade of the position from which the further reduction in grade was made, until 2 years have passed from the date of the further reduction in grade.

##### § 536.203 Determination of retained graded.

(a) An employee who is in a position under a covered pay schedule immediately prior to the action which gives entitlement to grade retention shall retain the grade held immediately prior to the action.

(b) An employee who is in a position not under a covered pay schedule immediately prior to the action which gives entitlement to grade retention shall retain:

(1) The lowest grade of the covered pay schedule in which placed which has a representative rate equal to or higher than the representative rate of the grade held immediately prior to that placement; or

(2) The highest grade of the covered pay schedule in which placed, if there is no grade in the covered pay schedule with a representative rate equal to or higher than the representative rate held immediately prior to that placement.

**§ 536.204 Determination of applicable rate schedule.**

(a) When an employee entitled to grade retention is placed in a position in a different geographical area, the rate schedule which applies to the employee is the rate schedule in the new geographical area.

(b) When an employee entitled to grade retention is placed in a position in, or his or her position is changed to, a different occupational series, the rate schedule which applies to the individual is the rate schedule for the new occupational series.

**§ 536.205 Determination of rate of basic pay.**

(a) When an employee becomes entitled to grade retention, or moves to another position during a period of grade retention under conditions which permit continuation of the grade retention entitlement, the employee is entitled to the greatest of:

(1) His or her rate of basic pay before the movement, or

(2) The rate of basic pay from the applicable rate schedule for the grade and step (or relative position within a range of rates under the merit pay system) held by the employee before the movement, or

(3) The lowest rate of basic pay from the applicable rate schedule for the retained grade which equals or exceeds the employee's rate of basic pay before the movement.

(b)(1) When an employee becomes entitled to pay retention, or moves to another position while receiving pay retention, the employee's rate of basic pay immediately prior to eligibility or movement shall be compared with the range of rates of basic pay for the position to be occupied by the employee upon this eligibility or movement.

(2) The employee is entitled to the lowest rate of basic pay in the position to be occupied upon the eligibility or movement which equals or exceeds his

or her rate of basic pay immediately prior to the eligibility or movement. If the rate of basic pay can be accommodated in the rate range of the latter position, pay retention does not apply.

(3) If the employee's rate of basic pay immediately prior to the pay retention exceeds the maximum rate of the position to be occupied when he or she becomes entitled to pay retention, the employee is entitled to the lower of:

(i) The rate of basic pay payable to the employee immediately before the reduction in pay; or

(ii) 150 percent of the maximum rate of basic pay payable for the new grade.

(c) When an increase in the scheduled rates of the grade of the employee's position occurs while the employee is under pay retention, the employee is entitled to 50 percent of the amount of the increase in the maximum rate of basic pay payable for the grade of the employee's current position.

(d) When, as a result of an increase in the scheduled rate(s) of the grade of the employee's position, an employee's retained rate of basic pay becomes equal to or lower than the maximum rate of that grade, the employee is entitled to the maximum rate of that grade and pay retention ceases.

(e) An employee who is serving on a temporary promotion at the time he or she becomes eligible for pay retention is entitled to retain the rate of basic pay which he or she would have been receiving at that time had the temporary promotion not occurred.

(f) When an employee's entitlement to grade or pay retention terminates, the employee's rate of basic pay shall be set in accordance with the provisions of Parts 531 and 532 of this title unless:

(1) Grade retention is being terminated as a result of the expiration of the 2-year retention period; or

(2) The employee is moved to a grade equal to or greater than the retained grade; or

(3) The employee is entitled to a higher rate of basic pay under paragraphs (b) or (d) of this section.

**§ 536.206 Criteria for a "reasonable offer".**

For the purposes of this part, an offer of a position, in order to be considered a reasonable one, must fulfill the following conditions:

(1) The offer must be in writing, and must include an official position description of the offered position; and

(2) The offer must inform the employee that an entitlement to grade or pay retention will be terminated if the offer is declined and that the employee may appeal the reasonableness of the offer as provided in § 536.302; and

(3) The offered position must be of tenure equal to or greater than that of the position creating the grade or pay retention entitlement; and

(4) The offered position must be in an agency, as defined in 5 U.S.C. 5102, although not necessarily in the same agency in which the employee is serving at the time of the offer; and

(5) The offered position must be full-time, unless the employee's position immediately before the change creating entitlement to grade or pay retention was less than full-time, in which case the offered position must have a work schedule of no less time than that of the position held before the change; and

(6) The offered position must be in the same commuting area as the employee's position immediately before the offer, unless the employee is subject to a mobility agreement or a published agency policy which requires employee mobility.

**§ 536.207 Loss of eligibility for grade retention.**

(a) Eligibility for grade retention as a result of entitlement under § 536.103(a) of this part ceases if any of the following conditions occurs at any time after the employee receives written notice of the reduction in grade action, but before the commencement of the 2-year period of grade retention:

(1) The employee has a break in service of 1 workday or more; or

(2) The employee is demoted for personal cause or at the employee's request; or

(3) The employee is placed in, or declines a reasonable offer of, a position the grade of which is equal to or higher than the retained grade; or

(4) The employee elects in writing to terminate the benefits of grade retention.

(b) Eligibility for grade retention as a result of entitlement under § 536.103(b) of this part ceases if any of the following conditions occurs at any time after the employee is informed by management of an impending reorganization or reclassification which will or could result in reduction in grade, but before the commencement of the 2-year period of grade retention:

(1) Any of the conditions listed in paragraph (a) of this section except that an employee's request for placement in a lower graded position, in lieu of displacing an employee at his or her grade under reduction-in-force procedures, is not a declination of a reasonable offer for grade retention purposes; or

(2) The employee fails to enroll in, or to comply with reasonable written requirements established to assure full

consideration under, a program providing priority consideration for placement.

**§ 536.208 Termination of grade retention.**

(a) Grade retention terminates if any of the conditions listed in § 536.207(a) occurs after commencement of the 2-year period of grade retention.

(b) Grade retention as provided by § 536.103(b) also terminates if any of the conditions listed in § 536.207(b) occur after the commencement of the 2-year period of grade retention.

(c) The effective date of termination of grade retention benefits is:

(1) The day before placement if the termination is the result of the employee's placement in another position; or

(2) At the end of the last day of the pay period which the employee:

(i) Declines a reasonable offer; or  
(ii) Elects to waive grade retention benefits; or

(iii) Fails to enroll in, or comply with reasonable written requirements established to assure full consideration under, a program providing priority consideration for placement.

**§ 536.209 Loss of eligibility for, or termination of, pay retention.**

(a) Eligibility for pay retention, or actual retention of pay, ceases if any of the following conditions occurs at any time after the employee had received written notification that his or her pay is to be reduced:

(1) The employee has a break in service of 1 workday or more; or

(2) The employee is entitled to a rate of basic pay which is equal to or higher than, or declines a reasonable offer of a position the rate of basic pay for which is equal to or higher than, the rate to which the employee is entitled under pay retention; or

(3) The employee is demoted for personal cause or at the employee's request.

(b) The effective date of termination of pay retention benefits is:

(1) The day before placement if the termination is the result of the employee's placement in another position; or

(2) The end of the last day of the pay period in which the employee declines a reasonable offer.

**Subpart C—Miscellaneous Provisions**

**§ 536.301 Placement and classification plans.**

(a) Agencies which employ individuals subject to this part are required to establish in writing placement and classification plans.

(b) The placement and classification plans must commit the agency to:

(1) Identify and correct classification errors; and

(2) Correct position management problems; and

(3) Carry out specific planned efforts to place employees subject to this part; and

(4) Pursue placement efforts that do not adversely affect affirmative action goals.

**§ 536.302 Appeal of termination of benefits because of reasonable offer.**

(a) Except as provided for in paragraph (e) of this section, an employee whose grade or pay retention benefits are terminated on the grounds the employee declined a reasonable offer of a position the grade or pay of which is equal to or greater than his or her retained grade or pay may appeal the termination to the Office of Personnel Management.

(b) An employee who appeals under this section shall file the appeal in writing with the Office of Personnel Management not later than 20 calendar days after being notified that his or her grade of pay retention benefits have been terminated, and shall state in the appeal the reasons why the employee believes the offer of a position was not a reasonable offer.

(c) The Office of Personnel Management may conduct any investigation or hearing it determines necessary to ascertain the facts of the case.

(d) If a decision by the Office of Personnel Management on an appeal under this section requires corrective action by an agency, including the retroactive or prospective restoration of grade or pay retention benefits, the agency shall take that corrective action.

(e) Termination of benefits based on a declination of a reasonable offer by an employee in an exclusively recognized bargaining unit may be reviewed under negotiated grievance and arbitration procedures in accordance with chapter 71 of title 5, United States Code, and the terms of any applicable collective bargaining agreement. An employee in an exclusively recognized bargaining unit may not appeal a termination of benefits to the Office of Personnel Management if the grievance procedure of the agreement by which he or she is covered provides for this review.

(f) Decisions issued by the Office of Personnel Management shall be considered final decisions. OPM may, at its discretion, reconsider an original appellate decision when new and material information is presented, in writing, by the employee or the agency,

which establishes a reasonable doubt as to the appropriateness of the original decision. The request must show that the information was not readily available when the decision was issued. A request for reconsideration of an original appeal decision must be submitted to OPM within 30 calendar days of the date of the original decision.

**§ 536.303 Documentation.**

The application of the provisions of this part shall be documented in writing as a permanent part of the employee's Official Personnel Folder. As a minimum this documentation will include a copy of the letter described in § 536.304.

**§ 536.304 Issuance of employee letters.**

When an employee is entitled to grade and/or pay retention, the employing agency shall give to the employee, with a copy of the Notification of Personnel Action (SF-50) documenting entitlement to grade and/or pay retention, a letter describing the circumstances warranting grade and/or pay retention, and the nature of that entitlement.

**§ 536.305 Effect of grade retention on quota spaces.**

To determine the number of positions at GS-16, -17 and -18, or the equivalent, including positions in the Senior Executive Service, authorized by an Act of Congress, the grades (or SES levels) of the positions occupied, rather than the retained grades, are to be used.

**§ 536.306 Retroactive entitlement.**

Employees who are eligible for grade retention as provided by § 536.103(a) except that the reduction in grade took place on or after January 1, 1977, and before the first day of the first pay period beginning on or after January 11, 1979, shall be entitled to pay and benefits as provided in section 801(b) of the Civil Service Reform Act of 1978 under procedures and instructions issued by the Office of Personnel Management.

[FR Doc. 80-40504 Filed 12-29-80; 8:45 am]

BILLING CODE 6325-01-M

**5 CFR Part 551**

**Federal Pay Administration Under the Fair Labor Standards Act**

**AGENCY:** Office of Personnel Management.

**ACTION:** Final rule

**SUMMARY:** The Fair Labor Standards Act was amended by the Fair Labor Standards Amendments of 1974 to include Federal employees under its coverage effective May 1, 1974. The

legislation authorized the Office of Personnel Management to administer the provisions of the Act for Federal employees. This document contains regulations that supplement and implement the Act.

**EFFECTIVE DATE:** January 29, 1981.

**FOR FURTHER INFORMATION CONTACT:** Dwight W. Brown, [202] 632-4634.

**SUPPLEMENTARY INFORMATION:** The Fair Labor Standards Act of 1938, as amended, provides for minimum standards for both wages and overtime entitlements, and delineates administrative procedures by which covered worktime must be compensated. Section 4(f) of the Act authorizes the Office of Personnel Management to administer the provisions of the Act for all employees of the United States, except for those who are employed by the Library of Congress, United States Postal Service, Postal Rate Commission, or the Tennessee Valley Authority; such employees are specifically covered by the Department of Labor's administration of the Act. In addition to this authority, the legislative history of Pub. L. 93-259 further authorizes the Office of Personnel Management to resolve conflicts between the Act and other statutory provisions entitling employees to overtime pay (120 Cong. Rec. 7335).

These regulations establish the rules and guidelines by which Federal administration of the Act is to be effected. In addition to specifying OPM's authority and agencies' responsibilities, they provide definitions, rules, and guidelines by which determinations are to be made as to what time constitutes "hours or work," and, therefore, as to what time is compensable. Furthermore, they provide the methodology by which precise overtime pay entitlements under the Act shall be computed. Finally, they provide special overtime provisions for employees engaged in fire protection activities or law enforcement activities.

On July 25, 1980, OPM published proposed regulations [45 FR 49580] for its administration of the Act in the Federal sector and invited written comments from the public. Comments were received from 24 Federal agencies and four labor organizations representing Federal employees. These comments, and OPM's action on these comments, are summarized as follows:

#### General

Numerous comments cited the need for supplemental guidance or examples to further clarify the regulations in this part. Numerous other comments referred to the more complete instructions

contained in FPM letters in the 551 series and asked what effect the regulations had on this material.

The regulations in this part create rights in or impose obligations upon employees or agencies for compliance with the Act. The more comprehensive instructions and examples contained in FPM letters in the 551 series provide supplemental instructions and continue in effect, with the exception of FPM Letter 551-3. OPM is issuing an FPM letter which rescinds FPM Letter 551-3 and provides instructions for the treatment of time spent in training as modified in § 551.423 of this part. The instructions in this new letter are effective on the effective date of these regulations.

In addition, OPM is completing a new book 551 to FPM Supplement 990-2. It will incorporate the instructions and examples contained in existing FPM letters. When completed, Book 551 will supplement and augment the requirements of the Act and this part. Until that time, the instructions and guidelines contained in FPM letters in the 551 series (with the exception of FPM Letter 551-3) are still appropriate.

#### Suffered or Permitted Work

Two agencies recommended transferring the definition of suffered or permitted work from subpart D, Hours of Work, to the definitions section in subpart A. This recommendation was adopted.

In addition, at the recommendation of several agencies, this definition has been modified to emphasize that the employee's supervisor (1) must have knowledge of such work and (2) must have an opportunity to prevent such work from being performed. It follows that if the supervisor did not know the work was being performed, he or she had no opportunity to prevent the work, and, therefore, the supervisor did not suffer or permit the work. Of course, once the supervisor knows work is being performed and does nothing to prevent it, he or she has suffered or permitted the work.

#### Trainees

With the change in OPM position concerning time spent in training under the Act, it was necessary to define the term "trainee" in § 551.102 and to exclude those persons meeting this definition from coverage under OPM's administration of the Act in § 551.103. Trainees who are assigned or attached to a Federal activity primarily for training are not employees of the Government of the United States for purposes of the Act. These include persons employed by a state or local

government under a CETA or WIN Program, persons employed by a college or university under a College Work Study Program, student-employees assigned or attached to a government hospital primarily for training (5 CFR Part 534), and any other person who attends a training program that meets the six conditions outlined in § 551.102.

#### Volunteers

Numerous comments were received recommending that persons who perform volunteer services for a Federal activity be excluded specifically from coverage under the Act. We have included a new definition of "volunteer" in § 551.102.

In addition, in § 551.103 we have excluded persons whose appointment authority specifically states that they are to be employed without compensation, and persons who meet the definition of volunteer in § 551.102. These include student volunteers (5 CFR Part 308), VISTA and Peace Corps volunteers, and persons who perform personal services primarily for their own benefit or for the benefit of other persons—e.g., volunteers in a Federal hospital who write letters for patients or perform other personal amenities for patients. The one group that does not meet the definition of volunteer in § 551.102 and, therefore, is not excluded from coverage by § 551.103, is that made up of individuals who perform services of economic benefit for a Federal agency. Persons in this group meet the "economic realities" test for employment. For example, they may perform services for a Federal activity to free Federal employees for other duties. If they did not perform such services, Federal employees would have to. Therefore, their services are of economic benefit to the Federal activity. However, acceptance of such services is subject to the restriction in section 665(b) of title 31, United States Code (the Anti-Deficiency Act), against accepting voluntary services.

#### Subminimum Wage

One labor organization recommended that the criteria for compliance with the subminimum wage authority be spelled out. OPM is issuing a separate FPM letter on this subject at this time. While the subminimum wage authority of the Act permits the employment of students, learners, apprentices, and handicapped workers, OPM has determined that use of this authority by Federal agencies will be limited to handicapped patients who are receiving treatment or care in a Federal hospital or institution and who are permitted to perform work of a

consequential economic benefit for the hospital or institution.

#### Records Keeping

Numerous comments addressed the proposed OPM requirement to keep records for a period of six years. The Office of Financial Management, GAO, advised that the present records retention schedule of three years at the agency level and 56 years at the National Personnel Records Center is sufficient for its use to settle pay claims. Therefore, we have removed the reference to six years. Agencies will continue to follow the GAO schedule.

#### Rest Periods and Meal Periods.

In numerous comments it was requested that OPM specify how many rest periods are allowed in a workday. Agencies are responsible for scheduling the work of their employees. This includes scheduling authorized rest periods during the workday. We have modified the language in § 551.411 to clarify that any authorized rest period is worktime.

One agency had a problem with the term "bona fide meal periods." We do not specify a specific scheduled meal period, nor do we authorize a deduction from hours worked when an employee works and does not take an authorized meal period. This term simply means that, when an employee has an authorized meal period and does, in fact, take the meal period off, the employee is off duty during this period and is not paid for it.

#### Time Spent Traveling

Numerous comments questioned the specific rules for compensable travel time under the Act. These rules are presently contained in FPM Letters 551-10 and 11. The letters also include in depth instructions, with examples, on how the rules are to be applied under the Act. The rules are consistent with the rulings, interpretations, and opinions of the Department of Labor and the courts in the private sector. We recognize that the rules for compensable travel time under title 5, United States Code, differ considerably from those under FLSA. This area is one of the most difficult in premium pay administration because of the dual administrations of title 5 and the FLSA. The rules for compensable travel time must be applied separately under each law, title 5 and FLSA, and nonexempt employees are to be paid under whichever law provides them the greater overtime pay benefit.

#### Time Spent in Training

Numerous comments recommended that we retain the prohibition currently contained in FPM Letter 551-3 on the payment of overtime pay for a period of training under the Act. The change in OPM determination concerning time spent in training was brought about by (1) a better understanding of the differences between title 5, United States Code, and the FLSA, and (2) other relevant decisions by OPM in its experience in resolving conflicts between the two laws. It has been OPM's position, endorsed by GAO, that the two laws are to be administered separately and independently, with nonexempt employees being paid under whichever law provides them the greater overtime pay benefit. Consistent with this position, we have modified our original determination to provide that time spent in training outside regular working hours is compensable as hours of work under the FLSA if certain specific criteria are met. This change will bring OPM's administration of the FLSA into line with that of the Department of Labor in the private sector and will produce consistency in OPM's administration of the Act.

We have modified the language in § 551.423, and have prepared an FPM letter to provide supplemental instructions in response to the myriad of comments received on this section. The new FPM letter rescinds FPM Letter 551-3 and is to be effective on the effective date of the regulations. Together the regulations in § 551.423 and the supplemental instructions in the FPM letter clearly outline those situations when time spent in training is hours of work and those situations when time spent in training is not hours of work. A summary of the changes in language in § 551.423 and the instructions contained in the FPM letter follows:

A paragraph was added in this section to clarify further the phrases, "directed to participate," and "to improve the employee's performance \* \* \* of his or her current position." The FPM letter provides specific instructions on what training meets these criteria.

A paragraph was added in this section to address preparatory time for attendance at training. The FPM letter provides additional instructions on how an agency may determine the appropriate allowance for preparatory time and when such preparatory time is hours of work.

A special provision was added in this section to address employees engaged in an apprenticeship program or other entry level training programs, employees

engaged in an internship program or other career related work study programs, and employees appointed under the Veterans Readjustment Act (5 CFR Part 307). The FPM letter contains special instructions for the treatment of training time for employees in these programs. Furthermore, OPM will issue Federal Personnel Manual guidance reflecting this change in its chapter 410 on training.

#### Time Spent Adjusting Grievances or Performing Representational Functions

Numerous comments expressed a need to distinguish clearly between time spent by a grievant adjusting his or her grievance and "official time" spent by an employee representative performing representational functions. The language in § 551.424 has been revised to clarify (1) that any time spent by a grievant in the settlement of his or her grievance while the grievant is required to be on the agency's premises is worktime, and (2) that any "official time" granted by an agency and used by an employee representative in the performance of representational functions is worktime.

One agency expressed concern over the meaning of the phrase, "while otherwise in a duty status." The key to whether time spent performing representational functions outside regular working hours is overtime work is that the employee representative must already have been in an overtime duty status at the direction of the agency at the time an event arises which calls for the performance of representational functions. The employee representative cannot extend his or her duty hours (including overtime hours) solely for the purpose of extending representational functions into overtime hours.

#### Time Spent Receiving Medical Attention

Three agencies recommended that the time spent receiving medical attention should be limited to job-related illnesses or injuries, and another agency recommended that such time be limited to one hour. It must be emphasized that § 551.425 addresses only a situation where an employee has already reported to work and subsequently becomes ill or injured, and, further, it only applies to that specific workday. This provision cannot be limited to a job-related illness or injury, and it cannot be limited to a specific period of time. However, it is limited to situations when an employee is receiving medical attention at the direction and under the control of the agency. When these criteria are met, the employee is on duty during the time he or she receives medical attention.

Two agencies recommended that this section be expanded to include time spent by an employee taking a physical examination that is required for continued employment with the agency. This recommendation was adopted.

#### Time Spent in Charitable Activities

The comments of a few agencies expressed some confusion concerning the treatment of time spent by volunteers in charitable activities. It must be emphasized that the rules for the treatment of such time contained in § 551.426 apply only to employees of an agency. Volunteers, as defined in § 551.102, are not employees under the Act, and, therefore, this section is not applicable to such individuals.

#### Time Spent on Standby Duty or in an On-Call Status

Two agencies recommended that § 551.431 be revised to distinguish clearly between (1) standby duty and (2) time spent in an on-call status. This recommendation was adopted.

In addition, one labor organization recommended that time spent in on-call status be compensable. Under the Act, an employee is either on duty or off duty. There is no provision for a semi-duty status such as standby duty or on-call status. Therefore, OPM was faced with the task of determining whether standby duty and time spent in an on-call status are properly worktime under the Act. OPM determined that the severe restrictions placed on an employee's whereabouts and time to qualify for standby duty pay under title 5, United States Code, make such duty worktime under the Act. However, the Department of Labor and the courts have not seen fit to consider time spent in an on-call status a severe enough limitation on an employee's off duty time to require compensation for such status. Therefore, we determined that time spent in an on-call status is not worktime. This policy determination was promulgated in FPM Letter 551-14, dated May 15, 1978. The feasibility of a premium or a differential to ensure an employee's availability during a period of on-call status is currently being reviewed by the Compensation Program Development Division, OPM.

#### Maximum Earnings Limitation

One agency recommended the inclusion of a statement that the maximum limitation on an employee's aggregate pay (basic pay and premium pay) under title 5, United States Code, does not apply to overtime pay under the Act. This recommendation was adopted.

#### Fractional Hours of Work

Numerous agencies questioned the requirements to pay for irregular, unscheduled overtime work in fractions of a quarter of an hour or less, and to pay for every minute of regularly scheduled overtime work. They indicated that it would be administratively burdensome to comply with these requirements. The requirements contained in § 551.521 are not a change in policy, but merely express in regulatory language the procedures currently prescribed in FPM Letter 551-8, dated June 12, 1975.

Recently, the Comptroller General concurred in an OPM proposal to provide for rounding of odd minutes of irregular, unscheduled overtime work under title 5, United States Code. For example, if an agency is paying for such overtime work in increments of 15 minutes, seven minutes or less may be rounded down to zero and eight minutes or more may be rounded up to 15 minutes. OPM is currently amending 5 CFR Part 550 to provide for the rounding of odd minutes under title 5. This section has been revised to provide for the rounding of odd minutes of irregular, unscheduled overtime work on the same basis. The revision will provide agencies four possible administrative procedures for the treatment of irregular, unscheduled overtime work: (1) Restrict the performance of overtime work to the full fraction used to account for overtime work, (2) pay for every minute of irregular, unscheduled overtime work, (3) round odd minutes of irregular, unscheduled overtime work on a daily basis, or (4) accumulate odd minutes of irregular, unscheduled overtime work and round on a workweek basis. Agencies are encouraged to adopt the same administrative procedure under both title 5 and the FLSA.

#### Compensatory Time Off

Two agencies and one labor organization commented on the seemingly limited use of compensatory time off under this part—i.e., that compensatory time off may be taken only in the same workweek. The rules contained in § 551.531, which are consistent with instructions contained in FPM Letter 551-6, dated June 12, 1975, allow for the use of compensatory time off in subsequent workweeks, provided the employee's overtime pay entitlement under title 5, United States Code, is equal to or greater than his or her overtime pay entitlement under the FLSA, and the employee makes a written request for such compensatory time off.

We acknowledge the position expressed by the Wage and Hour Division, Department of Labor, that an employee is entitled to overtime pay for overtime work and that overtime payments must be made within the regular pay periods. This is the basis for the Wage and Hour Division's position that an employer may not credit an employee with compensatory time off for overtime work to be used in subsequent pay periods. The Wage and Hour Divisions, at the same time, expressed its awareness of the statutory conflict between the FLSA and title 5. OPM has addressed this conflict by administering both laws concurrently and requiring compensation under whichever law provides the greater overtime pay benefit. When an employee's entitlement to overtime pay under title 5 is equal to or greater than his or her entitlement to overtime pay under the FLSA, the employee may exercise his or her statutory entitlement to request compensatory time off in lieu of overtime pay under title 5.

OPM has determined that this is a significant regulation for the purposes of E.O. 12044.

Office of Personnel Management.

JoAnn B. Platter,

Assistant Issuance System Manager.

Accordingly, OPM is adding Subparts A, C, D, and E to 5 CFR Part 551, to read as follows:

### PART 551—PAY ADMINISTRATION UNDER THE FAIR LABOR STANDARDS ACT

#### Subpart A—General Provisions

Sec.	
551.101	General.
551.102	Definitions.
551.103	Coverage.
551.104	Administrative authority.
* * *	

#### Subpart C—Minimum Wage Provisions

Basic Provision	
551.301	Minimum wage.

#### Subminimum Wage

551.311	Subminimum wage.
---------	------------------

#### Subpart D—Hours of Work

##### General Provisions

551.401	Basic principles.
551.402	Agency responsibility.

##### Application of Principles in Relation to Normal Workday

551.411	Workday.
551.412	Preparatory or concluding activities.

##### Application of Principles in Relation to Other Activities

551.421	Regular working hours.
---------	------------------------

- 551.422 Time spent traveling.  
 551.423 Time spent in training or attending a lecture, meeting, or conference.  
 551.424 Time spent adjusting grievances or performing representational functions.  
 551.425 Time spent receiving medical attention.  
 551.426 Time spent in charitable activities.

#### Special Situations

- 551.431 Time spent on standby duty or in an on-call status.  
 551.432 Sleep time.

#### Subpart E—Overtime Pay Provisions.

##### Basic Provisions

- 551.501 Overtime pay.

##### Overtime Pay Computations

- 551.511 Hourly regular rate of pay.  
 551.512 Overtime pay entitlement.  
 551.513 Payment of greater overtime pay entitlement.

##### Fractional Hours of Work

- 551.521 Fractional hours of work.

##### Compensatory Time Off

- 551.531 Compensatory time off.

##### Special Overtime Pay Provisions

- 551.541 Employees engaged in fire protection activities or law enforcement activities.

Authority: Pub. L. 93-259; 29 U.S.C. 204f.

#### Subpart A—General Provisions

##### § 551.101 General.

(a) Section 3(e)(2) of the Fair Labor Standards Act of 1938, as amended, authorizes the application of the provisions of the Act to any person employed by the Government of the United States, as specified in that section. Section 4(f) of the Act authorizes the Office of Personnel Management to administer the provisions of the Act for all such employees, except for those who are employed by the Library of Congress, United States Postal Service, Postal Rate Commission, or the Tennessee Valley Authority; the named groups of employees are specifically excluded from the Office of Personnel Management's administration.

(b) The Act provides for minimum standards for both wages and overtime entitlements, and delineates administrative procedures by which covered worktime must be compensated. Included in the Act are provisions related to child labor, equal pay, and portal-to-portal activities. In addition, the Act exempts specified employees or groups of employees from the application of certain of its provisions. It prescribes penalties for the commission of specifically prohibited acts.

(c) This part contains the regulations, criteria, and conditions that the Office of

Personnel Management has prescribed for the administration of the Act. This part supplements and implements the Act, and must be read in conjunction with it.

##### § 551.102 Definitions.

In this part:

(a) "Act" means the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201 et seq.);

(b) "Agency", for purposes of the Office of Personnel Management's administration of the Act, means any instrumentality of the United States Government, or any constituent element thereof acting directly or indirectly as an employer, as this term is defined in section 3(d) of the Act; but does not include:

- (1) The Library of Congress;
  - (2) The United States Postal Service;
  - (3) The Postal Rate Commission; or
  - (4) The Tennessee Valley Authority;
- all of which are subject to the administration of the Act by the Department of Labor, under Title 29, Code of Federal Regulations.

(c) "Employ" means to engage a person in an activity that is for the benefit of an agency, as defined for this part, and includes any hours of work that are suffered or permitted.

(d) "Employee" means a person who is employed:

- (1) In an executive agency;
- (2) As a civilian in a military department;
- (3) In a nonappropriated fund instrumentality of an executive agency or a military department; or
- (4) In a unit of the legislative or judicial branch of the Government that has positions in the competitive service.

(e) "Suffered or permitted" work means any work performed by an employee for the benefit of an agency, whether requested or not, provided the employee's supervisor knows or has reason to believe that the work is being performed and has an opportunity to prevent the work from being performed.

(f) "Trainee" means a person who does not meet the definition of "employee" in (d), above, and who is assigned or attached to a Federal activity primarily for training. A person who attends a training program under the following conditions is considered a "trainee" and, therefore, is not an "employee" of the Government of the United States for purposes of the Act:

- (1) The training, even though it includes actual operation of the facilities of the Federal activity, is similar to that given in a vocational school or other institution of learning;
- (2) The training is for the benefit of the individual;

(3) The trainee does not displace regular employees, but, rather, is supervised by them;

(4) The Federal activity which provides the training derives no immediate advantage from the activities of the trainee; on occasion its operations may actually be impeded;

(5) The trainee is not necessarily entitled to a job with the Federal activity at the completion of the training period; and

(6) The agency and the trainee understand that the trainee is not entitled to the payment of wages from the agency for the time spent in training.

(g) "Volunteer" means a person who does not meet the definition of "employee" in (d), above, and who volunteers or donates his or her service the primary benefit of which accrues to the performer of the service or to someone other than the agency. Under such circumstances there is neither an expressed nor an implied compensation agreement. Services performed by such a volunteer include personal services that, if left unperformed, would not necessitate the assignment of an employee to perform them.

##### § 551.103 Coverage.

(a) Any employee of an agency who is not specifically excluded by another statute is covered by the Act. This includes any person who is:

(1) Defined as an employee under section 2105 of title 5, United States Code;

(2) Appointed under other appropriate authority; or

(3) Suffered or permitted to work by an agency whether or not formally appointed.

(b) The following persons are not covered under the Act:

(1) A person appointed under appropriate authority without compensation;

(2) A trainee as defined in § 551.102(f); or

(3) A volunteer as defined in § 551.102(g).

##### § 551.104 Administrative authority.

The Office of Personnel Management is the administrator of the provisions of the Act with respect to any person employed by an agency, except for the equal pay provisions contained in section 6(d) of the Act, which are administered by the Equal Employment Opportunity Commission.

\* \* \* \* \*

**Subpart C—Minimum Wage Provisions****Basic Provision****§ 551.301 Minimum wage.**

(a) Except as provided in § 551.311, an agency shall pay each of its employees wages at rates not less than the minimum wage specified in section 6(a)(1) of the Act for all hours of work as defined in subpart D of this part.

(b) An employee has been paid in compliance with the minimum wage provisions of this subpart if the employee's hourly regular rate of pay, as defined in § 551.511(a) of this part, for the workweek is equal to or in excess of the rate specified in section 6(a)(1) of the Act.

**Subminimum Wage****§ 551.311 Subminimum wage.**

An agency may, if it meets certain criteria published by the Office of Personnel Management, employ certain groups of less than fully productive employees (e.g., handicapped patient workers) at rates less than the minimum wage specified in section 6(a)(1) of the Act.

**Subpart D—Hours of Work****General Provisions****§ 551.401 Basic principles.**

(a) All time spent by an employee performing an activity for the benefit of an agency and under the control or direction of the agency is "hours of work." Such time includes:

- (1) Time during which an employee is required to be on duty;
- (2) Time during which an employee is suffered or permitted to work; and
- (3) Waiting time or idle time which is under the control of an agency and which is for the benefit of an agency.

(b) Paid periods of nonwork (e.g., leave, holidays, or excused absences) are not hours of work for the purposes of this part.

(c) Time that is considered hours of work under this part shall be used only to determine an employee's entitlement to minimum wages or overtime pay under the Act, and shall not be used to determine hours of work for pay administration under title 5, United States Code, or any other authority.

**§ 551.402 Agency responsibility.**

(a) An agency is responsible for exercising appropriate controls to assure that only that work for which it intends to make payment is performed.

(b) An agency shall keep complete and accurate records of all hours worked by its employees.

**Application of Principles in Relation to Normal Workday****§ 551.411 Workday.**

(a) For the purposes of this part, "workday" means the period between the commencement of the principal activity(s) that an employee is engaged to perform on a given day, and the cessation of the principal activity(s) for that day. All time spent by an employee in the performance of such activity(s) is hours of work. The workday is not limited to a calendar day or any other 24-hour period.

(b) Any rest period authorized by an agency that does not exceed 20 minutes and that is within the workday shall be considered hours of work.

(c) *Bona fide* meal periods shall not be considered hours of work.

**§ 551.412 Preparatory or concluding activities.**

(a) A preparatory or concluding activity that is closely related to the principal activity, and is indispensable to its performance, is an integral part of the principal activity and is, therefore, a part of the workday and shall be considered hours of work.

(b) A preparatory or concluding activity that is not an integral part of the performance of the principal activity is not a part of the workday. Such an activity is a preliminary or postliminary activity and is not considered hours of work.

**Application of Principles in Relation to Other Activities****§ 551.421 Regular working hours.**

(a) Under the Act there is no requirement that a Federal employee have a regularly scheduled administrative workweek. However, under title 5 United States Code, and Part 610 of this chapter, the head of an agency is required to establish work schedules for his or her employees. In determining what activities constitute hours of work under the Act, there is generally a distinction based on whether the activity is performed by an employee during regular working hours or outside regular working hours. For purposes of this part, "regular working hours" means the hours and days during which an employee is normally scheduled to be on duty.

**§ 551.422 Time spent traveling.**

(a) Time spent traveling shall be considered hours of work if:

- (1) An employee is required to travel during regular working hours;
- (2) An employee is required to drive a vehicle or perform other work while traveling;

(3) An employee is required to travel as a passenger on a one-day assignment away from the official duty station; or

(4) An employee is required to travel as a passenger on an overnight assignment away from the official duty station during hours on nonworkdays that correspond to the employee's regular working hours.

(b) An employee who travels from home before the regular workday begins and returns home at the end of the workday is engaged in normal "home to work" travel; such travel is not hours of work. When an employee travels directly from home to a temporary duty location outside the limits of his or her official duty station, the time the employee would have spent in normal home to work travel shall be deducted from hours of work as specified in paragraphs (a)(2) and (a)(3) of this section.

(c) An employee who is offered one mode of transportation, and who is permitted to use an alternative mode of transportation, or an employee who travels at a time other than that selected by the agency, shall be credited with the lesser of:

- (1) The actual travel time which is hours of work under this section; or
- (2) The estimated travel time which would have been considered hours of work under this section had the employee used the mode of transportation offered by the agency, or traveled at the time selected by the agency.

**§ 551.423 Time spent on training or attending a lecture, meeting, or conference.**

(a) Time spent in training, whether or not it is under the purview of Part 410 of this chapter, shall be administered as follows:

- (1) Time spent in training during regular working hours shall be considered hours of work.
- (2) Time spent in training outside regular working hours shall be considered hours of work if:
  - (i) The employee is directed to participate in the training by his or her employing agency; and
  - (ii) The purpose of the training is to improve the employee's performance of the duties and responsibilities of his or her current position.

(3) Time spent in apprenticeship or other entry level training, or internship or other career related work study training, or training under the Veterans Readjustment Act (5 CFR Part 307) outside regular working hours shall not be considered hours of work, provided no productive work is performed during such periods.

(4) Time spent by an employee performing work for the agency during a period of training shall be considered hours of work.

(b) The following phrases contained in (a), above, are further clarified:

(1) "Directed to participate" means that the training is required by the agency and the employee's performance or continued retention in his or her current position will be adversely affected by nonenrollment in such training.

(2) Training "to improve the employee's performance . . . of his or her current position" is distinguished from upward mobility training or developmental training to provide an employee the knowledge or skills needed for a subsequent position in the same career field.

(c) Time spent by an employee within an agency's allowance of preparatory time for attendance at training shall be considered hours of work if such preparatory time is:

(1) During an employee's regular working hours; or

(2) Outside the employee's regular working hours, and the purpose of the training meets the requirements of (a)(2), above.

(d) Time spent attending a lecture, meeting, or conference shall be considered hours of work if attendance is:

(1) During an employee's regular working hours; or

(2) Outside an employee's regular working hours, and

(i) The employee is directed by an agency to attend such an event; or

(ii) The employee performs work for the benefit of the agency during such attendance.

#### § 551.424 Time spent adjusting grievances or performing representational functions.

(a) Time spent by an employee adjusting his or her grievance (or any appealable action) with an agency during the time the employee is required to be on the agency's premises shall be considered hours of work.

(b) "Official time" granted an employee by an agency to perform representational functions during those hours when the employee is otherwise in a duty status shall be considered hours of work. This includes time spent by an employee performing such functions during regular working hours (including regularly scheduled overtime hours), or during a period of irregular, unscheduled overtime work, provided an event arises incident to representational functions that must be dealt with during the irregular, unscheduled overtime period.

#### § 551.425 Time spent receiving medical attention.

(a) Time spent waiting for and receiving medical attention for illness or injury shall be considered hours of work if:

(1) The medical attention is required on a workday an employee reported for duty and subsequently became ill or was injured;

(2) The time spent receiving medical attention occurs during the employee's regular working hours; and

(3) The employee receives the medical attention on the agency's premises, or at the direction of the agency at a medical facility away from the agency's premises.

(b) Time spent taking a physical examination that is required for the employee's continued employment with the agency shall be considered hours of work.

#### § 551.426 Time spent in charitable activities.

Time spent working for public or charitable purposes at an agency's request, or under an agency's direction or control, shall be considered hours of work. However, time spent voluntarily in such activities outside an employee's regular working hours is not hours of work.

#### Special Situations

##### § 551.431 Time spent on standby duty or in an on-call status.

(a) An employee will be considered on duty and time spent on standby duty shall be considered hours of work if:

(1) The employee is restricted to an agency's premises, or so close thereto that the employee cannot use the time effectively for his or her own purposes; or

(2) The employee, although not restricted to the agency's premises:

(i) Is restricted to his or her living quarters or designated post of duty;

(ii) Has his or her activities substantially limited; and

(iii) Is required to remain in a state of readiness to perform work.

(b) An employee will be considered off duty and time spent in an on-call status shall not be considered hours of work if:

(1) The employee is allowed to leave a telephone number or to carry an electronic device for the purpose of being contacted, even though the employee is required to remain within a reasonable call-back radius; or

(2) The employee is allowed to make arrangements such that any work which may arise during the on-call period will be performed by another person.

#### § 551.432 Sleep time.

(a) Except as provided in paragraph (b) of this section, *bona fide* sleep time that fulfills the following conditions shall not be considered hours of work if:

(1) The tour of duty is 24 hours or more;

(2) During such time there are adequate facilities such that an employee may usually enjoy an uninterrupted period of sleep; and

(3) There are at least 5 hours available for such time during the sleep period.

(b) For employees engaged in fire protection activities or law enforcement activities, the exclusion of sleep time is appropriate for tours of duty of more than 24 hours only. However, paragraphs (a)(2) and (a)(3) of this section still apply to employees in these activities.

(c) Not more than 8 hours in a 24-hour period shall be considered sleep time.

(d) If sleep time is interrupted by a call to duty, the time spent on duty is considered hours of work.

#### Subpart E—Overtime Pay Provisions

##### Basic Provisions

##### § 551.501 Overtime pay.

(a) Except as otherwise provided in this subpart, an agency shall compensate an employee who is not exempt under subpart B of this part for all hours of work in excess of 40 in a workweek at a rate equal to one and one-half times the employee's hourly regular rate of pay.

(b) An employee's "workweek" is a fixed and recurring period of 168 hours—seven consecutive 24-hour periods. It need not coincide with the calendar week but may begin on any day and at any hour of a day. For employees subject to Part 610 of this chapter, the workweek shall be the same as the administrative workweek defined in § 610.102 of this chapter.

(c) The maximum limitation on an employee's aggregate rate of pay under § 550.105 of this chapter does not apply to overtime pay due the employee under this subpart.

##### Overtime Pay Computations

##### § 551.511 Hourly regular rate of pay.

(a) An employee's "hourly regular rate" is computed by dividing the total remuneration paid to an employee in the workweek by the total number of hours of work in the workweek for which such compensation was paid.

(b) "Total remuneration" includes all remuneration for employment paid to, or on behalf of, an employee except:

(1) Payments as rewards for service the amount of which is not measured by

or dependent on hours of work, production, or efficiency (e.g., a cash award for a suggestion made by an employee and adopted by an agency);

(2) Payments for periods during which no work is performed (e.g., leave, holidays, or excused absences), or reimbursements for travel expenses, or other similar expenses, incurred by an employee in furtherance of an agency's interest, which are not related to hours of work;

(3) Payments made in recognition of services performed during a given period, if both the fact that payment is to be made and the amount of the payment are determined at the sole discretion of the agency (e.g., incentive awards for outstandingly high-quality work);

(4) Contributions by an agency to a fund for retirement, insurance, or similar benefits;

(5) Extra compensation provided by a premium rate paid for hours of work performed by an employee in excess of eight in a day, or in excess of the normal workweek applicable to the employee;

(6) Extra compensation provided by a premium rate paid for hours of work performed by an employee on a Sunday or a holiday where such premium rate is at least one and one-half times the employee's rate of pay for work performed in nonovertime hours on other days; or

(7) Extra compensation provided by a premium rate paid for hours of work performed by an employee outside his or her regular working hours, where such premium rate is at least one and one-half times the employee's rate of pay for work performed in nonovertime hours.

#### § 551.512 Overtime pay entitlement.

(a) An employee's overtime entitlement under this subpart includes:

(1) The straight time rate of pay times all overtime hours worked; plus

(2) One-half times the employee's hourly regular rate of pay times all overtime hours worked.

(b) An employee's "straight time rate of pay" is equal to the employee's rate of pay for his or her position (exclusive of any premiums or differentials) except for an employee who is authorized annual premium pay under §§ 550.141 or 550.151 of this chapter. For an employee who is authorized annual premium pay, straight time rate of pay is equal to basic pay plus annual premium pay divided by the hours for which the basic pay plus annual premium pay are intended.

(c) An employee has been paid in compliance with the overtime pay provisions of this subpart only if the employee has received pay at a rate at

least equal to the employee's straight time rate of pay for all nonovertime hours of work in the workweek.

#### § 551.513 Payment of greater overtime pay entitlement.

An employee entitled to overtime pay under this subpart and overtime pay under § 550.113 of this chapter, or under any other authority, shall be paid under whichever authority provides the greater overtime entitlement in the workweek. This overtime pay shall be paid in addition to all pay, other than overtime pay, to which the employee is entitled under title 5, United States Code, or any other authority.

#### Fractional Hours of Work

##### § 551.521 Fractional hours of work.

(a) A quarter of an hour shall be the largest fraction of an hour used for crediting irregular, unscheduled overtime work under this subpart. Odd minutes or irregular, unscheduled overtime work shall be rounded up or rounded down to the nearest full fraction of an hour being used to account for overtime work.

(b) An employee shall be compensated for every minute of regularly scheduled overtime work.

#### Compensatory Time Off

##### § 551.531 Compensatory time off.

(a) An agency may grant an employee compensatory time off in lieu of overtime pay under appropriate statutory authority, to be taken during the same workweek in which the overtime work was performed.

(b) An employee who earns an overtime pay entitlement under this subpart may be granted compensatory time off in a subsequent workweek provided:

(1) The employee earns overtime entitlement under § 550.113 of this chapter that is equal to or greater than the employee's overtime entitlement under this subpart; and

(2) The employee makes a written request to substitute compensatory time off for overtime payment.

#### Special Overtime Pay Provisions

##### § 551.541 Employees engaged in fire protection activities or law enforcement activities.

(a) An employee engaged in fire protection activities or law enforcement activities shall be paid at a rate equal to one and one-half times the employee's hourly regular rate of pay for those hours in a tour of duty which exceed the overtime standard for a work period specified in section 7(k) of the Act.

(b) The "tour of duty" of an employee engaged in these activities shall include all time the employee is on duty. Meal periods and sleep periods are included in the tour of duty except as otherwise provided in § 551.432 of this part.

(c) Each agency shall establish the "work period" to be used for application of section 7(k) of the Act. The work period shall be at least seven days and not more than 28 days.

BILLING CODE 6325-01-M

## 5 CFR Part 581

### Processing Garnishment Orders for Child Support and/or Alimony

**AGENCY:** Office of Personnel Management.

**ACTION:** Final rule.

**SUMMARY:** This document revises and updates the entire appendix to the garnishment regulations which lists agents who are designated to accept legal process for garnishment for child support and/or alimony.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Murray Meeker, Office of the General Counsel, (202) 632-5524.

#### SUPPLEMENTARY INFORMATION:

Appendix A was originally published in the *Federal Register* on July 22, 1980 (45 FR 48853-48864). On July 22, 1980, OPM published final garnishment regulations for the executive branch. The regulations were in compliance with Executive Order 12105 which expressly directed OPM to promulgate such regulations. Included with the regulations was an appendix which listed designated agents to accept service of process in garnishment actions.

On September 3, 1980, OPM issued FPM Bulletin 581-3 which requested additional agents from agencies which had not responded previously. FPM Bulletin 581-3 was directly responsible for the majority of the new designations published herein. The entire Appendix is reprinted below as a service to the reader.

OPM has determined that this is a nonsignificant regulation for the purposes of E.O. 12044.

Office of Personnel Management.

JoAnn B. Platter,

Assistant Issuance System Manager.

Accordingly, OPM is revising Part 581 to read as follows:

**PART 581—PROCESSING  
GARNISHMENT ORDERS FOR CHILD  
SUPPORT AND/OR ALIMONY**

**Subpart A—Purpose and Definitions**

- Sec.  
581.101 Purpose.  
581.102 Definitions.  
581.103 Moneys which are subject to garnishment.  
581.104 Moneys which are not subject to garnishment.  
581.105 Exclusions.  
581.106 Future payments.

**Subpart B—Service of Process**

- 581.201 Agent to receive process.  
581.202 Service of process.  
581.203 Information minimally required to accompany legal process.

**Subpart C—Compliance with Process**

- 581.301 Suspension of payment.  
581.302 Notification of obligor.  
581.303 Response to legal process or interrogatories.  
581.304 Nonliability for disclosure.  
581.305 Honoring legal process.  
581.306 Lack of moneys due from, or payable by, a governmental entity served with legal process.

**Subpart D—Consumer Credit Protection Act Restrictions**

- 581.401 Aggregate disposable earnings.  
581.402 Maximum garnishment limitations.

**Subpart E—Implementation by Governmental Entities**

- 581.501 Rules, regulations, and directives by governmental entities.

**Appendix A—List of Agents Designated to Accept Legal Process.**

Authority: 42 U.S.C. 659, 661-662; 15 U.S.C. 1673; E.O. 12105.

**Subpart A—Purpose and Definitions**

**§ 581.101 Purpose.**

Section 659 of title 42 of the United States Code, as amended, provides that moneys, the entitlement to which is based upon remuneration for employment, due from, or payable by, the United States or the District of Columbia to any individual, shall be subject, as if the United States or the District of Columbia were a private person, to legal process brought for the enforcement of such individual's legal obligations to provide child support and/or make alimony payments. The purpose of this part is to implement the objectives of section 659 as it pertains to the executive branch of the Government of the United States.

**§ 581.102 Definitions.**

In this part: (a) "The executive branch of the Government of the United States" means all "governmental entities" as defined in this section, including therein

the territories and possessions of the United States, the United States Postal Service, the Postal Rate Commission, any wholly owned Federal corporation created by an Act of Congress, and the government of the District of Columbia.

(b) "Governmental entity" means each department, both civilian and military, agency, independent establishment, or instrumentality of the executive branch, including the United States Postal Service, the Postal Rate Commission, any wholly owned Federal corporation created by an Act of Congress, any office, commission, bureau, or other administrative subdivision or creature of the executive branch, and the governments of the District of Columbia and of the territories and possessions of the United States.

(c) "Private person" means a person who does not have sovereign or other special immunity or privilege which causes that person not to be subject to legal process.

(d) "Child support" means periodic payments of funds for the support and maintenance of a child or children, and, subject to and in accordance with State or local law, includes, but is not limited to, payments to provide for health care, education, recreation, clothing, or to meet other specific needs of such a child or children; the term also includes attorney's fees, interest, and court costs, if they are expressly made recoverable under a decree, order, or judgment issued in accordance with applicable State or local law by a court of competent jurisdiction.

(e) "Alimony" means periodic payments of funds for the support and maintenance of a spouse or former spouse, and, subject to and in accordance with State or local law, includes, but is not limited to, separate maintenance, alimony pendente lite, maintenance, and spousal support. Alimony also includes attorney's fees, interest, and court costs, if they are expressly made recoverable under a decree, order, or judgment issued in accordance with applicable State or local law by a court of competent jurisdiction. This term does not include any payment or transfer of property or its value by an individual to his/her spouse or former spouse in compliance with any community property settlement, equitable distribution of property, or other division of property between spouses or former spouses. (See instead 5 U.S.C. 8345(j).)

(f) "Legal process" means any writ, order, summons, or other similar process in the nature of garnishment, which may include an attachment, writ of execution, or court ordered wage assignment, which—

(1) Is issued by: (i) A court of competent jurisdiction, including Indian tribal courts, within any State, territory, or possession of the United States, or the District of Columbia;

(ii) A court of competent jurisdiction in any foreign country with which the United States has entered into an agreement which requires the United States to honor the process; or

(iii) An authorized official pursuant to an order of a court of competent jurisdiction or pursuant to State or local law, and

(2) Is directed to, and the purpose of which is to compel, a governmental entity, to make a payment from moneys otherwise payable to an individual, to another party to satisfy a legal obligation of the individual to provide child support and/or make alimony payments.

(g) "Legal obligation" means an obligation to pay alimony and/or child support which is enforceable under appropriate State or local law.

(h) "Obligor" means an individual having a legal obligation to pay alimony and/or child support.

(i) "Remuneration for employment" means compensation paid or payable for personal services, whether such compensation is denominated as wages, salary, commission, bonus, pay, or otherwise, and includes, but is not limited to, those items set forth in § 581.103.

(j) "Party" means the person or persons to whom alimony and/or child support payments should be made, or, in the case of an agency established by State or local law, the agency which has been assigned, by law or by agreement, the right to receive such payment or payments.

**§ 581.103 Moneys which are subject to garnishment.**

(a) For the personal service of a civilian employee obligor:

- (1) Saved pay;
- (2) Retained pay;
- (3) Night differentials;
- (4) Sunday and holiday premium pay;
- (5) Overtime pay;
- (6) Standby pay;
- (7) Environmental differentials;
- (8) Hazardous duty pay;
- (9) Tropical differentials;
- (10) Recruitment incentives;
- (11) Equalization allowance;
- (12) Any payment in consideration of accrued leave;
- (13) Severance pay;
- (14) Sick pay;
- (15) Physicians comparability allowances;
- (16) Special pay for physicians and dentists;

(17) Amounts paid pursuant to a personal services contract where the contractor recipient performed the services and received the payments in the capacity as a Federal employee;

(18) Merit pay;

(19) Incentive pay;

(20) Cash awards;

(21) Agency and Presidential incentive awards (except where such award is for making a suggestion); and

(22) Senior Executive Service rank and performance awards.

(b) For the personal service of an obligor in the uniformed services of the United States: (1) Basic pay (including service academy cadet and midshipmen pay);

(2) Special pay (including enlistment and re-enlistment bonuses);

(3) Lump sum reserve bonus;

(4) Continuation pay for physicians and dentists;

(5) Special pay for physicians, dentists, optometrists, and veterinarians;

(6) Incentive pay;

(7) Variable incentive pay;

(8) Inactive duty training pay;

(9) Administrative duty pay;

(10) Academy official pay (other than personal money allowances);

(11) Any payments made in consideration of accrued leave (basic pay portion only);

(12) Readjustment pay;

(13) Disability retired pay;

(14) Severance pay (including disability severance pay); and

(15) Cash awards (NOAA Corps).

(c) For obligors generally: (1) Periodic benefits, including a periodic benefit as defined in section 428(h)(3) of title 42 of the United States Code, title II of the Social Security Act, to include a benefit payable in a lump sum if it is commutation of, or a substitute for, periodic payments; or other payments to these individuals under the programs established by subchapter II of chapter 7 of title 42 of the United States Code (Social Security Act) and by chapter 9 of title 45 of the United States Code (Railroad Retirement Act) or any other system or fund established by the United States (as defined in section 662(a) of title 42 of the United States Code) which provides for the payment of:

(i) Pensions;

(ii) Retirement;

(iii) Retired/retainer pay;

(iv) Annuities;

(v) Refunds of retirement contributions where an application has been filed; and

(vi) Dependents' or survivors' benefits when payable to the obligor.

(2) Amounts received under any Federal program for compensation for work injuries; and

(3) Benefits received under the Longshoremen's and Harbor Workers' Compensation Act.

(4) Exceptions. Remuneration would not include: (i) Any payment as compensation for death, including any lump sum death benefit under any Federal program;

(ii) Any payment under any Federal program established to provide "black lung" benefits;

(iii) Any payment by the Veterans Administration as pension; or

(iv) Any payments by the Veterans Administration as compensation for a service-connected disability or death, except any compensation paid by the Veterans Administration to a former member of the Armed Forces who is in receipt of retired or retainer pay if such former member has waived a portion of his/her retired pay in order to receive such compensation. In this case, only that part of the Veterans Administration payment which is in lieu of the waived retired/retainer pay, is subject to garnishment.

**§ 581.104 Moneys which are not subject to garnishment.**

(a) Payments made pursuant to the provisions of the Federal Tort Claims Act, as amended, sections 1346(b) and 2671 *et seq.*, of title 28 of the United States Code;

(b) Payments or portions of payments made by the Veterans Administration pursuant to sections 501-562 of title 38 of the United States Code, in which the entitlement of the payee is based on non-service-connected disability or death, age and need;

(c) Refunds and other payments made in connection with overpayments or erroneous payments of income tax and other taxes levied under Title 26 of the United States Code;

(d) Grants;

(e) Fellowships;

(f) Veterans' educational assistance payments under sections 1651 *et seq.*, of Title 38 of the United States Code;

(g) Contracts, except where the contractor recipient performed personal services and received payments in his/her capacity as an employee of a governmental entity; and

(h) Reimbursement for expenses incurred by an individual in connection with his/her employment, or allowances in lieu thereof, and other payments and allowances, including, but not limited to:

(1) In the case of civilian employees:

(i) Uniform allowances;

(ii) Travel and transportation expenses (including mileage allowances);

(iii) Relocation expenses;

(iv) Storage expenses;

(v) Post differentials;

(vi) Foreign areas allowances;

(vii) Education allowances for dependents;

(viii) Separate maintenance allowances;

(ix) Post allowances and supplementary post allowances;

(x) Home service transfer allowances;

(xi) Quarters allowances;

(xii) Cost-of-living allowances

(COLA), when applicable to an employee in a foreign area or an employee stationed outside of the continental United States or in Alaska;

(xiii) Remote worksite allowance; and

(xiv) Per diem allowances.

(2) In the case of members of the uniformed services: (i) Position pay (Navy only);

(ii) Basic allowance for quarters;

(iii) Basic allowance for subsistence;

(iv) Station allowances;

(v) Armed Forces health professions scholarship stipends;

(vi) Public Health Service scholarship stipends;

(vii) Travel and transportation allowances;

(viii) Dislocation allowances;

(ix) Family separation allowances;

(x) ROTC subsistence allowance;

(xi) Allowance for recruiting expenses;

(xii) Education allowances for dependents;

(xiii) Clothing allowances for enlisted personnel; and

(xiv) Uniform allowances for General and Flag officers, and for the Surgeon General and other employees of the Public Health Service.

(3) In the case of volunteers serving under either the Domestic Volunteer Service Act or the Peace Corps Act, all allowances, including, but not limited to, readjustment allowances, stipends, and reimbursements for out-of-pocket expenses.

**§ 581.105 Exclusions.**

In determining the amount of any "moneys due from or payable by, the United States" to any individual, there shall be excluded amounts which:

(a) Are owed by the individual to the United States;

(b) Are required by law to be deducted from the remuneration or other payment involved, including, but not limited to:

(1) Amounts withheld from benefits payable under title II of the Social Security Act where the withholding is required by law;

(2) Federal employment taxes;  
 (3) Amounts mandatorily withheld for the U.S. Soldiers' and Airmen's Home; and

(4) Fines and forfeitures ordered by a court-martial or by a commanding officer;

(c) Are properly withheld for Federal, State, or local income tax purposes, if the withholding of the amounts is authorized or required by law and if amounts withheld are not greater than would be the case if the individual claimed all dependents to which he/she were entitled. The withholding of additional amounts pursuant to section 3402(i) of title 26 of the United States Code may be permitted only when the individual presents evidence of a tax obligation which supports the additional withholding;

(d) Are deducted as health insurance premiums, including, but not limited to, amounts deducted from civil service annuities for Medicare where such deductions are requested by the Health Care Financing Administration;

(e) Are deducted as normal retirement contributions, not including amounts deducted for supplementary coverage. Amounts withheld as Survivor Benefit Plan or Retired Serviceman's Family Protection Plan payments are considered to be normal retirement contributions. Amounts voluntarily contributed toward additional civil service annuity benefits are considered to be supplementary; or

(f) Are deducted as normal life insurance premiums from salary or other remuneration for employment, not including amounts deducted for supplementary coverage. Both Servicemen's Group Life Insurance and "regular" Federal Employees' Group Life Insurance premiums are considered to be normal life insurance premiums; "optional" Federal Employees' Group Life Insurance premiums and life insurance premiums paid for by allotment, such as National Service Insurance, are considered to be supplementary.

#### § 581.106 Future payments.

Moneys paid by a governmental entity which may be due and payable to an individual at some future date, shall not be considered due the individual unless and until all of the conditions necessary for payment of the moneys to the individual have been met, including, but not limited to, the following conditions which might apply:

- (a) Retirement;
- (b) Resignation from a position in the Federal service; or
- (c) Application for payment of moneys by the individual.

### Subpart B—Service of Process

#### § 581.201 Agent to receive process.

(a) Appendix A to this part lists agents designated to accept service of process.

(b) The head of each governmental entity shall submit to the Office of the General Counsel, Room 5H30, Office of Personnel Management, 1900 E Street, NW., Washington, D.C. 20415, for publication in Appendix A to this part, the following information concerning the agent(s) designated to accept service of process:

- (1) Title;
- (2) Mailing address;
- (3) Telephone number; and
- (4) Geographical area or region, if applicable.

(c) United States Attorneys are not considered appropriate agents to accept service of process.

#### § 581.202 Service of process.

(a) A party using this part shall serve on the designated agent of the governmental entity which has moneys due and payable to the obligor, legal process which names the governmental entity as the garnishee.

(b) Service of legal process brought for the enforcement of an obligation to provide child support and/or alimony shall be accomplished by certified or registered mail, return receipt requested, or by personal service, upon the appropriate agent designated in Appendix A to this part, or if no agent has been designated for the governmental entity having payment responsibility for the moneys involved, then upon the head of that governmental entity. The designated agent shall note the date and time of receipt on the legal process. The governmental entity shall make every reasonable effort to facilitate proper service of process on its designated agent(s). If legal process is not directed to any particular official within the entity, or if it is addressed to the wrong individual, the recipient shall, nonetheless, forward the legal process to the designated agent. However, valid service is not accomplished until the legal process is received in the office of the designated agent.

(c) Where it does not appear from the face of the process that it has been brought to enforce the legal obligation(s) defined in § 581.102(d) and/or (e), the process must be accompanied by a certified copy of the court order establishing such legal obligation(s).

(d) Where the State or local law provides for the issuance of legal process without a support order, such other documentation establishing that it was brought to enforce legal

obligation(s) defined in § 581.102(d) and/or (e) must be submitted.

(e) In order for the party who caused the legal process to be served to receive the additional five (5) percent provided for in either § 581.402(a) or (b), it must appear on the face of the legal process that the process was brought for the enforcement of a support order for a period which is twelve (12) weeks in arrears, or a certified copy of the support order, or other evidence acceptable to the head of the governmental entity, establishing this fact, must be submitted.

#### § 581.203 Information minimally required to accompany legal process.

(a) Sufficient identifying information must accompany the legal process in order to enable processing by the governmental entity named. Therefore, the following identifying information about the obligor, if known, is requested:

- (1) Full name;
- (2) Date of birth;
- (3) Employment number, social security number, Veterans Administration claim number, or civil service retirement claim number;
- (4) Component of the governmental entity for which the obligor works, and the official duty station or worksite; and
- (5) Status of the obligor, e.g., employee, former employee, or annuitant.

(b) If the information submitted is not sufficient to identify the obligor, the legal process shall be returned directly to the court, or other authority, with an explanation of the deficiency. However, prior to returning the legal process, if there is sufficient time, and attempt should be made to inform the party who caused the legal process to be served, or the party's representative, that it will not be honored unless adequate identifying information is supplied.

### Subpart C—Compliance With Process

#### § 581.301 Suspension of payment.

Upon proper service of legal process, together with all supplementary documents and information as required by §§ 581.202 and 581.203, the head of the governmental entity, or his/her designee, shall identify the obligor to whom that governmental entity holds moneys due and payable as remuneration for employment and shall suspend, i.e., withhold payment of such moneys for the amount necessary to permit compliance with the legal process.

#### § 581.302 Notification of obligor.

(a) As soon as possible, but not later than fifteen (15) calendar days after the date of valid service of legal process, the

agent designated to accept legal process shall send to the obligor, at his or her duty station or last known home address, written notice:

(1) That such process has been served, including a copy of the legal process, and, if submitted, such other documents as may be required by § 581.202;

(2) Of the maximum garnishment limitations set forth in § 581.402, with a request that the obligor submit supporting affidavits or other documentation necessary for determining the applicable percentage limitation;

(3) That by submitting supporting affidavits or other necessary documentation, the obligor consents to the disclosure of such information to the garnishor; and

(4) Of the percentage that will be deducted if he/she fails to submit the documentation necessary to enable the governmental entity to respond to the legal process within the time limits set forth in § 581.303.

(b) The governmental entity may provide the obligor with the following additional information:

(1) Copies of any other documents submitted in support of the legal process;

(2) That the United States does not represent the interests of the obligor in the pending legal proceedings;

(3) That the obligor may wish to consult legal counsel regarding defenses to the legal process that he or she may wish to assert; and

(4) That obligors in the uniformed services may avail themselves of the protections provided in sections 520, 521, and 523 of the Soldiers' and Sailors' Civil Relief Act of 1940 (50 U.S. Code App. 501 *et seq.*).

#### § 581.303 Response to legal process or interrogatories.

(a) Whenever the designated agent is validly served with legal process, the agent shall respond within thirty (30) calendar days, or within such longer period as may be prescribed by applicable State or local law, after the date valid service is made. The agent shall also respond within this time period to interrogatories which accompany legal process.

(b) If State or local law authorizes the issuance of interrogatories prior to or after the issuance of legal process, the agent shall respond to the interrogatories within thirty (30) calendar days after receipt: *Provided*, That the document(s) required by § 581.202(c) have been presented.

#### § 581.304 Nonliability for disclosure.

(a) No Federal employee whose duties include responding to interrogatories pursuant to § 581.303(b), shall be subject to any disciplinary action or civil or criminal liability or penalty for any disclosure of information made by him/her in connection with the carrying out of any duties pertaining directly or indirectly to answering the interrogatories.

(b) However, a governmental entity would not be precluded from taking disciplinary action against an employee who consistently or purposely failed to provide correct information requested by interrogatories.

#### § 581.305 Honoring legal process.

(a) The governmental entity shall comply with legal process, except where the process cannot be complied with because:

(1) It does not, on its face, conform to the laws of the jurisdiction from which it was issued;

(2) The legal process would require the withholding of funds not deemed moneys due from, or payable by, the United States as remuneration for employment;

(3) The legal process is not brought to enforce legal obligation(s) for alimony and/or child support;

(4) It does not comply with the mandatory provisions of this part;

(5) An order of a court of competent jurisdiction enjoining or suspending the operation of the legal process has been served on the governmental entity; or

(6) Where notice is received that the obligor has appealed the underlying alimony and/or child support order, payment of moneys subject to the legal process shall be suspended until the governmental entity is ordered by a court, or other authority, to resume payments. However, no suspension action shall be taken where the applicable law of the jurisdiction wherein the appeal is filed requires compliance with the legal process while an appeal is pending.

(b) Under the circumstances set forth in § 581.305(a), or where the governmental entity is directed by the Justice Department not to comply with the legal process, the entity shall respond directly to the court, or other authority, setting forth its objections to compliance with the legal process. In addition, the governmental entity shall inform the garnishor, or the garnishor's representative, that the legal process will not be honored. Thereafter, if litigation is initiated or threatened, the entity shall immediately refer the matter to the United States Attorney for the district from which the legal process

issued. To ensure uniformity in the executive branch, governmental entities which have statutory authority to represent themselves in court shall coordinate their representation with the United States Attorney.

(c) In the event that a governmental entity is served with more than one legal process for the same moneys due or payable to an individual, then the moneys shall be available to satisfy such processes on a first-come, first-served basis: *Provided*, That in no event will the total amount garnished for any pay or disbursement cycle exceed the applicable limitation set forth in § 581.402.

(d) Neither the United States, any disbursing officer, nor governmental entity shall be liable for any payment made from moneys due from, or payable by, the United States to any individual pursuant to legal process regular on its face, if such payment is made in accordance with this part. However, where a governmental entity negligently fails to comply with legal process, the United States shall be liable for the amount that the governmental entity would have paid, if the legal process had been properly honored.

(e) Governmental entities affected by legal process served under this part shall not be required to vary their normal pay or disbursement cycles to comply with the legal process. However, legal process, valid at the time of service, which is received too late to be honored during the disbursement cycle in which it is received, shall be honored to the extent that the legal process may be satisfied during the next disbursement cycle within the limits set forth in § 581.402. The fact that the legal process may have expired during this period would not relieve the governmental entity of its obligation to honor legal process which was valid at the time of service. If, in the next disbursement cycle, no further payment will be due from the entity to the obligor, the entity shall follow the procedures set forth in § 581.306.

#### § 581.306 Lack of moneys due from, or payable by, a governmental entity served with legal process.

(a) When legal process is served on a governmental entity, and the individual identified in the legal process as the obligor is found not to be entitled to moneys (the entitlement to which is based upon remuneration for employment) due from, or payable by, the governmental entity the entity shall follow the procedures set forth in the legal process for that contingency or, if no procedures are set forth therein, shall return the legal process to the court, or

other authority from which it was issued, and advise the court, or other authority, that no moneys, the entitlement to which is based upon remuneration for employment are due from, or payable by, the governmental entity to the named individual.

(b) Where it appears that remuneration for employment is only temporarily exhausted or otherwise unavailable, the court, or other authority, shall be fully advised as to why, and for how long, the remuneration will be unavailable, if that information is known by the governmental entity.

(c) In instances where an obligor employee separates from his/her employment with a governmental entity which is presently honoring a continuing legal process, the entity shall inform the party who caused the legal process to be served, or the party's representative, and the court, or other authority, that the payments are being discontinued. In cases where the obligor has retired, or separated and requested a refund of retirement contributions, or transferred, or is receiving benefits under the Federal Employee's Compensation Act, and where this information is known by the entity, the entity shall provide the party with the designated agent for the new disbursing governmental entity.

#### Subpart D—Consumer Credit Protection Act Restrictions

##### § 581.401 Aggregate disposable earnings.

The "aggregate disposable earnings", when used in reference to the amounts due from, or payable by, the United States or the District of Columbia which are garnishable under the Consumer Credit Protection Act for child support and/or alimony, are the obligor's remuneration for employment less those amounts deducted in accordance with § 581.105.

##### § 581.402 Maximum garnishment limitations.

Pursuant to section 1673(b)(2) (A) and (B) of title 15 of the United States Code (the Consumer Credit Protection Act, as amended), unless a lower maximum garnishment limitation is provided by applicable State or local law, the maximum part of the aggregate disposable earnings subject to garnishment to enforce any support order(s) shall not exceed:

(a) Fifty (50) percent of the obligor's aggregate disposable earnings for any workweek, where he/she asserts by affidavit, or by other acceptable evidence, that he/she is supporting a spouse and/or dependent child, other than the former spouse and/or child for whose support such order is issued,

except that an additional five (5) percent will apply if it appears on the face of the legal process, or from other evidence submitted in accordance with § 581.202(d), that such earnings are to enforce a support order for a period which is twelve (12) weeks prior to that workweek. An obligor shall be considered to be supporting a spouse and/or dependent child only if the obligor provides over half of the spouse's and/or dependent child's support.

(b) Sixty (60) percent of the obligor's aggregate disposable earnings for any workweek, where he/she fails to assert by affidavit or establishes by other acceptable evidence, that he/she is supporting a spouse and/or dependent child, other than a former spouse and/or child with respect to whose support such order is issued, except that an additional five (5) percent will apply if it appears on the face of the legal process, or from other evidence submitted in accordance with § 581.202(d), that such earnings are to enforce a support order for a period which is twelve (12) weeks prior to that workweek.

(c) Where, under § 581.302(a)(2), an obligor submits evidence that he/she is supporting a second spouse and/or child, copies of the evidence shall be sent by the governmental entity to the garnishor, or the garnishor's representative, as well as to the court, or other authority, together with notification that the obligor's support claim will be honored. If the garnishor disagrees with the obligor's support claim, the garnishor should immediately refer the matter to the court, or other authority, for resolution.

#### Subpart E—Implementation by Governmental Entities

##### § 581.501 Rules, regulations, and directives by governmental entities.

Appropriate officials of all governmental entities shall, to the extent necessary, issue implementing rules, regulations, and/or directives that are consistent with this part.

##### Appendix A—List of Agents Designated to Accept Legal Process

(This appendix lists the agents designated to accept legal process for the executive branch of the United States, including the United States Postal Service, the Postal Rate Commission, the District of Columbia, American Samoa, Guam, the Virgin Islands, and the Smithsonian Institution.)

##### I. Departments

##### Department of Agriculture

General Counsel, Department of Agriculture, 14th & Independence Ave., SW., Washington, D.C. 20250, (202) 447-3351.

##### Department of Commerce

1. For employee obligors in the Office of the Secretary, Economic Development Administration, Domestic and International Business Administration, Bureau of Economic Analysis, Office of Minority Business Enterprise, National Fire Prevention and Control Administration, United States Travel Service, Office of Regional Economic Coordination, Appalachian Regional Commission, and Regional Action Planning Commissions: Director, Finance Operations Division, Department of Commerce, Room 6830-A, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, (202) 377-2227.

2. Census Bureau: Chief, Finance Division, Bureau of the Census, Suite 111, Iverson Mall, Washington, D.C. 20233, (301) 763-5654.

3. National Oceanic and Atmospheric Administration: Chief, Finance Division, National Oceanic and Atmospheric Administration, Building AD-5, Room 300, 6010 Executive Boulevard, Rockville, MD 20852, (301) 443-8795.

4. Patent and Trademark Office: Director, Office of Finance, Patent and Trademark Office, Room 2-6D-07, Crystal Plaza, Washington, D.C. 20231, (703) 557-3761.

5. National Bureau of Standards, National Technical Information Service, and Office of Telecommunications: Chief, Financial Management Division, National Bureau of Standards, Room A-931, Administration Building, Washington, D.C. 20234, (301) 921-2507.

6. Maritime Administration: Chief, Division of Accounts, Office of Financial Management, Maritime Administration, Room 3090, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, (202) 377-4764.

7. In cases where the name of the operating unit in the Department of Commerce cannot be ascertained: Chief, Accounting Standards Division, Office of the Secretary, Room 6800, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, (202) 377-4407.

##### Department of Defense

##### Army

Commander, Army Finance and Accounting Center, Attention: FINCL-G, Indianapolis, IN 46249, (317) 542-4284.

##### Navy and Marine Corps

1. Navy Active-duty, Reserve, Fleet Reserve or retired Navy: Director Navy Family Allowance Activity, A. J. Celebrezze Federal Building, Room 967, Cleveland, Ohio 44199.

2. Marine Corps Active-duty, Reserve, Fleet Marine Corps Reserve, or retired, and civilian personnel, except non-appropriated fund employees: Commanding Officer, Marine Corps Finance Center (AA) Kansas City, Missouri 64197.

3. Civilian personnel of the Navy or Marine Corps, Director of Civilian Personnel Law, Office of the General Counsel, Navy Department, Washington, D.C. 23090.

4. Non-civil service civilian personnel of Navy Exchange or related non-appropriated fund instrumentalities administered by the Navy Resale System Office: Commanding Officer, Navy Resale System Office, Attention: Industrial Relations Officer, 29th Street & Third Avenue, Brooklyn, New York 11232.

5. Non-civil service civilian personnel of Navy clubs, messes, or recreation facilities (non-appropriated funds): Chief of Naval Personnel Director, Recreation Services Division (Pers/NMPC-72) Washington, D.C. 20370.

#### Air Force

1. Active duty, reserve, Air National Guard (ANG), retired military members and civilian employees of appropriated fund activities: Commander, Air Force Accounting and Finance Center, Attention: JA, Denver, CO 80279, (303) 370-7524.

2. Non-appropriated fund civilian employees of base exchanges: Army and Air Force Exchange Service, Attention: GC-G, Dallas, TX 75222, (214) 330-2174.

3. Civilian employees of all other Air Force nonappropriated fund activities: AFMPC/JA, Attention: NAF Law Division, Randolph AFB, TX 78548, (512) 652-6691.

With respect to other civilian employees of Department of Defense agencies, or other employing activities within the Department of Defense or the Military Departments, the Director of the agency or activity shall assist by receiving and forwarding process to the designated agent in the appropriate disbursing office.

#### Defense Communications Agency

General Counsel and Deputy General Counsel, Office of the General Counsel (Code 105), Defense Communications Agency, Washington, D.C. 20305 (202) 692-2009.

#### Defense Contract Audit Agency

Director of Personnel, Defense Contract Audit Agency, Cameron Station, Alexandria, VA 22314 (202) 274-7325.

#### Defense Logistics Agency

Accounting & Finance Officer (DCSC-CA), Defense Construction Supply Center, Columbus, OH 43215, (614) 236-3161.

Accounting & Finance Officer (DESC-CA), Defense Electronics Supply Center, 1507 Wilmington Pike, Dayton, OH 45444 (513) 296-6415.

Command Security Officer, Defense General Supply Center, Richmond, VA 23297 (804) 275-4751.

Accounting & Finance Officer (DPSC-ZA), Defense Personnel Support Center, 2800 South 20th Street, Philadelphia, PA 19101 (215) 952-2741.

Accounting & Finance Officer (DDMP-BD), Defense Depot Mechanicsburg, Mechanicsburg, PA 17055, (717) 790-2992.

Accounting & Finance Officer (DDMT-FD), Defense Depot Memphis, 2163 Airways Boulevard, Memphis, TN 38114 (901) 744-5541.

Accounting & Finance Officer (DDOU-RF), Defense Depot Ogden, Ogden, UT 84407, (801) 399-7358.

Accounting & Finance Officer (DDT-GD), Defense Depot Tracy, S. Chrisman Road, Tracy, CA 95376 (209) 835-9316.

Accounting & Finance Officer (DASC-F), Cameron Station, Alexandria, VA 22314 (202) 274-6108.

Accounting & Finance Officer (DCRA-FA), Defense Contract Administration Services Region, Atlanta, 805 Walker

Street, Marietta, GA 30060 (404) 424-9304.

Accounting & Finance Officer (DCRB-FA), Defense Contract Administration Services Region, Boston, 666 Summer Street, Boston, MA 02210 (617) 542-8893.

Accounting & Finance Officer (DCRI-FA), Defense Contract Administration Services Region, Chicago, O'Hare International Airport, 6400 North Mannheim Road, P.O. Box 66475, Chicago, IL 60666 (312) 694-2245.

Accounting & Finance Officer (DCRO-FA), Defense Contract Administration Services Region, Cleveland, Anthony J. Celebrezze Federal Building, 1240 East Ninth Street, Cleveland, OH 44199 (216) 522-5490.

Accounting & Finance Center Officer (DCRT-FA), Defense Contract Administration Services Region, Dallas, 500 South Ervay Street, Dallas, TX 75201 (214) 670-1350.

Accounting & Finance Officer (DCRL-FA), Defense Contract Administration Services Region, Los Angeles, 11099 South La Cienega Boulevard, Los Angeles, CA 90045 (213) 643-2210.

Accounting & Finance Center (DCRN-FA), Defense Contract Administration Services Region, New York, 60 Hudson Street, New York, NY 10013 (212) 374-9408.

Accounting & Finance Officer (DCRS-FA), Defense Contract Administration Services Region, St. Louis, 1136 Washington Avenue, St. Louis, MO 63101 (314) 263-6510.

#### Defense Mapping Agency

1. For employee obligors in the Headquarters and Components listed below: Headquarters, Defense Mapping Agency, Building 56, U.S. Naval Observatory, Washington, D.C. 20315.

Defense Mapping School, Fort Belvoir, Virginia 22060.

DMA Inter American Geodetic Survey, Fort Sam Houston, Texas 78234.  
General Counsel, Defense Mapping Agency, Building 56, U.S. Naval Observatory, Washington, D.C. 20305 (202) 254-4431.

2. For employee obligors in the DMA Aerospace Center: Counsel, DMA Aerospace Center, St. Louis Air Force Station, St. Louis, Missouri 63118 (314) 263-4501.

3. For employee obligors in the DMA Hydrographic/Topographic Center: Counsel, DMA Hydrographic/Topographic Center, Washington, D.C. 20315 (202) 227-2268.

#### Defense Nuclear Agency

General Counsel, Defense Nuclear Agency, Washington, D.C. 20305 (703) 325-7681.

#### Department of Energy

##### Power Administrations

1. Alaska Power Administration: Administrator, Alaska Power Administration, Department of Energy, P.O. Box 50, Juneau, AK 99802, (907) 586-7405.

2. Bonneville Power Administration: Head, Disbursement Audit Section (SNJ), Bonneville Power Administration, Department of Energy, 1002 N.E. Holladay, Portland, OR, (503) 234-3361.

3. Southeastern Power Administration: Director, Washington Financial Services Division (CR-46), Mail Station C-212, Department of Energy, Washington, D.C. 20545, (301) 353-5316.

4. Southwestern Power Administration: Chief Counsel, Southwestern Power Administration, Department of Energy, P.O. Drawer 1619, Tulsa, OK 74101, (918) 581-7426.

5. Western Area Power Administration: General Counsel, Western Area Power Administration, Department of Energy, P.O. Box 3402, Golden, CO 80401, (303) 231-1529.

#### Field Offices

## Veterans Administration

The fiscal officer at each VA facility shall be the designated agent for VA employee obligors at that facility. When a facility at which an individual is employed does not have a fiscal officer, the address and telephone number listed is for the fiscal officer servicing such a facility.

In those limited cases where a portion of VA service-connected benefits may be subject to garnishment, service of process, unless otherwise indicated below, should be made at the regional office nearest the veteran obligor's permanent residence.

## 5 CFR Part 831

### Retirement; Survivor Benefit Provisions

**AGENCY:** Office of Personnel Management.

**ACTION:** Final rule.

**SUMMARY:** The Office of Personnel Management (OPM) is revising its regulations to reflect current survivor benefit provisions of the Civil Service Retirement law and to establish spouse notification requirements pursuant to recent amendment.

**EFFECTIVE DATE:** January 5, 1981.

**FOR FURTHER INFORMATION CONTACT:** Doris Reeves, 202-632-4634.

**SUPPLEMENTARY INFORMATION:** On November 14, 1980, OPM published (45 FR 75217) proposed rules to incorporate statutory provisions that permit elimination of the survivorship reduction in a retiree's annuity under certain circumstances, permit retirees who were married at retirement to elect a reduced annuity with survivor benefits to a spouse acquired after retirement, provide for substituting a spouse acquired after retirement for the survivor benefit elected at retirement, and afford the retiree an opportunity of electing not to provide survivor protection for the spouse acquired after retirement even though such survivor benefit was elected at retirement.

The rules also established OPM's requirements under Pub. L. 96-391 which must be followed in order for a married employee's or Member's election of other than maximum survivorship protection to be valid in annuities commencing on and after January 5, 1981. In the latter case, OPM will accept a signed and witnessed declaration from the spouse to be submitted with the retirement application, in which the spouse acknowledges his/her understanding of the employee's or Member's election of other than a fully reduced annuity for survivor annuity purposes. Where an employee/Member elects other than a fully reduced annuity but cannot obtain the spouse's signature acknowledging the loss of or reduction in benefits, the proposed regulations will require the employee/Member to submit the spouse's last known mailing address to OPM. OPM will then send the spouse an explanatory letter by certified mail with return receipt requested. The spouse will be asked to sign the letter

acknowledging his/her understanding of the employee's or Member's election and return to OPM. If the letter is not signed by the spouse or returned to OPM, notification will be considered properly made upon return of the certified mail receipt to OPM; and the employee's or Member's election to exclude the spouse from benefits, either fully or partially, will become effective by final adjudication of the retirement application. On the other hand, where the employee/Member fails to cooperate in furnishing either (1) the spouse's witnessed acknowledgment of less than maximum survivor annuity protection or (2) the spouse's last known mailing address, OPM is required to complete final adjudication of the retirement application with the full reduction for survivor annuity benefits provided by statute (5 U.S.C. 8339(j)).

*Comments:* During the 30 day comment period which ended December 15, 1980, one agency submitted a suggestion that we require the spouse's acknowledgment to be notarized rather than merely witnessed. They rationalized that this would provide maximum protection against the possibility of fraud. We believe that requiring notarization would impose a hardship on the employee, and on the spouse, which was not intended by Congress. Further, the unavailability of notaries in many suburban and rural locations, as well as the fees involved, would probably result in some spouses refusing to acknowledge the employee's election. Since we are not convinced that requiring notarization would be effective when the employee is determined to violate the regulations, we are issuing the final regulations without change from those which were proposed.

The Director of OPM finds that good cause exists for making this amendment effective in less than 30 days, in order to give timely effect to the provisions of Pub. L. 96-391 which requires that spouses of married employees whose annuities commence on and after January 5, 1981 be notified when such employees elect less than maximum survivor annuity protection.

Office of Personnel Management.

JoAnn B. Platter,

Assistant Issuance System Manager.

Accordingly, the Office of Personnel Management amends 5 CFR Part 831 as follows:

(1) Section 831.601 (c) and (e) are revised to read as follows:

#### § 831.601 Survivor benefits.

\* \* \* \* \*

(c) The employee or Member shall communicate his/her choice of option over his/her signature on Standard Form 2801, Application for Retirement, for use in filing claim for annuity. Receipt of the communication in OPM constitutes prima facie evidence of the existence of all the elements of an election, except that an election by a married employee or Member of a life annuity, or an election to base the benefit payable to the surviving spouse on less than the full amount of annuity, is not valid unless:

- (1) The employee or Member provides OPM with the spouse's signed and witnessed declaration (the employee or Member may not witness the declaration) acknowledging the loss of or reduction in survivor benefits; or
- (2) The employee or Member provides OPM with the spouse's mailing address (or last known mailing address) in order for OPM to attempt to notify the spouse about the loss of or reduction in survivor benefits. The election is considered made when the prima facie evidence becomes conclusive by final adjudication of the claim by OPM.

(e) When an election has been conclusively made under this section, the employee or Member may not revoke or change the election or name another survivor, except as provided under 5 U.S.C. 8339 (j) and (k).

**§ 831.601 [Amended]**

(2) Paragraph (f) of § 831.601 is deleted and paragraphs (g) and (h) are redesignated as (f) and (g), respectively. (5 U.S.C. 8347(g))

BILLING CODE 6325-01-M

**5 CFR Parts 870, 871, 872, and 873**

**Basic Life Insurance, Standard Optional Life Insurance, Additional Optional Life Insurance, and Family Optional Life Insurance**

Note.—This document originally appeared in the Federal Register for Wednesday, December 24, 1980. It is reprinted in this issue to meet requirements for publication on the Tuesday-Friday schedule assigned to the Office of Personnel Management.

**AGENCY:** Office of Personnel Management.

**ACTION:** Interim regulations, with comments invited for consideration in final rulemaking.

**SUMMARY:** The Office of Personnel Management is issuing interim regulations governing the second phase of implementation of the Federal Employees' Group Life Insurance Act of

1980 (FEGLI), approved October 10, 1980, which has changed the FEGLI program from a two-part to a four-part package consisting of basic insurance and three optional plans.

**DATES:**

Effective date: The interim regulations are effective on December 24, 1980, unless otherwise specified.

Comment date: Comments must be received by February 23, 1981.

**ADDRESS:** Send written comments to Mr. Craig B. Pettibone, Director, Office of Pay and Benefits Policy, Compensation Group, Office of Personnel Management, P.O. Box 57, Washington, D.C. 20044.

**FOR FURTHER INFORMATION CONTACT:** John Landers (202) 632-4634.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 553(d)(3) of title 5, United States Code, the Director finds that good cause exists for making this amendment effective in less than 30 days, in order to give immediate and timely effect to provisions of Pub. L. 96-427 which require timely implementation of new group life insurance plans. The immediate effective date makes possible OPM's preparation and distribution of forms and materials necessary to make the new insurance available within the statutory time limit.

**Introduction**

The FEGLI program has been amended by Pub. L. 96-427, the Federal Employees' Group Life Insurance Act of 1980, approved October 10, 1980. The Act makes four major changes in the FEGLI program by (1) increasing basic FEGLI protection (beginning in October 1981) for employees under age 45 with no corresponding increase in withholdings, (2) requiring employees who retire or become entitled to receive workers' compensation after 1989 to continue paying premiums for unreduced basic insurance coverage to age 65, (3) permitting retiring employees to choose either the current post-retirement basic life insurance protection, which ultimately declines to 25 percent of the face value, or post-retirement coverage that, for an additional contribution, reduces at a lesser rate or not at all, and (4) adding to the existing \$10,000 optional insurance two new optional insurance plans affording additional life insurance on employees in multiples of one to five times annual pay, as well as life insurance on family members.

The Act allows OPM from 60 to 180 days in which to implement the increased post-retirement basic insurance coverage and to make available the two new optional plans. OPM implemented the offering of

increased post-age 65 basic life insurance at the earliest date permitted under the law, December 9, 1980 (see 45 FR 80472, December 5, 1980). The present interim regulations govern the two new optional plans, establish premium rates for coverage under them, and reduce the rates under the existing basic insurance and standard optional insurance effective on the first day of the first pay period beginning on or after April 1, 1981.

All employees will be given the opportunity to enroll for basic and optional coverages during an open enrollment period from March 1 through 31, 1981. Elections will be effective on or after April 1, 1981.

**New Rates for Basic Insurance and Standard Optional Insurance**

The Office of Personnel Management has re-evaluated the premium rates for basic insurance and standard optional insurance on the basis of experience. The new rates will be effective on the first day of the first pay period beginning on or after April 1, 1981. The biweekly rate for basic insurance for employees is reduced from 25.5 cents to 24 cents per \$1,000 of the employee's basic insurance amount. The biweekly rates for the \$10,000 of standard optional insurance will be:

Age	Current rate	New rate
Under 35.....	\$0.60	\$0.60
35-39.....	1.00	0.80
40-44.....	1.70	1.40
45-49.....	2.40	2.20
50-54.....	3.50	3.20
55-59.....	7.50	7.50
60 or over.....	9.00	9.00

**Additional Optional Insurance**

Pub. L. 96-427 authorizes OPM to purchase a group life insurance policy, without competitive bidding, which will make available to each employee who is insured for basic insurance additional optional life insurance. This coverage is referred to in the regulations as "additional optional insurance." Employees pay the full cost of coverage. There is no Government contribution.

The biweekly cost per \$1,000 of the additional optional insurance is:

Age	Rate
Under 35.....	\$.05
35-39.....	.07
40-44.....	.12
45-49.....	.20
50-54.....	.30
55-59.....	.60
60 or over.....	.95

Employees must affirmatively elect the additional optional insurance in order to obtain the coverage. All employees who are serving in positions which are not excluded from FEGLI coverage must either elect or decline the additional optional insurance during an open enrollment period to be held Government-wide from March 1 through 31, 1981. Only those employees who enroll for basic insurance are allowed to elect additional optional insurance. An employee who fails to elect this coverage during that period will not be allowed to enroll at a later date unless he/she meets the requirements discussed below, or the employing agency determines within 6 months that the employee was not able to elect the coverage due to reasons beyond his/her control.

The additional optional insurance is offered in multiples of 1, 2, 3, 4, or 5 times the annual rate of basic pay payable to the employee. Before multiplying, the pay is rounded to the next higher multiple of \$1,000. (When the annual pay is an exact multiple of \$1,000, the exact rate is used.) Additional optional insurance coverage may not exceed 5 times the annual rate of basic pay payable for positions at level II of the Executive Schedule under 5 U.S.C. 5313, rounded to the next higher \$1,000. Covered persons may elect to reduce or stop additional optional insurance coverage at any time, though the opportunity to re-elect or increase multiples is strictly limited by the regulations.

After March 31, 1981, an employee who does not have additional optional insurance will be allowed to elect it if he/she is enrolled (or enrolls) for basic insurance and (1) he/she is under age 50, (2) at least 1 year has elapsed since the date of the declination, and (3) he/she submits satisfactory medical evidence of insurability. An employee who satisfies all three requirements will be allowed to elect the additional optional insurance or to increase the number of multiples of this coverage. Also, an employee under age 36 may elect additional optional insurance without showing medical insurability if he/she has basic insurance and elects the coverage in timely fashion (usually within 60 days after the event permitting the election) following the birth, adoption or other acquisition of a child, as defined by the regulations. These interim regulations will also permit an employee under age 50 who has in force at least 1 multiple of pay under the additional optional insurance plan to increase the number of multiples without showing medical insurability

upon the employee's marriage or acquisition of a child. The employee must elect the increase in timely fashion (usually within 60 days after the event permitting the increase). The regulations limit the number of multiples acquired on the basis of the occurrence of an event to the number of family members (spouse and/or children) acquired with the event, e.g., 1 new multiple for a single birth, 2 new multiples upon birth of twins.

#### Family Optional Insurance

Pub. L. 96-427 authorizes OPM to purchase a group life insurance policy, without competitive bidding, which shall make available to each employee covered for basic insurance an amount of optional insurance on his/her family members. This coverage is referred to in the regulations as "family optional insurance." Employees pay the full cost of coverage. There is no Government contribution. The amount of family optional insurance is \$5,000 upon the death of a spouse and \$2,500 upon the death of a child. The benefit is paid to the employee, unless the employee dies before the payment can be made, in which case the benefit is paid to the employee's beneficiary for basic insurance.

The biweekly cost of the family insurance is:

Age	Rate
Under 35	\$0.50
35-39	0.60
40-44	0.70
45-49	0.90
50-54	1.30
55-59	2.00
60 or over	3.00

Employees must affirmatively elect the family optional insurance in order to obtain coverage. All employees who are serving in positions which are not excluded from FEGLI coverage must either elect or decline the family optional insurance during the March 1981 open enrollment period. Only those employees who enroll for basic insurance are allowed to elect the family optional insurance. An employee who fails to elect this coverage during March 1981 will be allowed to enroll at a later date only in the event that he/she marries, or upon the birth or adoption of a child, or other acquisition of a child, as defined in the regulations, or if the employing agency determines within 6 months that the employee was not able to elect the coverage due to reasons beyond his/her control.

Under the definition of a family member for the purposes of the FEGLI

law "child" means an unmarried dependent child who is under the age of 22, or who is 22 years of age or older and incapable of self-support because of a mental or physical disability which existed before the child became 22 years of age. These interim regulations provide the criteria to be used in determining the question of dependency, and in determining whether a child is to be considered incapable of self-support within the meaning of the FEGLI law. These regulations are similar to those in effect under Civil Service Retirement and Federal Employees Health Benefits regulations (see 45 FR 76087, November 18, 1980).

#### Open Enrollment Period

Because of the significant changes in the FEGLI program brought about by Pub. L. 96-427, OPM will hold an open enrollment period during the month of March 1981. Employees will be allowed to elect insurance irrespective of age, health or past participation in the program. The regulations provide that all waivers and declinations of existing basic and optional insurance filed before March 1981 are automatically canceled.

All non-excluded employees will be required to complete a Life Insurance Election form during March 1981, whether or not they are already participating in the FEGLI program. Employees who are already covered for basic insurance will continue that coverage unless they waive it. Employees who are already covered for standard optional insurance (\$10,000) will lose that portion of their coverage unless they affirmatively re-elect it during March 1981. In the event that an employee does not complete the Life Insurance Election form during March 1981, employing agencies will file an election of basic insurance and a declination of all optional coverages on his/her behalf on March 31, 1981. However, if within 6 months an agency determines that an employee was unable to complete the form during March for reasons beyond his/her control, the employee will be allowed 31 days from the date of the agency's determination in which to complete the form.

#### Effective Dates

Open enrollment period elections will generally become effective on the first day on or after April 1, 1981, on which an employee actually enters on duty in a pay status. An employee who is on leave and an employee who does not actually return to duty at his/her workplace on or after April 1, 1981, does not satisfy this requirement.

New hires during the month of March 1981 who are eligible for life insurance will be immediately covered for basic insurance from the time they actually enter on duty in pay status, unless they file a waiver of coverage before the end of the first pay period. These new hires will have the standard optional insurance on the first day they actually enter on duty in a pay status on or after the date on which they file an election of that coverage. However, additional optional insurance and family optional insurance coverage, if elected during March, become effective on the first day on or after April 1, on which the employee actually enters on duty in a pay status.

An employee who is already covered for standard optional insurance during March 1981 and who declines that coverage while retaining basic insurance will continue to be insured for both basic insurance and the standard optional insurance through the end of the pay period which includes March 31, 1981. A waiver of all coverage is effective at the end of the pay period in which it is received in the employing office.

#### Continuation of Insurance During Retirement or Receipt Workers' Compensation

An employee who retires on an immediate annuity, or who becomes entitled to receive workers' compensation under the Federal Employees Compensation Act because of disease or injury to himself/herself is entitled to continue as many multiples of additional optional insurance as have been in force for not less than: (1) the 5 years of service immediately preceding the date of retirement or entitlement to compensation or (2) the full period(s) of service during which the insurance was available to him/her. The same participation requirement for continuation of insurance exists under the law for standard optional insurance and family optional insurance. The optional coverages may continue for as long as the individual continues to be enrolled for basic insurance while the individual continues to receive annuity or workers' compensation and is held by the Department of Labor to be unable to return to duty. Withholdings for the full cost of the optional insurance continue to be taken from the annuity or compensation payments until the month following the month in which the individual becomes 65 years of age and is retired or receiving compensation.

Beginning with the second calendar month after a retiree or compensationner become 65 years of age the optional coverages begin to reduce by 2 percent a

month. The maximum reduction for the standard optional insurance is 75 percent of the face value. For additional optional insurance and family optional insurance this reduction continues until the insurance stops completely after 50 months. Once the reductions have begun, there are no withholdings from annuity or compensation for the optional coverages.

#### Reemployed Annuitants

There shall be no change in the current treatment of reemployed annuitants with respect to standard optional insurance coverage during reemployment. Retirees who are continuing standard optional insurance during retirement and who are reemployed in non-excluded positions will have the standard optional insurance coverage as employees unless the coverage is declined or waived, and the standard optional insurance as a retiree is suspended during reemployment. Withholdings for the full cost of the coverage are taken from salary. Following reemployment which is qualifying for a supplemental annuity, the individual may continue the reemployment-acquired insurance. If the reemployment period does not continue long enough for a supplemental annuity benefit to attach, the suspended insurance may be reinstated following separation from the reemployment.

These interim regulations provide for the same treatment with regard to family optional insurance of reemployed annuitants. However, the additional optional insurance of reemployed annuitants who have this coverage as retirees will not be automatically suspended upon reemployment. A reemployed annuitant in a non-excluded position will have the opportunity to elect either to continue additional optional insurance as a retiree or to have that coverage suspended and have additional optional insurance as an employee during reemployment. Following reemployment which is qualifying for a supplemental annuity, the individual may then continue the additional optional insurance acquired as a reemployed annuitant or the suspended additional optional insurance may be reinstated (if any remains after the post-age 65 reductions). If reemployment does not qualify the person for a supplemental annuity, any suspended additional optional insurance which remains in effect may be reinstated following separation from reemployment.

#### Waiver of Collection of Overpayment

Pub. L. 96-427 amends the FEGLI law to allow an agency which has failed to

withhold the proper FEGLI deductions from an individual's salary, annuity or compensation to waive the collection of the corresponding overpayments of salary, annuity or compensation if, in the judgment of the agency, the individual is without fault and recovery would be against equity and good conscience. However, if the agency waives the collection of any unpaid amount, it must still submit to OPM the uncollected FEGLI withholdings and contributions for deposit to the Employees' Life Insurance Fund.

Current Civil Service Retirement regulations, 5 CFR Part 831, provide standards for waiver of overpayments from the Civil Service Retirement Fund. These interim regulations provide that waivers of collections of life insurance deductions will be governed by the same standards, in cases where OPM fails to withhold proper FEGLI deductions from annuity. Agency standards for waivers of overpayments from salary will be those which the agency must follow under 4 CFR Subchapter G, Chapter I, which implements the provisions of 5 U.S.C. 5584 allowing agencies to waive collections of over-paid salary or allowances.

These interim regulations also make a technical amendment to 5 CFR 870.601(b) (see 45 FR 80472, December 5, 1980) needed to correct a reference in that paragraph to a non-existent paragraph (h). The reference is changed to paragraph (g) of the same section.

At the time OPM publishes final regulations, uniform nomenclature changes and editorial revisions will be added throughout Parts 870 and 871.

OPM has determined that this is a significant regulation for the purposes of E.O. 12044.

Office of Personnel Management.

**Beverly M. Jones,**

*Issuance System Manager.*

Accordingly, the Office of Personnel Management is amending Parts 870 and 871 of Title 5, Code of Federal Regulations, and adding new Parts 872 and 873, as follows:

#### PART 870—BASIC LIFE INSURANCE

(1) In Part 870, paragraphs (a), (b), and (f)(1) of § 870.401 are revised, effective on the first day of the first pay period beginning on or after April 1, 1981, to read as follows:

##### Subpart D—Withholdings and Contributions

##### § 870.401 Withholdings and contributions.

(a) During any period in any part of which an insured employee is in pay

status, \$0.24 for each \$1,000 of the employee's BIA shall be withheld from the biweekly pay of the employee. The amount withheld from the pay of an employee who is paid on other than a biweekly basis is determined at a proportionate rate, adjusted to the nearest cent.

(b) The amount withheld from the pay of an insured employee whose annual pay is paid during a period shorter than 52 workweeks is the sum obtained by converting the biweekly rate of \$0.24 for each \$1,000 of the employee's BIA to an annual rate and prorating the annual rate over the number of installments of pay regularly paid during the year.

(f)(1) Except as provided under paragraph (g) of this section, an insured person who elects continued basic life insurance coverage during receipt of annuity or compensation payments as provided under §§ 870.601(c)(2) or 870.701(c)(2) (maximum reduction of 75 percent after age 65) shall have withheld from his/her payments basic life insurance withholdings at the monthly rate (for annuitants) of \$0.52 for each \$1,000 of the BIA or at the weekly rate (for compensationers) of \$0.120 for each \$1,000 of the BIA.

(2) In Part 870, § 870.601(b) is revised to read as follows:

#### Subpart F—Retired Employees

##### § 870.601 Eligibility for life insurance.

(b) An employee who meets the requirements under paragraphs (a) or (g) of this section for continuation or reinstatement of life insurance shall execute a written election on a form furnished by OPM at the time entitlement to continuation or reinstatement of the insurance arises. To be considered valid, the election form must be received in OPM before final adjudication of the employee's application for annuity or supplemental annuity. In the absence of a valid election, the insured shall be deemed to have filed a valid election under paragraph (c)(2) of this section.

(3) The heading of Part 871 is revised, effective April 1, 1981, to read as follows:

#### PART 871—STANDARD OPTIONAL LIFE INSURANCE

(4) In Part 871, § 871.101 is revised, effective April 1, 1981, to read as follows:

#### Subpart A—Administration and General Provisions

##### § 871.101 Actions on the policy.

Optional life and accidental death and dismemberment benefits (referred to in this part as "standard optional insurance") shall be payable in accordance with an amendment to the policy purchased by OPM from the Metropolitan Life Insurance Co., 1 Madison Avenue, New York, NY 10010, under section 8709 of title 5, United States Code, to provide group insurance coverage (referred to in this part as "basic insurance"). Actions at law or in equity to recover on the policy, in which there is not alleged any breach of any obligations undertaken by the United States should be brought against the insurance company.

(5) In Part 871, § 871.202 and § 871.204(b) are revised, and §§ 871.204(d) and 871.205(e) are added, effective March 1, 1981, to read as follows:

#### Subpart B—Coverage

##### § 871.202 Election or declination.

(a) Except as otherwise provided in paragraph (b) of this section, each employee shall, on the form entitled Life Insurance Election, elect or decline standard optional insurance within 31 days after becoming eligible, unless during earlier employment he/she filed an election or declination which remains in effect.

(b) On a determination by an employing office, within 6 months after a person becomes eligible, that he/she was unable, for cause beyond his/her control to elect or decline the standard optional insurance within the prescribed time limit, the employee shall elect or decline the standard optional insurance within 31 days after he/she is advised of that determination. Standard optional insurance in that case is retroactive to the first day of the first pay period beginning after the date the person became eligible, or after April 1, 1981, whichever is later, and the person shall pay the full cost of the insurance from that date for the time that he/she is in a pay status or retired and under age 65.

(c) A person who does not file a Life Insurance Election form with his/her employing office does not have standard optional insurance.

##### § 871.204 Declination.

(b) A cancellation of standard optional insurance becomes effective and standard optional insurance stops at the end of the pay period in which the declination or waiver is received in the

employing office, except that a declination of standard optional insurance (which is not also a waiver of basic insurance) which is filed during the period from March 1, 1981 through March 31, 1981, becomes effective and standard optional insurance stops at the end of the pay period which includes March 31, 1981.

(d) For the purpose of having standard optional insurance as an employee, an election of insurance under this part filed on or before February 28, 1981, is deemed to have been canceled effective at the end of the pay period which includes March 31, 1981, unless the employee does not actually enter on duty in pay status during the first pay period which begins on or after April 1, 1981, in which case the election is deemed to have been canceled on the first day after the end of such pay period that the employee actually enters on duty in pay status. In order to retain or obtain standard optional insurance as an employee after the date of such declination an employee must affirmatively elect the coverage by filing the Life Insurance Election form with his/her employing office, subject to the provisions of § 871.205.

##### § 871.205 Cancellation of declination.

(e) Declinations of standard optional insurance filed on or before February 28, 1981, are automatically canceled effective on the first day an employee whose declination is so canceled actually enters on duty in pay status on or after April 1, 1981, and the standard optional insurance is effective on the date of cancellation of the declination, provided that the employee has filed an affirmative election of standard optional insurance on the form entitled Life Insurance Election during the period from March 1, 1981 through March 31, 1981. An employee whose pre-March 1981 declination is so canceled and who does not file the form with his/her employing office during the period from March 1, 1981 through March 31, 1981, shall be deemed to have declined standard optional insurance on March 31, 1981, except that an employee who fails to file the form during that period due to cause beyond his/her control shall be allowed to enroll belatedly under the conditions prescribed under § 871.202(b).

(6) In Part 871, § 871.401(c) is revised, and § 871.401(g) is added, effective on the first day of the first pay period beginning on or after April 1, 1981, to read as follows:

**Subpart D—Withholdings**

**§ 871.401 Withholdings.**

(c) The biweekly full cost of the \$10,000 of standard optional insurance (and for a person in receipt of annuity or compensation for work injury, of standard optional life insurance), until determined by OPM on the basis of experience to be otherwise, is:

For persons under age 35.....	\$0.60
For persons ages 35 through 39.....	\$0.80
For persons ages 40 through 44.....	\$1.40
For persons ages 45 through 49.....	\$2.20
For persons ages 50 through 54.....	\$3.20
For persons ages 55 through 59.....	\$7.50
For persons age 60 or over.....	\$9.00

The amount withheld from the pay of a person paid on other than a biweekly period or insured for more than \$10,000 shall be determined at a proportionate rate, adjusted to the nearest cent.

(g)(1) If OPM fails to withhold proper amounts of standard optional life insurance deductions from the annuity of a retired employee, OPM may waive the collection of the unpaid insurance deductions in accordance with section 8707(d) of title 5, United States Code. OPM shall use the standards for waiver of overpayments found under Subpart N of Part 831 of this chapter when determining whether a waiver of collection of the unpaid deductions may be granted, and shall follow the procedures under Subpart M of Part 831 of this chapter when applying the standards.

(2) If, under section 8707(d) of title 5, United States Code, an agency waives the collection of unpaid insurance deductions from an individual's pay, annuity or compensation, the agency shall submit an amount equal to the sum of the uncollected deductions and any applicable agency contributions required under section 8708 of title 5, United States Code, to OPM for deposit to the Employees' Life Insurance Fund. An agency will make its determination on the waiver of collection of an overpayment of pay in accordance with 5 U.S.C. 5584 as implemented by 4 CFR Chapter I, Subchapter G.

(7) In Part 871, paragraph (b) of § 871.501 is revised, paragraphs (c) and (d) are redesignated (d) and (e), and paragraph (c) is added, to read as follows:

**Subpart E—Termination and Conversion**

**§ 871.501 Termination and conversion of insurance.**

(b) If, because of a declination or waiver, an insured employee has not had the standard optional insurance during the full period(s) of service during which it was available to him/her, or for the 5 years of service immediately preceding the date on which that coverage stops, whichever is less, the optional insurance stops, subject to a 31-day extension standard optional life insurance coverage, on the date that his/her basic life insurance is continued or reinstated under the provisions of § 870.601 (during retirement) or § 870.701 (during receipt of compensation) of this chapter.

(c) If, at the time of an individual's election under §§ 870.601(b) or 870.701(b) of this chapter, he/she elects no basic life insurance during receipt of annuity or compensation (as provided under §§ 870.601(c)(1) and 870.701(c)(1) of this chapter), the standard optional insurance stops at the end of the month in which the election is received in OPM, subject to a 31-day extension of coverage.

(8) In Part 871, § 871.601 and § 871.604(b) are revised to read as follows:

**Subpart F—Retired Employees and Employees Compensation**

**§ 871.601 Amount of insurance.**

The amount of standard optional life insurance which is continued during receipt of annuity or compensation reduces by 2 percent a month effective at the beginning of the second calendar month after (a) the date the insurance would otherwise have stopped, or (b) the retiree's or compensation's 65th birthday, whichever is later, with a maximum reduction of 75 percent.

**§ 871.604 Reemployed retired employees.**

(b) Standard optional insurance acquired during reemployment may be continued after termination of the reemployment of the retired employee:

- (1) Qualifies for a supplemental annuity or acquires a new retirement right,
- (2) Continues his/her basic insurance under paragraphs (c)(2), (c)(3) or (c)(4) of § 870.601 of this chapter, and
- (3) Has had standard optional insurance in force for the 5 years of service immediately preceding separation from reemployment or for the full period(s) of service during which it was available to him/her, whichever is less.

If the standard optional life insurance acquired during reemployment is so continued, any suspended standard

optional life insurance stops with no 31-day extension of coverage or right of conversion.

(9) Part 872 is added to read as follows:

**PART 872—ADDITIONAL OPTIONAL LIFE INSURANCE**

**Subpart A—Administration and General Provisions**

- Sec.
- 872.101 Actions on the policy.
- 872.102 Payment of benefits; designations of beneficiary.
- 872.103 Correction of an error, mistake, or omission.

**Subpart B—Coverage**

- 872.201 Eligibility.
- 872.202 Election or declination.
- 872.203 Effective date of insurance.
- 872.204 Declination.
- 872.205 Cancellation of declination.
- 872.206 Reconsideration.

**Subpart C—Amount of Insurance**

- Sec.
- 872.301 Amount of employee's insurance.

**Subpart D—Withholdings**

- 872.401 Withholdings.

**Subpart E—Termination and Conversion**

- 872.501 Termination and conversion of insurance.

**Subpart F—Retired Employees and Employees Compensation**

- 872.601 Amount of insurance.
- 872.602 Termination of annuity compensation.
- 872.603 Waiver or suspension of annuity or compensation.
- 872.604 Reemployed retired employees.

Authority: 5 U.S.C. 8716. Interprets and applies 5 U.S.C. 8714b.

**Subpart A—Administration and General Provisions**

**§ 872.101 Actions on the policy.**

Optional life insurance (referred to in this part as "additional optional insurance") shall be payable in accordance with an amendment to the policy purchased by OPM from the Metropolitan Life Insurance Co., 1 Madison Avenue, New York, N.Y. 10010, pursuant to section 8709 of title 5, United States Code, to provide group insurance coverage (referred to in this part as "basic insurance"). Actions at law or in equity to recover on the policy, in which there is not alleged any breach of any obligations undertaken by the United States, should be brought against the insurance company.

**§ 872.102 Payment of benefits; designations of beneficiary.**

Additional optional insurance in force on a person at the date of his/her death

shall be paid, on receipt of a valid claim, in the same order of precedence and under the same conditions as are applicable to basic insurance. A designation of beneficiary for basic insurance is also a designation of beneficiary for additional optional insurance unless the insured person specifies otherwise in his/her designation.

**§ 871.103 Correction of an error, mistake, or omission.**

The Associate Director for Compensation may order correction of an error, mistake, or omission upon a showing satisfactory to the Associate Director that it would be against equity and good conscience not to do so.

**Subpart B—Coverage**

**§ 872.201 Eligibility.**

Each employee, as defined in section 8701 of title 5, United States Code, who is insured for basic insurance and for whom an uncanceled declination of additional optional insurance is not in effect is eligible to elect the additional optional insurance, if his/her periodic pay, after all other deductions, is sufficient to cover its full cost.

**§ 872.202 Election or declination.**

(a) Except as otherwise provided in paragraph (b) of this section, each employee shall, on the form entitled Life Insurance Election, elect or decline the additional optional insurance within 31 days after becoming eligible, unless during earlier employment he/she filed an election or declination which remains in effect. The 31-day time limit begins to run on the first day after February 28, 1981, on which an individual meets the definition of an employee under 5 U.S.C. 8701.

(b) On a determination by an employing office, within 6 months after a person becomes eligible, that he/she was unable, for cause beyond his/her control to elect the additional optional insurance within the prescribed time limit regulation, the employee shall elect or decline the optional insurance within 31 days after he/she is advised of that determination. Additional optional insurance in that case is retroactive to the first day of the first pay period beginning after the date the person became eligible, or after April 1, 1981, whichever is later, and the person shall pay the full cost of the insurance from that date for the time that he/she is in a pay status or retired and under age 65.

(c) A person who does not file a Life Insurance Election form with his/her employing office does not have the additional optional insurance.

**§ 872.203 Effective date of insurance.**

(a) The effective date of an election of additional optional insurance is the first day on or after April 1, 1981, that an employee actually enters on duty in a pay status on or after the day the election is received in his/her employing office.

(b) An election of additional optional insurance remains in effect until canceled as provided in § 872.204. For an employee whose additional optional insurance has stopped for a reason other than a declination or waiver, additional optional insurance is reinstated on the first day he/she actually enters on duty in a pay status in a position in which he/she again becomes eligible.

**§ 872.204 Declination.**

(a) An insured person may at any time cancel his/her additional optional insurance by filing with his/her employing office (which for a retired employee is the office that administers his/her retirement system, and, for an employee or former employee in receipt of compensation for work injury under subchapter I of chapter 81 of title 5, United States Code, is the Department of Labor) a declination of additional optional insurance or a waiver of basic insurance coverage. An insured person may at any time reduce the number of his/her multiples of additional optional insurance by filing a Life Insurance Election form with his/her employing office.

(b) A cancellation of additional optional insurance becomes effective and additional optional insurance stops at the end of the pay period in which the declination or waiver is received in the employing office. A reduction in the number of additional optional insurance multiples is effective at the end of the pay period in which the Life Insurance Election form is received in the employing office.

(c) A declination or reduction in multiples of additional optional insurance remains in effect until it is canceled as provided in § 872.205.

**§ 872.205 Cancellation of declination.**

(a)(1) An employee who has declined the additional optional insurance may elect it if (A) he/she is under age 50, (B) at least 1 year has elapsed since the effective date of his/her last declination or waiver, and (C) he/she furnishes satisfactory evidence of insurability.

(2) An employee who has declined additional optional insurance may elect it upon his/her marriage or the acquisition of an unmarried dependent child within the meaning of section 8701(d) of title 5, United States Code, and Subpart G of Part 873 of this

chapter, except that the election must be received in the employing office before the employee's 36th birthday. In order to be valid, the election must be filed with the employing office on the Life Insurance Election form during the 60-day period following the date of the event which permits the election. This 60-day time limit may be extended if the individual is not serving in a covered position on the date of the event, or if the individual separates from covered service prior to completion of the 60-day time limit. This extension of the time limit is limited to coincide with the 31-day time limit for electing insurance following employment in a covered position. The number of multiples which an employee may obtain upon acquisition of a spouse or child is limited to the number of family members (spouse and/or children) acquired with the event which permits the employee to elect additional optional insurance under this paragraph.

(3) An employee who has in force additional optional insurance of at least 1 multiple of annual pay but less than 5 multiples of annual pay may increase the number of multiples if he/she meets the requirements of paragraph (a)(1) of this section.

(4) An employee who has in force additional optional insurance of at least 1 multiple of annual pay but less than 5 multiples of annual pay may elect to increase the number of multiples upon his/her marriage or the acquisition of an unmarried dependent child within the meaning of section 8701(d) of title 5, United States Code, and Subpart G of Part 873 of this chapter, except that the election must be received in the employing office before the employee's 50th birthday. In order to be valid, the election to increase multiples must be filed with the employing office on the Life Insurance Election form during the 60-day period following the date of the event which permits the increase. This 60-day time limit may be extended if the individual is not serving in a covered position on the date of the event, or if the individual separates from covered service prior to completion of the 60-day time limit. This extension of the time limit is limited to coincide with the 31-day limit for electing insurance following employment in a covered position. The number of multiples which an employee may add upon acquisition of a spouse or child is limited to the number of family members (spouse and/or children) acquired with the event which permits the employee to increase multiples.

(b)(1) The effective date of the additional optional insurance for an

employee who has complied with paragraphs (a)(1) or (a)(3) of this section is the first day he/she actually enters on duty in a pay status, on or after the day his/her election is received in his/her employing office following the approval of his/her Request for Insurance by the Office of Federal Employees' Group Life Insurance.

This approval is revoked automatically and the additional optional insurance does not become effective if the employee fails to submit his/her election or meet the pay and duty status requirement within 31 days following the date of the approval.

(2) The effective date of an election under paragraphs (a)(2) or (a)(4) of this section is the first day the employee actually enters on duty in a pay status, on or after the day his/her election is received in the employing office.

(c) A former employee and an employee who is continuing basic life insurance during receipt of compensation is not eligible to cancel a declination under this section, nor to increase multiples of additional optional insurance.

#### § 872.206 Reconsideration.

(a) *Who may file.* An individual or annuitant may request the OPM to reconsider an agency decision or an initial decision of OPM denying additional optional insurance coverage.

(b) *Agency decision.* A request for reconsideration of an agency decision must be filed within 30 calendar days from the date of the written decision stating the right to reconsideration by OPM. The time limit may be extended as provided in paragraph (e) of this section.

(c) *Initial OPM decision.* An OPM decision shall be considered an initial decision when rendered by OPM in writing and stating the right to reconsideration. However, a decision initially rendered at the highest level of review available within OPM will not be subject to reconsideration.

(d) *Reconsideration.* A request for reconsideration must be made in writing, must include the claimant's name, address, date of birth, claim number, if applicable, and reasons for the request.

(e) *Time limit.* A request for reconsideration of an initial decision must be filed within 30 calendar days from the date of the initial decision. OPM may extend the time limit for filing when the individual shows that he/she was not notified of the time limit and was not otherwise aware of it, or that he/she was prevented by circumstances beyond his/her control from making the request within the time limit.

(f) *Final decision.* After consideration, OPM shall issue a final decision which shall be in writing and shall fully set forth the findings and conclusions of OPM.

### Subpart C—Amount of Insurance

#### § 872.301 Amount of employee's insurance.

An eligible employee may elect additional optional insurance of 1, 2, 3, 4, or 5 multiples of his/her annual pay. For this purpose, each multiple is equal to the lowest multiple of \$1,000 which is not less than the current rate of the employee's annual pay as determined under § 870.302 of this chapter. A multiple shall not exceed the annual rate of basic pay payable for positions at level II of the Executive Schedule under section 5313 of title 5, United States Code, rounded to the next higher multiple at \$1,000.

### Subpart D—Withholdings

#### § 872.401 Withholdings.

(a) During any period in any part of which an insured employee is in a pay status there shall be withheld from his/her pay the full cost of his/her additional optional insurance as specified in paragraph (c) of this section.

(b) Subject to the provisions of § 872.604, for any period before the first of the month following his/her 65th birthday during which an insured retired employee (or employee or former employee in receipt of compensation for work injury) receives annuity (or compensation), there shall be withheld from his annuity (or compensation) the full cost of his/her additional optional insurance as specified in paragraph (c) of this section.

(c) The biweekly full cost per \$1,000 of additional optional insurance in force, until determined by OPM on the basis of experience to be otherwise, is:

For persons under age 35—	\$0.05
For persons ages 35 through 39—	\$0.07
For persons ages 40 through 44—	\$0.12
For persons ages 45 through 49—	\$0.20
For persons ages 50 through 54—	\$0.30
For persons ages 55 through 59—	\$0.60
For persons age 60 or over—	\$0.95

The amount withheld from the pay of a person paid on other than a biweekly period shall be determined at a proportionate rate, adjusted to the nearest one-tenth of one cent.

(d) For the purposes of this section, a person is deemed to attain 35, 40, 45, 50, 55, or 60 years of age on the first day of his/her pay period beginning on or after January 1 of the year following the one in which his/her corresponding birthday occurs.

(e) The amount withheld from the pay of an insured person whose annual pay is paid during a period shorter than 52 workweeks is the sum obtained by converting the biweekly rate for his/her age group to an annual rate and prorating the annual rate over the number of installments of pay regularly paid during the year.

(f) The amount withheld from the pay of an insured employee whose amount of insurance changes during a pay period is based on the last amount of insurance in force during the pay period.

(g)(1) If OPM fails to withhold proper amounts of insurance deductions from the annuity of a retired employee, OPM may waive the collection of the unpaid insurance deductions in accordance with section 8707(d) of title 5, United States Code. OPM shall use the standards for waiver of overpayments found under Subpart N of Part 831 of this chapter when determining whether a waiver of collection of the unpaid deductions may be granted, and shall follow the procedures under Subpart M of Part 831 of this chapter when applying the standards.

(2) If, under section 8707(d) of title 5, United States Code, an agency waives the collection of unpaid insurance deductions from an individual's pay, annuity or compensation, the agency shall submit an amount equal to the sum of the uncollected deductions and any applicable agency contributions required under section 8708 of title 5, United States Code, to OPM for deposit to the Employees' Life Insurance Fund. An agency will make its determination on the waiver of collection of an overpayment of pay in accordance with 5 U.S.C. 5584 as implemented by 4 CFR Chapter I, Subchapter G.

### Subpart E—Termination and Conversion

#### § 872.501 Termination and conversion of insurance.

(a) The additional optional insurance of an insured employee stops when his/her basic insurance stops as provided in § 870.501 of this chapter subject to a 31-day extension of additional optional insurance coverage.

(b) If, because of a declination or waiver, an insured employee has not had the additional optional insurance during the full period(s) of service during which it was available to him/her, or for the 5 years of service immediately preceding the date on which the insurance stops, whichever is less, the additional optional insurance stops, subject to a 31-day extension of additional optional insurance coverage, on the date that his/her basic life

insurance is continued or reinstated under the provisions of § 870.601 (for retirement) or § 870.701 (during receipt of compensation) of this chapter.

(c) If, at the time of an individual's election under §§ 870.601(b) or 870.701(b) of this chapter (for basic life insurance during receipt of annuity or compensation), he/she elects no basic life insurance (as provided under §§ 870.601(c)(1) or 870.701(c)(1) of this chapter), the additional optional insurance stops at the end of the month in which the election is received in OPM, subject to a 31-day extension of coverage.

(d) The additional optional insurance of an insured person who remains in a pay status stops, subject to a 31-day extension of coverage, at the end of the pay period in which it is determined that his/her periodic pay, compensation for work injury, or annuity, after all other deductions, is insufficient to cover the full cost of the additional optional insurance.

(e) During the 31-day extension of additional optional insurance coverage under this section, a person may, upon application and without medical examination convert all or any part of his/her additional optional insurance to an individual policy of life insurance at rates applicable to his/her attained age and class of risk unless, within 3 calendar days after the date his/her additional optional insurance stopped, he/she returns to a position in which he/she is not excluded from coverage.

#### Subpart F—Retired Employees and Employees Compensation

##### § 872.601 Amount of insurance.

(a) Each multiple of additional optional insurance continued during receipt of annuity or compensation reduces by 2 percent a month effective at the beginning of the second calendar month after (1) the date the insurance would otherwise have stopped, or (2) the insured's 65th birthday, whichever is later. At 12:00 PM on the day preceding the 50th reduction the insurance stops, with no extension of coverage or right of conversion.

(b) The number of multiples of additional optional insurance which may be continued during receipt of annuity or compensation is the smallest number of multiples in force during (1) the 5 years of service immediately preceding separation from employment or entitlement to compensation, or (2) the full period(s) of service during which the additional optional insurance was available to the employee.

##### § 872.602 Termination of annuity or compensation.

If the annuity or compensation for work injury paid to an insured person is terminated, or if the Department of Labor finds that an insured person receiving compensation for work injury is able to return to duty, additional optional insurance held as a retired employee or person receiving compensation stops, with no 31-day extension of coverage or right of conversion, on the date of that termination or finding.

##### § 872.603 Waiver of suspension of annuity or compensation.

(a) Except as provided in paragraph (b) of this section, when annuity or compensation for work injury is waived or suspended, additional optional insurance continues. When payment of the annuity or compensation is resumed, the employing office shall withhold the full cost of the insurance for the period of waiver or suspension during which the person is under age 65.

(b) If suspension of annuity or compensation is because of reemployment, the reemployment office shall withhold the full cost of the insurance during each pay period of reemployment.

##### § 872.604 Reemployed retired employees.

(a)(1) A retired employee appointed to a position in which he/she is not excluded from basic insurance by law or regulation is eligible for additional optional insurance as an employee, unless he/she has on file an uncanceled waiver of basic insurance or declination of additional optional insurance. If he/she has additional optional insurance as a retired employee, that insurance (and any applicable annuity withholdings) continues as if the individual were not reemployed, unless (i) the person files with his/her employing office within 31 days following the date of reemployment an election of additional optional insurance on the Life Insurance Election form, in which case the additional optional insurance (and corresponding annuity withholdings) as a retiree is suspended effective on the date that the additional optional insurance as an employee becomes effective, or (ii) the person files a waiver of basic insurance.

(2) Except as provided in paragraph (b) of this section, the additional optional insurance acquired as an employee stops, with no 31-day extension or right of conversion, on the date reemployment terminates and any suspended additional optional insurance which remains in force after applicable monthly reductions after age 65 (and

corresponding annuity withholdings, if any) is reinstated on the day following termination of the reemployment.

(b) Additional optional insurance acquired during reemployment may be continued after termination of the reemployment if the retired employee:

(1) Qualifies for a supplemental annuity or acquires a new retirement right,

(2) Continues his/her basic insurance under paragraphs (c)(2), (c)(3), or (c)(4) of § 870.601 of this chapter, and

(3) Has had additional optional insurance in force for the 5 years of service immediately preceding separation from reemployment or for the full period(s) of service during which it was available to him/her, whichever is less. If the additional optional insurance acquired during reemployment is so continued, any suspended additional optional insurance stops with no 31-day extension of coverage or right of conversion.

(10) Part 873 is added to read as follows:

#### PART 873—FAMILY OPTIONAL LIFE INSURANCE

##### Subpart A—Administration and General Provisions

###### Sec.

- 873.101 Actions on the policy.
- 873.102 Payment of benefits.
- 873.103 Correction of an error, mistake, or omission.

##### Subpart B—Coverage

- 873.201 Eligibility.
- 873.202 Election or declination.
- 873.203 Effective date of insurance.
- 873.204 Declination.
- 873.205 Cancellation of declination.
- 873.206 Reconsideration.

##### Subpart C—Amount of Insurance

- 873.301 Amount of employee's insurance.

##### Subpart D—Withholdings

- 873.401 Withholdings.

##### Subpart E—Termination and Conversion

- 873.501 Termination and conversion of insurance.

##### Subpart F—Retired Employees and Employees Compensation

- 873.601 Amount of insurance.
- 873.602 Termination of annuity or compensation
- 873.603 Waiver or suspension of annuity or compensation.
- 873.604 Reemployed retired employees.

##### Subpart G—Definition of Family Member

- 873.701 Definition of family member.
  - 873.702 Proof of dependency.
  - 873.703 Child incapable of self-support.
- Authority: 5 U.S.C. 8716. Interprets and applies 5 U.S.C. 8714c.

**Subpart A—Administration and General Provisions****§ 873.101 Actions on the policy.**

Optional life insurance on family members (referred to in this part as "family optional insurance") shall be payable in accordance with an amendment to the policy purchased by OPM from the Metropolitan Life Insurance Co., 1 Madison Avenue, New York, N.Y. 10010, pursuant to section 8709 of title 5, United States Code, to provide group insurance coverage (referred to in this part as "basic insurance"). Actions at law or in equity to recover on the policy, in which there is not alleged any breach of any obligations undertaken by the United States, should be brought against the insurance company.

**§ 873.102 Payment of benefits.**

Family optional insurance in force on a spouse or child at the date of his/her death shall be paid to the employee or former employee whose pay, annuity or compensation is subject to withholding under § 873.401, except that in the event that payment is not made prior to the death of the employee, the insurance shall be paid to the person(s) eligible for the basic insurance on the employee or former employee.

**§ 873.103 Correction of an error, mistake, or omission.**

The Associate Director for Compensation may order correction of an error, mistake, or omission upon a showing satisfactory to the Associate Director that it would be against equity and good conscience not to do so.

**Subpart B—Coverage****§ 873.201 Eligibility.**

Each employee, as defined by section 8701 of title 5, United States Code, who is insured for basic insurance and for whom an uncanceled declination of family optional insurance is not in effect is eligible to elect the family optional insurance, if his/her periodic pay, after all other deductions, is sufficient to cover its full cost.

**§ 873.202 Election or declination.**

(a) Except as otherwise provided in paragraph (b) of this section, each employee shall, on the form entitled Life Insurance Election, elect or decline the family optional insurance within 31 days after becoming eligible, unless during earlier employment he/she filed an election or declination which remains in effect. The 31-day time limit begins to run on the first day after February 28, 1981, on which an individual meets the

definition of an employee under 5 U.S.C. 8701.

(b) On a determination by an employing office, within 6 months after a person becomes eligible, that he/she was unable, for cause beyond his/her control to elect or decline the family optional insurance within the prescribed time limit, the employee shall elect or decline the family optional insurance within 31 days after he/she is advised of that determination. Family optional insurance in that case is retroactive to the first day of the first pay period beginning after the date the person became eligible, or after April 1, 1981, whichever is later, and the person shall pay the full cost of the insurance from that date for the time that he/she is in a pay status or retired and under age 65.

(c) A person who does not file a Life Insurance Election form with his/her employing office does not have the family optional insurance.

**§ 873.203 Effective date of insurance.**

(a) The effective date of an election of family optional insurance is the first day on or after April 1, 1981, that an employee actually enters on duty in a pay status on or after the day the election is received in his/her employing office.

(b) An election of family optional insurance remains in effect until canceled as provided in § 873.204. For an employee whose family optional insurance has stopped for a reason other than a declination or waiver, family optional insurance is reinstated on the first day he/she actually enters on duty in a pay status in a position in which he/she again becomes eligible.

**§ 873.204 Declination.**

(a) An employee may at any time cancel his/her family optional insurance by filing with his/her employing office (which for a retired employee is the office that administers his/her retirement system, and, for an employee or former employee in receipt of compensation for work injury under subchapter I of chapter 81 of title 5, United States Code, is the Department of Labor) a declination of family optional insurance or a waiver of basic insurance coverage.

(b) A cancellation of family optional insurance becomes effective and family optional insurance stops at the end of the pay period in which the declination or waiver is received in the employing office.

(c) A declination of family optional insurance remains in effect until it is canceled as provided in § 873.205.

**§ 873.205 Cancellation of declination.**

(a) An employee who has declined the family optional insurance may elect it upon his/her marriage or the acquisition of a child. In order to be valid, the election must be filed with the employing office on the Life Insurance Election form during the 60-day period following the date of the event which permits the election. This 60-day time limit may be extended if the individual is not serving in a covered position on the date of the event, if the individual separates from covered service prior to completion of the 60-day time limit, or if the event occurs during the period following a waiver of basic insurance when he/she is not eligible to cancel the waiver. This extension of the time limit is limited to coincide with the 31-day time limit for electing insurance following employment in a covered position, or with the 31-day period following the first day on which the individual becomes eligible to cancel a waiver of basic insurance.

(b) The effective date of the family optional insurance for an employee who has complied with paragraph (a) of this section is the first day he/she actually enters on duty in a pay status, on or after the day his/her election is received in his/her employing office and basic insurance is in force.

(c) A former employee and an employee who is continuing basic insurance as a compensation is not eligible to make the election provided in paragraph (a) of this section.

**§ 873.206 Reconsideration.**

(a) *Who may file.* An individual or annuitant may request the OPM to reconsider an agency decision or an initial decision of OPM denying family optional insurance coverage.

(b) *Agency decision.* A request for reconsideration of an agency decision must be filed within 30 calendar days from the date of the written decision stating the right to reconsideration by OPM. The time limit may be extended as provided in paragraph (e) of this section.

(c) *Initial OPM decision.* An OPM decision shall be considered an initial decision when rendered by OPM in writing and stating the right to reconsideration. However, a decision initially rendered at the highest level of review available within OPM will not be subject to reconsideration.

(d) *Reconsideration.* A request for reconsideration must be made in writing, must include the claimant's name, address, date of birth, claim number, if applicable, and reasons for the request.

(e) *Time limit.* A request for reconsideration of an initial decision

must be filed within 30 calendar days from the date of the initial decision. OPM may extend the time limit for filing when the individual shows that he/she was not notified of the time limit and was not otherwise aware of it, or that he/she was prevented by circumstances beyond his/her control from making the request within the time limit.

(f) *Final decision.* After reconsideration, OPM shall issue a final decision which shall be in writing and shall fully set forth the findings and conclusions of OPM.

### Subpart C—Amount of Insurance

#### § 873.301 Amount of employee's insurance.

The amount of family optional insurance is \$5,000 payable upon the death of a spouse and \$2,500 payable upon the death of a child.

### Subpart D—Withholdings

#### § 873.401 Withholdings.

(a) During any period in any part of which an insured employee is in a pay status there shall be withheld from his/her pay the full cost of his/her family optional insurance as specified in paragraph (c) of this section.

(b) Subject to the provisions of § 873.604, for any period before the first of the month following his/her 65th birthday during which an insured retired employee (or employee or former employee in receipt of compensation for work injury) receives annuity (or compensation), there shall be withheld from his annuity (or compensation) the full cost of his/her family optional insurance as specified in paragraph (c) of this section.

(c) The biweekly full cost of family optional insurance in force, until determined by OPM on the basis of experience to be otherwise, is:

For persons under age 35—	\$0.50
For persons ages 35 through 39—	\$0.60
For persons ages 40 through 44—	\$0.70
For persons ages 45 through 49—	\$0.90
For persons ages 50 through 54—	\$1.30
For persons ages 55 through 59—	\$2.00
For persons age 60 or over—	\$3.00

The amount withheld from the pay of a person paid on other than a biweekly period shall be determined at a proportionate rate, adjusted to the nearest cent.

(d) For the purposes of this section, a person is deemed to attain 35, 40, 45, 50, 55, or 60 years of age on the first day of his/her pay period beginning on or after January 1 of the year following the one in which his/her corresponding birthday occurs.

(e)(1) If OPM fails to withhold proper amounts of insurance deductions from the annuity of a retired employee, OPM may waive the collection of the unpaid insurance deductions in accordance with section 8707(d) of title 5, United States Code. OPM shall use the standards for waiver of overpayments found under Subpart N of Part 831 of this chapter when determining whether a waiver of collection of the unpaid deductions may be granted, and shall follow the procedures under Subpart M of Part 831 of this chapter when applying the standards.

(2) If, under section 8707(d) of title 5, United States Code, an agency waives the collection of unpaid insurance deductions from an individual's pay, annuity or compensation, the agency shall submit an amount equal to the sum of the uncollected deductions and any applicable agency contributions required under section 8708 of title 5, United States Code, to OPM for deposit to the Employees' Life Insurance Fund. An agency will make its determination on the waiver of collection of an overpayment of pay in accordance with 5 U.S.C. 5584 as implemented by 4 CFR Chapter I, Subchapter G.

### Subpart E—Termination and Conversion

#### § 873.501 Termination and conversion of insurance.

(a) The family optional insurance of an insured employee stops when his/her basic insurance stops as provided in § 870.501 of this chapter subject to a 31-day extension of family optional insurance coverage.

(b) If, because of a declination or waiver, an insured employee has not had the family optional insurance during the full period(s) of service during which he/she was serving in a position subject to this part, or for the 5 years of service immediately preceding the date on which the insurance stops, whichever is less, the family optional insurance stops, subject to a 31-day extension of family optional insurance coverage, on the date that his/her basic life insurance is continued or reinstated under the provisions of § 870.601 (for retirement) or under the provisions of § 870.701 (during receipt of compensation) of this chapter.

(c) If, at the time of an individual's election under §§ 870.601(b) or 870.701(b) of this chapter (for basic life insurance during receipt of annuity or compensation), he/she elects no basic life insurance (as provided under §§ 870.601(c)(1) or 870.701(c)(1) of this chapter), the family optional insurance stops at the end of the month in which

the election is received in OPM, subject to a 31-day extension of coverage.

(d) The family optional insurance of an insured person who remains in a pay status stops, subject to a 31-day extension of coverage, at the end of the pay period in which it is determined that his/her periodic pay, compensation for work injury, or annuity, after all other deductions, is insufficient to cover the cost of the family optional insurance.

(e) During the 31-day extension of family optional insurance coverage under this section, a person may, upon application and without medical examination, convert his/her family optional insurance to an individual policy of life insurance at rates applicable to his/her attained age and class of risk unless, within 3 calendar days after the date his/her family optional insurance stopped, he/she returns to a position in which he/she is not excluded from coverage.

(f) During the 31-day period following the death of an insured employee, or during the 31-day extension of family optional insurance under this section, each one of the employee's or former employee's family members as defined by 5 U.S.C. 8701(d) may, upon application and without medical examination, convert the amount of family optional insurance coverage in force (maximums of \$5,000 for a spouse and \$2,500 for a child) to an individual policy of life insurance at rates applicable to his/her attained age and class of risk unless, within 31 days after the date the employee's or former employee's family optional insurance stopped, he/she returns to a position in which he/she is not excluded from coverage. The family member's right of conversion does not attach if the employee or former employee exercises his/her right of conversion under paragraph (e) of this section.

(g) The amount of an individual policy as provided under paragraphs (e) or (f) of this section shall not be less than \$1,000.

### Subpart F—Retired Employees and Employees Compensation

#### § 873.601 Amount of insurance.

The amount of family optional insurance (on each family member) continued during receipt of annuity or compensation reduces by 2 percent a month effective at the beginning of the second calendar month after (1) the date the insurance would otherwise have stopped, or (2) the retiree's or compensation's 65th birthday, whichever is later. At 12:00 PM on the day preceding the 50th reduction the

insurance stops, with no extension of coverage or right of conversion.

**§ 873.602 Termination of annuity or compensation.**

If the annuity or compensation for work injury paid to an insured person is terminated, or if the Department of Labor finds that an insured person receiving compensation for work injury is able to return to duty, family optional insurance held as a retired employee or person receiving compensation stops, with no 31-day extension of coverage or right of conversion, on the date of that termination or finding.

**§ 873.603 Waiver or suspension of annuity or compensation.**

(a) Except as provided in paragraph (b) of this section, when annuity or compensation for work injury is waived or suspended, family optional insurance continues. When payment of annuity or compensation is resumed, the employing office shall withhold the full cost of the insurance for the period of waiver or suspension during which the person is under age 65.

(b) If suspension of annuity or compensation is because of reemployment, the reemploying office shall withhold the full cost of the insurance during each pay period of reemployment.

**§ 873.604 Reemployed retired employees.**

(a)(1) A retired employee appointed to a position in which he/she is not excluded from basic insurance coverage by law or regulation is eligible for family optional insurance as an employee. If he/she has family optional insurance as a retired employee, that insurance (and any corresponding withholdings) is suspended on the day preceding his/her first day in a pay status under the appointment and, unless he/she files with his/her employing office a declination of family optional insurance (or a waiver of basic insurance), he/she acquires family optional insurance as an employee.

(2) Except as provided in paragraph (b) of this section, the family optional insurance acquired as an employee stops, with no 31-day extension or right of conversion, on the date reemployment terminates and any suspended family optional insurance which may remain in force following reductions is reinstated on the day following termination of the reemployment.

(b) Family optional insurance acquired during reemployment may be continued after termination of the reemployment if the retired employee:

(1) Qualifies for a supplemental annuity or acquires a new retirement right,

(2) Continues his/her basic insurance under paragraphs (c)(2), (c)(3), or (c)(4) of § 870.601 of this chapter, and

(3) Has had family optional insurance in force for the 5 years of service immediately preceding separation from reemployment or for the full period(s) of service during which it was available to him/her, whichever is less.

If the family optional insurance acquired during reemployment is so continued, any suspended family optional insurance stops with no 31-day extension of coverage or right of conversion.

**Subpart G—Definition of Family Member**

**§ 873.701 Definition of family member.**

For the purposes of this part, the terms "spouse" and "child" shall mean a spouse and unmarried dependent child within the meaning of these terms under the definition of "family member" under 5 U.S.C. 8701(d).

**§ 873.702 Proof of dependency.**

(a) A child is considered to have been dependent on an employee or former employee if he/she is:

(1) A legitimate child,

(2) An adopted child,

(3) A stepchild or recognized natural child who lived with the employee or former employee in a regular parent-child relationship,

(4) A recognized natural child for whom a judicial determination of support had been obtained, or

(5) A recognized natural child to whose support the employee or former employee made regular and substantial contribution.

(b) The following are examples of proof of regular and substantial support. More than one of the following proofs may be required to show support.

(1) Evidence of eligibility as a dependent child for benefits under State or Federal programs,

(2) Proof of inclusion of the child as a dependent on the employee's or former employee's income tax returns,

(3) Canceled checks, money orders, or receipts, for periodic payments from the employee or former employee for or on behalf of the child,

(4) Evidence of goods or services which show regular and substantial contributions,

(5) Any other evidence which the Office of Federal Employees' Group Life Insurance shall find to be sufficient proof of support or of paternity or maternity.

(c) The Office of Federal Employees' Group Life Insurance may deny an individual coverage as a dependent child, if:

(1) Evidence shows that the employee or former employee did not recognize the child as his/her own despite a willingness to support the child, or

(2) Evidence calls the child's paternity or maternity into doubt, despite the employee's or former employee's recognition and support of the child.

(d) For the purposes of an employee's election of family optional insurance upon the acquisition of a child, as provided in § 873.205, the employing agency shall base any requisite determination of dependency on the criteria expressed in paragraphs (a), (b), and (c) of this section.

**§ 873.703 Child incapable of self-support.**

(a) Upon receipt of a claim for family optional insurance in the event of death of a child over the age of 21 years, the Office of Federal Employees' Group Life Insurance shall determine, on the basis of such evidence as it deems necessary, whether the deceased child was incapable of self-support because of a mental or physical disability which existed before becoming 22 years of age.

(b) In the event of an employee's election of family optional insurance under § 873.205, where the opportunity to elect is based solely on the acquisition of a child over age 21, the employee shall submit to the employing office at the time of filing the election, a certificate of the physician that the child is incapable of self-support because of a physical or mental disability which existed before the child became 22 years of age, and can be expected to continue for more than 1 year. The certificate shall include a statement of the name of the child, the nature of his/her disability, the period of time it has existed, and its probable future course and duration. The certificate shall be signed by the physician and show his/her office address.

BILLING CODE 6325-01-M

**5 CFR Part 890**

**Federal Employees Health Benefits Program; Enrollee Deductibles**

**AGENCY:** Office of Personnel Management.

**ACTION:** Interim Regulations with comments invited for consideration in final rulemaking.

**SUMMARY:** The Office of Personnel Management (OPM) is amending its

Federal Employees Health Benefits (FEHB) regulations to add a new paragraph pertaining to enrollee deductibles. This action is necessary to correct an inequity which can occur after an employee changes health benefits plans during the FEHB open season.

**DATES:** Effective date: January 1, 1981, and until final regulations are issued. Comment Date: March 2, 1981.

**ADDRESS:** Send or deliver written comments to Craig B. Pettibone, Director, Office of Pay and Benefits Policy, Compensation Group, Office of Personnel Management, P.O. Box 57, Washington, D.C. 20044.

**FOR FURTHER INFORMATION CONTACT:** Lauretta Hall, Issuances and Instructions Staff, (202) 632-4684.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 553(d)(3) of title 5, U.S.C., the Director finds that good cause exists for making this amendment effective in less than 30 days, in order to give immediate and timely effect to a provision which corrects an inequity which can occur after an employee changes health benefits plans during an open season.

Under certain circumstances, an employee may be required to meet two deductibles during a calendar year before covered expenses may be reimbursed by the health benefits plan in which he/she is enrolled. This occurs mainly when an employee changes plans during the open season and incurs covered expenses subject to a deductible during the first few days of January, before his/her open season enrollment change becomes effective. Less than one percent of enrollees who change plans during the open season encounter this problem. However, it does give rise to complaints from those affected by it, who claim that the requirement to meet two deductibles in a calendar year is unfair.

Section 8902 of title 5, U.S.C., provides that each contract under the FEHB Program shall be for a uniform term of at least one year. Currently, health benefits contracts are negotiated to cover the period from January 1 through December 31 of a given year and the benefits are made available to cover an enrollee and eligible family members, if any, from January 1. For calendar year 1981, there will be 121 plans under the FEHB Program offering various benefit packages. The two Government-wide plans, a number of the employee organization plans, and a few of the comprehensive plans currently offer benefit packages with certain annual deductibles which are directly related to the contract year. The maximum deductible for these plans is \$150 for

certain high options and \$200 for certain low options.

If an individual is enrolled in a plan which has a deductible on January 1 (the beginning of a contract year), he/she must meet that plan's deductible, before receiving member benefits. If an individual's enrollment is transferred during the contract year from one plan to another plan with a deductible, he/she must also meet the new plan's deductible before receiving member benefits. To correct this inequity, OPM is amending its regulations to require that when an enrollee changes plans during an open season and his/her open season change becomes effective after January 1, any covered expenses incurred from January 1 to the effective date of the open season change shall count toward the deductible of the losing carrier for the prior year, or, if the covered expenses are in excess of the carrier's deductible or family limit for deductibles, the enrollee (or eligible family member) shall be eligible for reimbursement at the losing carrier's prescribed rate. The change made by this amendment shall apply only in *timely* filed open season changes. It shall *not* apply in cases of belated open season changes or any other permissible changes made during a contract year.

OPM has determined that this is a significant regulation for the purposes of E.O. 12044.

Office of Personnel Management.  
JoAnn B. Platter,  
Assistant Issuance System Manager.

Accordingly, OPM is adding a new § 890.201(a)(10), Title 5, Code of Federal Regulations, as set out below:

#### Subpart B—Health Benefits Plans

##### § 890.201 Minimum standards for health benefits plans.

(a) \* \* \*

(10) Provide that when an employee or annuitant changes enrollment from one health benefits plan which has an annual deductible to another plan with a deductible during an open season and his/her open season change becomes effective after January 1, any covered expenses incurred from January 1 to the effective date of the open season change shall count toward the deductible of the losing carrier for the prior year. If covered expenses for the prior year exceeded the losing carrier's deductible or family limit on deductibles, the enrolled employee or annuitant (and his/her eligible family members) shall be eligible for reimbursement of covered expenses, incurred during the current year, by the losing carrier based on contractual obligations for the current

contract year. Reimbursement of covered expenses shall apply only to covered expenses incurred from January 1 to the effective date of the enrolled employee's or annuitant's open season change. This amendment shall apply only in *timely* filed open season changes. It shall *not* apply in belated open season changes or any other permissible changes made during a contract year.

(5 U.S.C. 8913)

BILLING CODE 6325-01-M

## DEPARTMENT OF AGRICULTURE

### Office of the Secretary

#### 7 CFR Part 2

#### Revision of Delegations of Authority

**AGENCY:** Department of Agriculture.

**ACTION:** Final rule.

**SUMMARY:** This document revises the delegations of authority from the Secretary and General Officers of the Department to assign functional responsibilities under the Swine Health Protection Act.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** John C. Frey, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-5335 or 301-436-6466).

**SUPPLEMENTARY INFORMATION:** The delegations of authority by the Secretary and General Officers are being amended to provide that the Assistant Secretary for Marketing and Transportation Services and the Administrator, Animal and Plant Health Inspection Service, are responsible for administering the provisions of the Swine Health Protection Act. The Act, which will regulate the feeding of garbage to swine, is considered necessary to prevent outbreaks of Hog Cholera and African Swine Fever. The Department believes this delegation conforms to the mission of APHIS, and that this specific delegation will enable the Agency to serve the public more efficiently. This rule relates to internal agency management and, therefore, pursuant to 5 U.S.C. 553 it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after its publication in the **Federal Register**. Further, since this rule relates to internal agency management, it is exempt from

the provisions of E.O. 12044, Improving Government Regulations, and, thus, does not require the preparation of a regulatory impact analysis. Accordingly, 7 CFR Part 2 is amended as follows:

**Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, Assistant Secretaries, and the Director of Economics, Policy Analysis and Budget**

1. Section 2.17 is amended by adding a new paragraph (b)(34) to read as follows:

**§ 2.17 Delegation of authority to the assistant secretary for marketing and transportation services.**

\* \* \* \* \*

(b) \* \* \*  
(34) The Swine Health Protection Act (Pub. L. 96-468, 94 Stat. 2229 (7 U.S.C. 3801-3812)).

\* \* \* \* \*

**Subpart F—Delegations of Authority by the Assistant Secretary for Marketing and Transportation Services**

2. Section 2.51 is amended by adding a new paragraph (a)(35) to read as follows:

**§ 2.51 Administrator, Animal and Plant Health Inspection Service.**

(a) \* \* \*  
(35) The Swine Health Protection Act (Pub. L. 96-468, 94 Stat. 2229 (7 U.S.C. 3801-3812)).

(5 U.S.C. 301 and Reorganization Plan No. 2 of 1953)

For Subpart C:

Dated: December 22, 1980.

**Bob Bergland,**

*Secretary of Agriculture.*

For Subpart F:

Dated: December 22, 1980.

**Jerry C. Hill,**

*Deputy Assistant Secretary for Marketing and Transportation Services.*

[FR Doc. 80-40462 Filed 12-29-80; 8:45 am]

BILLING CODE 3410-01-M

**Food and Nutrition Service**

**7 CFR Parts 271 and 272**

**[Amendment Number 187]**

**Food Stamp Act of 1977: Complaint Procedures**

**AGENCY:** Food and Nutrition Service, USDA.

**ACTION:** final rule.

**SUMMARY:** This final rulemaking sets forth State agency procedures for handling complaints about the operation of the Food Stamp Program. These procedures were developed to assure that mechanisms to accept and resolve complaints exist, while not imposing burdensome Federal regulatory requirements on State agencies.

**EFFECTIVE DATE:** These rules are effective December 30, 1980, and must be implemented by State agencies no later than June 29, 1981.

**FOR FURTHER INFORMATION CONTACT:** Larry R. Carnes, Policy and Regulations Section, Program Standards Branch, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Washington, D.C., 20250. (202) 447-9075.

The final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available on request from the above named individual.

**SUPPLEMENTARY INFORMATION:** This final rule has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "not significant."

On April 10, 1979, the Department published a comprehensive proposal concerning the implementation of a State Complaint Procedure. The Department invited public scrutiny of that proposal and encouraged detailed written criticism and comment.

This preamble discusses both the basis and reasons for the significant changes made from the April 10 proposal. A total of 94 comment letters were received concerning the proposed complaint procedure. The Department gave careful consideration to all the comments made.

*General Scope*

Regulations currently provide for specific procedures to handle discrimination complaints and fair hearings to handle complaints concerning eligibility and level of benefits for specific households.

The proposed regulations were designed to assure that some system also existed to handle other complaints, such as complaints on delays in processing or on general service to participants.

Sixty-four commenters, including 3 regional offices and 5 State agencies, favored the concept of a formalized complaint system. Eighteen commenters opposed the concept of a formalized complaint system for reasons of increased burden on State agencies and

project areas, increase in staff, and increases in administrative funding. Those opposed include 1 regional office, 11 State agencies and 5 local agencies. Four State agencies suggested that the entire section on the complaint regulations be deleted.

After analyzing the comments, the Department concurs with those commenters who believed that many of the specific requirements of the proposed rules represented an unnecessary degree of Federal regulation and unnecessarily limited State flexibility. The type of Federal requirements that are necessary in connection with fair hearings, in order to assure basic due process rights in determinations affecting a household's eligibility or benefit levels, are not really appropriate in this area. As a result, the final rules remove nearly all such requirements. The final rules require that States have a system for accepting complaints, resolving them in an appropriate manner, and responding to complainants on the outcome. How States choose to do this, and how States inform recipients and potential recipients of the complaint system, will be up to them.

The only other requirement in the final rules is that States analyze records of complaints at least annually and provide information on any patterns of deficiencies, as indicated by what the State found in looking into the complaints, to the Performance Reporting System coordinator.

Virtually all other requirements in the proposed rules have been deleted. The following discussion addresses some of these matters in more detail.

*Staffing*

The proposed rules required that the State agency designate a person to act as the coordinator of activities relating to complaints. Several of the State agencies opposed or questioned why the Department felt it necessary to designate a person to coordinate activities related to program complaints. These State agencies feel that additional staff is not necessary and that States should be allowed flexibility to coordinate program complaint activities with existing staff especially since funds are not always available to hire additional staff.

Twelve interest groups, one government organization and one participant recommended that a full-time State complaint coordinator be required for all States. The requirement could be waived after the situation is evaluated and it is determined by the State that a full-time coordinator is not warranted.

The Department agrees that States should have flexibility in managing complaints, and that a Federal requirement for a complaint coordinator is not necessary. Therefore, this requirement is not contained in the final rules.

#### *Complaint System*

The proposed regulations provided States with two options for administering the complaint system: (1) have all complaints handled at State level; or (2) use a two-tiered system to allow complainants to file a complaint at either the State or the local project area.

As a result of comments received on this section, the section has been deleted and the final regulations provide States with flexibility on this matter. Thirty-two comments were received on the complaint system section. One regional office and 22 interest groups indicated that they prefer the State-agency-level-only system. Two State agencies and one local agency favor the two-tiered system. Three State agencies, two local agencies, three government organizations and 10 interest groups, stated that if the two-tiered system is optional, it should be made clear that the complainant has the option to file at either the State or local level. The majority of the interest groups feel that the two-tiered system would be confusing to complainants and that many complainants would be reluctant to file complaints at the project area level. There was also concern among interest groups that local project areas may not provide satisfactory resolution of complaints.

The Department believes this is an area where Federal requirements may prove cumbersome, and where the proposed rules contained too much regulatory detail. The Department has decided to allow State agencies to determine how to structure their own complaint systems.

#### *Filing Complaints*

Thirty-five comments were received on this section. The most significant comments on this section concern the proposed time standards for filing complaints. Twenty-seven commenters recommended that the time standard be lengthened to 90 days—consistent with the time allowed for filing for fair hearings, or 180 days—consistent with the time allowed for discrimination complaints or for incidents occurring within a certification period. One regional office, two State agencies and one local agency recommended that the time standard be shortened to 30 days or less. One regional office supports the

60-day time standard. Here again the Department believes that specific federally prescribed time standards are not necessary, and that States should be afforded flexibility to handle individual complaints in an appropriate and timely manner.

Some of the public interest groups indicated that it should be made clear that complaints can be filed by groups and organizations acting on behalf of a complainant or on their own behalf, as one interest group suggested. This was the intent of the Department, and is clarified in the final rule.

#### *Publicizing the complaint procedures*

Twenty-eight comments were received on proposed requirements for publicizing addresses and phone numbers for filing complaints. Most comments were from public interest groups, a number of whom recommended that States be required to include the address and phone number of the complaint system on all applications and program notices.

The Department believes that such a requirement is not necessary, and could increase Federal and State printing costs. Moreover, the Department believes that the complaint procedures are not appropriate for Federal requirements of this sort.

As noted, some commenters questioned the need for the detailed Federal requirements contained in the proposed rules. While the final rules do require that State agencies have some method for making information on the complaint system available, the rules do not contain specific Federal requirements regarding how this must be done. The Department believes that State agencies should be provided flexibility to determine how best to publicize the particular complaint systems which they choose to establish.

#### *Receipt of Complaints*

The section on Receipt of Complaints received 34 comments, with the majority of commenters indicating a desire for the complainant to have the option of having the complaint processed by the fair hearing and/or the complaint procedures. Several of the interest groups indicated that complainants may be reluctant to use the fair hearing procedures for fear of retaliation. Also, it is believed that some complaints, considering the nature of the complaint, could be more adequately resolved if they were handled by both systems concurrently.

One State agency indicated that State agencies should have the authority to resolve complaints concerning level of benefits, eligibility, a denial or

termination through the complaint system and that the complainants should be advised of their rights to a fair hearing. One government organization stated that only complaints which cannot be resolved to the complainant's satisfaction by a phone call to the local office should be processed through the fair hearing system.

One regional office and three interest groups recommended that the complaint officer accept hearing requests and that the day the complaint is filed be considered day one for the purpose of the fair hearing timeliness standard.

It is not the Department's intent that complaint procedures replace or be consolidated with fair hearing procedures, which are mandated by law. The final rules make clear that States need not handle under their complaint system any matter that can be addressed through a fair hearing. Beyond this, the final rules contain no further requirements in this area. Existing program regulations already require that households be notified of their right to a fair hearing in the event of disagreements over eligibility or benefit determinations.

#### *Documentation of Complaints*

The section on Documentation of Complaints prompted 15 comments, the majority of which were from interest groups. It was recommended by 3 interest groups and 2 government organizations that all complaints received be acknowledged by the complaint official sending a copy of the complaint record to the complainant. This acknowledgement should let the complainant know that the complaint was actually filed, that the complaint was described correctly in the record and when to expect corrective action. It was also recommended by 9 interest groups that reference to the State's manual which corresponds with a particular complaint be part of the complaint documentation. These recommendations were not adopted. The final rules require the State agency to respond to the complainant on the resolution of the complaint. The Department believes that additional Federal requirements are not appropriate. Those provisions of the proposed regulations regarding specific information States must take down regarding each complaint are removed as unnecessary. This is in keeping with the Department's decision to allow States flexibility to determine how to set up their complaint systems.

*Minimum State Agency Requirements for Handling Program Complaints*

One regional office, one State and 18 interest groups felt that the proposed 60-day time standard for notifying the complainant of actions taken or planned was too long. One regional office supported the 60-day time standard and two interest groups felt that the response time and implementation of corrective action on complaints from farmworkers/migrants should be shortened. The Department has removed this standard from the final rules, in accordance with its general determination that State Complaint Systems is not an area where so many specific Federal standards should be imposed. The Department encourages States to act expeditiously in resolving complaints.

*Analysis of Complaints*

There were 10 comments on the proposed requirement for a semi-annual analysis of complaint findings and records. Nine of the commenters, all interest groups supported this concept and one State agency opposed it. The Department does believe that States should use all available sources of information to identify deficiencies in State operations and has retained a requirement for an analysis of complaint records. However, the final rules require that the analysis only be done annually, and remove some of the detail in the proposed rules regarding the analysis.

*Implementation*

These final rules are effective upon publication. State agencies must implement these rules no later than 180 days after publication. This will assure State agencies adequate time to implement the new procedures during a period when other changes in the food stamp program are also being made.

Accordingly, Parts 271 and 272 of 7 CFR are amended as set forth below.

**PART 271—GENERAL INFORMATION AND DEFINITIONS**

1. Section 271.6 is amended by adding paragraph (a), (previously reserved), to include the following provisions:

**§ 271.6 Complaint procedure.**

(a) *State Agency Responsibility.* (1) *General Scope.* The State agency shall maintain a system of its choosing for handling program complaints filed by participants, potential participants, or other concerned individuals or groups. This shall not include complaints alleging discrimination on the basis of race, sex, age, religious creed, national origin, political beliefs or handicap; such

complaints shall be handled in accordance with § 272.7. This procedure also need not include complaints that can be pursued through a fair hearing. Complaints regarding such areas as processing standards and service to participants and potential participants would generally be handled under this complaint procedure.

(2) *Minimum requirements.* The State agency shall follow up on complaints, resolve complaints and take corrective action where warranted, and respond to the complainant on the State agency's disposition of the complaint. The State agency shall make information on the complaint system and how to file a complaint available to participants, potential participants and other interested persons. The State agency may make the information available through written materials or posters at certification offices or other appropriate means.

(3) *Complaint analysis.* The State agency shall maintain records of complaints received and their disposition, and shall review records at least annually to assess whether patterns of problems may be present in local offices, project areas, or throughout the State. The results of this review shall be provided to the Performance Reporting System coordinator for appropriate action, and for inclusion, if appropriate, in the State Corrective Action Plan in accordance with § 275.16 of this Chapter. The information provided to the Performance Reporting System Coordinator shall include the identification, if any, of potential or actual patterns of deficiencies in local offices, project areas, or throughout the State, and any identification of causes of these problems.

(4) *Monitoring.* FNS shall monitor State compliance with these requirements through the Performance Reporting System.

**PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES**

1. In subsection 272.1, a new subparagraph (25) is added to paragraph (g) of that subsection to read as follows:

**§ 272.1 General terms and conditions.**

\* \* \* \* \*

(g) *Implementation.* \* \* \*

\* \* \* \* \*

(25) Amendment 187. State agencies shall implement the complaint procedures required by § 271.6(a) no later than 180 days following publication of final regulations.

(91 Stat. 958 (7 U.S.C. 2011-2027))

(Catalog of Federal Domestic Assistance Programs No. 10551, Food Stamps)

Dated: December 19, 1980.

**Carol Tucker Foreman,**  
*Assistant Secretary for Food and Consumer Services.*

**BILLING CODE 3410-30-M**

**7 CFR Part 277**

[Amdt. No. 188]

**Payment of Certain Administrative Costs of State Agencies**

**AGENCY:** Food and Nutrition Service.

**ACTION:** Final rulemaking.

**SUMMARY:** This final rulemaking sets forth requirements for payment of certain administrative costs of State agencies which operate the Food Stamp Program, and the Food Distribution Program and the Food Stamp Program on Indian Reservations, under the authority of the Food Stamp Act of 1977, as amended.

**EFFECTIVE DATE:** December 29, 1980.

**FOR FURTHER INFORMATION CONTACT:** Raymond A. Pugh, Sr., Deputy Administrator for Financial Management, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-3545. The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing the rule is available from William E. Mothorpe, Director, State Financial Control Division, Food and Nutrition Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-8275.

**SUPPLEMENTARY INFORMATION:** This final action has been reviewed under U.S. Department of Agriculture (USDA) procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified as not significant.

**Introduction:**

In order to decrease fraud and abuse in the Food Stamp Program and to encourage participation in the Program by Indians residing on reservations, Congress made a number of changes in the administrative funding formulas formerly used to reimburse State agencies for operation of the program under the Food Stamp Act of 1964. The Food Stamp Act of 1977, Sections 16(a) and 16(c), provides for increasing the Federal reimbursement rate for State administrative costs associated with investigations, prosecutions, and fraud hearings; increasing the reimbursement rate for State agency administrative costs from

50 percent to 60 percent when the States' cumulative allotment error rates with respect to eligibility, overissuance, and underissuance, as calculated in the Quality Control Program, are less than five percent; and allowing for an increase in the Federal share of administrative costs for Program operations on Indian reservations to a level determined by the Secretary to be necessary for effective operation of the program.

The Food Stamp Act Amendments of 1980 (Pub. L. 96-249; May 26, 1980) subsequently increased the number of enhanced funding levels available for low error rates. These changes will allow 65, 60, or 55 percent funding levels based on error rates for participating households, negative error rates for improperly denied households, and the reduction of the State's error rate. Since negative error rates must be included prior to any consideration of payment of enhanced funding, data on this aspect of program operations must be developed and analysis performed to establish the basis for such funding. Because of anticipated public interest, provisions implementing these portions of the Food Stamp Act Amendments of 1980 were published as proposed rules on October 3, 1980 (45 FR 65932) to allow for public comments.

The Food Stamp Act Amendments of 1980 also provided for a higher rate of Federal Financial Participation (FFP) for the acquisition and development of automatic data processing and information retrieval systems. The Amendments provide for 75 percent FFP for these costs, effective October 1, 1980. The Department will issue proposed regulations on this provision to encourage public comment and participation in the development of standards to be used by FNS in determining which costs or systems projects will be covered by the higher federal funding.

On November 9, 1979 (44 FR 65318), the Department published proposed State Plan of Operation rules which included provisions concerning the necessary revisions to the Regulations which define the area and content of administrative funding, formerly 7 CFR Part 275, subsequently changed to Part 277. In addition, in emergency final rulemaking the Department issued Regulations on August 10, 1979 (44 FR 47037) which implemented the provisions for increasing the share of Federal reimbursement for investigation and prosecution of fraud cases from 50 percent to 75 percent. Comments were solicited on this rulemaking as well as on the remainder of Part 277.

The majority of the language in Part 277 was formerly in place as Part 275 and, in turn, was derived from two major Federal Management Circulars (FMCs), FMC 74-4, issued originally by the General Services Administration, but now under the Office of Management and Budget (OMB), and OMB Circular A-102. During the comment period, the Department received 65 letters in response to both the emergency final rulemaking on § 277.15, published August 10, 1979, and the proposed rulemaking for Part 277, published November 9, 1979. Some of the respondents submitted separate comments on each of the two proposals, which resulted in receipt of 65 comment letters from 55 organizations. Twenty-two State welfare agencies, 14 local welfare agencies, 1 public interest group, 5 other government agencies, and 13 letters from our Regional Offices were received. In light of the comments received, the Department made various changes, primarily clarifying details of funding procedures. However, no comments were received on a majority of the proposal. Therefore, significant portions are unchanged from the proposed rulemaking.

In addition, § 277.14, Procurement Standards, has been rewritten since the November 9, 1979 proposal to conform to the requirements of the revised Attachment O to OMB Circular A-102. Also, a new § 277.17 has been added since the November 9 publication, incorporating Attachment P of OMB Circular A-102, Audit Requirements. Since Attachments O and P were both the subject of notice and comment rulemaking and both were adopted without substantial change by FNS, it was not deemed necessary for these parts to be proposed again prior to final publication.

#### Funding (Part 277.4)

The Food Stamp Act of 1977 required major changes from regulations which previously provided for Federal reimbursement for 50 percent payment of all allowable administrative cost incurred by State agencies. Section 16 of the Act provided for reimbursing specific areas of administrative costs incurred by State agencies at a rate higher than 50 percent. Under this section of the Act, the Department was directed to increase the Federally funded share of a State agency's administrative costs to 60 percent if the State agency's cumulative allotment error rate was less than five percent with respect to basic Program eligibility, overissuance and underissuance as determined by quality control and FNS validation reviews conducted in

accordance with § 275.23. The proposed rules issued on November 9, 1979, included a provision to implement this Section of the Act. However, the 1980 Amendments to the Food Stamp Act, Pub. L. 96-249, changed the enhanced funding provisions. This law, signed on May 26, 1980, raised the possible reimbursement rate to 65 percent but also directed that the reimbursement at this higher level be based on cumulative allotment error rates and error rates in negative case actions.

As pointed out above, the Department proposed rules regarding these issues in the October 3, 1980 Federal Register. The comment period on these proposed rules has just recently closed. Because the comments have not been fully analyzed yet, it is unclear what the final rule on these issues will be. Therefore, the paragraph in § 277.4 of this final rulemaking pertaining to enhanced funding has been reserved. It will be added when final rules on the Quality Control Sanction and Incentive Systems are issued in the near future.

Section 16(a) of the Food Stamp Act of 1977, as amended, authorized the Secretary to pay 75 percent of the costs of State Food Stamp Program investigations and prosecutions. Section 277.4 allows for this increased funding level. The increased funding for this function is discussed in greater detail in § 277.15 of the final Regulations. Section 277.4 also makes changes in the reimbursement of administrative costs of State agencies administering the Program on Indian reservations. The details of this increased rate are discussed in Parts 281 and 282.

A total of sixteen comments were received which specifically addressed this Section. These comments were directed at the revised reimbursement rate. Additional comments were received which dealt with the specifics of the 75 percent funding for investigations and prosecutions. These comments are discussed further under § 277.15. Comments on § 277.4 included four which expressed the view that since State quality control reviews and recipient claim sections both contributed to the successful completion of fraud cases, both of these functions should be made eligible for the higher rate of Federal reimbursement.

The Department believes that quality control reviews are normal, ongoing program activities required of the State agency. The primary purpose or objective of such reviews is not the detection of fraud, although that may be disclosed, but rather to determine the quality of the certification activity conducted by the State. While the reviews may consequently provide

information needed for investigations and prosecutions, the reviews themselves cannot be said to be directly related to the investigation and prosecutive activities discussed in the legislative history. In regard to the comments relating to the eligibility of personnel engaged in recipient claims activities, we felt that a distinction must be made between claims which are established and maintained by eligibility workers (EWs) in the normal completion of their job duties and those which are handled by a unit expressly established for that function. Again returning to Congressional intent, we believe that establishing and maintaining claims is part of the normal duties of the EW and should not be eligible at the higher rate. A separate claims section which is an adjunct to an investigative and/or prosecutive unit would qualify at the higher rate.

However, we have added a provision that allows for an exception in the case of certain EWs whose principal function during some portion of their workweek is as an investigator. Section 277.15 has been revised to specifically require that only employees whose State or local job title is "investigator" are to be claimed at the higher rate. The exception to this requirement was added to allow for the higher payment in those counties or local jurisdictions whose caseload is not large enough to warrant a separate full-time investigator, but, nevertheless must routinely employ some member of their staff in an investigative capacity. Exceptions shall be granted by the FNS Regional Financial Management Officer based on an application for the exception by the county or local jurisdiction. Time sheets or time records must be used to substantiate any such exception.

#### **Administrative Costs Principles (Section 277.9)**

Five comments were received specifically addressing the present situation in which the Department cannot be charged for costs associated with the certification for Food Stamps for those households participating in the Aid to Families with Dependent Children (AFDC) Program. Two States were under the mistaken impression that this was a change and that such costs are currently being charged to the Department. This is not the case. Such charges have been allocated to the AFDC Program since the inception of the Food Stamp Program. This ongoing practice of allocating such charges to DHEW (now the Department of Health and Human Services) is contained in § 277.9. Since the cost of determining the eligibility of AFDC cases is not a charge to FNS, the enhanced funding for low

error rates is also clearly not applicable to such costs.

Discussions are currently underway between the Department and the Department of Health and Human Services to more clearly define this area. These discussions may result in a need for some modification of this aspect of these regulations at a subsequent date. Pending any such modifications, the existing practice (as reflected in § 277.9) shall remain in effect.

#### **Food Stamp Investigations and Prosecutions (Section 277.15)**

Fifty-four comments were received on this section, 46 of which were received in response to the interim final publication of this section on August 10, 1979. The comments were most positive and supportive of the concept of enhanced funding for Food Stamp fraud investigations, prosecutions, and fraud hearings. However, most of the comments received indicated a desire for further clarification of the funding process. Commenters from both State and Federal agencies requested that additional information be provided to identify what constitutes allowable activities for enhanced funding. A primary concern was handling anti-fraud activities which cross program lines and which are part-time functions of eligibility workers. Various comments also indicated that further clarification was needed on procedures to provide enhanced funding to agencies other than State welfare agencies that are involved in fraud investigations. Two State agencies and two Regional Offices recommended that there be a requirement for the establishment of a contractual relationship between all providers of services and State agencies.

The reference in the preamble, as published August 10, 1979, regarding establishing minimum professional standards, produced varied comments. Three local agencies and one Regional Office recommended that the regulations establish qualification standards for investigative employees. Two State agencies recommended that the establishment of qualification standards be left to the State agencies. One State agency questioned the authority of the Secretary to impose qualification standards. Another State agency recommended that the regulations define minimum functions to be performed by investigators rather than minimum standards. In light of the many questions and comments relating to the areas of coverage of the enhanced funding, we have revised the language of that part of the section which relates to allowable costs. This revision now deals with those cost item in a manner

similar to other allowable charges; that is, as direct and indirect charges for activities relating specifically to the function. The requirements in Appendix A of this Part 277 are now specifically referenced to this section, rather than making references in the section to certain indirect and support costs which are eligible for the enhanced funding.

In addition, we have specified that only those investigative activities related to workers whose State or local job title is "investigator" or similar, would be eligible for the enhanced funding. Accepting the fact that certain jurisdictions would not have a full-time investigator, allowances are made for part-time activity. In addition, an exception to the use of the State and local job title/description is included so that if the majority of the duties include investigations, the cost of this activity may be allowable at the 75 percent rate when approved by FNS. This action places the decision of allowable activities on the State or local civil service requirements for the investigation/prosecution function, rather than attempting to define the duties or mandatory qualifications on a national level for the enhanced funding. We believe that the State agency is in a better position to define its own needs in this area and we believe that current wording will allow for this.

Four comments were received which suggested that there be a requirement for a formal purchase of service agreement or contract between all providers of prosecution services and the State or local agency. We have agreed that such a requirement would be beneficial in spelling out the requirement on each party's part and specifically detailing the method to be used for this function. Therefore, the final regulations require that a formal agreement be signed between the State agency and the third party provider of prosecution or investigation services before funding is approved by FNS. Further, the regulations make clear that FNS does not fund such third party providers directly. All funding at the 75 percent level will go from FNS to the State agency and from the State agency to the service provider under the conditions specified in their formal agreement or contract.

For the reasons set out in the preamble, Part 227 of 7 CFR is amended as set forth below.

#### **Part 277—Payments of Certain Administrative Costs of State Agencies**

Part 277 was reserved for administrative cost regulations, formerly designed as Part 275. Sections 277.1—277.9, 277.11—277.15, and 277.17,

formerly reserved, are now added. Sections 277.10 and 277.16, previously issued, are now revised. The new Part 275 supersedes and deletes material formerly designated as § 271.1(h), § 271.2 and Part 275 (including Appendix A). The new Part 277 as added and amended, read as follows:

#### **PART 277—PAYMENTS OF CERTAIN ADMINISTRATIVE COSTS OF STATE AGENCIES**

Sec.

- 277.1 General purpose and scope.
- 277.2 Definitions.
- 277.3 Budget and budget revision procedures.
- 277.4 Funding.
- 277.5 Methods of payment.
- 277.6 Standards for financial management systems.
- 277.7 Cash depositories.
- 277.8 Bonding and insurance.
- 277.9 Administrative costs principles.
- 277.10 Program income.
- 277.11 Financial reporting requirements.
- 277.12 Retention and custody of records.
- 277.13 Property.
- 277.14 Procurement standards.
- 277.15 Food Stamp investigations and prosecutions.
- 277.16 Suspension, disallowance and program closeout.
- 277.17 Audit Requirements.

Appendix A—Principles for Determining Costs Applicable to Administration of the Food Stamp Program by State agencies.

**Authority:** 91 Stat. 958, as amended (7 U.S.C. 2011-2027)

##### **277.1 General purpose and scope.**

(a) *Purpose.* This Part establishes uniform requirements for the management of administrative funds provided to State agencies and sets forth principles for claiming costs of activities paid with administrative funds under the Food Stamp Program, and the Food Distribution Program and Food Stamp Program on Indian Reservations.

(b) *Scope and Applicability.* Upon compliance with the provisions of this Part, payments to State agencies will be made for cost(s) incurred for administration of the Food Stamp Program and for administration of the Food Distribution Program on Indian Reservations. To ensure maximum practical uniformity, deviation(s) by a State agency from this Part may be authorized only when necessary to meet program objectives, to conserve program funds, or when essential to the public interest. However, any deviations from this Part must be authorized by the Administrator of FNS.

##### **§ 277.2 Definitions.**

For the purpose of this Part the term: "Accrued Expenditures" means the charges incurred by the State agency

during a given period for liabilities incurred, benefits received or for goods and services used during this period.

"Accrued Income" means the net value of earnings during a given period resulting from services and goods provided whether or not payment has been realized.

"Acquisition Cost" refers to nonexpendable personal property acquired by purchase and means the net invoice price of the property including any attachments, accessories or auxiliary apparatus necessary to make the property usable for the purpose for which it was acquired. Ancillary charges such as taxes, duty, protection in-transit insurance, freight or installation shall be included in or excluded from acquisition cost in accordance with the State agency's regular accounting practices.

"Approval or Authorization by FNS" means documentation evidencing consent prior to incurring specific costs.

"Applicable Credits" refer to those receipts or reduction of expenditure-type transactions which offset or reduce expense items allocable to programs as direct or indirect costs. Examples of such transactions are: purchase discounts; rebates or allowances; recoveries or indemnities on losses; sale of publications, equipment, and scrap; income from personal or incidental services; and adjustments of overpayments or erroneous charges.

"Disbursements" refers to the transfer of funds by the state agency to pay for Program costs resulting from purchased or expired goods and services.

"Expendable Personal Property" means all tangible personal property other than nonexpendable property.

"Program Funds" means money, or property provided in lieu of money, paid for or furnished by FNS to a State agency.

"Funds Available to the State Agency" may include contributions from third parties including other Federal agencies.

"In-kind Contributions" refers to the value of noncash contributions. Only when authorized by Federal legislation may property purchased with Federal funds be considered as a State agency's in-kind contribution. In-kind contributions may be for the value of real and/or nonexpendable personal property or the value of goods and services provided specifically to the project or program.

"Nonexpendable Personal Property" means tangible personal property having a useful life of more than one year and an acquisition cost of more than \$300 per unit. A State agency may use its own definition of nonexpendable

personal property provided that such definition would at least include all tangible personal property as defined herein.

"Obligations" are the amounts of orders placed, contracts awarded, services received, and similar transactions during a given period which require payment.

"Offset" means a method to recover funds due FNS through use of the Letter of Credit system. Recovery is accomplished by accounting adjustments to increase Federal funds on hand or disbursed.

"OMB" means the Office of Management and Budget.

"Personal Property" means property of any kind except real property. It may be tangible (having physical existence) or intangible (having no physical existence) such as patents, inventions and copyrights.

"Program" means both the Food Stamp Program and the Food Distribution Program on Indian Reservations.

"Program Closeout" means the process by which FNS determines that all applicable administrative and financial processes have been completed by the State agency and FNS terminates the program in the affected project area or areas.

"Project Costs" are allowable costs as set forth in this Part.

"Real Property" means land, land improvements, structure and appurtenances thereto, excluding movable machinery and equipment.

"State Agency" means the organization as defined in 7 CFR Part 271.1.

"State Agency Costs" means the State agency outlays from its funds available for program administration. Unless authorized by Federal legislation, costs charged to other Federal grants or to other Federal contracts may not be considered as State agency costs reimbursable under this authority.

"Subagency" means the organization or person to which a State agency makes any payment for acquisition of goods, materials or services for use in administering the program and which is accountable to the State agency for the use of funds provided.

"Terms and Conditions" means legal requirements imposed by the Federal Government under statute, regulations, contracts, agreements or otherwise.

"Unliquidated Obligation" represents the amount of obligations not yet paid.

"Unobligated Balance" means the portion of the Federal funds authorized less all allowable costs and unpaid obligations of the State agency.

**§ 277.3 Budgets and budget revision procedures.**

The preparation, content, submittal, and revision requirements for the State Food Stamp Program Budget shall be as specified in § 272.2. The application for funds and budget requirements for the Food Distribution Program on Indian Reservations shall be as specified in § 283.9. State agencies must submit a budget to FNS as part of the State Plan each fiscal year. Upon approval of the budget by FNS, administrative funds will be provided.

**§ 277.4 Funding.**

(a) *General.* This section sets allowable cost standards for activities of State agencies in administering the Food Stamp Program and Food Distribution Program on Indian Reservations.

(b) *Federal Reimbursement Rate.* The base percentage for Federal payment shall be 50 percent of State agencies' allowable Food Stamp Program administrative costs.

(1) A 75 percent Federal reimbursement of Food Stamp Program allowable costs incurred for State fraud investigations, prosecutions, and fraud hearings upon presentation and approval of a State Plan Addendum as outlined in § 277.15.

(2) [Reserved.]

(3) Funding of demonstration projects approved by FNS will be at a rate agreed to by FNS in accordance with the requirements outlined in Part 282.

(4) The reimbursement of administrative costs to State agencies administering the program on Indian reservations shall be in accordance with the requirements of Parts 281 and 283.

(5) [Reserved.]

(c) *Matching Costs.* State agency costs for Federal matching funds may consist of:

(1) Charges reported on a cash or accrual basis by the State agency as project costs.

(2) Project costs financed with cash contributed or donated to the State agency by other non-Federal public agencies and institutions.

(3) Project costs represented by services and real or personal property donated by other non-Federal public agencies and institutions.

(d) All cash or in-kind contributions except as provided in paragraph (e) of this section shall be allowable as part of the State agency's share of program costs when such contributions:

(1) Are verifiable;

(2) Are not contributed for another federally-assisted program, unless authorized by Federal legislation;

(3) Are necessary and reasonable for accomplishment of project objectives;

(4) Are charges that would be allowable under this Part;

(5) Are not paid by the Federal Government under another assistance agreement unless authorized under the other agreement and its subject laws and regulations; and

(6) Are in the approved budget.

(e) The value of services rendered by volunteers or the value of goods contributed by third parties, exclusive of the State and Federal agencies, are unallowable for reimbursement purposes under the Food Stamp Program. The value of services rendered by volunteers shall be allowable only to meet any matching administrative costs requirements for the Food Distribution Program on Indian Reservations.

**§ 277.5 Methods of payment.**

(a) This section sets forth FNS methods for authorizing funds for State agencies.

(b) The "Letter of Credit" (LOC) (SF-1193A) is the document by which an official of FNS authorizes a State agency to draw funds from the United States Treasury. This shall be the preferred method of payment for State agencies which receive at least \$120,000 per year and meet the requirements prescribed in OMB Circular A-102, Attachment J.

(c) State agencies shall request payment(s) by submitting Request for Payment on Letter of Credit and Status of Funds Report (Treasury Form SF-183) to the appropriate United States Treasury Regional Disbursing Office with a copy to FNS.

(d) State agencies not meeting the requirements for the LOC method of payment or failing to meet LOC reporting requirements, including those requiring adjustments to cash balances to liquidate amounts owed to FNS, shall be provided funds by Treasury check in accordance with the provisions of Department of the Treasury Circular 1075.

(e) Payments for proper charges incurred by State agencies will not be withheld unless such payments are suspended or disallowed pursuant to § 277.16. When a payment is withheld, payment adjustments will be made in accordance with § 277.16. When FNS collects an indebtedness, whether due to a disallowance or an offset for amounts which the State agency has been billed but which it has failed to pay without cause acceptable to FNS, FNS shall provide reasonable notice to the State agency, and shall require appropriate accounting adjustment to cash balances for which the State agency is

accountable to the Federal government to liquidate the indebtedness.

**§ 277.6 Standards for financial management systems.**

(a) *General.* This section prescribes standards for financial management systems in administering program funds by the State agency and its subagencies or contractors.

(b) *Responsibilities.* Financial management systems for program funds in the State agency shall provide for:

(1) Accurate, current, and complete disclosure of the financial results of program activities in accordance with Federal reporting requirements.

(2) Records which identify the source and application of funds for FNS or State agency activities supporting the administration of the Program. These records shall show authorizations, obligations, unobligated balances, assets, liabilities, outlays and income of the State agency, its subagencies and agents.

(3) Records which identify unallowable costs and offsets resulting from FNS or other determinations as specified in § 277.16 and the disposition of these amounts. Accounting procedures must be in effect to prevent a State agency from claiming these costs under ongoing program administrative cost reports.

(4) Effective control and accountability by the State agency for all program funds, property, and other assets acquired with program funds. State agencies shall adequately safeguard all such assets and shall assure that they are used solely for program authorized purposes unless disposition has been made in accordance with § 277.13.

(5) Controls which minimize the time between the receipt of Federal funds from the United States Treasury and their disbursement for program costs. In the Letter of Credit system, the State agency shall make drawdowns from the U.S. Treasury through a U.S. Treasury Regional Disbursing Office as nearly as possible to the time of making the disbursements.

(6) Procedures to determine the reasonableness, allowability, and allocability of costs in accordance with the applicable provisions prescribed in Appendix A to this Part.

(7) Support and source documents for costs.

(8) An audit trail including identification of time periods, initial and summary accounts, cost determination and allocation procedures, cost centers or other accounting procedures to support any costs claimed for program administration.

(9) Periodic audits by qualified individuals who are independent of those who maintain Federal program funds as prescribed in § 277.17.

(10) Methods to resolve audit findings and recommendations and to follow up on corrective or preventive actions.

(11) [Reserved]

(c) The standards in § 277.6(b) apply to subagencies or contractors involved with program funding.

#### § 277.7 Cash depositories.

(a) The term "cash depositories" refers to banks or other institutions which maintain accounts where Food Stamp Program funds are deposited and from which withdrawals are made to meet administrative costs of the State agency.

(b) State agencies are encouraged to use minority owned banks to expand opportunities for minority enterprises.

(c) FNS shall not:

(1) Require physical segregation in a cash depository of program funds from other State agency funds.

(2) Establish any eligibility requirements for cash depositories in which program funds are deposited by the State agency.

#### § 277.8 Bonding and insurance.

(a) *General.* In administering FNS program funds, State agencies shall observe their regular requirements and practices with respect to bonding and insurance. FNS will not impose additional bonding and insurance requirements, including fidelity bonding, above those normally required by the State agency.

(b) *Loan Guarantees.* FNS makes no guarantee of any loan or payment of money borrowed by a State agency for administering the program. State agencies shall not make any assurances to any lender or contractor that FNS will furnish funds for loan payments.

#### § 277.9 Administrative costs principles.

(a) This section prescribes specific policies and procedures governing State agencies for funding under this Part.

(b) Any cost related to determining the Food Stamp eligibility of AFDC cases shall be included as part of the AFDC determination costs and claims. They are not allowable costs for FNS reimbursement.

(c) When costs for administering the program are claimed for reimbursement, the audit trail must identify the specific activities, locations, or time periods as defined in this section.

(1) *Direct Cost.* Allowable direct costs may be charged to the Food Stamp Program at the 50 percent or higher funding level as specified in this part.

(2) *Indirect Cost.* Allowable indirect costs may also be claimed at the 50 percent or higher reimbursement funding level as specified in this Part and Appendix A.

(3) Direct and indirect costs claimed for program cost reimbursement must be incurred for the time periods, the activities or for the locations for which the rates are approved by FNS.

(d) All State agency Cost Allocation Plans for determining the costs of administering the program must be approved by the cognizant Federal agency. All Cost Allocation Plans involving program funds shall be submitted to FNS for review.

#### § 277.10 Program income.

(a) Program income is gross income resulting from activities financed with program funds. Such earnings exclude interest income but include income from service fees, usage or rental fees, sale of assets purchased with program funds, and royalties on patents and copyrights.

(b) Interest earned on advances of program administrative funds shall be remitted to FNS except for interest earned on advances to States or instrumentalities of a State as provided by the Intergovernmental Cooperation Act of 1968 (Pub. L. 90-577) and advances to tribal organizations under the Indian Self-Determination Act (Sections 102-104).

(c) Income resulting from the sale of real and personal property whose acquisition cost was borne in whole or in part with Program funds shall be remitted to FNS or applied to the Federal share of current program costs in accordance with § 277.13. All other sales proceeds will be handled in accordance with § 277.13.

(d) Unless there is a prior agreement between FNS and the State agency, the State agency shall have no obligation to FNS with respect to royalties received from copyrights or patents produced as a result of activities financed with program administrative funds.

(e) Any other income earned under activities supported by program administrative funds may be retained by the State agency if they are deducted from the gross program administrative costs for the purposes of determining net costs and FNS's share of net cost.

(f) State agencies shall record the receipt and expenditure of revenues such as taxes, special assessments, levies, fines, etc., as a part of program fund transactions when such revenues are specifically earmarked for program fund projects.

#### § 277.11 Financial reporting requirements.

(a) *General.* This section prescribes requirements for the State agencies to report financial information to FNS.

(b) *Authorized Forms and Instructions.* (1) Only forms specified by this Part, or other forms authorized by FNS, may be used for obtaining financial information from State agencies for the program.

(2) All instructions for use in connection with the form specified in § 277.11(c) shall be followed. FNS may prescribe supplementary instructions.

(3) State agencies shall submit the original and two copies of forms required by this section unless FNS approves a waiver of this requirement.

(4) The forms and instructions in this Part shall be available to the State agency and to the public upon request to FNS Regional Offices as set out in § 271.6(b).

(c) *Financial Status Report.* (1) *Form.* State agencies shall use the standard Financial Status Report (Form SF-269) to report program costs.

(2) *Frequency.* The report (Form SF-269) shall be required quarterly.

(3) *Exceptions.* Those State agencies that receive payments under the U.S. Treasury check system shall submit to FNS a Quarterly Report of Federal Cash Transactions (Form SF-272).

(4) *Due Dates.* Quarterly reports shall be due April 30 (for the period January-March), July 30 (April-June), October 30 (July-September), January 30 (October-December). Final reports are due December 30 for all completed Federal fiscal years (October 1-September 30) or 90 days after termination of Federal financial support. Requests from State agencies for extension of reporting due dates may be approved, if necessary.

#### § 277.12 Retention and custody of records.

(a) *Retention Period.* All financial records, supporting documents, statistical records, negotiated contracts, and all other records pertinent to program funds shall be maintained for three years from the date of submission of the annual financial status report of the relevant fiscal year to which they apply except that:

(1) If any litigation, claim, or audit is started before the expiration of the three-year period, the applicable records shall be retained until these have been resolved.

(2) In the case of a payment by a State agency to a subagency or contractor using program funds, the State agency, USDA, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any book, documents, papers

and records of the subagency or contractor which the State agency, USDA, or the Comptroller General of the United States or any of their duly authorized representatives, determine are pertinent to administration of the specific FNS program funds, for the purpose of making audit, examination, excerpts, and transcripts.

(b) *Restrictions on Public Access.* Unless required by laws, FNS will not place restrictions on State agencies which limit public access to their records or the records of their subagencies or contractors that are pertinent to the administrative funding provided by FNS except when the State agency can demonstrate that such records must be kept confidential and would have been excepted from disclosure pursuant to the Freedom of Information Act (5 U.S.C. 552) if the records had belonged to FNS.

#### § 277.13 Property.

(a) *General.* This section prescribes policies and procedures governing title, use, disposition of real and personal property for which acquisition costs were borne, in whole or in part, as a direct charge to FNS funds, and ownership rights or intangible personal property developed, in whole or in part, with FNS funds. State agencies may follow their own property management policies and procedures provided they observe the requirements of this section. With respect to property covered by this section, FNS may not impose on State agencies any requirement (including property reporting requirements) not authorized by this section unless specifically required by Federal laws.

(b) *Nonexpendable Personal Property.*

(1) *Title.* Title to nonexpendable personal property whose acquisition cost is borne, in whole or in part, by FNS shall vest in the State agency upon acquisition, and shall be subject to the restrictions on use and dispositions set forth in this section.

(2) *Use.* (i) The State agency shall use the property in the program as long as there is a need for such property to accomplish the purpose of the program.

(ii) When there is no longer a need for the property to accomplish the purpose of the program, the State agency shall use the property where needed in administration of other programs in the following order of priority:

(A) Other federally-funded programs of FNS.

(B) Other federally-funded programs of USDA.

(C) Other federally-funded programs.

(iii) When the State agency no longer has need for such property in any of its federally financed activities, the

property may be used for the State agency's own official activities in accordance with the following standards:

(A) If the property had a total acquisition cost of less than \$1,000, the State agency may use the property without reimbursement to FNS.

(B) For all such property not covered under paragraph (b)(2)(iii)(A) of this section, the State agency may retain the property for its own use, provided a fair compensation is made to FNS for the FNS share of the property. The amount of compensation shall be computed by applying the percentage of FNS participation in the cost of the property to the current fair market value of the property.

(3) *Disposition.* If the State agency has no need for the property, disposition of the property shall be made as follows:

(i) If the property had a total acquisition cost of less than \$1,000 per unit, the State agency may sell the property and retain the proceeds.

(ii) If the property had an acquisition cost of \$1,000 or more per unit, the State agency shall:

(A) If instructed to ship the property elsewhere, the State agency shall be reimbursed with an amount which is computed by applying the percentage of the State agency's participation in the cost of the property to the current fair market value of the property, plus any shipping or interim storage costs incurred.

(B) If instructed to otherwise dispose of the property, the State agency shall be reimbursed by FNS for the cost incurred in such disposition.

(C) If disposition or other instructions are not issued by FNS within 120 days of a request from the State agency, the State agency shall sell the property and reimburse FNS an amount which is computed by applying the percentage of FNS participation in the cost of the property to the sales proceeds. The State agency may, however, deduct and retain from FNS's share \$100 or 10 percent of the proceeds, whichever is greater, for the State agency selling and handling expenses.

(c) *Transfer of Title to Certain Property.* (1) Where FNS determines that an item of nonexpendable personal property with an acquisition cost of \$1,000 or more which is to be wholly borne by FNS is unique, difficult, or costly to replace, FNS may reserve the right to require the State agency to transfer title of the property to the Federal Government or to a third party named by FNS.

(2) Such reservation shall be subject to the following:

(i) The right to require transfer of title may be reserved only by means of an expressed special condition under which funds were authorized for acquisition of the property, or, if approval for the acquisition of the property is given after the funds are awarded, by means of a written stipulation at the time such approval is given.

(ii) The property must be sufficiently described to enable the State agency to determine exactly what property is involved.

(3) FNS may not exercise the right to reserve until the State agency no longer needs the property in the activity for which it was acquired. Such need shall be assumed to end with termination of the activity in which the property was used unless the State agency continues to use the property in other program-related activities after the termination date and demonstrates to FNS a continued need for such use in the program.

(4) To exercise the right, FNS must issue disposition instructions to the State agency not later than 120 days after the State agency no longer needs the property in the activity for which it was acquired. If instructions are not issued within that time, FNS's right shall lapse, and the State agency shall act in accordance with the applicable standards in paragraph (b)(2) and (b)(3) of this section.

(5) The State agency shall be entitled to reimbursement with an amount which is computed by applying the percentages of the State agency's participation in the acquisition cost of the property to the current fair market value of the property, and for any reasonable shipping and interim storage costs it incurs pursuant to FNS's disposition instructions.

(d) *Property Management Standards.* State agencies' property management standards for nonexpendable personal property covered by this section shall include the following procedural requirements:

(1) Property records shall be maintained accurately and provide for:

(i) A description of the property.

(ii) Manufacturer's serial number or other identification number.

(iii) Acquisition date and cost.

(iv) Source of the property.

(v) Percentage of FNS funds used in the acquisition of the property, or sufficient information to be able to compute the percentage, if and when the property is disposed of.

(vi) Location, use and condition of the property.

(vii) Ultimate disposition data including sales price or the method used

to determine current fair market value if the State agency reimburses FNS for its share.

(viii) Trade-in value of any property purchased with Federal funds where their trade-in value reduces the acquisition cost of new property.

(2) A physical inventory of property shall be taken and the results reconciled with the property records at least once every two years to verify the existence, current utilization, and continued need for the property.

(3) A control system shall be in effect to ensure adequate safeguards to prevent loss, damage, or theft to the property. Any loss, damage, or theft of nonexpendable personal property shall be investigated and properly documented.

(4) Adequate maintenance procedures shall be implemented to keep the property in good condition.

(5) Proper sales procedures shall be implemented to keep the property in good condition.

(e) *Expendable personal property.* (1) *Title.* Title to expendable personal property, whose acquisition cost was borne in whole or in part by FNS, shall vest in the State agency.

(2) *Use.* The State agency shall use the property in the program as long as there is a need for such property to accomplish the purpose of the program.

(3) *Disposition.* When there is no longer a need for the property in the program and there is a residual inventory exceeding \$1,000 the State agency shall:

(i) Use the property in other federally sponsored projects or programs;

(ii) Retain the property for use on nonfederally sponsored activities; or,

(iii) Sell it.

(4) *Compensation.* FNS must be compensated for its share if the alternative in paragraph (e) (3) (i) of this section is not followed. The amount of compensation shall be computed in the same manner as for nonexpendable personal property.

(f) *Patents and Inventions.* If any program activity produced patents, patent rights, processes or inventions in the course of work aided by FNS, such fact shall be promptly and fully reported to FNS. Unless there is prior agreement between the State agency and FNS on disposition of such items, FNS shall determine whether protection on such invention or discovery shall be sought and how the rights in the invention or discovery—including rights under any patent issued thereon—shall be disposed of and administered in order to protect the public interest consistent with "Government Patent Policy" (President's Memorandum for Heads of

Executive Departments and Agencies, August 23, 1971), and State of Government Patent Policy as printed in Title 37 CFR, Chapters I and II.

(g) *Copyrights.* When a program activity results in a book or other copyrightable materials, the author or State agency is free to copyright the work, but FNS reserves a royalty-free, nonexclusive and irrevocable right to reproduce, publish or otherwise use and to authorize others to use the work for government purposes. This includes copyrights on ADP software as specified in Appendix A.

#### § 277.14 Procurement standards.

(a) *General.* This section establishes standards and guidelines for the procurement of supplies, equipment, construction and other services whose cost is borne in whole or in part by FNS program funds. These standards ensure that such materials are obtained in an effective and economical manner and in compliance with the provisions of applicable Federal law and Executive Orders. No additional procurement standards will be imposed by FNS upon State agencies unless specifically required by Federal law, or Executive Orders, or authorized by the Administrator for Federal Procurement Policy, Office of Management and Budget.

(1) These standards do not relieve the State agency of any contractual responsibilities under its contracts. The State agency is responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements entered into in support of the program. These include but are not limited to sources evaluations, protests, disputes and claims. FNS shall not substitute its judgment for that of the State agency unless the matter is primarily a Federal concern. Violations of laws shall be referred to the local, State or Federal authority having jurisdiction.

(2) State agencies shall use their own procurement procedures provided that procurements paid in whole or in part with FNS program funds meet the standards set forth in this Part.

(b) *Review of Proposed Contracts.* State agencies shall submit proposed contracts and related procurement documents to FNS for preaward review and approval when:

(1) The procurement is expected to exceed \$10,000 and is to be awarded without competition or only one bid or offer is received in response to solicitation;

(2) The procurement expected to exceed \$10,000 specifies a "brand name" product; or

(3) FNS has determined that the State agency's procurement procedures or operation fails to comply with one or more significant aspects of this section.

(c) *Code of Conduct.* The State agency shall maintain a written code or standards of conduct which shall govern the performance of its officers, employees, or agents engaged in the award and administration of contracts borne in whole or in part with FNS program funds. No employee, officer, or agent of the State agency shall participate in the selection, or in the award or administration of a contract supported in whole or in part by FNS program funds if a conflict of interest, real or apparent, would be involved. Such conflict would arise when:

(1) The employee, officer, or agent;

(2) Any member of his/her immediate family;

(3) His or her partner; or

(4) An organization which employs, or is about to employ, any of the above, has a financial or other interest in the firm selected for award. The State agency's officers, employees, or agents shall neither solicit nor accept gratuities, favors, or anything of monetary value from contractors, potential contractors, or parties to subagreements. State agencies may set minimum rules where the financial interest is not substantial or the gift is an unsolicited item of nominal intrinsic value. To the extent permitted by State or local law or regulations, such standards of conduct shall provide for penalties, sanctions, or other disciplinary actions for violations of such standards by the State agency's officers, employees, or agents, or by contractors or their agents.

(d) *Procurement Procedures.* The State agency shall establish procurement procedures which provide that proposed procurement actions shall be reviewed by State agency officials to avoid the purchase of unnecessary or duplicative items. Consideration should be given to consolidation or dividing the purchase into smaller units, to obtain a more economical purchase. Where appropriate, an analysis shall be made of lease versus purchase alternatives, and any other appropriate analyses, to determine which approach would be the most economical. To foster greater economy and efficiency, State agencies are encouraged to enter into State and local intergovernmental agreements for procurement or use of common goods and services.

(e) *Contracting with Small and Minority Firms, Women's Business Enterprises and Labor Surplus Area*

*Firms.* (1) It is FNS policy to award a fair share of contracts to small and minority business firms. State agencies must take affirmative steps to assure that small and minority businesses are utilized when possible as sources of supplies, equipment, construction and services. State agency affirmative steps shall include the following:

(i) Including qualified small and minority businesses on solicitation lists.

(ii) Assuring that small and minority businesses are solicited whenever they are potential sources.

(iii) When economically feasible, dividing total requirements into smaller tasks or quantities so as to permit maximum small and minority business participation.

(iv) Where the requirement permits, establishing delivery schedules which will encourage participation by small and minority business.

(v) Using the services and assistance of the Small Business Administration, the Office of Minority Business Enterprise of the Department of Commerce and the Community Services Administration, as appropriate.

(vi) If any subcontracts are to be let, requiring the prime contractor to take the affirmative steps in paragraphs (e)(1) (i) through (v) of this section.

(2) State agencies shall take similar appropriate affirmative action in support of women's business enterprises.

(3) State agencies are encouraged to procure goods and services from labor surplus areas, as defined by the Department of Labor.

(4) FNS shall impose no additional regulations or requirements in the foregoing areas unless specifically mandated by law or Executive order.

(f) *Selection Procedures.* All State agency procurement transactions shall be conducted in a manner that provides maximum open and free competition with this section. Procurement procedures shall not contain features which restrict or eliminate competition. The State agency shall have written selection procedures which shall provide, as a minimum, the following procedural requirements:

(1) Solicitation of offers, whether by competitive sealed bid or competitive negotiation, shall contain a clear and accurate description of the technical requirements for the material, product, or service desired. Descriptions shall not, in competitive procurements, contain features which unduly restrict competition. Descriptions may include a statement of the qualitative nature of the material, product or service desired and, when necessary, shall set forth those minimum essential characteristics and standards to which it must conform

if it is to satisfy its intended use. When it is impractical or uneconomical to describe clearly and accurately the technical requirements, a "brand name or equal" description may be used to define the performance or requirements of the material, product or service desired. The specific features of the named brand which must be met by offerors shall be clearly stated. State agencies shall clearly set forth all requirements which offerors must fulfill and all other factors to be used in evaluating bids or proposals.

(2) State agencies shall make awards only to responsible contractors that possess the potential ability to perform successfully under the terms and conditions of a proposed procurement. Consideration shall be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

(g) *Procurement Methods.* State agency procurements made in whole or in part with program funds shall be by one of the following methods:

(1) *Small Purchase Procedures* are those relatively simple and informal procurement methods that are sound and appropriate for a procurement of services, supplies, or other property, costing in the aggregate not more than \$10,000. State agencies shall comply with State or local small purchase dollar limits under \$10,000. If small purchase procedures are used for a procurement under the program, price or rate quotations shall be obtained from an adequate number of qualified sources.

(2) In *competitive sealed bids* (formal advertising), sealed bids are publicly solicited and a firm-fixed-price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is lowest in price.

(i) In order for the State agency to use this method of procurement the following conditions, as a minimum, must prevail:

(A) A complete, adequate, and realistic specification or purchase description is available.

(B) Two or more responsible suppliers are willing and able to compete effectively for the State agency's business.

(C) The procurement lends itself to a firm-fixed-price contract, and selection of the successful bidder can appropriately be made principally on the basis of price.

(ii) If formal advertising is used for a procurement under a grant, the following requirements shall apply:

(A) A sufficient time prior to the date set for opening of bids, bids shall be solicited from an adequate number of known suppliers. In addition, the invitation shall be publicly advertised.

(B) The invitation for bids, including specifications and pertinent attachments, shall clearly define the items or services needed in order for the bidders to properly respond to the invitation.

(C) All bids shall be opened publicly at the time and place stated in the invitation for bids.

(D) A firm-fixed-price contract award shall be made by written notice by the State agency to that responsible bidder whose bid, conforming to the invitation for bids, is lowest. Where specified in the bidding documents, factors such as discounts, transportation costs and life cycle costs shall be considered in determining which bid is lowest.

Payment discounts may only be used to determine low bid when prior experience of the State agency indicates that such discounts are generally taken.

(E) Any or all bids may be rejected by the State agency when there are sound documented business reasons in the best interest of the program.

(3) In *competitive negotiation*, proposals are requested from a number of sources and the Request for Proposal is publicized, negotiations are normally conducted with more than one of the sources submitting offers, and either a fixed-price or cost-reimbursable type contract is awarded, as appropriate. Competitive negotiation may be used if conditions are appropriate for the use of formal advertising. If competitive negotiation is used for procurement under a grant, the following requirements shall apply:

(i) Proposals shall be solicited from an adequate number of qualified sources to permit reasonable competition consistent with the nature and requirements of the procurement. The Request for Proposals shall be publicized and reasonable requests by other sources to compete shall be honored to the maximum extent practicable.

(ii) The Request for Proposal shall identify all significant evaluation factors, including price or cost where required and their relative importance.

(iii) The State agency shall provide procedures for technical evaluation of the proposals received, determinations of responsible offerors for the purpose of written or oral discussions, and selection for contract award.

(iv) Award may be made to the responsible offeror whose proposal will be most advantageous to the State agency, price and other factors

considered. Unsuccessful offerors should be notified promptly.

(v) State agencies may utilize competitive negotiation procedures for procurement of architectural/engineering professional services whereby competitors' qualifications are evaluated and the most qualified competitor is selected subject to negotiation of fair and reasonable compensation.

(4) *Noncompetitive negotiation* is procurement through solicitation of a proposal from only one source, or after solicitation of a number of sources, competition is determined inadequate. Noncompetitive negotiation may be used when the award of a contract is infeasible under small purchase, competitive bidding (formal advertising) or competitive negotiation procedures. Awards of contracts by noncompetitive negotiation are limited to the following:

(i) The item is available only from a single source;

(ii) Public exigency or emergency when the urgency for the requirement will not permit a delay incident to competitive procurement;

(iii) FNS authorizes noncompetitive procurement; or

(iv) After solicitation of a number of sources, competition is determined inadequate.

(h) *Contract Pricing*. The cost plus a percentage of cost and percentage of construction cost method(s) of contracting may not be used by a State agency. State agencies shall perform some form of cost or price analysis in connection with every procurement action including contract modifications. Costs or prices based on estimated costs for contracts, paid in whole or in part by FNS program funds, shall be allowed only to the extent that costs incurred or cost estimates included in negotiated prices are consistent with Federal cost principles.

(i) *State Agency Procurement Records*. State agencies shall maintain records sufficient to detail the significant history of a procurement. These records shall include, but are not necessarily limited to, information pertinent to the rationale for the method of procurement, the selection of contract type, the contract selection or rejection, and the basis for the cost or price.

(j) *Contract provisions*. In addition to provisions defining a sound and complete procurement contract, State agencies shall include the following contract provisions or conditions in all procurement contracts and subcontracts as required by this provision, Federal law, or FNS:

(1) Contracts other than small purchases shall contain provisions or

conditions which will allow for administrative, contractual, or legal remedies in instances where contractors violate or breach contract terms, and provide for such sanctions and penalties as may be appropriate.

(2) All contracts in excess of \$10,000 shall contain suitable provisions for termination by the State agency including the manner by which it will be effected and the basis for settlement. In addition, such contracts shall describe conditions under which the contract may be terminated for default as well as conditions where the contract may be terminated because of circumstances beyond the control of the contractor.

(3) All contracts awarded in excess of \$10,000 by State agencies and their contractors or subagencies shall contain a provision requiring compliance with Executive Order 11246, entitled "Equal Employment Opportunity," as amended by Executive Order 11375, and as supplemented in Department of Labor regulations (29 CFR Part 60).

(4) All contracts and subcontracts for construction or repair shall include a provision for compliance with the Copeland "Anti-Kickback" Act (18 USC 874) as supplemented in Department of Labor regulations (29 CFR Part 3). This Act provides that each contractor or subagency shall be prohibited from inducing, by any means, any person employed in the construction, completion, or repair of public work, to give up any part of the compensation to which he is otherwise entitled. The State agency shall report all suspected or reported violations to FNS.

(5) Where applicable, all contracts awarded by State agencies and subagencies in excess of \$2,000 for construction contracts in excess of \$2,500 for other contracts which involve the employment of mechanics or laborers shall include a provision for compliance with sections 103 and 107 of the Contract Work Hours and Safety Standards Act (40 USC 327-330) as supplemented by Department of Labor regulations (29 CFR Part 5). Under section 103 of the Act, each contractor shall be required to compute the wages of every mechanic and laborer on the basis of a standard work day of 8 hours and a standard work week of 40 hours. Work in excess of the standard work day or work week is permissible provided that the work is compensated at a rate of not less than 1½ times the basic rate for all hours worked in excess of 8 hours in any calendar day or 40 hours in the work week. Section 107 of the Act is applicable to construction work and provides that no laborer or mechanic shall be required to work in surroundings or under working

conditions which are unsanitary, hazardous, or dangerous to his health and safety as determined under construction, safety, and health standards promulgated by the Secretary of Labor. These requirements do not apply to the purchases of supplies or materials or articles ordinarily available on the open market, or contracts for transportation or transmission of intelligence.

(6) The contract shall include notice of FNS requirements and regulations pertaining to reporting and print rights under any contract involving research, developmental, experimental, or demonstration work with respect to any discovery or invention which arises or is developed in the course of or under such contract, and of FNS requirements and regulations pertaining to copyrights and rights to data so derived.

(7) All negotiated contracts (except those awarded by small purchases procedures) awarded by State agencies shall include a provision to the effect that the State agency, FNS, the Comptroller General of the United States, or any of their duly authorized representatives, shall have access to any books, documents, papers, and records of the contractor which are directly pertinent to that specific contract, for the purpose of making audit, examination, excerpts, and transcriptions. State agencies shall require contracts to maintain all required records for three years after the State agency makes final payments or all other pending matters are closed, whichever is last.

(8) Contracts, subcontracts, and subgrants of amounts in excess of \$100,000 shall contain a provision which requires compliance with all applicable standards, orders, or requirements issued under Section 306 of the Clean Air Act, Section 508 of the Clean Water Act, Executive Order 11738, and Environmental Protection Agency (EPA) regulations, which prohibit the use under nonexempt Federal contract, grants, or loans of facilities included on the EPA List of Violating Facilities. The provision shall require reporting of violations to the FNS and to the USEPA Assistant Administrator for Enforcement.

(9) Contracts shall recognize mandatory standards and policies relating to energy efficiency which are contained in the State energy conservation plan issued in compliance with the Energy Policy and Conservation Act (Pub. L. 94-165).

(k) *Contract Administration*. State agencies shall maintain a contract administration system insuring that contractors perform in accordance with

the terms, conditions, and specifications of their contracts or purchase orders.

**§ 277.15 Food stamp investigations and prosecutions.**

(a) *General.* This section establishes the standards and procedures for Federal funding of State and local costs of Food Stamp Program Fraud investigations, prosecutions and fraud hearings.

(b) *Funding.* Upon submission to and approval by FNS of a budget revision and the information required by paragraph (c) of this section, State agencies will be funded at 75 percent of all allowable direct and indirect costs in accordance with the requirements contained in this section. This higher rate may apply retroactively beginning October 1, 1978 and carry forward to the current period. In no case will 75 percent funding apply prior to October 1, 1978. In cases where an agency other than the State welfare agency is or will be involved, an information statement shall be submitted by each State agency to include this operation.

(c) *State Agency Descriptions.* Concurrent with the budget revision required in paragraph (d) of this section, the State agency shall submit the following information:

(1) Identification of the organizational units, with a brief description of the fraud hearing, investigation or prosecution function assigned, that is claimed at the 75 percent rate;

(2) A copy of the statutes or court decisions under which food stamp fraud cases are prosecuted;

(3) A detailed description of the coordination between the investigative units and the prosecuting units, and the process by which prosecuting officials present indictments regarding food stamp fraud cases;

(4) Agreement that investigative reports, prepared by the investigation or prosecution units, and other related records will be made available to USDA upon request; and

(5) Assurance that the fraud hearing activity claimed under this part is conducted in accordance with § 273.17.

(d) *Budget Revision.* The State agency shall prepare and submit a budget revision in compliance with §§ 272.2 and 277.3 to FNS for approval.

(e) *Eligible Activity.* The following activities performed at the State or local level shall be eligible for funding at 75 percent of the costs if they are an integral element of food stamp investigations, prosecutions, and fraud hearings.

(1) *Direct charges.* Direct charges are costs which may be directly attributable to employees assigned specifically to the

food stamp fraud investigation and prosecution functions. Such employees need not be assigned full time, but in the event they are employed less than full time, time sheets or time records must be used to document the amount of time spent on these functions.

(i) For investigation function, only employees whose State or local job title is "Investigator" or a similar descriptive title shall be eligible for the increased funding. Exceptions shall be granted based on adequate justification that the majority of the job duties are specifically related to the investigative function.

(ii) Costs related to the investigative or prosecutive function which are performed by agencies other than the State agency shall be based on a formal agreement between the State or local agency and provider agency. These interagency agreements shall meet the requirements of this Part in regard to allowable charges. Funding under these interagency agreements shall be provided by the State agency from their funds and funds made available by FNS.

(iii) Costs relating to the establishment and collection of claims, when performed by investigators or prosecutors or by any separate unit having claims establishment or collection as its primary function, shall be eligible for the increased funding.

(2) *Indirect charges.* Indirect charges are, in general, those costs which are attributable through allocation to the food stamp fraud investigation and prosecution functions.

(3) *Documentation.* The requirements of appendix A, Part 277, Section (2)(E), and (2)(F) will be followed for the classification and documentation of costs by the State or local agency.

(f) *Ineligible Activity.* The following activities, whether performed at the State or local level, shall be allowable only at the 50 percent funding level, and shall be ineligible for funding at the 75 percent level.

(1) Administrative reviews, such as fair hearings as required per 7 CFR 273 or Performance Reporting System reviews required per 7 CFR 275.

(2) Investigations of authorized retail or wholesale food concerns except when performed in coordination with USDA Office of Inspector General and FNS.

(3) Investigations or establishing claims against households by workers whose regular duties include the determination of a household's eligibility for participation in the Food Stamp Program, except as may be granted under the provisions of (e)(1)(i).

(4) Verification of eligibility information provided by the household

for the purpose of making an eligibility determination, and

(5) Audits.

**§ 277.16 Suspension, disallowance and program closeout.**

(a) *Suspension.* When a State agency has materially failed to comply with any of the provisions contained in the Act, regulations, or FNS-approved State Plan of Operation, FNS may, after written notification to the State agency, temporarily withhold some or all Federal reimbursements for costs of administration of the Food Stamp Program in accordance with § 276.4. Adjustments will be made either by adjusting the Letter of Credit authorization or by not allowing the State agency to withdraw funds.

(b) *Disallowance.* (1) FNS may disallow costs in accordance with Section 276 and effect nonpayment for some or all costs incurred by a State agency which are normally allowable but are determined by FNS to be nonreimbursable because the State agency has failed to comply with any of the provisions contained in the Act, regulations, or FNS-approved State Plan of Operation.

(2) FNS may also disallow costs and institute recovery of Federal funds when a State agency fails to adhere to the cost principles of this Part and Appendix "A".

(c) *Offsets to the Letter of Credit.* (1) FNS may recover funds when owed by the State agency to FNS through offsets to the Letter of Credit. Offsets shall include:

(i) Costs determined by FNS to be disallowed under the provisions of this Part;

(ii) Unallowable costs resulting from audit or investigation findings; or

(iii) Amounts owed which have been billed to the State agency and which the State agency has failed to pay without cause acceptable to FNS.

(2) The amounts recovered through the offset procedure should be in one lump sum. If recovery of funds through the offset procedure is not possible in one lump sum, FNS shall make appropriate adjustments to recover the funds in not more than three fiscal years.

(d) *Program Transfer or Termination.* (1) When termination or transfer of a State program has been agreed upon by FNS, the following closeout procedure shall be observed:

(i) Upon request, FNS shall make or arrange for prompt payment to the State agency for allowable costs not covered by previous payments.

(ii) The State agency shall immediately refund to FNS any

unobligated balance of cash withdrawn by the State agency for the administration of the program in the affected State or Indian reservation.

(iii) The State agency shall submit to FNS within 90 days after the date of termination of the program, all required financial, performance, and other reports. FNS may grant extensions when requested by the State agency.

(iv) FNS shall adjust the amount authorized by the Letter of Credit in order to effect payment of any amounts due the State agency, and if appropriate, shall bill the State agency for any amounts due to FNS. The amounts of such billings shall be promptly remitted to FNS.

(v) In the event a final audit has not been performed prior to the closeout of the program, FNS shall retain the right to disallow costs or recover funds resulting from the final audit findings.

(2) Provisions of § 277.13 apply for any property acquired with program funds or received from the Federal Government in connection with the program and which was in use in the affected project area or areas.

#### § 277.17 Audit requirements.

(a) *General.* This section sets forth the audit requirements for State agencies that receive FNS program funds. Audits shall be conducted on an organization-wide basis. Such audits are to determine whether:

(1) Financial operations are conducted properly;

(2) The financial statements are presented fairly;

(3) The organization has complied with laws and regulations affecting the expenditure of Federal funds;

(4) Internal procedures have been established to meet the objectives of Federally assisted programs; and

(5) Financial reports to the Federal Government contain accurate and reliable information.

Except where required by law, no additional requirements for audit will be imposed by FNS unless approved by the Office of Management and Budget (OMB). The provisions of this section do not limit the authority of FNS to make audits of State agencies, their subdivisions, and subcontracts. However, if independent audits arranged for by State agencies meet the requirements prescribed herein, FNS shall rely on them, and any additional audit work already done.

(b) *Audit Standards.* (1) State agencies shall use their own procedures to arrange for independent audits, and to prescribe the scope of audits, provided that the audits comply with the requirements set forth in this section.

Where contracts are awarded for audit services, the contracts shall include a reference to OMB Circular A-102, Attachment P.

(2) Audits shall be made in accordance with the General Accounting Office "Standards for Audit of Governmental Organizations, Programs, Activities, and Functions, the Guidelines for Financial and Compliance Audits of Federally Assisted Program," and any compliance supplements approved by OMB, and generally accepted auditing standards established by the American Institute of Certified Public Accountants.

(c) *Purpose of Audit.* Audits will include, at a minimum, an examination of the systems of internal control, systems established to ensure compliance with laws and regulations affecting the expenditure of Federal funds, financial transactions and accounts, and financial statements and reports of State agencies. These examinations are to determine whether:

(1) There is effective control over and proper accounting for revenues expenditures, assets, and liabilities.

(2) The financial statements are presented fairly in accordance with generally accepted accounting principles.

(3) The Federal financial reports (including Financial Status Reports, Cash Reports, and claims for advances and reimbursements) contain accurate and reliable financial data; and are presented in accordance with the terms of applicable agreements, and in accordance with Attachment H of OMB Circular A-102.

(4) Federal funds are being expended in accordance with the terms of applicable agreements and those provisions of Federal law or regulations that could have a material effect on the financial statements or on the awards tested.

(d) *Audit Coverage.* A representative number of charges to Federal funds shall be tested. The test shall be representative of:

(1) The universe of Federal funds received, and

(2) All cost categories that materially affect the award. The test is to determine whether the charges:

(i) Are necessary and reasonable for the proper administration of the program;

(ii) Conform to any limitations or exclusions in the award;

(iii) Were given consistent accounting treatments and applied uniformly to both Federally assisted and other activities of the State agency;

(iv) Were net of applicable credits;

(v) Did not include costs property chargeable to other Federally assisted programs;

(vi) Were properly recorded (i.e., correct amount, date) and supported by source documentation;

(vii) Were approved in advance, if subject to prior approval in accordance with Financial Management Circular 74-4;

(viii) Were incurred in accordance with competitive purchasing procedures, if covered by OMB Circular A-102, Attachment O; and

(ix) Were allocated equitably to benefiting activities, including non-Federal activities.

(3) Audits usually will be made annually, but not less frequently than every two years.

(4) If the auditors become aware of irregularities in the State agency, subagency or subcontractor, the auditor shall promptly notify the cognizant agency and State agency management officials above the level of involvement. Irregularities include such matters as conflict of interest, falsification of records or reports, and misappropriation of funds and other assets.

(e) *Audit Report.* The audit report shall include:

(1) Financial statements, including footnotes, of the State agency, subagency, or subcontractor organization.

(2) The auditor's comments on the financial statements which should:

(i) Identify the statements examined and the period covered.

(ii) Identify the various programs under which the organization received Federal funds, and the amounts received for each program.

(iii) State that the audit was done in accordance with paragraph (d) above.

(iv) Express an opinion as to whether the financial statements are fairly presented in accordance with generally accepted accounting principles. If an unqualified opinion cannot be expressed, state the nature of the qualification.

(3) The auditor's comments on compliance and internal control which should:

(i) Include comments on weaknesses in and noncompliance with the systems of internal control, separately identifying material weaknesses.

(ii) Identify the nature and impact of any noted instances of noncompliance with the terms of agreements and those provisions of Federal law or regulation that could have a material effect on the financial statements and reports.

(iii) Contain an expression of positive assurance with respect to compliance

with requirements for tested items, and negative assurance for untested items.

(4) Comments on the accuracy and completeness of financial reports and claims for advances or reimbursements to Federal agencies.

(5) Comments on corrective action taken or planned by the State agency.

(f) *Record Retention.* Work paper and reports shall be retained for a minimum of three years from the date of the audit report unless the auditor is notified in writing by the cognizant agency of the need to extend the retention period. The audit workpapers shall be made available upon request to the cognizant agency or its designees and the General Accounting Office or its designees.

(g) *Cognizant Agency Responsibilities.* The cognizant agency shall have the following responsibilities:

(1) Obtain or make quality assessment reviews of the work of non-Federal audit organizations, and provide the results to other interested audit agencies. If a non-Federal audit organization is responsible for audits of State agencies that have different cognizant audit agencies, a single quality assessment review will be arranged.

(2) Assure that all audit reports of State agencies that affect Federally assisted programs are received, reviewed, and distributed to appropriate Federal audit officials. These officials will be responsible for distributing audit reports to their program officials.

(3) Whenever significant inadequacies in an audit are disclosed, the State agency will be advised and the auditor will be called upon to take corrective action. If corrective action is not taken, the cognizant agency shall notify the State agency and Federal awarding agencies of the facts and its recommendation. Major inadequacies or repetitive substandard performance of independent auditors shall be referred to appropriate professional bodies.

(4) Assure that satisfactory audit coverage is provided in a timely manner and in accordance with the provisions of this section.

(5) Provide technical advice and act as a liaison between Federal agencies, independent auditors and State agencies.

(6) Maintain a followup system on audit findings and investigative matters to assure that audit findings are resolved.

(7) Inform other affected audit agencies of irregularities uncovered. The audit agencies, in turn, shall inform all appropriate officials in their agencies. State or local government law enforcement and prosecuting authorities

shall also be informed of irregularities within their jurisdiction.

(8) Recipients shall require subrecipients that are local governments of Indian tribal governments to adopt the requirements in paragraph (d) through (f). The recipient shall ensure that the subrecipient audit reports are received as required, and shall submit the reports to the cognizant agency. The cognizant agency will have the responsibility for those reports described in paragraph (g).

#### Appendix A—Principles for Determining Costs Applicable to Administration of the Food Stamp Program by State Agencies

This appendix sets forth the procedures implementing uniform requirements for the negotiations and approval of cost allocation plans with State agencies, in accordance with the provisions of Federal Management Circular (FMC) 74-4 and OASC-10, "Cost Principles and Procedures for Establishing Cost Allocation Plans and Indirect Cost Rates for Grants and Contracts with the Federal Government," U.S. Department of Health, Education, and Welfare. This material is adapted substantially from the circular; changes have been made only when necessary in order to conform with legislative constraints.

##### A. Purpose and scope.

(1) Objectives. This Appendix sets forth principles for determining the allowable costs of administering the Food Stamp Program by State agency under FNS approved State Plans of Operation. The principles are for the purpose of cost determination and are not intended to identify the circumstances or dictate the extent of Federal and State or local participation in the financing of the Program. They are designed to provide that all federally assisted programs bear their fair share of costs recognized under these principles, except where restricted or prohibited by law. No provision for profit or other increment above cost is intended.

(2) Policy guides. The application of these principles is based on the fundamental premises that:

(a) State agencies are responsible for the efficient and effective administration of the Food Stamp Program through the application of sound management practice.

(b) The State agency assumes the responsibility for seeing that Food Stamp Program funds have been expended and accounted for consistent with underlying agreements and program objectives.

(c) Each State agency, in recognition of its own unique combination of staff facilities and experience, will have the primary responsibility for employing whatever form of organization and management techniques as may be necessary to assure proper and efficient administration.

(3) Application. These principles will be applied by FNS in determining costs incurred by State agencies receiving FNS payments for administering the Food Stamp Program.

(B) Definitions. Approval or authorization by FNS means documentation evidencing consent prior to incurring specific costs.

Cognizant Federal Agency means the Federal agency recognized by OMB as having the predominate interest in terms of program dollars.

Cost allocation plan means the documentation identifying, accumulating, and distributing allowable costs of program administration together with the allocation methods used.

Cost, as used herein, means cost as determined on a cash, accrual, or other basis acceptable to FNS as a discharge of the State agency's accountability for FNS funds.

Cost center means a pool, summary account, objective or area established for the accumulation of costs. Such areas include objective organizational units, functions, objects or items of expense, as well as ultimate cost objective(s) including specific costs, products, projects, contracts, programs and other operations.

Federal agency means FNS and also any department, agency, commission, or instrumentality in the executive branch of the Federal Government which makes grants to or contracts with State or local governments.

Payments for administrative costs means reimbursement or advances for costs to State agencies pursuant to any agreement whereby FNS provides funds to carry out programs, services, or activities in connection with administration of the Food Stamp Program. The principles and policies stated in this Appendix as applicable to program payments in general also apply to any State agency obligations under a cost reimbursement type of agreement performed by a subagency, including contracts and subcontracts.

Food Stamp Program administration means those activities and operations of the State agency which are necessary to carry out the purposes of the Food Stamp Act, including any portion of the Program financed by the State agency.

Local unit means any political subdivision of government below the State level.

Other agencies of the State means departments or agencies of the State or local unit which provide goods, facilities, and services to a State agency.

Subagencies means the organization or person to which a State agency makes any payment for acquisition of goods, materials or services for use in administering the Food Stamp Program and which is accountable to the State agency for the use of the funds provided.

Service, as used herein, means goods and facilities, as well as services.

Supporting services means auxiliary functions necessary to sustain the direct effort of administering the Program. These services may be centralized in the State agency or in some other agency, and include procurement, payroll, personnel functions, maintenance and operation of space, data processing, accounting, budgeting, auditing, mail and messenger service, and the like.

##### (C) Basic guidelines.

(1) Factors affecting allowability of costs. To be allowable under the Program, costs must meet the following general criteria:

(a) Be necessary and reasonable for proper and efficient administration of the Program, be allocable thereto under these principles, and, except as specifically provided herein,

not be a general expense required to carry out the overall responsibilities of State or local governments.

(b) Be authorized or not prohibited under State or local laws or regulations.

(c) Conform to any limitations or exclusions set forth in these principles, Federal Laws, or other governing limitations as to types or amounts of cost items.

(d) Be consistent with policies, regulations, and procedures that apply uniformly to both federally assisted and other activities of the unit of government of which the State agency is a part.

(e) Be accorded consistent treatment through application of generally accepted accounting principles appropriate to the circumstances.

(f) Not be allocable to or included as a cost to any other federally financed program in either the current or a prior period.

(g) Be the net of all applicable credits.

(2) Allocable costs.

(a) A cost allocable to a particular cost objective to the extent of benefits received by such objective.

(b) Any cost allocable to a particular program or cost objective under these principles may not be shifted to other Federal programs to overcome fund deficiencies, avoid restrictions imposed by law or grant agreement, or for other reasons.

(c) Where an allocation of joint cost will ultimately result in charges to the Program, an allocation plan will be required as prescribed in Section 1 of these principles.

(3) Applicable credits.

(a) Applicable credits refer to those receipts or reduction of expenditure-type transactions which offset or reduce expense items allocable to programs as direct or indirect costs. Examples of such transactions are: Purchase discounts; rebates or allowances; recoveries or indemnities on losses; sale of publications, equipment, and scrap; income from personal or incidental services; and adjustments of overpayments or erroneous charges.

(b) Applicable credits may also arise when Federal funds are received or are available from sources other than FNS to finance operations or capital items donated or financed by the Federal Government to fulfill matching requirements under another program. These types of credits should likewise be used to reduce related expenditures in determining the rates or amounts applicable to a given program.

(D) Composition of cost.

(1) Total cost. The total cost of a program is comprised of the allowable direct cost incident to its performance, plus its allocable portion of allowable indirect costs, less applicable credit.

(2) Classification costs. There is no universal rule for classifying certain costs as either direct or indirect under every accounting system. A cost may be direct with respect to some specific service or function, but indirect with respect to a program or other ultimate cost objective. However, it is essential that each item of cost be treated consistently either as a direct or an indirect cost. Specific guides for determining direct and indirect costs allocable under the Program are provided in the section which follows.

(E) Direct costs.

(1) General. Direct costs are those that can be identified specifically with a particular cost objective. These costs may be charged directly to the Program, contracts, or to other programs against which costs are finally lodged. Direct costs may also be charged to cost objectives used for the accumulation of costs pending distribution in the course to programs and other ultimate cost objectives.

(2) Application. Typical direct costs chargeable to the Program are:

(a) Compensation of employees for the time and effort devoted specifically to the administration of the Program.

(b) Cost of materials acquired, consumed, or expended specifically for the purpose of the Program.

(c) Equipment and other approved capital expenditures.

(d) Other items of expense incurred specifically for efficiently and effectively administering the Program.

(e) Service furnished specifically for the Program by other agencies, provided such charges are consistent with criteria outlined in Section G of these principles.

(F) Indirect costs.

(1) General. Indirect costs are those (a) incurred for a common or joint purpose benefiting more than one cost objective, and (b) not readily assignable to the cost objectives specifically benefited, without effort disproportionate to the result achieved. The term indirect cost as used herein applies to costs of this type originating in the State agency, as well as those incurred by other departments in supplying goods, services, and facilities, to the State agency. To facilitate equitable distribution of indirect expenses to the cost objectives served, it may be necessary to establish a number of pools of indirect costs within a State agency or in other agencies providing services to a State agency. Indirect cost pools should be distributed to benefiting cost objectives on bases which will produce an equitable result in consideration of relative benefits derived.

(2) State agency indirect costs. All State agency indirect costs, including the various levels of supervision, are eligible for allocation to the program provided they meet the conditions set forth in their principles. In lieu of determining the actual amount of State agency indirect cost allocable to the program the following methods may be used:

(a) Predetermined fixed rates for indirect costs. A predetermined fixed rate for computing indirect costs applicable to program administration may be negotiated annually in situations where the cost experience and other pertinent facts available are deemed sufficient to enable the parties to reach an informed judgment (1) as to the probable level of indirect costs in the State agency during the period to be covered by the negotiated rate, and (2) that the amount allowable under the predetermined rate would not exceed actual indirect costs.

(b) Negotiated lump sum for overhead. A negotiated fixed amount in lieu of indirect costs may be appropriate under circumstances where the benefits derived from a State agency's indirect services cannot be readily determined as in the case of a small self-contained or isolated activity.

When this method is used, a determination should be made that the amount negotiated will be approximately the same as the actual indirect cost that may be incurred. Such amounts negotiated in lieu of indirect costs will be treated as an offset to total indirect expenses of the State agency before allocation to remaining activities. The base on which such remaining expenses are allocated should be appropriately adjusted.

(3) Limitation on indirect costs.

(a) Some Federal programs may be subject to laws that limit the amount of indirect cost that may be allowed. Agencies that sponsor programs of this type will establish procedures which will assure that the amount actually allowed for indirect costs under each such program does not exceed the maximum allowable under the statutory limitation or the amount otherwise allowable under these principles, whichever is the smaller.

(b) When the amount allowable under a statutory limitation is less than the amount otherwise allocable as indirect costs under these principles, the amount not recoverable as indirect costs under a program may not be shifted to another federally sponsored program or contract.

(G) Cost incurred by other agencies of the State.

(1) General. The cost of service provided by other agencies may only include allowable direct costs of the service plus a pro rata share of allowable supporting costs and supervision directly required in performing the service, but not supervision of a general nature such as that provided by the head of a department and his staff assistants not directly involved in operations. However, supervision by the head of a department or agency whose sole function is providing the service furnished would be an eligible cost. Supporting costs include those furnished by other units of the supplying department or by other agencies.

(2) Alternative methods of determining indirect cost. In lieu of determining actual indirect cost related to a particular service furnished by other agencies of the State, either of the following alternative methods may be used provided only one method is used for a specific service during the fiscal year involved.

(a) Standard indirect rate. An amount equal to ten percent of direct labor cost in providing the service performed by other agencies of the State (excluding overtime, shift, or holiday premiums, and fringe benefits) may be allowed in lieu of actual allowable indirect cost for that service.

(b) Predetermined fixed rate. A predetermined fixed rate for indirect cost of the unit or activity providing service may be negotiated as set forth in section F(2)(a) of these principles.

(H) Cost incurred by State agency for others. The principles provided in section G will also be used in determining the cost of services provided by the State agency to another agency.

(I) Cost Allocation Plan

(1) A cost allocation will be required to support the distribution of any indirect costs. All costs allocable to the Food Stamp Program under cost allocation plans will be supported by formal accounting records

which will substantiate the propriety of eventual charges.

(2) There are two types of cost allocation plans:

(a) Statewide or central service cost allocation plan identifies and distributes the cost of services provided by support organizations to those departments or units participating in Federal programs.

(b) Indirect cost proposals distribute the administrative or joint costs incurred by the State agency and the cost of service allocable to it under the Statewide or central service cost allocation plan in a ratio to all work performed by the State agency. The process involves applying a percentage relationship of indirect cost to direct cost.

(3) Requirements. The cost allocation plan of the State agency shall cover all allocated costs of the department as well as costs to be allocated under plans of other agencies or organizational units which are to be included in the costs of federally sponsored programs. The cost allocation plans of all the agencies rendering services to the State agency, to the extent feasible, should be presented in a single document.

(4) Instructions for preparation of cost allocation plans. The Department of Health and Human Services, in consultation with the other Federal agencies concerned, will be responsible for developing and issuing the instructions for use by State agencies in preparation of cost allocation plans. This responsibility applies to both central support services at the State and local government level and indirect cost proposals of individual State agencies.

(5) Submitting Plans for Approval

(a) Responsibility for approving cost allocation plans for individual State agencies has been assigned by the Office of Management and Budget to the cognizant Federal agency.

(b) State cost allocation plans must be submitted to the cognizant Federal agency within six months after the last day of the State's fiscal year. Upon request by the State agency, an extension of time for submittal of the cost allocation plan may be granted by the cognizant Federal agency. It is essential that cost allocation plans be submitted in a timely manner. Failure to submit the plans when required will cause the State agency to become delinquent. In the event a State becomes delinquent, FNS will not provide for the recovery of central service and indirect costs, and such costs already made and claimed against Food Stamp Program funds will be subject to disallowance.

(6) Negotiation and Approval of Cost Allocation Plans for States. The cognizant Federal agency, in collaboration with Federal agencies concerned, will be responsible for negotiation, approval, and audit of cost allocation plans.

(7) Negotiation and Approval of Cost Allocation Plans for Local Governments. Cost allocation plans will be retained at the local government level for audit by the cognizant Federal agency except in those cases where that agency requests that cost allocation plans be submitted to it for negotiation and approval.

(8) A current list of cognizant Federal agencies is maintained by the Office of Management and Budget.

(9) Resolution of problems. The Office of Management and Budget will lend assistance in resolving problems encountered by Federal agencies on cost allocation plans.

(10) Approval by FNS. FNS reserves the right to disapprove costs not meeting the general criteria outlined in Section C of these principles. FNS shall promptly notify the State agency in writing of the disapproval, the reason for the disapproval and the effective date. Costs incurred by State agencies after disapproval may not be charged to FNS unless if FNS subsequently approves the cost.

#### Standards for Selected Items of Cost

A. Allowable Cost. Standards for allowability of costs are established by Federal Management Circular 74-4. These standards will apply regardless of whether a particular item of cost is treated as direct or indirect. Failure to mention a particular item of cost in these standards is not intended to imply that it is either allowable or unallowable. Rather, determination of allowability in each case should be based on the treatment of standards provided for similar or related items of cost. The allowability of the selected items of cost is subject to the general policies and principles as stated in Attachment A to Federal Management Circular 74-4.

(1) Accounting. The cost of establishing and maintaining accounting and other information systems required for the management of the Food Stamp Program is allowable. This includes costs incurred by central service agencies of the State government for these purposes. The cost of maintaining central accounting records required for overall State or local government purposes, such as appropriation and fund accounts by the Treasurer, Comptroller, or similar officials, is considered to be a general expense of government and is not allowable.

(2) Advertising. Advertising media includes newspapers, magazines, radio and television programs, direct mail, trade papers, and the like. The advertising costs allowable are those which are solely for:

(a) Recruitment of personnel required for the Program;

(b) Solicitation of bids for the procurement of goods and services required;

(c) Disposal of scrap or surplus materials acquired in the performance of the agreement; and

(d) Other purposes specifically provided for by FNS regulations or approved by FNS in the administration of the Food Stamp Program.

(3) Advisory Councils. Costs incurred by State advisory councils or committees established to carry out Food Stamp Program goals are allowable. The cost of like organizations is allowable when used to improve the efficiency and effectiveness of the Program.

(4) Audit Service. The cost of audits necessary for the administration and management of functions related to the Program is allowable.

(5) Bonding. Costs of premiums on bonds covering employees who handle Food Stamp Program funds or food coupons are allowable. The amount of allowable coverage

shall be limited to the anticipated maximum amount of food stamp funds or food coupons handled at one time by that employee.

(6) Budgeting. Costs incurred for the development, preparation, and execution of budgets are allowable. Costs for services of a central budget office are generally not allowable since these are costs of general government. However, where employees of the central budget office actively participate in the State agency's budget process, the cost of services identifiable to the Food Stamp Program are allowable.

(7) Building Lease Management. The administrative cost for lease management which includes review of lease proposals, maintenance of a list of available property for lease, and related activities is allowable.

(8) Central Stores. The cost of maintaining and operating a central stores organization for supplies, equipment, and materials used either directly or indirectly for the Food Stamp Program is allowable.

(9) Communications. Communication costs incurred for telephone calls or service, telegraph, teletype service, wide area telephone service (WATS), centrex, telpak (tie lines), postage, messenger service and similar expenses are allowable.

(10) Compensation For Personal Services.

(a) General. Compensation for personal services includes all remuneration, paid currently or accrued, for services rendered during the period of performance in the administration of the program including but not necessarily limited to wages, salaries, and supplementary compensation and benefits as defined in Section A (13) of these principles. The costs of such compensation are allowable to the extent that total compensation for individual employees: is reasonable for the services rendered; follows an appointment made in accordance with State or local government laws and rules and which meets Federal Merit System or other requirements, where applicable; and is determined and supported as provided in Section A of these principles. Compensation for employees engaged in federally-assisted activities will be considered reasonable to the extent that it is consistent with that paid for similar work in other activities of the State or local government. In cases where the kinds of employees required for the Food Stamp Program activities are not found in the other activities of the State or local government, compensation will be considered reasonable to the extent that it is comparable to that paid for similar work in the labor market in which the employing government competes for the kind of employees involved. Compensation surveys providing data representative of the labor market involved will be an acceptable basis for evaluating reasonableness.

(b) Payroll and distribution of time. Amounts charged to the program for personal services, regardless of whether treated as direct or indirect costs, will be based on payrolls documented and approved in accordance with the generally accepted practice of the State or local agency. Payrolls must be supported by time and attendance or equivalent records for individual employees. Distribution of salaries and wages of employees chargeable to more than one

program or other cost objective will be supported by appropriate time reports or approved time study methodologies. The method used should be included in the cost allocation plan and should be approved by FNS.

(11) *Depreciation and Use Allowance.*

(a) State agencies may be compensated for the use of buildings, capital improvements, and equipment through use allowances or depreciation. Use allowances are the means of providing compensation in lieu of depreciation or other equivalent costs. However, a combination of the two methods may not be used in connection with a single class of fixed assets.

(b) The computation of depreciation or use allowances will be based on acquisition cost. Where actual cost records have not been maintained, a reasonable estimate of the original acquisition cost may be used in the computation. The computation will exclude the cost of any portion of the cost of buildings and equipment donated or borne directly or indirectly by the Federal Government through charges to Federal programs or otherwise, irrespective of where title was originally vested or where it presently resides. In addition, the computation will also exclude the cost of acquisition of land. Depreciation or a use allowance on idle or excess facilities is not allowable, except when specifically authorized by FNS.

(c) Where the depreciation method is followed, adequate property records must be maintained, and any generally accepted method of computing depreciation may be used. However, the method of computing depreciation must be consistently applied for any specific asset or class of assets for all affected federally sponsored programs and must result in equitable charges considering the extent of the use of the assets for the benefit of such programs.

(d) In lieu of depreciation, a use allowance for buildings and improvements may be computed at an annual rate not exceeding two percent of acquisition cost. The use allowance for equipment (excluding items properly capitalized as building cost) will be computed at an annual rate not exceeding six and two-thirds percent of acquisition cost of usable equipment.

(e) No depreciation or use charge may be allowed on any assets that would be considered as fully depreciated, provided, however, that reasonable use charges may be negotiated for any such assets if warranted after taking into consideration the cost of the facility or item involved, the estimated useful life remaining at time of negotiation, the effect of any increased maintenance charges or decreased efficiency due to age, and any other factors pertinent to the utilization of the facility or item for the purpose contemplated.

(12) *Disbursing Service.* The cost of disbursing program funds by the State Treasurer or other designated officer is allowable. Disbursing services cover the processing of checks or warrants, from preparation to redemption, including the necessary records of accountability and reconciliation of such records with related cash accounts.

(13) *Employee Fringe Benefits.* Costs identified are allowable to the extent that

total compensation for employees is reasonable as defined in paragraph (10)(a) of these principles.

(a) Employee benefits in the form of regular compensation paid to employees during periods of authorized absences from the job, such as for annual leave, sick leave, court leave, military leave, and the like, if they are provided pursuant to an approved leave system, and the cost thereof is equitably allocated to all related activities, including federally-assisted programs.

(b) Employee benefits in the form of employers' contributions or expense for social security, employees' life and health insurance plans, unemployment insurance coverage, workers' compensation insurance, pension plans, severance pay, and the like, provided such benefits are granted under approved plans and are distributed equitably to programs and to other activities.

(14) *Employee Morale, Health And Welfare Costs.* The costs of health or first-aid clinics and/or infirmaries, recreational facilities, employees' counseling services, employee information publications, and any related expenses incurred in accordance with general State or local policy, are allowable. Income generated from any of these activities will be offset against expenses.

(15) *Exhibits.* Costs of exhibits relating specifically to the Food Stamp Program are allowable.

(16) *Legal Expenses.* The cost of legal expenses required in the administration of the program is allowable. Legal services furnished by the chief legal officer of a State or local government or his staff solely for the purpose of discharging his general responsibilities as legal officer are allowable. Legal expenses for the prosecution of claims against the Federal Government is allowable.

(17) *Maintenance and Repair.* Costs incurred for necessary maintenance, repair, or upkeep of property which neither add to the permanent value of the property nor appreciably prolong its intended life, but keep it in an efficient operating condition, are allowable.

(18) *Materials and Supplies.* The cost of materials and supplies necessary to carry out the program is allowable. Purchases made specifically for the program should be charged thereto at their actual prices after deducting all cash discounts, trade discounts, rebates, and allowances received by the State agency. Withdrawals from general stores or stockrooms should be charged at cost under any recognized method of pricing consistently applied. Incoming transportation charges are a proper part of material cost.

(19) *Memberships, Subscriptions and Professional Activities.*

(a) The cost of membership in civic, business, technical, and professional organizations is allowable, provided:

(i) The benefit from the membership is related to the program,

(ii) The expenditure is for agency membership,

(iii) The cost of the membership is reasonably related to the value of the services or benefits received, and

(iv) The expenditure is not for membership in an organization which devotes a

substantial part of its activities to influencing legislation.

(b) *Reference material.* The cost of books, and subscriptions to civic, business, professional, and technical periodicals is allowable when related to the program.

(c) *Meetings and conferences.* Costs are allowable when the primary purpose of the meeting is the dissemination of technical information relating to the program and they are consistent with regular practices followed for other activities of the State agency.

(20) *Motor pools.* The costs of a service organization which provides automobiles to user State agencies at a mileage or fixed rate and/or provides vehicle maintenance, inspection and repair services are allowable.

(21) *Payroll preparation.* The cost of preparing payrolls and maintaining necessary wage records is allowable.

(22) *Personnel administration.* Costs for the recruitment, examination, certification, classification, training, establishment of pay standards, and related activities for the program are allowable.

(23) *Printing and reproduction.* Cost for printing and reproduction services necessary for program administration including but not limited to forms, reports, manuals, and information literature, is allowable.

Publication costs of reports or other media relating to program accomplishments or results are allowable.

(24) *Procurement service.* The cost of procurement service, including solicitation of bids, preparation and award of contracts, and all phases of contract administration in providing goods, facilities and services for the program is allowable.

(25) *Taxes.* In general, taxes or payments in lieu of taxes which the State agency is legally required to pay are allowable.

(26) *Training and education.* The cost of in-service training, customarily provided for employee development which directly or indirectly benefits the program is allowable. Out-of-service training involving extended periods of time is allowable only when specifically authorized by FNS.

(27) *Transportation.* Costs incurred for freight, cartage, express, postage, and other transportation costs relating either to goods purchased, delivered, or moved from one location to another are allowable.

(28) *Travel.* Travel costs are allowable for expenses for transportation, lodging, subsistence, and related items incurred by employees who are in travel status on official business incident to the program. Such costs may be charged on an actual basis, on a per diem or mileage basis in lieu of actual costs incurred, or on a combination of the two. The charges must be consistent with those normally allowed in like circumstances in nonfederally sponsored activities. The difference in cost between first-class air accommodations and less-than-first-class air accommodations is allowable except when less-than-first-class air accommodations are not reasonably available. Notwithstanding the provisions of paragraphs C (7) and (10), travel costs of officials covered by those paragraphs, when specifically related to grant programs, are allowable with the prior approval of a grantor agency.

B. *Costs allowable with approval of FNS*

(1) *General-Acquisition requirement.* A State shall obtain prior written approval from FNS when it plans to acquire ADP equipment or services that it anticipates will have total acquisition costs of \$100,000 or more in Federal and State funds over a 12-month period, or \$200,000 or more in Federal or State funds for the total acquisition. A State shall also obtain prior written approval from FNS when it plans to acquire noncompetitively from a commercial source ADP equipment or services that cost more than \$25,000 in Federal and State funds. A State shall notify FNS when it plans to acquire ADP equipment or services that will cost \$25,000 to \$100,000 over a 12-month period in Federal and State funds. The State shall send the prior notice of acquisition to FNS 60 days before the planned acquisition.

(2) *Definitions.*

(a) "Acceptance documents" means written evidence of satisfactory completion of an approved phase of work or contract, and acceptance thereof by the State agency.

(b) "Advance Planning Document" or "APD" means a written plan of action to acquire the proposed APD services, system, or equipment. The APD must contain a statement of needs and objectives:

- (i) The feasibility study;
- (ii) A preliminary cost/benefit analysis including lease/purchase options;
- (iii) A personnel resource statement indicating availability of qualified and adequate staff including a project director to accomplish the project objectives;
- (iv) A detailed description of the nature and scope of the activities to be undertaken and the methods to be used;
- (v) A proposed schedule;
- (vi) A proposed budget; and
- (vii) A statement indicating the period of time for which the services, system, or equipment described are expected to be used; for integrated computer systems, a statement of the percentage allocated to FNS and a breakdown or explanation of how the percentage was determined.

(c) "Automatic Data Processing" or "ADP" means data processing performed by a system of electronic or electrical machines so interconnected and interacting as to minimize the need for human assistance or intervention.

(d) "Automatic Data Processing equipment" or "ADP equipment" means:

- (i) Electronic digital computers, regardless of size, capacity, or price, that accept data input, store data, perform calculations, and other processing steps, and prepare information;
- (ii) All peripheral or auxiliary equipment used in support of electronic computers whether selected and acquired with the computer or separately;
- (iii) Data transmission or communications equipment that is selected and acquired solely or primarily for use with a configuration of ADP equipment which includes an electronic computer; and
- (iv) "Data input equipment" means equipment used to enter data directly or indirectly into an electronic digital computer; peripheral or auxiliary equipment; or data transmission or communication equipment.

(e) "Automatic Data Processing services" or "ADP services" means:

(i) Services to operate ADP equipment, either by private sources, or by employees of the State agency, or by State or local organizations other than the State agency; and/or

(ii) Services provided by private sources or by employees of the State agency or by State and local organizations other than the State agency to perform such tasks as feasibility studies, system studies, system design efforts, development of system specifications, system analysis, programming and system implementation.

(f) "Data processing" means the preparation of source media containing data or basic elements of information and the use of such source media according to precise rules of procedures to accomplish such operations as classifying, sorting, calculating, summarizing, recording and transmitting.

(g) "Feasibility study" means a preliminary study to determine whether it is sufficiently probable that effective and efficient use of ADP equipment or systems can be made to warrant the substantial investment of staff, time, and money. The study shall project for a three year period the requirements for ADP equipment, services, and systems.

(h) "Request for proposal" or "RFP" means the document used for public solicitations of competitive proposals from qualified sources as outlined in 7 CFR 277.14.

(i) "Service agreement" means a document signed by the State or local agency and a second State or local organization providing ADP services to the State or local agency which: (i) Identifies those ADP services to be provided by the provider agency;

(ii) Includes, preferably as an amendable attachment, a schedule of changes for each identified ADP service, and a certification that these charges apply equally to all users;

(iii) Includes a description of the method(s) of accounting for the services rendered under the agreement and computing services charges;

(iv) Includes assurances that services provided shall be timely and satisfactory; and

(v) Requires the provider agency to obtain prior State agency approval and to follow competitive procurement procedures equivalent to those contained in 7 CFR 277.14 for the acquisition of any ADP services in support of or in addition to the service agreement.

(j) "Software" means a set of computer programs, procedures, and associated documentation by which ADP equipment is used and operated.

(k) "System design" means the putting together of a new or more efficient ADP system which avoids the deficiencies and discrepancies in the old system.

(l) "System specifications" means information about the new ADP system—such as workload descriptions, input data, information to be maintained and processed, data processing techniques, and output data which is required to determine the ADP equipment and software necessary to implement the system design.

(m) "System study" means the examination of existing information flow and operational procedures within an organization to determine how to provide more timely, accurate, and meaningful information for

management decision-making and to develop new or improved ADP systems to service, control and coordinate the activities of the organization to improve operational efficiency. The study essentially consists of three basic phases: data gathering or investigation of the present system and new information requirements; analysis of the data gathered in the investigation; and synthesis, or refitting, of the parts and relationships uncovered through the analysis into an efficient system.

(3) *Obtaining approval.* Prior approval by FNS is required for costs of ADP equipment or ADP services in support of the Food Stamp Program which exceed \$100,000 in combined Federal and State funds per project. Requests for Approvals must be forwarded through the State agency prior to submittal to FNS. Approval by FNS will be based on a review of the studies conducted by or for the agency that will justify the acquisition of the proposed ADP equipment or ADP services. Written approval or the Advance Planning Document must be obtained from FNS by the State agency prior to entering into contractual agreements or making any other commitment for acquisition of ADP equipment or ADP services.

(4) *Approval by the State agency.* Approval by the State agency is required for all documents specified in this regulation prior to submittal for FNS approval. In addition, State agency approval is also required for those acquisitions of ADP equipment and ADP services not requiring prior approval by FNS.

(5) *Competitive procurement.* Acquisition of ADP equipment and purchase of ADP services shall be based on competitive procurement procedures specified in 7 CFR 277.14 when Food Stamp Program funds are involved. State agency officials responsible for such procurement will ensure that formal advertising is the method of procurement unless the conditions for negotiation in 7 CFR 277.14 are met. Notwithstanding the existence of circumstances justifying negotiation, competitive procurement shall be obtained to the maximum extent practicable. The competitive procurement policy shall be applicable except for ADP services provided by the agency itself, or by other State or local agencies.

(6) *Submittal of documents.*

(a) Prior to claiming funding under the Food Stamp Program the State agency will be required to submit:

- (i) The Advance Planning Document;
- (ii) The Service Agreement (when data processing services are to be provided by a State central data processing facility or by another State or local agency);
- (iii) The Request for Proposal, prior to its issuance when service or equipment proposals are being solicited from commercial sources; and

(iv) The Contract, prior to signature of the contracting officer when services or equipment are to be acquired commercially.

(b) Voluntary submittal, or when requested by FNS, will be made of:

- (i) The system study,
- (ii) The system design,
- (iii) The system specifications,
- (iv) The acceptance document.

(7) *Methods for charging costs.* Methods and procedures for properly charging the

costs of all systems whether acquired from public or private sources shall be in accordance with this regulation and applicable FNS instructions.

(8) *Access.* Access to the system by FNS in all of its aspects, including design, development, and operation, including work performed by any source, and including cost records of contractors and subcontractors, shall be made available by the State at intervals as are deemed necessary by FNS to determine whether the conditions for approval are being met and to determine the efficiency, economy and effectiveness of the system. Failure to provide full access by appropriate State and Federal representatives to all parts of the system shall result in termination of Food Stamp Program funds in the costs of the system and its operation.

(9) *Ownership rights.*

(a) *Software.* The State will have all ownership rights in software or modification thereof and associated documentation designed, developed or installed with Food Stamp Program funds except that FNS reserves a royalty-free, nonexclusive license to reproduce, publish, or otherwise use, and to authorize others to do so, such software, modification and documentation. Proprietary software which is provided at established catalog or market prices and sold or leased to the general public shall not be subject to the ownership provisions of this section.

(b) *Automatic data processing equipment.* The policies and procedures governing title, use and disposition of property purchased with Food Stamp Program funds, which are covered in 7 CFR 277.13 are applicable to automatic data processing equipment.

(10) *Use of ADP system.* ADP systems designed, developed or installed with Food Stamp Program funds shall be used for a period of time consistent with the Advance Planning Document as approved, or which FNS shall determine is sufficient to justify the Federal funds invested.

(11) *Basis for continued Federal Financial Participation.* Periodic onsite surveys and reviews of State and local agency ADP methods and practices may be conducted by or for FNS to determine the adequacy of such methods and practices and to assure that ADP equipment and services are utilized for the purposes for which Federal funds were authorized. Such surveys may include:

(a) *Pre-installation readiness.* A pre-installation survey including an onsite evaluation of the physical site and the State agency's readiness to use the proposed ADP services, equipment or system when installed and operational.

(b) *Post-installation.* A review conducted after installation of ADP equipment or systems to assure that the objectives for which Federal Financial Participation was approved is being accomplished.

(c) *Utilization.* A continuing review of ADP facilities to determine whether or not the ADP equipment or services are being efficiently and effectively utilized in support

of the Food Stamp Program. Should FNS determine from such surveys or reviews or otherwise that the State agency has improperly used Food Stamp Program funds, funding may be invoked. Such termination would be limited to the costs of the data processing services or equipment in question as specified in the written notification of termination by FNS.

(12) *Application of this Section.* The conditions of this section apply for initial and continuing authority to claim Food Stamp Program funding for automatic data processing services and equipment. Due to the nature of the procurement of ADP equipment and services, approved cost allocation plans will not be valid unless documentation required under B(1) of this Section is submitted and approvals are obtained.

(13) *Building space and related facilities.* The cost of space in privately or publicly owned buildings used for the benefit of the Program is allowable subject to the following conditions.

(a) The total cost of space, whether in a privately or publicly owned building, may not exceed the rental cost of comparable space and facilities in a privately owned building in the same locality.

(b) The cost of space may not be charged to FNS for periods of nonoccupancy, without authorization of FNS.

(i) *Rental Cost.* The rental cost of space in a privately-owned building is allowable.

(ii) *Maintenance and operation.* The cost of utilities, insurance, security, janitorial services, elevator service, upkeep of grounds, normal repairs and alterations and the like, are allowable to the extent they are not otherwise included in rental or other charges for space.

(iii) *Rearrangements and alterations.* Costs incurred for rearrangement and alteration of facilities required specifically for the program or those that materially increase the value or useful life of the facilities (Section B(3) of these principles) are allowable when specifically approved by FNS.

(iv) *Depreciation and use allowances on publicly owned buildings.* These costs are allowable as provided in paragraph A(11) of these principles.

(v) *Occupancy of space under rental-purchase or a lease with option-to-purchase agreement.* The cost of space procured under such arrangements is allowable when specifically approved by FNS.

(14) *Capital expenditures.* The cost, net of any credits, of facilities, equipment, other capital assets, and repairs which materially increase the value or useful life of capital assets, and/or of nonexpendable personal property, having a useful life of more than one year and a net acquisition cost of more than \$5,000 per unit after allocation to FNS as projected for one year after purchase, is allowable when such procurement is specifically approved by FNS. No such approval shall be granted unless the State

agency shall demonstrate to FNS that such a cost is:

(a) Necessary and reasonable for proper and efficient administration of the program, and allocable thereto under the principles provided herein; and

(b) That procurement of such item or items has been or will be made in accordance with the standards set out in 277.14. In no case shall such a cost become a program charge against FNS prior to approval in writing by FNS of the procurement and the cost. When assets acquired with Food Stamp funds are (i) sold, (ii) no longer available for use in a Federally-sponsored program, or (iii) used for purposes not authorized by FNS, FNS's equity in the asset will be refunded in the same proportion as Federal participation in its cost. In case any assets are traded on new items, only the net cost of the newly acquired assets is allowable.

(15) *Insurance.*

(a) Cost of insurance to secure the State agency against financial losses involved in the acceptance, storage, and issuance of food coupons and ATP cards is allowable with FNS approval.

(b) Costs of other insurance in connection with the general conduct of activities are allowable subject to the following limitations:

(i) Types and extent and cost of coverage will be in accordance with general State or local government policy and sound business practice.

(ii) Costs of insurance or contributions to any reserve covering the risk of loss of, or damage to, Federal government property are unallowable except to the extent that FNS approves such cost.

(16) *Management Studies.* The cost of management studies to improve the effectiveness and efficiency of program management for the Food Stamp Program is allowable. However, FNS must approve cost in excess of \$2,500 for studies performed by outside consultants or agencies other than the State agency.

(17) *Preagreement costs.* Costs incurred prior to the effective date of approval of the amended indirect cost proposal or the revised Statewide cost allocation plan, whether or not they would have been allowable thereunder if incurred after such date, are allowable only when subsequently provided for in the plan or approved indirect cost proposal.

(18) *Professional services.* Cost of professional services rendered by individuals or organizations not a part of the State agency is allowable. Prior authorization must be obtained from FNS for cost exceeding a total of \$2,500.

(19) *Proposal costs.* Costs of preparing indirect cost proposals or amendments for allocating, distributing, and implementing provisions for payment of portions of the costs of administering the Food Stamp Program by the State agency are allowable.

(20) *Cost incurred by Agencies other than the State.* The cost of services provided by

other agencies (including municipal governments) may only include allowable direct costs plus a pro rata share of allowable supporting costs and supervision directly required in performing the service. Allowable supporting costs are those services which may be centralized and includes such functions as procurement, payroll, personnel services, maintenance and operation of space, data processing, accounting, budgeting, auditing, mail and messenger service and the like. Supervision costs will not include supervision of a general nature such as that provided by the head of a department and his staff assistants not directly involved in the operation of the program. In lieu of determining actual indirect cost related to a particular service performed by another agency, either of the following alternative methods may be used during the fiscal year involved and is specifically provided for in the indirect cost proposal:

(a) Standard indirect rate equal to ten percent of direct labor cost in providing the service (excluding overtime, shift or holiday premiums, and fringe benefits) may be allowed in lieu of actual allowable cost.

(b) A predetermined fixed rate for indirect cost of the unit or activity providing service may be negotiated.

**C. Unallowable costs.** The following costs shall not be allowable:

(1) Costs of determining Food Stamp eligibility incidental to the determination of AFDC eligibility are not chargeable to FNS.

(2) Bad debts. Any losses arising from uncollectable accounts or other claims, and related costs, are unallowable.

(3) Contingencies. Contributions to a contingency reserve or any similar provision for unforeseen events are unallowable.

(4) Contributions and donations. Unallowable.

(5) Entertainment. Costs whose purpose is for amusement, social activities, and incidental costs relating thereto, such as meals, beverages, lodgings, rentals, transportation, and gratuities are unallowable.

(6) Fines and penalties. Costs resulting from violations of or failure to comply with Federal, State and local laws and regulations are unallowable.

(7) Governor's expenses. The salaries and expenses of the Office of the Governor of a State or the chief executive of a political subdivision are considered a cost of general State or local government and are unallowable. However, for a federally-recognized Indian tribal government, only that portion of the salaries and expenses of the office of the chief executive that is a cost of general government is unallowable. The portion of salaries and expenses directly attributable to managing and operating programs is allowable.

(8) Indemnification. The cost of indemnifying the State against liabilities to third parties and other losses not compensated by insurance is unallowable.

(9) Interest and other financial costs.

Interest on borrowings, bond discounts, cost of financing and refinancing operations, and legal and professional fees paid in connection therewith, are unallowable.

(10) Legislative expenses. Salaries and other expenses of the State legislature or similar local governmental bodies are unallowable.

(11) Losses. Losses which could have been covered by permissible insurance are unallowable.

(12) Underrecovery of cost under agreements. Any excess of cost over Federal contribution under one agreement is unallowable under another agreement.

(13) The acquisition of land or buildings is an unallowable cost.

**Note.**—The reporting and recordkeeping requirement contained in this rule are being submitted for approval by the Office of Management and Budget in accordance with the Federal Reports Act of 1942. The reporting and recordkeeping requirements may be subject to revision prior to implementation if the requirements as presently formulated are not approved without change by OMB.

## Agricultural Marketing Service

### 7 CFR Part 910

#### [Lemon Regulation 285]

#### Lemons Grown in California and Arizona; Limitation of Handling

**AGENCY:** Agricultural Marketing Services, USDA.

**ACTION:** Final rule.

**SUMMARY:** This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period December 28-January 3, 1981. Such action is needed to provide for orderly marketing of fresh lemons for this period due to the marketing situation confronting the lemon industry.

**EFFECTIVE DATE:** December 28, 1980.

**FOR FURTHER INFORMATION CONTACT:** Malvin E. McGaha, 202-447-5975.

**SUPPLEMENTARY INFORMATION:** *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona. The

agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee, and upon other information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1980-81 which was designated significant under the procedures of Executive Order 12044. The marketing policy was recommended by the committee following discussion at a public meeting on July 8, 1980. A final impact analysis on the marketing policy is available from Malvin E. McGaha, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202-447-5975.

The committee met again publicly on December 22, 1980, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that there is insufficient time between the date when information became available upon which this regulation is based and when the action must be taken to warrant a 60 day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the *Federal Register* (5 U.S.C. 553). It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Section 910.585 is added as follows:

#### § 910.585 Lemon Regulation 285.

(a) The quantity of lemons grown in California and Arizona which may be handled during the period December 28, 1980, through January 3, 1981, is established at 210,000 cartons.

(b) As used in this section, "handled" and "carton(s)" mean the same as defined in the marketing order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: December 23, 1980.

Charles R. Brader,

Director, Fruit and Vegetable Division,  
Agricultural Marketing Service.

BILLING CODE 3410-02-M

## Animal and Plant Health Inspection Service

### 9 CFR Part 78

#### Brucellosis Areas

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** These amendments add the county of Lipscomb in Texas, to the list of Modified Certified Brucellosis Areas and delete it from the list of Certified Brucellosis-Free Areas because it has been determined that this county now qualifies only as a Modified Certified Brucellosis Area. The effect of this action will provide for more restrictions on cattle moved interstate from this area. These amendments also add the county of Vernon in Missouri to the list of Modified Certified Brucellosis Areas and delete such county from the list of Noncertified Areas because it has been determined that this county now qualifies as a Modified Certified Brucellosis Area. The effect of this action will provide for less restrictions on cattle moved interstate from this area.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Dr. A. D. Robb, USDA, APHIS, VS, Room 805, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8713.

**SUPPLEMENTARY INFORMATION:** A complete list of Brucellosis Areas was published in the *Federal Register* (45 FR 44253-44256) effective July 1, 1980. These amendments update the complete list. These amendments add the county of Lipscomb in Texas to the list of Modified Certified Brucellosis Areas in § 78.21 and delete it from the list of Certified Brucellosis-Free Areas in § 78.20, because it has been determined that it now qualifies only as a Modified Certified Brucellosis Area as defined in § 78.1(m) of the regulations. These amendments add the county of Vernon in Missouri to the list of Modified Certified Brucellosis Areas in § 78.21 and delete such county from the list of Noncertified Areas in § 78.22 because it has been determined that such county now qualifies as a Modified Certified Brucellosis Area.

Accordingly, §§ 78.20, 78.21, and 78.22 of Part 78, Title 9, Code of Federal

Regulations, designating Certified Brucellosis-Free Areas, Modified Certified Brucellosis Areas, and Noncertified Areas, respectively, are revised to read as follows:

#### § 78.20 Certified Brucellosis-Free Areas.

The following states, or specified portions thereof, are hereby designated as Certified Brucellosis-Free Areas:

(a) *Entire States.*

Arizona, California, Colorado, Connecticut, Delaware, Hawaii, Iowa, Indiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oregon, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming, Virgin Islands.

(b) *Specific Counties Within States.*

*Alabama.* Dale, Geneva.  
*Arkansas.* Baxter, Bradley, Columbia, Crittenden, Dallas, Drew, Fulton, Garland, Grant, Jefferson, Marion, Monroe, Montgomery, Newton, Ouachita, Stone, Union, Woodruff.  
*Florida.* Baker, Bay, Calhoun, Citrus, Dixie, Franklin, Holmes, Jackson, Leon, Liberty, Monroe, Okaloosa, Santa Rosa, Seminole, St. Johns, Taylor, Wakulla, Walton.

*Georgia.* Appling, Atkinson, Bacon, Banks, Brantley, Bryan, Bulloch, Burke, Butts, Camden, Candler, Charlton, Chatham, Chattahoochee, Clarke, Clayton, Cook, Crawford, De Kalb, Echols, Effingham, Evans, Fannin, Franklin, Glascock, Glynn, Greene, Habersham, Jeff Davis, Johnson, Lanier, Laurens, Liberty, Long, McIntosh, Monroe, Peach, Rabun, Richmond, Screven, Stephens, Taylor, Toombs, Treutlen, Twiggs, Upson, Ware, Wayne, Wheeler, White, Wilkinson.

*Idaho.* Ada, Adams, Bannock, Bear Lake, Benewah, Bingham, Blaine, Boise, Bonner, Bonneville, Boundary, Butte, Camas, Canyon, Caribou, Clark, Clearwater, Custer, Elmore, Gem, Idaho, Kootenai, Latah, Lemhi, Lewis, Minidoka, Nez Perce, Owyhee, Payette, Power, Shoshone, Teton, Valley, Washington.

*Illinois.* Adams, Alexander, Bond, Boone, Brown, Bureau, Calhoun, Carroll, Cass, Champaign, Christian, Clark, Clay, Clinton, Coles, Cook, Crawford, Cumberland, De Kalb, DeWitt, Douglas, Du Page, Edgar, Edwards, Effingham, Fayette, Ford, Franklin, Fulton, Gallatin, Greene, Grundy, Hamilton, Hancock, Hardin, Henderson, Henry, Iroquois, Jackson, Jasper, Jefferson, Jersey, Johnson, Kane, Kankakee, Kendall, Knox, Lake, La Salle, Lawrence, Lee, Livingston, Logan, Macon, Macoupin,

Madison, Marion, Marshall, Mason, Massac, McDonough, McHenry, McLean, Menard, Mercer, Monroe, Montgomery, Morgan, Moultrie, Ogle, Peoria, Perry, Piatt, Pike, Pope, Pulaski, Putnam, Randolph, Richland, Rock Island, St. Clair, Saline, Sangamon, Schuyler, Scott, Shelby, Stark, Stephenson, Tazewell, Union, Vermilion, Wabash, Warren, Washington, Wayne, White, Whiteside, Will, Williamson, Winnebago, Woodford.

*Kansas.* Anderson, Barber, Bourbon, Brown, Chase, Chautauqua, Cherokee, Cheyenne, Clark, Coffey, Comanche, Crawford, Decatur, Dickinson, Doniphan, Douglas, Edwards, Ellsworth, Finney, Ford, Geary, Gove, Graham, Grant, Gray, Greeley, Hamilton, Harvey, Haskell, Hodgeman, Jewell, Johnson, Kearney, Kingman, Kiowa, Labette, Lane, Leavenworth, Lincoln, Logan, Marion, Marshall, Meade, Miami, Mitchell, Ness, Norton, Osage, Osborne, Pawnee, Phillips, Pottawatomie, Pratt, Rawlins, Republic, Riley, Rooks, Rush, Saline, Scott, Seward, Shawnee, Sheridan, Sherman, Smith, Stanton, Stevens, Sumner, Thomas, Trego, Wabaunsee, Wallace, Washington, Wichita, Wilson, Woodson, Wyandotte.

*Kentucky.* Bell, Breathitt, Campbell, Clay, Floyd, Harlan, Johnson, Kenton, Knott, Knox, Lawrence, Lee, Leslie, Letcher, Lewis, Magoffin, Martin, McCreary, Minifee, Morgan, Owsley, Pendleton, Perry, Pike, Robertson, Trimble, Whitley, Wolfe.

*Mississippi.* Harrison.

*Missouri.* Audrain, Dunklin, Gasconade, Hickory, Lewis, Moniteau, Montgomery, Perry, Platte, Pulaski, St. Louis, Schuyler, Shelby.

*Nebraska.* Banner, Box Butte, Burt, Chase, Cheyenne, Clay, Colfax, Cuming, Dakota, Deuel, Dodge, Douglas, Dundy, Franklin, Hitchcock, Jefferson, Lancaster, Nuckolls, Perkins, Saline, Seward, Sioux, Stanton, Thayer, Thurston, Washington, Wayne.

*New Mexico.* Catron, Colfax, De Baca, Dona Ana, Grant, Guadalupe, Harding, Hidalgo, Lincoln, Los Alamos, Luna, McKinley, Mora, Otero, Quay, Rio Arriba, Sandoval, San Juan, San Miguel, Santa Fe, Sierra, Socorro, Taos, Torrance, Union, Valencia.

*Oklahoma.* Alfalfa, Cimarron, Custer, Ellis, Jackson, Woodward.

*South Dakota.* Aurora, Beadle, Bennett, Bon Homme, Brookings, Brown, Brule, Buffalo, Butte, Campbell, Charles Mix, Clark, Clay, Codington, Corson, Custer, Davison, Day, Deuel, Dewey, Douglas, Edmunds, Fall River, Grant, Gregory, Haakon, Hamlin, Hand, Hanson, Harding, Hughes, Hutchinson, Hyde, Jackson, Jerauld, Kingsbury, Lake, Lawrence, Lincoln, Lyman, Marshall,

McCook, McPherson, Meade, Mellette, Miner, Minnehaha, Moody, Pennington, Perkins, Potter, Roberts, Sanborn, Shannon, Spink, Sully, Todd, Tripp, Turner, Union, Walworth, Washabaugh, Yankton, Ziebach.

*Tennessee.* Anderson, Blount, Campbell, Carter, Claiborne, Fentress, Grainger, Hamblen, Hancock, Johnson, Knox, Lake, Lewis, Meigs, Morgan, Perry, Polk, Roane, Robertson, Scott, Sequatchie, Sevier, Sullivan, Unicoi, Union, Van Buren.

*Texas.* Armstrong, Bandera, Borden, Brewster, Childress, Comal, Crane, Culberson, Ector, Gillespie, Glasscock, Gray, Hansford, Hartley, Hempill, Hudspeth, Hutchinson, Irion, Jeff Davis, Kendall, Kerr, Kimble, Llano, Loving, Martin, Mason, Menard, Midland, Moore, Newton, Ochiltree, Pecos, Presidio, Reagan, Real, Roberts, Schleicher, Sherman, Sterling, Sutton, Terrell, Tom Green, Val Verde, Ward, Winkler, Yoakum.

*Utah.* Beaver, Cache, Carbon, Daggett, Davis, Duchesne, Emery, Grand, Iron, Juab, Kane, Millard, Morgan, Piute, Rich, Salt Lake, San Juan, Sanpete, Sevier, Summit, Tooele, Uintah, Utah, Wasatch, Washington, Wayne, Weber.

*Puerto Rico.* Adjuntas, Aguada, Aguadilla, Aguas Buenas, Aibonito, Anasco, Arroyo, Barceloneta, Barranquitas, Bayamon, Cabo Rojo, Caguas, Canovanas (Loiza), Catano, Cayey, Ceiba, Ciales, Cidra, Coamo, Comerio, Corozal, Culebra, Dorado, Fajardo, Guanica, Guayama, Guaynabo, Guayanilla, Hormigueros, Humacao, Jayuya, Juana Diaz, Juncos, Lajas, Leres, Las Marias, Luquillo, Manati, Maricao, Maunabo, Mayaguez, Moca, Naranjito, Orocovis, Patillas, Penuelas, Ponce, Rincon, Rio Grande, Rio Piedras, Sabana Grande, Salinas, San German, San Juan, San Lorenzo, Santa Isabel, Toa Alta, Toa Baja, Trujillo Alto, Utuado, Vega Alta, Vega Baja, Vieques, Villalba, Yabucoa, Yauco.

**§ 78.21 Modified Certified Brucellosis Areas.**

The following States, or specified portions thereof, are hereby designated as Modified Certified Brucellosis Areas:

(a) *Entire States.* Alaska.

(b) *Specific Counties Within States.*

*Alabama.* Autauga, Baldwin, Barbour, Bibb, Blount, Bullock, Butler, Calhoun, Chambers, Cherokee, Chilton, Choctaw, Clarke, Clay, Cleburne, Coffee, Colbert, Conecuh, Coosa, Covington, Crenshaw, Cullman, Dallas, De Kalb, Elmore, Etowah, Escambia, Fayette, Franklin, Greene, Hale, Henry, Houston, Jackson, Jefferson, Lamar, Lauderdale, Lawrence, Lee, Limestone, Lowndes, Macon, Madison, Marengo, Marion, Marshall,

Mobile, Monroe, Montgomery, Morgan, Perry, Pickens, Pike, Randolph, Russell, St. Clair, Shelby, Sumter, Talladega, Tallapoosa, Tuscaloosa, Walker, Washington, Wilcox, Winston.

*Arkansas.* Arkansas, Ashley, Benton, Boone, Calhoun, Carroll, Chicot, Clark, Clay, Cleburne, Cleveland, Conway, Craighead, Crawford, Cross, Desha, Faulkner, Franklin, Greene, Hempstead, Hot Spring, Howard, Independence, Izard, Jackson, Johnson, Lafayette, Lawrence, Lee, Lincoln, Little River, Logan, Lonoke, Madison, Miller, Mississippi, Nevada, Perry, Phillips, Pike, Poinsett, Polk, Pope, Prairie, Pulaski, Randolph, Saline, Scott, St. Francis, Searcy, Sebastian, Sevier, Sharp, Van Buren, Washington, White, Yell.

*Florida.* Alachua, Bradford, Brevard, Broward, Clay, Collier, Columbia, Dade, De Sota, Duval, Escambia, Flagler, Gadsden, Gilchrist, Glades, Gulf, Hamilton, Hendry, Hernando, Hillsborough, Indian River, Jefferson, Lafayette, Lake, Lee, Levy, Madison, Manatee, Marion, Martin, Nassau, Orange, Osceola, Palm Beach, Pasco, Pinellas, Polk, Putnam, St. Lucie, Sarasota, Sumter, Suwannee, Union, Volusia, Washington.

*Georgia.* Baker, Baldwin, Barrow, Bartow, Ben Hill, Berrien, Bibb, Bleckley, Brooks, Calhoun, Carroll, Catoosa, Chattooga, Cherokee, Clay, Clinch, Cobb, Coffee, Colquitt, Columbia, Coweta, Crisp, Dade, Dawson, Decatur, Dodge, Dooly, Dougherty, Douglas, Early, Elbert, Emanuel, Fayette, Floyd, Forsyth, Fulton, Gilmer, Gordon, Grady, Gwinnett, Hall, Hancock, Haralson, Harris, Hart, Heard, Henry, Houston, Irwin, Jackson, Jasper, Jefferson, Jenkins, Jones, Lamar, Lee, Lincoln, Lowndes, Lumpkin, Macon, Madison, Marion, McDuffie, Meriwether, Miller, Mitchell, Montgomery, Morgan, Murray, Muscogee, Newton, Oconee, Oglethorpe, Paulding, Pickens, Pierce, Pike, Polk, Pulaski, Putnam, Quitman, Randolph, Rockdale, Schley, Seminole, Spalding, Stewart, Sumter, Talbot, Taliaferro, Tattnall, Telfair, Terrell, Thomas, Tift, Towns, Troups, Turner, Union, Walker, Walton, Warren, Washington, Webster, Whitfield, Wilcox, Wilkes, Worth.

*Idaho.* Cassia, Franklin, Fremont, Gooding, Jefferson, Jerome, Lincoln, Madison, Oneida, Twin Falls.

*Illinois.* Jo Daviess.

*Kansas.* Allen, Atchison, Barton, Butler, Cloud, Cowley, Elk, Ellis, Franklin, Greenwood, Harper, Jackson, Jefferson, Linn, Lyon, McPherson, Montgomery, Morris, Morton, Nemaha, Neosho, Ottawa, Reno, Rice, Russell, Sedgwick, Stafford.

*Kentucky.* Adair, Allen, Anderson, Ballard, Barren, Bath, Boone, Bourbon, Boyd, Boyle, Bracken, Breckinridge, Bullitt, Butler, Caldwell, Calloway, Carlisle, Carroll, Carter, Casey, Christian, Clark, Clinton, Crittenden, Cumberland, Daviess, Edmonson, Elliott, Estill, Fayette, Fleming, Franklin, Fulton, Gallatin, Garrard, Grant, Graves, Grayson, Green, Greenup, Hancock, Hardin, Harrison, Hart, Henderson, Henry, Hickman, Hopkins, Jackson, Jefferson, Jessamine, Larue, Laurel, Lincoln, Livingston, Logan, Lyon, Madison, Marion, Marshall, Mason, McCracken, McLean, Meade, Mercer, Metcalfe, Monroe, Montgomery, Muhlenberg, Nelson, Nicholas, Ohio, Oldham, Owen, Powell, Pulaski, Rockcastle, Rowan, Russell, Scott, Shelby, Simpson, Spencer, Taylor, Todd, Twigg, Union, Warren, Washington, Wayne, Webster, Woodford.

*Louisiana.* Acadia, Allen, Ascension, Assumption, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Catahoula, Claiborne, Concordia, De Soto, East Baton Rouge, East Carroll, East Feliciana, Evangeline, Franklin, Grant, Iberia, Iberville, Jackson, Jefferson, Jefferson Davis, Lafayette, La Salle, Lincoln, Livingston, Madison, Morehouse, Natchitoches, Orleans, Ouachita, Plaquemines, Pointe Coupee, Rapides, Red River, Richland, Sabine, St. Bernard, St. Charles, St. Helena, St. James, St. John The Baptist, St. Landry, St. Martin, St. Mary, St. Tammany, Tangipahoa, Tensas, Terrebonne, Union, Vermilion, Vernon, Washington, Webster, West Baton Rouge, West Carroll, West Feliciana, Winn.

*Mississippi.* Adams, Alcorn, Amite, Attala, Benton, Bolivar, Calhoun, Carroll, Chickasaw, Choctaw, Claiborne, Clarke, Clay, Coahoma, Copiah, Covington, De Soto, Forrest, Franklin, George, Greene, Grenada, Hancock, Hinds, Holmes, Humphreys, Issaquena, Itawamba, Jackson, Jasper, Jefferson, Jefferson Davis, Jones, Kemper, Lafayette, Lamar, Lauderdale, Lawrence, Leake, Lee, LeFlore, Lincoln, Lowndes, Madison, Marion, Marshall, Monroe, Montgomery, Neshoba, Newton, Noxube, Oktibbeha, Panola, Pearl River, Perry, Pike, Pontotoc, Prentiss, Quitman, Rankin, Scott, Sharkey, Simpson, Smith, Stone, Sunflower, Tallahatchie, Tate, Tippah, Tishomingo, Tunica, Union, Walthall, Warren, Washington, Wayne, Webster, Wilkinson, Winston, Yalobusha, Yazoo.

*Missouri.* Adair, Andrew, Atchinson, Barry, Barton, Bates, Benton, Bollinger, Boone, Buchanan, Butler, Caldwell, Callaway, Camden, Cape Girardeau,

Carroll, Carter, Cass, Cedar, Chariton, Christian, Clark, Clay, Clinton, Cole, Cooper, Crawford, Dade, Dallas, Daviess, DeKalb, Dent, Douglas, Franklin, Gentry, Greene, Grundy, Harrison, Henry, Holt, Howard, Howell, Iron, Jackson, Jasper, Jefferson, Johnson, Knox, Laclede, Lafayette, Lawrence, Lincoln, Linn, Livingston, Macon, Madison, Maries, Marion, McDonald, Mercer, Miller, Mississippi, Monroe, Morgan, New Madrid, Newton, Nodaway, Oregon, Osage, Ozark, Pemiscot, Pettis, Phelps, Pike, Polk, Putnam, Ralls, Randolph, Ray, Reynolds, Ripley, St. Charles, St. Clair, St. Francois, St. Genevieve, Saline, Scotland, Scott, Shannon, Stoddard, Stone, Sullivan, Taney, Texas, Vernon, Warren, Washington, Wayne, Webster, Worth, Wright.

*Nebraska.* Adams, Antelope, Arthur, Blaine, Boone, Boyd, Brown, Buffalo, Butler, Cass, Cedar, Cherry, Custer, Dawes, Dawson, Dixon, Fillmore, Frontier, Furnas, Gage, Garden, Garfield, Gosper, Grant, Greeley, Hall, Hamilton, Harlan, Hayes, Holt, Hooker, Howard, Johnson, Kearney, Keith, Keya Paha, Kimball, Knox, Lincoln, Logan, Loup, Madison, McPherson, Merrick, Morrill, Nance, Nemaha, Otoe, Pawnee, Phelps, Pierce, Platte, Polk, Redwillow, Richardson, Rock, Sarpy, Saunders, Scotts Bluff, Sheridan, Sherman, Thomas, Valley, Webster, Wheeler, York.

*New Mexico.* Bernalillo, Chaves, Curry, Eddy, Lea, Roosevelt.

*Oklahoma.* Adair, Atoka, Beaver, Beckham, Blaine, Bryan, Caddo, Canadian, Carter, Cherokee, Choctaw, Cleveland, Coal, Comanche, Cotton, Craig, Creek, Delaware, Dewey, Garfield, Garvin, Grady, Grant, Greer, Harmon, Harper, Haskell, Hughes, Jefferson, Johnson, Kay, Kingfisher, Kiowa, Latimer, Le Flore, Lincoln, Logan, Love, Major, Marshall, Mayes, McClain, McCurtain, McIntosh, Murray, Muskogee, Noble, Nowata, Okfuskee, Oklahoma, Okmulgee, Osage, Ottawa, Pawnee, Payne, Pittsburg, Pontotoc, Pottawatomie, Pushmataha, Roger Mills, Rogers, Seminole, Sequoyah, Stephens, Texas, Tillman, Tulsa, Wagoner, Washington, Washita, Woods.

*South Dakota.* Faulk, Jones, Stanley.

*Tennessee.* Bedford, Benton, Bledsoe, Bradley, Cannon, Carroll, Cheatham, Chester, Clay, Cocke, Coffee, Crockett, Cumberland, Davidson, Decatur, DeKalb, Dickson, Dyer, Fayette, Franklin, Gibson, Giles, Greene, Grundy, Hamilton, Hardeman, Hardin, Hawkins, Haywood, Henderson, Henry, Hickman, Houston, Humphreys, Jackson, Jefferson, Lauderdale, Lawrence, Lincoln, Loudon, Macon, Madison, Marion, Marshall,

Maury, McMinn, McNairy, Monroe, Montgomery, Moore, Obion, Overton, Pickett, Putnam, Rhea, Rutherford, Shelby, Smith, Stewart, Sumner, Tipton, Trousdale, Warren, Washington, Wayne, Weakley, White, Williamson, Wilson.

*Texas.* Anderson, Andrews, Angelina, Aransas, Archer, Atascosa, Austin, Bailey, Bastrop, Baylor, Bee, Bell, Bexar, Blanco, Bosque, Bowie, Brazoria, Brazos, Briscoe, Brooks, Brown, Burleson, Burnet, Caldwell, Calhoun, Callahan, Cameron, Camp, Carson, Cass, Castro, Chambers, Cherokee, Clay, Cochran, Coke, Coleman, Collin, Collingsworth, Colorado, Comanche, Concho, Cooke, Coryell, Cottle, Crockett, Crosby, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, De Witt, Dickens, Dimmitt, Donley, Duval, Eastland, Edwards, Ellis, El Paso, Erath, Falls, Fannin, Fayette, Fisher, Floyd, Foard, Fort Bend, Franklin, Freestone, Frio, Gaines, Galveston, Garza, Goliad, Gonzales, Grayson, Gregg, Grimes, Guadalupe, Hale, Hall, Hamilton, Hardeman, Hardin, Harris, Harrison, Haskell, Hays, Henderson, Hidalgo, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hunt, Jack, Jackson, Jasper, Jefferson, Jim Hogg, Jim Wells, Johnson, Jones, Karnes, Kaufman, Kenedy, Kent, King, Kinney, Kleberg, Knox, Lamar, Lamb, Lampasas, La Salle, Lavaca, Lee, Leon, Liberty, Limestone, Lipscomb, Live Oak, Lubbock, Lynn, McCulloch, McLennan, McMullen, Madison, Marion, Matagorda, Maverick, Medina, Milam, Mills, Mitchell, Montague, Montgomery, Morris, Motley, Nacogdoches, Navarro, Nolan, Nueces, Oldham, Orange, Palo Pinto, Panola, Parker, Parmer, Polk, Potter, Rains, Randall, Red River, Reeves, Refugio, Robertson, Rockwall, Runnels, Rusk, Sabine, San Augustine, San Jacinto, San Patricio, San Saba, Scurry, Shackelford, Shelby, Smith, Somervell, Starr, Stephens, Stonewall, Swisher, Tarrant, Taylor, Terry, Throckmorton, Titus, Travis, Trinity, Tyler, Upshur, Upton, Uvalde, Van Zandt, Victoria, Walker, Waller, Washington, Webb, Wharton, Wheeler, Wichita, Wilbarger, Willacy, Williamson, Wilson, Wise, Wood, Young, Zapata, Zavala.

*Utah.* Box Elder, Garfield.

*Puerto Rico.* Arecibo, Camuy, Carolina, Gurabo, Hatillo, Isabela, Las Piedras, Morovis, Naguabo, Quebradillas, San Sebastian.

#### § 78.22 Noncertified Areas.

The following States, or specified portions thereof, are hereby designated as Noncertified Brucellosis Areas:

(a) *Entire States.*

Yellowstone National Park.

(b) *Specific Counties Within States.*  
*Florida.* Charlotte, Hardee, Highlands, Okeechobee; *Louisiana.* Cameron, Lafourche.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; sec. 3, 33 Stat. 1265, as amended; sec. 2, 65 Stat. 693; and secs. 3 and 11, 76 Stat. 130, 132, 21 U.S.C. 111-113, 114a-1, 115, 117, 120, 121, 125, 134b, 134f; 37 FR 28464, 28477; 38 FR 19141, 9 CFR 78.25)

The amendment designating an area as a Modified Certified Brucellosis Area imposes restrictions presently not imposed on cattle moved from that area in interstate commerce. The restrictions are necessary in order to prevent the spread of brucellosis from such area.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this final rule are impracticable and contrary to the public interest and good cause is found for making this final rule effective less than 30 days after publication of this document in the *Federal Register*.

Further, this final rule has not been designated as "significant," and is being published in accordance with the emergency procedures in Executive Order 12044 and Secretary's Memorandum 1955. It has been determined by Paul Becton, Director, National Brucellosis Eradication Program, APHIS, VS, USDA, that the emergency nature of this final rule warrants publication without the opportunity for public comment and preparation of an impact analysis statement at this time.

This final rule will be scheduled for review under provisions of Executive Order 12044 and Secretary's Memorandum 1955.

Done at Washington, D.C., this 22nd day of December 1980.

Norvan L. Meyer,

Acting Deputy Administrator, Veterinary Services.

[FR Doc. 80-40408 Filed 12-29-80; 8:45 am]

BILLING CODE 3410-34-M

#### 9 CFR Part 92

#### Cattle Imported Through Harry S Truman Animal Import Center; Procedures

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** This document amends the regulations concerning the procedures to be used for the allotment of quarantine space for cattle to be imported through

the Harry S Truman Animal Import Center (HSTAIC). This amendment provides:

1. That at least 60 days prior to any drawing notice will be given in the **Federal Register** of the date, time and place of the drawing. The notice shall also designate the geographic areas from which animals will be considered for importation and shall include the fee schedule for the proposed importation.

2. That the application to import animals shall be accompanied by a certified check or money order in the amount of \$1,000 for each animal requested and that the application be received by the Department at least 5 days prior to the date of the drawing.

3. That the applicant, or their designated legal agent or representative, be present at the drawing at which time the cooperative agreement shall be executed and the financial responsibility shall be assumed by the successful applicants.

4. Editorial changes are provided to clarify the procedures and the importers' financial responsibility.

These changes are believed necessary to better administer the facility and help insure that the facility is fully utilized.

**EFFECTIVE DATE:** December 23, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Dr. D. E. Herrick, USDA, APHIS, VS, Federal Building, Room 819, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8170. The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available on request from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782, 301-436-8695.

**SUPPLEMENTARY INFORMATION:** This action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant".

Dr. Milton J. Tillery, Director, National Program Planning Staffs, has determined that an emergency situation exists which warrants that this final rule become effective less than 30 days after publication in the **Federal Register**, because the lottery for the third importation of animals imported into the United States through the HSTAIC will be on January 6, 1981, and the procedures required by this amendment concern the application process and system of allocation of space at HSTAIC. Potential applicants should be notified of these procedures as soon as possible. Further, these procedures should result in a substantial cost

savings to the Federal Government and should facilitate the allocation of space for the HSTAIC. Therefore, they should be implemented for the third importation.

On Friday, June 6, 1980, there was published in the **Federal Register** (45 FR 38036-38038) an amendment that provided a method of selecting alternate applicants to replace applicants originally selected who have not delivered the required cooperative agreement and the required funds, payment bond or letter of credit to the Department. The intended effect of that action was to achieve maximum utilization of all available quarantine space at HSTAIC.

A period of 60 days was provided for receipt of comments, which expired August 5, 1980. No comments were received. The amendment was determined to be essential in order to allow the Department to better coordinate and allocate personnel and materials to the facility and to provide maximum utilization of the facility. However, the procedures were time consuming, were difficult to administer and did not provide the desired results.

On Tuesday, October 14, 1980, there was published in the **Federal Register** (45 FR 67669-67673) a proposed amendment to the regulations of § 92.41 (9 CFR 92.41) concerning the procedures to be used for the allotment of quarantine space for cattle to be imported through the Harry S Truman Animal Import Center which, among other provisions, proposed to amend the procedures of the Friday, June 6, rulemaking.

A period of 30 days was provided for receipt of comments which expired November 13, 1980. Only one comment was received. It stated that the cost schedule would make it prohibitive to import any more animals through HSTAIC, that even if affordable, it would be impossible to bring a letter of credit at the time of the drawing, and suggesting a meeting be held with interested importers to resolve these matters.

The costs associated with the operation of the Harry S Truman Animal Import Center are to be borne by the importers using this facility and will vary in accordance with the actual number of animals utilizing the facility during a given importation period. Each importer who has been authorized a special permit in the drawing, must sign a cooperative agreement which, among other things, sets forth the payment requirements prior to being awarded a special permit to import cattle into HSTAIC.

The regulations also presently require that the selected applicants deliver the cooperative agreement set forth in § 92.41(c) and the payment required under such agreement to the Department within a specified time. This has resulted in the Department not being able to determine if the applicants selected by lottery are going to exercise their right to obtain a special permit. This could result in less than full utilization of the HSTAIC for a particular importation. Therefore, it is essential that the importers, prior to issuance of the special permits, assume fiscal responsibility of the expenses to be incurred. Due to the unusual nature of the service and the need to have adequate funds available to the Department for the cost of the services which will be performed in connection with the importation of animals into the HSTAIC in accordance with the provisions of section 1 of the Act of May 6, 1970 (21 U.S.C. 135), the Department requires either advance payment, a payment bond or a letter of credit, meeting the requirements specified in the cooperative agreement, be deposited with the Service (Veterinary Services) at the time of the drawing. The Department believes that while it could require only cash advance payment of the entire fee, alternative mechanisms for payment are necessary to provide the importer ways to participate in the importation process without "tying up" an importer's cash reserve from the outset of the importation process. The alternative methods of payment are believed to be workable alternatives to requiring that funds be deposited in cash at the outset of the importation process. If the letter of credit option does not prove feasible, the importer may rely on either the advance payment in cash or the use of a bond to cover the cost of the service.

Further, the Department has found that the formula for the fees prescribed for the quarantine period that are based upon full utilization of the facility do not provide for all contingencies. If there is less than full utilization of the facility during the quarantine period, then it will not be self-supporting to the fullest extent possible as Congress intended. However, whether or not the facility will actually be fully utilized depends on several factors, the first of which is the ability of all prospective importers to obtain the necessary financing to enter into the required cooperative agreement. If a prospective importer cannot obtain such financing, the facility will not be fully utilized, unless there is time for another importer to be offered the space in accordance with the regulations and he has time to make all the necessary

financial and pre-entry quarantine arrangements.

Therefore, in order to provide sound financial management both for the prospective importers and the Department, it is essential that the importers, prior to the approval and issuance of the special permits, assume fiscal responsibility for the expenses to be incurred.

The suggestion that the Department meet with prospective importers is rejected since, as stated previously, the lottery for the third importation will be on January 6, 1981, and there is not sufficient time to advise interested persons and schedule such a meeting. Therefore, since this amendment concerns the application process, the proposed amendment is adopted without change.

The Animal and Plant Health Inspection Service (APHIS) is quite concerned about the escalating cost of importing cattle through HSTAIC. APHIS is committed to analyzing its procedures for HSTAIC and to try to identify and implement cost-cutting measures in the operation of the Center. Along with this, APHIS is also exploring the legality and practical feasibility of alternative uses of the facility, or portions thereof in the event that there is less than maximum utilization of the Center during a given importation period, in order to cut costs associated with the importation of cattle through HSTAIC.

Accordingly, Part 92, Title 9, Code of Federal Regulations is amended in the following respects:

1. Sections 92.41 (a) and (b) are revised to read:

**§ 92.41 Requirements for the importation of animals into the United States through the Harry S Truman Animal Import Center.**

(a) *Special authorization.* Because of the extended period of time required to process cattle intended for importation from countries affected with exotic diseases not otherwise eligible for importation into the United States, including foot-and-mouth disease, through the Harry S Truman Animal Import Center, (HSTAIC), special authorization shall be required before any animal may enter the facility for quarantine. Such authorization will be issued on a lottery basis in accordance with the following procedures:

(1) *Drawing; contents of applications and deposits.* For each importation of animals into the HSTAIC, a drawing will be held of the names of applicants who desire to import animals into the facility at that particular time. Each applicant shall complete an application for importing animals through the

HSTAIC which shall be received by Veterinary Services at least 5 days prior to the date of the drawing.<sup>14</sup> The applicant shall state on the application the number of animals he desires to import into the HSTAIC and their country of origin. Each application shall be accompanied by a certified check or money order payable to the United States Department of Agriculture, Animal and Plant Health Inspection Service, in the amount of one thousand dollars (\$1,000), for each animal for which special authorization is requested on the application. In the event the applicant does not receive special authorization for animals for which he has applied, the amount deposited with the application for each animal not so authorized will be returned. If the applicant receives special authorization, the deposited amount shall be applied against the total cost of importation of each animal. At least 60 days prior to any drawing, notice will be given in the Federal Register of the date, time and place of the drawing for interested persons to submit an application. The notice shall also designate the geographic areas from which animals will be considered for importation into the HSTAIC and shall also include the fee schedule for the proposed importation. All applicants, or their designated legal agents or representatives, shall be required to appear in person at the drawing. Such designated legal agent or representative shall have a notarized statement of authority signed by the applicant.

(2) *Drawing for special authorization.* At the time, date, and places specified in the Notice of Drawing, if there are more than 400 applicants, a Department employee shall consecutively draw the names of applicants, until a maximum of 400 names have been selected to receive special authorization to qualify one animal for entry into the United States through the HSTAIC. If there are less than 400 applicants for 400 animals or more, the procedure for the consecutive drawings for spaces shall be as follows: A drawing will be held of the names of those applicants seeking to import at least one animal into the HSTAIC. Then a drawing will be held on the names of applicants wishing to import at least two animals. If after these names have been selected, available space in the HSTAIC still exists, a drawing will be held of the names of those applicants seeking to import at least three animals

<sup>14</sup> Application forms may be obtained upon request from and completed applications should be sent to Import-Export Animals and Products Staff, Veterinary Services, APHIS, U.S. Department of Agriculture, 6505 Belcrest Road, Room 815, Hyattsville, MD 20782.

into the center. This selection process shall continue in the same manner until no available space exists for importing animals into the HSTAIC. However, if the total applications received are for less than 400 animals, each applicant shall receive special authorization for the number requested on their application in accordance with the provisions of subparagraph (4) of this paragraph (a). Further, if available space at the HSTAIC still exists at the designated time of the drawing, each of the applicants shall be offered an opportunity to request additional space(s). If the requests for additional space(s) exceed the space(s) available, a lottery drawing shall be conducted for the additional spaces in the same manner as provided above from those interested applicants. Each applicant shall receive special authorization for the additional space(s) in accordance with the provisions of subparagraph (4) of this paragraph (a). At the end of the drawing when the total number of animals has been determined, the fee will be established in accordance with the graduated fee scale. If any person selected to receive a special authorization declines acceptance, the other applicants will be offered the opportunity to receive the special authorization as provided above in this subparagraph. If any such additional authorization is not requested, the fee per animal shall increase in accordance with the graduated fee schedule: *Provided*, That if the total number of animals for which special authorizations are requested is not at least 50, there shall not be a lottery or importation and the deposits shall be refunded to the applicants.

(3) *Area of origin; limitations.* All applications received will be carefully reviewed prior to the public drawing. In the event applications are received for the importation of cattle which originate from areas in which conditions are considered to be unacceptable as specified in § 92.4(a)(3), the applicant will be so advised in writing and the money submitted with the application will be returned.

(4) *Requirements for special authorization.* On the day of the drawing applicants selected to receive special authorization for cattle to be qualified for importation through the HSTAIC, or their designated legal agents or representatives shall be required to execute a cooperative agreement described in § 92.41(c) and pay the required fee in accordance with the provisions of the cooperative agreement. Authorization to qualify cattle into the United States through

HSTAIC shall not be assigned or transferred, not shall any interest be assigned or transferred.

(b) *Fees.* (1) Cost associated with the maintenance and operation of the facility shall be borne by applicants who receive a special authorization under this section in accordance with the provisions of a cooperative agreement specified in paragraph (c) of this section.

(2) The Deputy Administrator is authorized to establish reasonable fees of the costs incurred by the Department in the maintenance and operation of the HSTAIC. Such fees shall include certain pre-entry services provided by the Department to prepare HSTAIC and animals for entry into that facility. Fees shall also include costs incurred while animals are in the facility and for a period of 30 days subsequent to the animals leaving the facility for costs incurred in its cleaning and disinfecting.

(3) The fees authorized in this section shall be based upon the following items:

(i) *Personnel.* The hourly rates including appropriate premium pay in accordance with 5 U.S.C. 5541-5549 for Veterinary Services' employees who perform the service.

(ii) *Travel.* The costs of travel and per diem of Veterinary Services' employees from their official duty station to their temporary duty station and return in order to qualify animals for entry into the facility. Travel costs shall also include costs to courier test samples from temporary duty stations overseas to Plum Island for testing.

(iii) *Utilities.* The cost of electricity, oil and water for operating the HSTAIC for the five month period of quarantine plus one month for cleaning and disinfection.

(iv) *Laboratory costs.* The cost of conducting three series of laboratory tests for each animal as authorized by the cooperative agreement and in accordance with a Veterinary Services protocol <sup>14a</sup> to qualify for importation into the Harry S Truman Animal Import Center.

(v) *Supplies.* The cost of supplies (feed, bedding, disinfectants, contact test animals and miscellaneous supplies for the animal care, maintenance, and testing at the facility) for the five month period of quarantine plus one month for cleaning and disinfection.

(vi) *Overhead.* A surcharge for overhead based on the most current historical data available showing the percentage of Animal and Plant Health

<sup>14a</sup> A protocol concerning the requirements to be observed may be obtained upon request from Import-Export Animals and Products Staff, Veterinary Services, APHIS, VS, U.S. Department of Agriculture, 6505 Belcrest Road, Room 819, Hyattsville, MD 20782.

Inspection Service funds expended for administrative support.

(4) Any test performed on animals in excess of the number of animals specified in a cooperative agreement is not included in the fees authorized in this section. The Deputy Administrator shall charge the importer for whom the service is performed the actual cost of conducting such test. Payment shall be due upon receipt by such person of a bill for the services from the Department.

(5) The cost of any additional laboratory tests deemed necessary by the Deputy Administrator to determine an animal's freedom from communicable disease is not included in the fees authorized in this section. Also, any treatment performed on animals while at the Harry S Truman Animal Import Center is not included in the fees authorized in this section. The Deputy Administrator shall charge the importer for whom the service is performed the actual cost of such testing or treatment. Payment shall be due upon receipt by that person of a bill for the services from the Department.

(6) The importer shall be reimbursed for any monies advanced for feed, bedding or laboratory tests for animals at the HSTAIC if such feed or bedding are not used or if such laboratory test for animals are not performed by Veterinary Services.

(7) Fees shall be based on the expected level of occupancy of the HSTAIC as determined by the number of cattle for which importers have been specially authorized to import the Center.

§ 92.41 [Amended]

2. In § 92.41(c) the first paragraph is revised to read:

\* \* \* \* \*

(c) *Cooperative agreements.* Each applicant, or their legal agent or representative, selected to be specially authorized to qualify animals for importation through the HSTAIC shall enter into and abide by the provisions of the following cooperative agreement with the Department. Financial obligation for the amount detailed in the following cooperative agreement is to be provided at the time the cooperative agreement is signed.

\* \* \* \* \*

3. In § 92.41(c) paragraph (A) of the "Cooperative Agreement" is amended in subparagraphs 4, 5, 6, and 7 by renumbering 5, 6, 7, and 8 respectively and adding a new subparagraph 4 to read:

\* \* \* \* \*

(c) \* \* \*  
(A) \* \* \*

4. To pay for all laboratory tests in addition to those identified in the Veterinary Services protocol for importing animals into the HSTAIC deemed necessary by the Department to determine freedom from communicable animal diseases.

\* \* \* \* \*

(Sec. 1, Pub. L. 91-239 (21 U.S.C. 135); 37 FR 28464, 28477; 38 FR 19141)

Done at Washington, D.C., this 23d day of December, 1980.

Norvan L. Meyer,  
Acting Deputy Administrator, Veterinary Services.

[FR Doc. 80-40511 Filed 12-23-80; 4:02 pm]

BILLING CODE 3410-34-M

**NATIONAL CREDIT UNION ADMINISTRATION**

**12 CFR Part 701**

**Organization and Operations of Federal Credit Unions; Share, Share Draft and Share Certificate Accounts**

**AGENCY:** National Credit Union Administration.

**ACTION:** Final rule.

**SUMMARY:** On November 14, 1980, the National Credit Union Administration (NCUA) published for public comment a proposed rule concerning a premium or gift given by a Federal Credit Union for establishing an account, renewing an account or adding to an existing account. The proposed rule would consider such a premium or gift a promotional or advertising expense, and not a dividend for purposes of 12 CFR 701.35(h), f (1) the premium or gift is given only at the time of the opening of a new account or an addition to, or renewal of, an existing account; (2) no more than two premiums per account are given within a 12-month period; and (3) the value of the premium or gift (including shipping, warehousing, packaging and handling) does not exceed \$10 for share purchases of less than \$5,000 or \$20 for share purchases of \$5,000 or more. The costs of the premium may not be averaged. Prior to the beginning of a premium program, an official of the credit union must certify that the total cost of the premium or gift, including shipping, warehousing, packaging and handling does not exceed the applicable \$10/20 limitations and that no portion of the total cost of any premium has been attributed to development, advertising, promotional or other expenses. Certification and supporting documents must be retained in the files of the Federal credit union until the next examination and be made available to NCUA upon request.

The period for comments expired on December 10, 1980. After reviewing and considering all comments received and views expressed, the NCUA Board has decided to adopt the proposed regulation as a final regulation with the exception of the requirement that only two premiums may be given per account in any 12 month period.

**EFFECTIVE DATE:** December 31, 1980.

**ADDRESS:** National Credit Union Administration, 1776 G Street, NW., Washington, D.C. 20456.

**FOR FURTHER INFORMATION CONTACT:** James J. Engel, Assistant General Counsel or Todd A. Okun, Assistant General Counsel, both at above address; telephone (202) 357-1030.

**SUPPLEMENTARY INFORMATION:** Of the approximately 20 comments received, nearly all from Federal credit unions, the vast majority expressed the belief that there was no evidence of abuse to justify the proposed rule and that the proposal represented a burdensome and unnecessary new regulation and not a deregulation, which is the mandate of the Depository Institutions Deregulation Committee (Committee) whose regulation is the parallel for NCUA's proposal.

It is the view of the NCUA Board that the concurrent establishment of a dividend earning account (or renewal of, or addition to, an account) and the giving of a gift or premium of value could lead to impermissibly exceeding the dividend limitations on Federal credit union accounts prescribed at 12 CFR 701.35(h). Therefore, there is an obligation on the NCUA Board to assure that this does not occur. Coupled with this duty is the knowledge that premiums have, in fact, been valuable to Federal credit unions in attracting new funds. Previous policy in this area, common to all financial regulatory agencies, delineated *de minimus* amounts that could be given as premiums but that would not be considered as dividends. The final rule recognizes that economic conditions have changed since 1970 and, hence, it doubles the permissible value of premiums that may be given without being considered dividends.

The NCUA Board does not consider the rule to be burdensome except for the requirement that only two premiums may be given per account in any twelve month period. This requirement would impose a confusing and burdensome recordkeeping requirement and would inhibit a Federal credit union board of directors in its decision as to the proper timing and form of a premium campaign. It could serve to stifle innovation and preclude the use of a badly needed

premium campaign if the limit imposed by this requirement has already been reached. Therefore, the NCUA Board has deleted this requirement from the final regulation.

While Federal credit unions are not bound by rules promulgated by the Committee, the NCUA Board believes that, in this case, parallel rules as to the value of permissible premiums that will not be considered dividends are appropriate. All financial regulatory agencies have, since 1970, promulgated parallel rules or policies in this area. Because of this fact and the belief of the NCUA Board that the substance of the regulation itself is not overly restrictive or burdensome, the proposed rule as to amounts is adopted as final. The NCUA Board believes that, within the rule's guidelines, innovative and effective promotional programs can be undertaken while retaining the integrity of the dividend limitations.

One commenter asked about the applicability of the proposed rule to a promotional program wherein establishment of accounts and renewals of, or additions to, accounts are rewarded with changes of winning a television set or automobile through a random drawing. It has been, and continues to be, NCUA policy that the nominal value of each chance need not be considered in relation to the applicable dividend guidelines. In addition, the value of the ultimate prize awarded at the drawing is not considered a dividend to the recipient. The prize should be of reasonable value, as determined by the board of directors. Before initiating such a program, however, a Federal credit union would be well advised to consult with an attorney to determine whether any given program might run afoul of either Federal or state lottery laws.

Another commenter asked about the use of such "goodwill" items as pens, calendars, luggage tags and the like. These items need not be considered dividends unless they are specifically offered, and only given, in connection with the establishment of, addition to, or renewal of a Federal credit union account. That same commenter suggested that the proposed rule should apply to promotional activities designed to induce loans. However, the purpose of the rule is to ensure that the dividend guidelines in connection with share purchases are not exceeded. Premiums to induce loans are not covered by the final rule and are within the discretion of a board of directors.

Inadvertently omitted from the proposed rule was the fact that required certification would not have to be kept on file beyond the next examination of

the credit union. The regulation now reflects this requirement.

Accordingly § 701.35 is amended by adding a new paragraph (m) to read as set forth below.

**Rosemary Brady,**

*Secretary to the Board, National Credit Union Administration.*

December 22, 1980.

(Sec. 107(6), 94 Stat. 132 [12 U.S.C. 1757(6)], sec. 120, 73 Stat. 635 [12 U.S.C. 1766] and Sec. 209, 84 Stat. 1104 [12 R.S.C. 1789]).

**§ 701.35 Share Accounts and Share Certificate Accounts.**

(m) *Premiums.* (1) Premiums given by a Federal credit union, whether in the form of merchandise or cash, are regarded as an advertising or promotional expense rather than the payment of a dividend if:

(i) The premium is given only at the time of the establishment of a new account or an addition to, or renewal of, an existing account; and

(ii) The value of a premium, including shipping, warehousing, packaging and handling costs does not exceed \$10 for share purchases of less than \$5,000 or \$20 for share purchases of \$5,000 or more; and

(iii) The costs of premiums are not averaged; and

(iv) An official of the credit union, prior to the inception of a premium program, certifies in writing that the total cost of a premium, including shipping, warehousing, packaging and handling cost does not exceed the applicable \$10/20 limitations and that no portion of the total cost of the premium has been attributed to development, advertising, promotional or other expenses. The certification and supporting documents must be maintained in the Federal credit union files until the next examination of the credit union.

BILLING CODE 7535-01-M

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Food and Drug Administration**

**21 CFR Part 14**

[Docket No. 80N-0345]

**Public Hearing Before a Public Advisory Committee; Advisory Committee Annual Reports**

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending its regulations to delete the provision that requires advisory committees which meet entirely in open session to issue annual reports. This provision is no longer necessary.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Richard L. Schmidt, Committee Management Office (HFA-306), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-2765.

**SUPPLEMENTARY INFORMATION:** In the *Federal Register* of September 12, 1980 (45 CFR 60449), FDA published a proposal to eliminate annual reports from committees which meet entirely in open session and invited public comment through November 12, 1980. No comments were received.

Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) requires that any advisory committee that holds a closed meeting issue a report at least annually setting forth a summary of its activities as would be informative to the public. FDA's regulations implemented this requirement (21 CFR 14.60(d)) and further extended this obligation to all agency advisory committees whether or not they held any closed sessions (21 CFR Part 14.60(e)). The purpose of the report was to inform the public of the advisory committees' membership, functions, recommendations, and other actions. In light of the public accessibility to this information (21 CFR 14.75), particularly for committees which meet entirely in open session, § 14.60(e) is no longer necessary. Thus, with this change, FDA's regulations conform to Federal Advisory Committee Act requirements of reports only for committees that have held closed sessions.

**§ 14.60 [Amended]**

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 14 is amended in § 14.60 *Minutes and reports of advisory committee meetings* by deleting paragraph (e).

*Effective date.* December 29, 1980.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)).)

Dated: December 12, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[FR Doc. 80-0284 Filed 12-29-80; 8:45 am]

**BILLING CODE 4110-03-M**

**21 CFR Parts 73 and 81**

[Docket No. 80N-0447]

**Postponement of Closing Date for Provisional Listing of Lead Acetate; Notice of Stay of Regulations**

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of lead acetate for use as a color additive in cosmetics that color the hair on the scalp. A new closing date of March 3, 1981 is being established to complete the agency's evaluation of objections received in response to the final regulation approving the petition for the permanent listing of lead acetate. The regulation that permanently lists lead acetate and deletes lead acetate from the provisional list is stayed until final agency action is taken on the objections.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Andrew D. Laumbach, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

**SUPPLEMENTARY INFORMATION:** The current closing date of December 31, 1980, for the color additive provisional listing of lead acetate was established by a regulation published in the *Federal Register* of October 31, 1980 (45 FR 72117). The December 31, 1980, closing date for lead acetate was established to provide for receipt and evaluation of any objections received in response to the final regulation approving the petition for the permanent listing of lead acetate.

After the review and evaluation of the data relevant to the color additive petition for lead acetate used in hair dyes, the agency concluded that lead acetate was safe and suitable for that use. Therefore, FDA issued a regulation that would permanently list lead acetate. The listing regulation was published in the *Federal Register* of October 31, 1980 (45 FR 72112). It was stated in the text of the listing regulation that the regulation shall become effective December 1, 1980, except as to provisions that may be stayed by filing of proper objections.

FDA has received several objections to the listing regulation. Because of the objections the agency is staying the regulations that permanently lists lead acetate and that delete lead acetate from the color additive provisional list until the agency can rule upon the objections. It is expected that the agency will need only a brief period of time to

complete the evaluation of the objections and publish a final decision concerning them in the *Federal Register*. Therefore, the agency concludes that a brief postponement is necessary, and the regulation set forth below will postpone the December 31, 1980, closing date for the provisional listing of that color additive until March 3, 1981.

Because the current closing date expires on December 31, 1980, FDA has concluded that the use of a notice and public procedure on this regulation is impracticable. Moreover, good cause exists for issuing this postponement as a final rule and such action is consistent with the protection of the public health since the agency has previously concluded that lead acetate is safe for its intended use under the Color Additive Amendments of 1960. This regulation will permit the uninterrupted use of this color additive until March 3, 1981. To prevent any interruption in the provisional listing of lead acetate, and in accordance with 5 U.S.C. 553(d) (1) and (3), this regulation is being made effective on December 30, 1980.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701(e), 706(b), (c), and (d), 70 Stat. 919 as amended, 74 Stat. 399-403 (21 U.S.C. 371(e), 376(b), (c), and (d))) and the Transitional Provisions of the Color Additive Amendments (Title II, Pub. L. 86-618, sec. 203, 74 Stat. 404-407 (21 U.S.C. 376, note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Chapter I of Title 21 of the Code of Federal Regulations is amended as follows:

**PART 73—LISTING OF COLOR ADDITIVES EXEMPT FROM CERTIFICATION**

**§ 73.2396 [Stayed]**

1. Part 73 is amended by staying § 73.2396 *Lead acetate*.

**PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS**

2. Part 81 is amended as follows:

**§ 81.1 [Amended]**

a. In § 81.1 *Provisional lists of color additives* the amendment in paragraph (g) of deleting the entry "Lead acetate" is stayed, and the entry "Lead acetate" and its closing date, "March 3, 1981", are added.

**§ 81.27 [Amended]**

b. In § 81.27 *Conditions of provisional listing of additives*, the closing date for

"Lead acetate" in paragraph (b) is revised to read "March 3, 1981."

**Effective date.** This regulation is effective December 30, 1980.

(Secs. 701(e), 706(b), (c), and (d), 70 Stat. 919 as amended, 74 Stat. 399-403 (21 U.S.C. 371(e), 376(b), (c), and (d)); (sec. 203, 74 Stat. 404-407 (21 U.S.C. 376, note))

Dated: December 22, 1980.

**Joseph P. Hile,**

*Associate Commissioner for Regulatory Affairs.*

[FR Doc. 80-40580 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 173

[Docket No. 76F-0371]

### Secondary Direct Food Additives Permitted in Food for Human Consumption; 1-Hydroxyethylidene-1,1-Diphosphonic Acid and its Sodium and Potassium Salts

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) amends the food additive regulations to provide for the safe use of 1-hydroxyethylidene-1,1-diphosphonic acid and its sodium and potassium salts as boiler water additive used in the preparation of steam that will contact food. The agency is taking this action in response to a petition filed by Monsanto Co.

**DATES:** Effective December 30, 1980; objections by January 29, 1981.

**ADDRESS:** Written objections to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** James B. Lamb, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

**SUPPLEMENTARY INFORMATION:** In a notice published in the *Federal Register* of September 29, 1976 (41 FR 42970), FDA announced that a petition (FAP 6A3163) had been filed by Monsanto Co., 800 N. Lindbergh Blvd., St. Louis, MO 63166, proposing to amend § 173.310 *Boiler water additives* (21 CFR 173.310) to provide for the safe use of 1-hydroxyethylidene-1,1-diphosphonic acid and its sodium and potassium salts as boiler water additives used in the preparation of steam that will contact food.

Having evaluated data in the petition and other relevant material, FDA concludes that the food additive

regulations should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 173 is amended in § 173.310(c) by alphabetically inserting a new item in the list of substances to read as follows:

#### § 173.310 Boiler water additives.

\* \* \* \* \*

(c) \* \* \*

Substances	Limitations
1-hydroxyethylidene-1,1-diphosphonic acid (CAS Reg. No. 2809-21-4) and its sodium and potassium salts.....	* * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before January 29, 1981, submit to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

**Effective date.** This regulation shall become effective December 30, 1980.

(Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348))

Dated: December 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[FR Doc. 80-40505 Filed 12-29-80; 8:45 am]

BILLING CODE 4110-03-M

## 21 CFR Part 178

[Docket No. 80F-0169]

### Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers; Antistatic and/or Antifogging Agents in Food-Packaging Materials

**AGENCY:** Food and Drug Administration.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) amends the food additive regulations to provide for the safe use of sodium *n*-alkylsulfonate as an antistatic agent in polyolefin films intended for food-contact use. This action is in response to a petition filed by British Cellophane Ltd.

**DATES:** Effective December 30, 1980. Objections by January 29, 1981.

**ADDRESS:** Written objections to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Vir D. Anand, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

**SUPPLEMENTARY INFORMATION:** In a notice published in the *Federal Register* of June 3, 1980 (45 FR 37524), FDA announced that a food additive petition (FAP 9B3476) had been filed by British Cellophane Ltd., Bath Rd., Bridgewater, Somerset TA6 4PA, England, proposing that the food additive regulations be amended to provide for the safe use of sodium *n*-alkylsulfonate as an antistatic agent in polyolefin films intended to contact food.

Having evaluated data in the petition and other relevant material, FDA concludes that the food additive regulations should be amended as set forth below.

The agency has considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that document may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers

Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 178 is amended in § 178.3130(b) by alphabetically inserting a new item in the list of substances to read as follows:

**§ 178.3130 Antistatic and/or antifogging agents in food-packaging materials.**

\* \* \* \* \*

(b) \* \* \*

List of substances	Limitations
Sodium <i>n</i> -alkylsulfonate (alkyl group in the range of C <sub>10-18</sub> with not less than 50 percent C <sub>14-16</sub> ).	For use only as an antistatic agent at levels not to exceed 0.1 percent by weight of polyolefin films that comply with § 177.1520 of this chapter: <i>Provided</i> , That the finished olefin polymers contact foods only of types I, II, III, IV, V, VI—A, VI—B, VII, VIII, and IX described in table 1 of § 176.170(c) of this chapter, and under conditions of use E, F, and G described in table 2 of § 176.170(c) of this chapter.

Any person who will be adversely affected by the foregoing regulation may at any time on or before January 29, 1981 submit to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

*Effective date.* This regulation shall become effective December 30, 1980.

(Secs. 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348))

Dated: December 19, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

[FR Doc. 80-40506 Filed 12-29-80; 8:45 am]

**BILLING CODE 4110-03-M**

**21 CFR Part 510**

**Change of Sponsor Name; New Animal Drugs**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration amends the animal drug regulations to reflect change of sponsor for several new animal drug applications (NADA's) from Formica Laboratories to Mountaire Feeds & Vitamin Premixes, Division of Mountaire Corp., and to revise the list of sponsors of approved NADA's to reflect the name change.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Robert S. Brigham, Bureau of Veterinary Medicine (HFV-238), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6243.

**SUPPLEMENTARY INFORMATION:** Mountaire Feeds & Vitamin Premixes, Division of Mountaire Corp., 124 E. Fifth St., Little Rock, AR 72119, advised the agency of a change of sponsor name from Formica Laboratories. The Bureau of Veterinary Medicine is amending the regulations in 21 CFR 510.600 to reflect the change.

This action, the change of sponsor of several NADA's, does not involve changes in manufacturing facilities, equipment, procedures, or personnel. Under the Bureau of Veterinary Medicine's supplemental approval policy (42 FR 64367; December 23, 1977), approval of this action does not require reevaluation of the safety and effectiveness data in the parent applications.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))), and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 510 is amended in § 510.600 by deleting the entry for "Formica Laboratories" in paragraph (c)(1) and adding a new sponsor alphabetically, and by deleting from paragraph (c)(2) in the numerical

listing for "043734" the entry "Formica Laboratories," and inserting in its place "Mountaire Feeds & Vitamin Premixes, Division of Mountaire Corp.," to read as follows:

**§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.**

\* \* \* \* \*

(c) \* \* \*  
(1) \* \* \*

Firm name and address	Drug labeler code
Mountaire Feeds and Vitamin Premixes, Division of Mountaire Corp., 124 E. Fifth St., P.O. Box 5391, Little Rock, AR 72119.	043734

\* \* \* \* \*

(2) \* \* \*

Drug labeler code	Firm name and address
043734....	Mountaire Feeds and Vitamin Premixes, Division of Mountaire Corp., 124 E. Fifth St., P.O. Box 5391, Little Rock, AR 72119.

\* \* \* \* \*

*Effective date.* December 29, 1980.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)).)

Dated: December 16, 1980.

**Max L. Crandall,**

*Associate Director for Surveillance and Compliance.*

**BILLING CODE 4110-03-M**

**CFR Part 607**

[Docket No. 79N-0396]

**Exemption of Certain Transfusion Services and Clinical Laboratories From Registration**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending the biologics regulations to exempt transfusion services and clinical laboratories that are approved for Medicare reimbursement from FDA's registration and product listing requirements. This rule implements a Memorandum of Understanding concluded between the Public Health Service (PHS), including FDA, and the Health Care Financing Administration (HCFA). To avoid unnecessary

regulatory duplication, FDA has agreed not to conduct routine inspections of these exempted facilities.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:**

About this final rule: Steven F. Falter, Bureau of Biologics (HFB-620), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, 301-443-1306; about registration or for notification of a change in registration status: Herbert W. Dorsey, Bureau of Biologics (HFB-14), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, 301-443-5368.

**SUPPLEMENTARY INFORMATION:** In early October 1979, a Memorandum of Understanding (MOU) was concluded between PHS, including FDA, and HCFA. The MOU was approved by the Secretary on January 21, 1980. HCFA agreed to assume sole responsibility for the routine inspection (survey) of certain transfusion services and clinical laboratories approved for Medicare reimbursement. HCFA also agreed to assume responsibility for any other routine compliance activities that are necessary to ensure that these facilities are in compliance with FDA's technical and scientific standards. The MOU was published in the *Federal Register* of March 25, 1980 (45 FR 19316).

To implement this MOU, FDA proposed in the *Federal Register* of September 30, 1980 (45 FR 64601) to amend the biologics regulations to exempt the transfusion services and clinical laboratories affected by the MOU from the registration and product listing requirements under Part 607 (21 CFR Part 607). Under section 510(h) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360(h)), registered establishments must be inspected by FDA at least once every 2 years. Thus, an exemption from registration would also exempt the establishment from the requirement of biennial inspection by FDA, thereby fulfilling the objective of the MOU.

The proposal provided 30 days for public comment. Sixty-two letters, some containing more than one comment, were received in response to the proposed rule. A summary of the comments and FDA's response follow:

1. One comment requested that the proposed regulations be amended or withdrawn on the ground that they conflict with the requirements of the act. Specifically, the comment contended that:

a. Proposed § 607.65(f) violates section 510(g)(3) of the act (21 U.S.C. 360(g)(3)). Proposed § 607.65(f) would exempt certain transfusion services which " \* \* \* neither routinely collect nor

process blood and blood components \* \* \*." Section 510(g)(3) exempts from registration only those manufactures of drugs and devices used solely " \* \* \* in research, teaching, or chemical analysis and not for sale." The comment contended that the proposed rule provides for the limited (nonroutine) collection and processing by exempt facilities of a drug (blood) which is for sale and that this exemption expands upon 510(g)(3) of the act. The comment concluded that such legislative powers are beyond those delegated by Congress to an administrative agency such as FDA.

b. The expressions "neither routinely collect nor process," "emergency situation," and "responsible person" were not adequately defined in the proposal or MOU.

c. The effective enforcement of the act is impeded because, although FDA retains ultimate authority for enforcement of the act and, when necessary, will exercise this authority, HCFA has been delegated the responsibility for determining when enforcement of the act by FDA may be necessary.

d. No provision is made in proposed § 607.65(f) and (g) for FDA to inform HCFA inspectors of a fatal transfusion reaction reported by an exempt facility.

FDA disagrees with this comment. FDA's response to each contention within the comment is as follows:

a. Section 510(g)(3) of the act exempts from registration those manufacturers of drugs or devices for certain uses other than for sale. Conversely, it does not exempt this broad class of persons (i.e., manufacturers of drugs or devices) from registration if the products are offered for sale. However, section 510(g)(4) of the act does provide for the exemption of specific classes of persons upon a finding that registration " \* \* \* is not necessary for the protection of the public health." FDA considers this paragraph to grant FDA the authority to exempt those classes of persons whose registration is not necessary for the protection of the public health but which could not be identified by Congress at the time of enactment. This authority does indeed extend beyond the specific exemptions granted in section 510(g) (1), (2) and (3) of the act. The lack of significant public comment on the question of the protection of the public health confirms FDA's (and HCFA's) finding the public health will continue to be adequately protected with the exemption of the subject facilities. Accordingly, FDA finds that the proposed regulations are consistent with section 510 of the act.

b. For clarification, the term, "routinely collect or process" means the collection or processing (see definition of "processing" under 21 CFR 606.3(i)) of blood or a blood component on a regular (nonemergency) basis. For the purpose of this regulation, "an emergency situation" is when a person with the authority for making such a determination, i.e., "a responsible person," determines that blood or a blood component is needed immediately, and the urgency of the situation prohibits the obtaining of the blood or blood component through routine channels, and the circumstances justifying the action are suitably documented in writing. The responsible person is, in effect, the same as the designated, qualified person described in § 606.20(a) (21 CFR 606.20(a)) as the person who shall exercise control of the establishment in all matters related to compliance with the biologics regulations. FDA believes that these terms are adequately understood by the affected facilities and no further clarification in the regulations is necessary.

c. The MOU provides for the joint survey (inspection) by HCFA and FDA of transfusion services or clinical laboratories to certify and document any alleged significant deficiency or deficiencies which would, if confirmed to be present, adversely affect the safety or efficacy of products, or the health and safety of a donor or patient. The initial determination of the possible significance of an alleged deficiency is the responsibility of HCFA; however, in cases where the possible significance is unclear, the district FDA office may be contacted by the HCFA representative for consultation and, if necessary, a joint inspection initiated. In view of the continuing high compliance rate of the subject facilities, few actions of this kind are anticipated. FDA finds this arrangement adequate for the proper enforcement of the act for the protection of the public health.

d. The MOU provides that exempt facilities continue to report to FDA fatal transfusion reactions, as required by § 606.170(b) (21 CFR 606.170(b)). The reports received by FDA from transfusion services or those involving fatalities resulting from errors and accidents in areas of a hospital unrelated to the collection or processing of blood or blood components are transmitted to HCFA for followup action. Because the procedures for notifying HCFA officials are adequately documented in the MOU no corresponding revision of § 607.65 (f) and (g) is necessary.

Accordingly, for the reasons stated in a. through d. above, the comment is rejected.

2. One comment, by a representative of HCFA, concerned the reference in § 607.65 (f) and (g) to "Medicare/Medicaid reimbursement." The comment noted that approval of laboratories for participation in the Medicaid program is the function of the local State agency administering the State's Medicaid program, and not HCFA. Consistently, the MOU made no mention of clinical laboratories approved solely for participation in the Medicaid program and the sole responsibility for routine compliance activities for such facilities has not been transferred to HCFA.

FDA agrees with the comment. The MOU did not relieve those facilities participating solely in the Medicaid program from FDA inspection nor was it intended in the proposed rules that these facilities be exempted from FDA registration. During the 1980 registration period (commencing November 1979), the potential status of all registering blood establishments was determined. Only those establishments participating, or those parts of a facility participating, in the Medicare program and otherwise qualified for exemption under the proposed rules were notified by letter that with the publication of this final rule they would be exempt from FDA registration and inspection. The remaining facilities, including those clinical laboratories participating solely in Medicaid, were notified that they must continue to register and be inspected by FDA. Therefore, the clinical laboratories participating in Medicaid but not Medicare are aware that, consistent with the terms of the MOU, they must continue to register with and be inspected by FDA. Accordingly, § 607.65 (f) and (g) are amended in the final rule by changing the term "Medicare/Medicaid/reimbursement" to read "Medicare reimbursement."

3. One comment by a HCFA representative on proposed § 607.65(f), noted that transfusion services per se are not approved by HCFA for Medicare reimbursement; rather, a hospital or independent laboratory, of which transfusion services may be a part, may be approved by HCFA for Medicare.

FDA agrees with the comment and for clarity § 607.65(f) is amended in the final rule to read "Transfusion services which are part of a facility approved for Medicare reimbursement and \* \* \*."

4. The majority of the comments received requested that § 607.65(f) be amended also to exempt from registration those transfusion services approved for Medicare reimbursement

that routinely process red blood cells from units of whole blood. The comments noted that this "packing" of red blood cells is an uncomplicated process involving minimal danger to the eventual recipient of the blood component. Furthermore, the process is essentially the same as that used for recovering plasma from whole blood, a procedure which, under the proposed rules, may be performed by exempt facilities. The comments argued that in view of the high compliance rate of the facilities and HCFA's extensive experience in the regulation of the facilities, the dual inspection of transfusion services routinely packing red blood cells is a regulatory burden which is unnecessary for the protection of the public health.

FDA advises that the exemption from registration of transfusion services packing red blood cells is beyond the scope of this final rulemaking. In the MOU a "transfusion service" was defined, in part, as a facility which " \* \* \* is not engaged in the routine collection or processing of blood or plasma (except recovered plasma) \* \* \*." As a result, facilities routinely processing red blood cells from whole blood are by definition not included in the transfer to HCFA of routine inspectional responsibilities. However, FDA believes the comment has merit and will explore the possibility of amending the MOU to provide for the transfer of these responsibilities to HCFA. Upon amendment of the MOU, FDA intends to publish a proposed rule for comment by all interested persons to exempt the additional transfusion services from FDA registration. Accordingly, the comment is rejected at this time.

5. A number of comments were received from persons who, in some manner, either routinely collect or routinely process blood or blood components requesting that they be exempt from FDA registration and inspection.

Exemption of additional classes of persons is beyond the scope of this document. Before exemption of these persons could be contemplated, the individual merits of each request must be considered by FDA to determine if alternatives to FDA registration and inspection are possible which will continue to ensure the adequate protection of the public health. In any event, further agreements for the transfer of inspectional responsibilities would be necessary before an exemption from FDA registration for any additional classes of persons could be

considered. Accordingly, the comments are rejected at this time.

As noted in the proposal, FDA has reviewed the Forms FDA-2830, "Blood Establishment Registration and Product Listing" and related inspection records for the facilities registering for 1980. Those facilities notified by FDA as qualifying for exemption are exempt from FDA registration and inspection with the publication of this final rule. Approximately 3,500 facilities become exempt from registration by this final rule. FDA will continue to review the Forms FDA-2830 submitted each year and will identify those additional facilities qualified for exemption. Facilities should notify the Bureau of Biologics, FDA, at the address given above when a change in the registration status of the facility occurs, such as the commencement of the routine collection or processing of blood or blood components, so that the correct registration status may be determined.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201, 510, 710, 52 Stat. 1040-1042 as amended 1055-1056 as amended, 76 Stat. 794-795 as amended (21 U.S.C. 321, 360, 371)) and the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 607 is amended in § 607.65 by adding new paragraphs (f) and (g) to read as follows:

**§ 607.65 Exemptions for blood product establishments.**

\* \* \* \* \*

(f) Transfusion services which are a part of a facility approved for Medicare reimbursement and engaged in the compatibility testing and transfusion of blood and blood components, but which neither routinely collect nor process blood and blood components. The collection and processing of blood and blood components in an emergency situation as determined by a responsible person and documented in writing, therapeutic collection of blood or plasma, and the preparation of recovered human plasma for further manufacturing use are not acts requiring such transfusion services to register.

(g) Clinical laboratories that are approved for Medicare reimbursement and are engaged in the testing of blood products in support of other registered blood establishments.

*Effective date.* This regulation becomes effective on December 30, 1980. This regulation both grants an exemption and relieves an unnecessary regulatory burden from the affected establishments. Accordingly, under § 10.40(c)(4)(i) (21 CFR 10.40(c)(4)(i)), the

agency finds that a delayed effective date is unnecessary.

(Secs. 201, 510, 710, 52 Stat. 1040-1042 as amended, 1055-1056 as amended, 76 Stat. 794-795 as amended (21 U.S.C. 321, 360, 371) and sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262).)

Dated: December 18, 1980.

Jere E. Goyan,

Commissioner of Food and Drugs.

BILLING CODE 4110-03-M

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

#### 26 CFR Part 1

[T.D. 7744]

#### Income Tax; Taxation of Political Organizations

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Final regulations.

**SUMMARY:** This document provides final regulations relating to the taxation of political organizations. Changes to the applicable tax law were made by the Act of January 3, 1975. These regulations provide necessary guidance to political organizations for compliance with the law, and affect all political organizations that are entitled to receive special tax treatment.

**DATE:** Generally, except where otherwise provided, the regulations are effective for taxable years beginning after December 31, 1974.

**FOR FURTHER INFORMATION CONTACT:** Jason R. Felton of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224. Attention: CC:LR:T, 202-566-3289, not a toll-free call.

#### SUPPLEMENTARY INFORMATION:

##### Background

On November 24, 1976, the *Federal Register* published proposed amendments to the Income Tax Regulations (26 CFR Part I) under section 527 of the Internal Revenue Code of 1954, 41 FR 51840. The amendments were proposed to conform the regulations to section 10 (a) of the Act of January 3, 1975 (88 Stat. 2116). A public hearing was held on February 24, 1977. After consideration of all comments regarding the proposed amendments, those amendments are adopted as revised by this Treasury decision.

#### General Provisions

Section 527 provides special tax treatment for political organizations which are organized and operated primarily for an exempt function, such as supporting candidates for public office. Generally, organizations that qualify as political organizations as defined in section 527 are treated as exempt organizations. Thus, income such as contributions and dues is not taxed if segregated for use only for an exempt function. However, generally, the investment income of a political organization, such as interest income, is subject to tax.

#### 1978 Statutory Changes

In 1978, Congress amended the definition of exempt function income to include proceeds from the conducting of any bingo game (as defined in section 512 (f)(2)). Act of October 21, 1978 (92 Stat. 1702). This amendment will be the subject of a notice of proposed rulemaking and thus is not reflected in these final regulations.

#### Operational Test

Generally, a political organization must be operated primarily to receive contributions or make expenditures for an exempt function. Under the proposed regulations, if more than an insubstantial amount of exempt function income was spent for nonexempt function purposes, the political organization could lose its exempt status. In response to a number of comments this position has been modified. Such expenditures will, generally, cause the political organization to lose its exempt status only if such organization is primarily engaged in nonexempt function activities. However, amounts of exempt function income expended for nonexempt function activities might result in the taxation of amounts remaining in the political organization's segregated fund. See § 1.527-2(b).

#### Exempt Function

Generally, the term "exempt function" means the function of receiving contributions or making expenditures for the purpose of influencing or attempting to influence the selection, nomination, election, or appointment of individuals for Federal, State, or local public office. The definition of exempt function has been clarified, and a number of examples have been added to illustrate the general principles. See § 1.527-2(c).

#### Certain Expenditures by Organizations Described in Section 501(c)

Generally, section 527(f) provides that an organization described in section 501(c) is subject to tax if it makes expenditures for an exempt function as defined in section 527(e)(1). Several commentators suggested that certain expenditures made by an organization described in section 501(c) should be treated differently from identical expenditures made by a political organization. These commentators state that activities that are not considered to be political activities under Federal or State election laws should not be treated as exempt function activities under section 527. In particular they argue that under the Federal Election Campaign Act (FECA) labor unions and trade associations, among others, may engage in certain activities that under the proposed regulations could result in taxation of expenditures for such activities. These activities are (1) communications with members about candidates for public office, (2) paying the costs of establishing a fund and soliciting contributions to such fund, and (3) engaging in certain nonpartisan activities during a political campaign such as voter registration drives. They therefore argue that those expenditures should not be considered an expenditure for an exempt function.

Paragraph (b) (2) and (3) of § 1.527-6 is reserved pending resolution of the relationship between section 527 and FECA and similar State statutes. When adopted as a Treasury decision, paragraph (b) (2) and (3) will apply on a prospective basis if the commentators' position is rejected and taxpayers are thereby adversely affected. The final regulations also adopt the position that under certain circumstances commenting on potential appointees for public office will not be considered an exempt function activity.

#### Deductible Expenditures

In response to several comments, the final regulations adopt the position that where an expenditure relates to an exempt function activity and to an activity to produce political organization taxable income, the expenditure is allocated between the two uses on a reasonable and consistent basis. See § 1.527-4(c).

#### Other Changes

The final regulations delete the substantially related test with respect to fund raising and entertainment events, and sale of campaign materials. However, in any such case, the event or sale must still relate to a political

activity of the organization aside from the need for funds or income in order for the proceeds to qualify as exempt function income. See § 1.527-3 (d) and (e).

#### Drafting Information

The principal author of this regulation is Jason R. Felton of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

#### Adoption of amendments to the regulations.

Accordingly, 26 CFR Part 1 is amended by adding §§ 1.527-1 through 1.527-8 as follows:

\* \* \* \* \*

Sec.

- 1.527-1 Political organizations; Generally.
- 1.527-2 Definitions.
- 1.527-3 Exempt function income.
- 1.527-4 Special rules for computation of political organization taxable income.
- 1.527-5 Activities resulting in gross income to an individual or political organization.
- 1.527-6 Inclusion of certain amounts in the gross income of an exempt organization which is not a political organization.
- 1.527-7 Newsletter fund.
- 1.527-8 Effective date; filing requirements; and miscellaneous provisions.

**Authority:** Sec. 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; (26 U.S.C. 7805)).

#### § 1.527-1 Political organizations; Generally.

Section 527 provides that a political organization is considered an organization exempt from income taxes for the purpose of any law which refers to organizations exempt from income taxes. A political organization is subject to tax only to the extent provided in section 527. In general, a political organization is an organization that is organized and operated primarily for an exempt function as defined in § 1.527-2(c). Section 527 provides that a political organization is taxed on its political organization taxable income (see § 1.527-4) which, in general, does not include the exempt function income (see § 1.527-3) of the political organization. Furthermore, section 527 provides that an exempt organization, other than a political organization, may be subject to tax under section 527 when it expends an amount for an exempt function, see § 1.527-6. Finally, the taxation of newsletter funds is provided under section 527, see § 1.527-7.

#### § 1.527-2 Definitions.

For purposes of section 527 and these regulations—

(a) *Political organization*—(1) *In general.* A "political organization" is a party, committee, association, fund, or other organization (whether or not incorporated) organized and operated primarily for the purpose of directly or indirectly accepting contributions or making expenditures for an exempt function activity (as defined in paragraph (c) of this section). Accordingly, a political organization may include a committee or other group which accepts contributions or makes expenditures for the purpose of promoting the nomination of an individual for an elective public office in a primary election, or in a meeting or caucus of a political party. A segregated fund (as defined in paragraph (b) of this section) established and maintained by an individual may qualify as a political organization.

(2) *Organizational test.* A political organization meets the organizational test if its articles of organization provide that the primary purpose of the organization is to carry on one or more exempt functions. A political organization is not required to be formally chartered or established as a corporation, trust, or association. If an organization has no formal articles of organization, consideration is given to statements of the members of the organization at the time the organization is formed that they intend to operate the organization primarily to carry on one or more exempt functions.

(3) *Operational test.* A political organization does not have to engage exclusively in activities that are an exempt function. For example, a political organization may—

(i) Sponsor nonpartisan educational workshops which are not intended to influence or attempt to influence the selection, nomination, election, or appointment of any individual for public office,

(ii) Pay an incumbent's office expenses, or

(iii) Carry on social activities which are unrelated to its exempt function, provided these are not the organization's primary activities. However, expenditures for purposes described in the preceding sentence are not for an exempt function. See § 1.527-2 (c) and (d). Furthermore, it is not necessary that a political organization operate in accordance with normal corporate formalities as ordinarily established in bylaws or under state law.

#### (b) Segregated fund—(1) General rule.

A "segregated fund" is a fund which is established and maintained by a political organization or an individual separate from the assets of the organization or the personal assets of the individual. The purpose of such a fund must be to receive and segregate exempt function income (and earnings on such income) for use only for an exempt function or for an activity necessary to fulfill an exempt function. Accordingly, the amounts in the fund must be dedicated for use only for an exempt function. Thus, expenditures for the establishment or administration of a political organization or the solicitation of political contributions may be made from the segregated fund, if necessary to fulfill an exempt function. The fund must be clearly identified and established for the purposes intended. A savings or checking account into which only contributions to the political organization are placed and from which only expenditures for exempt functions are made may be a segregated fund. If an organization that had designated a fund to be a segregated fund for purposes of segregating amounts referred to in section 527(c)(3) (A) through (D), expends more than an insubstantial amount from the segregated fund for activities that are not for an exempt function during a taxable year, the fund will not be treated as a segregated fund for such year. In such a case amounts referred to in section 527(c)(3)(A)-(D), segregated in such fund will not be exempt function income. Further, if more than insubstantial amounts segregated for an exempt function in prior years are expended for other than an exempt function the facts and circumstances may indicate that the fund was never a segregated fund as defined in this paragraph.

(2) *Record keeping.* The organization or individual maintaining a segregated fund must keep records that are adequate to verify receipts and disbursements of the fund and identify the exempt function activity for which each expenditure is made.

(c) *Exempt function*—(1) *Directly related expenses.* An "exempt function", as defined in section 527(e)(2), includes all activities that are directly related to and support the process of influencing or attempting to influence the selection, nomination, election, or appointment of any individual to public office or office in a political organization (the selection process). Whether an expenditure is for an exempt function depends upon all the facts and circumstances. Generally, where an organization supports an

individual's campaign for public office, the organization's activities and expenditures in furtherance of the individual's election or appointment to that office are for an exempt function of the organization. The individual does not have to be an announced candidate for the office. Furthermore, the fact that an individual never becomes a candidate is not crucial in determining whether an organization is engaging in an exempt function. An activity engaged in between elections which is directly related to, and supports, the process of selection, nomination, or election of an individual in the next applicable political campaign is an exempt function activity.

(2) *Indirect expenses.* Expenditures that are not directly related to influencing or attempting to influence the selection process may also be an expenditure for an exempt function by a political organization. These are expenses which are necessary to support the directly related activities of the political organization. Activities which support the directly related activities are those which must be engaged in to allow the political organization to carry out the activity of influencing or attempting to influence the selection process. For example, expenses for overhead and record keeping are necessary to allow the political organization to be established and to engage in political activities. Similarly, expenses incurred in soliciting contributions to the political organization are necessary to support the activities of the political organization.

(3) *Terminating activities.* An exempt function includes an activity which is in furtherance of the process of terminating a political organization's existence. For example, where a political organization is established for a single campaign, payment of campaign debts after the conclusion of the campaign is an exempt function activity.

(4) *Illegal expenditures.* Expenditures which are illegal or are for a judicially determined illegal activity are not considered expenditures in furtherance of an exempt function, even though such expenditures are made in connection with the selection process.

(5) *Examples.* The following examples illustrate the principles of paragraph (c) of this section. The term "exempt function" when used in the following examples means exempt function within the meaning of section 527(e)(2).

(i) *Example (1).* A wants to run for election to public office in State X. A is not a candidate. A travels throughout X in order to rally support for A's intended candidacy. While in X, A attends a convention of an

organization for the purpose of attempting to solicit its support. The amount expended for travel, lodging, food, and similar expenses are for an exempt function.

(ii) *Example (2).* B, a member of the United States House of Representatives, is a candidate for reelection. B travels with B's spouse to the district B represents. B feels it is important for B's reelection that B's spouse accompany B. While in the district, B makes speeches and appearances for the purpose of persuading voters to reelect B. The travel expenses of B and B's spouse are for an exempt function.

(iii) *Example (3).* C is a candidate for public office. In connection with C's campaign, C takes voice and speech lessons to improve C's skills. The expenses for these lessons are for an exempt function.

(iv) *Example (4).* D, an officeholder and candidate for reelection, purchases tickets to a testimonial dinner. D's attendance at the dinner is intended to aid D's reelection. Such expenditures are for an exempt function.

(v) *Example (5).* E, an officeholder, expends amounts for periodicals of general circulation in order to keep informed on national and local issues. Such expenditures are not for an exempt function.

(vi) *Example (6).* N is an organization described in section 501(c) and is exempt from taxation under section 501(a). F is employed as president of N. F, as a representative of N, testifies in response to a written request from a Congressional committee in support of the confirmation of an individual to a cabinet position. The expenditures by N that are directly related to F's testimony are not for an exempt function.

(vii) *Example (7).* P is a political organization described in section 527(e)(2). Between elections P does not support any particular individual for public office. However, P does train staff members for the next election, drafts party rules, implements party reform proposals, and sponsors a party convention. The expenditures for these activities are for an exempt function.

(viii) *Example (8).* Q is a political organization described in section 527(e)(2). Q finances seminars and conferences which are intended to influence persons who attend to support individuals to public office whose political philosophy is in harmony with the political philosophy of Q. The expenditures for these activities are for an exempt function.

(d) *Public office.* The facts and circumstances of each case will determine whether a particular Federal, State, or local office is a "public office." Principles consistent with those found under § 53.4946-1(g)(2) (relating to the definition of public office) will be applied.

#### § 1.527-3 Exempt function income.

(a) *General rule.*—(1) For purposes of section 527, exempt function income consists solely of amounts received as—

(i) Contributions of money or other property,

(ii) Membership dues, fees, or assessments from a member of a political organization, or

(iii) Proceeds from a political fund raising or entertainment event, or proceeds from the sale of political campaign materials, which are not received in the ordinary course of any trade or business,

but only to the extent such income is segregated for use only for exempt functions of the political organization.

(2) Income will be considered segregated for use only for an exempt function only if it is received into and disbursed from a segregated fund as defined in § 1.527-2(b).

(b) *Contributions.* The rules of section 271(b)(2) apply in determining whether the transfer of money or other property constitutes a contribution. Generally, money or other property, whether solicited personally, by mail, or through advertising, qualifies as a contribution. In addition, to the extent a political organization receives Federal, State, or local funds under the \$1 "checkoff" provision (sections 9001-9013), or any other provision for financing of campaigns, such amounts are to be treated as contributions.

(c) *Dues, fees, and assessments.* Amounts received as membership fees and assessments from members of a political organization may constitute exempt function income to the political organization. Membership fees and assessments received in consideration for services, goods, or other items of value do not constitute exempt function income. However, filing fees paid by an individual directly or indirectly to a political party in order that the individual may run as a candidate in a primary election of the party (or run in a general election as a candidate of that party) are to be treated as exempt function income. For example, some States provide that a certain percentage of the first year's salary of the office sought must be paid to the State as a filing (or "qualifying") fee and party assessment. The State then transfers part of this fee to the candidate's party. In such a case, the entire amount transferred to the party is to be treated as exempt function income.

Furthermore, amounts paid by an individual directly to the party as a qualification fee are treated similarly.

(d) *Fund raising events.*—(1) *In general.* Amounts received from fund raising and entertainment events are eligible for treatment as exempt function income if the events are political in nature and are not carried on in the ordinary course of a trade or business. Whether an event is "political" in nature depends on all facts and circumstances. One factor that indicates an event is a political event is the extent to which the

event is related to a political activity aside from the need of the organization for income or funds. For example, an event that is intended to rally and encourage support for an individual for public office would be a political fund raising event. Examples of political events can include dinners, breakfasts, receptions, picnics, dances, and athletic exhibitions.

(2) *Ordinary course of any trade or business.* Whether an activity is in the ordinary course of a trade or business depends on the facts and circumstances of each case. Generally, proceeds from casual, sporadic fund raising or entertainment events are not in the ordinary course of a trade or business. Factors to be taken into account in determining whether an activity is a trade or business include the frequency of the activity, the manner in which the activity is conducted, and the span of time over which the activity is carried on.

(e) *Sale of campaign materials.* Amounts received from the sale of campaign materials are eligible for treatment as exempt function income if the sale is not carried on in the ordinary course of a trade or business (as defined in paragraph (d)(2) of this section), and is related to a political activity of the organization aside from the need of such organization for income or funds. Proceeds from the sale of political memorabilia, bumper stickers, campaign buttons, hats, shirts, political posters, stationery, jewelry, or cookbooks are related to such a political activity where such items can be identified as relating to distributing political literature or organizing voters to vote for a candidate for public office.

**§ 1.527-4 Special rules for computation of political organization taxable income.**

(a) *In general.* Political organization taxable income is determined according to the provisions of section 527(b) and the rules set forth in this section.

(b) *Limitation on capital losses.* If for any taxable year a political organization has a net capital loss, the rules of sections 1211(a) and 1212(a) apply.

(c) *Allowable deductions—(1) In general.* To be deductible in computing political organization taxable income, expenses, depreciation, and similar items must not only qualify as deductions allowed by chapter 1 of the Code, but must also be directly connected with the production of political organization taxable income.

(2) *"Directly connected with" defined.* To be "directly connected with" the production of political organization taxable income, an item of deduction must have a proximate and primary

relationship to the production of such income and have been incurred in the production of such income. Items of deduction attributable solely to items of political organization taxable income are proximately and primarily related to such income. Whether an item of deduction is incurred in the production of political organization taxable income is determined on the basis of all the facts and circumstances of each case.

(3) *Dual use of facilities or personnel.* Expenses, depreciation, and similar items that are attributable to the production of exempt function income and political organization taxable income shall be allocated between the two on a reasonable and consistent basis. For example, where facilities are used both for an exempt function of the organization and for the production of political organization taxable income, expenses, depreciation, and similar items attributable to such facilities (for example, items of overhead) shall be allocated between the two uses of a reasonable and consistent basis. Similarly, where personnel are employed both for an exempt function and for the production of political organization taxable income, expenses and similar items attributable to such personnel (for example, items of salary) shall be allocated between the activities on a reasonable and consistent basis. The portion of any such item so allocated to the production of political organization taxable income is directly connected with such income and is allowable as a deduction in computing political organization taxable income to the extent that it qualifies as an item of deduction allowed by chapter 1 of the Code. Thus, for example, assume that X, a political organization, pays its manager a salary of \$10,000 a year and that it derives political organization taxable income. If 10 percent of the manager's time during the year is devoted to deriving X's gross income (other than exempt function income), a deduction of \$1,000 (10 percent of \$10,000) would generally be allowable for purposes of computing X's political organization taxable income.

**§ 1.527.5 Activities resulting in gross income to an individual or political organization.**

(a) *In general—(1) General rule.* Amounts expended by a political organization for an exempt function are not income to the individual or individuals on whose behalf such expenditures are made. However, where a political organization expends any other amount for the personal use of any individual, the individual on whose behalf the amount is expended will be in

receipt of income. Amounts are expended for the personal use of an individual where a direct or indirect financial benefit accrues to such individual. For example, if a political organization pays a personal legal obligation of a candidate for public office, such as the candidate's federal income tax liability, the amount paid is includible in such candidate's gross income. Similarly, if a political organization expends any amount of its exempt function income for other than an exempt function, and the expenditure results in a direct or indirect financial benefit to the political organization, it must include the amount of such expenditure in its gross income. For example, if a political organization expends exempt function income for making an improvement or addition to its facilities, or for equipment, which is not necessary for or used in carrying out an exempt function, the amount of the expenditure will be included in the political organization's gross income. However, if a political organization expends exempt function income to make ordinary and necessary repairs on the facilities the political organization uses in conducting its exempt function, such amounts will not be included in the political organization's gross income.

(2) *Expenditure for an illegal activity.* Expenditures by a political organization that are illegal or for an activity that is judicially determined to be illegal are treated as amounts not segregated for use only for the exempt function and shall be included in the political organization's taxable income. However, expenses incurred in defense of civil or criminal suits against the organization are not treated as taxable to the organization. Similarly, voluntary reimbursement to the participants in the illegal activity for similar expenses incurred by them are not taxable to the organization if the organization can demonstrate that such payments do not constitute a part of the inducement to engage in the illegal activity or part of the agreed upon compensation therefor. However, if the organization entered into an agreement with the participants to defray such expenses as part of the inducement, such payments would be treated as an expenditure for an illegal activity. Except where necessary to prevent the period of limitation for assessment and collection of a tax from expiring, a notice of deficiency will not generally be issued until after there has been a final determination of illegality by an appropriate court in a criminal proceeding.

(b) *Certain uses not treated as income to a candidate.* Except as otherwise

provided in paragraph (a) of this section, if a political organization—

(1) Contributes any amount to or for the use of any political organization described in section 527(e)(1) or newsletter fund described in section 527(g),

(2) Contributes any amount to or for the use of any organization described in paragraph (1) and (2) of section 509(a) which is exempt from taxation under section 501(a), or

(3) Deposits any amount in the general fund of the U.S. Treasury or in the general fund of any State or local government,

such amount shall not be treated as an amount expended for the personal use of a candidate or other person. No deduction shall be allowed under the Internal Revenue Code of 1954 for the contribution or deposit described in the preceding sentence.

(c) *Excess funds*—(1) *General rule.* Generally, funds controlled by a political organization or other person after a campaign or election are excess funds and are treated as expended for the personal use of the person having control over the ultimate use of such funds. However, such funds will not be treated as excess funds to the extent they are—

(i) Transferred within a reasonable period of time by the person controlling the funds in accordance with paragraph (b) of this section, or

(ii) Held in reasonable anticipation of being used by the political organization for future exempt functions.

(2) *Excess funds transferred at death.* Where excess funds are held by an individual who dies, and these funds go to the individual's estate or any other person (other than an organization or fund described in paragraph (b) of this section), the funds are income of the decedent and will be included in the decedent's gross estate unless the estate or other person receiving such funds transfers the funds within a reasonable period of time in accordance with paragraph (b) of this section.

This paragraph (c)(2) will not apply where the individual who dies provides that the funds be transferred to an organization or fund described in paragraph (b) of this section.

**§1.527-6 Inclusion of certain amounts in the gross income of an exempt organization which is not a political organization.**

(a) *Exempt organizations—General*

*rule.* If an organization described in section 501(c) which is exempt from tax under section 501(a) expends any amount for an exempt function, it may be subject to tax. There is included in the gross income of such organization for the taxable year an amount equal to the lesser of—

(1) The net investment income of such organization for the taxable year, or

(2) The aggregate amount expended during the taxable year for an exempt function.

The amount included will be treated as political organization taxable income.

(b) *Exempt function expenditures*—(1) *Directly related expenses.* (i) Except as provided in this section, the term "exempt function" will generally have the same meaning it has in § 1.527-2(c). Thus, expenditures which are directly related to the selection process as defined in § 1.527-2(c)(1) are expenditures for an exempt function. Expenditures for indirect expenses as defined in § 1.527-2(c)(2), when made by a section 501(c) organization are for an exempt function only to the extent provided in paragraph (b)(2) of this section. Expenditures of a section 501 (c) organization which are otherwise allowable under the Federal Election Campaign Act or similar State statute are for an exempt function only to the extent provided in paragraph (b)(3) of this section.

(ii) An expenditure may be made for an exempt function directly or through another organization. A section 501(c) organization will not be absolutely liable under section 527(f)(1) for amounts transferred to an individual or organization. A section 501(c) organization is, however, required to take reasonable steps to ensure that the transferee does not use such amounts for an exempt function.

(2) *Indirect expenses.* [Reserved].

(3) *Expenditures allowed by Federal Election Campaign Act.* [Reserved].

(4) *Appointments or confirmations.*

Where an organization described in paragraph (a) of this section appears before any legislative body in response to a written request by such body for the purpose of influencing the appointment or confirmation of an individual to a public office, any expenditure directly related to such appearance is not treated as an expenditure for an exempt function.

(5) *Nonpartisan activity.* Expenditures for nonpartisan activities by an organization to which paragraph (a) of this section applies are not expenditures for an exempt function. Nonpartisan activities include voter registration and "get-out-the-vote" campaigns. To be nonpartisan voter registration and "get-out-the-vote" campaigns must not be specifically identified by the organization with any candidate or political party.

(c) *Character of items included in gross income*—(1) *General rule.* The items of income included in the gross income of an organization under paragraph (a) of this section retain their character as ordinary income or capital gain.

(2) *Special rule in determining character of item.* If the amount included in gross income is determined under paragraph (a)(2)(ii) of this section, the character of the items of income is determined by multiplying the total amount included in gross income under such paragraph by a fraction, the numerator of which is the portion of the organization's net investment income that is gain from the sale or exchange of a capital asset, and the denominator of which is the organization's net investment income. For example, if \$5,000 is included in the gross income of an organization under paragraph (a)(2) of this section, and the organization had \$100,000 of net investment income of which \$10,000 is long term capital gain, then \$500 would be treated as long term capital gain:

<u>Capital gain</u> net investment income	X	Amount expended on an exempt function	=	Portion of income subject to tax under section 1201
\$ 10,000	X	\$5,000	=	\$500
<u>\$100,000</u>				

(d) *Modifications.* The modifications described in section 527(c)(2) apply in computing the tax under paragraph (a)(2) of this section. Thus, no net operating loss is allowed under section 172 nor is any deduction allowed under part VIII of subchapter B. However, there is allowed a specific deduction of \$100.

(e) *Transfer not treated as exempt function expenditures.* Provided the provisions of this paragraph (e) are met, a transfer of political contributions or dues collected by a section 501(c) organization to a separate segregated fund as defined in paragraph (f) of this section is not treated as an expenditure for an exempt function (within the meaning of § 1.527-2(c)). Such transfers must be made promptly after the receipt of such amounts by the section 501(c) organization, and must be made directly to the separate segregated fund. A transfer is considered promptly and directly made if:

(1) The procedures followed by the section 501(c) organization satisfy the requirements of applicable Federal or State campaign law and regulations;

(2) The section 501(c) organization maintains adequate records to demonstrate that amounts transferred in fact consist of political contributions or dues, rather than investment income; and

(3) The political contributions or dues transferred were not used to earn investment income for the section 501(c) organization.

(f) *Separate segregated fund.* An organization or fund described in section 527(f)(3) is a separate segregated fund. To avoid the application of paragraph (a) of this section, an organization described in section 501(c) that is exempt from taxation under section 501(a) may, if it is consistent with its exempt status, establish and maintain such a separate segregated fund to receive contributions and make expenditures in a political campaign. If such a fund meets the requirements of § 1.527-2(a) (relating to the definition of a political organization), it shall be treated as a political organization subject to the provisions of section 527. A segregated fund established under the Federal Election Campaign Act will continue to be treated as a segregated fund when it engages in exempt function activities as defined in § 1.527-2(c), relating to State campaigns.

(g) *Effect of expenditures on exempt status.* Section 527(f) and this section do not sanction the intervention in any political campaign by an organization described in section 501(c) if such activity is inconsistent with its exempt status under section 501(c). For example,

an organization described in section 501(c)(3) is precluded from engaging in any political campaign activities. The fact that section 527 imposes a tax on the exempt function (as defined in § 1.527-2(c)) expenditures of section 501(c) organizations and permits such organizations to establish separate segregated funds to engage in campaign activities does not sanction the participation in these activities by section 501(c)(3) organizations.

#### § 1.527-7 Newsletter funds.

(a) *In general.* For purposes of this section, a fund established and maintained by an individual who holds, has been elected to, or is a candidate (within the meaning of section 41(c)(2)) for nomination or election to, any Federal, State, or local elective public office for the use by such individual exclusively for an exempt function, as defined in paragraph (c) of this section, shall be a newsletter fund. If assets of a newsletter fund are used for any purpose other than the exempt function of the newsletter fund as defined in paragraph (c) of this section, such amount shall be treated as expended for the personal use of the individual who established and maintained such fund. In addition, future contributions to such fund are treated as income to the individual who established and maintained the fund. In such a case, the facts and circumstances may indicate that the fund was never established and maintained exclusively for an exempt function as defined in paragraph (c) of this section.

(b) *Determination of taxable income.* A newsletter fund shall be treated as if it were a political organization for purposes of determining its taxable income. However, the specific \$100 deduction provided by section 527(c)(2)(A) shall not be allowed.

(c) *Exempt function.* For purposes of this section, the exempt function of a newsletter fund consists solely of the preparation and circulation of the newsletter. Among the expenditures treated as preparation and circulation expenditures of the newsletter are—

- (1) Secretarial services,
- (2) Printing,
- (3) Addressing, and
- (4) Mailing.

(d) *Nonexempt function purposes.* Newsletter fund assets may not be used for campaign activities. Therefore, an exempt function of a newsletter fund does not include—

- (1) Expenditures for an exempt function as defined in § 1.527-2(c) or
- (2) Transfers of unexpended amounts to a political organization described in section 527(e)(1).

(e) *Excess funds.* Excess funds held by a newsletter fund which has ceased to engage in the preparation and circulation of the newsletter are treated as expended for the personal use of the individual who established and maintained such fund. However, to the extent such excess funds are within a reasonable period of time—

(1) Contributed to or for the use of any organization described in paragraph (1) or (2) of section 509(a) which is exempt from taxation under section 501(a),

(2) Deposited in the general fund of the U.S. Treasury or in the general fund of any State or local government (including the District of Columbia), or

(3) Contributed to any other newsletter fund as described in paragraph (a) of this section,

the excess funds are not treated as expended for the personal use of such individual. In such a case the individual is not allowed a deduction under the Internal Revenue Code of 1954 for such contribution or deposit.

#### § 1.527-8 Effective date; filing requirements; and miscellaneous provisions.

(a) *Assessment and collections.* Since the taxes imposed by section 527 are taxes imposed by subtitle A of the Code, all provisions of law and of the regulations applicable to the taxes imposed by subtitle A are applicable to the assessment and collection of the taxes imposed by section 527. Organizations subject to the tax imposed by section 527 are subject to the same provisions, including penalties, as are provided for corporations, in general, except that the requirements of section 6154 concerning the payment of estimated tax do not apply. See, generally, sections 6151, et. seq., and the regulations prescribed thereunder, for provisions relating to payment of tax.

(b) *Returns.* For requirements of filing annual returns with respect to political organization taxable income, see section 6012 (a) (6) and the applicable regulations.

(c) *Taxable years, method of accounting, etc.* The taxable year (fiscal year or calendar year, as the case may be) of a political organization is determined without regard to the fact that such organization may have been exempt from tax during any prior period. See sections 441 and 446, and the regulations thereunder in this part, and section 7701 and the regulations in Part 301 of this chapter (Regulations on Procedure and Administration). Similarly, in computing political organization taxable income, the determination of the taxable year for which an item of income or expense is

taken into account is made under the provisions of sections 441, 446, 451, 461, and the regulations thereunder, whether or not the item arose during a taxable year beginning before, on, or after the effective date of the provisions imposing a tax upon political organization taxable income. If a method for treating bad debts was selected in a return of income (other than an information return) for a previous taxable year, the taxpayer must follow such method in its returns under section 527, unless such method is changed in accordance with the provisions of § 1.166-1. A taxpayer who has not previously selected a method for treating bad debts may, in its first return under section 6012 (a) (6), exercise the option granted in § 1.166-1.

(d) *Effective date.* Except as provided in paragraph (b) (2) of § 1.527-6, the regulations under section 527 apply to taxable years beginning after December 31, 1974.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954.

(68A Stat. 917; 26 U.S.C. 7805).

William E. Williams,

Acting Commissioner of Internal Revenue.

Approved: December 15, 1980.

Donald C. Lubick,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

## DEPARTMENT OF LABOR

### Occupational Safety and Health Administration

#### 29 CFR Part 1910

#### Occupational Exposure to Cotton Dust

**AGENCY:** Occupational Safety and Health Administration (OSHA), Labor.

**ACTION:** Notice of respirator-use enforcement policy concerning the period of use of respirators as required by the cotton dust standard.

**SUMMARY:** This notice enunciates a respirator use enforcement policy for the provisions of the OSHA cotton dust standard, 29 CFR 1910.1043 with respect to the period of use of respirators. The administrative stay of paragraphs 1910.1043(f)(1) (i) and (iii), published at 45 FR 64872 has now expired. Enforcement of these provisions will commence in accordance with this enforcement policy, which requires that respirators are to be worn to the extent necessary to assure that each employee's 8-hour time weighted average exposure is maintained at less than the permissible exposure limit. The

employee's exposure is computed by assuming that while respirators are worn, ambient cotton dust levels are reduced by the assigned class protection factor of the respirator being worn.

**DATES:** Effective January 19, 1981, 29 CFR 1910.1043(f)(1) (i) and (iii) will be enforced in accordance with this policy.

**FOR FURTHER INFORMATION CONTACT:** Dr. Bailus Walker, Occupational Safety and Health Administration, Room N3718, U.S. Department of Labor, Washington, D.C. 20210. Telephone (202) 523-7076, or Mr. Frank Tipton, Occupational Safety and Health Administration, Room N3718, U.S. Department of Labor, Washington, D.C. 20210. Telephone (202) 523-7174.

**SUPPLEMENTARY INFORMATION:** OSHA issued a final occupational safety and health standard for occupational exposure to cotton dust on June 19, 1978 (codified at 29 CFR 1910.1043); published at 43 FR 27350-399, June 23, 1978. The standard applied to textile manufacturing and non-textile industries. Petitions for review of the standard were consolidated in the U.S. Court of Appeals for the District of Columbia Circuit and a stay of the standard pending judicial review was issued on October 20, 1978. Petitions filed by representatives of the cotton waste processing industries and purchasers and users of cotton batting were severed from the main action on November 1, 1978. No decision respecting these industries has been issued as of this time. On October 24, 1979, the D.C. Circuit affirmed the standard in the main action except as applied to cotton seed oil mills. It subsequently denied petitions for rehearing, suggestions for rehearing en banc, and motions to continue the stay (except for cottonseed oil mills), and the standard became effective and enforceable on March 27, 1980. See 45 FR 12416, February 26, 1980. Thereafter, the Department suspended enforcement of the standard in the classing and warehousing industries for further consideration in light of the Supreme Court's ruling in Industrial Union Department, AFL-CIO v. American Petroleum Institute. (Nos. 78-911 and 78-1036). See 45 FR 50328, July 29, 1980. Petitions for certiorari to review the Court of Appeal's decision in the main action were granted by the U.S. Supreme Court.

Under the timetable for implementation of the requirements of the standard, employers were required to complete initial monitoring of covered facilities by September 27, 1980. Accordingly, on that date, the provisions of the standard for respirator usage

would have become effective as to all employers covered by the standard. These respirator provisions (29 CFR 1910.1043(f)) require, among other things, respirator use (i) during the time period necessary to install or implement feasible engineering controls and work practice controls and (ii) in work situations where feasible engineering controls are not yet sufficient to reduce exposure to or below the permissible exposure limit. However, it became apparent that there was widespread misunderstanding throughout the textile industry and among employees about how an effective respirator program should be implemented, which resulted in an unsuccessful implementation of the respirator provisions. Therefore, on September 30, 1980, at 45 FR 64872, OSHA published a notice of an administrative stay of 75 days ending December 15, 1980, of 29 CFR 1910.1043(f)(1) (i) and (iii). That notice included a commitment to develop guidelines for implementing effective respirator programs in the textile industry and in doing so to "meet with representatives of the cotton textile industry, workers and their unions and the National Institute for Occupational Safety and Health." These meetings were held and OSHA received many useful comments.

In addition to the parties mentioned above, these meetings also included state plan representatives, respirator manufacturers and independent organizations. All of the comments and criticisms have been carefully evaluated in developing this enforcement policy.

By this notice, OSHA announces this enforcement policy with respect to the use of respirators under the cotton dust standard, 29 CFR 1910.1043, and sets forth in detail the meaning and application of the enforcement policy. It must be noted that this interpretation is based on the unique circumstances involved in the cotton dust standard and therefore is limited to that standard. This enforcement policy will be incorporated into the compliance directive now being prepared for the cotton dust standard. The policy concerns the period of required use of respirators and allows the partial shift wearing of respirators on the condition that each employee's 8-hour time weighted average exposure is kept below the permissible exposure limit (PEL). In computing the exposure of an employee who is wearing a respirator, the respirator is assumed to reduce the ambient concentration of cotton dust by a factor equal to the assigned class protection factor of the respirator. Respirators need be worn only as long

as necessary to ensure compliance with the PEL. Some adjustment of the nominally required wearing times is made to allow for occasional lapses in protection due to brief respirator removal and to arrange an easily administered program.

Partial shift use is clearly implied in the cotton dust standard in paragraph (k)(1)(ii)(b) which requires a record of the "type of protective devices worn, if any, and length of time worn." Partial shift use of respirators is also incorporated in the lead standard (section 1910.1025).

The partial shift use of respirators as enunciated in this notice does not affect the requirement for using respirators during so-called "blow down" cleaning using compressed air, nor any other respirator provision of the standard not subject to the administrative stay of September 30, 1980. The requirement for respirators contained in paragraph (g)(1) is in addition to the routine use of respirators needed to comply with the PEL's.

In the interest of facilitating implementation of the partial shift use and of fostering understanding of the partial shift policy, industry suggested that OSHA include in its notice a table which would set forth a single set of specific times for donning and removing respirators that would constitute compliance with the standard in the presence of various increments of cotton dust concentration. Although this may appear reasonable, OSHA has concluded that such an approach would unnecessarily limit employers' flexibility and unnecessarily interfere with employers normal routines, both of which are often-mentioned industry concerns. By contrast the tables which have been provided below are a compilation, for the simplest case, of cotton dust levels and respirator use durations that satisfy the enforcement policy states herein.

The enforcement policy being enunciated by this notice clarifies what is the minimum actual respirator requirements of the cotton dust standard. OSHA recognizes that this may be somewhat less than the procedures being used in some existing respirator use schedules. However, OSHA continues to endorse and recommend that all employees on their own initiative wear respirators as much as possible when they are likely to be over exposed to toxic materials, whether cotton dust or other materials.

The concentration dependent time of use concept for respirators in no way makes a respiratory protection program inexpensive and does not by itself assure that a respiratory protection

program is effective. Although OSHA has as a matter of necessity accepted the use of respirators under some circumstances, this does not mean that respirators are as effective, reliable, or safe as primary control of a hazardous contaminant at the source by engineering controls.

#### Partial Use Enforcement Policy

When respirators are required to comply with the permissible exposure limit (PEL) the required time of use of the respirators depends on the levels of cotton dust in the air and the type of respirator that is worn. The respirators must be worn a sufficient amount of time to assure that no employee is subjected to an 8-hour average concentration in excess of the PEL as explained below. While the employee is wearing a respirator the actual exposure that employee sustains may be assumed to be reduced by the assigned class protection factor for the respirator. The overall exposure is then computed using the formula found in appendix A to the standard and in § 1910.1000(d)(1)(i). An employee's 8-hour time weighted average exposure is constructed by multiplying each dust concentration by the time the employee is exposed to it, adding these quantities, and then dividing by eight. Hence, if the employee works in two different concentrations of cotton dust and wears a respirator part of the time in each environment then the employee has four different exposure times and levels. Thus

$$\text{(eqn 1) TWA} = (C_1 T_1 + C_2 T_2 + C_3 T_3 + \dots + C_n T_n) / 8$$

where TWA = 8 hour time weighted average (in micrograms).

C = constant concentration for a time period (in micrograms).

T = time in hours that concentration exists. The sum of all time periods equals 8 hours.

If time period two is the time of wearing a respirator in the environment with concentration  $C_1$ , then  $C_2 = C_1$  divided by the protection factor (PF) of the respirator. If we assume a similar relationship for time periods 3 and 4 and that the same respirator is worn both times, then the formula becomes

$$\text{(eqn 2) TWA} = (C_1 T_1 + (C_1 / \text{PF}) T_2 + C_3 T_3 + (C_3 / \text{PF}) T_4) / 8$$

Again,  $T_1 + T_2 + T_3 + T_4 = 8$

For example, if a half mask respirator is worn in a yarn manufacturing process; the dust level in the first period of 3 hours is 1400 micrograms per cubic meter and the respirator is worn for 2 hours; and the dust level in the second period, of 5 hours, is 1200 micrograms, equation 2 can be used to find the

nominal minimum time of use of the respirator required to comply with the PEL.

$$1000 = [1400(1) + (1400/10)(2) + 1200(T_3) + (1200/10)(T_4)] / 8$$

Combining, and substituting from  $T_3 + T_4 = 5$ ,

$$1000 = [1680 + 1200(5 - T_4) + 120T_4] / 8 - 1080T_4 = 320$$

which indicates clearly that  $T_4$  is a negative value. This indicates that the use of respirators is not required for the second period. In fact equation 2 indicates a TWA of 960 micrograms per cubic meter without respirator use in the second period. The above calculation also demonstrates the advisability of using respirators first in the areas of highest concentration, a practice OSHA strongly endorses.

Alternatively, if an employee works in a single cotton dust concentration all day and wears a respirator part of the time the expression comparable to equation 2 is

$$\text{(eqn 3) TWA} = (C_1 T_1 + (C_1 / \text{PF}) T_2) / 8$$

Since  $T_1 + T_2 = 8$  hours, equation 3 can be rearranged to solve explicitly for the nominal minimum time of use of the respirator required to comply with the PEL, if the value of the PEL is substituted for the TWA, as

$$T = (C - \text{PEL}) / C(1 - 1/\text{PF}) / 8$$

With a half mask respirator used in a slashing and weaving operation, this expression becomes

$$T = (C - 750) / .9C / 8$$

or

$$T = (C - 750) / .112C$$

The employer has the responsibility to ensure that respirators are worn a sufficient amount of time to reduce each employee's actual exposure below the PEL's. Respirator wear for time in excess of that necessary to keep the actual exposure below the PEL is not required by the standard unless an employee requests the extra use (see para (f)(1)(v)).

All contributions to an employee's exposure to cotton dust must be included in the above computation. That is, the cotton dust exposure in any place in an employer's plant must be measured and included. This applies to service areas, break areas, etc. in addition to assigned work stations. If these other areas are not monitored, then the work station dust levels shall be applied. For work shifts longer than eight hours, the maximum allowable average cotton dust concentrations shall be proportionately reduced. For example, for a ten hour shift, an 8-hour

PEL of 500  $\mu\text{g}/\text{m}^3$  becomes 400  $\mu\text{g}/\text{m}^3$  instead.

One can expect that there may be, under most circumstances, brief occasions that employees will remove respirators for such purposes as personal hygiene, drinking, readjusting the respirator, or vital communications. Consequently it is inappropriate to assume constant wear of a respirator when using equation (1). To properly apply this equation, all periods, even short ones, that an employee is not wearing a respiratory must be accounted for because the exposure contribution without a respirator is so much larger than with a respirator. Since doing this accurately for each employee would be quite time consuming and burdensome, OSHA will accept a simpler procedure of lengthening by 10% the nominal wearing periods otherwise indicated by equation (1). It is OSHA's judgement that a 10% adjustment makes adequate allowance for these expected interruptions in periods normally considered to be periods of respirator wear. Such adjustment is more reasonable and feasible than the technically correct method of calculating exposure for each time interval when the respirator is removed. Alternatively and equivalently, when using the 10% adjustment and using equation 1 to calculate the resulting TWA, the assigned time of wear of the respirator shall be reduced by 9% (recall that 9% of 110 equals 10) and that difference interval shall be added to the unprotected exposure time.

The wearing period for respirators has a practical upper bound that is less than a full work shift regardless of cotton dust concentration. Lunch periods and other breaks that can be expected to involve substantial interference with wearing a respirator may not be included in the scheduled wearing periods for respirators.

Reasonable program administration and supervision, as well as OSHA enforcement, requires that a certain degree of uniformity and regularity be applied to the respirator wearing schedules. To this end, and as necessary to prevent an unwieldy complexity of schedules, all required periods of respirator wearing shall be rounded up to the next quarter hour so that all schedules will begin and end on a quarter hour.

The assigned class protection factors to be used in equation 1 are those in table 1 of the standard, namely, 5 for a single use or quarter mask; 10 for a half mask; 100 for a full facepiece; and 1000 for positive pressure devices.

### Rationale

The basis for the standard, which is designed to reduce worker exposure to cotton dust, and the basis for the supporting health risk analysis is the cumulative effects of an average daily dose and not the immediate or acute effects of an instantaneous exposure level. The standard does not contain requirements for a maximum instantaneous ceiling on cotton dust exposure levels. Instead an averaged exposure is relied upon for protection. Hence partial shift wearing of a respirator is consistent with the basis of the standard.

Reference to exposure periods without respirators as uncontrolled may be misleading in the context of employee exposure. These periods may be uncontrolled by engineering means but they should result in known and controlled exposures of employees. As described above, the employer is required to accurately quantify the exposure contribution from all aspects of an employee's work. Therefore a high exposure during one period must be offset by correspondingly lower exposures at other times. In addition, the dust generating processes must be continuous or repetitive, resulting in predictable dust levels, for any exposure calculations to be meaningful.

Because paragraph (d) of the standard requires complete exposure determination, the exposure contribution of any period during a work shift will be known without regard to the use of respirators. Each employer was required to monitor by September 27, 1980 any area, including break areas, etc. that he had any reason to believe contained cotton dust.

No new uncertainties or inaccuracies in exposure determinations or in employee protection are introduced by using respirators on a schedule that is dependent on the cotton dust concentrations. At the same time these schedules do not reduce any of the uncertainties with respect to adequate protection that have always been a part of reliance on respiratory protection to protect employee health.

One policy alternative suggested to OSHA was that employees should be allowed to remove respirators only at assigned break times or in assigned break areas including rest rooms, and that exposure during these periods be ignored. So limiting the removal of respirators could be overly restrictive (depending on cotton dust levels). Such a policy could easily become unreasonable by ignoring the real and legitimate causes for brief removals of a respirator. These periods of exposure

should be not ignored and shall not be ignored.

Direct comparison with the practice of other industries is not possible because unlike in those other industries the workplaces with cotton dust do not have clean areas conveniently accessible to which an employee can go to remove a respirator to clean it or his face, get a drink, etc. Since the cotton dust contaminated areas are not immediately dangerous to life and health (IDLH) and have no sensory warning properties, it is even more likely that these brief removals of the respirators will occur in the significantly contaminated areas. There has been no showing that cotton dust levels in break areas are negligible, especially in view of the fact that many employees take their breaks and lunch right at their assigned work stations. Without monitoring, or some other specific demonstrable reason, the dust levels in other areas cannot be assumed to be negligible. This includes rest rooms since they are normally under negative pressure from the odor control exhaust ventilation.

### Tables

Tables I, II, III show the maximum allowable 8-hour time weighted average cotton dust concentrations for the various PEL's as a function of assigned time of use of the respirators. The inclusion of these tables was requested at the informal meetings and address the simplest yet most common situation. The tables incorporate the short cut approach of using the 10% time adjustment and apply only to the case where an employee is exposed to a single cotton dust concentration in which the respirator is used part of the time. The assumption is also made that all time spent without a respirator is time exposed to cotton dust, which has repeatedly been affirmed to OSHA as the normal situation. The maximum time of assigned respirator use is seven and one quarter hours to allow for lunches and normal breaks. The table values were computed from a rearrangement of equation 3,  $C = 8 \text{ PEL} / (8 - KT)$  where  $K = 1 - 1/PF$ .

The values in these tables clearly demonstrate that a major influence in increasing the average actual employee exposure is the removal of a respirator. Because of this it will be observed that the highest values in the table fall far short of the PEL times the PF of the respirator even at seven and one quarter hours of assigned wear. This is not surprising since each minute without a respirator contributes 5, 10 or 100 times (depending on respirator) the dose to the employee as each minute wearing a respirator.

**BILLING CODE 4510-26-M**

**29 CFR Part 1952**

**Certification of Completion of Developmental Steps for Wyoming State Plan**

**AGENCY:** Occupational Safety and Health Administration, Department of Labor.

**ACTION:** Final rule.

**SUMMARY:** Wyoming, on July 31, 1980, submitted documentation attesting to the completion of all structural, developmental aspects of its approved State plan. After extensive review and opportunity for State correction, all developmental plan supplements have now been approved. This notice certifies this completion and the beginning of the final evaluation phase of State plan

development. This certification attests only to the fact that Wyoming now has in place those structural components necessary for an effective program. It does not render judgment, either positively or negatively, on the adequacy of the State's actual performance. In addition, although original State plan commitments on staffing and resources have been met, these initial commitments may not be interpreted as meeting the ultimate requirements of the Occupational Safety and Health Act of 1970 for "sufficient staff" as redefined in the U.S. Court of Appeals decision in "AFL-CIO v. Marshall", 570 F. 2d 030 (D.C. Cir. 1978).

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Charles Y. Boyd, Project Officer, Office of State Programs, Occupational Safety and Health Administration, 200 Constitution Avenue, N.W., Rm N3613, Washington, D.C. 20210—(202) 523-8081.

**SUPPLEMENTARY INFORMATION:**

**Background**

Section 18 of the Occupational Safety and Health Act of 1970 (the "Act," 29 U.S.C. 667) provides that States which desire to assume responsibility for the development and enforcement of occupational safety and health standards shall submit for Federal approval a State plan for such development and enforcement. Part 1902 of Title 29, Code of Federal Regulations, sets forth procedures under which the Assistant Secretary of Labor for Occupational Safety and Health ("Assistant Secretary") shall approve such plans. Under the Act and regulations, plan approval is essentially a two-step procedure. A State must first submit its plan for an initial determination under section 18(b) of the Act. If the Assistant Secretary, after reviewing the State's submission, determines that the plan satisfies or will satisfy the criteria set forth in section 18(c) of the Act, a decision of "initial approval" is issued and the State may begin enforcement of its safety and health standards in accordance with the plan and with concurrent enforcement by the Occupational Safety and Health Administration (OSHA).

A State plan may receive initial approval even though at the time of submission not all essential components of the plan are in place. As provided at 29 CFR 1902.2(b) the Assistant Secretary may initially approve the submission as a "developmental plan," and a schedule within which the State must complete specified "Developmental steps" is issued as part of the initial approval decision.

When the Assistant Secretary finds that the State has completed all developmental steps specified in the initial approval decision, a notice of such completion is published in the *Federal Register* (see 29 CFR 1902.34 and 35). Certification of completion of developmental steps initiates a thorough evaluation of the State plan by the Assistant Secretary to determine, on the basis of actual operations, whether the plan adequately protects safety and health of the State's workers. Certification does not render judgment as to the adequacy of State performance.

Final approval of the plan under section 18(e) of the Act and 29 CFR Part 1902 may not be granted until at least three years after initial approval and until at least one year after completion of developmental steps. Thereafter, when the Assistant Secretary determines on the basis of actual performance under the plan that the Act's criteria are being applied, a decision of final approval may be granted.

On May 3, 1974, a notice was published in the *Federal Register* (39 FR 15394) of initial approval of the developmental Wyoming plan and the adoption of Subpart BB of Part 1952 containing the decision, a description of the plan and the developmental schedule.

On July 31, 1980, Donald Owsley, Administrator of the Wyoming Occupational Health and Safety Department, submitted documentation attesting to the completion of each State developmental commitment for review and approval as provided in 29 CFR Part 1953. Following Departmental review, opportunity for public comment and subsequent modification of the State's submissions, as deemed appropriate, the Assistant Secretary has approved the completion of all individual Wyoming developmental steps.

#### Completion of Developmental Steps

All developmental steps specified in the May 3, 1974 notice of initial approval have been completed as follows:

a. The State adopted Federal standards covering all the issues contained in 29 CFR Part 1910, Subparts D through S, and Part 1926 (the State will not cover Parts, 1915, 1916, 1917, and 1918). (40 FR 8948, March 4, 1975; 41 FR 26767, June 29, 1976.)

b. Wyoming's Occupational Health and Safety posters for private and local government employees were approved by the Assistant Secretary on July 14, 1976. (41 FR 30329, July 23, 1976.)

c. Wyoming has developed and implemented a Management Information

System approved by the Assistant Secretary on July 2, 1976. (41 FR 28789, July 13, 1976.)

d. The State plan has been amended to include an Affirmative Action Plan outlining the State's policy of equal employment opportunity. (42 FR 45907, September 13, 1977.)

e. Guidelines and Procedures for implementing the State's health and safety program for public employees were approved by the Assistant Secretary on June 1, 1978. (41 FR 51011, Nov. 19, 1976.) (43 FR 4510-26, June 13, 1978.)

f. Administrative regulations for recordkeeping and reporting, variances, posting requirements, employee complaint procedures, inspections under the Act, employee exposure to toxic materials, providing information to employees on their exposure to hazards, personal protective equipment, medical examinations, and monitoring, safeguarding trade secrets, administrative review of citations, proposed penalties, and abatement periods were approved by the Assistant Secretary on December 19, 1980. (45 FR 83485.)

g. Legislation revising the enabling law to provide for civil enforcement of safety and health violations and revised regulations establishing procedures for review of enforcement actions was approved by the Assistant Secretary on December 19, 1980. (45 FR 83483.)

h. The State has met its plan commitment for hiring enforcement staff under an approved merit system for administration of its health and safety program pursuant to a July 3, 1980 memo from Don Owsley, Administrator of the Wyoming Occupational Health and Safety Department.

i. As required by 29 CFR 1902.34(b)(3), the personnel operations of the Wyoming Occupational Health and Safety Department have been found to be in substantial conformity with the "Standards for a Merit System of Personnel Administration" by the Office of Personnel Management in a letter dated October 17, 1980.

This certification covers all occupational safety and health issues covered under the Federal program except for longshoring and maritime standards found in 29 CFR Parts 1915, 1916, 1917 and 1918 (longshoring, ship repairing, ship building, and ship breaking), which are excluded from coverage under the plan. This certification also covers the State's program covering State and local government employees.

#### Location of the Plan and Its Supplements for Inspection and Copy

Copies of the supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations:

Office of the Director of Federal and State Programs, Occupational Safety and Health Administration, Room N-3613, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.  
Office of the Regional Administrator, Occupational Safety and Health Administration, Region VIII, Federal Building, Room 1554, 1961 Stout Street, Denver, Colorado 80294.  
Office of the Administrator, Occupational Health and Safety Department, 200 East Eighth Avenue, Cheyenne, Wyoming 82002.

#### Effect of Certification

The Wyoming plan is certified effective December 30, 1980 as having completed all developmental steps on or before April 25, 1977. This certification attests to structural completion, but does not render judgment on adequacy of performance.

The Wyoming occupational health and safety program will be monitored and evaluated for a period of not less than one year after publication of this certification to determine whether the State program in operation provides for an effective program of enforcement. The Assistant Secretary will then determine whether Federal authority should be withdrawn with respect to issues covered by the plan pursuant to Section 18(e) of the Act.

#### Level of Federal Enforcement

In accordance with 29 CFR 1902.35, Federal enforcement authority under sections 5(a)(2), 8, 9, 10, 13 and 17 of the Act (29 U.S.C. 654 (a)(2), 657, 658, 659, 662 and 666) and Federal standards authority under section 6 of the Act (29 U.S.C. 655) will not be relinquished during the evaluation period. However, OSHA's concurrent Federal enforcement authority will be exercised on a limited basis.

In accordance with this certification, 29 CFR 1952.344 is hereby amended to reflect successful completion of the developmental period by changing the title of the section and by adding paragraph (j) as follows:

#### § 1952.344 Completion of developmental steps and certification.

(j) In accordance with § 1902.34 of this chapter, the Wyoming occupational safety and health plan was certified, effective December 30, 1980, as having

completed all developmental steps specified in the plan as approved on April 25, 1974, on or before April 25, 1977. This certification attests to structural completion, but does not render judgment on adequacy of performance.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Washington, D.C. this 18th day of December 1980.

Eula Bingham,

Assistant Secretary of Labor.

BILLING CODE 4510-26-M

## DEPARTMENT OF THE INTERIOR

### National Park Service

#### 36 CFR Part 7

#### Glacier Bay National Monument; Protection of Humpback Whales

**AGENCY:** National Park Service, Interior.

**ACTION:** Final rule.

**SUMMARY:** The regulations set forth below are designed to protect declining populations of the humpback whale (*Megaptera Novaeangliae*) within Glacier Bay National Monument. To minimize the effects of vessel-whale interactions, these regulations establish numerical limitations upon small vessels within the monument. These regulations also prohibit the commercial harvesting of the major organisms upon which the humpback whales feed. Both these regulations and the final regulations published on May 15, 1980 (45 FR 32234 and 32228), the latter of which addressed: (1) Operating restrictions on all vessels within the monument and (2) numerical limitations on entries by large vessels (vessels at or in excess of 100 tons gross), will be in effect through May 15, 1983, subject to ongoing review and modification by the National Park Service where warranted.

**EFFECTIVE DATE:** January 29, 1981.

**FOR FURTHER INFORMATION CONTACT:** Superintendent, Glacier Bay National Monument, P.O. Box 1089, Juneau, Alaska 99802; Telephone: (907) 586-7137.

#### SUPPLEMENTARY INFORMATION:

##### The Humpback Whale

As a result of commercial whaling during the first half of this century, the number of humpback whales in the North Pacific was seriously reduced from former levels. Populations have declined from an estimated 15,000 in 1905 to a present estimate of 1,000. In 1966, the International Whaling Commission placed a prohibition on the

commercial taking of humpback whales. In 1970, the humpback whale was designated an endangered species under the Endangered Species Conservation Act of 1969. Additionally, humpback whales are protected by the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*), The Marine Mammal Protection Act of 1972, as amended (16 U.S.C. *et seq.*), and the Convention of International Trade in Endangered Species of Wild Fauna and Flora, March 3, 1973 (T.I.A.S. No. 8249).

It is estimated that between 70 and 100 humpback whales spend the summer months in the waters of Southeastern Alaska. They have been known to frequent these inland waters since before 1900. When humpback whales historically began occupying Glacier Bay is unknown. Their presence in Glacier Bay has been documented by National Park Service personnel since the area was staffed on-site in the 1950's.

##### Glacier Bay National Monument

Glacier Bay National Monument was established by Presidential Proclamation on February 26, 1925 (43 Stat. 1988), and expanded by subsequent proclamations on April 18, 1939 (53 Stat. 2534), and December 1, 1978 (43 FR 57053).

The primary purpose of the monument's establishment and enlargements is the protection and preservation of a wide array of geological, ecological and biological resources to be preserved in their natural condition.

The boundaries of Glacier Bay National Monument include approximately 973 square miles of marine waters. The Pacific Ocean marine life of the monument is one of the major attractions of the 120,000 visitors using the area annually. Of this marine life, the humpback whale is a high point in a visitor's experience.

Records indicate that in the years 1967 through 1977, an annual average of 20-25 individual whales were observed to use the Bay for summer feeding, entering in two stages (June and July) following the neap tides, and remaining into early fall. This period of occupancy is commonly referred to as the whale season. Seven years of scientific research and improved photo identification techniques indicate that certain individual whales repeatedly return to feed in Glacier Bay. In 1978, during the first entry stage, the whales entered the mouth of the Bay and several whales successfully moved up Bay into feeding areas. However, the whales of the second entry stage did not

stay, but left, accompanied by all but three animals of the first entry phase.

In 1979, only a few humpbacks entered Glacier Bay, and again, only three or four remained in up Bay feeding areas.

##### Research Investigations and Findings

Research into the behavioral responses of humpback whales to vessels has been conducted under contract in Glacier Bay since 1976. Preliminary results of this research indicate adverse impacts on humpback behavior from interaction with increasing numbers of vessels using the Bay. Although there is disagreement over the severity of impact caused by each vessel class and method of operation, it is clear that vessels can create stress in whale behavior.

Prior to the 1979 visitor season, vessel operating guidelines were publicized and discussed with boaters. Some of these were similar to the regulations now in effect. Basically, all motorized vessels were asked to remain ¼ mile from any humpback whale, and cruise ships were asked to proceed through designated waters at 10 knots or less. These requests were complied with in most respects, but the number of whales entering the Bay and remaining through their historic use period continued to decline.

On August 6, 1979, when these procedures appeared to have no beneficial effect on the use of Glacier Bay by humpback whales, the National Park Service requested a formal consultation with the National Marine Fisheries Services (NMFS) in accordance with the provisions of the Endangered Species Act. In their formal response to the consultation process, the National Marine Fisheries Service concluded " \* \* \* that uncontrolled increase of vessel traffic, particularly of erratically traveling charter/pleasure craft, probably has altered the behavior of humpback whales in Glacier Bay \* \* \*, "and" \* \* \* that continued increased in the amount of vessel traffic \* \* \* is likely to jeopardize the continued existence of the humpback whale population frequenting Southeast Alaska."

NMFS recommended " \* \* \* that total vessel use of the Bay be restricted to 1976 levels, at the very least, \* \* \* "and further, that " \* \* \* regulations should address vessel routing and vessel maneuvering \* \* \* " and " \* \* \* the system should be flexible enough to accommodate changes of areas of concentrated feeding activity." In a letter to the Superintendent of Glacier Bay dated October 15, 1980, the NMFS Director, Alaska Region unequivocally

reconfirmed NMFS' vessel use restriction recommendations.

The National Park Service and professional marine biologists recognize that a full understanding of marine mammal behavior and habitat processes is a complex problem, and that worldwide research to date has not provided final answers to many issues. However, until such time as additional research yields a more complete picture, the Service must exercise its responsibility to the total environment of the monument it manages. In addition, the Service must comply with the mandate of the Endangered Species Act to take appropriate steps to protect an endangered species and to mitigate any possible adverse impacts resulting from the actions of man.

The Service will re-evaluate the regulations promulgated today in order to consider any new or relevant information. The designation of a two and one-half year period does not eliminate the flexibility to take more stringent or relaxed measures if necessary or warranted.

#### Legal Authorities

On February 26, 1925, pursuant to his authority under the Antiquities Act, 16 U.S.C. 431 *et seq.* (1976), President Coolidge established Glacier Bay National Monument and directed the National Park Service to administer it in accordance with the Act of August 25, 1916, 16 U.S.C. 1 *et seq.* (hereinafter "the National Park Service Organic Act"). Proclamation No. 1733 (February 26, 1925) 43 Stat. 1988. Under the same authority, Presidents Roosevelt and Carter subsequently enlarged the monument in 1939 and 1978, respectively. Proclamation No. 2330 (April 18, 1939), 53 Stat. 2534; Proclamation No. 4618 (December 1, 1978), 43 FR 57053. The boundaries of Glacier Bay National Monument encompass approximately 973 square miles of marine waters.

The National Park Service Organic Act directs the National Park Service to "promote and regulate the use of the Federal areas known as 'national monuments,' including Glacier Bay National Monument" by such means and measures as conform to the "fundamental purpose of the said \* \* \* monuments \* \* \* which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations." 16 U.S.C. 1 (1976).

Furthermore, the Organic Act authorizes the Secretary of the Interior to "make such rules and regulations as he may deem necessary or proper for the use and management of the monuments \* \* \* under the jurisdiction of the National Park System". Id. S 1(a)-2(h) (1976).

In addition to the National Park Service Organic Act, both the Endangered Species Act of 1973, as amended, and the Marine Mammal Protection Act of 1972, as amended, provide authority for the regulations proposed today to protect humpback whales. 16 U.S.C. 1531 *et seq.*; 16 U.S.C. 1361 *et seq.* With respect to the Endangered Species Act, the humpback whale is listed as an endangered species of whale under the Act. 50 CFR 17.11; see also, Convention on International Trade in Endangered Species of Wild Fauna and Flora, March 3, 1973 (T.I.A.S. No. 8249). The Endangered Species Act directs the Secretary of the Interior to utilize all the programs which he administers in furtherance of the purposes of this Act. It also directs all Federal agencies to "utilize their authorities in furtherance of the purposes of the Act by carrying out programs for the conservation of endangered species \* \* \*" 16 U.S.C. 1536(a); 1531(c). By its terms, the Act's purposes "are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved, to provide a program for the conservation of each endangered species and threatened species, and to take such steps as may be appropriate to achieve the purposes of the (listed) treaties and conventions \* \* \*" Id. S 1531(b).

The Endangered Species Act defines "conservation" broadly to mean "all methods and procedures which are necessary to bring any endangered species to the point at which the measures provided pursuant to this Act are no longer necessary." Id. S 1532(2). The Endangered Species Act also makes it unlawful for any person "to take any such (endangered) species within the United States \* \* \* Id. S 1538(a)(1)(B). The Act defines "take" broadly to include, *inter alia*, "harass, harm, pursue." Id. S 1532(14); see 50 CFR 17.3.

The Marine Mammal Protection Act also protects humpback whales. 16 U.S.C. 1361 *et seq.* The Act prohibits, except as specifically permitted, the taking of marine mammals including, by definition, humpback whales. Id. 1372(a); 1362(5). Again, taking is defined broadly to include harassing or attempting to harass. Id. S 1362(13). As stated in the Act's legislative history:

"The act of taking need not be intentional. The operation of motorized vessels in waters in which these animals are found in a manner prohibited by the proposed rule can clearly constitute harassment." H.R. Rep. No. 707, 92d Cong., 1st Sess. 23.

The Marine Mammal Protection Act recognizes that "there is inadequate knowledge of the ecology and population dynamics of \* \* \* marine mammals." 16 U.S.C. 1361(3). Nevertheless, the Act directs each Federal agency to protect significant habitat for marine mammals from the "adverse effect of man's actions." Id. S S 1361(2); 1382 (a), (b). The above proclamations and acts provide the legal authority for the regulations which the National Park Service is promulgating today. These regulations are also based on the opinion of the National Marine Fisheries Service quoted above. Both the Endangered Species Act and the Marine Mammal Protection Act confer major responsibility for management of the endangered humpback whales on the National Oceanic and Atmospheric Administration. See Reorganization Plan No. 4 of 1970, 35 FR 15627; 16 U.S.C. 1532(10), 1533(a)(2); 50 CFR 17.2, see, also, 16 U.S.C. 1362 *et seq.*, and 16 U.S.C. 916 *et seq.*

#### Public Participation on the Interim Rules

The National Park Service has published two sets of regulations designed to protect the summer habitat of the humpback whale within Glacier Bay. The Service published final rules limiting large vessel entries and governing methods of operation for all vessels on May 5, 1980 (45 FR 32228). On the same date, interim rules governing small vessel entries and commercial fishing activities were published (45 FR 32234) as well as a request for public comments regarding those interim rules. The period for public comment on the interim rules closed July 14, 1980.

The National Park Service received eleven timely comments on its interim regulations. Of these, seven comments were from private individuals, three were from organizations, and one was from the State of Alaska.

The Service has carefully considered each of these comments and has adopted numerous suggestions made by the commenters. The comments received and the Service's reasons for accepting or rejecting the comments are as follows:

#### Commenters on Small Vessel Entries

1. Eight comments indicated general support for limiting the number of small vessel entries during the whale season. One individual suggested prohibiting all

pleasure craft entries while three others recommended further reducing the number of small vessel entries. The National Park Service appreciates the support it has received for its response to a difficult but important problem. That response involves a literal application of the NMFS recommendation to return all vessel entries to 1976 levels. This includes small vessel entries for which the very best available historic use data has been applied. That historic data base has been re-evaluated since these regulations were published in proposed form on May 15, 1980.

For small vessels other than charter vessels, the Bartlett Cove vessel observation sheets have been carefully examined and show total use during the 1976 whale season of 339. Since a conservative approach toward establishing a 1976 use level is warranted and no reasonable method of estimating uncounted vessels has been developed, a total entry limit of 339 private small vessels during the whale season is applied.

For charter vessels, which include the Park concessioner as well as special use permit operators the historic data base indicates the following: Concession entries in 1976 totaled 368. Since these entries are already controlled through a concessions contract they will not be subject to the small vessel permit system. Instead, the 1976 concessioner use level will be maintained through contract provisions. Likewise, charter vessel operators are controlled via special use permits. Rather than impose a second permit system on these individuals, the special use permit itself will limit charter vessel use to 1976 levels (an estimated 78 entries) or less.

The Service is confident that these levels reflect 1976 vessel use of Glacier Bay.

2. Several commenters asked specific questions regarding the permit system being implemented. These included five comments regarding entries allocated to the concession operation at Bartlett Cove, one request to limit the period of stay for any small vessel in Glacier Bay to three days, and one recommendation that unused daily entry allocations not be accumulated for later use without a firm ceiling on the maximum number of vessels permitted in the Bay. The permit system for small vessels set forth in these regulations responds affirmatively to these comments. Essentially, three limited use levels will be in effect. All are based upon 1976 use records. First, total entries for small vessels for the whale season will be at 1976 levels. Second, the maximum number of entries per day will be based upon the average

number of entries per day in 1976. And third, the maximum number of vessels permitted in Glacier Bay at any one time shall not be allowed to exceed the maximum number reported in the Bay in 1976.

As discussed above, while the concessionaire has increased the number of vessels he operates since 1976 he will not be permitted more vessel entries than those recorded for 1976.

All other charter vessels will similarly be restricted to 1976 levels.

3. One commenter alleged that the National Park Service has failed to provide sufficient funds for the enforcement of these regulations. As with any other Law Enforcement Programs, voluntary compliance is critical to success. Voluntary compliance is gained through public understanding of the need for the regulations, publicizing widely the nature of the regulations, facilitating compliance, and visible enforcement and the apprehension of violators. During the 1980 whale season the Service addressed all four areas through public education programs, public announcements, a clear and simple permit system, and an active enforcement program which resulted in several warnings and violation citations. Few, if any, enforcement programs are completely effective. However, the current level of compliance with previous regulations is remarkably high. Still, the Service maintains the flexibility to reallocate resources in response to significant enforcement problems and will do so at Glacier Bay if necessary.

#### Comments on Commercial Fishing

1. The State of Alaska, Department of Fish and Game, made three specific recommendations regarding commercial fishing of whale feed species. These recommendations included (1) applying the prohibition against fishing for certain species year around (2) applying them only within Glacier Bay proper, and (3) prohibiting the retention of those species as opposed to the incidental capture. Each of these recommendations has been adopted.

2. One comment questioned the exemption of commercial fishing vessels from entry limits. The data clearly indicates a significant reduction in commercial fishing vessel entries since 1976 making regulated limits unnecessary.

#### Drafting Information

The following persons participated in the writing of these regulations: John Chapman, Superintendent; Donald D. Chase, Chief of Operations. Glacier Bay

National Monument; William F. Paleck, Alaska Regional Office; Deborah L. Williams, Solicitor's Office, Anchorage.

#### Impact Analysis

The National Park Service has made a determination that the regulations contained in this rulemaking are not significant, as that term is defined under Executive Order No. 12044 as amended, and 43 CFR Part 14, nor do they require the preparation of a regulatory analysis pursuant to the provisions of these authorities. In addition, the Service has determined that these regulations do not represent a major Federal action significantly affecting the quality of the human environment which would require preparation of an Environmental Impact Statement. An Environmental Assessment and Finding of No Significant Impact have been prepared and are available at the address listed at the beginning of this rulemaking.

Authority: Presidential Proclamations No. 1733 (43 Stat. 1988), 2330 (53 Stat. 2534), and 4618 (43 FR 57053); Act of August 25, 1916 (39 Stat. 535, as amended, 16 U.S.C. 1 *et seq.*); 245 DM 1 (44 FR 23384); National Park Service Order 77 (38 FR 7478), as amended.

John F. Chapman,  
Superintendent.

In consideration of the foregoing, § 7.23 of Title 36 of the Code of Federal Regulations is amended by the addition of paragraphs (e) and (f) as follows:

#### § 7.23 Glacier Bay National Monument, Alaska.

##### (e) *Small Vessel Entry Restrictions.*

(1) Entries into Glacier Bay during the whale season by all small vessels, except charter vessels and commercial fishing vessels, will be limited to a total of 339. (2) Entries into Glacier Bay during the whale season by charter vessels will be at 1976 levels. (3) No small vessel operator shall enter or remain in Glacier Bay National Monument without a valid permit issued by the Superintendent, or in the case of charter vessel operators without special use permit or concession contract. (4) Upon entering and leaving Glacier Bay, each small boat operator shall notify the designated Park Service official. (5) The Superintendent shall develop, announce, and implement a permit system which details (i) how permits can be obtained, (ii) who the operator must contact when entering and leaving Glacier Bay (iii) the average number of small vessel entries to be allowed each day during the whale season (iv) the maximum number of small vessels to be allowed in Glacier Bay at any one time during the whale season and (v) the allocation of entry

permits among concessionaire, charter and all other types of small vessels.

(f) *Commercial Fishing.* (1) No commercial or charter fishing operator will actively fish for, or retain if incidentally caught, capeline (*Mallotus*), sandlance (*Ammodytes*), euphausiids (*Thalassia*), or shrimp (*Pandalidae*) within Glacier Bay. (2) These restrictions on fishing shall apply throughout the year but shall only apply to the waters inside the mouth of Glacier Bay.

[FR Doc. 80-40345 Filed 12-29-80; 8:45 am]

BILLING CODE 4310-70-M

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 52

[A-10-FRL 1710-8]

### Alaska; Approval and Promulgation of Implementation Plan

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** The purpose of this notice is to indicate final action on the transportation control plan portion of the Alaska State Implementation Plan (SIP) dealing with Part D (Plan Requirements for Nonattainment Areas) of the Clean Air Act (hereafter referred to as Act) as amended in 1977 (42 U.S.C. 1857 et seq.). EPA is conditionally approving the transportation control plan (TCP) portions of the Anchorage and Fairbanks carbon monoxide (CO) attainment strategies and is taking no action on the portions of the SIP addressing Part D New Source Review, Section 110 Preconstruction Review, Section 111 Standards for a New Source Performance and Part C Prevention of Significant Deterioration. Action on these other than Part D nonattainment SIP's will be taken at a later date and will incorporate the new EPA requirements promulgated August 7, 1980 as a result of *Alabama Power v. Costle*. In accordance with conditional approvals, the State of Alaska is required to submit to EPA additional materials to satisfy the conditions no later than 120 days after publication of this final rulemaking.

**EFFECTIVE DATE:** December 30, 1980.

**ADDRESSES:** Copies of the related material for this revision may be examined during normal business hours at the following locations:

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408

Central Docket Section (10A-79-6), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460

Air Programs Branch, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101

#### FOR FURTHER INFORMATION CONTACT:

Richard R. Thiel, P.E., Chief, Air Programs Branch, U.S. Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101; Telephone No. (206) 442-1226; FTS 399-1226.

#### SUPPLEMENTARY INFORMATION:

##### Table of Contents

- I. Introduction
- II. Background
- III. Plan Review
  - A. New Source Review
  - B. Nonattainment Area Plans
    - 1. Extension Requests
    - 2. Carbon Monoxide
      - a. Anchorage
      - b. Fairbanks
  - C. National Comments
- IV. SIP Requirements for Conditional Approval

#### I. Introduction

EPA finds that good cause exists for making the action taken in this notice immediately effective for the following reasons: (1) Implementation plan revisions are already in effect under State law and EPA approval poses no additional regulatory burden, and (2) EPA has a responsibility under the Clean Air Act to take final action on the portion of the SIP which addresses Part D regulations by July 1, 1979 or as soon thereafter as possible.

On September 16, 1980 the Environmental Protection Agency published in the *Federal Register* a notice of proposed rulemaking (45 FR 61319) which described the nature of the SIP revision, discussed certain provisions which, in the opinion of EPA, did not comply with the Act, and requested public comment.

As discussed in greater detail below, EPA has reviewed public comments received on the September 16, 1980 *Federal Register* proposal and is taking the following action:

- 1. Conditional Approval
  - (a) Anchorage CO nonattainment area TCP.
  - (b) Fairbanks CO nonattainment area TCP.
- 2. No Final Action
  - (a) Title 18 Alaska Annotated Code Chapter 50 (18 AAC 50)—provisions for New Source Review (NSR) in nonattainment areas, preconstruction review, Prevention of Significant

Deterioration (PSD) and standards for new source performance.

In this notice the problems interfering with SIP approval are discussed, comments from the State and the public are presented, and EPA's responses to comments on its proposal are presented. In addition, the notice describes final action with regard to conditional approval of the Alaska SIP. It should be noted that only the requirements pertaining to Part D of the Act are discussed.

Following this introduction, the information in this notice is divided into three sections entitled, "Background," "Plan Review" and "SIP Requirements for Conditional Approval." The first section outlines the background leading to the development of the Alaska SIP in relation to the Clean Air Act Amendments of 1977. The "Plan Review" portion is divided into three major sub-sections. The first, "General Regulations," discusses regulatory portions of the plan applicable to more than one nonattainment area; e.g., New Source Review. The second sub-section, "Nonattainment Area Plans," provides a description of each Part D nonattainment plan element for (CO). Deficiencies, together with appropriate corrective actions, which were proposed earlier, are summarized at the end of each topical discussion section.

Further public comments pertaining to those deficiencies, proposed corrective actions and other concerns regarding the SIP are then summarized along with EPA's responses. Following the public comment section, final EPA action is then described for each deficiency noted as well as EPA final action regarding other major elements of the SIP.

The third sub-section contains a discussion of other pertinent comments of a general nature, which apply to this action but were not in response to identified deficiencies.

#### II. Background

On March 3, 1978 (43 FR 8962), and September 11, 1978 (43 FR 40435), pursuant to the requirements of Section 107 of the Act, EPA designated certain areas of the State of Alaska as not attaining certain National Ambient Air Quality Standards (NAAQS). Part D of the Act requires States to revise their State Implementation Plans (SIP) for all areas that have not attained the NAAQS. The Alaska SIP revisions were developed and submitted to EPA to satisfy the requirements of the Act and are intended to update the present EPA approved SIP. The basic criteria for an approvable Part D SIP are summarized in a General Preamble published in the April 4, 1979, *Federal Register* (44 FR

20372) as supplemented in the Federal Register on July 2, 1979 (44 FR 38583), August 28, 1979 (44 FR 50371), September 17, 1979 (44 FR 53761), and November 23, 1979 (44 FR 67182). These criteria are incorporated by reference and will not be restated here. Additional guidance was published in the "EPA/ DOT Transportation Planning guidelines" and the "Transportation SIP Checklist" and general requirements for all SIPs are found in EPA regulations in 40 CFR Part 51.

In accordance with Section 174 of the Act, primary responsibility for preparing carbon monoxide (CO) control plans was delegated by the Governor of Alaska to organizations of local elected officials. These designated organizations are the Municipality of Anchorage (MOA) for the Anchorage CO nonattainment area and the Fairbanks North Star Borough (FNSB) for the Fairbanks CO nonattainment area. As a result of these designations, a description of the responsibilities between the various State and local agencies involved in the planning process was developed. Designated lead agencies were responsible for transportation control plan development, while the State, in general, retained responsibility for stationary source control efforts.

The CO control strategies for Anchorage and Fairbanks were developed in early 1979. Public hearings were held on March 22, and April 5, 1979, in Fairbanks and Anchorage, respectively. These plans were then submitted to the Alaska Department of Environmental Conservation (ADEC). Additional public hearings were then held on the entire State SIP in Anchorage and Fairbanks on May 15 and 16, 1979, respectively. Just before these hearings, a draft SIP was submitted informally to EPA for comment. After the public hearings, this version of the SIP was finalized and submitted to EPA by the Governor on June 28, 1979.

On July 18, 1979 EPA submitted comments to the State covering all aspects of the SIP. The State revised the SIP and submitted a second version for comments on January 20, 1980. EPA's review comments were then discussed in-depth with the State on May 7 and 8, 1980. Agreement was reached on all the changes that were required to make the SIP approvable.

On September 16, 1980 EPA proposed action on the revised Alaska Part D TCPs for Anchorage and Fairbanks CO nonattainment areas.

### III. Plan Review

As stated above, this section is divided into three major sub-sections. The first, "General Regulations," briefly describes the regulatory portions of the plan applicable to more than one nonattainment area; e.g., New Source Review, and discusses the deficiencies and specifically states which category of action EPA is proposing to take. The second sub-section, "Nonattainment Area Plans" discusses each area-pollutant-specific plan in terms of plan development, emission reduction required, control strategy proposed, deficiencies identified and corrective actions required, State response, public comments, and EPA's final action. The third "General Comments," contains a discussion of other pertinent comments on subjects not specifically defined as deficiencies in this action.

#### A. New Source Review (NSR)

Title 18 Alaska Annotated Code Chapter 50 (18 AAC 50) does not include provisions to satisfy the requirements of Section 172(b)(6) and 173 of the Act for major sources of CO in the Anchorage and Fairbanks nonattainment areas. Provisions must be added to ensure that (1) reasonable further progress (RFP) is achieved in attainment and maintenance of CO NAAQS; (2) no permit is granted to a source unless other sources in the State owned by the same company are in compliance with the Act; and (3) that lowest achievable emission rate (LAER) is required for emission control.

The State has prepared revisions to the regulation to correct this deficiency. The revised regulation was subject to public hearing on September 9 and 10, 1980 and is currently being revised based on comments received. Therefore, EPA is not taking action on Part D New Source Review at this time.

Until EPA takes final action to approve or conditionally approve the Part D CO attainment plans for the Anchorage and Fairbanks areas, which include new source review procedures submitted by the State, the ban on construction of new and modified major stationary sources of CO required by Section 110(a)(2)(I) of the Act, will remain in effect. These restrictions apply only in the designated nonattainment areas and only to new or modified major stationary sources. The restriction does not affect existing sources (unless they are being modified) or sources which applied for permits to construct before July 1, 1979.

Other deficiencies in 18 AAC 50 which affect the New Source Review (NSR) process are outlined below:

#### 1. Deficiencies:

a. *Source Applicability:* 18 AAC 50.300(a) excludes many sources with potential emissions equal to or greater than 100 tons per year. This must be changed to require NSR in accordance with Section 302(j) of the Act, which defines major source as one which has the potential to emit 100 tons or more per year of any air pollutant.

b. *Potential emissions or potential to emit:* 18 AAC 50 contains no definition for either of these terms. This terminology must be defined in order to ensure that NSR provisions apply to all required sources.

c. *Emission standard or emission limitation:* 18 AAC 50 contains no definition for either of these terms. This terminology must be defined to ensure proper understanding of the underlying permit review criteria.

2. *State Response:* The State is correcting these deficiencies and others as a result of EPA regulations promulgated after the final court decision on *Alabama Power vs. Costle*, and will resubmit the regulations at a later date.

3. *Public Comment:* None.

4. *EPA Action: No Action.* As explained earlier, EPA will take final action on the NSR program at a later date when the Alaska regulations have been revised.

#### B. Nonattainment Area Plans

Alaska's two nonattainment areas, located in Anchorage and Fairbanks, are both designated for carbon monoxide (CO). They will be discussed in terms of a brief description of the area, extensions requested, control measures proposed, any problems that would interfere with SIP approval, State actions to correct the problems, public comment and EPA's final action.

1. *Extension Requests:* Under Section 172(a)(2) of the Act, the State has described a need for an extension of the attainment date for CO for both the Anchorage and Fairbanks areas. This requires that the plans demonstrate the application of all reasonably available control measures (RACM), establish a program for determining costs and benefits of proposed facilities, and commit to expand public transportation. Attainment of the standard by 1987 in both areas will be defined upon completion of the alternatives analysis.

EPA approves extensions for the Anchorage and Fairbanks areas thus requiring an enforceable transportation control plan by July 1, 1982. EPA approves the CO SIP's conditioned upon the inclusion of provisions in each control strategy for cost benefit analyses as required by Section 172(b)(11)(A) of the Act. Further, EPA finds that the SIP's

contain adequate demonstrations of the application of RACM's and that commitments to expand public transportation are evident in the SIP and other planning documents. It should be noted that even though EPA's 200,000 population criterion exempts both cities from the inspection maintenance requirement. Anchorage and Fairbanks are each considering it as one of the alternatives for the 1982 SIP.

2. *Carbon Monoxide:*

a. *Anchorage:* i. *Background:* The Anchorage area consists of a large portion of the urbanized area which was defined based on air monitoring conducted in 1977 and 1978. The area is bounded by Elmendorf Air Force Base to the North, Muldoon Road and Lake Otis Parkway to the East, O'Malley Road to the South and Cook Inlet to the West.

The designated lead agency is the Municipality of Anchorage (MOA). The MOA worked with the Anchorage Air Pollution Control Program, the Alaska Department of Transportation (ADOT), the Federal Highway Administration (FHWA) and the Alaska Department of Environmental Conservation (ADEC) in developing the plan. Public participation was realized largely through the Citizens Delphi Panel and the Air Quality Citizens Advisory Committee. Public hearings on the Plan were held April 5 and May 15, 1979.

ii. *Emission Reduction Required:* For CO the maximum hotspot emission reduction required to achieve standards is 52 percent. At this time an attainment date for NAAQS will fall between 1983 and 1987. It is apparent, though, that the Federal Motor Vehicle Emission Control Program (FMVECP) will only produce a 17 percent reduction by 1982 and a 35 percent reduction by 1987. Reductions attributable to other alternative measures are currently being determined using the latest mobile source emission factors. There is also an effort underway by EPA to determine the effectiveness of an inspection and maintenance program (I/M) as an alternative measure in cold weather climates.

iii. *Control Strategy:* Carbon monoxide is primarily a transportation-related pollutant. In Anchorage transportation sources contribute about 85 percent of the emissions with commercial, residential and industrial stationary sources of fuel generation contributing the remaining 15 percent.

In light of the dominant motor vehicle contribution to the CO nonattainment problem, the control strategy focuses on transportation measures. Typical reasonably available control measures are listed in Section 108(f)(1)(A) of the Act. It should be noted that measures

designed to reduce vehicle emissions operate in one of three basic ways: (a) by reducing trips and miles traveled; i.e., improved mass transit, carpooling, etc., or (b) improving traffic speeds; i.e., improved traffic signalization, traffic flow improvements, parking restrictions, etc., or (c) by reducing the emissions from individual vehicles; i.e., an inspection and maintenance program and the FMVECP.

The overall strategy will be based on the results of the comprehensive analysis of the alternative transportation control measures outlined below:

- (1) Selected Restrictions of Commercial and Other Vehicles <sup>a</sup>
- (2) Pedestrian Facilities <sup>b</sup>
- (3) Inspection and Maintenance Program <sup>c</sup>
- (4) Vehicle Idling Controls <sup>a</sup>
- (5) Fleet Vehicle Controls <sup>b</sup>
- (6) Cold Start Strategies <sup>b</sup>
- (7) Public Transit Improvements <sup>a</sup>
- (8) Paratransit Improvements <sup>a</sup>
- (9) Parking Management <sup>a</sup>
- (10) Flex-Time and Staggered Work Hour Schedules <sup>a</sup>
- (11) Indirect Source Review <sup>b</sup>
- (12) Traffic-Improvement—Capital Intensive <sup>a</sup>
- (13) Traffic Improvements—Non-Capital Intensive <sup>a</sup>

<sup>a</sup> Currently implemented measure which will be expanded in scope.

<sup>b</sup> New measure.

<sup>c</sup> Voluntary measure which may become mandatory.

This analysis was due to be completed in April 1980, but has been delayed until December 1980 due to the revisions to the EPA mobile source emission factors. The 1982 strategy will contain sufficient measures from the above list to show attainment no later than December 31, 1987.

iv. *Deficiencies/Comments/EPA Action:* (1) *Deficiencies:* The CO TCP for the Anchorage area addresses all the requirements contained in Part D of the Act and in the EPA-DOT Transportation-Air Quality Guidelines Checklist except as described below. Accordingly, EPA approves the Anchorage TCP with the following conditions:

(a) The emissions inventory must be updated to include area sources and emissions associated with parking and idling activities.

(b) The population growth rates used to project CO emissions for 1982 and 1987 must be included in the SIP and shown to be consistent with Bureau of Economic Affairs (BEA) population projections or other more localized projections such as those used in water

quality planning under Sections 201 and 208 of the Federal Clean Water Act.

(c) Provisions must be included for cost-benefit analysis as required by Section 172(b)(11)(A) of the Act.

(2) *State Response:* The State has agreed to adopt and submit the required changes.

(3) *Public Comment:* The Municipality of Anchorage commented that information to correct the deficiencies was being developed.

(4) *EPA Action: Conditional Approval.* The action proposed by the State will correct the deficiencies.

b. *Fairbanks:* i. *Background:* The Fairbanks area consists of the major portion of the urbanized areas of Fairbanks and North Pole and Fort Wainwright military post.

The designated lead agency is the Fairbanks North Star Borough (FNSB). The FNSB worked with the Fairbanks/North Pole Metropolitan Air Quality Planning Organization and a technical advisory committee, which included representation from the City of Fairbanks, ADEC, ADOT, EPA Arctic Research Laboratory to develop the plan. Public participation was realized largely through a series of six public meetings and three public hearings prior to the June 29, 1979 submission of the SIP. A speakers bureau and a voluntary inspection and maintenance program were other means of informing the public and obtaining public input regarding the efforts underway to control CO emissions.

ii. *Emission Reduction Required:* The CO hotspot emission reduction required to achieve standards is 66 percent. At this time, an attainment date for NAAQS will fall between 1983 and 1987. It is apparent, though, that the reduction from the FMVECP will be offset in 1982 because of expected population growth. The FMVECP reduction expected for 1987 is 40 percent. Reductions attributable to alternate measures are currently being revised using the latest mobile source emission factors. In addition, there is an effort underway by EPA to determine the effectiveness of an inspection and maintenance program (I/M) as an alternative measure in cold weather climates.

iii. *Control Strategy:* In Fairbanks CO is primarily a transportation-related pollutant. CO from transportation sources contributes about 85 percent of the emissions with commercial, residential and industrial stationary sources of fuel generation contributing the remaining 15 percent.

In light of the dominant motor vehicle contribution to the CO nonattainment problem, the control strategy focuses on transportation measures. Typical

reasonably available control measures are listed in Section 108(f)(1)(A) of the Act. It should be noted that measures designed to reduce vehicle emissions operate in one of three basic ways: (a) by reducing trips and miles traveled; i.e., improved mass transit, carpooling, etc., or (b) improving traffic speeds; i.e., improved traffic signalization, traffic flow improvements, parking restrictions, etc., or (c) by reducing the emissions from individual vehicles; i.e., an inspection and maintenance program and the FMVECP.

A preliminary analysis of all reasonably available control measures resulted in the selection of the measures outlined below:

- (1) Implementation of a Transportation System Management Plan<sup>b</sup>
- (2) Implementation of a Transit Plan<sup>b</sup>
- (3) Implementation of a Parking Management Plan<sup>a</sup>
- (4) Plug-in Regulations<sup>a</sup>
- (5) Provision for Plug-ins in Parking Lots<sup>a</sup>
- (6) Carpooling Program<sup>a</sup>
- (7) Inspection and Maintenance Program<sup>c</sup>
- (8) Auto-start Retrofit<sup>b</sup>
- (9) Low Temperature Automobile Standard<sup>b</sup>
- (10) Idling Controls<sup>a</sup>
- (11) Gasohol<sup>b</sup>
- (12) Restricted Delivery Hours.<sup>b</sup>

<sup>a</sup>Currently implemented measure which will be expanded in scope.

<sup>b</sup>New measure.

<sup>c</sup>Voluntary measure which may become mandatory.

A comprehensive analysis was due to be completed in January 1980, but was delayed until July 1980. A preliminary package is currently being reviewed by EPA.

The remaining measures listed below were excluded due to the extremely limited reduction attributable to each due to the magnitude of the CO problem in a small urban area (60,000 population) with cold temperature climate. These measures will be reconsidered if the analysis currently in progress does not show attainment by the end of 1987.

- (1) Vehicle Free Zones
- (2) Land Use Controls
- (3) Gasoline Tax Changes
- (4) Indirect Source Review
- (5) Preferential High Occupancy Vehicle Lanes
- (6) Changes in Work Schedules (Flex-Time)
- (7) Ski Trails and Facilities
- (8) Long Range Transit Improvements iv. *Deficiencies/Comments/EPA*

*Action:* The TCP portion of the CO SIP for the Fairbanks area addresses all the requirements contained in Part D of the

Act and in the EPA-DOT Transportation-Air Quality Guidelines Checklist except as described below. Accordingly, EPA approves the Fairbanks TCP with the following conditions:

- (1) Deficiencies: (a) The emissions inventory must be updated to include area sources and emissions associated with parking and idling activities.
- (b) The population growth rates used to project CO emissions for 1982 and 1987 must be included in the SIP and shown to be consistent with Bureau of Economic Affairs (BEA) population projections or other more localized projections such as those used in water quality planning under Sections 201 and 208 of the Federal Clean Water Act.

(c) Procedures for carrying out an air quality consistency analysis program in order to retain eligibility for DOT and other Federal grants for highway improvement must be included in the SIP.

(d) Provisions must be added for a cost-benefit analysis as required by Section 172(b)(11)(A) of the Act.

(2) *State Response:* The State has agreed to adopt and submit the required changes.

(3) *Public Comment:* Comment was received from the Alaska office of the FHWA in regard to their purported agreement with Fairbanks to conduct air quality consistency analyses as required under Section 176(c) of the Act. According to the commenter, there is no agreement. However, the commenter felt that since Fairbanks has no Metropolitan Planning Organization (as designated by DOT) which would perform that required function in an officially recognized capacity, the procedure to conduct the analysis should be described in the SIP. EPA agreed and conditioned the approval accordingly.

(4) *EPA Action:* Conditional Approval: The agreement by the State to include in the SIP a procedure to describe the air quality consistency analysis will satisfy the condition.

#### C. National Comments

One commenter submitted extensive comments which were requested to be considered part of the record for each State plan. Although most of the issues raised are not relevant to provisions in Alaska's submission, EPA has placed its response to those comments in the Regional Office docket and in the Public Information Reference Unit in Washington, D.C., in relation to this action, the commenter questioned EPA's requirement for a demonstration that application of all reasonably available control measures (RACM) would not

result in attainment any faster than application of less than all RACM. In EPA's view, the statutory deadline is that date by which attainment can be achieved as expeditiously as practicable. If application of all RACM results in attainment more expeditiously than application of less than all RACM, the statutory deadline is the earlier date. While there is no requirement to apply more RACM than is necessary for attainment, there is a requirement to apply controls which will ensure attainment as soon as possible. Consequently, the State must select the mix of control measures that will achieve the standards most expeditiously, as well as assure reasonable further progress.

The commenter also suggested that all RACM may not be "practicable." By definition, RACM are only those measures which are reasonable. If a measure is impracticable, it would not constitute a reasonable available control measure.

#### IV. Additional SIP Requirements

EPA is taking final action to conditionally approve certain elements of Alaska's plan. A discussion of conditional approval and its practical effect appears in a supplement to the General Preamble, 44 FR 38583 (July 2, 1979), 44 FR 50371 (August 28, 1979), 44 FR 53716 (September 17, 1979), and 44 FR 67182 (November 23, 1979). As proposed, the conditional approval requires the State to submit additional materials within 120 days of the effective date of this action. There will be no extensions of conditional approval deadlines which are being promulgated today. EPA will follow the procedures described below when determining whether the State has satisfied the conditions.

1. If the State submits the required additional documentation according to schedule, EPA will publish a notice in the **Federal Register** announcing receipt of the material. The notice of receipt will also announce that the conditional approval is continued pending EPA's final action on the submission.

2. EPA will evaluate the State's submission to determine if the conditions are fully satisfied. After review is complete, a **Federal Register** notice will be published either approving or disapproving the State's action. If the action is disapproved, the funding limitations under Sections 176 and 316 of the Act may be imposed. Growth limitations under Section 110(a)(2)(I) will remain in effect until both stationary and mobile source portions of the plan are approved.

3. If the State fails to timely submit the required materials needed to meet a condition, EPA will publish a **Federal Register** notice shortly after the expiration of the time limit for submission. The notice will announce that the conditional approval is withdrawn, the SIP is disapproved and funding limitations under Section 176 and 316 may be imposed. Section 110(a)(2)(I) restrictions on growth will continue to be in effect.

If funding limitations are necessary, procedures for applying them would be consistent with those published in the **Federal Register** on April 10, 1980 (45 FR 24692). These procedures will not be discussed in detail here.

Section 316 of the Act also allows the Administrator of the EPA of withhold, condition or restrict grants for the construction of sewage treatment works in nonattainment areas where the State is not making reasonable further progress towards attainment of all NAAQS.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. I have reviewed this regulation and determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Under Section 307(b)(1) of the Clean Air Act, judicial review of EPA's final action conditionally approving the transportation control plan portions of the Anchorage and Fairbanks CO nonattainment strategies is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

(Secs. 110(a) and 172 of the Clean Air Act as amended (42 U.S.C. 7410(a) and 7502))

Dated: December 18, 1980.

**Douglas M. Costle,**  
Administrator.

**Note.**—Incorporation by reference of the State Implementation Plan for the State of Alaska was approved by the Director of the Federal Register on July 1, 1980.

Part 52 of Chapter I, Title 40, Code of Federal Regulations is amended as follows.

### Subpart C—Alaska

1. In § 52.70, paragraphs (c)(7) and (8) are added as follows:

#### § 52.70 Identification of plan.

\* \* \* \* \*

(c) \* \* \*  
(7) Revisions to the SIP including Part D nonattainment plans and modifications to Title 18 Chapter 50 Alaska Annotated Code to provide for Part C Prevention of Significant Deterioration (PSD) Section 111 New Source Performance Standards (NSPS) and Section 110(a)(2)(D) (Preconstruction Review) were submitted June 29, 1979.

(8) Revisions to the June 29, 1979 submission to further modify 18AAC 50 and to include Part D New Source Review (NSR).

2. Section 52.71 is amended by changing the hearing "photochemical oxidants (hydrocarbons)" to "ozone." Also, in the Table the listing for Cook Inlet Intrastate carbon monoxide, "III" is changed to "I."

#### § 52.71 [Amended]

3. In § 52.76 paragraph (a) is removed and new paragraphs (a) and (b) are added as follows:

#### § 52.76 Control strategy: Carbon monoxide.

(a) The transportation control plan portion of the Anchorage carbon monoxide attainment plan required under Part D of the Clean Air Act is approved conditioned upon receipt within 120 days of the effective date of this action of information to satisfy the following conditions:

(1) Update emission inventory to include parking and idling emissions.

(2) Show that population projections are consistent with Bureau of Economic Affairs (BEA) population projections or other more localized projections, such as those used in water quality planning under Sections 201 and 208 of the Federal Clean Water Act.

(3) Add provisions for a cost-benefit analysis required by Section 172(b)(11)(A) of the Act.

(b) The transportation control plan portion of the Fairbanks carbon monoxide attainment plan required under Part D of the Clean Air Act is approved conditioned upon the receipt within 120 days of the effective date of this action of information to satisfy the following conditions:

(1) Update the emission inventory to include parking and idling emissions.

(2) Show that population projections are consistent with Bureau of Economic Affairs (BEA) population projections or other more localized projections such as those used for water quality planning under Sections 201 and 208 of the Federal Clean Water Act.

(3) Add procedures for carrying out an air quality consistency analysis for transportation projects in the nonattainment area.

(4) Add provisions for a cost-benefit analysis required by Section 172(b)(11)(A) of the Act.

Until EPA takes final action to approve the Part D carbon monoxide attainment plan for the Anchorage and Fairbanks areas which includes the new source review procedures submitted by the State, the ban on construction of new and modified major stationary sources required by Section 110(a)(2)(I) of the Clean Air Act as amended, will remain in effect.

#### § 52.71 Classification of regions [Amended]

4. Section 52.71 is amended by changing the Table for Cook Inlet Intrastate carbon monoxide from the letter "d" to "e" and by replacing the date "May 31, 1977" for the Northern Alaska Intrastate with the letter "e". The following footnote is then added; "e. December 31, 1987." Also, the heading is changed on the Table from "Photochemical Oxidants (hydrocarbons)" to "Ozone."

#### § 52.81 Attainment dates for national standards [Amended]

5. In Section 52.81, paragraph (c) is added as follows:

#### § 52.81 Extensions

\* \* \* \* \*

(b) \* \* \*  
(c) The Administrator hereby extends the attainment date for carbon monoxide in the Anchorage and Fairbanks nonattainment areas to December 31, 1987.

[FR Doc. 80-40222 Filed 12-29-80; 8:45 am]

BILLING CODE 6560-01-M

### 40 CFR Part 52

[A-3-FRL 1714-1]

#### Virginia State Implementation Plan; Correction

**AGENCY:** Environmental Protection Agency.

**ACTION:** Correction of final rulemaking.

**SUMMARY:** This Notice corrects several errors in the codification of several revisions to the Virginia State Implementation Plan. On August 19, 1980 (45 FR 55180) and October 8, 1980 (45 FR 66789 and 66792), EPA published final approval and disapproval actions regarding changes to the Virginia SIP. Since that time, we have become aware of several errors in the CFR codification.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Ms. Eileen M. Glen, 3AH11, Air Programs Branch, U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Curtis Building, 10th Floor, Philadelphia, Pennsylvania 19106, (215) 597-8187.

**SUPPLEMENTARY INFORMATION:**

Amendments to § 52.2420 (Identification of Plan) of 40 CFR, Subpart VV (Virginia) which appeared in the *Federal Register* on August 19, 1980, 45 FR 55180, omitted two amendments because they were inadvertently listed under 40 CFR 52.2423 (Approval Status). Because of this omission, subsequent publications on October 8, 1980 (45 FR 66789 and 66792) erroneously listed amendments under paragraphs (c) (29) thru (36) of § 52.2420. Therefore, to avoid any confusion we are now reprinting § 52.2420 (c) (27) thru (37) as it should now appear. Paragraphs (c)(1) thru (c)(26) of 40 CFR 52.2420 remain unchanged.

In addition, amendments to 40 CFR 52.2423 (Approval Status) published on August 19, 1980 at 45 FR 55180 were inadvertently listed under § 52.2423 (d) and (f) rather than under § 52.2420(c) (28) and (29).

An amendment to 40 CFR 52.2436 was also incorrect in that it was listed here as (b) rather than in 40 CFR 52.2423(e).

Because of the above errors, 40 CFR 52.2423 (Approval Status) must also be renumbered.

On August 19, 1980, an amendment to 40 CFR 52.2431 (Control Strategy: Carbon Monoxide and Ozone) was published and inadvertently listed the revision under § 52.2431 (d) rather than (e).

This Notice serves to correct all of the above errors and since it does not alter previously approved revisions, only the codification of said revisions, EPA finds that a notice and comment period are unnecessary. See 5 U.S.C. 552(b)(A)(B). Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and, therefore, subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and have determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(42 U.S.C. 7401-7642)

Dated: December 11, 1980.

Jack J. Schramm,

*Regional Administrator.*

Part 52 of Title 40, Code of Federal Regulations, is corrected to read as follows:

**Subpart VV—Virginia**

1. In § 52.2420, the previous additions to paragraph (c) are correctly renumbered as (c) (27) through (37) and republished as follows:

**§ 52.2420 Identification of plan.**

\* \* \* \* \*

(c) \* \* \*

(27) On January 11, 1979, the Governor submitted the nonattainment area plans for Virginia with respect to ozone and carbon monoxide.

(28) The following portions of Virginia's September 6, September 21, and December 17, 1979, submittals are approved:

(1) September 6, 1979, submittal: Section 2.33(g)(1)(vi) of the regulation.

(2) September 21, 1979, submittal, the following Sections of Virginia's regulations: Section 4.57(b)(2)(ii); 4.55(f)(4)(i); 4.56(e); 4.52(a); 2.03(a)(1); 2.33(f)(3); Part I of the regulations, the definitions of "Delayed Compliance Order" and "Nonattainment Area;" Sections 4.02(f)(1) through 4.02(f)(5); Appendix N; and those portions of Sections 4.54, 4.55 and 4.56 where the phrase "will be considered acceptable compliance by the Board" has been modified.

(3) December 17, 1979, submittal: Chapter 3, Control Strategy Demonstration, design value for Northern Virginia.

(29) The following portions of Virginia's August 14, 1975, August 31, 1977, and January 11, 1979, submittals as they relate to Section 2.33 are approved:

(1) August 14, 1975, submittal: Section 2.33 (b) and (i).

(2) August 31, 1977, submittal: Section 2.33(h).

(3) January 11, 1979, submittal: Section 2.33 (a), (c), (d), (e), (f), (g) and (k).

(30) Amendments of Part I (Definitions), §1.02; Part II (General Provisions), Sections 2.02 (a), (c), and (e) (former §2.11 (a), (b), and (d)), § 2.05(b), § 2.11; and Part IV (Regulations for Existing sources), §§ 4.10, 4.11, and 4.13 deletion of the following regulations from Part IV: Former §§ 4.03.02, 4.05.03, 4.05.04, 4.05.05(b), 4.10.03, 4.705.04, and 4.705.05 submitted on August 14, 1975 by the Secretary of Commerce and Resources.

(31) Amendments on Part I (Definitions), § 1.02; Part III (Ambient Air Quality Standards), § 3.02(c); Part IV

(Special Provisions), § 4.02(a), (a)(1), (a)(2), (b), (c), and (d) (Formerly § 2.04) and § 4.03; and Part VII (Air Pollution Episode), §§ 7.04 (a), (b), (d), and (e) submitted on October 20, 1976 by the Secretary of Commerce and Resources.

(32) Amendments of Part II, (General Provisions), § 2.02(b) submitted on March 11, 1977, by the Secretary of Commerce and Resources.

(33) Amendments to Part II, (General Provisions), § 2.02(d) submitted on September 20, 1978, by the Secretary of Commerce and Resources.

(34) Amendments to Part II (General Provisions), § 2.06 (b) and (c); and Part VII (Air Pollution Episode), § 7.03(d); and deletion of Part IV (Existing Sources), Rule EX-7, § 4.07.05 submitted on August 14, 1975, by the Secretary of Commerce and Resources.

(35) Amendments to Part I (Definitions), § 1.02; Part II (General Provisions), § 2.06 (a) and (d); Part III (Ambient Air Quality Standards), § 3.02 (a) and (b); Part IV (Existing Sources), §§ 4.20, 4.21, 4.23 (formerly § 4.41), 4.25, 4.26, 4.27, and 4.51(a); Part VII (Air Pollution Episode), former § 4.51 (b) through (g) are changed to § 4.51 (c) through (h). Section 7.01(b) and 7.02 (a), (b), and (d); and Appendix A; and, deletion of former §§ 4.20, 4.21, and 4.22 submitted on September 20, 1978 by the Secretary of Commerce and Resources.

(36) Amendments to Part VII (Air Pollution Episode), §§ 7.03 (c) and (e) and 7.04(c); and deletion of Part II (General Provisions), § 2.04(a)(2) as submitted on March 11, 1977 by the Secretary of Commerce and Resources.

(37) Amendments to Part I (Definitions), § 1.02; Part IV (Existing Sources), Rule EX-2, § 4.22; and Part VII (Air Pollution Episode), § 7.03 (a) and (b) as submitted on September 21, 1979 by the Secretary of Commerce and Resources.

2. Section 52.2423 is corrected by revising paragraphs (c) through (f) to read as follows:

**§ 52.2423 Approval status.**

\* \* \* \* \*

(c) With the exceptions set forth in this subpart, the Administrator approves Virginia's plan for the attainment and maintenance of national standards under Section 110 of the Clean Air Act. Furthermore, the Administrator finds that the plan satisfies all requirements of Part D, Title I, of the Clean Air Act as amended in 1977, except as noted below in § 52.2431. In addition, continued satisfaction of the requirements of Part D for the ozone portion of the SIP depends on the adoption and submittal, by each subsequent January following January 1980, of additional RACT

requirements for sources covered by CTGs issued by the previous January.

(d) The portion of the January 11, 1979 SIP submittal pertaining to Smyth County is not approved, pending a possible redesignation of the area to attainment status.

(e) The requirements of § 51.22 are not met with respect to § 4.55(b) of the Virginia regulations, because the regulation is not adequately enforceable. Therefore, § 4.55(b) is disapproved.

(f) Section 4.02(a)(3) of Part IV of the Virginia Regulations for the Control and Abatement of Air Pollution is not considered part of the Applicable plan because it contradicts a previously approved section of the SIP.

3. Section 52.2431 is corrected by adding paragraph (e) to read as set forth below. At 45 FR 55196, August 19, 1980, this addition was erroneously codified as (d).

**§ 52.2431 Control strategy: Carbon monoxide and ozone.**

(e) The nonattainment plan for Carbon Monoxide and Ozone is approved provided that the following conditions are satisfied:

(1) *Margin for Growth.* A system for tracking emissions growth must be submitted.

(2) RACT as expeditiously as practicable. The following regulations contain RACT deficiencies that must be remedied:

(i) The emission limitation on automobile and light duty truck coating in § 4.55(e)(2).

(ii) The exemption from Stage I vapor controls for gasoline service stations with a throughput of less than 20,000 gallons per month, contained in § 4.56(d)(3)(ii) (for Richmond only).

(iii) The general exemption for sources of VOC emissions contained in § 4.54(a)(4)(i), as it applies to § 4.54(c) dealing with Solvent Metal Cleaning (For Richmond and Northern Virginia only).

(iv) The regulations covering cutback asphalt paving in § 4.57(b) must be remedied to correct two deficiencies: first, the maximum allowable solvent content of emulsified asphalt of 15% is not RACT; second, allowing the use of cutback asphalt as a tack coat is not allowed under RACT.

(3) *Inspection and Maintenance (I/M).* Adequate I/M legislation must be submitted. The SIP must include, as a minimum, a schedule for implementation of the I/M program and a clear commitment to implement and enforce the program and to reduce emissions by 25% by 1987. Specifically, the SIP should include a commitment to require

retesting of vehicles initially failing the annual emissions test, along with a commitment to prohibit registration or provide some equally effective mechanism to prevent vehicles not complying with applicable emission requirements from operating on public roads.

(4) *Enforceability.* (i) Acceptable test methods and procedures for determining compliance with §§ 4.54, 4.55, 4.56 and 4.57 must be submitted.

(ii) An acceptable definition of "reasonable further progress" must be submitted.

(5) *Conformity and requirement.* Commitments must be adopted by each lead agency and Metropolitan Planning Organization (MPO) in the Northern Virginia, Richmond, Peninsula, and Southeastern Virginia areas that no project, program, or plan will be approved that does not conform with the SIP. These commitments must be adopted by the designated lead agencies and MPOs, be endorsed by the State, and be submitted to EPA.

(6) *Carbon monoxide.* A "hot spot" analysis for Carbon Monoxide, as well as a line of reasonable further progress, must be submitted for the Carbon Monoxide nonattainment areas.

[FR Doc. 80-40343 Filed 12-24-80; 8:45 am]

BILLING CODE 6560-38-M

## DEPARTMENT OF LABOR

### Office of Federal Contract Compliance Programs

#### 41 CFR Part 60-4

#### Construction Contractors, Affirmative Action Requirements

**AGENCY:** Office of Federal Contract Compliance Programs, Labor.

**ACTION:** Effective date of reporting requirements stayed and goals for female utilization extended.

**SUMMARY:** Final regulations were published in the *Federal Register* of October 3, 1980 (45 FR 65976), clarifying the requirement in 41 CFR 60-4.1 that a non-exempt construction contractor's total construction workforce is covered under 41 CFR Part 60-4 even though some of the contractor's employees perform work on non-Federal or nonfederally assisted construction contracts or subcontracts, and even though such nonfederally related work may occur in geographical areas where the contractor does not currently have work on Federal or federally assisted construction projects. While those regulations took effect on November 3, 1980 (45 FR 65976), increased reporting

requirements (beyond those required prior to November 3, 1980) are stayed pending clearance by the Office of Management and Budget (OMB) under the Federal Reports Act and until further *Federal Register* notice.

In addition, pursuant to 41 CFR Part 60-4.6, the goal for female utilization by Federal and federally assisted construction contractors, which is now 6.9%, is extended until further notice.

**EFFECTIVE DATE:** Both the stay of the reporting requirements and the extension of the goals for female utilization is effective December 30, 1980 and until further notice.

**FOR FURTHER INFORMATION CONTACT:** James Cisco, Acting Director, Division of Program Policy, Office of Federal Contract Compliance Programs, room C-3324, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Telephone (202) 523-9426.

#### SUPPLEMENTARY INFORMATION:

##### (1) Reporting Requirements

On October 3, 1980, the Office of Federal Contract Compliance Programs (OFCCP) published in the *Federal Register* a final rule clarifying the requirement in 41 CFR Part 60-4.1 that a non-exempt construction contractor's total construction workforce is covered under 41 CFR Part 60-4 even though some of the contractor's employees perform work on non-Federal or nonfederally assisted construction contracts or subcontracts, and even though such nonfederally related job work may occur in geographical areas where the contractor does not currently have work on Federal or federally assisted construction projects (45 FR 65976). Published on the same date was a final Notice pursuant to 41 CFR Part 60-4.6 establishing goals under Executive Order 11246, as amended, for minorities working on construction projects located in certain areas (45 FR 65979). Both the final rule and the minority goals are scheduled to become effective on November 3, 1980 (45 FR 65976, 65984).

It has come to the attention of the OFCCP that the final rule (45 FR 65976) and new minority goals (45 FR 65979) may involve the imposition of new reporting requirements which are subject to clearance by the Office of Management and Budget (OMB) pursuant to its authority under the Federal Reports Act.

Specifically, contractors will be required to submit Monthly Employment Utilization Reports (Form CC-257) showing minority utilization (a) on Federal and nonfederal construction work performed in geographic areas

which have heretofore not been subject to minority utilization goals, and (b) on nonfederal construction work performed in geographic areas which have heretofore been subject to minority utilization goals but in which the contractor performs no Federal or federally assisted construction work. Under existing OFCCP practice, construction contractors have generally been submitting Forms CC-257 showing minority utilization only for construction work performed in geographic areas in which they hold Federal or federally assisted construction contracts and in which there has been a minority goal applicable.

In addition, contractors will be required to submit Forms CC-257 showing female utilization on construction work performed in geographic areas in which the contractor performs no Federal or federally assisted construction work. Since the female utilization goals took effect in May 1978, it has been OFCCP's intent that such reporting occur. However, OFCCP's experience has shown that there is confusion in this area. Therefore, for present purposes, OFCCP will treat this as a potential new reporting requirement.

Accordingly, the potential increased reporting burdens, as outlined above, are stayed pending clearance by OMB and further notice to be published in the *Federal Register*. However, all other requirements published on October 3, 1980 (i.e., the applicability of 41 CFR Part 60-4 to a nonexempt construction contractor's total workforce, and goals for minorities working on construction projects in certain areas) shall, as scheduled, take effect on November 3, 1980.

## (2) Goals for Women

OFCCP regulations at 41 CFR 60-4.6 provide, *inter alia*, as follows:

The director, from time to time, shall issue goals and timetables for minority and female utilization \* \* \* which shall cover construction projects, or construction contracts performed in specific geographical areas. The goals \* \* \* shall be published as notices in the *Federal Register* \* \* \*.

Goals for the utilization of women by Federal and federally assisted construction contractors were last published on April 7, 1978 (43 FR 14888, 14900). The April 7, 1978, publication included a 6.9% goal for the period from April 1, 1980, until March 31, 1981. Pursuant to 41 CFR 60-4.6, the 6.9% goal for female utilization is extended until further notice.

Date: December 19, 1980.

Ray Marshall,

Secretary of Labor.

Donald Elisburg,

Assistant Secretary, Employment Standards Administration.

Weldon J. Rougeau,

Director, Office of Federal Contract Compliance Programs.

BILLING CODE 4510-27-M

## GENERAL SERVICES ADMINISTRATION

### Transportation and Public Utilities Services

#### 41 CFR Part 101-40

[FPMR Amendment G-49]

### Transportation and Traffic Management Policies and Procedures

**AGENCY:** Transportation and Public Utilities Service, General Services Administration.

**ACTION:** Final rule.

**SUMMARY:** The General Services Administration (GSA) is changing its policies and procedures in the area of transportation and traffic management. This rule establishes traffic management regulations pertaining to shipments of household goods and personal effects and defines disqualification measures which may be imposed upon carriers which fail to meet the transportation needs and requirements of executive agencies. Further, in exercise of its mandate as traffic manager of executive agencies, GSA prescribes parameters by which agencies are required to obtain rate and/or routing information from specified GSA regional Transportation and Travel Management Divisions. Part 101-40 is amended to achieve a more efficient traffic management program in meeting the transportation needs and requirements of executive agencies.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Joseph M. Napoli, Traffic Programs Branch, Transportation and Public Utilities Service, General Services Administration (TTMP), Washington, DC 20406 (202-275-0654).

**SUPPLEMENTARY INFORMATION:** In the *Federal Register* of October 15, 1979 (44 FR 59247), GSA proposed to amend Part 101-40 by revising existing policies and procedures relative to transportation and traffic management and by adding new procedures providing for temporary exclusion of carriers participating in passenger or freight transportation for

the account of Federal executive agencies.

GSA received comments on the proposal from 18 sources—12 Federal agencies (Department of Agriculture, Department of Energy, Department of Health and Human Services, Department of Housing and Urban Development, Department of Justice, Department of Transportation, Department of the Treasury, Environmental Protection Agency, Federal Emergency Management Agency, National Aeronautics and Space Administration, U.S. General Accounting Office, and Veterans Administration); 3 carrier associations (Association of American Railroads; American Trucking Associations, Inc.; and Air Transport Association of America); 2 railroad companies (Boston and Maine Corporation, and St. Louis-San Francisco Railway Company); and 1 motor carrier (American Freight System, Inc.).

The following is a summary of the major comments received and the response GSA has made in addressing them:

1. Five agencies suggested that exemption from the requirements of § 101-40.301(a) be given for exigencies arising from national disasters, national defense, critical aerospace activity, firefighting emergencies, and isolated areas involved in shipping or receiving household goods.

GSA finds these exigencies appropriate for relief, and exceptions have been stated in this rule.

2. Carriers, in general, took issue with the routing factor "most fuel efficient carrier or mode." These opinions seemed weighted by the subjective interest of the particular carrier or mode. The energy crisis obligates GSA to weight fuel efficiency in proper balance with service, cost and socioeconomic factors. Reliance is placed upon the traffic manager to become sufficiently knowledgeable of a carrier's operating practices and thus enable the manager to identify the most fuel efficient carrier or mode.

3. The carrier industry requested clarification of the conditions which would justify the use of Government-owned equipment.

In deleting the phrase "and when their use will result in substantial economies," GSA accentuates the use of commercial carriers except in cases when suitable common carriage does not exist to meet the Government's service needs or where the use of Government-owned equipment provides the most economical and efficient complement to commercial carriage.

4. The Department of Agriculture suggested that GSA develop courses in managerial aspects of transportation in addition to operational-type training.

GSA will give this suggestion future consideration.

5. In establishing criteria for temporary nonuse, disqualification and suspension of carriers, GSA affected appropriate revisions affording carriers due process.

The addition of Subpart 101-40.2 supersedes FPMR Temporary Regulation A-12, dated January 26, 1978 (43 FR 5436, February 8, 1978) and its Supplement 2 (44 FR 37929, June 29, 1979), which are deleted and removed from the appendix at the end of Subchapter G in 41 CFR Chapter 101. The temporary regulation established procedures for a centralized household goods traffic management program by which GSA provides executive agencies with carrier selections and routings for domestic moves based on cost comparisons.

Sections 101-40.4906-1, 101-40.4906-2, 101-40.4906-3, 101-40.4906-4, are revised to illustrate the current editions of GSA Form 420 (Rev. 9-76), Optional Form 280 (3-80), Standard Form 361 (Rev. 11-79) and the Guidelines for Preparation of Standard Form 361, respectively. Sections 101-40.4906-8 and 101-40.4906-9 are added to illustrate GSA Form 2485 (Rev. 8-80) and GSA Form 3080 (Rev. 8-80), respectively.

The General Services Administration has determined that this regulation will not impose unnecessary burdens on the economy or on individuals and, therefore, is not significant for the purposes of Executive Order 12044.

Accordingly, Part 101-40 is amended as follows:

1. The table of contents for Part 101-40 is amended by revising, adding, reserving, or deleting the following entries:

## PART 101-40—TRANSPORTATION AND TRAFFIC MANAGEMENT

### Subpart 101-40.1—General Provisions

- Sec.
- 101-40.101-1 Freight and passenger transportation management assistance.
  - 101-40.101-2 GSA transportation and traffic management liaison.
  - 101-40.103-2 International transportation.
  - 101-40.105 Use of Government-owned transportation equipment.
  - 101-40.108 Transportation seminars and workshops.
  - 101-40.109 Availability of transportation-related contracts and agreements.
  - 101-40.109-1 Miscellaneous transportation-related contracts and agreements.
  - 101-40.109-3 Mandatory use of transportation-related contracts and agreements.

101-40.110 Assistance to economically disadvantaged transportation businesses.

- 101-40.110-1 Small business enterprises.
- 101-40.110-2 Minority business enterprises.
- 101-40.113 Employees travel and relocation allowances.

### Subpart 101-40.2—Centralized Household Goods Traffic Management

- 101-40.200 Scope of subpart.
- 101-40.201 Applicability.
- 101-40.202 The General Services Administration, Household Goods. Tender of Service (TOS) agreement.
- 101-40.203 Household goods movement evaluation procedures.
- 101-40.203-1 Household goods rate tenders.
- 101-40.203-2 The actual expense method.
- 101-40.203-3 The commuted rate system.
- 101-40.203-4 Cost comparisons.
- 101-40.204 Carrier selection and distribution of shipments.
- 101-40.205 Quality control.
- 101-40.206 Household goods carriers' liability.
- 101-40.207 Household goods loss and damage claims.
- 101-40.208 Disqualification or suspension of household goods carriers.

### Subpart 101-40.3—Rates, Routes, and Services

- 101-40.301 GSA rate and routing services.
- 101-40.303 Application of the standard routing principle.
- 101-40.303-3 Most fuel efficient carrier mode.
- 101-40.303-4 Equitable distribution of traffic among carriers.
- 101-40.305 Transportation negotiations.
- 101-40.305-2 Cost analysis required on substantial movements.
- 101-40.305-4 [Deleted]
- 101-40.305-5 [Deleted]
- 101-40.306-1 Recommended rate tender format.
- 101-40.306-2 Required shipping documents and annotations.
- 101-40.307 [Deleted]
- 101-40.307-1 [Deleted]
- 101-40.307-2 [Deleted]

### Subpart 101-40.4—Temporary Nonuse, Disqualification and Suspension of Carriers

- 101-40.400 Scope of subpart.
- 101-40.401 General.
- 101-40.402 Temporary nonuse of carriers.
- 101-40.402-1 Agency responsibility.
- 101-40.403 Administrative disqualification of carriers.
- 101-40.403-1 Causes and conditions for disqualification.
- 101-40.403-2 Disqualification procedures.
- 101-40.404 Suspension of carriers.
- 101-40.404-1 Causes and conditions for suspension.
- 101-40.404-2 Period of suspension.
- 101-40.404-3 Restrictions during period of suspension.
- 101-40.404-4 Notice of suspension.
- 101-40.404-5 Review of suspension.

### Subparts 101-40.5—101-40.6—[Reserved]

### Subpart 101-40.49 Forms, Formats, and Agreements

- 101-40.4906-1 GSA Form 420, Freight Rate and Route Request/Response.
- 101-40.4906-2 Optional Form 280, Uniform Tender of Rates and/or Charges for Transportation Charges.
- 101-40.4906-8 GSA Form 2485, Cost Comparison for Shipping Household Goods (Commutated Rate System vs. Actual Expense Method).
- 101-40.4906-9 GSA Form 3080, Household Goods Shipment Report.

2. Section 101-40.000 is revised to read as follows:

#### § 101-40.000 Scope of part.

This part prescribes regulations that apply to the freight and passenger transportation and traffic management activities of executive agencies except the Department of Defense. It also covers arrangements for transportation and related services by bill of lading type commitments. These regulations are designed to ensure that all transportation and traffic management activities will be carried out on the basis most advantageous to the Government in terms of economy, efficiency, and service.

3. Subpart 101-40.1 is revised to read as follows:

### Subpart 101-40.1—General Provisions

#### § 101-40.101 Transportation Assistance.

##### § 101-40.101-1 Freight and passenger transportation management assistance.

(a) Executive agencies of the United States shall request assistance from the Department of State on shipments of household goods moving to, from and between foreign countries. The administrative support provided by the Department of State will include carrier cost comparison, carrier selections and quality control assistance.

(b) Executive agencies of the United States without transportation officers or those in need of assistance concerning freight (except shipments of household goods moving to, from and between foreign countries) and passenger transportation management matters shall request assistance from the Transportation and Public Utilities Service (TPUS), General Services Administration, Regional offices having jurisdiction over shipments originating in the following areas:

Region 1, General Services Administration (1TT), J. W. McCormack, P.O. and Court House (Room 820), Boston, MA 02019, FTS 223-2735; COML 617-223-2735; Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont.  
Region 2, General Services Administration (2TT), 26 Federal Plaza, New York, NY

10007, FTS 264-1286, COML 212-264-1286; New Jersey, New York, Puerto Rico, Virgin Islands.

Region 3, General Services Administration (3TT), 9th & Market Streets, Philadelphia, PA 19107, FTS 597-1247, COML 215-597-1247, Delaware, Maryland (except Prince Georges and Montgomery counties), Pennsylvania, Virginia (except Prince William, Loudoun, Fairfax, and Arlington counties).

Region 4, General Services Administration (4TT), 75 Spring Street, SW., Atlanta, GA 30303, FTS 242-5121, COML 404-221-5121; Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee.

Region 5, General Services Administration (5TT), 230 S. Dearborn Street, Chicago, IL 60604, FTS 353-0818, COML 312-353-0818; Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin.

Region 6, General Services Administration (6TT), 1500 E. Bannister Road, Kansas City, MO 64131, FTS 258-3841, COML 816-258-3841; Iowa, Kansas, Missouri, Nebraska.

Region 7, General Services Administration (7TT), 819 Taylor Street, Fort Worth, TX 76102, FTS 334-2733, COML 817-334-2733; Arkansas, Louisiana, New Mexico, Oklahoma, Texas.

Region 8, General Services Administration (8TT), Building 41, Denver Federal Center, Denver, CO 80225, FTS 234-2626, COML 303-234-2626; Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming.

Region 9, General Services Administration (9TT), 525 Market Street (MS 42), San Francisco, CA 94105, FTS 556-3271, COML 415-556-3271; Arizona, California, Hawaii, Nevada.

Region 10, General Services Administration (10TT), GSA Center, Auburn, WA 98002, FTS 396-5411, COML 206-833-6500; Alaska, Idaho, Oregon, Washington.

National Capital Region, General Services Administration (WTT), 7th and D Streets SW., Washington, DC 20407, FTS 472-2003, COML 202-472-2003; Washington, DC, Maryland, (Prince Georges and Montgomery counties), Virginia (Prince William, Loudoun, Fairfax, and Arlington counties).

#### § 101-40.101-2 GSA Transportation and traffic management liaison.

GSA will maintain a continuing transportation and traffic management liaison program with the executive agencies to assist in the establishment, improvement, and maintenance of effective freight and passenger transportation and traffic management policies, practices, and procedures to meet executive agency program requirements.

#### § 101-40.102 Representation before regulatory bodies.

GSA, in behalf of executive agencies, will, as it considers appropriate, institute formal or informal action before Federal or State regulatory bodies with respect to carriers' tariffs, rates, and operating authority matters.

(See also § 101-40.305-1.) Agencies shall submit their requests and recommendations for these actions to the appropriate GSA office specified in § 101-40.101-1.

#### § 101-40.103 Selection of carriers.

##### § 101-40.103-1 Domestic transportation.

Preferential treatment, normally, shall not be accorded to any commercial mode of transportation (motor, rail, air, or water) or to any particular commercial carrier when arranging for domestic transportation services. However, where for valid reasons, a particular mode of transportation or a particular carrier within that mode must be used to meet specific program requirements and/or limitations, only that mode or carrier shall be considered. Examples of valid reasons for considering only a particular mode or carrier are (a) where only a certain mode of transportation or individual carrier is able to provide the needed service or is able to meet the required delivery date; and (b) where the consignee's installation and related facilities preclude or are not conducive to service by all modes of transportation. (See also § 101.40.303-1.)

##### § 101-40.103-2 International transportation.

(See § 1-1.323 of this title and 4 CFR 52.2 for a certificate required for nonuse of U.S.-flag vessels or U.S.-flag certificated air carriers.)

(a) *U.S.-flag ocean carriers.* Arrangements for international ocean transportation services shall be made in accordance with the provisions of section 901(b) of the Merchant Marine Act of 1936, as amended (46 U.S.C. 1241 (b)), concerning the use of privately owned U.S.-flag vessels. (See also § 5A-19.108 of this title for implementing policies and procedures followed by the General Services Administration.)

(b) *U.S.-flag certificated air carriers.* Arrangements for international air transportation services shall be made in accordance with the provisions of section 5 of the International Air Transportation Fair Competitive Practices Act of 1974, dated January 3, 1975 (49 U.S.C. 1517), which requires the use of U.S.-flag certificated air carriers for international travel of persons or property to the extent that service by these carriers is available.

##### § 101-40.104 Insurance against transportation hazards.

The policy of the Government with respect to insurance of its property while in the possession of commercial carriers is set forth in § 1-19.107 of this title.

#### § 101-40.105 Use of Government-owned transportation equipment.

Generally, the preferred method of transporting property for the Government is through use of the facilities and services of commercial carriers. However, under certain circumstances, Government vehicles may be used when they are available. They may be used for such purposes as local transfer of property, pickup or delivery services which are not performed by the commercial carriers in connection with the line-haul transportation, transportation of property to meet emergencies, and accomplishment of program objectives which cannot be attained through use of commercial carriers.

#### § 101-40.106 Reports.

Each executive agency shall submit reports concerning its transportation procedures, practices, and operations to the Transportation and Public Utilities Service, General Services Administration (TT), Washington, DC 20406, whenever so requested or as prescribed in the individual sections of this subpart or as provided in each specific request.

#### § 101-40.107 Surveys.

As necessary and after adequate advance notice to the agencies affected, or upon request of agencies, GSA will make onsite surveys of transportation activities and will make recommendations, when necessary, for changes in agencies' policies, standards, practices, and procedures to improve transportation concepts and operations at all levels.

#### § 101-40.108 Transportation seminars and workshops.

GSA will, from time to time, conduct transportation seminars and workshops for the benefit of executive agency personnel assigned functions relating to the movement of persons or materials. The objective of this training is to broaden traffic management knowledge and experience within the agency and to economy of operations. Agencies desiring assistance should direct their request to the Assistant Commissioner, Office of Transportation and Travel Management (TT), Transportation and Public Utilities Service, General Services Administration, Washington, DC 20406.

**§ 101-40.109 Availability of transportation-related contracts and agreements.****§ 101-40.109-1 Miscellaneous transportation-related contracts and agreements.**

(a) The Transportation and Public Utilities Service, General Services Administration, will, as considered necessary, enter into agreements or contracts for transportation and related services, including but not limited to stevedoring, passenger charters, storage, drayage, packing, marking, ocean freight forwarding, accessorial services, demurrage, and weighing. (See § 101-41.304-2 for the use of commercial forms and procedures instead of Government bills of lading.) These contracts and agreements will be made for and in behalf of all executive agencies.

(b) The availability of these contracts and agreements will be announced through GSA bulletins which will outline the specific contractual services and the terms of the agreements. After distribution of these bulletins, GSA will furnish copies of the contracts and agreements to agencies upon request.

**§ 101-40.109-2 Office relocation contracts.**

(a) In accordance with the provisions of Part 101-17, Assignment and Utilization of Space, prior approval is required from the Public Buildings Service, GSA, for agencies desiring to relocate office space which has been assigned by GSA.

(b) The Transportation and Public Utilities Service, GSA, offices specified in § 101-40.101-1 will enter into term contracts for office relocations, estimated to cost \$5,000 or less, in cities where it is determined that these contracts are warranted. On single office moves exceeding \$5,000, GSA will arrange to contract for the required moving services under competitive bidding procedures. The availability of term contracts for office relocations will be announced through GSA bulletins as indicated in § 101-40.109(b).

(c) In cities where term contracts are not available and where an executive agency anticipates an office relocation estimated to cost \$1,500 or more, GSA will enter into, in behalf of the agency, a specific relocation contract or other appropriate relocation arrangement. As soon as possible before the move, preferably 90 calendar days, the appropriate GSA office specified in § 101-40.101-1 shall be contacted and furnished with pertinent information concerning the proposed relocation, such as the origin, destination, moving date, property to be moved, and the agency relocation coordinator.

Note.—Arrangements for office relocations expected to cost less than \$1,500 may be handled by the agency requiring the services.

(d) Whether an office relocation is made under a GSA term moving contract or under a specific contract entered into by GSA in behalf of an individual agency, the agency being relocated shall make operational arrangements directly with the moving contractor. These arrangements shall include: (1) Issuing the purchase order or placing the work order; (2) arranging for direct billing; (3) supervising the actual move; (4) processing loss and damage claims, if any; (5) providing certification on the contractor's invoices; and (6) processing the invoice for direct payment to the contractor. The GSA contracting office shall be notified upon completion of the relocation and is prepared to provide technical assistance as necessary.

**§ 101-40.109-3 Mandatory use of transportation-related contracts and agreements.**

(a) When a contract or agreement for transportation-related services, including office relocations, is awarded in response to an agency's specific request, the use of the contract or agreement is mandatory for that requesting agency.

(b) When term contracts or agreements for transportation-related services, including office relocations, are entered into and awarded by GSA for use "as required," the term contract or agreement is mandatory upon all executive agencies; however, exceptions to the mandatory use of term contracts or agreements may be granted by the appropriate GSA office cited in § 101-40.101-1.

**§ 101-40.110 Assistance to economically disadvantaged transportation businesses.****§ 101-40.110-1 Small business enterprises.**

Consistent with the policies of the Government with respect to small business as set forth in Subpart 1-1.7 of this title, executive agencies shall place with small business concerns a fair proportion of the total purchases and contracts for intrastate and interstate transportation and related services, such as packing and crating, loading and unloading, and local drayage.

**§ 101-40.110-2 Minority business enterprises.**

Consistent with the policies of the Government stated in Subpart 1-1.13 of this title, minority business enterprises shall have the maximum practicable opportunity to participate in the performance of Government purchases

and contracts. Agencies shall encourage transportation-related minority enterprises regardless of the mode of transportation to identify themselves and provide services that will support the agencies' transportation requirements. The GSA offices cited in § 101-40.101-1 may be contacted for assistance, if needed.

**§ 101-40.111 Maintenance of tariff files.**

(a) The Transportation and Public Utilities Services, National Capital Region, General Services Administration (WTT), Washington, DC 20407, shall maintain a master file of carrier tariffs covering all modes and methods of transportation commonly used by executive agencies. Each of the 10 other Transportation and Public Utilities Service, GSA, regional offices will maintain a tariff file sufficient to meet the normal requirements of the executive agencies located within the area of responsibility of the GSA regional office.

(b) Executive agencies may maintain only those tariffs necessary to meet their routine operational requirements. Agencies may use GSA tariff files to meet unusual or abnormal transportation needs; or, alternatively, may request GSA to furnish rates, freight or passenger routings, or other tariff information. (See § 101-40.301 for use of GSA-furnished rates and routes.)

**§ 101-40.112 Transportation factors in the location of Government facilities.**

(a) Transportation rates, charges, and commercial carrier transportation services shall be considered and evaluated before selecting new site locations and during the planning and construction phases in the establishment of leased or relocated Government installations or facilities.

(b) If changes in the location, relocation or deactivation of Government installations or facilities are contemplated and will result in significant changes in the movement of property, executive agencies shall use the traffic management services of GSA to ensure that consideration is given to the various transportation factors that may be involved in this relocation or deactivation.

**§ 101-40.113 Employee travel and relocation allowances.**

The General Services Administration has the responsibility to prescribe and promulgate regulations governing employee travel and relocation allowances. These allowances are published in the Federal Travel Regulations and the Commuted Rate Schedule for Transportation of

Household Goods. These regulations are incorporated by reference into Part 101-7. Amendments are made to these regulations from time to time as conditions warrant. Suggestions or questions concerning regulations governing employee travel and relocation allowances may be addressed to the Director, Federal Travel Management Division, Transportation and Public Utilities Service, General Services Administration (TTT), Washington, DC 20406.

4. Subpart 101-40.2 is added to read as follows:

**Subpart 101-40.2—Centralized Household Goods Traffic Management**

**§ 101-40.200 Scope of subpart.**

This subpart prescribes regulations concerning the movement of household goods and personal effects of Government employees (and their families) who are eligible for relocation in connection with their employment. Under the centralized household goods traffic management program, GSA will provide agencies with cost comparisons, the names of carriers eligible to handle specific shipments, and requested administrative support related to the Government employees' household goods movements.

**§ 101-40.201 Applicability.**

(a) This subpart applies to executive agencies. In addition to the Department of Defense, uniformed personnel of the U.S. Coast Guard are exempt from this subpart.

(b) Cost comparisons between the commuted rate system and the actual expense method, as required in § 101-40.203-4, apply only to movements within the conterminous United States.

**§ 101-40.202 The General Services Administration Household Goods Tender of Service (TOS) agreement.**

As part of the centralized household goods traffic management program, GSA has developed a master household goods tender of service (TOS) agreement. This agreement establishes carrier service and performance standards which participating carriers agree to provide. Commercial carriers who desire to participate in this program must enter into an individual TOS agreement with GSA, acting in behalf of executive agencies. Carriers that desire to enter into a TOS agreement or agencies desiring additional information should contact the Office of the Assistant Commissioner for Transportation and Travel Management, General Services Administration (TTMS), Washington, DC 20406.

**§ 101-40.203 Household goods movement evaluation procedures.**

**§ 101-40.203-1 Household goods rate tenders.**

GSA will accept or reject household goods carriers' rate tenders (see § 101-40.306) on behalf of executive agencies.

(a) *Interstate shipments.* Household goods carriers' TOS agreements and individual carrier rate tenders covering interstate shipments shall be submitted to the Office of the Assistant Commissioner for Transportation and Travel Management, General Services Administration (TTMS), Washington, DC 20406.

(b) *Intrastate shipments.* Household goods carriers' TOS agreements and individual carrier rate tenders covering intrastate shipments shall be submitted to the appropriate GSA office specified in § 101-40.101-1 which has responsibility over the State specified in the rate tender.

**§ 101-40.203-2 The actual expense method.**

(a) For the purpose of the centralized household goods traffic management program described in this Subpart 101-40.2, authorized shipments of Government employees' household goods moving under a Government bill of lading (GBL) are classified as "actual expense method" shipments. Under this method the appropriate GSA office specified in § 101-40.101-1 that processes the shipment (1) furnishes the cost comparison (see § 101-40.230-4), (2) specifies the name(s) of carrier(s) eligible to handle the shipment, and (3) will assist in an advisory capacity in filing loss and damage claims, if requested. Under this method, the Government, not the employee, is considered as the shipper, and the Government reimburses the carrier for the applicable transportation charges. The actual cost of transportation, including related accessorial carrier services, falling within the employee's authorized weight allowance (11,000 pounds for employees with immediate families; 7,500 pounds for employees without immediate families) shall be allowed at the Government's expense. Under the actual expense method, the shipment is made using a GBL. Agencies are responsible for preparing the GBL, booking the shipment and filing loss and damage claims.

(b) When an agency makes the final determination that the actual expense method will be used, the Government's financial obligation for the shipment of the employee's household goods is established. Once the actual expense method is authorized as the most

economical means of shipment and the employee chooses to move all or part of the household goods by some other means, reimbursement will be limited to the cost that would have been incurred by the Government if the shipment had been made in one lot from one origin to one destination by the available low cost carrier on a Government bill of lading.

(c) When an employee chooses, for personal reasons, to use a higher cost carrier than the carrier selected by the Government, excess costs will be paid by the Government directly to the carrier and then collected from the employee. Agencies are cautioned to counsel employees as to their responsibilities under this alternative.

(d) When an employee chooses to use a rental truck, trailer or private conveyance, reimbursement will be limited to the actual costs incurred (e.g., truck rental, material handling equipment, packaging materials, gasoline, toll charges, etc.) not to exceed the maximum amount authorized in paragraph (b) above.

**§ 101-40.203-3 The commuted rate schedule.**

The commuted rate schedule is published in GSA Bulletin FPMR A-2 and contains allowances for reimbursement of Government employees who are authorized to transport their household goods at Government expense. In addition to transportation allowances, the commuted rate schedule includes allowances for various related accessorial expenses, including packing and crating, storage-in-transit, carrier labor charges, appliance servicing, and piano/organ handling. Under the commuted rate schedule the employee is responsible for making all arrangements with the carrier; filing loss and damage claims, if any, with the carrier; and making payment to the carrier after the shipment has been completed. Under the commuted rate schedule, the shipment is moved using a commercial bill of lading (CBL). The use of household goods rate tenders (see § 101-40.203-1) is not authorized when household goods are shipped under the commuted rate schedule.

**§ 101-40.203-4 Cost comparisons.**

(a) As stated in paragraph 2-8.3c(4)(a) of the Federal Travel Regulations (FPMR Part 101-7), the commuted rate system shall be used for individual employee transfers without consideration being given to the actual expense method, except that the actual expense method may be used if the actual costs to be incurred by the Government for packing

and other accessorial services are predetermined (at least as to price per 100 pounds) and if that method is expected to result in a real savings to the Government of \$100 or more. Under the centralized household goods traffic management program, agencies shall obtain cost comparisons from the appropriate GSA, TPUS, office specified in § 101-40.101-1.

(b) Requests for cost comparisons shall be made as far in advance of the moving date as possible (preferably 30 calendar days) and shall contain the following information:

- (1) Name of employee to be moved;
- (2) Origin city, county, and State;
- (3) Destination city, county, and State;
- (4) Anticipated or actual date household goods are to be picked up;
- (5) Estimated weight of shipments;
- (6) Number of days storage-in-transit is required (if applicable); and
- (7) Other pertinent data.

(c) Agencies should use GSA Form 2485, Cost Comparison for Shipping Household Goods (Commuted Rate System vs. Actual Expense Methods) for this purpose. (See § 101-40.4906-8.) In case of an emergency or an imminent moving date (less than 10 workdays), these details may be transmitted to GSA by phone. If information is received by phone, the response will be made by phone when requested. Regardless, all cost comparisons and carrier selection information will be confirmed in writing by GSA. Agencies will make the final determination as to the method of shipment (actual expense method or commuted rate system), based on the results of the cost comparison furnished by GSA.

**§ 101-40.204 Carrier selection and distribution of shipments.**

Results of the cost comparison will be furnished to the requesting agency together with the names and points of contract for at least three qualified carriers eligible to handle the shipment. If the rates of these carriers differ, the carrier offering the lowest rate should be used by the requesting agency. Carriers offering higher rates or charges should be used only if the less costly carrier cannot accept the shipment.

**§ 101-40.205 Quality control.**

(a) When the GSA, TPUS, Office specified in § 101-40.101-1 furnishes a cost comparison indicating that the actual expense method is less costly, a GSA Form 3080, Household Goods Shipment Report (See § 101-4906-9) shall be provided together with GSA Form 2485 to the requesting agency. GSA Form 3080 is a mailable form that contains a self-addressed portion, which

shall be completed by the moving employee. The agency's employee should be instructed to complete the GSA Form 3080, indicating the quality of performance of the household goods carrier upon completion of the household goods move, and to mail it to the GSA office which provided the cost comparison. Information compiled from completed reports will be used by GSA to monitor carrier performance and to determine whether suspension or disqualification actions should be considered as provided in § 101-40.208.

(b) Agencies may submit other documented instances of inadequate carrier service or performance to GSA, TPUS, offices specified in § 101-40.101-1. Sufficient details must be furnished to identify specific shipments.

**§ 101-40.206 Household goods carriers' liability.**

(a) Ordinarily, it is the policy of the Government to assume its own risks of loss. (See also § 1-19.107 of this title.) This policy also applies to personal property during transportation. Therefore, when a Government employee's household goods are shipped under the commuted rate system using a CBL or under the actual expense method using a GBL, they are based on a limited carrier liability of 60 cents per pound per article.

(b) In the event of loss or damage, the employee's recovery from the carrier is restricted to this limited carrier liability. Carriers have tariff provisions that provide increased liability at a valuation of \$1.25 times the weight of the shipment in pounds or a higher lump sum according to the employee's value of the shipment. These higher valuations are generally available at 50 cents per \$100 of valuation. However, the added cost for the increased carrier liability is not reimbursable by the Government but must be borne by the employee. Under the actual expense method, if the employee requests a higher valuation and agrees in writing, the excess cost will be paid by the Government and then collected from the employee. This information applies to interstate shipments. Carrier liability and increased valuation charges may differ on intrastate shipments. For these shipments, the appropriate GSA office should be contacted.

**§ 101-40.207 Household goods loss and damage claims.**

Claims for loss or damage to household goods will normally be filed and processed with the destination or delivering carrier as part of the bill of lading contract between the carrier and the shipper. When shipments are made

under the commuted rate system using a CBL, the employee, as the shipper, is responsible for filing claims. When shipments are made under the actual expense method using a GBL, the issuing agency, as the shipper, will assist the employee in filing claims. Under the Military and Civilian Employees' Claims Act of 1964, as amended (31 U.S.C. 241), employees may file claims against the United States for not more than \$15,000 for damage to or loss of personal property incident to the employee's service; this applies to commuted rate moves as well as actual expense moves. If the carrier's liability stated in § 101-40.206 is less than the loss or damage sustained by the employee, executive agencies may use the provisions of this act to more fully compensate the employee. Agencies should advise their employees regarding the use of this act for reimbursement of loss and damage to household goods shipments using a CBL or GBL. Additional information concerning processing loss and damage claims may be obtained from the appropriate GSA, TPUS, office specified in § 101-40.101-1.

**§ 101-40.208 Disqualification or suspension of household goods carriers.**

Based on information obtained from completed GSA Forms 3080 or documented instances of other service complaints or deficiencies, GSA, TPUS offices or executive agencies may disqualify or suspend household goods carriers in accordance with the procedures specified in § 101-40.4.

5. Subpart 101-40.3, with a new caption, is revised to read as follows:

**Subpart 101-40.3—Rates, Routes, and Services**

**§ 101-40.300 Scope of subpart.**

This subpart prescribes regulations governing the determination and use of rates and related data in the transportation of persons and property for the Government; selection of the mode of transportation and the carrier or carriers within the mode; and negotiations of classification ratings, rates, and services.

**§ 101-40.301 GSA rate and routing services.**

(a) Except as otherwise provided in this subpart, executive agencies shall obtain rate and/or routing information from the appropriate GSA transportation office specified in § 101-40.101-1 when they have a planned group of 25 or more individuals traveling at one time from the same origin to the same destination or when they have freight shipments that fall within the following categories:

Shipment category	Shipment weight
Surface shipments (other than uncrated used household goods) (See 101-40.305-3(a) for exemption).	10,000 pounds and over or shipments that occupy the full visible capacity (see note) of a railcar or intercity motor vehicle regardless of weight.
Air shipments	1,000 pounds and over.
Uncrated used household goods shipments.	All shipments, regardless of weight (except will not apply on shipments moving in foreign commerce). (See Subpart 101-40.2 for shipments moving within the conterminous U.S.)

**Note.**—Full visible capacity generally means that quantity of freight which in the manner loaded so fills a vehicle that no additional article in the shipping form tendered identical in size to the largest article in the shipment can be loaded in or on the vehicle. Consult governing tariffs for precise definition and application.

(1) Exemption to the provisions of § 101-40.301(a) is granted to the Federal Emergency Management Agency (FEMA), Department of Energy (DOE), National Aeronautics and Space Administration (NASA) and United States Department of Agriculture (USDA) to the following extent:

FEMA Initial positioning of mobile homes shipped in response to disasters.  
 DOE Priority energy and classified defense and nuclear waste management shipments.  
 NASA Shipments of key, critical items necessary to the success of space and aerospace research, development, acquisition, flight or launch activities.  
 USDA Emergency shipments of forest fire fighting materials and equipment.  
 Household goods shipments to and from isolated areas.

(2) To meet other transportation exigencies of a critical and recurring nature, executive agencies including those agencies exempted to the extent noted in paragraph (1) of this section may request the GSA transportation office having jurisdiction (See § 101-40.101-1) to grant relief from the routing requirements of this section. In a local emergency, which precludes the requesting of routing instructions in accordance with the requirements of this section, routing by any mode may be made without prior approval. Requests for exemption shall be in writing, and the GSA transportation office will accept or deny the request by written instructions to the requesting agency. Exemptions will apply for a duration of time not to exceed one year, however, on written request an exemption may be renewed or extended.

(b) Agencies shall submit requests for rate and route information to the appropriate regional office, Transportation and Public Utilities Service, General Services Administration, listed in § 101-40.101-1. Agencies may telephone urgent requests to GSA. Replies will be made by telephone and confirmed upon request

by the use of GSA Form 420 or GSA 2485, as appropriate.

(1) On shipments that are rated or routed by GSA, agencies will furnish the necessary details concerning the shipment as far in advance of the proposed shipping date as possible. For freight shipments, GSA Form 420, Freight Rate and Route Request/Response (see § 101-40.4906-1) may be used for this purpose. The procedures in Subpart 101-40.2 shall be followed when requesting household goods rate and route information on shipments moving within the conterminous United States.

(2) To eliminate the need for repetitive routing instructions, the GSA transportation offices listed in § 101-40.101-1 may issue standing route orders to cover normal repetitive movements (two or more shipments per month) of specific items between specified points by any mode of transportation. Ordinarily, a standing route order will be issued when the origin, destination, commodity(ies) and frequency of shipments constitute a repetitive traffic pattern. The GSA transportation office will maintain a standing route order file and review routings at 60 day intervals from the date of their issuance to assure current application of rates, ratings, routes and classification. When required by changed conditions, GSA shall provide the requesting agency with revised routing instructions.

(c) Agencies are encouraged, but not required, to request GSA-furnished rate or routing information for their freight shipments that are less than the shipment weights specified in paragraph (a) of this section.

(d) Executive agency shippers will comply with all state and local, as well as Federal, laws and regulations relating to vehicular size and weight limitations.

#### § 101-40.302 Standard routing principle.

Shipments shall be routed using the mode of transportation, or individual carrier or carriers within the mode, that can provide the required service at the lowest overall delivered cost to the Government.

#### § 101-40.303 Application of the standard routing principle.

In the application of the standard routing principle, the major factors to be considered are, in the order of their importance, satisfactory carrier service, overall cost considerations, most fuel efficient carrier/mode, and equitable distribution of traffic among carriers.

#### § 101-40.303-1 Service requirements.

The following factors shall be considered in determining whether a carrier or mode of transportation can

meet an agency's transportation service requirements for each individual shipment:

- Availability and suitability of carrier equipment;
- Shipping and receiving facilities at origin and destination;
- Pickup and/or delivery service (including inside pickup or delivery), if required;
- Availability of required accessorial and special services, if needed;
- Estimated time in transit;
- Record of past performance of the carrier; and
- Transit privileges when available.

#### § 101-40.303-2 Cost considerations.

When developing cost comparisons to determine the most economical routing of shipments consistent with service requirements, consideration shall be given to costs of packing, loading and unloading, bracing, blocking, extra handling, drayage, pickup and delivery, and other accessorial services, as well as the line-haul rate.

#### § 101-40.303-3 Most fuel efficient carrier/mode.

When more than one mode, or more than one carrier within a mode, can satisfy the service requirements of a specific shipment at the same lowest aggregate delivered cost, the carrier/mode determined to be the most fuel efficient shall be selected. In determining the most fuel efficient carrier/mode, consideration shall be given to such factors as use of the carrier's equipment in "turn around" service, proximity of carrier equipment to the shipping activity, and ability of carriers to provide the most direct service to the destination points.

#### § 101-40.303-4 Equitable distribution of traffic among carriers.

When more than one mode of transportation, or more than one carrier within a mode, can provide equally satisfactory service at the same overall cost and all modes are equally fuel efficient, the traffic shall be distributed as equally as practicable among the modes and among the carriers within the modes.

#### § 101-40.304 Description of property for shipment.

(a) Each shipment shall be described on the bill of lading or other shipping document as specified by the governing freight classification, carrier's tariff, or rate tender. Shipments shall be described as specifically as possible. Trade names such as "Foamite" or "Formica" or general terms such as "vehicles," "furniture," or "Government

supplies," shall not be used as bill of lading descriptions.

(b) A shipment containing hazardous materials, such as explosives, flammable liquids, flammable solids, oxidizers, or poison A or poison B, shall be prepared for shipment and described on bills of lading or other shipping documents in accordance with the Department of Transportation Hazardous Materials Regulations, 49 CFR Parts 170 thru 177.

(c) Agency requests for specific freight descriptions shall be submitted to the appropriate Transportation and Public Utilities Service office as listed in § 101-40.101-1.

#### § 101-40.305 Transportation negotiations.

##### § 101-40.305-1 Negotiations by GSA.

Except as provided in § 101-40.305-3, GSA will conduct all transportation negotiations for executive agencies to establish or modify rates, fares, charges, ratings, services, and the rules or regulations pertaining thereto.

##### § 101-40.305-2 Cost analysis required on substantial movements.

Except as provided in § 101-40.305-3, executive agencies shall submit to the appropriate GSA regional Transportation and Public Utilities Service office, as listed in § 101-40.101-1, complete information concerning planned transportation so that a cost analysis may be made to determine whether negotiation is appropriate. This information should be submitted as far in advance of the planned transportation as possible. The information supplied shall be detailed and shall include but not be limited to the number of individuals traveling as a group, property characteristics (those requiring shipment in bags, boxes or bulk; hazardous properties; weight; dimension; density; value; and susceptibility to damage), origin, destination, number of shipments, weight per shipment, planned shipping schedule, and planned required delivery date. The provisions of this subsection shall apply to all transportation payable by the Government.

##### § 101-40.305-3 Negotiations by other executive agencies.

Except for the transportation of an employee's personal household goods and the relocation of offices, the executive agencies are authorized to initiate and conduct negotiations on their own behalf under the following conditions:

(a) When the total planned quantity of property to be shipped does not exceed 100,000 pounds per shipment or when the known aggregate of several

shipments will not exceed 100,000 pounds.

**Note.**—Agencies making surface shipments under agency-negotiated rates are exempt from obtaining GSA rate and routing information as required in § 101-40.101-1.(1).

(b) Except as otherwise provided in the Federal Property Management Regulations A-15, or as it may be amended, when planned group travel, under Standard Form 1169, U.S. Government Transportation Request, consists of fewer than 25 individuals traveling at one time from the same origin to the same destination.

(c) When the planned shipment is less than that which would require the assessment of carload or truckload rates.

(d) When approval to negotiate is granted by the General Services Administration (TT), Washington, DC 20406, or the appropriate GSA regional Transportation and Public Utilities office.

**Note.**—§ 101-40.305-3 does not prohibit executive agencies from seeking GSA assistance in negotiations.

#### § 101-40.306 Rate tenders to the Government.

Under the provisions of section 10721 (formerly section 22) of the Interstate Commerce Act (49 U.S.C. 10721), common carriers are permitted to submit tenders to the Government which contain rates lower than published tariff rates available to the general public. In addition, rate tenders may be applied to shipments other than those made by the Government provided the total benefits accrue to the Government; that is, provided the Government pays the charges or directly and completely reimburses the party that initially bears the freight charges (Interpretation of Government Rate Tariff for Eastern Central Motor Carriers Association, Inc., 332 I.C.C. 161 (1968)).

##### § 101-40.306-1 Recommended rate tender format.

(a) Only those rate tenders which have been submitted by the carriers in writing and which apply to shipments of the U.S. Government shall be considered for use by executive agencies. Carriers should be encouraged to use Optional Form 280, Uniform Tender of Rates and/or Charges for Transportation Services, illustrated in § 101-40.4906-2, when preparing and submitting rate tenders to the Government. Rate tenders that are ambiguous in meaning shall be resolved in favor of the Government; therefore, explicit terms and conditions are necessary to preclude misunderstandings by the parties to the rate tender.

(b) Carriers may purchase Optional Form 280 from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or print it commercially. When ordering this form from the Superintendent of Documents, specify national stock number 7540-01-092-8057. When printing this form commercially, carriers shall ensure that the form conforms to the same size, wording, and arrangement of the approved optional form and, while no minimum grade or paper is set, carriers shall provide a reasonable grade of paper stock.

#### § 101-40.306-2 Required shipping documents and annotations.

(a) To qualify for transportation under section 10721 rates, property must be shipped by or for the Government on:

(1) Government bills of lading;

(2) Commercial bills of lading endorsed to show that these bills of lading are to be converted to Government bills of lading after delivery to the consignee; or

(3) Commercial bills of lading showing that the Government is either the consignor or the consignee and endorsed with the following statement:

"Transportation hereunder is for the (name the specific agency, such as the General Services Administration) and the actual total transportation charges paid to the carrier(s) by the consignor or consignee are assignable to, and are to be reimbursed by, the Government."

(b) When a rate tender is used for transportation furnished under a cost-reimbursable contract, the following endorsement shall be used on covering commercial bills of lading:

"Transportation hereunder is for the (name the specific agency, such as the General Services Administration), and the actual total transportation charges paid to the carrier(s) by the consignor or consignee are to be reimbursed by the Government, pursuant to cost reimbursable contract number ( ).

This may be confirmed by contacting the agency representative at (name and telephone number)." (See 332 ICC 161.)

(c) To ensure proper application of a Government rate tender on all shipments qualifying for their use, the issuing officer shall show on the bills of lading covering these shipments the applicable rate tender number and carrier identification, such as, "ABC Transportation Company, Tender ICC No. 374." In addition, if commercial bills of lading are used, they shall be endorsed as specified in paragraphs (a) or (b) of this section, as necessary.

#### § 101-40.306-3 Distribution.

Each agency receiving rate tenders shall promptly submit one signed copy

to the Transportation and Public Utilities Service, General Services Administration WTT, Washington, DC 20407. Also, two copies (including at least one signed copy) shall be promptly submitted to the General Services Administration (TAD), Chester A. Arthur Building, Washington, DC 20406.

**§ 101-40.306-4 Bill of lading endorsements.**

To ensure application of Government rate tenders to all shipments qualifying for their use, bills of lading covering the shipments shall be endorsed with the applicable tender or quotation number and carrier identification; e.g., "Section 10721 quotation ABC Transportation Company I.C.C. No. 143." In addition, where commercial bills of lading are used rather than Government bills of lading, the commercial bills of lading shall be endorsed in conformance with the provisions set forth in § 101-40.306-2(a). (For specific regulations covering transportation generated under cost-reimbursement type contracts, see § 1-19.109 of this title.)

6. Subpart 101-40.4 is added to read as follows:

**Subpart 101-40.4—Temporary Nonuse, Disqualification, and Suspension of Carriers**

**§ 101-40.400 Scope of subpart.**

This subpart prescribes policies and procedures governing the temporary nonuse, disqualification, and suspension of carriers transporting freight, household goods, or passengers for the account of executive agencies.

**§ 101-40.401 General.**

Temporary nonuse, disqualification, and suspension are measures taken to exclude carriers from participating in GSA routed or unrouted movements of persons or freight under tariffs, tenders of service, commercial or Government bills of lading, and similar arrangements. To ensure that the Government derives the benefits of full and free competition of interested carriers, temporary nonuse, disqualification, and suspension shall not apply for any period of time longer than necessary to protect the interests of the Government.

**§ 101-40.402 Temporary nonuse of carriers.**

GSA, TPUS regional offices or other executive agencies may place carriers that serve the agency in a temporary nonuse status for a maximum period of 30 calendar days when the carriers do not show a willingness or ability to meet the transportation service requirements of the agency. (Consecutive 30 calendar

day nonuse periods shall require advance approval of the Director, Transportation Management Division, TPUS, General Services Administration (TTM), Washington, DC 20406, and shall not be used to avoid the procedures and requirements of § 101-40.403 or § 101-40.404.) No component of an executive agency shall apply temporary nonuse actions against a carrier for a violation made by that same carrier in serving a different component of the same or another agency. Compliance with applicable laws and regulations that preclude arbitrary or capricious actions, among other things, rests upon the agency placing a carrier in this status.

**§ 101-40.402-1 Agency responsibility.**

(a) Agencies placing a particular carrier in a temporary nonuse status shall fully document that action with specific instances of carrier nonperformance, which may include but are not limited to the causes and conditions set forth in § 101-40.403-1. The documentation shall also include information showing that the carrier was provided with prior notices of service deficiencies and was afforded a reasonable opportunity to correct or explain these deficiencies.

(b) The carrier shall, by certified mail, with return receipt requested, be notified by the agency concerning the proposed 30 calendar day temporary nonuse status. This notice shall include:

- (1) The proposed period of nonuse;
- (2) The reasons for placing the carrier in a temporary nonuse status;
- (3) The corrective actions that may be taken by the carrier for reinstatement;
- (4) The time period of 7 calendar days afforded the carrier to present information refuting the proposed temporary nonuse status (information from the carrier must be received by the agency within 7 calendar days from the date notice is received by the carrier. If the carrier presents information within the allotted time, the agency must determine within 7 calendar days of receiving the carrier's data whether to place the carrier in temporary nonuse status).
- (5) The date on which temporary nonuse status commences in the event that information from the carrier is not received by the agency within the 7 calendar day period provided in paragraph (4) of this section.

(c) The agency shall review the carrier's reply, and shall prepare a response according to the facts presented. The agency's decision is administratively final.

(d) Copies of the notification to the carrier of the proposed temporary nonuse status and supporting

documentation shall be forwarded immediately to: Director, Transportation Management Division, Transportation and Public Utilities Service, General Services Administration (TTM), Washington, DC 20406.

(e) The agency shall also furnish the Director, Transportation Management Division, Transportation and Public Utilities Service, General Services Administration (TTM), Washington, DC 20406, a recommendation for disqualification or suspension, if considered necessary. If further action is warranted, appropriate measures in accordance with the provisions of this Subpart 101-40.4 will be initiated.

**§ 101-40.403 Administrative disqualification of a carrier.**

GSA may, in the public interest, disqualify a carrier from participation in traffic for any of the causes and under any of the conditions set forth in § 101-40.403-1.

**§ 101-40.403-1 Causes and conditions for disqualification.**

The causes and conditions for which a carrier may be disqualified by GSA are set forth in paragraphs (a) through (h) of this § 101-40.403-1.

(a) Willful violations of the terms of the tariffs, tenders of service, commercial or Government bills of lading, or similar arrangements determining the relationship of the parties.

(b) A record of failure to perform or of unsatisfactory performance in accordance with the terms of tariffs, tenders of service, commercial or Government bills of lading, or similar arrangements determining the relationship of the parties. Failure to perform or unsatisfactory performance includes but is not limited to the following:

- (1) Failure to meet requested packing/pickup dates;
- (2) Deliveries exceeding time-in-transit standards when established by the Government; e.g., the General Services Administration household goods tender of service and transit times established for shipments from Federal Supply Service distribution facilities;
- (3) Failure to meet required delivery dates on Government or commercial bills of lading;
- (4) Failure to furnish and use clean and safe equipment;
- (5) Violation of Department of Transportation (DOT) hazardous materials regulations;
- (6) Mishandling of freight; e.g., damaged or missing transportation seals or improper loading, blocking, packing, or bracing;

- (7) Excessive loss or damage;
- (8) Improper routing;
- (9) Failure to pay just debts so as to subject Government shipments to possible frustration, unlawful seizure, or detention;
- (10) Failure to maintain insurance coverage;
- (11) Expiration of carrier exemption, permit, or authority;
- (12) Failure to settle claims in accordance with applicable Government regulations; and
- (13) Repeated failure to comply with the regulations of DOT, the Interstate Commerce Commission, or State and local governments; or repeated failure to comply with any other applicable Government regulations.

(c) A conviction for commission of a criminal offense as an incident to obtaining or attempting to obtain a public or private contract, or subcontract, thereunder, or as an incident to performing the contract or subcontract;

(d) A conviction under the Organized Crime Control Act of 1970 or a conviction of embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, or any other offense indicating a lack of business integrity or business honesty which seriously and directly affects the question of present responsibility as a carrier of Government property.

(e) A conviction under the Federal antitrust statutes arising out of the submission of bids or proposals.

(f) Inclusion in a list issued by the Comptroller General (as provided in part 5, section 56(b) of the regulations issued by the Secretary of Labor under the authority of Reorganization Plan 14 of 1950) as found by the Secretary of Labor to be in aggravated or willful violation of the prevailing wage or overtime pay provisions of applicable regulations or statutes;

(g) A finding by the Director, Office of Federal Contract Compliance, Department of Labor, of noncompliance with the provisions of the Equal Employment Opportunity Clause; and

(h) Any other cause or condition of a serious or compelling nature affecting the present responsibility as a carrier of Government property.

#### § 101-40.403-2 Disqualification procedures.

(a) *Disqualification for periods of 90 calendar days or less—(1) Determining official.* A determination to disqualify a carrier for 90 calendar days or less will be made by the following GSA official: Director, Transportation Management Division, Office of Transportation and

Travel Management, Transportation and Public Utilities Service, General Services Administration (TTM), Washington, DC 20406. Notwithstanding the provisions of § 101-40.403-2, the Director, if he determines such action to be in the best interest of the United States, may deny awards of Government traffic to a carrier during the period commencing with the notice of proposed disqualification and continuing during the pending disqualification determination. In such event, the carrier shall be advised of the action and the basis therefor.

(2) *Notice of proposed disqualification.* GSA will, by certified mail, with return receipt requested, forward to the carrier and, if appropriate, to the carrier's known affiliates, a notice of proposed disqualification which will state:

- (i) That disqualification is being considered;
- (ii) The reasons that disqualification is being considered;
- (iii) The proposed period of disqualification;
- (iv) The time period of 10 calendar days afforded the carrier to present information refuting the proposed disqualification (information from the carrier must be received by GSA within 10 calendar days from the date the carrier receives the notice. The carrier may within that 10 calendar day period request the Director, Transportation Management Division (TTM), to grant an additional 5 days for presenting refuting information).

(3) *Carrier presentation of information.* The carrier may present information refuting the proposed disqualification in writing, in person, or through representation, to the Director, Transportation Management Division.

(4) *Disqualification determination.* (i) If within the time limit specified in paragraph (a)(2)(iv) of this section GSA receives the carrier's data refuting the proposed disqualification, GSA's determination to disqualify the carrier must be made within 20 calendar days after receipt of those data.

(ii) If, within the time period specified in paragraph (a)(2)(iv) of this section, the carrier neither refutes the notice of proposed disqualification nor requests additional time to present refuting information, GSA shall disqualify the carrier for the period specified in the notice of proposed disqualification.

(5) *Carrier notification of disqualification determination.* When a carrier's refuting information is duly filed and received, GSA will notify the carrier by certified mail, with return receipt requested, whether the disqualification will apply. If the

disqualification applies, the notice will specify the reasons for the disqualification as well as the period during which disqualification will be in effect.

(6) *Period of disqualification.* A period of disqualification for 90 calendar days or less shall begin on the first day following the date on which the carrier is notified of the determination to disqualify. If the carrier neither refutes the notice of proposed disqualification nor requests additional time to present refuting information as provided in paragraph (b)(2)(iv) of this section, the period of disqualification will commence on the first day following the expiration of the appeal period.

(7) *Request for review of determination.* A carrier may request that a review of a determination to disqualify for 90 calendar days or less be made by the Assistant Commissioner for Transportation and Travel Management, Transportation and Public Utilities Service, GSA. The request for review shall be forwarded to the General Services Administration (TT), Washington, DC 20406, within 10 calendar days after receipt of the disqualification notice. The Assistant Commissioner will issue a determination within 10 calendar days after receipt of the carrier's request. The carrier will be notified of this determination by certified mail with return receipt requested. The determination of the Assistant Commissioner shall be administratively final.

(b) *Disqualification for periods of more than 90 calendar days—(1) Determining official.* A determination to disqualify a carrier for more than 90 calendar days will be made by the following GSA official: Assistant Commissioner for Transportation and Travel Management, Transportation and Public Utilities Service, General Services Administration (TT), Washington, DC 20406.

Notwithstanding the provisions of § 101-40.403-2, the Assistant Commissioner, if he determines such action to be in the best interest of the United States, may deny awards of Government traffic to a carrier during the period commencing with the notice of proposed disqualification and continuing during the pending disqualification determination. In such event, the carrier shall be advised of the action and the basis therefor.

(2) *Notice of proposed disqualification.* GSA will, by certified mail, with return receipt requested, forward to the carrier and, if appropriate, to the carrier's known

affiliates, a notice of proposed disqualification which states:

- (i) The disqualification is being considered;
- (ii) The reasons that disqualification is being considered;
- (iii) The proposed period of disqualification; and

(iv) The time period of 20 calendar days afforded the carrier to present information refuting the proposed disqualification (information from the carrier must be received by GSA within 20 calendar days from the date carrier receives the notice. The carrier may within that 20 calendar day period request the Assistant Commissioner for Transportation and Travel Management, to grant an additional 5 days for presenting refuting information).

(3) *Carrier presentation of information.* The carrier may present information refuting the proposed disqualification in writing, in person, or through representation, to the Assistant Commissioner.

(4) *Disqualification determination.* (i) If within the time limit specified in paragraph (b)(2)(iv) of this section, GSA receives the carrier's data refuting the proposed disqualification, GSA's determination whether to suspend the carrier will be made within 30 calendar days after receipt of those data.

(ii) If within the time limit specified in paragraph (b)(2)(iv) of this section the carrier neither refutes the notice of proposed disqualification nor requests additional time to present refuting information, GSA shall disqualify the carrier for the period of time specified in the notice of proposed disqualification.

(5) *Carrier notification of disqualification determination.* When a carrier's refuting information is duly filed and considered, GSA will notify the carrier by certified mail, with return receipt requested, whether disqualification will apply. If disqualification applies, the notice will specify the reasons for the disqualification as well as the period during which disqualification will be in effect.

(6) *Period of disqualification.* (i) A period of disqualification for more than 90 calendar days shall begin on the first day following the date on which the carrier is notified of the determination to disqualify. If the carrier neither refutes the notice of proposed disqualification nor requests additional time to present refuting information as provided in paragraph (b)(2)(iv) of this section, the period of disqualification will commence on the first day following the expiration of the appeal period.

(ii) A disqualification under this § 101-40.403-2(b) for causes other than

failure to comply with the provisions of the Equal Employment Opportunity clause will be for a reasonable, specified period of time commensurate with the seriousness of the offense or the failure or inadequacy of performance. As a general rule, a period of disqualification will not exceed 3 years. If it is determined necessary to extend a period of disqualification, GSA will forward a new notice of proposed disqualification in accordance with § 101-40.403-(b)(2) on or about the expiration date of the disqualification period. Notifications of extended periods of disqualifications will be handled in the same manner as initial periods of disqualifications.

(iii) A disqualification under this § 101-40.403-2(b) for failure to comply with the provisions of the Equal Employment Opportunity clause will generally continue until removed by the Director, Office of Federal Contract Compliance, Department of Labor.

(7) *Request for review of determination.* A carrier may request that a review of a determination to disqualify for more than 90 calendar days be made by the Commissioner, Transportation and Public Utilities Service (TPUS), GSA. The request for review shall be forwarded to the General Services Administration (T), Washinton, DC 20406, within 10 calendar days after receipt of the disqualification notice. The Commissioner will issue a determination within 30 calendar days after receipt of the carrier's request. The carrier will be notified of this determination by certified mail. The determination of the Commissioner shall be administratively final.

(8) *Application for relief from disqualification.* Except as precluded by statute, GSA may terminate or reduce the period of time of a disqualification on the basis of appropriate evidence that the causes and conditions for which the disqualification was imposed have been eliminated or corrected. A carrier may apply to the Assistant Commissioner for Transportation and Travel Management for the granting of relief from a disqualification at any time after receipt of the notice of disqualification. The application shall fully document the reasons for the requested relief, which may include but are not limited to the discovery of new material evidence, the reversal of a conviction, or the bona fide change of ownership or management. The Assistant Commissioner for Transportation and Travel Management will review the application and supporting documentation and notify the

carrier of a determination by certified mail with return receipt requested.

#### § 101-40.404 Suspension of carrier.

Suspension is an action that GSA may take against a carrier which is suspected, on the basis of adequate evidence, of engaging in criminal, fraudulent, or seriously improper conduct. In determining whether the evidence merits invoking a suspension, GSA will consider the creditability of the evidence available, the existence or absence of corroboration as to important allegations, and the inferences which may be drawn from the existence or absence of affirmative facts. This assessment will include an examination of basic documents, such as contracts, inspection reports, and correspondence. A suspension may be modified whenever GSA determines that it is in the best interest of the Government to do so.

#### § 101-40.404-1 Causes and conditions for suspension.

GSA may, in the interest of the Government, suspend a carrier from participation in traffic for the causes and under the conditions set forth in this § 101-40.404-1:

(a) Suspicion, based upon adequate evidence, of the following:

(1) Commission of fraud or a criminal offense either as an incident to obtaining or attempting to obtain a public contract or in the performance of a public contract;

(2) Violation of the Federal antitrust statutes arising out of the submission of bids or proposals; or

(3) Commission of an act in violation of the Organized Crime Control Act of 1970 or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, receiving stolen property, or any other offense indicating a lack of business integrity or business honesty which seriously and directly affects the question of present responsibility as a carrier of Government property.

(b) Any cause of a serious and compelling nature affecting the responsibility of a carrier which, in the determination of GSA, warrants suspension. However, suspensions relating to matters involving the Equal Opportunity clause shall be handled in accordance with regulations prescribed by the Secretary of Labor.

#### § 101-40.404-2 Period of suspension.

Suspension is for a temporary period pending the completion of an investigation and any subsequent legal proceedings. If prosecution has not been initiated by the Department of Justice

(DOJ) within 12 months from the issue date of a notice of suspension (see § 101-40.404-4), GSA will terminate the suspension unless DOJ requests continuance of the suspension. (GSA will notify DOJ of a proposed suspension termination 30 calendar days before expiration of the 12-month period.) If a continuation is requested, the suspension may remain in effect for an additional 6 months. However, no suspension shall continue beyond 18 months unless prosecution has been initiated within that period. If prosecution has been initiated, a suspension may continue until the legal proceedings are completed.

**§ 101-40.404-3 Restrictions during period of suspension.**

A suspended carrier will not be permitted to transport freight or passengers for the Government during the period of suspension, unless otherwise determined by GSA to be in the best interest of the Government.

**§ 101-40.404-4 Notice of suspension.**

A carrier that has been suspended by GSA will, by certified mail, with return receipt requested, be furnished with a notice of suspension issued by the following GSA official: Assistant Commissioner for Transportation and Travel Management, Transportation and Public Utilities Service, General Services Administration (TT), Washington, DC 20406. The notice of suspension shall state that:

(a) The suspension is based on (1) an outstanding indictment or (2) adequate evidence that the carrier has committed irregularities which seriously reflect on the propriety of further dealings of the carrier with the Government. (The notice will identify the indictment or describe the nature of the irregularities in general terms, without disclosing the Government's evidence.);

(b) The suspension is for a temporary period pending the completion of an investigation and any subsequent legal proceedings; and

(c) The carrier will be excluded from participating in the movement of freight and passengers for the Government, unless otherwise determined by the Assistant Commissioner for Transportation and Travel Management to be in the best interest of the Government.

**§ 101-40.404-5 Review of suspension.**

(a) *Carrier request for review.* A carrier suspended by GSA may request that a review of the suspension action be made by the Commissioner, Transportation and Public Utilities Service (TPUS), GSA, and that the

carrier be provided an opportunity to present information refuting the suspension to the Commissioner, in person, in writing, or through representation. The request for review shall be forwarded to the General Services Administration (T), Washington, DC 20406.

(b) *Coordination with other executive agencies.* Upon receipt of a request for a review, GSA will seek the advice of other interested executive agencies as set forth below.

(1) *Coordination with Department of Justice (DOJ).* In all instances, GSA will solicit the formal advice of DOJ concerning the possible impact that the release of evidence could have on possible civil or criminal action against the carrier.

(2) *Coordination with the Department of Labor (DOL).* If the suspension is based upon violations of labor standards subject to legal proceedings before administrative law judges of DOL, GSA will solicit the formal advice of DOL concerning the possible proceedings against the carrier.

(c) *Response to carrier request for review.* GSA's decision on whether to grant the requested review will be based on the advice received from DOJ or DOL as to the possible effects of the release or disclosure of Government evidence. The Commissioner, TPUS, GSA, will notify the carrier of this decision by certified mail with return receipt requested. If a review is granted, GSA will, as necessary, determine the extent of the review and the conditions under which the review will be conducted and the carrier will be so notified. If a review is denied, the carrier will be notified that the release or disclosure of evidence which would occur as the result of a review would be prejudicial to the interest of the Government but that the carrier may, nevertheless, present any information refuting the suspension action to the Commissioner, TPUS, GSA.

(d) *GSA determination and carrier notification.* GSA will determine whether to continue or terminate the suspension following a review of the suspension action and/or consideration of information presented by the carrier to refute the suspension. The Commissioner, TPUS, GSA shall notify the carrier of this determination by certified mail with return receipt requested.

7. Subparts 101-40.5 and 101-40.6 are reserved.

**Subparts 101-40.5—101-40.6— [Reserved]**

8. Section 101-40.49 is revised to read as follows:

**Subparts 101-40.49—Forms, Formats, and Agreements**

**§ 101-40.4906-1 GSA Form 420, Freight Rate and Route Request/Response.**

*Note.*—The form illustrated in § 101-40.4906-1 is filed as part of the original document and does not appear in this volume.

**§ 101-40.4906-2 Optional Form 280, Uniform Tender of Rates and/or Charges for Transportation Services.**

*Note.*—The form illustrated in § 101-40.4906-2 is filed as part of the original document and does not appear in this volume.

**§ 101-40.4906-3 Standard Form 361, Discrepancy in Shipment Report.**

*Note.*—The form illustrated in § 101-40.4906-3 is filed as part of the original document and does not appear in this volume.

**§ 101-40.4906-4 Guidelines for Preparation of Standard Form 361, Discrepancy in Shipment Report (Short Title "DISREP") (Rev. 11-79)**

(a) Page 1 of Guidelines for Preparation of Standard Form 361.

**Section A**

*General*

a. The November 1979 edition of Standard Form 361, Discrepancy in Shipment Report (DISREP) requires the use of codes for certain information. A stub attached to the top of the form provides instructions concerning where to locate these codes for civilian agencies and the Department of Defense. The codes furnished in this section are uniform codes for civilian agencies to use in preparing the DISREP.

b. The DISREP is a two page form, but, when used by civilian agencies, the back requires completion only when the spaces in items 12 and 13 do not provide adequate space to fully describe the discrepancies being reported. Items 19 and 20 are primarily for use by the Department of Defense.

*Item Details.* The following are detailed instructions of the data required in completing the DISREP:

*Item Number, Title and Data Entry*

- Date.*—Date on which report is prepared in the sequence of: year, month and day; e.g., November 6, 1979, would be entered as 79 Nov. 6.
- File Reference.*—Activity address code (if assigned) of reporting activity and a 4-digit number (0001—

- 9999) for each DISREP issued within the calendar year.
3. *To.*—Name, address, activity address code (if assigned) and ZIP code of activity which is to receive the original of the report.
  4. *Reporting Activity.*—Name, address, activity code (if assigned) and ZIP code of reporting activity.
  5. *Consignor.*—Name, address, activity address code (if assigned) and ZIP code of activity making or directing the shipment. When shipper is a contractor or vendor always enter name and activity address code (if assigned) of the Government office responsible for documenting or arranging for shipment.
  6. *Consignee.*—Name, address, activity address code (if assigned) and ZIP code of activity scheduled to receive the shipment. If same as item 4, enter "same as item 4".
  7. *Shipper (if other than consignor).*—Name, address, activity address code (if assigned) and ZIP code of the activity physically making shipment for the account of the consignor shown in item 5. When a container shipment, enter name of activity stuffing the container in item 13.
  8. *Point of origin (city and state).*—Enter city and state where carrier accepted shipment.
  9. *Identification (conveyance/voyage number) and carrier routing.*—Enter identification number of railcar, truck, trailer, or name of vessel, as appropriate and routing shown on covering transportation document. Enter MILVAN, SEAVAN or CONEX type code in parentheses and trailer/container number and SEAVAN carrier. Enter TCN number of SEAVAN, MILVAN or CONEX or other consolidation container, and, when known, the voyage number.
  10. *Destination (city and state).*—Enter city and state of destination as shown on covering transportation document.
  11. *Documentation Data:*
    - a. *Carrier's pro/freight bill number.*—Enter number appearing on carrier's delivery receipt (waybill, pro, freight bill, lading, warrant or similar document).
    - b. *Bill of lading number.*—Enter document number under appropriate heading. Enter port of exit with an ocean bill of lading number.
    - c. *Exception noted on carrier's delivery receipt.*—Check "yes" or "no" as appropriate.
    - d. *Type of shipment code.*—Enter alpha or numeric code as listed in section B to designate whether rail, carload; motor, truckload, etc., as appropriate.
    - e. *Documents attached.*—Check applicable block(s).
    - f. *Date carrier signed for shipment.*—Enter actual date carrier signed for shipment.
    - g. *Date consignee received shipment.*—Enter actual date consignee received shipment.
    - h. *Date discrepancy discovered.*—Enter actual date discrepancy was discovered.
    - i. *Date carrier notified.*—Enter date carrier was first notified of discrepancy i.e., by phone, in person or by SF 363.
    - j. *This is a survey document.*—Check "yes" or "no" as applicable (primarily used by military activities).
    - k. *Seal numbers and condition.*—Check appropriate block to indicate condition of seals at delivery. Enter seal numbers. Explain when there is a variance between seal numbers shown on transportation documentation and numbers of seals on vehicles. Explanation may be continued in item 13.
    - l. *Inspection date.*—Check appropriate block. Attach document(s) as required, when reporting damage, pilferage or partial loss.
    - m. *Disposition date.*—Check appropriate block and attach document(s) as required.
  12. *Discrepancy Data (When necessary, multiple lines may be used for each requisition line item involved):*
    - (a) *Acquisition document and/or transportation control number.*—Enter applicable acquisition document number e.g., requisition or purchase request and/or transportation control number.
    - (b) *Commodity Description and/or National Stock Number (NSN).*—Enter noun description of commodity and/or National Stock Number.
    - (c) *Type of pack.*—Enter the 2 position code from section C to describe type of pack for shipment involved. (Codes applicable for CONEX, SEAVAN, MILVAN or other consolidation container will be entered in item 9 only.)
    - (d) *Quantity discrepant (pieces).*—Enter actual number of pieces of freight that are discrepant as evidenced by the covering bill of lading or governing transportation document.
    - (e) *Type and cause code.*—Enter the 2 position code as shown in section D that most closely identifies the cause or type of discrepancy.
  - Issue Data (May be obtained from packing list or authorized shipping document accompanying the shipment i.e. GSA or DD Form 1348-1, direct delivery purchase document, etc.)
    - (f) *Unit of issue.*—Enter the 2 letter abbreviation for type of unit under which material was issued.
    - (g) *Units billed/shipped.*—Enter actual number of units of issue billed (invoiced) or shipped as evidenced by the applicable shipping document.
    - (h) *Discrepant units.*—Enter actual number of units discrepant.
    - (i) *Discrepant weight.*—Enter weight of discrepant quantity.
    - (j) *Value or cost of repairs.*—Enter actual value of loss sustained, cost of repairs and/or cost to reoperator (materials and labor), as appropriate. Enter value of material when reporting over/stray freight.
  13. *Remarks.* This item is for use in providing detailed information or other data required by items referencing this item. Information should specify facts and not personal opinions unless substantiated by documentation, e.g., affidavits or certified statements. Other discrepancies or deficiencies in transportation such as improper loading, stowing, handling, blocking, bracing, lashing, excessive transit time, improper placarding or labeling of hazardous materials, etc., should be described in this item. When the discrepancy involves classified material, enter the applicable acquisition document or transportation control number and the appropriate security classification code, e.g., "S" (secret), "C" (confidential).
  14. *Responsibility.* The transportation or appropriate receiving personnel normally would make this determination based on findings and factual evidence available and check the appropriate block. If sufficient evidence to make such a determination is not available, check "other" and specify appropriate activity.
  15. *Distribution of Copies.* Enter name and address of office(s) to receive copies as directed by agency regulations.
  16. *Prepared by*
    - a. *Typed name, title and telephone extension.* Type name, title and commercial telephone number of the person whose signature is entered in item 16b.
    - b. *Signature.* Signature of person preparing this report.

17. *Discrepancy Data* (continuation of item 12). This item is a continuation of items 12a thru 12j, if required.
18. *Remarks.* (Continuation of item 13). This item is a continuation of item 13, if required.
19. *Action for Reviewing Officials.* Sections a, b, c and d under this item are for use in connection with inventory and financial adjustments of accounts in accordance with individual service/agency regulations. Section e will be completed by an official authorized to approve the report for use as a survey document and/or inventory and financial adjustment of accounts or when individual agency or service regulations require approval by an official other than the individual shown in item 16A.
20. *Action by Finance Center.* For use by finance center, as required (primarily for DOD).

Section B

Code	Type of Shipment Code (Item 11d)
A	Motor, truckload
B	Motor, less than truckload
C	Van (unpacked, uncrated personal or Government property)
D	Driveaway, truckaway, towaway
E	Bus
F	Military Airlift Command (MAC)
G	Parcel post, surface
H	Parcel post, air
I	Government trucks, for shipment outside local delivery area
J	Small package carrier
K	Rail, carload*
L	Rail, less than carload*
M	Freight forwarder
N	LOGAIR (commercial air charter service—Air Force controlled)
O	Organic military air
P	Through Government bill of lading (TGBL)
Q	Air freight, air express, air charter (commercial)
R	Expedited air freight
S	Reserved
T	Air freight forwarder
U	Quicktrans (commercial air charter service—Navy controlled)
V	SEAVAN
W	Water, river, lake coastal (commercial)
X	Reserved
Y	Intratheater airlift service
Z	MSC (Military Sealift command—controlled contract or arranged space)
2	Government watercraft, barge lighter
3	RORO (roll-on, roll-off)
4	ARFCOS (Armed Forces Courier Service)
5	United Parcel Service
6	Military official mail (MOM)
7	Weapon System Pouch Service
8	Pipeline
9	Local delivery, by Government or commercial truck including deliveries between air or water terminals and adjacent activities. Within CONUS, the local delivery area is defined in tariffs governing local application of carrier service as filed with regulatory authorities.

\*Includes trailer/container-on-flat-car (excluding SEAVAN).

Section C

Code	Type of Pack Code (Item 12c or 17c)
BD	Bundle
BE	Bale

Section C—Continued

Code	Type of Pack Code (Item 12c or 17c)
BG	Bag, burlap or cloth
BL	Barrel
BS	Basket
BX	Box
CA	Cabinet
CB	Carboy
CC	Household goods containers, wood, type II (Fed. Spec. PPP-B-580)
CL	Coil
CN	Can
CO	Container, other than CU, CW or X
CR	Crate
CS	Case
CT	Carton
CU	Container, Navy cargo, transporter
CW	Container, commercial highway lift (PTTC)
CY	Cylinder
DB	Dufflebag
DR	Drum
EC	Engine container
ED	Engine cradle or dolly
FK	Footlocker
HA	Hamper
KE	Keg
LS	Loose (not packaged)
MN	Multiwall container (formerly referred to as triple wall or triwall secured or attached to pallet)
MX	Mixed (more than one type of shipping container)
PC	Piece
PL	Pail
PT	Palletized unit load (other than code MW)
RL	Reel
RO	Roll
RT	Roll-on/roll-off trailer
SA	Sack, paper
SB	Skid box
SD	Skid
SH	Sheet
SL	Spool
SW	Suitcase
TB	Tub
TK	Trunk
TU	Tube
UX	Unitized (unitized cargo on roll-on/roll-off vehicles is considered roll-on/roll-off)
VE	Vehicle
VO	Vehicle in operating condition
VS	Sea-van-tote
WR	Wrapped
X	Container, CONEX (second position based on CONEX number, will be assigned as follows):
0	00000 to 99999
1	10000 to 199999
2	200000 to 299999
3	300000 to 399999
4	400000 to 499999
5	500000 to 599999
6	600000 to 699999
7	700000 to 799999
8	800000 to 899999
9	900000 to 999999

A-MSCVAN (MSC leased/controlled SEAVAN or MILVAN)  
 Y-MILVAN  
 Z-SEAVAN  
 (Second position identifies the loading data and loaded capacity as follows):

A Loaded to capacity by ocean carrier.  
 B Loaded to capacity by military terminal.  
 C Loaded to capacity by military shipping activity.  
 D Loaded to capacity by vendor/commercial supplier.  
 E Loaded to capacity by contract shipment consolidation facility.  
 F Loaded to less than capacity by military shipping activity, loading completed by contract shipment consolidation facility.  
 3 Loaded to less than capacity by military shipping activity.  
 4 Loaded to less than capacity by vendor/commercial supplier.  
 5 Loaded to less than capacity by contract shipment consolidation facility.  
 L Loaded to less than capacity by military shipping activity, loading completed by military terminal.  
 M Loaded to less than capacity by vendor/commercial supplier, loading completed by military terminal.  
 N Loaded to less than capacity by contract shipment consolidation facility, loading completed by military terminal.  
 T Loaded to less than capacity by military shipping activity, loading completed by ocean carrier.  
 U Loaded to less than capacity by vendor/commercial supplier, loading completed by ocean carrier.  
 V Loaded to less than capacity by contract shipment consolidation facility, loading completed by ocean carrier.  
 W Loaded to less than capacity by vendor/commercial supplier, loading completed by contract shipment consolidation facility.  
 Z Empty MILVAN or SEAVAN.

Section D

Code	Type and Cause Code (Item 12e or 17e)
	Astray
A3	Incomplete marking or missing label or tag
A4	Defaced or illegible marking
AA	Unknown
	Overage
05	Improper documentation
03	Incomplete marking or missing label or tag
04	Defaced or illegible marking
OK	Improper loading or stowing
OO	Unknown
	Shortage
SL	Leakage, spoilage, or evaporation
S5	Improper documentation
ST	Theft
SP	Pilferage
SI	Status "W" cargo (MMC terminal use only)
SK	Improper loading or stowing
SS	Unknown
	Damage
DF	Fire
DK	Improper loading, stowing, lashing, blocking and bracing
D6	Materials handling equipment
D1	Marine casualty
DG	Spoilage
DQ	Rough handling
D2	Stevedoring
DE	Water damage
DW	Wreck
DV	Vandalism
DZ	Concealed damage
DD	Unknown, visible or apparent damage
	Other
XB	Broken, missing, improper, or inadequate seals
XC	Carrier tariff or tender agreements, Government transportation regulations not observed on other than classified or protected material
XH	Excess transit time
X3	Incomplete marking or missing label or tag
X4	Defaced or illegible marking
XJ	Improper carrier handling, service or equipment
XK	Improper loading, stowing, lashing, blocking or bracing (when no actual damage is involved)
XM	Improper marking or labeling of dangerous or hazardous material
XN	Misconsignment
XR	Government transportation regulations, carrier tariff or tender agreements, not observed on classified or protected material
XX	Not specified above (describe in remarks)

9. Sections 101-40.4906-8 and 101-40.4906-9 are added to read as follows:

**§ 101-40.4906-8 GSA Form 2485, Cost Comparison for Shipping Household Goods (commuted rate system versus actual expense method).**

Note.—The form illustrated in § 101-40.4906-8 is filed as part of the original document and does not appear in this volume.

**§ 101-40.4906-9 GSA Form 3080, Household Goods Shipment Report.**

Note.—The form illustrated in § 101-40.4906-8 is filed as part of the original document and does not appear in this volume.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: December 17, 1980.

**BILLING CODE 6820-AN-M**

## DEPARTMENT OF THE INTERIOR

## Fish and Wildlife Service

## 50 CFR Part 33

## National Wildlife Refuges in Illinois, Iowa, Minnesota and Wisconsin; Sport Fishing

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Special regulations.

**SUMMARY:** The Director has determined that the opening to sport fishing of certain National Wildlife Refuges is compatible with the objectives for which the areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. These special regulations describe the conditions under which sport fishing will be permitted on portions of certain National Wildlife Refuges in Illinois, Iowa, Minnesota and Wisconsin.

**DATES:** Effective on December 30, 1980 for duration of calendar year 1981, subject to exceptions noted below for individual refuge areas.

**FOR FURTHER INFORMATION CONTACT:** The Area Manager or appropriate Refuge Manager at the address or telephone number listed below:

George G.P. Bekeris, Area Manager, U.S. Fish and Wildlife Service, 530 Federal Building & U.S. Court House, 316 North Robert Street, St. Paul, MN 55101.

James Heinecke, Refuge Manager, Big Stone National Wildlife Refuge, 25 N.W. 2nd Street, Ortonville, MN 56278. Telephone: (612) 839-3700.

John Toll, Refuge Manager, Horicon National Wildlife Refuge, Route #2, Mayville, WI 53050. Telephone: (414) 387-2658.

James M. Carroll, Jr., Refuge Manager, Necedah National Wildlife Refuge, Star Route, Necedah, WI 54646. Telephone: (608) 565-2551.

David Heffernan, Refuge Manager, Rice Lake National Wildlife Refuge, Route 2, McGregor, MN 55760. Telephone: (218) 768-2402.

Ronald Papike, Refuge Manager, Sherburne National Wildlife Refuge, Route #2, Zimmerman, MN 55398. Telephone: (612) 389-3323.

Omer N. Swenson, Refuge Manager, Tamarac National Wildlife Refuge, Rural Route, Rochert, MN 56578. Telephone: (218) 847-4355.

Robert Howard, Refuge Manager, Upper Mississippi Wildlife and Fish Refuge, 122 W. 2nd Street, Winona, MN 55987. Telephone: (507) 452-4232.

**SUPPLEMENTARY INFORMATION:** Sport fishing on portions of the following

refuges shall be in accordance with all applicable State and Federal regulations, subject to additional special regulations and conditions as indicated. Portions of refuges which are open to sport fishing are designated by signs and/or delineated on maps. Special conditions applying to individual refuges and maps are available at refuge headquarters or from the Office of the Area Manager (addresses listed above).

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds were available for the development, operation and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which these National Wildlife Refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

### § 33.5 Special regulations; sport fishing for individual wildlife refuge areas.

#### Minnesota

##### *Big Stone National Wildlife Refuge*

Sport fishing on Big Stone National Wildlife Refuge is allowed between sunrise and sunset during the State fishing season. Summer fishing shall be from the shoreline only except that fishing from boats without motors is permitted on the Minnesota River channel canoe trail which is designated by signs. Winter ice fishing is permitted in accordance with the state season except that ice fishing west of the Highway 75 dam, terminates on January 31. Portable fish shelters may be used but may not be left overnight.

##### *Rice Lake National Wildlife Refuge*

Sport fishing is permitted on the Rice Lake National Wildlife Refuge, Aitkin County, Minnesota, and the Sandstone Unit, Pine County, Minnesota, only on those areas designated by signs as being open to fishing. These areas comprise approximately 80 acres. The open

season for sport fishing extends from May 16, 1981 through November 30, 1981, inclusive. Fishing is allowed between sunrise and sunset only. The use of canoes and boats, without motors, is allowed for sport fishing on that portion of Rice River posted as open to fishing and on the Twin Lakes fishing area only.

##### *Sherburne National Wildlife Refuge*

Sport fishing is permitted on Sherburne National Wildlife Refuge in accordance with State seasons and regulations. Special conditions include the following: Fishing is only allowed on the St. Francis River at designated access sites during daylight hours. Boats without motors are allowed on the portion of the river as noted in the refuge brochure. A permit must be obtained from the refuge manager before using a shelter for ice fishing.

##### *Tamarac National Wildlife Refuge*

Sport fishing is permitted on the Tamarac National Wildlife Refuge in areas designated on maps or by signs as being open to fishing. Fishing shall be in accordance with all applicable State and/or White Earth Reservation regulations.

All sport fishing is subject to the following conditions:

1. Only that part of Tamarac Lake north of the dike is open during regular State season.
2. Fishing on Two Island, Wauboose, Lost, and Blackbird lakes is permitted only from the State season opening in May through Labor Day.
3. Bank fishing is permitted 50 yards either side of the Ottertail River bridges on County Roads No. 26 and No. 126 only.

#### Wisconsin

##### *Horicon National Wildlife Refuge*

Sport fishing is permitted on the Horicon National Wildlife Refuge, Wisconsin, only on the approximately 5 acres designated by signs as being open to fishing from May 15, 1981 through September 15, 1981, inclusive. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions:

1. The use of boats is not permitted.
2. Fishing during daylight hours only.

##### *Necedah National Wildlife Refuge*

Sport fishing is permitted on the Necedah National Wildlife Refuge, Wisconsin, only on the areas designated by signs as being open to fishing. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions:

Fishing is permitted only on the Sprague and Goose Pools, including the outlets of these pools as far south as the Sprague-Mather Road, from January 1 through March 15, 1981, and from June 1, through September 15, 1981, and from December 15, through December 31, 1981. Fishing is allowed between sunrise and sunset only. The use of boats, without motors, is permitted.

**Illinois, Iowa, Minnesota, Wisconsin**

*Upper Mississippi River Wild Life and Fish Refuge*

Sport fishing, commercial fishing, and the taking of frogs, turtles, crayfish and clams on the Upper Mississippi River Wild Life and Fish Refuge, are permitted on all water areas of the refuge. The refuge water areas comprise 125,000 acres. All fish, frogs, turtles, crayfish and clams shall be taken in accordance with all applicable state regulations and seasons. All sport and commercial fishing on the Spring Lake Closed Area of the Upper Mississippi River Wild Life and Fish Refuge in Carroll County, Illinois, is prohibited from October 1 through December 20, 1981. All persons, including their helpers, exercising the privilege of commercial fishing on the Spring Lake Closed Area must possess a valid commercial fishing permit issued by the Refuge Manager and must comply with the conditions which are set forth in the permit.

December 17, 1980.

**Richard E. Toltzmann,**

*Acting Area Manager.*

<sup>1</sup>A final decision on whether or not to adopt a proposed new order for this marketing area is pending before the Department.

**AGENCY:** Agricultural Marketing Service, USDA.

**ACTION:** Extension of time to submit additional comments or proposals.

**SUMMARY:** On November 7, 1980, the Department issued a preliminary impact statement concerning the potential effect of proposals to change the regulatory treatment of reconstituted milk under all Federal milk orders. Interested parties were invited to submit comments on the impact statement and also any alternative proposals that would mitigate any adverse economic impacts of the proposals. This notice extends the initial 45-day filing period, which would have expired on January 2, 1981.

**DATE:** Comments and proposals should be submitted by February 16, 1981, to assure their consideration in this matter.

**ADDRESS:** Comments and proposals (two copies) should be mailed to: Deputy Administrator, Marketing Program Operations, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250.

**FOR FURTHER INFORMATION CONTACT:** Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (telephone: 202-447-4824).

**SUPPLEMENTARY INFORMATION:** Prior documents in this proceeding: Pre-Notice of hearing: issued November 13, 1979; published November 16, 1979 (44 FR 65989). Extension of time: issued January 15, 1980; published January 18, 1980 (45 FR 3593). Preliminary Impact Statement: issued November 7, 1980; published November 17, 1980 (45 FR 75956).

The Community Nutrition Institute, a fluid milk processor, and three individual consumers have requested that a public hearing be held on proposed changes in all Federal milk marketing orders. The proposals relate

to the regulatory treatment of reconstituted milk products.

A preliminary impact statement presenting an analysis of the potential impact of the proposals was issued by the Department on November 7, 1980. The public was invited to submit by January 2, 1981, comments on the impact statement and also any additional proposals that would mitigate any adverse economic impacts of the proposals.

The Department has received requests from the National Milk Producers Federation and other producer groups for an extension of the comment period. The producer organizations indicate that an additional 45 days is needed in view of the time that was involved in distributing copies of the impact statement to interested parties, the complex nature of the issues involved, and the time constraints stemming from the several holidays in the initial comment period.

An extension of the comment period is reasonable under these circumstances. Accordingly, notice is hereby given that the time for filing comments on the preliminary impact statement and alternative proposals is extended from January 2, 1981, to February 16, 1981.

Signed at Washington, D.C., on December 22, 1980.

**William T. Manley,**

*Deputy Administrator, Marketing Program Operations.*

[FR Doc. 80-40503 Filed 12-29-80; 8:45 am]

**BILLING CODE 3410-02-M**

## Animal and Plant Health Inspection Service

### 9 CFR Part 91

#### Animal Export Regulations; Pseudorabies Test of Export Swine

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Proposed rule.

**SUMMARY:** This document proposes to amend the animal export regulations to require that all swine to be exported from the United States, except swine for immediate slaughter, shall be handled in accordance with certain procedures and be negative to an official pseudorabies test or tests. This action is necessary to provide assurance that swine exported

from the United States, except swine exported for immediate slaughter, are not infected with or exposed to pseudorabies. The intended effect of this action is to provide assurance to the animal health authorities of other countries that swine exported from the United States, except swine exported for immediate slaughter, are not infected with or exposed to pseudorabies.

**DATE:** Comments on or before March 2, 1981.

**ADDRESS:** Written comments to Deputy Administrator, USDA, APHIS, VS, Room 821, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

**FOR FURTHER INFORMATION CONTACT:** Dr. Harold A. Waters, USDA, APHIS, VS, Room 826, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8383. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301-436-8695.

**SUPPLEMENTARY INFORMATION:** This proposed action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "significant". Notice is hereby given in accordance with the administrative procedure provisions in 5 U.S.C. 553, that pursuant to 21 U.S.C. 105, 112, 113, 114a, 120, 121, 134b, 134f, 612, 613, 614, 618; 46 U.S.C. 466a, 466b; 37 FR 28464, 28477; 38 FR 19141, the Animal and Plant Health Inspection Service is considering amending Part 91, Title 9, Code of Federal Regulations.

On Friday, February 16, 1979, there was published in the *Federal Register* (44 FR 10306-10313) regulations intended to prevent the spread of pseudorabies in the United States. Pseudorabies, also known as Aujeszky's disease, mad itch, and infectious bulbar paralysis, is primarily a disease of swine caused by a herpes virus.

Susceptible animals other than swine are not known to become carriers and are not known to transmit the disease after a period of 21 days following exposure to the disease. Therefore, animals other than swine are believed not to be potential spreaders of pseudorabies after a period of 21 days since their last exposure to the virus.

Swine are more resistant to pseudorabies than most other livestock, and some swine develop an inapparent carrier state. Such swine are capable of transmitting the disease to other animals even though these carrier swine are apparently healthy. The number and

severity of outbreaks of pseudorabies have increased dramatically throughout the world during the past 3 years. This trend is expected to continue and to cause serious financial losses to swine producers and the swine industry in general. For this reason, pseudorabies in swine has become a significant factor in the United States Export Animal Health Program. In order to prevent the exportation of swine (for other than slaughter purposes), which may be infected with or exposed to pseudorabies, certain testing requirements are needed. Therefore, present § 91.5(c) (Specific export requirements for swine) would be redesignated § 91.5(c)(1) and additional requirements which the Department believes would prevent the exportation of swine (except swine exported for immediate slaughter) infected with or exposed to pseudorabies would be added in proposed § 91.5(c)(2).

Specifically, proposed § 91.5(c)(2) would provide exporters with two options under which swine, other than swine for immediate slaughter, could be exported.

Proposed § 91.5(c)(2)(i) would require that swine to be exported, except swine for immediate slaughter be (A) from a qualified pseudorabies negative herd, (B) found negative to an official pseudorabies test within 30 days prior to the date of export, (C) moved directly from the qualified pseudorabies negative herd to the port of embarkation after such test, and (D) physically separated so as to prevent physical contact with other animals or effluent drainage therefrom during such movement.

In lieu of the proposed requirements in § 91.5(c)(2)(i) an exporter could export swine in accordance with proposed § 91.5(c)(2)(ii) which would require that swine to be exported, except swine to be exported for immediate slaughter, be physically separated so as to prevent physical contact with other animals or effluent drainage therefrom. Further, the proposal would require that the swine are found negative to two official pseudorabies tests at intervals of not less than 30 days nor more than 60 days between tests during such separation. The last test would be required to be conducted within 30 days prior to the date of export. After such tests, the swine would be required to be moved directly to the port of embarkation and physically separated so as to prevent physical contact with all other animals and the effluent drainage therefrom during such movement.

The Department believes that the requirements in proposed § 91.5(c)(2)(i) would provide reasonable assurance

that the swine to be exported are not infected with or exposed to pseudorabies. Such swine would be from a qualified pseudorabies negative herd, as defined in Title 9, Code of Federal Regulations, § 85.1(ee). A qualified pseudorabies negative herd is monitored for pseudorabies at regular intervals and the entrance of other swine into such a herd is restricted to swine which have been found negative to two official pseudorabies tests not less than 30 days or more than 60 days apart before being added to the herd or are from another qualified pseudorabies negative herd. Therefore, herds of swine which have attained qualified pseudorabies negative herd status are far less likely to contain swine which are either exposed to or infected with pseudorabies than the remainder of the swine population.

Proposed § 91.5(c)(2)(i) would require that swine to be exported from qualified pseudorabies negative herds be moved directly from such herds to the port of embarkation and be physically separated so as to prevent physical contact with other animals and effluent drainage therefrom during such movement. This physical separation could be attained in any manner. The intention is that swine do not come into physical contact with other animals or their effluent drainage. This requirement would insure that such swine to be exported only come into physical contact with other swine from qualified pseudorabies negative herds prior to arrival at the port of embarkation.

To further insure that swine to be exported, except swine exported for immediate slaughter, are not infected with or exposed to pseudorabies, proposed § 91.5(c)(2)(i) would require that such swine be found negative to an official pseudorabies test within 30 days prior to the date of export. Such official test would be conducted prior to the swine being moved to the port of embarkation. The Department believes that the requirement that the negative finding to the official pseudorabies test be within 30 days prior to the date of export is necessary to reduce the risk of tested swine becoming infected with pseudorabies between the test and the date of export and gives an exporter a reasonable amount of time in which to have the swine tested.

As stated above, proposed § 91.5(c)(2)(ii) would provide exporters with a second method by which swine, except swine exported for immediate slaughter, could be exported. Under this provision, such swine to be exported, other than for immediate slaughter, would be required to be physically

separated from other animals and effluent drainage therefrom so that no new sources of infection with pseudorabies could be introduced into the group of swine intended for export. This physical separation could be attained in any manner (artificial barriers, natural barriers or even distance). The intention is that such swine do not come into physical contact with other animals or the effluent drainage. During such physical separation, the group of swine to be exported would be required to be found negative to two official pseudorabies tests at intervals of not less than 30 nor more than 60 days between tests. The Department believes that the official pseudorabies tests would provide reasonable assurance that the swine so tested are neither infected with nor exposed to pseudorabies. The interval which would be required between the two tests is necessary to allow any swine exposed to pseudorabies at the time of the first test to incubate the disease long enough to become positive to the second test. Further, proposed § 91.5(c)(2)(ii) would require that the last test be conducted within 30 days prior to the date of export because the Department believes that this requirement would reduce the risk of the tested swine becoming infected with pseudorabies between the test and the date of export. Further, 30 days would give an exporter a reasonable amount of time in which to have the swine tested. To eliminate the risk of infection with or exposure to pseudorabies, proposed § 91.5(c)(2)(ii) would require that after such tests the swine be moved directly to the port of embarkation and during such movement be physically separated so as to prevent physical contact with other animals or effluent drainage therefrom.

Proposed new footnotes 7 and 8 would be referred to in proposed § 91.5(c)(2). Proposed new footnote 7 would appear directly after the term "qualified pseudorabies negative herd" and would refer the reader to Title 9, Code of Federal Regulations, § 85.1(e) which contains the definition of that term. Proposed new footnote 8 would appear directly after the term "official pseudorabies test" and would refer the reader to Title 9, Code of Federal Regulations, § 85.1(q) which contains the definition of that term. Further, proposed new footnote 8 would inform the reader that copies of the test protocols (Recommended Minimum Standards for Diagnostic Tests Employed in the Diagnosis of Pseudorabies) were published as a Veterinary Services Notice, May 17, 1978, and are available

upon request from Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

The Department believes that these proposed new footnotes are necessary to clarify the terms "qualified pseudorabies negative herd" and "official pseudorabies test". The addition of proposed footnotes 7 and 8 would require that present footnote 7 and the reference thereto be renumbered footnote 9; present footnote 8 and the reference thereto be renumbered footnote 10; and present footnote 9 and the reference thereto be renumbered footnote 11.

Accordingly, Part 91, Title 9, Code of Federal Regulations, would be amended in the following respects:

1. In § 91.5, paragraph (c) would be redesignated as paragraph (c)(1) and a new paragraph (c)(2) and new footnotes 7 and 8 would be added to read:

**§ 91.5 Specific export requirements.**

(c) Swine. \* \* \*

(2) Swine to be exported, except swine to be exported for immediate slaughter, shall be:

(i)(A) From a qualified pseudorabies negative herd;<sup>7</sup>

(B) Found negative to an official pseudorabies test<sup>8</sup> within 30 days prior to the date of export;

(C) Moved directly from the qualified pseudorabies negative herd to the port of embarkation after such test; and

(D) Physically separated so as to prevent physical contact with other animals or the effluent drainage therefrom during such movement; or

(ii)(A) Physically separated so as to prevent physical contact with other animals or effluent drainage therefrom;

(B) During such physical separation, found negative to two official pseudorabies tests<sup>8</sup> at intervals of not less than 30 days nor more than 60 days between tests during such separation. The last test shall be conducted within 30 days prior to the date of export;

(C) Moved directly to the port of embarkation after such tests; and

(D) Physically separated so as to prevent physical contact with other

<sup>7</sup>A qualified pseudorabies negative herd is defined in § 85.1(ee) of this chapter.

<sup>8</sup>"Official pseudorabies test" is defined in § 85.1(q) of this chapter. Copies of the test protocols (Recommended Minimum Standards for Diagnostic Tests Employed in the Diagnosis of Pseudorabies) published as a Veterinary Services Notice, May 17, 1978, are available upon request from Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782.

animals or effluent drainage therefrom during such movement.

**§ 91.9 [Amended]**

2. In § 91.9 present footnote 7 and the reference thereto would be redesignated footnote 9; in § 91.13 present footnote 8 and the reference thereto would be designated footnote 10; and in § 91.33 present footnote 9 and the reference thereto would be designated footnote 11.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 825, Hyattsville, Maryland, during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (9 CFR 1.27(b)).

Comments submitted should bear a reference to the date and page number of this issue in the Federal Register.

Done at Washington, D.C., this 22nd day of December 1980.

Jerry C. Hill,

Deputy Assistant Secretary for Marketing and Transportation Services.

BILLING CODE 3410-34-M

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration (NOAA)**

**15 CFR Parts 923 and 931**

**Advance Notice of Proposed Rulemaking for Improving Coastal Management in the United States**

**AGENCY:** National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

**ACTION:** Advance notice of proposed rulemaking (ANPR).

**SUMMARY:** Pub. L. No. 96-464, the Coastal Zone Management Improvement Act of 1980 (the Act), which amended the Coastal Zone Management Act of 1972 (CZMA), requires the Secretary of Commerce to issue regulations for improving the administration of the Federal coastal zone management program established by the CZMA. This notice deals with proposed rules for: (1) Focusing state management efforts on achieving significant improvements in meeting certain national coastal management objectives; (2) enhancing the protection of nationally significant coastal resources; (3) allocating among eligible states grants to administer approved state coastal management programs; (4) awarding grants to eligible states to mitigate adverse coastal impacts caused by coal and alternative

ocean energy activities; (5) awarding grants to eligible coastal states for preserving specific coastal areas, redeveloping urban waterfronts and ports, and providing access to public beaches and coastal waters; (6) reviewing and evaluating the performance of coastal states with respect to adherence to approved coastal management programs and achievement of significant improvement in meeting national coastal management objectives; and (7) awarding grants to assist eligible states in preserving islands.

NOAA will publish a separate advance notice of proposed rulemaking outlining issues relevant to clarifying the term "directly affected" in Section 307 of the CZMA.

This advance notice of proposed rulemaking is issued to provide interested persons with an early opportunity to contribute to the development of these regulations. It is designed to elicit both views on the issues posed below and identification of other issues that should be addressed. Interested persons are invited to submit detailed written comments.

**DATE:** Comments should be received by January 31, 1981.

**ADDRESS:** Submit comments concerning the advance notice to: Jane P. Rogers, Deputy Director, Office of Policy, Evaluation and External Relations, Office of Coastal Zone Management, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

**FOR FURTHER INFORMATION CONTACT:** Jane P. Rogers, Dan Hoydysh or Vickie Allin, Office of Policy, Evaluation and External Relations, (202-634-4245).

**SUPPLEMENTARY INFORMATION:**

**I. Authority**

This advance notice of proposed rulemaking is issued under authority of Section 317 of the CZMA and Sections 5, 7 and 9 of the Act.

**II. Availability of Comments**

All comments submitted in response to this advance notice of proposed rulemaking will be available for examination during normal business hours in Room 310, Page Building Number 1, 2001 Wisconsin Avenue, NW., Washington, D.C. 20235.

**III. Mailing List**

Any person interested in receiving public regulatory documents as they are developed during this rulemaking should submit his/her name, address, affiliation, and phone number to the Deputy Director, Policy, Evaluation, and

External Relations at the above address in order to be placed on the mailing list.

**IV. Proposed and Final Rules**

NOAA will issue proposed rules to implement the Act after comments received in response to this ANPR have been evaluated. NOAA plans to issue the proposed rules in April 1981 and final rules in July 1981.

**V. Regulatory Issues**

**A. General Background**

The CZMA was enacted in 1972 to encourage and assist states in developing and implementing management programs to preserve, protect, develop, and where possible, to restore or enhance the resources of our nation's coast. The primary purpose of the 1980 amendments is to reaffirm the nation's commitment to the wise use and management of our coastal resources through the coastal zone management program. To this end, Section 306, which provides funds to coastal states to implement approved coastal management programs, was reauthorized for five years by the Act, and certain key provisions of the CZMA were strengthened to require significant improvements in state coastal management programs.

**B. Legislative Amendments and Issues to be Resolved Through Rulemaking**

**1. Improving Coastal Zone Management—Sections 303/306**

The following provisions of the Act relate to improving coastal management:

—Section 303 was amended to clarify national coastal policy by describing specific national objectives that warrant full consideration during the implementation of approved State coastal management programs.

—Section 306(a) was amended to encourage more effective coastal management by requiring states with approved programs to expend an increasing proportion of administrative grants (up to a maximum of 30 percent unless a state agrees to a higher percentage) on activities that will result in significant improvement in achieving the national coastal objectives specified in Section 303.

—Section 312 was amended to require the Secretary to evaluate the extent to which a state addresses the national coastal objectives in Section 303 and to reduce or withdraw up to 30 percent of the financial assistance available to any coastal state under Section 306 if that state is failing to make "significant improvement" in achieving these objectives.

Comments are requested with respect to the following and any other relevant issues:

—What guidelines or standards should be used in determining what constitutes a

"significant improvement" in achieving the coastal management objectives specified in Section 303? Against what baseline should improvements be measured?

—What types of management activities may a state perform as a means of making significant improvements?

—How long should an activity be eligible to be considered an "improvement?" One year? If longer, based on what factors?

—How should priorities be set for determining in which areas of national concern a state needs to make significant improvements?

—How should the phrase "increasing proportion of each grant" be defined? Against what baseline should the increasing proportion be measured?

—What guidelines and procedures should be followed to determine the amount of funding that will be withheld or withdrawn if the state has failed to make "significant improvements"?

**2. Protecting Resources of National Significance—Section 306(i)**

New Section 306(i) encourages states to increase protection of coastal resources of national significance by inventorying and designating such resources and developing "specific and enforceable standards" for their protection. The Secretary is directed to monitor state progress in carrying out these activities and to deny grants under section 306A to states that have not made "satisfactory progress" in accomplishing these tasks by September 30, 1984.

Comments are requested with respect to the following and any other relevant issues:

—What criteria should be provided to states to guide them in their determination of whether a resource is one of national significance?

—How should "satisfactory progress" in achieving the objectives of Section 306(i) be measured?

—When should states begin activities designed to protect nationally significant resources in order to support a finding of satisfactory progress by 1984?

—How should "specific and enforceable standards" be defined?

—To what extent have some states with approved programs already satisfied the requirements of Section 306(i) and how should this compliance be demonstrated?

**3. Allocating Administrative Grants—Section 306(b)**

Section 306(b) requires that administrative grants under Section 306 be allocated among coastal states with approved programs in accordance with rules and regulations that take into account "the extent and nature of the shoreline and area covered by the plan, population of the area, and other relevant factors."

Comments are requested with respect to the following and any other relevant issues:

—How should the shoreline, coastal area and population factors be weighted in the formula used to allocate administrative grants?

—What other factors are "relevant" and how much weight should they be given?

#### 4. Resource Management

##### Improvement Grants—Section 306A

New Section 306A establishes a grant program to assist states in preserving and restoring specific areas, redeveloping urban waterfronts and ports, and providing access to public coastal areas and coastal waters. Section 306A grants may be used for acquiring interests in land, low-cost construction projects, engineering designs and specifications, and educational interpretive and management costs determined by the Secretary to be consistent with the purposes of the section. No state is eligible to receive Section 306A grants unless it is making "satisfactory progress" in activities designed to result in significant improvements as discussed above.

Comments are requested with respect to the following and any other relevant issues:

—What methodology should be followed for allocating 306A grants, i.e. should grants be allocated by formula or competitively? If by formula, what factors should be included? If competitively, what criteria should be used?

—How should funds available under 306A be allocated among the three purposes of (1) preserving and restoring specific areas, (2) redeveloping urban waterfronts and ports, and (3) providing public access to coastal areas and coastal waters.

—What should be the allowable uses and costs that are eligible under section 306A.

##### 5. Coal and Alternative Ocean Energy Impact Grants—Section 308(c)(3)

The Act established a new Section 308(c)(3) under the Coastal Energy Impact Program (CEIP), authorizing the Secretary to make grants to eligible coastal states for preventing or mitigating unavoidable environmental and recreational losses in the coastal zone resulting from the "transportation, transfer or storage of coal or from alternative ocean energy activities." Funds available under Section 308(c)(3) must be allocated among eligible states in accordance with "rules and regulations \* \* \* which shall take into account the number of coal or alternative ocean energy facilities, the nature of their impacts, and other relevant factors \* \* \*"

Comments are requested with respect to the following and any other relevant issues:

—How should "coal transportation, transfer or storage" activities and facilities be

defined? Should facilities be water dependent in order to qualify a state for impact assistance?

—How should "alternative ocean energy activities" be defined?

—How should coal and alternative ocean energy impact grants be allocated among eligible states? Should one formula be developed that includes coal and alternative ocean energy facilities? Should available funds be split between coal and alternative energy impacts and separate formulas developed? Should a competitive system be used rather than state-by-state allocations based upon a formula?

—How should eligibility of coastal states for coal and alternative ocean energy grants be determined? Should states not receiving OCS formula grants be given priority consideration?

—What should be the allowable uses of these grants? Should the same uses eligible under environmental and recreational loss grants (Selection 308(b)(5)(c)) be allowed or should uses be restricted—e.g., planning only or planning and land acquisition only?

##### 6. Review of Performance (Evaluation)—Section 312

Section 312 requires a "continuing review of the performance of coastal states with respect to coastal management." This review must include a written evaluation which assesses the extent to which the state has: (1) Implemented and enforced its approved program; (2) addressed the coastal management needs identified in Section 303(2) (A)–(I); and (3) adhered to the terms of any grant, loan or cooperative agreement funded under the CZMA, as amended. The Act requires that a public meeting be conducted as part of each evaluation and that opportunity be provided for oral and written comment by the public. Evaluation reports must be issued following each review of state performance. The Secretary is directed to reduce financial assistance under the Act by up to 30 percent if it is determined that a state is not making significant improvement in achieving the coastal management objectives identified in Section 303(2)(A)–(I) and to withdraw program approval and financial assistance if it is found that a state is failing to adhere to or is unjustifiably deviating from its approved program or the terms of any grant or cooperative agreement and refuses to remedy the deviation. The statute outlines procedural safeguards (such as notice to the state and an opportunity for a public hearing) that must be observed if the Secretary finds that program approval and financial assistance should be withdrawn.

Comments are requested with respect to the following and any other relevant issues:

—Should the regulations allow use of alternative types of evaluation, such as

evaluation by third parties, self-evaluations or nationwide evaluation with respect to specific national objectives? If so, what alternatives should be considered?

—What should the evaluation team review to determine whether the state has (1) implemented and enforced its approved program (2) addressed the coastal management needs identified in Section 303(2) (A)–(I), and (3) adhered to the terms of any grant, loan, or cooperative agreement?

—Should state coastal zone management programs and coastal energy impact programs be evaluated in a separate or integrated manner? For example, should the CEIP evaluation be conducted on the same schedule as the CZM program evaluation? How should the CEIP be assessed with respect to consistency with CZM program goals? Should there be separate regulations for CEIP evaluations?

—What factors, criteria or standards should be developed for determining whether a state is "adhering to" its approved program, "addressing" the national coastal management needs identified in Section 303(2)(A)–(I), and "implementing and enforcing" the approved program or is "unjustifiably deviating from" the program?

—At what point in the grant cycle should evaluation site visits take place and draft and final findings be issued? Should a uniform approach be adopted, or should timing be set on a state by state basis? Should timing be established by regulation or should it be left flexible?

—What should be the guidelines for withdrawing program approval and financial assistance to any state that is unjustifiably deviating from its approved program or the terms of any grant, or cooperative agreement and refuses to remedy the deviation?

—What procedures should be established for providing oral and written comments and for holding public meetings? What procedures should be used for distributing evaluation reports?

##### 7. Island Preservation—Section 315

Section 315 of the Act authorizes the Secretary to make grants for (1) acquiring, developing and operating estuarine sanctuaries, and (2) acquiring lands to provide for the preservation of islands or portions thereof. Regulations implementing the estuarine sanctuary program were issued by NOAA in 1974 (15 CFR Part 921).

Comments are requested with respect to the following and any other relevant issues.

—For what purposes should island preservation grants be made? For example, should such grants be made only for the purpose of preserving islands, or portions thereof in their natural state, should they encompass acquisition for compatible uses such as research, education, or public recreational access, should they encompass other purposes and, if so, what purposes?

—Should the procedures for administration of the island preservation program be integrated with or separate from those of the estuarine sanctuary program with respect to programmatic objectives, grant application

process, public participation, and operation and management of acquired lands?

—How should appropriations for Section 315 be allocated between island preservation and the estuarine sanctuary program?

—By what criteria should grant applications for island preservation be evaluated? Should certain types of islands, such as barrier islands, be given priority over others for awards?

#### VI. Availability of Funds for Public Participation

In order to promote a full and fair determination of the issues involved, OCZM is making available \$5,000 to compensate persons eligible under the criteria set forth in NOAA regulations (15 CFR Part 904) for their participation in this proceeding. The closing date for the receipt of applications for compensation is March 1, 1980.

**Available Fund:** A total fund of \$5,000 is available to compensate eligible applicants. This fund may be distributed among one or more applicants, or, at the discretion of the Administrator, not distributed at all.

**Eligible Persons:** In accordance with the criteria of 15 CFR 904.3, persons who represent an interest in the presentation of which can reasonably be expected to contribute substantially to a fair determination of the issues described above may be eligible for compensation from these funds. In determining eligibility and the amount of compensation, the Administrator may take into account:

- (a) Whether the interest will be adequately represented otherwise;
- (b) The need to encourage participation by segments of the public who may have little economic incentive to participate;
- (c) The importance of the representation to a fair balance of interests;
- (d) The number and complexity of the issues presented;
- (e) The importance of public participation; and
- (f) The applicant's resources available for participation.

**Eligible Costs:** The Administrator may compensate eligible persons for some or all of the reasonable costs incurred in participating including:

- (1) Salaries for participants or employees of participants;
- (2) Fees for consultants, experts, contractual services, and attorneys;
- (3) Travel and travel related costs such as lodging, meals, tipping, telephone calls, etc.; and
- (4) Document reproduction, postage, etc.

**Procedures for applying:** Applications may be filed with the Office of General Counsel, National Oceanic and

Atmospheric Administration, Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, D.C. 20230, no later than March 1, 1980, and shall contain the information required by and be filed in accordance with NOAA's financial participation regulations, 15 CFR 904.4.

Dated: December 19, 1980.

Robert W. Knecht,  
*Acting Assistant Administrator for Coastal Zone Management.*

[FR Doc. 80-40480 Filed 12-29-80; 8:45 am]

BILLING CODE 3510-08-M

### CONSUMER PRODUCT SAFETY COMMISSION

#### 16 CFR Part 1020

#### Proposed Methodology for Commission Consideration of Findings Under Section 9(c) of the Consumer Product Safety Act

**AGENCY:** Consumer Product Safety Commission.

**ACTION:** Proposed rule.

**SUMMARY:** The Commission proposes a regulation setting forth its general methodology for Commission consideration of the various findings under section 9(c) of the Consumer Product Safety Act. These findings are required for the issuance or material amendment of consumer product safety standards or bans. To the extent section 9(c) requires the Commission to evaluate the effect of a rule in terms of reduced risks and increased costs, this document contains the Commission policy on risk assessment and economic considerations, including benefit and cost issues, relevant to issuance of consumer product safety standards or bans.

**DATES:** (1) Written comments concerning the proposed rule must be received by March 2, 1981. Comments or other relevant information received after this date will be considered only to the extent practicable.

(2) There will be an opportunity for interested persons to orally present data, views, or arguments on Tuesday, February 3, 1981, at 9:30 a.m. Those wishing to make oral presentations should notify the Office of the Secretary by Tuesday, January 27, 1981. Additionally, a summary or copy of testimony is to be submitted to the Office of the Secretary two working days prior to the public meeting.

(3) The Commission proposes that this rule become effective 30 days after publication of the final rule in the *Federal Register*.

**ADDRESS:** Written comments, preferably in five copies, should be sent to: Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments received may be seen in the Office of the Secretary, Third floor, 1111 18th St., NW., Washington, D.C. during working hours (8:30 a.m.—5:00 p.m.) Monday through Friday. Persons wishing to make oral presentations should contact Richard Danca in the Office of the Secretary. These oral presentations will be held in the Commission's 3rd floor hearing room at the address above.

**FOR FURTHER INFORMATION CONTACT:** Carole Roth, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207 (202-634-7770). Persons wishing to make oral presentations should contact: Richard Danca, Office of the Secretary (202-634-7700).

**SUPPLEMENTARY INFORMATION:** In this document the Commission proposes a regulation setting forth its general methodology for Commission consideration of the various findings under section 9(c) (15 U.S.C. 2058(c)) of the Consumer Product Safety Act (CPSA). The seven separate findings of section 9(c)(1) and 9(c)(2) are required to be made by the Commission prior to promulgating a consumer product safety rule under the Act or a material amendment to such a rule. (This includes consumer product safety standards or bans under sections 7 and 8 of the CPSA, respectively. (15 U.S.C. 2056, 2057)). In addition, the Commission is required to include its section 9(c) findings in the rules. To revoke a consumer product safety rule, the Commission is required to make the negative finding that the rule is not reasonably necessary to address an unreasonable risk of injury. (See section 9(e).)

The section 9(c) findings relate to the risk which will be eliminated or reduced by a rule and the costs of a rule. While these findings are made in issuing individual consumer product safety rules, the Commission believes that a rule generally interpreting the requirements of section 9(c) will assist the public in understanding CPSC decision-making processes regarding these findings and will be helpful to the Commission in providing an overall approach for consideration of the findings in individual cases.

The provisions of the regulation below are essentially self-explanatory. The regulation follows section 9(c) subsection by subsection. Certain subsections are highlighted in this preamble. While this Part only applies

to consumer product safety rules, it may be useful for rules issued under other sections of the CPSA or under the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1211 et seq.), the Flammable Fabrics Act (FFA) (15 U.S.C. 1191 et seq.), the Poison Prevention Packaging Act of 1970 (PPPA) (15 U.S.C. 1471 et seq.) and the Refrigerator Safety Act (RSA) (15 U.S.C. 1211 et seq.) to the extent these other statutory provisions require findings similar to the 9(c) findings. The Commission emphasizes that Part 1020 is a general interpretive rule; as provided in proposed § 1020.2(c) below, individual rule may incorporate in their 9(c) findings information or approaches not specifically mentioned here or may omit portions of the information discussed in this Part. If a substantial departure from this rule occurs, an explanation will be provided in the individual rule.

The Commission notes that the process of describing benefits and costs of a rule for the purpose of section 9(c) is a complex one. While the Commission prepares individually articulated findings as required by the section, information considered under the various findings may overlap since the findings are interrelated (e.g., the finding concerning the approximate number of consumer products subject to the rule (§ 1020.6 below) provides information useful in calculating the various costs of a rule (§ 1020.7 below) and also helps determine the finding involving the extent of consumer exposure to the products being regulated (§ 1020.5 below on the nature and degree of the risk.)

The Commission also points out that benefits and costs of its rules, when described in numerical terms, may often, because of the inherent uncertainties in risk estimation, best be represented by a range of values rather than a single point estimate. This fact is recognized in several places in the rule proposed below. Section § 1020.5 on the degree and nature of the risk of injury includes statements in both the acute and chronic area that estimates of the number and kinds of injuries or illnesses that will be affected by a rule may be expressed as a range of possible harm and may reflect any uncertainties involved in estimating risks to humans. Similarly, § 1020.7 on cost recognizes that cost estimates are likely to be expressed as ranges of costs.

The Commission, furthermore, emphasizes that while the findings of section 9(c) can be related to the elements of analyzing benefits and costs, the Commission uses quantified cost-benefit analyses as one of many tools in regulatory decisionmaking and does not rely solely on the cost-benefit

outcome to regulate. Commission decisions to issue consumer product safety rules are premised on a thorough consideration of the benefits and costs. The Commission notes that it is often difficult to assign monetary values to human suffering in a meaningful way for regulatory purposes. (Therefore, § 1020.5(a)(4) and § 1020.5(b)(5) provide that the Commission, *where feasible*, estimates the costs of injuries or illnesses that will be eliminated by a rule.) The Commission believes that the ultimate issues involved in issuing health and safety regulations are likely to require judgments on values much as on judgments characterized by numerical estimations. In this regard it should be noted that the legislative history of the CPSA indicates that the Commission is not required to conduct a cost-benefit analysis prior to promulgating a consumer product safety rule. (H.R. Rep. No. 1153, 92nd Cong., 2nd Sess. 33 (1972).)

While the Commission is not required to conduct a formal cost-benefit analysis prior to issuing a consumer product safety rule, the Commission is required to find that the rule is reasonably necessary to eliminate or reduce an unreasonable risk of injury associated with the regulated product. (Section 9(c)(2)(A) of the CPSA.) This is the central finding for issuance of a consumer product safety rule since it is made after and based upon the individual findings contained in section 9(c)(1) of the CPSA. A number of court cases have interpreted this finding to mean that the Commission must find that the expected benefits of a rule bear a reasonable relationship to the anticipated costs. (See *Aqua Slide "N" Dive v. CPSC*, 569 F.2d 831, at 842 (5th Cir. 1978); *Southland Mower Co. v. CPSC*, 619 F.2d 499, at 523 (5th Cir. 1980).) This test, which does not require the Commission to find that the quantifiable costs are outweighed by the quantifiable benefits but rather to determine that the total benefits, in the judgment of the Commission, justify the costs, is incorporated in the proposal below at § 1020.10(c).

As a means of designing the most effective regulations, the proposed regulation provides for consideration of alternatives to a mandatory consumer product safety standard or ban. These are listed at § 1020.8(b) below.

#### Conclusion

The Commission is proposing this rule for public comment in order to have the benefit of diverse views on the complicated and often controversial subjects dealt with in the rule and may revise the rule in the final version as a

result of the comments. In addition, as the state of the art in the area of risk assessment or economic analysis for health and safety regulations advances and the Commission's procedures in this area change, the Commission will amend this rule, as needed and appropriate.

In addition to written comments, because of the importance of this interpretive rule, interested persons will be afforded an opportunity to make an oral presentation of data, views, or arguments on any aspect of the proposed rule on February 3, 1981. The proceedings for the oral presentation will be held at 9:30 am at the Commission's third floor hearing room at 1111 18th St., NW., Washington, D.C. The Commission's procedural regulations for oral presentation, 16 CFR Part 1109, (40 FR 49122), shall govern this proceeding.

The Commission is particularly interested in receiving written and oral comments on the following three issues:

1. Whether, in considering costs and benefits of proposed regulations, the Commission should ever assign a monetary value to life, types of injuries, and pain and suffering and if so, in what circumstances;
2. Whether the Commission should discuss in the rule its methodology or methodologies available for assessing risk, particularly risk from chronic hazards such as carcinogens, including specification of preferred risk assessment models (e.g. linear, multistage, and so forth); and
3. Whether the Commission should discuss in detail in the rule the types of indirect benefits (e.g. pain and suffering avoided) it expects from regulations and the methods used for assigning values to such indirect benefits.

The Commission proposes that this rule become effective 30 days after publication of the final rule.

Accordingly, pursuant to the provision of the Consumer Product Safety Act (section 9(c), Pub. L. 92-572, 86 Stat. 1216), the Commission proposes to add a new Part 1020 to Title 16 as follows:

#### PART 1020—METHODOLOGY FOR COMMISSION CONSIDERATION OF FINDINGS UNDER SECTION 9(c) OF THE CONSUMER PRODUCT SAFETY ACT

##### Subpart A—General

Sec.	
1020.1	Purpose.
1020.2	Scope.
1020.3	Definitions.

**Subpart B—Specific Findings under Section 9(c)(1)**

- 1020.5 The degree and nature of the risk of injury the rule is designed to eliminate or reduce.
- 1020.6 The approximate number of consumer products, or types or classes thereof, subject to such rule.
- 1020.7 The need of the public for the consumer products subject to such rule, and the probable effect of such rule upon the utility, cost, or availability of such products to meet such need.
- 1020.8 Any means of achieving the objective of the order while minimizing adverse effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety.

**Subpart C—Summary Findings under Section 9(c)(2)**

- 1020.10 The rule (including its effective date) is reasonably necessary to eliminate or reduce an unreasonable risk of injury associated with such product.
- 1020.11 The promulgation of the rule is in the public interest.
- 1020.12 In the case of a rule declaring the product a banned hazardous product, that no feasible consumer product safety standard under this Act would adequately protect the public from the unreasonable risk of injury associated with the product.

Authority: Sec. 9(c), Pub. L. 92-573, 86 Stat. 1216; 15 U.S.C. 2058(c).

**Subpart A—General****§ 1020.1 Purpose.**

(a) The purpose of this Part 1020 is to set forth the methodology the Commission will generally use in making the findings required by section 9(c) of the Consumer Product Safety Act (CPSA) (15 U.S.C. 2058(c)) for issuance or material amendment of consumer product safety rules. For revocation of consumer product safety rules, the Commission must find that the rule is not reasonably necessary to eliminate or reduce an unreasonable risk of injury. (Section 1020.10 of the rules below may be helpful in this regard.)

(b) The various findings under section 9(c) can be related to the elements of analyzing the expected costs to industry and consumers of Commission regulatory action in the light of the health and safety benefits to be obtained. To the extent section 9(c) mandates the use by the Commission of evaluations of the effect of a rule, this Part contains the Commission policy on benefit and cost considerations relevant to issuance of consumer product safety rules.

**§ 1020.2 Scope.**

(a) This Part contains the Commission's general policy for making findings under section 9(c) of the

Consumer Product Safety Act prior to promulgating a consumer product safety standard or ban under sections 7 and 8 of the CPSA, respectively, or a material amendment to such a standard or ban.

(b) Regulations issued under other sections of the Consumer Product Safety Act or under the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1211, et seq.), the Flammable Fabrics Act (FFA) (15 U.S.C. 1191, et seq.), the Poison Prevention Packaging Act of 1970 (PPPA) (15 U.S.C. 1471 et seq.), and the Refrigerator Safety Act (RFA) (15 U.S.C. 1211, et seq.) will be issued in accordance with the findings required by the appropriate statutory authority. However, to the extent these other statutory provisions require findings similar to the 9(c) findings, the kinds of information and methodologies discussed in this Part may be used by the Commission.

(c) In issuing individual consumer product safety rules, the Commission may find it necessary to consider information or approaches not specifically mentioned in this rule in order to make the section 9(c) findings. Similarly, in individuals cases, it may not be appropriate or necessary for making section 9(c) findings to consider all of the information discussed in this Part. Where a substantial departure from this rule occurs, the departure will be fully explained in the individual rule.

(d) The Commission makes preliminary section 9(c) findings when it proposes a consumer product safety rule or a material amendment to such a rule. These preliminary findings may be subject to revision in issuing the final rule based on public comments received on the proposed rule.

**§ 1020.3 Definitions.**

(a) The term "risks of acute injury or illness" means the potential for injury or illness which can occur immediately or shortly after a single or limited number of exposures to a consumer product. The injuries associated with acute risks are characterized by sudden or short onset and temporary or permanent damage. Examples include the injury which can result from contact with a sharp blade or exposure to a faulty electrical connection.

(b) The term "risks of chronic injury or illness" means the potential for injury or illness which can occur after a significant period of time following single or multiple exposures to a consumer product. The injuries or illnesses associated with chronic risks are often characterized by lengthy duration or frequent recurrence over a long time. Examples include the contracting of a form of cancer or other

progressive or persistent disease after a single or continual exposure to various levels of a certain chemical.

(c) The term "risks assessment" means an evaluation, in qualitative or quantitative terms or both, of the effects of exposure to hazards in consumer products. The evaluation includes an analysis of the nature of the hazard and the likelihood of injury or illness that will result from exposure to certain products. Assessing the likelihood of injury or illness may require the development of ranges of risk estimates based partly on data and partly on scientific or medical theory. The evaluation may also take into account factors other than the overall magnitude of the risk, such as the special vulnerability of children, the elderly or the handicapped; the foreseeability or hidden nature of the risk; and to what extent the manner or duration of product use affects injuries.

**Subpart B—Specific Findings under Section 9(c)(1)****§ 1020.5 The degree and nature of the risk of injury the rule is designed to eliminate or reduce.**

This finding by the Commission is fundamental to a determination of the benefits that can be expected from a consumer product safety rule. The Commission evaluates the frequency and severity of risks of both acute and chronic injury or illness, which are discussed separately below:

(a) *Acute injury or illness.* The Commission shall prepare a qualitative discussion of the kind and extent of acute harm that results from exposure to the product being regulated. The Commission may base this finding on engineering, medical, scientific, or human factor analyses or injury potential. Where practicable and appropriate, however, in assessing the risks of acute injury or illness, the Commission also prepares a quantified risk assessment as part of its analysis of the degree and nature of the risk of injury. If such quantification is not possible in particular cases, the Commission explains why a quantitative assessment has not been prepared. The following steps are generally used in assessing risks of acute injury or illness:

(1) The Commission estimates the number and kinds of injuries and illnesses annually associated with the hazard being regulated. This estimate can include a range of possible harm, reflecting whatever uncertainties may exist in the data and theory used in deriving the estimate. Data sources for these estimates include but are not limited to the Commission's National

Electronic injury Surveillance System (NEISS), which provides information on injuries treated in hospital emergency rooms; death certificates; news clips and consumer complaints available to the Commission; and data from burn treatment centers and poison control centers.

(2) The Commission then estimates the number and kinds of injuries or illnesses which would be eliminated annually if all consumer products subject to the rule were in compliance with the rule.

(3) If determinable, factors such as expected industry compliance with the rule and the rate of product replacement by consumers are considered to arrive at an estimate of the number and kinds of injuries or illnesses which would be eliminated after promulgation of the rule.

(4) The Commission, where feasible, estimates the "costs" of the injuries or illnesses that will be eliminated by a rule to arrive at a determination of the safety or health benefits of a rule. Where a numerical description of these costs is not possible, the Commission describes them in qualitative terms. Costs may include indirect costs (e.g., social costs, lost wages, pain and suffering) as well as direct medical costs associated with injuries or illnesses.

(5) Risk assessment for acute risks may involve consideration of such factors as the special vulnerability of certain populations such as children, the elderly, or the handicapped; the foreseeability of the risk by the consumer; and to what extent the manner or duration of product use affects injuries.

(b) *Chronic injury or illness.* The Commission prepares a qualitative discussion of the kind and extent of chronic harm that results from exposure to the product being regulated. Where practicable and appropriate, the Commission uses a quantified risk assessment as discussed in paragraph (a) of this section as a tool in regulatory decisionmaking. Many chronic risks of injury or illness, such as cancer, typically occur years after first exposure, making it difficult to link incidence of disease to exposure to specific consumer products. The Commission must often evaluate risk on the combined basis of scientific theory and available empirical evidence rather than using injury data alone. The following steps will generally be used in assessing risks of chronic injury or illness. (Where a quantitative assessment is not possible in particular cases, the Commission explains why):

(1) The Commission evaluates whether the substances in the products

in question are likely to cause chronic illness in humans. In some instances, this evaluation will be based on the experience of workers or other populations exposed to the substance for long periods. In other instances, the evaluation will be based on animal experiments. Data from predictive *in vitro* tests and chemical structure-activity relationships will also be used in evaluating a chronic hazard. With regard to carcinogenic risks, the Commission is assisted by the work and conclusions of various expert research organizations, including but not limited to the International Agency for Research on Cancer (IARC) and the National Cancer Institute (NCI) as well as other regulatory agencies such as the Environmental Protection Agency (EPA) and the Occupational Safety and Health Administration (OSHA).

(2) The Commission assesses the nature and extent of consumer exposure to the substances in the products being regulated. A theoretical model may be developed to determine typical consumer exposure. For example, in the case of a gas released from an aerosol product, the Commission might use predictions concerning the likely concentration of the chemical in the air and the likely amount inhaled by a consumer, based on assumptions concerning the quantity of chemical released under a specified set of conditions and the rate of air exchange.

(3) Combining the evaluation of the chronic injury or illness potential of the substance in the products and the exposure evaluation, the Commission assesses the risk to consumers from the consumer products. Where feasible, the assessment includes an estimate of the number or range of numbers of incidents of disease or deaths associated with exposure to the product, and the number of incidents which will be eliminated by the rule. Where numerical assessments are made, the Commission will explain any assumptions made as well as the extent to which the resulting conclusions may be uncertain.

(4) In evaluating the risk from a potential carcinogen, the Commission is assisted by scientific work concerning risk assessment, such as the Interagency Regulatory Liaison Group document entitled *Scientific Basis for Identification of Potential Carcinogens and Estimation of Risks*, (44 FR 39858, July 8, 1979) and the Regulatory Council's cancer policy, *Regulation of Chemical Carcinogens* (44 FR 60038; October 17, 1979).

(5) As with risks of acute injury or illness, where feasible, the Commission estimates the "costs" of the injuries or illnesses that will be eliminated by a

rule to arrive at a determination of the benefits of a rule.

(6) Risk assessment for chronic risks may involve consideration of such factors as the special vulnerability of certain populations, the foreseeability of the risk by the consumer, and to what extent the manner or duration of product use affects the risk.

**§ 1020.6 The approximate number of consumer products, or types or classes thereof, subject to such rule.**

Information from this finding serves two purposes: it helps determine the extent of consumer exposure to the products being regulated, thus aiding in risk assessment and it provides a basis for calculating the various costs of the rule to industry and consumers. The Commission considers the following elements in making this finding:

(a) The Commission attempts to determine current production and sales of the products or the product types or classes covered by the rule. It also taken into account expected changes in production and sales as a result of the rule and other relevant changes such as long-term trends in production or sales or the use of close substitutes. Sources for these estimates include published data of federal and other government units, private publications, direct contact with manufacturers and distributors, industry trade associations, consumer surveys, and direct staff observation.

(b) While consumer product safety rules do not apply to products already in consumers' hands, estimates of the stock of goods to which consumers are exposed are useful in assessing risk. Therefore, on a case-by-case basis, the Commission considers such estimates. Factors which are taken into account in estimating the stock in consumers' hands include previous production, expected product life, product maintenance, and consumer patterns of use and abuse.

(c) Where the products potentially covered by a rule include items used in the consumer environment and items used in industrial settings, the Commission develops criteria for distinguishing among the products to identify those consumer products covered by the rule.

(d) Complete description of all of the individual products involved may not be feasible for rules which potentially affect a wide range of products for a specific hazard (e.g., rules setting requirements for consumer products containing a certain chemical). In such cases, the Commission considers representative information about the

types and classes of products subject to the rule.

**§ 1020.7 The need of the public for the consumer products subject to such rule, and the probable effect of such rule upon the utility, cost, or availability of such products to meet such need.**

This finding requires that the Commission consider four factors: the need for the products being regulated, the effect of the rule on the utility of the products for their users, the effect of the rule on the cost of the products, and the effect of the rule on the availability of the products. Each factor is discussed separately below:

(a) The Commission measures the need for a product by the extent to which the product is bought by the public, the uses to which it is put, and the extent to which close substitutes exist.

(b) The Commission evaluates the potential effect of its action on the utility of the product for its users by describing or analyzing how the functional attributes of the product may be changed, how the esthetic appeal of the product may be altered, and how other kinds of utility that may attach to the product may be modified. Particularly in case of a product ban, where close substitutes for the regulated product exist, the Commission takes the characteristics of these substitutes into account in evaluating the overall effect of the rule on the consumer. Sources for the evaluation of a rule's impact on utility include the opinions of the Commission's technical staff and comments from manufacturers, trade associations, and consumers, as well as comments from the public generally.

(c) The Commission considers the following kinds of costs (costs may be expressed as a range of costs):

(1) *Costs to affected firms.* The Commission estimates costs to manufacturers and others in the chain of distribution of producing and distributing complying products or where appropriate, of no longer being able to produce or distribute the regulated product. These cost estimates are based on CPSC determinations as to reasonable costs of compliance and on estimates by producers and others as to actual expected costs, including any significant costs of capital, labor, materials, distribution and sales. The Commission considers possible shifts in product lines by firms reacting to a rule. The Commission considers all significant production and distribution effects to estimate the total impact on firms.

(2) *Costs to consumers.* CPSC

estimates the cost to consumers of compliance with a CPSC rule. Such costs include estimated changes in product price, utility, and availability as a result of a rule. Where there may be significant changes in the value of the product because of such factors as changes in quality, durability, or maintenance costs, these are included in the estimates of cost to consumers.

(3) *Other effects.* The Commission discusses any other significant costs of a rule such as changes in sales and employment for some firms, effects on international trade, competitive disruptions, or other changes in normal business practice. The Commission may consider how any such effects may be offset by changes in the market for close substitutes. (e.g., substitute products may increase sales and employment for other firms.)

(d) The Commission discusses whether the availability of products will be affected by a rule, taking into account such factors as whether changes in the state of technology are required by a rule, how fast affected firms can adapt to a rule, and the availability of substitute products or new technologies to fill consumers' needs.

**§ 1020.8 Any means of achieving the objective of the order while minimizing adverse effects on competition or disruption or dislocation of manufacturing and other commercial practices consistent with the public health and safety.**

This finding requires the Commission to consider alternatives to the rule or parts of the rule which will accomplish the objective of the rule but will be less disruptive to industry. The Commission considers the following elements under this finding:

(a) The Commission considers effects the rule may have on processes of production, distribution and sale of the products subject to the rule. Particular attention is given to effects on small business, on competition, and on foreign trade.

(b) The Commission considers alternative ways, consistent with protecting the public health and safety, to minimize any adverse impacts identified. Such alternatives may include different effective dates; different substantive requirements, including labeling requirements; the use, where feasible, of performance rather than design requirements; and voluntary standards or information disclosure by CPSC rather than mandatory CPSC regulations. The Commission also may consider, where appropriate and authorized by law, such regulatory

alternatives as exemptions for small business and differing requirements according to the type of firm or product regulated ("tiering").

**Subpart C—Summary Findings Under Section 9(c)(2)**

**§ 1020.10 The rule (including its effective date) is reasonably necessary to eliminate or reduce and unreasonable risk of injury associated with such product.**

This is the central finding for issuance or material amendment of a consumer product safety rule. It concerns the relationship between the anticipated injury or illness reduction from a rule and the costs of the rule. The Commission takes the following steps in making this finding:

(a) The Commission reviews the information contained in the individual findings for a rule under section 9(c)(1) of the CPSA.

(b) The Commission considers the expected effectiveness of a rule in eliminating or reducing the number of accidents, injuries and illnesses and their costs, in light of the costs to the public of eliminating or reducing the hazards.

(1) A variety of factors may be involved in estimating the effectiveness of a rule in addressing a risk, including engineering, scientific, behavioral and enforcement considerations; and predictions about the response of industry and the public in general.

(c) The Commission may make this finding if it concludes that the expected benefits of a rule bear a reasonable relationship to the anticipated costs.

**§ 1020.11 The promulgation of the rule is in the public interest.**

Issuance of rules where the benefits bear a reasonable relationship to the costs (i.e., rules which are reasonably necessary to address an unreasonable risk of injury) will generally also be in the public interest. However, where a rule is reasonably necessary to address and unreasonable risk of injury, some other factor may make issuance of the rule more or less desirable. Under this finding, the Commission, where it has found a rule to be reasonably necessary to address an unreasonable risk of injury, reviews any other relevant factors; such as adequacy of voluntary actions and societal concerns, such as environmental, energy, or international trade concerns, to determine whether issuance of the rule is in the best interest of the public.

§ 1020.12 In the case of a rule declaring the product a banned hazardous product, that no feasible consumer product safety standard under this Act would adequately protect the public from the unreasonable risk of injury associated with the product.

Under this finding, the Commission looks at the particular product being regulated and determines whether a standard, including a labeling rule, could be designed and met so as to render what is being regulated safe. The Commission considers only "feasible" standards. "Feasibility" under this provision means technically and economically possible within a reasonable time period, given current technology or technology expected to be developed in the near future.

Dated: December 23, 1980.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

## 16 CFR Part 1201

### Proposed Interpretation of Architectural Glazing Materials Safety Standard; Decision on Petition CP 78-18

**AGENCY:** Consumer Product Safety Commission.

**ACTION:** Proposed interpretation; decision on petition.

**SUMMARY:** The Commission's safety standard for architectural glazing materials applies to several products, including bathtub and shower doors and enclosures. The Commission is proposing an interpretation of the standard that clarifies that the terms "bathtub doors and enclosures" and "shower door and enclosure" do not include glazing materials in a window located over a bathtub or within a shower stall and in the exterior wall of a building. The interpretation is intended to resolve questions which have arisen among firms whose activities are subject to regulation by the standard. This proposed interpretation grants a portion of a petition from the National Glass Dealers Association. The Commission has denied the other portions of that petition, which requested amendments to the standard, and in this notice explains the reasons for its decision.

**DATE:** Comments on the proposed interpretation should be submitted by March 2, 1981. The interpretation is proposed to become effective 30 days after it is published in final form.

**ADDRESS:** Comments should be submitted to the Office of the Secretary,

Consumer Product Safety Commission, Washington, D.C. 20207.

**FOR FURTHER INFORMATION CONTACT:** Harry I. Cohen, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492-6453.

**SUPPLEMENTARY INFORMATION:** In January 1977 the Consumer Product Safety Commission issued a safety standard to reduce unreasonable risks of injury associated with architectural glazing materials and certain products incorporating those materials (42 FR 1428; 16 CFR Part 1201). The standard prescribes tests to ensure that the glazing materials either do not break when impacted with a specified energy or break with such characteristics that they are less likely than other glazing materials to present an unreasonable risk of injury. The standard became effective on July 6, 1977.

The standard is applicable to glazing materials used in six specific products and to the products themselves. These products, each defined in the standard, are storm doors, doors, bathtub doors and enclosures, shower doors and enclosures, sliding glass doors (patio-type), and glazed panels. On August 28, 1980 the Commission revoked the provisions applicable to glazed panels (45 FR 57383). Therefore, as of August 28, 1981, the standard will apply only to five products and the glazing materials used in those products.

#### Bathtub and shower windows

The standard defines the term "bathtub doors and enclosures" to mean "assemblies of panels and/or doors that are installed on the lip of or immediately surrounding a bathtub" (§ 1201.2(a)(2)). The standard defines the term "shower door and enclosure" to mean "an assembly of one or more panels installed to form all of part of the wall and/or door of a shower stall" (§ 1201.2(a)(30)).

Since the effective date of the standard, firms whose activities are regulated by the standard have raised the question of whether these definitions include glazing materials in a window that is located over a bathtub or within a shower stall and in the exterior wall of a building. The definitions of bathtub and shower doors and enclosures contain no specific exemption for glazing materials in such windows. The text of § 1201.2(a)(2), if read literally, could include glazing material in an exterior wall window located above a bathtub because that window could be interpreted as being "immediately surrounding" the bathtub. Similarly, the text of § 1201.2(a)(30), if read literally,

could include glazing material in an exterior wall window because that window could be interpreted as forming "all or part of the wall \* \* \* of a shower stall."

In September, 1978 the National Glass Dealers Association (NGDA) petitioned the Commission to amend the architectural glazing standard (Petition CP 78-18). A portion of the petition requested amendments to the definitions of bathtub and shower doors and enclosures to exclude any glazing material in a window that is located over a bathtub or within a shower stall and in the exterior wall of a building.

The Commission, when it issued the standard in 1977, did not intend to include within the definitions of bathtub and shower doors and enclosures any item of glazing material that is contained in a window in an exterior wall of a building. In response to the petition, the Commission has reevaluated its original intention and found that it was appropriate to exclude from the standard glazing material in such windows. The Commission is aware of no injuries that have been associated with exterior wall windows surrounding bathtubs or within shower stalls. In addition, a common sense understanding of doors and enclosures would include the panels used to assemble bathtubs and showers inside the house, but not the actual walls of the house.

The existing definitions of bathtub and shower doors and enclosures could reasonably be interpreted either to include or exclude the glazing materials in exterior wall windows. Therefore, the Commission has decided to propose for public comment an interpretation of the architectural glazing standard that clarifies the Commission's original and present intention that the standard does not apply to such glazing materials. This initiation of a proceeding provides NGDA with the relief that it sought on this issue and the Commission has thus granted the portion of NGDA's petition concerning bathtub and shower exterior windows.

Because the Commission clarification does not amend the standard, the provisions of section 9(e) of the Consumer Product Safety Act do not apply. Nevertheless, the Commission wants to obtain the views of any member of the public who may be affected by it. Therefore, the Commission proposes the clarification below as an interpretation. If issued in final form, the interpretation will be codified in a new Subpart C so that anyone referring to the standard will also be able to refer to the interpretation.

### Other portions of petition

Aside from the bathtub and shower exterior window issue, NGDA's petition requested amendments to the Commission's architectural glazing standard. As discussed below, the Commission has denied these other portions of the petition, and this Federal Register document shall serve as the Commission's publication of its reasons for denial, as required by section 10 of the CPSA:

1. NGDA has requested amendments to the glazed panel provisions of the standard. However, the Commission revoked all of the glazed panel provisions on August 28, 1980, to become effective on August 28, 1981.

Before revoking the glazed panel provisions, the Commission solicited public comment on possible amendments to them. The Commission evaluated these comments before deciding to revoke the glazed panel provisions in final form. The Commission's Federal Register documents that proposed and issued the revocation fully discuss the Commission's reasons for revoking the provisions instead of amending them (44 FR 31218, May 31, 1979; 45 FR 57383, August 28, 1980). Briefly, the Commission determined that enforcement of glazed panel provisions by local building officials would be more effective than a federal enforcement program (45 FR 57388).

Because the glazed panel provisions of the standard have been revoked, the Commission has denied the portions of the NGDA petition that concern those provisions.

2. NGDA has also requested that six products containing glazed materials be deleted from the architectural glazing standard. If this were done, the standard would still apply to the glazing materials contained in the six products (after the glazed panel revocation becomes effective, five products).

NGDA's position is that application of the standard to the six products is unnecessary because consumers would be adequately protected by the applicability of the standard to the glazing materials incorporated into the six products. For example, a storm door need not fall within the standard because the glazing material comprising the storm door panel is within the standard.

The Commission disagrees with the NGDA position and has decided to deny this portion of the petition.<sup>1</sup> Under the existing standard, installers and fabricators of architectural glazing

products must certify that their products comply with the standard. This certification is a useful enforcement tool because most violations of the standard thus far have resulted from the intentional use of noncomplying glazing materials by installers and fabricators. If the standard were amended as requested by NGDA, installers and fabricators would no longer be "manufacturing" a product within the standard and they would not have to issue any certification. If the Commission did not have the certification requirement to use as an enforcement tool against installers and fabricators who use noncomplying glazing material, consumers would not be protected as well as they currently are.

3. Finally, the NGDA petition requested terminology changes in the standard. One was to add the phrase "or installations" to the term "architectural glazing products." The other was to define and use the term "installers" so that it is distinguished from the term "fabricators." NGDA's primary reason for requesting these changes is that installers are more familiar with these terms than the ones currently contained in the standard. NGDA has described the changes as "technical" ones that would have no impact on consumer protection.

The Commission does not dispute that segments of the glazing industry might well be more familiar with the terms "installations" and "installers" than with the terms now used in the standard. However, the Commission has no indication that the installers are confused about the application of the standard to them and their activities. To the contrary, the Commission's numerous contacts with the installers all indicate a high level of awareness on their part. In large part because of the educational efforts of NGDA and other glazing trade associations, the Commission believes that this level of awareness will continue. If any terminology changes are made to the standard now, the Commission cannot be sure that new questions will not be raised and uncertainty about applicability of the standard fostered. Therefore, the Commission has decided to deny this portion of the petition.

### Conclusion

The Commission has denied the portions of the NGDA petition concerning amendments to the glazed panel provisions, deletion of six products, and changes in terminology. The Commission has granted the portion concerning bathtub and shower doors and enclosures and, accordingly,

pursuant to sections 7 and 9 of the Consumer Product Safety Act, 15 U.S.C. 2056, 2058, the Commission proposes to amend Title 16, Chapter II, Subchapter B, Part 1201 of the Code of Federal Regulations, by adding a new Subpart C, as follows:

### PART 1201—SAFETY STANDARD FOR ARCHITECTURAL GLAZING MATERIALS

#### Subpart A—The Standard

\* \* \* \* \*

#### Subpart B [Reserved]

\* \* \* \* \*

#### Subpart C—Statements of Policy and Interpretation

##### § 1201.40 Interpretation concerning bathtub and shower doors and enclosures.

(a) *Purpose and background.* The purpose of this section is to clarify the scope of the terms "bathtub doors and enclosures" and "shower door and enclosure" as they are used in the Standard at Subpart A. The Standard lists the products that are subject to it (§ 1201.1(a)). This list includes "bathtub doors and enclosures," a term defined in the Standard to mean "assemblies of panels and/or doors that are installed on the lip of or immediately surrounding a bathtub" (§ 1201.2(a)(2)). The list also includes "shower doors and enclosures," a term defined to mean "(assemblies) of one or more panels installed to form all or part of the wall and/or door of a shower stall" (§ 1201.2(a)(30)). Since the Standard became effective on July 6, 1977, the question has arisen whether the definitions of these products include glazing materials in a window that is located over a bathtub or within a shower stall and in the exterior wall of a building. The definitions of the terms "bathtub doors and enclosures" and "shower door and enclosure" contain no specific exemption for glazing materials in such windows. If read literally, the Standard could include glazing materials in an exterior wall window located above a bathtub because that window could be interpreted as being "immediately surrounding" the bathtub. Similarly, the Standard, if read literally, could include glazing materials in an exterior wall window because that window could be interpreted as forming "all or part of the wall \* \* \* of a shower stall."

(b) *Interpretation.* When the Consumer Product Safety Commission issued the Standard, it did not intend the standard to apply to any item of glazing material in a window that is located

<sup>1</sup> The vote on this portion was 4 to 1, with Commissioner Sloan voting to grant.

over a bathtub or within a shower stall and in the exterior wall of a building. The Commission clarifies that the Standard does not apply to such items of glazing material or such windows. This interpretation applies only to the terms "bathtub doors and enclosures" and "shower door and enclosure" and does not affect the applicability of the Standard to any other product.

(Secs. 7, 9 of the Consumer Product Safety Act (15 U.S.C. 2056, 2058))

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

#### 18 CFR Part 271

[Docket No. RM79-76 (Texas-7)]

#### Ceiling Prices

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of Proposed Rulemaking.

**SUMMARY:** The Federal Energy Regulatory Commission is authorized by section 107(c)(5) of the Natural Gas Policy Act of 1978 to designate certain types of natural gas as high-cost gas where the Commission determines that the gas is produced under conditions that present extraordinary risks or costs. Under section 107(c)(5), the Commission issued a final regulation designating natural gas produced from tight formations as high-cost gas subject to an incentive price (18 CFR 271.703). The rule establishes procedures for jurisdictional agencies to submit to the Commission recommendations of areas for designation as tight formations. This notice of proposed rulemaking contains the recommendation of the Texas Railroad Commission that the Lower Wilcox Formation be designated as a tight formation under § 271.703(d).

**DATE:** Comments on the proposed rule are due on January 21, 1981.

**PUBLIC HEARING:** No public hearing is scheduled in this docket as yet. Written requests for a public hearing are due on January 7, 1981.

**ADDRESS:** Comments and requests for hearing must be filed with the Office of the Secretary, 825 North Capitol Street, N.E., Washington, D.C. 20426.

**FOR FURTHER INFORMATION CONTACT:** Leslie Lawner, (202) 357-8299 or John Bassett/Ting Chin, (202) 357-8595.

#### SUPPLEMENTARY INFORMATION:

Issued: December 19, 1980.

#### I. Background

On December 11, 1980, the Railroad Commission of Texas (Texas) submitted to the Commission a recommendation, in accordance with § 271.703 of the Commission's final regulations (45 FR 56034, August 22, 1980), that the Lower Wilcox Formation, located in the southeastern part of the State of Texas, be designated as a tight formation. Pursuant to § 271.703(c)(4) of the regulations, this Notice of Proposed Rulemaking is hereby issued to determine whether Texas' recommendation that the Lower Wilcox Formation be designated a tight formation should be adopted. Texas' recommendation and supporting data are on file with the Commission and are available for public inspection.

#### II. Description of Recommendation

Texas recommends that the Lower Wilcox Formation, encountered in the southern portion of Austin County, the northern portion of Wharton County, and the eastern portion of Colorado County, Texas, be designated as a tight formation. The particular area being recommended entails a 2.5 mile radius around a well which is located 467 feet from the southwestern boundary and 650 feet from the northwestern boundary of the Frank R. Moore Survey A-377 in Austin County. (A more detailed description of the recommended area is contained in the recommendation on file with the Commission.) The Lower Wilcox Formation is located below the Claiborne Formation and above the Midway Formation. The top of the recommended portion of the Lower Wilcox Formation is located at an approximate depth of 11,700 feet and the base is located at an approximate depth of 12,700 feet, giving a thickness of 1,000 feet.

#### III. Discussion of Recommendation

Texas claims in its submission that evidence gathered through information and testimony presented at a public hearing convened by Texas on this matter demonstrates that:

(1) The average *in situ* gas permeability throughout the pay section of the proposed area is not expected to exceed 0.1 millidarcy.

(2) The stabilized production rate, against atmospheric pressure, of wells completed for production from the recommended formation, without

stimulation, is not expected to exceed the maximum allowable production rate set out in § 271.703(c)(2)(i)(B); and

(3) No well drilled into the recommended formation is expected to produce more than five (5) barrels of oil per day.

Texas further asserts that existing State and Federal regulations assure that development of this formation will not adversely affect any fresh water aquifers that are or are expected to be used as a domestic or agricultural water supply.

Accordingly, pursuant to the authority delegated to the Director of the Office of Pipeline and Producer Regulation by Commission Order No. 97, issued in Docket No. RM80-68 (45 FR 53456, August 12, 1980), notice is hereby given of the proposal submitted by Texas that the Lower Wilcox Formation, as described and delineated in Texas' recommendation as filed with the Commission, be designated as a tight formation pursuant to § 271.703.

#### IV. Public Comment Procedures

Interested persons may comment on this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 21, 1981. Each person submitting a comment should indicate that the comment is being submitted in Docket No. RM79-76 (Texas-7), and should give reasons including supporting data for any recommendations. Comments should include the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Written comments will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C., during business hours.

Any person wishing to present testimony, views, data, or otherwise participate at a public hearing should notify the Commission in writing that they wish to make an oral presentation and therefore request a public hearing. Such request shall specify the amount of time requested at the hearing. Requests should be filed with the Secretary of the Commission no later than January 7, 1981.

(Natural Gas Policy Act of 1978, 15 U.S.C. §§ 3301-3432)

Accordingly, the Commission proposes to amend the regulations in

Part 271, Chapter I, Title 18, Code of Federal Regulations, as set forth below, in the event Texas' recommendation is adopted.

**Kenneth A. Williams**

*Director, Office of Pipeline and Producer Regulation.*

Section 271.703(d) is amended by adding new subparagraph (27) to read as follows:

**§ 271.703 Tight Formations.**

(d) *Designated tight formations.* The following formations are designated as tight formations. A more detailed description of the geographical extent and geological parameters of the designated tight formations is located in the Commission's official file for Docket No. RM79-76, as subindexed below, and is also located in the official files of the jurisdictional agency that submitted the recommendation.

(11) through (26) [Reserved]

(27) *Lower Wilcox Formation in Texas*

(i) *Delineation of formation.* The Lower Wilcox Formation is found in the southern portion of Austin County, the northern portion of Wharton County, and the eastern portion of Colorado County, Texas.

(ii) *Depth.* The top of the Lower Wilcox is located at an approximate depth of 11,700 feet and the base is located at an approximate depth of 12,700 feet, giving a thickness of 1,000 feet.

BILLING CODE 6450-85-M

## DEPARTMENT OF THE TREASURY

### Customs Service

#### 19 CFR Part 18

#### Transportation in Bond and Merchandise in Transit; Proposed Customs Regulations Amendments Relating to the Assessment of Liquidated Damages Under Carrier's Bonds

**AGENCY:** U.S. Customs Service, Department of the Treasury.

**ACTION:** Proposed rule.

**SUMMARY:** Bonded carriers are responsible for shortages, irregular deliveries, or nondeliveries of imported merchandise received by them to be transported from one port to another. In the case of any shortage, failure to deliver, or direct delivery to the

consignee or other person of any duty-free merchandise, the bonded carrier is subject to a penalty imposed by Customs as liquidated damages in an amount equal to the value of the merchandise not to exceed \$25 in any one shipment.

Customs has determined that the maximum penalty has failed to act as a deterrent to future violations and does not cover the administrative costs of processing the penalty. This document proposed to amend the Customs Regulations to increase the penalty to a minimum of \$50 and a maximum of \$100, in any one shipment, to be determined within the discretion of the district director.

Bonded carriers are also responsible for any internal revenue taxes or other taxes due to the United States on the missing merchandise. While customs duties are included in these taxes, they are not expressly mentioned. Accordingly, this document also proposes to include the term "duties" within the category of liabilities assumed by bonded carriers for shortage, nondelivery, or irregular delivery of merchandise.

**DATE:** Comments must be received on or before March 2, 1981.

**ADDRESS:** Comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations and Research Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

**FOR FURTHER INFORMATION CONTACT:**

Legal Aspects: William G. Rosoff, Carriers, Drawback and Bonds Division, 202-566-5856; Operational Aspects: Thomas Hargrove, Cargo Processing Division, 202-566-5354; U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

**SUPPLEMENTARY INFORMATION:**

#### Background

Generally, when merchandise is imported into the United States it must be entered for Customs purposes at the first port at which the merchandise arrives. However, under certain circumstances, imported merchandise may be placed in a Customs bonded warehouse or transported from the first port in the United States to another port. This procedure postpones final Customs formalities, including payment of duties due, until the merchandise arrives at the other port. The merchandise then may be entered, warehoused, or exported. In order to forward imported merchandise to another port, the merchandise must

be transported in bond; that is certain Customs documents are required to support the movement and the carriers must be bonded by Customs for this purpose. Carriers bonded to transport merchandise in bond must follow certain procedures specified in Part 18, Customs Regulations (19 CFR Part 18), and they will incur penalties if shipments, together with the necessary documents, are not properly transported and delivered to Customs at the port of destination.

Section 18.10, Customs Regulations (19 CFR 18.10), lists five types of entries or withdrawals which may be made for merchandise to be transported in bond. Under § 18.8, Customs Regulations (19 CFR 18.8), carriers of merchandise transported in bond are responsible for any shortage, irregular delivery, or nondelivery at the port of destination or port of exit of bonded merchandise received by them. If there is a shortage, irregular delivery, or nondelivery, the bonded carrier is assessed liquidation damages under its bond. The amount of the liquidated damages depends on the dutiable status of the merchandise and the type of nonperformance by the carrier.

Section 18.8(b)(1), Customs Regulations (19 CFR 18.8(b)(1)), provides that if there is a shortage, irregular delivery, or nondelivery of duty-free merchandise, the penalty to be imposed as liquidated damages will be an amount equal to the value of the missing merchandise, not to exceed \$25 in any one shipment.

In addition to the penalties prescribed by § 18.8(b)(1), § 18.8(c), Customs Regulations (19 CFR 18.8(c)), provides that the bonded carrier is also responsible to pay any internal revenue taxes or other taxes owed to the United States on the missing merchandise, as well as all costs, charges, and expenses caused by the failure to make the required transportation, report, and delivery.

#### Discussion

Customs has determined that the maximum amount of the penalty imposed as liquidated damages assessed against the carrier's bond for shortage, nondelivery, or irregular delivery of duty-free merchandise is insufficient to act as a deterrent to future violations. In addition, the \$25 maximum penalty permitted under § 18.8(b)(1) does not nearly meet the administrative costs to Customs of processing claims for liquidated damages. In a study performed in the Houston, Texas, Customs Region, it was

concluded that the cost of processing the simplest liquidated damages case is \$41.50. The cost to Customs has increased since that study was made.

Accordingly, Customs proposes to amend § 18.8(b)(1) to increase the amount of the liquidated damages that can be assessed to a minimum of \$50 and maximum of \$100, in any one shipment, to be determined within the discretion of the district director.

Although the provisions of § 18.8(c) have been used to collect customs duties under a carrier's bond on any missing merchandise, and the authority to collect duties under the carrier's bond has been recognized by the U.S. Customs Court in *Art Craft Jewelry Co. v. United States*, 64 Cust. Ct. 414, C.D. 4010 (1970), the term "duties" does not expressly appear in § 18.8(c). Accordingly, for purposes of clarity, Customs proposes to amend § 18.8(c) to expressly include the term "duties" among the liabilities imposed upon a carrier in the case of shortage, nondelivery, or irregular delivery of merchandise.

#### Customs Forms

If this proposal is adopted, Customs Forms 3587 ("Carrier's Bond"), 3588 ("Private Carrier's Bond"), and 3855 ("Bond of Customs Cartman or Lighterman") would be revised to conform to the proposed amendments.

#### Authority

These amendments are proposed under the authority of R.S. 251, as amended, and sections 551, 623, 624, 46 Stat. 742, as amended, 759, as amended, (19 U.S.C. 66, 1551, 1623, 1624).

#### Comments

Before adopting this proposal, consideration will be given to any written comments, preferably in triplicate, submitted timely to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.8(b), Customs Regulations (19 CFR 103.8(b)), during regular business hours at the Regulations and Research Division, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

#### Applicability of Executive Order 12044

This document is subject to the Treasury Department directive published in the *Federal Register* on November 8, 1978 (43 FR 52120), implementing E.O. 12044, "Improving Government Regulations," and was the subject of Work Plan 79-11, approved by the Department on May 1, 1979.

In the directive, the Treasury

Department stated that it considers each regulation or amendment to an existing regulation published in the *Federal Register* and codified in the Code of Federal Regulations to be "significant". However, regulations which are nonsubstantive, are essentially procedural, do not materially change existing or establish new policy, and do not impose substantial additional requirements or costs on, or substantially alter the legal rights or obligations of, those affected, with Secretarial approval, may be determined not to be significant. Accordingly, it has been determined that this proposal does not meet the criteria in the directive for "significant" regulations.

#### Drafting Information

The principal author of this document was Laurie Strassberg Amster, Regulations and Research Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

#### Proposed Amendments

It is proposed to revise § 18.8(b)(1) and (c), Customs Regulations (19 CFR 18.8(b)(1), (c)), to read as follows:

#### § 18.8 Liability for shortage, irregular delivery, or nondelivery; penalties.

\* \* \* \* \*

(b) Penalties imposed as liquidated damages under the carrier's bond for shortage, failure to deliver, or irregular delivery shall be as follows:

(1) In the case of shortage, failure to deliver, or delivery direct to the consignee or other person of any merchandise free of duty, a minimum of \$50 and a maximum of \$100, in any one shipment, to be determined within the discretion of the district director.

\* \* \* \* \*

(c) In addition to the penalties described in paragraph (b) of this section, the carrier shall pay any internal-revenue taxes, duties, or other taxes accruing to the United States on the missing merchandise, together with all costs, charges, and expenses caused by the failure to make the required transportation, report, and delivery.

William T. Archey,

*Acting Commissioner of Customs.*

Approved: December 15, 1980.

Richard J. Davis,

*Assistant Secretary of the Treasury.*

BILLING CODE 4810-22-M

#### 19 CFR Part 132, 141, and 142

#### Proposed Customs Regulations Amendments Relating to Quota Merchandise, Statistical Information, and Merchandise Released Under the Immediate Delivery Procedure

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

**SUMMARY:** Pub. L. 95-410, the "Customs Procedural Reform and Simplification Act of 1978," made significant changes in the Customs laws relating, in part, to the entry and warehousing of imported merchandise. Amendments to the Customs Regulations implementing these changes were recently published; however, several sections of the Customs Regulations need further changes. This document proposes to amend the Customs Regulations to:

(1) Clarify the procedure relating to quota merchandise when the quota is nearing fulfillment;

(2) Remove a mandatory requirement to aggregate statistical information from multiple invoices;

(3) Clarify the circumstances under which a district director may authorize release of merchandise from warehouse under a special permit; and

(4) Clarify what documentation may be filed after merchandise is released under the immediate delivery procedure.

**DATE:** Comments must be received on or before March 2, 1981.

**ADDRESS:** Written comments should be addressed to the Commissioner of Customs, Attention: Regulations and Research Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Room 2426, Washington, D.C. 20229.

**FOR FURTHER INFORMATION CONTACT:** Relating to quota merchandise—Helen Rohrbaugh, Duty Assessment Division, (202-566-8592); Relating to statistical information—William L. Marchi, Duty Assessment Division, (202-566-8235); Relating to merchandise released under the immediate delivery procedure—Benjamin H. Mahoney, Entry Procedure and Penalties Division, (202-566-5778), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

#### SUPPLEMENTARY INFORMATION:

#### Background

Pub. L. 95-410, the "Customs Procedural Reform and Simplification Act of 1978," made significant changes in the Customs laws relating, in part, to the entry and warehousing of imported merchandise. Final amendments to the Customs Regulations implementing these changes were published in the

Federal Register on August 9, 1979, as T.D. 79-221 (44 FR 46794).

Based upon recent experience and further review, Customs has determined that several sections of the Customs Regulations amended by T.D. 79-221 need further changes. Accordingly, this document proposes to amend the following sections of the customs Regulations:

1. Section 132.13(a)(1), Customs Regulations (19 CFR 132.13(a)(1)), to clarify the procedure relating to quota merchandise when the quota is nearing fulfillment;

2. Sections 141.61(e)(1)(i) and (f)(2), Customs Regulations (19 CFR 141.61(e)(1)(i), (f)(2)), to remove a mandatory requirement to aggregate statistical information from multiple invoices;

3. Section 142.21(f), Customs Regulations (19 CFR 142.21(f)), to clarify the circumstances under which a district director may authorize release of merchandise from warehouse under a special permit; and

4. Section 142.22(b), Customs Regulations (19 CFR 142.22(b)), to clarify what documentation may be filed after merchandise is released under the immediate delivery procedure.

#### Discussion of Proposed Changes

##### Section 132.13(da)(1)

As amended by T.D. 79-221, the first sentence of § 132.13(a)(1)(ii) provides that "Except in emergency cases, as provided for in § 142.21(e)(2) of this chapter, absolute quota merchandise shall not be released under this immediate delivery procedure if the quota is nearing fulfillment." To correct an inconsistency in the regulations, this sentence subsequently was amended by T.D. 80-26, published in the Federal Register on January 21, 1980 (45 FR 3901), to provide that "Absolute quota merchandise shall not be released under the immediate delivery procedure if the quota is nearing fulfillment."

A question of interpretation has been raised as to whether absolute quota merchandise could be released under the immediate delivery procedure if the quota were not nearing fulfillment. To clarify this point, this document proposes to further amend § 132.13(a)(1)(ii) to provide that except as provided for in § 142.21(e)(2) (relating to perishable merchandise of a class approved by Headquarters subject to an absolute quota) and § 142.21(g) (relating to release of merchandise when authorized by Headquarters), absolute quota merchandise shall not be released under the immediate delivery procedure.

Section 132.12, Customs Regulations, relating to the opening of potentially filled quotas, provides a procedure in paragraph (c)(2) to be used in the event quantities specified on entry summaries for consumption or withdrawals for consumption shall be prorated against the quota quantity.

This document further proposes to amend § 132.13(a)(1) by deleting the last sentence of § 132.13(a)(1)(ii) and by adding a new § 132.13(a)(1)(iii) to provide that the procedure set forth under § 132.13(c)(2), relating to the opening of potentially filled quotas, also applies to tariff and absolute quota when the quota is nearing fulfillment.

##### Sections 141.61(e)(1)(i) and (f)(2)

Section 141.61 (e)(1)(i), as amended by T.D. 79-221, provides that if a class or kind of merchandise from the same country of origin subject to the same statistical reporting number is included in more than one invoice, the information shall be combined and reported under one statistical reporting number. That section also provides that when consolidating information from several invoices under one reporting number, a worksheet itemizing the entered value of the merchandise from each invoice shall be attached to the appropriate form.

Section 141.61(f)(2), as amended by T.D. 79-221, relating to values on multiple invoices, requires that the aggregate of the entered values of all the merchandise on each of the multiple invoices be shown on an attached worksheet.

The new procedures relating to aggregating statistical information were proposed initially to reduce the loss of statistical data because detailed information on line items of the Tariff Schedules of the United States Annotated (TSUSA) valued under \$250 was not reported. By combining data under one TSUSA number, many line items valued under \$250 could be included in the detailed data. Additionally, many TSUSA line items on Customs entry summaries could be eliminated, thus realizing significant savings in computer processing time.

The effective date for implementing these sections was September 10, 1979. However, after publication of T.D. 79-221 on August 9, 1979, a number of individual customhouse brokers, their trade association, and other interested parties advised Customs of serious problems and burdens they were experiencing in attempting to establish procedures to comply with the new regulations.

After reviewing this matter, Customs found there was merit to these

complaints. Accordingly, a notice was published in the Federal Register as T.D. 79-248 on September 24, 1979 (44 FR 55001), delaying implementation of §§ 141.61 (e)(1)(i) and (f)(2), to January 1, 1980. Subsequently, on October 26, 1979, Customs field personnel were directed by Customs Headquarters to advise importers, brokers, and other interested parties that there would be an indefinite delay in implementing these sections.

Customs has determined that the problems and financial burden that the new requirements would impose on certain segments of the importing public outweigh the benefits to be gained in reducing processing costs and time, and providing more complete statistical data.

On the other hand, some importers and nonautomated brokers prefer to aggregate the TSUSA numbers. A practice has been established in many locations to permit entry summaries to be filed in this manner.

Therefore, Customs has determined to permit importers and brokers, at their option, to either:

1. Aggregate the TSUSA number regardless of the number of invoices involved; or
2. List the TSUSA number within each invoice.

This document proposes to amend §§ 141.61 (e)(1)(i) and (f)(2) to provide that the broker and importer may use either procedure.

##### Section 142.21(f)

Section 142.21(f), Customs Regulations (19 CFR 142.21(f)), as amended by T.D. 79-221, provides that at the discretion of the district director, merchandise may be released from a warehouse under a special permit provided the importer has on file one of the types of Customs bonds provided for in § 142.4, Customs Regulations (19 CFR 142.4).

The purpose of this provision is to avoid unnecessary delay in releasing merchandise from a bonded warehouse when an importer must travel a great distance from (1) the bonded warehouse to the customhouse to file the withdrawal for consumption with estimated duties attached, and (2) the customhouse to the bonded warehouse to obtain release of the merchandise.

Under § 142.21(f), an importer may obtain prompt release of merchandise from a bonded warehouse by filing Customs Form 3461. The importer may accumulate several of these forms over a period of days and then make one trip to the customhouse within the required 10-day period to file the withdrawal for consumption with estimated duties attached.

However, it appears that some importers, who do not travel great distances between their bonded warehouses and the customhouse and, therefore, can obtain prompt release of merchandise from the warehouse, may take advantage of the benefit of § 142.21(f) merely to forestall the payment of estimated duties until 10 days after release of the merchandise from the bonded warehouse.

This document proposes to amend § 142.21(f) to ensure that the procedure will not be used by some importers merely to delay payment of estimated duties. Section 142.21(f) would be amended to provide that the district director may authorize release from warehouse under a special permit only under the following circumstances:

1. The warehouse is located a considerable distance from the customhouse and actual release of the merchandise from the warehouse could not be effected within the next full business day after the day of the payment of duty, and

2. The district has sufficient manpower to permit such practice.

#### Section 142.22(b)

Section 142.21, Customs Regulations (19 CFR 142.21), as amended by T.D. 79-221, provides that merchandise may be released under a special permit for immediate delivery, in accordance with section 448(b), Tariff Act of 1930, as amended, under circumstances relating to the following:

1. Contiguous countries,
2. Fresh fruits and vegetables,
3. Agency of the U.S. Government,
4. Articles of a trade fair,
5. Quota-class merchandise,
6. Release from warehouse followed by warehouse withdrawal for consumption, and
7. When authorized by Headquarters.

Section 142.22(b), Customs Regulations (19 CFR 142.22(b)), lists the documentation which must be filed after the release of merchandise for which a special permit for immediate delivery had been issued. They are:

1. An entry summary for consumption, with estimated duties attached, an entry summary for warehouse, or an entry summary for entry under a temporary bond;
2. A withdrawal for consumption, with estimated duties attached;
3. An entry for transportation and exportation, immediate transportation without appraisal, or direct exportation; or
4. An application to destroy.

Section 142.28, Customs Regulations (19 CFR 142.28), provides, in part, that an entry for exportation, or for

transportation and exportation, or an application to destroy, may be filed for merchandise released under a special permit for immediate delivery and later found to be prohibited.

A question of interpretation was raised by Customs personnel as to under what circumstances, relating to the release of merchandise under the immediate delivery procedure of § 142.21, would the transportation entries specified in § 142.22(b)(3) be used. Transportation entries may be used only with respect to the release of fresh fruits and vegetables under § 142.21(b) and absolute quota merchandise under § 142.21(e)(2). However, § 142.22(b)(3) does not set forth these two circumstances under which the transportation entries may be used. Therefore, an ambiguity may be raised concerning the proper document to be used.

In a related matter, § 142.28 provides for the use of an entry for exportation, or for transportation and exportation, or an application to destroy merchandise released and later found to be prohibited. However, neither § 142.22(b)(3) nor § 142.22(b)(4) makes any reference to merchandise released under the immediate delivery procedure and later found to be prohibited. An ambiguity also may be raised with regard to the proper documents to be used.

This document proposes to amend § 142.22(b)(3) to provide that the transportation entries shall be filed only in the circumstances under §§ 142.21 (b) and (e)(2), and to provide that an entry for exportation, or for transportation and exportation, shall be filed in the circumstance under § 142.28.

Similarly, this document proposes to amend § 142.22(b)(4) to provide that an application to destroy shall be filed in the circumstances under § 142.21 (b) and (e)(2), and § 142.28.

Two additional changes to § 142.22(b) are proposed in this document. It is proposed to amend § 142.22(b)(1) to clarify that the entry summary documents may be filed in any of the circumstances listed in § 142.21 except for merchandise released from warehouse under § 142.21(f). It is proposed to amend § 142.22(b)(2) to clarify that a withdrawal for consumption shall be filed only for merchandise released from warehouse under § 142.21(f).

#### Inapplicability of Executive Order 12044

This document is not subject to the provisions of the Treasury Department directive implementing E.O. 12044, "Improving Government Regulations" because T.D. 79-221, to which these

amendments relate, was in process before May 22, 1978, the effective date of the directive. The proposal has been under extensive study by Customs, the International Trade Commission, and the Bureau of Census since T.D. 79-221 was published on August 19, 1979.

#### Authority

These amendments are proposed under the authority of R.S. 251, as amended (19 U.S.C. 66), section 484, 552, 553, 557, 624, 46 Stat. 722, as amended, 742, as amended, 744, as amended, 759, (19 U.S.C. 1484, 1552, 1553, 1557, 1624.); 92 Stat. 888, (Pub. L. 95-410), October 3, 1978).

#### Comments

Before adopting this proposal, consideration will be given to any written comments, preferably in triplicate, that are submitted timely to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.8(b), Customs Regulations (19 CFR 103.8(b)), during regular business hours at the Regulations and Research Division, Headquarters, U.S. Customs Service, 1301 Constitution Avenue NW., Room 2426, Washington, D.C. 20229.

#### Drafting Information

The principal author of this document was Charles D. Ressin, Regulations and Research Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

#### Proposed Amendments

It is proposed to amend Parts 132, 141, and 142, Customs Regulations (19 CFR Parts 132, 141, 142), in the following manner:

#### PART 132—QUOTAS

1. It is proposed to revise the first sentence of § 132.13(a)(1)(ii) to read as follows:

#### § 132.13 Quotas after opening.

(a) *Procedure when nearing fulfillment.*—(1) For release of merchandise.

(ii) *Absolute.* Except as provided for in § 142.21 (e)(2) and (g) of this chapter, absolute quota merchandise shall not be released under the immediate delivery procedure.

2. It is proposed to remove the last sentence of § 132.13(a)(1)(ii).

3. It is proposed to add a new § 132.13(a)(1)(iii) to read as follows:

**§ 132.13 Quotas after opening.**

(a) *Procedure when nearing fulfillment.*—(1) *For release of merchandise.* \* \* \*

(iii) *Quota Proration.* When it is determined that entry summaries for consumption or withdrawals for consumption must be amended to permit only the quantity of tariff-rate and absolute quota merchandise determined to be within the quota, the entry summaries for consumption or withdrawals for consumption must be returned to the importer for adjustment. The time of presentation for quota purposes in that event shall be the same as the time of the initial presentation of the entry summaries for consumption or withdrawals for consumption provided—

(A) An adjusted entry summary for consumption, or withdrawals for consumption, with estimated duties attached, is deposited within 5 working days after Headquarters authorizes release of the merchandise, and

(B) The importer takes delivery of the merchandise within 15 working days after release is authorized.

**PART 141—ENTRY OF MERCHANDISE**

1. It is proposed to revise § 141.61(e)(1)(i) to read as follows:

**§ 141.61 Completion of entry and entry summary documentation.**

(e) *Statistical information.*—(1) *Information required on entry summary or withdrawal form.*—(i) *Where form provides space.*—(A) *Single invoice.* For each class or kind of merchandise subject to a separate statistical reporting number, the applicable information required by the General Statistical Headnotes, Tariff Schedules of the United States Annotated ("TSUSA"), shall be shown on the appraisal entry, Customs Form 7500; the entry summary, Customs Form 7501 or 7502; the transportation entry and manifest of goods, Customs Form 7512, when used to document an incoming vessel shipment proceeding to a third country by means of an entry for transportation and exportation, or immediate exportation; the rewarehouse entry, Customs Form 7519; the manufacturing warehouse entry, Customs Form 7521; the withdrawal form, Customs Form 7505 or 7506; or the record of vessel/aircraft foreign repair or equipment purchase, Customs Form 226, in the space provided.

(B) *Multiple invoices.* If a class or kind of merchandise from the same country of origin subject to the same statistical reporting number is included in more than one invoice, the importer

may, at his option (1) list each invoice separately on the appropriate form listed under paragraph (e)(1)(i)(A) of this section and for each class or kind of merchandise within each invoice subject to a separate statistical reporting number, report the applicable information required by the General Statistical Headnotes, Tariff Schedules of the United States Annotated (TSUSA); or (2) combine the information for each class or kind of merchandise and report it under one statistical reporting number for all invoices. When consolidating information from several invoices under one reporting number, a worksheet itemizing the entered value of the merchandise from each invoice in the manner prescribed in paragraph (f)(2)(ii) of this section shall be attached to the appropriate form.

**§ 141.61 [Amended]**

2. It is proposed to revise § 141.61(f)(2) to read as follows:

(f) *Value of each invoice.* (1) \* \* \*

(2) *Multiple invoices.* (i) If the importer or his agent elects the first option specified in paragraph (e)(1)(i)(B) of this section, the information required to be restated by paragraph (f)(1) of this section for a single invoice shall be restated for each invoice. The required information shall be shown on a worksheet attached to the form or placed across columns (2a) or (2b) on Customs Form 7501 and 7502, and in the same general location on Customs Forms 7505, 7506, 7519, and 7521.

(ii) If the importer or his agent elects the second option specified in paragraph (e)(1)(i)(B) of this section, the information required to be restated by paragraph (f)(1) of this section for a single invoice shall be restated for each invoice. The final amount in the summary computation shall represent the aggregate of the entered values of all the merchandise on each of the multiple invoices. The required information shall be shown on an attached worksheet.

(iii) The worksheet also shall contain:

(A) A statistical reporting number restatement for the merchandise from each invoice subject to the same statistical reporting number from the same country of origin, and

(B) An aggregate total value which represents the entered value.

(iv) To permit the identification of the merchandise entered under each reporting number, each class or kind of merchandise from one country reported under a single statistical reporting number shall be coded identically on each invoice and on the worksheet.

**PART 142—ENTRY PROCESS**

1. It is proposed to revise § 142.21(f) to read as follows:

**§ 142.21 Merchandise eligible for special permit for immediate delivery.**

(f) *Release from warehouse followed by warehouse withdrawal for consumption.* Merchandise may be released from warehouse under a special permit—

(1) At the discretion of the district director when

(i) The warehouse is located a considerable distance from the customhouse and actual release of the merchandise from the warehouse could not be effected within the next full business day after the day of the payment of duty, and (ii) The district has sufficient manpower to permit such practice;

(2) The importer shall have on file one of the types of Customs bonds provided for in § 142.4; and

(3) The immediate delivery permit shall be annotated to state that a warehouse withdrawal for consumption will be filed for this merchandise.

2. It is proposed to revise § 142.22(b) to read as follows:

**§ 142.22 Application for special permit for immediate delivery.**

(a) \* \* \*

(b) *Customs custody.* Merchandise for which a special permit for immediate delivery has been issued under § 142.21 shall be considered to remain in Customs custody until the filing of one of the following:

(1) An entry summary for consumption, with estimated duties attached, an entry summary for warehouse, or an entry summary for entry under a temporary importation bond, which may be filed in any of the circumstances under § 142.21 except for merchandise released from warehouse under § 142.21(f);

(2) A withdrawal for consumption, with estimated duties attached, which shall be filed only for merchandise released from warehouse under § 142.21(f);

(3) An entry for transportation and exportation, immediate transportation without appraisal, or direct exportation, which shall be filed in those circumstances under § 142.21(b) and (e)(2); or entry for transportation and exportation, or direct exportation, which shall be filed in the circumstances under § 142.28 or

(4) An application to destroy, which shall be filed in those circumstances

under §§ 142.21(b) and (e)(2), and § 142.28.

William T. Archey,

Acting Commissioner of Customs.

Approved: December 16, 1980.

Richard J. Davis,

Assistant Secretary of the Treasury.

BILLING CODE 4910-22-M

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

#### 21 CFR Part 600

[Docket No. 80N-0497]

#### Shipping Temperature Requirements for Certain Biological Products

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

**SUMMARY:** The Food and Drug Administration (FDA) is proposing to amend the biologics regulations to require that certain adsorbed biological products be maintained at temperatures between 1° and 10° C. This proposal is being made to assure that the safety, purity, and potency of the biological products are maintained during shipment.

**DATE:** Comments by March 2, 1981.

**ADDRESS:** Comments may be addressed to the Dockets Management Branch (formerly the Hearing Clerk's office) (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Paul K. Hiranaka, Bureau of Biologics (HFB-620), Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205, 301-443-1306.

**SUPPLEMENTARY INFORMATION:** Diphtheria Toxoid Adsorbed, Tetanus Toxoid Adsorbed, and Pertussis Vaccine Adsorbed are vaccines that are used individually and in combination to produce active immunity against the diseases Diphtheria, Tetanus, and Pertussis, respectively. The dating periods for these vaccines, as prescribed in § 610.53(a) [21 CFR 610.53(a)], are based on data relating to usage, clinical experience or laboratory tests that establish the period beyond which the products cannot be expected beyond reasonable doubt to yield their specific results and retain their safety, purity, potency, and effectiveness provided that the products are maintained at the recommended temperatures. Biological products that may become unstable during transport when subjected for

short periods of time to temperatures other than those prescribed in § 610.53 must be transported at temperatures prescribed in § 600.15(a) [21 CFR 600.15(a)] to assure that the products will retain their safety, purity, potency, and effectiveness throughout their dating periods.

The agency has reviewed and placed on file with the Dockets Management Branch, FDA, data from two studies concerning the physical appearance of biological products adsorbed on aluminum salts at temperatures below 2° C and above 8° C. One study was conducted by the agency's Bureau of Biologics and the other study was conducted by a licensed manufacturer of Diphtheria and Tetanus Toxoids and Pertussis Vaccine Adsorbed. The studies demonstrate that biological products adsorbed on aluminum salts undergo physical changes, ranging from the development of very granular suspensions to the development of large strands of aggregated material which are difficult or impossible to resuspend, when the products are subjected to freezing temperatures. Similar, but not as drastic, effects were observed in some products exposed to temperatures above 10° C.

Data available to the agency demonstrate the continued satisfactory stability when the products are stored at temperatures of 2° C to 8° C. Data on some biological products, such as live Measles, Mumps and Rubella Virus Vaccines demonstrate a decrease in potency when the products are not maintained at appropriate temperatures during shipment. As a result of the data demonstrating effects of inappropriate shipping temperatures on potency of live Measles, Mumps and Rubella Virus Vaccines, and because of the changes in the resuspension characteristics of Diphtheria, Tetanus Toxoid and Pertussis Vaccines, adsorbed, alone or in combination, the agency believes that inappropriate shipping temperatures may cause unacceptable variability of the dose or may otherwise affect the desired or expected response resulting from the use of the products. Therefore, the agency believes it is in the interest of public health to require that Diphtheria, Tetanus Toxoid and Pertussis Vaccines, Adsorbed, alone or in combination, be required to be maintained at temperatures between 1° C to 10° C during shipment. Accordingly, the agency is proposing to amend § 600.15 to require that certain adsorbed biological products be maintained at temperatures between 1° C and 10° C during shipment. Special precautions should be taken when shipping these

products in chemical ice or wet ice to assure that the ice does not contact the product container and lower the temperature below 1° C.

It should be noted that existing § 600.15(b) provides for exemptions from the shipping temperature requirements. Manufacturers proposing such an exemption for their adsorbed vaccines should submit supporting data to the Director, Bureau of Biologics, in the form of an amendment to their product license application. The agency also encourages all interested persons to submit available data relating the physical effects resulting from storage at temperatures below 1° C and above 10° C and the effects on the safety, purity, potency, and effectiveness of these products.

The agency has determined pursuant to 21 CFR 25.24(d)(10) [proposed December 11, 1979; 44 FR 71742] that this proposed action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201, 502, 701, 52 Stat. 1040-1042 as amended, 1050-1051 as amended, 52 Stat. 1055-1056 as amended [21 U.S.C. 321, 352, 371]); the Public Health Service Act (sec. 351, 58 Stat. 702 as amended [42 U.S.C. 262]) and under authority delegated to him [21 CFR 5.1], the Commissioner of Food and Drugs proposes to amend Part 600 in § 600.15(a) by alphabetically adding "Diphtheria and Tetanus Toxoids Adsorbed"; "Diphtheria and Tetanus Toxoids and Pertussis Vaccine Adsorbed"; "Diphtheria Toxoid Adsorbed"; "Pertussis Vaccine Adsorbed"; "Tetanus and Diphtheria Toxoids Adsorbed (For Adult Use)"; and "Tetanus Toxoid Adsorbed" to read as follows:

#### § 600.15 Temperatures during shipment.

\* \* \* \* \*

##### (a) Products

Product	Temperature
Diphtheria and tetanus toxoids adsorbed.	Between 1° and 10° C.
Diphtheria and tetanus toxoids and pertussis vaccine adsorbed.	Do.
Diphtheria Toxoid adsorbed .....	Do.
Pertussis vaccine adsorbed.....	Between 1° and 10° C.
Tetanus and diphtheria toxoids adsorbed (for adult use).	Between 1° and 10° C.
Tetanus toxoid adsorbed .....	Do.

Interested persons may, on or before March 2, 1981 submit to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, as amended by Executive Order 12221, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Dockets Management Branch, Food and Drug Administration.

Dated: December 18, 1980.

William F. Randolph,  
Acting Associate Commissioner for  
Regulatory Affairs.

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

#### 26 CFR Part 1

[EE-17-78]

#### Custodial Accounts for Regulated Investment Company Stock; Amendment of Notice of Proposed Rulemaking

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Amendment of notice of proposed rulemaking.

**SUMMARY:** This document contains proposed amendments to a notice of proposed rulemaking which was published in the Federal Register on February 10, 1978 (43 FR 5852). That notice contains proposed regulations relating to custodial accounts for regulated investment company stock. Changes to the applicable tax law were made by the Employee Retirement Income Security Act of 1974, the Tax Reform Act of 1976, and the Revenue Act of 1978. The regulations would provide the guidance needed to comply

with those Acts and would affect public school teachers and employees of certain tax exempt organizations.

**DATES:** Written comments and requests for a public hearing must be delivered or mailed by March 2, 1981. The amendments and the original notice of proposed rulemaking are proposed to be effective for contributions to custodial accounts made after December 31, 1973.

**ADDRESS:** Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (EE-17-78), Washington, D.C. 20224.

**FOR FURTHER INFORMATION CONTACT:** H. B. Hartley of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, Attention: CC:LR:T, 202-566-3287 (not a toll-free number).

#### SUPPLEMENTARY INFORMATION:

##### Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) relating to custodial accounts for regulated investment company stock under section 403(b)(7) of the Internal Revenue Code of 1954. On February 10, 1978, the Federal Register published proposed amendments to the Income Tax Regulations under section 403 of the Internal Revenue Code (43 FR 5852). The regulations in this document are being proposed in order to replace portions of those earlier proposed regulations which were rendered obsolete by section 154 of the Revenue Act of 1978 (92 Stat. 2801, 26 U.S.C. 403). The proposed regulations are issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

The proposed regulations published in the Federal Register on February 10, 1978, provided that a section 403(b)(7) custodial account could make no distributions to the employee until the employee attained age 65, unless the employee (A) died or became disabled, or (B) attained age 55 and left the service of the employer. Section 154 of the Revenue Act of 1978 changed this requirement. That Act provides that no distributions can be made from a custodial account before the employee attains age 59½, unless the employee (A) dies or becomes disabled, (B) separates from service, or (C) encounters financial hardship.

##### Comments and Requests for A Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are

submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register. Persons who requested a public hearing on the original notice of proposed rulemaking, as published February 10, 1978, need not again request a hearing if their original comments involved only issues not affected by the amendments contained in this notice. Any such persons who do not submit comments and request a public hearing on these amendments will be individually contacted by the Internal Revenue Service to ascertain whether they still desire to testify at any hearing held on the proposed regulations. Persons who originally commented and requested a public hearing on issues affected by these amendments will not be so contacted.

##### Drafting Information

The principal author of these proposed regulations is H. B. Hartley of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

##### Proposed amendments to the regulations

The proposed amendments to 26 CFR Part 1 are as follows:

**Paragraph 1.** Paragraph (h)(2)(vi) of proposed § 1.403(b)-1, published in the Federal Register on February 10, 1978, (43 FR 5852), is amended by striking the third sentence thereof.

**Par. 2.** Paragraphs (h)(2)(vii) and (h)(2)(viii) of proposed § 1.403(b)-1, published in the Federal Register on February 10, 1978, (43 FR 5852), are redesignated as paragraphs (h)(2)(viii) and (h)(2)(ix) respectively, and a new paragraph (h)(2)(vii) is added to read as follows:

§ 1.403(b)-1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.

\* \* \* \* \*

(h) Custodial accounts—\* \* \*

(2) Description of custodial account.

\* \* \*

(vii) The custodial agreement must provide that the custodian is not to make any distributions to the employee or to his or her beneficiaries before the

employee attains age 59½, unless the employee (A) becomes disabled or dies, (B) leaves the service of the employer, or (C) encounters financial hardship, as determined under paragraph (h)(13).  
\* \* \*

**Par. 3.** Paragraph (h)(4)(ii) of proposed § 1.403(b)-1(h), published in the Federal Register on February 10, 1978, (43 FR 5852), is amended by adding the following new sentence to the end thereof:

**§ 1.403(b)-1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.**  
\* \* \*

(h) *Custodial accounts*—\* \* \*

(4) *Distributions*—\* \* \*

(ii) \* \* \* Any purchase and distribution of an annuity contract under this subdivision (ii) can occur only at a time when distributions are otherwise permitted under the provisions of paragraph (h)(2) (vi) or (vii).

**Par. 4.** A new paragraph (h)(13) to read as follows is added at the end of proposed § 1.403(b)-1, published in the Federal Register on February 10, 1978 (43 FR 5852):

**§ 1.403(b)-1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.**  
\* \* \*

(h) *Custodial accounts*—\* \* \*

(13) *Determination of financial hardship*—(i) For purposes of paragraph (h)(2)(vii), distribution will be on account of financial hardship if—

(A) The distribution is necessary in light of immediate and heavy financial needs of the employee,

(B) The distribution would meet the requirements for a hardship distribution under a profit-sharing plan qualified under section 401(a) of the Code, and

(C) An independent person or persons (designated as provided in paragraph (h)(13)(iii)) has determined, in accordance with uniform and nondiscriminatory standards established at the time that person or persons are designated, that the conditions described in (A) and (B) above exist.

(ii) No distribution based upon financial hardship can exceed the amount determined pursuant to paragraph (h)(13)(iii) to be required to meet the immediate financial need created by the hardship and not reasonably available from other resources of the employee.

(iii) No distributions based upon financial hardship shall be made except following written notification to the custodian by an independent person (or persons) of a determination by that

person of the existence of a qualifying financial hardship and of the amount required to be distributed to meet the need created by the hardship. The independent person must be designated by the employer before any distributions based upon financial hardship are made. The independent person can be any person other than the employee, the custodian, an employee or director of the regulated investment company, or any other person who would be a disqualified person within the meaning of section 4975 if the custodial account were a qualified plan under section 401. All determinations by the independent person must be made in accordance with uniform and nondiscriminatory standards which are established at the time the person is designated.

William E. Williams,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

## 26 CFR Part 1

[LR-261-79]

### Income Tax; Charitable Contribution of Property Elected Under the Asset Depreciation Range System

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This document contains a proposed regulation relating to the treatment of eligible property elected under the Asset Depreciation Range System and retired by charitable contribution.

**DATES:** Written comments and requests for a public hearing must be delivered or mailed by March 2, 1981. The amendment to the regulations is proposed to be effective with respect to property retired after December 30, 1980.

**ADDRESS:** Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-261-79), Washington, D.C. 20224.

**FOR FURTHER INFORMATION, CONTACT:** Harold T. Flanagan, Jr., of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T, 202-566-3459).

**SUPPLEMENTARY INFORMATION:**

#### Background

This document contains a proposed amendment to the Income Tax Regulations (26 CFR Part 1) under section 167 of the Internal Revenue Code of 1954. This amendment to the

regulations is proposed to be issued under the authority contained in sections 167 and 7805 of the Internal Revenue Code (85 Stat. 508, 26 U.S.C. 167; 68A Stat. 917, 26 U.S.C. 7805).

#### General Rule

The proposed regulation would require that a charitable contribution of eligible property which is elected under the Asset Depreciation Range system be treated as an extraordinary retirement. Upon retirement of the asset, the unadjusted basis of the contributed property will be removed from the vintage account and an adjustment will be made to the depreciation reserve.

#### Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

#### Drafting Information

The principal author of this proposed regulation is Harold T. Flanagan, Jr., of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

#### Proposed amendment to the regulations

The proposed amendment to 26 CFR Part 1 is as follows:

Section 1.167(a)-11(d)(3)(ii) (relating to definitions of ordinary and extraordinary retirements) is amended by adding a new subdivision (d) after subdivision (c), to read as follows:

**§ 1.167(a)-11 Depreciation based on class lives and asset depreciation ranges for property placed in service after December 31, 1970.**  
\* \* \*

(d) *Special rules for salvage, repairs and retirements.* \* \* \*

(3) *Treatment of retirements.* \* \* \*

(ii) *Definitions of ordinary and extraordinary retirements.* \* \* \*

(d) The asset is section 1245 property which is retired after December 30, 1980 by a charitable contribution for which a

deduction is allowable under section 170.

William E. Williams,  
Acting Commissioner of Internal Revenue.

[FR Doc. 80-40499 Filed 12-29-80; 8:45 am]

BILLING CODE 4830-01-M

## 26 CFR Part 301

[EE-28-78]

### Inspection of Applications for Tax Exemption and Similar Material

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This document contains proposed regulations relating to public inspection of applications for tax exemption, applications for determination of the qualification of pension and other plans, and other related material. Changes to the applicable law were made by the Employee Retirement Income Security Act of 1974 and the Tax Reform Act of 1976. The regulations would provide the public guidance on how the documents may be obtained for inspection, and would affect all persons wishing to inspect the documents, as well as those persons submitting them.

**DATES:** Written comments and requests for a public hearing must be delivered or mailed by March 2, 1981.

The amendments are generally proposed to be effective for applications for tax exemption filed after October 31, 1976, and applications for determination letters for pension and other plans that are filed after September 2, 1974.

**ADDRESS:** Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T:EE-28-78, Washington, D.C. 20224.

**FOR FURTHER INFORMATION CONTACT:** Paul G. Accettura of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T:EE-28-78, 202-566-3422 (Not a toll-free number).

#### SUPPLEMENTARY INFORMATION:

##### Background

This document contains proposed amendments to the Regulations on Procedure and Administration (26 CFR Part 301) under section 6104(a)(1) of the Internal Revenue Code of 1954. The amendments are proposed to conform the regulations under section 6104(a)(1)(A) to section 1201(d) of the

Tax Reform Act of 1976 (90 Stat. 1667), and the regulations under section 6104(a)(1)(B), (C) and (D) to section 1022(g) of the Employee Retirement Income Security Act of 1974 (88 Stat. 940). The amendments are to be issued under the authority contained in sections 6104(a)(1)(A), 6104(a)(1)(B) and 7805 of the Internal Revenue Code of 1954 (72 Stat. 1660, 88 Stat. 940, 68A Stat. 917; 26 U.S.C. 6104(a)(1)(A), 6104(a)(1)(B), 7805).

### Public Inspection of Applications for Tax Exemption

Code section 6104(a)(1)(A) was amended by the Tax Reform Act of 1976. Prior to the amendment, the public could inspect approved applications for tax exemption and supporting documents filed by tax exempt organizations. The amendment extends the material open to public inspection to include documents or letters issued by the Internal Revenue Service which relate to approved applications for tax exemption.

### Public Inspection of Applications for Determination Letters Filed for Deferred Compensation Plans

Code section 6104(a)(1) was also amended by the Employee Retirement Income Security Act of 1974 ("ERISA"). ERISA authorizes public inspection of applications for determination letters and supporting documents filed after September 2, 1974, concerning the qualification of a pension, profit-sharing, stock bonus, annuity or bond purchase plan, or an individual retirement account or annuity. It also authorizes public inspection of applications for tax exemption and supporting documents filed for a related trust or custodial account. Any letter or document issued by the Internal Revenue Service after September 2, 1974, which relates to the qualification of a plan or account, or the exempt status of a related trust or custodial account, is also available for public inspection.

Applications and other documents are not open to public inspection, however, if a plan has fewer than 26 participants, inspection is then limited to plan participants.

### Material Withheld From Inspection

An applicant may request that information relating to a trade secret, patent, process, style of work, or apparatus not be open to public inspection. The information will be withheld from public inspection if the Secretary determines that public disclosure would adversely affect the applicant. In the case of pension or other plan, the information will also be

withheld from inspection by plan participants.

National defense information is not open to inspection by the public or a plan participant whether or not the applicant requests that it be withheld. In the case of a pension or other plan, information from which an individual's compensation (including deferred compensation) may be ascertained is also not open to inspection by the public or a plan participant whether or not the applicant requests that it be withheld.

### Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the Federal Register.

### Drafting Information

The principal author of these proposed regulations was Paul G. Accettura of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service participated in developing the regulation, both on matters of substance and style.

### Proposed Amendments to the Regulations

The proposed amendments to 26 CFR Part 301 are as follows:

**Paragraph 1.** The following new §§ 301.6104(a)-1 through 301.6104(a)-6 are added in the appropriate place:

#### § 301.6104(a)-1 Public inspection of material relating to tax-exempt organizations.

(a) *Application for tax exemption and supporting documents.* If the Internal Revenue Service determines that an organization described in section 501(c) or (d) is exempt from taxation for any taxable year, the application for tax exemption upon which the determination is based, together with any supporting documents, is open to public inspection. Some applications for tax exemption have been destroyed and therefore are not available for inspection. For purposes of determining the availability for public inspection, a claim for tax exemption filed to reestablish exempt status after denial

thereof under the provisions of section 503 or 504 (as in effect on December 31, 1969), or under the corresponding provisions of any prior revenue law, is considered an application for tax exemption.

(b) *Letters or documents issued by the Internal Revenue Service with respect to an application for tax exemption.* If an application for tax exemption is filed with the Internal Revenue Service after October 31, 1976, and is open to public inspection under paragraph (a) of this section, then any letter or document issued to the applicant by the Internal Revenue Service which relates to the application is also open to public inspection. For rules relating to when a letter or document is issued, see § 301.6110-2(h). Letters or documents to which this paragraph applies include, but are not limited to—

- (1) Favorable rulings and determination letters (see § 601.201(n)(1)) issued in response to applications for tax exemption,
- (2) Technical advice memoranda (see § 601.201(n)(9)) issued with respect to an approved, or subsequently approved, application for tax exemption, and
- (3) Letters issued in response to an application for tax exemption that propose a finding that the organization is not entitled to be exempt from tax, if the organization is subsequently determined, on the basis of the application, to be exempt from tax.

(c) *Requirement of exempt status.* An application for tax exemption, supporting documents, and letters or documents issued by the Internal Revenue Service that relate to the application will not be open to public inspection before the organization filing the application is determined, on the basis of the application, to be exempt from taxation for any taxable year. On the other hand, if the organization is determined to be exempt for any taxable year, the material will not be withheld from public inspection on the ground that the organization is determined not to be exempt for any other taxable year.

(d) *Documents included in the term "application for tax exemption".* For purposes of this section—

(1) *Prescribed application form.* If a form is prescribed for an organization's application for tax exemption, the application for tax exemption includes the form and all documents and statements the Internal Revenue Service requires to be filed with the form.

(2) *No prescribed application form.* If no form is prescribed for an organization's application for tax exemption, the application for tax exemption includes:

(i) The application letter and a copy of the articles of incorporation, declaration of trust, or other instrument of similar import that sets forth the permitted powers or activities of the organization,

(ii) The bylaws or other code of regulations,

(iii) The latest financial statement showing assets, liabilities, receipts and disbursements,

(iv) Statements showing the character of the organization, the purpose for which it was organized, and its actual activities,

(v) Statements showing sources of income and receipts and the disposition thereof, and whether or not any income or receipts is credited to surplus or may inure to the benefit of any private shareholder or individual, and

(vi) Any other statements or documents the Internal Revenue Service requires to be filed with the application letter.

(3) *Prohibited transactions.* An application for tax exemption does not include a request for a ruling as to whether a proposed transaction is a prohibited transaction under section 503.

(e) *Supporting documents defined.* For purposes of this section, "supporting documents", as used with respect to an application for tax exemption, means any statement or document not described in paragraph (d) of this section that is submitted by an organization in support of its application. For example, a legal brief submitted in support of an application for tax exemption is a supporting document.

(f) *Statement of exempt status.* In addition to having the opportunity to inspect material relating to tax exempt organizations, a person may request a statement setting forth the following information:

(1) The subsection and paragraph of section 501 (or the corresponding provision of any prior revenue law) under which an organization has been determined, on the basis of an application open to public inspection, to qualify for exemption from taxation, and

(2) Whether the organization is currently held to be exempt.

The request for the statement must be made in the same manner as a request for inspection (see § 301.6104(a)-6).

(g) *Withholding of certain information from public inspection.* For rules relating to certain information contained in an application for tax exemption and related material which will be withheld from public inspection, see § 301.6104(a)-5(a).

(h) *Procedures for inspection.* For rules relating to procedures for public inspection of applications for tax

exemption and related material, see § 301.6104(a)-6.

(i) *Material not open to public inspection under section 6104 or 6110.* Under section 6110 certain written determinations issued by the Internal Revenue Service are made available for public inspection. Section 6110 does not apply, however, to matters on which the determination of availability for public inspection is made under section 6104. Accordingly, § 301.6110-1(a) describes matters which, for purposes of section 6110, are considered within the ambit of section 6104. Some determination letters and other documents relating to tax exempt organizations that are not open to public inspection under section 6104(a)(1)(A) and this section are nevertheless within the ambit of section 6104 for purposes of section 6110. These determination letters and other documents are therefore not available for public inspection under either section 6104 or section 6110. They include, but are not limited to—

(1) Unfavorable rulings or determination letters (see § 601.201(n)) issued in response to applications for tax exemption,

(2) Rulings or determination letters revoking or modifying a favorable determination letter (see § 601.201(n)(6)),

(3) Technical advice memoranda (see § 601.201(n)(9)) relating to a disapproved application for tax exemption or the revocation or modification of a favorable determination letter,

(4) Any letter or document filed with or issued by the Internal Revenue Service relating to whether a proposed or accomplished transaction is a prohibited transaction under section 503,

(5) Any letter or document filed with or issued by the Internal Revenue Service relating to an organization's status as an organization described in section 509(a) or 4942(j)(3), unless the letter or document relates to the organization's application for tax exemption, and

(6) Any other letter or document filed with or issued by the Internal Revenue Service which, although it relates to an organization's tax exempt status as an organization described in section 501 (c) or (d), does not relate to that organization's application for tax exemption, within the meaning of paragraph (d).

#### § 301.6104(a)-2 Public inspection of material relating to pension and other plans.

(a) *Material open to inspection.* Except as provided in § 301.6104(a)-4 with respect to plans having fewer than 26 participants, an application for a determination letter which is filed with

the Internal Revenue Service after September 2, 1974, together with supporting documents filed by the applicant in support of the application, will be open to public inspection under section 6104(a)(1)(B) (i) and (ii). An application for a determination letter and supporting documents will be open to public inspection whether or not the application is withdrawn by the applicant, and whether or not the Internal Revenue Service determines that the plan, account, or annuity to which the application relates is qualified or that any related trust or custodial account is exempt from tax.

(b) *Documents included in the term "application for a determination letter"*—(1) *Employees' plans and individual retirement plans.* For purposes of this section, the term "application for a determination letter" includes the documents that an applicant files with respect to a request that the Internal Revenue Service determine the qualification of—

(i) A pension, profit-sharing, or stock bonus plan under section 401(a),

(ii) An annuity plan under section 403(a), or

(iii) A bond purchase plan under section 405(a), or

(iv) An individual retirement account or annuity described in section 408 (a), (b) or (c).

(2) *Tax exempt trusts or custodial accounts.* The term "application for a determination" letter also includes the documents an applicant files with respect to a request that the Internal Revenue Service determine the exemption from tax under section 501(a) of an organization forming part of a plan or account described in subparagraph (1) of this paragraph, or a custodial account described in section 401(f).

(3) *Master, prototype and pattern plans.* The term "application for a determination letter" also includes documents which an applicant files with respect to a request for approval of a master, prototype, pattern or other such plan or account.

(4) *Prescribed forms and application letters.* With respect to an application for a determination letter described in this paragraph (b) for which a application form is prescribed, the application for a determination letter includes the form and all documents and statements required to be filed in connection with the form. With respect to an application for a determination letter for which no application form is prescribed, the application for a determination letter includes the application letter and all documents and statements the Internal Revenue Service

requires to be submitted with the application letter.

(c) *Documents not constituting an "application for a determination letter".* The following are not applications for a determination letter for purposes of this section:

(1) An incomplete application that is returned without action for proper completion,

(2) An application that is returned without action to the applicant for failure to notify all interested parties in accordance with the regulations under section 7476 (relating to declaratory judgments), and

(3) A request for a ruling as to whether a proposed transaction is a prohibited transaction under section 4975.

(d) *Supporting documents.* "Supporting documents", as used with respect to an application for a determination letter which is open to public inspection under this section, means any statement or document submitted in support of the application which is not specifically required by the application form or the Internal Revenue Service. For example, a legal brief submitted in support of an application for a determination letter is a supporting document.

(e) *Applicant.* For purposes of this section, § 301.6104(a)-3 (relating to Internal Revenue Service letters and documents open to public inspection) and § 301.6104(a)-5 (relating to the withholding of certain information from public inspection), an "applicant" includes, but is not limited to, an employer, plan administrator (as defined in section 414(g)), labor union, bank, or insurance company that files an application for a determination letter.

**§ 301.6104(a)-3 Public inspection of Internal Revenue Service letters and documents relating to pension and other plans.**

(a) *In general.* Except as provided in § 301.6104(a)-4 with respect to plans having fewer than 26 participants, a letter or other document issued by the Internal Revenue Service after September 2, 1974, is open to public inspection under section 6104(a)(1)(B)(iv) and this section, if it is issued with respect to—

(1) The qualification of a pension, profit-sharing or stock bonus plan under section 401(a), an annuity plan under section 403(a), a bond purchase plan under section 405(a), or an individual retirement account or annuity described in section 408 (a), (b) or (c),

(2) The exemption from tax under section 501(a) of an organization forming part of such a plan or account, or a

custodial account described in section 401(f), or

(3) The approval of a master, prototype, pattern or other such plan or account.

(b) *Scope.* Internal Revenue Service letters and documents open to public inspection under section 6104(a)(1)(B)(iv) and this section are not limited to those issued in response to an application for a determination letter described in § 301.6104(a)-2. They are, however, limited to those issued by the Internal Revenue Service to the person or organization which either did or could file an application for a determination letter for the plan, account or annuity to which the letter or document relates. If such person or organization designates a representative having a power of attorney, however, then the letter or document will be open to inspection if issued to the representative. For rules relating to when a letter or document is issued, see § 301.6110-2(h). Internal Revenue Service letters and documents are open to public inspection under section 6104(a)(1)(B)(iv) and this section whether or not the Internal Revenue Service determines that the plan, account or annuity to which the letter or document relates is qualified or that any related trust or custodial account is exempt from tax.

(c) *Letters and documents open to public inspection.* Internal Revenue Service letters and documents open to public inspection under section 6014(a)(1)(B)(iv) and this section include, but are not limited to:

(1) Determination letters relating to the qualification of a plan, account or annuity described in paragraph (a) (1) of this section (see § 601.201 (o)),

(2) Technical advice memoranda (see § 601.201(n)(9)) relating to the issuance of such determination letters,

(3) Technical advice memoranda relating to the continuing qualification of a plan, account or annuity previously determined to be qualified, or to the qualification of a plan, account or annuity for which no determination letter has been issued,

(4) Letters or documents revoking or modifying any prior favorable determination letter or denying the qualification of a plan, account or annuity for which no determination letter has been issued,

(5) Determination letters relating to the exemption from tax of a trust or custodial account described in paragraph (a) (2) of this section (see § 601.201 (o) (2) (i) (h)), or

(6) Opinion letters relating to the acceptability of the form of any master, prototype or other such plan or account

(see § 601.201 (p) (q)) or notification letters issued with respect to pattern plans.

(d) *Extent letter or document open to public inspection.* A letter or document issued by the Internal Revenue Service is open to public inspection under section 6104(a) (1) (B) (iv) and this section only to the extent it relates directly to the qualification of a plan, account or annuity, the exemption from tax of a related organization or custodial account, or the approval of a master, prototype, pattern or other such plan. Any part of the letter or document which does not directly relate to such qualification, exemption or approval is not open to public inspection. For example, a letter to an employer which concludes that an employees' plan is not qualified and the related trust is not tax exempt will be open to public inspection. However, that same letter may also assert an income tax deficiency because employer contributions to the trust are, therefore, not deductible. In such a case, that part of the letter relating to the tax deficiency will be deleted before the letter is opened to public inspection.

(e) *Letters or documents issued with respect to tax return examination.* In the case of an examination of a taxpayer's return or consideration of a taxpayer's claim for credit or refund, no letter or document issued to the taxpayer before the preliminary or "30-day" letter described in § 601.105 (d) (1) is issued to the taxpayer will be open to public inspection under section 6104 (a) (1) (B) (iv) and this section. The "30-day" letter and any statutory notice of deficiency subsequently issued to the taxpayer under section 6212 will be open to public inspection to the extent provided in paragraph (d) of this section. If any letter or document other than a statutory notice of deficiency is issued to the taxpayer after the "30-day" letter is issued, such letter or document will be open to inspection to the extent provided in paragraph (d) of this section only if it finally resolves or otherwise disposes of a plan qualification or tax exemption issue raised in the "30-day" letter.

(f) *Letters or documents issued after September 2, 1974.* Section 6104(a) (1) (B) (iv) and this section apply to letters or documents issued by the Internal Revenue Service after September 2, 1974, even though the relevant application for a determination letter or other initiating correspondence from the applicant was filed with the Internal Revenue Service before September 2, 1974.

**§ 301.6104(a)-4 Requirement for 26 or more plan participants.**

(a) *Inspection by plan participants.* In the case of a plan, annuity or account described in § 301.6104(a)-2(b) and § 301.6104(a)-3(a) that has fewer than 26 participants, material described in §§ 301.6104(a)-2 and 301.6104(a)-3 as open to public inspection is only open to inspection by a plan participant or the participant's authorized representative. This limitation does not apply, however, with respect to documents which an applicant files with respect to a request for approval of a master, prototype, pattern or other such plan (see § 301.6104(a)-2(b)(3)) or to opinion, notification or other such letters issued by the Internal Revenue Service with respect to such plans (see § 301.6104(a)-3(a)(3)).

(b) *Determining number of plan participants—(1) In general.* For purposes of determining whether a plan has fewer than 26 participants, the number of plan participants will be the number indicated on the most recent annual return filed for the plan under section 6058. Where an annual return indicates the number of participants both at the beginning and end of the plan year, the number indicated on the return means the number at the end of the plan year. If no annual return has been filed for the plan, then the number of plan participants will be the number indicated on the most recent application for a determination letter filed for the plan. If, however, the number of plan participants is increased prior to final Internal Revenue Service action on the application, the number of plan participants will be that increased number.

(2) *Decreasing number of plan participants.* If a plan having 26 or more participants, as indicated on an annual return or application for a determination letter, subsequently files an annual return indicating fewer than 26 plan participants, then material relating to the plan which is issued or received by the Internal Revenue Service after the date the annual return is filed will be open to inspection only by plan participants or their authorized representatives. Similarly, if a plan having 26 or more participants as indicated on an annual return or an application for a determination letter, subsequently files an application for a determination letter which indicates fewer than 26 plan participants, then that application and related material as well as any other material relating to the plan which is received or issued by the Internal Revenue Service after the date of receipt of that application, will be

open to inspection only by plan participants or their authorized representatives. In either case, material open to public inspection pursuant to the number of plan participants indicated on previous annual returns or applications for a determination letter will remain open to public inspection.

(3) *Increasing number of plan participants.* If a plan having fewer than 26 plan participants, as indicated on an annual return or application for a determination letter, files a subsequent return or application indicating 26 or more plan participants, all the plan's prior applications and other material received or issued by the Internal Revenue Service after September 2, 1974, will be open to public inspection regardless of the number of plan participants indicated on any prior return or application.

(c) *Plan participant.* Solely for purposes of determining who is a plan participant permitted to inspect material relating to a plan having fewer than 26 participants, the term "plan participant" includes, but is not limited to, former employees (such as certain retired and terminated employees) who have a nonforfeitable right to benefits under the plan. An individual who is merely a beneficiary of an employee or former employee is not a plan participant, unless the individual is a beneficiary of a deceased former employee and is receiving benefits or entitled to receive future benefits under the plan. The term "plan participant" also includes the administrator, executor, or trustee of the estate of a deceased plan participant. That material may be available for inspection to an individual under this paragraph does not constitute a determination by the Internal Revenue Service that the individual is a plan participant for any purpose other than inspection under section 6104 (a) (1) (B).

(d) *Authorized representative.* "Authorized representative" means the representative of a plan participant designated by the participant in writing to inspect material described in §§ 301.6104(a)-2 and 301.6104(a)-3. The document designating the authorized representative must be signed by the plan participant and must specify that the representative is authorized to inspect the material. The document, or a copy, must be filed with the office of the Internal Revenue Service in which the authorized representative is to inspect the material. A copy which is reproduced by a photographic process need not be certified as a true and correct copy of the original.

**§ 301.6104(a)-5 Withholding of certain information from public inspection.**

(a) *Tax exempt organizations*—(1) *Trade secrets, patents, processes, styles of work, or apparatus.* An organization whose application for tax exemption is open to public inspection under section 6104(a)(1)(A) and § 301.6104(a)-1 may in writing request the withholding of information contained in the application or supporting documents which relates to any trade secret, patent, process, style of work, or apparatus of the organization. The information will be withheld from public inspection if the Commissioner determines that the disclosure of such information would adversely affect the organization. Requests for withholding information from public inspection should be filed with the office with which the organization files the documents containing the information. The request must clearly identify the material desired to be withheld (the document, page, paragraph, and line) and must state why the information should not be open to public inspection. The organization will be notified of the Commissioner's determination as to whether the information will be withheld from public inspection.

(2) *National defense material.* The Internal Revenue Service will withhold from public inspection any information which is submitted by an organization whose application for tax exemption is open to inspection under section 6104(a)(1)(C) or (D) should not be included in an application for a determination letter, supporting documents, or any other document open to inspection under section 6104(a)(1)(A) and § 301.6104(a)-1, if the Commissioner determines that public disclosure would adversely affect the national defense.

(b) *Pension and other plans*—(1) *Applicant's exclusion of certain information.* Except as provided in subparagraph (2) of this paragraph, information that, in the opinion of the applicant, is of the type described in section 6104(a)(1)(B). Accordingly, an applicant should not include in an application for a determination letter or supporting documents confidential compensation information as described in subparagraph (4) of this paragraph. Neither should an applicant include information relating to any trade secret, patent, process, style of work or apparatus, the disclosure of which would be adverse to the applicant.

(2) *Exception for separate document.* The rule that an applicant should exclude from an application for a determination letter or other documents information of the type in section 6104(a)(1)(C) or (D) does not apply—

(i) In the case of the separate schedule to certain applications for a determination letter which is provided for the purpose of setting forth confidential compensation information (as described in subparagraph (4) of this paragraph) which must be submitted by the applicant,

(ii) If the applicant determines that it is impossible to provide the Internal Revenue Service with sufficient information to support an application for a determination letter without submitting what is believed to be information of the type described in section 6104(a)(1)(C) or (D), or

(iii) If the Internal Revenue Service requests that the applicant submit information of the type described in section 6104(a)(1)(C) and (D).

In a case described in subdivision (ii) or (iii) of this subparagraph, the applicant is to set forth the information in a document separate from the remainder of the application for a determination letter or other documents. The separate document is to state why the information is to be withheld from public inspection under section 6104(a)(1)(C) or (D). If the Internal Revenue Service has not requested the information, the separate document is to also state why it is impossible to provide the Internal Revenue Service sufficient information to support the application for a determination letter without including information which is to be withheld. The separate document should clearly identify the relevant portion of the application for a determination letter or other document (the document, page, paragraph, and line) to which the information set forth in the separate document relates. The Internal Revenue Service will withhold from public inspection (including inspection by a plan participant or authorized representative) information contained in the separate document if the Commissioner determines that the information is in fact information of the type described in section 6104(a)(1)(C) or (D), and, in the case of information relating to any trade secret, patent, process, style of work or apparatus, the Commissioner further determines that disclosure would be adverse to the applicant.

(3) *National defense material.* The Internal Revenue Service will withhold from public inspection (including inspection by a plan participant or authorized representative) any information which is included in an application for a determination letter or supporting documents if the Commissioner determines that public disclosure would adversely affect the

national defense. The information will be withheld whether or not submitted on a separate document pursuant to subparagraph (2) of this paragraph.

(4) *Confidential compensation information.* If an application for a determination letter, supporting document, or related letter or document referred to in section 6104(a)(1)(B) and §§ 301.6104(a)-2 and 301.6104(a)-3 contains information (including aggregate figures) from which an individual's compensation (including deferred compensation) may be ascertained, that information is not open to public inspection (including inspection by a plan participant or authorized representative). Confidential compensation information includes the amount of benefit a specific plan participant may expect to receive at normal or early retirement age and the amount of the employer's contributions under the plan that may be allocated to a specific plan participant. However, so long as a plan has more than one participant, the amount of benefit provided under the plan to plan participants, in general, at normal or early retirement, age, or the amount of the employer's contributions under the plan that are allocable to plan participants, in general, does not constitute confidential compensation information. Further, a description of the numbers of individuals covered and not covered by a plan, listed by compensation range, does not constitute confidential compensation information.

**§ 301.6104(a)-6 Procedural rules for inspection.**

(a) *Place of inspection; tax exempt organizations and pension and other plans.* Material relating either to tax exempt organizations or to pension and other plans that is open to public inspection under section 6104(a)(1) and § 301.6104(a)-1 through § 301.6104-3 will be made available for inspection at the Freedom of Information Reading Room, National Office, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, and in the office of any district director of internal revenue.

(b) *Request for inspection*—(1) *Tax exempt organizations and pension and other plans; public inspection.* Material relating to either tax exempt organizations or pension and other plans that is open to public inspection under section 6104(a)(1) and §§ 301.6104(a)-1 through § 301.6104(a)-3 will be available for inspection only upon request. If inspection at the National Office is desired, a request should be made in writing to the Commissioner of Internal Revenue,

Attention: Freedom of Information Reading Room, 1111 Constitution Avenue, N.W., Washington, D.C. 20224. Requestes for inspection in the office of a district director should be made in writing to the district director's office. The requests must describe the material to be inspected in reasonably sufficient detail so that Internal Revenue Service personnel can locate the material. If a tax-exempt organization has more than one application for tax exemption open to public inspection, or if a pension or other plan has more than one application for a determination letter open to public inspection, only the most recent application and related material will be made available for inspection unless the request states otherwise. Further, in the case of a pension or other plan, only Internal Revenue Service documents issued or delivered after the date of the filing of the most recent application for a determination letter will be made available for inspection, unless the request states otherwise.

(2) *Pension and other plans; inspection by plan participant or authorized representative.* As described in § 301.6104(a)-4, material relating to plans having fewer than 26 participants is only open to inspection by a plan participant or authorized representative. In the case of such a plan, the rules described in subparagraph (1) of this paragraph apply, except that the request for inspection must be in writing. The request for inspection must include satisfactory evidence that the person requesting inspection is a plan participant (see § 301.6104(a)-4 (c)) or an authorized representative of such a plan participant within the meaning of § 301.6104(a)-4 (d).

(c) *Time and extent of inspection.* A person requesting inspection will be notified when the material will be made available for inspection. The material will be made available for inspection at times that will not interfere with its use by the Internal Revenue Service or exclude other persons from inspecting it. In addition, the Commissioner or district director may limit the number of applications for tax exemption, applications for a determination letter, supporting documents, or letters and documents issued by the Internal Revenue Service that will be made available to any person for inspection on a given date. Inspection will be allowed only in the presence of an Internal Revenue Service employee and only during regular business hours.

(d) *Copies.* Notes may be taken of the material open for inspection. Copies may be made manually or, if a person provides the equipment,

photographically at the place of inspection. Photographic copying is subject to reasonable supervision with regard to the facilities and equipment used. A fee will be charged for copies of the material furnished by the Internal Revenue Service. Copies will be certified upon request.

§§ 301.6104-2, 301.6104-3 and 301.6104-4 [Redesignated as §§ 301.6104(b)-1, 301.6104(c)-1 and 301.6104(d)-1]

Par. 2. Sections 301.6104-2, 301.6104-3 and 301.6104-4 are redesignated §§ 301.6104(b)-1, 301.6104(c)-1 and 301.6104(d)-1, respectively.

William E. Williams,  
Acting Commissioner of Internal Revenue.

## DEPARTMENT OF LABOR

### Office of Pension and Welfare Benefit Programs

#### 29 CFR Part 2520

#### Proposed Revision of Annual Return/Reports and Regulations Regarding Plans Which Participate in a Master Trust

**AGENCY:** Department of Labor.

**ACTION:** Notice of proposed revision of annual report forms and annual reporting regulations.

**SUMMARY:** This document contains proposed revisions to the Form 5500, (annual return/report form) filed under the Employee Retirement Income Security Act of 1974 (the Act) and a proposed revision of related employee benefit plan annual reporting regulations. If adopted, these revisions would affect the reporting of financial information by plans which participate in a master trust.

**DATES:** Written comments (at least three copies) concerning the proposed revisions must be received by the Department on or before February 13, 1981. The revisions, if adopted, will be effective for plan years beginning on or after January 1, 1981.

**ADDRESS:** Written comments should be addressed to "Master Trust", Office of Reporting and Plan Standards, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4508, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

**FOR FURTHER INFORMATION CONTACT:** John Christensen, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216, (202) 523-8684 or Roger Thomas, Office of the

Solicitor, Plan Benefits Security Division, U.S. Department of Labor, Washington, D.C. 20210, (202) 523-8602. These are not toll free numbers.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that the Department has under consideration proposed revisions to 29 CFR 2520.103-1, relating to the contents of the annual report, Form 5500 (annual return/report), and instructions thereto. The annual return/report provides financial information regarding an employee benefit plan to the Department of Labor (the Department) and the Internal Revenue Service. The plan administrator must make the annual return/report available for examination by plan participants and beneficiaries.

The proposed revisions relate to the treatment of plans participating in master trusts for annual reporting purposes. Generally, a master trust is a trust maintained by certain financial institutions to hold the assets of several plans that are all sponsored by a single employer or by several employers which are under common control. The Department has been advised that when the assets of several plans are combined in a single master trust, significant economies in recordkeeping and asset management expenses can often be achieved.

The Department's annual reporting requirements are set forth at 29 CFR 2520.103-1 *et seq.* In accordance with these regulations plans generally file annual reports on Forms of the 5500 Series (Forms 5500, 5500-C, and 5500-K). The annual report includes financial statements, which include a statement of assets and liabilities (Item 13 of Form 5500) and a statement of income, expenses and changes in net assets (Item 14 of Form 5500). Plan assets, liabilities, income and expenses are grouped in categories and sub-categories ("line items"). In general, the instructions to the forms currently require that if the assets of two or more plans are maintained in one trust (as in the case of a master trust), the statement of assets and liabilities and the statement of income, expenses, and changes in net assets should be completed by entering the allocable portion of each line item for the plan in question.<sup>1</sup>

The department has received correspondence from representatives of banks and the banking industry with regard to the treatment of master trusts

<sup>1</sup> This rule does not apply with respect to common or collective trusts. See 29 CFR 2520.103-3.

for annual reporting purposes.<sup>2</sup> This correspondence has generally expressed the view that the current method of reporting is confusing and presents financial information relating to a plan's participation in a master trust in a manner which they characterize as misleading. These letters have generally recommended that a plan which participates in a master trust report the value of the plan's interest in the master trust as a single asset under item 13, and that the plan's share of earnings and realized and unrealized gains and losses of the master trust be reported as a single figure representing the increase or decrease in the value of the plan's interest in the master trust under item 14. With respect to the schedules of assets held for investment, loans or leases in default or classified as uncollectable, party in interest transactions and reportable transactions required in item 22(a), the banking representatives have generally recommended that such schedules be filed by the master trust, instead of by individual plans.

Upon consideration of these comments, the Department is proposing revisions to the forms and the regulations to obtain financial information from plans which participate in a master trust in a manner which the Department believes more accurately reflects the financial condition of each plan participating in the master trust. The Department expects that the revisions will reduce or eliminate uncertainty on the part of the public as to the reporting requirements for such plans. The proposed revisions, which largely utilize the concepts suggested by the commentators with certain modifications, are described below.

#### Investment Accounts

According to representatives of banks serving as trustees of master trusts, master trusts commonly include various types of investment funds in which assets of participating plans are pooled for investment purposes, such as equity funds, real-estate funds, bond funds, and money-market funds. These pooled investment funds within the master trust may be managed by the trustee or by other investment managers. Under some master trusts, the assets of the plans participating in the master trust must be allocated among these investment funds

in such a manner that each plan has the same percentage interest in each pooled investment fund within the master trust as in the master trust as a whole. Other master trusts, however, permit fiduciaries of each plan, such as the plan's investment committee, to specify the portion of the plan's interest in the master trust to be allocated to each separate fund within the master trust. Thus, for example, such fiduciaries may direct that 60% of the plan's interest in the master trust be allocated to the master trust's equity fund, 30% to the master trust's bond fund, 10% to the master trust's real-estate fund, and nothing to the master trust's money-market fund. If each plan's assets are allocated in this manner, each plan will ordinarily have a different percentage interest in each pooled fund and in the master trust as whole. Moreover, many master trusts permit separate assets to be held and managed by the master trust outside of any pooled investment fund, for the benefit of one or more (but not necessarily all) participating plans.

Under many master trusts, therefore, the plan's percentage interest in the master trust as a whole does not necessarily bear any relationship to the plan's interest in each separate pooled fund and each separate asset within the master trust. Thus, in order to determine accurately the share of each item of assets, liabilities, income, expense, etc. Allocated to the plan from the master trust, it is necessary to know relevant financial information for each pooled investment fund and each separately held asset in the master trust, as well as each plan's percentage or dollar interest in each pooled investment fund and each separately held asset. Accordingly, the Department is proposing revisions which, if adopted, would provide that the bank, trust company, or similar institution maintaining the master trust shall complete such information for each participating plan.

In the proposed instructions, the term "investment account" is used to mean both pooled investment funds and separately held assets in the master trust. Each of the following would be treated as a separate investment account: (1) each pool of assets such that each plan has the same fractional interest in each asset in the pool and each plan is unable to dispose of its interest in any asset in the pool without disposing of its interest in the pool, and (2) each asset held in the master trust which is not part of such a pool of assets. Thus, every asset held in the master trust would be considered to be held in an investment account. An investment account, therefore, could

consist of a pool of assets, such as the pooled funds typically maintained in master trusts, or of a single asset. Any asset which is "dedicated" to a single plan or to several plans (i.e., an asset held exclusively for the benefit of such plan or plans apart from any pool of investments) would itself be treated as comprising a separate investment account. In the case of a master trust in which each plan has the same percentage interest in each pooled investment fund (and in each separate asset, if any), the definition of "investment account"; would permit all of the assets in the master trust to be viewed as a single pool of assets appropriate for treatment as a single investment account.

A principal feature of the proposed reporting revisions would be that detailed financial information would be provided with respect to each investment account maintained within the master trust, as explained more fully below. By contrast with current requirements, it would not be necessary to determine the plan's allocable share of each line item of Form 5500 for assets held in the master trust.

#### Assets and Liabilities

The current value of a plan's interest in a master trust at the beginning and end of the plan year would be reported in item 13(c)(x) of Form 5500. The value of the plan's interest in a master trust would be the sum of the net values of the plan's interest in each master trust investment account. No other information regarding the assets held in the master trust and liabilities attributable to those assets would be reported in item 13 of the plan's Form 5500.

Detailed information on assets held in the master trust would be provided with respect to each master trust investment account in a statement in the format of item 13, showing the assets and liabilities of the investment account at the beginning and end of the most recent fiscal year of the investment account.

#### Income, Expenses and Changes in Net Assets

In item 14(n)(ii) of the plan's Form 5500, the net investment gain (or loss) allocated to the plan from all master trust investment accounts for the plan year would be reported. This figure would be determined by adding together all net investment gains allocated to the plan for the plan year and by subtracting from that sum any net

<sup>2</sup> Letters received by the Department regarding the treatment of master trusts under the regulations are available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

investment losses allocated to the plan for the plan year.<sup>3</sup>

A separate schedule would list each master investment account in which the plan has an interest and would show the net investment gain (or loss) allocated to the plan from each such master trust investment account for the plan year.

A statement prepared for each investment account would report, in the format of item 14, the income, expenses and change in net assets and net increase (decrease) in net assets of the investment account during the most recent fiscal year of the investment account.

Any expenses which are incurred by the plan in connection with the master trust but which are not subtracted from the gross income of one of the master trust investment accounts in determining the net increase (decrease) in net assets of such investment accounts would be reported in item 14(j) or (k) of the plan's Form 5500.

#### Fees, Commissions or Other Compensation

Item 12 of the plan's Form 5500 would include the plan's share of amounts of compensation paid during the plan year to the trustee of the master trust and to persons providing services to the master trust, if such compensation is not subtracted from the gross income of any investment account in determining the investment account's net increase (decrease) in net assets. Any amounts of compensation paid to persons providing services to an investment account which are subtracted from the gross income of the investment account in determining the net increase (decrease) in net assets of the investment account would be reported in a statement prepared for the investment account in the same format as item 12 of Form 5500.

#### Item 22(a) Schedules

Schedules of the information specified in item 22(a) (i.e., party in interest transactions, assets held for investment, loans and leases in default or classified as uncollectable and reportable transactions) would, if appropriate, be completed for each investment account.

<sup>3</sup>The net investment gain (or loss) allocated to the plan from each investment account for the plan year would be determined by subtracting the value of the plan's interest in the investment account at the beginning of the plan year from the value of the plan's interest at the end of the plan year and by adjusting that difference to eliminate the effect of any transfers of assets into or out of the investment account by the plan (i.e., by subtracting any such transfers into the investment account and by adding transfers out of the investment account).

#### Plan Holdings in Both Master Trusts and Other Funding Media

If some plan assets are held in a master trust and other plan assets are held in other funding media, all applicable lines in items 12, 13, 14, and 22(a) of Form 5500 must be completed to report information regarding the plan assets held in the other funding media. For example, if a plan invests all of its funds in master trust except cash temporarily deposited in a checking account held in a separate trust to pay administrative expenses unrelated to the master trust (such as the accountant's fee or charges for disclosing plan information to participants and beneficiaries), information regarding such cash must be shown in the annual report in addition to information regarding plan assets held in the master trust.

#### Proposed Regulation

The revisions to Form 5500 would be accompanied by a regulation, which is proposed in this document (29 CFR § 2520.103-1(e)), and which would require the plan administrator of a plan participating in a master trust to follow the instructions to Form 5500 regarding master trust. Corresponding revisions are proposed to § 2520.103-1(c).

#### Filing of Reports

Under the proposed regulation, a plan participating in a master trust, including a plan which would normally file a Form 5500-C or 5500-K,<sup>4</sup> would be required to file form 5500, in order to ensure uniformity of reporting among all plans participating in a single master trust. It is contemplated that the instructions to Forms 5500-C and 5500-K would be modified by adding a statement to the effect that those forms should not be used for filing the annual report for plans participating in a master trust. However, the plan administrator of a plan covering fewer than 100 participants at the beginning of the plan year is not required to engage an accountant to examine the financial statements of the plan or to include within the annual report a report of such accountant. (Since such plan is required to file Form 5500 because it participates in a master trust, the plan is not deemed to be making an election under 29 CFR 2520.103-1(d); therefore, the waiver of the accountant's examination and report, provided by § 2520.104-46, applies to the plan).

<sup>4</sup>Forms 5500-C and 5500-K contain abbreviated financial statements of assets and liabilities and statements of income, expenses and changes in net assets.

Under the proposal, the trustee of a master trust would furnish to the plan administrator of a plan participating in the master trust copies of the required statements, schedules and other information relating to the master trust investment accounts as specified in the instructions and would file these documents directly with the Department. It is the Department's opinion that the information required to be provided for each plan by the trustee of the master trust constitutes a part of a plan's annual report for purposes of satisfying a plan's disclosure obligations to participants and beneficiaries.<sup>5</sup> The required information would be filed with the Department no later than the earliest date on which Form 5500 must be filed for any plan participating in the master trust. The Department believes that the direct filing of master trust information in this manner would eliminate duplicative reporting and would provide financial information on such plans in a more useful form. The annual report of a plan participating in the master trust would be filed by the plan administrator in accordance with the "General Instructions" provided on Form 5500.

#### Arrangements Other Than Master Trusts

Under the proposals contained in this document, annual reporting along the lines described above would be limited to plans participating in master trusts. Although the Department is aware that arrangements other than master trusts may exist in which assets of more than one plan are pooled for investment purposes, it does not have an adequate factual basis for expanding the scope of the master trust proposals to cover plans participating in such arrangements. Special rules are currently provided in 29 CFR § 2520.103-3 for plans participating in common or collective trusts, in § 2520.103-4 for plans participating in insurance company pooled separate accounts meeting specified requirements, and in § 2520.103-21 and § 2520.103-43 for plans participating in certain group insurance arrangements. Furthermore, the instructions for Forms 5500 and 5500-C provide special reporting instructions, in the section entitled

<sup>5</sup>Section 104(b)(2) of the Act gives any plan participant or beneficiary the right to examine the plan's latest annual report at the plan administrator's principal office and such other places as may be necessary to make available all pertinent information to all participants. Further, section 104(b)(4) gives any plan participant or beneficiary the right to receive, upon his or her written request, a complete copy of the plan's latest annual report. The plan administrator may make a reasonable charge to cover the costs of furnishing such copy. (See also 29 CFR § 2520.104b-1 and § 2520.104b-30).

"Type of Filer", for a single plan of a controlled group of corporations or trades or businesses under common control, a multiemployer plan, a multiple-employer-collectively-bargained plan, and a multiple-employer plan (other).

The Department invites comments regarding appropriate reporting methods for multiple plan arrangements which are not entitled to follow any of the reporting methods or instructions mentioned in the preceding paragraph and which do not involve master trusts. Such comments should include a detailed explanation of both the form and operation of any such other multiple plan arrangement. Suggestions for special reporting methods for any other multiple plan arrangement will be considered separately from the subject proposal for plans participating in master trusts.

#### Drafting Information

The principal authors of these proposed revisions are Miriam Freund of the Pension and Welfare Benefit Programs and Roger Thomas of the Plan Benefits Security Division, Office of the Solicitor, Department of Labor. However, other persons in the Department of Labor and in the Internal Revenue Service participated in developing the proposed revisions, both on matters of substance and style.

#### Proposed Revisions of Annual Return/Reports and of Annual Reporting Regulation

1. In consideration of the matters discussed above, it is proposed to amend § 2520.103-1 of Title 29 of the Code of Federal Regulations by revising paragraph (c) and adding a new paragraph (e) to read as set forth below.

#### § 2520.103-1 Contents of the annual report.

(c) *Contents of the annual report for plans with fewer than 100 participants.* Except as provided in paragraphs (d) and (e) of this section and in §§ 2520.104-43 and 2520.104a-6, the annual report of an employee benefit plan which covers fewer than 100 participants at the beginning of the plan year shall be Form 5500-C "Return/Report of Employee Benefit Plan (with fewer than 100 participants)" or 5500-K "Return/Report of Employee Pension Benefit Plan for Sole Proprietorships and Partnerships (with fewer than 100 participants and at least one owner-employee)", or 5500-R "Registration Statement of Employee Benefit Plan (with fewer than 100 participants)." See

the section headed "What to File" in the instructions to these forms.

(e) *Plan which participate in a master trust.* The plan administrator of a plan which participates in a master trust shall file an annual report on Form 5500 in accordance with the specific instructions relating to master trusts on Form 5500 and instructions thereto. A master trust is a trust which is maintained by a bank, trust company, or similar institution regulated, supervised, and subject to periodic examination by a State or Federal agency, and which contains only assets of more than one plan of a single employer or more than one plan of several employers, all of which are members of a controlled group of corporations or trades or businesses under common control (as defined in section 414(b) and (c) of the Internal Revenue Code).

(2) It is proposed to amend the annual return/report (Forms 5500, 5500-C, and 5500-K) and instructions thereto in the manner described below.

#### I. Revisions to Form 5500

Add new sub-item 13(c)(x) "Value of Interest in Master Trust" and renumber current 13(c)(x) and 13(c)(xi) as 13(c)(xi) and 13(c)(xii) respectively.

Add new sub-item 14(n)(ii) "Net investment gain (or loss) from all master trust investment accounts". Renumber current sub-item 14(n)(ii) ("Other changes") as 14(n)(iii).

#### II. Revisions to Instructions for Form 5500

[Insert at the end of "A. What to File" under "General Instructions".]

#### Plans Participating in Master Trust(s)

##### A. Definitions and General Information.

For purposes of this form, a master trust is deemed to exist where the assets of more than one plan of a single employer or more than one plan of several employers, all of which are members of a single controlled group of corporations or trades or businesses under common control (as defined in section 414(b) and (c) of the Code) are held in trust maintained by a bank, trust company, or similar institution regulated, supervised, and subject to periodic examination by a State or Federal agency.

For purposes of this form, the assets of a master trust are considered to be held in one or more "investment accounts". A master trust investment account may contain a pool of assets or a single asset. Each pool of assets held in a master trust must be treated as a separate master trust investment account if each plan which has an interest in the pool has the same fractional interest in each asset in the pool as its fractional interest in the entire pool, and if each such plan is unable to dispose of its interest in any asset in the pool without disposing of its interest in the pool. A

master trust may also contain assets which are not held in such a pool. Each such asset must also be treated as a separate master trust investment account.

Financial information must generally be provided with respect to each master trust investment account as specified in Part C, "Reporting Information Relating to Master Trusts and Master Trust Investment Accounts," below.

Each plan participating in a master trust must file Form 5500, regardless of the number of participants in the plan. If such a plan covers fewer than 100 participants at the beginning of the plan year, the accountant's examination and report described in section 103(a)(3)(A) of the Act is not required (see 29 CFR 2520.104-46).

B. *Reporting Information Relating to the Individual Plan 1.* In item 12 include the plan's share of amounts of compensation for services paid during the plan year to the master trustee and to persons providing services to the master trust if such compensation is not subtracted from the gross income of any master trust investment account in determining the net investment gain (or loss) from the investment account (see ¶B6, below). Amounts of compensation subtracted from investment account gross income in determining the net investment gain (or loss) from the investment account must be reported on separate schedules (see ¶C3, below).

2. Enter the current value of the plan's interest in the master trust at the beginning of the plan year and at the end of the plan year on line 13(c)(x). The value of the plan's interest in a master trust is the sum of the net values of the plan's interests in master trust investment accounts. The net values of such interests are obtained by multiplying the plan's percentage interest in each master trust investment account by the net assets of the investment account reported in the applicable column of the "net assets" line item of the statement of assets and liabilities filed for the investment account (see ¶C4, below). If some plan funds are held in a master trust and other plan funds are held in other funding media, complete all applicable sub-items of item 13 with regard to assets held in other funding media.

3. In sub-items 14 (d), (e), (f), (i), (j), (k), and (n)(i), do not report earnings, expenses, gains or losses, and unrealized appreciation or depreciation which were included in computing the net investment gain (or loss) from any master trust investment account. (See ¶B6, below, for explanation of net investment gain (or loss) from master trust investment account). If some plan funds are held in a master trust and other plan funds are held in other funding media, complete all applicable sub-items of item 14 to report plan earnings, expenses, gains or losses, and unrealized appreciation or depreciation relating to the other funding media.

4. In sub-item 14(j), report all administrative expenses (by specified category) paid by or charged to the plan which were not subtracted from the gross income of a master trust investment account in determining the net investment gain (or loss) from the investment account (see ¶B6, below).

5. Enter in sub-item 14(n)(ii) the net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts. The net investment gain (or loss) allocated to the plan for the plan year from all master trust investment accounts is obtained by subtracting any net investment losses allocated to the plan from master trust investment accounts from the sum of net investment gains allocated to the plan from master trust investment accounts. The net investment gain (or loss) allocated from each master trust investment account is reported on a separate schedule (see ¶B6, below).

6. State the name of the master trust used in the master trust's filing with the Department of Labor (see Part C, below). Attach a list of each master trust investment account in which the plan has an interest. In tabular format show the plan's fractional interest, in the form of a percentage, in each investment account at the beginning of the plan year and at the end of the plan year; the total amount of transfers to the investment account, and the total amount of transfers from the investment account, by the plan during the plan year; and the net investment gain (or loss) allocated to the plan for the plan year from the investment account. The net investment gain (or loss) allocated to the plan for the plan year from the investment account is equal to:

—the current value of the plan's interest in the investment account at the end of the plan year, *minus*

—the current value of the plan's interest in the investment account at the beginning of the plan year, *plus*

—any amounts transferred out of the investment account by the plan during the plan year, *minus*

—any amounts transferred into the investment account by the plan during the plan year.

7. Do not complete sub-item 22(a) if all plan funds are held in master trusts. If some plan funds are held in master trusts and other plan funds are held in other funding media, complete sub-item 22(a) to report information relating to the other funding media. In such cases, complete item 22(a)(v) only with respect to transactions involving assets of the plan which are not held in a master trust. In determining the 3 percent figure, do not include the value of plan assets held in the master trust in the current value of the plan's assets at the beginning of the plan year. Do not report acquisitions or dispositions of interests in a master trust in sub-item 22(a)(v). (See ¶C6, below, with respect to information that must be included concerning each master trust investment account.)

#### C. Reporting Information Relating to Master Trusts and Master Trust Investment Accounts

For each plan participating in the master trust, the bank, trust company or similar institution maintaining the master trust shall furnish to the plan administrator and file directly with the Department of Labor the information described below. Each of the required statements and schedules should indicate the name of the plan, the sponsor's employer identification number, and the three

digit plan number. The required information shall be filed with the Department of Labor by mailing it to: Master Trust, Office of Reports and Disclosure, Pension and Welfare Benefit Programs, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216. The required information must be filed with the Department no later than the earliest date on which Form 5500 must be filed for any plan participating in the master trust.

1. The name and fiscal year of the master trust and the name and address of the master trustee.

2. A list of all plans participating in the master trust, showing each plan's name and its percentage interest in each master trust investment account as of the beginning and end of the most recent fiscal year of the investment account.

3. A statement, in the same format as item 12 of Form 5500, for each master trust investment account, showing amounts of compensation paid during the most recent fiscal year of the investment account to persons providing services with respect to the investment account and subtracted from the gross income of the investment account in determining the net increase (decrease) in net assets of the investment account (see ¶C5, below).

4. A statement in the same format as item 13 of Form 5500, for each master trust investment account, showing the assets and liabilities of the investment account at the beginning and end of the most recent fiscal year of the investment account.

5. A statement in the same format as item 14 of Form 5500 for each master trust investment account, showing the income, expenses, changes in net assets, and net increase (decrease) in net assets of each such investment account during the most recent fiscal year of the investment account. In place of sub-items (a), (b), and (c) of item 14, show all transfers of assets into the investment account by participating plans. In place of sub-item (h) of item 14, show all transfers of assets out of the investment account by participating plans. Do not complete sub-item 14(n)(ii).

6. Schedules in the format set forth in the instructions to item 22 of Form 5500, of the following items with respect to each master trust investment account for the most recent fiscal year of the investment account: assets held for investment, nonexempt party in interest transactions, defaulted or uncollectable loans and leases, and 3 percent transactions involving assets in the investment account. The 3 percent figure shall be determined by comparing the current value of the transaction at transaction date with the current value of the investment account assets at the beginning of the fiscal year of the investment account.

#### III. Revisions to Instructions for Form 5500-C

1. [Insert at the end of the first sentence under "A. What to File" under "General Instructions":]

\* \* \* and for each plan, regardless of the number of participants, which participants in a master trust. See "A. What to File" under

"General Instructions" in the instructions for Form 5500, for detailed filing information for plans participating in master trusts. (An accountant's examination and report is not required for a plan which meets the requirements of 29 CFR § 2520.104-46 and which participates in a master trust.)

2. [Insert at end of second paragraph under "A. What to File" under "General Instructions":]

*Exception:* Plan participating in master trusts must file Form 5500, as noted in the preceding paragraph, rather than Form 5500-C.

#### IV. Revisions to Instructions for Form 5500-K

[Insert at end of first paragraph under "A. What to File" under "General Instructions":]

*Exception:* A plan that participates in a master trust must file Form 5500, regardless of the number of participants in the plan; Form 5500-K should not be filed for such plan. See "A. What to File" under "General Instructions" in the instructions for Form 5500, for detailed filing information for plans participating in master trusts. (An accountant's examination and report is not required for a plan which meets the requirements of 29 CFR 2520.104-46 and which participates in a master trust.)

Signed at Washington, D.C. this 23rd day of December, 1980.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc. 80-40554 Filed 12-24-80; 9:02 am]

BILLING CODE 4510-29-M

#### DEPARTMENT OF THE INTERIOR

##### Office of Surface Mining Reclamation and Enforcement

##### 30 CFR Part 935

##### Surface Coal Mining and Reclamation and Enforcement Under Federal Program for Ohio

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Department of the Interior.

**ACTION:** Notice of intent to prepare Federal Program, Suspension of Ohio schedule for State program resubmission, and Notice of public comment period.

**SUMMARY:** The Office of Surface Mining Reclamation and Enforcement (OSM) was advised by the State of Ohio of the existence of injunctions enjoining the State from resubmitting its State regulatory program to the Department of the Interior for a period of one year. Accordingly, the Secretary of the Interior is temporarily suspending the

Ohio schedule for resubmission and is initiating action to prepare a Federal program for the regulation of surface coal exploration, mining and reclamation on non-Federal and non-Indian lands in Ohio. The Federal program will not be implemented before December 1, 1981, unless the injunctions cease to remain in effect or are no longer determined effective under Section 503(d) of the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201, *et seq.* In any event, Ohio will be given the opportunity to resubmit a State program before a Federal program is implemented. If Ohio does resubmit, the program will be reviewed in accordance with the Secretary's regulations. A Federal program will be implemented only if the State fails to resubmit, or if the resubmitted program is disapproved. Public comment is also being sought on the preparation of a Federal program for Ohio and on Ohio's actions under the interim program.

**DATE:** Public comments must be received by OSM by 5:00 p.m., January 29, 1981.

**ADDRESS:** Information and comments should be sent to: Office of Surface Mining, Room 153, South Interior Building, 1951 Constitution Avenue, N.W., Washington, D.C. 20240.

**FOR FURTHER INFORMATION CONTACT:** Carl C. Close, Assistant Director, OSM, State and Federal Programs, 1951 Constitution Avenue, N.W., U.S. Department of the Interior, Washington, D.C. 20240, (202) 343-4225.

**SUPPLEMENTARY INFORMATION:** Under the Surface Mining Control and Reclamation Act of 1977 (the "Act"), a State which seeks to regulate surface coal mining and reclamation operations within its borders may apply to the Secretary of the Interior for approval of a State program. In order for a program to be approved, a State must develop a program that contains laws and regulations which are consistent with the Act and the regulations of the Secretary of the Interior. The Act says that once a State makes a program submission, the Secretary of the Interior has six months in which to consider the State's application. At the end of that six-month period the Secretary has to decide whether to approve, conditionally approve, approve in part and disapprove in part, or completely disapprove the State program submission. If the Secretary partially or completely disapproves the State program submission, the State, under normal conditions, has sixty days to revise and resubmit its program. The statute then gives the Secretary sixty days to consider the resubmitted program and to make a final decision. If,

after the end of this ten month period, the Secretary is unable to approve or conditionally approve the State Program, he is required to promulgate a Federal program.

As announced in the October 1, 1980, Federal Register notice, 45 FR 64962, the Secretary of the Interior reviewed the State of Ohio's initial program submission and disapproved that program. Ohio had until December 1, 1980, to resubmit a revised program.

In a letter dated November 26, Charles E. Call, Chief of the Division of Reclamation, Ohio Department of Natural Resources, informed the Office of Surface Mining that the Ohio Department of Natural Resources was enjoined on November 24, 1980, by the Common Pleas Court of Franklin County, Ohio, and on November 25, 1980, by the Common Pleas Court of Belmont County, Ohio, from resubmitting to the Office of Surface Mining a State program for the regulation of surface coal mining and reclamation operations. Ohio did not resubmit a program by the December 1, 1980 deadline.

Section 503(d) of the Surface Mining Control and Reclamation Act provides:

... [T]he inability of State to take any action the purpose of which is to prepare, submit or enforce a State program, or any portion thereof, because the action is enjoined by the issuance of an injunction by any court of competent jurisdiction shall not result \* \* \* in the imposition of a Federal Program. Regulations of the surface coal mining and reclamation operations covered or to be covered by the State program subject to an injunction shall be conducted by the State pursuant to Section 502 of this Act, until such time as the injunction terminates or for one year, whichever is shorter, at which time the requirements of Section 503 and 504 shall again be fully applicable.

The Secretary has completed all the actions in the review of the Ohio State program that can be done without further participation by the State of Ohio. Because the Secretary of the Interior has received notification that the State of Ohio is enjoined from taking further formal action, the Secretary is temporarily suspending the State program approval process for Ohio as of November 24, 1980 (the date of the first injunction), which was the 54th day of the 60 days that Ohio had for resubmission.

The effect of this action is that federal enforcement of the interim program requirements, e.g., two federal inspections per year of each mine or regulated facility, will continue until the injunctions are lifted, expire, or are determined not to invoke the operation of Section 503(d). Since the Act allows

the state access to its reserved portion of the Abandoned Mine Land Fund only after it has achieved regulatory primacy, Ohio's access to the Fund must be delayed. The amount currently reserved for Ohio is \$15,652,069.98.

The Secretary has considered various options in rescheduling Ohio's state program approval process. First, because the 60 day resubmission period expired on December 1, 1980, and because the injunctions give Ohio more time than the 60 days normally allowed, Ohio could be required to resubmit its state program on the day the injunctions are lifted. However, an immediate deadline for resubmission after the injunctions are lifted appears abrupt and would ignore the fact period when the first injunction was issued. Second, Ohio could be given 60 days after the lifting of the injunctions to resubmit its state program. However, 60 additional days appears excessive, because (1) Ohio has already had 54 days to develop its resubmission, (2) it would be unfair to other states which only had 60 days to resubmit and (3) the operation of the injunctions has already given Ohio considerably more time than the normal 60 days to develop an acceptable program. Third, Ohio could be given the amount of time it had remaining to resubmit its program, six days. This would take into account the time Ohio already had for resubmission, would be fair to other states involved in the process, and would be a reasonable deadline for the state to meet.

The Secretary has chosen the third option. Beginning on November 24, 1981, or, if the injunctions are lifted or determined to be ineffective before that date, then on the date when the injunctions are lifted or deemed ineffective, Ohio will have six days to resubmit an acceptable program. In any event, the deadline for Ohio's resubmission will not be later than November 30, 1981. The Secretary will make every effort to notify Ohio by letter prior to that date for resubmission in order to assist Ohio in meeting the deadline.

The legislative history of Section 503(d) indicates that its purpose is to avoid penalizing states which make good faith efforts to comply with the Act but are prevented by court action from achieving full compliance. Where, however, attendant circumstances lead the Secretary to determine that an injunction does not invoke the operation of Section 503(d), or that the State has failed to make a good faith effort to comply with the Act, the Secretary will not suspend the statutory timetable for state programs beyond the date of such

determination. The Secretary has not yet determined, at this time, whether Section 503(d) is applicable in Ohio. The Secretary is reviewing the circumstances under which the injunctions were entered and the jurisdictional competence of the state courts to hear the matter. The Secretary believes that the delay and relief available under Section 503(d) is limited to those States which are seeking in good faith to prepare and adopt a permanent surface coal mining and reclamation program. Section 503 is not meant to be used as an artifice or device to avoid the requirements of the Surface Mining Act.

Section 503(d) does not provide general authority to extend the statutory timetable established under that Act. Accordingly, the Secretary requests public comment on the issues bearing upon the applicability of Section 503(d) in Ohio. If, after review, the Secretary determines that Section 503(d) is inapplicable to Ohio under the circumstances, Ohio will have six days from the date of such determination within which to resubmit an acceptable state program. If it fails to do so, the Secretary will implement a Federal program for Ohio in accordance with Section 504 of the Act. Until a determination is made, the Secretary will presume that Section 503(d) applies, and thus will suspend the running of the resubmission period provided by Section 503(c). However, the Secretary expressly reserves that right to take appropriate action if he concludes that the circumstances surrounding the entry of the injunctions warrant doing so.

Section 503(d) also requires a State which is subject to an injunction prohibiting resubmission of a state program to regulate surface coal mining and reclamation operations pursuant to Section 502 of the Act (the interim program) until such time as the injunction terminates or until one year after the injunction is entered, whichever comes first. The Secretary construes Section 503(d) of the Act to authorize implementation of a Federal program if a State fails to implement Section 502 during the term of an injunction. Thus, while the Secretary fully endorses the intent of Congress to have the State assume regulatory primacy under the Act, he also is required to implement a Federal program in cases where that becomes necessary because of a State's failure to carry out its responsibilities under Section 502.

Consequently, the Secretary is also examining the compliance by the State of Ohio with Section 502 of the Surface

Mining Control and Reclamation Act and the interim program regulations issued by the Department of the Interior related to Section 502 (42 FR 62639, December 13, 1977). Within the next three months and after receipt or public comments and completion of this preliminary analysis, the Secretary will decide what further steps are necessary and should be taken. At that time, he may conclude that there is no basis for further examination because the State of Ohio is adequately enforcing the requirements of Section 502 of the Act; alternatively, he may decide there is the need for a public hearing or additional public comment. If the Secretary ultimately determines there is a lack of compliance, he will recommence the State program review process after appropriate notice to Ohio.

One additional effect of the injunctions, if they run a full year, is to delay the permanent program in Ohio for a period of approximately eight to twelve months beyond that applicable to most other States in the country. In addition, if Ohio is ultimately unsuccessful in obtaining approval of its program, the Secretary will then have to adopt a Federal program for that State. This could cause an additional delay of six months or more if the process for adoption of the Federal program were delayed until after the injunctions are lifted.

To reduce the potential delay in the application of the permanent surface coal mining reclamation program in Ohio if a Federal program becomes necessary, the Secretary has decided to begin preparation of a Federal program for Ohio within the next three months. This action is considered necessary both to reduce the time during which the environmental objectives established by Congress are not fully achieved because a permanent program has not been implemented and to reduce the potential for competitive economic disadvantages among states because implementation of permanent programs in the different states are unlikely to be concurrent. The Secretary will not actually implement this program until Ohio either fails to meet the six day deadline to resubmit its program or resubmits but fails to obtain approval of its program.

In the meantime, the Secretary has instructed the Director of the Office of Surface Mining to make every effort during the period of the injunctions to accomplish the following: (1) work with the State toward correcting the remaining deficiencies in its proposed program to the extent the State can participate in such an effort, given the existence of the injunctions; (2) ensure

that the Federal enforcement program under Section 502 is diligently pursued in order to obtain compliance with the provisions of the Act and the interim program regulations; and (3) determine whether Ohio is adequately carrying out its responsibilities under Section 502 of the Act.

A major purpose of this notice is to seek public comment on preparing a Federal program in Ohio and to receive specific suggestions for how the Secretary of the Interior ought to adopt or modify the permanent program regulations to meet the local conditions in the State of Ohio. Section 504(a) of the Act and 30 CFR 736.22(a)(1) require that each Federal program consider the nature of the topography soils, climate and biological, chemical, geological, hydrological, agronomic and other physical conditions of the State involved. For important information, the reader is referred to "General Background on the Permanent Program" and "Criteria for Promulgating Federal programs" previously published in the Federal Register on May 16, 1980 (45 FR 32328). That notice explains how the Secretary will consider unique conditions in a State, how existing State laws will be considered, and what standards will be used in adopting regulations. The reader should also refer to the Secretary's decision concerning the Ohio program published in the Federal Register on October 1, 1980. (45 FR 64962 *et seq.*)

This action of proposing the preparation of a contingent Federal program for Ohio is not significant under the criteria of Executive Order 12044 and 43 CFR Part 14 and does not require preparation of regulatory analysis, nor is this action a major Federal action significantly affecting the environment under the National Environmental Policy Act.

**PUBLIC COMMENT PERIOD:** The comment period announced in this notice will extend until January 30, 1981. All written comments must be received at the address given above by 5:00 p.m. on that date.

Comments on the preparation of a Federal program received after that hour will not be considered in drafting the proposed Federal program; they will be considered to the extent applicable in subsequent actions under that program.

Dated: December 18, 1980.

Joan Davenport,

Assistant Secretary, Energy and Minerals.

**ENVIRONMENTAL PROTECTION  
AGENCY****40 CFR Part 162**

[OPP-250023A; PH-FRL 1715-2]

**Exemption of Certain Biological  
Control Agents From Regulation;  
Notification of Secretary of Agriculture**AGENCY: Environmental Protection  
Agency (EPA).

ACTION: Proposed Rule Related Notice.

**SUMMARY:** Notice is given that the Administrator of EPA has forwarded to the Secretary of the U.S. Department of Agriculture a proposed regulation exempting certain biological control agents (generally, organisms of an order higher than microorganisms) from further regulation under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, because that are adequately regulated by other Federal agencies.

**FOR FURTHER INFORMATION CONTACT:** Ronald E. Ney, Jr., Hazard Evaluation Division (TS-769), Office of Pesticide Programs, 401 M St. SW., Washington, D.C. 20460, (703 577-7347).

**SUPPLEMENTARY INFORMATION:** Pursuant to sec. 25(a)(2)(A) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA) (Pub. L. 92-516, 86 Stat. 973; 7 U.S.C. 136 et seq.), the Administrator of EPA sent the Secretary of Agriculture a copy of a proposed rule exempting certain biological control agents (i.e., organisms of a class higher than microorganisms) from further regulation under FIFRA. This rule is being proposed, under FIFRA sec. 25(b)(1), which authorizes EPA to exempt from regulation under FIFRA any pesticides which are adequately regulated by other Federal agencies.

This proposed rule was submitted to the Secretary of Agriculture on November 26, 1980. If the Secretary comments in writing within 30 days after receiving the proposed regulation, the Administrator shall publish in the **Federal Register** (along with the proposed regulation) the comments of the Secretary and the response of the Administrator. If the Secretary does not comment in writing within 30 days after receiving the proposed regulation, the Administrator may sign the regulation for publication in the **Federal Register** anytime after such 30 day period.

Pursuant to FIFRA sec. 25(a)(3), a copy of the proposed regulation was forwarded on December 18, 1980, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition and Forestry of the Senate.

This proposed regulation was also submitted to the FIFRA Scientific Advisory Panel on November 26, 1980, for its review, as required by sec. 25(d) of FIFRA. (Sec. 25, Pub.L. 92-515, 86 Stat. 973; Pub.L. 94-140, 89 Stat. 753; 7 U.S.C. 136 et seq.)

Dated: December 19, 1980

## DEPARTMENT OF AGRICULTURE

### Agricultural Stabilization and Conservation Service

#### Feed Grain Donations for the Oglala Sioux Indian Tribe in South Dakota

Pursuant to the authority set forth in Section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427) and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Oglala Sioux Indian Tribe on the Pine Ridge Indian Reservation in South Dakota has been materially increased and become acute because of severe and prolonged drought substantially reducing range forage and hay production, thereby creating a serious shortage of feed and causing increased economic distress. This reservation is designated for Indian use and is utilized by members of the Oglala Sioux Indian Tribe for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation for livestock feed for such needy members of the tribe will not displace or interfere with normal marketing of agricultural commodities.

3. Based on the above determinations, I hereby declare the reservation and grazing lands of the tribe to be an acute distress area and authorize the donation of feed grain owned by the Commodity Credit Corporation to livestock owners who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the tribe utilizing such lands. These donations by the Commodity Credit Corporation may commence upon signature of this notice and shall be made available through May 10, 1981, or to such other time as may be stated in a

notice issued by the Department of Agriculture.

Signed at Washington, D.C. on December 18, 1980.

John E. Gibbs,

*Acting Administrator, Agricultural Stabilization and Conservation Service.*

BILLING CODE 3410-05-M

#### Commodity Credit Corporation Determinations Regarding the 1981-Crop Loan Rate for Upland Cotton and for Extra-Long Staple (ELS) Cotton, the Payment Rate for ELS Cotton, and the Loan Program for Seed Cotton

**AGENCY:** Commodity Credit Corporation, USDA.

**ACTION:** Notice of determination of the 1981-crop loan rates for upland and ELS cotton, the payment rate for ELS cotton, and the loan program for seed cotton.

**SUMMARY:** The purpose of this notice is to set forth the basis for the determinations announced by the Secretary of Agriculture on October 31, 1980 with respect to (1) the 1981 loan rate for Strict Low Middling (SLM) one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States, (2) the 1981 loan rate and a payment rate with respect to the 1981 crop of ELS cotton, and (3) the 1981 loan program for seed cotton.

These determinations were required to be made by the Secretary in accordance with provisions of Sections 101(f) and 103(f) of the Agricultural Act of 1949, as amended, and Section 5(a) of the Commodity Credit Corporation Charter Act, as amended.

**EFFECTIVE DATE:** December 29, 1980.

**ADDRESS:** Director, Production Adjustment Division, ASCS-USDA, 3630 South Building, P.O. Box 2415, Washington, D.C. 20013

**FOR FURTHER INFORMATION CONTACT:** Charles V. Cunningham, Chief Program Analysis Branch, Production Adjustment Division, ASCS, P.O. Box 2415, Washington, D.C. 20013, (202) 447-7873. The Final Impact Statement describing the options considered in developing this Notice of Determinations and the impact of implementing each option is available from the above named individual.

**SUPPLEMENTARY INFORMATION:** This final action has been reviewed under USDA procedures established in

Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified "not significant."

The title and number of the federal assistance program that this notice applies to are: Title-Commodity Loans and Purchases; Number-10.051; as found in the Catalog of Federal Domestic Assistance.

This action will not have significant impact specifically on area and community development. Therefore, review as established by OMB Circular A-95, was not used to assure that units of local government are informed of this action.

A notice that determinations were to be made with respect to these provisions of the Agricultural Act of 1949, as amended, and the Commodity Credit Corporation Charter Act, as amended, was published in the Federal Register on August 29, 1980 (45 FR 57751) in accordance with 5 U.S.C. 553 and Executive Order 12044. Interested persons were given until October 28, 1980, to submit recommendations, views, and comments.

A total of nine responses were received concerning the loan rate for upland cotton or the seed cotton loan program. Five persons from Texas, two from Arkansas, and one each from Washington, D.C. and California responded.

Of the eight responses concerning the loan rate for upland cotton, two recommended a loan rate of 52.46 cents, and four others recommended levels which were outside legislative authority. Four persons stated that the loan level likely to be in effect would be insufficient when compared to the cost of producing upland cotton.

One comment was received concerning the loan rate and payment rate for ELS cotton recommending a loan rate of 99.0 cents and a payment rate of zero.

Five persons recommended that a seed cotton loan program be instituted for the 1981 crop. No respondent opposed the program.

All comments received were duly considered were within statutory authority.

It was essential that these determinations be announced as soon as possible so that farmers could make their farming and marketing plans. Accordingly, these determinations with respect to the 1981 crops of upland, ELS, and seed cotton were announced by the Secretary on October 31, 1980. The basis for these determinations is set forth herein.

### Final Determinations

1. *Upland Cotton Loan Rate.* Based on the formula prescribed in Section 103(f) of the Agricultural Act of 1949, as amended (hereinafter referred to as the "1949 Act"), the loan rate for Strict Low Middling (SLM), one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States has been determined to be 52.46 cents per pound. This figure is calculated using the domestic spot market prices as required by Section 103(f) of the 1949 Act.

The loan rate for upland cotton must be the smaller of: (a) 85 percent of the average price (weighted by market and month) of SLM 1 1/16-inch upland cotton (micronaire 3.5 through 4.9) quoted in the designated United States spot markets during the five year period ending July 31, 1980, excluding the year with the highest and the year with the lowest average price, or (2) 90 percent of the average, for the fifteen-week period beginning July 1, 1980, of the five lowest priced growths of the growths quoted for Strict Middling (SM) 1 1/16-inch cotton C.I.F. Northern Europe (adjusted downward by the average difference during the period April 15, 1980, through October 15, 1980, between such average Northern Europe price quotation for such quality of cotton and the market quotations in the designated United States spot markets for SLM 1 1/16-inch cotton (micronaire 3.5 through 4.9)).

In no event, however, shall such loan level be less than 48 cents per pound. Further, if the level which is determined based upon the calculation of the average Northern Europe quotation results in a loan level that is less than the level which is determined based on the calculation of the average United States spot market price, the Secretary may increase the loan level to such level as the Secretary deems appropriate, but not in excess of the level which is determined based upon the calculation of the average United States spot market price.

The spot market calculation is as follows: (1) Weighted average spot market prices for SLM 1-1/16 inch upland cotton, micronaire 3.5 through 4.9:

August 1975 through July 1976 - 55.29 cents.  
August 1976 through July 1977 - 71.59 cents.  
August 1977 through July 1978 - 51.15 cents.  
August 1978 through July 1979 - 61.01 cents.  
August 1979 through July 1980 - 68.87 cents.

(2) Average of the five years, excluding the highest and lowest years:  
 $55.29 + 61.01 + 68.87 / 3 = 61.72$  cents.

(3) Loan rate based on U.S. spot market calculation:  $61.72 \times 0.85 = 52.46$  cents.

The Northern Europe calculation is as follows:

(1) Average Northern Europe quotation for SM 1-1/16 inch cotton July 1 through Oct. 14, 1980.....	95.35
(2) Average difference between average Northern Europe quotation and the U.S. spot market average for SLM 1-1/16 inch, mic. 3.5 through 4.9 Apr. 15 through Oct. 15, 1980.....	-11.18
(3) Adjusted Northern Europe average.....	84.17
(4) 90 percent of adjusted average.....	75.75

Accordingly, the 1981 upland cotton loan rate is 52.46 cents per pound.

2. The loan level for 1981-crop ELS cotton is 99.0 cents per pound, and the payment rate is zero. Section 101(f) of the 1949 Act requires that price support shall be made available to cooperators for the 1968 and each subsequent crop of ELS cotton, if producers have not disapproved marketing quotas therefor, through loans at a level which is not less than 85 percent or more than 135 percent in excess of the loan level established for Strict Low Middling 1-1/16 inch upland cotton of such crop at average location in the United States (except that such loan level for ELS cotton shall in no event be less than 35 cents per pound). Section 101(f) also provides for price support payments at a rate which, together with the loan level established for such crop, shall be not less than 55 percent or more than 90 percent of the parity price for ELS cotton as of the month in which the payment rate so determined is announced. Section 401 of the 1949 Act requires that, in determining the level of support in excess of the minimum level prescribed for ELS cotton, consideration shall be given to the supply of the commodity in relation to the demand therefor, the price levels at which other commodities are being supported, the availability of funds, the perishability of the commodity, the importance of the commodity to agriculture and the national economy, the ability to dispose of stocks acquired through a price support operation, the need for offsetting temporary losses of export markets, and the ability and willingness of producers to keep supplies in line with demand.

The loan rate of 52.46 cents per pound for 1981-crop upland cotton is basis 3.5 through 4.9 micronaire. This rate must be converted to average micronaire by deducting 0.85 cents—the estimated premium included in the upland rate for 3.5 through 4.9 micronaire—before it can serve as the basis for the ELS loan rate. The possible range of the loan rate for ELS cotton is 95.48 to 121.28 cents (85 percent to 135 percent in excess of the adjusted rate for upland cotton). The parity price for ELS cotton applicable for October 1980 is \$1.80 per pound. The

minimum total support is 99.0 cents per pound (55 percent of parity), and the maximum total support is \$1.62 per pound (90 percent of parity).

Supplies of ELS cotton are projected to continue tight during the remainder of the 1980/81 marketing year. Stocks carried into the 1981/82 marketing year, which begins on August 1, 1981, are projected at 31,000 bales. The market price for ELS cotton is likely to be sufficient incentive for producers to increase their plantings of ELS cotton in 1981/82. Therefore, there is no need to provide a total support above the minimum level of 55 percent of parity, and there is no need to provide a direct support payment for the 1981 crop of ELS cotton.

It is determined that the loan rate for 1981-crop ELS cotton is 99.0 cents per pound. Since 99.0 cents per pound is equal to the statutory minimum of 55 percent of the October 1980 parity price for ELS cotton, no support payments are required to be made.

The loan rate of 99.0 cents per pound for 1981-crop ELS cotton would encourage the production of ELS cotton for the marketplace and minimize government expenditures for the ELS program. This level is expected to provide adequate returns to ELS producers and would not constrict export sales or domestic mill use.

3. The seed cotton loan program has been reviewed, and it has been determined that seed cotton from the 1981 crops of upland and ELS cotton will again be eligible for loans. Recourse loans are offered to producers of seed cotton pursuant to the Commodity Credit Corporation Charter Act as a means of affording interim financing to producers until their cotton is ginned in the form in which it can be marketed and eligible for regular nonrecourse loans under the upland and ELS cotton programs under the provisions of the 1949 Act, as amended.

Detailed regulations concerning the seed cotton loan program will be published later.

Signed at Washington, D.C. on December 22, 1980.

Jim Williams,

Acting Secretary of Agriculture.

## Forest Service

### National Forest System Advisory Committee; Meeting

The National Forest System Advisory Committee will meet in Washington, D.C., January 15-16, 1981. The meeting

will be held in the South Agriculture Building, 12th Street and Independence Avenue, SW., Room 3840, beginning at 8 a.m.

This Committee, comprised of 12 members from a broad spectrum of geographic and interest areas, advises the Secretary of Agriculture and the Forest Service on the planning and management of the National Forests. The purpose of the meeting is to bring to completion subcommittee positions or recommendations on *energy* (biomass, transmission corridors, small hydroelectric facilities, and energy minerals), *Resources Planning Act*, *human resources programs* (and their use in achieving National Forest outputs), and *subjects recommended for further study* and evaluation. This will include non-Forest uses on Forest lands and information on land grant college assistance to States and Federal agencies as in the case of the Range Improvement Task Force at New Mexico State University.

Phillip L. Thornton, Acting Deputy Assistant Secretary for Natural Resources and Environment, and Kay Cenicerros, Advisory Committee chairperson, will cochair the meeting.

The meeting will be open to the public. Persons who wish to attend should notify Floyd J. Marita, Executive Secretary, USDA-Forest Service, P.O. Box 2417, Room 3021-S, Washington, D.C. 20013, telephone (202) 447-6341. Written statements may be filed with the Committee before or after the meeting.

Jerome A. Miles,  
Deputy Chief.

December 22, 1980.

BILLING CODE 3410-11-M

## CIVIL AERONAUTICS BOARD

### Alaska International Air, Inc.; Service Mail Rates Investigation

AGENCY: Civil Aeronautics Board.

**ACTION:** Summary of Order 80-12-107 modifying the temporary subsidy mail rate for Alaska International Air, Inc., effective November 4, 1980, retroactively.

**SUMMARY:** The Board adopted an order, modifying Alaska International Air's temporary mail rates as prescribed by Order 80-10-1, insofar as they relate to points in the Aleutian Islands. Instead, the final mail rates established by Order 80-5-33 for Reeve Aleutian Airways for mail service to points in the Aleutians will apply to AIA.

**DATE:** Since these rates have already gone through full notice and comment procedures when they were originally established for Reeve, the institution of show-cause procedures on these rates is unnecessary and they are effective on and after November 4, 1980, the date on which Alaska International Air filed its rate petition.

**FOR FURTHER INFORMATION CONTACT:** Peter Bonanno, Jr., Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Ave., N.W., Washington, D.C. 20428.

The complete text of Order 80-12-107 is available from our Distribution Section, Room 516, 1825 Connecticut Ave., N.W., Washington, D.C. Persons outside the metropolitan area may send a postcard request for Order 80-12-107 to the Distribution Section, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: December 19, 1980.

Phyllis T. Kaylor,  
Secretary.

BILLING CODE 6320-01-M

[Order 80-12-94; Docket 38504]

### Mississippi Valley Airlines, Inc.; Intent To Terminate Essential Air Service at Ottumwa, Iowa

Adopted by the Civil Aeronautics Board at its offices in Washington, D.C. on the 18th day of December, 1980. Application of Mississippi Valley Airlines, Inc. for compensation for losses in providing essential air transportation at Ottumwa, Iowa, under section 419(a)(3) of the Federal Aviation Act of 1958, as amended; Docket 38504.

On July 21, 1980, Mississippi Valley Airlines, Inc. (MVA) filed a notice of intent to terminate essential air service at Ottumwa, Iowa, effective August 20, 1980. By Order 80-8-108, August 20, 1980, we prohibited the carrier from suspending or reducing its service at Ottumwa for a 30-day period, through September 19, 1980.<sup>1</sup>

On October 22, 1980, MVA filed an application for compensation for losses at Ottumwa for the period August 20 through September 19, 1980, inclusive. The carrier provided a detailed explanation of its estimated traffic, revenue, expenses, and operating statistics and sought interim compensation of \$39,989.07, excluding profit, for each 30-day period of forced service. On November 17, 1980, the carrier reduced its compensation

<sup>1</sup> We have since extended the carrier's obligation.

request to \$32,188.56 exclusive of profit, to reflect actual rather than estimated August costs, and a change from flight hours to seat miles as a basis for allocating most indirect expenses.

We have reviewed MVA's application and find that the information contained therein reasonably supports the requested compensation on an interim basis with but one exception. We are reallocating certain indirect expenses using revenue passenger miles rather than seat miles. This reduces compensation to \$30,305, exclusive of profit, for each 30-day period of compulsory service. A profit element will be considered when we propose a final settlement of the carrier's claim.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, particularly sections 102, 204, 419, and 1002(d) thereof, and the regulations promulgated in 14 CFR 302 and 304:

1. We set the interim level of compensation for losses sustained by Mississippi Valley Airlines, Inc. by virtue of its provision of essential air transportation at Ottumwa, Iowa at \$120,737 for each scheduled flight completed beginning August 20, 1980, subject to a maximum compensation of \$30,305 per 30-day period;

2. This proceeding shall remain open pending entry of an order fixing the final rate of compensation, and the amount of such rate of compensation may be the same as, lower than, or higher than the interim rate of compensation set here; and

3. We shall serve the order upon all parties to this proceeding.

We shall publish this order in the Federal Register.

By the Civil Aeronautics Board.

Phyllis T. Kaylor,  
Secretary.

## DEPARTMENT OF COMMERCE

### Senior Executive Service; Bonuses

Below is a listing of Senior Executive Service employees who are scheduled to receive bonuses:

- Allan H. Young, Deputy Director, Bureau of Economic Analysis, \$5,512—to be paid 1/12/81
- Robert P. Parker, Chief, National Income and Wealth Division, Bureau of Economic Analysis, \$5,512—to be paid 1/12/81
- Carol S. Carson, Chief, Current Business Analysis Division, Bureau of Economic Analysis, \$5,512—to be paid 1/12/81
- Beatrice N. Vaccara, Director, Bureau of Industrial Economics, \$5,512—to be paid 1/12/81

Katherine K. Wallman, Deputy Director for Social Statistics, Office of Federal Statistical Policy and Standards, \$5,512—to be paid 1/12/81

Jo Ann Sondey-Hersh,

Executive Secretary, Economic and Statistical Affairs Performance Appraisal System.

BILLING CODE 3510-85-M

## Bureau of the Census

### Neighborhood Statistics Program; Application Deadline Extension

The Director of the Bureau of the Census is issuing below a statement that extends the application deadline of the 1980 census Neighborhood Statistics Program from December 31, 1980, to June 30, 1981. The final criteria for program participation and an explanation of the application procedure were announced in the November 21, 1979, issue of the Federal Register (Vol. 44, Number 226, pages 66862 and 66863). Expressions of interest in this program or requests for further information should be sent to the Director, Bureau of the Census, Washington, D.C. 20233.

### 1980 Census Neighborhood Statistics Program

Because of the great interest that has been expressed in the Neighborhood Statistics Program, the Bureau of the Census is extending the application deadline for program participation to June 30, 1981. The new deadline is the date by which all documentation described below must be submitted to the Bureau.

Any locality which is interested in the Neighborhood Statistics Program but has not yet notified the Census Bureau is urged to do so as soon as possible. Participation in the program should be initiated by a written request from either the chief elected official of the local government or an appropriate officer of a central neighborhood council or coalition that represents all neighborhoods in the locality. The request should include a description of how the neighborhoods meet the final criteria and a map showing the boundaries of all the neighborhoods. The letter requesting participation also should designate a person who will coordinate program activities in the locality and serve as contact person for the Bureau of the Census.

Dated: December 23, 1980.

Vincent P. Barabba,  
Director, Bureau of the Census.

## Economic Development Administration

### Senior Executive Service Performance Awards

As authorized by 5 USA 5384, notice is hereby given that the following senior executives in the Department of Commerce, Economic Development Administration will receive SES performance awards in the amount of \$5,500 on January 25, 1981:

#### SES Members:

- Harold W. Williams, Deputy Assistant Secretary  
George T. Karras, Deputy Assistant Secretary for Economic Development Operations  
John E. Corrigan, Director, Philadelphia Regional Office

Dated: December 22, 1980.

Robert T. Hall,  
Assistant Secretary for Economic Development.

BILLING CODE 3510-24-M

## International Trade Administration

### Footwear From Republic of Korea; Preliminary Results of Administrative Review of Countervailing Duty Order and of Tentative Determination To Revoke

**AGENCY:** International Trade Administration, Department of Commerce.

**ACTION:** Notice of Preliminary Results of Administrative Review of Countervailing Duty Order and of Tentative Determination to Revoke.

**SUMMARY:** This notice is to advise the public that, as a result of an administrative review of the countervailing duty order on footwear from the Republic of Korea, the Department of Commerce has tentatively determined to revoke such order on the grounds that net subsidies have been *de minimis* for at least two years. Interested parties are invited to comment on this decision.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Josephine Russo, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Room 1126, Washington, D.C. 20230 (202-377-4023).

**SUPPLEMENTARY INFORMATION:** A notice of "Final Countervailing Duty Determination," T.D. 76-13, was published in the Federal Register of January 9, 1976 (41 FR 1588-89). The notice stated that the Treasury Department has determined that exports of rubber and non-rubber footwear from the Republic of Korea were provided bounties or grants, within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303) ("the Act"). Accordingly, imports into the United States of this merchandise were subject to countervailing duties. Concurrently with that determination, however, Treasury published T.D. 76-14 (41 FR 1587-88) waiving the imposition of those duties on rubber footwear under the authority of section 303(d) of the Act.

The term "rubber footwear" as used throughout this proceeding covers footwear which is either: (1) over 50 percent by weight of rubber or plastics; or (2) over 50 percent by weight of a combination of fibers with rubber or plastics, with at least 10 percent by weight of rubber or plastics. Such footwear is currently classifiable under items 700.51, 700.52, 700.53, 700.54 and 700.58 (both formerly 700.55), or 700.60, Tariff Schedules of the United States (TSUS). "Non-rubber footwear" covers all other footwear classifiable under Part I, Subpart A, of Schedule 7 of the TSUS.

The countervailable programs under the Final Determination are: (1) preferential short-term export financing, (2) special tax benefits provided to enterprises located in the Masan Free Trade Zone, (3) tax benefits resulting from the inclusion in loss accounts of reserve funds for losses accruing from overseas activities, and (4) accelerated depreciation of fixed assets utilized for export production. The Treasury Department found that Korean manufacturers or exporters of footwear received bounties or grants of 0.7 percent *ad valorem*.

On November 19, 1979, the Treasury Department received a request for revocation of the order from the Government of the Republic of Korea. In its submission, the Republic of Korea alleged that only three footwear companies received benefits from reserve funds and that, for more than a two-year period (through September 1979), reserve fund benefits were less than 0.3 percent. Four other companies were located in the Masan Free Trade Zone. Only one of these exported footwear after 1976, and it ceased exporting to the United States after May 1977. With regard to all of the programs, total benefits did not exceed 0.3 percent

*ad valorem* for any company for the period January 1977 through September 1979. The Government of Korea argued that this level was *de minimis*.

On January 1, 1980, Title I of the Trade Agreements Act of 1979 (93 Stat. 150) ("the TAA") went into effect. On January 2, 1980, the authority for administering the countervailing duty law was transferred from the Treasury Department to the Department of Commerce ("the Department"). Because Korea was not a "country under the Agreement" (as defined in section 701(b) of the Act), the Department revoked the waiver on February 21, 1980 for rubber footwear (45 FR 12860). On April 7, 1980, liquidation was suspended on all shipments of footwear from Korea entered, or withdrawn from warehouse, for consumption retroactive to January 1, 1980. Subsequently, the Department conducted an administrative review of the information submitted by the Korean Government. We confirmed that the benefits received by the exporting firms were no more than 0.30 percent *ad valorem* from January 1977 through December 1979.

We verified the information by examining Korean Government laws and documents; company books and records; and consulting with economic officials of the United States consulate in the Republic of Korea.

As a result of our administrative review, we preliminarily conclude that the imported merchandise has not benefitted from more than *de minimis* net subsidies for at least the two-year period specified in section 355.42, Commerce Regulations. As further required by this section, the manufacturers and exporters have agreed in writing to an immediate suspension of liquidation and, if appropriate, reinstatement of the order if circumstances develop which indicate that the imported merchandise benefits from a net subsidy.

Therefore, the Department has tentatively determined to revoke the countervailing duty order concerning footwear from Korea. If this order is revoked, it shall apply with respect to unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. Additionally, entries from January 1, 1980 to the date of publication, assuming no change in the *de minimis* rate, will be liquidated without regard to countervailing duties. The suspension of liquidation previously ordered will continue until further notice.

Interested parties may submit written comments on or before January 29, 1981,

and may request disclosure and/or a hearing on or before January 14, 1981.

The Department will publish a notice of final results of administrative review after analysis of issues raised in written comments or at a hearing.

This administrative review, tentative determination to revoke, and notice publication are in accordance with section 751(a)(1), (c) of the Act (93 Stat. 175-76, 19 U.S.C. 1675(a)(1), (c)) and sections 355.41 and 355.42 of the Commerce Regulations (19 CFR 355.41, 355.42, 45 FR 4947-48).

John D. Greenwald,

Deputy Assistant Secretary for Import Administration.

December 18, 1980.

## Minority Business Development Agency

### Financial Assistance Application Announcement

December 18, 1980.

The Minority Business Development Agency announces that it is seeking applications under its program to operate one project for a twelve month period beginning April 1, 1981. The total cost of the project will not exceed \$340,000.

**Funding Instrument:** It is anticipated that the funding instrument, as defined by the Federal Grant and Cooperative Agreement Act of 1977, will be a grant.

**Program Description:** The General Business Services Program (GBS) of the Minority Business Development Agency (MBDA) provides technical assistance to minority business persons and firms for the purpose of improving their stability by increasing their management and marketing capabilities. MBDA offers competitive grants to consulting firms (either non-profit or commercial entities). These firms must be capable of providing such services as:

- Preparation of business plans;
- Financial packaging;
- Industrial management assistance;
- Personnel management services;
- Marketing planning.

and a broad range of other business services excluding legal services.

Applications are invited for the following project: One grant for a management and technical assistance project to operate in the Columbia, Greenville, Spartanburg, and Charleston SMSAs in South Carolina. The project will operate at a cost not to exceed \$340,000. The Project I.D. Number is 04-10-80002-01. This project will also

include supplying specialized consulting services.

**Eligibility Requirements:** There are no restrictions. Any profit or non-profit institution is eligible to submit an application.

**Pre-application Conference:** A Pre-application Conference for this project will be held on January 8, 1981 at 1:30 p.m. at the following address: U.S. Department of Commerce, Minority Business Development Agency, 1371 Peachtree Street, NE, Suite 505, Conference Room, Atlanta, Georgia 30309.

**Application Materials:** An application kit for this project may be requested by writing the following address: U.S. Department of Commerce, Minority Business Development Agency, 1371 Peachtree Street, NE, Suite 505, Conference Room, Atlanta, Georgia 30309.

In requesting an application kit, the applicant must specify its profit status; i.e., State or local government, federally recognized Indian tribal units, educational institutions, hospitals, or other type of profit or non-profit institution. This information is necessary to enable MBDA to include the appropriate cost principles in the application kit.

**Award Process:** All applications that are submitted in accordance with the instructions in the application kit will be submitted to a panel for review and ranking. Specific criteria by which applications will be evaluated is included in the application kit.

**Closing Date:** Applicants are encouraged to obtain an application kit as soon as possible in order to allow sufficient time to prepare and submit an application before the closing date of January 21, 1981. Applications received after this date will not be considered.

(11,800 Minority Business Development, Catalog of Federal Domestic Assistance)

**Note.**—This program is not subject to the requirements of OMB Circular A-95.

Dated: December 18, 1980.

Charles F. McMillan,  
Regional Director.

## National Bureau of Standards

### Federal Standard COBOL (FIPS Pub. 21-1); Proposed Interpretation

Under the provisions of Public Law 89-306 (79 Stat. 1127; 40 U.S.C. 759 (f)) and Executive Order 11717 (38 FR 12315, dated May 11, 1973), the Secretary of Commerce is authorized to establish uniform Federal automatic data

processing standards. Interpretation number 7 to Federal Standard COBOL (FIPS Pub 21-1) is being recommended for Federal use. It pertains to the OCCURS clause.

This proposed interpretation is in accordance with the Interpretation Procedures for Federal Standard COBOL as contained in Federal Information Processing Standards Publication 29, dated June 30, 1974. The proposed interpretation, if adopted, will serve as an additional specification to Federal Standard COBOL, which is an adoption of the voluntary industry standard (COBOL, X3.23-1974) that has been developed by the American National Standards Institute.

The proposed interpretation contains a definition of the problem identification of the issues, recommended interpretation, supporting justification for the proposed interpretation, necessary clarifications to Federal Standard COBOL to effect the resolution, and the effective date of the interpretation.

Prior to approval of the proposed interpretation by the National Bureau of Standards, it is essential to assure that proper consideration is given to the needs and views of manufacturers, the public, and State and local governments. The purpose of this notice is to solicit such views.

Interested parties may submit comments in writing to the Standards Administration Office, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, not later than March 30, 1981. Telephone inquiries should be directed to Mable V. Vickers at (301) 921-3485.

Dated: December 22, 1980.

Ernest Ambler,  
Director.

### Federal Standard COBOL Interpretation No. 7—The OCCURS Clause

#### Definition of the problem

When a group data item, having subordinate to it an entry that specifies the OCCURS DEPENDING ON clause, is the receiving field in a statement which moves data to the item, is it permissible for contents of subordinate variable-occurrence data items whose occurrence numbers exceed the value of the data item referenced in the OCCURS DEPENDING ON clause to be changed in a predictable way as a side effect of executing the statement?

#### Issues

The situation of concern arises where there are occurrences of a data item which lie beyond the maximum occurrence for a table determined by the value of another data item referenced in an OCCURS DEPENDING ON clause. It is necessary to determine the extent to which an implementation is permitted to change the contents of these occurrences. In particular, the question must be answered whether or not it is allowed for the contents of such occurrences to be changed as if they were part of the table area during the execution of statements which refer to a group data item which has the variable-occurrence data item subordinate to it.

#### Interpretation

This interpretation applies to American National Standard COBOL, X3.23-1974, as it has been adopted as Federal Standard COBOL, FIPS Pub 21-1. The interpretation is that the contents of data items whose occurrence numbers exceed the value of the data item referenced in the OCCURS DEPENDING ON clause are not predictable and may be changed or left intact as the implementor sees fit until the value of the data item referenced in the OCCURS DEPENDING ON clause is increased. After the value of the data item referenced in the OCCURS DEPENDING ON clause is increased, the variable-occurrence data items which previously had unpredictable contents cannot be assumed to contain or not to contain any particular values until data is next moved into them.

#### Supporting justification

References: The following references are to American National Standard COBOL, X3.23-1974:

(a) Pages III-3 and III-4, Paragraph 2.1.4, General Rule 3.b, states: "... the current value of the data item referenced by data-name-1 represents the number of occurrences. This format specifies that the subject of this entry has a variable number of occurrences. . . . This does not imply that the length of the subject entry is variable, but that the number of occurrences is variable. . . . Reducing the value of the data item referenced by data-name-1 makes the contents of data items, whose occurrence number now exceed the value of the data item referenced by data-name-1 unpredictable."

(b) Page III-4, Paragraph 2.1.4, General Rule 4, states: "When a group item, having subordinate to it an entry that specifies Format 2 of the OCCURS clause, is referenced, only that part of the table area that is specified by the

Examples include carrier sense multiple access networks and token bus access networks.

2. The desirability of the issuance, as soon as possible, of protocol standards applicable to carrier sense multiple access networks due to the relative maturity of this type of technology.

3. The desirability of specifying protocol standards which can meet user requirements and can be implemented in a cost effective manner in LSI technology.

## National Oceanic and Atmospheric Administration

### Coastal Zone Management Programs

**AGENCY:** Office of Coastal Zone Management.

**ACTION:** Notice of availability of evaluation findings.

**SUMMARY:** Notice is hereby given of the availability of the evaluation findings for the California, Delaware and Hawaii Coastal Zone Management Programs.

Section 312 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. 1451 et seq.) requires the conduct of a continuing review of the performance of each coastal state under its federally approved coastal zone management program. All 3 states evaluated were found to be adhering to their management programs as a result of which accomplishments are occurring with respect to resource protection, management of coastal development, increased recreational access, and improved government decisionmaking.

A copy of findings made by the Acting Assistant Administrator for Coastal Zone Management for each of these states may be obtained on request from: Rosella Sussman, Evaluation Officer, Office of Coastal Zone Management, Page Building 1, 3300 Whitehaven Street, N.W., Washington, D.C. 20235 (telephone: (202) 634-4245).

Dated: December 12, 1980.

Donald W. Fowler,  
Acting Assistant Administrator for Coastal Zone Management.

### Western Pacific Fishery Management Council's Pelagic Fishery Resources Subpanel, Spiny Lobster Subpanel and Scientific and Statistical Committee; Public Meetings

**AGENCY:** National Marine Fisheries Service, NOAA.

**SUMMARY:** The Western Pacific Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), has established a Spiny Lobster Subpanel, a Pelagic Fishery Resources Subpanel, and a Scientific and Statistical Committee (SSC), which will meet separately. The spiny Lobster Subpanel will meet to review the final Spiny Lobster Fishery Management Plan (FMP); the Pelagic Fishery Resources Subpanel will meet to review a final draft of the billfish source document, and the SSC will meet to review the final Spiny Lobster FMP, a final draft of the billfish source document, a work plan for the bottomfish fisheries, as well as other business.

**DATES:** The Spiny Lobster Subpanel meeting will convene on Friday, January 23, 1981, at approximately 1:30 p.m., and will adjourn at approximately 4:30 p.m. The Pelagic Fishery Resources Subpanel meeting will convene on Monday, January 26, 1981, at approximately 9 a.m., and will adjourn at approximately 5:30 p.m. and the SSC meeting will convene on Tuesday, January 27, 1981, at approximately 9 a.m., and will adjourn on Wednesday, January 28, 1981, at approximately 3:30 p.m. These meetings are open to the public.

**ADDRESS:** All of the above meetings will take place at the Honolulu Laboratory, Southwest Fisheries Center, National Marine Fisheries Service, 2570 Dole Street, Honolulu, Hawaii.

**FOR FURTHER INFORMATION CONTACT:** Western Pacific Fishery Management Council, Room 1608, 1164 Bishop Street, Honolulu, Hawaii 96813, Telephone: (808) 523-1368.

Dated: December 23, 1980.

William H. Stevenson,  
Deputy Assistant Administrator for Fisheries,  
National Marine Fisheries Service.

## National Technical Information Service

### U.S. Government-Owned Inventions; Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and, possibly, foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of patents cited are available from the Commissioner of Patents & Trademarks, Washington, DC 20231, for \$.50 each. Requests for copies of patents must include the patent number.

Copies of patent applications cited are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for \$5.00 each (\$10.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to avoid premature disclosure. Claims and other technical data will usually be made available to serious prospective licensees upon execution of a non-disclosure agreement.

Requests for information on the licensing of particular inventions should be directed to the addresses cited for the agency-sponsors.

Douglas J. Campion,  
Program Coordinator, Office of Government Inventions and Patents, National Technical Information Service, U.S. Department of Commerce.

### National Telecommunications and Information Administration

#### Grant Appeals Board of the Public Telecommunications Facilities Program; Open Meeting

**AGENCY:** National Telecommunications and Information Administration, U.S. Department of Commerce.

**ACTION:** Notice.

**SUMMARY:** By this notice we announce the rescheduling of a meeting of the Grant Appeals Board of the Public Telecommunications Facilities Program (PTFP).

**PURPOSE:** To consider the petition of Barbara Wheeler Gilbert, on behalf of the Wiconi Project of the South Dakota United Indian Association (Wiconi), seeking reconsideration of an action of the PTFP staff declining to accept for filing Wiconi's application for grant under the Public Telecommunications Financing Act of 1978, Pub. L. No. 95-567, 92 Stat. 2405, 47 U.S.C. 390, *et seq.* (1978), refusing to waive the closing date for the filing of applications and denying Wiconi's petition for extraordinary relief to become the substitute applicant for the American Indian Satellite Project.

**TIME:** January 15, 1981, at 10:00 a.m.

**PLACE:** National Telecommunications and Information Administration, 1800 G Street, N.W., Room 765, Washington, D.C.

**COMMENTS:** Interested parties are encouraged to submit comments on the petition for reconsideration of Ms. Gilbert. A copy of Ms. Gilbert's petition and the staff decision rejecting Wiconi's petition for extraordinary relief were published as appendices to our initial notice of this meeting, 45 F.R. 72,243 (October 31, 1980). An original and seven copies of any comments should be filed on or before January 8, 1981, with: Office of Chief Counsel, NTIA/DOC, 1800 G Street, N.W., Room 703, Washington, D.C. 20504. A certificate of service must be attached to the comments reflecting that a copy of the comments has been served on: Barbara W. Gilbert; Project Director, American Indian Satellite Project, 905 6th Street, S.W., Washington, D.C. 20024.

Additional information may be

obtained from Robert Hunter, NTIA/DOC, Office of Chief Counsel, 1800 G Street, N.W., Room 703, Washington, D.C. 20504. Telephone (202) 377-1866.

(Catalog Program Number 11.550)

Gregg P. Skall,  
*Chief Counsel.*

#### COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

##### Soliciting Public Comment on Bilateral Negotiations During 1981 With Governments of Japan, Mexico, Singapore and Sri Lanka

December 1980.

In accordance with the Committee for the Implementation of Textile Agreements' desire to solicit public comment whenever practicable on actions implementing the GATT Arrangement Regarding International Trade in Textiles (the "Multifiber Arrangement" or "MFA") and pursuant to the bilateral textile agreements, the U.S. Government anticipates holding negotiations during 1981 with the Governments of Japan, Mexico, Singapore and Sri Lanka regarding certain aspects of the agreements.

Any party wishing to comment or provide data on information regarding these agreements, or to comment on domestic production or availability of textiles and apparel affected by the agreements, is invited to submit such comments or information in ten copies to Mr. Paul O'Day, Chairman, Committee for the Implementation of Textile Agreement and Deputy Assistant Secretary of Commerce for Textiles and Apparel, International

Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Since the exact timing of the negotiations is not yet established, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 2808, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the MFA or agreements entered into thereunder, or the implementation thereof, is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) and 554 (a)(4) relating to matters which constitute "a foreign affairs function of the United States."

Paul T. O'Day,

*Chairman, Committee for the Implementation of Textile Agreements.*

### Announcing Import Levels for Certain Cotton, Wool and Man-Made Fiber Textile Products From the Republic of Korea, Effective on January 1, 1981

December 23, 1980

**AGENCY:** Committee for the Implementation of Textile Agreements.

**ACTION:** Establishing import levels for certain cotton, wool and man-made fiber textile products imported from the Republic of Korea, effective on January 1, 1981.

**SUMMARY:** The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 23, 1977, as amended, between the Governments of the United States and the Republic of Korea, establishes specific ceilings for cotton, wool and man-made fiber textile products in Categories 333/334/335, 338/339, 340, 341, 347/348, 433/434, 440, 444, 445/446, 633/634/635, 638/639, 640, 641, 643, 645/646, and 659 pt., among others, during the agreement year which begins on January 1, 1981 and extends through December 31, 1981. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption, or withdrawal from warehouse for

consumption, of textile products in the foregoing categories, produced or manufactured in the Republic of Korea and exported during the twelve-month period which begins on January 1, 1981 and extends through December 31, 1981, in excess of the designated levels. The level for Category 645/646, among others, may be adjusted later in the year as a result of consultations between the two governments.

During the twelve-month period beginning on January 1, 1981, and also pursuant to the terms of the bilateral agreement, the United States Government has decided also to control Group I (Categories 300, 301, 310-320, 330, 360-363, 369, 600-605, 610-614, 625-627, 630, 665, 666, and 669) at the group level of 141,285,894 square yards equivalent.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), and August 12, 1980 (45 FR 53506)).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

**EFFECTIVE DATE:** January 1, 1981.

**FOR FURTHER INFORMATION CONTACT:**

William Boyd, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377-5423).

Paul T. O'Day,

*Chairman, Committee for the Implementation of Textile Agreements.*

United States Department of Commerce, International Trade Administration Washington, D.C., December 23, 1980.

Committee for the Implementation of Textile Agreements

Commissioner of Customs, Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 23, 1978, as amended, between the Governments of the United States and Republic of Korea; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed to prohibit, effective on January 1, 1981 and for the twelve-month period extending through December 31, 1981, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, wool and man-made fiber textile products in the following categories,

produced or manufactured in Korea, in excess of the indicated levels of restraint:

Category	12-mo. level of restraint
Group I (300, 301, 310-320, 330, 360-363, 369, 600-605, 610-614, 625-627, 630, 665, 666 and 669).	141,285,894 square yards equivalent.
333/334/335.....	92,475 dozen of which not more than 52,618 dozen shall be in Category 333/334 and not more than 53,728 dozen shall be in Category 335.
338/339.....	504,099 dozen.
340.....	163,226 dozen.
341.....	101,689 dozen.
347/348.....	243,328 dozen of which not more than 171,825 dozen shall be in Category 347 and not more than 132,336 dozen shall be in Category 348.
433/434.....	16,691 dozen of which not more than 12,136 dozen shall be in Category 433 and not more than 6,224 dozen shall be in Category 434.
440.....	206,059 dozen.
444.....	3,906 dozen.
445/446.....	50,413 dozen.
633/634/635.....	1,347,719 dozen of which not more than 170,238 dozen shall be in Category 633; not more than 784,220 dozen shall be in Category 634; and not more than 595,418 dozen shall be in Category 635.
638/639.....	5,367,635 dozen.
640 pt. <sup>1</sup> .....	4,320,773 dozen.
640 pt. <sup>2</sup> .....	1,598,731 dozen.
641.....	994,774 dozen.
643.....	58,903 dozen.
645/646.....	3,126,416 dozen.
659 pt. <sup>3</sup> .....	2,134,965 pounds.

<sup>1</sup>In Category 640, only T.S.U.S.A. numbers 380.0455, 380.8431 and 380.8433.

<sup>2</sup>In Category 640, all T.S.U.S.A. numbers except those listed in footnote 1.

<sup>3</sup>In Category 659, only T.S.U.S.A. numbers 703.0500, 703.1000 and 703.1515.

In carrying out this directive, entries of textile products in the foregoing categories, except Category 659 pt., which have been exported to the United States on and after January 1, 1980 and extending through December 31, 1980, shall, to the extent of any unfilled balances be charged against the levels of restraint established for such goods during the twelve-month period beginning on January 1, 1980 and extending through December 31, 1980. In the event that the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter. Textile products in Category 659 pt. which have been exported prior to January 1, 1981 shall not be subject to this directive.

The levels of restraint set forth above are subject to adjustment in the future pursuant to the provisions of the bilateral agreement of December 23, 1977, as amended, between the Governments of the United States and the Republic of Korea, which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be adjusted by designated percentages; (2) these same levels may be adjusted for carryover and carryforward up to 11 percent of the applicable category limit; (3) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement. Any appropriate adjustments under the provisions

of the bilateral agreement referred to above will be made to you by letter.

A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the *Federal Register* on February 28, 1980 (45 FR 13172), as amended on April 23, 1980 (45 FR 27463), and August 12, 1980 (45 FR 53506).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of cotton, wool and man-made fiber textile products from the Republic of Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the *Federal Register*.

Sincerely,

Paul T. O'Day,

*Chairman, Committee for the Implementation of Textile Agreements.*

## **DEPARTMENT OF DEFENSE**

### **Office of the Secretary**

#### **DOD Advisory Group on Electron Devices; Advisory Committee Meeting**

The DoD Advisory Group on Electron Devices (AGED) will meet in closed session on March 9-10, 1981, at the Advisory Group on Electron Devices, 201 Varick Street, New York, New York, 10014.

The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of Electron Devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities, or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with 5 U.S.C. App. 1 Sec. 10(d) (1976), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

M. S. Healy,

*OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.*

BILLING CODE 3810-70-M

#### **DOD Advisory Group on Electron Devices, Working Group A; Advisory Committee Meeting**

Working Group A (Mainly Microwave Devices) of the DoD Advisory Group on Electronic Devices (AGED) will meet in closed session on 22 January, 1981, at the Advisory Group on Electron Devices, 201 Varick Street, New York, New York 10014.

The mission of the Advisory group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical

and effective research and development programs in the area of electron devices.

The Working Group A meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This microwave device area includes programs on developments and research related to microwave tubes, solid state microwave, electronic warfare devices, millimeter wave devices, and passive devices. The review will include classified program details throughout.

In accordance with 5 U.S.C. App. 1 Sec. 10(d) (1976), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

M. S. Healy,

Working Group C (Mainly Imaging and Display) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session 21-22 January 1981, at the Naval Ocean Systems Center, 271 Catalina Blvd., San Diego, Ca. 92152, and on 26 February 1981 at the Palisades Institute for Research Services, AGED, 1925 N. Lynn Street, Arlington, Virginia 22209.

The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group C meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. This special device area includes such programs as infrared and night vision sensors. The review will include classified program details throughout.

In accordance with 5 U.S.C. App 1 Sec. 10(d) (1976), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

M. S. Healy,

*OSD Federal Register Liaison Officer,  
Washington Headquarters Services,  
Department of Defense.*

December 22, 1980.

#### **DOD Advisory Group on Electron Devices, Working Group D; Advisory Committee Meeting**

Working Group D (Mainly Laser Devices) of the DoD Advisory Group on Electronic Devices (AGED) will meet in closed session 3 and 4 February 1981, at the Palisades Institute or Research Services, Inc., 1925 North Lynn Street, Arlington, Virginia 22209.

The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group D meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. The laser area includes programs on developments and research related to low energy lasers for such applications as battlefield surveillance, target designation, ranging, communications, weapon guidance and data transmission. The review will include classified program details throughout.

In accordance with 5 U.S.C. App 1 Sec. 10(d) (1976), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

M. S. Healy,

*OSD Federal Register Liaison Officer,  
Washington Headquarters Services,  
Department of Defense.*

### **DEPARTMENT OF EDUCATION**

#### **Education Appeal Board; Applications for Review Accepted for Hearing**

**AGENCY:** Department of Education.

**ACTION:** Notice of Applications for Review Accepted for Hearing by Education Appeal Board.

**SUMMARY:** This notice lists the applications for review that were received and accepted for hearing by the Education Appeal Board between July 1, 1980, and December 8, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, S.W. (Room 2141, FOB-6), Washington, D.C. 20202. Telephone (202) 245-7835.

**SUPPLEMENTARY INFORMATION:** Under sections 451 through 456 of the General Education Provisions Act (20 U.S.C. 1234), the Education Appeal Board has authority to conduct (1) audit appeal hearings, (2) withholding, termination and cease and desist hearings initiated by the Secretary of Education, and (3) other proceedings designated by the Secretary as being within the

jurisdiction of the Board. For information concerning the Board and its procedures, see the Board's final regulations published in the *Federal Register* on April 3, 1980 (45 FR 22634).

This notice lists the applications for review that were received and accepted for hearing by the Education Appeal Board between July 1, 1980, and December 8, 1980.

One application for review involved programs conducted under the Vocational Education Act of 1963, as amended: *Appeal of the State of Maryland*, Docket No. 10-(65)-80.

The State appealed a final audit determination by the Assistant Secretary for Vocational and Adult Education that Federal funds authorized under the Vocational Education Act of 1963 were misspent. The audit exceptions, based on two audits by the HEW Audit Agency, involve a number of State and city programs. The contested issues include the propriety of the State's procedure for determining recipient eligibility, the failure of the State to show how a funded curriculum project would benefit disadvantaged students, and the use of Vocational Education funds for projects covered by the Vocational Rehabilitation Act. Also in dispute are expenditures for city vocational education and work study programs, and for city administrative and wage costs. Finally, the State contests the audit finding that Consumer and Homemaking funds were improperly distributed. The Department of Education requested a refund from the State in the total amount of \$513,712.

One application for review involved programs conducted under Title I of the Elementary and Secondary Education Act of 1965, as amended: *Appeal of the State of Illinois*, Docket No. 9-(64)-80.

The State appealed final audit determinations that: [1] one local educational agency failed to provide services from State and local funds to schools serving Title I project areas comparable to services provided schools in non-Title I project areas; [2] one local education agency used Title I funds to supplant State and local funds by charging Title I for a portion of the salaries of three principals; [3] the State educational agency awarded excess Title I funds to local districts after the period for obligating the funds had lapsed and without determining the need for additional funds or monitoring the use of these funds; and [4] two local educational agencies overstated indirect cost rates and misapplied indirect cost rates to capital expenditures under Title I. The Department of Education requested a refund of \$718,458 from the State.

*Intervention*

Section 78.43 of the final regulations establishing procedures for the Education Appeal Board provides that an interested person, group, or agency may, upon application to the Board Chairperson, intervene in appeals before the Education Appeal Board, including the appeals listed above.

An application to intervene must indicate to the satisfaction of the Board Chairperson or, as appropriate, the Panel Chairperson, that the potential intervenor has an interest in and information relevant to the specific issues raised in the appeal. If an application to intervene is approved, the intervenor becomes a party to the proceedings.

All these applications or questions should be addressed to Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, S.W. (Room 2141, FOB-6), Washington, D.C. 20202, telephone (202) 245-7835.

(20 U.S.C. 1234)

**Note.**— Catalog of Federal Domestic Assistance Number not applicable.

Dated: December 15, 1980.

David S. Pollen,

Chairman, Education Appeal Board.

BILLING CODE 4000-01.M

### Education Appeal Board; Summaries of Final Actions

**AGENCY:** Department of Education.

**ACTION:** Summaries of final actions of the Education Appeal Board.

**SUMMARY:** This notice contains summaries of two decisions of the Education Appeal Board which were adopted as the final decisions of the Department of Education between July 1, 1980, and December 8, 1980. Also included is a summary of a cease and desist order issued by the EAB and a summary of an appeal dismissed by the Board during the same period.

**FOR FURTHER INFORMATION CONTACT:** Dr. David S. Pollen, Chairman, Education Appeal Board, 400 Maryland Avenue, S.W. (Room 2141, FOB-6), Washington, D.C. 20202. Telephone (202) 245-7835.

**SUPPLEMENTARY INFORMATION:** Under sections 451 through 456 of the General Education Provisions Act (20 U.S.C. 1234), the Education Appeal Board has authority to conduct (1) audit appeal hearings, (2) withholding, termination, and cease and desist hearings initiated by the Secretary of Education, and (3) other proceedings designated by the Secretary as being within the

jurisdiction of the Board. For information concerning the Board and its procedures, see the Board's final regulations published in the *Federal Register* on April 3, 1980 (45 FR 22634).

This notice summarizes two decisions of the Education Appeal Board that were adopted as the final decisions of the Department of Education between July 1, 1980, and December 8, 1980. Also included is a summary of a cease and desist order issued and a summary of an appeal dismissed by the EAB during the same period. Summaries of the Board's final actions and decisions are published on a semiannual basis in order to keep the public informed as to the Board's activities.

The summaries are prepared as a convenience to the public and are intended only to highlight the holdings of the Education Appeal Board. The summaries are not official parts of the decisions and should not be relied upon as guidance from the Department of Education or legal precedent. Copies of the full decisions of Education Appeal Board are available at the address given above on request and with payment of the full costs of reproduction.

**SUMMARY OF FINAL DECISION:** *Appeal of the State of Pennsylvania*, Docket No. 10-(25)-76, July 12, 1980.

The State of Pennsylvania appealed five final audit determinations made by the Deputy Commissioner for Elementary and Secondary Education involving programs conducted by local educational agencies (LEAs) under Title I of the Elementary and Secondary Education Act of 1965, as amended. The Commissioner sought a refund of \$664,707.21 from the State. Three LEAs intervened in the appeal, and the State of Pennsylvania moved the Panel to join two additional LEAs as indispensable parties. The Hearing Panel denied the State's motion as it found it had no direct jurisdiction to join parties. One of the LEAs in question entered the appeal voluntarily. The other LEA objected to being joined but promised full cooperation with the State on issues related to the appeal. The Panel held, therefore, that there was no prejudice to the State by its ruling.

On additional prehearing motions filed by the State, the Panel held that the Commissioner (now the Secretary) was authorized to seek recovery of improperly spent Title I funds; that the EAB had jurisdiction to review the final audit determinations and make an initial decision advising the Commissioner (now the Secretary) whether the audit exceptions were properly taken; that the procedures of the EAB as stated in the Board's regulations and general

provisions were reasonable; and that the contested amount was reduced by application of the statute of limitations.

In the final opinion, the Panel upheld four audit exceptions. The Panel found that the two LEAs improperly used Title I funds to pay the salaries of personnel whose services were not designed to meet the special educational needs of educationally deprived children. The Panel found that two other LEAs improperly used Title I funds to provide services in schools that did not have high concentrations of children from low-income families and therefore were ineligible to receive Title I funds.

The Panel also found that although one LEA used Title I funds to pay the salaries of art, music and physical education teachers and library personnel who served all the children in the LEA's elementary schools, virtually all the children in the schools were educationally deprived and the services were designed to meet the children's special educational needs. The Panel ruled that Pennsylvania did not have to refund to the Department the \$242,282.92 at issue for this exception.

On several collateral issues, the Panel ruled that Pennsylvania's interests in a properly conducted audit were sufficiently protected by the appeal process, that the date of expenditure governed the application of the statute of limitations, and that Pennsylvania and the LEAs had sufficient notice of the evidentiary hearings held in the appeal.

The Hearing Panel issued a decision on May 7, 1980, requiring Pennsylvania to refund \$422,424.29 to the U.S. Department of Education. This decision was adopted as the final decision of the U.S. Department of Education on July 12, 1980.

**SUMMARY OF FINAL DECISION:** *Appeal of the State of West Virginia*, Docket No. 3-(33)-77, August 30, 1980.

West Virginia appealed a final audit determination, made by the Deputy Commissioner for Elementary and Secondary Education, that a local educational agency agency within the State of West Virginia improperly used Federal funds under Title I of the Elementary and Secondary Education Act of 1965, as amended, to help pay construction costs of an administrative office building in 1975. The Deputy Commissioner requested a refund from the State in the amount of \$125,000.

The Hearing Panel sustained the Deputy Commissioner's position, holding that Title I funds could not be used to help pay construction costs of an administrative office building. The Panel found that the administrative offices used to house Title I personnel were not

"school facilities" nor were they essential to the success of the local educational agency's Title I program, therefore the construction costs of these offices were not allowed by the Title I statute. Further, post-construction use of the offices for Title I purposes not contemplated and described by the local educational agency in its project application could not justify the use of Title I funds for construction.

On June 20, 1980, the Hearing Panel issued a decision requiring West Virginia to refund \$125,000 to the U.S. Department of Education. The Panel's decision was adopted as the final decision of the U.S. Department of Education on August 30, 1980.

**SUMMARY OF CEASE AND DESIST ORDER:**  
*Cease and Desist Hearing for the State of California and the Richmond, California Unified School District, Docket No. 4-(59)-80 September 27, 1980.*

The Richmond, California Unified School District appeared before the EAB, for itself and with the authorization of the California State Department of Education, to argue against the issuance of a cease and desist order by the Board based on a cease and desist complaint issued by the Commissioner of Education on April 4, 1980. In the cease and desist complaint the Commissioner charged that the Richmond Unified School District violated advisory council requirements under Title I of the Elementary and Secondary Education Act of 1965, as amended, as interpreted in the Interpretive Rule issued by the Office of Education on October 27, 1978, by prohibiting a husband and wife from serving concurrently on a Title I advisory council. The Commissioner also charged that the California State Department of Education failed to carry out its Title I administrative responsibilities with regard to Richmond.

On preliminary matters, the Hearing Panel ruled that the Commissioner had complied with the Board's regulations providing for the issuance of a cease and desist complaint, and that the State educational agency and local educational agency had a right to appear to present reasons why the cease and desist order should not be issued.

The Panel held that it was required to enforce the Interpretive Rule, as EAB regulations prohibited the Panel from waiving the rule or ruling on its validity. The Panel found that the Interpretive Rule was applicable to the Richmond local educational agency and that, by its admitted policy of prohibiting a husband

and wife from serving concurrently on a Title I advisory council, the local agency violated the rule. Further, the Panel held that the California State Department of Education violated the Interpretive Rule by failing to enforce it according to that agency's administrative responsibilities under Title I.

The Hearing Panel issued an order on July 24, 1980, requiring the Richmond Unified School District to cease and desist from enforcing its policy, and ordering the California State Department of Education to take appropriate administrative steps to ensure compliance with the cease and desist order by the local educational agency. The order became final on September 27, 1980.

**SUMMARY OF DISMISSAL OF ACTION:**  
*Appeal of the State of Ohio, Docket No. 5-(41)-78, November 20, 1980.*

The State of Ohio appealed a final audit determination issued by the Department of HEW's Regional Commissioner of Region V in 1976. The audit exception was based on a transfer of \$1,000,000 in Federal funds from the State Library Board to the State General Fund. The Federal money was awarded to the State under the Library Services and Construction Act (LSCA). The transfer was in accordance with a State appropriations act which provided State funds for library support during a period when LSCA funds were impounded by the Federal government. The State law directed the State finance director to recover these State expenditures for the general fund once Federal monies became available. At the State finance director's request, the State Library Board transferred \$1,000,000 in subsequent LSCA Federal funds to the State Emergency Purposes fund. This transfer constituted partial replacement of \$3,000,000 in State appropriations expended for library support during the period of impoundment, as required by the State law. The final audit determination maintained that such a transfer was improper.

The Assistant Secretary for Educational Research and Improvement further reviewed the final determination letter and vacated it as not supported by sufficient evidence. The Assistant Secretary moved the Hearing Panel to dismiss the appeal. The State of Ohio concurred in the motion. The Hearing Panel issued an Order Dismissing the Appeal on November 20, 1980.

**Note.**—Catalog of Federal Domestic Assistance Number not applicable.

Dated: December 15, 1980.

### Grants for Research on Knowledge Use and School Improvement

**AGENCY:** Department of Education.

**ACTION:** Amendment to Application Notice.

The application notice published in the *Federal Register* on December 5, 1980 (45 FR 80575-80576) is amended by revoking the January 6, 1981 closing date for submittal of preapplications for major grants under the Grants for Research on Knowledge Use and School Improvement program. There is no longer a requirement for the submittal of preapplications for major grants under this program.

This action is taken because of administrative delays in preparing the program announcement package.

**FURTHER INFORMATION:** For further information, contact Mr. Rolf Lehming, Team Leader, Knowledge Use and School Improvement Studies, DIP, NIE, OERI, who is located in Room 619B, 1200 19th Street, N.W., Washington, D.C. and whose telephone number is (202) 254-6050.

(Catalog of Federal Domestic Assistance Number 84.117, Educational Research and Development; formerly 13.950)

Dated: December 22, 1980.

F. James Rutherford,  
Assistant Secretary for Educational Research and Improvement.

BILLING CODE 4000-01-M

### National Institute of Handicapped Research; Transmittal of Applications

**AGENCY:** Department of Education.

**ACTION:** Notice of closing date for transmittal of applications.

Applications are invited for noncompeting continuation projects under the National Institute of Handicapped Research.

Authority for this program is contained in Section 204 of the Rehabilitation Act of 1973, as amended, by Pub. L. 95-602.

Under this program awards are issued to public and private agencies and organizations, including institutions of higher education.

The purpose of the awards is planning and conducting research, demonstration and related activities which bear

directly on the development of methods, procedures, and devices to assist in the provision of vocational and other rehabilitation services to handicapped individuals, especially those with the most severe handicaps.

**Closing Date for Transmittal of Applications:** To be assured of consideration for funding, applications for a noncompeting continuation award should be mailed or hand delivered no later than 90 days prior to the end of the current budget period.

If the application is late, the Department of Education may lack sufficient time to review it and may decline to accept it.

**Applications Delivered by Mail:** An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.133, Washington, D.C. 20202.

An applicant should show proof of mailing consisting of one of the following:

- (1) A legibly dated U.S. Postal Service postmark.
- (2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.
- (3) A dated shipping label, invoice, or receipt from a commercial carrier.
- (4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing:

- (1) A private metered postmark, or
- (2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail.

**Applications Delivered by Hand:** An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building No. 3, 7th and D Streets, S.W., Washington, D.C.

The Application Center Control will accept a hand delivered application between 8:00 a.m., and 4:30 p.m. (Washington, D.C. time) daily, except Saturday, Sundays, and Federal holidays.

**Available Funds:** The funding level for the National Institute of Handicapped Research is expected to be approximately \$35 million for fiscal year 1981.

**Application Forms:** Application forms will be mailed to applicants approximately 90 days before applications are due.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages. Applicants are urged not to submit information that is not requested.

**Applicable Regulations:** Regulations governing this program include the following:

- (a) Regulations governing the National Institute of Handicapped Research; and
- (b) Education Division General Administrative Regulations (EDGAR) (34 CFR, Part 75, and 77) published in the Federal Register on April 3, 1980 (45 FR 22494).

**Note.**—Program regulations governing the institute are currently undergoing revision. Prior to final publication of these regulations, the Institute will review and make grant awards solely under the provisions of EDGAR.

**Further Information:** For further information contact Margaret J. Giannini, M.D., F.A.A.P., Director, National Institute of Handicapped Research, 400 Maryland Avenue, S.W., (Room 3070, Switzer Building), Washington, D.C. 20202. Telephone: 202-245-0565.

Dated: December 22, 1980.  
(Catalog of Federal Domestic No. 84.133, National Institute of Handicapped Research)

## DEPARTMENT OF ENERGY

### Voluntary Agreement and Plan of Action To Implement International Energy Program; Meetings

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C 6272), notice is hereby provided of the following meetings:

I. A meeting of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on January 6, 1981, at the offices of Mobil Oil Corporation, 150 East 42nd Street, New York, New York, beginning at 9:30 a.m. The agenda for the meeting is as follows:

1. Opening remarks.
2. Review of ISAG draft report on AST-3, and of matters arising from AST-3.
3. Closing remarks and confirmation of next meeting date.

II. A meeting of the Industry Working Party (IWP) to the International Energy Agency (IEA) will be held on January 14 and 15, 1981, at the offices of Texaco Inc., 2000 Westchester Avenue, White Plains, New York, beginning at 9:30 a.m. on January 14. The agenda for the meeting is as follows:

1. Status of Standing Group on the Oil Market (SOM) and IWP activities and arrangements for future meetings.
2. Questions concerning a review of the crude and oil product import registers.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, these meetings will not be open to the public.

Pursuant to section 252(c)(3) of the Energy Policy and Conservation Act, a verbatim transcript of these meetings will be made; the transcript, with such deletions as are determined to be necessary or appropriate pursuant to E.O. 12065 (43 FR 28949, July 3, 1978), E.O. 11932 (41 FR 32691, August 5, 1976) and 22 CFR 9a.1-9a.9, will be available in the Reading Room of the Department of Energy, Room 1E-190, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, between the hours of 8:00 AM and 4:00 PM weekdays, except Federal holidays.

Issued in Washington, D.C., December 22, 1980.

**Craig S. Bamberger,**  
*Assistant General Counsel, International Trade & Emergency Preparedness.*

BILLING CODE 6450-01-M

## Office of Energy Research

### Solar Photovoltaic Energy Advisory Committee and Subcommittee of the Energy Research Advisory Board; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463, 86 Stat. 770), notice is hereby given of the following meetings:

Name: Solar Photovoltaic Energy Advisory Committee (SPEAC) and Central Utilities Applications Pilot Plant Subcommittee (CUAPPS) of the Energy Research Advisory Board.

Date and time:

- January 19, 1981—9 a.m.—4 p.m. (SPEAC)
- January 20, 1981—9 a.m.—12 noon (SPEAC)
- January 20, 1981—1 p.m.—4 p.m. (CUAPPS)
- January 21, 1981—9 a.m.—4 p.m. (SPEAC)

Place: *January 19-20, 1981* (SPEAC and CUAPPS), Sandia Laboratory, Room B-6, Coronado Club, Kirtland Air Force Base, Albuquerque, New Mexico.

*January 21, 1981* (SPEAC), Solar Power Research Institute, Building 17, Room 4A, 1617 Cole Boulevard, Golden, Colorado.  
Contact: Georgia Hildreth, Director, Advisory Committee Management, Department of

Energy, Forrestal Building—Room 8G087, 1000 Independence Avenue, SW., Washington, D.C. 20585 Telephone: 202-252-5187.

Purpose of the Committee: To advise the Secretary on the scope and pace of research and development with respect to solar photovoltaic energy systems; the need for and timing of solar photovoltaic energy systems demonstration projects; the need for change in any research, development, or demonstration program established under this Act; and the economic, technological, and environmental consequences of the use of solar photovoltaic energy systems.

Tentative agenda:

January 19-20, 1981—*SPEAC*

- Review of the photovoltaic systems development activities
- Review of the photovoltaic concentrator subsystem activities
- Public Comment (10 minute rule)

January 20, 1981—*CUAPPS*

- Discussion of need for pilot plant
- Public Comment (10 minute rule)

January 21, 1981—*SPEAC*

- Review of photovoltaic research and development activities
- Public Comment (10 minute rule)

Public participation: The meetings are open to the public. Written statements may be filed with the Committee and Subcommittee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact the Advisory Committee Management Office at the address or telephone number listed above. Requests must be received at least 5 days prior to the meetings and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee and Subcommittee are empowered to conduct the meetings in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Public Reading Room, Room 1E190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Executive summary: Available approximately 30 days following the meeting from the Advisory Committee Management Office.

Issued at Washington, D.C. on December 22, 1980.

Georgia Hildreth,

Director, Advisory Committee Management.

BILLING CODE 6450-01-M

## Economic Regulatory Administration

### Mandatory Oil Import Program

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice.

**SUMMARY:** The Economic Regulatory Administration (ERA) of the Department

of Energy (DOE) is issuing this notice in order to clarify the status of the license fees formerly imposed on imports of petroleum and petroleum products by Presidential Proclamation 3279, as amended. Although the Proclamation currently provides that no fee shall be in effect through December 31, 1980, it is silent as to the status of license fees after that date. Consequently, in the absence of any further amendment of the Proclamation by the President, a zero fee will remain in effect indefinitely. Importers must continue to observe all the other requirements imposed by the Proclamation, including the requirement that they obtain licenses prior to the importation of petroleum and petroleum products.

#### FOR FURTHER INFORMATION CONTACT:

Martin J. Berrigan (Office of Oil Imports), Economic Regulatory Administration, 2000 M Street NW., Room 6222, Washington, D.C. 20461, (202) 653-3443

Robert D. R. de Sugny (Office of General Counsel), Department of Energy, 1000 Independence Avenue SW., Forrestal Building, Room 6F-094, Washington, D.C. 20585, (202) 252-2900

William L. Webb (Office of Public Information), Economic Regulatory Administration, 2000 M Street NW., Room 110-B, Washington, D.C. 20461, (202) 653-3511.

#### SUPPLEMENTAL INFORMATION:

Proclamation 3279 was amended in 1973 in order to impose per barrel license fees of \$0.21 on crude oil and \$0.63 on unfinished oils and finished products. Since that time the domestic and international oil markets have experienced significant changes. Domestic markets were made subject to price and allocation controls pursuant to the Emergency Petroleum Allocation Act, while international markets have experienced large price increases and fluctuating levels of supply. In order to meet those rapidly changing conditions, the amount of the fees has been changed on several occasions and the original \$0.21 and \$0.63 license fees have been suspended entirely since April 1979. The suspension was extended most recently in June of this year in order to provide time for a reassessment of the need for the \$0.21 and \$0.63 fees (Presidential Proclamation 4766, 45 FR 41899, June 23, 1980). At that time, no provision was made for the reimposition of any particular fee. Therefore, the license fee will remain at the zero level as long as the President does not take any further action to amend Proclamation 3279.

All other requirements of Proclamation 3279, as amended, remain in effect, which means that licenses still

must be obtained from the Office of Oil Imports prior to the importation of petroleum and petroleum products. Section 213.35(a)(6) of the Mandatory Oil Import Program's regulations, contained in Title 10 of the Code of Federal Regulations, provides that licenses shall remain valid for such period as a zero fee is in effect. Therefore, an otherwise valid license may continue to be used by an importer despite the fact that a December 31, 1980, expiration date may appear on the face of the license. The foregoing does not apply to licenses issued for the exchange of Canadian crude oil under section 213.28(b) of the regulations; such licenses are valid for one year from the date of issuance unless fees are reimposed or the license is completely utilized at an earlier date.

Issued in Washington, D.C., December 22, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

BILLING CODE 6450-01-M

## Mapco, Inc.; Proposed Consent Order

**AGENCY:** Economic Regulatory Administration, Department of Energy.

**ACTION:** Notice of proposed consent order and opportunity for comment.

**SUMMARY:** The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) announces a proposed Consent Order and provides an opportunity for public comment on the proposed Consent Order and on potential claims against the refunds deposited in an escrow account established pursuant to the Consent Order.

Comments by: January 29, 1981.

**ADDRESS:** Send comments to Alan L. Wehmeyer, Chief, Crude Products Program Management Branch, Central Enforcement District, 324 East 11th Street, Kansas City, Missouri 64106.

**FOR FURTHER INFORMATION CONTACT:** Alan L. Wehmeyer, Chief, Crude Products Program Management Branch, Central Enforcement District, 324 East 11th Street, Kansas City, Missouri 64106. Phone (816) 374-5932.

**SUPPLEMENTARY INFORMATION:** On December 2, 1980, the Office of Enforcement of the ERA executed a proposed Consent Order with Mapco, Inc. ("Mapco"). Under 10 CFR, 205.199(b), a proposed Consent Order which involves a sum of \$5,000 or more in the aggregate, excluding penalties and interest, becomes effective only after the

DOE has received comments with respect to the proposed Consent Order. Although the ERA has signed and tentatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate an alternative Consent Order.

### I. The Consent Order

Mapco, with its home office located in Tulsa, Oklahoma, is engaged in the processing and sale of natural gas liquids (NGL) and NGL products, and is subject to the Mandatory Petroleum and Allocation and Price Regulations at 10 CFR Parts 210, 211, and 212. To resolve certain civil actions which could be brought by the Office of Enforcement of the Economic Regulatory Administration as a result of its audit of Mapco, the ERA Office of Enforcement and Mapco entered into a Consent Order, the significant terms of which are as follows:

1. The Office of Enforcement has examined Mapco's books and records and reviewed all pertinent matters relating to Mapco's compliance with the DOE petroleum price regulations in effect during the period from September 1, 1973 through October 31, 1980. All civil matters pertaining to compliance with the DOE petroleum price regulations and prices charged by Mapco in sales of NGL and NGL products during the period September 1, 1973 through October 31, 1980 are resolved by this Consent Order.

2. Mapco will refund the aggregate amount of \$31,500,000, which includes interest through the date on which the Consent Order becomes effective, plus further interest as specified in the Consent Order. In addition, Mapco will reduce by \$15,097,160 the amount of increased product costs incurred but not recovered as of September 30, 1980, and otherwise available for recovery in sales of covered NGL products after September 30, 1980.

3. Execution of the Consent Order constitutes neither an admission by Mapco nor a finding by DOE that Mapco has violated any statutes or applicable regulations of the Cost of Living Council, the Federal Energy Office, the Federal Energy Administration or the Department of Energy.

4. The provisions of 10 CFR 205.199], including the publication of this Notice, are applicable to the Consent Order.

### II. Disposition of Refunded Overcharges

In this Consent Order, Mapco agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of

Enforcement, ERA, arising out of the transactions specified in I.1. above, the sum of \$31,500,000 within 60 months after the Consent Order becomes effective. Refunded overcharges will be distributed as follows:

a. With respect to its sales of propane through Thermogas, Inc. (Thermogas), Mapco will, beginning on the first day of the first month after the effective date of this Consent Order and continuing until such refund is completed, implement price reductions of not more than eight cents (\$.08) per gallon but not less than one cent (\$.01) per gallon in its sales of propane through Thermogas, in order to accomplish a refund in the aggregate of \$22,500,000.

b. With respect to its sales of NGL products through Mapco Products Company (Mapco Products), Mapco agrees to refund the sum of \$9,000,000, plus interest, in the form of checks made payable to the United States Department of Energy and delivered to the Assistant Administrator for Enforcement, ERA. These funds will remain in a suitable account pending the determination of their proper disposition.

The DOE intends to distribute the refund amounts in a just and equitable manner in accordance with applicable laws and regulations. Accordingly, distribution of such refunded overcharges requires that only those "persons" (as defined at 10 CFR 205.2) who actually suffered a loss as a result of the transactions described in the Consent Order receive appropriate refunds. Because of the petroleum industry's complex marketing system, overcharges may have been passed through as higher prices to subsequent purchasers or offset through devices such as the Old Oil Allocation (Entitlements) Program, 10 CFR 211.67. In fact, the adverse effects of the overcharges may have become so diffused that it is a practical impossibility to identify specific, adversely affected persons, in which case disposition of the refunds will be made in the general public interest by an appropriate means such as payment to the Treasury of the United States pursuant to 10 CFR 205.199(a).

### III. Submission of Written Comments

A. *Potential Claimant:* Interested persons who believe that they have a claim to all or a portion of the refund amount should provide written notification to the ERA at this time. Proof of claims is not now being required. Written notification to the ERA at this time is requested primarily for the purpose of identifying valid potential claims to the refund amount.

After potential claims are identified, procedures for the making of proof of claims may be established. Failure of a person to provide written notification of a potential claim within the comment period for this notice may result in the DOE irrevocably disbursing the funds to other claimants or to the general public interest.

B. *Other Comments:* The ERA invites interested persons to comment on the terms, conditions, or procedural aspects of this Consent Order. You should submit your comments or written notification of a claim within 30 days after publication of this notice to Alan L. Wehmeyer, Chief, Crude Products Program Management Branch, ERA Central Enforcement District, U.S. Department of Energy, 324 East 11th Street, Kansas City, Missouri 64106. You may obtain a free copy of the Consent Order by writing to the same address.

You should identify your comments or written notification of a claim on the outside of your envelope and on the documents you submit with the designation, "Comments on Mapco Consent Order." We will consider all comments we receive within 30 days after the publication of this notice. You should identify any information or data which is, in your opinion, confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Kansas City, Missouri, on the 4th day of December 1980.

William D. Miller,

*District Manager, Economic Regulatory Administration.*

Concurrence:

Robert J. Wehrle-Einhorn,

*Acting Chief Enforcement Counsel.*

BILLING CODE 6450-01-M

## Federal Energy Regulatory Commission

[Project No. 3273]

### Chittenden Falls Hydro Power, Inc., Application for Short-Form License (Minor)

December 19, 1980.

Take notice that Chittenden Falls Hydro Power, Inc. (Applicant filed on July 30, 1980, an application for license pursuant to the Federal Power Act, 16 U.S.C. 791 (a)-825 (r) for construction and operation of a water power project to be known as Chittenden Falls Hydroelectric Project No. 3273. The project would be located on Kinderhook Creek at Stockport in Columbia County, New York. Correspondence with the Applicant should be directed to: Mary

A. Eckhoff, Box 806, Melville, Long Island, New York 11747.

**Project Description**—The project would consist of existing project works including: (1) a reinforced concrete dam, 320 feet long and 4 feet high, set on a natural rock ledge at the top of waterfalls 27 feet high; (2) a reservoir of negligible storage at surface elevation 59.8 feet m.s.l.; (3) a timber sluiceway 8 feet wide, 8 feet deep, and 69 feet long; (4) a steel penstock, 90 inches in diameter and 46 feet long; (5) a powerhouse, 50 feet long and 30 feet wide, containing a 440-HP turbine and a 178-HP turbine; (6) a tailrace channel; and new project works to include (7) two horizontally mounted replacement generators, one rated at 300 kW and one rated at 125 kW, attached to the 440 HP turbine and 178 HP turbine, respectively; and (8) other appurtenances. Applicant estimates annual generation would average 2.5 million kWh.

**Purpose of Project**—Project energy would be sold to Niagara Mohawk Power Corporation.

**Agency Comments**—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments within the time set below, it will be presumed to have no comments.

**Competing Applications**—Anyone desiring to file a competing application must submit to the Commission, on or before February 23, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than June 23, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c), as amended, 44 FR 61328 (October 25, 1979). A competing application must conform with the requirements of 18 CFR 433 (a) and (d), as amended, 44 FR 61328 (October 25, 1979).

**Comments, Protests, or Petitions to Intervene**—Anyone desiring to be heard or to make any protests about this application should file a petition to

intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1979). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before February 23, 1981. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-171-000]

#### Duke Power Co.; Supplement to Electric Power Contract

December 19, 1980.

Take notice that Duke Power Company (Duke Power) tendered for filing on December 15, 1980 a supplement to the Company's Electric Power Contract with Blue Ridge Electric Cooperative, Inc. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 142.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following new delivery point: Delivery Point No. 19 with a designated demand of 4,500 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of February 18, 1981.

According to Duke Power copies of this filing were mailed to Blue Ridge Electric Cooperative, Inc. and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825

North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 9, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the preceding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-172-000]

#### Duke Power Co.; Supplement to Electric Power Contract

December 19, 1980.

Take notice that Duke Power Company (Duke Power) tendered for filing on December 15, 1980 a supplement to the Company's Electric Power Contract with Pee Dee Electric Membership Corporation. Duke Power states that this contract is on file with the Commission and has been designated Duke Power Company Rate Schedule FERC No. 137.

Duke Power further states that the Company's contract supplement, made at the request of the customer and with agreement obtained from the customer, provides for the following increase in designated demand: Delivery Point No. 3 from 2,000 KW to 2,100 KW.

Duke Power indicates that this supplement also includes an estimate of sales and revenue for twelve months immediately preceding and for the twelve months immediately succeeding the effective date. Duke Power proposes an effective date of November 19, 1980.

According to Duke Power copies of this filing were mailed to Pee Dee Electric Membership Corporation and the North Carolina Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 9, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to

the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. RP81-23-000]

### El Paso Natural Gas Co.; Petition for Relief

December 19, 1980.

Take notice that on December 9, 1980, El Paso Natural Gas Company ("El Paso"), a Delaware corporation, whose mailing address is Post Office Box 1492, El Paso, Texas, 79978, filed, on behalf of five (5) customers served by El Paso's interstate pipeline system,<sup>1</sup> pursuant to Section 1.7 of the Commission's Rules of Practice and Procedure, a petition for relief from the unauthorized overrun gas provisions set forth in El Paso's currently effective FERC Gas Tariff.

The instant petition states that El Paso's experience in administering said unauthorized overrun gas provisions has made it aware that such provisions fail to take into account the possibility that mechanical failure or human error may result in daily deliveries to El Paso's customers in excess of their daily entitlement. By reason of mechanical failure and/or human error, customers can and do inadvertently receive gas in excess of daily entitlements, thereby unnecessarily incurring daily overrun penalties. Upon request by certain of its customers for a joint review of El Paso's penalty invoices, it has been determined that five (5) of El Paso's interstate pipeline system customers have been assessed penalty charges resulting from mechanical failures or human errors, and that a request for relief therefrom is appropriate. El Paso states that in four of the five instances referred to, the error arose in a system that was installed for the purpose of more accurately controlling gas flows and thus preventing overruns. Further, in all five instances, the problem was remedied as soon as it was recognized. In El Paso's view, given the unintentional nature of the overruns, which occurred despite (and, perhaps even as a consequence of) the efforts made by the parties to keep overruns from occurring, it would be inequitable in the extreme, and serve no good

purpose, to require the customers to absorb the subject overrun penalties.

The petition states further that the overrun penalties in question constitute an inequitable financial burden on each of those five customers. El Paso therefore requested that the Commission expeditiously grant the relief sought by this petition.

Any person desiring to be heard or to make any protest with reference to said petition should, on or before Jan. 6, 1981, file with the Federal Energy Regulatory Commission Washington, D.C., 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations Under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 4 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this petition if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the authorization is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for El Paso to appear or be represented at the hearing.

**Kenneth F. Plumb,**  
*Secretary.*

[FR Doc. 80-40375 Filed 12-29-80; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 1651]

### Lower Valley Power and Light, Inc.; Application for Amendment of License

December 19, 1980.

Take notice that on October 14, 1980, Lower Valley Power and Light, Inc. (Licensee) filed an application pursuant to the Federal Power Act, 16 U.S.C.

791(a)—825(r), for amendment of its license for its Upper and Lower Swift Creek Project, FERC No. 1651, located on the Swift Creek, in the Bridger-Teton National Forest, Lincoln County, Wyoming. Correspondence with the Applicant should be directed to: M. Boyd A. Parker, General Manager, Lower Valley Power and Light, Inc., P.O. Box 188, Afton, Wyoming 83110, and CH2M Hill, Attention: Loren A. Baker, P.O. Box 428, Corvallis, Oregon 97330.

Applicant requests that its license be amended to authorize the following proposed changes in the project: (1) at the upper development, replace all 7,000 feet of the existing unserviceable 36-inch diameter penstock with a new 48-inch diameter concrete penstock; (2) at the lower penstock; (b) construct a new development; (a) replace the previously removed 1,200-foot long 54-inch diameter wood stave penstock with a new 2,000-long penstock; (b) construct a new powerhouse about 800 feet downstream from the existing unserviceable powerhouse; and (c) install two new turbine-generator units, one rated at 250 kW and one rated at 500 kW; and (3) at both developments, install new appurtenant electrical facilities to include switchgear, transformers, and protective devices.

Rehabilitation of the project will also include limited dredging of reservoirs, and at the lower dam, earthwork to repair eroded areas of the downstream toe of the dam, and other necessary dam embankment repairs.

The above described proposed changes in the project will increase the total installed capacity of the project from 980 kW to 1,340 kW. Annual energy production of the rehabilitated project will be 7,000,000 kWh which is equivalent to saving 11,500 barrels of oil or 3,249 tons of coal.

Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before February 9, 1981. The

<sup>1</sup>The five customers are: Arizona Public Service Company, ASARCO Incorporated—Hayden, Arizona, Magma Copper Company, Phelps Dodge Corporation and Southern Union Gas Company.

Commission's address is: 825 N. Capital Street, NE, Washington, D.C. 20426. The application is on file with the Commission and is available for public inspection.

Lois D. Cashell,  
Acting Secretary.

[FR Doc. 80-40369 Filed 12-29-80; 8:45 am]  
BILLING CODE 6450-85-M

[Docket No. ER81-175-000]

### Missouri Utilities Co.; Proposed Change in Rates

December 19, 1980.

Please take notice that on December 15, 1980, Missouri Utilities Company, of Cape Girardeau, Missouri, pursuant to Section 205 of the Federal Power Act and Part 35 of the Commission's Regulations thereunder, tendered for filing a change in rates applicable to electric service rendered to its Southeast Missouri wholesale electric customers. These changes in rates are proposed to become effective customers. These changes in rates are proposed to become effective as of February 13, 1981. Missouri Utilities Company indicates that the proposed changes in rates are to compensate Missouri Utilities Company primarily for increased power costs and to provide an adequate return on investments relative to the effected customers.

Missouri Utilities Company states that its current wholesale rates in Southeast Missouri are deficient by \$201,680.47 annually based on sales volumes for the test year ended June 30, 1980, as set forth in the statements accompanying its Notice of Change in Rates.

Copies of the proposed rate schedules and their revenue effect have been served upon the Missouri Utilities Company's effected wholesale customers namely the Missouri Cities of Jackson, Malden and Kennett.

Any person desiring to be heard to protest said notice should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 9, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Missouri Utilities Company's proposed tariff sheets and rate filings

are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,  
Secretary.

[FR Doc. 80-40370 Filed 12-29-80; 8:45 am]  
BILLING CODE 6450-85-M

[Project No. 3622-000]

### Mitchell Energy Company, Inc.; Application for Preliminary Permit

December 19, 1980.

Take notice that Mitchell Energy Company, Inc. (Applicant) filed on October 31, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for the proposed Mississippi Lock & Dam No. 8 Hydroelectric Project, FERC No. 3622 to be located at the U.S. Army Corps of Engineers Mississippi Lock and Dam No. 8, a navigational aid project, on the Upper Mississippi River near Genoa, Wisconsin, Vernon County, Wisconsin. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Mitchell L. Dong, 173 Commonwealth Avenue, Boston, Massachusetts 02116. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

**Project Description**—The proposed project would utilize and existing U.S. Army Corps of Engineers' lock and dam. Project No. 3622 would consist of: (1) a proposed powerhouse located below the existing dam and equipped with turbine/generator units with a total capacity of approximately 14 megawatts; (2) proposed transmission lines; and (3) appurtenant facilities. Applicant's facilities would be located on U.S. land.

The Applicant estimates that the average annual energy output would be 86,000,000 kWh.

**Purpose of Project**—Energy produced at the proposed project would be purchased by a local utility in the Genoa area.

**Proposed Scope and Cost of Studies under Permit**—Applicant has requested a 24 month permit to prepare a definitive project report, including preliminary design and economic feasibility studies, hydrological studies, environment and social studies, soil and foundation data. The cost of the aforementioned activities along with obtaining agreements with other Federal, State and local agencies is estimated to be \$50,000.

**Purpose of Preliminary Permit**—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

**Agency Comments**—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

**Competing Applications**—Anyone desiring to file a competing application must submit to the Commission, on or before February 23, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than April 24, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

**Comments, Protests, or Petitions to Intervene**—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before February 23, 1981.

**Filing and Service of Responsive Documents**—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3622.

Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First St., N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Lois D. Cashell,  
Acting Secretary.

[FR Doc. 80-40371 Filed 12-29-80; 8:45 am]  
BILLING CODE 6450-85-M

**[Project No. 3553]**

**Rauniker, Inc.; Application for Preliminary Permit**

December 19, 1980.

Take notice that Rauniker, Inc. (Applicant) filed on October 9, 1980, an application for preliminary permit pursuant to the Federal Power Act, 16 U.S.C. 791(a)—825(r) for proposed Project No. 3553 to be known as the Lowell Water Power Project located on Spring River and Shoal Creek in Cherokee County, Kansas. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Richard L. Rauniker, President, Rauniker, Inc., 220 Fairway Drive, Carl Junction MO 64834. Lowell Dam is owned by the Empire District Electric Company. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

**Project Description**—The proposed project would be operated primarily run-

of-river with limited storage capacity for peaking operation and would consist of: (1) an existing dam comprising a 1,100-foot-long spillway section, an 800-foot-long earth embankment, and a 475-foot-long, 40 feet high, concrete gravity section containing five spillway bays; (2) an 826-acre reservoir having a normal water surface elevation of 807.25 feet msl; (3) existing penstocks requiring repair; (4) a powerhouse integral with the dam's concrete gravity section requiring rehabilitation and which would contain generating units with a total rated capacity between 2,300 kw and 4,200 kw; (5) a tailrace; (6) a new transmission line; and (7) appurtenant facilities.

The Applicant estimates that the average annual energy output would be between 9,500,000 kWh and 12,000,000 kWh.

**Purpose of Project**—Project energy would be sold to The Empire District Electric Company.

**Proposed Scope and Cost of Studies under Permit**—Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be \$53,200.

**Purpose of Preliminary Permit**—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

**Agency Comments**—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

**Competing Application**—Anyone desiring to file a competing application must submit to the Commission, on or before February 23, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than April 24, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

**Comments, Protests, or Petitions to Intervene**—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before February 23, 1981.

**Filing and Service of Responsive Documents**—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3553. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W. Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must

also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Lois D. Cashell,  
Acting Secretary.

[FR Doc. 80-40372 Filed 12-29-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER81-173-000]

**Vermont Electric Power Company, Inc.; Rate Schedule Filing**

December 19, 1980.

Take notice that on December 15, 1980, Vermont Electric Power Company, Inc. (VELCO) tendered for filing a rate schedule containing a lease agreement between VELCO and Citizens Utilities Company dated as of August 1, 1980, and an addendum thereto.

VELCO states that the service to be rendered under this rate schedule consists of the use by Citizens of a 15/20 MVA transformer which is owned by VELCO. The purpose of the addendum is to revise Section 8 of the agreement which concerns Repairs and Replacement.

The estimated monthly charge under this agreement is \$764. The basis of the charge is one-twelfth of the annual amount determined by multiplying the original cost of the facilities involved by fifteen percent. Since the revenue from these charges will be credited to the state there will be no change in VELCO's overall rate of return and no cost of service studies were prepared in connection with the derivation of the rate.

VELCO further states that as a result of unavoidable delay in resolving certain aspects of negotiations for this rate schedule, VELCO was not able to file the schedule in a timely manner. In addition, it was necessary to submit the agreement to the Vermont Public Service Board for approval. As a result of these circumstances VELCO could not comply with the notice requirements of § 35.11 since the circumstances described constitute a good cause for a waiver. Approval of this agreement was granted by the Vermont Public Service Board.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 9, 1981. Protests will be considered by the Commission in determining the

appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,  
Secretary.

[FR Doc. 80-40373 Filed 12-29-80; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. RP81-10-001]

**Western Gas Interstate Co.; Motion To Place Tariff Sheets Into Effect and Proposed PGA Rate Adjustment (Revised)**

December 19, 1980.

Take notice that on December 2, 1980, Western Gas Interstate Company (Western) filed (1) Western's Motion To Place Tariff Sheets Into Effect in FERC Docket No. RP81-10-001; (2) Substitute Sixteenth Revised Sheet No. 3A; and (3) Western's agreement and undertaking to comply with the terms and conditions of Section 154.67 of the Commission's Regulations. Said tariff sheet is proposed to become effective on December 2, 1980, pursuant to the Commission's "Order Accepting For Filing And Suspending Certain Tariff Sheets, Subject To Refund And Rejecting Other Tariff Sheets", issued on November 28, 1980. Western states that the proposed rate changes filed in this docket on October 31, 1980, have been modified by the concurrent filing of "Substitute Sixteenth Revised Sheet No. 3A: to its FERC Gas Tariff, Original Volume No. 1, to reflect on intervening purchased gas cost change.

Western also states that the rates filed in its "Substitute Fifteenth Revised Sheet No. 3A", reflected an increased rate of .01¢ per Mcf in Western's Rate Schedule G-N calculated on the revised rates filed by Colorado Interstate Gas Company (CIG) in Docket No. TA81-1-32 (PGA81-1)(IP81-1) dated October 22, 1980. Thus, Western's "Substitute Sixteenth Revised Sheet No. 3A" reflects those rates originally filed in this proceeding and the increased CIG rate under Rate Schedule G-N.

Western states that copies of this filing were served upon Western's transmission system customers and the interested state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of

Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 6, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,  
Secretary.

BILLING CODE 6450-85-M

**ENVIRONMENTAL PROTECTION AGENCY**

[OPTS-50026; TSH, FRL 1715-2]

**Enviro Control, Inc.; Data Transfer to Contractor**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of data transfer.

**SUMMARY:** EPA's contractor, Enviro Control, Inc. (ECI) is assisting EPA in reviewing information submitted by chemical manufacturers under the Toxic Substances Control Act (TSCA) on certain chemicals as part of EPA's evaluation of the ecological impact of those chemicals for purposes of proposing testing requirements under Section 4 of TSCA. Some of the information ECI will review may be claimed confidential.

**DATE:** The transfer of information to ECI will begin no sooner than January 14, 1981.

**FOR FURTHER INFORMATION CONTACT:** John B. Ritch, Jr., Director, Industry Assistance Office (TS-799), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, 202/544-1404 or toll-free 800/424-9065.

**SUPPLEMENTARY INFORMATION:** Under Section 4(e) of TSCA, the TSCA Interagency Testing Committee (ITC) has periodically recommended lists of chemicals or categories of chemicals to EPA for priority testing under TSCA Section 4. The agency is analyzing available information, including physicochemical properties, environmental distribution, aquatic toxicity and ecological impact, on these substances in order to determine what testing, if any, to propose. Among the sources of this information are reports submitted to EPA by manufacturers in response to requests for information on the chemicals recommended for testing

by the ITC in compliance with Section 4 of TSCA. Some of the information in these reports may be claimed confidential.

ECI will assist EPA in its evaluation of the ecological impact of the chemicals or categories of chemicals under study (Contract Nos. 68-01-6147, 68-01-6149, and 68-01-6150). In doing so, it will need to review the reports submitted by industry, some of which may contain Confidential Business Information. On completion of its task, ECI will return all originals and copies of documents containing confidential information to the EPA Document Control Officer.

Pursuant to 40 CFR 2.306(j), EPA has determined that in certain instances it will be necessary for ECI to have access to Confidential Business Information to satisfactorily perform its work under these contracts. In accordance with provisions of its contracts with EPA, ECI is required to safeguard from any unauthorized disclosure the Confidential Business Information it receives from EPA. Information generated by ECI from its review of Confidential Business Information will also be treated as confidential.

ECI has been authorized under the EPA/TSCA Confidential Business Information Security Manual to have access to Confidential Business Information. A security plan for ECI has been approved. EPA has conducted the required inspection of the ECI facilities and has found them to be in compliance with the requirements of the Manual. ECI is required to treat all TSCA Confidential Business Information in accordance with the requirements of that Manual.

(Section 4 of TSCA (Pub. L. 94-469, 90 Stat. 2003, 15 U.S.C. 2601 et. seq.))

Dated: December 15, 1980.

Warren R. Muir,

*Deputy Assistant Administrator for Toxic Substances.*

[FR Doc. 80-40471 Filed 12-29-80; 8:45 am]

BILLING CODE 6560-31-M

[A-4-FRL 1715-1]

**Standards of Performance for New Stationary Sources; National Emissions Standards for Hazardous Air Pollutants; Delegation of Authority to the State of North Carolina**

**AGENCY:** Environmental Protection Agency.

**ACTION:** Informational notice.

**SUMMARY:** Sections 111(c) and 112(d) of the Clean Air Act permit EPA to delegate to the states the authority to implement and enforce the standards set

out in 40 CFR Part 60, Standards of Performance for New Stationary Sources (NSPS) and in 40 CFR Part 61, National Emission Standards for Hazardous Air Pollutants (NESHAPS). On May 2, 1980, the State of North Carolina asked EPA to delegate to it authority for NSPS and NESHAPS promulgated between March 1976 and July 1, 1979. EPA granted the State's request on October 22, 1980. The State now has authority to implement and enforce NSPS for ferroalloy production facilities, kraft pulp mills, lime manufacturing plants, and grain elevators, and NESHAPS for vinyl chloride. Applications and reports required under these regulations should be sent to the State's Division of Environmental Management rather than to EPA Region IV.

**EFFECTIVE DATE:** October 22, 1980.

**ADDRESSES:** Applications and reports required under all NSPS and NESHAPS promulgated prior to July 1, 1979, should be addressed to the Division of Environmental Management, North Carolina Department of Natural Resources and Community Development, P.O. Box 27687, Raleigh, North Carolina 27611, rather than to EPA Region IV.

**FOR FURTHER INFORMATION CONTACT:** Walter Bishop of the EPA Region IV, Air Programs Branch, telephone 404/881-3043 or FTS 257-3043.

**SUPPLEMENTARY INFORMATION:** On November 24, 1976, EPA delegated to North Carolina authority to implement and enforce the NSPS and NESHAPS that had been promulgated through March 23, 1976 (see 41 FR 56886, December 30, 1976). On May 2, 1980, the State requested that EPA delegate to it authority for the NSPS and NESHAPS promulgated in the period between March 23, 1976, and July 1, 1979. Delegation of these standards was made by the following letter on October 22, 1980. (Copy of Rebecca Hanmer's Letter to Neil Grigg.)

Effective immediately, all applications, reports, and other correspondence required under the NSPS for ferroalloy production facilities, kraft pulp mills, lime manufacturing plants, and grain elevators, and NESHAPS for vinyl chloride should be sent to the North Carolina Division of Environmental Management (see address above) rather than to the EPA Region IV office in Atlanta.

(Sections 111(c) and 112(d) of the Clean Air Act (42 U.S.C. 7411(c) and 7412(d))

Dated: December 15, 1980.

John A. Little,  
*Acting Regional Administrator.*  
October 22, 1980.

Dr. Neil S. Grigg,  
*Director, Division of Environmental Management, North Carolina Department of Natural Resources & Community Development, P.O. Box 27687, Raleigh, North Carolina*

Dear Dr. Grigg: On November 24, 1976, we delegated to the State of North Carolina the authority for implementation and enforcement of the Standards of Performance for New Stationary Sources (NSPS) and the National Emission Standards for Hazardous Air Pollutants (NESHAPS) that had been promulgated by EPA as of March 23, 1976. On May 4, 1976, February 23, 1978, March 7, 1978, and August 3, 1978, EPA promulgated NSPS for ferroalloy production facilities, kraft pulp mills, lime manufacturing plants, and grain elevators, respectively, on October 21, 1976, EPA promulgated NESHAPS for vinyl chloride. In your letter of May 2, 1980, you requested that EPA delegate to the State of North Carolina the authority for implementation and enforcement of these new Federal regulations.

As stated in our letter of November 24, 1976, we have reviewed the pertinent laws of the State of North Carolina and your rules and regulations and have determined that they provide an adequate and effective procedure for implementing and enforcing the NSPS and NESHAPS in the State of North Carolina. Therefore, we hereby delegate our authority for the implementation and enforcement of the NSPS and NESHAPS to the State of North Carolina as follows:

A. Authority for all sources located or to be located in the State of North Carolina subject to the Standards of Performance for New Stationary Sources for ferroalloy production facilities, kraft pulp mills, lime manufacturing plants, and grain elevators promulgated in 40 CFR Part 60 as of the date of this letter.

B. Authority for all sources located or to be located in the State of North Carolina subject to the National Emission Standards for Hazardous Air Pollutants for vinyl chloride promulgated in 40 CFR Part 61 as of the date of this letter.

This delegation is based upon the same conditions as those stated in our letter of November 24, 1976, except that condition 5, relating to Federal facilities, has been voided by the Clean Air Act Amendments of 1977. A copy of the November 24, 1976, letter was published in the Notices section of the Federal Register of December 30, 1976 (41 FR 56886), along with the associated rulemaking notifying the public that certain reports and applications required from operators of new sources shall be submitted to the State of North Carolina (41 FR 56805). All those conditions except condition 5, relating to Federal facilities, are hereby incorporated into this delegation by reference. A notice announcing this delegation will be published in the Federal Register in the near future.

Since this delegation is effective immediately, there is no need for the State to notify EPA of its acceptance. Unless we receive from you written notice of objections

within ten days of the date on which you receive this letter, the State of North Carolina will be deemed to have accepted all of the terms of the delegation.

Sincerely yours,

Rebecca W. Hammer,  
Regional Administrator.

[FR Doc. 80-40472 Filed 12-29-80; 8:45 am]

BILLING CODE 6560-38-M

[OPTS-59039A; TSH FRL 1714-6]

**Ammonium Salt of Substituted Alkyl Phosphoric Acid; Approval of Test Marketing Exemption**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** On October 8, 1980, EPA received an application for a test marketing exemption (TM-80-44) from the premanufacturing notification requirements of section 5 of the Toxic Substances Control Act (TSCA). The manufacturer has claimed its identity confidential.

EPA has determined that the manufacturer's test marketing of this chemical substance will not present any unreasonable risk of injury to health or the environment. Therefore, the Agency has granted this manufacturer an exemption from the TSCA premanufacture reporting requirements for test marketing of the substance in the manner described in the application.

**DATE:** Interested persons may submit written comments on or before January 29, 1981.

**ADDRESS:** Written comments to: Document Control Officer (TS-793), Management Support Division, Office of Pesticide and Toxic Substances, Environmental Protection Agency, Rm. E-447, 401 M Street, S.W., Washington, D.C. 20460, (202-755-8050).

**FOR FURTHER INFORMATION CONTACT:** Kirk Maconaughey, Chemical Control Division (TS-794), Environmental Protection Agency, 401 M St., S.W., Washington, D.C. 20460 (202-426-3936).

**SUPPLEMENTARY INFORMATION:** Under section 5 of TSCA, anyone who intends to manufacture or import a new chemical substance for commercial purposes in the United States must submit a notice to EPA before manufacture or import begins. A "new" chemical substance is one that is not on the Inventory of existing chemical substances compiled by EPA under section 8(b) of TSCA. Section 5(a)(1) requires each premanufacture notice (PMN) to be submitted in accordance with section 5(d) and any applicable requirements of section 5(b). Section

5(d)(1) defines the contents of a PMN and section 5(b) contains additional reporting requirements for certain new chemical substances.

Section 5(h), "Exemptions", contains several provisions for exemptions from some or all of the requirements of section 5. In particular, section 5(h)(1) authorizes EPA, upon application, to exempt persons from any requirement of section 5(a) or section 5(b), to permit them to manufacture or process chemical substances for test marketing purposes. To grant an exemption, the Agency must find that the test marketing activities will not present any unreasonable risk of injury to health or the environment. EPA must either approve or deny the application within 45 days of its receipt, and under section 5(h)(6) the Agency must publish a notice of its disposition in the *Federal Register*. If EPA grants a test marketing exemption, it may impose restrictions on the test marketing activities.

The application was assigned test marketing exemption number TM 80-44. Due to administrative error, EPA failed to publish in the *Federal Register* notice of receipt of the application. EPA has granted this Test Market Exemption Application and the submitter is proceeding with his test marketing activities, however interested persons will have until January 29, 1981, to submit comments on this test marketing exemption. All comments will be reviewed and evaluated by the Agency, and should new information be brought to EPA's attention the decision to grant the exemption may be modified.

The manufacturer claimed its identity, the specific chemical identity of the chemical and the specific use of the chemical as confidential business information.

The substance is described generically as ammonium salt of substituted alkyl phosphoric acid; its generic use is as a materials coating. Six thousand, six hundred pounds of the substance will be manufactured as an approximate 50 percent solution during the test marketing period not to exceed six months. EPA has established that the test marketing of TM 80-44, under the conditions set out in the application, will not present any unreasonable risk of injury to health or the environment for the reasons explained below.

While the company provided no information on the test market substance they did supply toxicity data on a very close structural analogue. The acute toxicity level for that analogue (acute oral LD<sub>50</sub>) was approximately 7 grams/kilogram. The analogue was found to be minimally irritating in an eye irritation study. No other adverse

chronic health effects were noted for this close structural analogue. The Agency believes that the data submitted on the analogue is representative of that expected for the test market substance.

No significant worker exposure to the substance is expected. The product will be manufactured in a closed system. The reaction is instantaneous and complete. There are no by-products. The substance, a materials coating, is applied mechanically with no worker exposure. Consumer exposure to the test market substance is very limited. The substance once applied to products is complexed and then further sealed, making it unavailable for consumer uptake. Environmental release of the substance will be low and is not judged to be a concern.

Based on the facts and information obtained and reviewed, EPA grants the manufacturer a test marketing exemption for TM 80-44, effective immediately, but subject to all conditions set out in the exemption application, and in particular those enumerated below:

1. This exemption is granted solely to this manufacturer.
2. The applicant must maintain records of the date(s) of shipment(s) to the one customer specified in the application who will test market the substance, and the quantities shipped in each shipment, and must make these records available to EPA upon request.
3. Each bill of lading that accompanies a shipment of the substance during the test marketing period must state that the use of the substance is restricted to that described to EPA in the test marketing exemption application.
4. The production volume of the new substance may not exceed the quantity of 6,600 pounds described in the test market application.
5. The test marketing activity approved in this notice is limited to a 6 month period commencing on the date of publication of the notice in the *Federal Register*.
6. The substance will be manufactured in a closed system as specified in the application.
7. The number of workers, both manufacturers and processors' should not exceed that specified in the application and the exposure levels and duration of exposure should not exceed that specified.
8. The Agency reserves the right to rescind its decision to grant this exemption should any new information come to its attention which indicates that the substance may present an unreasonable risk of injury to human health or the environment.

Dated: December 22, 1980.

Douglas M. Costle,  
Administrator.

[FR Doc. 80-40388 Filed 12-29-80; 8:45 am]

BILLING CODE 6560-31-M

[OPTS-59038A; TSH-FRL 1714-5]

**Polymer of: D-Glucose; Succinic Acid; Propanoic Acid, 2-Oxo; and Galactose; Approval of Exemption Application**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** On October 6, 1980, EPA received an exemption application for test marketing purposes from Kelco, Division of Merck and Co., Inc. The Test Marketing Exemption (TME) case number assigned to the substance was T80-43. EPA has determined that the manufacturer's test marketing of the chemical substance will not present any unreasonable risk of injury to health or the environment. Therefore, the Agency has granted the manufacturer an exemption from the TSCA premanufacture reporting requirements for test marketing in the manner described in the application. The exemption is effective immediately.

**FOR FURTHER INFORMATION CONTACT:** Robert W. Jones, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Room E-208, Washington, DC 20460 (202-426-8815).

**SUPPLEMENTARY INFORMATION:** Under section 5 of TSCA anyone who intends to manufacture or import a new chemical substance for commercial purposes in the United States must submit a notice to EPA before manufacture or import begins. A "new" chemical substance is one that is not on the Inventory of existing substances compiled by EPA under section 8(b) of TSCA. Section 5(a)(1) requires each premanufacture notice (PMN) to be submitted in accordance with section 5(D) and any applicable requirements of section 5(b). Section 5(d)(1) defines the contents of a PMN and section 5(b) contains additional reporting requirements for certain new chemical substances.

Section 5(h), "Exemptions," contains several provisions for exempt from some or all of the requirements of section 5. In particular, section 5(h)(1) authorizes EPA, upon application, to exempt persons from any requirement of section 5(a) or section 5(b), to permit them to manufacture or process chemical substances for test marketing purposes. To grant an exemption, the Agency must

find that the test marketing activities will not present an unreasonable risk of injury to health or the environment. EPA must either approve or deny the application within 45 days of receipt, and under section 5(h)(6) the Agency must publish a notice of its disposition in the Federal Register. If EPA grants a test marketing exemption, it may impose restrictions on the test marketing activities.

On October 6, 1980, EPA received an application from Kelco, Division of Merck and Co. Inc., for an exemption from the requirements of section 5(a) and 5(b) of TSCA, to manufacture a copolymer of D-glucose; succinic acid; propanoic acid, 2-oxo; galactose for test marketing purposes.

A Federal Register notice published on November 10, 1980 (45 FR 74563) announced receipt of the exemption application and summarized information submitted by Kelco. The Federal Register notice requested comments on the appropriateness of granting the exemption. However, the Agency received no public comments concerning the application. Review of the TME application raised little or no concern with regard to health and environmental effects from the TME substance.

Considering both the toxicity and exposure, the Agency has determined that the manufacture, production, and use of this substance, in the manner described in the test market application, will not present any unreasonable risk to the people who come into contact with it during manufacture, processing, or use. There are no environmental concerns with the release or disposal of this substance. Thus, the Agency has decided to grant a test market exemption to Kelco, Division of Merck Co. Inc., for the limited manufacture of the substance as described in the test marketing exemption application.

At least 90 days prior to manufacturing the substance listed in the application for commercial purposes other than test marketing or in small quantities solely for research and development activities, the manufacturer must submit a premanufacture notice (PMN) as required under section 5(a) of TSCA. This exemption is granted solely to the applicant of TME T80-43 with the following provisions.

1. That the company not exceed the production amounts specified on the test market application;
2. That worker exposure not exceed the levels specified;
3. That the company only use the TME substance for the purpose described in the test market application and in other

contacts between EPA and the submitter;

4. That the company maintain records of customers to whom the test market substance has been given or sold and that these records may be inspected by EPA;

5. That each shipment contains a statement informing the recipient that the substance shipped may only be used for the purpose allowed in the exemption;

6. The Agency reserves the right to rescind its decision to grant this exemption should any new information come to its attention which indicates that the substance may present an unreasonable risk of injury to human health or the environment.

Section 5(h)(6) of TSCA requires EPA to approve or deny a test marketing exemption within 45 days of its receipt by the Agency. The 45-day period for this exemption application expired on November 20, 1980. EPA regrets the delay in approving this application. However, simultaneously with the processing of test marketing exemption applications, EPA is Charged by TSCA with the task of examining a much larger number of premanufacture notices. The health and environmental implications associated with these notices are generally more significant and widespread than those associated with a test marketing exemption application, requiring EPA to preferentially allocate its very limited resources to the examination of the notices. In the near future EPA will communicate a set of informal guidelines to regulated industry that will help EPA make Test Marketing Exemption Application decisions in a more timely manner.

Dated: December 22, 1980.

Douglas M. Costle,  
Administrator.

Programs Branch M/S 629,  
Environmental Protection Agency, 1200  
Sixth Avenue, Seattle, Washington  
98101.

**SUPPLEMENTARY INFORMATION:**

**Background Information**

For several years, EPA has provided financial assistance to the State of Oregon to aid the Department of Environmental Quality (DEQ) in administration of its air pollution control program. This assistance has been provided through a grant under Section 105 of the Clean Air Act [42 U.S.C. 7405(b)].

Section 105 of the Clean Air Act prevents award of such grants where the recipient agency's:

Expenditures of non-Federal funds for other than noncurrent expenditures for air pollution control programs will be less than its expenditures were for such programs during the preceding fiscal year, unless the Administrator, after notice and opportunity for public hearing, determines that a reduction in expenditures is attributable to a nonselective reduction in expenditures in the programs of all executive branch agencies of the applicable unit of Government.<sup>1</sup>

The Oregon DEQ has budgeted 24 percent (24%) fewer dollars from its general fund for the air program in 1981. DEQ has provided EPA with information indicating that (1) the programs of all agencies of the executive branch of State government have also been scheduled for a reduction in expenditures (although the percentage reductions vary somewhat from agency to agency) and (2) the air pollution control program and DEQ have not been selectively targeted by the State for a disproportionate reduction in funding.

**Request for Comments—Opportunity for Hearing**

On October 23, 1980 (45 FR 70313), EPA published in the *Federal Register* a request for public comment on the intent to award a grant and also provided an opportunity to request a public hearing.

<sup>1</sup> Authority to award Section 105 grant awards was delegated to the Regional Administrators on January 28, 1976. [EPA Delegations Manual, Chapter 7, Item 1.]

The same notification also appeared in the public notice section of the *Oregonian Journal* on October 24, 1980 (page A24).

The notice established November 24, 1980 for a tentative public hearing on this matter. The hearing was to be cancelled if no request for a hearing was received. No request for such a hearing was received. However, at the appointed time and place, an EPA representative was present to receive public comments had anyone appeared.

**Response to Comments**

Three written comments were received during the comment period. The Washington Department of Ecology, the State's air agency, expressed full support of EPA's intended action to award the grant.

Comments were also received from the State of New Hampshire's Air Resources Commission and the State of Maine's Department of Environmental Protection. Both recognized that Section 105 of the Clean Air Act allows States to reduce the State funding for air programs if EPA determines the budget reduction is a "nonselective reduction in expenditures in programs of all executive branches of the applicable unit of government," but felt the reduction would set an unfortunate national precedent. Due to the extensive documentation provided by Oregon, indicating that this cut was not selective, EPA believes no unfortunate national precedent will be set.

**Evaluation of Oregon's Reduction in Expenditures**

A considerable amount of documentation was submitted by the State of Oregon to substantiate that the cut was not selective. Based upon this documentation, it appears that the Oregon reduction was in the State's general fund and was applied to all executive branches of government using the same criteria. Variations in the level of funding cuts among the various State agencies were also due to other factors, such as the need to maintain essential services and to minimize personnel layoffs. Based on the documentation submitted, EPA could find no evidence that the State's air program was deliberately chosen for a disproportionately large reduction. The briefing memorandum supporting this decision and documentation from Oregon supporting the determination are available on request from Laurie M. Kral at the address listed above as well as at the document locations listed.

**Intended Action**

Finding that the procedural requirements have been met and that Oregon's 1980 statewide budget cuts are nonselective, Region 10 has awarded a grant to the State of Oregon to assist the Oregon Department of Environmental Quality in the funding of its air pollution control program for the Federal fiscal year 1981.

Dated: December 18, 1980.  
L. Edwin Coate,  
Acting Regional Administrator.

**FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL**

**Request for Comments on the Feasibility and Usefulness of Requiring Depository Institutions Which Make Small Business Loans To Compile and Publicly Disclose Information Regarding Such Loans.**

**AGENCY:** Federal Financial Institutions Examination Council.

**ACTION:** Notice of request for comments.

**SUMMARY:** The Federal Financial Institutions Examination Council (Council), which is composed of representatives of the Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation, Federal Home Loan Bank Board, National Credit Union Administration and Office of the Comptroller of the Currency, is required by Section 311(d) of the Housing and Community Development Act of 1980 (Pub. L. 96-399) to conduct a study to assess the feasibility and usefulness of requiring depository institutions which make small business loans to compile and publicly disclose information regarding such loans. The results of this study are to be reported to the House and Senate Banking Committees not later than March 1, 1981.

As part of its study, the Council requests comment from the public—including small businesses, financial institutions, community organizations, trade associations and the academic community—on the general feasibility and usefulness of public disclosure of small business loan activity and on various issues related to method of disclosure should such a requirement be deemed appropriate.

**DATE:** Comments must be received on or before February 17, 1981.

**ADDRESS:** Comments should be sent to David K. Schweitzer, Deputy Executive Secretary, Federal Financial Institutions

Examination Council, Eighth Floor, 490, L'Enfant Plaza SW, Washington, DC, 20219.

**FOR FURTHER INFORMATION CONTACT:** David K. Schweitzer, Deputy Executive Secretary, Federal Financial Institutions Examination Council, (202) 287-4206.

**SUPPLEMENTARY INFORMATION:** The Congressional call for this study on small business loan disclosures appears to have originated from a concern in some communities that lenders are giving insufficient attention to the credit needs of small business, especially those located in low- and moderate-income neighborhoods. It has been suggested that small business lending patterns in a community can be identified most effectively by requiring public disclosure of the small business lending activities of local depository institutions, just as public disclosure of mortgage lending data under the Home Mortgage Disclosure Act (HMDA) is seen by many as useful in identifying mortgage lending patterns.

Although the mandatory disclosure of small business lending activity might be judged both feasible and useful in an absolute sense, the Council requests that all comments be directed to the relative value of such disclosures in terms of real costs and benefits. Depository institutions should consider carefully the additional demands such a disclosure requirement would place on their business operations, and potential users of the data should describe clearly the benefits the proposed disclosures would provide to them.

For purposes of the issues raised below, the term "depository institution" means any commercial bank, savings bank, savings and loan association, credit union, or similar institution (including any majority-owned subsidiaries) the deposits or accounts of which are insured by an agency of the federal government or which is regulated by any agency of the federal government. The definition of "small business loan" is open for comment under Issue A2. In general, however, "business loans" may be considered to include all credit extended to any natural person, business, or organization, which is not considered "consumer credit" under Federal Reserve Regulation Z, Truth in Lending (TIL), and is exempted from TIL disclosure requirements on the basis of 12 CFR 226.3(a).<sup>1</sup>

<sup>1</sup> Regulation Z (12 CFR 226) Section 226.2(p) states in part "consumer credit" means credit offered or extended to a natural person . . . primarily for personal, family, household or agricultural purposes." The exemption in Section 226.3(a) covers "extensions of credit to organizations, including

**ISSUES: A. Specific Issues. 1. Definition of "Small Business."** If disclosure of small business lending activity were to be required, the term "small business" would have to be defined. Possible definitions could be based upon the complex eligibility standards established by the small Business Administration (SBA) for use in its various programs, simplified variations of the SBA standards (e.g., abbreviated Standard Industrial Classification, asset size, and employee count), or a single criterion such as number of employees at the borrowing firm. Comment is requested on the advantages and disadvantages of various approaches to defining "small business" and specifically on the feasibility of using number of employees as the determinant. Comments should include discussion of whether the borrower characteristics needed for a particular definition are currently recorded by financial institutions; and, if not, whether the information is readily available from borrowers and the anticipated expense of modifying recordkeeping systems to collect it. If SBA guidelines were used to define the size of a business, information such as sales, asset size, employment, etc., would have to be recorded on a consolidated basis where the borrowing business was a subsidiary or division of a larger commercial enterprise. What effect would imposing this procedure have on the lender's ability to collect required information and on the utility of the resulting data to community users? Alternatively, would disclosures based on unconsolidated information relating only to the local borrower (e.g., the subsidiary) have any value?

**2. Definition of "Small Business Loan."** The Council seeks comment on whether all credit granted to a borrower meeting the definition of "small business" should be considered a small business loan for disclosure purposes. Where the lender has more than one department approving various types of credit to small businesses, what difficulties, if any, could be encountered in attempting to consolidate loan data from multiple departments? Should a line of credit be counted as one loan for the total amount at the time it is established, or should each draw against that line be counted as a separate loan? Are there other unique commercial credit arrangements that could complicate disclosures?

**3. Loan Data.** HMDA requires mortgage loan data to be compiled in terms of number of loans and total

governments, or for business or commercial purposes, other than agricultural purposes."

dollar amounts (of original principle originated or purchased). Considering that commercial loans are less homogeneous in character than residential mortgages, comment is sought on the appropriate loan data disclosures for small business loans. Comment is specifically requested on the feasibility and usefulness of separating disclosures on the basis of such criteria as (a) purpose of loan, (b) term of loan, or (c) conventional versus government guaranteed. The Council also requests comment on whether disclosures should be broken down by the borrower's type of industry. For example, what added costs and benefits would result if loans were separated on the basis of the nine basic industry groups identified by U.S. Standard Industrial Classification numbers?

**4. Data Aggregation and Itemization.** HMDA requires that institutions with offices in standard metropolitan statistical areas (SMSA's) disclose mortgage loan data aggregated by SMSA and that, within SMSA's, data be itemized by census tract. HMDA also provides that reporting institutions record aggregated data on lending outside of the SMSA without itemization. The Council requests comment on whether similar requirements would be feasible and useful for disclosures of loans to small businesses. What kind of geographic information is routinely recorded on commercial loan applications? If a borrower operates at multiple locations, what additional information would have to be recorded to allow identification of the business location receiving primary benefit of the credit extended? What additional costs would be incurred in this process? If no single location receives the primary benefit, how should such a loan be identified geographically for disclosure purposes?

Specific comment on the feasibility and usefulness of compiling and disclosing small business loan data in non-SMSA (e.g., rural) areas is also requested.

**5. Exemptions.** Section 309 of HMDA (and Section 203.3(a)(1) of Regulation C-12 CFR 203) specifically exempts depository institutions with less than \$10 million in assets from mortgage loan disclosure requirements. The Council solicits comment on whether a similar exemption would be appropriate with regard to any requirement for small business loan disclosures. Views on the role of small institutions in providing credit to small businesses and on what effect exclusion of small institution loan data would have on the usefulness of disclosures would be helpful.

B. Summary Issues. 1. General Feasibility. In addition to the foregoing specific issues the Council requests comment, especially from depository institutions, on the overall increase in cost of operations that would result from required small business loan disclosures. Would such costs be variable or fixed, one time or recurring, related to the size of the institution, etc.? In addition, the Council requests comment on whether past cost/benefit experience under HMDA is relevant to the recording and disclosure of small business loans. What unique characteristics of business lending might pose special problems not found with disclosures of mortgage lending activity? How can such problems be overcome and at what cost? Commentors are requested to substantiate their conclusions on this issue by describing in detail the factors considered.

2. General Usefulness. Potential users of disclosures of small business loan activity are assumed to be primarily the same groups currently using HMDA data (i.e., community action groups, local and state government agencies, private and government researchers, the federal financial regulatory agencies, etc.) plus the business community itself. The Council requests comment from all categories of potential users on what specific needs or problems currently exist which they expect to be satisfied or resolved by requiring depository institutions to compile and publicly disclose information regarding loans to small businesses. The Council considers it important for potential users to substantiate both that information is needed and that public disclosure of small business lending by depository institutions would be the most effective means of obtaining it.

Any person or organization wishing to comment on the issues outlined above may do so by filing a written submission with the Council. See DATE and ADDRESS at the beginning of this Notice. All submissions will become part of the record and will be available for public review.

Dated: December 22, 1980.

Robert J. Lawrence,  
Executive Secretary, Federal Financial  
Institutions Examination Council.

Marie Giblin,  
Office of the Comptroller of the Currency,  
Communications Division.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Assistant Secretary for  
Health

### National Center for Health Care Technology; Scientific Evaluation of Medical Technology

The National Center for Health Care Technology (Center) announces that it is beginning a scientific evaluation of the clinical safety and effectiveness of the Bentonite flocculation test, DNA antibody test, mycoplasma complement fixation test, Kunkel test, and joint scans used in the diagnosis and treatment of rheumatoid arthritis. Based on this evaluation, a recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. Any person or group wishing to provide the Center with information relevant to this evaluation should do so in writing no later than March 2, 1981. To enable the Center's staff to give appropriate consideration to any literature references or analyses of clinical data, a written summary no longer than 10 pages should be attached to any such material submitted.

Written material should be submitted to: National Center for Health Care Technology, Room 17A-29, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

**FOR FURTHER INFORMATION CONTACT:** Stephen P. Heyse, M.D., M.P.H., Health Science Analyst, National Center for Health Care Technology, Room 17A-29, Parklawn Building, Rockville, Maryland 20857, (301) 443-4990.

Dated: December 22, 1980.

Wayne C. Richey, Jr.,

Acting Executive Secretary, Office of Health  
Research, Statistics, and Technology.

### Food and Drug Administration

[FDA-225-81-3000]

#### Medical Treatment Standards for Methadone Treatment Programs; Memorandum of Understanding With National Institute on Drug Abuse

**AGENCY:** Food and Drug Administration.  
**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration has executed a memorandum of understanding (MOU) with the National Institute on Drug Abuse. The purpose of the MOU is to describe the cooperative relationship and procedures to be followed by both

the National Institute on Drug Abuse and the Food and Drug Administration in implementing the jointly published Narcotic Addict Treatment regulations. The MOU will help reduce the likelihood of inconsistent interpretations of the regulations.

**EFFECTIVE DATE:** November 20, 1980.

**FOR FURTHER INFORMATION CONTACT:** Edwin V. Dutra, Jr., Bureau of Drugs (HFD-30), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-6490.

**SUPPLEMENTARY INFORMATION:** The Comprehensive Drug Abuse Prevention and Control Act of 1970 (CDAP&C Act) as amended, assigned to the Secretary of Health and Human Services (HHS) a number of responsibilities regarding the treatment of narcotic addicts. The Secretary delegated these responsibilities to the Director, National Institute on Drug Abuse (NIDA) and the Commissioner, Food and Drug Administration (FDA) (see 37 FR 27646, December 19, 1972; 38 FR 27315, October 2, 1973; and 21 CFR 5.1). Because of the unavoidable overlap in certain of these delegated responsibilities, FDA and NIDA have agreed to enter into this memorandum of understanding (MOU). This MOU will help reduce the likelihood of inconsistent interpretations of the jointly published regulations on narcotic addict treatment (see 45 FR 62694; September 19, 1980).

Under the notice published in the *Federal Register* of October 3, 1974 (39 FR 35697) stating that future memoranda of understanding and agreements between FDA and others would be published in the *Federal Register*, the following memorandum of understanding is issued:

**Memorandum of Understanding Between the National Institute on Drug Abuse and the Food and Drug Administration**

#### I. Purposes

The purposes of this MOU are: (a) to describe the cooperative relationship and procedures to be followed by the National Institute on Drug Abuse (NIDA) and the Food and Drug Administration (FDA) in implementing the jointly published narcotic addict treatment regulations; (b) to establish a mechanism that ensures a systematic and timely input from NIDA to FDA about decisions on the operation of narcotic treatment programs under those regulations; and (c) to reduce the likelihood of inconsistent interpretations of those regulations. This agreement does not affect FDA's authority to make and issue all final decisions under the regulations.

#### II. Background

In 1974 the Controlled Substances Act (CSA), Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970

(CDAP&C Act), was amended by the Narcotic Addict Treatment Act (NATA). The NATA was intended primarily to establish the basis for more control of narcotic addict treatment programs by the Drug Enforcement Administration (DEA) and the Department of Health and Human Services (HHS) to prevent diversion of narcotic drugs, and to ensure proper treatment of narcotic addicts. The NATA amended the CSA to provide for registration (through DEA) of practitioners conducting narcotic treatment programs. The fundamental purpose of the NATA, according to its legislative history, is to increase the Government's control over methadone and other narcotic drugs used in the treatment of narcotic addicts. This additional control would both ensure proper treatment and prevent diversion. The legislative history of the NATA further states that it is intended to complement the DEA and HHS controls in force at the time of enactment and to establish the basis for additional joint regulation of treatment programs by these two agencies.

The NATA, among other things, gives the Secretary of HHS authority to establish treatment standards for practitioners who use narcotic drugs for either maintenance or detoxification treatment of persons dependent upon narcotic drugs. Practitioners providing this treatment obtain a special registration which must be renewed annually from the Attorney General (through DEA) and, as a condition of registration, must comply with standards established by the Secretary. Under the NATA (21 U.S.C. 823(g)), the Secretary must (a) determine if an applicant/practitioner is qualified, and (b) determine if the applicant/practitioner will comply with the standards about the quantities of narcotic drugs which may be provided for unsupervised use by persons in such treatment and then report this determination to DEA. As noted above, HHS responsibilities under the NATA are carried out by FDA and NIDA.

In 1975 the Commissioner of Food and Drugs and the Director, National Institute on Drug Abuse agreed to jointly publish revisions to the methadone regulations. Accordingly, in 1977 they proposed a revision of the treatment standards. The final revised treatment standards were recently published in the Federal Register on Friday, September 19, 1980 (45 FR 62694). This revision of the methadone regulations includes the Secretary's treatment standards under the NATA.

### III. Substance of Agreement

#### A. FDA agrees to the following terms:

1. FDA will continue to inspect and monitor narcotic addict treatment programs for compliance with the jointly published treatment standards.

2. Before issuing a letter of noncompliance to a narcotic addict treatment program, FDA will provide NIDA with a draft copy of the letter, send to NIDA the supporting information upon which the action is based, and obtain NIDA's written recommendation as to whether the letter should issue.

3. Before notifying the DEA not to certify a treatment program under the jointly published standards, FDA will provide NIDA

with a draft copy of the notice, send to NIDA the supporting information upon which the action is based, and obtain NIDA's written recommendation as to whether the notice should issue.

4. Before granting or denying an exemption under section (d)(12) of the jointly published treatment standards, FDA will notify NIDA of the request for an exemption, send to NIDA the information supporting the request, and obtain NIDA's written recommendation as to whether to grant or deny the request. However, if the request involves a medical emergency or an exception for a specific patient, the notification may be made orally by telephone or in person.

5. FDA will notify NIDA in writing before taking action which is contrary to NIDA's recommendations under items 2, 3, and 4 above.

6. FDA will make the final determination in matters which relate to safety and effectiveness of drugs or to the approval of new drugs to be used in the treatment of narcotic addicts.

#### B. NIDA agrees to the following terms:

1. Within seven (7) days of receipt of the information from FDA described in items 2 and 3 above, NIDA will give FDA its written recommendation and, in the event of disagreement with a proposed FDA action, state the reason(s) for disagreement including, when appropriate, a recommended alternative action.

2. Within ten (10) days of receipt of the information from FDA described in item 4 above, NIDA will give FDA its written recommendation.

3. In the event of disagreement with a proposed FDA action, NIDA will state the reasons for disagreement including, when appropriate, a recommended alternative action. However, if the request involves a medical emergency or an exception for a specific patient, the recommendation may be made orally by telephone or in person.

#### C. NIDA and FDA agree to the following terms:

1. Jointly publish any future revisions of the methadone treatment regulations;

2. Consult each other before issuing interpretations and opinions under the treatment standards which would have broad policy implications; and

3. Consult each other on the need to update, develop, or revise the regulations and policy affecting narcotic addict treatment.

### IV. Name and Address of Participants

A. National Institute on Drug Abuse, 5600 Fishers Lane, Rockville, MD 20857.

B. Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

### V. Liaison Officers

A. Liaison Officer for NIDA: Mr. Nathan M. Kight, National Institute On Drug Abuse, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4877.

B. Liaison Officer for FDA: Mr. Edwin V. Dutra, Jr., Food and Drug Administration (HFD-30), 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

### VI. Period of Memorandum of Understanding

This agreement becomes effective when signed by both parties and remains in effect

until it is terminated. This agreement may be terminated by either agency upon 90 days' advance written notice to the other.

### VII. Revisions

Revisions to this agreement may be made by mutual consent of the agencies.

Approved and accepted for the Food and Drug Administration:

By: Mark Novitch for Jere E. Goyan,  
Title: Commissioner of Food and Drugs.  
Date: November 20, 1980.

Approved and accepted for the National Institute on Drug Abuse:

By: William Pollin,  
Title: Director, National Institute on Drug Abuse.  
Date: October 30, 1980.

*Effective date.* This memorandum of understanding becomes effective November 20, 1980.

Dated: December 22, 1980.

**William F. Randolph,**

*Acting Associate Commissioner for Regulatory Affairs.*

## Health Services Administration

### Filing of Annual Reports of Federal Advisory Committees

Notice is hereby given that pursuant to section 13 of Pub. L. 92-463, the Annual Reports for the following Health Services Administration Federal Advisory Committees have been filed with the Library of Congress:

National Advisory Council on the National Health Service Corps  
National Advisory Council on Migrant Health

Maternal and Child Health Research Grants Review Committee.

Copies are available to the public for inspection at the Library of Congress, Newspaper and Current Periodical Reading Room, Room 1026, Thomas Jefferson Building, Second Street and Independence Avenue, S.E. Washington, D.C. or weekdays between 9:00 a.m. and 4:30 p.m. at the Department of Health and Human Services, Department Library, North Building, Room 1436, 300 Independence Avenue, S.W., Washington, D.C. 20201, Telephone (202) 245-6791.

Copies may be obtained from the following committee contacts:

*National Advisory Council on the National Health Service Corps*—Mr. Billy Sandlin, Bureau of Health Personnel Development and Service, Room 6-05, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-4434.

*National Advisory Council on Migrant Health*—Mr. Jaime L. Manzand,

Bureau of Community Health Services,  
Room 7A-55, Parklawn Building, 5600  
Fishers Lane, Rockville, Maryland 20857,  
Telephone (301) 443-1153.

*Maternal and Child Health Research  
Grants Review Committee*—Gontran  
Lamberty, Dr. P. H., Bureau of  
Community Health Services, Room 7-15,  
Parklawn Building, 5600 Fishers Lane,  
Rockville, Maryland 20857, Telephone  
(301) 443-2190.

Dated: December 17, 1980.

**William H. Aspden, Jr.,**

#### Office of Human Development Services

#### White House Conference on Aging; Technical Committee on Creating an Age-Integrated Society: Implications for the Family; Meeting

The White House Conference on  
Aging Technical Committee was  
established to provide scientific and  
technical advice and recommendations  
to the National Advisory Committee of  
the 1981 White House Conference on  
Aging and to the Executive Director of  
the 1981 White House Conference on  
Aging in developing issues to be  
considered and to produce technical  
documents to be used by the  
Conference.

Notice is hereby given pursuant to the  
Federal Advisory Committee Act,  
(Public Law 92-463, 5 U.S.C. App. 1, sec.  
10, 1976) that the Technical Committee  
on Creating an Age-Integrated Society:  
Implications for the Family will hold  
their next meeting Wednesday, January  
14, 1981, from 9:00 a.m. until 5:00 p.m. at  
the Andrus Gerontology Center,  
University of Southern California, Los  
Angeles, California 90007.

The purpose of the meeting will be to:  
(1) complete review of technical paper  
by committee (Chapters I, II, III were  
reviewed on 12/12/80) and (2) to review  
Chapters IV and V on Policy and  
Recommendations, and the chapter on  
Ethnic Families.

Further information on the Technical  
Committee meeting may be obtained  
from Mr. Jerome R. Waldie, Executive  
Director, White House Conference on  
Aging, Room 4059, 330 Independence  
Avenue, S.W., Washington, D.C. 20201,  
telephone (202) 245-1914. Technical  
Committee meetings are open for public  
observation.

Dated: December 22, 1980.

#### White House Conference on Aging; Technical Committee on Creating an Age-Integrated Society: Implications for Education; Meeting

The White House Conference on  
Aging Technical Committee was  
established to provide scientific and  
technical advice and recommendations  
to the National Advisory Committee of  
the 1981 White House Conference on  
Aging and to the Executive Director of  
the 1981 White House Conference on  
Aging in developing issues to be  
considered and to produce technical  
documents to be used by the  
Conference.

Notice is hereby given pursuant to the  
Federal Advisory Committee Act,  
(Public Law 92-463, 5 U.S.C. App. 1, sec.  
10, 1976) that the Technical Committee  
on Creating an Age-Integrated Society:  
Implications for Education will hold  
their next meeting Monday, January 19,  
1981 and Tuesday, January 20, 1981 from  
9 a.m. until 5 p.m. each day. The meeting  
will be held at the Institute of  
Gerontology at the University of  
Michigan, 520 E. Liberty Street, Ann  
Arbor, Michigan 48108.

The purpose of the meeting will be to  
review draft of committee report for  
revisions and finalization.

Further information on the Technical  
Committee meeting may be obtained  
from Mr. Jerome R. Waldie, Executive  
Director, White House Conference on  
Aging, Room 4059, 330 Independence  
Avenue, SW., Washington, D.C. 20201,  
telephone (202) 245-1914. Technical  
Committee meetings are open for public  
observation.

#### White House Conference on Aging; Technical Committee on Creating an Age-Integrated Society: Implications for Societal Institutions; Meeting

The White House Conference on  
Aging Technical Committee was  
established to provide scientific and  
technical advice and recommendations  
to the National Committee of the 1981  
White House Conference on Aging and

to the Executive Director of the 1981  
White House Conference on Aging in  
developing issues to be considered and  
to produce technical documents to be  
used by the Conference.

Notice is hereby given pursuant to the  
Federal Advisory Committee Act,  
(Public Law 92-463, 5 U.S.C. App. 1, sec.  
10, 1976) that the Technical Committee  
on Creating an Age-Integrated Society—  
Implications for Societal Institutions will  
convene its fourth meeting on Friday,  
January 16, 1981 and Saturday, January  
17, 1981 from 9:30 am until 5:30 pm each  
day. The meeting will be held in Room  
403-425A at the Hubert H. Humphrey  
Bldg., 200 Independence Avenue, S.W.,  
Washington, D.C. 20201.

The purpose of the meeting will be to  
review segments of the draft final report  
and to make plans for the completion of  
the committee's report.

Further information on the Technical  
Committee meeting may be obtained  
from Mr. Jerome R. Waldie, Executive  
Director, White House Conference on  
Aging, Room 4059, 330 Independence  
Avenue, S.W., Washington, D.C. 20201,  
telephone (202) 245-1914. Technical  
Committee meetings are open for public  
observation.

Dated: December 22, 1980.

#### White House Conference on Aging; Technical Committee on the Family, Social Services and Other Support Systems; Meeting

The White House Conference on  
Aging Technical Committee was  
established to provide scientific and  
technical advice and recommendations  
to the National Advisory Committee of  
the 1981 White House Conference on  
Aging and to the Executive Director of  
the 1981 White House Conference on  
Aging in developing issues to be  
considered and to produce technical  
documents to be used by the  
Conference.

Notice is hereby given pursuant to the  
Federal Advisory Committee Act,  
(Public Law 92-463, 5 U.S.C. App. 1, sec.  
10, 1976) that the Technical Committee  
on the Family, Social Services and Other  
Support Systems will convene its final  
meeting on Thursday, January 15, 1981  
from 9:00 am until 5:00 pm in Room 5542  
at HHS-North Bldg., 330 Independence  
Avenue, S.W., Washington, D.C. 20201.

The purpose of the meeting will be to  
review the final draft of the policy paper  
and to approve the recommendations.

Further information on the Technical Committee meeting may be obtained from Mr. Jerome R. Waldie, Executive Director, White House Conference on Aging, Room 4059, 330 Independence Avenue, S.W., Washington, D.C. 20201, telephone (202) 245-1914. Technical Committee meetings are open for public observation.

Dated: December 22, 1980.

##### **Cinnamyl Anthranilate; for Possible Carcinogenicity; Availability**

Cinnamyl anthranilate (CAS 87-29-6) has been tested for cancer-causing activity with rats and mice in the Bioassay Program of the national Toxicology Program. A report is available to the public.

*Summary:* A bioassay of cinnamyl anthranilate (a synthetic flavoring agent) for possible carcinogenicity was conducted by administering the test chemical in food to F344 rats and B6C3F1 mice.

It was concluded that under the conditions of this bioassay cinnamyl anthranilate was carcinogenic for male and female B6C3F1 mice, including increased incidences of hepatocellular carcinomas or adenomas. The test chemical was also carcinogenic for male F344 rats, inducing low incidences of acinar-cell carcinomas or adenomas of the pancreas and adenocarcinomas or adenomas of the renal cortex. Cinnamyl anthranilate was not carcinogenic for female F344 rats.

Single copies of the report, Bioassay of Cinnamyl anthranilate for Possible Carcinogenicity (T.R. 196), are available from the Office of Cancer Communications, National Cancer Institute, Building 31, Room 10A21.

National Institutes of Health, Bethesda, Maryland 20205.

### Bureau of Land Management

#### Federal-Private Cooperative Coal Leasing Proposal

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Request for public comment on the Federal-private cooperative coal leasing proposal.

**SUMMARY:** Under the Mineral Leasing Act of 1920, as amended, the Secretary

of the Interior is responsible for managing a program for the competitive leasing of Federal coal. In addition, he is to ensure that Federal coal is leased at its fair market value. Considerations for ensuring receipt of fair market value were studied by a Department of the Interior task force that concluded its efforts in the spring of 1980.

One of the recommendations of the Fair Market Value Task Force on Federal coal leases was to enhance Federal coal sale competition by working cooperatively with private coal owners to jointly market coal from potential logical mining units comprised of both Federal and private coal. A cooperative leasing procedure would be of significant benefit to the systematic development of private-Federal mixed ownership coal, especially checkerboard coal. Acting on the task force's recommendation, a working group within the Department has designed a proposed method for cooperative leasing which it hopes to apply in the October 1981 lease sale in the Green River-Hams Fork Federal Coal Region in northwest Colorado and southwest Wyoming. This method and its benefits, costs, and potential problems are described in the enclosed appendix. The two suitable tracts for cooperative leasing, Red Rim and China Butte, are juxtaposed with the lands owned by Rocky Mountain Energy Company. Rocky Mountain Energy Company and the Department have already conducted preliminary discussions concerning the possibility of cooperative leasing on these tracts.

The public is invited to comment on the validity of this specific cooperative leasing proposal, as well as the concept of cooperative leasing itself; to suggest modifications to the proposed methods; or to suggest other means to accomplish the same ends. The next step in the process, following analysis of comments, will be to enter into formal negotiations with Rocky Mountain Energy Company over cooperative leasing.

**DATES:** Written comments will be received on or before January 29, 1981.

**ADDRESS:** Send comments to Director (160), Bureau of Land Management, 18th & C Streets, N.W. Washington, D.C. 20240.

**FOR FURTHER INFORMATION CONTACT:** Ryan Dudley, Office of Coal Management, Bureau of Land Management, (202) 343-4537.

Dated: December 22, 1980.

Ed Hastey,

Associate Director, Bureau of Land Management.

## Appendix—Federal-Private Cooperative Coal Leasing Proposal

### 1. Introduction

This country has vast reserves of coal. Its coal deposits are widely distributed and vary greatly in quality and value. Much of this coal is privately owned and with a few notable exceptions, namely certain concentrated railroad holdings, private ownership is widely dispersed. The States also own significant reserves. However, the most significant single owner of U.S. coal reserves is the United States Government and most of these reserves are located in the West.

The "checkerboard" pattern of ownership occurs in some of the richest coal fields in the West, such as the Green River Basin in Wyoming. This pattern may have a significant effect on the development of U.S. coal and competition for Federal coal leases. Checkerboarding occurs where alternate sections of land are owned by the United States and a private landowner or corporation, most often a railroad company or its affiliate. Coal deposits in many areas of these checkerboard regions underlie a number of sections of land owned by the government and private parties, making efficient development of the deposit as a single economic unit difficult. Unless these coal deposits are controlled through lease or ownership by a single operator, the coal deposit may be mined piecemeal in a manner that is neither efficient nor economical. When a coal deposit underlies unleased Federal lands and adjoining privately owned land, the competitive interest in the unleased Federal coal may also be diminished because prospective Federal lessees may be uncertain of their ability to arrive at satisfactory contractual agreements with the adjoining private owner or owners. Also, the time needed to bring a Federal lease into production in a checkerboard area may be significantly lengthened by the extra time needed for land assembly. In short, the checkerboard pattern of ownership may constitute a significant impediment to efficient mining of coal in the checkerboard, may reduce the value of any Federal lease to a potential bidder, and may reduce competition as well. The total effect may be inefficient mining of the coal, a loss in the Department's effectiveness in meeting leasing targets, and a significant reduction in Federal leasing revenues.

### II. The Concept of Cooperative Leasing

The most serious problems created by checkerboarding may be overcome if it is possible to obtain and package all the rights that are necessary for efficient mining of a potential logical mining unit prior to the sale so that the entire package can be put up for bid. Competition could then assure that the public receives a fair return from the sale of the Federal coal. Efficient development of the coal resources would also be promoted, many costly uncertainties would be eliminated, and, if the packaging can be done cheaply, there may be significant savings in transaction costs. Therefore, it is important to explore the possibility of packaging Federal and private rights, which we shall refer to as "cooperative leasing," prior to leasing Federal deposits. If cooperative leasing is adopted, the winning bidder for a Federal lease will have the opportunity to acquire all the public and private property rights that are required for efficient mining. If packaging takes place prior to auction, it eliminates the most serious problems presented by a checkerboard. There are a number of important practical and theoretical questions associated with the concept of cooperative leasing. For example, one question is what legal or procedural means should be used to effect the cooperation? This is important because different procedures have very different implications for risk bearing, capital requirements, and the need for revenue sharing rules, etc. A second question is which party should initiate the cooperative agreement: the government, one of the private parties owning rights that would be included in the package, or a third party acting as a broker? A third question is whether a workable and fair rule for sharing revenues can be defined and implemented. The list of possible questions regarding the hows and wherefores of cooperative leasing is a long one. The department believes these questions can best be answered by the experience gained through attempting to conduct a cooperative lease sale. The following discussion outlines the procedure the Department might follow for such a trial run.

### III. Current Proposal for Cooperative Leasing

Even though several Department studies have been done relating to the question of cooperative leasing, a great many technical issues still need resolution for it to become a reality. Up until now, no single preferred method has been developed by, or presented to, the Department. This proposal came

about as a result of the Secretary's commitment that the Department make every attempt to find a feasible way to include one "unitized" tract in the first Green River-Hams Fork regional lease sale in 1981.

As a result of this commitment, a task group set up under the guidance of the Office of Coal Leasing, Planning and Coordination has selected a workable method from among all the prior proposals. The task force has rejected, as far as this first attempt is concerned, all methods of cooperative leasing which do not meet certain, basic criteria. These criteria include the following:

1. The proposal must provide for *pre-sale* packaging of Federal and private coal. This has no applicable precedents in Federal mineral leasing. The unitization procedures common to oil and gas are *post-sale* procedures and do not solve the problems in holding a competitive sale in a checkerboard area.

2. Any lease terms affecting the value of the lease must be the same in both the public and private leases.

3. The Department has no legal authority for compulsory pre-sale packaging of Federal and private tracts; nor is it clear that such authority would be purely beneficial. Consequently, we must rely upon a voluntary agreement between the Department and willing private coal owners.

4. The proposal must be in accord with all current laws and regulations governing Federal coal leasing.

5. A potential additional criterion would provide that the private cooperator could not participate in the sale as a bidder.

With these criteria in mind, the task group sifted through the numerous theoretical proposals advanced by earlier studies. The proposal presented here is one that appeared to be both feasible and relatively simple to execute. No doubt other methods also exist which meet the criteria. The task group and the Office of Coal Leasing are anxious to receive any and all such proposals for consideration. If other methods turn out to be clearly more workable, they will be adopted. At this time, however, the need is to bring the cooperative leasing concept out of the realm of theory and into a single, concrete, and workable proposal.

*A. Leasing with checkerboard ownership.*—In this proposal, we focus on specific procedures for cooperative leasing in the one case of most widespread importance, namely, checkerboard ownership. Here the government and a private owner own alternate sections of land and face each

other in a two-party bargaining situation.

In the case of a potential logical mining unit (LMU) composed of Federal coal and private coal controlled by one party, the policy objectives should be to form the potential LMU at minimum cost to society and to develop procedures that allow the public to receive a fair share of the LMU rents. Transaction costs of assembly in checkerboard potential LMU may be high both for the Department and for its future lessees. For this reason, bidders other than the private owner or a party that had already reached an understanding with the private owner might ordinarily be discouraged from bidding on the unconsolidated tract.

The bilateral situation requires that the government have the pre-sale cooperation of the private owner in order to reach agreement that his property will be put up as part of a potential logical mining unit and sold at the same time as the Federal property for specified terms. The winning bidder would thereby acquire at one sale a tract of land that can be approved and operated as an LMU without costly effort on his part.

As part of this agreement, the government and the private owner must agree on a rule by which they will split the revenues from the LMU. Because of the efficiencies of scale, the LMU will be worth substantially more than the worth of either party's tracts individually. To encourage private sector cooperation, the government should attempt to devise a sharing rule that would split the gains from forming an LMU in a way roughly proportional to each party's interests in that unit.

While the initial costs of bargaining between the government and the private owner might be substantial, once the basis for an agreement has been reached within a coal field where checkerboarding occurs, costs would be reduced for future bargaining to form additional public-private LMUs. In other words, once the basis of agreement has been established, it would likely extend without major changes to all properties and all potential LMUs in the checkerboard region. Therefore, the potential exists for a savings in the future costs associated with attempting to assemble preliminary LMUs.

In practice, the simplest way to administer cooperative leasing in the checkerboard case might be to have the private owner and the government agree on a sharing rule and then have the private owner lease to the government with written permission to sublease. Then, the entire potential logical mining unit could be offered by the government

on a competitive basis with the revenues from the lease being divided according to the preagreed sharing rule. This arrangement, however, might require legislation giving the Department of the Interior authority to lease privately owned land. An alternative arrangement would be to have competitors bid separately on the total mining unit as two individual mining units in a simultaneous sale. Here an agreement would be needed whereby the winning bidder must lease the government's land and the private land separately, but at or above a price determined by the prespecified sharing rule and the level of the winning bid for the total potential LMU. Simultaneous auctions appear too cumbersome, however. The method proposed in the following section is to conduct a single auction for the Federal coal land. The private owner would not assign any rights to the Federal Government, but would, instead, agree to offer his coal lease to the successful bidder on the Federal tract upon terms which he and the Federal Government would agree upon. For the present, sales would proceed through the variable bonus/fixed royalty bidding system. Whether deferred bonuses would be used has been decided.

**B. Federal-private cooperative coal leasing proposal.**—The task force has labeled its proposal for pre-sale coal lease packaging "Federal-Private Cooperative Coal Leasing." The intent of this proposal is to provide an opportunity for any interested party, to obtain at the same time separate leases for both Federal and private coal necessary for an efficient mining operation in a checkerboard area. The sale of the Federal coal lease will be conducted in the usual and customary manner with the winning bidder obtaining the Federal lease. By means of a pre-sale cooperative leasing agreement, the winning bidder for Federal coal would be given the opportunity also to buy the private coal.

To accomplish this, the Department would enter into a presale cooperative agreement with the private coal owner. The agreement would provide that the private coal owner would sell a private coal lease at the same time as the Federal sale to the winning bidder in the Federal sale. The agreement would also contain a key provision to fix the share of the total bonus going to the private coal owner and the amount going to the Federal Government. This allows each bidder to calculate the total amount to be spent for the entire mining unit, both Federal and private coal.

The factor referred to will be called the "Federal-Private Bid Ratio." This is simply a pre-sale announced fixed ratio between the bid on the Federal lease and the selling price on the private lease which each bidder for the Federal lease is required to adhere to. This ratio will be set by agreement between the Department and the private coal owner and will be based upon economic evaluations of the tracts and arrived at through bilateral negotiations. The minimum acceptable bid for the Federal lease and its concomitant private selling price would also be set at this ratio.

Any increase in the bid for the Federal lease above the minimum will also require raising the selling price for the private lease in order to keep the ratio constant. Thus, the high bidder in the Federal sale will always be paying a "fair" price to the private coal holder also. Of course, this system requires that royalties, rentals, and any other financial consideration be equal before the sale.

**c. Proposed agreement.**—In order to further clarify the proposed pre-sale packaging procedure, the following is the task force's outline of the terms which it believes might be included in a cooperative leasing agreement.

1. The parties agree that it would be mutually advantageous to hold coordinated sales of coal leases covering deposits of Federal and X Company coal.

2. The Department and X Company shall delineate a tract, called the combined tract, which shall not exceed 25,000 acres in size. The combined tract shall be an area of land in which the coal resources can be developed in an efficient, economical, and orderly unit with due regard to conservation of the coal reserves and other resources.

The combined tract shall be delineated from all of the following Federal lands (called the "Federal tract"): [To be described]

The combined tract shall also include all or portions of the following lands owned by X Company (called the X Company tract): [to be described]

All of the lands included in the combined tract shall be contiguous. (An alternative is for the parties to agree to a combined tract constituting a potential logical mining unit prior to entering into the agreement. The agreement would then simply recite a land description of the combined tract.)

3. The X Company shall supply to the Department all available geologic information, including drill logs and isopachous maps, which the Department needs to determine the amount and quality of the coal reserves on the X Company tracts. This information must

then be available to the public without condition. The Department shall also provide like information to X Company, except where the disclosure of such information would violate the Department's confidentiality agreements or the laws respecting the nondisclosure of proprietary information. In such cases, the Department will first request the holder of the proprietary data to release it or, failing that, notify X Company of the existence of such data.

4. The Department will conduct an economic evaluation of that portion of the combined tract which embraces the Federal lands in accordance with the regulations in 43 CFR Subpart 3422. Minimum bonus bids in the Federal tract shall not be less than \$25 per acre. Royalties in the lease for the Federal and private tract shall be 12 1/2 percent for a surface mine and 8 percent for an underground mine.

The Department shall, at the same time it evaluates the Federal tract, conduct an economic evaluation of the combined tract and of the X Company tract in accordance with accepted Departmental procedures. The economic evaluation shall be based on the information made available to the Department by X Company as well as other relevant data. The Department and X Company shall use the Department's evaluation of the combined tract and other relevant information to arrive at a mutually acceptable minimum bid and Federal-private bid ratio for the X Company tract. All terms of both sales would be published for comment simultaneously with the request for comment on fair market value of the Federal tract.

5. The Department will hold a lease sale for the Federal tract in October 1981.

The lease sale procedures in 43 CFR Subpart 3422 shall be followed. The Department shall not issue a lease on the Federal tract to any bidder who does not meet the leaseholder qualifications of the Mineral Leasing Act, 30 U.S.C. 181, *et seq.*, or the regulations under 34 CFR Part 3400.

The Department shall issue a lease on the Federal tract to the highest qualified bidder, who has 45 days to conclude a sale agreement with X Company at an amount determined by the bid ratio.

X Company would agree to offer the X Company tract to the highest qualified bidder on the Federal tract. The terms for the sale of the X Company tract (including the bid ratio) shall be published simultaneously with the sale notices of the Federal tract required by 43 CFR 3422.2 together with X

Company's agreement to lease to anyone satisfying these terms.

X Company shall not accept any offer that does not conform to the fixed ratio between the bid on the Federal lease and the bid on the private lease which was agreed to by the Department and X Company. The sale notices for the X Company shall specify this ratio.

**D. Post-sale Procedures.**—Once the leases have been issued, the lessee should petition to have the private coal included in the LMU containing the Federal lease at approximately the same time that a mine plan is submitted. The Department is examining two methods of royalty payment distribution for such a consolidated LMU. Under the first alternative, royalties would be received by the Department on an as-mined basis. Distinct and obvious differences in the timing of royalties to the private and public owners could be compensated for in setting the bonus ratio. As a second alternative, the Department is considering whether a proration approach would be feasible. Under such a distribution method, royalties would be paid to the parties in accordance with a sharing formula based on the relative ownership of the coal deposits within the LMU.

**E. Conclusion.**—An approach that potentially allows the systematic cooperative leasing of Federal checkerboard areas has been described. The Department will proceed to implement this procedure barring significant adverse comment and will make changes as appropriate. This approach is based on solving problems as they occur rather than trying to anticipate all possible complexities and resolving them in advance. At the conclusion of the Green River-Hams Fork cooperative leasing sale, the Department will assess the benefits and costs of this method, its general level of workability, and future potential gains or losses to determine a final course of action on cooperative leasing.

**Oil Shale Environmental Advisory Panel; Meeting**

Notice is hereby given in accordance with Pub. L. 92-463 that a meeting of the Oil Shale Environmental Advisory Panel will be held on January 13, 1981, at the Cosmopolitan Hotel, 1780 Broadway, Denver, Colorado. The meeting will begin at 8:30 a.m. on Tuesday, January 13, in the Century Room and conclude by 5:00 p.m.

The Panel was established to assist the Department of the Interior in the performance of its functions in connection with the supervision of oil shale leases issued under the Prototype Oil Shale Leasing Program.

The purpose of this meeting is to review a Draft of the Revised Detailed Development Plan prepared by Rio Blanco Oil Shale Company for Oil Shale Lease Tract C-a in Rio Blanco County, Colorado, to receive progress reports from Interior officials, and to consider any other matters which have come before the Panel. The Panel will also receive a status report on Interior's plans for additional oil shale leasing.

The meeting is open to the public. It is expected that space will permit at least 100 persons to attend the meeting in addition to the panel members. Interested persons may make brief presentations to the Panel on Tuesday afternoon, January 13, or file written statements with the Chairman. Requests to speak to the Panel should be made to Mr. Henry O. Ash, Chairman, Office of the Oil Shale Environmental Advisory Panel, Department of the Interior, Room 690, Building 67, Denver Federal Center, Denver, Colorado 80225, telephone (303) 234-3275.

Further information concerning this meeting may be obtained from Mr. Ash's office. Minutes of the meeting will be available for public inspection 30 days after the meeting at the panel office.

Dated: December 23, 1980.

James W. Curlin,

Acting Assistant Secretary of the Interior.

### Antitrust Division

#### Proposed Final Judgment in United States v. B.F. Goodrich Co. and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. Sections 16(b)-(h), that a proposed final judgment and a competitive impact statement as set out below have been filed with the United States District Court for the Northern District of California in Civil No. C-78-1785-WAI, *United States v. B.F. Goodrich Company*. The Complaint in this case alleged that B.F. Goodrich conspired to fix, raise, maintain and stabilize the retail and wholesale prices of passenger tires in the western United States in violation of Section 1 of the Sherman Act.

The proposed judgment prohibits B.F. Goodrich from having any agreement or understanding with any tire dealer to fix, raise, maintain or stabilize prices, discounts, or mark-ups for B.F. Goodrich tires. The defendant is also enjoined from entering into agreements or understandings with tire dealers which prohibit either tire dealers or B.F. Goodrich from advertising the price of tires. B.F. Goodrich Company is also forbidden from soliciting or encouraging any complaints by tire dealers concerning prices, discounts, or price-related advertisements regarding B.F. Goodrich tires, as well as from acting on any such complaints.

The judgment requires B.F. Goodrich to mail out copies of the judgment to its present dealers, and to take internal

measures to insure compliance with the judgment and the antitrust laws.

Public comment is invited within the statutory 60-day comment period. Such comments and responses thereto will be published in the *Federal Register* and file with the Court. Comments should be directed to Anthony E. Desmond, Chief, San Francisco Field Office, Antitrust Division, Department of Justice 450 Golden Gate Avenue, Box 36046, San Francisco, California 94102.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

Bernard H. Meyers, Glenda R. Jermanovich, Shauna I. Marshall; Department of Justice, Antitrust Division, 450 Golden Gate Avenue, Room 16216C, Box 36046, San Francisco, CA 94102, Telephone: 415/556-6300

#### United States District Court for the Northern District of California

Civil No. C-78-1785 WAI

#### Stipulation

Filed: December 15, 1980

*United States of America*, Plaintiff, v. *B.F. Goodrich Company*, Defendant.

It is stipulated by and between the plaintiff, the United States of America, and the defendant, B.F. Goodrich Company, by their respective attorneys, that:

1. A Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of either party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act [15 U.S.C. § 16] and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendant and by filing said notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to plaintiff and defendant in this or any other proceeding.

Dated: December 15, 1980.

For the plaintiff:

Sanford M. Litvack, Assistant Attorney General Antitrust Division; Joseph H. Widmar; Anthony E. Desmond, Attorneys, Department of Justice; Bernard H. Meyers; Glenda R. Jermanovich; Shauna I. Marshall, Attorneys, Department of Justice.

For defendant B.F. Goodrich Company: Jones, Day, Reavis & Pogue, Attorneys for Defendant B.F. Goodrich Company; By Gerald W. Palmer, Esq., and Harold G. Munter, Esq., Corporate Counsel, The B.F. Goodrich Company; Harold G. Munter, Esq.

United States District Court, Northern District of California

Civ. No. C-78-1785-WAI

#### Final Judgment

Filed: December 15, 1980.

*United States of America*, Plaintiff, v. *B.F. Goodrich Company*, Defendant.

Plaintiff, the United States of America, having filed its Complaint herein on August 8, 1978, and defendant, The B.F. Goodrich Company, having answered the Complaint and having appeared by its counsel, and both parties by their respective attorneys having consented to the making and entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting evidence against or an admission by any party consenting hereto with respect to any such issue:

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon consent of the parties hereto, it is hereby

Ordered, adjudged and decreed, as follows:

I

This Court has jurisdiction over the subject matter of this action and of the parties hereto. The Complaint states claims upon which relief may be granted against the defendant under Section 1 of the Sherman Act (15 U.S.C. § 1).

II

As used in this Final Judgment: (A) "Defendant" means defendant The B.F. Goodrich Company;

(B) "Person" means any individual, partnership, corporation, association, firm or any other business or legal entity;

(C) "Tires" means tires used on automobiles, recreational vehicles and/or light trucks, except for those tires actually delivered to and installed by original equipment manufacturers on new vehicles;

(D) "Dealer" or "tire dealer" shall mean any person who is in the business of selling tires; and

(E) "B.F. Goodrich brand tires" means tires on which appear the name "B.F. Goodrich," "BFG," "Goodrich," or the B.F. Goodrich pentagonal, or any other tires sold through the BFG Brand Replacement Sales organization, or successors thereto.

III

(A) This Final Judgment applies to the defendant and to each of its officers, directors, agents, employees, domestic subsidiaries, successors and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise; provided, however, that nothing contained herein shall apply to any transaction solely between defendant and its officers, directors, employees, domestic subsidiaries, or any of them when acting in such capacity.

(B) The Defendant shall require, as a condition of the sale or other disposition of all, or substantially all, of the assets of the B.F. Goodrich Tire Group (formerly, the B.F. Goodrich Tire Division), or that subdivision of defendant (by whatever name that subdivision is known) responsible for producing and distributing B.F. Goodrich brand tires, that the acquiring party agree to be bound by the provisions of this Final Judgment. The acquiring party shall file with the Court, and serve upon the Plaintiff, its consent to be bound by this Final Judgment.

(C) This Final Judgment shall apply throughout the United States.

#### IV

Defendant is enjoined and restrained from:  
(A) entering into, adhering to, maintaining, or enforcing any contract, agreement, combination or mutual understanding with any tire dealer;

(1) to fix, raise, maintain or stabilize the price, discount, markup or margin of profit at which B.F. Goodrich brand tires are sold, or offered for sale; and/or

(2) by which said dealer or defendant is not to advertise the price of B.F. Goodrich brand tires;

(B) encouraging or soliciting any complaints by any tire dealer regarding the pricing, discounting or price-related advertising of B.F. Goodrich brand tires by any other tire dealer; or

(C) taking any coercive or joint action with respect to any tire dealer because of any complaint or other communication by any other tire dealer or wholly-owned B.F. Goodrich tire outlet regarding the pricing, discounting or price-related advertising of B.F. Goodrich brand tires.

#### V

Defendant is enjoined and restrained from:

(A) suggesting or requiring that any tire dealer establish, adopt, advertise or adhere to any fixed, suggested or specified price, discount, markup or margin of profit on the sale of any B.F. Goodrich brand tires; provided, however, that nothing in this provision shall prohibit the defendant from unilaterally suggesting resale prices, discounts, markups or margins of profit for the sale of B.F. Goodrich brand tires on the conditions (a) that any such oral suggestion shall include a statement in substance that each dealer, and the defendant as well, is free to sell at whatever prices, discounts, markups or margins of profit such dealer or the defendant may unilaterally choose; (b) that any such written suggestion shall include a statement on each page of any such writing in substance that each dealer, and the defendant as well, is free to sell at whatever prices, discounts, markups or margins of profit such dealer or defendant may unilaterally choose; and (c) that no less frequently than once each year defendant notify its dealers that notwithstanding any such suggestion, each dealer, and the defendant as well, is free to sell at whatever prices, discounts, markups or margins of profit each may unilaterally choose;

(B) suggesting or requiring that any tire dealer not offer the tire dealer's own guarantee on any B.F. Goodrich brand tire; or

(C) coercing or attempting to coerce any tire dealer to change its price or terms for the sale of B.F. Goodrich brand tires.

#### VI

Nothing in this Final Judgment shall prohibit defendant from:

(A) Proposing to any B.F. Goodrich dealer or prospective B.F. Goodrich dealer that it join in any joint advertisement to promote the sale of B.F. Goodrich brand tires, or agreeing with any such dealer to participate in any such joint advertisement or publishing or causing to be published any such joint

advertisement; provided, however, that any such actual or proposed joint advertisement shall include a statement to the effect that any advertised prices are those offered by defendant and are not necessarily those offered by participating B.F. Goodrich dealers;

(B) Engaging in negotiations or communications with any person for the purpose of a proposed or actual bona fide sale by defendant of B.F. Goodrich brand tires; or

(C) formulating or submitting with any B.F. Goodrich dealer a bona fide joint bid or quotation, made in writing and in response to a formal invitation, for the sale of B.F. Goodrich brand tires to any public or private entity where performance of any contract entered into as a result of that bid or quotation is to be carried out, in whole or in part, through the sale or delivery of B.F. Goodrich brand tires by one or more B.F. Goodrich dealers.

#### VII

Defendant is ordered and directed:

(A) within 60 days after entry of this Final Judgment to provide a copy of this Final Judgment to

(1) each of defendant's officers and directors with responsibility for selling, pricing or advertising B.F. Goodrich brand tires;

(2) each of defendant's employees with responsibility for selling, pricing, or advertising B.F. Goodrich brand tires to dealers; and

(3) each of defendant's employees having managerial responsibility for selling, pricing or advertising B.F. Goodrich brand tires from B.F. Goodrich retail outlets; and to obtain and retain for 10 years documents sufficient to show receipt thereof;

(B) for a period of 10 years from the date of entry of this Final Judgment, to provide a copy of this Final Judgment to each of its future officers, directors and employees in the positions described in Paragraph A above and to obtain and retain for 10 years documents sufficient to show receipt thereof;

(C) to file with this Court and serve upon the plaintiff within 90 days after the date of entry of this Final Judgment an affidavit as to the fact and manner of compliance with subsections A and D of this Section VII;

(D) within 60 days after entry of this Final Judgment to provide a copy of this Final Judgment to all of defendant's present dealers, and within the ensuing four years, to provide a copy of this Final Judgment to each new franchised dealer;

(E) during the period in which this Final Judgment is in effect, to advise each of its officers and employees in positions described in paragraph (A) above of its and their obligations under this Final Judgment.

Defendant shall maintain a program to insure compliance with this Final Judgment, which program shall include at a minimum the following with respect to each of such persons:

(1) the annual distribution to them of this Final Judgment;

(2) the annual submission to them of a written directive setting forth the defendant's antitrust compliance program, with such directive to include (a) an admonition that

non-compliance with such program and this Final Judgment will result in appropriate disciplinary action determined by the defendant and which may include dismissal, and (b) advice that the defendant's legal staff is available at all reasonable times to confer with such persons regarding any compliance questions or problems;

(3) the imposition of an annual requirement that each of them sign and submit to the defendant a certificate in substantially the following form:

The undersigned hereby acknowledges that he/she (1) has received a copy of the Final Judgment and a written directive setting forth the Company policy regarding compliance with the antitrust laws and with such Final Judgment, (2) has read and understands such Final Judgment and directive, (3) has been advised and understands that non-compliance with such policy and Final Judgment will result in appropriate disciplinary measures determined by the Company and which may include dismissal, and (4) has been advised and understands that non-compliance with the Final Judgment may also result in conviction for contempt of court and imprisonment and/or fine; and

(4) the holding of one or more meetings with them to review the terms of this Final Judgment and the obligations it imposes, with such meetings to be arranged and conducted so that each of them attends at least one such meeting with approximately each twelve-month period.

#### VIII

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

(A) duly authorized representatives of the Department of Justice shall, upon written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendant made to its principal office, be permitted:

(1) access during the office hours of defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents, in the possession or under the control of defendant, which may have counsel present, relating to any matters contained in this Final Judgment; and

(2) subject to the reasonable convenience of defendant and without restraint or interference from it, to interview officers, directors, agents, partners, members or employees of defendant, who may have counsel present, regarding any such matters;

(B) defendant, upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, shall submit such reports in writing, under oath if requested, with respect to any of the matters contained in this Final Judgment as may from time to time be requested.

No information or documents obtained by the means provided in this Section VIII shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which

the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise permitted by law;

(C) if at the time information or documents are furnished by the defendant to plaintiff, the defendant represents and identifies in writing the material in any such information or documents to which a claim for protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and the defendant marks each pertinent page of such material, "Subject to Claim of Protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) days' notice shall be given by plaintiff to the defendant prior to divulging such material in any legal proceeding (other than a grand jury proceeding) to which the defendant is not a party.

#### IX

Jurisdiction is retained by this Court for the purpose of enabling either of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance therewith, and for the punishment of violation thereof.

#### X

The provisions of this Final Judgment shall be in effect for a period of not longer than ten (10) years from the date of entry of this Final Judgment.

#### XI

Entry of this Final Judgment is in the public interest.

Dated: \_\_\_\_\_

#### United States District Judge.

Bernard H. Meyers, Glenda R. Jermanovich, Shauna I. Marshall, Antitrust Division, U.S. Department of Justice, 450 Golden Gate Avenue, Box 36046, San Francisco, CA 94102, Telephone: 415/556-6300.

United States District Court, Northern District of California

Civ. No. C-78-1785-WAI

#### Competitive Impact Statement

Filed: December 15, 1980.

United States of America, Plaintiff, v. B.F. Goodrich Company, Defendant.

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act [15 U.S.C. § 16(b)] the United States hereby submits this Competitive Impact Statement relating to the proposed Consent Judgment submitted for entry in this civil antitrust proceeding.

#### I. Nature of Proceeding

On August 8, 1978 the United States Department of Justice filed a civil complaint against the B.F. Goodrich Company pursuant to Section 4 of the Sherman Act [15 U.S.C. § 4], alleging a conspiracy to fix, raise, maintain and stabilize the retail and wholesale prices of B.F. Goodrich tires sold in the western United States. The Complaint asks the Court to find that the defendant has violated Section 1 of the Sherman Act [15

U.S.C. § 1] and further requests the Court to enjoin the continuance of the conspiracy.

Entry by the Court of the proposed Consent Judgment will terminate this action. The Court will retain jurisdiction over this matter for such further proceedings as may be required to interpret, modify or enforce the proposed judgment or to punish violations thereof.

#### II. Description of Practices Involved in the Alleged Violation

The defendant, the B.F. Goodrich Company, manufactures tires and sells them to, among others, independent wholesalers and retailers. B.F. Goodrich also sells tires to the public through its company-owned stores and leased department operations. Because of this distribution system, B.F. Goodrich and independent wholesale distributors are actual or potential competitors for the sale of B.F. Goodrich tires to independent retailers. Similarly, by selling B.F. Goodrich tires to the public through its company-owned stores and leased department operations, B.F. Goodrich competes with independent retailers for the sale of B.F. Goodrich tires to the public.

The Complaint in the case alleges that beginning at least as early as 1972 and continuing through at least the date of the commencement of the suit (August, 1978) the defendant met and communicated with independent wholesalers and retailers in order to fix, raise, maintain and stabilize retail and wholesale prices of B.F. Goodrich tires. The Complaint further alleged that 1) the prices of B.F. Goodrich brand passenger tires have been fixed, raised, maintained and stabilized at artificial and non-competitive levels; 2) purchasers of B.F. Goodrich tires have been deprived of the benefits of free and open competition in the marketing of B.F. Goodrich tires; and 3) competition between and among B.F. Goodrich and the conspirators in the sale of B.F. Goodrich tires has been reduced and restrained.

#### III. Explanation of the Proposed Consent Judgment

The United States and defendant, the B.F. Goodrich Company, have agreed, in a stipulation, that the consent judgment may be entered by the Court at any time after compliance with the Antitrust Procedures and Penalties Act. The proposed judgment provides that there has been no admission by either party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the Antitrust Procedures and Penalties Act, entry of the consent judgment by the Court is conditioned upon a determination of the Court that the proposed judgment is in the public interest.

#### A. Prohibited Conduct

The proposed judgment will prohibit the defendant for a period of 10 years from the date of the Final Judgment from entering into or adhering to any agreement, combination or mutual understanding with any tire dealer to fix, raise, maintain or stabilize the price, discount, mark-up or margin of profit at which B.F. Goodrich tires are sold. The defendant is also enjoined from entering into any agreement or understanding with tire dealers which prohibits either tire dealers or B.F. Goodrich from advertising the price of

B.F. Goodrich tires. B.F. Goodrich is also forbidden from encouraging or soliciting any complaints by any tire dealer with respect to the pricing, discounting or price-related advertising of any other tire dealer (including B.F. Goodrich's own outlets). Nor may B.F. Goodrich take any coercive or joint action against any tire dealer due to any complaint or any communication from any other tire dealer (including B.F. Goodrich's own outlets).

B.F. Goodrich may only suggest resale prices to tire dealers under the conditions that in so doing it state to each dealer that the prices are only being suggested by B.F. Goodrich and that B.F. Goodrich and each dealer are free to sell at whatever price, discount, markup or margin of profit they may unilaterally choose. B.F. Goodrich is also prohibited from suggesting or requiring that any tire dealer not offer the dealer's own guarantee on B.F. Goodrich tires, and from coercing or attempting to coerce any tire dealer to change its prices or terms for the sale of B.F. Goodrich tires. The proposed judgment covers all B.F. Goodrich tires used on passenger cars, recreational vehicles, or light trucks. It does not apply to B.F. Goodrich Brand tires sold to and actually used by original equipment manufacturers. The proposed judgment also covers B.F. Goodrich tires bearing the name B.F. Goodrich (or variations thereof), and tires sold through the B.F. Goodrich Brand Replacement Sales organization (or successors thereto). Although the complaint only alleged violations in the six western states, the proposed judgment applies throughout the United States.

The proposed judgment applies to the defendant, its officers, directors, employees, agents, successors and assigns. Before the defendant may sell all or substantially all of its Tire Group assets, the acquiring party must agree to be bound by the judgment.

#### B. Other Provisions

The defendant is ordered for a period of 10 years to distribute a copy of the judgment to each of its employees, officers and directors with responsibility for the selling, pricing and advertising of B.F. Goodrich tires at the wholesale or retail level. The defendant must also provide a copy of the judgment to all of its present dealers, and for a period of 4 years, to each new franchised dealer. The defendant must distribute the initial copy to employees, directors, officers and dealers within 60 days after entry of the final judgment. An affidavit stating the manner of compliance must be filed by defendant within 90 days after entry of the judgment.

In addition to the annual distribution of the judgment, B.F. Goodrich must conduct a compliance program. The program shall require the defendant to take affirmative steps, including the holding of annual meetings, to advise each of the officers and other employees with any responsibility for the selling, pricing and advertising of B.F. Goodrich tires of their obligations under the judgment.

The United States Department of Justice is given access under the proposed judgment to the files and records of B.F. Goodrich, to examine such records for compliance or non-compliance with the judgment. The

Department is also granted access to interview employees of the defendant to determine whether the defendant is complying with the judgment.

#### C. Effect of the Proposed Judgment on Competition

The relief encompassed in the proposed consent judgment is designed to prevent a recurrence of any of the activities alleged in the complaint. The prohibitory language of the judgment should ensure that wholesale and retail prices of B.F. Goodrich tires shall be arrived at independently by both the defendant and individual tire dealers. The judgment contains sufficient record-keeping requirements and access to defendant's records to allow the Department to adequately monitor defendant's activities in the future.

Accordingly, it is the opinion of the Department of Justice that the proposed judgment is fully adequate to prevent future antitrust violations by the defendant. It is also the view of the Department that disposition of the case without additional litigation is appropriate in view of the fact that the proposed judgment includes the form and scope of relief equal to that which might be obtained after a full airing of the issues.

#### IV. Alternatives to the Proposed Consent Judgment

The alternative to the proposed Final Judgment considered by the Antitrust Division was a full trial on the merits and on relief. The Division considers the proposed judgment to be of sufficient scope and effectiveness to make a trial unnecessary, since it provides appropriate relief against the violations alleged in the Complaint.

In line with the Antitrust Division's policy in existence at the time the case was filed, the Government originally sought a perpetual decree. Thereafter, the Division's policy in this regard changed to insistence on a term of 10 years, the term specified in the decree.

#### V. Remedies Available to Potential Private Plaintiffs

Section 4 of the Clayton Act [15 U.S.C. § 15] provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages such person has suffered, as well as costs and reasonable attorneys' fees. Following the filing of the Government's Complaint in this action, several lawsuits were brought on behalf of various classes of persons allegedly injured as a result of the violation of the antitrust laws alleged in the Government's suit. These lawsuits are now in the discovery phase and are pending before this Court. (*In Re B.F. Goodrich Antitrust Litigation*, MDL-386 including: *State of California v. B.F. Goodrich Co.*, Civil No. C-78-2263; *State of Arizona v. B.F. Goodrich Co.*, Civil No. 79-1841; *State of Colorado v. B.F. Goodrich*, Civil No. C-80-0252). These plaintiffs and any potential plaintiff will retain the same rights to seek monetary and equitable remedies that they would have had if the proposed judgment had not been entered. However, pursuant to Section 5(a) of the Clayton Act [15 U.S.C. § 16(a)], this judgment has no *prima facie* effect in the lawsuits which have been brought or may be brought against defendant B. F. Goodrich.

#### VI. Procedures Available for Modification of the Proposed Judgment

The proposed consent judgment is subject to a stipulation by and between the United States and the defendant which provides that the United States may withdraw its consent to the proposed judgment at any time before the Court has found that entry of the proposed judgment is in the public interest. By its terms, the proposed consent judgment provides for the Court's retention of jurisdiction of this action in order, among other reasons, to permit either of the parties thereto to apply to the Court for such orders as may be necessary or appropriate for the modification of the Final Judgment.

As provided by Section 2(b) of the Antitrust Procedures and Penalties Act, any persons wishing to comment on the proposed consent judgment may, for the sixty (60) day period prior to the effective date of the judgment, submit written comments to: Anthony E. Desmond, Chief, San Francisco Field Office, Antitrust Division, U.S. Department of Justice, 450 Golden Gate Avenue, Box 36046, San Francisco, CA 94102. The comments, and the responses thereto, will be filed with the Court and published in the *Federal Register*. The Department of Justice will evaluate all such comments and determine whether there are any reasons for withdrawal of its consent to the judgment.

#### VII. Determinative Documents

Since there are no materials or documents which were determinative in formulating a proposal for the consent judgment, none are being filed by the plaintiff pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act.

#### Proposed Final Judgment in United States v. Hercules Incorporated and Competitive Impact Statement Thereon

Notice is hereby given pursuant to the Antitrust Procedures and penalties Act, 15 U.S.C. § 16(b)-(h), that on December 16, 1980, a proposed Final Judgment and a Competitive Impact Statement ("CIS") as set out below have been filed with the United States District Court for the District of New Jersey in *United States v. Hercules Incorporated*, Civil Action No. 80-136. The Complaint in this case alleges that Hercules violated the Sherman Act by monopolizing the U.S. industrial nitrocellulose market through exchanging price information with foreign competitors.

The proposed Judgment enjoins the defendant from engaging in or renewing any of the alleged illegal conduct and requires the defendant to refrain from exchanging price information with its competitors.

The CIS describes the terms of the Judgment and the background of the

action and concludes that the proposed Judgment provides appropriate relief against the violation alleged in the Complaint.

Public comment is invited within the statutory 60-day comment period. Such comments, and response thereto, will be published in the *Federal Register* and filed with the Court. Comments should be directed to Kevin R. Sullivan, attorney, Foreign Commerce Section, Antitrust Division, Department of Justice, Washington, D.C. 20530.

#### Stipulation

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. A Final Judgment in the form attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendant and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this Stipulation, this Stipulation shall be of no effect whatever and the making of this Stipulation shall be without prejudice to any party in this or any other proceeding. Dates: December 16, 1980

#### Final Judgment

Filed: December 16, 1980.

*United States of America*, Plaintiff, v.  
*Hercules Incorporated*, Defendant.

Plaintiff, *United States of America*, having filed its complaint herein on January 11, 1980, and plaintiff and defendant, *Hercules Incorporated* ("Hercules"), by their respective

attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment's constituting any evidence against or an admission by any party with respect to any such issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein and upon consent of the parties hereto, it is hereby,

Ordered, adjudged, and decreed as follows:

I

This Court has jurisdiction of the subject matter of this action and of the parties consenting hereto. The complaint states a claim upon which relief may be granted against the defendant under Section 2 of the Sherman Act (15 U.S.C. § 2).

II

As used in this Final Judgment, the term:

(A) "Person" means any individual, corporation, partnership, firm, association, or other business or legal entity;

(B) "Industrial nitrocellulose" means a dry white amorphous synthetic chemical produced by the chemical action of nitric acid on cellulose. Commonly made from the cellulose found in wood pulp or cotton linters, industrial nitrocellulose is classified by its uses and has a nitrogen content between 10.8 percent and 12.2 percent;

(C) "Nitrocellulose producer" means those persons engaged in the business of manufacturing nitrocellulose;

(D) "Distributor" means (so long as they serve in that capacity) any person in the U.S. who has been publicly designated as an agent or distributor, or whose designation as such is otherwise made known to the defendant by the producer, distributor, or agent;

(E) "Subsidiary" shall mean a company of which the parent owns more than 50% of capital stock; and

(F) "Affiliate" shall mean an entity of which the defendant has more than 50% non-stock ownership interest or has less than 50% interest and exercises or has the right to exercise control.

III

This Final Judgment applies to the defendant, Hercules, and to its officers, directors, agents, employees, subsidiaries, affiliates, successors, and assigns, and to all other persons in active concert or participation with any of them who shall have received actual notice of this Final Judgment by personal service or otherwise.

IV

Subject to the exceptions provided in Articles V and VI herein, defendant Hercules is enjoined and restrained from:

(A) Furnishing to or requesting from any other industrial nitrocellulose producer, or distributor in the U.S. for such producer:

1. information concerning the prices, terms or other conditions of sale which any industrial nitrocellulose producer intends to charge or is considering submitting to any actual or prospective purchaser of industrial nitrocellulose; provided that this prohibition shall not apply to information disseminated in the form of a press release or public announcement, or to written notification to

all or to a class of customers or prospective customers; and

2. information concerning industrial nitrocellulose production capacity, excess production capacity, or production available for export; provided that this prohibition shall not apply to information disseminated in the form of a press release or public announcement, or to written notification to all or to a class of customers or prospective customers; and

(B) Acting as a distributor or agent in the United States for industrial nitrocellulose produced by any other industrial nitrocellulose producer.

V

Nothing in this Final Judgment shall be applicable to any communications with any other industrial nitrocellulose producer, or distributor in the United States for such producer, concerning price, other terms and conditions of sale, or production available for sale, in connection with a bona fide potential purchase or sale of industrial nitrocellulose between Hercules and such other industrial nitrocellulose producer, or distributor in the United States for such producer. The parties agree that, while it is not possible to anticipate all bona fide situations that might lead to buyer-seller relations between producers in the purchase or sale of industrial nitrocellulose, usually such relations are the result of: temporary inability of a producer to meet the demands of a growing market; shortage or cessation of supply capabilities; interruption of manufacturing or distribution capabilities because of explosion, fire, accident, strike or other work stoppage; and the desire or need of a producer to obtain a type or grade of industrial nitrocellulose it does not manufacture.

VI

Nothing in this Final Judgment shall be applicable to the furnishing or requesting of information described in Article IV hereof in connection with a possible acquisition, sale or licensing of assets, business or stock, or a joint venture; provided that in such circumstances, defendant is ordered and directed, prior to the furnishing or requesting of such information, to advise plaintiff of the nature of the transaction and of the information to be furnished or requested.

VII

Defendant is ordered and directed to:

(A) Furnish a copy of this Final Judgment to each of its officers, directors, sales and service managers concerned with the production or sale of industrial nitrocellulose within thirty (30) days of entry of this Final Judgment;

(B) Furnish a copy of this Final Judgment to each successor to those persons described in Paragraph VII (A) hereof within sixty (60) days after each such successor is employed;

(C) Attach to each a copy of this Final Judgment furnished pursuant to Subparagraph VII (A) and (B) hereof a statement advising each person of his or her obligations; such statement shall include (1) an instruction that non-compliance with this Final Judgment will result in appropriate disciplinary action determined by the defendant which may include dismissal, and

(2) advice that the defendant's legal advisers are available at all reasonable times to confer with such persons regarding any compliance question or problem;

(D) File with this Court and serve upon the plaintiff within ninety (90) days after the date of entry of this Final Judgment and annually thereafter on the anniversary of this Final Judgment an affidavit as to the fact and manner of its compliance with Paragraph VII hereof; and

(E) Serve upon the plaintiff annually on the anniversary of this Final Judgment the following information concerning bona fide purchases and sales of industrial nitrocellulose between Hercules and any other industrial nitrocellulose producer pursuant to Article V hereof: identity of purchaser and seller; amount of industrial nitrocellulose purchased or sold; and price of nitrocellulose purchased or sold. If Hercules is the purchaser, the information so furnished shall include a statement of the reasons for such purchase.

VIII

For the purpose of determining or securing compliance with this Final Judgment, and subject to any legally recognized privilege, from time to time:

(A) Duty authorized representatives of the Department of Justice shall, upon written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to defendant made to its principal office, be permitted;

(1) Access during regular office hours of defendant to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of defendant, who may have counsel present; and

(2) Subject to the reasonable convenience of defendant and without restraint or interference from it, to interview officers, employees, and agents of defendants, who may have counsel present;

(B) Upon the written request of the Attorney General or of the Assistant Attorney General in charge of the Antitrust Division made to defendant's principal office, defendant shall submit such written reports, under oath if requested, with respect to any of the matters contained in this Final Judgment as may be requested;

(C) No information or documents obtained in the means provided in this Section VIII shall be divulged by an representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law; and

(D) If at the time information or documents are furnished by defendant to plaintiff by the means provided in this Section VIII, and defendant at the time represents and identifies in writing the material in any such information or documents to which a claim of protection may be asserted under Rule 26(c)(7) of the Federal Rules of Civil Procedure, and said defendant marks each pertinent page of such material, "Subject to

claim of protection under Rule 26(c)(7) of the Federal Rules of Civil Procedure," then ten (10) days notice shall be given by plaintiff to defendant prior to divulging such material in any legal proceedings (other than a grand jury proceeding) to which defendant is not a party.

## IX

Jurisdiction is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or the carrying out of this Final Judgment, for the modification of any of the provisions hereof, for the enforcement of compliance herewith, or for the punishment of violation hereof.

## X

Defendant shall require, as a condition of the sale or disposition of all, or substantially all, of the assets used by it in its industrial nitrocellulose business, that the acquiring party agree to be bound by the provisions of this Final Judgment, and that such agreement be filed with the Court.

## XI

The term of this Final Judgment shall be ten (10) years from the date of entry.

## XII

Entry of this Final Judgment is in the public interest.

Dated:

United States District Judge.

United States District Court, District of New Jersey

Civil Action No.

Filed: December 16, 1980.

United States of America, plaintiff, v. Hercules Incorporated, Defendant.

## Competitive Impact Statement

Pursuant to Section 2(b) of the Antitrust Procedures and Penalties Act ("APPA"), 15 U.S.C. §§ 16(b)-(h), the United States of America submits this Competitive Impact Statement relating to the proposed Final Judgment submitted for entry in this civil antitrust proceeding.

## I The Nature and Purpose of the Proceeding

On January 11, 1980, the Department of Justice filed a civil antitrust complaint under Section 4 of the Sherman Act (15 U.S.C. § 4), alleging that the defendant violated Section 2 of the Sherman Act (15 U.S.C. § 2). The Complaint alleged that the defendant has attempted to monopolize and has monopolized the production and sale of industrial nitrocellulose in the United States.

The Complaint sought equitable relief to prevent continuing violations of the Sherman Act by Hercules, Inc. ("Hercules"), which have had the effect of restraining actual and potential competition in the production and sale of industrial nitrocellulose in the United States.

## II

## Description of the Practices Giving Rise to the Alleged Violation of the Antitrust Laws

Industrial nitrocellulose is used in combination with other chemicals as a bonding agent in various coatings. Applied in solutions, industrial nitrocellulose forms hard, smooth finishes known for their short drying time and attractive appearance. Industrial nitrocellulose is widely used in wood finishes, lacquers, paints, primers, textile and paper coatings, book bindings, printing inks, cellophane film, coatings and fingernail polishes.

Before July 1977, Hercules and E. I. duPont de Nemours and Company, Inc. ("duPont") produced and sold all of the industrial nitrocellulose used in the United States. In 1977 approximately 64 million pounds of industrial nitrocellulose were sold in the United States. Hercules' sales accounted for approximately 65 percent of 1977 U.S. sales, and duPont's sales accounted for approximately 35 percent of the U.S. total.

On July 19, 1977, duPont announced its decision to discontinue the production and sale of industrial nitrocellulose at the end of 1977. This decision left Hercules as the sole domestic nitrocellulose producer.

Shortly after the duPont announcement, foreign industrial nitrocellulose producers, especially those based in Europe, began to consider selling this product in the United States in competition with Hercules. For its part, Hercules did not have sufficient capacity to supply the entire U.S. demand, and was considering expanding its production.

Hercules' first effort, before it decided whether to expand, was to seek to ensure sufficient supplies of industrial nitrocellulose at reasonable prices for the short term. Hercules proposed to European producers that it act as the importer for all European producers interested in selling industrial nitrocellulose in the United States. After that effort was abandoned, Hercules continued to have meetings and other communications with foreign producers, the purpose and effect of which were to control the price of industrial nitrocellulose in the United States. During those communications, present prices and future price intentions were exchanged. In the last quarter of 1977 and throughout 1978, the dry weight price of substantially all the industrial nitrocellulose sold by Hercules, Societe Nationale des Poudres et Explosifs ("SNPE"), and Wolff Walsrode A.G. ("Wolff") was stabilized, exclusive of drum and duty costs.

In 1978, Hercules' sales accounted for more than 75 percent of the industrial nitrocellulose sold in the United States. The balance purchased in the United States in 1978 was produced and sold by foreign manufacturers in Europe and Japan. In that year, Hercules announced a plan to expand its industrial nitrocellulose plant capacity by 30 million pounds, by mid-1980, enough to enable Hercules to more than satisfy the entire American demand for industrial nitrocellulose.

The Complaint alleges that Hercules' actions have had the following effects, among others: (a) the defendant has monopolized

and continues to monopolize the industrial nitrocellulose market in the United States; (b) actual and potential competition in the production and sale of industrial nitrocellulose in the United States has been restrained; and (c) purchasers of industrial nitrocellulose have been denied the benefits of a free and competitive market.

## III

## A. Explanation of the Proposed Final Judgment

The United States and the defendant have stipulated that the Court may enter the proposed Final Judgment after compliance with the APPA, 15 U.S.C. § 16(b)-(h). The proposed Final Judgment provides that its entry does not constitute any evidence against or an admission by any party with respect to any issue of fact or law. Under the provisions of Section 2(e) of the APPA, the proposed Final Judgment may not be entered until the Court determines that entry is in the public interest.

## 1. Prohibited Conduct

Paragraph IV(A) of the proposed Final Judgment prohibits the defendant from furnishing to or requesting from any other nitrocellulose producer, or the distributor in the United States for such producer, information concerning the prices, terms, or other conditions of sale which any nitrocellulose producer intends to charge, or is considering submitting to any actual or prospective purchaser of industrial nitrocellulose, and from furnishing to or requesting from such producer and distributor for such producer, any information concerning industrial nitrocellulose production capacity, excess production capacity, or production available for export. This Paragraph does allow price and capacity information to be disseminated to the public in the form of a press release, public announcement, or written notification to all or to a class of customers.

Paragraph IV(B) enjoins Hercules from acting as a distributor or agent for industrial nitrocellulose produced by any other nitrocellulose producers.

Paragraph V provides that nothing in the proposed Final Judgment shall be applicable to any discussions of price or other terms and conditions of sale offered by Hercules to any other nitrocellulose producer or offered by any other nitrocellulose producer to Hercules in connection with a bona fide purchase or sale of industrial nitrocellulose between Hercules and such other nitrocellulose producer. Bona fide situations include those which are the result of temporary inability of a producer to meet the demand of a growing market, shortage or cessation of supply capabilities, interruption of manufacturing or distribution capabilities because of explosion, fire, accident, strike, or other work stoppage; or because of the desire or need of a producer to obtain a type of industrial nitrocellulose it does not manufacture.

Paragraph VI provides that the Final Judgment is not applicable to information furnished or requested in connection with a possible acquisition, sale or licensing situation, provided that Hercules is required to advise the Government of the nature of

any such transaction before furnishing or requesting such information.

#### 2. Affirmative Obligations

The proposed Final Judgment (Paragraph VII) requires that the defendant furnish a copy of the Final Judgment to each of its officers, directors, sales managers, and to each successor of those persons within thirty (30) days after each successor is employed, together with a statement advising each person of his or her obligations under the Final Judgment, of the possible disciplinary actions for non-compliance, and of the availability of advice from the company's legal advisers. Paragraph VI also requires the defendant to serve on the plaintiff within ninety (90) days after entry of the Final Judgment, and annually thereafter, an affidavit as to the fact and manner of its compliance with Paragraph VII. Paragraph VII requires the defendant to serve plaintiff with certain information concerning *bona fide* purchases and sales of industrial nitrocellulose, including the identity of the purchaser and the seller, the amount of industrial nitrocellulose involved, the price, and, if Hercules is the purchaser, a statement of the reason for the purchase.

Section VIII of the Final Judgment will provide the Justice Department with access, upon reasonable notice, to Hercules' records and personnel in order to determine Hercules' compliance with the Judgment. Paragraph X will require any purchaser of all or substantially all the assets used by Hercules in its nitrocellulose business to enter an agreement to be bound by the provisions of the Final Judgment, and to file that agreement with the Court.

#### 3. Scope of the Proposed Judgment

The proposed Final Judgment will remain in effect for a period of ten (10) years from the date of entry. It applies to the defendant Hercules and to all other persons in active concert or participation with any of them who shall have received actual notice of the Final Judgment by personal service or otherwise.

#### 4. Effect of the Proposed Judgment on Competition

The relief in the proposed Final Judgment is designed to prevent any recurrence of the activities alleged in the Complaint. The prohibitive language of the Judgment is designed to ensure that Hercules will act independently in determining prices, terms and conditions at which it will sell or offer to sell industrial nitrocellulose. It will also prevent Hercules from controlling the price or distribution in the United States of foreign-produced industrial nitrocellulose. The affirmative obligations are designed to ensure that Hercules' employees are aware of their obligations under the decree in order to avoid a repetition of the kinds of behavior that occurred.

The Department of Justice believes that the proposed Final Judgment contains adequate provisions to prevent further violations by the defendant of the type of activities upon which the Complaint is based. The Department believes that disposition of the lawsuit without further litigation is appropriate because the proposed Judgment

provides all the relief which the United States sought in its Complaint, and the additional expense of litigation would not result in additional public benefit.

#### IV

##### *Procedures Available to Potential Private Litigants*

Section 4 of the Clayton Act (15 U.S.C. § 15) provides that any person who has been injured as a result of conduct prohibited by the antitrust laws may bring suit in federal court to recover three times the damages suffered, as well as costs and reasonable attorneys fees. Entry of the proposed Final Judgment will neither impair nor assist the bringing of such actions. Under the provisions of Section 5(a) of the Clayton Act (15 U.S.C. § 16(a)), the Judgment has *no prima facie* effect in any subsequent lawsuits that may be brought against this defendant.

#### V

##### *Procedures Available for Modification of the Proposed Judgment*

As provided by the Antitrust Procedures and Penalties Act, any person believing that the proposed Final Judgment should be modified may submit written comments to Kevin R. Sullivan, Antitrust Division, United States Department of Justice, Washington, D.C. 20530 within the 60-day period provided by the Act. These comments, and the Department's responses, will be filed with the Court and published in the Federal Register. All comments will be given due consideration by the Department of Justice, which remains free to withdraw its consent to the proposed Judgment at any time prior to entry. The Judgment provides that the Court retains jurisdiction over this action, and the parties may apply to the Court for any order necessary or appropriate for its modification, interpretation or enforcement.

#### VI

##### *Alternatives to the Proposed Final Judgment*

The Department considers the substantive language of the Judgment to be of sufficient scope and effectiveness to make litigation on relief unnecessary, as the Judgment provides all relief which reasonably could have been expected after trial.

The Division considered, but did not propose, relief which would include divestiture of part of Hercules' industrial nitrocellulose production capacity. This possibility was not prayed for in the Complaint and was not requested from the defendant because it did not seem warranted by the facts, and because Hercules' single plant production capacity could not practicably be divided.

#### VII

##### *Determinative Materials and Documents*

No materials or documents were considered determinative by the United States in formulating the proposed Final Judgment. Therefore, none are being filed

pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16(h).

Kevin R. Sullivan,  
Attorney, United States Department of Justice.

Jane C. Luxton,  
Attorney, United States Department of Justice.

BILLING CODE 4410-01-M

## Drug Enforcement Administration

### Quotas for Controlled Substances in Schedules I and II

**AGENCY:** Drug Enforcement Administration, Justice.

**ACTION:** Notice of Established 1981 Aggregate Production Quotas.

**SUMMARY:** This notice establishes 1981 aggregate production quotas for tetrahydrocannabinols, a Schedule I substance, and dextropropoxyphene and pethidine intermediate-A, Schedule II substances, as required under the Controlled Substances Act of 1970.

**EFFECTIVE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:** Howard McClain, Jr., Chief, Regulatory Control Division, Drug Enforcement Administration, Telephone: (202) 633-1366.

**SUPPLEMENTARY INFORMATION:** Section 306 of the Controlled substances Act (21 U.S.C. 826) requires the Attorney General to establish aggregate production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration in accordance with § 0.100 of Title 28 of the Code of Federal Regulations.

On November 7, 1980, a notice of the proposed 1981 aggregate production quotas for tetrahydrocannabinols, dextropropoxyphene, and pethidine intermediate-A was published in the Federal Register (45 FR 74092). All interested parties were invited to comment on or object to these proposed aggregate production quotas on or before December 7, 1980.

One comment was received from Eli Lilly and Company of Indianapolis, Indiana, concerning dextropropoxyphene. Lilly has expressed concern that the proposed 1981 aggregate production quota for this substance will be insufficient to meet total U.S. medical needs. Because of the uncertainty attendant to the control of dextropropoxyphene in Schedule II, Lilly has requested that comments be continued to be considered by DEA after the issuance of the 1981 manufacturing

quotas to the companies who have applied for them. DEA will take into consideration any such comments received after the issuance of these quotas. However, unless extraordinary events require otherwise, full consideration of them will be deferred until early 1981, when the quotas for all Schedule II substances are reviewed and, where necessary, revised. No other comments and no requests for a hearing relative to any of the substances involved were received. In accordance with § 1303.11(c) of Title 21 of the Code of Federal Regulations, the Administrator of the Drug Enforcement Administration has determined that no hearing relative to the above mentioned comment is necessary at this time.

Therefore, under the authority vested in the Attorney General by Section 306 of the Controlled Substances Act of 1970 (21 U.S.C. 826), and delegated to the Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations, the Administrator of the Drug Enforcement Administration hereby orders that the 1981 aggregate production quotas for dextropropoxyphene and pethidine intermediate-A, expressed as anhydrous base, and tetrahydrocannabinols be established as follows:

Controlled substance	1981 aggregate production quota (grams)
Tetrahydrocannabinols (Schedule I).....	20,000
Dextropropoxyphene (Schedule II).....	44,798,000
Pethidine intermediate-A (Schedule II).....	6,877,000

DEA will review the above established quotas early in 1981 to take into consideration actual 1980 sales and actual December 31, 1980 inventories, as well as other information which might be available to DEA at that time.

Dated: December 22, 1980.

Peter B. Bensinger,  
Administrator, Drug Enforcement  
Administration.

[FR Doc. 80-40488 Filed 12-29-80; 8:45 am]  
BILLING CODE 4410-09-M

[Docket No. 80-31]

**Dennis Stephen Oddo, D.D.S.;  
Revocation of Registrations**

On October 7, 1980, the Administrator of the Drug Enforcement Administration [DEA] issued to Dennis Stephen Oddo, D.D.S. [Respondent], Orders to Show Cause as to why DEA Certificates of Registration AO8138605, issued to the

Respondent at Silver Spring, Maryland, and AO8266733, issued to the Respondent at Brooklyn, New York, should not be revoked for reasons stated in the Orders to Show Cause. The Respondent, through counsel, has waived a hearing on the issues raised by the Orders to Show Cause.

The Administrator has considered the investigative file and the record of these proceedings and, pursuant to the provisions of Title 21, Code of Federal Regulations, Sections 1301.54(e) and 1316.67, hereby publishes his final order, based upon the findings of fact and conclusions of law hereinafter set forth.

The Administrator finds that on September 22, 1980, in the Circuit Court of Montgomery County, State of Maryland, in Docket No. 23766, the Respondent was convicted, in 43 counts, of violating Section 286(a)(1), Article 27, Annotated Code of Maryland, each of such counts being a felony offense relating to controlled substances. There are, therefore, lawful or statutory grounds for the revocation of the Respondent's registrations under Title 21, United States Code, Section 824(a)(2).

The Administrator further finds that by order of the Board of Dental Examiners of the State of Maryland, effective January 4, 1980, the Respondent's license to practice dentistry was suspended, thereby terminating his authority to prescribe, dispense or otherwise handle controlled substances in the course of professional practice in that State. The Administrator, therefore, concludes that there is an additional statutory basis for the revocation of the DEA registration issued to the Respondent in the State of Maryland. 21 U.S.C. 824(a)(3).

Having concluded that there are statutory grounds for the revocation of the Respondent's DEA registrations, and having been presented no legal or factual reasons for any other determination, it is the Administrator's decision that DEA Certificates of Registration AO8138605 and AO8266733, previously issued to Dennis Stephen Oddo, D.D.S., should be revoked, effective immediately. Accordingly, pursuant to the authority granted to the Attorney General by 21 U.S.C. 824, and redelegated to the Administrator of the Drug Enforcement Administration by 28 CFR § 0.100, the Administrator hereby orders that the Respondent's DEA registrations be, and they hereby are, revoked, effective immediately.

Dated: December 22, 1980.

Peter B. Bensinger,  
Administrator, Drug Enforcement  
Administration.

[FR Doc. 80-40452 Filed 12-29-80; 8:45 am]  
BILLING CODE 4410-09-M

[Docket No. 80-11]

**Gold Drugs, Inc.; Permission To Retain  
DEA Registration**

On April 15, 1980, the Administrator of the Drug Enforcement Administration [DEA] directed to Gold Drugs, Inc. [Respondent] of Hartford, Connecticut, an Order to Show Cause proposing to revoke Respondent's DEA Certificate of Registration [AG633252] and to deny Respondent's pending application for renewal of that registration for reason that Everett Goldberg, president of Gold Drugs, Inc., had been convicted of felony offenses relating to controlled substances. The Respondent, through Counsel, requested a hearing on the issues raised by the Order to Show Cause.

Following the completion of prehearing procedures, the hearing in this matter was held in Washington, D.C. on June 11, 1980. Administrative Law Judge Francis L. Young presided. On October 2, 1980, Judge Young issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. No exceptions were filed and on October 30, 1980, pursuant to 21 CFR 1316.65, he transmitted the record of these proceedings to the Administrator. The record contains, *inter alia*, the Administrative Law Judge's report or opinion, the hearing transcript, the Administrative Law Judge's orders and rulings, all exhibits which had been placed in the record, and the papers filed by the respective parties.

The Administrator has considered this record in its entirety and, pursuant to 21 CFR § 1316.67, hereby issues his final order in this matter, based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge's report has been extremely helpful in this matter, Judge Young has carefully identified the issues and has clearly, thoroughly and fairly summarized the evidence in this case. The Administrator hereby adopts the recommended findings of fact and conclusions of law in their entirety.

The Administrator finds that Mr. Goldberg was responsible for the diversion of large quantities of Schedule II controlled substances. He knowingly filled fraudulent prescriptions for drugs such as Dilaudid, Quaalude, Percodan and various amphetamine preparations.

He charged as much as five times the legitimate price for these prescriptions. In at least one instance, Mr. Goldberg "doctored" a prescription for his own use and on several occasions, he himself authored prescriptions in order to maintain the appearance of accountability in his dispensing records. These illegal activities began within weeks of the date on which Mr. Goldberg opened his pharmacy for business. It was a time period during which Mr. Goldberg was beset by financial, physical, psychological and family problems. These activities resulted in Mr. Goldberg's arrest and, ultimately, his guilty plea to five felony counts charging violations of the Connecticut controlled substance laws. Mr. Goldberg is now on probation and has paid a \$2,500.00 fine.

In early January 1978, the Connecticut Pharmacy Commission suspended Mr. Goldberg's license as a registered pharmacist. The suspension is effective until January 20, 1982. The Pharmacy Commission has permitted Mr. Goldberg to continue the operation of the Respondent pharmacy through the employment of another pharmacist who acts as the pharmacist-manager and who is responsible for the lawful operation of the pharmacy business. Since the date of his suspension by the Connecticut authorities, Mr. Goldberg has restricted his activities to the retail merchandising aspect of the business—he does not work as a pharmacist.

The Administrator concludes, as did the Administrative Law Judge, that there is a lawful statutory basis pursuant to 21 U.S.C. 824(a)(2) for the revocation of the Respondent's DEA registration and for the denial of its pending application by reason of the conviction of its president of felony offenses relating to controlled substances. The conviction of an owner or officer of a corporate registrant is sufficient ground for the revocation of the corporation's DEA registration. *In the Matter of Lynnfield Drug, Inc.*, Docket No. 76-8, 42 FR 8435 (1977); *Arenstein v. California State Board*, 71 Cal. Rptr. 357, 265 Cal. App. 179 (1968).

The illicit activities and felony conviction of Mr. Goldberg notwithstanding, the Administrative Law Judge felt that the circumstances which has led to Mr. Goldberg's violations has been eliminated, that the threat of further diversion by Mr. Goldberg was remote, and that, therefore, the pharmacy should be permitted to retain its DEA registration.

The Administrator reaches the same conclusion, but for different reasons than those discussed by the Administrative Law Judge. The

Administrator does not believe that a pharmacist who has abused the trust placed in members of his professions and who has diverted controlled substances to individuals whom he knew were disposing of them in the illicit market should be entrusted with the responsibility for maintaining controlled substances within the closed system of distribution envisaged by the Controlled Substances Act. The action of the Connecticut Pharmacy Commission, suspending Mr. Goldberg's license and requiring him to hire a pharmacist-manager, has provided an opportunity to observe that the pharmacy can be run, lawfully and regularly, through the agency of this other pharmacist. The pharmacist-manager is responsible for the ordering, dispensing and security of the Respondent's controlled substances. He must see that dispensing records are accurately kept, that a true accountability is maintained, and that controlled substances are dispensed only pursuant to lawfully issued prescriptions in usual course of the pharmacy's professional activity. The continued employment of an independent registered pharmacist-manager is a much surer way to protect the public than to speculate that Mr. Goldberg is unlikely to again violate the law.

Accordingly, it is the Administrator's decision, pursuant to the discretion vested in him by 21 U.S.C. 824 and 28 CFR § 0.100, not to revoke the Respondent's DEA registration or to deny its pending application for renewal of such registration. This decision is conditioned, however, upon the maintenance of the *status quo* with respect to the employment of a pharmacist-manager other than Mr. Goldberg. In the event that this condition is violated, or if there is any further diversion of controlled substances from the Respondent pharmacy, the Administrator will not hesitate to order the immediate revocation of the Respondent's registration, based upon its president's conviction.

After Mr. Goldberg's license to practice pharmacy has been restored by the Connecticut authorities, and once there has been an adequate period of time in which to observe Mr. Goldberg, working as a pharmacist in conjunction with the pharmacist-manager, the Administrator will consider an application to vacate the condition imposed by this order.

Dated: December 22, 1980.

Peter B. Bensinger,

Administrator, Drug Enforcement Administration.

[FR Doc. 80-40543 Filed 12-29-80; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 80-28]

#### Marshall S. Tuck, M.D.; Revocation of Registration

On August 22, 1980, the Administrator of the Drug Enforcement Administration [DEA] issued to Marshall S. Tuck, M.D. [Respondent], an Order to Show Cause proposing to revoke the Respondent's DEA Certificate of Registration, AT1479939, for reason that the Respondent was not licensed to practice medicine in the State of Arizona and was not, therefore, authorized to prescribe, dispense, administer or otherwise handle controlled substances under the laws of that State. Simultaneously, citing his finding of imminent danger to the public health and safety, the Administrator ordered the immediate suspension of the Respondent's registration pending a final determination in these proceedings.

In a two-sentence letter dated September 23, 1980, the Respondent, *pro se*, requested a hearing on the issues raised by the Order to Show Cause.

By Order dated October 3, 1980, the Administrative Law Judge noted that the only ground stated in the Order to Show Cause in support of the proposed revocation seemed to present only an issue of law and granted Government counsel an opportunity to file a motion for summary judgment. The order also provided that the Respondent was to have an opportunity to file a response or opposing motion. Government counsel filed a Motion for Summary Disposition on October 20, 1980. No response has been received from the Respondent and the period of time provided him for the filing of same has expired.

The Government's motion was supported by a certification of the Associate Executive Director of the Arizona State Board of Medical Examiners attesting to the fact that as of October 7, 1980, the Respondent was not licensed, either as a physician or a physician's assistant, in the State of Arizona. The Respondent is not, therefore, a practitioner authorized to dispense or conduct research with controlled substances under the laws of Arizona. Accordingly, DEA is without statutory authority to register the Respondent in Arizona and must terminate his registration. 21 U.S.C. 823(f).

In administrative proceedings in which the Order to Show Cause alleges lack of state authorization to handle controlled substances, this agency has consistently held that, absent a showing that such state authorization in fact exists, the DEA is without statutory authority to issue or maintain a registration. In such cases, if a hearing is requested, the proceedings may be terminated summarily, that is, without an evidentiary hearing, once it is determined or established, on the record, that the prerequisite state authority is lacking. See, *James Waymon Mitchell*, Dk. 79-16, 44 FR 71466 (1979); *Alfred Tennyson Smurthwaite*, Dk. 77-29, 43 FR 11873 (1978); *John W. Whitenight, D. O.*, Dk. 77-30, 43 FR 28259 (1978); and *David Sachs, M.D.*, Dk. 77-2, 42 FR 29112 (1977).

It is settled law that when no fact question is involved or the facts are agreed, a plenary, adversary administrative proceeding involving evidence, cross examination of witnesses, and the like, is not obligatory—even though a pertinent statute prescribes a hearing. In such situations, the rational is that Congress does not intend for administrative agencies to perform meaningless tasks. *United States v. Consolidated Mines and Smelting Co., Ltd.*, 455 F. 2d 432, 453 (9th Cir. 1971).

In this case, Government counsel has provided documentary evidence establishing that the Respondent is not licensed to practice medicine in the State of Arizona and that he is not, therefore, authorized to administer, dispense, prescribe or otherwise handle controlled substances under the laws of that State. The Administrative Law Judge has recommended that the Respondent's registration be revoked. The Administrator, after considering the record of this matter, concurs, in all respects, with the recommendations of the Administrative Law Judge.

Accordingly, pursuant to the authority granted to the Attorney General by 21 U.S.C. 824, and redelegated to the Administrator of the Drug Enforcement Administration by 28 CFR § 0.100, the Administrator hereby orders that DEA Certificate of Registration AT1479939, previously issued to Marshall S. Tuck, M.D., be, and it hereby is, revoked, effective immediately.

Dated: December 22, 1980.

Peter B. Bensinger,  
Administrator, Drug Enforcement  
Administration.

## DEPARTMENT OF LABOR

### Employment and Training Administration

#### Labor Surplus Area Classifications Under Executive Orders 12073 and 10582; Additions to Annual List of Labor Surplus Areas

**AGENCY:** Employment and Training  
Administration, Labor.

**ACTION:** Notice.

**SUMMARY:** The purpose of this notice is to announce a determination by the Department to add 12 areas to the list of labor surplus areas effective December 1, 1980.

**FOR FURTHER INFORMATION CONTACT:**

James W. Higgins, Assistant Chief,  
Division of Labor Market Information,  
601 D Street NW., Washington, D.C.  
20213 (202-376-6263).

**SUPPLEMENTARY INFORMATION:** The areas described below have been classified by the Assistant Secretary for Employment and Training as labor surplus areas for purposes of Executive Orders 12073 and 10582 pursuant to 20 CFR 654.5(c) and added to the "Listing of Eligible Labor Surplus Areas" for June 1, 1980, through May 31, 1981, effective December 1, 1980.

Executive Order 12073 requires executive agencies to emphasize procurement set-asides in labor surplus areas. The Secretary of Labor is responsible under this Order for classifying and designating areas which are labor surplus areas. Under Executive Order 10582, executive agencies may reject bids or offers of foreign materials in favor of the lowest offer by a domestic supplier, provided that the domestic supplier undertakes to produce substantially all of the materials in areas of substantial unemployment, as defined by the Secretary of Labor. Areas of substantial unemployment are defined by Department of Labor regulations as labor surplus areas at 20 CFR 654.13.

The Department's labor surplus area classification procedures are set forth at 20 CFR Part 654, Subpart A. The regulations require that the Assistant Secretary for Employment and Training classify labor surplus areas and publish the labor surplus areas together with corresponding geographic descriptions. Accordingly, the following additions to the list of labor surplus areas are published for the use of all Federal departments and agencies in directing procurement activity.

Additions to List of Eligible Labor Surplus Areas Under Executive Orders 12073 and 10582—June 1, 1980 through May 31, 1981

#### Labor Surplus Area and Geographic Description

**Alabama:**

Morgan County—Morgan County

**North Carolina:**

Person County—Person County

**Ohio:**

Ashtabula County—Ashtabula County

**Pension and Welfare Benefit Programs**

[Application No. D-2219]

**United Cotton Goods Company, Inc., Employee Stock Ownership Plan; Griffin, Georgia; Proposed Exemption for Certain Transactions**

**AGENCY:** Department of Labor

**ACTION:** Notice of Proposed Exemption.

**SUMMARY:** This document contains a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and the Internal Revenue Code of 1954 (the Code). The proposed exemption would exempt, effective December 30, 1980: (1) the sale by the United Cotton Goods Company, Inc. Employee Stock Ownership Plan (the Plan) of 56,109 shares (the Plan Shares) of the common stock of United Cotton Goods Company, Inc. (United) to Doag Georgia, Inc. (Georgia), for cash and a note of Georgia (the Purchase Money Note); (2) the extension of credit by the Plan to Georgia; and (3) the guarantee of payment on the Purchase Money Note by Doag USA, Inc. (USA), the parent of Georgia. The proposed exemption, if granted would affect United, Georgia, USA, the participants and beneficiaries of the Plan and other persons participating in the transaction.

**DATES:** Written comments and requests for a public hearing must be received by the Department on or before February 6, 1981.

**ADDRESS:** All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216, Attention: Application No. D-2219. The application for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

**FOR FURTHER INFORMATION CONTACT:** Mr. Paul R. Antsen of the Department, Telephone (202) 523-6915. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:** Notice is hereby given of the pendency before the Department of an application for exemption from the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and from the sanctions resulting

from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code. The proposed exemption was requested in an application filed by counsel for United pursuant to section 408(a) of the Act and section 4975(c) (2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, this notice of pendency is issued solely by the Department.

**Summary of Facts and Representations**

The application contains representations with regard to the proposed exemption which are summarized below. Interested persons are referred to the application on file with the Department for the complete representations of the applicant.

1. The Plan is an employee stock ownership plan established effective September 1, 1975. The assets of a prior frozen profit sharing plan were transferred to the Plan on its effective date so the Plan contains both employer securities and a segregated fund containing the assets of the prior profit sharing plan. As of August 31, 1980, the Plan had assets of approximately \$1,944,000 and 240 participants. The corporate trustee of the Plan is the Commercial Bank and Trust Company, (Commercial). Commercial is a directed trustee with all instructions regarding purchase or sale of United stock coming from the Plan's Administrative Committee. The Administrative Committee is composed of A. L. Blanton (Blanton), J. Frank Stovall (Stovall) and Joyce M. Jones (Jones), all of whom are officers, directors and/or employees of United. However, pursuant to a resolution of the Board of Directors of United, Commercial will be designated as having complete fiduciary responsibility with respect to this transaction. This responsibility will include: (1) evaluating the terms and conditions of the Purchase Money Note and (2) determining whether the sale of the Plan Shares is in the best interests of the participants and beneficiaries of the Plan.

2. United is a closely held corporation engaged in the business of importing, manufacturing and selling textile products to hospital, physicians, hotels, motels and linen supply companies. United's principal place of business is Griffin, Georgia. There is no public trading market for the common stock of

United. As of August 31, 1979, the net worth of United was \$6,245,965 or \$22.57 per share. Earnings for the fiscal year after taxes were \$905,073 or \$3.27 per share.

3. On November 2, 1980, United had issued and outstanding 229,022 shares of common stock, of which 149,381 shares or sixty five (65) percent were held by Blanton and Stovall, the principals of United, and their immediate families. The remaining shares and their percentage of the total issued and outstanding shares of United were held as follows: (1) the Plan Shares—twenty five (25) percent; (2) three United employees (including Jones)—15,925 shares or seven percent; and (3) twenty six (26) minority shareholders each owning less than 3,000 shares—7,498 shares or three percent.

4. The proposed transaction was described in an agreement (the Agreement and Plan of Merger) which was executed by the parties on October 24, 1980. The Agreement and Plan of Merger states that the transaction involves the acquisition by merger of United by Doag Griffin, Inc. (Griffin). It is anticipated that the effective date of the merger (Effective Date) will be December 30, 1980. The surviving corporate entity will retain the name United.

5. Griffin is a wholly owned subsidiary of Georgia which in turn is a wholly owned subsidiary of USA. All three Doag corporations are incorporated in Georgia. All outstanding and issued stock of USA is owned by Doag Warenhandels, a Republic of West Germany corporation having its principal office in Hamburg, Germany, and whose stock is traded on both the Hamburg and Berlin stock exchanges.

6. Prior to November 2, 1980, Angelica Corp. (Angelica), an entity unrelated to any of the parties to this transaction, had been a minority shareholder of United and held 54,208 shares of United common stock. In seeking to implement the Agreement and Plan of Merger, the management of United was advised by Angelica that Angelica would not consent to the Agreement and Plan of Merger unless it could be guaranteed by September 30, 1980, that the transaction would close in one of two specified fiscal periods. Angelica was motivated by, among other reasons, its desire to book the entire transaction in the same fiscal year that it contemplated losses from a change in its accounting procedures. Since absolute assurances could not be given to Angelica of such a closing and since their dissent could preclude a closing, management of United negotiated with Angelica on September 30, 1980, to redeem for cash

all of Angelica's shares of United stock on November 1, 1980, at a discount price of \$27.00 per share. The total cost to United for such redemption was \$1,463,616.

7. In order to defray the impact on United of such redemption, Georgia has agreed to contribute \$1,000,000 to the capital of United on February 10, 1981 by the purchase of additional common stock of United and the pledge of such stock as additional collateral for the Purchase Money Note. This redemption, in addition to allowing the transaction to be consummated, results in an increase in the purchase price being paid all other United shareholders of approximately \$1.55 per share. The Plan will receive approximately \$85,000 more from the proposed transaction as a result of the redemption of Angelica's stock.

8. Pursuant to the agreement and Plan of Merger, Griffin will be merged into United with each issued and outstanding share of common stock of United being converted into and exchanged for either cash, or cash and a participation in the Purchase Money Note equal to that percentage of stock ownership covered by the Purchase Money Note. Each share of common stock of Griffin will be converted into and exchanged for one share of United common stock. As a result of the merger, United will become a wholly owned subsidiary of Georgia.

9. Based on the results of a certified audit of United, prepared by Touche Ross & Co., for its fiscal year ended August 31, 1980, the purchase price for all shares of United has been established as \$8,093,725. When this amount is rounded to a per share value each share of United common stock will have a value of \$35.34. The purchase price for each share of United reflects an increase in the per share value of \$12.77 from the 1979 audit valuation. This amount will be reduced by the expenses of the transaction which shall be borne proportionately by the shareholders of United. It has been represented that the maximum projections for such expenses will not exceed sixty-five (65) cents per share. Therefore, the net sale price to all shareholders of United, including the Plan, will be not less than \$34.69 per share.

10. The terms of the Agreement and Plan of Merger provide that all shareholders of United, except as noted below, will be treated equally. The method of payment for the respective stock interests will be twenty-nine (29) percent in cash on the Effective Date of the Agreement and Plan of Merger and the balance represented by a participation in the Purchase Money

Note payable over a five year period with interest at ten (10) percent per annum. It is anticipated that the expenses of the transaction will be paid from the funds received on the Effective Date of the Agreement and Plan of Merger and charged to the separate accounts of the United Shareholders in proportion to their respective stock interests.

11. As set forth in paragraph 3 above, twenty-six (26) shareholders, some of whom are employees of United, own a total of 7,498 shares of United's common stock. In order to accommodate this proposed transaction without the necessity of registering the Purchase Money Note under the Securities Act of 1933 and complying with the Trust Indenture Act as a part of such registration, thereby incurring additional costs and delays, the Agreement and Plan of Merger provides that these minority shareholders will receive full cash payment for their stock on the Effective Date.

12. The Purchase Money Note will be secured by the guaranty of USA and the pledge of all of the issued and outstanding stock of United with Commercial, an independent commercial bank, as escrow agent. The escrow agreement (Escrow Agreement) states that holders of the Purchase Money Note shall exercise their rights and remedies through a person or persons designated as the Holders Representatives. Blanton and Stovall have been designated as the Holders Representatives. In addition, Commercial has been designated a Holders Representative insofar as the Plan is concerned. Accordingly, Commercial, in the event of a breach of any of the terms or conditions of the Purchase Money Note, shall have the unilateral authority to initiate action to protect the Plan's interests. In the event of a default, any of the Representatives would notify Commercial, who, in turn, shall make a written demand upon Georgia. Such written demand would notify Georgia of the acceleration of the Purchase Money Note and would demand payment of all accrued interest and unpaid principal remaining on the Purchase Money Note within ten (10) days of such notice. In addition to the normal safeguards present in a security arrangement of this type, additional safeguards will be provided as follows:

a. Existing management (Messrs. Blanton and Stovall) will be retained under five year incentive employment agreements, including representation on the Board of Directors of United.

b. The employment agreements provide that existing management will retain operational control of United.

c. USA will be precluded from upstreaming any funds from United other than those that may result from tax savings for a period of two years and thereafter only if such funding transfers do not result in the net worth of United dropping below an amount equal to twice the amount of the then outstanding principal balance and remaining interest due on the Purchase Money Note.

d. At the end of each fiscal year, United will be required to have a minimum of \$5,000,000 working capital and a ratio of current assets to current liabilities equal to the lower of (i) 2 to 1 or (ii) United's ratio at August 31, 1980 (3 to 1).

13. In summary, the applicant represents that the statutory criteria contained in section 408(a) of the Act have been satisfied as follows: (a) the Administrative Committee represents that the Plan is receiving equal treatment with all other shareholders of United (except for those small shareholders who will be receiving a cash only distribution on the Effective Date); (b) the price per share represents a price exceeding that price paid in prior transactions involving United common stock and substantially exceeds the valuation arrived at by and independent appraiser in 1979; (c) no public trading market existed in which the Plan Shares could alternatively have been sold; (d) the rights of the Plan under the Purchase Money Note are protected through the Escrow Agreement; (e) the Purchase Money Note is collateralized by the common stock of United which exceeds the balance owed to the Plan and other United shareholders; and (f) prior to the effective date of the exemption Commercial, as an independent fiduciary on behalf of the Plan, will review the terms and conditions of the Purchase Money Note and make a determination that the transaction is in the best interests of the Plan and its participants.

#### Notice to Interested Persons

Within five days following the publication in the Federal Register notice of the proposed exemption will be provided to all active Plan participants and to all former participants or beneficiaries who have outstanding account balances, and to Commercial, as corporate trustee of the Plan. The notice will be posted prominently in locations customarily used by United for notices to employees with regard to labor-management relations; notice by mail will be given as required for persons who cannot reasonably be expected to receive notice by the posting. Such notice shall contain a copy

of the notice of pendency of the exemption as published in the Federal Register and inform the interested persons of their right to comment and the right to request a hearing within the period set forth in the notice of pendency.

#### General Information

The attention of interested persons is directed to the following: (1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an Administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

#### Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing

should state the reasons for the writer's interest in the pending exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

#### Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply, effective December 30, 1980 to: (1) the sale of the Plan Shares of United to Georgia provided that the Plan receive not less than fair market value at the time of sale; (2) the extension of credit by the Plan to Georgia; and (3) the guarantee of payment on the Purchase Money Note by USA.

The proposed exemption, if granted, will be subject to the express conditions that the material facts and representations contained in the application are true and complete, and that the application accurately describes all material terms of the transaction to be consummated pursuant to the exemption.

Signed at Washington, D.C., this 23rd day of December, 1980.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

[Application No. D-1522 and Application No. D-1611]

#### Proposed Class Exemption for Life Insurance Company Discretionary Asset Management

AGENCY: Department of Labor.

ACTION: Notice of Proposed Exemption.

SUMMARY: This document is a notice of pendency before the Department of Labor (the Department) of a proposed exemption from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (ERISA or the Act) and from certain taxes imposed with respect to such transactions under the Internal Revenue code of 1954 (the Code). The proposed

exemption would allow a life insurance company to direct the allocation of assets of employee pension plans among certain investment funds, including separate accounts maintained by such insurance company, and to receive reasonable compensation for the performance of such allocation services. If it is granted, the proposed exemption would affect participants and beneficiaries of certain employee pension plans, fiduciaries of such plans, and life insurance companies.

**DATE:** Written comments and requests for a public hearing must be received by March 2, 1981.

**ADDRESS:** Written comments and requests for a public hearing (preferably at least three copies) should be sent to: Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C-4526, U.S. Department of Labor, Washington, D.C. 20216. Attention: Discretionary Asset Management Exemption. The applications for exemption, as well as all comments and requests for a public hearing, will be available for public inspection in the Public Documents Room, Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

**FOR FURTHER INFORMATION CONTACT:** William A. Schmidt, Plan Benefits Security Division, Office of the Solicitor, U.S. Department of Labor, Washington, D.C. 20216, telephone (202) 523-8610. This not a toll free number.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given of the pendency before the Department of a proposed class exemption from certain of the prohibited transaction restrictions of section 406 or ERISA, and from the taxes imposed by section 4975(a) and (b) of the Code by reason of certain transactions described in section 4975(c)(1) thereof.<sup>1</sup> The relief provided by the proposed exemption was requested in an application filed by six life insurance companies<sup>2</sup> and in an application filed by the American Council of Life Insurance<sup>3</sup> (the six insurance companies and the American

Council of Life Insurance are collectively referred to in this notice as the "applicants"). The applications were filed pursuant to section 408(a) of ERISA and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

#### Summary of the Applications

The representations made by the applicants with respect to the proposed class exemption are summarized below. However, interested persons are referred to the applications on file with the Department for the complete representations of the applicants.

The applicants request an exemption that would permit life insurance companies, and certain affiliates of such companies, to perform "discretionary asset management" services for employee benefit plans, and to receive compensation for such services. Generally, the expression "discretionary asset management," as used in reference to these applications, means the allocation of plan assets among separate accounts maintained by a life insurance company, or among separate accounts and one or more "advisory accounts" with respect to which the life insurance company provides investment advice or serves as investment manager. Discretionary asset management services may also consist of the allocation of assets within a separate account to different categories of investments with respect to which different fees are charged.

Life insurance companies issue contracts to employee benefit plans under which all or part of the insurance company's obligation is based on the investment results of a separate account of the company.<sup>4</sup> Typically, a group annuity contract is issued to the trustees of the plan or to an employer, and such contract provides for the deposit and accumulation of funds under both the "general account" provisions of the contract and the "separate account" provisions of the contract.

<sup>4</sup> Separate accounts are established by resolution of boards of directors of life insurance companies and are maintained pursuant to provisions of state laws relating to separate accounts. The applicants also state that the principal feature of separate accounts is that the insurer's contractual obligation normally varies in direct relation to the investment results, including changes in market value, of the assets that are held in the separate account. This description is consistent with section 3(17) of ERISA which provides that the term "separate account" means "an account established or maintained by an insurance company under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company."

Pooled separated accounts are accounts established for a number of plans each of which has an interest in the account. When a plan's funds are allocated to a pooled separate account, the plan is usually credited with units of participation in the account which reflect a unit value based on the fair market value of the account's assets on valuation dates specified in the contract, and when such funds are withdrawn, these units are liquidated and the amounts paid are also determined on the basis of unit values. Instead of using the unit method, some companies state a plan's interest in a pooled separate account as a dollar amount which reflects the fair market value of account assets on the applicable valuation dates. Transfers of funds between separate accounts are generally based on the fair market value of the interests being acquired or disposed of.

Some separate accounts are established to hold all or part of the funds of a plan or plans of a single employer or sponsor. Traditionally, such accounts have been maintained in order to invest the plan's assets in one category of investments. However, some insurers may invest funds which are allocated to a single customer account in more than one category of investments.

In addition to its authority to direct the investments of its separate accounts, an insurer also may have discretion over funds of an employee benefit plan which are held by an entity unrelated to the insurance company, such as a bank. These funds are referred to as "advisory accounts." In some cases, the insurer may be authorized to allocate funds among one or more advisory accounts and one or more separate accounts. In other cases, the insurer may be authorized to allocate plan assets only among two or more advisory accounts, and, in these circumstances, plan assets may not be invested in any of the insurer's separate accounts.

Discretionary asset management services are performed pursuant to a written agreement between the life insurance company performing such services and an independent plan fiduciary, and such an independent fiduciary is informed of the terms on which the life insurance company will perform discretionary asset management. Ordinarily the insurer's exercise of discretion with respect to the investment of plan assets is preceded by analysis intended to establish a desired ratio of fixed income to equity risk for the plan, taking into account plan liquidity and diversification needs, current and projected benefit payments, the general funding status of the plan,

<sup>1</sup> Section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978), effective December 31, 1978 (44 FR 1065, January 3, 1979), transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor.

<sup>2</sup> Application Number D-1522, filed August 31, 1979. The six insurance company applicants are: Aetna Life Insurance Company, Connecticut General Life Insurance Company, The Equitable Life Assurance Society of the United States, John Hancock Mutual Life Insurance Company, The Mutual Life Insurance Company of New York, and The Prudential Insurance Company of America.

<sup>3</sup> Application Number D-1711, filed October 31, 1979.

and the financial stability of the plan's sponsor. Once the insurer has directed investment of plan assets in order to achieve the basic asset mix objective, the insurer's investment personnel monitor, and from time to time make changes in, the plan's participation in the accounts available to the plan under its agreement with the insurer. Plan fiduciaries are regularly informed of allocations and transfers made by the insurer pursuant to its discretionary authority.

A plan fiduciary may generally terminate an insurer's discretionary authority and, once the fiduciary indicates its intention to terminate the insurance company's authority, such termination is typically effective within a period not exceeding 30 days after notice to the insurer. The plan fiduciary may also discontinue the plan's participation in one or more separate accounts; however, the applicable group annuity contract may impose limitations on large withdrawals which the insurer may invoke when necessary to maintain stability and liquidity in the account. In addition, some pooled separate accounts are designed to invest in a selected group of long-term debt obligations on a closed-end basis, and these accounts, by their terms, substantially limit withdrawals.

Life insurance companies that perform discretionary asset management services receive fees for managing the assets in a single customer or pooled separate account or in an advisory account. This investment management fee is usually expressed as a percentage of the value of a plan's investment in the account and varies depending on the kind of investments that are made by the account.<sup>5</sup> In addition, some of the applicants use the same fee structure for their various separate accounts, but scale the investment management fee downward at specified breakpoints as the plan's total interest in the various accounts of that insurer increases.

In those cases where an insurer invests in different categories of investments within a single customer separate account, the investment management fee for that account may be

<sup>5</sup> Investment management fees are charged regardless of whether a plan's interest in an account is acquired at the direction of an insurance company pursuant to discretionary asset management authority. The applicants indicate that investment management fees charged with respect to funds invested in common stock and bond separate accounts may range from .25 to .40 percent of asset value, and that investment management fees for real estate separate accounts may range from 1 to 1.25 percent of asset value; fees for private placement accounts are between those for common stock and bond accounts and those for real estate accounts.

determined by applying the fee for each category of investment to the amount of account assets invested in that category.

Life insurance companies also make certain other charges in connection with their management of plan assets invested in a separate account. For example, a charge is commonly made by a life insurance company to cover its accounting and recordkeeping expenses incurred in connection with a plan's disposition of an interest in one account and its acquisition of an interest in another. Also, the applicants state that when a plan invests funds in a separate account, or withdraws funds from the account, a charge is made in order to compensate the separate account for the expenses related to the investment or withdrawal of such funds.

Some of the life insurance companies that provide discretionary asset management services make a separate charge for such services. In one case, the fee charged to the plan is based on the actual time spent by insurance company personnel in providing such services. In another case, the life insurance company charges a fee expressed as a percentage of plan assets under discretionary asset management.

The applicants request an exemption which would provide that the restrictions of section 406 of ERISA and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1) thereof shall not apply to any transaction, including the provision of services, involving the allocation or transfer of plan assets by, or at the direction of, a life insurance company or certain affiliates of such life insurance company<sup>6</sup>—(1) between two or more life insurance company separate accounts, (2) between one or more advisory accounts and one or more separate accounts, or, (3) within a single customer separate account if such separate account is invested in different types of assets. The exemption suggested by the applicants would be subject to several conditions including a condition requiring that discretionary asset management services be provided pursuant to a written agreement between the life insurance company and an unrelated plan fiduciary. In addition, other conditions to the suggested exemption would provide for written disclosure of certain information to the authorizing plan fiduciary concerning fees with respect to each separate account or advisory account in which

<sup>6</sup> The applicants suggest that the exemption be made available to any affiliate of the life insurance company that is a member of any "controlled group of corporations," as defined in section 1563(a) of the Code, of which the life insurance company is also a member.

the plan may participate; information concerning the contractual provisions for discontinuance of discretionary asset management services (which would be required to be permitted on no more than 30 days' notice); and information concerning the contractual provisions relating to the discontinuance of a plan's participation in a separate account. The applicants also suggest a condition which would require that a life insurance company disclosure to the authorizing fiduciary any changes in the information previously disclosed if the effect of such changes is adverse to the plan; and a condition requiring quarterly reporting to the authorizing plan fiduciary of all allocations and transfers among separate accounts and advisory accounts. Finally, the applicants suggest a condition which would require that no commission or similar fee be payable to the life insurance company solely on account of an allocation of plan assets to a separate account or advisory account at the direction of the life insurance company.

The exemption requested by the applicants also would permit an insurance company to make a separate charge for the performance of discretionary asset management services. In this regard, the applicants state that provision for a separate charge for life insurance company discretionary asset management and a separate charge for portfolio management of an account in which a plan may have an interest is not inconsistent with Prohibited Transaction Exemption 77-4,<sup>7</sup> which permits a fiduciary who is an investment advisor with respect to a plan to cause the plan to purchase shares in a mutual fund for which the fiduciary also serves as investment manager. Among the conditions to the availability of that exemption is a requirement that the plan whose assets are managed by an investment advisor who also manages the assets of a mutual fund does not pay an investment management, investment advisory, or similar fee with respect to plan assets that are invested in shares of such mutual fund for the entire period of such investment.

According to the applicants, an insurance company that provides asset management services, unlike an investment advisor subject to Prohibited Transaction Exemption 77-4, undertakes two separate responsibilities: the responsibility to manage the assets of its separate accounts, and the responsibility to determine the proper asset mix of the plan and the timing of allocations or transfers among the

<sup>7</sup> 42 FR 18732, April 8, 1977.

available accounts. In addition, the applicants state that proper performance of the insurer's responsibility as investment manager to its separate accounts requires that time and attention be given to the composition of the account in light of the objectives and policies established for that account, while proper performance of its discretionary asset management responsibility requires that time and attention be given to the mix of assets of a particular plan in light of its needs and objectives and the range of available alternatives. Accordingly, the applicants assert, a separate fee for discretionary asset management is for a separate service, and is not duplicative of the separate account investment management fee.

The applicants state that the exemption is in the interests of plans and their participants and beneficiaries because it will assure the availability of investment services that are desired by plans and will better enable plan fiduciaries to carry out their responsibilities with respect to the management of plan assets. In this regard, the applicants represent that plan fiduciaries have expressed a strong interest in discretionary asset management services, and insurance companies have begun providing such services in order to satisfy the needs of plan sponsors and fiduciaries. Further the applicants state that they are not aware of any investment advisors or consultants who currently provide advice to plans with respect to the allocation and transfer of plan assets among life insurance company separate accounts, and that the provision of such services by unrelated parties would result in fees that would almost surely be significantly higher than those charged by an insurance company.

The applicants state that the exemption would be protective of plan participants and beneficiaries because an independent fiduciary would approve the provision of such services after being provided with sufficient disclosure materials to evaluate the transaction, and because such authorizing fiduciary would receive periodic reports that would enable him to evaluate the performance of such services. In addition, the applicants note that the suggested exemption would require that the authorizing fiduciary retain the right to terminate the insurer's discretionary asset management authority.

Finally, the applicants state that the exemption they request is administratively feasible because it establishes objective criteria for its application, and an insurance

company's compliance with such criteria may be readily determined and audited.

#### Treatment of Discretionary Asset Management Under ERISA

Assets held in a separate account of an insurance company to support obligations under contracts purchased by, or on behalf of, employee benefit plans are plan assets, and thus, an insurance company maintaining such a separate account is, under section 3(21) of ERISA, a fiduciary with respect to those plan assets and also is, under section 3(14)(A) of ERISA, a party in interest with respect to the plans that participate in such separate account.<sup>8</sup> Similarly, an insurance company that exercises any authority or control respecting management or disposition of plan assets held in an advisory account or renders investment advice for a fee or other compensation, direct or indirect, with respect to such assets, or has any authority or responsibility to do so, would be a fiduciary with respect to such assets and, therefore, a party in interest with respect to the plans that participate in the advisory account. See section 3(21)(a)(ii) of ERISA.

In performing discretionary asset management services an insurance company would also be exercising control over plan assets other than the investments of the separate account—i.e., a plan's interest in the separate account—and, therefore, would be a fiduciary with respect to the plans for which it performs such services. In this regard, section 408(b)(8) of ERISA provides an exemption from the prohibitions of section 406(a) for, among other things, the sale or purchase of an interest in a pooled investment fund of an insurance company qualified to do business in a State provided certain conditions are met. The transactions described in section 406(b) of ERISA, however, impose additional restrictions regarding the conduct of fiduciaries, and are separately prohibited. The Department is not prepared to state that

<sup>8</sup> See the Notice of Proposal of an Exemption (42 FR 54866, October 11, 1977) to what was subsequently adopted as Prohibited Transaction Exemption 78-19 (43 FR 59915, October 22, 1978). See also, the Department's proposed rule under section 401 of ERISA which states in part that in the case of a plan which is funded in whole or in part by a contract or policy of insurance issued by an insurer, the assets of the plan shall include the contract or policy under which the benefits are insured but shall not, solely by reason of the issuance of such contract or policy, include the assets of the insurer issuing the contract or policy except to the extent that such assets are maintained by the insurer in one or more separate accounts and do not constitute surplus in any such account. Proposed 29 CFR 2550.401b-1(d), 44 FR 50363, 50366, August 28, 1979.

the exemption in section 408(b)(8) applies to such transactions.<sup>9</sup>

#### The Proposed Exemption

The exemption being proposed by the Department in this notice would permit life insurance companies to perform discretionary asset management services of the kind described in the application. However, the exemption is subject to a number of conditions that differ from, or are in addition to, those suggested by the applicants. These conditions are primarily to provide sufficient protection to plans whose assets are held in a separate account (and to protect participants and beneficiaries of such plans) by means of assuring that the transactions are subject to approval and periodic review by an informed and disinterested fiduciary. This approach is similar to that taken by the Department in other "multiple services" exemptions—specifically Prohibited Transaction Exemption 77-9, referred to above, and Prohibited Transaction Exemption 79-1 (44 FR 5963, January 30, 1979), (relating to the effecting or execution of securities transactions on behalf of a plan by a person who is a fiduciary with respect to the plan)—and elements of the conditions to each of these exemptions are incorporated in the conditions to the exemption being proposed in this notice.

The major features of the proposed exemption are discussed below.

#### 1. Scope.

The proposed exemption would provide relief from the prohibitions of sections 406(a)(1) (A), (C), and (D) and 406(b) (1) and (2) of ERISA and from the taxes imposed by section 4975(a) and (b) of the Code by reason of section 4975(c)(1) (A), (C), (D) and (E) thereof for certain described transactions. First, the exemption would permit the acquisition or sale of an interest in a pooled separate account at the direction of the life insurance company that maintains such separate account, and the transfer of assets to or from an advisory account at the direction of a life insurance company that provides investment advice to, or serves as investment manager of, such advisory account. Second, the exemption would allow a

<sup>9</sup> In addition Prohibited Transaction Exemption 77-9, as amended, (42 FR 32395, June 24, 1977; as amended 44 FR 1479, January 5, 1979, and 44 FR 52365, September 7, 1979) provides an exemption from the prohibitions of section 408(a) and 406(b) of ERISA for the purchase with plan assets, or sale of an insurance or annuity contract from an insurance company. However, this exemption is not available for a transaction involving a fiduciary who is expressly authorized in writing to manage, acquire or dispose of assets of a plan on a discretionary basis.

life insurance company to recommend the allocation of plan assets among its separate accounts or between one or more of its separate accounts and one or more advisory accounts with respect to which it provides investment advice or serves as investment manager. Third, a life insurance company would be permitted to receive periodic investment management or advisory fees with respect to a separate account or advisory account in which plan assets have been invested at the direction of such life insurance company.<sup>10</sup> Finally, the proposed exemption would allow a life insurance company to allocate assets held in a separate account that is maintained for the plan or plans of a single employer among different classes of investments, notwithstanding that the fees received by the insurance company with respect to the assets held in such account are determined at different rates for each of the different classes of investments to which the assets of the account may be allocated.

## II. Conditions to the Exemption

**A. General Conditions.** The proposed exemption, if granted, would be effective from January 1, 1975. However, the exemption would be subject to two conditions that would be applicable both before and after the date a final exemption is published. First, the discretionary asset management services must be authorized pursuant to a written agreement between the insurance company and the plan (or a fiduciary on behalf of the plan), signed by an independent fiduciary.<sup>11</sup> Second, the combined total of all fees, commissions, and other consideration received by the life insurance company and its affiliates for the provision of services to the plan, in connection with the purchase of any insurance or

annuity contracts, and in connection with the investment of plan assets in a separate account or an advisory account may not exceed "reasonable compensation" within the contemplation of section 408(b)(2) and 408(c)(2) of ERISA and section 4975(d)(2) and 4975(d)(10) of the Code.<sup>12</sup> See 29 CFR 2550.408b-2(d), 2550.408c-2(b).

**B. Prospective Conditions.** The proposed exemption includes a number of conditions that would be applicable, in addition to the two conditions described above, for transactions occurring on and after a date 90 days from the date and exemption is granted.

**1. Conditions Relating to a Life Insurance Company's Authorization to Engage in Certain Transactions.** The first prospective condition to the proposed exemption would require that neither the insurance company providing discretionary asset management services to a plan pursuant to the exemption nor any affiliate of the insurance company may be a trustee or administrator of the plan or an employer of any participant in the plan. This condition is included because the proposed exemption provides for the supervision and monitoring of discretionary asset management services by an informed and disinterested fiduciary in order to protect affected plans and their participants,<sup>13</sup> and an exemption that would be available in circumstances where the insurer can effectively control the activities of the plan (such as where it is a sponsoring employer with respect to the plan) presents additional issues not specifically addressed by the applicants.<sup>14</sup> Although the proposed

exemption therefore would not be available for discretionary asset management services performed by an insurance company for a plan covering its own employees, the Department would consider expanding the scope of the exemption to cover such transactions if the comments received provide a sufficient basis for such relief.

The second prospective condition to the proposed exemption would require an independent plan fiduciary to specifically approve the allocation of plan assets to a pooled separate account or advisory account any of the assets of which are invested in assets other than "publicly traded" securities (or, in the case of a single-customer separate account, any investment of plan assets in such property).<sup>15</sup> This condition is included because the Department believes that it would not necessarily be in the interests of plan participants, or protective of their rights, for an insurance company to allocate plan assets to an account the assets of which are composed of relatively illiquid securities or real property (and with respect to which the insurance company will receive periodic investment management fees) without specific scrutiny by an independent plan fiduciary. However, in view of the additional burden this condition may impose on the insurance company and the authorizing fiduciary, the Department specifically invites comments concerning other ways in which meaningful supervision of the insurance company's allocation of plan assets to illiquid investment funds can be assured.

Another condition to the proposed exemption would require that an independent plan fiduciary renew its authorization of discretionary asset management services at least annually. In addition, the insurance company is required to provide the authorizing fiduciary with such reasonably available information as the life insurance company believes is

<sup>10</sup> The proposed exemption would not expressly permit an insurance company to receive fees for the performance of asset allocation services on behalf of a plan. However, section 408(b)(2) of ERISA provides an exemption from the restrictions of section 406(a) of ERISA for, among other things, contracting for services necessary to the operation of the plan if no more than reasonable compensation is paid, and section 408(c)(2) of ERISA generally permits a fiduciary to receive reasonable compensation for services rendered. Accordingly, the receipt by a life insurance company of reasonable compensation for the performance of asset allocation services would not, in itself, be a prohibited transaction. See 29 CFR 2550.408b-2; 29 CFR 2550.408c-2. Nonetheless, as discussed below, the proposed exemption would not be available if the aggregate of all fees received by the insurance company exceeds "reasonable compensation."

<sup>11</sup> In the Department's view, a transaction entered into by an insurance company would be "authorized" only if the authority existed at the time of the transaction; therefore, an independent fiduciary's ratification of past activities of an insurance company would not satisfy this condition.

<sup>12</sup> As discussed below, the exemption would be available for transactions occurring on and after a date 90 days from the date an exemption is granted only if the insurer receives no fees in connection with an investment of plan assets in a separate account or advisory account at the direction or recommendation of the insurer other than those that are specified in a condition to the exemption.

<sup>13</sup> In other exemptions that permit a fiduciary to perform multiple services for a plan, the Department has included conditions that preclude application of the exemption to transactions involving fiduciaries whose influence over the general operation of the plan is so great that another plan fiduciary would not be able to examine critically and objectively the multiple service arrangements. See e.g., section V(a) of Prohibited Transaction Exemption 77-9, as amended, (44 FR 1479, 1483, January 30, 1979).

<sup>14</sup> Cf. note 13, above (describing the provisions of other "multiple service" exemptions issued by the Department). In this regard, the Department has granted an exemption for transactions involving the "in-house" plans of certain investment advisors (Prohibited Transaction Exemption 77-3; 42 FR 18734, April 13, 1977). In addition, section 408(b)(5) of ERISA and section 4975(d)(5) of the Code provide an exemption from the prohibited transaction restrictions of ERISA for the purchase of life insurance, health insurance or annuities from a life insurance company that employs participants in a

plan if certain conditions are met. Further, the Department recognizes that the policy underlying these exemptions might also apply to an exemption permitting the provision of discretionary asset management services by an insurance company to a plan in which its employees participate. Cf. H.R. Rep. No. 1280, 93d Cong., 2d Sess., 314 (1974) (indicating that it would be contrary to normal business practice to require the plan of an insurance company to purchase its insurance from another insurance company). However, the Department is not prepared to conclude at this time that section 408(b)(5) provides an exemption for the performance of discretionary asset management services by an insurance company for a plan covering its own employees.

<sup>15</sup> "Publicly traded" securities are defined in the proposed exemption as securities that are not "restricted securities" within the meaning of Rule 144 under the Securities Act of 1933.

reasonably necessary in order for the independent fiduciary to determine whether the authorization should be granted or renewed, and also requires that the insurance company provide certain additional information concerning the matter in response to a reasonable request from the independent fiduciary.

The general disclosure standard with respect to an independent plan fiduciary's grant or renewal of an authorization is supplemented by conditions that require certain specific information to be disclosed to an authorizing fiduciary in connection with an initial authorization or the renewal of an authorization, as the case may be. These specific requirements are intended to assure that information that is essential to informed approval of discretionary asset management services, and to the effective oversight of the performance of such services, is brought to the attention of the authorizing fiduciary. Further, no change in the matters specifically required to be described in connection with an initial authorization may be effective as to a plan until the change has been disclosed to an authorizing fiduciary, and such fiduciary has either specifically consented to the change or has renewed the insurance company's authorization after such disclosure has been made.

**2. Conditions Relating to Periodic Reporting Regarding Performance of Discretionary Asset Management Services.** A prospective condition to the proposed exemption would require an insurance company that performs discretionary asset management services for a plan to provide quarterly reports to the plan fiduciary who authorized such services. This report would include a statement of the total charges incurred by the plan in connection with any plan assets with respect to which the life insurance company provides asset allocation services, and a further description of such charges by category. In addition, the report would include a description of each acquisition with plan assets or disposition of an interest in a separate account, as well as each transfer of plan assets to or from an advisory account. This quarterly report is intended to allow the authorizing fiduciary to monitor, on a continuing basis, the services performed on behalf of the plan by the insurance company.

**3. Conditions Relating to Fees Imposed in Connection With the Investment of Plan Assets in a Separate Account or Advisory Account.** In addition to the general standard of reasonableness applicable to

transactions that would be subject to the exemption, the prospective conditions describe the specific fees that a life insurance company may charge in connection with the investment of plan assets in a separate account or advisory account. Generally, these charges are limited to fees for asset allocation and investment management services that are specifically disclosed to an authorizing plan fiduciary; a reasonable charge for accounting and recordkeeping services actually rendered in connection with an investment of plan assets in a separate account or advisory account; and charges that do not exceed the amount reasonably necessary to reimburse a separate account or advisory account for direct expenses properly and actually incurred in connection with the investment of plan assets that have been allocated to such an account.<sup>16</sup>

In regard to the fees that are permitted to be charged by an insurance company providing discretionary asset management services, as discussed above, Prohibited Transaction Exemption 77-4 would not permit an investment advisor who invests plan assets in a mutual fund pursuant to that exemption to receive a separate investment advisory fee with respect to the assets so invested. In addition, as the department indicated in the notice accompanying the proposed exemption that was granted as Prohibited Transaction Exemption 77-4<sup>17</sup> the applicants for that exemption represented that it has generally been the practice of investment advisory firms utilizing publicly marketed mutual funds in the management of plan assets to deduct the value of assets invested in mutual fund shares from the asset base on which the plan account fees are periodically computed, and that this procedure essentially eliminates the possibility of the investment advisor receiving a "double fee" on assets invested in mutual fund shares.

Notwithstanding the provisions of Prohibited Transaction Exemption 77-4, the Department has not included in the exemption being proposed here a condition that would prohibit an insurance company which performs discretionary asset management services from making a separate charge for such services because the applicants state that the performance of discretionary asset management

services imposes responsibilities on the insurer that are distinct from the insurer's responsibilities as investment manager of its separate accounts.<sup>18</sup> However, the Department specifically invites comments addressing whether, in light of the restrictions imposed by Prohibited Transaction Exemption 77-4 on the fees that may be charged by an investment advisor, an additional condition should be included in the final class exemption relating to discretionary asset management that would prohibit or restrict an insurance company's imposition of separate charges for the performance of asset allocation services.

**4. Conditions Relating to Termination of an Agreement to Perform Discretionary Asset Management Services and Liquidation of a Plan's Investment in a Separate Account or Advisory Account.** Prospective conditions to the proposed exemption provide that the portion of any agreement under which an insurance company performs discretionary asset management services must be terminable by the plan, without penalty or other charge, on no more than 30 days' notice. In addition, the proposed exemption contains a condition that would enable a plan to withdraw from any separate account or advisory account in which its assets have been invested at the direction of a life insurance company that acts as investment manager of, or provides investment advice to, such account on not more than 90 days' notice (unless an independent plan fiduciary has consented in writing to an extension of such 90-day period).<sup>19</sup>

<sup>16</sup> Although an insurance company would, under the proposed exemption, be permitted to impose a separate charge for the performance of discretionary asset management services, other conditions to the proposed exemption would require the insurer to specifically disclose all charges to an authorizing fiduciary, and also could require that the fees charged by the insurance company be, in the aggregate, reasonable. In the Department's view, if an insurer is paid a separate charge that is characterized as a charge for "discretionary asset management" where the services involved merely duplicate services that the insurer is required to perform in managing plan assets that are invested in its separate accounts, the aggregate fees received by the insurer would not, in such circumstances, be reasonable. Therefore, an independent fiduciary authorizing the payment of such fees would violate his obligations in approving the payment. In addition, in determining whether to pay a separate fee to an insurance company for the performance of discretionary asset management services, an authorizing fiduciary would be obligated to consider the terms on which the plan could obtain comparable services from other sources. See e.g., sections 404(a)(1)(A)-(B), 405(a) and section 406(a)(1)(D) of ERISA.

<sup>19</sup> As discussed above, the applicants indicate that some pooled separate accounts limit withdrawals. Accordingly, the requirement that a plan be permitted to liquidate its interest in a

Footnotes continued on next page

<sup>16</sup> The Department's regulations under section 408(c)(2) of ERISA indicate that an expense is not a direct expense to the extent it would have been sustained had the service not been provided or if it represents an allocable portion of overhead costs. 29 CFR 2550.408c-2(b)(3).

<sup>17</sup> 41 FR 50516, November 16, 1976.

Another condition specifies the charges that an insurance company may impose with respect to a plan's withdrawal from an account. Generally, these are limited to charges for accounting and recordkeeping expenses, and charges that reimburse the separate account or advisory account for direct expenses properly and actually incurred in connection with the plan's withdrawal (e.g., the direct costs of disposing of securities in order to liquidate the plan's interest in the account).<sup>20</sup> However, where assets of a separate account consist of investments that may be illiquid, an additional charge is permitted to be made. This charge is equal to the difference between the fair market value of plan assets that are disposed of in order to liquidate the plan's interest in the account and the amount actually received on such disposition (adjusted to exclude that portion of the difference that is attributable to the withdrawing plan's interest in the account), and is intended to allow an insurance company to prevent any diminution in the value of other plans' interests in the separate account that might otherwise occur as a result of the plan's withdrawal from the account.<sup>21</sup>

Footnotes continued from last page  
separate account within a fixed period may require alteration of insurance companies' existing practices in some cases. Nonetheless, the Department believes that the ability of an independent fiduciary to terminate a plan's relationship with an insurance company is a very important factor in the fiduciary's effective supervision of discretionary asset management services. However, as discussed below, because prompt liquidation of a plan's investment in a pooled separate account may, in some cases, have adverse consequences to other plans that participate in the account, another condition to the proposed exemption would permit certain additional charges to be made to a plan that withdraws from separate accounts whose assets are illiquid. These charges are intended to protect the interests of other plans that participate in such accounts (see note 21, below). The Department is also prepared to consider modifications to the condition that requires that a plan be permitted to withdraw from a separate account if the changes would protect the interests of the withdrawing plan as well as other plans for which the insurance company is acting as a fiduciary.

<sup>20</sup> See note 16, above.

<sup>21</sup> The additional charge described in the proposed exemption is intended to allow an insurance company to protect the interests of other plans in a separate account from any diminution in the value of their interests in the account that would result from the sale of assets held in the separate account for an amount less than "fair market value" in order to promptly liquidate the interest of the withdrawing plan. In this regard, if the value of the assets of a separate account are determined on a basis other than fair market value, the disposition of assets at a discount attributable to interest rate fluctuations in order to liquidate the interest of a withdrawing plan may arguably also result in a diminution in the interests of the plans that continue to participate in the account. The proposed exemption does not permit a separate charge to

### III. Definitions

The proposed exemption contains definitions of various terms used in the exemption which generally are the same as the definitions of those terms in other class exemptions available to life insurance companies.<sup>22</sup> However, the term "life insurance company" is defined to include a corporate affiliate of a life insurance company that is a member of a "controlled group of corporations," within the meaning of section 1563(a) of the Code, of which the life insurance company also is a member. This definition has the effect of allowing certain affiliates of life insurance companies to perform discretionary asset management services under the exemption.

### General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which require, among other things, that a fiduciary discharge his duties respecting the plan solely in the interests of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption may be granted under section 408(a) of the Act

prevent such diminution because the applicants indicate that assets of separate accounts are generally determined on the basis of fair market value and no other basis for valuation is described in the applications. Nonetheless, the Department recognizes that an insurance company has fiduciary obligations with respect to plans that retain interests in a separate account as well as plans that elect to liquidate their interests, and, accordingly, it will consider, on the basis of public comments received regarding the proposed exemption, permitting other charges to be made on a plan's withdrawal from certain separate accounts if such charges are equitable to the withdrawing plan and reasonably designed to protect the interests of plans that continue to participate in the account.

<sup>22</sup> See e.g., Prohibited Transaction Exemption 78-19 (43 FR 59915, December 22, 1978).

and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible; in the interest of the plan(s) and of participants and beneficiaries of the plan(s); and protective of the rights of such participants and beneficiaries.

(4) The proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

### Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the proposed exemption to the address and within the time period set forth above. All comments will be made a part of the record. Comments and requests for a hearing should state the reasons for the writer's interest in the proposed exemption. Comments received will be available for public inspection with the application for exemption at the address set forth above.

### Proposed Exemption

The Department has under consideration the granting of the following class exemption pursuant to the authority of section 408(a) of the Act and section 497(c)(2) of the Code and in accordance with the procedure set forth in ERISA Procedure 75-1.

*Section I. Covered Transactions.*  
Effective January 1, 1975, the restrictions of sections 406(a)(1)(A), (C) and (D), 406(b)(1), and 406(b)(2) of the Act and the taxes imposed by section 4975 (a) and (b) of the Code by reason of section 4975(c)(1)(A), (C)(D), and (E) thereof shall not apply to the transactions described below if the applicable conditions set forth in Section II are met.

A. The acquisition with pension plan assets, or disposition, of an interest in a pooled separate account in the direction of the life insurance company that maintains such account.

B. The transfer of pension plan assets to or from an advisory account in the direction of a life insurance company that provides investment advice to, or serves as investment manager of, such advisory account.

C. A life insurance company's recommendation that pension plan assets be allocated to—

1. a separate account maintained by such life insurance company, or,

2. an advisory account for which such life insurance company serves as investment manager, or to which it provides investment advice, and any investment of pension plan assets in a separate account or advisory account that results from such recommendation.

D. The receipt by a life insurance company of periodic investment management or advisory fees with respect to a separate account or advisory account in which plan assets have been invested at the direction or recommendation of such life insurance company.

E. The allocation by a life insurance company of pension plan assets among different classes of investments within a separate account that is maintained by such life insurance company and which is funded solely by assets of pension plans that are sponsored by a single employer or by affiliated employers, the receipt by such life insurance company of compensation for such services, and the receipt by such life insurance company of periodic investment management fees with respect to the assets held in such separate account, notwithstanding that the fees received by such life insurance company are determined at different rates for each of the different classes of investments to which plan assets may be allocated.

For the purposes of this exemption, asset allocation services that constitute, or may result in, a transaction described in this Section I are referred to as "discretionary asset management services."

**Section II. Conditions.** A. Effective January 1, 1975, the exemption provided for transactions described in Section I is available only if each of the following conditions is met:

1. The discretionary asset management services are authorized pursuant to a written agreement between a plan (or a fiduciary on behalf of a plan) and an insurance company, which agreement has been signed by an independent fiduciary of the plan for which the discretionary asset management services are performed.

2. The combined total of all fees, commissions, and other consideration received by such life insurance company and its affiliates:

(a) For the provision of services to the plan and,

(b) In connection with the purchase of insurance or annuity contracts by such plan, or by a fiduciary on behalf of the plan, or in connection with the investment of plan assets in a separate account or an advisory account.

Is not in excess of "reasonable compensation" within the contemplation of section 408(b)(2) and 408(c)(2) of the

Act and section 4975(d)(2) and 4975(d)(10) of the Code.

B. Effective [a date 90 days from the date an exemption is granted], the exemption provided for transactions described in Section I is available only if each of the following conditions is satisfied in addition to each of the conditions described in paragraph A of this Section II:

1. Neither the life insurance company engaging in the transaction nor any affiliate of such life insurance company is a trustee or administrator of the plan or an employer of any employee covered by the plan.

2. In the case of any transaction described in paragraphs A through C of Section I that constitutes, or results in, the investment of plan assets in any separate account or advisory account any of the assets or which are, or may be, assets other than "publicly traded securities," and any transaction described in paragraph E of Section I that constitutes or results in, an investment in assets other than "publicly traded securities," such transaction is specifically authorized by an independent fiduciary of the plan whose assets are involved in such transaction. For the purposes of this paragraph B(2) and paragraph B(12)(c) of this section, "publicly traded securities" are securities that are not "restricted securities" within the meaning of Rule 144 of the Securities Act of 1933.

3. The authorization referred to in paragraph A(1) of this section (relating to the authorization of a life insurance company to perform discretionary asset management services) continues in effect for more than one year only if such continuance is authorized in writing at least annually by an independent fiduciary of the plan for which the discretionary asset management services are performed.

4. No such authorization is made or renewed unless the life insurance company receiving such authorization shall have furnished the authorizing plan fiduciary with any reasonably available information which the life insurance company which seeks the authorization reasonably believes to be necessary to determine whether such authorization should be made or renewed, and any other reasonably available information regarding the matter that the authorizing fiduciary may reasonably request.

5. In the case of an initial authorization, the information required by paragraph B(4) of this Section II shall include, but is not limited to:

(a) A description of the discretionary asset management services to be

rendered by such life insurance company;

(b) The schedule of the specific fees charged by the life insurance company for the performance of discretionary asset management services, and the schedule of any asset management or advisory fees charged by such life insurance company with respect to—

(i) Any separate account or advisory account in which plan assets may be invested at the direction or recommendation of such life insurance company; or,

(ii) Any separate account for which a life insurance company performs allocation services described in paragraph E of Section I;

(c) A description of all other charges that may be imposed with respect to the performance of discretionary asset management services and in connection with each separate account or advisory account in which plan assets may be invested at the direction or recommendation of such life insurance company, including fees charged in connection with the acquisition or disposition of an interest in a separate account or the transfer of plan assets to or from an advisory account;

(d) A description of the steps a plan must take in order to terminate the agreement made for it by its independent fiduciary with the life insurance company which authorizes the performance of discretionary asset management services;

(e) A description of the steps a plan must take to liquidate its investment in any separate account or advisory account that has been made at the direction or recommendation of such life insurance company; and,

(f) A full description of the consequences to the plan of terminating any agreement under which the insurance company performs discretionary asset management services and a full description of the consequences to the plan of the liquidation of any investment of plan assets in a separate account or advisory account that may be made at the direction or recommendation of such life insurance company.

6. In the case of any renewal of an authorization, the information required to be disclosed by paragraph B(4) of this Section II shall include, but is not limited to:

(a) A description of any changes in matters specifically required to be disclosed by paragraph B(5) of this Section II (relating to an initial authorization);

(b) A statement of the value, as of a date within 90 days of the date such information is furnished, of the plan's

investment, if any, in each separate account or advisory account to which its assets have been allocated at the direction or recommendation of such life insurance company (regardless of when such allocation was made);

(c) a general statement of the manner in which such life insurance company determines the value of the plan's investment in each separate account or advisory account to which its assets have been allocated.

7. No change in the substance of any matter specifically required to be disclosed by paragraph B(5) of this Section II (relating to an initial authorization) is effective as to a plan until the earlier of:

(a) the date on which an independent plan fiduciary specifically consents to such change; or,

(b) the first date after disclosure of such change pursuant to paragraph B(6) of this Section II on which an independent plan fiduciary renews the insurance company's authorization to perform discretionary asset management services.

8. The life insurance company furnishes the authorizing fiduciary with a report containing at least the following information not less frequently than every three months and not later than 45 days following the end of the period to which the report relates:

(a) the total of all charges incurred by the plan during the preceding three months in connection with any plan assets with respect to which the life insurance company provides discretionary asset management services;

(b) the amount of such charges, by category, including

(i) fees for the provision of discretionary asset management services,

(ii) the investment management, or advisory fee charged to the plan (or that portion of any such fee charged to a separate account or advisory account that is attributable to the plan's interest in such account) with respect to each separate account or advisory account in which the plan's assets are invested during the period to which the report relates,

(iii) any charge relating to the acquisition or disposition of an interest in a separate account or the transfer of plan assets to or from an advisory account; and,

(c) a description of each acquisition with plan assets or disposition of the plan's interest in a separate account and each transfer of plan assets to or from an advisory account, including the date

of such transaction and the amount involved.

9. No commission or other charge is payable to a life insurance company performing discretionary asset management services or to any affiliate of such life insurance company, in connection with any investment of plan assets in a separate account or advisory account at the direction or recommendation of such life insurance company or affiliate, except the following:

(a) fees that are described in paragraph B(5)(b) of this Section II;

(b) a reasonable charge for accounting and recordkeeping services actually rendered in connection with such investment; and,

(c) a charge not in excess of the amount reasonably necessary to reimburse the separate account or advisory account for direct expenses properly and actually incurred in connection with the initial investment of plan assets that have been allocated to such account.

10. That portion of any agreement pursuant to which a life insurance company performs discretionary asset management services is terminable by the plan, without penalty or charge, on not more than 30 days' notice.

11. The plan is able to liquidate its investment in any separate account or advisory account to which its assets have been allocated at the direction or recommendation of a life insurance company on not more than 90 days' notice (unless an independent plan fiduciary has agreed in writing to an extension of such 90 day period).

12. No penalty or other charge is made with respect to the withdrawal of plan assets from a separate account or advisory account, except the following:

(a) a reasonable charge for accounting and recordkeeping services actually rendered in connection with such liquidation;

(b) a charge not in excess of the amount reasonably necessary to reimburse the separate account or advisory account for direct expenses properly and actually incurred in connection with the liquidation of the plan's investment in the account; and,

(c) in a case where a plan has requested withdrawal of its assets from a separate account any of the assets of which are invested in property other than "publicly traded securities" (as defined in paragraph B(2) of this Section II), a charge not in excess of the amount reasonably necessary to reimburse to such separate account an amount equal to—

(i) the difference, if any, between the "fair market value," determined as of

the date of withdrawal, of any assets of the account that are disposed of in order to liquidate the plan's investment and the amount actually received on disposition; less,

(ii) that portion of such difference that bears the same relationship to the total amount of the difference as the value of the withdrawing plan's interest in the separate account, determined immediately prior to its withdrawal, bears to the aggregate value of all interests in such separate account, determined immediately prior to the plan's withdrawal.

For the purposes of this paragraph B(12), the "fair market value" of an asset means the fair market value of such asset as reasonably determined in writing by a person who is reasonably qualified to form an opinion regarding the fair market value of the asset and who is agreed to in writing by an independent fiduciary of the withdrawing plan. Such person may be designated in the instrument authorizing the life insurance company to perform discretionary asset management services.

*Section III. Definitions.* For the purpose of this exemption—

A. An "advisory account" means an asset or pool of assets, other than a life insurance company's general assets or a separate account, with respect to which a life insurance company provides investment management services or investment advice.

B. An "affiliate" of a person includes—

(1) any person, directly or indirectly, through one or more intermediaries, controlling, controlled by, or under common control with the person;

(2) any officer, director, employee (including in the case of an insurance company, an insurance agent thereof, whether or not the agent is a common law employee of the insurance company), or relative of, or partner in, any such person; and,

(3) any corporation or partnership of which such person is an officer, director, partner or employee.

C. The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

D. The term "discretionary asset management services" has the meaning given it in Section I.

E. The term "life insurance company" means an insurance company authorized to do business as a life insurance company under the laws of a State. For purposes of this exemption, the term "life insurance company" shall include a corporate affiliate of a life

insurance company that is a member of a "controlled group of corporations," within the meaning of section 1563(a) of the Code, of which such life insurance company is a member.

F. The term "party in interest" includes a "disqualified person" described in section 4975(e)(2) of the Code.

G. The term "relative" means a "relative" as that term is defined in section 3(15) of the Act (or a "member of the family" as that term is defined in section 4975(e)(5) of the Code), or a brother, a sister, or a spouse of a brother or sister.

Signed at Washington, D.C. this 22nd day of December 1980.

Ian D. Lanoff,

#### Office of the Secretary

[TA-W-8602]

#### Active Products Corp.; Correction and Clarification

On June 9, 1980, the Department instituted an investigation under TA-W-8602 incorrectly designating the petitioning workers as Active Tool and Manufacturing Company, Incorporated, Detroit, Michigan, published in the *Federal Register* on June 13, 1980 (45 FR 40257). In fact, the petition was filed on behalf of workers at the company's division, Active Products Corporation, Marion, Indiana.

On June 27, 1980, the Department published in the *Federal Register* (45 FR 43484) a Notice of Termination of Investigation concerning employees of Active Tool and Manufacturing, Detroit, Michigan (TA-W-8602). Subsequently, the Department on its own motion reinstated the investigation of the petition having recognized that the intent of petition TA-W-8602 was to petition for assistance of the Marion workers. The Department inadvertently failed to publish notice of the reinstatement of the investigation of the Marion workers. In due course, following investigation, the Department issued a Notice of Negative Determination denying trade adjustment assistance to the Marion workers on December 10, 1980, published in the *Federal Register* on December, 1980 (45 FR ———).

Signed at Washington, D.C., this 15th day of December 1980.

Harold A. Bratt,

*Deputy Director, Office of Trade Adjustment Assistance.*

BILLING CODE 4510-28-M

[TA-W-11,277]

#### APCO Knitwear, Inc. (Formerly Known as APCO Manufacturing Company, Incorporated); Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on October 14, 1980 in response to a worker petition received on October 6, 1980 which was filed by the Amalgamated Clothing and Textile Workers' Union on behalf of workers and former workers producing men's and boys' knit shirts at APCO Knitwear, Incorporated, Brodhead, Wisconsin.

The Notice of Investigation was published in the *Federal Register*. No public hearing was requested and none was held.

The petitioning group of workers in this case was included in a determination (TA-W-4752) issued on March 30, 1979 which certified as eligible to apply for adjustment assistance all workers engaged in employment related to the production of men's knit sport shirts at APCO Manufacturing Company, Incorporated, Brodhead, Wisconsin. APCO Manufacturing Company was sold in September 1979 and the name was changed to APCO Knitwear, Incorporated. No changes were made in the day-to-day operation of the firm. Only the name and ownership changed. Since all workers separated, totally or partially from APCO Knitwear, Incorporated, formerly known as APCO Manufacturing Company, Incorporated, on or after January 18, 1978 (impact date) and before March 30, 1981 (expiration date of the determination) are covered by an existing determination, a new investigation would serve no purpose. Therefore, this investigation has been terminated.

Signed at Washington, D.C. this 19th day of December 1980.

Marvin M. Fooks,

*Director, Office of Trade Adjustment Assistance.*

[TA-W-8193]

#### Borg-Warner Corp., Warner Gear Division; Affirmative Determination Regarding Application for Reconsideration

On November 25, 1980, after being granted a filing extension, counsel for the petitioners requested administrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance for workers and former workers of the Warner Gear Division plant in Muncie, Indiana of the Borg-Warner Corporation. The determination was published in the *Federal Register* on October 3, 1980 (45 FR 65703).

Among other things, the application for reconsideration claimed that the Department's customer survey was not adequate.

#### Conclusion

After review of the application, I conclude that the counsel's claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, D.C., this 17th day of December 1980.

James F. Taylor,

*Director, Office of Management Administration and Planning.*

[FR Doc. 80-40548 Filed 12-29-80; 8:45 am]

BILLING CODE 4510-28-M

#### Determinations Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for worker adjustment assistance issued during the period December 15-19, 1980.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

- (1) That a significant number of proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,
- (2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and
- (3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have

contributed importantly to the separations, or threat, thereof, and to the absolute decline in sales or production.

#### Negative Determinations

In each of the following cases it has been concluded that at least one of the above criteria has not been met.

TA-W-8095; *Firestone Tire and Rubber Co., Corporate Headquarters, Akron, OH.* Investigation revealed that criterion (3) has not been met. A survey of customers of the subject firm indicated that increased imports did not contribute importantly to sales declines and worker separations at the subject firm.

TA-W-9331; *Weldmation, Inc., Madison Heights, MI.* Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of welding and assembly machinery are negligible.

TA-W-9970; *Gathen Industries, Inc., Roseville, MI.* Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of automobile tools and dies are negligible.

TA-W-7948; *C.A. Baltz and Sons, Inc., Kingston, NY.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8159; *Lattimore and Tessmer, Inc., Southfield, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8808 & 8808A; *Means Stamping Industries, Inc., Means Stamping Div., Saginaw, MI and Delta Metal Products Div., Bay City, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-9481; *Adell Industries, Inc., Novi, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-7997; *Motor City Stamping, Inc., Sterling Heights, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8343; *Excel Pattern Works, Inc., Dearborn, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not

contribute importantly to worker separations at the firm.

TA-W-8648; *Shuron Division of Textron, Inc., Rochester, NY.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8887; *Eagle Clothes, Inc., New York, NY.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-9300 & 9300A-B; *American Sunroof Corp., Paramount, CA, Los Angeles, CA, and San Francisco, CA.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8811; *General Tire and Rubber Co., Aldora Mills, Barnesville, GA.* Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of tire cord are negligible.

TA-W-8286; *McIntosh—Division of Norris Industries, Detroit, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8334; *Eifel Pattern and Model, Fraser, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-9328; *Tiger Babe Sportswear, Inc., Newark, NJ.* Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of blouses did not increase as required for certification.

TA-W-9615 & 9973; *Republic Steel Corp., Buffalo District, New York Plant, Buffalo, NY and New York Sales Office, Amherst, NY.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-7351, 9241, & 10,993; *General Electric Co., Engineering Section, Cleveland, OH, Memphis, TN, and Lexington, KY.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8588, 8589, 8673-76, 8678, 8679, and 8681-83; *Walker Mfg. Co., Grass Lake, MI, Jackson, MI, Seward, NE, Racine, WI, Newark, OH, Jonesboro, AR, Harrisonburg, VA, Greenville, TX,*

*Batavia, IL, Arden, NC, and Aberdeen, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-9164; *Rockford Headed Products, Inc., Rockford, IL.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8346; *Visioneering, Inc., Fraser, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-8039 & 8039A-M; *American Sunroof Corp., Southgate, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-11,147; *American Sunroof Corp., Glass and Trim Plant, Lansing, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-10,459; *American Sunroof Corp., Warren, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-10,963; *Square D Environmental Contracting Corp., Detroit, MI.* Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of duct work are negligible.

TA-W-9993 & 9993A; *Quhault Cedar Products, Neilton, WA.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-9060; *Hall Heating and Air Conditioning, Inc., Burton, MI.* Investigation revealed that criterion (3) has not been met. Aggregate U.S. imports of duct work are negligible.

TA-W-7947; *Balfour Industries, Inc., Detroit, MI.* Investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

#### Affirmative Determinations

TA-W-9055; *Rockwell International, Inc., Logansport, IN.* With respect to workers producing suspension springs, a certification was issued applicable to all

such workers separated from employment on or after June 16, 1979.

With respect to workers producing mechanical springs the investigation revealed that criterion (3) has not been met. Surveyed customers did not increase purchases of imports while decreasing purchases from the subject firm.

*TA-W-10,689; Keuffel and Esser Co., Cape May Court House, NJ.* A certification was issued covering all workers of the firm separated on or after April 1, 1980 and before October 1, 1980.

*TA-W-10,510; Trim Trends, Inc., Clawson, MI.* A certification was issued covering all workers of the firm separated on or after March 15, 1980.

*TA-W-8203; Motor Wheel Corp., Mendota, IL.* A certification was issued applicable to all workers engaged in employment related to the production of automobile wheels who were separated from employment on or after August 6, 1979.

With respect to workers engaged in employment related to the production of agricultural and industrial wheels, criterion (3) has not been met. Surveyed customers did not buy imports of agricultural or industrial wheels.

I hereby certify that the aforementioned determinations were issued during the period December 15-19, 1980. Copies of these determinations are available for inspection in Room S-5314, U.S. Department of Labor, 200 Constitution Avenue, NW, Washington, D.C. 20210 during normal working hours or will be mailed to persons who write to the above address.

Dated: December 22, 1980

BILLING CODE 4510-28-M

[TA-W-10,699]

### **First Ford; Negative Determination Regarding Application for Reconsideration**

By letter of November 17, 1980, (copy attached) one of the petitioners for the former workers requested administrative reconsideration of the Department of Labor's Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance in the case of former workers of that company. The determination was published in the *Federal Register* on October 24, 1980, (45 FR 70604).

Pursuant to 29 CFR 90.18(c), reconsideration may be granted under the following circumstances:

(1) if it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) if, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justifies reconsideration of the decision.

The petitioner claims that Ford Motor Company (Ford) has a substantial degree of proprietary control over First Ford since the loss of auto sales caused Ford to close First Ford.

The Department's review showed that First Ford was an independent, franchised dealership which sold and serviced Ford automobiles and trucks and, as such, did not produce an article within the meaning of Section 222(3) of the Trade Act.

Since workers at First Ford do not produce an article, they may be certified only if Ford is the "workers' firm" within the meaning of Section 222 of the Act. Ford may be determined to be the "workers' firm" if Ford and First Ford, an independent dealership, are related by ownership or by a substantial degree of proprietary control, or if the workers are *de facto* employees of Ford. Ford is not the "workers' firm" under either test. There is no element of ownership or control between the firms. The workers also are not *de facto* employees of Ford since all payroll transactions, personnel actions and employee benefits are under the control of First Ford. The mere fact that the Ford Motor Credit Company, a subsidiary of Ford, lent First Ford money to purchase new cars and equipment and the further fact that Ford Leasing Development Company petitioned the Des Plaines Zoning Board of Appeals for a change in zoning are not sufficient in themselves to support a determination that the Ford Motor Company is the "workers' firm".

### **Conclusion**

After review of the application and the investigative file, I conclude that there has been no error or misinterpretation of the law which would justify reconsideration of the Department of Labor's prior decision. The application is, therefore, denied.

Signed at Washington, D.C., this 15th day of December 1980.

**C. Michael Aho,**

*Director, Office of Foreign Economic Research.*

BILLING CODE 4510-28-M

[TA-W-9957]

### **Solix Sportswear Corp., Termination of Investigation**

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on August 11, 1980 in response to a worker petition received on July 29, 1980 which was filed on behalf of former workers at Solix Sportswear Corporation, New York, New York. The workers produced men's outerwear.

The investigation revealed that the petitioning group of workers in this case was included in a determination (TA-W-8051) issued on June 25, 1980 which certified as eligible to apply for adjustment assistance all workers of Solix Sportswear Corporation who became totally or partially separated from employment on or after May 8, 1979 and before December 1, 1979. The three workers who filed the present petition were separated from employment at Solix in November 1979 and were never recalled. All production of men's outerwear by Solix ceased in November 1979. A totally new product line was introduced during February 1980.

Since all workers separated totally or partially from Solix Sportswear Corporation, New York, New York on or after May 8, 1979 and before December 1, 1979 are eligible to apply for adjustment assistance under an existing determination a new investigation would serve no purpose. Consequently, the investigation has been terminated.

Signed at Washington, D.C. this 17th day of December 1980.

**Marvin M. Fooks,**

*Director, Office of Trade Administration Assistance.*

## **NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE**

### **Meeting**

Pursuant to Sec. 10(a)(2), of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), notice is hereby given that the Marine Transportation Subgroup of the Independent Areas Task Force (IATF) of the National Advisory Committee on Oceans and

Atmosphere (NACOA) will meet Thursday and Friday, January 15-16, 1981. The Subgroup will meet in the B-100 conference room of Page Building No. 1, 2001 Wisconsin Avenue, NW., Washington, D.C.

The session, which will be open to the public, will convene at 9:00 a.m. and adjourn at 4:00 p.m. each day. The agenda for the meeting of the Marine Transportation Subgroup is as follows:

*Ocean Problems and Transoceanic Shipping*

- A. U.S. merchant marine capabilities to meet national trade and defense needs.
- B. Flags of convenience.
- C. Other issues.

NACOA has initiated a study to formulate national goals and objectives for the oceans in the decade of the 1980's and beyond. To support the conduct of this study, the Secretary of Commerce has established the IATF for NACOA. The IATF will be responsible for the preparation of preliminary recommendations in the areas of energy, fisheries, marine transportation, ocean minerals, ocean operations and services, pollution, and waste management.

Persons desiring to attend will be admitted to the extent seating is available. Persons wishing to make formal statements should notify the Chairperson of the Subgroup on Marine Transportation, Dr. Don Walsh, in advance of the meeting. The Chairperson retains the prerogative to impose limits on the duration of oral statements and discussion. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the NACOA Executive Director, Mr. Steven N. Anastasion, or CDR Tom Nunes, the Staff Member for the Marine Transportation Subgroup. The mailing address is: NACOA, 3300 Whitehaven Street NW. (Suite 438, Page Building No. 1), Washington, D.C. 20235.

Steven N. Anastasion,  
*Executive Director.*

## NATIONAL SCIENCE FOUNDATION

### Advisory Committee for Behavioral and Neural Sciences; Subcommittee for Psychobiology; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee on Psychobiology of the Advisory Committee for Behavioral and Neural Sciences.

Date & Time: January 23-24, 1981, 8:30 a.m.-5:00 p.m. each day.

Place: Hilton Inn, Room 339, Salt Lake City, Utah.

Type of Meeting: Closed.

Contact Person: Dr. Fred Stollnitz  
Program Director, Psychobiology Program, Room 320, National Science Foundation, Washington, D.C. (202) 357-7949.

Purpose of Subcommittee: To provide advice and recommendations concerning support for research in psychobiology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority To Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,

*Committee Management Coordinator.*

### Advisory Committee for Physics; Subcommittee on Computational Facilities for Theoretical Research; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Committee for Physics—Subcommittee on Computational Facilities for Theoretical Research.

Date and Time: January 15-17, 1981; 9 a.m. to 5 p.m. each day.

Place: National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550. Room 628 each day.

Type of Meeting: Open.

Contact Person: Dr. Richard A. Isaacson, Division of Physics, National Science Foundation, Washington, D.C. 20550. Telephone (202) 357-7979.

Summary of Minutes: Will be available as an attachment to the minutes of the full Committee meeting to be held in February, 1981.

Purpose of Subcommittee: To examine present and future trends for the usage of

computers for university-based Theoretical Physics research and recommend an appropriate strategy for meeting the computational needs of this area of research.

Agenda:

January 15, 1981, 9 a.m. to 5 p.m.: Review of available studies on the usage of computers for theoretical research by university scientists. Preliminary discussion of Subcommittee recommendations.

January 16, 1981, 9 a.m. to 5 p.m.: Continuation of previous day's discussion.

January 17, 1981, 9 a.m. to 5 p.m.: Continuation of previous day's discussion.

M. Rebecca Winkler,

*Committee Management Coordinator.*

### Advisory Council; Task Group No. 15; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Task Group No. 15 of the NSF Advisory Council.

Place: Room 523, National Science Foundation, 1800 G Street, N.W., Washington, D.C. 20550.

Date: Friday, January 30, 1981.

Time: 9:00 a.m. till 5:00 p.m.

Type of Meeting: Open.

Contact Person: Ms. Jeanne Hudson,

Executive Secretary of the NSF Advisory Council, National Science Foundation, Room 518, 1800 G Street, N.W., Washington, D.C. 20550. Telephone: 202/357-9433.

Purpose of Task Group: The purpose of the Task Group, composed of members of the NSF Advisory Council, is to provide the full Advisory Council with a mechanism to consider numerous issues of interest to the Council that have been assigned by the National Science Foundation.

Summary Minutes: May be obtained from the contact person at above stated address.

Agenda: The Task Group is asked to determine the role of NSF in the science education for the general public. The task Group will focus on mechanisms to encourage greater interagency cooperation and will suggest mechanisms to foster increased and/or expanded in-school as well as out-of-school programs for education in the sciences and technology.

## NUCLEAR REGULATORY COMMISSION

### FEDERAL EMERGENCY MANAGEMENT AGENCY

#### Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants (NUREG-0654/FEMA-REP-1, Rev. 1)

In January 1980, NUREG-0654/FEMA-REP-1, "Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in

Support of Nuclear Power Plants," was issued for interim use and comment. Comments have been received and evaluated. The Nuclear Regulatory Commission and the Federal Emergency Management Agency have used the comments in revising the document. The revision process included close coordination with State and local planning groups.

As a result, Revision 1 of NUREG-0654/FEMA-REP-1 was published in November 1980. Wide distribution is being made to industry and to State and local officials who are responsible for radiological emergency planning and preparedness. This document is consistent with NRC and FEMA regulations and supersedes other previous guidance and criteria published by FEMA and NRC on this subject. It will be used by reviewers in determining the adequacy of State, local, and nuclear power plant licensee emergency plans and preparedness.

Single copies of this document are available free, to the extent of supply, by writing to the Director, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; or to Headquarters, Federal Emergency Management Agency, 1725 I Street NW., Washington, D.C. 20472, Attention: Administrative Services Division. Copies will also be available for review in the NRC Public Document Room, Washington, D.C.; the local NRC Public Document Rooms; at FEMA Headquarters, Administrative Services Division; and the FEMA Regional Offices.

Dated at Washington, D.C., this 17th day of December 1980.

For the Nuclear Regulatory Commission.

E. Kevin Cornell,

Deputy Executive Director for Operations.

For the Federal Emergency Management Agency.

Frank A. Camm,

Associate Director for Plans and Preparedness.

## SECURITIES AND EXCHANGE COMMISSION

### Cincinnati Stock Exchange; Application for Unlisted Trading Privileges and of Opportunity for Hearing

December 18, 1980.

The above named national securities exchange has filed an application with the Securities and Exchange

Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stock of:

Dart & Kraft Incorporated, Common Stock, \$2.50 Par Value (File No. 7-5795).

This security is listed and registered on one or more other national securities exchanges and is reported on the consolidated transaction reporting system.

Interested persons are invited to submit on or before January 12, 1981 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,  
Secretary.

## SYNTHETIC FUELS CORPORATION

### Proposal Workshops

*Action: Notice/Invitation.*

#### Summary

The U.S. Synthetic Fuels Corporation will conduct two pre-proposal workshops on January 19 at the Hilton Hotel in New York City and on January 28 at the Fairmont Hotel in Denver. The purpose of these workshops is to provide prospective proposers and interested parties an opportunity to meet SFC officers and staff to discuss our solicitation, evaluation and selection process and the various forms of financial assistance available through the SFC.

**Note.**—The SFC is authorized to financially assist the commercial production of synthetic fuels from coal (including peat and lignite), shale, tar sands (including heavy oils), and water (as a source of hydrogen through electrolysis).

#### NATIONAL CREDIT UNION ADMINISTRATION.

#### Notice of Change in Subject of Meeting

The National Credit Union Administration Board determined that its business required that the previously announced open meeting on December 18, 1980, include an additional item, which was open to public observation.

Consideration of DIDC Actions of December 12, 1980.

The previously announced items were:

1. Review of Central Liquidity Facility Lending Rate.
2. Consideration of a waiver of the regular reserve transfer for the fourth quarter of 1980.
3. Consideration of a revision of the regulations applying to retirement accounts.
4. Consideration of Advance Notice of Proposed Rulemaking for revising Regulation

721, Federal Credit Union insurance and group purchasing activities.

5. Consideration of Interpretive Ruling and Policy Statement regarding the use of statistical sampling for the verification of members' accounts that is required by Section 115 of the Federal Credit Union Act and Section 741.2 of the NCUA Rules and Regulations.

6. Final Rule on Premiums.

7. Adoption of an NCUA System of Grievance Records.

8. Publication of Fifth Semi-Annual Agenda in Federal Register.

9. Report on actions taken under delegations of authority.

10. Applications for charters, amendments to charters, bylaw amendments, mergers as may be pending at that time.

The meeting was held at 9:30 a.m., in the 7th Floor Board Room, 1776 G St., NW., Washington, D.C.

**FOR MORE INFORMATION CONTACT:** Rosemary Brady, Secretary of the Board, telephone (202) 357-1100.

**AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK**

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday. Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

**NOTE: As of September 2, 1980, documents from the Animal and Plant Health Inspection Service, Department of Agriculture, will no longer be assigned to the Tuesday/Friday publication schedule.**

**REMINDERS**

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

**Rules Going Into Effect Today**

Note: There were no items eligible for inclusion in the list of Rules Going Into Effect Today.

**List of Public Laws**

**Last Listing December 30, 1980**

This is a continuing listing of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (telephone 202-275-3030).

**H.J. Res. 615 / Pub. L. 96-563** Providing for appointment of David C. Acheson as a citizen regent of the Board of Regents of the Smithsonian Institution (December 22, 1980; 94 Stat. 3304) Price \$1.

**S. 2227 / Pub. L. 96-564** To grant the consent of the United States to the Red River Compact among the States of Arkansas, Louisiana, Oklahoma, and Texas (December 22, 1980; 94 Stat. 3305) Price \$1.25.

**H.R. 7217 / Pub. L. 96-565** To establish the Kalaupapa National Historical Park in the State of Hawaii, and for other purposes (December 22, 1980; 94 Stat. 3321) Price \$1.

**H.J. Res. 642 / Pub. L. 96-566** Providing for convening of the first regular session of the Ninety-seventh Congress on January 5, 1981, and for other purposes (December 22, 1980; 94 Stat. 3328) Price \$1.

**H.R. 7865 / Pub. L. 96-567** Nuclear Safety Research, Development, and Demonstration Act of 1980 (December 22, 1980; 94 Stat. 3329) Price \$1.

**S. 3027 / Pub. L. 96-568** Disaster Relief Act Amendments of 1980 (December 22, 1980; 94 Stat. 3334) Price \$1.

**S. 2726 / Pub. L. 96-569** Environmental Research, Development, and Demonstration Authorization Act of 1981 (December 22, 1980; 94 Stat. 3335) Price \$1.

**H.R. 2111 / Pub. L. 96-570** To extend the service area for the Sacramento Valley Canals, Central Valley project, California,

and for other purposes (December 22, 1980; 94 Stat. 3339) Price \$1.

**S. 1784 / Pub. L. 96-571** Alaska Federal-Civilian Energy Efficiency Swap Act of 1980 (December 22, 1980; 94 Stat. 3341) Price \$1.

**S. 1148 / Pub. L. 96-572** To reauthorize title I of the Marine Protection, Research, and Sanctuaries Act, and for other purposes (December 22, 1980; 94 Stat. 3344) Price \$1.

**S. 2189 / Pub. L. 96-573** Low-Level Radioactive Waste Policy Act (December 22, 1980; 94 Stat. 3347) Price \$1.

**H.R. 999 / Pub. L. 96-574** To amend the Plant Variety Protection Act (7 U.S.C. 2321 et seq.) to clarify its provisions, and for other purposes (December 22, 1980; 94 Stat. 3350) Price \$1.

**H.R. 4941 / Pub. L. 96-575** To name a dam and reservoir on the San Gabriel River, Texas, as the "North San Gabriel Dam" and "Lake Georgetown", respectively (December 22, 1980; 94 Stat. 3353) Price \$1.

**H.R. 8345 / Pub. L. 96-576** To name the United States Customs House in Ogdensburg, New York, the "Robert C. McEwen United States Customs House" (December 22, 1980; 94 Stat. 3355) Price \$1.

**H. J. Res. 337 / Pub. L. 96-577** Designating February 11, 1981, "National Inventors' Day" (December 22, 1980; 94 Stat. 3357) Price \$1.

Federal Register  
Drafting  
Handbook  
A Handbook for  
Regulation Writers

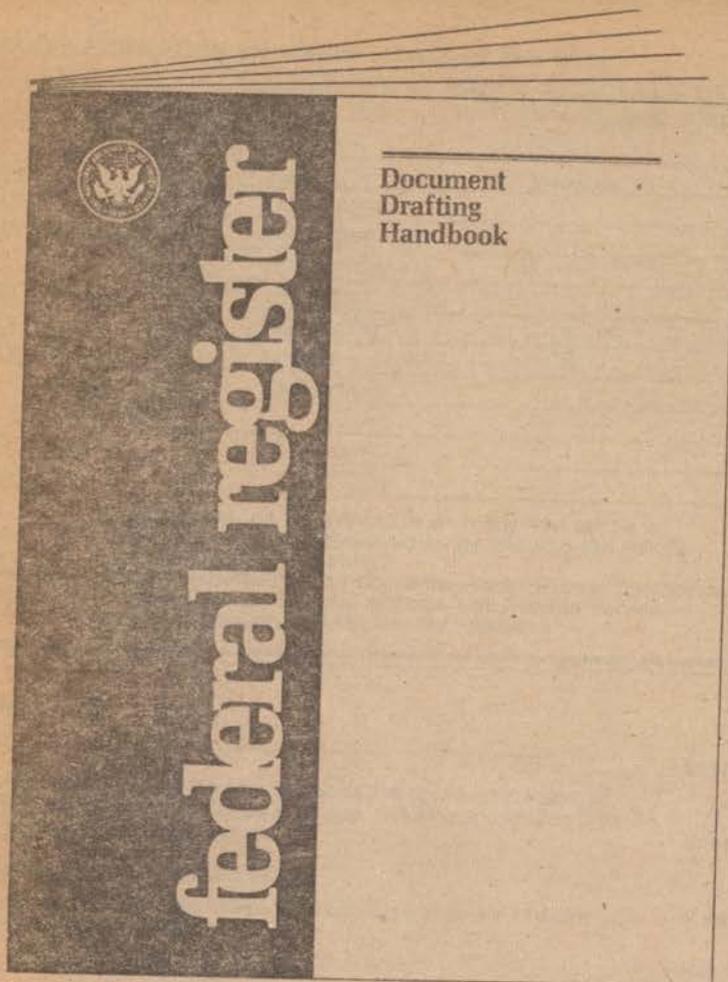

The Federal Register is the official journal of the Federal Government. It contains the daily list of Federal Register notices, proposed rules, and final rules. The Handbook is a practical guide for writing regulations. It covers the entire process from the initial proposal to the final rule. It includes information on the Federal Register process, the rules of administrative procedure, and the requirements for writing regulations. The Handbook is written in a clear, concise, and practical style. It is an essential reference for all those who are involved in the regulation process.

## Publication of Advisory Notes, the Commodity Control List and Commodity Interpretations in the Code of Federal Regulations

**AGENCY:** International Trade Administration, U.S. Department of Commerce.

**ACTION:** Final rule.

**SUMMARY:** This revision makes technical changes in the regulations which are necessary to include the full text of the following sections in the Code of Federal Regulation (CFR): Advisory Notes for Selected CCL Entries (Supplement No. 1 to Part 385), Commodity Control List (§ 399.1), and Commodity Interpretations (§ 399.2). In prior years these documents were incorporated by reference. This document also revises the authority citation for Part 399 by updating it to reflect the latest statutory and departmental authorizations.

**EFFECTIVE DATE:** December 30, 1980.

**FOR FURTHER INFORMATION CONTACT:**

Richard J. Isadore, Acting Director, Operations Division, Office of Export Administration, Room 1617M, Washington, D.C. 20230, 202-377-4738.

**SUPPLEMENTARY INFORMATION:****Advisory Notes for Selected CCL Entries**

The Advisory Notes appear in Supplement 1 to Part 385. They were printed in the *Federal Register* on June 25, 1980 (45 FR 43012-43054). They are revised and set out in full text in today's document. The Advisory Notes will be included in the next edition of Title 15 of the CFR, revised as of January 1, 1981.

**Commodity Control List (CCL)**

The Commodity Control List was printed in the *Federal Register* on June 25, 1980 (45 FR 43060-43138). Today, the Department announces its intention to include the CCL in full text in the next revision of Title 15 of the CFR. The CCL is designated Supplement 1 to § 399.1. In addition, replacement pages issued since the June 25, 1980, publication are printed in today's document and the authority section is revised and updated.

**Commodity Interpretations**

The Department has decided to include the Commodity Interpretations in the next revision of Title 15 of the CFR. Therefore, the full text of the interpretations is included in today's document as Supplement 1 to § 399.2.

**Rulemaking Requirements**

Section 13(a) of the Export Administration Act of 1979 ("the Act") exempts regulations promulgated thereunder from the public participation in rulemaking procedures of the Administrative Procedure Act. Section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form, is not applicable because these regulations do not impose controls on exports. It has been determined that these regulations are not "significant" within the meaning of Department of Commerce Administrative Order 218-7 (44 FR 2082, January 9, 1979) and International Trade Administration Administrative Instruction 1-6 (44 FR 2093, January 9, 1979) which implement Executive Order 12044 (43 FR 12661, March 23, 1978), "Improving Government Regulations." Therefore these regulations are issued in final form. Although there is no formal comment period, public comments on the regulations are welcome on a continuing basis.

In consideration of the reasons set out in the preamble, 15 CFR Chapter III is amended as set forth below.

(Secs. 4, 5, 6, 7, 13, 15, 17(d) and 21, Pub. L. 96-72 (50 U.S.C. app. 2401 *et seq.*); Executive Order 12214 (45 FR 29783, May 6, 1980); Departmental Organization Order 10-3 (45 FR 6141, January 25, 1980); International Trade Administration Organization and Function Order 41-1 (45 FR 11862, January 30, 1980))

**Kent N. Knowles,**

*Director, Office of Export Administration.*

1. Supplement 1 to Part 385 is revised to read as follows:

**Supplement No. 1 to Part 385—Advisory Notes for Selected CCL Entries**

2018A Specialized machinery, equipment, gear, and specially designed parts and accessories therefor, specially designed for the examination, manufacture, testing, and checking of the arms, ammunition, appliances, machines, and implements of war.

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of equipment used to determine the safety data of explosives, as required by the International Convention on the Transport of Dangerous Goods (C.I.M.), articles 3 and 4 in Annex 1 RID, provided that such equipment will be used only by the railway authorities of current C.I.M. members, or by Government accredited testing facilities in those countries, for the testing of explosives to transport safety standards, as follows:

- (a) Equipment for determining the ignition and deflagration temperatures;
- (b) Equipment for steel-shell tests;
- (c) Drop hammers not exceeding 20 kg in weight for determining the sensitivity of explosives to shock;

(d) Equipment for determining the friction sensitivity of explosives when exposed to charges not exceeding 36 kg in weight.

1081A Machinery for use in the manufacture of aircraft, as follows:

(a) Machinery specially designed for the working or forming of aircraft sheet, plate or extrusion; or

(b) Machinery specially designed for the milling of aircraft skin.

**Note.**—Licenses are likely to be approved for export to satisfactory end-users provided that the machinery does not present an improvement on machinery in production before the 1st January of the year ten years preceding the year of the proposed export.

1091A (a) Units for numerically controlling simultaneously coordinated (contouring and continuous path) movements of machine tools and dimensional inspection machines in two or more axes, *except units having all of the following characteristics:*

- (1) *Hardwired (not softwired, i.e., not Computerized Numerical Control (CNC));*
- (2) *No more than two contouring interpolating axes can be simultaneously coordinated (interpolating is understood to be any mathematical function including linear and circular; the units may have one or more positioning axes in addition to two contouring axes. The units may have more than one set of two contouring axes (e.g. units controlling two independent railheads on a vertical turret lathe), provided a separate feedrate number is required for each set of two contouring axes, and a single feedrate number (standard or optional) does not control more than two contouring axes);*
- (3) *Minimum programmable increment equal to or greater (coarser) than 0.001 mm (0.0004 in.); and*
- (4) *Without interface to allow direct computer input;*

(b) Machine tools and dimensional inspection machines, which according to the manufacturer's technical specifications can be equipped with controls described in sub-entry (a) above, *except:*

- (1) *Boring mills, milling machines, and machining centers, having all of the following characteristics:*
  - (i) *Maximum slide travel in any axis equal to or less than 3,000 mm (10 ft.);*
  - (ii) *Positioning accuracy of any axis equal to or greater than  $\pm 0.01$  mm per 300 mm (0.0004 in./ft.) and 0.005 mm for each additional 300 mm (0.0002 in./additional ft.);*
  - (iii) *Spindle horsepower equal to or less than 20 kW (25 hp);*
  - (iv) *Single-working spindle;*
  - (v) *Axial and radial axis motion measured at the spindle axis in one revolution of the spindle equal to or greater than  $D \times 2 \times 10^{-5}$  TIR (peak-to-peak) where D is the spindle diameter; and*
  - (vi) *Not more than 3 axes capable of simultaneously coordinated contouring motion regardless of the NC unit connected to the machine;*
- (2) *Machine tools (other than the machines described in sub-entry (1) above) and dimensional inspection machines having all of the following characteristics:*
  - (i) *Positioning accuracy of any axis equal to or greater than  $\pm 0.01$  mm per 300 mm*

(0.0004 in./ft.) and 0.005 mm for each additional 300 mm (0.0002 in./additional ft.);

(ii) Radial axis motion measured at the spindle axis equal to or greater than 0.0008 mm (0.00003 in.) TIR (peak-to-peak) in one revolution of the spindle (for lathes and other turning machines); and

(iii) Not more than 3 axes capable of simultaneously coordinated contouring motion regardless of the NC unit connected to the machine; (the machines in sub-entry (b)(1)(iv) above may have multiple tool heads or turrets, but only one working spindle (standard or optional) may be operative at a time; the machines defined in sub-entries (b)(1)(vi) and (b)(2)(iii) above may have more than one work station, but each station shall be limited to 2-axes contouring (e.g. vertical turret lathes with two independent railheads). The machines may have one or more discrete positioning mode axes (e.g. discrete positioning index table) in addition to the three contouring axes. Secondary contouring axes parallel to primary contouring axes (e.g. W-axis of a boring mill that has a primary Z-axis) are not to be considered when determining the number of contouring axes; the value of the positioning accuracy described in sub-entries (b)(1)(ii) and (b)(2)(i) above does not include the width of backlash. This value is determined by the usual statistical methods (random tests), i.e. by approaching from only one direction a minimum of five measurement points up to a maximum of twenty-five measurement positions as random tests along one axis. National standards, e.g. the German VDI standards No. 2354, sheet 1 and/or the United States NMTBA standard ("Definition and Evaluation of Accuracy and Repeatability for Numerically-controlled Machine-Tools," August 1972), can be taken as binding standards for this measuring method);

(c) Direct Numerical Control (DNC) systems consisting of a dedicated stored program computer acting as a host computer and controlling, on-line or off-line, one or more numerically-controlled machine tools or inspection machines, as defined in sub-entry (b) above, related software, and interface and communication equipment for data transfer between the host computer memory, the interpolation functions, and the numerically-controlled machine tools; and

(d) Specially designed sub-assemblies which, according to the manufacturer's technical specifications, can upgrade the capabilities of numerical control units and machine tools to meet the specifications described in sub-entries (a), (b), or (c) above.

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of Computer Numerical Control (CNC) units for uses other than aerospace, provided that:

(a) At the time of export, the units are mounted on non-controlled machine tools or equipment;

(b) The CNC units are designed to have all of the following characteristics:

(1) No more than two contouring interpolating axes can be simultaneously coordinated ("Interpolating" is understood to be any mathematical function including linear and circular. Units may not have additional positioning axes);

(2) The cabinet shall be designed for only 2-axes operation (i.e. there shall be no

additional card rack locations, wiring provisions for more than two servo-loops, nor physical space for later additions of these types of items);

(3) Memory is limited to and not capable of being extended beyond that enabling a maximum of two-axes simultaneous velocity and path generation, plus 400 characters (8-bit) of part program storage;

(4) Power supply is limited to two-axes operation;

(5) Minimum programmable increment equal to or greater (coarser) than 0.001 mm; and

(6) Without interface to enable data exchange with another computer;

(c) The information exported with and pertaining to the control unit shall:

(1) Be limited to machine language, binary format, control software enabling a maximum of two-axes simultaneous velocity and path generation;

(2) Not include flow charts, logic diagrams, nor source program documentation for the control software;

(3) Reflect only two-axes parameters in all electrical/mechanical installation, operation, or maintenance of documentation.

2120A Cryogenic equipment, the following:

(a) \* \* \*

(b) Electrical, magnetic, and electronic equipment or components, and electrical conductors, specially designed for operation continuously or discontinuously at ambient temperatures below  $-274^{\circ}\text{F}$  ( $-170^{\circ}\text{C}$ ), as follows:

(1) Superconductive metals, alloys, compounds, composites, and intercalate materials, *except*:

(i) Superconductive wire having a filament cross-sectional area of  $4.42 \times 10^{-3}$  sq.mm. (or 75 microns diameter) or greater; or

(ii) Superconductive niobium-titanium wire having a filament cross-sectional area of  $1.26 \times 10^{-3}$  sq.mm. (or 40 microns diameter) or greater in a copper matrix;

(2) \* \* \*

(3) \* \* \*

(4) \* \* \*

(c) \* \* \*

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of individual shipments of niobium-titanium wire covered by sub-entry (b)(1) above having a filament cross-sectional area of  $9.5 \times 10^{-5}$  sq.mm. (or 11 microns diameter) or greater in a copper matrix, in quantities not exceeding 10 kg.

1131A Pumps (except vacuum pumps listed under entry No. 1129) having any of the following characteristics:

(a) \* \* \*

(b) Having all flow contact surfaces made of 90 percent or more tantalum, titanium, or zirconium, either separately or combined, *except when such surfaces are made of materials containing more than 97 percent and less than 99.7 percent titanium; and*

(c) \* \* \*

**Note.**—Licenses are likely to be approved for export of pumps covered by sub-entry (b) above to bona fide civil end-users for non-aerospace end-uses.

1133A Valves, cocks and pressure regulators having all flow contact surfaces

made of 90% or more tantalum, titanium or zirconium, either separately or combined, *except when such surfaces are made of materials containing more than 97% and less than 99.7% titanium.*

**Note.**—Licenses are likely to be approved for export of valves, cocks and pressure regulators to bona fide civil end-users for non-aerospace end-uses.

1205A Electro-chemical, semi-conductor, and radioactive devices for the direct conversion of chemical, solar, or nuclear energy to electrical energy, as follows:

(a) Electro-chemical devices, as follows:

(1) Fuel cells operating at temperatures of  $392^{\circ}\text{F}$  ( $200^{\circ}\text{C}$ ) or less, including regenerative cells, i.e., cells for generating electric power, to which all the consumable components are supplied from outside the cell (the temperature of  $392^{\circ}\text{F}$  ( $200^{\circ}\text{C}$ ) or less is intended to refer to the fuel cell and not the fuel conditioning equipment, which may be either an ancillary or an integral part of the fuel cell battery and which may operate at over  $392^{\circ}\text{F}$  ( $200^{\circ}\text{C}$ ));

(2) \* \* \*

(3) \* \* \*

(4) \* \* \*

(b) \* \* \*

(c) Power sources other than nuclear reactors based on radioactive materials systems, *except*:

(1) Those having an output power of less than 0.5 Watt and a total weight of more than 200 lbs. (90.7 kg); or

(2) Those specially designed and developed for medical use within the human body; and

(d) \* \* \*

**Notes.**—1. Licenses are likely to be approved for export to satisfactory end-users of fuel cells covered by sub-entry (a)(1) above, having a maximum output power level greater than 10 kW using gaseous pure hydrogen and oxygen/air reactants, alkaline electrolytic, and a catalyst support by carbon either pressed on a metal mesh electrode, or attached to a conducting porous plastic.

2. Licenses are likely to be approved for export to satisfactory end-users of devices covered by sub-entry (c) above, having an output power of 0.5 Watt or more and an overall efficiency of 6 percent or less. (The overall efficiency is obtained by dividing the electrical output, expressed in watts, by the thermal input, expressed in watts. It is understood that this efficiency is to be measured at the beginning of life.)

3261A Neutron generator systems, including tubes, designed for operation without an external vacuum system and utilizing electrostatic acceleration to induce a tritium-deuterium nuclear reaction; and specially designed parts therefor.

**Note.**—Licenses are likely to be approved for the export to satisfactory end-users of tubes and systems whose technical specifications are essentially the same as those for previously approved exports, provided that they are for civil use.

1312A Presses and specialized controls, accessories, and parts therefor, as follows:

(a) \* \* \*

(b) Hydraulic presses, as follows:

(1) Vertical presses having a total rated force of over 10,000 tons; or

(2) Horizontal presses having a total rated force of over 5,000 tons;

(c) Isostatic presses, as follows (isostatic presses are those capable of pressurizing a closed cavity through various media (gas, liquid, solid particles, etc.) to create equal force in all directions within the cavity upon a workpiece or material):

(1) Capable of achieving a maximum working pressure of 20,000 psi (1,406 kg/cm<sup>2</sup>) or greater and possessing a chamber cavity with an inside diameter in excess of 16 inches (40.6 cm); or

(2) Capable of achieving a maximum working pressure of 5,000 psi (351 kg/cm<sup>2</sup>) or greater and having a controlled thermal environment within the closed cavity, *except those possessing a chamber cavity with an inside diameter of less than 5 inches (127 mm) and which are also capable of achieving and maintaining a controlled thermal environment only between +176° F (+80° C) and -31° F (-35° C)*; and

(d) Control equipment, accessories, and parts which are specially designed for the above presses.

**Notes.**—1. Licenses are likely to be approved for export to satisfactory end-users of hydraulic presses covered by sub-entry (b) above, provided that:

(i) The total rated force is less than 30,000 tons for vertical presses, and 10,000 tons or less for horizontal presses;

(ii) The presses are not specially designed for use in forming aircraft, missile or space vehicle parts, in powder metallurgy or in ceramics production; and

(iii) The presses could not reasonably be used for strategic purposes.

2. Licenses are likely to be approved for export to satisfactory end-users of isostatic presses covered by sub-entry (c) above, provided that:

(i) Isostatic presses having a controlled thermal environment within the closed cavity are limited as follows:

(a) Maximum working pressure not exceeding 20,000 psi (1,406 kg/cm<sup>2</sup>);

(b) Chamber cavity with an inside diameter not exceeding 10 inches (25.4 cm);

(c) Capable of achieving and maintaining a controlled thermal environment within the closed cavity of no greater than 1,200° C;

(ii) Isostatic presses, other than those dealt with under sub-paragraph (i) above, are limited as follows:

(a) Maximum working pressure not exceeding 30,000 psi (2,109 kg/cm<sup>2</sup>);

(b) Chamber cavity with an inside diameter not exceeding 20 inches (50.8); and provided the equipment will be used for specific non-strategic applications and will not be used for any nuclear or aerospace applications.

3. Licenses are likely to be approved for export to satisfactory end-users of normal amounts of equipment covered by sub-entry (d) above to service presses licensed for export under Note 1 above.

1353A Equipment specially designed for the manufacture of communication cable described in entry No. 1526.

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of equipment specially designed for the manufacture of cable covered by entry No. 1526 sub-entry II (b).

1355A Machinery and equipment for the manufacture of electronic equipment, components and materials; related test gear; parts and specialized controls and accessories thereof, as follows:

(a) \* \* \*

(b) Equipment for the manufacture of semiconductor, acoustic wave and film memory devices, of electronic equipment and components covered by sub-entry 1564II (b) and (c), and of parts, materials and subassemblies thereof, as follows:

(1) Equipment for the processing of semiconductor materials for the manufacture of devices, equipment and components specified in the heading of this sub-entry as follows:

(i) \* \* \*

(ii) Crystal pullers, furnaces, and gas systems, as follows:

(a) \* \* \*

(b) \* \* \*

(c) \* \* \*

(d) \* \* \*

(e) Crystal pullers having any of the following characteristics:

(1) \* \* \*

(2) Capable of operation at pressures above 10<sup>5</sup> pascals (1 atmosphere absolute);

(3) \* \* \*

(f) \* \* \*

(iii) \* \* \*

(iv) \* \* \*

(v) \* \* \*

(vi) \* \* \*

(vii) \* \* \*

(viii) \* \* \*

(ix) \* \* \*

(2) \* \* \*

(3) \* \* \*

(4) \* \* \*

(5) \* \* \*

(6) \* \* \*

**Note.**—Licenses are likely to be approved for satisfactory civil end-users of crystal pullers covered by subparagraph (b)(1)(ii)(e)(2) above which can be operated at pressures up to 2.5 × 10<sup>5</sup> pascals (2.5 atmospheres absolute).

1361A Wind tunnels, as follows:

(a) Supersonic (Mach 1.4 to Mach 5), hypersonic (Mach 5 to Mach 15) and hypervelocity (above Mach 15) wind tunnels, *except wind tunnels specially designed for educational purposes and having a test section size (measured internally) of less than 10 in. (25 cm)*. (By "test section size" is understood the diameter of the circle, or the side of the square, or the longest side of the rectangle constituting possible shapes of the test section.);

(b) \* \* \*

(c) \* \* \*

(d) Specially designed parts and accessories.

**Notes.**—1. Licenses are likely to be approved for export to satisfactory end-users of supersonic wind tunnels which are capable of Mach velocities of 1.4 or more but less than 5, and are not specially designed for or fitted with means of preheating the air.

2. Licenses are likely to be approved for export to satisfactory end-users of specialized parts and assemblies covered by sub-entry (d) for wind tunnels previously exported under Note 1, provided that such parts and assemblies will not upgrade the

performance of the wind tunnel and, for normally-consumable replacement parts, will not exceed a 6-month supply.

1371A Anti-friction bearings, as follows:

(a) Ball and roller bearings having an inner bore diameter of 10 mm or less and tolerances of ABEC 5, RBEC 5 (or national equivalents) or better and either of the following characteristics:

(1) Made of special materials, *i.e.* with rings, balls or rollers made from any steel alloy or other material including, but not limited to high-speed tool steels, Monel metal, beryllium, metaloids, ceramic, and sintered metal composites, *except the following: low-carbon steel; SAE-52100 high carbon chromium steel; SAE-4615 nickel molybdenum steel; AISI-440C (SAE 51440C) stainless steel; or national equivalents; and/or*

(2) Manufactured for use at normal operating temperatures over 302° F (150° C) either by use of special materials or by special heat treatment;

(b) Ball and roller bearings *except separable ball bearings and thrust ball bearings*, having an inner bore diameter exceeding 10 mm and having tolerances of ABEC 7, RBEC 7 (or national equivalents) or better (ABEC 5 in the case of hollow bearings) and either of the following characteristics:

(1) Made of special materials, *i.e.* with rings, balls or rollers made from any steel alloy or other material including, but not limited to high-speed tool steels, Monel metal, beryllium, metaloids, ceramic, and sintered metal composites, *except the following: low-carbon steel; SAE-52100 high carbon chromium steel; SAE-4615 nickel molybdenum steel; AISI-440C (SAE 51440C) stainless steel; or national equivalents; and/or*

(2) Manufactured for use at normal operating temperatures over 302° F (150° C) either by use of special materials or by special heat treatment;

(c) Ball and roller bearings having tolerances better than ABEC 7 (or national equivalents); and

(d) Bearing parts usable only for bearings covered by this entry, as follows: outer rings, inner rings, retainers, balls, rollers, and sub-assemblies. (See § 376.7.)

**Note.**—Licenses are likely to be approved for export of reasonable quantities of bearings covered by this item to satisfactory civil end-users which have furnished assurances that the bearings will be incorporated in equipment previously imported from Canada or countries in Country Group T or V.

1485A Compasses, gyroscopes, accelerometers, and inertial equipment, as follows:

(a) \* \* \*

(b) Integrated flight instrument systems for aircraft which include gyrostabilizers and/or automatic pilots (An integrated flight instrument system is a primary instrument display system of attitude and azimuth with facilities for giving maneuver guidance information to the pilot and often integrated with an autopilot to the extent of embodying a common unit for setting up the required demands);

- (c) \* \* \*
- (d) Gyrostabilizers used for other purposes than aircraft control, *except those for stabilizing an entire surface vessel*;
- (e) \* \* \*
- (f) Accelerometers with a threshold of 0.005 g or less, or a linearity error within 0.25 percent of full scale output or both, which are designed for use in inertial navigation systems or in guidance systems of all types;
- (g) Gyros with a rated free directional drift rate (rated free precession) of less than 0.5 degree (1 Sigma or r.m.s.) per hour in a 1 g environment;
- (h) \* \* \*
- (i) Specially designed parts and components, and test, calibration, and alignment equipment for the above.

Note.—Licenses are likely to be approved for export to satisfactory end-users of equipment, as follows:

- (a) Types and series covered by sub-entry (b) above, provided the equipment has been in normal civil use for more than two years, is standard equipment of aircraft excluded from control under entry No. 1460, and is, or is to be, installed in civilian aircraft.
- (b) Types and series covered by sub-entry (d) above, provided the equipment has been in normal civil use for more than two years and is intended for a clearly civil application in the importing country.
- (c) Parts, components and equipment covered by sub-entry (i) above, provided they are not also covered by sub-entries (f) and (g) above, and are intended for use with exports meeting the conditions of sub-paragraphs (a) and (b) of this Note.

1501A Navigation, direction finding, radar and airborne communication equipment, as follows: (See also entry No. 1485 sub-entries (b) and (h), and entry No. 2120 sub-entries (b) and (c).)

(a) Airborne communication equipment and specialized parts and components therefor, having any of the following characteristics:

- (1) Designed to operate at frequencies greater than 156 MHz;
- (2) Incorporating facilities for:
- (i) The rapid selection of more than 200 channels per equipment, or
- (ii) Equipment using frequency synthesis techniques (see also entry No. 1531), *except equipment operating in the frequency range of 108 to 136 MHz with 720 channels or fewer at not less than 25 kHz spacing, and which has been in normal civil use for at least one year*;

- (3) Pressurized throughout;
- (4) Rated for continuous operation over a range of ambient temperatures extending from below  $-55^{\circ}\text{C}$  to  $+55^{\circ}\text{C}$ ; or
- (5) Designed for modulating methods employing any form of digital modulation using time and frequency redundancy such as "Quantized Frequency Modulation" (QFM);

(b) Navigation and direction finding equipment (and specialized parts and accessories, specialized testing or calibrating equipment and training or simulating equipment therefor), as follows:

- (1) Airborne navigation equipment and direction finding equipment, as follows:
- (i) Designed to make use of "Doppler" frequency phenomena;

(ii) Utilizing the constant velocity and/or rectilinear propagation characteristics of electromagnetic waves having frequency less than  $4 \times 10^{14}$  Hz (0.75 micron);

- (iii) Radio altimeters, the following:
- (a) Pulse modulated;
- (b) Frequency modulated having a displayed electrical output accuracy better than  $\pm 3$  feet ( $\pm 0.914$  m) over the range between 0 and 100 feet (30.4 m) or better than  $\pm 3$  percent above 100 feet (30.4 m); or
- (c) Frequency modulated which have been in normal civil use for less than one year;
- (iv) Direction finding equipment operating at frequencies greater than 5 MHz, *except equipment specially designed for search and rescue purposes, provided that the receiver operates on a crystal controlled fixed frequency of 121.5 MHz or an alternating frequencies of 121.5 MHz and 243 MHz*;

- (v) Pressurized throughout; or
- (vi) Rated for continuous operation over a range of ambient temperatures extending from below  $-55^{\circ}\text{C}$  to above  $+55^{\circ}\text{C}$ ;
- (2) Ground and marine equipment for use with airborne navigation equipment utilizing the constant velocity and/or the rectilinear propagation characteristics of electromagnetic waves having frequency less than  $4 \times 10^{14}$  Hz (0.75 micron); or
- (3) Ground and marine direction finding equipment operating at frequencies greater than 30 MHz; and

(c) Radar equipment and specialized parts and accessories, specialized testing or calibrating equipment and training or simulating equipment therefor, as follows: (For Lidar Equipment see entry No. 1522.)

- (1) Airborne radar equipment; or
- (2) Ground and marine radar equipment having one or more of the following features:
- (i) Operating at a frequency not in normal civil use or at a frequency of more than 10.5 GHz;

(ii) Operating at a frequency of less than 1.5 GHz and having a peak output power from the transmitter greater than 2.5 MW; or operating at a frequency within the range of 1.5 to 3.5 GHz and having a peak output power from the transmitter greater than 1.5 MW; or operating at a frequency within the range of 3.5 to 6 GHz and having a peak output power from the transmitter greater than 1 MW; or operating at a frequency within the range of 6 to 10.5 GHz and having a peak output power from the transmitter greater than 500 kW;

(iii) Operating at a frequency of less than 3.5 GHz and having an 80 percent or better probability of detection for a 10 sq. m. target at a free space range of 250 nautical miles; or operating at a frequency within the range of 3.5 to 10.5 GHz and having an 80 percent or better probability of detection for a 10 sq. m. target at a free space range of 100 nautical miles;

(iv) Utilizing other than pulse modulation with a constant and/or staggered pulse repetition frequency, in which the carrier frequency of the transmitted signal is not changed deliberately between groups of pulses, from pulse to pulse or within a single pulse, *except civil commercial airport radars using a carrier frequency that may change from pulse to pulse between two fixed frequencies separated in time and in frequency by constant magnitudes*;

(v) Utilizing a Doppler technique for any purpose, other than M.T.I. systems using a conventional double or triple pulse delay line cancellation technique *except those utilized for surveillance and control radar for aerial navigation in civil airports*;

- (vi) Including any digital signal processing techniques used for automatic target tracking, or having a facility for electronic tracking;
- (vii) Including signal processing techniques other than those covered by sub-entry (c)(2)(vi) above, which have been in normal civil use for a period of less than two years; or

(viii) In the case of ground radar, having been in commercial use for a period of less than one year.

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users of commercial airborne equipment needed to equip civil aircraft, or as normal standard equipment incorporated in civil aircraft being exported for civil commercial use, and not containing characteristics in sub-entry (a)(5) above.

2. Licenses are likely to be approved for export to satisfactory end-users of navigation equipment covered by sub-entry (b)(1)(i) above, provided that it is to be installed in civil aircraft or helicopters, and is normal standard equipment of a type installed in civil aircraft or helicopters in TV country groups.

3. Licenses are likely to be approved for export to satisfactory end-users of standard commercial airborne equipment listed in sub-entries (b)(1)(ii) and (iii) above, needed to equip civil aircraft, or as normal standard equipment incorporated in civil aircraft being exported for civil commercial use, provided that such equipment is equivalent in all characteristics and performance to standard equipment of aircraft not subject to control, and which:

(a) For equipment covered by sub-entry (b)(1)(ii) above, is in conformity with ICAO standards and assures no function exceeding those resulting from such standards, and is not designed to make use of hyperbolic grids at frequencies greater than 3 MHz. (Standard commercial airborne equipment designed to make use of hyperbolic grids at frequencies of less than 3 MHz may be exported if coordinate conversion equipment, which has been in normal civil use for less than one year, or which could not be shipped under the provisions of entry No. 1565, is not included and is not separately supplied), and

(b) For equipment covered by sub-entry (b)(1)(iii) above, are frequency modulated radio altimeters which have been in normal civil use for a period of more than one year.

4. Licenses are likely to be approved for export to satisfactory end-users of ground equipment for use at civil airports or for civil use in association with airborne equipment which meets the criterion of Note 3 to sub-entry (b)(1)(ii) above, and approved for export, provided that such equipment:

- (a) is in conformity with ICAO standards and assures no function exceeding those resulting from such standards;
- (b) is not designed to make use of hyperbolic grids at frequencies greater than 3 MHz.

5. Licenses are likely to be approved for export to satisfactory end-users of equipment covered by sub-entry (b)(3) above, provided:

- (a) The equipment is to be installed at civil airports or for use on civil air routes;
- (b) The equipment is designed to operate at frequencies between 30 MHz and 157 MHz, excluding single side band equipment;
- (c) The equipment employs a loop system or a system employing a number of spaced vertical aerials uniformly disposed around the circumference of a circle, excluding electronically commutated types.

6. Licenses are likely to be approved for export to satisfactory end-users of equipment covered by sub-entry (c) above, when it is to be installed in civil aircraft, provided that this equipment:

- (a) Has been in normal commercial service for at least one year;
- (b) Is specially designed for use as a commercial weather radar;
- (c) Is a normal and reasonable equipment for such civil aircraft; and
- (d) Does not contain significant advanced technology of strategic value for other applications.

7. Licenses are likely to be approved for export to, satisfactory end-users of secondary radar equipment covered by sub-entry (c) above, designed specifically for civil air traffic identification and control purposes.

8. Licenses are likely to be approved for export to satisfactory end-users of the following:

(a) Radar equipment covered only sub-entries (c)(2) (i), (ii) and/or (iii) above, provided that both of the following conditions are met:

- (i) It is specially designed for the surveillance and coordination of airfield surface traffic; and
- (ii) It is to be installed at airports operating scheduled commercial flights.

(b) Radar equipment covered only by sub-entries (c)(2) (ii) or (iii) above, or by both, provided that all the following conditions are met:

- (i) Operating at a frequency of not more than 1.5 GHz and having a peak output power from the transmitter not greater than 5 MW; or operating at a frequency within the range of 1.5 to 3.5 GHz and having a peak output power not greater than 2.5 MW;
- (ii) Having an 80 percent or better probability of detection for a 10 sq. m. target at a free space range of 270 nautical miles;
- (iii) Having a pulse repetition frequency exceeding 300 pulses per second; and
- (iv) It is to be installed for air traffic control of scheduled international commercial flights;

(c) Radar equipment covered only by sub-entries (c)(2) (iv) and/or (v) above, provided it is to be installed for air traffic control purposes in international airports and has been in normal civil use for a period of not less than three years;

(d) Radar equipment covered by sub-entry (c)(2)(vi) above, provided it is specially designed for marine, harbor or meteorological use, or has been in normal civil use for not less than three years;

(e) Radar equipment covered only by sub-entry (c)(2)(vii) above, provided it is specially designed for marine (or harbor) use, or radar equipment covered only by sub-entries (c)(2)

(vii) or (viii) above, or both, provided it is specially designed for meteorological observation.

1502A Communication, detection or tracking equipment of a kind using ultra-violet radiation, infrared radiation or ultrasonic waves; *except ultrasonic devices which operate in contact with a controlled material to be inspected, or which are used for industrial cleaning, sorting or materials handling, industrial and civilian intrusion alarm, traffic and industrial movement control and counting systems, medical applications, emulsification, homogenisation, or simple educational or entertainment devices; underwater ultrasonic communications equipment designed for operation with amplitude modulation and having a communications range of 500 m or less (sea state 1), a carrier frequency of 40 to 60 kHz and a carrier power supplied to the transducer of 1 W or less; industrial equipment employing cells not described in entry Nos. 1548 or 1550; industrial and civilian intrusion alarm, traffic and industrial movement control and counting systems; medical equipment; industrial equipment used for inspection, sorting or analysis of the properties of materials; simple educational or entertainment devices which employ photo cells; flame detectors for industrial furnaces; equipment for non-contact temperature measurement for laboratory or industrial purposes utilizing a single detector cell with no scanning of the detector; or instruments capable of measuring radiated power or energy having a response time constant exceeding 10 milliseconds; and specialized parts therefor.*

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of infrared geodetic equipment covered by this entry, provided that the equipment uses a lighting source other than a laser and is manually operated, or that it uses a lighting source (other than a laser or a light-emitting diode) remote from the measuring equipment.

1510A Acoustic and/or ultrasonic systems or equipment specially designed for detecting or locating underwater or subterranean objects or features, and specially-designed components of such systems or equipment (including but not limited to hydrophones and transducers, towed hydrophone arrays, software therefor, and beamformers), *except:*

(i) *Marine systems or equipment, as follows:*

(A) \* \* \*

(B) Passive (receiving, whether or not related in normal application to separate active equipment) acoustic hydrophones and/or transducers having *all* of the following characteristics:

(1) Incorporating sensitive elements made of piezoelectric ceramics or crystal, and with a sensitivity no greater than  $-192$  dB (reference 1 volt per micropascal);

(2) Not designed for operation at depths greater than 100 meters;

(3) Independently mounted or configured and not reasonably capable of assembly by the users into a towed hydrophone array;

(ii) \* \* \*

**Notes.**—1. Licenses are likely to be approved for export for civil end-use by civil

end-users of acoustic hydrophones and transducers which have all of the other characteristics of sub-entry (i)(B), but which either:

(a) Have a sensitivity no greater than  $-204$  dB (reference 1 volt micropascal), and are designed for operation at greater than 100 meters depth but not greater than 1,000 meters depth; or

(b) Are not acceleration compensated, have a sensitivity no greater than  $-180$  dB (reference 1 volt per micropascal) and are not designed for operation at depths greater than 100 meters.

2. Licenses are likely to be approved for export for civil end-use by civil end-users of towed acoustic hydrophone arrays having all of the following characteristics:

(a) Not specially designed for operation at greater than 100 meters depth or at tow speeds in excess of 8 knots;

(b) Not incorporating temperature or heading sensors;

(c) Having hydrophone groups uniformly spaced at not less than 25 meters and not more than 60 meters;

(d) Having an assembled diameter of 40 mm or greater and using metallic strength members only;

(e) Not having multiplexed hydrophone group signals;

(f) Not having a configuration for multiple or overlapping acoustic aperture operation;

(g) Not having characteristics better than those specified in sub-entries (i)(B) (1) and (2) above;

(h) Not having associated processing equipment which provides any of the following features:

(1) Electronically-steerable beamforming capabilities;

(2) Side-lobe suppression techniques such as shading coefficients;

(3) On-line real-time processing or off-line batch pre-processing capabilities exceeding the limits specified in entries 1529 and 1565.

1519A Single and multi-channel communications transmission equipment, including terminal, intermediate amplifier or repeater equipment and multiplex equipment used for communications (line, cable, optical fiber cable, or radio) systems, and data modems making use of the aforementioned communication systems and associated multiplex equipment, *except telemetering, telecommand and telegraphing equipment designed for industrial purposes, together with data transmission equipment not intended for the transmission of written or printed text and specialized parts, accessories and test equipment therefor (by telemetering, telecommand and telegraphing equipment is meant: sensing heads for the conversion of information into electrical information, the systems used for its long-distance transmission, the processes used to translate electrical information into coded data (telemetering), into control signals (telecommand), and into display signals (telegraphing)); facsimile equipment other than that employing cipher, cryptographic and/or coding devices and equipment that are designed to ensure the secrecy of communications and thus prevent clear reception by anyone other than the intended receiver (see Supplement No. 2 to Part 370);*

equipment employing exclusively the direct current transmission technique; electronic measuring equipment, suitable for use with PCM transmission equipment defined in CCITT recommendation series G 700 (ITU Geneva), as follows:

(a) Employing analog transmission techniques with analog input and output, designed to deliver, carry or receive baseband frequencies higher than 19 MHz into, or in, a communications system, but only higher than 300 kHz for equipment suitable for use with submarine cable (analog transmission techniques include, inter alia, frequency division multiplex (FDM));

(b) Employing digital transmission techniques designed for operation at a data signalling rate exceeding 2.1 Megabits per second, with analog input and output, designed for use on communications circuits (digital transmission techniques include, inter alia, pulse code modulation (PCM));

(c) Data communications equipment employing digital transmission with digital input and output, including telegraphic and data transmission, having any of the following characteristics:

(1) Designed for operation at a data signalling rate in bits per second, excluding servicing and administrative channels, numerically exceeding either:

(i) 4,800; or  
(ii) 160 percent of the channel (or sub-channel) bandwidth in Hertz;

(2) Employing an automatic error detection and correction system having both of the following characteristics:

(i) Retransmission is not required for correction; and  
(ii) A data signalling rate exceeding 300 bits per second; and

(d) Components, accessories, and sub-assemblies specially designed for the above equipment, and test equipment specially designed for the equipment covered by sub-entry (b) above, except connectors for use with optical fibers or cable with a repeatable coupling loss of 0.5 dB or more.

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users of equipment covered by sub-item (a) above, and components, accessories and sub-assemblies thereof, as follows:

(a) Equipment specially designed for the transmission of television signals by cable between camera and studio or between studio and television transmitter not exceeding 50 miles (80 km) for a link with respect to any one installation. (For radio relay links see entry No. 1520.)

(b) Equipment to be used for closed circuit television or television distribution (community aerial systems and cable television systems) with an upper frequency limit of 960 MHz.

(c) Equipment designed to deliver, carry or receive baseband frequencies up to and including 62 MHz.

2. Licenses are likely to be approved for the export to satisfactory end-users of equipment covered by sub-item (b) above, and components, accessories and sub-assemblies and cable therefor, provided that it is for other than submarine use, is to be permanently installed in a circuit operated by the civilian authorities of the importing

country, and is to be used for general commercial traffic, as follows:

(a) A total digital bit rate at the highest level multiplex point of 8.5 million bits per second or less; and either

(b) A total number of voice channels per each physical bearer (wire or radio) of 120 or less; or

(c) A monochrome or color television channel with a maximum nominal bandwidth of 6 MHz, and associated sound channels.

3. Licenses are likely to be approved for the export to satisfactory end-users of the data modems described in sub-entry (c)(1) above, conforming to CCITT recommendations and/or specially designed for civil end-use, and operating at speeds up to 9,600 bits per second or 320% of the channel (or sub-channel) bandwidth in hertz, provided they are to be permanently installed in a circuit operated by the civilian authorities of the importing countries for general commercial traffic.

1520A Radio relay communications equipment designed for use at frequencies exceeding 960 MHz, and components, accessories and sub-assemblies therefor.

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users of equipment covered by this item, and components, accessories and sub-assemblies therefor, specially designed for the transmission of television signals between camera and studio or between studio and television transmitter, and not exceeding a line of sight distance with respect to any one installation.

2. Licenses are likely to be approved for export to satisfactory end-users of equipment covered by this item, and components, accessories and sub-assemblies therefor, as follows:

(a) Ground communication radio equipment for use with temporary fixed services operated by the civilian authorities of the importing country and designed to be used at fixed frequencies not exceeding 13.5 GHz with a power output of not more than 5 watts;

(b) Equipment to be permanently installed in a circuit operated by the civilian authorities of the importing country for civil television transmission nor for general commercial traffic, provided that:

(1) Associated multiplex equipment is considered separately under the provisions of entry No. 1519; and

(2) No equipment with a base bandwidth exceeding the limits set forth in Note 3 to entry No. 1519 is included.

3. Licenses are likely to be approved for export to satisfactory end-users of equipment covered by this item, for communications satellite earth stations provided that it is to be installed for operation in the framework of an INTELSAT satellite communications system.

4. Licenses are likely to be approved for export to satisfactory end-users of equipment with a maximum capacity of 300 voice channels of 4 kHz each, components, accessories, sub-assemblies and specialized test equipment for industrial use, e.g. remote supervision, control and metering of oil and gas pipelines, public utility services (e.g. electricity networks) including telephone

channels for the operation of such networks and the engineering service circuits required for the maintenance of telecommunications links.

5. Licenses are likely to be approved for the export to satisfactory end-users of tropospheric scatter communication equipment, and components, accessories and sub-assemblies therefor, covered by this entry, provided that it will be permanently installed at specified sites for civil communication purposes and has all of the following characteristics:

(a) Fixed frequency of 2.7 GHz or less;  
(b) Frequency modulation;  
(c) Power amplifier output of 10 kW or less.

1522A Lasers and laser systems (including active and passive components in semi-fabricated forms as well as in fabricated forms) and equipment containing them, as follows:

(a) Lasers and specially designed components and parts therefor, including amplification stages, *except the following when not contained in equipment:*

(i) \* \* \*  
(ii) \* \* \*  
(iii) \* \* \*  
(iv) \* \* \*  
(v) \* \* \*

(vi) Nd: YAG lasers having an output wavelength of 1.06 micrometers with either of the following characteristics:

(1) A pulsed output not exceeding 0.5 joule per pulse and a maximum rated average single- or multi-mode output power not exceeding 10 watts or a continuous wave maximum rated single- or multi-mode output power not exceeding 50 watts;

(2) \* \* \*

(vii) Nd: Glass lasers with both of the following characteristics:

(1) An output wavelength of 1.06 micrometers;

(2) A pulsed output not exceeding 0.5 joule per pulse;

(viii) \* \* \*  
(ix) \* \* \*  
(x) \* \* \*

(b) Equipment containing lasers and laser systems, *except equipment listed below containing lasers listed in (a) above as exceptions:*

(i) Specially designed for industrial and civilian intrusion detection and alarm systems;

(ii) Specially designed for medical applications;

(iii) Equipment for educational and laboratory purposes;

(iv) Specially designed for traffic and industrial movement control and counting systems;

(v) Specially designed for detection of environmental pollution;

(vi) Optical spectrometers and densitometers;

(vii) Equipment containing continuous wave helium-neon gas lasers but see sub-entries (c) and (d) below;

(viii) Textile-cutting and textile-bonding equipment;

(ix) Paper cutting equipment;

(x) Equipment containing lasers for drilling diamond dies for the wire drawing industry;

(xi) Electronic daylight scanning equipment with auxiliary electronic

screening units especially designed for printing processes;

(xii) Laser-radar (lidar) equipment specially designed for surveying or meteorological observation;

(xiii) Consumer, disc-type video and audio recorders and reproducers;

(xiv) Price scanners (point of sale); and  
(xv) Systems designed for surveying purposes; provided there is no capability of measuring range;

(c) \* \* \*

(d) \* \* \*

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of equipment listed in sub-entry (b) containing lasers described in (a) (vi)(1) and (vii) provided the lasers have a maximum pulsed output not exceeding 2 joules per pulse. The shipment of spare laser rods for equipment exported under this Note will be restricted to rods having no greater output power and/or energy capability than those originally exported with the equipment.

1526A Cable, as follows:

I. \* \* \*

II. Communications cable, as follows:

(a) Submarine cable, as follows:

(1) Reversed-twist, double-armored cable used for towing or suspending and communicating with submerged devices;

(2) Unarmored or single-armored ocean cable having an attenuation of 1.8 dB per nautical mile (0.97 dB/km) or less, measured at a frequency of 600 kHz;

(b) Coaxial cable using a dielectric aired by discs, beads, spiral, screw, or any other means, with an inner diameter of the outer conductor of the cores greater than 14 mm (0.551 in.);

(c) Graded index or single-mode step index optical fiber communications cable and optical fibers therefor, having either of the following characteristics:

(1) An attenuation at any operating wavelength of 5 dB/km or less;

(2) A tensile strength greater than  $7 \times 10^9$  N/m<sup>2</sup>; or

(d) \* \* \*

**Notes.**—1. Licenses are likely to be approved for the export to satisfactory end-users of cable covered by sub-entry II(a)(1) above when used for civil applications in oceanographic research or in natural resources exploration.

2. Licenses are likely to be approved for the export to satisfactory end-users of cable covered by sub-entries II (a)(2), (b) and (c) above, provided that:

(a) The cable is for a specific civil end-use;

(b) The quantities of cable required are normal for the purpose; and

(c) (applicable to sub-entry II(c) above only) The cable is not specially designed for underwater use.

1529A Electronic measuring, calibrating, counting, testing, and/or time interval measuring equipment, whether or not incorporating frequency standards, having any of the following characteristics:

(a) Equipment, as follows:

(1) \* \* \*

(2) Designed for fixed ground use and containing frequency standard(s), with a stability over 24 hours of 1 part in  $10^9$  or better; or

(3) \* \* \*

(b) Instruments, as follows:

(1) \* \* \*

(2) \* \* \*

(3) \* \* \*

(4) Spectrum analyzers employing time compression of the input signal or FFT (Fast Fourier Transform) techniques;

(5) Incorporating computing facilities with user accessible reprogramming capability and an alterable memory of more than 8,192 bits;

(6) \* \* \*

(c) \* \* \*

(d) \* \* \*

(e) \* \* \*

(f) \* \* \*

(g) \* \* \*

(h) \* \* \*

**Notes.**—1. Licenses are likely to be approved for export to satisfactory end-users of items covered only by sub-entry (a)(2) above, provided that:

(a) The stability over 24 hours is not better than 5 parts in  $10^{10}$ ; and

(b) The equipment is a reasonable requirement for the stated legitimate civil end-use.

2. Licenses are likely to be approved for export to satisfactory end-users of items covered by sub-entry (b)(4) above, having either of the following characteristics:

(a) Capable of computing 512 complex spectral lines in 200 milliseconds or more;

(b) Capable of computing 512 real spectral lines in 100 milliseconds or more;

3. Licenses are likely to be approved for export to satisfactory end-users of instruments covered by sub-entry (b)(5) above, provided that:

(a) The instruments have been designed for non-strategic use and by nature of design, software, microprogram control (firmware), specialized logic control (hardware) or performance are substantially restricted to the particular application for which they have been designed.

(b) The instruments are not covered by any other part of this entry and do not exceed the limits of Note 4 to entry No. 1565.

1531A Frequency synthesizers (and equipment containing such frequency synthesizers), as follows (frequency synthesizer means any kind of frequency source or signal generator, regardless of the actual technique used, providing a multiplicity of simultaneous or alternative output frequencies, from one or more outputs, controlled by, derived from or disciplined by a lesser number of standard (or master) frequencies):

(a) \* \* \*

(b) Instrument frequency synthesizers and synthesized signal generators designed for ground laboratory use, producing output frequencies whose accuracy and short and long term stability are controlled by, derived from or disciplined by the input frequency or internal master standard frequency, and having any of the following characteristics:

(1) \* \* \*

(2) \* \* \*

(3) Electrically programmable (in that the output frequency can be controlled or selected by the injection of digitally coded electrical signals from an external control

source) with a switching speed from one selected output frequency to another selected output frequency less than 10 milliseconds;

(4) \* \* \*

(5) \* \* \*

(6) \* \* \*

(7) \* \* \*

(c) \* \* \*

(d) \* \* \*

(e) \* \* \*

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of equipment covered by sub-entry (b)(3) above, with a switching speed not less than 5 milliseconds.

1532A Precision linear and angular measuring systems and components, as follows:

(a) Contact-type systems and linear voltage differential transformers (LVDT) therefor, as follows:

(1) Systems having all of the following characteristics:

(i) Range equal to or less than 5 mm;

(ii) Linearity equal to or less than 0.1 percent;

(iii) Drift equal to or less than 0.1 percent per day at standard ambient test room temperatures  $\pm 1^\circ$  C;

(2) Linear voltage differential transformers with no compensation networks and having either of the following characteristics:

(i) Range equal to or less than 5 mm;

(ii) Linearity equal to or less than 0.2 percent; (linearity measurements are made in the static mode);

(b) Linear measuring machines, *except optical comparators*, with two or more axes having both of the following characteristics:

(1) Range in any axis greater than 200 mm;

(2) Accuracy (including any compensation) less (finer) than 0.0008 mm per any 300 mm segment of travel;

(c) Angular measuring systems having an accuracy equal to or less than 1 second of arc, *except optical instruments, such as autocollimators, using collimated light to detect angular displacements of a mirror*;

(d) Non-contact type systems having either of the following characteristics:

(1) Effective probe measurement diameter less than 0.5 mm and drift less than 0.5 percent per day at standard ambient test room temperatures  $\pm 1^\circ$  C;

(2) Linearity less than 0.3 percent and drift less than 0.5 percent per day at standard ambient test room temperature  $\pm 1^\circ$  C.

**Note.**—Licenses are likely to be approved for export of equipment covered by this item to civil end-users not engaged in aerospace activities.

1533A Radio spectrum analyzers (i.e. apparatus capable of indicating the single-frequency components of multi-frequency signals), specialized components, accessories and parts therefor, as follows (for spectrum analyzers employing time compression of the input signal or FFT techniques, see entry No. 1529(b)(4)):

(a) \* \* \*

(b) \* \* \*

(c) \* \* \*

(d) Incorporating computing facilities with user accessible reprogramming capability and an alterable memory of more than 8,192 bits;

(e) \* \* \*  
(f) \* \* \*  
(g) \* \* \*

Note.—Licenses are likely to be approved for export to bona fide civil end-users for civil end-use of equipment covered by sub-entry (d) above.

1534A Flatbed microdensitometers, except cathode-ray types, specially designed parts, components and assemblies therefor, having any of the following characteristics:

(a) A recording or scanning rate exceeding 5,000 data points per second;

(b) A figure of merit better (less) than 0.1, defined as the product of the density resolution (expressed in density units) and the spatial resolution (expressed in micrometers);

(c) An optical density range greater than 0 to 4.

Notes.—1. Licenses are likely to be approved for export of equipment specially designed for medical applications, provided the equipment is a reasonable requirement for the stated application.

2. Licenses are likely to be approved for export to civil end-users for civil end-uses of equipment covered only by sub-entry (b) above, provided the spatial resolution is not better (less) than 2 micrometers and the density resolution is not better (less) than 0.01 in density units.

1537A Microwave equipment, including parametric amplifiers, capable at frequencies over 1 GHz (other than microwave equipment covered by entries 1501, 1517, 1520, 1526(I), 1529 and Supplement No. 2 to part 370), as follows:

(a) \* \* \*

(b) \* \* \*

(c) Waveguide components, as follows:

(1) \* \* \*

(2) \* \* \*

(3) Magnetic including gyro-magnetic waveguide components;

(d) TEM mode device using magnetic including gyro-magnetic properties;

(e) TR and anti-TR tubes and components therefor except those designed for use in waveguides and having any of the following characteristics, which are in normal civil use for ground or marine radar:

(i) Operating at a peak power not exceeding 3 MW and at a frequency of 1.5 GHz or less;

(ii) Operating at a peak power not exceeding 1.2 MW and at a frequency over the range of 1.5 GHz to 6 GHz; or

(iii) Operating at a peak power not exceeding 300 kW and at a frequency over the range of 6 GHz to 10.5 GHz;

(f) Assemblies and sub-assemblies in which the isolating base material functions as a dielectric (as used in stripline, microstrip or slotline) except for those items specifically designed for use in civil television systems to meet ITU standards and using as an isolating material paper base phenolics, glass cloth melamine, glass epoxy resin, polyethylene terephthalate or other isolating material with an operating temperature not exceeding 302° F (150° C);

(g) \* \* \*

(h) Microwave assemblies and sub-assemblies having circuits fabricated by the same processes used in integrated circuit

technology, which include active circuit elements (for acoustic wave devices, see entry No. 1586) (see also entry No. 1564);

(i) \* \* \*

(j) Amplifiers (see also entry No. 1521);

(k) \* \* \*

(l) \* \* \*

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users of items covered by sub-entries (c)(3) and (d) above, required as replacement parts in specific civil equipment not exceeding the capability of that which could be exported under entry No. 1501 or entry No. 1520, provided such parts do not upgrade the initial performance of that equipment.

2. Licenses are likely to be approved for export to satisfactory end-users of items covered by sub-entry (e) above required as replacement parts in specific civilian equipment not exceeding the capability of that which could be exported under entry No. 1501, provided such parts do not upgrade the initial performance of that equipment.

3. Licenses are likely to be approved for export to satisfactory end-users of items covered by sub-entry (f) above, designed and intended for use in civil telecommunications systems at frequencies allocated by the ITU for that purpose.

4. Licenses are likely to be approved for export to satisfactory end-users of items covered by sub-entry (h) above, for use at frequencies between 1 GHz and 3 GHz.

5. Licenses are likely to be approved for export to satisfactory end-users of equipment containing parametric amplifying or paramagnetic amplifiers covered by sub-entry (j) above;

(a) Specially designed for medical applications or for use in simple educational devices and operating at ISM frequencies; or  
(b) Having an output power of not more than 10 watts, which is specially designed for industrial and civilian intrusion detection and alarm systems, traffic and industrial movement control and counting systems, environmental pollution of air or water detection systems, or for simple educational devices.

1541A Cathode-ray tubes having any of the following characteristics:

(a) \* \* \*

(b) With traveling wave or distributed deflection structure using delay lines, or incorporating other techniques to minimize mismatch of fast phenomena signals to the deflection structure; or

(c) \* \* \*

(d) \* \* \*

Note.—Licenses are likely to be approved for export to satisfactory end-users of cathode-ray tubes covered by sub-entry (b) above, which utilize segmented plate (sectioned Y-plate) structures.

1544A Semi-conductor diodes and dice and wafers therefor (except those made from germanium, selenium or copper oxide), designed or rated for use at input or output frequencies above 12.5 GHz or having any of the following characteristics:

(a) (i) \* \* \*

(ii) Schottky diodes designed or rated for mixer use at input or output frequencies of:

(a) 3 GHz or less and having a noise figure of more than 6 dB; or

(b) Greater than 3 GHz and less than 12.5 GHz and having a noise figure of more than 6.5 dB;

(iii) Schottky diodes designed or rated for detector use at input or output frequencies of less than 12.5 GHz and having a minimum rated tangential sensitivity of either worse than -45 dBm under unbiased conditions to worse than -50 dBm under biased conditions;

(b) \* \* \*

(c) \* \* \*

(d) \* \* \*

(e) \* \* \*

(f) Non-coherent light-emitting diodes with a peak radiant intensity at a wavelength of greater than 1,000 nanometers (for coherent light-emitting diodes, see entry No. 1522).

(g) \* \* \*

Notes.—1. Licenses are likely to be approved for the export to satisfactory end-users of shipments for civil use containing up to 200 of the Schottky diodes mentioned in sub-entries (a) (ii) and (iii) above, having a maximum frequency not exceeding 3 GHz irrespective of noise level or tangential sensitivity.

2. Licenses are likely to be approved for the export to satisfactory end-users of non-coherent light-emitting diodes covered by sub-entry (f) above, for use in identifiable civilian communications systems.

1545A Transistors and dice and wafers therefor (for phototransistors see entry No. 1548) as follows:

(a) \* \* \*

(b) Using silicon as the bulk semiconductor material and having any of the following characteristics:

(1) \* \* \*

(2) An operating frequency of 1.5 MHz or below and a maximum collector dissipation exceeding 300 watts, or an operating frequency greater than 1.5 MHz and a maximum collector dissipation exceeding 250 watts;

(3) An operating frequency greater than 200 MHz and a product of the operating frequency (in GHz) and the maximum collector dissipation (in watts) exceeding 5;

(4) Majority carrier devices, including but not limited to junction field-effect transistors and metal-oxide semi-conductor transistors, except field-effect transistors having a maximum power dissipation of 500 mW or less and a maximum operating frequency of 1 GHz or less.

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users of transistors covered by sub-entries (b) (2) and (3) above, specially designed for television transposers or for civil mobile communication equipment, and having a product of the operating frequency (in GHz) and the maximum collector dissipation (in watts) not exceeding 20.

2. Licenses are likely to be approved for export to satisfactory end-users of transistors covered by sub-entry (b)(4) above which are suitable for and will be used in civil TV, AM or FM receivers or audio frequency equipment.

1547A Thyristors and dice and wafers therefor, as follows:

(a) Designed for use in pulse modulators having a rated turn-on time of less than 1

microsecond where the rated peak current exceeds 150 Amperes;

(b) Having a rated turn-off time of less than 1 microsecond;

(c) Having a rated turn-off time of from 1 microsecond to less than 2.3 microseconds except those having a rated peak current of 50 Amperes or less and encapsulated in non-hermetically sealed packages;

(d) Having a rated turn-off time of from 2.3 to 10 microseconds and a figure of merit greater than 25 (the figure of merit is defined as the product of the repetitive peak off-state voltage (V DRM) in kilovolts and the repetitive peak on-state current (I TRM) in Amperes as shown on the thyristor data sheets; and

(e) Specially designed parts and accessories therefor.

**Notes.—1.** Licenses are likely to be approved for export to satisfactory end-users of thyristors required as replacement parts in specific civil equipment provided they do not upgrade the initial performance of that equipment.

2. Licenses are likely to be approved for export to satisfactory end-users of thyristors covered by this entry, provided that they have been designed and are intended for civil applications other than in radar or laser modulators.

1548A Photosensitive components and dice and wafers therefor, as follows:

(a) Photosensitive components (including photodiodes, phototransistors, photothyristors, photoconductive cells and similar photosensitive components) with a peak sensitivity at a wavelength longer than 1,200 nanometers or shorter than 190 nanometers;

(b) Semi-conductor photodiodes and phototransistors with a response time constant of 0.25 microsecond or less measured at the operating temperature for which the time constant reaches a minimum.

**Notes.—1.** Licenses are likely to be approved for the export to satisfactory end-users of infra-red single-element encapsulated photoconductive cells or pyroelectric detectors intended for civil applications and using any of the following:

(a) Evaporated lead sulphide;  
(b) Triglycine sulphate with a surface area of 20 mm<sup>2</sup> or less;  
(c) Lead-lanthanum-zirconium titanate ceramic.

2. Licenses are likely to be approved for the export to satisfactory end-users for civil applications of semi-conductor photodiodes covered by sub-entry (b) above, with a response time constant of 0.5 nanosecond or more and with a peak sensitivity at a wavelength neither longer than 920 nanometers nor shorter than 300 nanometers.

1549A Photomultiplier tubes, as follows:

(a) For which the maximum sensitivity occurs at wavelengths longer than 0.75 micrometer or shorter than 0.3 micrometer; or  
(b) \* \* \*  
(c) \* \* \*

**Note.—**Licenses are likely to be approved for export to satisfactory end-users of non-ruggedized tubes covered by sub-entry (a) above, required as replacement parts for specific civil equipment not exceeding the

capability of that which could be exported under the Commodity Control List, provided that these parts do not upgrade the initial performance of such equipment.

1555A Electron tubes and specialized components and parts therefor, except commercial standard television camera tubes not having fiber optic faceplates and commercial standard X-ray amplifier tubes, as follows:

(a) Image intensifiers and image converters incorporating fiber-optic faceplates and/or microchannel-plate electron multipliers, and camera tubes incorporating or coupled with such intensifiers or converters;

(b) Electronic storage tubes, including memory transformers of radar pictures, except signal converter storage tubes specially designed for television purposes;

(c) Camera tubes with fiber optic faceplates and/or microchannel-plate electron multipliers;

(d) Ruggedized camera tubes having a maximum length-to-bulb diameter ratio of 5:1 or less.

**Notes.—1.** Licenses are likely to be approved for export to satisfactory end-users of reasonable quantities of non-ruggedized tubes covered by this entry, provided that the tubes will be used for bona fide medical applications.

2. Licenses are likely to be approved for export to satisfactory end-users of non-ruggedized direct view storage tubes covered by sub-entry (b) above, having an effective diameter or diagonal not exceeding 280 mm, for civil radar or oscilloscope applications.

3. Licenses are likely to be approved for export to satisfactory end-users of camera tubes covered by sub-entries (c) and (d) incorporating fiber optic faceplates but not microchannel-plate electron multipliers, provided that the tubes will be used for bona fide civil television applications.

1558A Electronic vacuum tubes (valves), and specialized parts, as follows:

(a) Tubes in which space charge control is utilized as the primary functional parameter, including but not limited to triodes and tetrodes, as follows:

(1) Tubes rated for continuous wave operation having either of the following characteristics:

(i) Above 4 GHz at maximum rated anode dissipation; or  
(ii) Within the frequency range 0.3 to 4 GHz and for which, under any condition of cooling, the product of the maximum rated anode dissipation (expressed in watts) and the square of the maximum frequency (expressed in GHz) at the maximum rated anode dissipation is greater than 10<sup>4</sup>, except for tubes specially designed for television transmitters operating in the frequency range of 0.47 to 0.96 GHz and rated for operation without a grid current, for which the product of the rated anode dissipation (expressed in watts) and the square of the maximum frequency (expressed in GHz) may reach 2 × 10<sup>4</sup>;

(2) Tubes rated only for pulse operation having either of the following characteristics:

(i) Above 1 GHz at the peak pulse output power; or  
(ii) Between 0.3 and 1 GHz and for which, under any condition of cooling, the product of

the peak pulse output power (expressed in watts) and the square of the maximum frequency (expressed in GHz) is greater than 4.5 × 10<sup>4</sup>;

(3) Tubes specially designed for use as pulse modulators for radar or similar applications, having a peak anode voltage rating of 100 kV or more, or rated for a peak pulse power of 6 MW or more (see also entry No. 1514);

(b) Tubes which utilize interaction between a beam of electrons and microwave elements and in which the electrons travel in a direction perpendicular to the applied magnetic field, including but not limited to magnetrons, crossed-field amplifier tubes and crossed-field oscillator tubes, except:

(1) Fixed frequency and tunable pulsed magnetrons and crossed-field amplifier tubes which are in normal civil use in equipment which may be exported under the terms of this List as follows:

(i) Magnetrons designed to operate at frequencies below 3 GHz with a maximum rated peak output power of 1.5 MW or less, or between 3 and 12 GHz with the product of the maximum rated peak output power (expressed in kW) and the frequency (expressed in GHz) less than 4,200;

(ii) Crossed-field amplifier tubes designed to operate at frequencies below 4 GHz with a maximum rated peak output power of 1.2 MW or less and with less than 15 dB gain;

(2) Fixed frequency continuous wave magnetrons designed for medical use or for industrial heating or cooking purposes operating at a frequency of 2.375 GHz ± 0.05 GHz or 2.45 GHz ± 0.05 GHz with a maximum rated power not exceeding 6 kW or at a frequency lower than 1 GHz with a maximum rated power not exceeding 25 kW;

(c) Tubes which utilize interaction between a beam of electrons and microwave elements or cavities and in which the electrons travel in a direction parallel to the applied magnetic field, including but not limited to klystrons and traveling wave tubes, except:

(1) Continuous wave tubes for use in civil communications designed for octave or lesser bandwidth (where the highest operating frequency is equal to or less than two times the lowest operating frequency) having the following characteristics:

(i) Designed to operate below 20 GHz;  
(ii) The product of the rated output power (expressed in watts) and the frequency (expressed in GHz) is less than 800;

(2) Pulsed tubes for civil applications designed for octave or less bandwidth and having either of the following characteristics:

(i) Peak saturated output power not exceeding 1 kW and average power not exceeding 40 watts at or below 10 GHz;  
(ii) Peak saturated output power not exceeding 100 watts and average power not exceeding 20 watts between 10 and 20 GHz;

(3) Pulsed tubes for civil applications designed for fixed frequency operation at frequencies below 3.5 GHz, peak output power of 1.6 MW or less, and operating bandwidth less than 1 percent;

(4) Low power oscillator tubes designed to operate at frequencies below 20 GHz with maximum output power of less than 3 watts;

(d) \* \* \*  
(e) \* \* \*

(f) \* \* \*  
 (g) \* \* \*  
 (h) \* \* \*  
 (i) \* \* \*

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of the following:

(a) Tubes covered by sub-entries (a) and (c) above, specially designed for television purposes and which are to be used in television transmitters, the precise location of which is known, for civil telecasting according to CCIR or OIR standards;

(b) Tubes covered by sub-entries (a), (b) and (c) above required as replacement parts for specific civilian equipment not exceeding the capability of that which could be exported under other Commodity Control List entries, provided that these parts do not upgrade the initial performance of that equipment;

(c) Pulsed amplifier klystrons and fixed frequency and mechanically tunable pulsed magnetrons covered by sub-entries (b) and (c) above intended for civil radar equipment previously exported, provided that they do not upgrade the initial performance of that equipment.

1559A Hydrogen thyratrons of ceramic-metal construction rated for a peak pulse power output of 12.5 MW or more; and specially designed parts and accessories therefor.

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of ceramic-metal structured hydrogen thyratrons to replace such thyratrons in specific civil radar equipment previously exported, provided that they do not upgrade the initial performance of that equipment.

1564A Electronic component assemblies, sub-assemblies, printed circuit boards, and microcircuits:

I. \* \* \*

II. Listed as follows:

(a) Printed circuit boards (single sided, double sided, or multilayer) designed to mount and provide interconnection between electronic components, except those manufactured from any of the following insulating materials:

(i) Paper base phenolics;

(ii) Glass cloth melamine;

(iii) Glass epoxy resin;

(iv) Polyethylene terephthalate; or

(v) Any insulating material with a maximum continuous rated operating temperature not exceeding 150° C;

(b) Assemblies, modules and printed circuit boards with mounted components, as follows:

(1) Those including printed circuit boards covered by sub-entry II(a) above;

(2) Those which contain microprocessor, microcomputer or memory microcircuits or embargoed components, except:

(i) Assemblies, not containing microprocessor, microcomputer, or memory microcircuits, whose only embargoed components are capacitors;

(ii) Power supply assemblies;

(c) Microcircuits (monolithic integrated circuits, microprocessor, microcomputer, multichip, hybrid, film or integrated optical types), except:

(i) Encapsulated passive networks; or

(ii) Encapsulated micro-circuits which are not designed or rated as radiation hardened, which are not rated for operation below -40° C or above +85° C, which are packaged in TO-5 outline cases (0.305 inch to 0.370 inch diameter) or in non-hermetically sealed cases and which are:

(1) Bipolar types designed for operation as digital logic circuit elements but limited to gates, inverters, buffers, bilateral switches, drivers, counters, latches, adders, comparators, parity generators, multiplexers, expanders, flip-flops, multivibrators, code converters, registers, encoders, decoders, demultiplexers, diode matrices, multipliers and Schmidt-triggers, and having all of the following characteristics:

(a) A product of the typical basic gate propagation delay time (in nanoseconds) and the power dissipation per basic gate (in milliwatts) not less than 30pJ (i.e. speed-power product/gate not less than 30pJ);

(b) A typical propagation delay time not less than 3 nanoseconds; and

(c) Encapsulated in a package having 24 terminals or less;

(2) CMOS types designed for operation as digital logic circuit elements but limited to gates, inverters, buffers, flip-flops, latches, multivibrators, bilateral switches, display drivers, fixed counters, fixed frequency dividers, storage registers, decoders, voltage translators, encoders, and Schmidt-triggers, and having both of the following characteristics:

(a) A minimum propagation delay time under any rated conditions of not less than 10 nanoseconds;

(b) Encapsulated in a package having 24 terminals or less;

(3) Silicon single-chip microcomputer microcircuits that are mask programmed for a civil application prior to export and having all of the following characteristics:

(a) A word size/speed ratio of less than or equal to 0.4 bit per microsecond;

(b) A speed-power dissipation product of greater than or equal to 4 microjoules;

(c) An on-chip read-only memory (ROM), not including the microcode, of less than or equal to 2,048 bytes;

(d) An on-chip random-access memory (RAM) of less than or equal to 512 bits;

(e) An operand (data) word length of less than or equal to 8 bits;

(f) Not capable of addressing off-chip program memory;

(g) Not rated for operation below -20° C or above +75° C;

(Speed is defined as the time (in microseconds) to add C to D where C and D are both in memory, and put the result back in C.)

(4) Silicon microprocessor microcircuits having all of the following characteristics:

(a) A word size/speed ratio of less than or equal to 0.4 bit per microsecond;

(b) A speed-power dissipation product of greater than or equal to 4 microjoules;

(c) Containing no on-chip ROM or on-chip RAM;

(d) An operand (data) word length of less than or equal to 8 bits;

(e) Capable of addressing off-chip program memory of less than or equal to 32,768 bytes;

(f) Not rated for operation below -20° C or above +75° C;

(5) Memory microcircuits as follows:

(a) MOS dynamic RAM's having all of the following characteristics:

(i) A maximum number of bits per package of 1,024 bits and an access time of no less than 250 nanoseconds;

(ii) Not rated for operation below -20° C or above +75° C;

(b) Mask programmed ROMs not rated for operation below -20° C or above +75° C, as follows:

(i) With a maximum number of bits per package of 2,048 bits and an access time of no less than 450 nanoseconds;

(ii) PMOS or NMOS types with a maximum number of bits per package of 4,096 bits and an access time of no less than 700 nanoseconds;

(c) MOS static RAM's having both of the following characteristics:

(i) A maximum number of bits per package of 256 bits;

(ii) An access time of no less than 450 nanoseconds;

(d) Bipolar RAM's as follows:

(i) With a maximum number of bits per package of 64 bits and an access time of no less than 30 nanoseconds;

(ii) With a maximum number of bits per package of 256 bits and an access time of no less than 40 nanoseconds;

(iii) With a maximum number of bits per package of 1,024 bits and an access time of no less than 45 nanoseconds;

(6) (a) Non-reprogrammable microcircuits, not capable of addressing external memory, specially designed for, and which by virtue of circuit design are normally limited to use only for simple calculators which perform a single function in response to a keystroke, capable of performing a floating point addition of 13 decimal digits (mantissa only) or less in no less than 0.02 second;

(b) Programmable microcircuits specially designed for, and which by virtue of circuit design are normally limited to use only for simple key programmable calculators having both of the following characteristics:

(i) Capable of executing a sequence of no more than 256 program steps introduced into a program memory on the chip by a sequence of keystrokes;

(ii) Capable of performing a floating point addition of 13 decimal digits (mantissa only) or less in no less than 0.02 second;

(c) P-channel or N-channel MOS microcircuits specially designed as, and which by virtue of circuit design are normally limited to use only as, serial digital shift registers with a maximum clock rate of 2.5 MHz, and a maximum number of bits per package of 1,024;

(7) (a) Untuned AC amplifier microcircuits having a bandwidth of less than 3 MHz and a maximum rated power dissipation of 5 watts or less at a case temperature of 25° C;

(b) Audio amplifier microcircuits having a maximum rated continuous power output of 25 watts or less at a case temperature of 25° C;

(8) Operational amplifier microcircuits having all of the following characteristics:

(a) A typical unity-gain open-loop bandwidth of not more than 4MHz;

(b) A typical open-loop voltage gain of not more than 500,000 or 115 dB;

(c) A maximum intrinsic rated input offset voltage of not less than 2.5 mV; and

(d) A typical slew rate at unity gain not exceeding 2.5 volts/microsecond;

(9) Analog multiplier and/or divider microcircuits having both of the following characteristics:

(a) A best case rated non-linearity of not better than 0.5 percent of full scale;

(b) A -3 dB small-signal bandwidth of not more than 500 kHz;

(10) Isolation amplifier microcircuits;

(11) Instrumentation amplifier microcircuits having all of the following characteristics:

(a) A best case rated non-linearity of not better than 0.02 percent at a gain of 100;

(b) A maximum gain-bandwidth product not greater than 5 MHz (e.g., a maximum band width of 50 kHz at -3 dB and at a gain of 100);

(c) A typical slew rate at unity gain not exceeding 1 volt/microsecond;

(12) Voltage regulator microcircuits, as follows:

(a) Linear types, having both of the following characteristics:

(i) A rated nominal output voltage of 40 volts or less;

(ii) A maximum output current of 1 A or less;

(b) Switching types, having both of the following characteristics:

(i) A rated nominal output voltage of 40 volts or less;

(ii) A maximum output current of 150 mA or less;

(For voltage regulators, the +85° C upper temperature limit specified in II(c)(ii) is not applicable. The lower limit of -40° C is applicable.)

(13) Voltage comparator microcircuits, having both of the following characteristics:

(a) A maximum input offset voltage of not less than 2 mV; and

(b) A typical switching speed or typical response time of not less than 30 nanoseconds;

(14) Bipolar microcircuits designed for operation in civil applications as externally controlled (by inductive, magnetic or optical means) electronic switches, or as threshold value switches with switching times of 0.5 microsecond or greater;

(15) Non-coherent light-emitting alphanumeric displays not incorporating an integrated circuit;

(16) Non-coherent light-emitting alphanumeric displays incorporating an integrated circuit used for decoding, controlling and/or driving that display, provided that the integrated circuit is not integral with the actual display device;

(17) Simple encapsulated photo-coupler (transoptor) assemblies with electrical input and output and which incorporate non-coherent light-emitting diodes;

(18) Interface microcircuits, as follows:

(a) Line drivers and line receivers having a typical propagation delay time from data input to output of not less than 15 nanoseconds;

(b) Sense amplifiers, having both of the following characteristics:

(i) A typical propagation delay time from data input to output of not less than 15 nanoseconds;

(ii) A typical input threshold voltage of not less than 10 millivolts;

(c) Memory and clock drivers, having all of the following characteristics:

(i) A maximum rated output current of 500 milliamperes or less;

(ii) A maximum rated output voltage of 30 volts or less;

(iii) A typical propagation delay time from data input to output of not less than 20 nanoseconds;

(d) Peripheral and display drivers, having all of the following characteristics:

(i) A maximum rated output current of 500 milliamperes or less;

(ii) A typical propagation delay time from data input to output of not less than 20 nanoseconds;

(iii) A maximum rated output voltage of 80 volts or less;

(When propagation delay time is not specified, typical turn-on or turn-off time, whichever is less, should be used.)

(19) Voltage-to-frequency converter microcircuits not employing delta or delta/sigma modulation techniques, having both of the following characteristics:

(a) A rated non-linearity of not better than 0.01 percent of full scale;

(b) A settling/response time of not less than 20 microseconds for a full scale input change;

(20) Rms-to-dc voltage converter microcircuits having both of the following characteristics:

(a) A rated conversion accuracy, with or without external adjustment, of not better than 0.2 percent of full scale;

(b) A  $\pm 1$  percent amplitude error bandwidth of not greater than 100 kHz;

(21) Analog-to-digital and digital-to-analog converter microcircuits as follows:

(a) Analog-to-digital converter microcircuits having both of the following characteristics:

(i) A conversion time to maximum resolution of not less than 20 microseconds;

(ii) A rated non-linearity of not better than 0.05 percent of full scale over the specified operating temperature range;

(b) Digital-to-analog converter microcircuits having both of the following characteristics:

(i) A settling time to rated linearity of not less than 5 microseconds for "voltage output", and not less than 300 nanoseconds for units not incorporating an output amplifier;

(ii) A rated non-linearity of not better than 0.05 percent of full scale over the specified operating temperature range;

(22) Non-reprogrammable microcircuits which are specially designed for and by virtue of circuit design are normally limited to use for functional purposes in the following applications:

(a) Automotive, including safety, comfort, operations and pollution;

(b) Home electronics, including radio and television, appliances, clocks, watches, audio and video tape recorders, safety, comfort and amusement;

(c) Personal communications up to 150 MHz, including amateur radio communications and intercom;

(d) Unembargoed cameras (including cine cameras) but excluding imaging microcircuits;

(e) Cardiac pacemakers; (A microcircuit whose function cannot be altered by accepting or executing instructions from any external source is non-reprogrammable.)

(Programmed microcircuits are only eligible for export if the program is unalterably stored at the time of manufacture and the performance of the function has been established for the intended end-use.)

(The temperature limits specified in the heading of II(c)(ii) above do not apply to sub-sections II(c)(ii)(22)(a) or (d).)

(23) Timing microcircuits having both of the following characteristics:

(a) A typical timing error of not less than 0.5 percent;

(b) A typical rise time of not less than 100 nanoseconds;

(iii) Unencapsulated monolithic integrated circuits which are not designed or rated as radiation hardened, and which are:

(1) Bipolar types designed for operation as digital logic circuit elements but limited to gates, inverters, buffers, bilateral switches, drivers, counters, latches, adders, comparators, parity generators, multiplexers, expanders, flip-flops, multivibrators, code converters, registers, encoders, decoders, demultiplexers, diode matrices, multipliers and Schmidt-triggers, and having both of the following characteristics:

(a) A product of the typical basic gate propagation delay time (in nanoseconds) and the power dissipation per basic gate (in milliwatts) not less than 70 pJ (i.e., speed-power product/gate not less than 70 pJ);

(b) A typical propagation delay time not less than 5 nanoseconds;

(2) Operational amplifiers, having all of the following characteristics:

(a) A typical unity-gain open-loop bandwidth of not more than 5 MHz;

(b) A typical open-loop voltage gain of not more than 100,000 or 100 dB;

(c) A maximum intrinsic rated input offset voltage of not less than 5 mV;

(d) A typical slew rate at unity gain not exceeding 1 volt/microsecond;

(3) Audio amplifiers having a maximum rated power output of 10 watts or less at a case temperature of 25° C;

(4) Non-reprogrammable types which are specifically designed for and by virtue of circuit design are normally limited to civil uses in television and radio receivers, having all of the following characteristics:

(a) Rated for operation at 11 MHz or less;

(b) Not specially designed for station scanning applications;

(c) Not utilizing charge-coupled device (CCD) technology;

(d) Not intended for beam lead bonding;

(e) Not intended for video and/or luminance amplifiers with maximum rated supply voltages exceeding 30 volts or with typical bandwidths greater than 7.5 MHz.

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users for civil applications of assemblies, modules and printed circuit boards with mounted components (excluding those containing microprocessor, microcomputer and memory

microcircuits) covered by sub-entry II(b)(2) above, if the components are likely to be approved for export to satisfactory end-users.

2. Licenses are likely to be approved for export to satisfactory end-users of devices covered by sub-entry II(b), and not released by sub-entries II(c) (i) and (ii) above, when they consist of, or are incorporated in, plug-in printed circuit boards or plug-in modules for use in specifically identified equipment previously exported, and which do not upgrade the initial performance of that equipment, provided that the plug-in printed circuit boards or plug-in modules cannot operate independently from the equipment to which they are likely to be connected or inserted.

3. Licenses are likely to be approved for export to satisfactory end-users of integrated circuits covered by sub-entry II(c)(ii) above only by virtue of being encased in hermetically sealed dual-in-line packages, provided that the stated legitimate civil end-use requires such a package.

4. Licenses are likely to be approved for export to satisfactory end-users of devices, encapsulated or unencapsulated, covered by sub-entries II (b) and (c) above, provided the devices have been designed specifically for identifiable civil applications and, by nature of design or performance, are substantially restricted to the particular application for which they have been designed.

1565A Electronic computers and related equipment, as follows:

(a) Analog computers designed or modified for use in airborne vehicles, missiles or space vehicles and rated for continuous operation at temperatures from below  $-45^{\circ}\text{C}$  to above  $+55^{\circ}\text{C}$ ; and equipment or systems incorporating such computers;

(b) Other analog computers capable of accepting, processing and putting out data in the form of one or more continuous variables and capable of incorporating a total of at least 20 summers, integrators, multipliers or function generators with facilities for readily varying the interconnection of these components;

(c) Digital computers and digital differential analyzers (incremental computers), as follows:

(1) Designed or modified for use in airborne vehicles, missiles, or space vehicles and rated for continuous operation at temperatures from below  $-45^{\circ}\text{C}$  to above  $+55^{\circ}\text{C}$ ;

(2) Designed or modified to limit electromagnetic radiation to levels much less than those required to meet appropriate government civil interference specifications;

(3) Designed as ruggedized equipment and capable of meeting military specifications for ruggedized equipment or modified for military use;

(4) Designed or modified for "data (message) switching" or those incorporating equipment, devices, or techniques, including software, microprogram control (firmware) and/or specialized logic control (hardware), for accepting, storing, processing and retransmitting data groups ("Data (message) switching" is the technique (including but not limited to store and forward or packet switching) for accepting data groups (including messages, packets or other digital or telegraphic information groups that are

transmitted as a composite whole), storing (buffering) data groups as necessary, processing part or all of the data groups for control (routing, priority, formatting, code conversion, error control, retransmission or journaling), transmission or multiplexing purposes as necessary, and retransmitting (processed) data groups when transmission and/or receiving facilities are available); and

(5) Equipment or systems incorporating such computers;

(d) Digital computers with one or more of the following characteristics:

(1) Floating point operations are implemented by hardware or microprogram control (firmware);

(2) The computer is equipped with peripherals (other than those free from control under sub-entry (h) below);

(3) The computer is equipped with cathode-ray tube or other displays (other than those free from control under sub-entry (h) below), as follows:

(i) Used to display alphanumeric, graphic and/or similar data or information; or

(ii) With light gun or other graphic input devices;

(e) Other digital computers operated by one or more common control units and capable of all of the following:

(1) Accepting, storing, processing, and producing an output in numerical or alphabetical form;

(2) Storing in fixed or alterable (writable) storage devices more than 512 numerical and/or alphabetical characters or having an internal fixed or alterable memory of more than 2,048 bits;

(3) Performing a stored sequence of operations that are modifiable by means (including replacement of fixed storage devices) other than a physical change in wiring or interconnections; and

(4) Selecting a sequence from a plurality of stored operations based upon data or an internally computed result;

(f) Computers capable of operating both analog and digital modes and related equipment, as follows:

(1) Equipment whose analog portion meets the conditions of sub-entry (b) and whose digital portion meets the conditions of sub-entry (e) and which also provides facilities for processing in the digital section numeric data from the analog section and/or vice versa;

(2) Equipment for interconnecting the analog and digital portions of computers as defined in sub-entry (f)(1); and

(3) Digital or analog computers containing interconnecting equipment as defined in sub-entry (f)(2);

(g) Related equipment for the above (including that also described in entry Nos. 1572 and 1588), designed or modified as described in sub-entry (a) or (c), i.e. specialized parts, components, peripherals, displays, sub-assemblies, accessories, and spare parts; and

(h) Other related equipment for the above (including that also described in entry Nos. 1572 and 1588), i.e., specialized parts, components, peripherals, displays, sub-assemblies, accessories, and spare parts.

Notes.—1. Licenses are likely to be approved for export to satisfactory end-users

of analog computers covered by sub-entry (b) above, and related equipment therefore covered by sub-entry (h) above, provided that:

(a) The equipment is primarily used in non-strategic applications;

(b) The equipment will be used primarily for the specific non-strategic applications for which the export would be approved and that the number, type and characteristics of such equipment are normal for the approved use;

(c) The computers and related equipment are not covered by and would not thereby become covered by sub-entry (a), (f), or (g) above, or exceed the limits of this Note;

(d) The analog computers are limited as follows:

(1) The rated errors for summers, inverters and integrators are not less than (i) Static: 0.01%; (ii) Total at 1 kHz: 0.15%.

(2) The rated errors for multipliers are not less than (i) Static: 0.025%; (ii) Total at 1 kHz: 0.25%.

(3) The rated error for fixed function generators (log x and sine/cosine) is not less than Static: 0.1%.

(4) No more than 350 operational amplifiers; and

(5) No more than four integrator time scales switchable during one program;

Technical Notes.—(1) The percentage for Note 1(d)(1)(i) above applies to the actual output voltage; all other percentages apply to full scale, that is from maximum negative to maximum positive reference voltages.

(2) Total errors at 1 kHz for Note 1(d) (1)(ii) and (2)(ii) above, are to be measured with those resistors incorporated in the inverter, summer or integrator which provide the least error.

(3) Total error measurements include all errors of the unit resulting from, for example, tolerances of resistors and capacitors, tolerances of input and output impedances of amplifiers, the effect of loading, the effects of phase shift, and the generating of functions.

2. Favorable consideration for export to satisfactory end-users of digital computers covered by sub-entry (c)(4) above will depend in part upon the degree of conformity with the following:

(a) The equipment is specially designed to meet the requirements of CCITT recommendation F-31 or ICAO recommendations for civilian aviation communication networks;

(b) The equipment will be used primarily for the specified civil application and will be operated by the civil authorities of the importing country for general civil traffic, or for traffic with links with Western countries, or for an international Service to fulfill a commitment to ITU, ICAO, or any other inter-governmental organization which includes Western countries;

(c) The computers are not covered by the remainder of sub-entry (c) above, or by sub-entries (f) or (g) above, or do not exceed the limits of this Note;

(d) The number, type and characteristics of such equipment are normal for the approved use and that the equipment will be limited as follows:

(1) Suitable combinations of circuits not exceeding:

(i) 250 circuits with "data signaling rates" of less than 150 bits per second;

(ii) 60 circuits with "data signaling rates" of 150 to 1,000 bits per second; and/or

(iii) 8 circuits with "data signaling rates" of greater than 1,000 to 4,800 bits per second;

(2) The maximum "data signaling rate" of any circuit does not exceed 4,800 bits per second;

(3) The sum of the "data signaling rates" of all circuits does not exceed 27,500 bits per second;

(4) The sum of the "data signaling rates" of all circuits with "data signaling rates" greater than 1,000 bits per second does not exceed 19,200 bits per second;

**Technical Note.**—"Data signaling rate" is as defined in ITU Recommendation 53-36, taking into account that, for non-binary modulation, "bauds" and "bits per second" are not equal. Bits for coding, checking and synchronization functions are to be included.

(e) The disclosure of software and technical information for the equipment exported is held to the minimum necessary for the application, operation and maintenance of the equipment in the stated civil end-use.

3. Favorable consideration for export to satisfactory end-users of digital computers covered by sub-entries (d) (1) or (2), or (e) above, and related equipment therefor covered by sub-entry (h) above, will depend in part upon the degree of conformity with the following:

(a) The equipment is primarily used in "telephone circuit switching" or "telegraph (telex) circuit switching" systems designed for fixed civil applications;

(b)(1) The equipment will be installed in "telephone circuit switching", or "telegraph (telex) circuit switching" systems designed for fixed civil applications;

(2) The equipment in total represents no more than 30 percent of the value of the switching system (during the initial installation of a partially-equipped system, this total may approach 50 percent); and

(3) The switching system will be either:

(i) Operated by civil authorities of the importing country for general civil traffic, or for traffic with links with Western countries, or for an international service to fulfill a commitment to ITU, ICAO or any other inter-governmental organization which includes Western countries; or

(ii) Used in a private exchange or private branch exchange (in each case of no more than 5,000 lines) which will be used in a civil installation situated in a proscribed destination, and for which a responsible representative of the end-user or importing agency has furnished a signed statement describing the end-use and the location of the exchange and certifying that the equipment will only be used for that specific end-use;

(c) The computers and related equipment are not covered by and would not thereby become covered by sub-entries (c), (f), or (g) above, or exceed the limits of this Note;

(d) The number, type and characteristics of such equipment are normal for the approved use and that the equipment will be limited to the minimum system configuration necessary to control a 50,000 line exchange for the uses cited in sub-paragraph (b)(3)(i) above, or to control a 5,000 line exchange for the uses cited in sub-paragraph (b)(3)(ii) above;

(e) For the interface equipment with which the digital computer is equipped (to be provided only for administrative and control communications purposes):

(1) The "total effective bit transfer rate" of remote "terminal devices" does not exceed 2,400 bits per second;

(2) The "effective bit transfer rate" of any interfaced "communication channel" does not exceed 2,400 bits per second;

(3) The interface equipment is located within the "computer operating area" and limits the "effective bit transfer rate" to those specified in sub-paragraphs (1) and (2) above; and

(4) All interfaced "communication channels" are dedicated full time to the given application;

(f) The disclosure of software and technical information for the equipment exported is held to the minimum necessary for the application, operation and maintenance of the equipment in the stated civil end-use.

**Technical Notes.**—(1) "Telephone Circuit Switching" is the technique for establishing within an exchange, on demand and until released, an exclusive direct or PCM (CCITT Recommendations G-11, G-732 and G-733) connection between calling and called telephone circuits based solely on subscriber-type of telephone dialing information derived from the calling circuit. The telephone circuits may carry any type of signal, e.g. telephony, telegraph or telex, compatible with a voice channel bandwidth of 3,100 Hz. No information available on the circuit other than the subscriber dialing information is utilized for any other function.

(2) "Telegraph (Telex) Circuit Switching" utilizes techniques essentially identical to "Telephone Circuit Switching" for establishing connections between telegraph (telex) circuits based on the same type of dialing information. The telegraph (telex) circuits (which may be telephone circuits) may carry any telegraph (telex) signal compatible with a voice channel bandwidth of 3,100 Hz or less. No information available on the circuit other than the subscriber dialing information is utilized for any other function.

4. Licenses are likely to be approved for export to satisfactory end-users of digital computers and/or devices covered by sub-entries (d)(1) or (2) or (e) above, and related peripherals covered by sub-entry (h) above, provided that:

(a) The digital computers and/or devices have been designed for identifiable office and personal use and, by nature of design, software, microprogram control (firmware), specialized logic control (hardware) or performance, are substantially restricted to the particular application for which they have been designed;

(b) The digital computers and/or devices and the related peripherals and displays are not covered by sub-entries (c), (f) or (g) above, or do not exceed the limits of this Note;

(c) The digital computers and/or devices are limited as follows:

(1) The "CPU data handling rate" does not exceed 2 million bits per second;

(2) The "CPU numerical processing rate" for units capable of arithmetic operations does not exceed 0.1 million bits per second;

(3) The "total internal memory available to the user" does not exceed 32,768 bits;

(4) For peripheral devices with which the computer is equipped:

(i) No more than one magnetic tape transport which does not exceed:

(a) 1,600 bits per inch per track;  
(b) 9 tracks per ½ inch (12.7mm) tape width;

(c) ½ inch (12.7mm) tape width; and  
(d) 25 inches (65.6cm) per second tape read/write speed;

(ii) Cassette/cartridge tape drives described in sub-paragraph (d) below;

(iii) Digital computer peripherals and displays free from control under sub-entry (h) above; and

(iv) Digital recording and reproducing equipment specially designed to use magnetic card, tag, label or bank check recording media free from control under entry No. 1572 sub-entry (a)(ii);

(d) The related peripherals are limited as follows:

Cassette/cartridge tape drives operating serially one track at a time, provided they have:

(i) No more than 800 bits per inch per track; and

(ii) No more than 6,000 bits per second maximum bit transfer rate.

**Technical Notes.**—(1) "CPU data handling rate" is defined as the maximum number of bits that can be accessed in parallel from an internal memory divided by the minimum time (including access time) for the execution of any instruction operating on this number of bits.

(2) "CPU numerical processing rate" is defined as the number of bits used to represent an arithmetic operand divided by the average time required for execution of a multiplication operation, assuming the most efficient arithmetic data coding and the fastest hardware, microprogram control (firmware) and/or software multiplication technique available to the user.

(3) "Total internal memory available to the user" is defined as the sum of the storage capacities of all user-alterable internal storage devices plus all user-replaceable fixed storage devices that may be incorporated in the equipment at one time and that may be used to store microprogram control (firmware) and/or software instructions and data.

5. Licenses are likely to be approved for export to satisfactory end-users of related specialized parts, components, sub-assemblies, accessories and spare parts covered by sub-entry (h) above, for equipment previously exported pursuant to Note 4, provided that:

(a) The related specialized parts, components, sub-assemblies, accessories and spare parts:

(1) Will not upgrade the equipment beyond the limits of Note 4;

(2) Are in reasonable quantities based on the quantity of equipment previously exported from the country; and

(3) Are only for equipment previously exported from the country;

(b) Advanced technology components (microprocessors, arithmetic logic units (ALUs), fixed or alterable storage devices,

programmed logic arrays (PLAs), etc.) covered by entry No. 1564 or 1588 are held to the minimum performance and quantity appropriate for the type and quantity of equipment they are intended for, assuming normal usage patterns.

6. Licenses are likely to be approved for export to satisfactory end-users of related specialized parts, components, sub-assemblies, accessories and spare parts covered by sub-entry (h) above, for tape drives previously exported pursuant to Note 4 (c)(4)(ii) and (d), provided that they will not upgrade the tape drives beyond the limits of Note 4.

7. Licenses are likely to be approved for export to satisfactory end-users of digital computers covered by sub-entries (d) (1) or (2) or (e) above, and related equipment therefor covered by sub-entry (h) above, provided that:

(a) The equipment is primarily used in non-strategic applications;

(b) The equipment will be used primarily for the specific non-strategic applications for which the export would be approved and that the number, type and characteristics of such equipment are normal for the approved use;

(c) The computers and related equipment are not covered by and would not thereby become covered by sub-entries (c), (f) or (g) above, or exceed the limits of this Note;

(d) The digital computers are limited, as follows:

(1) The sum of either the "I/O bus rate" or the "total effective bit transfer rate", whichever is less, and the "CPU bus rate" does not exceed 45 million bits per second;

(2) The "processing data rate" for CPUs which implement floating point operations by hardware or microprogram control (firmware) does not exceed 8 million bits per second;

(3) The internal memory total connected capacity (excluding parity, word marker and flag bits) does not exceed 2.36 million bits;

(4) For peripheral devices with which the computer is equipped:

(i) The "total effective bit transfer rate" (excluding data channels not equipped with peripheral memory units) does not exceed 8 million bits per second;

(ii) The "effective bit transfer rate" of any peripheral memory or data channel does not exceed 1.6 million bits per second;

(iii) No more than 12 magnetic tape transports;

(iv) Magnetic tape transports which do not exceed:

(a) 1,600 bits per inch per track;

(b) 9 tracks per 1/2 inch (12.7 mm.) tape width; and

(c) 1/2 inch (12.7 mm.) tape width;

(v) For peripheral memory devices other than magnetic tape transports:

(a) Total connected "net capacity" does not exceed 960 million bits;

(b) For each independent device with an "average access time" of less than 30 milliseconds, the "memory performance factor" does not exceed 8,000;

(c) For each independent device with an "average access time" of 30 milliseconds or greater, the "memory performance factor" does not exceed 43,000;

(d) "Total number of access" does not exceed 150 per second;

(5) The "effective bit transfer rate" of any "terminal device" located remote from the "computer operating area" does not exceed 2,400 bits per second;

(6) For interface equipment with which the computer is equipped:

(i) The "total effective bit transfer rate" (excluding parity, word marker and flag bits) of remote "terminal devices" does not exceed 4,800 bits per second;

(ii) The "effective bit transfer rate" of any interfaced "communication channel" does not exceed 1,200 bits per second;

(iii) The interface equipment is located within the "computer operating area" and limits the "effective bit transfer rates" to those specified in sub-paragraphs (i) and (ii) above; and

(iv) All interfaced "communication channels" are dedicated full time to the given application.

8. Licenses are likely to be approved for export to satisfactory end-users of additional internal memory or peripheral memory devices covered by sub-entry (h) above, for equipment previously exported pursuant to Note 7, provided that:

(a) Two years have elapsed since the initial installation of the equipment;

(b) The equipment would not thereby exceed the limits of Note 7(d) with the following modified limits on internal memory and peripheral memory devices:

(1) The internal memory total connected capacity (excluding parity, word marker and flag bits) does not exceed 4.72 million bits;

(2) For peripheral memory devices other than magnetic tape transports:

(i) Total connected "net capacity" does not exceed 1,400 million bits;

(ii) "Total number of accesses" does not exceed 200 per second;

(c) The conditions of Note 7 continue to be met.

9. Licenses are likely to be approved for export to satisfactory end-users of reasonable quantities of peripherals covered by sub-entry (h) above, as follows:

(a) Disc drives utilizing non-rigid magnetic media, provided they have:

(1) No more than a 7.88 in. (201 mm.) disc;

(2) No more than 3.2 million bit "net capacity";

(3) No more than 250,000 bits per second maximum bit transfer rate; and

(4) No less than 250 millisecond "average access time";

(b) Cassette/cartridge tape drives operating serially one track at a time, provided they have:

(1) No more than 1,600 bits per inch per track;

(2) No more than 48,000 bits per second maximum bit transfer rate;

(c) Non-impact line printers operating at 2,000 lines per minute or less and non-impact character printers operating at 300 characters per second or less;

(d) Graphic displays specially designed for signature security checking having an active display area not exceeding 150 sq. cm.

10. Licenses are likely to be approved for export to satisfactory end-users of additional internal memory and peripheral memory devices covered by sub-entry (h) above, for equipment previously exported, provided that

the equipment would not thereby exceed the limits with the following additional limits on peripheral memory devices with which the computer is equipped:

(a) The "effective bit transfer rate" of any peripheral memory or data channel does not exceed 1.6 million bits per second;

(b) For peripheral memory devices other than magnetic tape transports:

(1) Total connected "net capacity" does not exceed 1,900 million bits;

(2) For each independent device with an "average access time" of 30 milliseconds or greater, the "memory performance factor" does not exceed 64,000.

1568A Equipment, as follows:

(a) \* \* \*

(b) \* \* \*

(c) \* \* \*

(d) \* \* \*

(e) \* \* \*

(f) \* \* \*

(g) Precision potentiometers, *except*

*potentiometers using only switched elements*

(for the purpose of this sub-entry, a precision potentiometer means one having a rated conformity better than 0.25 percent for a

linear potentiometer; or 1 percent for a non-linear potentiometer), and special

instruments rated to have the same characteristics as potentiometers in (1) and (2) below, such as Vernistats, as follows:

(1) Linear potentiometers having a constant resolution and a rated linearity of better than 0.05 percent absolute;

(2) Non-linear potentiometers having a variable resolution and a rated conformity of:

(i) 1 percent or less when the resolution is inferior to that obtained with a linear potentiometer of the same type and of the same track length; or

(ii) 0.5 percent or less when the resolution is better than or equal to that obtained with a linear potentiometer of the same type and of the same track length; or

(3) \* \* \*

(h) \* \* \*

(i) \* \* \*

(j) \* \* \*

(k) \* \* \*

(l) \* \* \*

(m) \* \* \*

**Note.**—Licenses are likely to be approved

for export to bona fide end-users of potentiometers covered by subentries (g) (1)

and (2) above, provided they have been

designed for civil use, and have been in use in civil equipment for a period of not less

than five years.

1572A Recording and/or reproducing

equipment as follows (for equipment which

may be exported in conjunction with

computer shipments, see entry No. 1565.):

(a) Using magnetic techniques, *except:*

(i) *Those specifically designed for voice or music;*

(ii) *Those specifically designed to use magnetic card, tag, label or bank check recording media with a magnetic surface area not exceeding 10 sq. in. (65 sq. cm.); or*

(iii) *Digital recording and reproducing equipment operating serially with a packing density not exceeding 800 bits per inch per track specially designed for use with, and incorporated in, typewriter systems used for preparing, correcting and/or composing text;*

(b) Using electron beam(s) operating in a vacuum, and/or laser-produced light beams (see also entry No. 1522) that produce patterns or images directly on the recording surface, and specialized equipment for image development, *except equipment specifically designed for television recording and/or reproducing on discs;*

(c) Graphic instruments capable of continuous direct recording of sinusoidal waves at frequencies exceeding 20 kHz; and

(d) Specialized parts and components for the above and recording media used in equipment covered by subentries (a) and (b). (The term "recording media" is intended to include all types and forms of specialized recording media used in such recording techniques, including but not limited to tapes, drums, discs and matrices.)

**Notes.**—1. Licenses are likely to be approved for export to satisfactory end-users of reasonable quantities of equipment covered by sub-entry (a) above, and specialized parts, components and recording media therefor covered by sub-entry (d) above, for use with the exported equipment, as follows:

(a) Video magnetic tape recorders, specially designed for television recording, using a signal registered with the C.C.I.R., or specifically designed or adapted for use with medical equipment, and having all of the following characteristics:

(1) 3 dB recording bandwidth not exceeding 6 MHz;

(2) Maximum length of time of a single scan not exceeding 20 milliseconds;

(3) Not ruggedized;

(b) Analog magnetic tape recorders having all of the following characteristics:

(1) Bandwidth capability at maximum design speed not exceeding 100kHz per track;

(2) Recording density not exceeding 5,000 magnetic flux sine waves per linear inch (25.4 mm) per track;

**Technical Note.**—Recording density is, for direct recorders, the recording band width divided by the tape speed; and, for FM recorders, the sum of the carrier frequency and the deviation divided by the tape speed;

(3) Not ruggedized;

(4) Not rated for continuous operation in ambient temperatures from below  $-20^{\circ}$  C to above  $+55^{\circ}$  C;

(5) Not specifically designed for underwater use;

(6) Not including recording and/or reproducing heads of the rotary or floating types or designed for use in equipment with characteristics superior to those designed in subparagraph (b) (1) and (2) above;

(7) Tape speed not exceeding 60 inches (152.4 cm) per second;

(8) Number of recording tracks (excluding audio voice track) not exceeding 16;

(9) Start-stop time not less than 25 milliseconds;

(10) Equipped with tape-derived (off-tape) servo speed control and with a time displacement (base) error of not less than  $\pm 25$  microseconds at a tape speed of 60 inches (152.4 cm) per second and not less than  $\pm 50$  microseconds at any lower tape speed measured in accordance with IRIG document 118-71, paragraph 5.2.2.5, or document EIA RS-413/ANSI C 83.94-1973;

(c) Systems for use in civil aircraft or helicopters to record flight data for safety and/or maintenance purposes, and having all of the following characteristics:

(i) In normal civil use for more than one year;

(ii) Not exceeding 100 input channels;

(iii) Sum of the individual channel recording bandwidths not exceeding 500 Hz;

(d) Recording equipment not intended for use in conjunction with equipment or materials covered by other items, provided that the capability of the recorder is limited to both:

(1) A tape width not exceeding  $\frac{1}{4}$  inch (6.35 mm);

(2) Digital recording techniques in serial form with a packing density not exceeding 800 bits per inch.

**Technical Note.**—Packing density is, for digital recorders, the number of bits per second per track divided by the tape speed;

(e) Incremental recorders and/or reproducers (i.e. equipment designed for discontinuous sampling and/or collection of data in an incremental manner) having all of the following characteristics:

(1) The maximum tape speed, at the maximum stepping rate, does not exceed 2 inches (50.8 mm) per second;

(2) The equipment has all the characteristics specified in sub-paragraphs (3) to (6) inclusive in Note 1(b) above;

(f) Digital magnetic recorders specially designed for seismic/geophysical applications, operating in the frequency range of 5 to 800 Hz and limited to the following operational parameters:

(1) A maximum bit packing density of 1,600 bits per inch (63 bits per mm) per track;

(2) A maximum bit transfer rate of 0.96 million bits per second;

(3) A maximum tape read-write speed of 75 inches (190.5 cm) per second.

**Technical Note.**—Packing density is, for digital recorders, the number of bits per second per track divided by the tape speed.

2. Licenses are likely to be approved for export to satisfactory end-users of reasonable quantities of magnetic tape and flexible disc cartridge recording media covered by sub-entry (d) above, for use in civil television recording and reproducing applications or with computers as appropriate, provided that:

(a) The base material consists only of polyethylene terephthalate or cellulose acetate;

(b) The magnetic coating material consists only of undoped gamma-ferric (iron) oxide with a rated intrinsic coercivity not exceeding 350 oersteds (video tape considered under subparagraph (c)(1) below, may also include chromium dioxide-coated tape with a rated intrinsic coercivity not exceeding 500 oersteds and a width not exceeding 1 inch (25.4 mm)); and

(c) The magnetic recording media is limited to the following types and characteristics:

(1) Video tape designed for television recording and reproduction with a tape width not exceeding 2 inches (50.8 mm);

(2) Computer tape designed for digital longitudinal recording and reproduction and having all of the following characteristics:

(i) A magnetic coating certified for a maximum packing density of 6,250 bits per

inch (9,042 flux changes per inch) along the length of the tape;

(ii) A magnetic coating thickness not less than 0.40 mil (10.2 microns);

(iii) A tape width not exceeding 1 inch (25.4 mm);

(iv) A tape length not exceeding 3,600 feet (1,097.3 meters);

(3) Computer tape in cassettes/cartridges designed for digital longitudinal recording and reproduction and having all of the following characteristics:

(i) A magnetic coating certified for a maximum packing density of 1,600 bits per inch (3,200 flux changes per inch) along the length of the tape;

(ii) A magnetic coating thickness not less than 0.17 mil (4.32 microns);

(iii) A tape width not exceeding  $\frac{1}{4}$  inch (6.35 mm);

(iv) A tape length not exceeding 900 feet (274.3 meters);

(4) Computer flexible disc cartridges designed for digital recording and reproduction and having all of the following characteristics:

(i) A magnetic coating certified for a maximum packing density of 13,262 flux changes per radian (3,268 bits per inch at a radius of 2.029 inches (51.536 mm)) around the disc;

(ii) A magnetic coating thickness not less than 0.1 mil (2.54 microns);

(iii) A disc thickness not exceeding 0.003 inch (80 microns);

(iv) A disc outer diameter not exceeding 7.88 inches (201 mm);

(v) A disc inner diameter of 1.5 inch (38.1 mm).

3. Licenses are likely to be approved for export to satisfactory end-users of reasonable quantities of recording media covered by sub-entry (d) above, specially designed for digital recording and reproducing equipment operating serially with a packing density not exceeding 800 bits per inch per track specially designed for use with, and incorporated in, typewriter systems used for preparing, correcting and/or composing text. (The digital recording and reproducing equipment described in this Note is not covered by sub-entry (a) above.)

1584A Cathode-ray oscilloscopes and specialized parts therefor, including associated plug-in units and external amplifiers, preamplifiers, and sampling devices, having any of the following characteristics:

(a) An amplifier bandwidth greater than 100 MHz (defined as the band of frequencies over which the deflection on the cathode-ray tube does not fall below 70.7 percent of that at maximum point measured with a constant input voltage to the amplifier);

(b) Containing or designed for use with cathode-ray tubes covered by entry 1541 (b) or (c);

(c) \* \* \*

(d) \* \* \*

(e) \* \* \*

(f) \* \* \*

**Note.**—Licenses are likely to be approved for export to satisfactory end-users of oscilloscopes (including mainframe/amplifier systems) and probes therefor, covered only by sub-entries (a) and (b) above, provided that:

(a) The oscilloscope or system bandwidth is not rated in excess of 200 MHz;

(b) In the case of systems, the characteristics of individual plug-ins or mainframes are not in excess of what is required for the overall system performance;

(c) The equipment is a reasonable requirement for the stated legitimate civil end-use; and

(d) The cathode-ray tube contains no electron multiplier.

1586A Acoustic wave devices and specialized parts therefor, as follows:

(a) Surface acoustic wave and surface skimming acoustic wave devices (*i.e.*, signal processing devices employing elastic waves in materials, including but not limited to, lithium niobate, lithium tantalate, bismuth germanium oxide, silicon, quartz, yttrium garnet, aluminum oxide and magnesium aluminum oxide) which permit direct processing of signals, including but not limited to, amplifiers, correlators (fixed, programmable and memory), oscillators, bandpass filters (transversal and resonator), multiplexers, dispersive expansion and compression filters, delay lines (fixed and tapped) and non-linear devices, having any of the following characteristics:

(1) A carrier frequency of greater than 400 MHz;

(2) \* \* \*

(b) \* \* \*

Note.—Licenses are likely to be approved for export to satisfactory end-users of devices covered by sub-entry (a)(1) above, which are specially designed for use in civil television equipment and which operate at frequencies below 1 GHz.

1587A Quartz crystals and assemblies thereof in any stage of fabrication (*i.e.*, worked, semi-finished or mounted), *except optical grade quartz crystals*, as follows:

(a) For use as filter elements, and having either of the following characteristics:

(1) Designed for operation over a temperature range wider than 125° C; or

(2) Crystals or assemblies of crystals which use the trapped energy phenomenon (*i.e.*, those which have more than one series or parallel resonance on a single quartz element);

(b) \* \* \*

(c) \* \* \*

Note.—Licenses are likely to be approved for export to satisfactory end-users of items covered by sub-entry (a) above, which have either of the following characteristics:

(a) Designed for operation as intermediate frequency filters operating from 10.5 to 11 MHz or from 21 to 22 MHz with 3 dB bandwidths not exceeding 40 kHz; or

(b) Designed for operation as single sideband filters operating at from 1 to 10 MHz with 3 dB bandwidths not exceeding 4kHz.

1588A Materials composed of crystals having spinel, hexagonal, orthorhombic or garnet crystal structures; thin film devices; assemblies of the foregoing; and devices containing them, as follows (for equipment which may be exported in conjunction with computer shipments, see entry No. 1565):

(a) \* \* \*

(b) Single aperture forms possessing either of the following characteristics:

(1) Switching speed of 0.3 microsecond or faster at the minimum field strength required for switching at 104° F (40° C); or

(2) A maximum dimension less than 30 mils (0.76 mm);

(c) \* \* \*

(d) \* \* \*

(e) \* \* \*

(f) \* \* \*

(g) \* \* \*

Note.—Licenses are likely to be approved for export to satisfactory end-users of single aperture forms covered by sub-entry (b) above, provided they have a switching speed of slower than 0.3 microsecond and a maximum dimension of 14 mils (0.36 mm) or more.

1595A Gravity meters (gravimeters), and specialized parts therefor, designed or modified for airborne or marine use.

Note.—Licenses are likely to be approved for export to civil end-users for civil end-uses of marine gravimetric systems having a static accuracy of 1 milligal or above, or an in-service (operational) accuracy of 1 milligal or above with a time to steady-state registration of two minutes or greater under any combination of attendant corrective compensations and motional influences.

3604A Zirconium metal; alloys containing more than 50% zirconium by weight; and compounds in which the ratio of hafnium content to zirconium content is less than one part to five hundred parts by weight; manufacturers wholly thereof; *except*

(i) Zirconium metal and alloy in shipments of 5 kg or less;

(ii) Zirconium in the form of foil or strip having a thickness not exceeding 0.025 mm (0.00095 in.) and specially fabricated and intended for use in photo flash bulbs, in shipments of 200 kg or less.

Note.—Licenses are likely to be approved for export to satisfactory end-users of:

(a) Finished parts made of zirconium metal or alloys, specially designed for an identified civil research or power reactor, such as cladding tubes and plugs and separators therefor, liner tubes, thermal insulating tubes, pressure tubes and calandria tubes, provided that:

(1) None of the parts contains fissile materials; and

(2) The importing country has agreed to the application of the Safeguards of the International Atomic Energy Agency (IAEA) in connection with the nuclear reactor facility;

(b) Contained zirconium metal, or parts made therefrom, in individual shipments not exceeding 100 kg, when intended for use in, or in support of, an identified civil research or power reactor facility, in connection with which it is contemplated that IAEA Safeguards would be applied.

3605A Nickel powder and porous nickel metal, as follows:

(a) Powder with a nickel content of 99 percent or more, and a particle size of less than 100 micrometers; and

(b) \* \* \*

Note.—Licenses are likely to be approved for export to satisfactory end-users of:

(a) Nickel powder in uncompact powder form not made by the carbonyl process; or

(b) Nickel powder in uncompact powder form made by the carbonyl process, in quantities of 50 kg or less.

1673A Artificial graphite having an apparent relative density of 1.90 or greater when compared with water at 60° F (15.50° C), *except artificial graphite which has been impregnated or composited with inorganic materials for the purpose of improving only its electrical conductivity, its mechanical resistance or its mechanical friction properties; and electrical resistors, artificial loads for microwave applications, cable waveguide terminations, brush stock, special joints for electrodes, boats and crucibles and high density graphite optical elements.*

Note.—Licenses are likely to be approved for export to satisfactory end-users of the following:

(a) Pyrolytic graphite (*e.g.* graphite made by vapor deposition at temperatures exceeding 2,732° F. (1,500° C)) in crude or semi-fabricated forms, the dimension of any one of which does not exceed 4 inches (10. cm) in any direction, in individual shipments not exceeding 55 pounds (25 kg);

(b) Non-pyrolytic graphite, having a relative density of less than 1.95 which has not been coated or composited with other elements or compounds to improve its performance at elevated temperatures or reduce its permeability to gases.

1754A Fluorocarbon compounds and manufactures, as follows:

(a) Monomeric and polymeric materials, as follows:

(1) Polychlorotrifluoroethylene, oily and waxy modifications only;

(2) \* \* \*

(3) \* \* \*

(4) \* \* \*

(5) \* \* \*

(b) Greases, lubricants and dielectric, damping and flotation fluids made wholly of any of the materials in sub-entry (a) above;

(c) \* \* \*

Note.—Licenses are likely to be approved for export to satisfactory end-users of up to 5 US gallons (18.9 liters) of polychlorotrifluoroethylene-based lubricating oils covered jointly by sub-entries (a)(1) and (b) above, for bona fide civil uses.

1755A Silicone fluids and greases, as follows:

(a) \* \* \*

(b) Silicone lubricating grease capable of operating at temperatures of 356° F (180° C) or higher and having a drop point (method of test being ASTM or ITP) of 428° F (220° C) or higher.

Note.—Licenses are likely to be approved for export to satisfactory end-users of silicone lubricating greases covered by sub-entry (b) above, provided they are not capable of operating at temperatures of 400° F (205° C) or higher.

1763A Fibrous and filamentary materials which may be used in composite structures or laminates and manufactures thereof, as follows:

(a) Having both of the following characteristics:

(1) Specific modulus greater than  $1.25 \times 10^6$ , and

(2) Specific tensile strength greater than  $3 \times 10^6$

(b) Having both of the following characteristics:

(1) Specific modulus greater than  $1 \times 10^6$ , and

(2) Melting or sublimation point higher than  $3,000^\circ \text{F}$  ( $1,649^\circ \text{C}$ ) in an inert environment; except carbon fibers having a specific modulus of less than  $2 \times 10^6$  and a specific strength of less than  $1 \times 10^6$ .

(c) \* \* \*

Note.—Licenses are likely to be approved for export for bona fide civil end-uses, of carbon fibers covered by sub-entries (a) and (b) above having both of the following characteristics:

(a) Specific modulus less than  $4.5 \times 10^6$ , and

(b) Specific tensile strength less than  $4 \times 10^6$ .

1767A Preforms of glass or any other material specially designed for the fabrication of optical transmission fibers intended for the manufacture of cable covered by entry No. 1526 II(c).

Note.—Licenses are likely to be approved for export to satisfactory end-users of the preforms described in this entry.

2. The authority citation for Part 399 is revised to read as follows:

Authority: Sec. 4, Pub. L. 96-72 (50 U.S.C. app. 2403); (E.O. 12214, 45 FR 29783, May 6, 1980), Department Organization Order 10-3, (45 FR 6141, January 25, 1980) and International Trade Administration Organization and Function Order 41-1 (45 FR 11862, January 30, 1980).

3. Section 399.1 is revised to read as set forth below. The Commodity Control List printed in the Federal Register of June 25, 1980 (45 FR 43060-43138) is reconfirmed and is designated Supplement 1 to § 399.1. Supplement 1 is amended by removing pages CCL-5, 10, 19, 21, 22, 23, 24, 28, 66, 70, 72, 77 and 79 printed at 45 FR 43064, 43069, 43078, 43080, 43081, 43082, 43083, 43087, 43125, 43129, 43131, 43136, and 43138, and inserting in their place replacement pages CCL-5, 10, 19, 21, 22, 23, 24, 28, 66, 70, 72, 77 and 79 set forth below.

**§ 399.1 The commodity control list and how to use it.**

(a) *Commodity Coverage.* The Commodity Control List (CCL) includes all commodities except those specifically controlled for export by another department or agency of the U.S. Government. For example, arms, ammunition, and implements of war are controlled for export by the Office of Munitions Control, U.S. Department of State. See § 370.10 for a listing of exports controlled by other U.S. Government departments and agencies.

(b) *Commodity Categories.* The commodities under OEA jurisdiction are grouped on the CCL under 10 general categories. Each CCL entry is preceded by a four-digit Export Control

Commodity Number (ECCN). The first digit relates to the strategic level of control; the second digit identifies the Group to which the commodity belongs; and the remaining two digits identify related commodities within a Group.

Group	Types of commodities
0	Metal-working machinery
1	Chemical and petroleum equipment
2	Electrical and power-generating equipment
3	General industrial equipment
4	Transportation equipment
5	Electronics and precision instruments
6	Metals, minerals, and their manufactures
7	Chemicals, metalloids, petroleum products, and related materials
8	Rubber and rubber products
9	Miscellaneous

Within the ten general categories, specific CCL entries define the commodities under control to the destinations included in the country groups specified in the CCL column headed "Validated License Required." See Supplement No. 1 to Part 370 for a listing of the countries included in each country group.

(c) *Embargo Destinations.* Almost all CCL entries include Country Groups S and Z, embargo destinations, in the column headed "Validated License Required." Generally, the last entry in each commodity category is a "basket" entry asserting control over exports to destinations in Country Groups S and Z of commodities that are not elsewhere specified in that commodity category. In a few instances, however, certain entries are excepted from the general embargo policy and are specifically identified. The commodities so excepted may be exported under General License *G-DEST*. Certain other General Licenses may also apply, e.g., General License *GIFT*. With these exceptions, no commodity may be exported or reexported to a destination in Country Group S or Z unless an export license application (Form ITA-622P) or request to reexport (Form ITA-699P) has been filed with the Office of Export Administration and a validated export license or reexport approval covering the proposed transaction has been issued to the exporter. See § 385.1 for general policy statements with respect to embargo destinations.

(d) *All Other Destinations, except Canada.* If a commodity is intended for export to a destination in Country Group P, Q, T, V, W, or Y and is covered by a CCL entry that includes P, Q, T, V, W, or Y, as appropriate, in the column headed "Validated License Required," an export license application or reexport request will generally have to be filed with the OEA and a validated export license or reexport authorization covering the

proposed transaction will generally have to be issued prior to shipment. If a commodity is covered by a CCL entry but is intended for export to a country that is not included in a country group for which control is indicated, the commodity may be shipped under authority of General License *G-DEST*, provided none of the parties involved is currently denied export privileges (see Supplement No. 1 to Part 388) and the export is not restricted by the special licensing requirements summarized in (f)(3) below. A small value shipment of a commodity included in a CCL entry may be eligible for export to a destination in Country Group Q, T, or V under the authority of General License *GLV*. In addition, one of the other, more specialized, General Licenses set forth in Part 371 may be applicable. Exporters should review the General License provisions in Part 371 prior to filing an application to ascertain whether any apply to the proposed shipment or conversely require a validated license.

(e) *Canada.* Canada is not included in any of the Country Groups, and most commodities may be exported to Canada for consumption or use in that country without a validated export license. In the few instances where a validated license is required, Canada is specifically named. See § 385.6 for a general policy statement with respect to exports to Canada. Note also the special licensing requirements summarized in (f)(3) below.

(f) *How To Use the CCL.*—(1) *General categories.* The first step is to identify which CCL entry covers the commodity proposed for export. This can usually be determined by reviewing the appropriate general category within which the commodity is most likely to be included. If the exporter is uncertain of the proper CCL entry, he should consult the Office of Export Administration.

Once the CCL entry has been located, the Export Control Commodity Number (ECCN) should be noted. This consists of a four-digit number that must appear on your export license application or reexport request, if one is required. The four-digit number will be followed by a code letter. This code letter is a key to the documentation requirements of Part 375, and is used elsewhere in the Regulations to indicate the country group level of control for CCL entries. This code letter need not appear on the export license application or reexport request. The letters used and the respective country groups are:

Code letters	Country groups for which validated license is required
A	PQSTVWYZ (Multilaterally controlled to all destinations.) Only "A" commodities are subject to IC/DV procedure (see § 375.1).
B	PQSTVWYZ (Unilaterally controlled to all destinations.)
C	PQSWYZ and certain other countries.
D	PQSWYZ only.
E	PSWYZ.
F	SZ and certain other countries.
G	SZ only.
I	None.
M	Various (Country Group control level is governed by another entry on the CCL.)

(2) *Country of destination and value of shipment.* Having located the ECCN for a commodity that is to be exported, the next step is to determine if a validated export license is required for the particular shipment in question. This is determined by reference to the column of the CCL headed "Validated License Required" and, in certain cases, by the value of the shipment.

(i) If the code letter following the ECCN is A or B, and the country of destination is in Country Group T or V, a validated export license is required if the value of the shipment exceeds the value shown in the column of the CCL headed "GLV \$ Value Limit." However, see § 371.5 for restrictions on the use of General License *GLV*.

(ii) If the code letter following the ECCN is A and the country of destination is in Country Group P, Q, S, W, Y, or Z, a validated export license is required regardless of the value of the shipment.

(iii) If the code letter following the ECCN is B, C, D, or E, and the country of destination is in Country Group P, S, W, Y or Z or specifically named in the column of the CCL headed "Validated License Required," a validated export license is required, regardless of the value of the shipment. If the country of destination is in Country Group Q, a validated export license is required unless the code letter is E, F, G or I, or there is a GLV \$ value shown in a footnote to the entry and the value of the shipment does not exceed the GLV \$ value. The GLV \$ value limit for Country Group Q is "0" unless stated otherwise in a footnote for the entry. However, see § 371.5 for restrictions on the use of General License *GLV*.

(iv) If the code letter following the ECCN is F or G, and the country of destination is in Country Group S or Z or is specifically named in the column of the CCL headed "Validated License Required," a validated export license is required, regardless of the value of the shipment.

(3) *Special licensing requirements.* Under certain circumstances, a

commodity may not be exported under a General License even though, from an examination of the CCL, it appears to meet the requirements for export under a General License. Exporters should review, in particular, Parts 376, 378, and 385. For example—

(i) The commodity is related to nuclear weapons, nuclear explosive devices, nuclear testing, the chemical processing of irradiated special nuclear or source materials, the production of heavy water, the separation of isotopes of source and special nuclear material, or the fabrication of nuclear reactor fuel containing plutonium, as described in § 378.3, or the technical data are related to any of these activities, as described in § 379.4(c)(1), unless the technical data may be exported under the provisions of General License *GTDA*;

(ii) An individual validated export license is required to export any commodity or technical data (except data meeting the conditions of General License *GTDA*) where the exporter knows or has reason to know that the commodity, the data, or any product of the data, will be sold to or used by or for military or policy entities in the Republic of South Africa or Namibia. See also § 385.4 with respect to controls over other commodities for export to the Republic of South Africa or Namibia.

(g) *Commodity Control List Headings.* The Commodity Control List contains two headings designed to inform applicants of information that must be included on an export license application or reexport request, and one heading to inform applicants of the reason for control of the commodity.

(1) *Unit of quantity.* The quantity classification given for each commodity in the "Unit" column of the CCL must be shown on the export license application. If dashes (—) are shown in this column, the license is issued in terms of dollar value, unless a specific unit of quantity is required by a footnote in this column. However, if another unit of quantity is commonly used in the trade, the application should show the quantity in terms of that unit. If a unit of weight or measure is listed in the unit column, a shipping tolerance is allowed. (See § 386.7.)

(2) *Processing code.* For each entry on the Commodity Control List, a processing code, *i.e.*, CD, EE, MG, or SS, appears in the "Processing Code" column. These processing codes must be shown on the application for export license or reexport request, since they are used to facilitate the routing and processing of export license applications within the Office of Export Administration. These processing codes stand for Computer Division (CD),

Electronic Equipment Division (EE), Capital Goods and Production Material Division (MG), and Short Supply Division (SS). Only those entries on the CCL that have the same processing code may be entered on a single application for export license. (For complete information the inclusion of related commodities on a single application, see § 372.4 (d).)

(3) *Reason for control.* The reason for control for each entry is specified in the last column<sup>1</sup>, using the following number code—

Code No.	Reason for control
1	National security <sup>1</sup>
2	Short supply <sup>2</sup>
3	Foreign policy <sup>3</sup>
4	Nuclear non-proliferation <sup>4</sup>
5	Crime control (foreign policy) <sup>5</sup>

<sup>1</sup> Export Administration Act of 1979, Section 5, Pub. L. 96-72, 93 Stat. 507, to be codified at 50 U.S.C. app. § 2404.

<sup>2</sup> Export Administration Act of 1979, Section 7, Pub. L. 96-72, 93 Stat. 515, to be codified at 50 U.S.C. app. § 2406. Other statutes controlling petroleum and other commodities include: Energy Policy and Conservation Act, Section 103, Pub. L. 94-163, 89 Stat. 877, 42 U.S.C. § 6212; Trans-Alaska Pipeline Authorization Act, Section 101, Pub. L. 93-153, 87 Stat. 576, amending 30 U.S.C. § 165; Naval Petroleum Reserve Production Act of 1976, Section 201(10), Pub. L. 94-258, 90 Stat. 309, amending 10 U.S.C. § 7430.

<sup>3</sup> Export Administration Act of 1979, Section 6, Pub. L. 96-72, 93 Stat. 513, to be codified at 50 U.S.C. app. § 2405.

<sup>4</sup> Export Administration Act of 1979, Sections 5, 6, and 17(d), Pub. L. 96-72, 93 Stat. 507, to be codified at 50 U.S.C. app. § 2416(d), Nuclear Non-Proliferation Act of 1978, Section 309(c), Pub. L. 95-242, 92 Stat. 141, to be codified at 42 U.S.C. § 2139a.

<sup>5</sup> Export Administration Act of 1979, Section 6(j), Pub. L. 96-72, 93 Stat. 515, to be codified at 50 U.S.C. app. § 2405(j).

In some cases, more than one reason for control is given for one entry. If an entry is controlled for more than one reason, but not to an identical list of countries, the lesser degree of control is explained in a footnote. Also, all entries (except those showing "none" in the "Validated License Required" column) are controlled for foreign policy reasons to Country Groups S and Z due to certain embargo programs, and all entries having both a "V" in the "Validated License Required" column and a "1" in the "Reason for Control" column are controlled for foreign policy reasons to Syria, Iraq, Libya, and the People's Democratic Republic of Yemen. In some cases, sub-entries of a CCL entry are controlled for different reasons. In these cases, a dash (—) will be shown in the first line of the entry, and the code number is shown in the "Reason for Control" column exactly opposite each sub-entry (a), (b), etc. (For example, see CCL entry No. 1110.)

(h) *The Abbreviation "n.e.s."* The abbreviation "n.e.s." appearing in various CCL entries means "not elsewhere specified." If a commodity intended for export appears to be covered by a CCL entry and the

<sup>1</sup> In accordance with section 5(c)(1) and 6(k) of the Export Administration Act of 1979.

commodity description carries the limitation "n.e.s.," that CCL entry should not be used until a check has been made to determine whether another CCL entry specifically covers the commodity.

(i) *Commodity Description on Applications or Reexport Requests.* Phrases such as "specify by name," "specify by name and model number," "give full specifications," etc., are included in various CCL entries. This information is required by the OEA on export license applications or reexport requests in order to evaluate the proposed export. Failure to provide the requested information may delay processing or result in the application or reexport request being returned without action.

(j) *Commodity Groups.* Export control commodity classifications are divided into major groups of related commodities. Below are the titles appearing on the Commodity Control List and initial page number of each group.

(k) *Control Over End Products.* Certain commodities that are under export control to all destinations for national security reasons may be used as components in end products that, because of their peaceful use, are under control only to embargo destinations. Where a controlled component is the principal element in such an end product, however, and can feasibly be removed or used for other purposes, the object of the control program is defeated unless the end product is subject to the same control as the component. This explains why, in some instances, commodities that do not appear to qualify for control for national security reasons are under validated license control to all destinations.

*Note.*—The foregoing portion of this § 399.1 is explanatory only and does not modify or supersede other Parts of the *Export Administration Regulations*.

**GROUP 3—GENERAL INDUSTRIAL EQUIPMENT<sup>4,5</sup>**

1805A Metal rolling mills, as follows:

- (a) Mills specially designed or re-designed for the rolling of metals and alloys with a melting point exceeding 1,900°C; and
- (b) Specialized controls, parts, and accessories for the above mills.

1312A Presses and specialized controls, accessories, and parts therefor, as follows:

- (a) Presses specially designed or re-designed for the working or forming of metals, alloys, or other materials with a melting point exceeding 3,462°F (1,900°C);
- (b) Hydraulic presses, as follows:
  - (1) Vertical presses having a total rated force of over 10,000 tons; or
  - (2) Horizontal presses having a total rated force of over 5,000 tons;
- (c) Isostatic presses, as follows (isostatic presses are those capable of pressurizing a closed

<sup>1</sup> The countries to which commodities in this entry are controlled for nuclear reasons are those not listed in Supp. No. 2 or Supp. No. 3 to Part 274.

<sup>2</sup> Report systems and tubes in "number."

<sup>3</sup> A validated license also is required for export to the Republic of South Africa and Namibia if intended for delivery to or for use by or for military or police entities in these destinations or for use in servicing equipment owned, controlled, or used by or for these entities. See Part 274.

<sup>4</sup> A validated license is also required for export or reexport to the U.S.S.R. if the exporter knows or has reason to know the commodity is for any use directly in preparation for, in support of, or in connection with the 1980 Summer Olympic Games scheduled to be held in Moscow on July 19, 1980. These commodities are subject to controls under the authority of the foreign policy provisions contained in section 6 of the Export Administration Act of 1979. This commodity control list entry as well as the other entries in this Group are subject to controls on the basis of the above criteria.

<sup>5</sup> For mechanical measuring instruments, see entry No. 1832.

**GROUP 4—TRANSPORTATION EQUIPMENT<sup>1</sup>**

2404A Rockets and missiles, guided or unguided, as follows: PQSTVWYZ || 500 || MC || 1

- (a) Meteorological sounding rockets;
- (b) Non-irritant smoke flares, canisters, grenades, and charges;
- (c) Other pyrotechnic articles having dual military and commercial use;
- (d) Rocket launching ramps, towers, and associated equipment for meteorological rockets; and
- (e) Specially designed parts for the above.

2406A Vehicles specially designed for military purposes, as follows: PQSTVWYZ || 0 || MC || 1, 3, 5

- (a) Specially designed military vehicles, excluding vehicles listed in Supplement No. 2 to Part. 370;
- (b) Pneumatic tire casings (excluding tractor and farm implement types), of a kind specially constructed to be bullet proof or to run when deflated;
- (c) Engines for the propulsion of the vehicles enumerated above, specially designed or essentially modified for military use; and
- (d) Specially designed components and parts therefor.

(See § 399.2, Interpretation 19, for aid in determining whether your commodity is covered by this entry.)

5406D\* Diesel engines, nonmagnetic, 50 brake horsepower and over, having a nonmagnetic content exceeding 50 percent, up to but not exceeding 75 percent of total weight; and parts and accessories, n.e.s. (Specify brake hp at rated rpm.) PQSWYZ\* || —\* || MC || 1

2409A Naval equipment as follows: PQSTVWYZ || 1,000 || MC || 1

- (a) Diesel engines of 1,500 hp and over with rotary speed of 700 rpm or over specially designed for submarines; and
- (b) Electric motors specially designed for submarines, i.e., over 1,000 hp, quick reversing type, liquid cooled, and totally enclosed;
- (c) Nonmagnetic diesel engines, 50 hp and over, specially designed for military purposes (An engine shall be presumed to be specially designed for military purposes if it has nonmagnetic parts other than crankcase, block, head, pistons, covers, and plates, valve facings, gaskets, and fuel, lubrication and other supply lines, or its nonmagnetic content exceeds 75 percent of total weight.);
- (d) Other magnetic, pressure, and acoustic underwater detection devices specially designed for military purposes; and controls and components thereof;
- (e) Marine boilers designed to have any of the following characteristics:
  - (1) Heat release rate (at maximum rating) equal to or in excess of 190,000 BTU's per hour per cubic foot of furnace volume; or
  - (2) Ratio of steam generated in pounds per hour (at maximum rating) to the dry weight of the boiler in pounds equal to or in excess of 0.83; and
- (f) Components, parts, accessories, and attachments for the above.

<sup>1</sup> See § 399.10 for commodities which require export authorization from other U.S. Government Departments and Agencies.  
 \* Report vehicle and engine in number.  
 \* A validated license also is required for export to the Republic of South Africa and Namibia, if intended for delivery to or for use by or for the benefit of any person or entity in these countries or for use in prohibited equipment owned, controlled, or used by or for these entities. See § 399.13(c)(1) and § 399.14(a).

4.63B Nuclear reactor and nuclear power plant related equipment as follows: PQSTVWYZ || 0 || MC || 4

- (a) Reactor and power plant simulators, models or mock-ups;
- (b) Process control systems intended for use with nuclear reactors;
- (c) Generators, turbine-generator sets, steam turbines, heat exchangers, and heat exchanger type condensers designed or intended for use in a nuclear reactor; and
- (d) Commodities, parts and accessories specially designed or prepared for use with nuclear plants (e.g., scrubbers, airlocks, reactor inspection equipment) except items licensed by the NRC pursuant to 10 CFR 110.

1370A Turning machines for generating optical quality surfaces using a single point cutting tool, and components and accessories therefor, as follows: PQSTVWYZ || 500 || MC || 1, 4

- (a) Turning machines having all of the following characteristics:
  - (1) Slide positioning accuracy less (finer) than 0.0005 mm per 300 mm of travel, TIR (peak-to-peak);
  - (2) Slide positioning repeatability less (finer) than 0.00025 mm per 300 mm of travel, TIR (peak-to-peak);
  - (3) Spindle runout (radial and axial) less than 0.0004 mm TIR (peak-to-peak);
  - (4) Angular deviation of the slide movement (yaw, pitch and roll) less (finer) than 2 seconds of arc (peak-to-peak) over full travel;
  - (5) Slide perpendicularity less than 0.001 mm per 300 mm of travel, TIR (peak-to-peak);
 (Turning machines will be evaluated under the conditions yielding the most accurate values, including but not limited to the incorporation of control systems which permit mechanical, electronic and software compensation.)

(b) Components, as follows:

- (1) Spindle assemblies, consisting of spindles and bearings as a minimal assembly, except those assemblies with axial and radial axis motion measured along the spindle axis in one revolution of the spindle equal to or greater (coarser) than 0.0008 mm TIR (peak-to-peak);
- (2) Linear induction motors used as drives for slides, having all of the following characteristics:
  - (i) Stroke greater than 200 mm;
  - (ii) Nominal force rating greater than 45 N; and
  - (iii) Minimum controlled incremental movement less than 0.001 mm; or
- (c) Accessories, i.e., single point diamond cutting tool inserts having all of the following characteristics:
  - (1) Flawless and chip-free cutting edge when magnified 400 times in any direction;
  - (2) Cutting radius between 0.1 and 5 mm; and
  - (3) Cutting radius out-of-roundness less than 0.002 mm TIR (peak-to-peak); and
- (d) Specially designed parts and components therefor.

1371A Anti-friction bearings, as follows: PQSTVWYZ || 500 || MC || 1

- (a) Ball and roller bearings having an inner bore diameter of 10 mm or less and tolerances of ABEC 5, RBEC 5 (or national equivalents) or better and either of the following characteristics:
  - (1) Made of special materials, i.e., with rings, balls or rollers made from any steel alloy or other material including, but not limited to high-speed tool steels, Monel metal, beryllium, metaloids, ceramic, and

\* A validated license is not required for export of these commodities to Australia, Belgium, Denmark, France, the Federal Republic of Germany (including West Berlin), Greece, Iceland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Turkey and the United Kingdom.  
 † A validated license is required for export to the Republic of South Africa and Namibia if intended for delivery to or for use by or for military or police entities in these destinations or for use in servicing equipment owned, controlled, or used by or for these entities. See § 371.2(c) (1) and § 371.2(d) (1).  
 ‡ A validated license is also required for export or reexport to the U.S.S.R. if the exporter knows or has reason to know the commodity is for any use directly in preparation for, in conduct of, in support of, or in violation of the Olympic Games, as defined in section 8 of the Export Administration Act of 1979. These commodities are subject to controls under the authority of the foreign policy provisions contained in section 8 of the Export Administration Act of 1979. This commodity control list entry as well as the other entries in this Group are subject to controls on the basis of the above criteria.  
 § See § 370.10 for commodities which require export authorization from other U.S. Government Departments and Agencies.  
 ¶ The GLV & value limit for Country Group Q is \$500.  
 \*\* See § 370.10 for commodities which require export authorization from the U.S. Department of State, Office of Munitions Control. See Supplement No. 2 to Part 371.0 for commodities which require export authorization from other U.S. Government Departments or Agencies.

9999M Technical models for demonstration.	-----				

|| The validated export license control applicable to each model is the same as the control which is applicable to the full size commodity represented by the model as exercised by Commerce (OEA and/or Maritime Administration), State (OMC), or Nuclear Regulatory Commission.

<sup>1</sup> A validated license also is required for export to the Republic of South Africa and Namibia if intended for delivery to or for use by or for military or police entities in these destinations or for use in servicing equipment owned, controlled, or used by or for these entities. See 18 CFR 120.10.

<sup>2</sup> A validated license is also required for export or receipt to the U.S.S.R. if the exporter knows or has reason to know the commodity, except medicines and medical supplies, is for any use directly in preparation for, in conduct of, in support of, or visually identified with the activities of the Communist Party of the United States of America, or any of its branches, or any of its affiliates, or any of its agents, or any of its other entries in this Group are subject to controls on the basis of the above criteria. The following countries are subject to the above controls: Albania, Bulgaria, Cambodia, Cuba, Czechoslovakia, Democratic People's Republic of Korea, Democratic Republic of Vietnam, East Germany (including West Berlin), Greece, Iceland, Italy, Japan, Luxembourg, the Netherlands, New Zealand, Norway, Portugal, Turkey and the United Kingdom.

One must be licensed for protection against tear gas and other chemical agents are controlled by the Office of Munitions Control. See 18 CFR 120.10.

Export Administration Regulations

BILLING CODE 3510-25-C

4. Section 399.2 and Supp. 1 to § 399.2 are revised to read as follows:

#### § 399.2 Commodity Interpretations

The commodity interpretations set forth in Supplement No. 1 to this § 399.2 are for use in determining (1) the appropriate Export Control Commodity Numbers under which certain commodities are classified, or (2) the validated license requirements for these commodities. They are intended to clarify the question of control where it has been demonstrated that such clarification may prove helpful to the export community, and where such control is not readily apparent from the Commodity Control List and the Export Administration Regulations.

#### Supplement No. 1 to § 399.2—Interpretations

##### Interpretation 1: Electronic Computers and Related Equipment (ECCN 1565)

The following equipment is subject to nuclear non-proliferation controls and requires a validated license for Country Groups P, Q, S, T, V, W, Y, and Z, and in the case of (a) (1) through (4) below to Canada:

(a) Electronic computers intended for ultimate consignees engaged directly or indirectly in any of the following activities:

(1) Designing, developing or fabricating nuclear weapons or nuclear explosive devices; or devising, carrying out, or evaluating nuclear weapons tests or nuclear explosions;

(2) Designing, assisting in the design of, constructing, fabricating or operating facilities for the chemical processing of irradiated special nuclear material, for the production of heavy water, for the separation of isotopes of any source or special nuclear material, or specially designed for the fabrication of nuclear reactor fuel containing plutonium;

(3) Designing, assisting in the design of, constructing, fabricating or furnishing equipment or components specially designed, modified or adapted for use in such facilities; or

(4) Training in any of the above activities; and

(b) Advanced electronic digital computers with a bus rate of 60 million bits per second or more, or a processing data rate of 20 million bits per second or more (including digital differential analyzers), except

(1) Electronic computers that do not exceed either a CPU bus rate of 500 million bits per second or a processing data rate of 225 million bits per second are not subject to nuclear non-proliferation controls for destinations listed in Supplement No. 2 to Part 373 of the Export Administration Regulations unless the activities cited in (a) above are involved; or

(2) Electronic computers that do not exceed either a CPU bus rate of 200 million bits per second or a processing data rate of 60 million bits per second are not subject to nuclear non-proliferation controls for destinations listed in Supplement Nos. 2 and 3 to Part 373 of the Export Administration Regulations

unless the activities cited in (a) above are involved.

##### Interpretation 2: Ball and Roller Bearings and Specially Designed Parts

(a) A ball or roller bearing physically incorporated in a segment of a machine or in a complete machine prior to shipment loses its identity as a bearing and the machine or segment of machinery containing the bearing is the item subject to export license requirements.

(b) A ball or roller bearing not incorporated in a segment of a machine prior to shipment but shipped as a component of a complete unassembled (knocked-down) machine is considered a component of the machine, and the complete machine is the item subject to export license requirements.

(c) Ball or roller bearings shipped as spares or replacements are classified under ECCN 1371 and 6699 (ball, roller, or needle-roller bearings and parts). This applies to separate shipments of ball or roller bearings and ball or roller bearings shipped with machinery or equipment for which they are intended to be used as spares or replacement parts.

##### Interpretation 3: Gear Making and Finishing Machinery

Certain Types of gear-making and gear-finishing machines, Export Control Commodity No. 1088, require a validated license for shipments to all destinations except Canada if they are capable of producing gears finer than 48 diametral pitch. In order to clarify the meaning of the term "diametral pitch finer than 48," examples are given of how diametral pitch is computed. In addition, there is also given below an explanation of how to distinguish between "gear-tooth grinding machines, generating types" and "nongenerating types of grinding machines."

(a) *Diametral pitch* of a gear is the ratio of the number of teeth to the number of inches in the pitch diameter. It indicates the number of teeth in the gear for each inch of pitch diameter. ("Pitch diameter" is the diameter of the pitch circle which is the circle through the pitch point having its center at the axis of the gear.) *Module* (British or metric) is the ratio of the pitch diameter in millimeters to the number of teeth. The larger the proportion of teeth to pitch diameter, the finer the diametral pitch. Example of diametral pitch: If a gear has a 1-inch pitch diameter and has 48 teeth, the ratio would be 48:1, or a 48 diametral pitch gear. Additional teeth in the same pitch diameter gear, i.e., 49, would result in a finer diametral pitch; fewer teeth, i.e., 47, would result in a gear of coarser diametral pitch. Examination of a gear making or finishing machine may not disclose whether it is capable of producing a gear of finer than 48 diametral pitch. If the exporter has no information on the ability of the machine to be exported for making gears of finer than 48 diametral pitch, he should obtain the information from the manufacturer or distributor.

(b) *Generating type gear-tooth grinding machines* are those in which the grinding wheel and the gear are both power-driven for continuous circular motion while grinding, rather than an intermittent or indexing operation as with the non-generating type.

##### Interpretation 4: Classification of "Parts" of Machinery, Equipment, or Other Items

(a) Where an assembled machine or unit of equipment is being exported. Where one or more assembled machines or units of equipment are being exported, the individual component parts which are physically incorporated into the machine or equipment do not require a separate validated export license. The validated license or the general license under which the complete machine or unit of equipment is exported will also cover its component parts, provided that the parts are normal and usual components of the machine or equipment being exported; or that the physical incorporation is not used as a device to evade the requirement for a validated export license.

(b) Where parts are exported as spares, replacements, for resale, or for stock. Where parts are exported as spares, replacements, for resale or for stock, a validated export license is required only if the appropriate entry for the part specifies that a validated license is required for the intended destination.

##### Interpretation 5: Wire or Cable Cut to Length

(a) Wire or cable may be included as a component of a system or piece of equipment, whether or not the wire or cable is cut to length and whether or not it is fitted with connectors at one or both ends so long as it is in normal quantity necessary to make the original installation of the equipment and is necessary to its operation.

(b) Wire or cable shipped as replacement or spares, or for further manufacture overseas, shall be reported under the applicable wire or cable classification only. This includes wire or cable, whether or not cut to length or fitted with connectors at one or both ends.

##### Interpretation 6

[Reserved]

##### Interpretation 7: Numerical Control Systems

(a) Numerical control systems for machine tools are systems in which actions are controlled by the direct insertion of numerical data at some point. The system must automatically interpret at least some portion of this data. Units defined in 1091 include:

(1) Units consisting of fixed and dedicated circuits of discrete logic elements and storage devices (referred to as hardwired units);

(2) Units consisting of and including stored instructions (routines and/or programs), defined as logic states of alterable and nondedicated logic elements which determine various control functions of the machine(s), such as slide movements, cutter compensation, readout, adaptive control, part program editing and tool offsets (softwired or stored program units);

(3) Hardwired unit—a numerical control system wherein fixed and dedicated circuit interconnections of discrete, decision elements are used for primary system control. These circuits may include, but not necessarily, freely programmable memory devices which would be limited to use for data files, part program storage, or output control of machine tool interfacing;

(4) Softwired Unit (Computer Numerical Control (CNC))—a numerical control system

which includes: (a) Computer—a dedicated stored program computer to perform some or all of the basic numerical control functions which include, but may not be limited to, velocity and path generation. A stored program computer is further defined as a computer processor controlled by stored instructions that can synthesize, store, and in some cases, alter instructions as though they were data and subsequently execute these instructions. (b) Software—a control program (routines and/or programs) stored in the read/write memory of the computer which implements the basic numerical control functions. (c) Interface—the means by which the data is transmitted between the stored program computer and the machine;

(5) Direct Numerical Control (DNC)—a system connecting a set of numerically controlled machines to a common memory within a computer for part program or machine program storage with provision for on-demand distribution of data to the machines. Direct Numerical Control systems typically have additional provisions for collection, display, or editing of part programs, operator instructions, or data related to the numerical control process;

(6) Software—control programs, used with CNC and DNC systems, which are stored in a read/write memory of a computer and implement numerical functions, including but not limited to, velocity and path generation, on-line adaptive control and special purpose data distribution, recall, and editing programs for DNC applications. Software used in part programming, e.g., APT, EXAPT, IFAPT, post processors, and similar programs are not considered among these control programs used for CNC and DNC systems.

Where the system is shipped complete (machine and controls) it shall be reported as a complete machine under the appropriate Export Control Commodity Number for the machine. Where a control system for a machine tool is not shipped as part of the original installation of the machine it shall be reported under Export Control Commodity No. 1091.

**Note.**—When preparing an *export license application* for a numerical control system, the machine and the control unit are classified separately. If either the machine or the control unit requires a validated license, then the entire system requires a license. If either a machine or a control unit is exported separately from the system, it is classified on the export license application without regard to the other parts of a possible system.

When preparing the *Shipper's Export Declaration* (SED), however, a system being shipped complete (i.e., machine and control unit), should be reported under the Schedule B number for the machine. When either a control unit or a machine is shipped separately, it should be reported under the Schedule B number appropriate for the individual item being exported.

(b) Units for numerically controlling machine tools and dimension inspection machines having all of the following characteristics:

- (1) Hardwired (not softwired, i.e., Computerized Numerical Control (CNC)).
- (2) No more than 2 contouring interpolating axes can be simultaneously coordinated,

(3) Minimum programmable increment equal to or greater (coarser) than 0.001 mm, and

(4) Without interface to enable direct computer input.

(c) Boring mills, milling machines, and machining centers, having all of the following characteristics:

(1) Maximum slide travel in any axis equal to or less than 3,000 mm.

(2) Positioning accuracy of any axis equal to or greater than plus or minus 0.01 mm per 300 mm and 0.005 mm for each additional 300 mm.

(3) Spindle power equal to or less than 20 kw.

(4) Single working spindle.

(5) Axial and radial axis motion measured at the spindle axis in one revolution of the spindle equal to or greater than  $D \times 2 \times 10^{-5}$  mm TIR (peak-to-peak) where D is the spindle diameter in millimeters, and

(6) Not more than 3 axes capable of simultaneously coordinated contouring motion regardless of the NC unit connected to the machine.

(d) Machine tools, other than the machines described in (c) above, and dimensional inspection machines, which according to the manufacturer's technical specifications can be equipped with controls covered by paragraph (b) above, having all of the following characteristics:

(1) Positioning accuracy of any axis equal to or greater than plus or minus 0.01 mm per 300 mm and 0.005 mm for each additional 300 mm.

(2) Radial axis motion measured at the spindle axis equal to or greater than 0.008 mm TIR (peak-to-peak) in one revolution of the spindle (for lathes and other turning machines), and

(3) Not more than 3 axes capable of simultaneously coordinated contouring motion regardless of the NC unit connected to the machine.

#### Interpretation 8

[Reserved]

#### Interpretation 9

[Reserved]

#### Interpretation 10: Parts, Accessories, and Equipment Exported as Scrap

Parts, accessories, or equipment which are being shipped as scrap should be described on the Shipper's Export Declaration in sufficient detail to be identified under the proper Commodity Control List Number. When commodities declared as parts, accessories, or equipment are shipped in bulk, or are otherwise not packaged, packed, or sorted in accordance with normal trade practices, the Customs Officer may require evidence that the shipment is not scrap. Such evidence may include, but is not limited to, bills of sale, orders and correspondence indicating whether the commodities are scrap or are being exported for use as parts, accessories, or equipment. Exporters should consult the Exporters' Service Staff, Office of Export Administration, Room 1623, U.S. Department of Commerce, Washington, D.C. 20230, when in doubt regarding the proper Commodity Control List Number of

commodities, as parts, accessories, equipment or as scrap.

#### Interpretation 11

[Reserved]

#### Interpretation 12: Scrap Arms, Ammunition, and Implements of War

Arms, ammunition, and implements of war, as defined in the U.S. Munitions List (see Supplement No. 2 to Part 370), are under the jurisdiction of the U.S. Department of State, with the following exceptions:

(a) Cartridge and shell cases which have been rendered useless beyond the possibility of restoration to their original identity by means of excessive heating, flame treatment, mangling, crushing, cutting, or by any other method are "scrap" and under the jurisdiction of the U.S. Department of Commerce.

(b) Cartridge and shell cases which have been sold by the armed services as "scrap" are under the jurisdiction of the U.S. Department of Commerce, whether or not they have been heated, flame-treated, mangled, crushed, cut, or reduced to scrap by any other method.

(c) Other commodities on the Munitions List are "scrap" and under the jurisdiction of the U.S. Department of Commerce if they have been rendered useless beyond the possibility of restoration to their original identity only by means of mangling, crushing, or cutting. When in doubt as to whether a commodity covered by the Munitions List has been rendered useless, exporters should consult the Office of Munitions Control, U.S. Department of State, Washington, D.C. 20520, or the Exporter's Service Staff, Office of Export Administration, Room 1623, U.S. Department of Commerce, Washington, D.C. 20230, before reporting a shipment as metal scrap.

#### Interpretation 13-18

[Reserved]

#### Interpretation 19: Military Automotive Vehicles

(a) *Military automotive vehicles.* (1) For purposes of U.S. export controls, military automotive vehicles "possessing or built to current military specifications differing materially from normal commercial specifications" may include, but are not limited to, the following characteristics:

- (i) Special fittings for mounting ordnance or military equipment,
- (ii) Bullet-proof glass,
- (iii) Armor plate,
- (iv) Fungus preventive treatment,
- (v) Twenty-four volt electrical systems,
- (vi) Shielded electrical system (electronic emission suppression), or
- (vii) Puncture-proof or run-flat tires.

(2) These automotive vehicles fall into two categories:

(i) *Military automotive vehicles on the Munitions List, new and used.* Automotive vehicles in this category are primarily combat (fighting) vehicles, with or without armor and/or armament, "designed for specific fighting function." These automotive vehicles are licensed by the U.S. Department of State. See list with descriptions, Supplement No. 2 to Part 370, Category VII.

(ii) *Military automotive vehicles not on the U.S. Munitions List, new and used.*

Automotive vehicles in this category are primarily transport vehicles designed for non-combat military purposes (transporting cargo, personnel and/or equipment, and/or for towing other vehicles and equipment over land and roads in close support of fighting vehicles and troops). These automotive vehicles are licensed by the U.S. Department of Commerce.

(b) *Parts for military automotive vehicles.* Functional parts are defined as those parts making up the power train of the vehicles, including the electrical system, the cooling system, the fuel system, and the control system (brake and steering mechanism), the front and rear axle assemblies including the wheels, the chassis frame, springs and shock absorbers.

Parts specifically designed for military automotive vehicles on the Munitions List are licensed for export by the U.S. Department of State.

(c) *General instructions.* Manufacturers of non-Munitions List automotive vehicles and/or parts will know whether their products meet the conditions described above. Merchant exporters and other parties who are not sure whether their products (automotive vehicles and/or parts) meet these conditions should check with their suppliers for the required information before making a shipment under general license or submitting an application to the Office of Export Administration for an export license.

*Interpretation 20: Aircraft, Parts, Accessories and Components*

(a) *Aircraft, and parts, accessories and components therefor.*<sup>1</sup>

Aircraft, parts, accessories, and components defined in Categories VIII and IX of the Munitions List (see supplement No. 2 to Part 370) are under the export licensing authority of the U.S. Department of State. All other aircraft, and parts, accessories and components therefor, are under the export licensing authority of the U.S. Department of Commerce.

The following aircraft, parts, accessories and components are under the licensing authority of the U.S. Department of Commerce:

(1) Any aircraft (except an aircraft that has been demilitarized, but including aircraft specified in paragraph (2) below) that conforms to a Federal Aviation Agency type certificate in the normal, utility, acrobatic, transport, or restricted category, provided such aircraft has not been equipped with or modified to include military equipment, such as gun mounts, turrets, rocket launchers, or similar equipment designed for military combat or military training purposes.

(2) Military aircraft, demilitarized (aircraft not specifically equipped, reequipped, or modified for military operations), *the following only:*

(i) Cargo, bearing designations "C-45 through C-118 inclusive," and "C-121";

(ii) Trainers, bearing a "T" designation and using piston engines;

(iii) Utility, bearing a "U" designation and using piston engines;

(iv) Liaison, bearing an "L" designation; and

(v) Observation, bearing an "O" designation and using piston engines.

(3) All reciprocating engines.

(4) Other aircraft engines not specifically designed or modified for military aircraft.

(5) Parts, accessories, and components (including propellers), designed exclusively for aircraft and engines described in (1), (2), (3), and (4) above.

(6) General purpose parts, accessories, and components usable interchangeably on either military or civil aircraft.

(b) *Normal civil use.* Aircraft listed on the Commodity Control List under No. 1460 are those that are in normal civil use and contain one or more of the following:

(1) Any item on the Munitions List (see Supplement No. 2 to Part 370),

(2) Inertial navigation or other inertial equipment,

(3) Integrated flight instrument systems that have been in normal civil use for less than two years,

(4) Airborne communications equipment having any of the following characteristics:

(i) Designed to operate at frequencies greater than 156 MHz,

(ii) Incorporating facilities for (a) the rapid selection of more than 200 channels per equipment, *except equipment operating in frequency range 108-136 MHz with 720 or fewer channels at not less than 25 kHz spacing and which has been in normal civil use for at least one year,* or (b) using frequency synthesis techniques with a speed of switching from one selected output frequency to another selected output frequency less than 10 milliseconds,

(iii) Pressurized throughout,

(iv) Rated for continuous operation over a range of ambient temperatures extending from below minus 55° C to above plus 55° C, and/or

(v) Designed for modulating methods employing any form of digital modulation using time and frequency redundancy such as "Quantized Frequency Modulation" (QFM).

(5) Airborne navigation and direction finding equipment having any of the following characteristics:

(i) Pressurized throughout,

(ii) Rated for continuous operation over a range of ambient temperatures extending from below minus 55° C to above plus 55° C,

(iii) Frequency modulated radio altimeters which have been in normal civil use for less than one year,

(iv) Pulse modulated radio altimeters.

(v) Is not in conformity with ICAO standards or provides a function exceeding those resulting from such standards,

(vi) Is designed to make use of hyperbolic grids at frequencies greater than 3 MHz, and/or

(vii) Direction finding equipment operating at frequencies greater than 5 MHz, other than equipment designed for search and rescue.

(6) Airborne radar having any of the following:

(i) In normal commercial service for less than one year, and/or

(ii) Specially designed for use other than as a commercial weather radar,

(iii) Incorporating any digital signal processing technique used for automatic target tracking, or having a facility for electronic tracking.

*Interpretations 21-23*

[Reserved]

*Interpretation 24: Chemicals*

The commodities listed below require a validated license for export to Country Groups S and Z.

**Organic chemicals**

Acenaphthene  
Acenaphthenequinone  
Acetal  
Acetaldehyde  
Acetamide  
3-Acetamido-4 hydroxybenzene-arsonic acid  
2-Acetamidoethyl (p-chlorophenyl) (m-trifluoro methyl phenoxy) acetate  
Acetanilide  
Acetic acid  
Acetic anhydride  
Acetin  
Acetoacetic acid  
Acetobromopropyl lactate  
Acetone  
Acetone cyanohydrin  
Acetonitrile  
Acetylacetone  
Acetophenetidin  
Acetophenone  
Acetoxime  
Acetylacetone  
para-Acetylamino-phenol  
para-Acetylamino-phenyl salicylate  
Acetyl chloride  
Acetylene tetrabromide  
N-Acetyleneuraminic acid  
Acetylhistamine  
N-Acetyl-L-tyrosine  
N-Acetyl-L-tyrosine ethyl ester  
Acetylpyridine  
Acetylsalicylic acid  
Acetyl triallyl citrate  
Acetyl tributyl citrate  
Acetyl triethyl citrate  
Acetyl tri-2-ethyl hexyl citrate  
Aconitic acid  
Acrolein  
Acrylamide

Alanine  
beta-Alanine  
Aldol  
Alginic acid

<sup>1</sup> This interpretation does not refer to electronic communication and navigational commodities usable on aircraft.

Alkyl aryl phosphate diphenyl, 2-ethyl hexyl phosphate	Amprolium	Benzhydrol
Alkyl dicyclophosphate	Amyl acetate	Benzhydroxylamine HCl
Allantoin	Amyl alcohol	Benzidine
Allene	n-Amyl alcohol, primary	Benzidine sulfate
Alloxane	tert-Amyl alcohol	Benzil
Allylamine	Amylase	Benzoguanamine
Allyl bromide	n-Amyl bromide	Benzoic acid
Allyl chloride	tert-Amyl bromide	Benzonitrile
Allyl iodide	tert-Amyl chloride	3,3',4,4'-Benzophenone tetracarboxylic dianhydride
Allyl isocyanate	alpha-Amyl cinnamic aldehyde	Benzotriazole
Allyl isothiocyanate	Amyl mercaptan	Benzotrithloride
N-Allyl-morpholine	tert-Amyl mercaptan	Benzotrifluoride
Aluminum acetate	Amyl nitrate	N-alpha-Benzoyl-L-arginine ether ester hydrochloride
Aluminum dihydroxyaminoacetate	Amyl nitrite	Benzoyl chloride
Aluminum ethylhexoate	Amyl salicylate	Benzoyl peroxide
Aluminum formate solutions	Amylopectin	2-Benzoyl pyridine
Aluminum isopropylate	Amylose	4-Benzoyl pyridine
Aluminum lactate	ortho-sec-Amylphenol	Benzthiazide
Aluminum octoate	para-tert-Amylphenol	Benztropin mesylate
Aluminum oxyquinolate	Amyl salicylate	Benzyl acetate
Aluminum stearate solution	n-Amyl sebacate	Benzyl alcohol
Ambrettolide	Amyl ziram	Benzyl amine
Ambutonium bromide	Anethole	N-Benzyl-para-amino phenol
N-Amidino 3,5-diamino-6-chlorophyazine carboxamide and its salts	Aniline hydrochloride	Benzyl benzoate
Amino-acetophenone	Aniline oil	Benzyl bromide
Aminoanthraquinone	Aniline salt	Benzyl chloride
p-Aminobenzamidinium HCl	Aniline sulfate	Benzyl cinnamate
Aminobenzoic acid	Anisic acid	Benzyl cyanide
para-Aminobenzoic acid	Anisic aldehyde	Benzyl formate
2-Amino-1-butanol	ortho-Anisidine	Benzylidene acetate
Aminobutyric acid	para-Anisidine	Benzyl salicylate
Aminodiazine	Anthracene	Benzyl succinate
para-Aminodiethylaniline	Anthranilic acid	Benzyltriphenylphosphonium chloride
para-Aminodiethylylaniline hydrochloride	Anthraquinone	Betaine
para-Aminodimethylaniline	Anthrone	Betaine hydrochloride
para-Aminodiphenylamine	Antimony lactate	Bilirubin
2-Aminoethanethiol	Antimony potassium tartrate	2-(4-Biphenyl)-6 phenyl benzoxazole
PTH (PTC-S-Aminoethyl) cysteine	Antimony triacetate	N,N-Bis-(3-aminopropyl) methylamine
3-(2-Aminoethyl) indole hydrochloride	Antipyrine	2,5-Bis-2-(5-tert-butylbenzoxazolyl)-thiophene
N-Aminoethylpiperazine	Apiol	Bis-(2-dimethylaminoethyl) ether
Aminoethylpyrimidine	Apoferitin	Bis (2-ethylhexyl) peroxydicarbonate
L-Amino-beta-guanidinopropionic acid	Apolysin	N,N-Bis-(2-hydroxyethyl) alkylamine
4-Amino-5-imidazole carboxamide	Arabinose	N,N-Bis-(2-hydroxyethyl) glycine sodium salt
5-Amino-4-imidazole carboxamide	Arachidic acid	N,N-Bis (2-hydroxypropyl) aniline
Aminoisobutyric acid	Arachidonic acid	1,4-Bis [2-(4-methyl-5-phenyloxazolyl)] benzene (methyl POPOP)
2-Amino-2-methyl-1-propanol	Arginine	Bismuth citrate
Aminomethylpyrimidine	Arginine hydrochloride	Bismuth subgallate
Aminonaphthol sulfonic and disulfonic acids	Arrhenal	Bismuth tannate
O-Aminonitrobenzene	Asparagine	Bisphenol A
2-Amino-5-nitrothiazole	Asparagine hydrate	1,4-Bis-2-(5-phenyloxazolyl) benzene
Aminopentamide	Aspartic acid	N-N-Bis (trimethylsilyl) acetamide
meta-Aminophenol	Aubepine	Bis (trimethylsilyl) trifluoroacetamide
ortho-Aminophenol	Aurothioglucose	Bis-triphenylsilyl chromate
para-Aminophenol	5-Azacytidine	Bithionol
ortho-Aminophenol hydrochloride	8-Azaguanine	Borneol
para-Aminophenol hydrochloride	6-Azathymine	Bornyl acetate
2-Amino-1-phenol-4-sulfonic acid	6-Azaauracil	Bornyl formate
Aminophenylacetic acid	6-Azauridine	Bromelain-Pure
Aminophylline	Azelaic acid	N-Bromoacetamide
beta-Aminopropionitrile	d-Azetidine-2 carboxylic acid	Bromoacetic acid
2-Aminopyrimidine	Azetylcholine chloride	Bromobenzene
Aminopyrine	1-Aziridineethanol	sym-Bromochloroethane
4-Aminosalicyclic acid	Azobenzene	Bromochloromethane
5-Aminosalicyclic acid	Azocoll	1-Bromo-3-chloropropane
2-Aminothiazole	Azosulfamide	5-Bromodeoxyuridine
L-3-Aminotyrosine dihydrochloride	Banana oil	N-(2-Bromoethyl) phthalimide
Ammonium acetate	Barbital	Bromomethylethyl ketone
Ammonium benzoate	Barbital sodium	Bromoform
Ammonium bitartrate	Barbituric acid	Bromomonochlorodifluoromethane
Ammonium ferric oxalate	Barium styphnate	alpha-Bromonaphthalene
Ammonium gluconate	Behenic acid	Bromosuccinic acid
Ammonium mandelate	Benzaldehyde	N-Bromosuccinimide
Ammonium oxalate	Benzalkonium chloride	Bromostyrol
Ammonium thioglycollate	Benzanthrone	
	Benzene	
	Benzenesulfonic acid	

Bromotrifluoromethane	Calcium linoleate	para-Chloronitrobenzene
Butabarbital acid	Calcium mandelate	2-Chloro-6-nitrotoluene
Butabarbital sodium salt	Calcium phenosulfonate	4-Chloro-2-nitrotoluene
Butacaine sulfate	Calcium propionate	Chloropentafluoroethane
1,4-Butanediamine dihydrochloride	Calcium salicylate	meta-Chlorophenol
Butanediol succinate	Calcium stearate	ortho-Chlorophenol
2,3-Butanedione monoxime	Calcium succinate	para-Chlorophenol
1-Butoxyethoxy-2-propanol	Calcium tannate	p-Chlorophenylalanine
Butoxytriglycol	Calcium tartrate	Chlorophyll, dry
Butyl acetate	Calcium undecylenate	Chlorophyll, solution in oil
Butyl acetyl ricinoleate	Camphene	Chloroprene
n-Butyl acrylate	Camphor (natural or synthetic)	Chloroquine base
tert-Butyl acrylate	Camphor bromate	Chloroquine phosphate
N-Butyl alcohol	Camphoric acid	N-Chlorosuccinimide
n-Butylamine	Camphorsulfonic acid	6-Chloro-7-sulfamyl-1,2,4-benzothiazine-1,1-dioxide
tert-Butylamine	Camposulfuric acid	6-Chloro-7-sulfamyl-3,4-dihydro-1,2,4-benzothiazine-1,1-dioxide
(-)-1-(tert-Butylamino)-3-[(4-morpholino-1,2,5-thiadiazol-3-yl)oxy]-2-propanol maleate (1:1) and its salts	Capric acid	Chlorothen citrate anti-histamines
Butylate hydroxyanisole	Caproic acid	Chlorothymol
n-Butyl benzene	Caprolactam	alpha-Chlorotoluene
sec-Butyl benzene	epsilon-Caprolactone	meta-Chlorotoluene
tert-Butyl benzene	Caprylic acid	ortho-Chlorotoluene
Butyl benzyl phthalate	Canavanine sulfate	para-Chlorotoluene
n-Butyl Bromide	N-Carbamoylarsanilic acid	Chlorotrifluoromethane
sec-Butyl bromide	Carazole	Cholesterol
tertiary Butyl bromide	Carbinoxamie antihistamines	Cholic acid
p-tert-Butyl catechol	Carbodiimide (cyanamide)	Choline
n-Butyl chloride	Carbon tetrachloride	Choline bitartrate
sec-Butyl chloride	Carbonyl chloride (phosgene)	Choline chloride
tert-Butyl chloride	Carbonyl cyanide, m-chlorophenylhydrazone	Chondroitin sulfate
6-tert-Butyl-meta-cresol	Carbosine	Chromic acetate
Butyl-meta-cresol methyl ethers	Carboxylic acid anhydride	Chymar
n-Butyl diethyl malonate	Carisoprodol (n-isopropyl-2-methyl-2-propyl-1,3-propanediol discarbamate)	Chymotrypsin, pure
Butylene glycol	Carvacrol	Cinnamic acid
1,2-Butylene oxide	Carvone	Cinnamic alcohol
2,3-Butylene oxide	Cedryl acetate	Cinnamic aldehyde
Butyl ether	Cellulase	Citral
tert-Butyl hydroperoxide	Cerotic acid	Citrazinic acid
Butyl isocyanate	Cerous oxalate	Citric acid
n-Butyl lactate	Cetyl alcohol	Citronella
Butyl methacrylate	Cetylpyridinium chloride	Cobalt salts, n.e.s.
n-Butyl myristate	Chloral	Cobinamide cyanide phosphate 3'-ester with 5,6 dimethyl-1-a-D-ribofuranosylbenzimidazole inner salt
Butyl octyl phthalate	Chloral formamide	Cobinamide hydroxide phosphate 3'-ester with 5,6 dimethyl-1-a-D-ribofuranosylbenzimidazole inner salt
tert-Butyl perbenzoate	Chlorbetamide	Coccarboxylase
di-tert-Butyl peroxide	Chlorendic acid	Colace
di (sec-Butyl) peroxydicarbonate	Chlormrodrin	Colchicine
Butylphenol	meta-Chloroaniline	2,4,6-Collidine (2,4,6 trimethylpyridine)
o-sec-Butyl phenol	ortho-Chloroaniline	Compound N (Conmel) granulation
tert-Butyl phenol 2,2,4-trimethyl dihydroquinoline	para-Chloroaniline	Copper acetate
2-(4-t-Butylphenyl)-5-(4-biphenyl)-1,3,4-oxdiazole	Chloroacetic acid	Corticosterone
Butyl phthalyl butyl glycollate	Chlorobenzene	Coumarin
n-Butyl propionate	para-Chlorobenzhydrol	Coumarone
tert-Butylquinoline	meta-Chlorobenzoic acid	Creatine
Butyl stearate	ortho-Chlorobenzoic acid	Creatinine
Butyne diol	para-Chlorobenzoic acid	m-Cresol
Butyraldehyde	Chlorobenzotriazole	o-Cresol
Butyric acid	ortho-Chlorobenzotrifluoride	p-Cresol
Butyrolactone	para-Chlorobenzotrifluoride	Cresotic acid
Cadmium acetate	1-(p-Chlorobenzoyl)-5-methoxy-2-methylindole-3-acetic acid	Cresyl diphenyl phosphate
Cadmium octoate	Chlorobiphenyl	Cresylic acid
Cadmium salicylate	Chlorobutanol	Crotonic acid
Caffeine	3'Chloro-4'-(p-chlorophenoxy)-3,5-diiodosalicylanilide	Crontonaldehyde
Caffeine sodium benzoate	1-Chloro-2,4-dinitrobenzene	Cumene
Calcium acetate	Chlorogenic acid	Cumidine
Calcium benzoate	Chlorohydroquinone	Cyanacetamide
Calcium citrate	p-Chloromercuribenzoate	3-Cyanopyridine
Calcium cyanamide	2-Chloro-4-nitroaniline	4-Cyanopyridine
Calcium cyclamate	4-Chloro-2-nitroaniline	Cyanuric acid
Calcium formate	4-Chloro-3-nitroaniline	Cyanuric chloride
Calcium gluconate	meta-Chloronitrobenzene	Cyclizine antihistamines
Calcium glycerophosphate	ortho-Chloronitrobenzene	Cyclocyamine
Calcium lactate		
Calcium levulinate		

Cyclohexane	2,5-Debiphenyloxazole	Diethylene glycol dibutyl ether
Cyclohexanol	Dibromodifluoromethane	Diethylene glycol diethyl ether
Cyclohexanone	1,3-Dibromo-5,5-Dimethylhydantoin	Diethylene glycol dimethyl ether
Cyclohexene	Dibromoethylbenzene	Diethylene glycol ethyl ether
Cyclohexylamine	Dibromomonochlorotrifluoroethane	Diethylene glycol mono-butyl ether
1-Cyclohexyl-3-(2-morpholinoethyl)- carbodiimide metho-p-toluene sulfonate	alpha, beta-Dibromopropionic acid	Diethylene glycol mono-butyl ether acetate
para-Cyclohexylphenol	Dibutylamine	Diethylene glycol mono-ethyl ether acetate
N-Cyclohexyl para toluene sulfonamide	Dibutylamine Pyrophosphate	Diethylene glycol mono-methyl ether
Cyclopentamine hydrochloride	4,6-Di-tert-butyl-meta-cresol	Diethylene glycol mono-methyl ether acetate
Cyclopentane	2,6-Di-tert-butyl-para-cresol	Diethylene glycol succinate
Cyclopentanol	2,6-Di-tert-butyl-alpha-dimethyl-amino-para- cresol	Diethylene triamine
Cyclopentanone	Di-tert-butyl disulfide	Di (2-ethylhexyl) adipate
Cyclopentene	Dibutyl fumarate	Di (2-ethylhexyl) isophthalate
Cyclopentyl bromide	Dibutyl itaconate	Di (2-ethylhexyl) phosphoric acid
Cymene	Dibutyl maleate	Di (2-ethylhexyl) phthalate
Cystathionine	Dibutyl phosphate	Di (2-ethylhexyl) sebacate
Cysteic acid	Dibutyl phthalate	Diethyl ketone
Cysteine	Dibutyl sebacate	Diethyl malonate
Cystine	Dibutyl tetrachlorophthalate	3,3-Diethyl-5-methyl-2,4-piperidinedione
Cytidine	Dibutylthiourea	Diethyl phosphate
Cytidine-5-diphosphate trisodium	Dibutyl tin compounds	O,O-Diethyl phosphorochloridothioate
Cytidine-5-monophosphate	Dibutyryl adenosine	Diethyl phthalate
Cytidine-5-monophosphate hydrate	Dicapryl adipate	Diethylstilbestrol
Cytidine-3,2-phosphoric	Dicapryl phthalate	Difluoroethane
Cytidine-5-triphosphate	Dicapryl sebacate	Digitalin
Cytidine-5-triphosphate hexahydrate	3,4-Dichloroaniline	Dihydrocholic acid USP
Cytidylic acid	Dichlorobenzene	10,11-Dihydro-N,N-dimethyl-5H-dibenzo (a,d) cycloheptene-delta-5-gamma-propylamine and its salts
Cytidylyl 3'-5' adenosine	meta-Dichlorobenzene	Dihydrouracil
Cytidylyl 3'-5'-cytidine	ortho-Dichlorobenzene	1,2-Dihydroxyanthraquinone
Cytidylyl 3'-5'-guanosine	para-Dichlorobenzene	1,4-Dihydroxyanthraquinone
Cytidylyl 3'-5'-uridine	2,5-Dichlorobenzenesulfonic acid	1,5-Dihydroxyanthraquinone
Cytosine beta-d-arabinofuranoiside HCl	3,3'-Dichlorobenzidine	1,8-Dihydroxyanthraquinone
Cytosine hemihydrate	3,3'-Dichlorobenzidine dihydrochloride	Dihydroxy diphenyl sulfone
Decahydronaphthalene	2,4-Dichlorobenzoic acid	dl-3,4-Dihydroxyphenylalanine levo-3-(3,4- Dihydroxyphenyl)-2-methylalanine and its salts and esters
1-Decanol	3,4-Dichlorobenzoic acid	Dihydroxyuridine-2,3-monophosphate
Dehydroabietylamine	2,4-Dichlorobenzoyl peroxide	Diiodo-tyrosine
Dehydroabietylamine acetic acid salt	Dichlorodifluoromethane	Diisoamyl phthalate
Dehydroabietylamine ethylene oxide	Dichlorodiphenyl sulfone	Diisobutylcarbinol
Dehydroacetic acid	Dichloroethylene	Diisobutyl ketone
trans-Dehydroandrosterone acetate	Dichloroethylether	Diisobutyl phthalate
semicarbazone	Dichloroisocyanuric acid	Diisodecyl adipate
Dehydrocholic acid	Dichloroisopropyl ether	Diisodecyl phthalate
Dehydrothio-para-toluidine	[2,3-Dichloro-4-(2-methylene-butyl) phenoxy] acetic acid	Diisooctyl adipate
Deoxyadenosine	2,3-Dichloro-1,4-naphthoquinone	Diisooctyl phthalate
Deoxyadenosine-5-triphosphate	2,6-Dichloro-4-nitroaniline	Diisooctyl sebacate
Deoxyadenylic acid	2,4-Dichlorophenol	Diisopropanolamine
Deoxycytidine	Dichloropropane	Diisopropylamine
Deoxycytidine-5-triphosphate	Dicumyl peroxide	Diisopropyl benzene
Deoxyguanosine	Dicyanodiamide	meta-Diisopropyl benzene
Deoxyguanosine monohydrate	Dicyclohexylamine	para-Diisopropyl benzene
Deoxyguanosine-5-triphosphate	Dicyclohexyl phthalate	Diisopropyl benzene hydroperoxide
Deoxyguanylic acid	Dicyclomine hydrochloride	Diisopropyl carbinol
Deoxyinosine	Dicyclopentadiene	Diisopropyl fluophosphates
Deoxyribonucleic acid	Dienestrol	Diketene
Desoxyadenosine monohydrate	Diethanolamine	2,5-Dimethoxybenzaldehyde
Diacetone alcohol	Diethylaluminum ethoxide	2,6-Dimethoxybenzoic acid
Diacetyl	Diethylaluminum hydride	Dimethoxytetraglycol
Diallylbarbituric acid	Diethylamine	Dimethyl acetal
Diallyl maleate	Diethylaminoethanol	Dimethyl acetamide
Diallyl phthalate	meta-Diethylaminophenol	Dimethyl adipimide dihydrochloride
1,2-Diaminopropane	N,N-Diethylaniline	Dimethylallylamine
1,3-Diaminopropane	Diethylbarbituric acid	Dimethyl aluminum chloride
Diaminoazoxytoluene	Diethylbenzene	Dimethyl aluminum hydride
L-2,4-Diaminobutyric acid hydrochloride	Di-(2-ethylbutyl) phthalate	Dimethyl amine
2,4-Diaminodiphenylamine	Diethylcarbamide	para-Dimethylaminobenzaldehyde
Diamthazole dihydrochloride	Diethylcarbamide citrate	2-Dimethylaminoethanol
Diamylphenol	Diethyl carbamate	Dimethylaminomethylphenol
Dianisidine	diethyl chromium (chromocene)	5-Dimethylamino-1-naphthalene sulfonyl chloride
ortho-Dianisidine dihydrochloride	Diethylene dichloride	Dimethylaminopropylamine
Diastase	Diethylene glycol	5-(3-Dimethylaminopropylidene)-dibenzo (a,d) (1,4) cycloheptadiene pamoate
Diastatic enzymes	Diethylene glycol adipate	
Diastefor	Diethylene glycol bis (allyl carbonate)	
Diazoaminobenzene	Diethylene glycol-n-butyl ether	
Diazodinitrophenol	Diethylene glycol dibenzoate	
4-(5H-Dibenzo (a,d) cyclohepten-5-ylidene)-1- methylpiperidine and its salts

Glucose, pharmaceutical

Glucose-6-phosphate, disodium salt	Hexylresorcinol	Isoamyl alcohol, primary
Glucuronic acid	Hippuric acid	Isoamyl bromide
Glucuronolactone	Histamine	Isoamyl butyrate
Glutamic acid	Histamine phosphate	Isoamyl chloride
Glutamine	Histidine	Isoamyl phthalate
Glutaraldehyde	Histidine hydrochloride	Isoamyl valerate
Glutaric acid	Homatropine and its salts	Isoborneol
Glutaric anhydride	Homocystine	Isobutene
Glutaronitrile	Homoserine	Isobutyl acetate
Glutathione	Hyaluronidase	Isobutyl acrylate
Glycerin	Hydantoin	Isobutyl alcohol
Glycerol monooleate	(-)-1-a-Hydrazino-3,4-dihydroxy-a-methyl- hydrocinnamic acid monohydrate	Isobutyl allyl barbituric acid
Glycerophosphates	Hydrazobenzene	Isobutylamine
Glycerophosphoric acid and salts	Hydrindantin, including hydrated forms	Isobutyl benzene
Glyceryl monostearate	Hydrocholin	Isobutyl benzoate
Glyceryl tri-(acetyl ricinoleate)	Hydrocholine powder	Isobutyl bromide
Glyceryl tributyrinate (tributylin)	Hydroorotic acid	Isobutyl chloride
Glycidyl acrylate	Hydroquinone	Isobutyl methacrylate
Glycine	Hydroquinone monobenzyl ether	Isobutyl phenyl acetate
Glycylglycine	Hydroxyacetic acid	Isobutyl quinoline
Glycocholic acid (cholyglycine)	meta-Hydroxybenzaldehyde	N-Isobutylundecyleneamide
Glyoxal	para-Hydroxybenzaldehyde	Isobutyraldehyde
Guaiacol	meta-Hydroxybenzoic acid	Isobutyric acid
Guaiacol carbonate	ortho-Hydroxybenzoic acid	Isobutyronitrile
Guaiacol glyceryl ether	para-Hydroxybenzoic acid	dl-Isocitrate trisodium
Guaiamar	3-Hydroxy-2-butanone	Isoctyl thioglycolate
Guanidine	dl-Hydroxybutyric acid sodium salt	Isodecanol
gamma-Guanidinobutyric acid	p-Hydroxychlorobenzene	Isoeugenol
Guanidinopropionic acid	Hydroxycitronella	Isoleucine
Guanine	2-Hydroxy-4n dodecyloxybenzophenone	Isoniazid
Guanosine	Hydroxyethyl cellulose	Isooctyl alcohol
Guanosine-2,3-cyclic	Hydroxyethylethylenediamine	Isooctyl isodecyl phthlate
Guanosine-3,5-cyclic phosphate	N-Hydroxyethylpiperazine	Isopentanoic acid
Guanosine dihydrate	N-2-Hydroxyethylpiperazine-N'-2'- ethanesulfonic acid	Isophorone
Guanosine-5-diphosphate	Hydroxylapatite	Isophthalic acid
Guanosine-5-monophosphate	Hydroxylsine hydrochloride	Isopropenyl acetate
Guanosine-5-triphosphate	Hydroxymethyl 6-(2-amino-2- phenylacetamido)-3,3-dimethyl-7-oxo-4- thia-1-azabicyclo (3,2,0) heptane-2- carboxylate pivalate and its salts and esters	Isopropyl acetate
Guanosine-5'-triphosphate trilithium tetrahydrate	5-Hydroxymethylcytosine	Isopropyl alcohol (isopropanol)
3-Guanylic acid	5-Hydroxymethyl deoxyuridine	Isopropyl ethyl thionocarbamate
5-Guanylic acid	3-Hydroxy-2-naphthoic acid	Isopropylamine
Guanylyl-3,5-adenosine	2-Hydroxyphenylmercuric chloride	Isopropyl bromide
Guanylyl-3,5-cytidine	Hydroxyproline	Isopropyl chloride
Guanylyl-3',5'-guanosine	Hydroxyquinoline and oxyquinoline anti- infective agents	Isopropyl ether
Guanylyl-3',5'-uridine	Hydroxystearic acid	Isopropyl iodide
Hellotropine	5-Hydroxytryptophan	Isopropyl palmitate
Hemimellitene (1,2,3-trimethylbenzene)	3-Hydroxytyramine hydrochloride	Isopropyl phenol
Hemin (chlorohemin; hemin chloride)	Hydroxyzine	Isopropyl 2-(4 thiazolyl)-5-benzimidazole carbamate
Heparin sodium (heparin)	Hypoxanthine	Isosafrole
n-Heptadecanoic acid	3-3'-Iminobispropylamine	Itaconic acid
n-Heptadecanol	Iminodiacetonitrile	beta-Ketoglutaric acid
Heptafluorobutyric acid (perfluorobutyric acid)	Indene	Khellin
n-Heptanoic acid	Indole	Kinetin-6-furfurylaminopurine
n-Heptanol	3-Indoleacetic acid	Kojic acid
Heptylic acid	3-Indolebutyric acid	Lactic acid and salt(s)
Hexachlorobenzene	Indolyl-3 acetyl-L-aspartic acid	Lactonitrile
Hexachlorocyclopentadiene	Indomethacin	Lanthionine
Hexachloroethane	Inosine	Lauric acid
n-Hexadecane	Inosine-5'-diphosphate	Lauroyl peroxide
n-Hexadecanol	Inosine-5'-monophosphate	Lauryl alcohol
Hexa-2-ethylbutoxydisiloxane	Inosine-5'-triphosphate	Lauryl aldehyde
Hexafluoroacetone	Inosinic acid	Lauryl chloride
Hexahydrobenzoic acid	alpha-Iodoacetamide	Lauryl mercaptan
Hexahydrophthalic anhydride	5-Iododeoxyuridine	Lead acetate
Hexamethonium chloride	Iodoform	Lead formate
Hexamethylene diammonium adipate (nylon salt)	Ionones	Lead maleate tribasic
Hexamethylenediamine	Iron protosalate	Lead stearate
Hexamethyleneimine	Iron sodium oxalate	Lead styphnate
Hexamethylenetetramine	Isatoic anhydride	Lead tetraacetate
n-Hexanol		Lecithin, n.e.c.
Hexestrol NNR		Leucine
n-Hexyl bromide		Leucenol leucenine
n-Hexyl chloride		Levulinic acid
Hexylene glycol		Lignoceric acid
		D-Limonene
		Linalool

Linalyl acetate	Methylaluminum sesquichloride	Methyl palmitate
Linoleic acid	Methylamine	Methyl palmitoleate
Linolenic acid	Methylamyl acetate	Methylparaben
Linalyl acetate	Methyl amyl alcohol	2-Methylpentaldehyde
Lithium benzoate	Methyl-n-amyl carbinol	2-Methyl-1-pentanol
Lithium salts	Methyl amyl ketone	3-Methyl-1-pentyn-3-ol
Lutidine	N/Methylaniline (monomethylaniline)	Methylphenyldichlorosilane
2,4-Lutidinic acid	alpha-Methylanthracene	3-Methyl-1-phenyl-2-pyrazolin-5-one
Lysine	Methyl antranilate	n-Methyl-o-phenylenediamine
Lysine hydrochloride	Methyl anthraquinone	dihydrochloride
Lysozyme	Methyl arachidate	Methyl phthalate
D-Lyxose	alpha-Methylbenzyl alcohol	Methyl phthalyl ethylglycollate
Magnesium benzoate	alpha-Methylbenzyl ether	N-Methylpiperazine
Magnesium citrate	Methyl-bicyclo (2,2,1) heptene-2,3-	2-Methyl piperidine
Magnesium citrate, dibasic	dicarboxylic anhydride isomers	Methyl propyl ketone
Magnesium p-(dipropylsulfamoyl) benzoate	2-Methyl-1-butanol	n-Methyl-2-pyrrolidine
Magnesium glycerophosphate	Methyl butynol	Methyl salicylate
Magnesium salicylate	Methyl caproate (methyl hexanoate)	Methyl stearate
Magnesium stearate	Methyl chavicol	alpha Methyl styrene
Magnesium sulfate	Methyl chloride	N-Methyltaurine and aqueous solutions
Magnesium oxyphenyl arsenate	Methyl cinnamate	N-Methyltaurine slurry
Maleic acid	Methylcyclohexane	Methyl tricosanoate
Maleic anhydride	Methylcyclohexanol	Methyl tridecanoate
Malic acid	Methylcyclohexanol acetate	dl-5-Methyl-tryptophan-2,5-hydrate
Malonic acid	Methylcyclohexanone	beta-Methylumbelliferone
Malt diastase	Methylcyclopentane	2-Methyl-5-vinylpyridine
Maltose	N-Methyl-5H-dibenzene (a,d) cycloheptene-5-	Mimosine
Mandelic acid	propyl-amine and its salts	Monobutylamine
Manganese acetate	Methyl dichloroacetate	Monochlorodifluoroethane
Manganese citrate	Methyldiethanolamine	Monochlorodifluoromethane
Manganese glycerophosphate	Methyl di-hydrogenated tallow tertiary amine	Monoethanolamine
Mannitol	Methyleaidate	Monoethylamine
D-Mannose	N,N-Methylene bisacrylamide	Monoisopropanolamine
Margaric acid	Methylene blue	Monopentaerythritol diacetate dibutyrate
Meclizine	Methylene bromide	Monopentaerythritol tetrabutryrate
Melamine	Methylene chloride	Monosodium glutamate
Melissic acid	Methylene iodide	Montanic acid
Menadione (2-methyl-1,4-naphthoquinone)	N-Methylethanolamine	Morpholine
para-Menthane hydroperoxide	2-Methyl-2-ethyl-1,3-dioxolane	Musk ambrette
Menthol	Methylethylketone	Musk ketone
Mephentermine	Methylethylketone and cyclohexanone	Musk xylene
Mephentermine sulfate	peroxide	Myristic acid
Mercaptobenzothiazole	Methylethylketone peroxide	Myristoleic acid
Mercaptoethanol	2-Methyl-5-ethylpyridine	Myristyl alcohol
beta-Mercaptopropionic acid	N-Methylglucamine	Myristyl bromide
6-Mercaptopurine	Methyl glutamate	Nalidixic acid
Mercuric acetate	Methyl glycolate	Naphazoline hydrochloride
Mercuric salicylate	Methyl heneicosanoate	Napthalene
Mesityl oxide	Methyl heptene carbonate	Napthalenesulfonic and disulfonic acids
Mesitylene (1,3,3-trimethylbenzene)	Methyl hexyl ketone	Naphthionic acid
Metamine (troinitrate phosphate)	Methyl histidine	alpha-Napthol
Metanilic acid	Methyl alpha-hydroxy behenate	beta-Napthol
Methacrylic acid	Methyl alpha-hydroxy eicosanoate	Napthol sulfonic and disulfonic acids and salts
Methacrylonitrile	Methyl alpha-hydroxy-lignocerate	1,2-Napthoquinone
Methallyl chloride	Methyl alpha-hydroxy myristate	1,4-Napthoquinone
Methanesulfonyl chloride (mesyl chloride)	Methyl alpha-hydroxy palmitate	alpha-Napthylamine
Methantheline bromide	Methyl alpha-hydroxy stearate	beta-Napthylamine
Methapyralene antihistamines	Methylinoacetaldehyde	Napthylamine sulfonic, disulfonic and trisulfonic acids
Methenamine anti-infective agents	Methyl iodide	2-Napthyl benzoate
Methionine	Methyl ionone	Napthyl ethyl ether
Methionine hydroxy analogue	Methyl isoamyl ketone	Napthyl methyl ether
Methionine sulfone	Methyl isobutyl ketone	2-(1-Napthyl)-5-phenyl oxazole
Methoxyphenamine hydrochloride	Methyl isopropenyl ketone	Neopentyl glycol
Methoxytriglycol	Methyl laurate	Neopentyl glycol adipate
Methoxytriglycol acetate	Methyl linoleate	Neopentyl glycol sebacate
Methyl acetate	Methyl linolenate	Neopentyl glycol succinate
Methyl-4-acetamido-2-ethoxy benzoate	Methyl mercaptan	Neotridecanoic
Methyl acetanilide	Methyl methacrylate monomer	Nerol
Methyl acetone	N-Methyl morpholine	Nialamide
Methyl acetophenone	Methyl myristate	Nicarbazin
Methyl acetylene	alpha-Methylnapthalene	Nickel acetate
Methyl acetyl ricinoleate	beta-Methylnapthalene	Nickel formate
Methyl acrylate	(1-Methyl-5-nitroimidazol-2-yl)methyl	Nikethamide
Methyl alanine	carbamate	Ninhydrin
Methylallyl alcohol	Methyl nonadecanoate	
Methylaluminum sesquibromide	Methyl oleate

 Polyuridylic acid potassium  
 Pontalin granulation  
 Pontalin powder  
 Potassium acetate  
 Potassium amyl xanthate  
 Potassium biphthalate  
 Potassium bitartrate

Potassium chloride	Rhodinol	Stearic acid
Potassium citrate	Ricinoleic acid and salts	Stearin
Potassium dichloroisocyanurate	Ristocetin	Stearyl alcohol
Potassium ethyl xanthate	Rochelle salts	Stilbestrol
Potassium hexyl xanthate	Saccharin	Strontium acetate
Potassium oxalate	Saffrole	Strontium lactate
Potassium oxichinolin sulfonate	Salicin	Strontium oxalate
Potassium salicylate	Salicylaldehyde	Streptokinase
Potassium tetroxalate	Salicylamide	Styrene oxide
Proline	Salicylic acid, technical grade	Suberic acid
Prominal	Salicylic acid, USP grade	Succinic acid
Propargyl alcohol	Salol	Succinic acid disodium salt
Propargyl bromide	Salophen	Succinic anhydride
Propenyl guaethol	Santalol	Succinimide
Prophenpyridamine maleate	Santonin	Sucrose
beta-Propiolactone	Sarcosine	Sucrose acetate butyrate
Propionaldehyde	Sebacic acid	Sulfanilic acid
Propionic acid	Secobarbital sodium salicylate	meta-Sulfobenzoic acid
Propionic anhydride	Selenium diethylthiocarbonate	ortho-Sulfobenzoic acid
Propionyl chloride	Serine	Sulfonamide drugs
Propiophenone	Serotonin	4,4-Sulfonyldianiline
d-Propoxyphene hydrochloride	Serotonin creatinine sulfate	4-Sulfophthalic acid
n-Propyl acetate	Serotonin creatin sulfate complex	Tartar emetic
n-Propyl alcohol	Shikimic acid (3,4,5,-trihydroxy;-1-carboxylic acid)	Tartaric acid
Propyl amine	Silanes	Taurine
n-Propyl bromide	Skatole	Terephthalic acid
n-Propyl chloride	Sodium acetate	Terephthaloyl chloride
Propylene carbonate	Sodium allyl arsenate	para-Terphenyl
Propylene chlorohydrin	Sodium para-aminobenzoate	Terpin hydrate
Propylene dichloride	Sodium para-aminosalicylate	Terpineol
1,2-Propylene glycol	Sodium arsenilate	Terpinyl acetate
Propylene glycol methyl ether	Sodium benzoate	Tetrabutyl titanate
Propylene oxide	Sodium bitartrate	Tetrachlorodifluoroethane
Propyl gallate	Sodium biphthalate	sym-Trachloroethane
Propylhexadrine	Sodium-sec-butyl xanthate	Tetrachlorophthalic acid
n-Propyl iodide	Sodium chloride	Tetrachlorophthalic anhydride
Propylparaben	Sodium-4-chlorophthalate	5-Tetradecenoic acid
Protamine sulfate	Sodium citrate	1,1,3,3-Tetraethoxypropane
Protoporphyrin	Sodium dehydroacetate	Tetraethylene glycol
Pseudocumene (1,2,4-trimethylbenzene)	Sodium diacetate	Tetraethylene pentamine
Pseudocumidine	Sodium dibutyl naphthalene sulfonate	Tetraethyl lead
Pseudouridine (salmine)	Sodium dichloro isocyanurate	Tetrafluoroethylene
Purine	Sodium dimethyl-S-sulfo isophthalate	Tetrafluoromethane
Pyramidon	Sodium dodecyl benzene sulfonate	Tetrahydrofuran
Pyranisamine maleate	Sodium erythorbate	Tetrahydrofurfuryl alcohol
Pyrene	Sodium formate	Tetrahydrofurfuryl oleate
Pyridine (refined)	Sodium gentisate	Tetrahydrofuralool
3,4-Pyridinecarboxylic acid	Sodium gluconate	Tetrahydronaphthalene
Pyridium	Sodium glycolate	Tetrahydrophthalic anhydride
Pyrilamine maleate (benzal)	Sodium isobutyl xanthate	Tetrahydropyran-2-methanol
Pyrilamine maleate N.N.R.	Sodium isopropyl xanthate	Tetrahydrothiophene 1,1-dioxide (sulfolane)
Pyrocatechol	Sodium lactate	Tetrahydroxyethylenediamine
Pyrogallol acid	Sodium N-lauroyl sarcosinate	Tetrahydrozoline
Pyroligneous acid	Sodium lignosulfonate	Tetrahydrozoline hydrochloride
Pyromellitic acid and dianhydrides	Sodium methylate	Tetraisopropyl titanate
Pyruvic acid	Sodium methyl silicate	N,N,N,N-Tetramethyl-1,3-butane diamine
Pyruvic aldehyde	Sodium oxalate	Tetramethyldiaminobenzhydrol
Quinacrine hydrochloride	Sodium phenolsulfonate	Tetramethyldiaminobenzophenone
Quinaldine	Sodium potassium tartrate	Tetramethyldiaminodiphenylmethane
Quinhydrone	Sodium propionate	N,N,N,N-Tetramethylene diamine
Quinic acid	Sodium saccharin	Tetramethyl lead
Quinizarin	Sodium saccharinate	1,1,4,4-Tetraphenylbutadiene
Quinoline	Sodium salicylate	Tetraphenyltin
Quinone	Sodium tetroxalate	Tetrapropylene
N <sup>1</sup> -(2-Quinoxalyl) sulfanilamide	Sodium undecylenate	Tetrazene
Racephedrine	Sodium zirconium lactate	2-(4'-Thiazolyl) benzimidazole
Raffinose	Sorbic acid	beta-2-Thienylalanine
Rennet	Sorbitol	2-Thiobarbituric acid
Rennin	Sorbose	Thiodiglycol
Resorcinol	Spermidine trihydrochloride	Thiodipropionic acid
Resorcinol acetate	Spermidine tetrahydrochloride	Thioglycerol
Resorcinol dimethyl ether	Sphingomyelin	Thioglycolic acid
Resorcinol monobenzoate	Squalane	Thiophene
alpha-Resorcylic acid	Squalene	alpha-Thiophenealdehyde
beta-Resorecylic acid	Stannous 2-ethylhexoate	Thiophenol
Rhamnose		Thiosalicylic acid

Thiothixene	Trifluoroacetic acid	Vinyl acetate
2-Thiouracil	Trifluoromono-chloroethylene	Vinyl benzene (styrene)
Thiourea	Tri-n-hexylaluminum	Vinyl bromide
Threonine	Triisobutylaluminum	Vinyl-n-butyl ether
Thrombin topical	Triisohexylaluminum	Vinyl chloride
Thromboplastin	Triisopropanolamine	Vinyl-2-chloroethyl ether
Thymidine	Trilinolein	Vinyl ether
Thymidine-3,5-diphosphate	Trimellitic acid and anhydrides	Vinyl ethyl ether
Thymidine-5-diphosphate	Trimethyl aluminum	Vinylidene chloride
Thymidine-5-monophosphate	3,4,5-Trimethylcyclohexanol-1	Vinyl isobutyl ether
Thymidine-5-triphosphate	Trimethylene bromide	Vinyl methyl ether
Thymine (5-methyluracil)	Trimethylene chlorohydrin	Vinyl methyl ketone
Thymol	Trimethylene glycol	Vinyl pyridine
Thymol blue	2,6,8-Trimethyl-4-nonanone	1-Vinyl-2-pyrrolidone
Thymol iodide	2,6,8-Trimethylnonyl-4-alcohol	Vinyltoluene
Titanium potassium oxalate	Trimethylolthane	Wintodon granulation
Titanyl acetylacetonate	Trimethylolpropane	Xanthine
ortho-Tolidine	2,2,4-Trimethyl-1,3-pentanediol	Xanthophyll feed supplement
ortho-Tolidine dihydrochloride	2,2,4-Trimethyl-1,3-pentanediol di-isobutyrate	Xanthosine
Toluene	2,2,4-Trimethyl-1,3, pentanediol mono-isobutyrate	Xanthosine-5-phosphate
Toluene-2,4-diamine	2,4,4-Trimethylpentene	Xanthrydrol
Toluene diisocyanates, except the 2-4 isomer with 85 percent purity and above.	Tri-2-methylpentylaluminum	Xylene
Toluene sulfonamide	2,4,6-Trinitrobenzene sulfonic acid	ortho-Xylene
ortho-Toluenesulfonamide	Trinonylphenyl phosphite	para-Xylene
para-Toluenesulfonamide	Tri-n-octylaluminum	Xylenol
ortho-Toluenesulfonic acid	Tripalmitin (Palmitin, glyceryl tripalmitate)	Xylidine
p-Toluenesulfonylchloride	Tripelennamine anti-histamines	Xylenyl phosphate
para-Toluene sulfonyl-L-arginine methyl ester, HCl	Triphenyl phosphate	Xylose
o-Toluidine	Triphenyl phosphite	Yttrium salts
Tolyl acetate	Triphenyl phosphorus	Zinc acetate
ortho-Tolyl biguanide	Triphosphopyridine nucleotide	Zinc 1,4-phenosulfonate
para-Tolyl-1-naphthyl-amine-8-sulfonic acid	Tripropylene	Zinc stearate
Triacetin	Tripropylene glycol methyl ether	Zinc undecylenate
N-Triacontane (Melissic acid)	Tris-B-chloroethyl phosphate	
Triallyl cyanurate	Tris (2,3-dibromopropyl) phosphate	<b>Plastic Materials and Artificial Resins, as Follows:</b>
Tribromoacetic acid	Tris dichloropropyl phosphate	Acetal resins
Tribromoethanol	Tris (hydroxymethyl) aminomethane	Acrylic acid esters
Tributoxyethyl phosphate	Trixylenyl phosphate	Acrylic polymers
Tri-n-butyl aconitate	Trypsin powder	Acrylonitrile-butadiene-styrene copolymer (ABS resin)
Tributyl citrate	Trypsin pure	Alkyd resins
Tributyl phosphate	Tryptar trypsin	Amino resins
Tributyl phosphite	Tryptophan	Ammonium alginate
Trichloroacetic acid	Tyramine	Carboxy vinyl polymers, water soluble <sup>1</sup>
1,2,3-Trichlorobenzene	Tyrosine	Cellulose, chemical derivatives
1,2,4-Trichlorobenzene	Undecalactone	Cellulose, regenerated
1,1,1-Trichloroethane	Undecanaldehyde	Chlorendic alkyd resins
Trichloroethylene	1-Undecanol	Chlorinated polyether resins
Trichlorofluoromethane	2-Undecanol	Composites or laminates n.e.s., containing polyimides, polybenzimidazoles, polyimidazopyrrolones, aromatic polyamides, polyparxylenes, polyimide-polyamide, silica, quartz, carbon or graphite fibers, polytetrafluoroethylene, polyvinylfluoride, or solid forms of polychlorotrifluoroethylene
Trichloroisocyanuric acid	Undecylic acid	Copolymer of tetrafluoroethylene and perfluoroalkyl-vinyl ether
Trichloromethane (chloroform)	Undecylenic acid	Coumarone-indene resins
Trichloromethyl chloroformate (diphosgene)	Uracil	Epoxy resins, n.e.s.
Trichloropropane	Uranine	Ethylene oxide polymers, water soluble <sup>1</sup>
Tricresyl phosphate	Urea	Ethylene maleic anhydride resins
Tridecyl alcohol	Urease	Ethylene-propylene
Tri-n-decylaluminum	Uric acid	Ethylene-vinyl acetate
Tridecylic acid	Uridine	Flocculating agents <sup>1</sup>
2,4,6-Tri(dimethylaminomethyl) phenol	Uridine-5-diphosphate	Floor tile and flooring, plastic or plastic composition
Triethanolamine	Uridine-5-diphosphogalactose	Furan resins
Triethanolamine titanate	Uridine-5-diphosphomannose	High styrene resins masterbatches
1,1,3-Triethoxyhexane	Uridine-5-monophosphate	Hydroxyvinyl resins
Triethyl aluminum	Uridine-5-triphosphate	Ion exchange liquids, membranes, and resins
Triethylamine	Uridylic acid	
Triethyl citrate	Uridyl-3',5'-cytidine	
Tri-2-ethylhexyl phosphate	Uridyl-3',5'-uridine	
Triethyl phosphate	n-Valeraldehyde	
Triethylenediamine	Valeric acid	
Triethylene glycol	Valine	
Triethylene glycol dibenzoate	d Valine	
Triethylene glycol di(2-ethylbutyrate)	dl Valine	
Triethylene glycol di(2-ethylhexoate)	l Valine	
Triethylene glycol monobutyl ether phosphate	Vanadium ethylate	
Triethylenetetramine	Vannilin	
	Varidase streptokinase-streptodornase	
	Veratraldehyde	
	Vetivert acetate	

<sup>1</sup> A validated license is required for export of these commodities to the USSR, Estonia, Latvia, and Lithuania.

- Ionomer resins  
 Laminates (including metal-clad) composed of two or more products included in Commodity Interpretation 24  
 Melamine-formaldehyde resins  
 Methacrylic acid esters  
 Methyl methacrylate, n.e.s.  
 Modified natural resins, including ester gum  
 Natural rubber, chemical derivatives  
 Nylon 6, 66, 610, and 612  
 Pentaerythritol resins  
 Phenol-formaldehyde adhesive and resins  
 Phenolic resins, n.e.s.  
 Phenoxy resins  
 Pipe and tubing made of, or lined and covered with, fluorocarbon polymers or copolymers, n.e.s.<sup>1</sup>  
 Polyallomer resins  
 Polyamide resins, n.e.s.  
 Polybutadiene resins  
 Polybutene resins  
 Polycaprolactone resins  
 Polycarbonate film, n.e.s.  
 Polycarbonate resins, molding and extrusion forms  
 Polychlorotrifluoroethylenem, solid forms  
 Polydivinylbenzene  
 Polyester resins, n.e.s.  
 Polyester tapered filaments  
 Polyethylene film, sheeting, laminates or wax containing any boron  
 Polyethyleneimine  
 Polyethylene, n.e.s.  
 Polyethylene oxide-based resins  
 Polyethylene terephthalate film  
 Polyimide-polyamide resins  
 Fully cured polyimide or polyimide-based film, sheet, tape, or ribbon having a maximum thickness of 10 mils (0.010 inch or 0.254 mm) whether or not coated or laminated with heat- or pressure-sensitive resinous substances of an adhesive nature, which contain no fibrous reinforcing materials, and which have not been coated or laminated with carbon, graphite, metals, or magnetic substances  
 Polymethylpentene resins  
 Polypropylene  
 Polystyrene  
 Polysulfone resins, n.e.s.  
 Polyterpene resins  
 Polytetrafluoroethylene, coagulated dispersion grades only; polyvinylidene fluoride; the copolymers of tetrafluoroethylene and hexafluoropropylene; and dibromotetrafluoroethane having a purity of 99.8 percent or less and containing at least 25 particles of 200 microns or larger in size per 100 ml; and damping, dielectric, or flotation fluids wholly made thereof  
 Polytetrafluoroethylene, nondispersion grades  
 Polyurethane resins  
 Polyvinyl acetal resins  
 Polyvinyl acetate resins  
 Polyvinyl alcohol  
 Polyvinyl butyral  
 Polyvinyl chloride  
 Polyvinylidene chloride resins  
 Polyvinyl ether resins  
 Polyvinyl fluoride  
 Polyvinyl formal  
 Polyvinyl pyrrolidone  
 Potassium alginate  
 Products, n.e.s., made of fluorocarbon polymers or copolymers<sup>1</sup>
- Proteins, hardened  
 Resorcinol-formaldehyde resins  
 Silicone diffusion pump fluids having the capacity for producing ultimate pressures of 10<sup>-8</sup> torr and greater  
 Silicone rubber and compounds, n.e.s.  
 Sodium alginate  
 Styrene-acrylonitrile copolymers  
 Styrene-butadiene copolymers  
 Sulfonamide-formaldehyde resins  
 Urea-formaldehyde resins  
 Vinylidene chloride acrylonitrile copolymers  
 Vulcanized fiber
- Chemical preparations and compounds, miscellaneous related materials and products, n.e.s., as follows:**  
 Acetone oil  
 Acid cupric chromate solution  
 Activated carbon for petroleum or chemical processing  
 Activated natural mineral products  
 Additives for fuel oils  
 Adhesives or cements containing polyimides, polybenzimidazoles, polyimidazopyrrolones, aromatic polyamides, polyparaxylenes, or polyimide-polyamide, n.e.s.  
 Albumins, albuminates, and other albumin derivatives  
 Alkane sulfonic acid; mixed  
 Alkyl aryl phosphate  
 Alkyl aryl phthalate blend with alkyl benzene  
 Alkyl benzenes (detergent alkylates) with straight-chain alkyl groups containing 8 or more carbon atoms  
 Animal black, except activated  
 Articles, finished, of artificial plastic materials, n.e.s.  
 Artificial graphite, n.e.s.  
 Aryl-modified butyl benzyl phthalate ester  
 Auxiliary preparations for soldering, brazing, or welding (fluxes, powders, pastes) containing metal and other constituents  
 Azeotropic mixture of trifluoromethane and monochlorotrifluoromethane (R-503)  
 Boiler feed water compounds  
 Boric acid esters  
 Brewers' tank coating compounds  
 pH Buffer salt and solution mixtures  
 Calcium lignosulfate  
 Calcium naphthenate  
 Carnauba wax, micronized  
 Calcium sulfate impregnated silica gel adsorbent carbon or graphite fibers, n.e.s.  
 Casein  
 Catalysts, n.e.s.  
 Cementing preparations not of fish, animal or vegetable origin, *the following only*: cementing preparations for pyroxylin watch glasses; film cement with paraffin; floor cement; floor patch, concrete; iron cement; linoleum cement except rubber; linoleum paste except rubber; polishing wheel cement; roofing cement; running board cement; soil pipe cementing preparation; solder glue; automobile top sealer; wall board cementing preparation; thread lubricant and seal compound; acrylic based glues, adhesives, or cement; and tire cut filler  
 Charges for fire extinguishers  
 Chemical compounds for manufacturing ice cream  
 Chill proofing compounds
- Chlorinated hydrocarbon wax preparations  
 Clarifier for beer or ale  
 Clarifying powder for wines  
 Collecting reagents (preparations) for concentration of ores, metals, or minerals  
 Compounds and mixtures of rare earth metals, yttrium, or scandium n.e.s.  
 Composite solvents, paint removers, thinners, and other similar products, n.e.c.  
 Concrete hardeners  
 Concrete plasticizer compounds  
 Concrete waterproofing compounds  
 Conversion coating compounds  
 Copper naphthenate  
 Corrosion-inhibiting compounds  
 Cyanoacrylate adhesives and glues  
 Dental impression compounds and modelling pastes in plates, sticks, and similar forms  
 Dental plasters and preparations  
 Dextrins  
 Diethyl chromium (Chromocene) in toluene  
 Digestive enzymes (Glycerol Red Bone Marrow)  
 Diphenyl and diphenyl oxide heat transfer mixtures  
 N,N-Diphenyl-meta-phenylene-diamine  
 N,N-Diphenyl-para-phenylene-diamine  
 Dyeing, tanning, and coloring materials, natural and synthetic, n.e.s.  
 pH Electrode electrolyte solution mixtures  
 Epoxy-based adhesives or cements  
 Essential oils and perfume materials  
 Esters of saturated aliphatic monohydric alcohols containing more than six carbon atoms with adipic or azelaic or sebacic acids  
 Esters of dibasic saturated aliphatic acids combined with polyglycols, where one or both of the two constituents contain six or more carbon atoms, or saturated monohydric alcohols with dibasic saturated aliphatic acids where both of the two constituents contain six or more carbon atoms  
 Esters of trimethylol propane or trimethylol ethane or pentaerythritol with saturated monobasic acids containing more than six carbon atoms  
 Explosives and pyrotechnic products, n.e.s.  
 Ferrocium and other pyrophoric alloys  
 Film developers  
 Flocculating agents, n.e.s.<sup>1</sup>  
 Glues and adhesives of fish, animal, or vegetable origin  
 Gluten and gluten flour  
 Glyceride kit MDT  
 Glycerol stearate  
 Glyceryl tri-(12-hydroxystearate)  
 Graphite, artificial and colloidal, n.e.s.  
 Gum rosin  
 Gum turpentine  
 Hat finishing powders  
 Herbicidal or antiplant preparations, n.e.s.  
 Hydraulic fluids, oils, and lubricants, n.e.s.  
 Hydrocarbon N-paraffin mixes  
 Hydrogenated tallow primary amine  
 Indicating pastes  
 Ink conditioners or eradicators  
 Ink thinners for cellophane printing  
 Inorganic and organic insecticides, pesticides, defoliants, herbicides, fumigants,

<sup>1</sup> A validated license is required for export of these commodities to the USSR, Estonia, Latvia, and Lithuania.

- agricultural chemicals<sup>2</sup> and similar products n.e.s. *except organic phosphate insecticides and pesticidal compounds containing more than 75 per cent by weight of organic phosphates.*
- Inulin
- Iron oxide suspension
- Laundry sour
- Lead naphthenate
- Leather binding compounds
- Lipstick bases and waxes
- Magnesium silicate impregnated silica gel adsorbent
- Manganese naphthenate
- Manufactured fertilizers
- Meat curing compounds
- Medicinal and pharmaceutical products in bulk, in dosage form, or as preparations, mixtures, or compounds, for human or veterinarian use, n.e.s.
- Melamine-formaldehyde or Resorcinol-formaldehyde adhesives and glues
- Metal patch solvents
- Metallic hardeners for cement floors
- Metanephthine
- Methyl ethyl ketone peroxide 60 percent solution in dimethyl phthalate
- Mineral or vegetable waxes, modified
- Mixture of isobutyl ethers of propylene glycol and its homologs
- Mixture of n-ethyl ortho and paratoluene ethyl sulfonamide
- Mixture of ortho and para toluene sulfonamides
- Mixtures or solutions containing two or more of any product included in Commodity Interpretation 24
- Molecular sieves, loaded
- Molecular sieves, not loaded
- Monoglycerides
- Natural and man-made staple, tow, fibers, filaments, yarn, fabrics, and made-up articles, clothing, and related products, new, used or waste, n.e.s.
- Nickel compound catalysts and other catalysts, n.e.s.
- Noncyclic-phosphates (plasticizers) n.e.s.
- Nonmetallic mineral manufactures, n.e.s.
- Oil-field demulsifying agents<sup>1</sup>
- Peptones
- Petroleum and petroleum products natural or synthetic, n.e.s.
- Photographic chemicals and paper, n.e.s.
- Photoresist thinners and rinses, synthetic polymer
- Phthalate plasticizer incorporating coesterified mixed alkyl alcohols in the range of C<sub>7</sub>C<sub>9</sub>C<sub>11</sub>
- Pickling preparations for metal surfaces
- Pigments, inorganic n.e.s.
- Pine oil, *except pine-needle oil*
- Platinum plating solutions
- Polyether triols of alkylene oxides
- Polyethylene glycol plus nitro (STAP)
- Polyethylene glycol reacted with 2-nitro terephthalic acid (FFAP)
- Polyethylene glycol, solidified
- Polonium metal, salts and compounds
- Polyester of adipic acid and butylene glycol
- Polyester of adipic acid and phthalic acids and propylene glycol
- Polymeric isocyanate
- Polymeric (modified)-adipic acid
- Polysaccharides
- Polyvinyl acetate emulsion glues and adhesives
- Potassium or sodium soaps of rosins in liquid, paste, or powder form
- Prepared additives for petroleum lubricants, n.e.s.
- Prepared additives for synthetic lubricants
- Prepared brighteners and addition agents used in the following electroplating systems: antimony, arsenic, copper and copper alloy, cadmium, chromium, gold, indium, iridium, iron, lead, and lead alloy, nickel, palladium, platinum, rhodium, ruthenium, silver, tin and tin alloy, and zinc.
- Prepared culture media
- Prepared anti-knock compounds, n.e.s.
- Prepared glazings, dressings, mordants, and sizes
- Prepared rubber accelerators and compounding agents
- Protein substances, including edible and inedible gelatins
- Putty powder
- Radioisotopes, cyclotron-produced or naturally occurring, having an atomic number 3 through 83, and compounds and preparations thereof; and stable isotopes and their compounds, n.e.s.
- Radium and radium salts, alloys, and compounds
- Road binding compounds
- Rodenticides, inorganic
- Rosin and resin acid derivatives, except ester gums
- Rubber compounding chemicals, preparations and compounds, n.e.s.
- Rubber thread lubricating compounds
- Rust-preventive compounds
- Screening pastes
- Shark detergents
- Shaving cream bases
- Silanized diatomaceous earth
- Silica-based refractory core coatings
- Silk-stocking savers, tablet form
- Silver nitrate impregnated silica gel adsorbent
- Soda lime
- Sodium biphenyl in dimethoxyethane
- Solvents, compounds, cutting fluids, or mixtures, containing less than 95 per cent of Trichlorotrifluoroethane (R-113) or Dichlorotetrafluoroethane (R-114)
- Starches
- Sulfite lye, concentrated
- Talc paste
- Tall oil
- Tall oil resins
- Terphenyl resin plasticizer, partially hydrogenated
- Terpenic solvents, n.e.s.
- Tetrapropylene
- Toilet, polishing and cleansing preparations
- Ultraviolet light absorbers
- Urea formaldehyde adhesives and glues
- Urine concentrate
- Vegetable pitch and products based thereon or on rosin
- Water purifiers
- Water softeners
- Waxes, greases, lubricants, and damping dielectric, or flotation fluids wholly made of polytetrafluoroethylene, coagulated dispersion grades only; polyvinylidene fluoride; the copolymers of tetrafluoroethylene and hexafluoropropylene; or dibromotetrafluoroethane having a purity of 99.8 percent or less and containing at least 25 particles of 200 microns or larger in size per 100 ml.
- Weed killers, consisting primarily of boron compounds
- Wood creosote
- Wood naphtha
- Wood rosins
- Wood rosin liquid tire chain solution
- Wood tar
- Wood tar oils
- Wood turpentine
- Inorganic chemicals elements, acids, oxides, hydroxides, peroxides, and halogen salts, as follows:**
- Alumina, n.e.s.
- Antimony pentoxide
- Antimony trioxide
- Argon, *except liquified*
- Arsenic disulfide
- Arsenic, metallic
- Arsenic powder
- Arsenic trichloride
- Arsenic triiodide
- Arsenic trioxide
- Artificial corundum (fused aluminum oxide), n.e.s.
- Barium hydroxide monohydrate
- Barium hydroxide octahydrate
- Barium hydroxide pentahydrate
- Barium oxide
- Barium peroxide
- Bismuth trioxide
- Boric acids, n.e.s.
- Boron, n.e.s.
- Cadmium oxide
- Carbon black, all forms
- Carbon disulfide
- Cerium oxide
- Chlorine
- Chlorine dioxide
- Chlorosulfonic acid
- Chromic acid
- Chromic anhydride
- Chromium oxides, anhydrides, and hydroxides, n.e.s.
- Copper hydroxide
- Copper oxide, black
- Copper oxide, red
- Dihydrazine sulfate
- Ferric hydroxide
- Fluosilicic acid
- Germanium oxides, hydroxides, and peroxides
- Hafnium oxides, n.e.s.
- Hexafluorophosphoric acid
- Hydrazine hydrate
- Hydrazine mixtures containing less than 70 percent of hydrazine equivalent
- Hydriodic acid
- Hydrobromic acid
- Hydrochloric acid
- Hydrocyanic acid
- Hydrofluoric acid
- Hydrogen bromide, anhydrous
- Hydrogen chloride
- Hydrogen sulfide
- Hydroxylamine
- Hydroxylamine hydrochloride

<sup>2</sup> A validated license is required for export of phosphate rock and processed phosphatic fertilizers of all concentrations to the U.S.S.R.

<sup>1</sup> A validated license is required for export of these commodities to the U.S.S.R., Estonia, Latvia, and Lithuania.

Hypophosphorous acid	Thionyl chloride	Cadmium carbonate
Iodic acid and its salts	Tin oxides	Cadmium chloride
Iodine U.S.P. (resublimed)	Titanium, n.e.s.	Cadmium iodide
Iron oxides and hydroxides, n.e.s.	Tungsten trioxide	Cadmium nitrate
Lead oxides, n.e.s.	Tungstic acid	Cadmium sulfate
Lithium, n.e.s.	Tungstic oxide	Calcium bromide
Magnesium hydroxide	Vanadium pentoxide	Calcium carbide
Magnesium oxide	Vanadium tetraoxide	Calcium carbonate
Magnesium peroxide	Vanadium trioxide	Calcium carbonate, precipitated
Manganese oxides, n.e.s.	Yttrium metal and powders	Calcium chloride
Manganic hydroxide	Zinc oxides and peroxides, n.e.s.	Calcium fluoride
Mercuric oxide, red	Zirconium oxides, hydroxides, and peroxides, n.e.s.	Calcium hydride
Mercuric oxide, yellow		Calcium hydroxide
Mercury (quicksilver)		Calcium hypochlorite
Molybdenum oxides	<b>Other inorganic chemicals n.e.s., as follows:</b>	Calcium hypophosphite
Monocrystalline gallium compounds, n.e.s.	Alum, crystallized	Calcium iodide
Monocrystalline and polycrystalline forms of molybdenum or tungsten, n.e.s.	Aluminum ammonium sulfate	Calcium peroxide
Muriatic acid	Aluminum chloride, anhydrous	Calcium phosphate
Neon, <i>except liquified</i>	Aluminum chloride hydrate	Calcium polysulfide
Nickel oxides, hydroxides, and peroxides	Aluminum fluoride	Calcium pyrophosphate
Niobium, n.e.s.	Aluminum fluosilicate	Calcium silicate
Nitric acid, <i>except fuming nitric acid</i>	Aluminum hydride	Calcium sulfate
Nitric oxide	Aluminum nitrate	Calcium thiosulfate
Nitrogen, <i>except liquified</i>	Aluminum phosphate	Calcium tungstate
Nitrogen pentoxide	Aluminum silicate	Carbic cake
Nitrous oxide	Aluminum sulfate	Carbic carbide
Oleum	Ammonia alum	Carbide powder, <i>except abrasive powders</i>
Oxygen, <i>except liquified</i>	Ammonium bicarbonate	Cesium bromide
Perchloric acid	Ammonium bifluoride	Cesium chloride
Phosphomolybdic acid	Ammonium borate	Cesium iodide
Phosphoric acid <sup>1</sup>	Ammonium bromide	Cesium sulfate
Phosphoric anhydride	Ammonium carbonate	Chalk, precipitated
Phosphorus, elemental	Ammonium chloride	Chloroplatinic acid
Phosphorus oxychloride	Ammonium chromate	Chromic chloride
Phosphorus pentasulfide	Ammonium dichromate	Chromic sulfate
Phosphorus sesquisulfide	Ammonium fluosilicate	Chromium ammonium sulfate
Phosphorus trichloride	Ammonium hexafluoroaluminate	Chromium potassium sulfate
Phosphorus trisulfide	Ammonium iodide	Cobalt compounds, n.e.s.
Polyphosphoric acid	Ammonium metavanadate	Copper alloy containing more than 8 percent phosphor
Potassium hydroxides	Ammonium persulfate	Copper chloride
Potassium peroxide	Ammonium phosphate, dibasic	Copper cyanide
Rhenium oxides, hydroxides, and peroxides	Ammonium phosphate, monobasic	Copper nitrate
Rubidium hydroxide	Ammonium polyphosphate	Copper oxychloride
Selenium	Ammonium reineckate	Copper sulfate
Selenium dioxide	Ammonium sulfate	Copper sulfate, ammoniated
Selenium oxychloride	Ammonium sulfide	Cupric bromide
Selenium sulfide	Ammonium tungstate	Cupric carbonate, basic
Selenous acid	Antimony pentachloride	Cupric chloride
Silanes	Antimony pentafluoride	Cuprous chloride
Silica aerogel	Antimony trichloride	Cuprous cyanide
Silica, colloidal	Antimony trifluoride	Cuprous iodide
Silica, gel	Antimony trisulfide	Cuprous sulfide
Silica, pyrogenic	Arsenic pentoxide	Cyanogen bromide
Silicic acid	Arsenic trioxide	Cyanogen chloride
Silicon, n.e.s.	Barium chlorate	Dicalcium phosphate
Silicon dioxide, hydrated	Barium carbonate	Dihydroxyaluminum sodium carbonate
Silicon monoxide	Barium chloride	Disodium phosphate
Silicon tetrachloride	Barium cyanide	Epsom salts
Silicotungstic acid	Barium fluoride	Ferric ammonium sulfate
Sodium hydroxide, solid and liquid	Barium nitrate	Ferric bromide
Sodium peroxide	Barium phosphate, dibasic or secondary	Ferric hypophosphite
Strontium hydroxide	Barium silicate	Ferric pyrophosphate
Strontium oxide	Barium thiocyanate	Ferrophosphorous containing 15 percent or more by weight of phosphorous
Strontium peroxide	Barium titanate	Ferrous ammonium sulfate
Sulfamic acid	Bismuth chloride	Ferrous carbonate
Sulfur, <i>except crude sulfur</i>	Bismuth iodide	Ferrous chloride
Sulfur dioxide	Bismuth nitrate	Ferrous sulfate
Sulfuric acid	Bismuth oxychloride	Fluoroborates, n.e.s.
Sulfur trioxide	Bismuth subcarbonate	Gallium compounds, n.e.s.
Tantalum, n.e.s.	Bismuth subnitrate	Germanium compounds
Tantalum-niobium, n.e.s.	Bismuth sulfate	Gold cyanide
Thallium monoxide	Bismuth tetraoxide	Gold sodium thiosulfate
	Bismuth trioxide	Gold trichloride
	Borates, refined	Hafnium compounds, n.e.s.
	Boron compounds and mixtures, n.e.s.	
	Cadmium bromide	

<sup>1</sup> A validated license is required for export of this commodity to the U.S.S.R.

Hydrogen peroxide, concentrations of less than 85 percent	Potassium bicarbonate	Sodium hypochlorite
Hydroxylapatite	Potassium bisulfate	Sodium hypophosphite
Iron chloride	Potassium bromate	Sodium iodide
Iron phosphate	Potassium bromide	Sodium metabisulfite
Iron sulfate	Potassium carbonate	Sodium metaphosphate
Iron sulfide, artificial	Potassium chlorate	Sodium metasilicate
Lead antimonate	Potassium chlorochromate	Sodium metavanadate
Lead arsenite	Potassium chromate	Sodium nitrate
Lead iodide	Potassium cyanide	Sodium nitrite
Lead nitrate	Potassium dichromate	Sodium nitroferrocyanide
Lead silicate	Potassium ferricyanide	Sodium orthosilicate
Lead silicate, basic	Potassium ferrocyanide	Sodium orthovanadate
Lead sulfate	Potassium fluoride	Sodium paraperiodate
Lead sulfate, basic	Potassium fluosilicate	Sodium perborate
Lead sulfate, blue basic	Potassium gold cyanide	Sodium perchlorate
Lead sulfate, tribasic	Potassium hypophosphite	Sodium periodate
Lead thiocyanate	Potassium iodate	Sodium persulfate
Lime bisulfate	Potassium iodide	Sodium phosphate
Lime, chlorinated	Potassium metabisulfite	Sodium phosphate, dibasic
Lime phosphate	Potassium nitrate, particle size greater than 100 microns	Sodium phosphate, monobasic
Lithium compounds, n.e.s.	Potassium perchlorate	Sodium phosphate, tribasic
Magnesium arsenide	Potassium periodate	Sodium phosphite
Magnesium carbonate	Potassium permanganate	Sodium polyphosphate
Magnesium chloride	Potassium persulfate	Sodium polysulfide
Magnesium fluosilicate	Potassium phosphate, dibasic	Sodium pyrophosphate
Magnesium hypophosphite	Potassium phosphate, monobasic	Sodium pyrophosphate, acid
Magnesium perchlorate	Potassium phosphate, tribasic	Sodium pyrovanadate
Magnesium phosphate	Potassium pyrophosphate	Sodium selenite
Magnesium silicate	Potassium silicate	Sodium sesquicarbonate
Magnesium silicofluoride	Potassium stannate	Sodium silicate
Magnesium sulfate	Potassium sulfate	Sodium silico aluminate
Magnesium thiosulfate	Potassium sulfide	Sodium stannate
Magnesium trisilicate	Potassium thiocyanate	Sodium sulfate
Magnesium tungstate	Potassium tripolyphosphate	Sodium sulfide
Manganese acetate	Rhenium compounds	Sodium sulfite
Manganese carbonate	Rubidium iodide	Sodium thiocyanate
Manganese hypophosphite	Sal soda	Sodium thiosulfate
Manganous chloride	Silanes	Sodium trimetaphosphate
Manganous nitrate	Silicon carbide, n.e.s.	Sodium tripolyphosphate
Manganous sulfate	Silver chloride	Sodium tungstate
Manganous sulfide	Silver cyanide, industrial	Stannic chloride
Mercuric bromide	Silver iodide	Stannous chloride
Mercuric chloride	Silver nitrate	Stannous sulfate
Mercuric cyanide	Silver oxide	Strontium bromide
Mercuric iodide	Silver sulfate	Strontium carbonate
Mercuric nitrate	Silver sulfide	Strontium chloride
Mercuric oxycyanide	Soda alum	Strontium iodide
Mercuric potassium iodide	Sodium aluminate	Strontium nitrate
Mercuric sulfate	Sodium ammonium phosphate	Strontium sulfate
Mercuric sulfide, black	Sodium aluminum sulfate	Tantalum compounds, n.e.s.
Mercuric sulfide, red	Sodium aluminum phosphate	Tantalum-niobium compounds, n.e.s.
Mercuric thiocyanate	Sodium antimonate	Theophylline
Mercurous chloride	Sodium arsenate	Titanium carbide
Mercurous nitrate, hydrated	Sodium azide	Titanium sulfate
Mercurous sulfate	Sodium bicarbonate	Titanium tetrachloride
Mercury, ammoniated	Sodium bifluoride	Titanium trichloride
Mercury fulminate	Sodium bisulfate	Tricalcium phosphate
Molybdenum salts and compounds	Sodium bromide	Vanadium carbide
Monocalcium phosphate	Sodium carbonate	Vanadyl sulfate
Monocalcium sulphate	Sodium carbonate peroxide	Zinc ammonium chloride
Nickel ammonium sulfate	Sodium chlorate	Zinc carbonate
Nickel carbonate	Sodium chlorite	Zinc chloride
Nickel chloride	Sodium chromate	Zinc chromate
Nickel nitrate	Sodium cyanide	Zinc cyanide
Nickel phosphate	Sodium dichromate	Zinc hydrosulfite
Nickel sulfate	Sodium ferricyanide	Zinc nitrate
Niobium (columbium) compounds, n.e.s.	Sodium ferrocyanate	Zinc oxide, U.S.P.
Palladium chloride	Sodium fluorosilicate	Zinc phosphate
Palladium salts and compounds	Sodium gold cyanide	Zinc phosphide
Pea carbide	Sodium hexafluorosilicate	Zinc silicate
Potash alum	Sodium hexametaphosphate	Zinc sulfate
Potash magnesia carbonate	Sodium hydride and dispersions	Zinc thiocyanate
Potassium alum	Sodium hydrosulfide	Zirconium compounds containing one part or more of hafnium to 500 parts of zirconium by weight
Potassium aluminum sulfate	Sodium hydrosulfite	Zirconium carbonate, basic
Potassium arsenite		

Zirconium phosphate  
Zirconium silicate  
Zirconium sulfate

*Interpretations 25-26*

[Reserved]

*Interpretation 27: Phosphate Materials  
Subject to Validated Licensing to the U.S.S.R.  
and Afghanistan*

The commodities described below are included in ECCN 6794F and are subject to the policy set forth in §§ 385.2(e) and 385.4(f).

Schedule B <sup>1</sup> No.	Commodity description
416.3000	Phosphoric acid, other than fertilizer grade
480.4500	Phosphates, crude and apatite
480.7015	Phosphoric acid, less than 65 percent available P <sub>2</sub> O <sub>5</sub> equivalents
480.7025	Phosphoric Acid, 65 percent or more available P <sub>2</sub> O <sub>5</sub> equivalents
480.7030	Normal and enriched superphosphates
480.7050	Concentrated superphosphates
480.7075	Other superphosphates
480.8005	Diammonium phosphates
480.8010	Monoammonium phosphates
480.8018	Other ammonium phosphates
480.8027	Other mixed chemical fertilizers containing 1
480.8065	percent or more P <sub>2</sub> O <sub>5</sub>

<sup>1</sup> Commodity description, not Schedule B Number, determines the commodity subject to validated licensing.

*Interpretation 28: Commodities and  
Transactions Not Classified According to  
Kind*

The commodities below require a validated license for export to **Country Groups S and Z**.

Bacteria and protozoa, as follows:

1. Bacteria, as follows:

(a) Attenuated or inactivated systems.

(b) Orders and Suborders, *the following only*:

Chlamydothales  
Hyphomicrobiales  
Caryophanales  
Beggiatoales  
Myxobacterales  
Rhodobacteriiales

(c) Families and Subfamilies, *the following only*:

Nitrobacteraceae  
Methanomadaeae  
Thiobacteriaceae  
Caulobacteraceae  
Siderocapsaceae  
Azatobacteraceae  
Rhizobiaceae  
Brevibacteriaceae  
Propionibacteriaceae  
Streptomycetaceae  
Serratia

(d) Genera, *the following only*:

Acetobacter  
Alginomonas  
Azotomonas  
Mycoplana  
Photobacterium  
Protaminobacter  
Zymomonas  
Achromobacter  
Agarobacterium  
Alcaligenes  
Aerobacter  
Alginobacter  
Paracolobactrum

Methanococcus  
Micrococcus  
Peptococcus  
Sarcina  
Veillonella  
Eubacterium  
Lactobacillus  
Leuconostoc  
Pediococcus  
Mycococcus  
Saprospira  
Spirochaeta  
Grahamella  
Anaplasma  
Ehrlichia  
Neorickettsiella  
Symbiotes  
Wolbachia

2. Protozoa, as follows:

(a) Classes, *the following only*:

Ciliata  
Suctoria  
Chryomonadida  
Cryptomonadida  
Phytomonadida  
Euglenoidida  
Chloromonadida  
Hypermastigida  
Proteomyxida  
Mycetomyxida  
Testacida  
Foraminiferida  
Heliozoida  
Radiolarida  
Gregarinida

(c) Families, *the following only*:

Procentridae  
Cystodiniidae  
Pronoctilucidae  
Pauchetiidae  
Noctilucidae  
Polykrikidae  
Peridiniidae  
Dinophysidae  
Multiciliidae  
Phalansteriidae  
Cadosigidae  
Bicosoecidae  
Amphimonadidae  
Trimastigidae  
Strebloplastigidae  
Pyrsonymphidae  
Devesconvinidae  
Calonymphidae  
Naegleriidae  
Amoebidae  
Paramoebidae  
Selenococciidae  
Aggregatidae  
Dabelliidae  
Adeleidae  
Ceratomyxidae  
Trilosporidae  
Myxidiidae  
Tetractonomyxidae  
Sphaeractonomyxidae  
Trisctionomyxidae  
Heractonomyxidae  
Coccosporidae  
Mrazekiidae  
Telomyxidae

*Interpretation 29: General Industrial  
Equipment*

The commodities listed below require a validated license for export to **Country Groups S and Z**.

General industrial equipment and parts therefor, n.e.s. *the following only*:

Abrasive circulators  
Abrasive-coating  
Accumulators, hydraulic  
Aerators  
Agricultural machines and appliances, n.e.s.  
Air-conditioning machines, n.e.s.  
Air or gas compressors, n.e.s.  
Air heaters, portable, fuel, fired, n.e.s.  
Armature winding  
Assembling fixtures, production, *except for production of military equipment*  
Basket-making  
Battery-making  
Binoculars and telescopes, including astronomical telescopes, n.e.s.  
Bituminous pavers, finishers, and spreaders  
Blenders  
Boiler room specialty tools  
Bottling, canning, cleaning, dishwashing, filling, packaging, and sealing machines, n.e.s.  
Broom-making  
Brush-making  
Button covering  
Button-making  
Cable-making, n.e.s.  
Cable spinning  
Calendering machines and similar rolling machines, n.e.s.  
Candle making  
Carpet sweepers, hand  
Cattle stunners  
Centrifuges, filtering, and purifying machines for liquids, air, and gases, n.e.s.  
Cigarette and cigar making and other tobacco processing  
Clay guns  
Cleaners, ultrasonic, n.e.s.  
Cleaning equipment, n.e.s., for magnetic tape and other recording media  
Cleaning units, sack  
Coil winding for electrical components  
Coiling, flexible casing or flexible tube  
Color mixing and dispensing  
Concrete pavers, finishers, and spreaders  
Coolers, evaporative type  
Cordage making  
Cranes, n.e.s., nonmilitary  
Creosoting, wood products  
Dehumidifiers, non-freezing  
Diving bells or suits, mechanically equipped  
Drawing, marking out, calculating, drafting, measuring, and checking appliances and machines, mechanical, nonelectric, or non-electronic, n.e.s.  
Environmental chambers, n.e.s.  
Excavating, leveling, mining, oilwell drilling, well drilling, construction, and maintenance equipment, n.e.s.<sup>1</sup>  
Fans and blowers, n.e.s.  
Fermentors  
Filament winding, n.e.s.  
Filters, ferro-magnetic  
Flame arrestors

<sup>1</sup> A validated license is required for export of oil well drilling equipment and oil field wire line and down hole equipment to the USSR, Estonia, Latvia, and Lithuania.

Floor finishers, sanders, scrubbers, and surfacers, industrial type  
 Fluorescent disposal units  
 Food processing machines  
 Freeze dryers  
 Fumigation chambers  
 Fur-blowing  
 Fur-treating  
 Garbage grinders, commercial and industrial  
 Gas operated welding, cutting, brazing, and surface tempering machines and appliances, n.e.s.  
 Gas or liquid supply meters, n.e.s.  
 Gas turbine engines, n.e.s.  
 Glass working machines, n.e.s.  
 Grinders and crushers, laboratory  
 Hand tools, n.e.s.  
 Hat-blocking and hat-making  
 Homogenizers, laboratory  
 Humidifiers, air  
 Ice breakers  
 Ice-crusher slingers  
 Ice saw and drill, combination type, engine driven  
 Impregnators, non-centrifugal  
 Incinerators, commercial and industrial  
 Incubator shakers  
 Industrial and laboratory nonelectric furnaces and ovens, n.e.s.  
 Internal combustion engines, reciprocating  
 Internal pneumatic line-up clamps for welding transmission line pipe  
 Lifting, loading, and conveying machines and equipment, n.e.s.  
 Line-travelling coating and wrapping for pipes and tubes  
 Linoleum-making  
 Lubricating  
 Machinery and equipment, n.e.s., for the manufacturing and assembling of electronic components, n.e.s.  
 Machines, n.e.s., for processing and working wood, cork, bone, ebonite, glass, plastics, cement products, stone, and similar mineral materials.  
 Machines, n.e.s., for treatment of a material involving a change in temperature.  
 Mattress filling  
 Measureograph for measuring cloth  
 Mechanical appliances for testing physical properties of industrial materials, n.e.s.  
 Mechanical instruments, n.e.s., for measurement, transmission, or control of temperature, pressure, or other variables of liquids or gases  
 Mechanical watches and clocks  
 Metal finishing, chemical  
 Metallurgical, mill, and foundry equipment, n.e.s.  
 Metering and mixing, n.e.s.  
 Microscopes, except electron and proton, n.e.s.  
 Nutters  
 Office machines, n.e.s.  
 Oil field wire line and downhole equipment<sup>1</sup>  
 Optical elements and appliances, n.e.s.  
 Paint markers and mixers  
 Paper making machinery  
 Photoprinters, n.e.s.  
 Pin ticketing (tag-to-product applying)  
 Pipe line cleaning

Plastic working, n.e.s.  
 Power sweepers  
 Power transmission equipment, n.e.s.  
 Presses, n.e.s.  
 Printed circuit board laminating presses and lead masters  
 Printing machines, n.e.s.  
 Proportioning, mixing, and dispensing resins  
 Pulsating dampeners  
 Pumps for liquids, n.e.s.  
 Reels, hose and cable, power operated  
 Refractory injection guns  
 Refrigerant charging apparatus, automatic  
 Refrigeration equipment, n.e.s.  
 Ribbon coiling  
 Roller coaters, n.e.s.  
 Rope-making  
 Rubber extruding and processing  
 Rubber products manufacturing, n.e.s.  
 Searchlights and spotlights  
 Shaking machines, laboratory  
 Shock absorbers, mechanical or hydraulic  
 Shoelace tipping  
 Smoke generators, *except military*  
 Snow throwers, self-propelled  
 Soldering, automotive wave and reflow type  
 Sonic sewing machines  
 Special purpose industrial vehicles, n.e.s., non-military, e.g., cement mixers, street and airfield cleaning, asphalt mixers, seismograph thumper mounted trucks, mine shuttle vehicles, trucks with derrick assembly and similar equipment for drilling, mounted integral to truck frame, etc.  
 Spinning  
 Spraying machines, n.e.s.  
 Steam cleaning  
 Steam generating power boilers, engines, and turbines, n.e.s.  
 Stone products manufacturing  
 Surgical dressing making  
 Surveying, hydrographic, meteorological, hydrological, and geophysical instruments, n.e.s.  
 Sweepers, road  
 Tank-cleaning  
 Tanks with agitators  
 Taping machines for covering wire and cable  
 Textile and leather working machines, n.e.s.  
 Tire building, recapping, and repairing  
 Toothbrush manufacturing  
 Track press for repairing tractor crawlers or tracks  
 Transfer machines, nonmetalworking, *except for assembling, gauging, or packing of munitions*  
 Tube cleaners  
 Tube expanders, maintenance type  
 Typemaking and typesetting machines, n.e.s.  
 Vacuum cleaners  
 Valves, plumbing fixtures, cocks, and taps, n.e.s.  
 Vegetable oil mill  
 Vibrating paper joggers  
 Vibrators, hydraulic  
 Wall-board plaster core  
 Watch-cleaning  
 Water bath shakers  
 Watercraft controls, nonelectric, *except military* (for example, steering equipment excluding rudders and remote controls)  
 Water turbines, water engines, wind, and hot air engines  
 Wax molding  
 Waxing, industrial

Weed cutting, underwater  
 Weighing machines  
 Welders, plastic, ultrasonic  
 Welding machines, n.e.s.  
 Welding rod brushing and feeders  
 Wheel tractors, including garden, log skidders, and contractors earthmoving types, n.e.s.  
 Wind tunnels, subsonic  
 Winding, n.e.s.  
 Windshield wipers, nonelectric  
 Wire braiding, wire rope-making, wire stitching, and measuring, stripping, cutting, and terminal attaching  
 Zipper manufacturing

*Interpretation 30: Petroleum and Natural Gas Exploration and Production Equipment*

The following is an illustrative list of petroleum and natural gas exploration and production equipment subject to validated license control for export to the USSR, Estonia, Latvia, and Lithuania. This list is illustrative only. It does not include all commodities which are covered by CCL entry Nos. 6191, 6391, and 6598.

(1) All equipment related to off-shore floating or bottom-supported drilling and producing structures, including all gathering equipment.

(2) Production and pipeline equipment designed for use in Arctic regions and the Polar Seas.

(3) Rotary type well drilling rigs and derricks.

(4) Parts, accessories, and equipment for well drilling machines, including, but not limited to, drill bits, box and pin tool joints, drill pipe, drill collars, rotary tables, and blow-out preventors.

(5) Petroleum gas-lift equipment.

(6) Oil well and oil field pumps, including, but not limited to, high performance types of submersible or conventional pumping units.

(7) Pipeline valves for oil and gas pipelines and high pressure steel hoses, pipes, and connections.

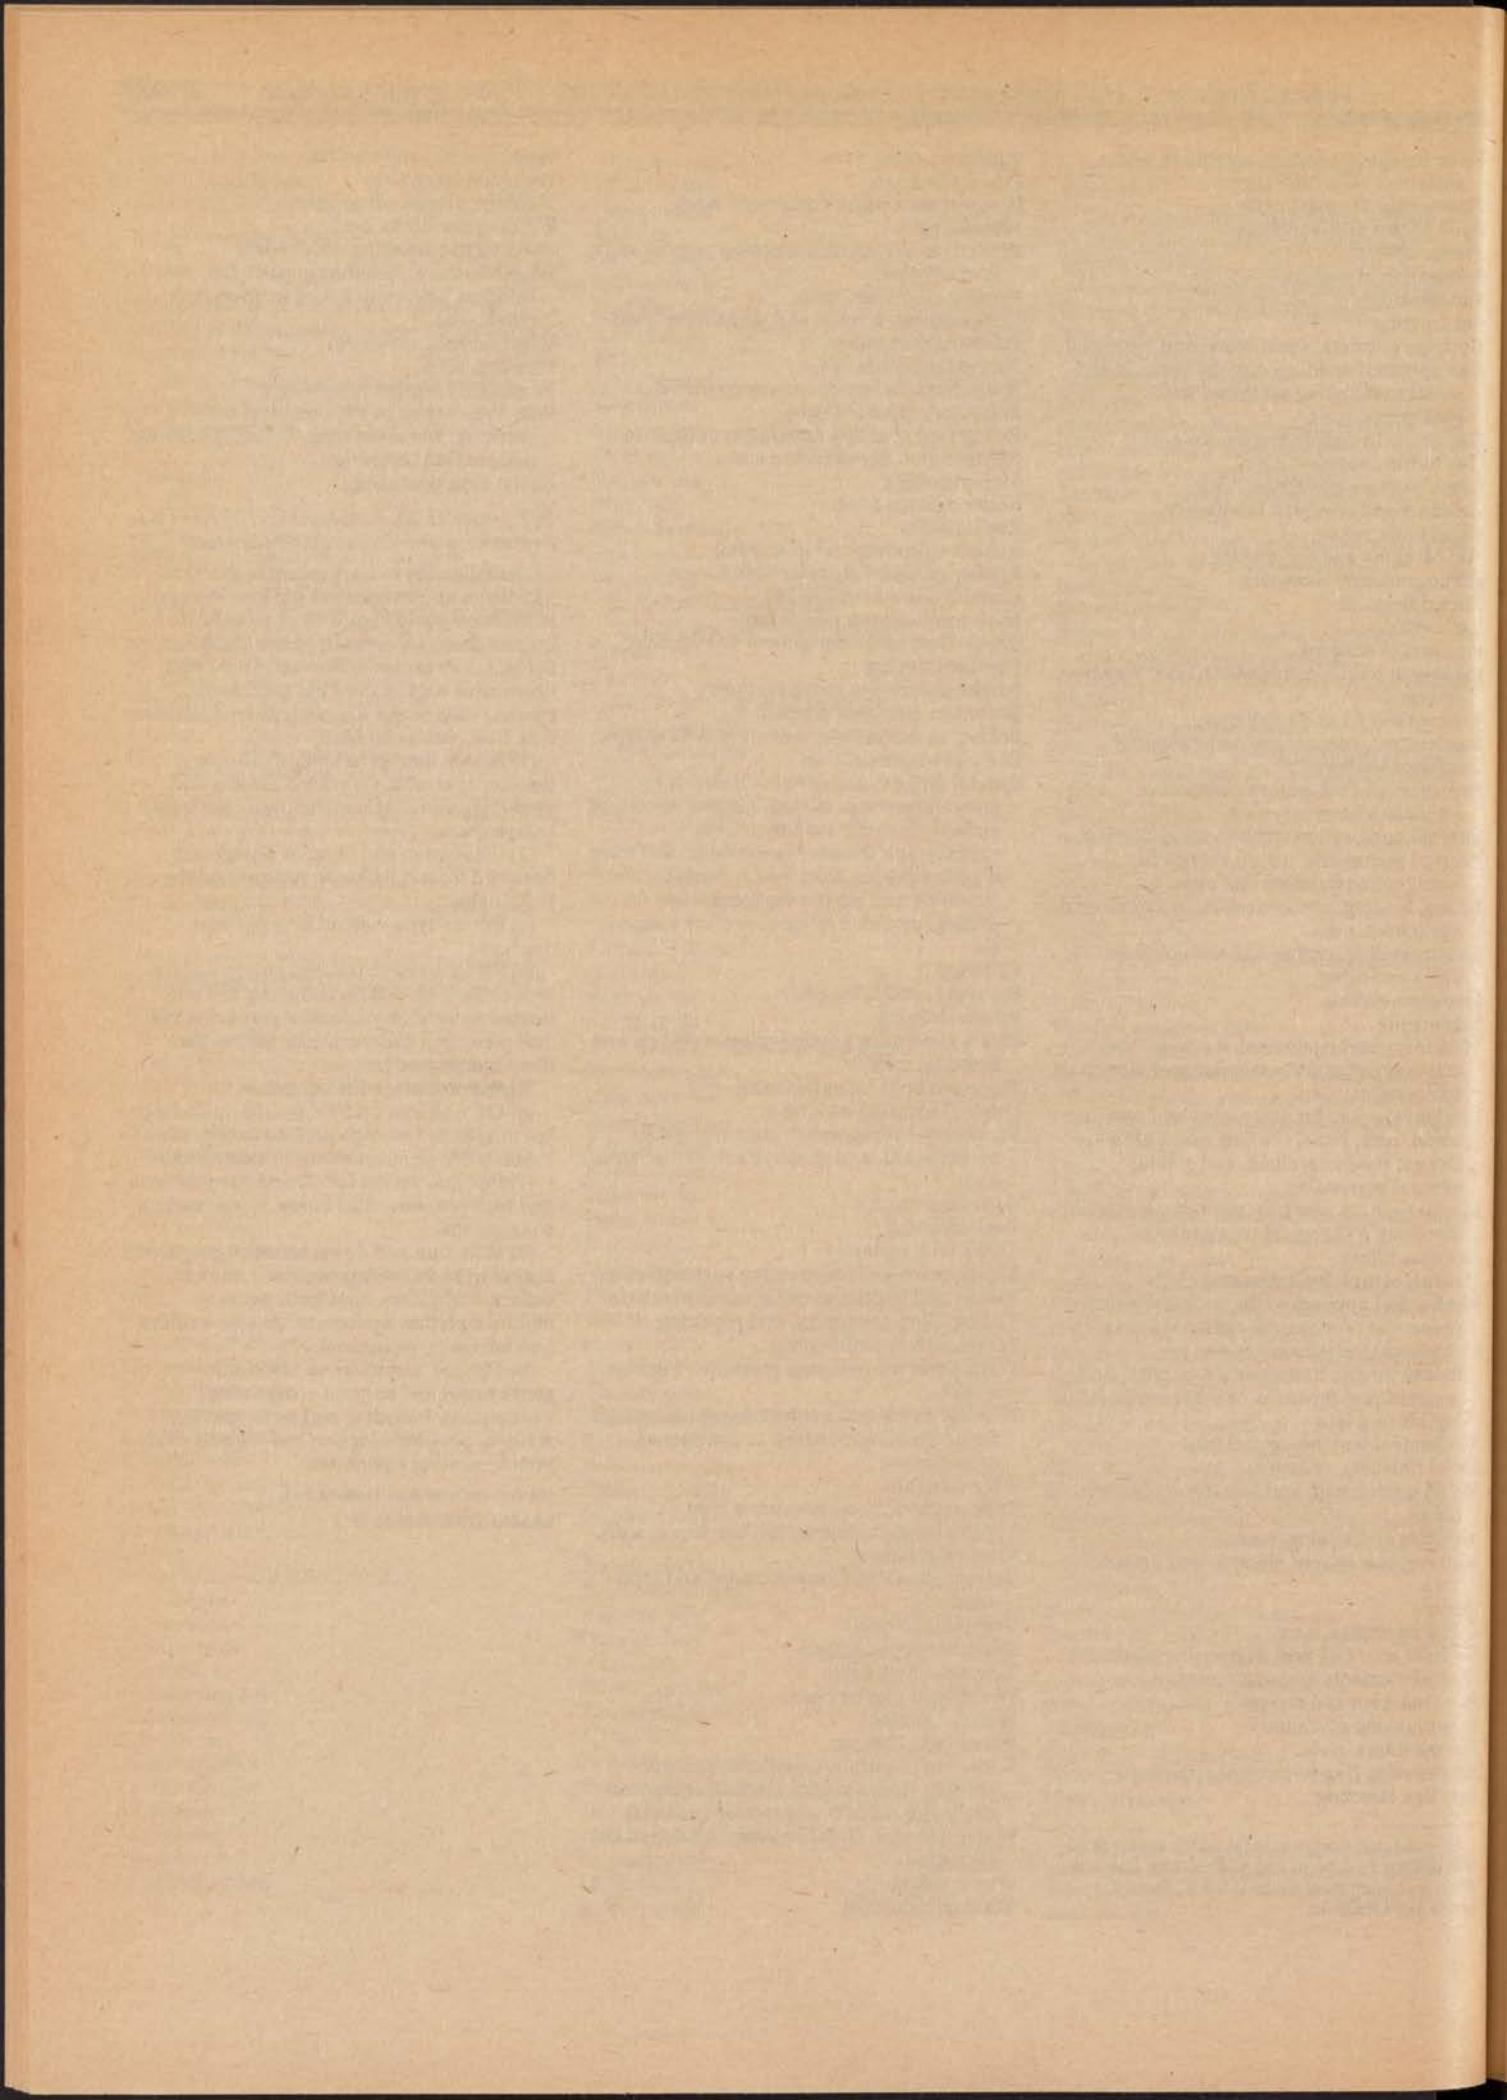

(8) Wire line and down-hole equipment and accessories, including, but not limited to, collars, stabilizers, mandrels, packers, multicompletion equipment, gun perforators, and telemetry equipment.

(9) Optical, electrical, or electronic geophysical and mineral prospecting instruments, including magnetic, gravity, seismic, bore-hole logging and high-resolution remote sensing equipment.

[FR Doc. 80-39748 Filed 12-29-80; 8:45]

BILLING CODE 3510-25-M

<sup>1</sup> A validated license is required for export of oil well drilling equipment and oil field wire line and down hole equipment to the U.S.S.R., Estonia, Latvia and Lithuania.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

#### 21 CFR Part 872

[Docket No. 78N-2830]

#### Classification of Dental Devices; Development of General Provisions

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is proposing general rules applicable to the classification of all dental devices. The Medical Device Amendments of 1976 require FDA to classify all medical devices intended for human use into three categories: class I, general controls; class II, performance standards; and class III, premarket approval. In the preamble to this proposal, FDA describes the development of the proposed regulations classifying individual dental devices, which are being published elsewhere in this issue of the *Federal Register*. The preamble also describes the activities of the Dental Device Section of the Ophthalmic, Ear, Nose, Throat; and Dental Devices Panel, an FDA advisory committee, that makes recommendations to FDA concerning the classification of dental devices.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Device Classification System

The Medical Device Amendments of 1976 (Pub. L. 94-295, hereinafter called the amendments) establish a comprehensive system for the regulation of medical devices intended for human use. One provision of the amendments, section 513 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360c) establishes three categories (classes) of devices, depending on the regulatory controls needed to provide reasonable assurance of their safety and effectiveness. The three categories are

as follows: class I, general controls; class II, performance standards; and class III, premarket approval.

Most devices are not classified under section 513 of the act until after FDA has (1) received a recommendation from a device classification panel (an FDA advisory committee); (2) published the Panel's recommendation for comment, along with a proposed regulation classifying the device; and (3) published a final regulation classifying the device. These steps must precede the classification of any device that was in commercial distribution before May 28, 1976 (the date of enactment of the amendments) and that was not previously regarded by FDA as a new drug under section 505 of the act (21 U.S.C. 355). A device that is first offered for commercial distribution after May 28, 1976, and that is substantially equivalent to a device classified under this scheme, is classified in the same class as the device to which it is substantially equivalent.

A device that FDA previously regarded as a new drug, or a newly offered device that is not substantially equivalent to a device that was in commercial distribution before the amendments, is classified by statute into class III. These two types of devices are classified into class III without any FDA rulemaking proceedings. The agency determines whether new devices are substantially equivalent to previously offered devices by means of the premarket notification procedure in section 510(k) of the act (21 U.S.C. 360(k)) and Part 807 of the regulations (21 CFR Part 807).

##### Related Regulations

In the *Federal Register* of July 28, 1978 (43 FR 32988), FDA issued final regulations describing the procedures for classifying devices intended for human use. These regulations, which were proposed in the *Federal Register* of September 13, 1977 (42 FR 46028), supplement the agency's regulations in Part 14 (21 CFR Part 14) governing the use of advisory committees. The agency also issued interim device classification procedures in a notice published in the *Federal Register* of May 19, 1975 (40 FR 21848).

##### Activities of Panel

Anticipating enactment of the amendments, FDA established several advisory committees to make preliminary recommendations on device classification. The Dental Device Classification Panel (the Panel) was originally chartered on October 15, 1974, as the Panel on Review of Dental Devices. FDA placed a report of the

Panel's tentative classification recommendations on file with the office of the Hearing Clerk (HFA-305), Food and Drug Administration, and announced the availability of the report to the public by notice published in the *Federal Register* of June 25, 1976 (41 FR 26245). On August 9, 1976, the Panel and other preamendments device classification panels were rechartered to reflect their new responsibilities under the amendments. The agency directed each panel to reconsider its preamendments classification recommendations in light of the new requirements. In 1976 and 1977, the Panel reviewed all devices that FDA had referred to it to make certain that its recommendations were in accord with the amendments. Throughout the Panel's deliberations, interested persons were given an opportunity to present their views, data, and other information concerning the classification of dental devices. The Panel also invited experts to testify and sought information on many devices from the published literature.

In October 1977, the Panel submitted to FDA a preliminary report of its recommendations. The report included a roster of current and former Panel members and consultants and listed all meeting dates. The agency placed a copy of the report in the office of the Hearing Clerk (HFA-305), Food and Drug Administration, and announced its availability to the public by notice published in the *Federal Register* of November 29, 1977 (42 FR 60792). Also available in the office of the Hearing Clerk are summary minutes from all Panel meetings, verbatim transcripts of meetings held after May 28, 1976 (the date of enactment of the amendments), and all references cited in individual dental device proposed classification regulations.

On April 28, 1978, the agency terminated all of the device classification panels, and then reestablished them with new names and with a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, and 21668) and May 26, 1978 (43 FR 22672 and 22673). The Dental Device Classification Panel was terminated, and its functions are now conducted by the Dental Device Section of the Ophthalmic, Ear, Nose, Throat; and Dental Devices Panel.

##### Relationship Between the Device Names in the Device Registration and Listing Codes and the Device Names in Classification Regulations

Some manufacturers have become accustomed to identifying a device by

its registration and listing name and three-letter code and used for purposes of device listing under section 510 of the act (21 U.S.C. 360). However, FDA is still making changes in the names and identifications of generic types of devices in the classification regulations for all devices for which final regulations have not been published. Because FDA has not used the present device registration and listing names in the proposed and final classification regulations, FDA has prepared an index of names of generic types of medical devices used in classification regulations to aid a manufacturer in matching its device with the proper classification regulation. The index shows the device registration and listing product code for each device reviewed by a classification panel and the corresponding name of the generic type of device and classification panel in which the device classification will be published in the *Federal Register*. The Agency announced the availability of this index in the *Federal Register* of March 6, 1979 (44 FR 12269). If necessary, this index will be updated and the availability of the revised index will be reannounced in the *Federal Register*. FDA believes that, because this index is available, it is unnecessary to include or cross-reference the present device registration and listing name and product code in the classification regulations. In the future, following publication of most of the device classification regulations, the agency will revise and reissue the device registration and listing product code, so the device names to be used for registration and listing correspond to the device names in the final device classification regulations.

#### List of Dental Devices

In 1972, FDA surveyed device manufacturers to identify the devices for which classification regulations would be needed. Following this survey, FDA developed a list of dental devices. The Panel supplemented the list utilizing its members' knowledge of dental devices in use. Devices that were solely for experimental or investigational use or that were not generally available were not included.

FDA is proposing to establish a new Part 872 in Title 21 of the Code of Federal Regulations. Part 872 will consist of sections identifying each dental device with a brief narrative description and stating the classification of that device. A list of the dental devices appears elsewhere in this preamble.

#### Individual Dental Device Classification Regulations

Elsewhere in this issue of the *Federal Register*, FDA is issuing 185 individual proposed regulations to classify each dental device. FDA is proposing to classify 49 dental devices into class I (general controls), 122 dental devices into class II (performance standards), 13 dental devices into class III (premarket approval); and one dental device into either class I or class II, depending upon the construction of the device. The agency also is publishing the recommendations of the Panel regarding these devices, as required by section 513(c)(2) and (d)(1) of the act (21 U.S.C. 360c(c)(2) and (d)(1)).

#### Interaction Between the Bureau of Medical Devices and the Bureau of Radiological Health

In addition to its authority under the amendments, FDA has authority to regulate some medical devices under the Radiation Control for Health and Safety Act of 1968 (Pub. L. 90-602). Public Law 90-602 authorized FDA to establish and execute a program to control electronic product radiation that includes performance standards for electronic products and their related accessories. Radiation emission performance standards have been, and will continue to be, established for those medical devices that emit electronic product radiation. Performance standards have already been promulgated for diagnostic X-ray systems and their major components (21 CFR 1020.30); radiographic equipment (21 CFR 1020.31); fluoroscopic equipment (21 CFR 1020.32); laser products (whether or not for medical use) (21 CFR 1040.11), and ultrasonic therapy products (21 CFR 1050.10). The agency will continue to use its authority over radiation-emitting electronic medical products under both the amendments and the Radiation Control for Health and Safety Act of 1968, as appropriate.

#### Published Panel Recommendations

Each published Panel recommendation concerning a dental device includes the information described below.

1. *Identification.* Both the Panel recommendation and the proposed FDA classification regulation include a brief narrative identification of the device. The identification statement is necessarily broad because it applies to a category or type of device rather than to a specific device. As explained in proposed § 872.1, any manufacturer of a newly offered device who files a premarket notification submission under

section 510(k) of the act (21 U.S.C. 360(k)) and Part 807 (21 CFR Part 807) of the regulations cannot show merely that the device is accurately described by the section title and identification provisions of a classification regulation. Although a newly offered device may be described accurately by the title and identification in a classification regulation, it is nevertheless in class III under section 513(f) of the act if it is not substantially equivalent to a preamendments device (or to a postamendments device that has already been reclassified from class III into class I or class II). It is not practical for FDA to publish an identification of each type of device that is so detailed as to anticipate every product feature that may be relevant in determining whether a new device is substantially equivalent to previous devices classified by the regulation. The agency believes that this problem was recognized in, and addressed by, the premarket notification procedures in section 510(k) of the act. Accordingly, any manufacturer who submits a premarket notification submission should state why the manufacturer believes the device is substantially equivalent to other devices in commercial distribution, as required by § 807.87 (21 CFR 807.87), and whether the device is described in a classification regulation.

2. *Recommended classification.* Each Panel's recommendation describes whether the device is recommended for classification into class I (general controls), class II (performance standards), or class III (premarket approval).

For each device recommended for classification into class I, the Panel considered whether the device should be exempt from any requirements under certain sections of the act: section 510 (21 U.S.C. 360, registration), section 519 (21 U.S.C. 360i, records and reports), and section 520(f) (21 U.S.C. 360j(f), the good manufacturing practice requirements). The Panel recommended that several devices be exempted from section 510, section 519, and section 520(f) of the act in the manufacture of these devices. The agency's policy concerning these exemption recommendations is discussed below in the section of this proposal concerning "Exemptions for Class I Devices."

A Panel recommendation that a device be classified into class II includes the Panel's recommended priority ("high," "medium," or "low") for establishing a performance standard for the device. Similarly, each Panel recommendation that a device be classified into class III includes the

Panel's recommended priority ("high," "medium," or "low") for application of premarket approval requirements to that device. As explained below in the section of this notice concerning "Priorities for Class II and III Devices," the agency is not, however, proposing the establishment of FDA priorities at this time.

3. *Summary of reasons for recommendation.* The summary of reasons for the Panel's recommendation explains why the Panel believes that a particular device meets the statutory criteria for classification into class I, II, or III.

Except in those instances in which FDA's classification proposal differs from the Panel's recommendation, FDA is adopting the Panel's summary of reasons as the agency's statement of the reasons for issuing the regulations, as required by section 517(f) of the act (21 U.S.C. 360g(f)).

4. *Summary of date on which the recommendation is based.* In many cases, the Panel based its recommendations on Panel members' personal knowledge of, and clinical experience with, the devices under review. The Panel particularly relied upon clinical experience and judgment when considering a simple device that had been used extensively and was accepted widely before the amendments were enacted. The legislative history of the amendments provides that the term "data" has a special meaning in section 513(c)(2)(A) of the act, which requires that a Panel recommendation summarize the data upon which a recommendation is based. As used in that section, "data" refers not only to the results of scientific experiments, but also to less formal evidence, other scientific information, or judgments of experts (House Committee on Interstate and Foreign Commerce, Medical Device Amendments of 1976, H.R. Rept. No. 94-853, 94th Congress, 2d Session 40 (1976)). FDA has determined that clinical experience and judgment constitute valid scientific evidence for classifying certain devices.

In many cases, FDA sought more data and information concerning the classification of a device than were cited by the Panel. References to these data and information are found in the "Proposed Classification" section of the preambles to individual dental device regulations. The agency is adopting as its statement of the basis for issuing the regulation under section 517(f) of the act the Panel's summary of the data on which a recommendation to classify a device is based, together with any additional data and information cited in the preamble to the proposed classification regulation.

5. *Risks to health.* In identifying the risks to health presented by dental devices, the Panel recognized that few devices are completely free of risk. The Panel listed the risks it considered most significant, especially those that are unique to the individual device. In some cases, FDA has identified risks to health presented by a device in addition to those listed by the Panel. These additional risks are set out in the section of the preamble concerning the "Proposed Classification" of a particular device.

In addition to those hazards explicitly mentioned, the Panel and FDA recognize that there are general hazards associated with certain types of devices. For example, trauma may be associated with moving or powered device components. In any diagnostic device, accurate results must be obtained in a usable form in order to avoid misdiagnosis and incorrect patient management or to avoid the additional radiation exposure necessitated by a repeat procedure. The absence of a discussion of these general hazards does not imply that they are insignificant or that they were not considered in determining a proposed classification.

Because the classification recommendations and FDA regulations may not identify all risks to health presented by dental devices, future regulations establishing performance standards under section 514 of the act (21 U.S.C. 360d) or requiring premarket approval under section 515(b) of the act (21 U.S.C. 360e(b)) may identify additional risks to health to be addressed by FDA requirements.

#### Proposed classification

Each proposed regulation to classify a dental device states whether FDA agrees with the Panel's recommendation, describes the agency's proposed classification of the device, and proposes a new section in Part 872 in which the device classification will be codified. FDA is proposing that 75 of the devices that the Dental Device Section of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel recommended for classification into class I be classified into class II. The agency has identified risks to health, such as lack of biocompatibility of materials used in the devices, that would be controlled by performance standards. The agency believes that general controls alone are insufficient to control the risks to health presented by these 75 devices. In March 1979, FDA sent a letter to each member of the Dental Device Section. The letter to the members of the Section explained the agency's proposed change in the classification of the 75 devices. A copy

of the agency's letter to members of the Section is on file with the Hearing Clerk, at the address noted above (Ref. 1).

FDA cautions that the final classification of a device may differ from the proposal. Factors that may cause such a change include comments, the agency's reconsideration of existing data and information, and the agency's consideration of new data and information.

#### Panel Definition of a Dental Implant

The Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel identified a dental implant as a device that is surgically placed into, or in opposition to, the maxilla or mandible and which protrudes through the mucosa of the oral cavity. According to this Panel definition, restorative materials placed in the teeth, such as amalgams, gold alloys, silicates, and cements, are not implants.

#### Priorities for Class II and Class III Devices

For a device that the Panel recommends classification into class II or class III, section 513(c)(2)(A) of the act requires that the Panel recommendation include, to the extent practicable, a recommendation for the assignment of a priority for application to the device of performance standards or premarket approval requirements. In developing its advice concerning priorities ("high," "medium," or "low") of devices recommended for classification into class II or class III, the Panel compared the device with other dental devices, based on information available to the Panel members concerning the relative importance of use of the device and the relative risks presented by the device. The Panel recommended assignment of a "high priority" only to those class II or class III devices that the Panel believed should receive the agency's immediate attention.

FDA is not proposing at this time to establish priorities for development of performance standards for all class II devices. Section 513(d)(3) of the act authorizes, but does not require, establishment of these priorities. In the *Federal Register* of February 1, 1980 (45 FR 7489 and 45 FR 7493), FDA published notices identifying which class II devices the agency found to warrant a high priority for the development of performance standards. At a later date, the agency will establish priorities for the development of standards for the remaining class II devices. All priorities established by the agency are based on the classification panels' recommendations, available resources,

and other relevant factors. The agency's priorities will be reflected in the agency's annual budget request and other publicly available documents and may be published in the **Federal Register**.

The agency intends to proceed as quickly as the statute and panel resources permit to require premarket approval of devices classified into class III. Two factors affect the length of time before FDA requires submission of premarket approval applications for any particular device that is classified by an FDA regulation into class III: the number of devices reviewed by a panel and the priority of a particular device in relation to other class III devices considered by a panel. For example, where FDA classifies into class III only a few devices within a Panel's specialty area, FDA may, at the same time, publish regulations under section 515(b) of the act requiring premarket approval for many of the class III devices considered by the Panel, regardless of whether of a high or a low priority. Where practical, FDA will publish these section 515(b) regulations during the grace period (30 months) following classification, during which 30 month period a device classified into class III by FDA regulation may lawfully remain on the market without a premarket approval application. The grace period is provided for in section 501(f) of the act (21 U.S.C. 351(f)).

#### Products That Have Both Medical and Nonmedical Uses

Some products have both medical and nonmedical uses. FDA will regulate a multipurpose product as a medical device if it is intended for a medical purpose, i.e., for "use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of disease," or "to affect the structure or any function of the body." Section 210(h) of the act (21 U.S.C. 321(h)). FDA will determine the intended use of a product based upon the expressions of the person legally responsible for its labeling and by the circumstances surrounding its distribution. The most important factors the agency will consider in determining the intended use of a particular product are the labeling, advertising, and other representations accompanying the product. Products that have medical uses only are clearly intended for medical purposes and, therefore, will be regulated as medical devices whether or not medical claims are made for them.

#### Exemptions for Class I Devices

Section 513 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360c)

provides that FDA may exempt a device recommended for classification into class I from a requirement under the following sections of the act: section 510 (21 U.S.C. 360), registration; section 519 (21 U.S.C. 360i), records and reports; and section 520(f) (21 U.S.C. 360j(f)), good manufacturing practice.

Under section 510 of the act, a person "engaged in the manufacture, preparation, propagation, compounding or processing of \* \* \* a device or devices" must register with FDA (section 510 (b) through (i)), file a list of devices (section 510(j)), and notify FDA at least 90 days before beginning commercial distribution of a device (section 510(k)). (See 21 CFR Part 807.) Section 510(g)(4) authorizes the agency to exempt a device from section 510 if it finds that compliance with that section is not necessary for the protection of the public health. In § 807.65 (21 CFR 807.65), FDA has exempted certain classes of persons from section 510 of the act. Several device panels have recommended that manufacturers of certain class I devices also be exempted from all or some of the requirements of section 510. The agency has determined that protection of the public health requires that manufacturers of medical devices, other than those already exempt under § 807.65, register and list their products with FDA to ensure that the agency can identify these manufacturers and their products and conduct necessary inspections.

The agency has determined, however, that it is not necessary for the protection of the public health that FDA receive premarket notification submissions for certain devices. Thus, the agency has proposed to exempt manufacturers of certain devices from Subpart E of Part 807 of the regulations, which implements section 510(k) of the act. The agency does not, at this time, anticipate that premarket approval will be required for these devices. The agency believes that the semiannual updating of device listing under section 510(j)(2) of the act will provide FDA with adequate notice of new products within these generic types of devices.

Section 519 of the act authorizes FDA to issue regulations requiring device manufacturers, importers, and distributors to establish and maintain such records, make such reports, and provide such information as the agency may reasonably require to assure that devices are not adulterated or misbranded and to otherwise assure their safety and effectiveness. The records and reports requirements in several of FDA's present device regulations are authorized, wholly or in

part, by section 519. The most extensive of these requirements are found in the device good manufacturing practice (GMP) regulation under Part 820 (21 CFR Part 820), published in the **Federal Register** of July 21, 1978 (43 FR 31508). In the future, FDA will publish other regulations in accordance with section 519 of the act, including a regulation requiring reports to FDA of experiences with medical devices. Until these regulations are issued, FDA believes that it cannot properly issue exemptions from them. In the future, whenever the agency proposes device regulations that include records and reports requirements, interested persons may submit comments requesting that certain classes of manufacturers or other persons be exempted from the requirements, and FDA will issue exemptions that are appropriate.

The only type of exemption from records and reports requirements that FDA is proposing now, in device classification regulations, is an exemption of certain manufacturers from most requirements of the device GMP regulation. As explained below the exemption will not extend to two device GMP records requirements.

The device GMP regulation was published in final form in the **Federal Register** of July 21, 1978. At the time of the Panel's recommendations, the GMP regulation had not yet been promulgated, and the agency had not yet developed criteria for exempting manufacturers of a class I device from GMP requirements. The agency has now decided that, if any one of the following criteria is met, FDA will consider exempting from the GMP regulation manufacturers of a class I device that is not labeled or otherwise represented as sterile. The agency will not, however, exempt manufacturers of a device from general requirements concerning records or complaint files. The criteria are:

1. FDA has determined, based on adequate information about current practices in the manufacture of the device and about user experience with the device, that application of the GMP regulation is unlikely to improve the safety and effectiveness of the device.
2. FDA has determined that all possible defects relating to the safety and effectiveness of the device are readily detectable before use, either through visual examination by the user or routine testing before use, e.g., testing a clinical laboratory reagent with positive and negative controls.
3. FDA has determined that any defect in the device that is not readily detectable will not result in a device failure that could have an adverse effect on the patient or other user.

FDA has determined that no device that is labeled or otherwise represented as sterile will be exempted from the device GMP regulation. A sterile device must be subject to the entire GMP regulation to ensure that manufacturers adequately reduce the bioburden (number of microorganisms) on the device and its components during the manufacturing process. This reduction is accomplished through adherence to a comprehensive quality assurance program as is required by the GMP regulation, with adequate environmental controls, trained personnel, appropriate maintenance and calibration of sterilization equipment, recordkeeping concerning lot sterility, strict packaging and labeling controls, and other quality assurance measures.

The agency also has determined that no exemption from the device GMP regulation will extend to § 820.180, with respect to general requirements concerning records, or § 820.198, with respect to complaint files. The agency believes that granting exemptions from these sections would not be in the public interest and that compliance with these sections is not unduly burdensome for device manufacturers. To ensure that device manufacturers have adequate systems for complaint investigation and followup, all manufacturers are required to comply with the complaint file requirements. All device manufacturers also are required to comply with the general requirements concerning records to ensure that FDA has access to complaint files, can investigate device-related injury reports and complaints about product defects, can determine whether the manufacturer's corrective actions are adequate, and can determine whether the exemption from other sections of the GMP regulation is still appropriate.

In general, FDA has not initiated proposals to exempt manufacturers of devices from requirements under section 510 or 520(f) of the act, but has acted on the basis of exemption recommendations of the device classification panels. However, FDA has proposed occasionally to exempt manufacturers of certain devices classified into class I or class II from the requirements of certain sections of the GMP regulation, according to the above exemption criteria. Manufacturers and other interested persons may submit comments on the appropriateness of the

proposed exemptions of manufacturers of devices, whether the exemptions are proposed in response to recommendations of the panels or on the agency's initiative. Comments requesting additional exemptions should be supported by information showing that the exemption of manufacturers of a device from the premarket notification requirement or the GMP regulation is consistent with the criteria discussed above.

#### Guidelines for Preparing Petitions Requesting Exemption or Variance From the Device GMP Regulation for Devices Classified Into Class I or Class II

FDA has prepared guidelines on the procedures that should be followed by persons who wish to submit petitions for

exemption or variance from the device GMP regulation. These petitions may be submitted in accordance with provisions of section 520(f)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j(f)(2)). The agency announced the availability of the guidelines in a notice published in the *Federal Register* of January 18, 1980 (45 FR 3671).

#### List of Dental Devices

The following is a list of dental devices that FDA is proposing to classify, the section and subpart of Part 872 in the Code of Federal Regulations under which the regulation classifying the device will be codified, the docket number of the proposed classification regulation, and the proposed classification of each device.

Section	Device	Docket No.	Class
<b>Subpart B—Dental Diagnostic Devices</b>			
872.1500	Gingival fluid measurer	78N-2831	I
872.1720	Pulp tester	78N-2834	II
872.1730	Electrode gel for pulp tester	78N-2835	II
872.1800	Extraoral source X-ray system	78N-2836	II

### Devices Considered by Two or More Panels

The Dental Device Section of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel and the other panels listed below made classification recommendations concerning the following devices:

#### Device—Other Panels

X-ray film cassette—Obstetrics-Gynecology and Radiologic  
 Extra oral X-ray dental film—Obstetrics-Gynecology and Radiologic  
 Intra oral X-ray dental film—Obstetrics-Gynecology and Radiologic  
 Intensifying radiographic screen—Obstetrics-

Gynecology and Radiologic  
 Automatic radiographic film processor—Obstetrics-Gynecology and Radiologic  
 Lead apron—Obstetrics-Gynecology and Radiologic  
 Lead operator radiation protector—Obstetrics-Gynecology and Radiologic  
 Anesthesia flowmeter—Respiratory and Nervous System  
 Compressed gas cylinder and valve—Respiratory and Nervous System  
 Analgesia/anesthesia gas machine—Respiratory and Nervous System  
 Resuscitation and emergency oxygen unit—Respiratory and Nervous System  
 Cotton applicator—General Medical  
 Autoclave—General Medical  
 Ethylene oxide gas sterilizer—General Medical

Luer-lock drug syringe—General Medical  
Tongue depressor—General Medical  
Gauze sponge—Surgical and Rehabilitation  
Surgical knife—Surgical and Rehabilitation  
Dental suture—Surgical and Rehabilitation  
Iontophoresis device—Surgical and  
Rehabilitation

The agency is not at this time publishing the recommendations of the Dental Device Section of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel to classify the devices listed above. The agency has published, or will publish, these recommendations and proposed classification regulations along with the recommendations of other Panels that reviewed the devices. Some of these other Panels' recommendations have already been published in the *Federal Register*. The following table shows the current structure of the advisory committees involved with classification of medical devices and a list of all proposed and final classification regulations published to date:

*Panel/Section Name—Publication Date in Federal Register*

*Circulatory Systems Devices Panel*—March 9, 1979 44 FR 13284-13434 (proposals); February 5, 1980, 45 FR 7904-7971 (final regulations)

*Clinical Chemistry and Hematology Devices Panel*

Clinical Chemistry Device Section  
Clinical Toxicology Device Section

Ear, Nose, and Throat Device Section  
Dental Device Section

*Respiratory and Nervous System Devices Panel*

Anesthesiology Device Section—November 2, 1979, 44 FR 63293-63426 (proposals)

Neurological Device Section—November 28, 1978, 43 FR 54640-55732 (proposals); September 4, 1979, 44 FR 51726-51778 (final regulations)

*Surgical and Rehabilitation Devices Panel*

Physical Medicine device section—August 28, 1979, 44 FR 50458-50537 (proposals)  
Orthopedic Device Section  
General and Plastic Surgery Device Section

FDA has determined that the following devices reviewed by the Ophthalmic Ear, Nose, Throat, and Dental Devices Panel are identical to devices that have been reviewed by the General Hospital and Personal Use Device Section of the General Medical Devices Panel and classified by regulations published with that Panel: Dry heat sterilizer; air or water bulb syringe; and irrigating syringe. FDA has also determined that these dental devices should be included in the generic types of devices that have already been classified in regulations published with the General Medical Devices Panel. However, because the proposed general hospital and personal use device classification regulations were published before FDA determined that the devices in question were identical, the agency did not publish the recommendations of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel at that time. Accordingly, the agency is publishing the recommendations of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel for these devices, as required by the amendments. Interested persons are invited to comment, in accordance with the procedure set forth at the end of this notice, on the Panels' recommendations and on the agency's determinations that the devices described below are identical to the general hospital and personal use devices.

1. The Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel recommends that the dry heat sterilizer be classified into class II because it believes that the dry heat sterilizer should be capable of sterilizing dental instruments properly. The Panel based its recommendation on the Panel members' clinical experience with this device. The Panel identified infection in the patient as a risk to health from use of this device.

FDA has determined that the dry heat sterilizer classified by the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel is identical to the device with the same name considered by the General Hospital and Personal Use Device Section of the General Medical Devices Panel. On August 24, 1979, FDA published in the *Federal Register* (44 FR 49947) a proposed regulation, based on

that Panel recommendation, classifying the dry heat sterilizer into class II.

2. The Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel recommends that both the air or water bulb syringe and the irrigating syringe be classified into class I with exemptions from premarket notification procedures and the good manufacturing practice requirements because it believes that both the air or water bulb syringe and the irrigating syringe are simple devices that present no risks to health. The Panel based its recommendation on the Panel members' clinical experience with these devices.

The agency has determined that both the air or water bulb syringe and the irrigating syringe classified by the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel are identical to the irrigating syringe considered by the General Hospital and Personal Use Device Section of the General Medical Devices Panel. On August 24, 1979, FDA published in the *Federal Register* (44 FR 49951) a proposed regulation based on that Panel recommendation classifying the irrigating syringe into class I.

#### Dental Products Regulated as Drugs

The Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel made classification recommendations concerning the following three dental products that FDA has determined will be regulated as drugs rather than as devices: plaque-disclosing kits, lingual ascorbic acid tests, and root canal cleansers. The agency is not publishing proposal classification regulations for these products.

#### Environmental Impact

The agency has determined under 21 CFR 25.24(b)(12) (proposed December 11, 1979; 44 FR 71742) that this proposed action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, the agency has concluded that neither an environmental assessment nor an environmental impact statement is required.

#### Reference

The following information has been placed in the office of the Hearing Clerk (address above) and may be seen by interested persons from 9 a.m. and 4 p.m., Monday through Friday.

1. Letter dated March 22, 1979 from D. Gregory Singleton, Executive Secretary, Dental Device Section of the Ophthalmic; Ear, Nose, Throat; and Dental Devices Panel to members of this Section.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21

U.S.C. 360c, 371(a)), and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes that Chapter I of Title 21 of the code of Federal Regulations be amended by adding new Part 872, Subpart A, to read as follows:

## PART 872—DENTAL DEVICES

### Subpart A—General Provisions

Sec.

871.1 Scope.

Authority: Secs. 513 and 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c and 371(a)).

### Subpart A—General Provisions

#### § 872.1 Scope.

(a) This part sets forth the classification of dental devices intended for human use.

(b) The identification of a device in a regulation in this part is not a precise description of every device that is, or will be, subject to the regulation. A manufacturer who submits a premarket notification submission for a device under Part 807 cannot show merely that the device is accurately described by the section title and identification provision of a regulation in this part, but shall state why the device is substantially equivalent to other devices, as required by § 807.87.

(c) To avoid duplicative listings, a dental device that has two or more types of uses (e.g., used both as a diagnostic device and as a therapeutic device) is listed in one subpart only.

(d) References in this part to regulatory sections of the Code of Federal Regulations are to Chapter I of Title 21 unless otherwise noted.

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, as amended by Executive Order 12221, the economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve major economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file

with the Hearing Clerk, Food and Drug Administration.

Dated: December 16, 1980.

**William F. Randolph,**  
Acting Associate Commissioner for  
Regulatory Affairs.

[Docket No. 78N-2831]

### Medical Devices; Classification of Gingival Fluid Measurers

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying gingival fluid measurers into class I § (general controls). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of gingival fluid measurers:

1. Identification: A gingival fluid measurer is a gauge device used to measure the amount of fluid in the gingival sulcus (depression between the tooth and gums) in order to determine if there is a gingivitis condition.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360i), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360j(f)).

3. Summary of reasons for recommendation: The Panel recommends that gingival fluid measurers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, gingival fluid measurers in the practice of dentistry.

5. Risks to health: None identified.

##### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that gingival fluid measurers be classified into class I (general controls). FDA believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device.

In response to the Panel's recommendation that manufacturers of gingival fluid measurers be exempt from section 510(k) of the act (21 U.S.C. 360(k)), FDA is proposing that that these manufacturers be subject to registration, device listing, and premarket notification under section 510(a) through 510(k) of the act. Under section 510(g)(4) of the act, the agency may exempt a manufacturer from section 510 only if it finds that compliance with this section is not necessary for the protection of the public health. In the case of registration, listing, and premarket notification by manufacturers of gingival fluid measurers, the agency cannot make the required finding. To protect the public health, the agency needs to be able to identify the firms manufacturing this device, and to conduct necessary

inspections and to receive premarket notification from manufacturers to assure that FDA learns of new devices and of significant modifications of existing devices for which premarket approval is required.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540.546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 by adding new Subpart B and new § 872.1500, to read as follows:

#### Subpart B—Dental Diagnostic Devices

##### § 872.1500 Gingival fluid measurer.

(a) *Identification.* A gingival fluid measurer is a gauge device used to measure the amount of fluid in the gingival sulcus (depression between the tooth and gums) to determine if there is a gingivitis condition.

(b) *Classification.* Class I (general controls).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4110-03-M

#### 21 CFR Part 872

[Docket No. 78N-2834]

#### Medical Devices; Classification of Pulp Testers

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying pulp testers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

#### SUPPLEMENTARY INFORMATION:

##### Panel Recommendation

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of pulp testers:

1. *Identification:* A pulp tester is an A.C. or battery powered device used to evaluate the pulpal vitality of teeth, by employing high frequency current, transmitted by an electrode, to stimulate the nerve tissue in the dental pulp.

2. *Recommended classification:* Class II (performance standards). The Panel recommends that establishing a performance standard for this device be a low priority.

3. *Summary of reasons for recommendation:* The Panel recommends that pulp testers be classified into class II because improper electrical design of the device could

cause electrical shock to the patient or user. Moreover, the amount of power delivered by the device must be controlled, because insufficient voltage could cause erroneous evaluation and excessive voltage could cause burns to oral tissue. The Panel believes that general controls alone would not provide sufficient control over the performance and electrical characteristics of this device. The Panel believes that a performance standard would provide reasonable assurance of safety and effectiveness of the device and that there is sufficient information to establish a standard.

4. *Summary of data on which the recommendation is based:* The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, the device in the practice of dentistry.

5. *Risks to health:* (a) *Electrical shock:* Improper electrical design or malfunction of the device could cause electrical shock to the patient or user. (b) *Erroneous evaluation:* Improper mechanical or electrical design of the device may result in erroneous evaluation and subsequent therapy that is inappropriate. (c) *Tissue burns:* If the voltage delivered by the device is excessive, burns to oral tissue may result.

#### Proposed Classification

FDA agrees with the Panel recommendation and is proposing that pulp testers be classified into class II (performance standards). The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

On April 28, 1978, the agency terminated all of the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the *Federal Register* of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the *Federal Register*.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs proposes to amend Part 872 in Subpart B by adding new § 872.1720, to read as follows:

**§ 872.1720 Pulp tester.**

(a) *Identification.* A pulp tester is an A.C. or battery powered device used to evaluate the pulpal vitality of teeth, by employing high frequency current, transmitted by an electrode, to stimulate the nerve tissue in the dental pulp.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

[Docket No. 78N-2835]

**Medical Devices; Classification of  
Electrode Gel for Pulp Testers**

**AGENCY:** Food and Drug Administration.  
**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying electrode gel for pulp testers into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class I (general controls). The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. The effect of classifying a device into class I is to require that the device meet only the general controls applicable to all devices. After considering public

comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the Federal Register.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:** Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the Federal Register provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of electrode gel for pulp testers:

1. Identification: An electrode gel for pulp testers is a device that is applied to the surface of a tooth before use of a pulp tester to aid conduction of electrical current.

2. Recommended classification: Class I (general controls). The Panel recommends that this device be exempt from premarket notification under section 510(k) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360(k)), records and reports requirements under section 519 of the act (21 U.S.C. 360(i)), and the good manufacturing practice regulation under section 520(f) of the act (21 U.S.C. 360(j)(f)).

3. Summary of reasons for recommendation: The Panel recommends that electrode gel for pulp testers be classified into class I because the Panel believes that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device. This device has been used in dentistry for many years. The materials used in the device that contact the body have known and acceptable properties. The Panel believes that manufacturers should not be required to comply with premarket notification procedures, records and reports requirements, and the good manufacturing practice regulation because this is a simple device that presents no undue risks to health when used in a normal manner and for the purpose recommended.

4. Summary of data on which the recommendation is based: The Panel based its recommendation on the Panel members' personal knowledge of, and clinical experience with, electrode gel for pulp testers in the practice of dentistry.

5. Risks to health: None identified.

**Proposed Classification**

FDA disagrees with the Panel recommendation and is proposing that electrode gel for pulp testers be classified into class II (performance standards). This device comes into direct contact with oral tissue. It is essential that the materials used in the device be biocompatible. Changes in the composition of the device or contamination of the device with other materials may lead to adverse tissue reactions (painful burns or infections), thus placing the patient unnecessarily at risk. The agency believes that a performance standard is necessary for this device because general controls alone are insufficient to control the risks to health presented by the device. A performance standard would provide reasonable assurance of the safety and effectiveness of the device. The agency also believes that there is sufficient information to establish a performance standard for this device.

Because the agency has determined that electrode gel for pulp testers should be classified into class II rather than class I, the agency is not required to publish a regulation adopting or rejecting the Panel recommendation that this device be exempt from premarket notification procedures under section 510(k), records and reports requirements under section 519, and the good manufacturing practice regulation under section 520(f) of the act.

On April 28, 1978, the agency terminated all the device classification panels and reestablished them with the same functions, but with new names and a new structure. FDA published notices of these changes in the Federal Register of May 19, 1978 (43 FR 21666, 21667, and 21668) and May 26, 1978 (43 FR 22672 and 22673). This proposed classification regulation identifies each device panel by the former name. Further information regarding the device advisory committees and list of their new names may be found in the preamble to the general provisions, published elsewhere in this issue of the Federal Register.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner of Food and Drugs

proposes to amend Part 872 in Subpart B by adding new § 872.1730, to read as follows:

**§ 872.1730 Electrode gel for pulp testers.**

(a) *Identification.* An electrode gel for pulp testers is a device that is applied to the surface of a tooth before use of a pulp tester to aid conduction of electrical current.

(b) *Classification.* Class II (performance standards).

Interested persons may, on or before March 2, 1981, submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Four copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: November 19, 1980.

**Medical Devices; Classification of  
Extraoral Source X-Ray Systems**

**AGENCY:** Food and Drug Administration.

**ACTION:** Proposed rule.

**SUMMARY:** The Food and Drug Administration (FDA) is issuing for public comment a proposed regulation classifying extraoral source X-ray systems into class II (performance standards). FDA is also publishing the recommendation of the Dental Device Classification Panel that the device be classified into class II. The effect of classifying a device into class II is to provide for the future development of one or more performance standards to assure the safety and effectiveness of the device. After considering public comments, FDA will issue a final regulation classifying the device. These actions are being taken under the Medical Device Amendments of 1976.

**DATES:** Comments by March 2, 1981. FDA proposes that the final regulation based on this proposal become effective 30 days after the date of its publication in the *Federal Register*.

**ADDRESS:** Written comments to the office of the Hearing Clerk (HFA-305),

Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

**FOR FURTHER INFORMATION CONTACT:**  
Gregory Singleton, Bureau of Medical Devices (HFK-460), Food and Drug Administration, 8757 Georgia, Ave., Silver Spring, MD 20910, 301-427-7536.

**SUPPLEMENTARY INFORMATION:**

**Panel Recommendation**

A proposal elsewhere in this issue of the *Federal Register* provides background information concerning the development of the proposed regulation. The Dental Device Classification Panel, an FDA advisory committee, made the following recommendation regarding the classification of extraoral source X-ray systems:
