Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

6134 **Lead** Labor/OSHA publishes supplemental statement of reasons and amendment of standard regarding occupational exposure to lead; effective 2–20–81 (Part II of this issue)

6322 **Education** ED publishes regulations regarding certain educational programs concerning a student's cost of attendance at school; comments by 3–23–81 (Part VII of this issue)

6029 **Grant Programs—Food Stamps** USDA/FNS gives notice of availability of fiscal year 1981 funds for demonstration, research, and evaluation grants related to Food Stamp Program operations; apply by 3–23–81

6019 **Income Tax** Treasury/IRS publishes extension of time for comments to 2–17–81, regarding payments to foreign countries for oil and gas that are not considered taxes

6019 **Income Tax** Treasury/IRS releases proposal regarding limitation on foreign tax credit for foreign oil and gas taxes; comments by 2–17–81

6018 **Income Tax** Treasury/IRS extends time for comments to 2–17–81, regarding limitation on foreign tax credit for foreign oil and gas taxes

Executive Agencies

Agricultural Marketing Service
RULES
5859 Oranges, grapefruit, tangerines, and tangelos grown in Florida
5859 Oranges (navel) grown in Arizona and California

Agricultural Stabilization and Conservation Service
RULES
Export programs:
5860 Feed grains; CFR Part removed
5860 Flaxseed and linseed oil; CFR Part removed

Agriculture Department
See also Agricultural Marketing Service; Agricultural Stabilization and Conservation Service; Animal and Plant Health Inspection Service; Food and Nutrition Service; Forest Service.
NOTICES
Committees; establishment, renewals, terminations, etc.:
6031 Human Nutrition Board of Scientific Counselors

Animal and Plant Health Inspection Service
RULES
Livestock and poultry quarantine:
5861 Brucellosis; correction

Arms Control and Disarmament Agency
NOTICES
Committees; establishment, renewals, terminations, etc.:
6031 General Advisory Committee

Arts and Humanities, National Foundation
NOTICES
Meetings:
6106 Museum Advisory Panel
6106 Partnership Panel Office

Civil Aeronautics Board
NOTICES
Hearings, etc.:
6031 Former large irregular air service investigation et al.
6125 Meetings; Sunshine Act (2 documents)

Commerce Department
See also International Trade Administration; Maritime Administration.
NOTICES
Laboratory Accreditation Program, National Voluntary:
6230 Thermal insulation, concrete, and carpet; quarterly report

Commodity Futures Trading Commission
NOTICES
Futures contracts, proposed; availability:
6032 Chicago Mercantile Exchange; 20-year U.S. Treasury bond

Consumer Product Safety Commission
PROPOSED RULES
6016 Coal and wood burning appliances; performance provision and technical data; extension of time

Defense Department
See also Navy Department.
RULES
5956 American Forces Radio and Television Service (AFRTS); policy, responsibilities, information requirements, management and operations
NOTICES
6426 Privacy Act; systems of records; annual publication

Economic Regulatory Administration
RULES
Petroleum allocation and price regulations:
5864 Crude oil, newly discovered; verification requirements, etc.; interpretation
PROPOSED RULES
Petroleum allocation and price regulations:
6014 Alaska North Slope crude oil entitlements; intent to defer issuance of final rules
NOTICES
Meetings:
6035 National Petroleum Council

Education Department
RULES
Postsecondary education:
6322 National direct student loan program, etc.; cost of attendance calculation

Employment and Training Administration
PROPOSED RULES
Employment service system:
6017 Veterans preference indicators; compliance levels, 1981 FY

Employment Standards Administration
RULES
5876 Federal service contract labor standards; treatment of concession contracts under Service Contract Act; republication

Energy Department
See also Economic Regulatory Administration; Energy Information Administration; Federal Energy Regulatory Commission.

6033 Accounts, overdue; interest rates change
International atomic energy agreements; civil uses; subsequent arrangements:
6034 European Atomic Energy Community (2 documents)
6035 European Atomic Energy Community and Norway
6034 European Atomic Energy Community and Switzerland
6034 Japan

Energy Information Administration
NOTICES
6036 Natural gas, high cost; alternative fuel price ceilings and incremental price threshold

Environmental Protection Agency
RULES
Air quality implementation plans; approval and promulgation; various States, etc.:
5965 California
5980 Rhode Island
Conduct standards:
5962 Financial disclosure statements and procedures for administrative enforcement of post-employment restrictions
Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.:
5981 l-Naphthaleneacetic acid; correction
5980 Polyamide polymer derived from sebacic acid
Toxic substances:
5981 Chlorofluoroalkanes, fully halogenated; essential use exemption for spinnerette release agents
PROPOSED RULES
Air quality implementation plans; approval and promulgation; various States, etc.:
6021 Oregon; advance notice
Toxic substances:
6019 Chlorofluoroalkanes, fully halogenated; essential use exemption for pharmaceutical rotary tablet press punch lubricants
6021 N-methanesulfonyl-p-toluene sulfonamide; significant new uses; meeting
NOTICES
Air quality; prevention of significant deterioration (PSD):
6064 Permit approvals
Pesticide registration, cancellation, etc.:
6062 Lontrel 205 herbicide
Pesticides; emergency exemption applications:
6059 Benomyl
6062, 6063 Chlorofluorocarbons (2 documents)
6060 Fenvalerate
6061 Mesurol
6063 Napropamide
Pesticides; experimental use permit applications:
6065 Monsanto Co. et al.
Pesticides; temporary tolerances:
6066 Rohm & Haas Co.
6067 Uniroyal Chemical
Pesticides; tolerances in animal feeds and human food:
6061 Monsanto Co. et al.
Toxic and hazardous substances control:
6065 Premanufacture notices receipts

Federal Communications Commission
RULES
Common carrier services:
5984 Second computer inquiry (telephone deregulation); reconsideration and clarification
PROPOSED RULES
Common carrier services:
6025 MTS and WATS market structure; interstate telecommunications services entry policy and Alaska submarket inquiry; extension of time
Television broadcasting:
6025 Cable television; addition to Huntsville-Decatur, Ala., market; denial

Federal Deposit Insurance Corporation
NOTICES
6125 Meetings; Sunshine Act
Securities suspension of trading:
6067 Farmers Bank of Delaware

Presidential Documents

Title 3—

The President

Proclamation 4817 of January 16, 1981

Proclamation To Modify the Suspension in Part of the Tariff Concessions on Certain Lead Products

By the President of the United States of America

A Proclamation

1. On October 31, 1979, under the authority of section 101(a)(1) of the Trade Act of 1974 (the Trade Act) (19 U.S.C. 2111(a)(1)), the United States entered into a trade agreement with the United Mexican States (Mexico) containing certain tariff concessions by the United States. These tariff concessions were implemented by Proclamation No. 4707 of December 11, 1979, beginning January 1, 1980. This agreement provides that, under certain circumstances which now exist, the United States may suspend or withdraw these concessions in whole or in part.

2. An expectation, which this agreement stated to be the basis for the United States concessions therein, not having materialized, and only partially equivalent substitute concessions having been received from Mexico, the President, by Proclamation 4792 of September 15, 1980 (45 Fed. Reg. 61589), suspended in part tariff concessions which were granted to Mexico in the October 31, 1979 agreement because adequate substitute compensatory concessions had not been provided by Mexico at that time.

3. In view of the temporary modification of the rate of duty on unwrought lead other than lead bullion by section 114 of Public Law 96–609, of December 28, 1980, and of the extent of concessions which have been received from Mexico, I determine that the suspension of the concessions under the Agreement of October 31, 1979 should be modified as set forth below.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and the statutes of the United States, including sections 125 and 604 of the Trade Act (19 U.S.C. 2135 and 2483), do proclaim that:

The tariff concessions proclaimed by Proclamation No. 4707 on litharge and red lead provided for in items 473.52 and 473.56 of the Tariff Schedules of the United States (19 U.S.C. 1202), (in the case of litharge as partially suspended by Proclamation 4792) are suspended as set forth in the Annex of this proclamation.

IN WITNESS WHEREOF, I have hereunto set my hand this sixteenth day of January, in the year of our Lord nineteen hundred and eighty-one, and of the Independence of the United States of America the two hundred and fifth.

Jimmy Carter

ANNEX

Part 2D of the Appendix to the Tariff Schedules of the United States is modified to read as follows:

Item	Articles	Rates of Duty 1	Rates of Duty 2	Effective Period
	Subpart D.-Temporary Duties, Pursuant to Section 125 of the Trade Act of 1974			
	Subpart D headnote:			
	1. Any article described in the provisions of this subpart, if entered during the period specified in the last column, is subject to duty at the rate set forth herein in lieu of the rate provided therefor in schedules 1 to 8, inclusive.			
948.10	Litharge (provided for in item 473.52)	3% ad val. or such other rate as may be proclaimed by the President	No change	On and after 1/19/81
948.12	Red lead (provided for in item 473.56)	3.4% ad val. or such other rate as may be proclaimed by the President	No change	On and after 1/19/81

Executive Order 12272 of January 16, 1981

Foreign Service Retirement and Disability System

By the authority vested in me as President of the United States of America by Section 805 of the Foreign Service Act of 1946, as amended (22 U.S.C. 1065), and in order to further conform the Foreign Service Retirement and Disability System to the Civil Service Retirement and Disability System, it is hereby ordered as follows:

1–101. Section 882(c) of the Foreign Service Act of 1946, as amended (22 U.S.C. 1121(c)), shall be deemed to be amended (a) by striking out paragraph (1) thereof, and (b) by inserting in lieu thereof the provisions of Section 8340(c)(1) of Title 5 of the United States Code.

1–102. The amendment made by subsection 1–101(a) hereof shall apply with respect to annuities commencing after January 19, 1981.

Executive Order 12273 of January 16, 1981

Central Intelligence Agency Retirement and Disability System

By the authority vested in me as President of the United States of America by Section 292 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees, as amended (50 U.S.C. 403 note), and in order to further conform the Central Intelligence Agency Retirement and Disability System to certain amendments to the Civil Service Retirement and Disability System, it is hereby ordered as follows:

1–101. Section 291(b) of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees, as amended, shall be deemed to be amended (a) by striking out paragraph (1) thereof, and (b) by inserting in lieu thereof the following:

"(1) The first cost-of-living increase (if any) made to an annuity which is payable from the Central Intelligence Agency Retirement and Disability Fund to a participant who retires, or to the widow or widower of a deceased participant, shall be equal to the product (adjusted to the nearest of 1/10 of one percent) of:

a. 1/6 of the applicable percent change computed under subsection (a) of this Section, multiplied by

b. the number of full months for which the annuity was payable from the Fund before the effective date of the increase (counting any portion of a month as a full month).".

1–102. The amendment made by subsection 1–101(a) hereof shall apply with respect to annuities commencing after January 19, 1981.

Executive Order 12274 of January 16, 1981

Military Pay and Allowances

By the authority vested in me as President and as Commander in Chief of the Armed Forces of the United States of America by Sections 301c, 305a, and 403 of Title 37 of the United States Code, and in order to implement incentive pay for submarine duty for Navy enlisted members and officers, to implement special pay for officers serving on sea duty and increased rates of special pay for enlisted personnel serving on sea duty, and to extend the payment of basic allowances for quarters to certain members without dependents, it is hereby ordered as follows:

1–1. *Incentive Pay for Submarine Duty.*

1–101. Executive Order No. 11157, as amended, is further amended by revising Section 106 of Part I thereof to read as follows:

"Sec. 106(a). As determined by the Secretary of the Navy, a member who is entitled to basic pay, who holds or is in training leading to a submarine duty designator, who is not entitled to continuous monthly submarine duty incentive pay, and who is in and remains in the submarine service on a career basis, is also entitled to submarine duty incentive pay for the frequent and regular performance of operational submarine duty required by orders, except as provided by 37 U.S.C. 301c(c).

"(b) To the extent provided for by appropriations, a member of the Naval Reserve who is entitled to compensation under Section 206 of Title 37 of the United States Code, and who performs, under orders, duty on a submarine during underway operations, is eligible for an increase in such compensation equal to one-thirtieth of the monthly submarine duty incentive pay for the performance of that duty by a member of a corresponding grade and years of service who is entitled to basic pay when those orders specify such increased entitlement. Such member is eligible for the increase for each day served, for as long as he is qualified for it, during each regular period of appropriate duty.

"(c) As determined by the Secretary of the Navy, a member who is entitled to basic pay, who holds or is in training leading to a submarine duty designator and who is in and remains in the submarine service on a career basis, is entitled to continuous monthly submarine duty incentive pay, subject to the performance of required number of years of operational submarine duty (37 U.S.C. 301c(a) (3)–(4)), except as provided by 37 U.S.C. 301c(c).

"(d) The Secretary of the Navy is hereby designated and empowered to issue additional implementing regulations with respect to entitlement of regular and reserve officers and enlisted members of the Navy to submarine duty incentive pay, or continuous monthly submarine duty incentive pay.".

1–2. *Special Pay for Career Sea Duty.*

1–201. Section 201 of Part II of Executive Order No. 11157, as amended, is further revised to read as follows:

"Sec. 201(a). The following members of a uniformed service who are entitled to receive basic pay shall be entitled to receive, additionally, career sea pay while on sea duty:

(1) enlisted members who are in pay grade E–4 or above,

(2) warrant officers,

(3) commissioned officers in pay grade 0–3 or above who have over three years of sea duty, and

(4) commissioned officers in pay grades 0–1 and 0–2 with at least four years active service as enlisted members or as noncommissioned warrant officers and over three years of sea duty.

"(b) The period of sea duty shall include the date of reporting and the date of detachment as stated in orders. Career sea pay shall be at the rates prescribed in Section 305a of Title 37 of the United States Code.".

1–202. Section 202 of Part II of Executive Order No. 11157 as amended, is revoked.

1–203. Part II of Executive Order No. 11157, as amended, is further revised by adding a new Section 202 as follows:

"Sec. 202. A member of a uniformed service who is entitled to career sea pay and who has served 36 consecutive months of sea duty as such period is computed under regulations of the Secretary concerned, is entitled to a monthly career sea pay premium for the thirty-seventh consecutive month and each subsequent consecutive month of sea duty service by such member when such member is entitled to career sea pay. In the regulations published by the Secretary concerned, the term "consecutive months of sea duty" may be defined to include periods during which a member is serving in or under orders to duties, service in which qualifies the member for career sea pay, either periodically or continuously during assignment to such duties. Examples of such periods are periods of service as a member of a two crewed submarine or fleet aviation units assigned to ships, or periods for training, hospitalization, or other periods of a similar nature.".

1–204. Section 206 of Part II of Executive Order No. 11157, as amended, is further revised by deleting subsection (b).

1–3. *Basic Allowance for Quarters.*

1–301. Subsection 401 of Part IV of Executive Order No. 11157, as amended, is amended by adding new subsections (e) and (f) as follows:

"(e) The term "deployed" shall apply to time during which the unit is at sea or in a port more than 50 miles from its home port; provided, however, time during which the unit is in a port for overhaul or extended repairs is not to be considered deployed time. Unanticipated overhauls or extended repairs which occur during a period scheduled as extended deployment in the mission assignment of the ship is time deployed unless otherwise classified by appropriate command authority.

"(f) The phrase "while the unit to which he is assigned is deployed for a period in excess of 90 days" shall apply to periods of time commencing on the 91st day the unit to which the member is assigned is deployed.".

1–302. Executive Order No. 11157, as amended, is further amended by deleting section 408 of Part IV thereof.

1–4. *Effective Date.*

1–401. The amendments made by this Order to Executive Order No. 11157, as amended, shall be effective as of January 1, 1981.

Executive Order 12275 of January 16, 1981

Design Liaison Council

By virtue of the authority vested in me as President by the Constitution of the United States of America, and in order to affirm our commitment that each Federal dollar spent on design shall be viewed as an investment in enriching the quality of American life, it is hereby ordered as follows:

1–101. To encourage good design within the Federal government, there is hereby established an interagency Design Liaison Council composed of the heads of the following agencies or their designees:

Department of State.

Department of the Treasury.

Department of Defense.

Department of Justice.

Department of the Interior.

Department of Agriculture.

Department of Commerce.

Department of Labor.

Department of Health and Human Services.

Department of Housing and Urban Development.

Department of Transportation.

Department of Energy.

Department of Education.

Environmental Protection Agency.

National Aeronautics and Space Administration.

Office of Personnel Management.

General Services Administration.

Veterans Administration.

International Communication Agency.

Small Business Administration.

Federal Council on the Arts and the Humanities.

1–102. The following agencies are invited to participate in the activities of the Design Liaison Council:

Commission on Fine Arts.

Smithsonian Institution.

U.S. Postal Service.

Tennessee Valley Authority.

1–103. The representative of the Federal Council on the Arts and the Humanities shall chair the Design Liaison Council.

1–104. Representatives of other interested agencies may be invited to participate in the functions of the Design Liaison Council.

1–105. For the purposes of this Order, "design" encompasses products and processes of architecture, energy conservation, engineering, graphic design, industrial and product design, interior design, landscape architecture, urban design and city planning, and other related disciplines.

1–106. The Design Liaison Council shall encourage the exchange of information and research on design issues among federal agencies. The Council shall also recommend those changes in agency standards and procedures which will enhance the functional and visual quality of design products and processes.

Jimmy Carter

Rules and Regulations

Federal Register
Vol. 46, No. 13
Wednesday, January 21, 1981

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Orange, Grapefruit, Tangerine and Tangelo Regulation 4, Amendment 6]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Amendment of Tangerine Size Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment lowers the minimum diameter requirement for Florida Honey tangerines from 2 1/16 inches to 2 6/16 inches during the period January 15 through October 18, 1981. This action recognizes demand conditions and the size composition of available supply in the interest of growers and consumers.

EFFECTIVE DATE: January 15, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975. The Final Impact Analysis relative to this final rule is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified "not significant." This regulation is issued under the marketing agreement and Order NO. 905, (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon the recommendation and information submitted by the Citrus Administrative Committee, and upon other available information. It is hereby found that the regulation of Florida Honey tangerines, as hereinafter provided, will tend to effectuate the declared policy of the act.

The minimum size requirements, herein specified, for domestic shipments reflect the Department's appraisal of the need for the amendment of the current regulation to permit handling of smaller size fresh Florida Honey tangerines during the specified period based on the size composition of the crop and current and prospective demand conditions.

It is further found that there is insufficient time between the date when information became available upon which this amendment is based and when the action must be taken to warrant a 60-day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), and this amendment relieves restrictions on the handling of Florida Honey tangerines. It is necessary to effectuate the declared purposes of the act to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

Accordingly, it is found that the provisions of § 905.304 (Orange, Grapefruit, Tangerine and Tangelo Regulation 4; (45 FR 67047; 76651; 79002; 80269; 81199; 83192) should be and are amended by revising Table I, paragraph (a) to read as follows:

§ 905.304 Orange, grapefruit, tangerine, and tangelo regulation 4.

(a) * * *

Table I

Variety	Regulation period	Minimum grade	Minimum diameter (inches)
(1)	(2)	(3)	(4)
Tangerines: Honey	Jan. 15, 1981, through Oct. 18, 1981	Florida No. 1	2 6/16

* * * * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: January 15, 1981.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 81–2069 Filed 1–19–81; 8:45 am]

BILLING CODE 3410–02–M

7 CFR Part 907

[Navel Orange Regulation 504; Amendment 2]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This action increases the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period January 9–January 15, 1981. Such action is needed to provide for orderly marketing of fresh navel oranges for the period specified due to the marketing situation confronting the orange industry.

DATES: The amendment is effective for the period January 9–January 15, 1981.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This amendment is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges in Arizona and designated part

of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Navel Orange Administrative Committee and upon other information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1980–81 which was designated significant under the procedures of Executive Order 12044. The marketing policy was recommended by the committee following discussion at a public meeting on October 14, 1980. A final impact analysis on the marketing policy is available from William J. Doyle, Acting Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again on January 14, 1981, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is improving.

It is further found that there is insufficient time between the date when information became available upon which this amendment is based and when the action must be taken to warrant a 60-day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), and this amendment relieves restrictions on the handling of navel oranges. It is necessary to effectuate the declared policy of the act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

Section 907.804 Navel Orange Regulation 504 (46 FR 2025; 46 FR 3493) is revised to read as follows:

Order

§ 907.804 Navel Orange Regulation 504.

The quantity of navel oranges grown in Arizona and California which may be handled during the period January 9, 1981, through January 15, 1981, are established as follows:

(1) District 1: 1,406,000 cartons;

(2) District 2: 54,509 cartons;

(3) District 3: unlimited cartons;

(4) District 4: 44,000 cartons;

(b) As used in this section, "handled," "District 1," "District 2," "District 3," "District 4," and "carton" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: January 15, 1981.

D. S. Kuryloski,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 81–2070 Filed 1–19–81; 8:45 am]

BILLING CODE 3410–02–M

Agricultural Stabilization and Conservation Service

7 CFR Part 1484

Feed Grains; Deletion

AGENCY: Agricultural Stabilization and Conservation Service (ASCS), USDA.

ACTION: Final rule.

SUMMARY: This rule deletes the regulations issued under Part 1484, Feed Grains, including the Subpart—Feed Grain Export Program. These regulations no longer need to be set forth in the Code of Federal Regulations since the Feed Grain Export Program has been inoperative for more than five years.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald Burgess, Chief, Commodity Operations Branch, Inventory Management Division, Agricultural Stabilization and Conservation Service, USDA, Room 5969 South Building, P.O. Box 2415, Washington, D.C. 20013, (202) 447–2762.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedure established in Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified as "not significant." In compliance with Secretary's Memorandum 1955 and the final report issued by the Secretary with respect to Executive Order 12044 and entitled "Improving USDA Regulations" (43 FR 50988), it is determined after review of these regulations for need, currency, clarity, and effectiveness, that deletion of these regulations is appropriate at this time. Furthermore, it has been determined that it is impractical and contrary to the public interest to comply with the public rulemaking requirement of 5 U.S.C. 553 since this action merely deletes provisions which are no longer applicable.

The Feed Grain Export Program, as provided for in 7 CFR Part 1484, authorized the making of payments to exporters of feed grains to encourage exports. While statutory authority for this program continues to exist, this program has been inoperative for more than five years.

Final Rule

Accordingly 7 CFR Part 1484 is removed and reserved.

PART 1484—[RESERVED]

Signed at Washington, D.C. on January 13, 1981.

Ray Fitzgerald,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 81–1844 Filed 1–19–81; 8:45 am]

BILLING CODE 3410–05–M

7 CFR PART 1486

Flaxseed and Linseed Oil; Deletion

AGENCY: Agricultural Stabilization and Conservation Service (ASCS), USDA.

ACTION: Final rule.

SUMMARY: This rule deletes the regulations issued under 7 CFR Part 1486, Flaxseed and Linseed Oil. These regulations no longer need to be set forth in the Code of Federal Regulations since the Flaxseed and Linseed Oil Export Program has been inoperative for more than five years.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Ronald Burgess, Chief, Commodity Operations Branch, Inventory Management Division, Agricultural Stabilization and Conservation Service, USDA, Room 5969 South Building, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedure established in Secretary's Memorandum 1955 to implement Executive Order 12044 and has been classified as "not significant." In compliance with Secretary's Memorandum 1955 and the final report issued by the Secretary with respect to Executive Order 12044 and entitled "Improving USDA Regulations" (43 FR 50988), it is determined after review of these regulations for need, currency, clarity, and effectiveness, that deletion of these regulations is appropriate at this time. Furthermore, it has been determined that it is impractical and contrary to the public interest to comply with the public rulemaking requirement of 5 U.S.C. 553 since this action merely deletes provisions which are no longer applicable.

The Flaxseed and Linseed Program as provided for in 7 CFR Part 1486, has been inoperative for more than five years and continuation of the program regulations is not necessary.

Final rule

Accordingly 7 CFR Part 1486 is removed and reserved.

PART 1486—[RESERVED]

Signed at Washington, D.C. on January 13, 1981.

Ray Fitzgerald,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 1505-01-M

FEDERAL RESERVE SYSTEM

12 CFR Part 262

[Docket No. R-0343]

Waiver of Procedural Rules for Applications Requiring Immediate or Expeditious Action

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This amendment to the Board's Rules of Procedure permits waiver of public notice and other procedural rules for applications that require immediate or expeditious action.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Bronwen Mason (202/452-3564), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: (1) *Background.* On November 6, 1978 (43 FR 47,157), the Board amended its Rules of Procedure to require applicants for the Board's approval for expansion of their banking operations through merger, consolidation, acquisition, or branching to publish notices of their applications in newspapers of general circulation for two consecutive weeks (12 CFR 262.3(b)), and in some cases to post notices in branch lobbies. Occasionally the Board must act immediately on such applications because an institution involved is likely to fail otherwise, or the Board must act expeditiously because of some emergency. In those rare circumstances, normally initiated by a request from the primary supervisor of a bank for immediate or expedited action, the delay involved in the publication of newspaper notice and the solicitation of public comment will normally not be in the public interest. This amendment permits the Board (or the Reserve Bank or officer having authority over a particular application) to waive or curtail notice and comment reuirements in those cases as circumstances dictate. This amendment does not reflect any change in the Board's commitment to maximize public participation in the regulatory process, it does not affect the statutory obligation of a bank to publish notice of an application requiring expeditious action filed under the Bank Merger Act (12 U.S.C. 1828(c)); and for all applications requiring expeditious, but not immediate, action the Board will expect applicants to satisfy the requirements of its Rules of Procedure to the fullest extent compatible with the emergency.

Under this amendment the Board, Reserve Bank, or responsible official may also waive or curtail any other procedural rule that might prevent immediate or expditious action when needed. For example, the Board may find it necessary to eliminate or shorten notice of a proposed acquisition of a nonbank company by a bank holding company in exigent circumstances. However, the Federal Reserve System and applicants normally should be able to observe all other procedural rules even in emergencies.

(2) *Authority.* This action is taken pursuant to the Board's authority under sections 3(a), 4 and 5(b) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a), 1843, and 1844(b)), section 18 of the Federal Deposit Insurance Act (12 U.S.C. 1828(c)), and sections 9 and 11(i) of the Federal Reserve Act (12 U.S.C. 321 and 248(i)).

(3) *Effective date.* This amendment has been adopted without following the provisions of 5 U.S.C. § 553 relating to notice, public participation, and deferred effective date because the change involved is procedural in nature and does not constitute a substantive rule subject to the requirements of that section. The Board's expanded rulemaking procedures (44 FR 3,957 (1979)) have not been followed because the amendment is a technical one and because it relieves a procedural burden that could obstruct necessary and prompt action that would be in the public interest.

Accordingly, § 262.3 of the Board's Rules of Procedure (12 CFR 262.3) is amended by adding the following paragraph (l):

§ 262.3 Applications.

* * * * *

(l) *Waiver.* The Board, or the officer or Reserve Bank authorized to approve an application, may waive or modify any procedural requirements for that application prescribed or cited in this section and may excuse any failure to comply with them upon a finding that immediate action on the application is necessary to prevent the probable failure of a bank or company or that an emergency exists requiring expeditious action.

* * * * *

By Order of the Board of Governors of the Federal Reserve System, January 13, 1981.

Theodore E. Allison,

Secretary of the Board.

[FR Doc. 81-2110 Filed 1-19-81; 8:45 am]

BILLING CODE 6210-01-M

---

12 CFR Part 265

[Docket No. R-0346]

Authority To Accept Agreements Under the Securities Exchange Act of 1934

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: Section 8 of the Securities Exchange Act of 1934 requires nonmember banks wishing to extend credit in connection with securities transactions to enter into an agreement with the Board to comply with the provisions of law and the Board's rules

in connection with such extensions of credit. The Board has delegated to the Federal Reserve Banks authority to receive such agreements.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Laura Homer, Securities Credit Officer (202/452-2786), Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Section 8(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78h(a)) prohibits a broker or dealer from borrowing on a security registered on a national exchange from any bank other than a member of the Federal Reserve System, or one that has filed an agreement with the Board. The agreement provides that the nonmember bank will comply with the provisions of the 1934 Act, the Federal Reserve Act and the Banking Act of 1933 as well as the rules and regulations issued thereunder. This amendment authorizes the Federal Reserve Banks to accept on the Board's behalf these agreements, which are executed on forms approved by the Board.

The provisions of 5 U.S.C. 553, relating to notice, public participation and deferred effective date are not followed in connection with adoption of the amendment because the change involved is procedural in nature and does not constitute a substantive rule subject to the requirements of that section. The Board's expanded rulemaking procedures (44 FR 3,957 (1979)) have not been followed because the amendment is a technical one and because it relieves a burden that could obstruct necessary and prompt action.

Pursuant to its authority under section 11(k) of the Federal Reserve Act and section 8(a) of the Securities Exchange Act of 1934, the Board amends its Rules Regarding Delegation of Authority (12 CFR 265) by adding paragraph (f)(53) to read as follows:

Section 265.2 is amended by adding paragraph (f)(53) as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

* * * * *

(f) * * *

(53) Under the provisions of section 8(a) of the Securities Exchange Act of 1934 (15 U.S.C. 78h(a)) concerning extensions of credit to finance securities transactions, to accept agreements on behalf of the Board from nonmember banks in the form prescribed by the Board.

By Order of the Board of Governors of the Federal Reserve System, January 13, 1981.

Theodore E. Allison,

Secretary of the Board.

[Docket R-0345]

Authority To Approve Applications To Acquire Failing Banks

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This amendment to the Board's Rules Regarding Delegation of Authority permits the Director of the Board's Division of Banking and Supervision and Regulation to approve applications by a company to acquire a bank and to permit an individual to acquire a bank when immediate or expeditious action is necessary.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Bronwen Mason (202/452-3564), Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Occasionally urgent consideration is required of certain applications under the Bank Holding Company Act or notices under the Change in Bank Control Act because the institution is likely to fail otherwise or because of some emergency. In order to avoid undue delay, under this amendment, the Board has delegated authority to the Director of its Division of Banking Supervision and Regulation to approve such applications and to permit such acquisitions that meet the conditions specified for Reserve Bank approval under delegated authority.

This action is taken pursuant to the Board's authority under sections 3(a) and 5(b) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a) and 1844(b), and the Change in Bank Control Act (12 U.S.C. 1817(j)).

The provisions of 5 U.S.C. 553 relating to notice, public participation and deferred effective date are not followed in connection with adoption of the amendment because the change involved is procedural in nature and does not constitute a substantive rule subject to the requirements of that section. The Board's expanded rulemaking procedures (44 FR 3,957 (1979)) have not been followed because the amendment is a technical one and because it relieves a burden that could obstruct necessary and prompt action that would be in the public interest.

In order to accomplish this delegation, § 265.2(c) of the Board's Rules Regarding Delegation of Authority is amended by adding subparagraph (30) to read as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

* * * * *

(c) * * *

(30) Under the provisions of § 3(a) of the Bank Holding Company Act (12 U.S.C. § 1842(a)) and the Change In Bank Control Act (12 U.S.C. § 1817(j)) to take actions the Reserve Bank could take under paragraphs (f)(22) and (f)(30) of this section if immediate or expeditious action is required to avert failure of a bank or because of an emergency.

* * * * *

By Order of the Board of Governors of the Federal Reserve System, January 13, 1981.

Theodore E. Allison,

Secretary of the Board.

12 CFR Part 265

[Docket No. R-0347]

Authority To Approve Branch Applications

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final regulation.

SUMMARY: Section 265.2(f) of the Board's Rules Regarding Delegation of Authority is hereby amended to eliminate the requirement that Federal Reserve Banks may approve the application of a State member bank to establish a branch only if the proposed branch has already been approved by the appropriate State supervisory authority.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Bronwen Mason, Senior Attorney (202/452-3564) of the Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Section 265.2(f) of the Board Rules Regarding Delegation of Authority authorizes Federal Reserve Banks to approve applications pursuant to section 9 of the Federal Reserve Act (12 U.S.C. 321) by State member banks to establish branches. The Reserve Banks may approve branch applications if the proposed branch has already been approved by the appropriate state

supervisory authority and if several other conditions are met. The other conditions that must be met relate to the Reserve Bank's evaluation of the overall financial condition of the applicant bank, as well as competitive considerations, and the convenience and needs of the community to be served. In a 1953 interpretation concerning this policy, the Board noted that embarrassment may result if the Board approves a branch before a state supervisor acts. However, in the Board's experience with matters requiring action by an agency other than the Board, such conflicts arise rarely. Accordingly, in order to promote greater efficiency, the requirement of state approvals before Reserve Banks can approve branch applications has been eliminated. Of course, the Reserve Banks may require supervisory approval in cases where it appears that the record is not complete or where precipitous Board action might create a conflict.

This action is taken pursuant to the Board's authority under section 9 of the Federal Reserve Act (12 U.S.C. 321).

The provisions of 5 U.S.C. 553 relating to notice, public participation and deferred effective date are not followed in connection with adoption of the amendment because the change involved is procedural in nature and does not constitute a substantive rule subject to the requirements of that section.

Accordingly, paragraph (f)(1) of § 265.2 is revised to read as follows:

§ 265.2 Specific functions delegated to Board employees and Federal Reserve Banks.

* * * * *

(f) * * *

(1) Under the provisions of the third paragraph of section 9 of the Federal Reserve Act (12 U.S.C. 321), section 5155 of the Revised Statutes (12 U.S.C. 36), and § 208.8 of this chapter (Regulation H), to approve the establishment by a State member bank of a domestic branch if the Reserve Bank is satisfied that approval is warranted after giving consideration to:

(i) The bank's capitalization in relation to the character and condition of its assets and to its deposit liabilities and other corporate responsibilities, including the volume of its risk assets and of its marginal and inferior quality assets, all considered in relation to the strength of its management;

(ii) The ability of bank's management to cope successfully with existing or foreseeable problems, and to staff the proposed branch without any significant deterioration in the overall management situation;

(iii) The convenience and needs of the community;

(iv) The competitive situation (either actual or potential);

(v) The prospects for profitable operations of the proposed branch within a reasonable time, and the ability of the bank to sustain the operational losses of the proposed branch until it becomes profitable; and

(vi) The reasonableness of bank's investment in bank premises after the expenditure for the proposed branch.

12 CFR Part 265

[Docket R-0344]

Modifications of Commitments and Conditions

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: In order to expedite and facilitate the performance of certain of its functions with respect to applications and notices under the Bank Holding Company Act, Bank Merger Act, Federal Reserve Act, International Banking Act, Federal Reserve Act, and Change of Bank Control Act, the Board of Governors has delegated to the Director of the Division of Banking Supervision and Regulation the authority to grant or deny requests for modification, including extension of time, to fulfill commitments or conditions relied on by the Board in acting on such applications.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Bronwen M. Mason, Senior Attorney (202-452-3564) or Jennifer J. Johnson, Senior Attorney (202-452-3584), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: From time to time, often because of economic conditions or changes of circumstances, the Board receives requests from companies for modification, including extension of time to fulfill conditions or commitments relied on by the Board in acting on applications. Under existing procedures, each of these requests, including the most routine, must be acted upon by the Board resulting in unnecessary delay in processing such requests. To avoid this delay, the Board has, by the instant amendment, delegated the authority to grant or deny such extensions to the Director of the Division of Banking Supervision and Regulation in consultation with other interested Divisions.

This action is taken pursuant to the Board's authority under sections 3(a), 4 and 5(b) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a), 1843 and 1844(b)), section 18 of the Federal Deposit Insurance Act (12 U.S.C. 1828 (c)), sections 9 and 11(i) of the Federal Reserve Act (12 U.S.C. 321 and 2481) and section 13 of the International Banking Act (12 U.S.C. 3108), sections 25 and 25a of the Federal Reserve Act (12 U.S.C. 604(a) and 615), and Change in Bank Control Act (12 U.S.C. 1817(j)).

The provisions of 5 U.S.C. 553 relating to notice, public participation and deferred effective date were not followed in connection with the adoption of this amendment because the change involved herein is procedural in nature and does not constitute a substantive rule subject to the requirements of such section. The Board's expanded rulemaking procedures (44 FR 3,957 1979) have not been followed because the amendment is a technical one and because it relieves a burden that could obstruct necessary and prompt action that would be in the public interest.

In order to accomplish this delegation, § 265.2(c) of the Rules Regarding Delegation of Authority is amended by adding subparagraph (29) to read as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

* * * * *

(c) * * *

(29) To grant or deny requests for modification, including extension of time, for the performance of a commitment or condition relied on by the Board or its delegee in taking any action under the provisions of the Bank Holding Company Act, the Bank Merger Act, the Change in Bank Control Act of 1978, the Federal Reserve Act or the International Banking Act. In acting on requests hereunder, the Director may take into account changed circumstances and good faith efforts to fulfill the commitments or conditions, and shall consult with the Directors of other interested divisions, where appropriate. The Director may not take any action hereunder that would be inconsistent with or result in an evasion of the provisions of the Board's original action.

* * * * *

By Order of the Board of Governors of the Federal Reserve System, January 13, 1981.

Theodore E. Allison,

Secretary of the Board.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 212

[Docket No. ERA-R-78-26-A]

Newly Discovered Crude Oil Rule

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice.

SUMMARY: The Economic Regulatory Administration of the Department of Energy ("DOE") is issuing this Notice to answer several questions concerning the identification report that 10 CFR 212.79(c) requires for each newly discovered crude oil property.

FOR FURTHER INFORMATION CONTACT:

Jim Mayberry, Southwest Office of Special Counsel for Compliance, U.S. Department of Energy, 1341 West Mockingbird Lane, Suite 200-E, Dallas, Texas 75247, (214) 767-7407

John Marks, Office of Enforcement, U.S. Department of Energy, 2000 M Street, NW., Room 5002, Washington, D.C. 20461, (202) 653-3517

Ben McRae, Office of General Counsel, Department of Energy, 1000 Independence Avenue SW., Room 6A-127, Washington, D.C. 20585, (202) 252-6739.

SUPPLEMENTARY INFORMATION: On November 18, 1980, we adopted several amendments concerning newly discovered crude oil. (45 FR 78588, November 25, 1980). As a result of one of these amendments, an identification report for each newly discovered crude oil property must be filed with DOE on or before February 1, 1981. Several firms have asked similar questions concerning the manner in which they should comply with the requirment to file this report. In order to minimize the burden on firms that must file this report, we are issuing this Notice to set forth our answers to the questions most frequently asked by these firms.

1. *Who must file this report?* A report must be filed for each property that qualifies as a newly discovered crude oil property.[1] It is not necessary, however, for each producer of oil from a specific property to file a report. Rather, the operator of a property may file a report that will satsify the requirement for all producers of oil from that property, provided that the report lists the names and addresses of those producers.

2. *What should this report contain?* There is no official format for this report. Rather, a firm that is complying with the requirement should prepare a letter that supplies the information requested by 10 CFR 212.79(c).[2] The report must be signed by an official who is authorized to act for the firm. The report also should contain the name and telephone number of a person who may be contacted with regards to the content of the report.

3. *Where should this report be filed?* The address of the appropriate DOE office for a property from which one of the thirty-four major refiners is a producer of oil is: Southwest Office of Special Counsel for Compliance, U.S. Department of Energy, 1341 West Mockingbird Lane, Suite 200-E, Dallas, Texas 75247, Attn: Mr. Jim Mayberry.

The address of the appropriate DOE office for a property from which a firm that is not one of the thirty-four major refiners is a producer of oil is: Office of Enforcement, U.S. Department of Energy, 2000 M Street, NW., Room 5002, Washington, D.C. 20461, Attn: Mr. John Marks.

(Emergency Petroleum Allocation Act of 1973, 15 U.S.C. 751 *et seq.*, Pub. L. 93.159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, 15 U.S.C. 787 *et seq.*, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70, and Pub. L. 95-91; Energy Policy and Conservation Act, 42 U.S.C. 6201 *et seq.*, Pub. L. 94-163, as amended, Pub. L. 94-385, Pub. L. 95-70, Pub. L. 95-619, and Pub. L. 96-30; Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, Pub. L. 95-91, Pub. L. 95-509, Pub. L. 95-619, Pub. L. 95-620, and Pub. L. 95-621; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267)

Issued in Washington, D.C., January 14, 1981.

Barton R. House,

Acting Administrator, Economic Regulatory Administration.

[FR Doc. 81-1972 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-01-M

[1] 10 CFR 212.79(b) defines a "newly discovered crude oil property" as "(1) a new lease on the Outer Continental Shelf; or (2) a property (not on the Outer Continental Shelf) from which no crude oil was produced and sold in commercial quantities in calendar year 1978; or (3) any unitized property that includes only properties that prior to inclusion within the unit qualified as newly discovered crude oil properties. For purposes of this definition, crude oil is produced and sold in commercial quantities from a property if crude oil is produced from that property on a continuing basis. Crude oil shall be deemed to be produced on a continuing basis from a property if installation of a production facility for the crude oil produced from that property has begun."

[2] 10 CFR 212.79(c) requests the following information:

(1) the type of legal instrument which establishes the property and its effective date;

(ii) the date on which crude oil first was produced and sold from the property;

(iii) the date on which crude oil first was produced and sold in commercial quantities from the property;

(iv) where the property is a reservoir that is to be or has been designated as a newly discovered crude oil property, evidence of the reservoir designation by the appropriate governmental authority and the basis upon which the reservoir qualifies;

(v) where the property is a unitized property, the amount of production that will be certified as imputed newly discovered crude oil and the name of the unitized property; and

(vi) the location of the producer's main place of business.

15 CFR Parts 371 and 374

Expansion of Foreign Policy Control; Correction

AGENCY: U.S. Department of Commerce, International Trade Administration, Office of Export Administration.

ACTION: Interim Final Rule; Correction.

SUMMARY: This notice corrects an incorrect date in the Expansion of Foreign Policy Control notice printed in the January 6, 1980 **Federal Register.**

DATE: This correction is effective January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Daniel E. Cook, Assistant to the Director, Policy Planning Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, Telephone: (202) 377-4159.

SUPPLEMENTARY INFORMATION: This notice corrects an incorrect date in a notice published January 6, 1981 (45 FR 1258) which expanded a foreign policy export control. The second sentence in the second paragraph of the Supplementary Information in the third column reads "Effective January 1, 1980, computers exported to South African or Namibian government officials will be subject to foreign policy controls regardless of their performance level." It should read instead "Effective January 1, 1981, computers exported to South African or Namibian government officials will be subject to foreign policy controls regardless of their performance level." This notice effectuates that change.

(Secs. 6, and 13, Pub. L. 96-72, 93 Stat. 503, 50 U.S.C. app. 2401 *et seq.*: Executive Order 12214, 45 FR 29783 [May 6, 1980]; Department Organization Order 10-3, 45 FR 6141 [January 25, 1980]; International Trade Administration

Organization and Function Order 41–1, 45 FR 11862 (February 22, 1980)).

Issued in Washington, D.C. on January 14, 1981.

William V. Skidmore,

Director, Office of Export Administration.

15 CFR Part 377

Short Supply Controls; Establishment of Criteria for Consideration of Applications for Exceptions

AGENCY: Office of Export Administration, International Trade Administration, U.S. Department of Commerce.

ACTION: Interim Rule with Invitation to Comment.

SUMMARY: These regulations establish the basis for the consideration of applications for exceptions to the regulations governing exports of commodities subject to short supply export controls. They are intended to supplement the regulations under which short supply control programs are administered without significantly altering applicable program policies.

DATES: These rules are effective on publication, but may be revised after comments are received. Comments must be received by the Department by March 23, 1981.

ADDRESS: Written comments (five copies) should be sent to: Mr. Robert F. Kan, Special Assistant to the Director, Short Supply Division, Office of Export Administration, P.O. Box 7138, Ben Franklin Station, Washington, DC 20044, (202) 377–3984.

FOR FURTHER INFORMATION CONTACT: Mr. Robert F. Kan, Special Assistant to the Director, Short Supply Division, Office of Export Administration, P.O. Box 7138, Ben Franklin Station, Washington, DC 20044, (202) 377–3984.

SUPPLEMENTARY INFORMATION: On September 25, 1974, the Department published regulations establishing standards for the consideration of applications for relief from short supply export controls on grounds of unique hardship. These regulations, contained in § 377.3, remain in effect. With limited exceptions, they have been the sole basis on which relief from short supply controls have been granted.

Since publication of those regulations, the Department has administered short supply export control programs covering ferrous scrap (in 1973–74) and petroleum and petroleum products, and a statutorily mandated control program covering western red cedar. In administering these programs, it has noted that certain applications have presented persuasive reasons, not explicitly contemplated by the unique hardship criteria, for considering the issuance of an export license outside the quota system. In the Department's experience, the express provisions of this unique hardship criteria have tended to be particularly applicable to the period immediately following the institution of export controls, but after controls have been in place for a considerable period of time, the hardship criteria have been less applicable to the kinds of cases which might warrant consideration for the granting of an exception to the regulations. Therefore, the Department has concluded that it should provide by regulation a basis for the consideration of exceptions to short supply export controls on grounds other than those specified in the provisions on unique hardship.

The Department has also noted that the types of exceptions applications filled under short supply programs tend to vary significantly according to the commodity under control. Consequently, while this rule establishes certain general criteria applicable to all short supply export control programs, irrespective of the commodity involved, it also enumerates factors more particularly applicable to the petroleum control program.

Hardship and exceptions applications for western red cedar are already provided for in the regulations. It is anticipated that specific factors for the consideration of applications for exceptions involving other commodities that may be made subject to short supply export control in the future will be issued at the appropriate time.

The establishment of these criteria for the consideration of exceptions cases does not represent a change of policy by the Department and does not reflect any change in the Department's administration of current control programs, including the petroleum short supply and the western red cedar programs. Exporters are placed on notice that applications for licenses considered under these criteria are likely to be approved only under exceptional circumstances.

This rule also revokes the special exception under the petroleum regulations applicable to residual fuel oil refined on the West Coast from California-origin crude petroleum. The circumstances which gave rise to the establishment of that special exception no longer exist. Furthermore, should an application be filed which heretofore would have been considered under that special rule, it may now be considered under the new exceptions criteria established herein.

Rulemaking Procedure and Invitation to Comment

Section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, to be codified at 50 U.S.C. App. 2401 *et seq.)* ("the Act") exempts regualtions promulgated under the Act from the public participation in rulemaking procedures of the Administrative Procedures Act. Because they relate to a foreign affairs function of the United States, it has been determined that these regulations are not subject to Department of Commerce Administrative Order 218–7 (44 FR 2082, January 9, 1979) and International Trade Administration Administrative Instruction 1–6 (44 FR 2093, January 9, 1979) which implement Executive Order 12044 (43 FR 12661, March 23, 1978), "Improving Government Regulations."

However, because of the importance of the issues raised by these regulations and the intent of Congress set forth in section 13(b) of the Act, these regulations are issued in interim form and comments will be considered in developing final regulations.

The period for submission of comments will close March 23, 1981. However, in order that they may be given maximum consideration, persons wishing to comment are urged to submit their comments as soon as possible. All comments received before the close of the comment period will be considered by the Department in the development of final regulations. While comments received after the end of the comment period will be considered if possible, their consideration cannot be assured. Public comments which are accompanied by a request that part or all of the material be treated confidentially, because of its business proprietary nature or for any other reason, will not be accepted. Such comments and materials will be returned to the submitter and will not be considered in the development of the final regulations.

All public comments on these regulations will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, comments in written form are preferred. If oral comments are received, they must be followed by written memoranda (in five copies) which will also be a matter of public record and will be available for public review and copying.

Communications from agencies of the United States Government or foreign governments will not be made available for public inspection.

The public record concerning these regulations will be maintained in the International Trade Administration Freedom of Information Records Inspection Facility, Room 3012, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, D.C., 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about the inspection and copying of records at the facility may be obtained from Mrs. Patricia L. Mann, the International Trade Administration Freedom of Information Officer, at the above address or by calling (202) 377–3031.

Accordingly, the Export Administration Regulations, 15 CFR 368 *et seq.*, are revised as follows:

1. Section 377.2 is amended by inserting a new paragraph (c)(2) and renumbering the present paragraphs (c)(2) and (3) as (c)(3) and (4).

§ 377.2 Past participation in exports licensing method.

* * * * *

(c) Submission of Statement of Past Participation.

* * * * *

(2) Unique or unusual factors. If there are any unique or unusual factors affecting an exporter's history of exports during the base period—such as commencement or termination of export activity, disruption of exports due to strikes, acts of God, or seasonal variations or supply-demand cycles impacting his level of exports—which an exporter believes should be taken into consideration in the allocation of quotas, these should be succinctly stated in a letter to be considered with the Past Participation Statement.

* * * * *

2. Section 377.3 is amended by revising the section's title, retitling and renumbering subsection (a) as paragraph (a)(1), inserting a new paragraph (a)(2), and inserting a new subsection (c).

§ 377.3 Unique hardship and exceptions.

(a) *General.* (1) Unique Hardship * * *

(2) *Exceptions.* If an applicant seeks an exception, on grounds other than unique hardship, to quota limitations or other restrictions on export imposed for reasons of short supply, he must specifically cite this subsection in his application and state the precise reason(s) why he believes an exception is warranted. Each such application will be considered on a case-by-case basis and will be approved only in exceptional circumstances and only if the Office of Export Administration determines that granting of the requested exception would be consistent with the national interest and the purposes of the applicable short supply control program.

* * * * *

(c) Standards for Exceptions Cases. In making a determination with respect to an application for an exception, the Office of Export Administration will consider, in addition to the general guidelines of § 377.3(a)(2):

(1) Factors such as the following, to the extent that they are relevant to a particular case:

(i) Whether, for specific economic or technological reasons, the particular materials to be exported cannot be practicably processed or untilized within the United States;

(ii) The impact of the proposed export on the adequacy of domestic supply;

(iii) The probable impact on the domestic economy, including consumer and wholesale prices (nationally, regionally, or sectorally);

(iv) The extent to which the proposed country of destination engages in equitable trade practices with respect to the United States and treats the United States equitably in times of short supply;

(v) The extent to which the proposed export would advance or impair specific U.S. policy objectives (including those set forth in statutes or in any international agreement to which the United States is a party);

(vi) The extent to which the exceptions request arises from unique circumstances and is unlikely to be repeated;

(vii) The extent to which the circumstances giving rise to the exceptions request were within the control of the applicant; and

(viii) Any additional factors applicable to the particular commodity to be exported, as set forth elsewhere in this Part 377.

(2) What effect a finding in favor of the applicant would have on attainment of the basic objectives of the short supply control program.

3. Section 377.6 is amended by revising the present subsection (d)(10) and removing subsection (e)(10).

§ 377.6 Petroleum and petroleum products.

* * * * *

(d) Issuance of Export Licenses

* * * * *

(10) *Exceptions Cases.* An application for a validated license to export a pertroleum commodity, other than crude petroleum, submitted under Section 377.3(a)(2) will be considered under the standards for exceptions cases set forth in § 377.3(c) and under the following factors, if applicable:

(i) Whether there is a practicable domestic market for the commodity;

(ii) The level of domestic stocks of the commodity proposed for export, both nationally and in the area from which the export would take place, in relation to normal levels;

(iii) Whether the applicant, for bona fide business reasons other than export,

(A) Refined (or fractionated),

(B) Purchased, or

(C) Is contractually obligated to purchase the commodity proposed for export;

(iv) Whether the commodity will be only temporarily exported (e.g., for convenience or increased efficiency of transporation) and will reenter the United States;

(v) Whether the export would be part of a two-way transaction with Canada or Mexico, which has not yet begun, involving the import of an equal quantity of the same commodity, to be initiated under either of the following circumstances:

(A) To meet an emergency shortage in the importing country, or

(B) To relieve a temporary lack of practicable storage facilities in the exporting country.

(vi) If the proposed export is represented as an exchange, the extent to which:

(A) The commodity to be imported is otherwise available for purchase on the world market so that the export is not necessary for the import to take place, and

(B) The export-import transaction would result in a net gain or loss of energy, as measured in quantity and/or BTU content, to the United States.

(vii) Whether the export would be part of a transaction involving a temporary import, which has not yet begun, to be carried out for convenience or increased efficiency of transportation; and

(viii) The effect of the export (or combined export-import transaction in the case of an exchange) on wholesale and consumer prices in the United States.

BILLING CODE 3510–25–M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 250

[Release No. 35–21881; File No. S7–845]

Rules Exempting Certain Acquisitions by Electric Utility Companies and Exempting Such Companies as "Holding Companies"

AGENCY: Securities and Exchange Commission.

ACTION: Final rules.

SUMMARY: The Commission is adopting Rule 14, which exempts from the requirements of sections 9(a)(2) and 10 of the Public Utility Holding Company Act of 1935 ("Act") the acquisition by one or more electric utility companies of securities of a power supply company as defined in the rule. The Commission is also adopting Rule 15, a related rule, to provide an exemption from regulation as a "holding company" under section 3(a)(2) of the Act for an electric utility company that makes any such acquisitions. The rules eliminate the need for case-by-case consideration of projects by electric utility companies that would not be subject to regulation under the Act but for the fact that a separate company is employed to provide additional capacity to generate or transmit electric energy.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Aaron Levy, Director, Division of Corporate Regulation (202) 523–5691, Grant G. Guthrie, Associate Director (202) 523–5156, or James E. Lurie, Special Counsel (202) 523–5683, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is adopting Rules 14 and 15. The first exempts from Commission review and approval under sections 9(a)(2) and 10 of the Act acquisitions by one or more electric utility companies (hereinafter referred to as "participating" or "sponsoring companies") of securities of defined electric generation or transmission companies (hereinafter referred to as "power supply companies"). Rule 15 exempts pursuant to section 3(a)(2) of the Act companies that as a result of the acquisitions become holding companies. An electric utility company that also distributes gas at retail is an "electric utility company" as defined in section 2(a)(3) of the Act and under these rules.

When electric utility companies acquire the voting securities of a separate company organized to construct or operate electric generation or transmission facilities, one or more of the sponsoring companies may become "holding companies" within the meaning of section 2(a)(7)(A) of the Act.[1] Such acquisitions may require Commission approval under sections 9(a)(2) and 10 of the Act [2] if the acquiring company is an "affiliate" of another utility company within the meaning of section 2(a)(11)(A) of the Act and will become an affiliate of a power supply company by acquiring five percent or more of its voting securities.[3]

Electric utilities are increasingly relying on joint ownership of large new base-load generating plants and related transmission facilities in an effort to spread the risks associated with escalating costs of plant and equipment. It permits unaffiliated utilities to share the benefits of efficient new facilities that are too large for any one utility to construct for its own needs. The organization of a separate power supply company by one or more sponsoring utilities offers some advantages over joint ownership under a tenancy in common. The principal advantage is the ability to utilize "project financing," which allows the sponsoring utilities to finance the facility by the power supply company issuing long-term securities that are not subject to the mortgage bond indentures of the sponsoring companies and which provides flexibility with respect to the kind of security and the amount of debt used to finance the project. In addition, the proportionate interests of the participants in the new facility can be altered as load forecasts change and new participants in the project can be admitted by a transfer of the voting securities.

Over the years, the Commission has authorized, by order, the acquisition by electric utilities of equity interests in companies that would construct and operate generating facilities and sell power to the participating utilities or to a government agency.[4] On the basis of this experience, the Commission believes that an acquisition of a proportionate interest in a power supply company by an operating electric utility is not the kind of acquisition that the Commission need review and approve by order under section 10 in all cases. The requirement in Rule 14 that the energy produced be sold to the sponsoring utilities (except for sales to municipal and cooperative utilities) and the regulatory approvals relating to the financings of the power supply company satisfy the main objectives of section 10 without additional review by this Commission. Such an acquisition does not enlarge the service area of any sponsoring electric utility company, nor, in terms of the Act, frustrate effective local regulation of the sponsoring companies. It does no more than provide a sponsoring utility a source of supply to serve existing or future needs. These are the assumptions upon which the exemptions under Rules 14 and 15 are predicated.

The proposed rules were published for comment July 22, 1980 (HCAR No. 21661) (45 FR 49954, July 28, 1980). Twenty-nine

[1] A "holding company" is defined in section 2(a)(7)(A) as "any company which directly or indirectly owns, controls, or holds with power to vote, 10 per centum or more of the outstanding voting securities of a public utility company * * *." A "holding company" and its subsidiaries must register under section 5 of the Act, unless exempt under section 3(a) of the Act.

[2] Section 9(a)(2) provides: "Unless the acquisition has been approved by the Commission under section 10, it shall be unlawful for any person * * * to acquire, directly or indirectly, any security of any public utility company, if such person is an affiliate [under section 2(a)(11)(A)] of such [public utility] company and of any other public utility or holding company, or will by virtue of such acquisition become such an affiliate."

[3] If any company owns five percent or more of the voting securities of one public utility company or of a holding company, it is an "affiliate" of that company within the meaning of section 2(a)(11)(A) of the Act.

[4] *See Middle South Utilities, Inc.*, HCAR No. 18437 (June 4, 1974); *Maine Yankee Atomic Power Company*, 43 Sec. 764 (1968); *Vermont Yankee Nuclear Power Corporation*, 43 Sec. 693 (1968); *Connecticut Yankee Atomic Power Company*, 41 Sec. 705 (1963); *Southern Electric Generating Company*, HCAR No. 13210 (June 28, 1956); *Yankee Atomic Electric Company*, 36 Sec. 552 (1955); *Mississippi Valley Generating Company*, 36 Sec. 159 (1955); *Electric Energy, Inc.*, 34 Sec. 586 (1953); *Ohio Valley Electric Corporation, 34 Sec. 323 (1952); Central Illinois Public Service Company, 32 Sec. 202 (1951); Wisconsin River Power Company*, 27 Sec. 539 (1948).

letters of comment were received, all but one in favor of the proposed rules with suggested amendments. The rules, as now adopted, have been revised in light of the comments and have been clarified in other respects. The American Public Power Association ("APPA") is opposed in principle for reasons discussed below.

The exemption under Rule 14 applies to an electric utility company provided it is not an "affilitate" of any other company under clause (B) of section 2(a)(11).[5] This requirement limits the exemption to an independent utility that is not under the influence or control of another company as an affiliate or subsidiary of such other company. An affiliation under clause (B), when linked to the affiliations subject to section 9(a)(2), would result in an affiliate chain of a kind that might not meet the standards of section 10, particularly section 10(b)(3).[6] In this respect the limitation in the rule is consistent with section 10.

Rule 14 does not deny an exemption to a sponsoring company that, by reason of the voting securities it owns, has subsidiaries or affiliates as defined in clause (A) of section 2(a)(11). Indeed, the affiliate acquisition exempted by Rule 14 from section 9(a)(2) assumes that the sponsoring company has at least one other utility affiliate under clause (A). Nor does it preclude the sponsoring company from affiliate acquisitions of other electric utilities or of other power supply companies. Acquisitions by a registered holding company, directly or through a subsidiary, are governed by sections 9(a)(1) and 10. Rule 14 provides an exemption from section 9(a)(2), which applies to affiliate acquisitions by "any person" [7] other than a registered holding company or its subsidiary. Rule 14 does not apply to the latter acquisitions, but that does not affect exemptions under the rule for other participating utilities.

In response to comments, Rule 14(a)(1) substitutes approval by "a regulatory authority" for "the regulatory authorities." An acquisition by a sponsoring utility may require approval by more than one such authority, depending on the laws to which it is subject. For purposes of the rule one approval is sufficient.

The required authorization extends also to the obligation by the sponsoring companies to provide funds to the power supply companies pursuant to a capital funds agreement among the utility companies or a guarantee of their debt obligations. These are essential to effective review of project financing by the authorizing agencies. During the construction of its facilities, the power supply company has no revenues or income to supply any construction funds. Some of the funds are provided by the sponsoring utilities by a purchase of common stock. A far greater proportion of the capital funds are obtained from other sources, mostly institutional lenders. The obligations to them are supported or secured by the investment and financial commitments of the sponsoring companies, which are normally in proportion to their respective power entitlements.

When a utility company proposes to become a participating member in a power supply company, it must and does consider the exent or magnitude of the obligations or guarantees it is required to undertake. In fact these commitments are essential to the project's financing. It is not to be assumed that, in reviewing proposed financings of the power companies or the capital investments by the participating companies, regulatory agencies would or should be content with less. That is not to say that Rule 14 requires that these commitments shall be separately reviewed by the regulatory agencies. All that the rule requires is a determination that the total obligations or commitments by the participating utilities have been expressly considered and found acceptable by the regulatory agencies when granting the required authorization for the transactions that have been submitted to them.

The requirement in subsection (a)(2) of the rule that the electric energy produced by the power supply company shall be sold to the sponsoring companies does not restrict resale by them. The business of an electric utility company is to sell electric energy, at retail or wholesale, so that all of its energy is normally subject to sale. The terms of resale are governed by the Federal Power Act or state laws, not by the Holding Company Act, whether jurisdiction over acquisitions under section 9(a)(2) is exercised by order or exemption by rule. Subsection (a)(2) rests on the basic assumption of Rule 14 that participation of each sponsoring utility is for the purpose of securing additional capacity for its own needs. In this respect subsection (a)(2) is in accord with the policy of section 10 as expressed in subsection (c)(2) thereof.[8]

Rule 14 includes a transmission company in its definition of a "power supply company." A transmission company does not normally buy or sell the energy it transmits. Subsection (a)(2) has been revised accordingly to allow for transmission to the sponsoring utility or to its customers.

Subsection (a)(3) of Rule 14 has been revised to provide that the issuence of securities by the power supply company shall be expressly authorized by a regulatory authority having jurisdiction "over their issuance" rather than over "rates and services." Rates and services of the power supply company will generally be regulated by the Federal Energy Regulatory Commission under the Federal Power Act, but under sections 204 (a) and (f) of that stature its security issues may be subject to regulation by the regulatory agency of the state in which it is organized and operating. As revised, subsection (a)(3) or Rule 14 is consistent with that division of authority under the Federal Power Act.

Rule 14(b) provides that if the voting securities of the power supply company are acquired by more than one sponsoring utility, the requirements for exemption under the rule "shall apply to each." Some of the comment letters mistakenly infer that if one of the sponsoring utilities does not qualify for an exemption the exemption is not available to the others. The exemption under the rule, like section 9(a)(2) itself, applies to affiliate acquisitions by each of the participating utilities. If a participating utility does not qualify for the exemption that does not affect the exemption for the others. If a participating utility sells the voting securities it acquired, the purchaser's acquisition will be subject to section 9(a)(2) unless exempt under Rule 14. The revision stating that the exemption requirements "shall apply independently to each" eliminates any question about what is meant.

APPA objects to the exemption of Rule 14, citing *Municipal Electric Association of Massachusetts* v. *SEC*, 413 F.2d 1052 (C.A.D.C. 1969). In that case the court reversed orders of the Commission that, without a hearing, had approved under the standards of section 10 the acquisition, by a group of New England utilities, of the common stocks

[5] Under clause (B) of section 2(a)(11) an "affiliate" of a specified company is defined as "any company 5 per centum or more of whose outstanding voting securities are owned, controlled, or held with power to vote, directly or indirectly, by such specified company * * *."

[6] Section 10(b)(3) provides that approval be granted unless "such acquisition will unduly complicate the capital structure of the holding company system of the applicant * * *."

[7] Under section 2(a)(1) "person" means "an individual or company."

[8] Section 10(c)(2) provides that the Commission shall not approve of the acquisition unless the Commission finds that the acquisition will tend toward the development of "an integrated public utility system."

of two companies, each organized to construct and operate nuclear power generating facilities. The Massachusetts municipal utilities requested a hearing, claiming that their exclusion from participation in these projects was contrary to the Federal antitrust laws.[9] The court agreed that the municipals should have been granted a hearing and the opportunity to develop a record supporting their contentions.[10] APPA urges that the exemption under Rule 14 deprives excluded utilities, including municipal utilities and cooperatives, of an adjudicatory forum to present those issues.

The exemption from sections 9(a) (2) and 10, as provided by Rule 14, is not a grant of immunity from suit under Federal antitrust laws, and Rule 14 was not designed to foster exclusion of municipal and cooperative utilities. Rule 14 allows for their participation by the sale of electric energy to them without any equity or capital investment in the power supply company. The Commission is satisfied that the exemption under Rule 14 is consistent with the policies of the Act as expressed in Section 10. It does not share APPA's apprehensions that the exemption will be turned against municipal or cooperative utilities or APPA's assumption that only approval by order under section 10, issued after notice and opportunity for hearing, is necessary to assure their participation in the power supply company.

One of the comment letters, although supporting the rules, prefers an amendment to section 2(a)(3). The adoption of exemptive Rules 14 and 15 does not bar this legislative route.

Actually, the direct and simple way to achieve the aim of Rules 14 and 15 is by an amendment to section 2(a)(3) that would declare a power supply company not to be an "electric utility company." The assumption underlying such an amendment is that, although a separate company, the power supply company, whether a corporation or a partnership, is only a source of supply of electric energy to its sponsoring utilities and in practical effect is a divisional unit within the operations of the utilities it serves. It is the same assumption, as noted before, upon which the exemption of Rules 14 and 15 are predicated. If the power supply company were not an "electric utility company," section 9(a)(2) would not apply to any affiliate acquisitions of its voting securities; the acquisition of their voting securities would not make the acquiring utility a "holding company;" [11] and no exemptions from section 9(a)(2) or pursuant to section 3(a) would be needed.

Rule 15 is adopted pursuant to section 3(a) which authorizes the Commission, by rule or order, to exempt five classes of holding companies. The exemption in section 3(a)(2) is for a public-utility company, operating in the state of its organization and contiguous states, that is a holding company because it has one or more public-utility subsidiaries.

Rule 15 limits the exemption under section 3(a)(2) to a public-utility company that is an electric utility company and defines the exemption in terms related to the exemption under Rule 14. Subsection (a) of Rule 15 provides that an electric utility company is exempt pursuant to section 3(a)(2) if as a holding company it has one or more power supply companies as a subsidiary utility or utilities and the acquisitions are exempt under Rule 14. It further provides that if the electric utility otherwise qualifies for exemption pursuant to section 3(a)(2), by order or Rule 2(a)(2),[12] that exemption is not affected by an affiliate acquisition exempt under Rule 14. The sequence in the acquisition is not relevant.

Subsection (b) is for the special case in which the first affiliate acquisition with respect to a power supply company is not subject to section 9(a)(2), and Rule 14 is therefore not applicable. For that case, subsection (b) provides that the exemption under subsection (a) applies if the conditions for exemption under Rule 14 are satisfied.

APPA objects to Rule 15 as well. It refers to the Pacific Northwest Electric Power Planning and Conservation Act, which was signed into law on December 5, 1980 (P.L. 96–501). Section 9(h) of that statute declares the power supply company not a utility company and thus exempt or excluded from the definition in section 2(a)(3) of the Act. That legislation is a response to an anticipated regional shortage of electric generation and permits the utility companies in the region to provide additional facilities through jointly-owned companies. It differs from the pattern contemplated by Rule 14 in that the energy will be sold under contract to the Bonneville Power Administration for pooling with its own hydroelectric power and for redistribution to all utilities in the regional network, public and private. The Commission is satisfied that the Congress did not intend for that statute to provide a model or mandate for the exemptions the Commission is authorized to grant under the Act. For reasons previously discussed, the Commission considers Rules 14 and 15 consistent with the intent and purposes of the Act.

The definition of "power supply company" in Rule 14(c) is revised and is restated solely in terms of the included properties. The reference to ownership interests has been eliminated as not relevant to the definition. No change of substance is intended.

It has been suggested that Rule 14 should be revised to allow for participation by non-utility companies, either by extending the exemption to the non-utility companies or by providing that their participation would not affect the exemptions for the utility participants. These proposals might require republication for comment and in any case would delay adoption of Rules 14 and 15 as now drawn. Consideration of these proposals is deferred for further review to determine if there is a real and public need for non-utility participations and whether the present exemption, by order, under section 3(a)(3) is adequate.

Statutory Basis and Text of the Rules

The Securities and Exchange Commission hereby amends Title 17, Chapter II of the Code of Federal Regulations, pursuant to its authority under the Public Utility Holding Company Act of 1935 [15 U.S.C. 79a *et seq.* and particularly sections 3(a), 3(d) and 20(a) thereof [15 U.S.C. 79c(a), 79c(d) and 79t(a)]] by adding § 250.14 and § 250.15 to read as set forth below. This action is effective immediately pursuant to the Administrative Procedure Act [5 U.S.C. 553(d)(1)].

PART 250—GENERAL RULES AND REGULATIONS, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

§ 250.14 Exemption of acquisitions of securities of power supply companies from section 9(a)(2) of the act.

(a) An electric utility company which is not an "affiliate" of any other company under clause (B) of section 2(a)(11) shall be exempt from section

[9] Section 10(b)(1) provides for disapproval of the acquisition if it "will tend towards interlocking relations or the concentration of control of public utility companies, of a kind or to an extent detrimental to the public interest or the interest of investors or consumers."

[10] After some hearings the parties reached a settlement, which the Commission approved. *Vermont Yankee Nuclear Power Corp.* and *Maine Yankee Atomic Power Co.*, 44 SEC 396 (1970).

[11] A holding company as defined in section 2(a)(7)(A) is based on the ownership of voting securities (fn. 1 *supra*) of a "public utility company," which section 2(a)(5) states is either "an electric utility company or a gas utility company."

[12] Rule 2 provides a procedure under which a holding company and every subsidiary thereof as such may claim an exemption pursuant to sections 3(a)(1) or 3(a)(2) of the Act by filing a statement claiming such exemption, rather than by application and order.

9(a)(2) of the Act with respect to the acquisition of any security of a power supply company, either directly or through a wholly-owned company organized solely for that purpose, provided that:

(1) The acquisition of any securities of the power supply company, including its voting securities, and any obligation by such electric utility company to provide funds to the power supply company pursuant to a capital funds agreement or guarantee of its debts, is authorized by a regulatory authority having jurisdiction over the rates and services of such electric utility company;

(2) All of the voting securities of the power supply company are owned by one or more electric utility companies to which the power supply company sells all of its electric energy, or as a transmission company provides all its transmission services to them or their customers (exclusive of any electric energy or transmission services which it sells to or provides to any person described in section 2(c) of the Act or to any rural electric cooperative association); and

(3) The issue of securities by the power supply company (other than any security maturing not more than one year after the date of issue) is subject to express authorization by a regulatory authority having jurisdiction over their issuance.

(b) If the voting securities of the power supply company are acquired by more than one electric utility company, the requirements of this rule shall apply independently to each (except that paragraph (a)(1) shall not apply to any person referred to in section 2(c) of the Act or to any rural electric cooperative association).

(c) *Definitions.* (1) The term "electric utility company," as used in this rule, includes any person referred to in section 2(c) of the Act.

(2) The term "power supply company" means any company which owns and/or operates facilities for the generation or transmission of electric energy for sale to one or more electric utility companies, together with such other facilities as are incidental and functionally related thereto.

(3) The term "voting security" shall have the same meaning as in section 2(a)(17) of the Act, including any voting interest that serves the same defined purpose.

§ 250.15 Exemption of holding company and subsidiary companies under section 3(a)(2) of the act.

(a) When an electric utility company becomes a holding company with respect to one or more power supply companies in a transaction or tranactions exempted under § 250.14, the electric utility company, as such holding company, shall be exempt pursuant to section 3(a)(2) of the Act. If an electric utility company otherwise qualifies for an exemption pursuant to section 3(a)(2) of the Act, either by order or pursuant to § 250.2(a)(2) of these rules, that exemption shall not be affected by an acquisition exempt under § 250.14.

(b) The exemption under paragraph (a) of this section shall apply to an electric utility company whose acquisition, though not subject to section 9(a)(2) of the Act, satisfies all the requirements provided by § 250.14 for an exempt acquisition.

By the Commission.

George A. Fitzsimmons,

Secretary.

January 13, 1981.

BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

20 CFR Part 416

Supplemental Security Income for the Aged, Blind, and Disabled; Required Reports

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: These final regulations reorganize and restate our rules on reports required from each applicant, eligible individual, eligible spouse, eligible child, and representative payee under the Supplemental Security Income (SSI) program. To administer the program efficiently we must receive timely notice of events that affect eligibility and the amount of benefits. The final rules set forth all the provisions regarding required reports and explain the penalties we impose for failure to report on time. They also explain that if an individual has good cause for not making a report on time, we will not impose a penalty, but may still require that the individual refund an overpayment caused by a failure to report on time. We are making several minor revisions in the regulations. However, our principal purpose in rewriting this subpart is to make the rules clearer and easier for the public to use.

EFFECTIVE DATE: These regulations are effective January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. Marval Cazer, Office of Regulations, Social Security Administration, Room 4-H-10, West High Rise Building, 6401 Security Boulevard, Baltimore, MD 21235; Phone (301) 594-7463.

SUPPLEMENTARY INFORMATION: We have recodified Subpart G of 20 CFR Part 416 as part of Operation Common Sense, a Department-wide project to review and clarify all of our current regulations. We published our proposed recodification of this subpart as a Notice of Proposed Rule Making (NPRM) in the **Federal Register** on June 19, 1980 (45 FR 41453) with a 60-day comment period. A number of comments were received and are discussed under the heading **Discussion of Comments.**

Sections Retitled, Rearranged

We have rearranged the sections in this Subpart G in a more logical sequence. We have retitled and rewritten the sections in clear, plain language. We have added subtitles to highlight important rules and make them easier to find.

Definitions

We have added a new section (§ 416.702) to define terms used in this subpart.

Report Provisions

To administer the SSI program efficiently, the Social Security Administration (SSA) must receive timely notice of events that affect eligibility and the amount of benefits.

Section 416.704 states that an applicant, an eligible individual, and eligible spouse, an eligible child, or a representative payee of any of these, must report certain events to SSA. In addition, this section explains that a person who has been legally adjudged incompetent need not make reports, but that the incompetent person's representative payee must make the required reports.

Section 416.708 describes the events that must be reported to SSA. They include, for example, a change of address, a change in marital status, and an increase or decrease in the amount of income or resources an individual has. As explained in the NPRM, we are adding the requirement that a change in marital status and a change in school attendance must be reported for an ineligible child who lives with an eligible individual and an ineligible spouse. We are also clarifying the requirement that reports of temporary absences from the United States need be made only for absences of 30 or more consecutive days or for a full calendar month.

Section 416.710 lists what the reports must include, such as the event being reported and the date it happened. Also the name and social security number under which benefits are paid must be reported.

Section 416.712 describes the various ways an individual can make a report. For example, an individual can send a written report to SSA or go to one of SSA's offices and make an oral report.

Section 416.714 explains when reports are due. In addition, this section explains that SSA sometimes sends a written request for information needed to determine continuing eligibility or the correct amount of an SSI benefit payment. If an individual fails to respond to a written request for a report within 30 days, SSA may determine that he or she is ineligible to receive SSI benefits and benefits will be suspended.

Office of Management and Budget Clearance

The Department of Health and Human Services is required to submit to the Office of Management and Budget (OMB) for review and approval § 416.708, which deals with reporting requirements imposed on the public. All of the reporting events listed in § 416.708, with three exceptions, have OMB clearance under number 072–R0978. The exceptions are:

1. Section 416.708(i)—*Refusal to accept vocational rehabilitation services.* We generally receive these reports on Form SSA–1408 (VR Initiated Report to SSA). That form does not require OMB clearance.

2. Section 416.708(j)—*Refusal to accept treatment for drug addiction or alcoholism.* We generally receive these reports on Form SSA–8740 (Referral and Treatment Status). That form does not require OMB clearance.

3. Section 416.708(m)—*A termination of residence in the U.S.* We generally receive these reports from the Immigration and Naturalization Service on Form I–157 (Notice of Deportation).

However, when a recipient reports any of these three events directly to us, the report is taken on Form SSA–795 (Statement of Claimant or Other Person). The Form SSA–795 has OMB clearance under number 072–R0442.

Penalty Deduction

Section 416.722 explains that SSA will make a penalty deduction from an individual's SSI benefits if:

He or she has not made a required report on time;

SSA reduces, suspends, or terminates his or her benefits;

The individual has received and accepted an SSI benefit for the penalty period; and

The individual does not have good cause for not reporting on time.

Section 416.724 lists the amount of penalty deductions and explains that SSA will limit the number of penalty deductions imposed to one penalty deduction for any one penalty period.

Sections 416.726–416.730 describe penalty periods, give examples of penalty periods, and explain when a penalty period may be extended. We have clarified the beginning and ending dates of penalty periods. This clarification makes clear that where an event (described in § 416.708) occurs in one penalty period and does not become overdue until after that penalty period ends, a new penalty period is created.

Section 416.732 explains that if an individual has good cause for not making a report on time, SSA will not impose a penalty deduction, but may require that the individual refund an overpayment because of the event that was not reported. Good cause means that an individual was "without fault" as defined in § 416.552 or his or her delay in reporting was not willful.

Discussion of Comments

As previously indicated, we received a number of comments on the NPRM published on June 19, 1980 (45 FR 41453). A summary of the comments and our responses follow.

Report Provisions (§§ 416.704–416.714)

1. *Comment:* One commenter states the proposed rules fail to comply with the Privacy Act because the regulations do not inform the recipient of the purpose for which the information will be used and its effect on their benefit levels. In addition, the commenter states the regulations do not define "in-kind income", or adequately define "living arrangement", and "household".

Response: Section 416.701(a) clearly indicates that the events listed in this subpart must be reported because they may affect continued eligibility or payment amount. We disagree with the suggestion that we define "in-kind income" or expand the discussion on "living arrangement" or "household" in this subpart. This information appropriately belongs with the rules on income. Accordingly, in § 416.708(c) we specifically refer the reader to Subpart K, which contains the rules on income, for a complete discussion of what we consider income. We have used a cross-reference because we do not believe the rules should be repeated here. Also, it would be confusing to include only a partial listing of what constitutes income. For these reasons and since this subpart is designed only to alert the reader as to why we require reports of certain events, the events that must be reported, and the penalties for not making required reports, no change is being made in the regulations.

2. *Comment:* One commenter states that § 416.708(k) limits reporting to admission to or discharge from a public institution or medical facility. The commenter suggests this section be revised to include admission to or discharge from a private institution.

Response: This comment is correct. Admission to or discharge from any kind of facility including a private institution may affect eligibility or payment amount and must be reported. Accordingly, § 416.708(k) is being revised to include private institutions.

3. *Comment:* One commenter is concerned that the reporting requirement of "any improvement in your medical condition" (§ 416.708(h)) will unduly burden those agencies serving as representative payees for disabled or blind recipients. The commenter suggests that § 416.708(h) be revised to state that medical improvement need not be reported if the recipient is a resident of an inpatient medical program or other alternative living arrangement where the recipient's medical condition is monitored by a health professional. In this situation the recipient or representative payee would report medical improvement only where it would affect eligibility for benefits.

Response: We do not believe the regulations require a change to clarify the conditions under which medical improvement need be reported. The proposed change is unacceptable because the recipient or representative payee would not be able to determine under what conditions medical improvement affects eligibility for benefits. We require reports of medical improvement in all cases because this information is necessary for us to determine whether to conduct a continuing disability investigation. We use the results of the investigation to determine if eligibility for benefits continues or should be terminated.

4. *Comment:* One commenter points out that § 416.708 (m) and (n) makes a distinction between reporting a permanent change in U.S. residency and a temporary change in U.S. residency for more than 30 days or a full calendar month. The commenter suggests these paragraphs be combined to read as follows:

(m) *Leaving the U.S.* You must report to us if you leave the U.S. for 30 or more consecutive days or for a full calendar month.

Response: We disagree with this suggestion. We believe two separate paragraphs are necessary to avoid any potential misunderstandings. The purpose of having two paragraphs is to clarify and state more clearly when reports for leaving the U.S. are required. The rule in § 416.708(m) is intended to cover those cases where the individual no longer meets the citizenship or alienage requirements as well as residency in the U.S. Paragraph (n) deals with the situations where a person would no longer be considered a resident only for the period he or she was outside the U.S.

Penalty Deductions (§§ 416.722–416.732)

5. *Comment:* One commenter strongly opposed the penalty provisions for tardy reports and recommended we eliminate it.

Response: Section 1631(e)(2) of the Social Security Act clearly requires that we impose a penalty by reducing subsequent benefits where an individual fails to timely report events and changes in circumstances relevant to eligibility and benefit amount unless the individual had good cause for such failure or delay. Since this is a statutory requirement, we cannot eliminate the penalty provisions.

6. *Comment:* One commenter believes that the penalty imposed as a result of these regulations is a reduction, suspension, or termination of benefits. The commenter believes that such a penalty provision would force SSI recipients whose benefits are reduced, suspended, or terminated to seek public assistance from other programs, thereby overburdening those programs. The commenter also believes that the regulations will have an adverse effect on children and that children cannot be penalized if their parents fail to report.

Response: The penalty for failure to report is not a reduction, suspension, or termination of benefits. However, the penalty for failure to report, which is a dollar amount ($25–$100), is or may be withheld from SSI payments. The events listed in this subpart must be reported because they affect eligibility and payment amount. If eligibility and payment amount are affected, we will reduce, suspend, or terminate benefits as required by the circumstances.

We are not aware of any public assistance program that has been overburdened with applications from SSI recipients whose benefits have been reduced, suspended, or terminated. We have no reason to believe that other public assistance programs will be adversely affected by SSI benefit reductions, suspensions, or terminations arising in the future. In any case since the penalty is required by statute we could not change the rules reflecting this requirement.

In regard to the commenter's final point as to the reporting requirements for children, § 416.704(a)(3) requires an eligible child to make the required reports. The parents of the child are not responsible for making the report unless the parent is the representative payee. Eligible children will not be penalized if they have good cause for failure to report a change in their circumstances. As a general rule, children who fail to report are usually found to be "without fault" in failing to report and are not penalized.

7. *Comment:* One commenter states that the definition of "not willful" in § 416.732 is insufficiently defined.

Response: We have expanded the definition of "not willful" to explain more fully what we mean. The expanded definition states that "not willful" means the individual did not have full knowledge of the existence of an obligation to make a required report or did not intentionally, knowingly, and purposely fail to make a required report.

8. *Comment:* One commenter believes that where it is the representative payee's responsibility to report and he or she fails to do so, the penalty should not be imposed upon the recipient as it is obviously not the recipient's fault.

Response: Under § 416.704(c), a recipient with a representative payee shares the responsibility for making a report unless the recipient has been adjudged legally incompetent. In that case, a recipient is relieved of his or her responsibility and the responsibility to report rests solely with the representative payee. In those situations a recipient would not be penalized for a representative payee's failure to report. However, a recipient who has not been adjudged legally incompetent can be penalized for failing to report even if the representative payee also failed to report. For recipients with representative payees, as well as all recipients, we would determine if "good cause" existed for failure to report.

Periodic Notices

9. *Comment:* One commenter suggested that the regulations include a requirement that SSA periodically notify applicants, recipients, and representative payees of their duty to report.

Response: We, in fact, issue periodic reminders to SSI recipients and representative payees as to what events must be reported. We are opposed to changing the language of the regulations to mandate that these reminders be issued at specific times. We are evaulating our current methods of issuing periodic reminders of reporting responsibilities to recipients and representative payees (that is, check stuffers, periodic redeterminations, public information newspaper articles) to see if they can be improved.

Relationship to Medicaid Regulations

10. *Comment:* One commenter notes that States are required to use SSI criteria in determining Medicaid eligibility for aged, blind, and disabled individuals. The commenter asks what impact does §§ 416.714 and 416.722 have on the States' Medicaid eligibility determination? The commenter also asks if the applicable sections of this subpart will be incorporated in the Medicaid regulations?

Response: Section 416.714(b) (which provides that failure to submit a report requested by us could result in a determination of ineligibility for SSI benefits), will impact on a State's Medicaid eligibility determinations in those States which condition Medicaid eligibility solely on SSI eligibility. Therefore, in those States, if a recipient failed to answer our written request for information within 30 days, the person may be determined to be ineligible for SSI and, as a result, also lose Medicaid eligibility. Many States which use SSI eligibility as a condition for Medicaid eligibility use other criteria to determine Medicaid eligibility if a recipient loses SSI eligibility. In those States, a loss of SSI eligibility under section 416.714(b) will not necessarily result in loss of Medicaid.

Section 416.722 (which lists the circumstances under which we make a penalty deduction), will have no impact on Medicaid eligibility determinations in any Statem, including those which condition Medicaid eligibility solely on SSI eligibility. Recipients whose benefits are reduced for collection of a penalty deduction are not considered ineligible for SSI, even if that reduction results in the recipient not receiving any benefits. Since these recipients do not lose SSI eligibility, they should not lose their Medicaid eligibility. Decreased SSI payments will not result in any increase in Medicaid to compensate for the reduction.

Since these regulations are merely a clarification of SSI regulations and there is no substantive change in them, changes in the Medicaid regulations do not appear necessary. Nevertheless, we have forwarded a copy of this comment to the Health Care Financing Administration (which administers the Medicaid program) for any action it believes may be necessary.

Differences between Current Regulations, NPRM, and Final Regulations

As indicated in the NPRM we proposed a number of changes which we are incorporating into these final regulations.

1. In § 416.708(g) we have added the requirement that an eligible individual must report to us the marriage of an ineligible child who lives with an eligible individual and an ineligible spouse. This report is required because a change in marital status could affect the amount of income that is deemed (as described in Subpart K of this part) to an eligible individual from his or her ineligible spouse. When an ineligible child marries, we cease allocating a portion of the ineligible spouse's income to that child beginning in the month after the child's marriage.

2. In § 416.708(l) we have added the requirement that an eligible individual must report to us a change in school attendance of an ineligible child who is at least age 18 but less than 21 and who lives with the eligible individual and his or her ineligible spouse. This report is required because a change in school attendance could affect the amount of income that is deemed (as described in Subpart K of this part) to an eligible individual from his or her ineligible spouse. When an ineligible child who is at least age 18 but less than 21 stops attending school we cease allocating a portion of the ineligible spouse's income to that child beginning in the month after the child stops attending school. Conversely, when an ineligible child who is at least age 18 but less than 21 becomes a student, we allocate a portion of the ineligible spouse's income to that child beginning in the month after the child becomes a student.

3. In § 416.708(m) we have added the requirement that an eligible individual must report to us when he or she leaves the United States with the intent of abandoning his or her residence in the United States. This report is required because an eligible individual who abandons his or her residence in the United States becomes ineligible in the first month he or she is no longer a resident of the United States. The current regulations (§ 416.708(n)) state that an eligible individual must report the loss of his or her status as a resident of the United States. This clarification makes clear that intent to abandon residence in the United States, whether voluntary or not, must be reported to us.

4. In § 416.708(n) we explain that an eligible individual must report to us when he or she leaves the United States for 30 or more consecutive days or for a full calendar month without intending to abandon his or her residence in the United States. The current regulations (§ 416.703(j)) state that an eligible individual must report any departure from the United States. The final rule states more clearly what is intended.

In addition to the above changes we are also making several changes based on the comments we received.

1. In § 416.708(k) we are adding the requirement that admission to or discharge from a private institution must be reported. We are also defining the term "private institution".

2. In § 416.732(b) we have expanded the definition of "not willful" to more fully explain what we mean.

Accordingly, the regulations with these clarifying and editorial changes are adopted as set forth below.

(Catalog of Federal Domestic Assistance Program No. 13.807, Supplemental Security Income Program)

Dated: December 10, 1980.

William J. Driver,

Commissioner of Social Security.

Approved: January 9, 1981.

Patricia Roberts Harris,

Secretary of Health and Human Services.

Subpart G of Part 416, Chapter III of Title 20 of the Code of Federal Regulations is revised to read as follow:

Subpart G—Reports Required

Introduction

Sec.

416.701 Scope of subpart.
416.702 Definitions.

Report Provisions

416.704 Who must make reports.
416.708 What you must report.
416.710 What reports must include.
416.712 Form of the report.
416.714 When reports are due.

Penalty Deductions

416.722 Circumstances under which we make a penalty deduction.
416.724 Amounts of penalty deductions.
416.726 Penalty period: First failure to report.
416.728 Penalty period: Second failure to report.
416.730 Penalty period: Three or more failures to report.
416.732 No penalty deduction if you have good cause for failure to report timely.

Authority: Secs. 1102, 1611, 1612, 1613, 1614, and 1631 of the Social Security Act, as amended; Sec. 211 of Pub. L. 93–66; 49 Stat. 647, as amended; 86 Stat. 1466, 1468, 1470, 1471, and 1475; 87 Stat. 154; 42 U.S.C. 1302, 1382, 1382a, 1382b, 1382c, and 1383.

Subpart G—Reports Required

Introduction

§ 416.701 Scope of subpart.

(a) *Report provisions.* The Social Security Administration, to achieve efficient administration of the Supplemental Security Income (SSI) program for the Aged, Blind, and Disabled, requires that you (or your representative) must report certain events to us. It is important for us to know about these events because they may affect your continued eligibility for SSI benefits or the amount of your benefits. This subpart tells you what events you must report; what your reports must include; and when reports are due. The rules regarding reports are in §§ 416.704–416.714.

(b) *Penalty deductions.* If you fail to make a required report when it is due, you may suffer a penalty. This subpart describes the penalties; discusses when we may impose them; and explains that we will not impose a penalty if you have good cause for failing to report timely. The rules regarding penalties are in §§ 416.722–416.732.

§ 416.702 Definitions.

For purposes of this subpart—

"Essential person" means someone whose presence was believed to be necessary for your welfare under the State program that preceded the SSI program. (See §§ 416.241–416.249.)

"Parent" means a natural parent, an adoptive parent, or the spouse of a natural or adoptive parent.

"Representative payee" means an individual, an agency, or an institution selected by us to receive and manage SSI benefits on your behalf. (See Subpart F of this part for details describing when a representative payee is selected and a representative payee's responsibilities.)

"Residence in the United States" means that your permanent home is in the United States.

"United States" or *"U.S."* means the 50 States, the District of Columbia, and the Northern Mariana Islands.

"We," "Us," or *"Our" means the Social Security Administration.*

"You" or *"Your"* means an applicant, an eligible individual, an eligible spouse, or an eligible child.

Report Provisions

§ 416.704 Who must make reports.

(a) You are responsible for making required reports to us if you are—

(1) An eligible individual (see § 416.120(13));

(2) An eligible spouse (see § 416.120(14));

(3) An eligible child (see §§ 416.120(13) and 416.1050); or

(4) An applicant awaiting a final determination upon an application.

(b) If you have a representative payee, and you have not been legally adjudged incompetent, either you or your representative payee must make the required reports.

(c) If you have a representative payee and you have been legally adjudged incompetent, you are not responsible for making reports to us; however, your representative payee is responsible for making required reports to us.

§ 416.708 What you must report.

This section describes the events that you must report to us. They are—

(a) *A change of address.* You must report to us any change in your mailing address and any change in the address where you live.

(b) *A change in living arrangements.* You must report to us any change in the make-up of your household: that is, any person who comes to live in your household and any person who moves out of your household.

(c) *A change in income.* You must report to us any increase or decrease in your income, and any increase or decrease in the income of—

(1) Your ineligible spouse who lives with you;

(2) Your essential person;

(3) Your parent, if you are an eligible child and your parent lives with you; or

(4) An ineligible child who lives with you.

However, you need not report an increase in your Social Security benefits if the increase is only a cost-of-living adjustment. (For a complete discussion of what we consider income, see Subpart K. See Subpart M, § 416.1323 regarding suspension because of excess income.)

(d) *A change in resources.* You must report to us any resources you receive or part with, and any resources received or parted with by—

(1) Your ineligible spouse who lives with you;

(2) Your essential person; or

(3) Your parent, if you are an eligible child and your parent lives with you. (For a complete discussion of what we consider a resource, see Subpart L. See Subpart M, § 416.1324 regarding suspension because of excess resources.)

(e) *Eligibility for other benefits.* You must report to us your eligibility for benefits other than SSI benefits. See §§ 416.230 and 416.1330 regarding your responsibility to apply for any other benefits for which you may be eligible.

(f) *Certain deaths.* (1) If you are an eligible individual, you must report the death of your eligible spouse, the death of your ineligible spouse who was living with you, and the death of any other person who was living with you.

(2) If you are an eligible spouse, you must report the death of your spouse, and the death of any other person who was living with you.

(3) If you are an eligible child, you must report the death of a parent who was living with you, and the death of any other person who was living with you.

(4) If you are a representative payee, you must report the death of an eligible individual, eligible spouse, or eligible child whom you represent; and the death of any other person who was living in the household of the individual you represent.

(5) If you have a representative payee, you must report the death of your representative payee.

(g) *A change in marital status.* You must report to us—

(1) Your marriage, your divorce, or the annulment of your marriage;

(2) The marriage, divorce, or annulment of marriage of your parent who lives with you, if you are an eligible child;

(3) The marriage of an ineligible child who lives with you, if you are an eligible child; and

(4) The marriage of an ineligible child who lives with you if you are an eligible individual living with an ineligible spouse.

(h) *Medical improvements.* If you are eligible for SSI benefits because of disability or blindness, you must report any improvement in your medical condition to us.

(i) *Refusal to accept vocational rehabilitation services.* If we have referred you for vocational rehabilitation services and you refuse to accept these services, you must report your refusal to us.

(j) *Refusal to accept treatment for drug addiction or alcoholism; discontinuance of treatment.* If you have been medically determined to be a drug addict or an alcoholic, and you refuse to accept treatment for drug addiction or alcoholism at an approved facility or institution, or if you discontinue treatment, you must report your refusal or discontinuance to us.

(k) *Admission to or discharge from a medical facility, public institution, or private institution.* You must report to us your admission to or discharge from—

(1) A hospital;

(2) A skilled nursing facility;

(3) An intermediate care facility; or

(4) A public institution (defined in § 416.231); or

(5) A private institution. "Private institution" means an institution as defined in § 416.231(b)(1) which is not administered by or the responsibility of a governmental unit.

(l) *A change in school attendance.* You must report to us—

(1) A change in you school attendance if you are an eligible child;

(2) A change in school attendance of an ineligible child who is at least age 18 but less than 21 and who lives with you if you are an eligible child; and

(3) A change in school attendance of an ineligible child who is at least age 18 but less than 21 and who lives with you if you are an eligible individual living with an ineligible spouse.

(m) *A termination of residence in the U.S.* You must report to us if you leave the United States voluntarily with the intention of abandoning your residence in the United States or you leave the United States involuntarily (for example, you are deported).

(n) *Leaving the U.S. temporarily.* You must report to us if you leave the United States for 30 or more consecutive days or for a full calendar month (without the intention of abandoning your residence in the U.S.).

§ 416.710 What reports must include.

When you make a report you must tell us—

(a) The name and social security number under which benefits are paid;

(b) The name of the person about whom you are reporting;

(c) The event you are reporting and the date it happened; and

(d) Your name.

§ 416.712 Form of the report.

You may make a report in any of the ways described in this section.

(a) *Written reports.* You may write a report on your own paper or on a printed form supplied by us. You may mail a written report or bring it to one of our offices.

(b) *Oral reports.* You may report to us by telephone, or you may come to one of our offices and tell one of our employees what you are reporting.

(c) *Other forms.* You may use any other suitable method of reporting—for example, a telegram or a cable.

§ 416.714 When reports are due.

(a) *A reportable event happens.* You should report to us as soon as an event listed in § 416.708 happens. If you do not report within 30 days after the calendar quarter in which the event happens, your report will be late. We may impose a penalty deduction from your benefits for a late report (see §§ 416.722–416.732).

(b) *We request a report.* We may request a report from you if we need information to determine continuing eligibility or the correct amount of your SSI benefit payments. If you do not report within 30 days of our written request, we may determine that you are ineligible to receive SSI benefits. We will suspend your benefits effective with the month following the month in which we determine that you are ineligible to receive SSI benefits because of your failure to give us necessary information.

Penalty Deductions

§ 416.722 Circumstances under which we make a penalty deduction.

A penalty deduction is made from your benefits if—

(a) You fail to make a required report on time (see §§ 416.708 and 416.714);

(b) We must reduce, suspend, or terminate your benefits because of the event you have not reported;

(c) You received and accepted an SSI benefit for the penalty period (see §§ 416.724–416.728 for penalty period definitions); and

(d) You do not have good cause for not reporting on time (see § 416.732).

§ 416.724 Amounts of penalty deductions.

(a) *Amounts deducted.* If we find that we must impose a penalty deduction, you will lose from your SSI benefits a total amount of—

(1) $25 for a report overdue in the first penalty period;

(2) $50 for a report overdue in the second penalty period; and

(3) $100 for a report overdue in the third (or any following) penalty period.

(b) *Limit on number of penalties.* Even though more than one required report is overdue from you at the end of a penalty period, we will limit the number of penalty deductions imposed to one penalty deduction for any one penalty period.

§ 416.726 Penalty period: First failure to report.

(a) *First penalty period.* The first penalty period begins on the first day of the month you apply for SSI benefits and ends on the day we first learn that you should have made a required report, but did not do so within 30 days after the calendar quarter in which the event happened. There may be more than one required report overdue at the end of the first penalty period, but we will impose no more than one penalty deduction for the period.

Example: On February 1 Mr. Jones filed for SSI benefits. His benefit payments began with February. On May 5 Mr. Jones left the U.S. to visit relatives in Europe. On September 1 he returned to his home in the U.S. On November 20 he reported that he had been out of the U.S. The event (being out of the U.S. for more than 30 consecutive days) happened in the second calendar quarter (April–May–June). Mr. Jones should have reported it to us within 30 days after the calendar quarter in which the event happened (before July 31). The first penalty period began February 1, the day Mr. Jones filed his application, and ended November 20, the day we learned that his report was overdue.

(b) *Extension of first penalty period.* If you have good cause for not making a report on time (see § 416.732), we will extend the first penalty period to the day when we learn that you should have made another required report, but did not do so within 30 days after the calendar quarter in which the event happened. There may be more than one required report overdue at the end of the extended first penalty period, but we will impose no more than one penalty deduction for the extended period.

Example: Mr. Jones was found to have good cause for failing to report that he had been outside the U.S. (see § 416.732); therefore, the first penalty period did not end on November 20. On December 6 we learned that he had failed to report to us income he received in March and April. He did not have good cause for failing to report this income; therefore, the first penalty period ended December 6 and we imposed a penalty deduction for his failure to report the income.

§ 416.728 Penalty period: Second failure to report.

(a) *Second penalty period.* The second penalty period begins on the day after the first penalty period ends. The second penalty period ends on the day we first learn that you should have made a required report, but did not do so within 30 days after the calendar quarter in which the event happened. (The event may have happened during the first penalty period, with the reporting due date in the second penalty period. The due date and the failure to report on time are the important factors in establishing a penalty period.) There may be more than one required report overdue at the end of the second penalty period, but we will impose no more than one penalty deduction for the period.

Example: Mrs. Martin's first penalty period had ended June 30. On December 31 Mrs. Martin reported that she had received a $2,000 inheritance on July 3. The event happened in the third calendar quarter (July–August–September). She should have reported it to us within 30 days after the calendar quarter in which the event happened (before October 31). The second penalty period began July 1, the day after the first penalty period ended, and ended December 31, the day we learned that her report was overdue.

(b) *Extension of second penalty period.* If you have good cause for not making a report on time (see § 416.732), we will extend the second penalty period to the day when we learn that you should have made another required report, but did not do so within 30 days after the calendar quarter in which the event happened. There may be more than one required report overdue at the end of the extended second penalty period, but we will impose no more than one penalty deduction for the extended period.

Example: Mrs. Martin did not have good cause for failing to report on time (see § 416.732); therefore, we did not extend the second penalty period—it ended on December 31, the day we learned that her report was overdue, and we imposed a penalty deduction. One year later, we first learned that Mrs. Martin was absent from the United States for several months and her report of this event was overdue during the second penalty period, but we did not impose another penalty deduction.

§ 416.730 Penalty period: Three or more failures to report.

(a) *Third (or a following) penalty period.* A third (or a following) penalty period begins the day after the last penalty period ends. This penalty period ends on the day we first learn that you should have made a required report during the penalty period, but did not do so within 30 days after the calendar quarter in which the event happened. (The event may have happened during an earlier penalty period, with the reporting due date in the third (or a following) penalty period. The due date and the failure to report on time are the important factors in establishing a penalty period.) There may be more than one required report overdue at the end of a penalty period, but we will impose no more than one penalty deduction for any one penalty period.

(b) *Extension of third (or a following) penalty period.* Just as with the first and second penalty periods, if you have good cause for not making a report on time during the third (or a following) penalty period (see § 416.732), we will extend the penalty period to the day when we learn that you should have made another required report, but did not do so within 30 days after the calendar quarter in which the event happened. There may be more than one required report overdue at the end of an extended penalty period, but we will impose no more than one penalty deduction for any one extended penalty period.

§ 416.732 No penalty deduction if you have good cause for failure to report timely.

We will find that you have good cause for failure to report timely and we will not impose a penalty deduction, if—

(a) You are "without fault" as defined in § 416.552; or

(b) Your failure or delay in reporting is not willful. "Not willful" means that—

(1) You did not have full knowledge of the existence of your obligation to make a required report; or

(2) You did not intentionally knowingly, and purposely fail to make a required report.

However, in either case we may require that you refund an overpayment caused by your failure to report. See Subpart E of this part for waiver of recovery of overpayments.

[FR Doc. 81-1568 Filed 1-19-81; 8:45 am]

BILLING CODE 4110-07-M

DEPARTMENT OF LABOR

29 CFR Part 4

Office of the Secretary

Labor Standards for Federal Service Contracts

Note.—This document originally appeared for Monday January 19, 1981. It is reprinted in this issue to meet requirements for publication on the Tuesday–Friday schedule assigned to the Department of Labor.

AGENCY: Wage and Hour Division, Labor.

ACTION: Final rule.

SUMMARY: This rule revises § 4.133 of the regulations of the Department of Labor (29 CFR 4.133) to clarify the treatment of concession contracts under the Service Contract Act. Subsection (a) of the revised regulation makes it clear that government concession contracts, like all other government contracts for services, are covered by the Act. Subsection (b) indicates the types of concession contracts the Secretary of Labor is exempting from the Act's coverage pursuant to his authority under Section 4(b) of the Service Contract Act.

EFFECTIVE DATE: February 18, 1981.

FOR FURTHER INFORMATION CONTACT: Dorothy P. Come, Assistant Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S–3502, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone: 202–523–8333.

SUPPLEMENTARY INFORMATION:

Coverage of the Service Contract Act is broad. It encompasses all contracts, or any bid specifications therefor, entered into by and with the Government, which have as their principal purpose the furnishing of "services in the United States through the use of service employees." Since 1966 the Department of Labor excepted from the Act's requirements those concession contracts which provide services of "indirect or remote" benefit to the Government, for example, National Park Service food and lodging concessionaires serving the general public.

However, difficulties were encountered in applying the language of 29 CFR 4.133, particularly in circumstances where it is difficult to determine how "indirect or remote" is the benefit to the Government. Further, the regulation was susceptible of being misconstrued as providing that the Act itself does not cover a contract unless the services provided are of direct benefit to the Government.

For these reasons, the Department of Labor proposed to recast the regulation to indicate that the Act covered all government concession contracts for services, and to continue to provide an exemption for National Park Service concession contracts which furnish food or lodging services to the general public. This proposed revision of § 4.133 was published in the **Federal Register** (44 FR 77057) on December 28, 1979. Comments concerning this proposed revision were received from the National Counsel of Technical Service Industries and three government agencies—the Federal Aviation Administration (FAA), the National Aeronautics Space Administration (NASA), and the General Services Administration (GSA). All except GSA questioned the correctness of the interpretation of the Department of Labor that the Service Contract Act covers concession contracts for services irrespective of the beneficiary of the contract services. NASA and FAA contended that the Act was intended to cover only concession contracts which are of a direct benefit to the Government or its personnel, and was not intended to cover concession contracts which primarily benefit the general public.

However, these contentions must be rejected. As previously noted, the language of the Act is very broad and covers all contracts the principal purpose of which is furnishing services. The Act's language makes no distinction based on the beneficiary of the contract services. In addition, the legislative history of the statute provides no evidence of a Congressional intent to limit coverage to service contracts of direct benefit to the Government. Comments by members of Congress that the Act should not be applied to certain concession contracts providing services to the general public were made after the passage of the Act, and do not constitute part of the statute's legislative history.

GSA and the National Council of Technical Service Industries submitted comments questioning whether there was a sufficient basis to exempt concession contracts in National Parks while not exempting similar concession contracts involving other Federal agencies. As a consequence of these comments, the Department of Labor proposed additional revisions to the regulation, which were published in the **Federal Register** (45 FR 81785) on December 12, 1980. Under this further proposed revision, subsection (b) was modified and clarified to specifically list which types of concession contracts were exempt, and to indicate that the exemption is not limited to National Park Service concession contracts but applies to qualifying concession contracts of other government agencies as well.

FAA and NASA submitted additional comments concerning these further proposed revisions. FAA generally approved of the revisions, but recommended that the list of exempt concession contracts be expanded to include those involving taxicabs, barber shops, commercial advertising displays and aircraft fuel sales. This recommendation is rejected as not being appropriate for incorporation in the regulation at this time. Further information is needed to establish both the basis for and the precise scope of these additionally suggested exemptions.

NASA submitted additional comments again contesting the interpretation of the Act found in § 4.133 that concession contracts which provide services of indirect or remote benefit to the Government are covered by the Act. NASA expressed concern with the possible effect this proposed regulation might have on the status of a pending lawsuit, and recommended that the proposed regulation be held in abeyance until the court rules in the case. However, in light of the real need for clarification of the position of the Department of Labor concerning the application of the Service Contract Act to government concession contracts, and the fact that it has been over a year since publication of the proposed revision of the regulation, the Department of Labor feels it would not be in the public interest to further delay publication of the regulation as a final rule.

The Secretary of Labor has determined, based on the information available, that because the proposed exemption is supported by statements of members of Congress, it is necessary and proper in the public interest; and further that because the proposed regulation will clarify the limits and make clear the basis of the previous exemption, it is therefore in accord with its remedial purpose to protect prevailing labor standards.

It has been determined that the amendments to this Regulation do not meet the criteria of Executive Order 12044 and the Department of Labor Guidelines (44 FR 5570) for a regulatory analysis. The revised regulation essentially clarifies interpretations and policies, and will not, in any event, cause major cost/price increases.

Accordingly, 29 CFR § 4.133 is revised as set forth below:

§ 4.133 Beneficiary of contract services.

(a) The Act does not say to whom the services under a covered contract must be furnished. So far as its language is concerned, it is enough if the contract is "entered into" by and with the government and if its principal purpose is "to furnish services in the United States through the use of service employees". It is clear that Congress intended to cover at least contracts for services of direct benefit to the Government, its property, or its civilian or military personnel for whose needs it is necessary or desirable for the government to make provision for such services. For example, the legislative history makes specific reference to such contracts as those for furnishing food service and laundry and dry cleaning service for personnel at military installations. Furthermore, there is no limitation in the Act regarding the beneficiary of the services, nor is there any indication that only contracts for services of direct benefit to the Government, as distinguished from the general public, are subject to the Act. Therefore, where the principal purpose of the Government contract or any bid specification therefor is to provide services through the use of service employees, the contract is covered by the Act, regardless of the direct beneficiary of the services or the source

of the funds from which the contractor is paid for the service, and irrespective of whether the contractor performs the work in its own establishment, on a Government installation, or elsewhere. The fact that the contract requires or permits the contractor to provide the services directly to individual personnel as a concessionaire, rather than through the contracting agency, does not negate coverage by the Act.

(b) Because of comments made shortly after the Act's passage by some members of Congress that the Act's requirements should not be imposed on certain concession contracts providing services to the general public, the Department of Labor, pursuant to Section 4(b) of the Act, exempts from the provisions of the Act certain kinds of concession contracts as provided herein. Specifically, concession contracts (such as those entered into by the National Park Service) for the furnishing of food, lodging, automobile fuel, souvenirs, newspaper stands, and recreational equipment to the general public, as distinguished from the United States Government or its personnel, are exempt. Where concession contracts, however, include specifications for services other than those stated, such as the maintenance of government buildings and grounds, and the dissemination of information about government programs or facilities, those services are not exempt. Exemption of additional recreational or similar services under concession contract will be determined in the discretion of the Secretary on a case-by-case basis in accordance with 29 CFR 4.123 and section 4(b) of the Act. The exemption provided does not affect a concession contractor's obligation to comply with the labor standards provisions of any other statutes such as the Contract Work Hours and Safety Standards Act, the Davis-Bacon Act (40 U.S.C 276 *et seq.*; see Part 5 of this title) and the Fair Labor Standards Act (29 U.S.C. 201 *et seq.*). This clarification and limitation of the exemption previously granted (33 FR 9880, July 10, 1968) is necessary and proper in the public interest and is in accord with the remedial purpose of the Act.

(Secs. 2(a) and 4, 79 Stat. 1034, 1035; 41 U.S.C. 351, 353, and under 5 U.S.C. 301)

Signed at Washington, D.C. this 14th day of January, 1981.

Donald Elisburg,

Assistant Secretary of Labor, Employment Standards Administration.

BILLING CODE 4510-27-M

Occupational Safety and Health Administration

29 CFR Part 1990

Identification, Classification and Regulation of Potential Occupational Carcinogens; Conforming Deletions

Note.—This document originally appeared for Monday January 19, 1981. It is reprinted in this issue to meet requirements for publication on the Tuesday–Friday schedule assigned to the Department of Labor.

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Final Rule.

SUMMARY: Deletions are made to the permanent standard for the Identification, Classification and Regulation of Potential Occupational Carcinogens ("Cancer Policy" standard, 45 FR 5002, Jan. 22, 1980) to conform it to the recent Supreme Court decision on OSHA's benzene standard, *Industrial Union Department, AFL-CIO* v. *American Petroleum Institute, et al.* 65 L. Ed. 2d 1010, 100 S. Ct. 2844 (July 2, 1980). The deletions carry out the Court's interpretation of the Occupational Safety and Health Act of 1970 that consideration must be given to the significance of the risk in the issuance of a carcinogen standard and that OSHA must consider all relevant evidence in making these determinations.

EFFECTIVE DATE: February 18, 1981.

FOR FURTHER INFORMATION CONTACT: Mr. James F. Foster, OSHA Office of Public Affairs, Room N-3641, U.S. Department of Labor, Third Street and Constitution Avenue, NW., Washington, D.C. 20210, telephone (202) 523-8151.

SUPPLEMENTARY INFORMATION:

1. Introduction

On January 22, 1980, the Occuaptional Safety and Health Administration published a final standard (29 CFR Part 1990) for the Identification, Classification and Regulation of Potential Occupational Carcinogens (the "Cancer Policy") at 45 FR 5002. On June 27, 1980, OSHA issued a correction document at 45 FR 43403. The Cancer Policy included scientific policies, regulatory policies and procedures designed to lead to the more effective regulation of occupational carcinogens. Among the regulatory policies was the provision that exposures to Category I Occupational Carcinogens be reduced to the lowest feasible level taking into account economic and technical considerations. Limitations on the consideration of some types of evidence already considered in the cancer Policy were also included.

On July 2, 1980, the Supreme Court issued its decision on the OSHA benzene standard, *Industrial Union Department, AFL-CIO* v. *American Petroleum Institute et al.*, 65 L. Ed. 2d 1010, 100 S. Ct. 2844 (the "benzene decision" or *"I.U.D.* v. *A.P.I."*). The Court held that OSHA must consider the significance of the risk before regulating toxic substances and that OSHA had the burden of demonstrating the significance of the risk.

The Cancer Policy shares certain policies with the benzene standard.

Therefore to conform the Cancer Policy to the benzene decision, OSHA is deleting the provisions of the Cancer Policy which required the automatic setting of the lowest feasible level for Category I Potential Carcinogens. Also deleted are limitations on the evidence which OSHA may consider in determining the exposure limit for carcinogens. The results of these deletions are that in setting exposure limits for carcinogens on a substance by substance basis, OSHA will take into account significance of the risk, feasibility, all relevant provisions of the Act, court interpretations, all relevant evidence, prudent occupational health policy and its experience in regulating toxic substances. No automatic setting of exposures at the lowest feasible level will occur.

Most provisions of the Cancer Policy are not affected by the benzene decision. These include scientific policies, priority setting, identification criteria and classification criteria. OSHA is, of course, not deleting them and they remain in force.

2. OSHA's Cancer Policy

The Cancer Policy preamble discusses the basis for the policy at great length. Very briefly occupational carcinogens pose a serious health problem. OSHA had regulated a number of such chemicals, (asbestos, vinyl chloride, coke oven emissions, arsenic, etc.), but discovered that it was a slow process, in part because it was necessary to reevaluate the scientific basis for identifying potential human carcinogens in each rulemaking. Therefore there were a significant number of likely occupational carcinogens which OSHA would not be able to regulate for a substantial period of time. However, during the course of the earlier rulemakings, it became clear that there was a significant body of well established scientific data to provide the basis for identifying and regulating carcinogenic substances.

In the Cancer Policy proposal, OSHA proposed to make use of this scientific data and its regulatory experience, to lead to a more efficient regulatory process and better protection for employees exposed to carcinogens. The proposal was intensively and extensively explored in a 10 week hearing during which many scientific and policy experts testified, and literally hundreds of scientific articles were submitted. That record and the final standard are analyzed in a 300 page Federal Register preamble.

The final Cancer Policy modified the proposal in a number of ways to meet suggestions and criticism made in the record and the scientific evidence. The final standard includes provisions for setting priorities (see §§ 1990.131, .132). There are provisions to amend the policies to reflect advances in science and changes in policy (see §§ 1990.104 and .145).

The Cancer Policy sets forth scientific principles for the identification and classification of carcinogenic chemicals. These principles are primarily stated in §§ 1990.111, .112 and .143. They deal with the relevance of animal data to humans, the appropriateness of high dose testing, the relevance of various routes of exposure to the chemical in test animals, the uses and abuses of human data, the relevance of benign tumors in test animals, and other scientific principles. These scientific principles are based on an extensive scientific record and are analyzed in depth in the preamble.

The Cancer Policy treats these scientific policies as binding on the Agency and the public. Inconsistent evidence may not be considered, unless it is substantial and new and forms the basis for amending the Cancer Policy (see § 1990.145).

The Supreme Court's benzene decision is fully consistent with the aspects of the Cancer Policy just discussed, including the scientific principles and all the identification and classification provisions of the Cancer Policy. Therefore, there is no need to change any of these provisions of the Cancer Policy based on the benzene decision. It should also be noted that all these provisions and specifically the identification and classification provisions of the Cancer Policy are readily severable from the regulatory policies, and it is OSHA's intention that they be considered severable.

3. Conforming Changes to Regulatory Sections

The following paragraphs discuss those sections of the Cancer Policy standard required to be deleted by the Supreme Court's decision in *I.U.D.* v. *A.P.I.* and explain why the Court's decision compels the changes made.

Section 1990.111(h)

This paragraph states that for Category I Potential Carcinogens, exposures will be reduced to the lowest feasible level primarily through engineering and work practice controls. The words "to the lowest feasible level" are deleted. In consequence no binding requirement for exposure level is included in the Cancer Policy and the level will be set on a substance by substance basis taking into account all relevant evidence and statutory provisions. Obviously included within this would be consideration of the significance of the risk present by each substance.

The last sentence in § 1990.111(h) is deleted to avoid the inappropriate inference that the significance of the risk should be ignored. However, the general scientific principle concerning thresholds is already included in § 1990.143(h) and it remains one of those principles adopted by OSHA based on the record evidence in the Cancer Policy rulemaking.

No change is made in the regulatory policy of primary reliance on engineering and work practice controls. That policy was adopted by OSHA based on an extensive analysis of the record (see the discussion at 45 FR 5222) and was not affected by the Supreme Court's decision.

Section 1990.111(i)

This paragraph provided that exposures to Category II Potential Carcinogens "will be reduced as appropriate and consistent with the statutory requirements on a case-by-case basis." No changes are needed, since the formulation of the criterion for setting the exposure limit is "as appropriate and consistent with statutory requirements." the existing language therefore automatically incorporates the Supreme Court's interpretation in *I.U.D.* v. *A.P.I.* and consideration of the significance of the risk becomes an issue.

Section 1990.111(j)

This paragraph states that risk assessments will be performed based on the available data utilizing cautious and prudent assumptions and that they will depend on the Secretary's judgment. The last sentence has been deleted to eliminate the possible interpretation that the risk assessments would depend solely on the Secretary's judgment. The assessment of risk and its significance have become regulatory issues as a result of the Supreme Court's decision. In consequence, determinations by the Secretary are to be based on the evidence in the record as to factual matters, and appropriate reasonable policies.

The clause that "cautious and prudent assumptions" are to be used remains. The Supreme Court held this was appropriate, stating that,

> So long as they are supported by a body of reputable scientific thought, the agency is free to use conservative assumptions in interpreting the data with respect to carcinogens, risking error on the side of over protection, rather than under-protection, (slip. op. p. 45)

Section 1990.111(k)

This paragraph provides that when suitable substitutes exists for a use of a chemical, a no occupational exposure limit should be set for that use to encourage substitution. Criteria are set for the determination of the suitability of substitutes including consideration of "regulatory requirements".

That terminology, of course, automatically incorporates into the determination of suitability, the regulatory requirements of the Supreme Court that OSHA consider the significance of the risk. Therefore there is no need to change the language of the paragraph to conform to the benzene decision. OSHA, before it encourages substitution, must consider whether the significance of the risk presented by the carcinogen makes it appropriate to encourage substitution.

Section 1990.142(a)(2)(iii)

This paragraph provided that exposure limits for Category I Carcinogens be set at the lowest feasible level achieved through engineering and work practice controls. For the reasons stated in the discussion of § 1990.111(h), the deletion of the reference to the lowest feasible level conforms the paragraph to *I.U.D.* v. *A.P.I.* No change in the suitable substitute language is required because as stated in the discussion of § 1990.111(k), the language of that section automatically incorporates into the suitability determination the significant risk question.

Section 1990.142(b)(2)

This paragraph stated that Category I Potential Carcinogens automatically create a "grave danger" for purposes of determining whether an Emergency Temporary Standard may be issued pursuant to section 6(c) of the OSH Act. (29 U.S.C. 655(c)). The Supreme Court's decision interpreted the Act to require non-emergency regulation of

carcinogens to be based on consideration of the significance of the risk as well as qualitative evidence of their carcinogenicity. Clearly then, qualitative evidence of carcinogenicity must be accompanied by consideration of the gravity of the danger before the issuance of an ETS. (See sl. op. p. 30, n. 45). Therefore, this interpretation of the Court requires the deletion of § 1990.142(b)(2). In consequence, the issuance of an ETS under the Cancer Policy requires that the agency determine that a "grave danger" exists and that an "emergency standard is necessary to protect employees from such danger" as provided by § 6(c) of the Act. Conforming changes in numeration are also made.

Section 1990.142(b)(3)(iii) (Renumbered to § 1990.142(b)(2)(iii))

This section provided that the exposure limit for Emergency Temporary Standards shall be set at the lowest feasible level through any practical combination of engineering and work practice controls and respiratory protection. The deletion of the words "set as low as feasible," conforms the paragraph to *I.U.D.* v. *A.P.I.* for the same reasons specified in the discussion of § 1990.111(h).

Section 1990.143

This section sets forth scientific principles to be utilized in the identification of carcinogenic chemicals. They are based on an extensive scientific record including review of many hundreds of scientific articles, testimony of more than 100 scientific witnesses and extensive OSHA experience in earlier rulemaking proceedings. They are discussed in over 200 pages of Federal Register preamble. The agency is to apply these principles unless contrary arguments are based on substantial new evidence not considered by the agency, substantial new issues (§ 1990.145), or upon evidence which meets certain threshold criteria (§ 1990.144).

The Supreme Court's decision is consistent with OSHA's recognizing scientific principles and policies based on a substantial evidentiary record. Several Supreme Court cases have recognized the appropriateness of generic policies in those areas so that the same issues need not be constantly repeated.

To require the Commission to proceed only on a case-by-case basis would require it, so long as its policy outlawed indefinite price changing provisions, to repeat in hearing after hearing its conclusions that condemn all of them. There would be a vast proliferation of hearings * * *. We see no reason why under the statutory scheme the process of regulation need be so prolonged and so crippled. (*F.P.C.* v. *Texaco*, 377 U.S. 33, 112 (1964).)

See also *United States* v. *Storer Broadcasting*, 351 U.S. 199 (1956) and *Weinberger* v. *Hynson*, 412 U.S. 609 (1973). Therefore these scientific principles remain established for the identification of carcinogens and the language of the introductory paragraph of the section indicates that their purpose is for the identification of carcinogens.

However, arguments based on evidence which would not be relevant for identification (such as the dose levels in animal testing) could be relevant in assessing the significance of the risk. Since § 1990.143 only refers to identification, arguments and evidence inconsistent with the principles may be introduced and considered on their merits for purposes of setting exposure limits. Therefore, no changes are made in § 1990.143.

Section 1990.144

This section sets minimum quality standards for the consideration of certain types of evidence for the identification, classification and regulation of carcinogens. As discussed in regard to § 1990.143, the criteria are based on an extensive scientific record and are consistent with the Supreme Court's decision when utilizing the criteria for the identification and classification of carcinogens. However, data which do not meet those criteria may be relevant to assessing the significance of the risk pursuant to the Supreme Court's decision. Therefore, the word "regulating" is deleted from the third line, to indicate that evidence not meeting the quality criteria will nonetheless be considered for purposes of assessing the significance of the risk.

Section 1990.146

This section lists the issues to be considered during the rulemaking proceeding on a carcinogen. Paragraph (h) provides for the consideration of "issues required by statute or executive order." The preamble discussion at 45 FR 5114 states that "this issue recognizes that future court decisions interpreting the Act and amendments to the Act may require OSHA to consider additional issues". Clearly then, the issues required to be considered by the benzene decision such as the significance of the risk and its assessment become germane to the proceeding. Evidence and arguments on each issue may be introduced in the proceeding and will be considered by the Secretary in his decision.

Paragraph (i) of this section provided for the consideration of the "lowest feasible level to control exposure to Category I Potential Carcinogens * * *." The words "lowest feasible" are deleted to conform the paragraph to the benzene decision for the reasons stated in the discussion of § 1990.111(h). As a result of the deletion all evidence and arguments as to the setting of exposure levels consistent with the statute and the benzene decision are relevant.

Sections 1990.151(c) and .152(c)

Sections 1990.151 and .152 are the model standards for permanent and emergency temporary standards setting forth guidelines for monitoring, exposure limit format, control strategy, medical protection, housekeeping and other provisions. Conforming deletions are made by striking the lowest feasible terminology from the time weighted average limit, ceiling limit, eye exposure limit and dermal limit. The reasons are explained in the discussion of § 1990.111(h). The suitable substitutes provisions automatically pick up the significant risk requirements of *I.U.D.* v. *A.P.I.* as discussed above. Certain minor typographical errors are also corrected.

5. The Process for Conforming the Cancer Policy to the Benzene Decision

As this discussion indicates, the Supreme Court's interpretation of the OSHA Act is clear and the deletions necessary to make the Cancer Policy standard consistent with the Act as interpreted are relatively simple. The deletions merely incorporate the law, as stated by the Supreme Court, into the language of the Cancer Policy, where the Court found OSHA's policy inconsistent with the OSHA Act. Indeed the Supreme Court's benzene decision has already legally nullified those sections of the Cancer Policy inconsistent with the decision, and these changes merely conform the regulations to the law. The agency has not changed any of the factual determinations and has not changed any policies except as required by the Supreme Court's holding in interpreting the OSHA Act.

It is true that the determination of what constitutes significant risk and the role of risk assessment in making these determinations may include many difficult policy and factual questions. However, the agency, by these changes, is not determining those policy or factual questions or setting criteria for those determinations. Rather, those determinations will be made in the regulatory proceedings on specific substances.

It should be noted that the Supreme Court required consideration of the significance of the risk including risk assessments when they could be appropriately performed. The Court stated this requirement was not to be a "mathematical straitjacket"; "OSHA is not required to support its finding that significant risk exists with anything approaching scientific certainty." The agency can utilize the "best available evidence" and "there are a number of ways in which the agency can make a rational judgment about the relative significance of the risks * * *" (sl. op. pp. 44, 45, 46). Therefore, when data are not available to perform a formal quantitative risk assessment, qualitative evidence, expert testimony and other evidence may be appropriately utilized to base a determination of significance of risk.

OSHA has therefore concluded that notice and comment is unnecessary in the process of conforming the Cancer Policy to the holding of the Supreme Court in the benzene decision. The deletions of certain Cancer Policy provisions are compelled by the Supreme Court's benzene decision. They concern only matters of law and they do not involve the reconsideration of evidentiary issues. OSHA's decision would be neither enhanced nor assisted by the receipt of evidence on the issue of what changes are compelled.

In addition, as also discussed above, OSHA recognized when it issued the Cancer Policy that changes in the issues considered may become necessary because of changes in law and provided that such issues would be automatically considered without the need to amend the Cancer Policy. Section 1990.146(h) provides for the consideration of "any issues required by statute or executive order." The preamble discussion at 45 FR 5214 states that "this issue recognizes that future court decisions interpreting the Act and amendments to the Act may require OSHA to consider additional issues." The requirement for consideration of additional issues required by court decision clearly implies that those issues become relevant to the Secretary's decisions. Therefore the conforming deletions from the Cancer Policy merely make explicit the issues which have already become relevant to the Cancer Policy as a result of the Supreme Court's decision.

This document was prepared under the direction and supervision of Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health.

Accordingly, pursuant to sections 4(b), 6(b), 8(c) and 8(g) of the Occupational Safety and Health Act of 1970 (84 Stat. 1592, 1593, 1599; 29 U.S.C. 653, 655, 657), the Secretary of Labor's Order 8–76 (41 FR 25059), and section 4 of the Administrative Procedure Act (5 U.S.C. 553), Part 1990, of Title 29, of the Code of Federal Regulations is hereby amended as set forth below.

Signed at Washington, D.C. this 14th day of January, 1981. This amendment is effective on February 18, 1981.

Eula Bingham,

Assistant Secretary of Labor.

Part 1990 of Title 29, Code of Federal Regulations, is amended as follows:

1. Section 1990.111 is amended by revising paragraphs (h) and (j) to read as follows:

§ 1990.111 General statement of regulatory policy.

* * * * *

(h) Worker exposure to Category I Potential Carcinogens will be reduced primarily through the use of engieering and work practice controls.

* * * * *

(j) The assessment of cancer risk to workers resulting from exposure to a potential occupational carcinogen will be made on the basis of available data. Because of the uncertainties and serious consequences to workers if the estimated risk is understated, cautious and prudent assumptions will be utilized to perform risk assessments.

* * * * *

2. Section 1990.142 is amended by revising paragraph (a)(2)(iii), removing paragraph (b)(2) and renumbering paragraph (b)(3) as new paragraph (b)(2) and by revising newly redesignated paragraph (b)(2)(iii) as follows:

§ 1990.142 Initiation of rulemaking.

* * * * *

(a) * * *

(2) * * *

(iii) The permissible exposure limit shall be achieved primarily through engineering and work practice controls except that if a suitable substitute is available for one or more uses no occupational exposure shall be permitted for those uses.

* * * * *

(b) * * *

(2) * * *

(iii) The permissible exposure limit shall be achieved through any practicable combination of engineering controls, work practice controls and respiratory protection.

3. Section 1990.144 is amended by revising the introductory paragraph as follows:

§ 1990.144 Criteria for consideration of arguments on certain issues.

Arguments on the following issues will be considered by the Secretary in identifying or classifying any substance pursuant to this Part, if evidence for the specific substance subject to the rulemaking conforms to the following criteria. Such arguments and evidence will be evaluated based upon scientific and policy judgments.

* * * * *

4. Section 1990.146 is amended by revising paragraph (i) as follows:

§ 1990.146 Issues to be considered in the rulemaking.

* * * * *

(i) The determination of the level to control exposures to Category I Potential Carcinogens primarily through the use of engineering and work practice controls including technological and economic considerations.

* * * * *

5. Section 1990.151 is amended by revising paragraph (c) as follows:

§ 1990.151 Model standard pursuant to section 6(h) of the Act.

* * * * *

(c) Permissible exposure limits provisions. (1) Inhalation. (i) Time weighted average limit (TWA). Within (insert appropriate time period) of the effective date of this section, the employer shall assure that no employee is exposed to an airborne concentration of———in excess of: (insert appropriate exposure limit or when it is determined by the Secretary that there are available suitable substitutes for uses or classes of uses that are less hazardous to humans, the proposal shall permit no occupational exposure) as an eight (8)-hour-time-weighted average.

(Where the Secretary finds that suitable substitutes for———may exist, the determination of the ———level shall include consideration of the availability, practicability, relative degree of hazard, and economic consequences of the substitutes.)

(ii) Ceiling limit. (If appropriate.) Within (insert appropriate time period) of the effective date of this section, the employer shall assure that no employee is exposed to an airborne concentration of———in excess of: (insert exposure limit) as averaged over any: (insert appropriate time period) during the working day.

(2) Dermal and eye exposure. (As appropriate.) (i) Within (insert appropriate time period) of the effective date of this section, the employer shall (If eye exposure to———does not create a risk of cancer, insert exposure level or criteria which will prevent other adverse

health affects of eye exposure to———if any. If eye exposure creates a risk of cancer, insert exposure level or criteria which represents the level of eye exposure to———).

(ii) Within (insert appropriate time period) of the effective date of this section, the employer shall (If skin exposure to———does not create a risk of cancer, insert exposure level or criteria which will prevent other adverse health effects of skin exposure to——— if any. If skin exposure creates a risk of cancer, insert exposure level or criteria which represents the level of skin exposure to———).

6. Section 1990.152 is amended by revising paragraph (c) as follows:

§ 1990.151 Model emergency temporary standard pursuant to section 6(c) of the Act.

* * * * *

(c) Permissible exposure limits—(1) Inhalation. (i) Time-weighted average limit (TWA). Within (insert appropriate time) from the effective date of this emergency temporary standard, the employer shall assure that no employee is exposed to an airborne concentration of———in excess of: (insert appropriate exposure limit representing a level that can be complied with immediately) as an eight (8)-hour-time-weighted average.

(ii) Ceiling limit. (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of———in excess of: (insert appropriate exposure limit representing a level that can be complied with immediately) as averaged over any: (insert appropriate time period) during the working day.

(2) Dermal and eye exposure. (As appropriate.)

(i) Within (insert appropriate time period) of the effective date of this section, the employer shall (If eye exposure to———does not create a risk of cancer, insert exposure level or criteria which will prevent other adverse effects of eye exposure to———, if any. If eye exposure creates a risk of cancer, insert exposure level or criteria which represent the level of eye exposure to———.)

(ii) Within (insert appropriate time period) of the effective date of this section, the employer shall (If skin exposure to———does not create a risk of cancer, insert exposure level or criteria which will prevent other adverse health affects of skin exposure to——— if any. If skin exposure creates a risk of cancer, insert exposure level or criteria which represents the level of skin exposure to———).

BILLING CODE 4510-26-M

Pension and Welfare Benefit Programs

29 CFR Parts 2520 and 2560

Limited Relief From Reporting, Disclosure, and Claims Procedure Requirements With Respect to Welfare Plans Offering Membership in a Qualified Health Maintenance Organization as an Option

AGENCY: Department of Labor.

ACTION: Adoption of final regulation.

SUMMARY: These regulations provide limited relief from certain of the reporting, disclosure, and claims procedure requirements of the Employee Retirement Income Security Act of 1974 (ERISA) with respect to employee welfare benefit plans under which an available option is membership in a health maintenance organization qualified under Title XIII of the Public Health Service Act, "Health Maintenance Organizations", 42 U.S.C. 300e *et seq.* (HMO Act). The regulations are designed to avoid duplicative or otherwise unnecessary requirements which might result from the interaction of ERISA and the HMO Act. The regulations affect all plans that include membership in a federally qualified health maintenance organization (QHMO) as an available option.

EFFECTIVE DATE: February 20, 1981.

FOR FURTHER INFORMATION CONTACT: Robert Doyle, Office of Reporting and Plan Standards, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216, (202) 523–8684, or Doris Jacobs, Office of the Solicitor, Plan Benefits Security Division, U.S. Department of Labor, Washington, D.C. 20210, (202) 523–6844. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: On June 22, 1979, the Department published in the Federal Register (44 FR 36862) a notice of proposed rulemaking proposing the addition of a new § 2520.102–5 and the amendment of §§ 2520.104–20, 2520.104–44, and 2560.503–1 to provide relief from certain reporting, disclosure and claims procedure requirements of ERISA for plans that include membership in a QHMO as an available option.

Section 1310 of the HMO Act requires that certain employers which offer health benefits plans[1] to their employees make available, as an option under those plans, membership in a health maintenance organization which is qualified under the HMO Act.[2] Under ERISA and the Department's regulations thereunder, certain information relating to benefits made available under a plan must be disclosed to plan participants and beneficiaries. Furthermore, certain procedures must be established with regard to the making of claims for benefits and the review of any denials of such claims. Because there are comparable provisions in the HMO Act and the regulations of HHS thereunder, some of these ERISA requirements are duplicative or otherwise unnecessary when the benefit in question is made available through membership in a QHMO. Accordingly, the Department proposed limited exemptions and other relief in these areas. In addition, the Department proposed amendments to existing exemptions from the reporting and disclosure requirements of ERISA so as to make clear that those exemptions apply to the extent that plans offer benefits through QHMOs.

At the time the proposed regulations were published, the Department solicited comments from interested persons. The Department has reviewed the comments received and modified the regulations where appropriate, as discussed below. The Department considers the final regulations to be "significant" within the meaning of Department of Labor guidelines implementing Executive Order 12044.

Discussion of Comments

The HMO Act and the HHS regulations thereunder set forth specific requirements that an employer offering a health benefits plan must comply with when such an employer is approached by a QHMO. Among other things, the employer is required to give the QHMO reasonable access to employees (42 CFR Subpart H 110.806(a)); is given the opportunity to review, revise and approve the QHMO offering materials (42 CFR 110.806(b); must assure that employees choosing the HMO option do not lose certain other health benefits (42 CFR 110.806(d)); must elicit an affirmative written selection from employees as to whether they wish to choose the QHMO option (42 CFR 110.806(e)); and must make contributions to the QHMO on behalf of selecting employees in accordance with specific standards (42 CFR 110.808). Some

[1] A "health benefits plan," as defined in regulations of the Department of Health and Human Services (HHS) under the HMO Act, comes within the definition of "employee welfare benefit plan" under section 3(1) of ERISA. See 42 CFR § 110.801(h).

[2] In order for a health maintenance organization to be qualified under the HMO Act, HHS must be satisfied that the health maintenance organization will be operated in accordance with various provisions of the HMO Act relating to fiscal soundness, nature of services, and other matters. See sections 1301 and 1310 of the HMO Act.

commenters took the view that in cases where the employer did no more than fulfill these obligations under the HMO Act and the HHS regulations, and did not contract with the QHMO regarding the substantive terms and conditions of coverage, the employer's involvement would not warrant a finding that the employer had established or maintained a plan within the meaning of section 3(1) of ERISA. These commenters concluded that in such circumstances the QHMO would not be subject to coverage under Title I of ERISA.

As the Department indicated in the preamble to the proposed regulations, when an employer, in order to comply with Federal law, offers employees the option of membership in a QHMO, the QHMO itself will not, solely by virtue of this fact, be deemed a plan under ERISA. On the other hand, in the Department's opinion, a plan established or maintained by an employer is established or maintained for the purpose of providing benefits enumerated in section 3(1) of Title I of ERISA,[3] to the extent the plan offers participants memberships in a QHMO (or any other HMO). Accordingly, the provisions of ERISA will apply, in relevant part, to the extent a plan established or maintained by an employer offers membership in a HMO.

Section 1310(a) of the HMO Act provides that an employer covered under that Act shall "include in any health benefits plan offered to its employees" the option of membership in a QHMO. These provisions of the HMO Act assume a pre-existing plan established by an employer for the purpose of providing health benefits, and require that the QHMO membership option be included in that plan. Since this pre-existing health benefits plan must be established by an employer, the provisions of ERISA will apply to the plan to the extent the plan offers benefits listed under section 3(1) of Title I, whether those benefits are offered through a QHMO or otherwise. Nothing in either the wording of section 3(1) of ERISA, which defines the term "employee welfare benefit plan," or in section 4 of ERISA, which specifies which employee benefit plans are subject to Title I of ERISA, suggests that the provisions of Title I do not apply to a plan to the extent the plan provides one or more of the benefits listed in section 3(1) through an option that is offered to participants by requirement of law, rather than by the choice of the plan sponsor. Accordingly, the Department is of the opinion that the provisions of Title I of ERISA are applicable, in relevant part, to a plan that offers a QHMO option pursuant to the HMO Act and HHS regulations thereunder, regardless of whether the employer enters into a contract with the QHMO as to the specific terms and conditions of coverage, and without regard to the terms of any such contract.

However, the existence and terms of such a contract are relevant to the reporting and disclosure requirements of ERISA, because such a contract may affect participants' and beneficiaries' rights under the plan. For this reason, one commenter recommended that the regulations require that participants and beneficiaries be given access to any contract between the employer and the QHMO. Section 104 (b)(2) and (b)(4) of ERISA require a plan administrator to make available for inspection and furnish at a reasonable charge "instruments under which [a] plan is . . . operated." Under this provision, a plan administrator is required to make available any relevant contract that the QHMO enters into with the employer or other plan sponsor, or with the plan. Moreover, under 29 CFR 2520.102–3(t)(2), the plan administrator is required to include a notice in the summary plan description (SPD) informing participants and beneficiaries that they may inspect and obtain copies of such documents. The Department does not think that any additional language is needed in the QHMO regulations to clarify the plan administrator's duty in this regard. As to the QHMO, under the HMO Act and the HHS regulations thereunder, the QHMO would be required to disclose all provisions in a contract between the plan, the plan administrator, or the plan sponsor and the QHMO that would be necessary for a full and fair description of the QHMO option. See 42 CFR 110.108(c) (45 FR 72512, 72534, October 31, 1980).

Some commenters suggested that the Department should extend relief not only to plans offering federally qualified HMOs, but also to those offering HMOs, which are qualified only under state law. The Department has decided not to extend the relief provided in § 2520.102–5 and § 2520.503(j) to plans offering HMOs which are qualified only under state law. The Department proposed relief under both of those provisions because these were areas where the federal HMO Act and ERISA imposed overlapping requirements, and because the Department was able to determine that the requirements of the HMO Act and HHS regulations thereunder were sufficiently protective of participants' rights to warrant limited relief under ERISA. On the other hand, the Department is unable to conclude, on the basis of the information submitted, that the various state laws regulating non-qualified HMOs would necessarily provide sufficient protections to participants to warrant relief for plans providing those benefits from the requirements of ERISA. However, the Department notes that the limited reporting and disclosure exemption for small plans contained in § 2520.104–20, and the limited reporting exemption and alterntive method of compliance contained in § 2520.104–44 are available if, among other things, benefits are provided through an organization that is (1) similar to an insurance company and (2) qualified to do business in any state. The Department has indicated that an HMO that is registered with a state insurance commissioner and regulated under state insurance laws can qualify as an organization similar to an insurance company under § 2520.104–20. See ERISA Opinion Letter 76–05. Moreover, such an HMO would also qualify as an organization similar to an insurance company for purposes of § 2520.104–44.

One commenter expressed concern as to the scope of § 2520.102–5(b)(3)(ii) of the proposed regulation, which refers to certain information regarding eligibility that the QHMO must supply to participants and beneficiaries upon request. The comments indicated that § 2520.102–5(b)(3)(ii), as written, might be interpreted to mean that a QHMO would have to disclose the general rules of the plan pertaining to eligibility for participation in the plan, as well as the specific rules of the QHMO pertaining to eligibility to receive services from the QHMO. Since information relating to general conditions of eligibility imposed by the plan must be disclosed in the summary plan description ("SPD"), additional disclosure of this information by the QHMO is unnecessary. Accordingly, the wording in § 2520.102–5(b)(3)(ii) has been modified to make clear that the information to be supplied by the QHMO does not include information regarding general conditions of eligibility for participation in the plan.

One commenter raised a question as to the timing of the required disclosure. Under § 2510.102–5(a)(3) of the proposed regulation the employer was required to furnish a notice identifying all QHMOs

[3] Section 3(1) of Title I of ERISA defines an employee welfare benefit plan to mean: "any plan, fund, or program which was heretofore or is hereafter established or maintained by an employer or by an employee organization, or by both, to the extent that such plan, fund, or program was established or is maintained for the purpose of providing for its participants or their beneficiaries, through the purchase of insurance or otherwise, (A) medical, surgical, or hospital care or benefits in the event of sickness, accident [or] disability . . ."

in which membership was available as a benefit under the plan "at the time the summary plan description is furnished or within 30 days after such information is made available to the plan administrator." The commenter noted that this language leaves doubt as to whether the identity of the QHMO is to be supplied within thirty days of the date an employer is approached by the QHMO, or within thirty days of the date the QHMO offering is made to the employees. The commenter also pointed out that the date on which disclosure by the plan administrator is required under this section of the proposed regulation may not coincide with the date on which disclosure by the QHMO is required under HHS's regulations. To deal with these problems, the Department has modified the regulation to provide that the plan administrator must disclose the identity of the QHMO at a date no later than the date when the QHMO is offered to employees pursuant to 42 CFR 110.807.

One commenter recommended that the QHMO be considered an ERISA fiduciary in administering the QHMO grievance procedures. In the Department's view, the QHMO would be a fiduciary to the extent the QHMO acts as a final decision maker on claims for benefits. See News Release USDL–78–188, March 10, 1978.

A minor editorial change has also been made in that regulation for purposes of clarity.

Statutory Authority

The regulations set forth below are issued under the authority of sections 104, 109, 503 and 505 of ERISA (29 U.S.C. §§ 1024, 1029, 1133, and 1135).

In consideration of the matters discussed above, Parts 2520 and 2560 of Chapter XXV of Title 29 of the Code of Federal Regulations are amended as follows:

PART 2520—RULES AND REGULATIONS FOR REPORTING DISCLOSURE

1. Add a new § 2520.102–5, to provide as follows:

§ 2520.102–5 Limited exemption with respect to summary plan descriptions of welfare plans providing benefits through a qualified health maintenance organization.

(a) The summary plan description of an employee welfare benefit plan under which some or all benefits are provided through membership in one or more qualified health maintenance organizations, as defined in section 1310(d) of the Public Health Service Act, as amended, 42 U.S.C. § 300e–9(d), shall not be required to include, with respect to any such qualified health maintenance organization, the information described in sections 102–3(j)(2), 102–3(l), 102–3(q) and 102–3(s) of this Part 2520, provided that:

(1) Such summary plan description contains a notice of the type described in paragraph (b) of this section;

(2) Any request made in the manner described in paragraph (b)(4) of this section is transmitted promptly by the plan administrator to any such organization in which the person making the request is eligible for membership as a benefit under the plan; and

(3) The plan administrator furnishes, in the manner described in section 104b–1 of this Part 2520, to each person to whom such summary plan description is furnished, the identity of all such qualified health maintenance organizations in which such person is eligible for membership as a benefit under the plan at a date no later than the date when the option of membership in the qualified health maintenance organization is offered to such person.

(b) The notice referred to in paragraph (a) of this section shall indicate:

(1) The availability of membership in one or more qualified health maintenance organizations as defined in section 1310(d) of the Public Health Service Act, as amended, 42 U.S.C. § 300e–9(d), as an option under the plan;

(2) Whether such membership is made available as the sole benefit under the plan, in addition to one or more other benefits, or as an alternative to one or more other benefits;

(3) That each such organization in which membership is available to the participant or beneficiary will supply him or her upon request, written materials concerning (i) the nature of services provided to members; (ii) conditions pertaining to eligibility to receive such services (other than general conditions pertaining to eligibility for participation in the plan) and circumstances under which services may be denied; and (iii) the procedures to be followed in obtaining such services, and the procedures available for the review of claims for services which are denied in whole or in part; and

(4) That requests for the materials described in paragraph (b)(3) of this section may be addressed to the plan administrator.

2. Amend § 2520.104–20 by revising paragraph (b)(2)(ii) thereof to read as follows:

§ 2520.104–20 Limited exemption for certain small welfare plans.

* * * * *

(b) * * *

(2) * * *

(ii) The benefits of which are provided exclusively through insurance contracts or policies issued by an insurance company or similar organization which is qualified to do business in any State or through a qualified health maintenance organization as defined in section 1310(d) of the Public Health Service Act, as amended, 42 U.S.C. § 300e–9(d), the premiums for which are paid directly by the employer or employee organization from its general assets or partly from its general assets and partly from contributions by its employees or members, *Provided*, that contributions by participants are forwarded by the employer or employee organization within three months of receipt, or

* * * * *

3. Amend § 2520.104–44 by revising paragraph (b)(1)(ii) thereof to read as follows:

§ 2520.104–44 Limited exemption and alternative method of compliance for annual reporting by unfunded plans and certain insured plans.

* * * * *

(b) Application. * * *

(1) * * *

(ii) The benefits of which are provided exclusively through insurance contracts or policies issued by an insurance company or similar organization which is qualified to do business in any State or through a qualified health maintenance organization as defined in section 1310(d) of the Public Health Service Act, as amended, 42 U.S.C. § 300e–9(d), the premiums for which are paid directly by the employer or employee organization from its general assets or partly from its general assets and partly from contributions by its employees or members, provided that any plan assets held by such an insurance company are held solely in the general account of such company or organization, contributions by participants are forwarded by the employer or employee organization within three months of receipt and, in the case of a plan that provides for the return of refunds to contributing participants, such refunds are returned to them within three months of receipt by the employer or employee organization, or

* * * * *

PART 2560—RULES AND REGULATIONS FOR ADMINISTRATION AND ENFORCEMENT

(4) Amend § 2560.503–1 by revising paragraph (b)(1)(i) thereof and adding thereto a new paragraph (j), to read as follows:

§ 2560.503–1 Claims procedure.

* * * * *

(b) *Obligation to establish.* * * *

(1) * * *

(i) Complies with the provisions of paragraphs (d) through (h) of this

section, except to the extent that it is deemed to comply with some or all of such provisions under the authority of paragraph (b)(2) or paragraph (j) of this section.

* * * * *

(j) *Qualified Health Maintenance Organizations.* Claims procedures with respect to any benefits provided through membership in a qualified health maintenance organization, as defined in section 1310(d) of the Public Health Service Act, as amended, 42 U.S.C. § 300e–9(d), shall be deemed to satisfy the requirements of this section with respect to the provision of such benefits to persons who are members of such qualified health maintenance organization, provided those procedures meet the requirements of section 1301 of the Public Health Service Act, as amended 42 U.S.C. § 300e and the regulations thereunder.

Signed at Washington, D.C. this 15th day of January, 1981.

Ian D. Lanoff,

Administrator, Pension and Welfare Benefit Programs, Labor-Management Services Administration.

BILLING CODE 4510–29–M

Mine Safety and Health Administration

30 CFR Part 90

Coal Miners Who Have Evidence of the Development of Pneumoconiosis

AGENCY: Mine Safety and Health Administration (MSHA), Department of Labor.

ACTION: Final rule; correction.

SUMMARY: The Department of Labor's mandatory health standard for coal miners who have evidence of the development of pneumoconiosis, 30 CFR Part 90, was amended at 45 FR 80760 (December 5, 1980). This document corrects a technical error which appeared in the final rule.

EFFECTIVE DATE: February 1, 1981.

FOR FURTHER INFORMATION CONTACT: William H. Sutherland, Chief, Division of Health, Mine Safety and Health Administration, Room 810, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, Virginia 22203, (703) 235–1358.

SUPPLEMENTARY INFORMATION: The Mine Safety and Health Administration makes the following revision to FR Doc. 80–37866, 30 CFR Part 90 which appeared as a final rule at 45 FR 80760 (December 5, 1980):

1. On page 80770, paragraph (a) of § 90.3 is corrected in the sixteenth line by removing the words "during each shift" the second time it appears and reads as follows:

§ 90.3 Part 90 option; notice of eligibility; exercise of option.

(a) Any miner employed at an underground coal mine or at a surface work area of an underground coal mine who, in the judgment of the Secretary of Health and Human Services, has evidence of the development of pneumoconiosis based on a chest X-ray, read and classified in the manner prescribed by the Secretary of Health and Human Services, or based on other medical examinations shall be afforded the option to work in an area of a mine where the average concentration of respirable dust in the mine atmosphere during each shift to which that miner is exposed is continuously maintained at or below 1.0 milligrams per cubic meter of air. Each of these miners shall be notified in writing of eligibility to exercise the option.

* * * * *

Dated: January 12, 1981.

Frank A. White,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510–43–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 915

Conditional Approval of the Permanent Regulatory Program Submission From the State of Iowa Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Final rule.

SUMMARY: The State of Iowa resubmitted to the Department of the Interior its proposed permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), following an initial approval in part and disapproval in part. The notice announcing the initial decision was published in the **Federal Register**, October 16, 1980 (45 FR 68673–68685). The purpose of the resubmission is to demonstrate the State's intent and capability to administer and enforce the provisions of SMCRA and the permanent regulatory program regulations, 30 CFR Chapter VII. After providing opportunities for public comment and conducting a thorough review of the program resubmission, the Secretary of the Interior has determined that the Iowa program meets the requirements of SMCRA and the federal permanent program regulations except for minor deficiencies discussed below under "Supplementary Information." Accordingly, the Secretary of the Interior has conditionally approved the Iowa program. A new Part 915 is being added to 30 CFR Chapter VII to implement this decision.

EFFECTIVE DATE: This conditional approval is effective April 10, 1981.

ADDRESSES: Copies of the Iowa program and the administrative record on the Iowa program are available for public inspection and copying during business hours at:

Office of Surface Mining Reclamation and Enforcement, Room 153, Interior South Building, 1951 Constitution Avenue NW., Washington, D.C. 20240, telephone: (202) 343–4728

Office of Surface Mining Reclamation and Enforcement, Region IV, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106

Iowa Department of Soil Conservation, Mines and Minerals Division, Wallace State Office Building, Des Moines, Iowa 50319

FOR FURTHER INFORMATION CONTACT: Carl C. Close, Assistant Director for State and Federal Programs, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, Interior South Building, 1951 Constitution Avenue, N.W., Washington, D.C. 20240, telephone (202) 343–4225

SUPPLEMENTARY INFORMATION: The general background on the permanent program, the state program approval process, and the Iowa program submission were discussed in the October 16, 1980, **Federal Register** (45 FR 68673–68676).

Also, in that notice the Secretary announced his partial approval and partial disapproval of the Iowa program. The legislative provisions were approved with the exceptions noted in the "Secretary's Decision," (45 FR 68676–68686, October 16, 1980).

Under 30 CFR 732.13(f), the State of Iowa had 60 days (until December 15, 1980) from the date of publication of the Secretary's partial approval decision in which to submit a revised program for consideration. Iowa submitted its revised program for consideration on December 15, 1980. Announcement of Iowa's resubmission was made in newspapers of general circulation within the State of Iowa and published in the **Federal Register** on December 15, 1980 (45 FR 82276).

A public hearing on the submission was also announced in the December 15,

1980, Federal Register notice (45 FR 82276) and in the newspapers of general circulation in Iowa and was held in Des Moines, Iowa on December 30, 1980. The post-resubmission public comment period ended December 31, 1980. Public disclosure of comments by Federal agencies was made on January 9, 1981 (46 FR 2368).

On January 14, 1981, the Administrator of the Environmental Protection Agency transmitted to the Secretary his written concurrence with the decision on the Iowa program.

The Regional Director completed his program review on January 7, 1981, and forwarded the public hearing transcripts, written presentations, and copies of all comments to the Director together with a recommendation that the program be approved conditionally.

On January 12, 1981, the Director recommended to the Secretary that the Iowa program be approved conditionally.

On behalf of the Secretary, the Regional Director discussed the conditions of approval in a telephone conversation with Lawrence G. Vance, Director, Iowa Department of Soil Conservation on January 7, 1981 (*see* the Regional Director's memorandum of this telephone conversation contained in Administrative Record No. IA–161). On January 8, 1981, the Director, Iowa Department of Soil Conservation telegraphed acceptance of the conditions of approval (*see* Administrative Record No. IA–162).

The Iowa program consists of the formal submission of February 28, 1980, (Administrative Record Nos. IA–9, 10, 11 and 22) as amended on June 11, 1980, (Administrative Record No. IA–75) and revised on December 15, 1980, (Administrative Record No. IA–148).

Throughout the review period beginning with the submission of the program, OSM has had frequent contact and discussions on the state program submission with the staff of the Iowa Department of Soil Conservation. Minutes or notes of the discussions were placed in the Iowa Administrative Record and made available for public review. All contacts between officials or staffs of the Department of the Interior and the State of Iowa were conducted in accordance with the Department's guidelines for such contacts published September 19, 1979 (44 FR 54444–54445).

In the initial decision notice approving in part and disapproving in part the Iowa program, the Secretary made findings on the Iowa program provisions pursuant to section 503 of SMCRA and 30 CFR 732.15. Iowa's resubmission, except as noted below in the "Secretary's Findings," amends the program to correct the deficiencies identified in that notice. Therefore, any deficiencies previously identified in the initial decision notice and corrected by the Iowa resubmission will not be discussed in the "Secretary's Findings," below.

Throughout the remainder of this notice, the term "Iowa Program" or "Iowa Submission" is used to mean the resubmission together with those parts of the original submission partially approved on October 16, 1980.

Secretary's Findings

In reaching his decision to approve conditionally the Iowa submission, the Secretary makes the following findings pursuant to section 503 of SMCRA and 30 CFR 732.15.

1. In accordance with section 503(a) of SMCRA, the Secretary finds that Iowa has the capability to carry out the provisions of SMCRA and to meet its purposes in the following ways:

(a) The Iowa Surface Coal Mining Act (ISCMA), and the Iowa Administrative Procedures Act (IAPA), and the regulations adopted thereunder provide for the regulation of surface coal mining and reclamation operations on non-Indian and non-federal lands in Iowa in accordance with SMCRA with the exception noted in Findings 4(i) and 4(o).

(b) The ISCMA provides sanctions for violations of Iowa laws, regulations or conditions of permits concerning surface coal mining and reclamation operations, and these sanctions meet the requirements of SMCRA, including civil and criminal action, forfeiture of bonds, suspensions, revocations, withholding of permits, and the issuance of cessation orders by the Iowa Department of Soil Conservation or its inspectors with the exceptions noted in Finding 4(h).

(c) The Iowa Department of Soil Conservation has sufficient administrative and technical personnel and sufficient funds to enable Iowa to regulate surface coal mining and reclamation operations in accordance with the requirements of SMCRA. The Iowa Department of Soil Conservation has requested an increase for the staff of the Mines and Minerals Division by three additional positions effective July 1, 1981. From the effective date of the Iowa program until July 1, 1981, the Mines and Minerals Division will rely upon a combination of personnel borrowed from other agencies through memoranda of agreement and contracts with consultants to adequately staff the program. The Secretary finds that these measures, when implemented, should provide for adequate administration and implementation of the Iowa regulatory program until the proposed staffing and budget plan is approved. The Secretary will, through OSM, carefully monitor the State's administration and implementation measures to ensure that the requirements of SMCRA and 30 CFR Chapter VII are being met. *See* Administrative Record No. IA–148 (Attachment 1) and transcripts to the public hearing held on December 30, 1980, in Des Moines, Iowa (Administrative Record No. IA–156).

(d) The ISCMA provides for the effective implementation, maintenance, and enforcement of a permit system that meets the requirements of SMCRA for the regulation of surface coal mining and reclamation operations on non-Indian and non-federal lands within Iowa;

(e) The ISCMA has established a process for the designation of areas as unsuitable for surface coal mining in accordance with section 522 of SMCRA, 30 U.S.C. 1272;

(f) Iowa has established for the purpose of avoiding duplication, a process for coordinating the review and issuance of permits for surface coal mining and reclamation operations with other federal and state permit processes applicable to the proposed operations;

(g) As of April 10, 1981, Iowa will have fully enacted regulations consistent with the federal regulations issued pursuant to SMCRA with the exceptions noted in Findings 4(h) and 4(o).

2. As required by sections 503(b)(1)–(3) of SMCRA, 30 U.S.C. 1253(b)(1)–(3), and 30 CFR 732.11–732.13, the Secretary has, through OSM:

(a) Solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other federal agencies concerned with or having specific expertise pertinent to the proposed Iowa program;

(b) Obtained the written concurrence of the Administrator of the Environmental Protection Agency with respect to those aspects of the Iowa program that relate to air or water quality standards promulgated under the authority of the Clean Water Act as amended, (33 U.S.C. 1151–1175), and the Clean Air Act as amended, (42 U.S.C. 7401 *et seq.)*, and;

(c) Held a public review meeting in Des Moines, Iowa on April 15, 1980, to discuss the completeness of the Iowa program submission, held a public hearing in Des Moines, Iowa on July 17, 1980, on the substance of the program submission, and subsequently held a public review meeting in Des Moines, Iowa on December 30, 1980, on the resubmitted program;

(d) Obtained an opinion from the U.S. Fish and Wildlife Service that the approval of the Iowa program is not likely to jeopardize the continued existence of species listed in Iowa as threatened or endangered under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*

3. In accordance with section 503(b)(4) SMCRA (30 U.S.C. 1253(b)(4)), the Secretary finds the Department of Soil Conservation and other agencies having a role in the program of Iowa have as described in Finding 1(c) sufficient legal, technical, and administrative personnel and the necessary legal authority for the enforcement of the environmental protection standards of SMCRA and 30 CFR Chapter VII.

4. In accordance with 30 CFR 732.15, and on the basis of information in the Iowa program submission, including the section-by-section comparison of the Iowa statutes and rules with SMCRA and 30 CFR Chapter VII, public comments, testimony at the public meeting and hearings, and other relevant information, the Secretary makes the following findings:

(a) Pursuant to 30 CFR 732.15(a), the Secretary finds that the proposed Iowa program provides for the Iowa Department of Soil Conservation to carry out the provisions and meet the purposes of SMCRA and 30 CFR Chapter VII because the program includes fully enacted regulations consistent with 30 CFR Chapter VII, except as noted below in Findings 4(h) and 4(o). The original program submission contained four alternatives submitted pursuant to 30 CFR 731.13. The Secretary explained in the October 16, 1980, **Federal Register** (45 FR 68673–68685), why these four alternatives did not meet the criteria in 30 CFR 731.13. Iowa has subsequently withdrawn these four alternatives, and has not proposed any additional alternatives pursuant to 30 CFR 731.13.

(b) Pursuant to 30 CFR 732.15(b)(1), the Secretary finds that the Iowa Department of Soil Conservation has the authority under Iowa statutes and enacted regulations to implement, administer and enforce all applicable requirements consistent with 30 CFR Chapter VII, Subchapter K.

(c) Pursuant to 30 CFR 732.15(b)(2), the Secretary finds that the Iowa Department of Soil Conservation has the authority under the ISCMA and under enacted regulations to implement, administer and enforce a permit system consistent with 30 CFR Chapter VII, Subchapter G and to prohibit surface coal mining and reclamation operations without a permit issued by the Iowa Department of Soil Conservation.

(d) Pursuant to 30 CFR 732.15(b)(3), the Secretary finds that the Iowa Department of Soil Conservation has the authority under ISCMA section 18 and under enacted regulations to regulate coal exploration consistent with 30 CFR Parts 776 and 815, and to prohibit coal exploration that does not comply with 30 CFR Parts 776 and 815.

(e) Pursuant to 30 CFR 732.15(b)(4), the Secretary finds that the Iowa Department of Soil Conservation has the authority under ISCMA Section 26 and enacted regulations to require that persons extracting coal incidental to government-financed construction maintain information on-site consistent with 30 CFR Part 707.

(f) Pursuant to 30 CFR 732.15(b)(5), the Secretary finds that the Iowa Department of Soil Conservation has the authority under section 13 of the ISCMA and enacted regulations to provide for entry, inspections, and monitoring of all coal exploration and surface coal mining and reclamation operations on non-Indian and non-federal lands within Iowa consistent with section 517 of SMCRA and 30 CFR Chapter VII, Subchapter L.

(g) Pursuant to 30 CFR 732.15(b)(6), the Secretary finds that the Iowa Department of Soil Conservation has the authority in sections 10 and 16 of the ISCMA and enacted regulations, to implement, administer, and enforce a system for performance bonds and liability insurance, or other equivalent guarantees, consistent with sections 507(f), 509, 510 and 519 of SMCRA and 30 CFR Chapter VII, Subchapter J.

(h) Pursuant to 30 CFR 732.15(b)(7), the Secretary finds that the Iowa Department of Soil Conservation has the authority under section 15 of the ISCMA but does not have fully enacted regulations to provide for civil and criminal sanctions for violations of the Iowa law, regulations and conditions of permits and exploration approvals including civil and criminal penalties in accordance with section 518 of SMCRA (30 U.S.C. 1268) and consistent with 30 CFR Part 845 (except to the extent remanded) including the same or similar procedural requirements.

(1) Iowa has proposed a judicial system of penalty assessment, rather than the administrative system prescribed in section 518 of SMCRA and 30 CFR 845.17–845.20. In the initial decision notice (Finding 4(h), 45 FR 68678), the Secretary identified five aspects of the proposed Iowa system for proposal and assessment of civil penalties found to be inconsistent with section 518 of SMCRA and 30 CFR Part 845. These deficiencies were that (i) the proposed judicial assessment system did not adequately address the five considerations identified in the preamble to the permanent regulatory program at 44 FR 15296 (March 13, 1979). These considerations are used in determining whether a judicial system is the same or similar as the administrative system for proposal and assessment of civil penalties in section 518 of SMCRA; (ii) the proposed program did not provide procedures for proposing assessments of civil penalties, informing operators of the amount of those proposed assessments and providing an opportunity for payment of the penalty prior to a formal assessment hearing; (iii) the proposed program did not provide for mandatory assessment of civil penalties for cessation orders as required by section 518(a) of SMCRA; (iv) the program lacked criteria for determining when a civil penalty or an injunction would be sought when a notice of violation is issued under sections 14(8) and 15(1) of the ISCMA; and, (v) the program did not provide for prepayment of civil penalties into an escrow account, as required by section 518(c) of SMCRA. Iowa's resubmission addresses those deficiencies through an attorney general's opinion and a proposed amendment to rule 4.6(8) (*see* Adminsitrative Record No. IA–146, Attachments 4 and 5). The Secretary has reviewed the information in the Administrative Record and has determined that, with two exceptions, the problems identified in the initial decision notice would be corrected if proposed rule 4.6(8) is enacted as proposed.

(2) One ambiguity not fully clarified in the proposed rule amendment is whether the proposed Iowa program provides for mandatory assessment of civil penalties for cessation orders as required by section 518(a) of SMCRA (see 45 FR 68678, Finding 4(h)(3)). Both the ISCMA section 15(1) and proposed Iowa rule 4.6(8) require the Department of Soil Conservation to request the Attorney General to institute a civil action for recovery of a penalty whenever a cessation order has been issued. The Attorney General's opinion and section 15(1) of the ISCMA state that, in the judicial penalty action, the Department's findings as to the fact of the violation, the issuance of the cessation order, and the amount of the penalty shall be conclusive if supported by substantial evidence. However, the ISCMA is not clear as to whether the court must assess a penalty for a cessation order upon recommendation of the Attorney General and the Department of Soil Conservation. The Iowa Attorney General's office has

advised OSM that in its opinion section 15 of the ISCMA was intended to establish mandatory penalties for cessation orders, and that the Attorney General's office will take this position in any relevant enforcement action under section 15 of the ISCMA (*see* Administrative Record No. IA–146). In view of these assurances from the Attorney General of Iowa, the Secretary finds that the procedures in section 15(1) of the ISCMA and proposed rule 4.6(8), if enacted as proposed, will be in accordance with section 518 of SMCRA. The Secretary will, through OSM, carefully monitor the implementation of these procedures for penalty assessments for cessation orders to ensure that the requirements of section 518(a) are being met.

(3) The second apparent inconsistency is that the Iowa program does not contain provisions comparable to those in section 518(c) of SMCRA and 30 CFR Part 845 requiring prepayment of civil penalties into an escrow account. However, pursuant to the order of the United States District Court for the Southern District of Iowa in *Star Coal* v. *Andrus*, 14 ERC 1325 (1980), the Secretary has been enjoined on constitutional grounds from requiring Iowa to include in its program a provision comparable to section 518(c)'s prepayment requirement. *Star Coal* v. *Andrus* has been appealed to the United States Supreme Court (appeal filed March 13, 1980). Moreover, the issue of the constitutionality of section 518(c) is presently before the Supreme Court in two cases, *Virginia Surface Mining and Reclamation Association* v. *Andrus*, Nos. 79–1538 and 79–1596 and *Andrus* v. *Indiana*, No. 80–231. Should the Supreme Court rule that the prepayment requirement of section 518(c) is constitutional, the Secretary will then take steps to require the Iowa permanent program to comply with the requirements of section 518(c) relating to prepayment of civil penalties.

The Secretary conditions his approval of Iowa's judicial penalty assessment system on Iowa's correcting the deficiencies identified above (with the exception of the escrow provision for civil penalties) by enacting rule 4.6(8) as proposed or by otherwise amending its program to establish procedures for proposal and assessment of civil penalties similar to those established in section 518 of SMCRA and 30 CFR Part 845.

(i) Pursuant to 30 CFR 732.15(b)(8), the Secretary finds that the Iowa Department of Soil Conservation has the authority under section 14 of ISCMA, and regulations consistent with 30 CFR Chapter VII, Subchapter L to issue, modify, terminate and enforce notices of violation, cessation orders and show cause orders in accordance with section 521 of SMCRA (30 U.S.C. 1271) (with the exception noted specifically below) including the same or similar procedural requirements. However, according to the opinion of the Attorney General of Iowa (See Administrative Record No. IA–148, Attachment 5), section 17A.18(3) of the Iowa Administrative Procedures Act requires that an administrative hearing be held prior to the issuance of a cessation order for failure to abate a violation. This requirement potentially conflicts with section 14(2) of the ISCMA and with section 521(a)(3) of SMCRA, which provide that a cessation order shall be issued immediately upon the expiration of the time for abatement if abatement has not been accomplished. In its resubmission, Iowa has proposed an amendment to rule 4.363(2) to minimize the chance of conflict between the ISCMA and the IAPA. This proposed rule requires an operator who wishes to show compliance with abatement requirements to seek an expedited administrative hearing before the time set in the order for abatement. Hearings must be held promptly, and the abatement time may not be extended beyond ninety days from the date of issuance of the notice of violation.

However, even if the proposed amendment to Iowa rule 4.363(2) were promulgated as proposed, an Iowa operator could be able to extend the abatement time up to ninety days by requesting and participating in a hearing on the fact of abatement. In the case of a notice of violation with a short abatement period (e.g., 25 days) this potential delay in the issuance of a cessation order makes this procedure inconsistent with SMCRA. The Secretary conditions his approval of the Iowa program on Iowa's amending its program to provide for the immediate issuance of a cessation order for failure to abate a violation so as to be consistent with section 521(a)(3) of SMCRA.

(j) Pursuant to 30 CFR 732.15(b)(9), the Secretary finds that the Iowa Department of Soil Conservation has authority under section 8 of the ISCMA and enacted regulations to provide for the designation of areas as unsuitable for surface coal mining, consistent with 30 CFR Chapter VII, Subchapter F.

(k) Pursuant to 30 CFR 732.15 (b)(10), the Secretary finds that the Iowa Department of Soil Conservation has authority under the ISCMA and enacted regulations, to provide for public participation in the development, revision and enforcement of Iowa regulations and the Iowa program consistent with the public participation requirements of SMCRA, 30 CFR Chapter VII, and 43 CFR Part 4. Iowa also has the authority under the ISCMA and enacted regulations to provide for public participation in the permitting process and the enforcement of its laws consistent with 30 CFR Chapter VII and 43 CFR Part 4. The Secretary further finds that the public has had a meaningful opportunity to participate in the development of the state program submitted to OSM based on the information in the Administrative Record, the public hearings Iowa held on January 30, 1980, and July 23, 1980, in Des Moines, Iowa and the public comment periods provided pursuant to the Iowa Administrative Procedures Act.

(l) Pursuant to 30 CFR 732.15(b)(11), the Secretary finds that the Iowa Department of Soil Conservation has the statutory authority under the ISCMA, section 15, and enacted regulations to monitor, review, and enforce the prohibition against indirect or direct financial interests in coal mining operations by employees of the Iowa Department of Soil Conservation, consistent with 30 CFR Part 705.

(m) Pursuant to 30 CFR 732.15(b)(12), the Secretary finds that the Iowa Department of Soil Conservation has the authority under section 6(2) of the ISCMA to require the training, examination and certification of persons engaged in or responsible for blasting and the use of explosives in accordance with section 719 of SMCRA. Iowa has no regulations on the training, examination, and certification of persons engaged in blasting, but 30 CFR 732.15(b)(12) does not require the State to implement regulations governing such training, examination and certification until six months after complete federal regulations have been promulgated for these provisions. On December 12, 1980, OSM published partial final rules establishing minimal requirements for training and certifying persons involved in blasting in surface coal mining operations (45 FR 82084–82100). These regulations are codified at 30 CFR Chapter VII, Subchapter M, Part 850. Subchapter M is now final and complete with the exception of four subsections concerning qualification requirements and experience requirements. These subsections will be reproposed and subject to public comment prior to their final promulgation. Once the complete Subchapter M is finally promulgated, Iowa will have an additional six months

to prepare and submit to OSM regulations consistent with the federal regulations.

(n) Pursuant to 30 CFR 732.15(b)(13), the Secretary finds that the Iowa Department of Soil Conservation has the authority under section 4.1(d) of the ISCMA and enacted regulations to implement for a small operator assistance program consistent with 30 CFR Part 795.

(o) Pursuant to 30 CFR 732.15(b)(14), the Secretary finds that while the Iowa program contains authority in section 718.4 of the Iowa Code to provide for protection of state employees, the Iowa program does not establish penalties as stringent as those provided in section 704 of SMCRA. In the initial decision notice, 45 FR 68679, Finding 4(o), the Secretary determined that the Iowa Code provides a maximum penalty of 30 days imprisonment and a $100 fine for interference or harassment of state employees, whereas section 704 of SMCRA provides a maximum penalty of 1 year imprisonment and a $5,000 fine. In its resubmission, Iowa has proposed a rule which, as a condition of each permit, prohibits the permittee from willfully resisting, preventing, impeding, or interfering with state employees in the performance of their duties. When promulgated, this rule will subject violators to the sanctions provided in ISCMA section 15(2). This section establishes a maximum penalty of $10,000, and provides that violation of a permit condition shall constitute a serious misdemeanor. Under Iowa criminal law, serious misdemeanors are punishable by up to one year imprisonment. Therefore, Iowa's penalties for violation of a permit condition will satisfy the requirements of section 704 of SMCRA.

This scheme will provide protection to state employees comparable to that provided federal employees by section 704 of SMCRA, except that persons who are not employees of a permittee will not be subject to criminal sanctions for a violation of a permit condition. The Secretary believes that there is no material risk of interference with government employees from "wildcat operators" or others, in light of the information on the nature of the Iowa coal industry in the program submission and the absence of any public comments on this issue. The Secretary conditions his approval of the Iowa program on Iowa's amending its program to provide for protection of state employees by promulgating the proposed rule described above, or accomplishing the same results by other means. *See* Administrative Record No. IA–148 (Attachment 6).

(p) Pursuant to 30 CFR 732.15(b)(15), the Secretary finds that the Iowa Department of Soil Conservation has the authority under section 14 of the ISCMA and the Iowa Administrative Procedures Act and enacted regulations to provide for the administrative and judicial review of the Iowa program actions in accordance with section 525 and 526 of SMCRA, and with 30 CFR Chapter VII, Subchapter L.

(q) Pursuant to 30 CFR 732.15(b)(16), the Secretary finds that the Iowa Department of Soil Conservation has authority under Iowa laws and that the Iowa program contains provisions to cooperate and coordinate with, and provide documents and other information to, the Office of Surface Mining under the provisions of 30 CFR Chapter VII.

(r) Pursuant to 30 CFR 732.15(c), the Secretary finds that the ISCMA and other laws and regulations of Iowa do not contain provisions that would interfere with or preclude implementation of the provisions of SMCRA and 30 CFR Chapter VII with the exception noted in Finding 4(i).

(s) Pursuant to 30 CFR 732.15(d), the Secretary finds that the Iowa Department of Soil Conservation and other agencies having a role in the program have sufficient legal, technical, and administrative personnel and sufficient funding to implement, administer, and enforce the provisions of the program, the requirements of 30 CFR 732.15(b), and other applicable state and federal laws (*See* Finding 1(c)).

Disposition of Comments

The Heritage Conservation and Recreation Service commented that the Iowa rules should require consideration of cultural resources which have been determined eligible for the National Register of Historic Places when issuing a permit for surface coal mining or exploration, or when designating lands unsuitable for mining. However, pursuant to litigation in the United States District Court, the phrase "eligible for listing on" has been suspended in connection with 30 CFR Chapter VII regulations dealing with the National Register of Historic Places, (*see* 44 FR 67942), OSM and the Advisory Council on Historic Preservation have entered into a Programmatic Memorandum of Agreement (PMOA) setting forth OSM's responsibilities for compliance with section 106 of the National Historic Preservation Act of 1966, as amended (NHPA). In the PMOA, OSM has agreed to propose a modification to the permanent regulatory program, which will require state programs to include information on properties protected under section 106 of the NHPA in applications for approval to conduct coal exploration of 250 tons or more or surface coal mining operations. In addition, applicants for permits would be required to identify and describe historic properties on lists maintained by the State. When the changes to the federal regulations are made, Iowa will be required to have regulations consistent with them. The Secretary finds that the Iowa rules relating to the National Register of Historic Places are consistent with 30 CFR Chapter VII as affected by the court decision. Therefore, the Secretary will not require any program change at this time.

Background On Conditional Approval

The Secretary is fully committed to two key aims that underlie SMCRA. The Act calls for comprehensive regulation of the effects of surface coal mining on the environment and public health and safety, and for the Secretary to assist the states in becoming the primary regulators under the Act. To enable the states to achieve that primacy, the Secretary has undertaken many activities, of which several are particularly noteworthy.

The Secretary has worked closely with several state organizations, such as the Interstate Mining Compact Commission, the Council of State Governments, the National Governors Association and the Western Interstate Energy Board. Through these groups OSM has frequently met with state regulatory authority personnel to discuss informally how the Act should be administered, with particular reference to unique circumstances in individual states. Often these meetings have been a way for OSM and the states to explain portions of the federal requirements and how the states might meet them. Alternative state regulatory options, the "state window" concept, for example, were discussed at several meetings of the Interstate Mining Compact Commission and the National Governors Association.

The Secretary has dispensed over $6.9 million in program development grants and over $37.6 million in initial program grants to help the states to develop their programs, to administer their initial programs, to train their personnel in the new requirements, and to purchase new equipment. In several instances OSM detailed its personnel to states to assist in the preparation of their permanent program submissions. OSM has also met with individual states to determine how

best to meet the Act's environmental protection goals.

Equally important, the Secretary structured the state program approval process to assist the states in achieving primacy. He voluntarily provided his preliminary views on the adequacy of each state program to identify needed changes and to allow them to be made without penalty to the state. The Secretary adopted a special policy to insure that communication between him and the states remained open and uninhibited at all times. This policy was critical to avoiding a period of enforced silence with the state after the close of the public comment period on its program and has been a vital part of the program review process (*see* 44 FR 54444, September 19, 1979).

The Secretary has also developed in his regulations the critical ability to approve conditionally a state program. Under the Secretary's regulations, conditional approval gives full primacy to a state even though there are minor deficiencies in a program. This power is not expressly authorized by the Act; it was adopted through the Secretary's rulemaking authority under 30 U.S.C. 201(c), 503(b) and 503(a)(7). The Act expressly gives the Secretary only two options—to approve or disapprove a state program. Read literally, the Secretary would have no flexibility; he would have to approve those programs that are letter perfect and disapprove all others. To avoid that result and in recognition of the difficulty of developing an acceptable program, the Secretary adopted the regulation providing the authority to approve conditionally a program.

Conditional approval has a vital effect for programs approved by the Secretary: It results in the implementation of the permanent program in a state months earlier than might otherwise be anticipated. While this may not be significant in states that already have comprehensive surface mining regulatory programs, in many states that earlier implementation will initiate a much higher degree of environmental protection. It also implements the rights SMCRA provides to citizens to participate in the regulation of surface coal mining through soliciting their views at hearings and meetings and enabling them to file requests to designate lands as unsuitable for mining if they are fragile, historic, critical to agriculture, or simply cannot be reclaimed to their prior productive capacity.

The Secretary considers three factors in deciding whether a program qualifies for conditional approval. First is the State's willingness to make good faith efforts to effect the necessary changes. Without the state's commitment, the option of conditional approval may not be used.

Second, no part of the program can be incomplete. As the preamble to the regulations says, the program, even with deficiencies, must "provide for implementation and administration of all processes, procedures, and systems required by the Act and these regulations" (44 FR 14961). That is, a state must be able to operate the basic components of the permanent program: the designation process; the permit and all coal exploration systems; the bond and insurance requirements; the performance standards; and the inspection and enforcement systems. In addition there must be a functional regulatory authority to implement the other parts of the program. If some fundamental component is missing, conditional approval may not be issued.

Third, the deficiencies must be minor. For each deficiency or group of deficiencies, the Secretary considers the significance of the deficiency in light of the particular state in question. Examples of deficiencies that would be minor in virtually all circumstances are correction of clerical errors and resolution of ambiguities through attorneys general opinions, revised regulations, policy statements and changes in the narrative or the side-by-side.

Other deficiencies require individual consideration. An example of a deficiency that would most likely be major would be a failure to allow meaningful public participation in the permitting process. Although this would not render the permit system incomplete because permits could still be issued, the lack of any public participation could be such a departure from a fundamental purpose of the Act that the deficiency would most likely be major.

The use of a conditional approval is not and cannot be a substitute for the adoption of an adequate program. Section 732.13(i) of Title 30 of the regulations gives the Secretary little discretion in terminating programs where the state fails to fulfill the conditions. The purpose of the conditional approval power is to assist the states, not to excuse them from achieving compliance with SMCRA.

Conditional Approval

As indicated under Secretary's Findings 4(h), 4(i) and 4(o) there are three minor deficiencies in the Iowa program that the Secretary requires be corrected as a condition of program approval, and which the State has agreed to correct. In all other aspects, the Iowa program meets the criteria for approval. The deficiencies identified in the findings and the reason why they are considered minor are summarized below. In each instance, the discussion of the deficiencies found under "Secretary's Findings" discusses one means of eliminating the deficiency. The State may take other measures to eliminate the deficiencies, and so long as the same result is achieved, the conditions will be met.

1. As noted in Finding 4(h), Iowa has proposed a system of judicial assessment for civil penalties, rather than the administrative civil penalty assessment system prescribed by 30 CFR Chapter VII, Subchapter L and section 518 of SMCRA. The administrative rules proposed to correct the deficiencies identified in Finding 4(h) have not been fully enacted. Due to the short time between the effective date of the Secretary's conditional approval of the Iowa program and the date the proposed rules are scheduled to be enacted, and to the small number of violations and civil penalties expected during that time, this deficiency is viewed as minor. The Secretary is requiring Iowa to amend its program by enacting the proposed rules described in Finding 4(h), or by any other means, to be consistent with section 518 of SMCRA.

2. As noted in Finding 4(i), section 17A.18(3) of the Iowa Administrative Procedures Act requires that an administrative hearing be held prior to the issuance of a cessation order for failure to abate a violation. The Secretary has determined that this requirement potentially conflicts with section 14(2) of the ISCMA and with section 521(a)(3) of SMCRA, which provide that a cessation order shall be issued immediately upon the expiration of the time for abatement if abatement has not been accomplished. While the Secretary is requiring Iowa to amend its program to be consistent with SMCRA, this deficiency is viewed as minor in light of the small number of operating mines and violations expected to occur during the period when this deficiency is being corrected.

3. As noted in Finding 4(o), Iowa's program provisions that provide for the protection of state employees during the performance of their duties establish penalties which are less stringent than those provided by section 704 of SMCRA. While the Secretary is requiring Iowa to amend its program to be as stringent as SMCRA, this deficiency is viewed as minor in light of the history of mining in the state and the small number of operating mines. The

probability of harassment of state employees during the period while Iowa amends its program is relatively small.

Given the nature of these three deficiencies and their magnitude in relation to all other provisions of the Iowa program, the Secretary has concluded they are minor. Accordingly, the program is eligible for conditional approval under 30 CFR 732.13(i), because:

1. The deficiences are of such a size and nature as to render no part of the Iowa program incomplete since all other aspects of the program meet the requirements of SMCRA and 30 CFR Chapter VII, and the three deficiencies, which the state has agreed to correct promptly, will not directly affect the environmental performance of surface coal mining and reclamation operations;

2. Iowa has initiated and is actively proceeding with steps to correct the three deficiencies; and

3. Iowa has agreed, by telegram dated January 8, 1981, to correct the regulation deficiencies concerning rules for proposal and assessment of civil penalties and protection of state employees by July 1, 1981, and the statutory deficiency concerning the issuance of cessation orders for failure to abate notices of violations by January 1, 1982.

Accordingly, the Secretary is conditionally approving the Iowa program. This approval shall terminate if regulations correcting the deficiencies concerning rules for proposal and assessment of civil penalties and protection of state employees are not enacted by July 1, 1981, or if state legislation correcting the statutory deficiency concerning the issuance of cessation orders for failure to abate notices of violation is not enacted by January 1, 1982. This conditional approval is effective on April 10, 1981. This is the effective date of the Iowa rules. On December 15, 1980 (45 FR 82277), the Secretary announced he was considering waiving the provisions of 30 CFR 732.13(h), which state that the State program becomes effective on the date the Secretary's decision is published in the Federal Register. The Secretary is waiving this rule in light of the short delay between the date of publication of this notice and the effective date of the Iowa rules, and the lack of any public comments on his proposal to do so. The Secretary chooses to delay the effective date of the conditional approval until Iowa's rules become effective. In the December 15, 1980, Federal Register notice (45 FR 82277), the Secretary indicated that the Iowa rules were to take effect on January 29, 1981, and that the Iowa program would become effective on that date were it to be approved or approved conditionally by the Secretary. That date has since been extended to April 10, 1981. Iowa and the Department of the Interior will continue to implement the interim regulatory program during this period. The Iowa Legislative Rules Committee is presently reviewing the State's rules. The Secretary will indicate to Iowa that should any changes be made to the State's rules, the Secretary will have to review such revisions and make them available for public review, and may have to reconsider this decision in light of the revisions. This information is hereby being provided to Iowa by this notice and will also be included in the letters the Secretary is sending to Iowa Governor Robert D. Ray and to Lawrence G. Vance, Director, Iowa Department of Soil Conservation, to communicate to the State his decision on the Iowa program. These letters will be sent shortly and will be included in the Iowa Administrative Record.

Beginning on April 10, 1981, the Iowa Department of Soil Conservation shall be deemed the regulatory authority in Iowa and all surface coal mining and reclamation operations and all coal exploration on non-federal and non-Indian lands in Iowa shall be subject to the permanent regulatory program.

On non-federal and non-Indian lands in Iowa, the permanent regulatory program consists of the state program as conditionally approved by the Secretary.

On federal lands, the permanent regulatory program consists of the federal rules made applicable, under 30 CFR Chapter VII, Subchapter D, Parts 740–745. Iowa and the Department of the Interior may enter into a cooperative agreement to apply the requirements of the approved Iowa permanent regulatory program to federal lands under 30 CFR Part 745.

The Secretary's approval of the Iowa program relates at this time only to the permanent regulatory program under Title V of SMCRA. The approval does not constitute approval of any provisions related to implementation of Title IV of SMCRA, the abandoned mine lands reclamation program. In accordance with 30 CFR Part 844 (State Reclamation Plans), Iowa may submit a state AML reclamation plan. At the time of such a submission, all provisions relating to Abandoned Mined Lands Reclamation will be reviewed by officials of the Department of the Interior.

Additional Findings

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this conditional approval.

The Secretary has determined that this document is not a significant rule under E.O. 12044, or 43 CFR Part 14, and no regulatory analysis is being prepared on this conditional approval.

Dated: January 15, 1981.

Joan M. Davenport,

Assistant Secretary of the Interior for Energy and Minerals.

A new PART, 30 CFR Part 915, Subchapter T is adopted to read as follows:

PART 915—IOWA

Sec.

915.1 Scope.

915.10 State regulatory program approval.

915.11 Conditions of State regulatory program approval.

Authority: Pub. L. 95–87, sections 102, 201 and 503, 30 U.S.C. 1202, 2111, and 1253.

§ 915.1 Scope.

This part contains all rules applicable only within Iowa which have been adopted under the Surface Mining Control and Reclamation Act of 1977.

§ 915.10 State regulatory program approval.

The Iowa program, as submitted on February 28, 1980, and amended, and clarified on June 11, 1980, and December 15, 1980, is conditionally approved, effective on April 10, 1981. Beginning on that date, the Iowa Department of Soil Conservation shall be deemed the regulatory authority in Iowa for surface coal mining and reclamation operations on non-federal and non-Indian lands. Copies of the approved program, together with copies of the telegram from the Iowa Department of Soil Conservation agreeing to the conditions in 30 CFR 915.11, are available at:

Iowa Department of Soil Conservation, Mines and Minerals Division, Wallace State Office Building, Des Moines, Iowa 50319

Office of Surface Mining Reclamation and Enforcement, Region IV, 5th Floor, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106

Office of Surface Mining Reclamation and Enforcement, Interior South Building, Room 153, 1951 Constitution Avenue NW., Washington, D.C. 20240, Telephone: (202) 343–4728.

§ 915.11 Conditions of State regulatory program approval.

The approval of the State regulatory program is subject to the following conditions:

(a) The approval found in § 915.10 will terminate on July 1, 1981, unless Iowa submits to the Secretary by that date

copies of fully enacted regulations establishing procedures for proposal and assessment of civil penalties similar to those established in section 518 SMCRA and 30 CFR Part 845, or otherwise amends its program to accomplish the same result.

(b) The approval found in § 915.10 will terminate on January 1, 1982, unless Iowa submits to the Secretary by that date copies of fully enacted statutes resolving the conflicting provisions of section 14(2) of the Iowa Surface Coal Mining Act and section 17A.18(3) of the Iowa Administrative Procedures Act so as to provide that cessation orders for failure to abate notices of violation shall be issued immediately, to be consistent with section 521(a)(3) of SMCRA or otherwise amends its program to accomplish the same result.

(c) The approval found in § 915.10 will terminate on July 1, 1981, unless Iowa submits to the Secretary by that date copies of fully enacted regulations establishing penalties to protect state employees during the performance of their duties in accordance with section 704 SMCRA, or otherwise amends its program to accomplish the same result.

BILLING CODE 4310-05-M

---

30 CFR Part 916

Conditional Approval of the Permanent Program Submission From the State of Kansas Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Final rule; conditional approval of Kansas' permanent regulatory program.

SUMMARY: The State of Kansas resubmitted to the Department of the Interior its proposed permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), following an initial approval in part and disapproval in part. The notice announcing the initial decision was published in the Federal Register, September 4, 1980 (45 FR 58569–58576). The purpose of the resubmission is to demonstrate the state's intent and capability to administer and enforce the provisions of SMCRA and the permanent regulatory program regulations, 30 CFR Chapter VII.

After providing opportunities for public comment and conducting a thorough review of the program resubmission, the Secretary of the Interior has determined that the Kansas program meets the minimum requirements of SMCRA and the federal permanent program regulations, except for minor deficiencies discussed below under "Supplementary Information." Accordingly, the Secretary of the Interior has conditionally approved the Kansas program.

A new Part 916 is being added to 30 CFR Chapter VII to implement this decision.

EFFECTIVE DATE: This conditional approval is effective January 21, 1981.

This conditional approval will terminate as specified in 30 CFR 916.11, adopted below, unless the deficiencies identified below have been corrected in accord with 30 CFR 916.11.

ADDRESSES: Copies of the Kansas program and the administrative record on the Kansas program, including the telegram from the Kansas Mined-Land Conservation and Reclamation Board agreeing to correct the deficiencies identified below, are available for public inspection and copying during business hours at:

Office of Surface Mining Reclamation and Enforcement, Department of the Interior, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106, Telephone: (816) 374–3920

Mined-Land Office, 107 West 11th Street, Pittsburg, Kansas 66762, Telephone: (316) 231–8540

Kansas Corporation Commission, Legal Office, 4th Floor, State Office Building, 915 Harrison, Topeka, Kansas 66612, Telephone: (913) 296–3361

Office of Surface Mining Reclamation and Enforcement, Room 153, Interior South Building, 1951 Constitution Avenue NW., Washington, D.C. 20240, Telephone: (202) 343–4728.

FOR FURTHER INFORMATION CONTACT:

Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining Reclamation and Enforcement

U.S. Department of the Interior, South Building, 1951 Constitution Avenue NW., Washington, D.C. 20240, Telephone (202) 343–4225.

SUPPLEMENTARY INFORMATION: The general background on the permanent program, the general background on state program approval process, and the background on the Kansas program submission were discussed in the Federal Register, September 4, 1980 (45 FR 58569–58576).

Also, in that notice the Secretary announced the partial approval and partial disapproval of the Kansas program. The legislative provisions were approved with the exceptions noted in the "Secretary's Decision," September 4, 1980, (45 FR 58569–58576). Under 30 CFR 732.13(f), Kansas had 60 days from the date of partial disapproval to resubmit a revised program. Kansas submitted its revised program for consideration on October 31, 1980. Announcement of Kansas' resubmission was made in two newspapers of general circulation within the State of Kansas and published in the **Federal Register** on November 10, 1980 (45 FR 74513–74515).

A public hearing on the resubmission was announced in the November 10, 1980, **Federal Register**, and was held in Pittsburg, Kansas, on November 24, 1980. The post-resubmission public comment period ended November 26, 1980. Public disclosure of comments by federal agencies was made on December 23, 1980 (45 FR 84824).

On December 15, 1980, the Regional Director completed the program review and forwarded the public hearing transcript and copies of all comments to the Director together with a recommendation that the program be conditionally approved.

On December 30, 1980, the Administrator of the Environmental Protection Agency transmitted his written concurrence on the Kansas program.

On January 13, 1981, the Director recommended to the Secretary that the Kansas program be conditionally approved.

On January 9, 1981, Kansas agreed to accept the conditions of approval. The Secretary's decision to approve conditionally the Kansas program was conveyed in a letter to Governor John Carlin. Copies of these documents are available for review in the Administrative Record.

Throughout the review period, beginning with the submission of the program, OSM has had frequent contact and discussions on the state program submission with the staff of the Mined Land Conservation and Reclamation Board. Minutes or notes of the discussions were placed in the Kansas Administrative Record and made available for public review. All contacts between officials or staffs of the Department of the Interior and the State of Kansas were conducted in accordance with the Department's guidelines for such contacts published September 19, 1979 (44 FR 54444–54445).

Throughout the remainder of this notice, the term "Kansas program" or "Kansas submission" is used to mean the resubmission, together with those parts of the original submission partially approved on September 4, 1980.

When the Secretary announced the initial decision on the Kansas program on September 4, 1980 (45 FR 58569–58576), he included with the analysis of the Kansas program the findings on the regulatory provisions and the disposition of comments. Kansas' resubmission, except as noted below under "Secretary's Findings," amends the program to correct the deficiencies identified in that notice.

Therefore, any deficiencies previously identified in the initial decision notice and corrected by the Kansas resubmission will not be discussed in the Secretary's Findings below.

The Secretary has determined that the conclusions in the initial decision were correct with the exception of Finding 4(e). Finding 4(e) concerned an exemption for coal extraction incidental to government-financed highway or other construction as provided for in Section 528(3) of SMCRA and 30 CFR Part 707. The Kansas Mined Land Conservation and Reclamation Board does not have the authority under the Mined Land Conservation and Reclamation Act (MLCRA) or under state regulations to require that persons extracting coal incidental to government-financed construction maintain information on site consistent with 30 CFR Part 707. However, the Secretary finds that the Kansas program can be approved without these provisions because the MLCRA does not contain an exemption from the requirements of the Act for the extraction of coal incidental to government-financed construction, as does SMCRA (Sec. 528(3), 30 U.S.C. 1228(3)). Therefore, the Kansas program is more stringent than SMCRA in this regard.

Also in the September 4, 1980, Federal Register notice, the Secretary explained that since Kansas had withdrawn its proposed regulations prior to that notice, the Secretary was unable to provide a list of regulations in the Kansas program affected by the orders of the U.S. District Court for the District of Columbia in *In Re: Permanent Surface Mining Regulation Litigation.*

The Secretary also noted that under these court orders, he need not affirmatively disapprove state regulations similar to those federal regulations suspended or remanded by the court where the state has adopted such provisions after the date of the Round II District Court decision (May 16, 1980), or where a state official specifically requests the Secretary to approve them. (45 FR 58570).

By the letter dated October 27, 1980 (Administrative Record Document KS–183), the Chairman of the Mined-Land Conservation and Reclamation Board stated that Kansas desires to retain all state regulations corresponding to suspended or remanded OSM regulations. In addition, all such state regulations except one were adopted on October 8, 1980, after the date of the Round II decision. Therefore, the Secretary need not affirmatively disapprove any Kansas regulations as a result of the above-mentioned litigation.

The contents of the September 4, 1980, notice also provide part of the basis for the following findings and for this decision.

Secretary's Findings

1. In accordance with Section 503(a) of SMCRA, the Secretary finds that Kansas has the capability to carry out the provisions of SMCRA and to meet its purposes in the following ways:

(a) The Kansas Mined-Land Conservation and Reclamation Act (MLCRA) and the regulations adopted thereunder provide for the regulation of surface coal mining and reclamation operations on non-Indian and non-Federal lands in accordance with SMCRA with the exceptions noted below in Findings 4(b), 4(g), 4(h), 4(i), 4(o), 4(p), and 4(r);

(b) The MLCRA provides sanctions for violations of Kansas laws, regulations or conditions of permits concerning surface coal mining and reclamation operations with the exception noted below in finding 4(h). These sanctions meet the requirements of SMCRA, including civil and criminal actions, forfeiture of bonds, suspensions, revocations, withholding of permits, and the issuance of cessation orders by the Kansas Mined-Land Conservation and Reclamation Board or its inspectors;

(c) The Kansas Mined-Land Office has sufficient administrative personnel and funds to enable Kansas to regulate surface coal mining and reclamation operations in accordance with the requirements of SMCRA. In the "Secretary's Findings" supporting the initial decision on the Kansas program, the Secretary noted that while the proposed staff and budget would probably be sufficient, the staffing and budget plan had not been approved by the Kansas Legislature. *See* Finding 1(c), 45 FR 58571, September 4, 1980. The Kansas Legislature is not expected to be able to act on the proposed staffing and budget plan until it recovenes in early 1981. Until the proposed staffing and budget plan is approved, Kansas proposes to administer and implement the State regulatory program using the following measures. Kansas has agreed to contract the services of qualified consulting firms to provide technical support as needed. The budget has been increased to cover these contractual services (Volume III, 731.14(K), page 165, Administrative Record document KS–189). Kansas also has agreed to utilize the expertise of other state agencies, as needed. In addition, OSM and Kansas have entered into an agreement under the Intergovenmental Personnel Act, whereby OSM will provide to Kansas a full-time technically qualified person for a period of one year, beginning January 11, 1981. Accordingly, the Secretary finds that these measures, when implemented, should provide for adequate administration and implementation of the Kansas regulatory program during the immediate time period until the proposed staffing and budget plan is approved by the Kansas Legislature. The Secretary will, through OSM, carefully monitor these measures and the permanent program staffing and budget plan once it is approved by the Kansas Legislature to ensure that the requirements of SMCRA and 30 CFR Chapter VII will be met;

(d) The MLCRA provides for the effective implementation, maintenance, and enforcement of a permit system that meets the requirements of SMCRA for the regulation of surface coal mining and reclamation operations on non-Indian and non-Federal lands within Kansas;

(e) The MLCRA has established a process for the designation of areas as unsuitable for surface coal mining in accordance with Section 522 of SMCRA, 30 U.S.C. 1272;

(f) Kansas has established, for the purpose of avoiding duplication, a process for coordinating the review and issuance of permits for surface coal mining and reclamation operations with other federal and state permit processes applicable to the proposed operations;

(g) Kansas has fully enacted regulations consistent with regulations issued pursuant to SMCRA. These regulations were enacted as temporary regulations on October 8, 1980, and will become effective as permanent regulations on May 1, 1981.

2. As required by Section 503(b)(1)–(3) of SMCRA, 30 U.S.C. 1253(b)(1)–(3), and 30 CFR 732.11–732.13, the Secretary has through OSM:

(a) Solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other federal agencies concerned with

or having special expertise pertinent to the proposed Kansas program;

(b) Obtained the written concurrence of the Administrator of the Environmental Protection Agency with respect to those aspects of the Kansas program that relate to air or water quality standards promulgated under the authority of the Clean Water Act as amended, (33 U.S.C. 1151–1175); and the Clean Air Act as amended, (42 U.S.C. 7401 *et seq.*), and;

(c) Held a public review meeting in Topeka, Kansas, on April 10, 1980, to discuss the completeness of the Kansas program submission, held a public hearing in Pittsburg, Kansas, on July 14, 1980, on the substance of the program submission, and subsequently held a public hearing in Pittsburg, Kansas, on November 24, 1980, on the resubmitted program;

(d) Obtained an opinion from the U.S. Fish and Wildlife Service that the approval of the Kansas program is not likely to jeopardize the continued existence of species listed in Kansas as threatened or endangered under the Endangered Species Act, 16 U.S.C. 1531 *et seq.*

3. In accordance with Section 503(b)(4) of SMCRA, 30 U.S.C. 1253(b)(4), the Secretary finds the State of Kansas has the legal authority and qualified personnel necessary for the enforcement of the environmental protection standards of SMCRA and 30 CFR Chapter VII. However, see Finding 1(c).

4. In accordance with 30 CFR 732.15, and on the basis of information in the Kansas program submission, including the section-by-section comparison of the Kansas MLCRA and regulations and SMCRA and 30 CFR Chapter VII, public comments, testimony at the public meeting and hearings, and other relevant information, the Secretary makes the following findings:

(a) Pursuant to 30 CFR 732.15(a), the Secretary finds that the proposed Kansas program provides for the Mined Land Conservation and Reclamation Board to carry out the provisions and meet the purposes of SMCRA and 30 CFR Chapter VII. The Secretary further finds that Kansas, in its resubmission, has not proposed any alternative approaches to the requirements of 30 CFR Chapter VII pursuant to 30 CFR 731.13;

(b) Pursuant to 30 CFR 732.15(b)(1), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations (except as specifically set forth below in this paragraph) to implement, administer, and enforce all applicable requirements consistent with 30 CFR Chapter VII, Subchapter K. These provisions are incorporated in Sections 49–405 and 49–408 of the MLCRA and Article 9 of Kansas' regulations. The Secretary further finds that Sections 49–411 and 49–412 of the MLCRA, which allow for deferred planting and delayed reclamation, are inconsistent with Section 515(b)(16) of SMCRA which requires reclamation contemporaneously with mining. The Secretary conditions his approval of the Kansas program on Kansas amending MLCRA Section 49–411 to the extent it authorizes deferred planting and repealing Section 49–412 which authorizes delayed reclamation;

(c) Pursuant to 30 CFR 732.15(b)(2), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to implement, administer and enforce a permit system consistent with 30 CFR Chapter VII, Subchapter G and prohibit surface coal mining and reclamation operations without a permit issued by the Kansas Mined Land Conservation and Reclamation Board. These provisions are incorporated in Sections 49–405, 49–406, 49–407, 49–410, 49–427, and 49–429 of the MLCRA and Articles 2, 3, 4, 6, 7, 10, 11, 14, and 15 of Kansas' regulations;

(d) Pursuant to 30 CFR 732.15(b)(3), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to regulate coal exploration consistent with 30 CFR Parts 776 and 815, and to prohibit coal exploration that does not comply with 30 CFR Parts 776 and 815. These provisions are incorporated in Sections 49–405 and 49–427 of the MLCRA and Article 7 of Kansas' regulations;

(e) Pursuant to 732.15(b)(4) the Secretary finds that the MLCRA and the Kansas program do not provide an exemption from permanent program requirements for coal extraction incidental to government-financed construction. The Secretary further finds that without the exemption, the Kansas program is more stringent than SMCRA and 30 CFR Part 707;

(f) Pursuant to 30 CFR 732.15(b)(5), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to provide for entry, inspections, and monitoring of all coal exploration and surface mining and reclamation operations on non-Indian and non-federal lands within Kansas consistent with Section 517 of SMCRA and 30 CFR Chapter VII, Subchapter L. These provisions are incorporated in Sections 49–405, 49–405c and 49–405d of MLCRA and Articles 5 and 15 of Kansas' regulations;

(g) Pursuant to 30 CFR 732.15(b)(6), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to implement, administer and enforce a system for performance bonds and liability insurance, or other equivalent guarantees, consistent with 30 CFR Chapter VII, Subchapter J (with the exceptions noted specifically below in this paragraph). These provisions are incorporated in Sections 49–405, 49–406, 49–415 and 49–416 of the MLCRA and Articles 2, 3, and 8 of Kansas' regulations. The Secretary further finds that Sections 49–413 and 49–414 of the MLCRA, which allow for bond release once the Kansas Mined Land Conservation and Reclamation Board has determined that a satisfactory vegetative cover has been established, are inconsistent with Sections 515(b)(20) and 519(c) of SMCRA, which require an operator to assume a five year minimum period of responsibility for successful revegetation. Approval of the Kansas program is conditioned on Kansas amending Section 49–413 to the extent it authorizes discretionary bond release and repealing Section 49–414 of the MLCRA which authorizes release of bond in conjunction with deferred planting;

(h) Pursuant to 30 CFR 732.15(b)(7), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and Kansas regulations to provide for civil and criminal sanctions for violations of the Kansas law, regulations and conditions of permits and exploration approvals including civil and criminal penalties in accordance with Section 518 of SMCRA and 30 CFR Part 845 including the same or similar procedural requirements (with the exception noted specifically below in this paragraph). These provisions are incorporated in Sections 49–405 and 49–405c of the MLCRA and Article 5 of Kansas' regulations. The Secretary further finds that Section 49–421 of the MLCRA, relating to penalties, is inconsistent with SMCRA inasmuch as it does not authorize mandatory penalties for cessation orders as high as the $5,000 maximum contained in Section 518(a) of SMCRA. The Kansas statute limits such penalties to $250. The MLCRA also contains a provision (Section 49–405c) that establishes a penalty of $5,000 that is consistent with SMCRA. However, Section 49–421 is inconsistent with Section 49–405c;

apparently the Kansas legislature inadvertently failed to repeal Section 49–421 when Section 49–405c was enacted. The Secretary conditions his approval on Kansas repealing Section 49–421 of the MLCRA;

(i) Pursuant to 30 CFR 732.15(b)(8), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority (except as specifically set forth below in this paragraph) under the MLCRA and regulations to issue, modify, terminate and enforce notices of violation, cessation orders and show-cause orders in accordance with Section 521 of SMCRA (30 U.S.C. 1271), and consistent with 30 CFR Chapter VII, Subchapter L, including the same or similar procedural requirements. These provisions are incorporated in Section 49–405, 49–405c and 49–405d of the MLCRA and Articles 5 and 15 of Kansas' regulations. The Secretary further finds that Section 49–416 of the MLCRA is inconsistent in part with and less stringent than Section 521 of SMCRA (and Section 49–405(m) of the MLCRA) because it allows for discretionary permit revocation as distinguished from the mandatory cessation orders required under Section 521 for violations creating imminent danger to public health or safety or causing imminent environmental harm. The Secretary conditions his approval on Kansas amending Section 49–416 to the extent that it provides for discretionary permit revocation;

(j) Pursuant to 30 CFR 732.15(b)(9), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to provide for designation of areas as unsuitable for surface coal mining consistent with 30 CFR Chapter VII, Subchapter F. These provisions are incorporated in Sections 49–405, 49–405b, 49–406 and 49–422a of the MLCRA and Articles 2 and 12 of Kansas' regulations;

(k) Pursuant to 30 CFR 732.15(b)(10), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to provide for public participation in the development, revision and enforcement of Kansas regulations and the Kansas program consistent with the public participation requirements of SMCRA, 30 CFR Chapter VII, and 43 CFR Part 4. The Secretary further finds that the public has had a meaningful opportunity to participate in the development of the state program submitted to OSM based on the information in the administrative record, the public hearings Kansas held on July 24, 1979, December 10, 1979, and September 29, 1980, in Pittsburg, Kansas, and the public comment periods provided pursuant to Kansas Statutes Annotated, Chapter 77, Article 4;

(l) Pursuant to 30 CFR 732.15(b)(11), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to monitor, review, and enforce the prohibition against indirect or direct financial interests in coal mining operations by employees of the Kansas Mined Land Conservation and Reclamation Board consistent with 30 CFR Part 705. These provisions are incorporated in Sections 49–404, 49–405 and 49–406 of the MLCRA and Articles 2 and 14 of Kansas' regulations;

(m) Pursuant to 30 CFR 732.15(b)(12), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA, but does not have the authority under fully enacted regulations, to require the training, examination, and certification of persons engaged in or responsible for blasting and the use of explosives in accordance with Section 719 of SMCRA. Under 30 CFR 732.15(b)(12), the State is not required to implement regulations governing such training, examination and certification until six months after complete federal regulations have been promulgated for these provisions. On December 12, 1980, OSM published partial final rules establishing minimal requirements for training and certifying persons involved in blasting in surface coal mining operations (45 FR 82084–82100). These regulations are codified at 30 CFR Chapter VII, Subchapter M, Part 850. Subchapter M is now final and complete with the exception of four subsections concerning qualification and experience reuirements. These subsections will be reproposed and subject to public comment prior to their final promulgation. Once the complete Subchapter M is finally promulgated, Kansas will have an additional six months to prepare and submit to OSM regulations consistent with the federal rules;

(n) Pursuant to 732.15(b)(13), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to implement a small operator assistance program consistent with 30 CFR Part 795. These provisions are incorporated in Sections 49–405 and 49–406 of the MLCRA and Article 11 of Kansas' regulations;

(o) Pursuant to 30 CFR 732.15(b)(14), the Secretary finds that the Kansas program does not provide for protection of employees of the Kansas Mined Land Conservation and Reclamation Board in accordance with the protection afforded federal employees under Section 704 of SMCRA. The Secretary conditions his approval on Kansas amending the MLCRA to include provisions for the protection of employees of the Kansas Mined Land Conservation and Reclamation Board consistent with the protection afforded federal employees under Section 704 of SMCRA;

(p) Pursuant to 30 CFR 732.15(b)(15), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has the authority under the MLCRA and regulations to provide for the administrative and judicial review of the Kansas program actions (except as specifically set forth in this paragraph) in accordance with Sections 525 and 526 of SMCRA and with 30 CFR Chapter VII, Subchapter L. These provisions are incorporated in Sections 49–407, 49–416a and 49–422a of the MLCRA and Article 4 of Kansas' regulations. The Secretary further finds that Sections 49–422 and 49–422a of the MLCRA are inconsistent with each other and neither Section 49–422 nor 49–422a of the MLCRA states whether judicial review of an administrative action will be *de novo* or on the record made before the Board. The Secretary conditions his approval on Kansas repealing Section 49–422 and amending Section 49–422a to demonstrate that the review provided for will be on the record or consistent with the federal requirements for *de novo* review as stated in Finding 4(p) of the initial decision on the Kansas program (45 FR 58573, September 4, 1980);

(q) Pursuant to 30 CFR 732.15(b)(16), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board has authority under the MLCRA and regulations to cooperate and coordinate with, and provide documents and other information to the Office of Surface Mining under the provisions of 30 CFR Chapter VII;

(r) Pursuant to 30 CFR 732.15(c), the Secretary finds that the MLCRA contains provisions that would interfere with or preclude implementation of the provisions of SMCRA and 30 CFR Chapter VII, as noted in findings 4(b), 4(g), 4(h), 4(i), and 4(p) above;

(s) Pursuant to 30 CFR 732.15(b), the Secretary finds that the Kansas Mined Land Conservation and Reclamation Board and other agencies having a role in the program have sufficient legal and administrative personnel and sufficient funding to implement, administer, and enforce the provisions of the program, the requirements of 30 CFR 732.15(b)

and other applicable state and federal laws; however, see Finding 1(c) above.

Disposition Of Comments

The comments received on the Kansas program resubmission during the public comment period held between November 10, 1980, and November 26, 1980, raised several issues. The Secretary considered these comments in evaluating Kansas' program, as indicated below.

1. The Heritage Conservation and Recreation Service requested that Kansas adopt supplemental regulations that would adequately address compliance with Section 106 of the National Historic Preservation Act of 1966, as amended. The suggested supplemental regulations are discussed below:

(a) Both Kansas regulations 47–12–4(j) and 47–3–42(a)(2) should include a provision that would restrict public release of information identifying historic, archeological or Indian burial site locations if such disclosures might result in vandalism of these sites. Although the National Historic Preservation Act has been recently amended to restrict release of information in these circumstances for sites on federal lands, OSM's regulations at present, do not impose this requirement on the states. Therefore, the Secretary will not require Kansas to change its regulations at this time. If the Secretary subsequently adopts a regulation requiring such a provision in state programs, Kansas will be required to amend its program at that time.

(b) Both Kansas regulations 47–3–42(a)(32) and 47–10–1(c) should include a provision for consultation with the Heritage Conservation and Recreation Service in the development of measures to minimize or prevent adverse impacts to public parks and historic places. Kansas regulation 47–12–4(c) incorporates by reference 30 CFR 761.12(f), which provides for consultation with the Federal, State or local agency with jurisdiction over any public park or places listed on the National Register of Historic Places which may be adversely affected by a proposed surface coal mining operation. Such consultation would include HCRS when HCRS is the Federal agency with jurisdiction.

2. The Environmental Protection Agency (EPA) requested that the Memorandum of Agreement (MOA) between the Kansas Mined Land Conservation and Reclamation Board and the Kansas Department of Health and Environment specify provisions to coordinate water quality planning activities. In addition, EPA stated that the MOA did not specify how coordination on air pollution issues would be accomplished. The MOA does specify how the Board will coordinate with the Department of Health and Environment (DHE) on NPDES matters. The Board has no general water quality planning activities under the permanent program. The MOA also specifies that the board will consult with DHE before approving air pollution related aspects of an application for a surface coal mining permit. Therefore, no change to this part of the program is required.

3. The EPA recommended a larger staff for the Kansas Mined Land Office. The Secretary shares EPA's concern over Kansas' staffing and budget plans; see the detailed discussion contained in Finding 1(c) above.

4. The Soil Conservation Service (SCS), United States Department of Agriculture, noted that a clearer and more defined process for the review of reclamation plans would help inform all reviewers of their responsibilities and reduce delays in permit approvals. Volume 3 of the Kansas program, at pages 69–73 (Administrative Record No. KS–189), sets out in adequate detail the proposed process for coordinating the review of permit applications. These pages include a flow chart with time limits, as well as a narrative description of the process. Therefore, no additional information is required.

5. The SCS commented that Kansas regulation 47–3–21 should not consider historical use to determine prime farmland. The SCS further commented that the identification of prime farmland should be classified according to the USDA Soil Conservation Service definition, not based on historical use. Section 701(20) of SMCRA requires the Secretary to consider historical use in the determination of whether land is prime farmland. Therefore, Kansas' regulation 47–3–21 is consistent with SMCRA.

6. The Environmental Policy Institute (EPI) commented that by using Kansas' workload assumptions, Kansas needs to hire additional reclamation specialists to meet the Kansas projected inspection workload. The Secretary believes, based on experience in the interim program, the Kansas projection of inspection workload is overestimated. Partial inspections should require about 8 hours and complete inspections about 16 hours because the mines in Kansas are moderate to small in size. Also, because the mines are located in one small region of the state, the travel time to and between mines is relatively short. In light of these factors, the Secretary believes that the proposed inspection staff will be sufficient to permit Kansas to meet its inspection mandates. Also, see the discussion of Kansas' overall staffing and budget plan in Finding 1(c) above.

7. The EPI noted that the Kansas program does not include a provision comparable to section 704 of SMCRA providing for the protection of employees of the Kansas Mined Land Conservation and Reclamation Board in accordance with the protection afforded federal employees. The Secretary concurs; see the discussion under Finding 4(o), above.

The Secretary's Decision

The Secretary is fully committed to two key aims which underlie SMCRA. The Act calls for comprehensive regulation of the effects of surface coal mining on the environment and public health and safety, and for the Secretary to assist the states in becoming the primary regulators under the Act. To enable the states to achieve that primacy, the Secretary has undertaken many activities, of which several are particularly noteworthy.

The Secretary has worked closely with several state organizations, such as the Interstate Mining Compact Commission, the Council of State Governments, the National Governors Association and the Western Interstate Energy Board. Through these groups OSM has frequently met with state regulatory authority personnel to discuss informally how the Act should be administered, with particular reference to unique circumstances in individual states. Often these meetings have been a way for OSM to explain portions of the federal requirements and how the states might meet them. Alternative state regulatory options, the "state window" concept, for example, were discussed at several meetings of the Interstate Mining Compact Commission and the National Governors Association.

The Secretary has dispensed over $6.9 million in program development grants and over $37.6 million in initial program grants to help the states to develop their programs, to administer their initial programs, to train their personnel in the new requirements, and to purchase new equipment. In several instances OSM detailed its personnel to states to assist in the preparation of their permanent program submissions. OSM has also met with individual states to determine how best to meet the Act's environmental protection goals.

Equally important, the Secretary structured the state program approval process to assist the states in achieving primacy. He voluntarily provided his

preliminary views on the adequacy of each state program to identify needed changes and to allow them to be made without penalty to the state. The Secretary adopted a special policy to insure that communication between him and the states remained open and uninhibited at all times. This policy was critical to avoiding a period of enforced silence with a state after the close of the public comment period on its program and has been a vital part of the program review process (*see* 44 FR 54444, September 19, 1979).

The Secretary has also developed in his regulations the critical ability to approve conditionally a state program.

Under the Secretary's regulations, conditional approval gives full primacy to a state even though there are minor deficiencies in a program. This power is not expressly authorized by the Act; it was adopted through the Secretary's rulemaking authority under 30 U.S.C. 201(c), 503(b), and 503(a)(7). The Act expressly gives the Secretary only two options—to approve or disapprove a state program. Read literally, the Secretary would have no flexibility; he would have to approve those programs that are letter-perfect and disapprove all others. To avoid that result, and in recognition of the difficulty of developing an acceptable program, the Secretary adopted the regulation providing the authority to approve conditionally a program.

Conditional approval has a vital effect for programs approved by the Secretary: it results in the implementation of the permanent program in a state months earlier than might otherwise be anticipated. While this may not be significant in states that already have comprehensive surface mining regulatory programs, in many states that earlier implementation will initiate a much higher degree of environmental protection. It also implements the rights SMCRA provides to citizens to participate in the regulation of surface coal mining through soliciting their views at hearings and meetings and enabling them to file requests to designate lands as unsuitable for mining if they are fragile, historic, critical to agriculture, or simply cannot be reclaimed to their prior productive capability.

The Secretary considers three factors in deciding whether a program qualifies for conditional approval. First is the state's willingness to make good faith efforts to effect the necessary changes. Without the state's commitment, the option of conditional approval may not be used.

Second, no part of the program can be incomplete. As the preamble to the regulations says, the program, even with deficiencies, must "provide for implementation and administration for all processes, procedures, and systems required by the Act and these regulations" (44 FR 14961). That is, a state must be able to operate the basic components of the permanent program: the designation process; the permit and coal exploration systems; the bond and insurance requirements; the performance standards; and the inspection and enforcement systems. In addition there must be a functional regulatory authority to implement the other parts of the program. If some fundamental component is missing, conditional approval may not be used.

Third, the deficiencies must be minor. For each deficiency or group of deficiencies, the Secretary considers the significance of the deficiency in light of the particular state in question. Examples of deficiencies that would be minor in virtually all curcumstances are correction of clerical errors and resolution of ambiguities through attorneys general opinions, revised regulations, policy statements, and changes in the narrative or the side-by-side.

Other deficiencies require individual consideration. An example of a deficiency that would most likely be major would be a failure to allow meaningful public participation in the permitting process. Although this would not render the permit system incomplete because permits could still be issued, the lack of any public participation could be such a departure from a fundamental purpose of the Act that the deficiency would most likely be major. The use of a conditional approval is not and cannot be a substitute for the adoption of an adequate program. Section 732.13(i) of Title 30 of the regulations gives the Secretary little discretion in terminating programs where the state fails to fulfill the conditions. The purpose of the conditional authority power is to assist the states, not to excuse them from achieving compliance with SMCRA.

Conditional Approval

As indicated under "Secretary's Findings," there are minor deficiencies in the Kansas program that the Secretary requires be corrected as a condition of program approval, and which the State has agreed to correct. In all other aspects, the Kansas program meets the criteria for approval. The deficiencies identified in prior findings and the reasons why they are considered minor are summarized below. In each instance, the discussion of the deficiencies found under "Secretary's Findings" discusses one means of eliminating the deficiency. The State may take other measures to eliminate the deficiencies, and so long as the same result is achieved, the conditions will be met.

The statutory deficiencies identified below cannot be repealed or amended until the Kansas Legislature convenes in January 1981. However, the Chairman of the Kansas Mined Land Conservation and Reclamation Board stated in a letter of October 27, 1980, that the Board "will exercise its discretion, within the allowable limits of the law, in favor of the standards and policies identified in the proposed statutory revisions to the State Act. In other words, where a conflicting statute which the Board wishes to have repealed or amended currently contains language making an Act discretionary with the Board, and that Act conflicts with OSM regulations and P.L. 95–87, then the Board will not exercise its discretion to allow or order that Act." Administrative Record Document KS–183.

1. Sections 49–411 and 49–412 of the MLCRA allow the state regulatory authority to authorize deferred planting and delayed reclamation. These provisions are capable of implementation in a manner inconsistent with Section 515(b)(16) and SMCRA which requires reclamation as contemporaneously as practicable with mining.

As noted above, Kansas has agreed not to exercise its discretion in a manner inconsistent with SMCRA. Based on this representation, there is little likelihood of environmental damage prior to revision of the statute.

2. Sections 49–413 and 49–414 of the MLCRA allow the state regulatory authority to authorize bond release upon a determination that a satisfactory vegetative cover has been established. These sections are inconsistent with Sections 515(b)(20) and 519(c) of SMCRA which require an operator to assume a five year minimum period of responsibility for successful revegetation.

As noted above, Kansas has agreed not to exercise its discretion in a manner inconsistent with SMCRA. Based on this representation, there is little likelihood of any impact prior to the time when a statutory revision can be made.

3. Section 49–421 of the MLCRA limits mandatory civil penalties for cessation orders to $250. This provision is inconsistent with and less stringent than Section 518(a) of SMCRA which authorizes mandatory penalties of up to $5000. The Kansas MLCRA also contains a provision (Section 49–405c) that establishes a maximum penalty of

$5000. Apparently, Kansas inadvertently failed to repeal Section 49–421 when Section 49–405c was enacted.

Kansas state law (Section 49–405c) and regulations provide for penalties consistent with federal law and regulations. The deficiency noted above appears to be the result of an inadvertent error. While it is possible that in the period prior to revision of the statute these provisions could be applied to limit civil penalty assessments in a manner inconsistent with SMCRA, this is a minor deficiency in that operators will, in all cases, be subject to some fines, and the period before correction of the legislation should be brief.

4. Section 49–416 of the MLCRA is inconsistent in part with Section 521 of SMCRA (and Section 49–405(m) of the MLCRA) because it allows for discretionary permit revocation as distinguished from the mandatory cessation orders required under Section 521 for violations creating imminent danger to public health or safety or causing imminent environmental harm.

As noted above, Kansas has agreed not to exercise its discretion in a manner inconsistent with SMCRA. Based on this representation, there is little likelihood of any impact prior to revision of the statute.

5. The Kansas program contains no counterpart to Section 704 of SMCRA concerning protection of employees of the Kansas Mined Land Conservation and Reclamation Board equivalent to the protection afforded federal employees under Section 704.

The history of state and coal industry relations in Kansas indicates that state employees will not likely be either significantly deterred in performing their duties or subject to violence or harassment during the time necessary to amend the statute. State inspectors will be protected under certain circumstances by the general state assault and battery statutes.

6. Sections 49–422 and 49–422a of the MLCRA are inconsistent with each other (the retention of Section 49–422 may have been inadvertent) and neither Section states whether judicial review of an administrative action will be *de novo* or on the record made before the Mined Land Conservation and Reclamation Board. To the extent that the Kansas program provides for trial *de novo* review of an administrative action such review must incorporate procedures adequately addressing the seven criteria enumerated in Finding 4(p) of the **Federal Register** notice announcing the initial decision on the Kansas program. (45 FR 58573, September 4, 1980).

Based on the time periods involved in the administrative process and the small number of mines in Kansas, there are not likely to be any appeals from administrative decisions prior to correction of this deficiency in the state program. The probability of an appeal and of an inconsistent interpretation of federal regulations is considered minimal.

Given the nature of these deficiencies and their magnitude in relation to all the other provisions of the Kansas program, the Secretary of the Interior has concluded they are minor deficiencies. Accordingly, the program is eligible for conditional approval under 30 CFR 732.13(i), because:

1. The deficiencies are of such a size and nature as to render no part of the Kansas program incomplete since all other aspects of the program meet the requirements of SMCRA and 30 CFR Chapter VII, and these deficiencies, which have been agreed to be promptly corrected, will not directly affect environmental performance at coal mines;

2. Kansas has initiated and is actively proceeding with steps to correct the deficiencies (See Kansas Administrative Record Document KS–198 of draft legislation); and,

3. Kansas has agreed, by telegram dated January 9, 1981, to correct the statutory deficiencies by June 1, 1981.

Accordingly, the Secretary is conditionally approving the Kansas program. This approval shall terminate if the state legislation correcting the statutory deficiencies is not fully enacted by June 1, 1981. This conditional approval is effective on January 21, 1981. Beginning on that date, the Kansas Mined Land Conservation and Reclamation Board shall be deemed the regulatory authority in Kansas and all surface coal mining and reclamation operations and all coal exploration on non-federal and non-Indian lands in Kansas shall be subject to the permanent regulatory program.

On non-federal and non-Indian lands in Kansas, the permanent regulatory program consists of the state program as conditionally approved by the Secretary.

On federal lands, the permanent regulatory program consists of the federal rules made applicable under 30 CFR Chapter VII, Subchapter D, Parts 740–745. Kansas and the Department of Interior may enter into a cooperative agreement to apply the requirements of the approved Kansas permanent regulatory program to federal lands under 30 CFR Part 745.

The Secretary's approval of the Kansas program relates at this time only to the permanent regulatory program under Title V of SMCRA. The approval does not constitute approval of any provisions related to implementation of Title IV of SMCRA, the abandoned mine lands reclamation program. In accordance with 30 CFR Part 884, Kansas may submit a state reclamation plan now that its permanent program has been conditionally approved. At the time of such a submission, all provisions relating to abandoned mined lands reclamation will be reviewed by officials of the Department of the Interior.

Additional Findings

The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this conditional approval.

The Secretary has determined that this document is not a significant rule under E.O. 12044 or 43 CFR Part 14, and no regulatory analysis is being prepared on this conditional approval.

Dated: January 13, 1981.

Joan M. Davenport,

Assistant Secretary, Energy and Minerals.

A new Part, 30 CFR Part 916, is adopted to read as follows:

PART 916—KANSAS

Sec.

916.1 Scope.

916.10 State regulatory program approval.

916.11 Conditions of State program approval.

Authority: Pub. L. 95–87, Sections 102, 201 and 503; 30 U.S.C. 1202, 1211, and 1253.

§ 916.1 Scope.

This part contains all rules applicable only within Kansas which have been adopted under the Surface Mining Control and Reclamation Act of 1977.

§ 916.10 State regulatory program approval.

The Kansas program as submitted on February 26, 1980, and amended on October 31, 1980, is conditionally approved, effective January 21, 1981. Beginning on that date, the Kansas Mined Land Conservation and Reclamation Board shall be deemed the regulatory authority in Kansas for all surface coal mining and reclamation operations on non-federal and non-Indian lands. Copies of the approved program, together with copies of the telegram from the Kansas Mined Land Conservation and Reclamation Board agreeing to the conditions in 30 CFR 916.11, are available at:

(a) Office of Surface Mining Reclamation and Enforcement, Region IV, Fifth Floor, Scarritt Building, 818

Grand Avenue, Kansas City, Missouri 64106. Telephone: (816) 374–3920

(b) Mined-Land Office, 107 West 11th Street, Pittsburg, Kansas 66762. Telephone: (316) 231–8540

(c) Kansas Corporation Commission, Legal Office, 4th Floor, State Office Building, 915 Harrison, Topeka, Kansas 66612. Telephone: (913) 296–3361

(d) Office of Surface Mining Reclamation and Enforcement, Room 153, Interior Building, 1951 Constitution Avenue NW., Washington, D.C. 20240. Telephone: (202) 343–4728.

§ 916.11 Conditions of State program approval.

The approval of the State regulatory program is subject to the following conditions:

(a) The approval found in Section 916.10 will terminate on June 1, 1981, unless Kansas corrects the deficiencies by submitting to the Secretary by that date a law amending Section 49–411 of the MLCRA to remove the discretion to allow deferred planting and a law repealing Section 49–112 of the MLCRA which allows the state regulatory authority to authorize delayed reclamation, or otherwise amends its program to accomplish the same result.

(b) The approval found § 916.10 will terminate on June 1, 1981, unless Kansas corrects the deficiencies by submitting to the Secretary by that date a law amending Section 49–413 of the MLCRA to remove the discretion to allow bond release upon a determination that a satisfactory vegetative cover has been established and a law repealing Section 49–414 of the MLCRA which authorizes release of bond in conjunction with deferred planting, or otherwise amends its program to accomplish the same result.

(c) The approval found in § 916.10 will terminate on June 1, 1981, unless Kansas corrects the deficiency by submitting to the Secretary by that date a law repealing Section 49–421 of the MLCRA to the extent that it provides for a civil penalty assessment limit of $250, or otherwise amends its program to accomplish the same result.

(d) The approval found in § 916.10 will terminate on June 1, 1981, unless Kansas corrects the deficiency by submitting to the Secretary by that date a law amending Section 49–416 of the MLCRA to the extent that it provides for discretionary permit revocation, or otherwise amends its program to accomplish the same result.

(e) The approval found in § 916.10 will terminate on June 1, 1981, unless Kansas corrects the deficiency by submitting to the Secretary by that date a law providing for the protection of employees of the Kansas Mined Land Conservation and Reclamation Board consistent with the protection afforded federal employees under Section 704 of SMCRA, or otherwise amends its program to accomplish the same result.

(f) The approval found in § 916.10 will terminate on June 1, 1981, unless Kansas corrects the deficiency by submitting to the Secretary by that date a law repealing Section 49–422 and amending Section 49–422a of the MLCRA to establish that judicial review of an administrative action will be on the record before the Board or if trial *de novo*, that it complies with the federal requirements, or otherwise amends its program to accomplish the same result.

BILLING CODE 4310–05–M

---

30 CFR Part 944

Conditional Approval of the Permanent Regulatory Program Submission From the State of Utah Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final Rule; Conditional Approval of Utah's Proposed Permanent Regulatory Program.

SUMMARY: The State of Utah resubmitted to the Department of the Interior its proposed permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), following an initial approval in part and disapproval in part. The notice announcing the initial decision was published in the Federal Register, October 24, 1980 (45 FR 70481–70510). The purpose of the resubmission is to demonstrate the State's intent and capability to administer and enforce the provisions of SMCRA and the permanent regulatory program regulations, 30 CFR Chapter VII. After providing opportunities for public comment and conducting a thorough review of the program submission, the Secretary of the Interior has determined that the Utah program meets the minimum requirements of SMCRA and the permanent program regulations except for minor deficiencies discussed below under "Supplementary Information." Accordingly, the Secretary of the Interior has conditionally approved the Utah program. A new Part 944 is being added to 30 CFR Chapter VII to implement this decision.

EFFECTIVE DATE: This conditional approval is effective January 21, 1981. This conditional approval will terminate as specified in 30 CFR 944.11 unless the deficiencies identified below have been corrected in accordance with 30 CFR 944.11, adopted below.

FOR FURTHER INFORMATION CONTACT: Mr. Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, South Building, 1951 Constitution Avenue NW., Washington, D.C. 20240, telephone (202) 343–4225.

ADDRESSES: Copies of the Utah program and the administrative record on the Utah program are available for public inspection and copying during business hours at:

Office of Surface Mining Reclamation and Enforcement, Region V, Brooks Towers, Room 2115, 1020 15th Street, Denver, Colorado 80202, telephone: (303) 837–5421

Office of Surface Mining Reclamation and Enforcement, Room 153, Interior South Building, 1951 Constitution Avenue NW., Washington, D.C. 20240, telephone: (202) 343–4728

Division of Oil, Gas and Mining, 1588 West North Temple, Salt Lake City, Utah 84116, telephone: (801) 533–5771

SUPPLEMENTARY INFORMATION: The general background on the permanent program, the state program approval process, and the Utah program submission were discussed in the Federal Register, October 24, 1980 (45 FR 70481–70510). That notice, and the findings and discussions in it, form part of the basis and purpose of the decision being announced in this notice and are incorporated herein.

In that notice the Secretary announced his partial approval and partial disapproval of the Utah program. Regulatory and legislative provisions were disapproved because they did not meet the minimum requirements of SMCRA and the permanent program regulations. Under 30 CFR 732.13(f), Utah had 60 days from the date of partial disapproval to resubmit a revised program.

Utah resubmitted its program to OSM on December 23, 1980. The resubmission included: Utah Coal Mining and Reclamation Act—Proposed Housekeeping Amendments; Cooperative agreement; Utah State Program Amended Text and Clarifications—Rules and Regulations (Adopted Amendments); Amendments to Bonding Provisions; Penalty Provisions; Attorney General's Opinion;

Coal Mining and Reclamation Regulations—Proposed Amendments for Adoption; State Window Submission; Errors in adopted regulations; errors in Bonding Provisions, Proposed amendments for adoption on December 18, 1980; and Addendum to Attorney General Opinion dated December 19, 1980. Announcement of Utah's resubmission was made in the Salt Lake City Tribune within the State of Utah and published in the Federal Register on December 23, 1980 (45 FR 84824–26).

A public hearing on the resubmission was announced in the December 23, 1980, Federal Register, and held in Salt Lake City, Utah, on January 7, 1981.

The Utah program was resubmitted pursuant to 30 CFR 732.13(f). The post-resubmission public comment period ended January 8, 1981. Public disclosure of comments by Federal agencies was made on January 14, 1981 (45 FR 3238).

On January 15, 1981, the Administrator of the Environmental Protection Agency transmitted his written concurrence on the Utah program.

The Regional Director completed his program review on January 12, 1981, and forwarded the public hearing transcripts, written presentations, and copies of all comments to the Director together with a recommendation that the program be conditionally approved.

On January 12, 1981, the Director recommended that the Utah program be conditionally approved.

Throughout the remainder of this notice, the term "Utah program" or "Utah submission" is used to mean the resubmission together with those parts of the original submission approved on October 16, 1980.

Secretary's Findings

1. In accordance with section 503(a) of SMCRA, the Secretary finds Utah has, subject to the exceptions in findings (6)(1)(a)(i-v); (4)(b)(i); (c)(viii), (xv), (xx)(5), (xxix), (xxxi); and (4)(d)(i), below, the capability to carry out the provisions of SMCRA and to meet its purposes in the following ways:

(a) The Utah Coal Mining and Reclamation Act (Utah CMRA) and the Utah Coal Mining and Reclamation Regulations adopted thereunder provide for the regulation of surface coal mining and reclamation operations on non-Indian and non-federal lands in Utah in accordance with SMCRA except as noted in the following findings. Approval of the Utah program is based on the following findings or conditions of approval by the Secretary or representations made by Utah concerning Utah laws:

(i) Section 507(c) of SMCRA concerning criteria for the establishment of a Small Operator Assistance Program requires that under certain circumstances the regulatory authority pay for the required determination of probable hydrologic consequences and the statement of results of test borings and core samplings. The Utah CMRA limits this requirement by adding the phrase in Section 40–10–10(3) UCA "contingent upon receipt of funding from the Office of Surface Mining." This limitation is inconsistent with and less stringent than the federal requirement. Approval of the Utah program is conditioned on the State's revision of Section 40–10–10(3) UCA of the Utah CMRA or other appropriate revision to Utah's Program to provide for a Small Operator Assistance Program consistent with that mandated by Section 507(c) of SMCRA.

(ii) The state statute contains several apparently inadvertent errors. The statute's reference in 40–10–17(2)(j)(ii)(B) UCA to "(2)(h)(ii)" should be to "(2)(j)(ii)". In 40–10–16(4) UCA, the word "approves" should be "disapproves," as set forth in Section 519(d) of SMCRA. That section of SMCRA prescribes that if the regulatory authority disapproves the application for bond release, the regulatory authority must notify the permittee of the reasons for disapproval and recommended corrective action. Approval of the Utah program is conditioned upon the correction of these errors such that the noted provisions are consistent with SMCRA.

(iii) Section 40–10–21 UCA allows a suit against the United States in state court. The Secretary does not agree to submit to the jurisdiction of the Utah courts in all circumstances involving lawsuits under SMCRA or the Utah program. Accordingly, Section 40–10–21 UCA of the Utah CMRA is found to be inconsistent with Federal law to the extent that it purports to grant the Utah courts jurisdiction over the Secretary in these areas. Approval of the Utah program is conditioned upon Utah amending its statute to delete the provision for state court jurisdiction over the United States in citizen suits filed in state courts. The Secretary explicitly reserves the right to remove any suit brought against him in the courts of Utah, and further reserves his right to object to the jurisdiction of the Utah courts over him. By approval of the Utah program, the Secretary in no way consents to such jurisdiction.

(iv) Section 510(b)(6) of SMCRA and 30 CFR 788.15(b) provide that where the private mineral estate has been severed from the private surface estate, the permit applicant must submit either the written consent of the surface owner or a conveyance expressly granting or reserving the right to use surface mining methods, or where the conveyance does not have express language, the relative legal rights of the parties must be determined in accordance with state law. Section 40–10–11(f) UCA differs from the federal provisions in that these requirements are triggered only when the state mineral estate has been severed from the private surface estate.

Utah submitted to the Utah Legislative Drafting Committee, on November 19, 1980, an admendment to Section 40–10–11(f) UCA changing "state mineral estate" to "private mineral estate". With this change, the Utah statute will be verbatim to Section 510(b)(6) of SMCRA. Approval of the Utah program is conditioned upon the adoption of a statutory provision or other program modification to make the determination of property rights equivalent to that prescribed in the federal statute.

(v) The Utah statute does not reflect the dates of SMCRA for the determinations listed below. On December 9, 1980, Utah submitted housekeeping amendments to the Utah Legislative Drafting Committee to change the noted dates to be consistent with those set forth in SMCRA. Approval of the Utah program is conditioned upon Utah amending its statute to be consistent with the requirements of SMCRA.

(a) The date for the establishment of the "grandfathering" date of alluvial valley floors under Section 40–10–11(2)(e)(ii) UCA/Section 510(b)(5)(B) of SMCRA.

(b) The date for prime farmland permit application requirements under Section 40–10–11(4) UCA/Section 510(d)(2)of SMCRA.

(c) The date for the establishment of valid existing rights in Section 40–10–24(4) UCA/Section 522(e) of SMCRA.

(d) The date for the determination of substantial legal and financial commitments in Section 40–10–24(1)(e) UCA/Section 522(a)(6) of SMCRA.

(vi) Subsection 516(b)(1) of SMCRA requires operators to take steps consistent with known technology to prevent and mitigate damage from subsidence to the extent technologically and economically feasible, except where the mining method used involves planned subsidence and with the proviso that "nothing in this subsection shall be construed to prohibit the standard method of room and pillar mining * * *". Section 40–10–18 UCA has the same provisions, except that the proviso declares that "nothing in this

subsection shall be construed to prohibit the standard methods of mining."

The Secretary requested in his October 24, 1980 decision (45 FR 70484) partially approving the Utah program, that Utah either clarify that Utah's reference to "standard methods of mining" applies to "room and pillar" or "longwall" mining or a combination of those methods or to revise its statute.

Utah submitted on December 23, 1980, a Utah Attorney General's opinion stating that the reference in Section 40–10–18 UCA of the Utah CMRA to "standard methods of mining" applies only to the two methods or a combination thereof given special status under SMCRA. The Secretary bases his approval of Section 40–10–18 UCA on Utah's representation and on the Secretary's understanding that longwall mining results in predictable and controlled subsidence and as such is consistent with Section 516(b)(1) of SMCRA.

(b) The Utah CMRA provides sanctions for violations of Utah laws, regulations, or conditions of permits concerning surface coal mining and reclamation operations, and these sanctions meet the requirements of SMCRA, including civil and criminal actions, forfeiture of bonds, suspensions, revocations, withholding of permits, and the issuance of cease-and-desist orders by the Utah Division of Oil, Gas and Mining or its inspectors.

(c) The Utah Division of Oil, Gas and Mining has sufficient administrative and technical personnel and sufficient funds to enable Utah to regulate surface coal mining and reclamation operations in accordance with the requirements of SMCRA.

(d) Utah law provides for the effective implementation, maintenance, and enforcement of a permit system that meets the requirements of SMCRA for the regulation of surface coal mining and reclamation operations on non-Indian and non-federal lands within Utah except as noted in findings 4(d)(ii).

(e) The Utah (CMRA) has established a process for the designation of areas as unsuitable for surface coal mining in accordance with Section 522 of SMCRA, 30 U.S.C. 1271.

(f) Utah has established, for the purpose of avoiding duplication, a process for coordinating the review and issuance of permits for surface coal mining and reclamation operations with other federal and state permit processes applicable to the proposed operations.

(g) Utah has fully enacted regulations consistent with regulations issued pursuant to SMCRA, subject to the exceptions discussed below in these findings.

2. As required by Section 503(b)(1)–(3) of SMCRA, 30 U.S.C. 1253(b)(1)–(3), and 30 CFR 732.11–732.13, the Secretary has, through OSM:

(a) Solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other federal agencies concerned with or having special expertise pertinent to the proposed Utah program (45 FR 55477, August 20, 1980, and 46 FR 3238, January 14, 1981).

(b) Obtained the written concurrence of the Administrator of the Environmental Protection Agency with respect to those aspects of the Utah program that relate to air or water quality standards promulgated under the authority of the Clean Water Act as amended (33 U.S.C. 1151–1175), and the Clean Air Act as amended (42 U.S.C. 7401 *et seq.*). The administrator's concurrence was given in letter dated January 15, 1981 Utah Administrative Record No. 191, and;

(c) Held a public review meeting in Salt Lake City, Utah, on April 11, 1980, to discuss the completeness of the Utah program submission and subsequently held a public hearing in Salt Lake City, Utah, on July 21, 1980, on the substance of the program submission, and subsequently held a public hearing January 7, 1981, in Salt Lake City, Utah, on the resubmitted program.

3. In accordance with Section 503(b)(4) of SMCRA, 30 U.S.C. 1253(b)(4), the Secretary finds the State of Utah has the legal authority and qualified personnel necessary for the enforcement of the environmental protection standards of SMCRA and 30 CFR Chapter VII.

4. In accordance with 30 CFR 732.15, the Secretary finds, on the basis of information in the Utah program submission, including the section-by-section comparison of the Utah law and regulations with SMCRA and 30 CFR Chapter VII, public comments, testimony and written presentation at the public meeting and hearings and other relevant information that:

(a) The Utah program provides for Utah to carry out the provisions and meet the purposes of SMCRA and 30 CFR Chapter VII within its borders;

(b) Utah has proposed the following alternative approach to the requirements of 30 CFR Chapter VII pursuant to 30 CFR 731.13:

(i) Performance Standards for Steep Slope Grading and Backfilling Section 515(b)(3) of SMCRA requires operators to backfill and grade in order to restore the approximate orignial contour (AOC) of the land with all highwalls * * * eliminated * * *" 30 CFR 817.101 and .102 implement this statutory requirement. The basic purpose of backfilling and grading is to reshape the disturbed area to AOC to minimize erosion and water pollution and prevent slides, (44 FR 15271 March 13, 1979). Utah proposed (July 24, 1980 submission) to allow the reduction rather than the elimination of the highwall in those cases where, as determined by the Division, the reduced highwall would meet requirements associated with approximate original contour, mass stability and hydrologic balance.

In his partial approval/partial disapproval decision on the Utah program, published in the October 24, 1980 (45 FR 70481–70510), the Secretary agreed with the concept of Utah's proposed alternative approach, but noted that such an alternative must be defined to carefully limit the exception to highwall elimination in order to be consistent with SMCRA.

In his finding on the proposed alternative, the Secretary noted that the provision contained in UMC 817.101(6)(1), which would implement the proposed alternative was deficient in that it did not specifically state that alternative applied only to underground mining activities in terrain with steep slopes composed of steep escarpments. Further, the provision was deficient because it allowed the Division, as it determined to be "practical and appropriate" to apply the alternative of not eliminating highwalls in all cases. The lack of defined criteria for the Division's determination to apply this alternative made the provision deficient in that it could allow the retention of highwalls in situations where the unique topographical justification was lacking. In addition, the state allowed the reduction rather than the elimination of depressions and spoil piles. The Secretary stated that these deficiencies must be corrected before the proposed alternative approach could be approved.

Utah adopted, on November 19, 1980, amendments to UMC 817.101(b)(1). The Utah provision requires that all areas at underground mines affected by surface operations be graded and restored to achieve approximate original contour except where settled fills have become stabilized and revegetated. Utah requires the elimination of highwalls except, where approved by the Division, the highwall may be reduced in order to achieve approximate original contour when the underground coal mining is in steep slope terrain. Utah further prescribes that all applicable requirements for insuring a static safety factor of 1.5 and protecting the hydrologic balance of the surrounding

terrain as specified in the regulation, the program and the (state) Act shall be met.

The Secretary finds that Utah's provision for allowing settled fills that have become stabilized and revegetated to remain is consistent with the court's order *In Re: Permanent Surface Mining Regulation Litigation* (Civil Action No. 79–1144, February 26, May 16 and August 15, 1980). The Secretary believes that 817.101(b)(1) adequately addresses the concern for stability, protection of the environment and health and safety of the public through its reference to the 1.5 static safety factor requirement and the incorporation of the requirements of regulations, the program and the state's Act.

The court ordered the Secretary to suspend the requirements of 30 CFR 817.101(b)(1) and .102 insofar as they did not provide for some flexibility for settled fills that have become stabilized and revegetated. Upon promulgation of new regulations replacing 30 CFR 817.101, the Secretary will afford the state an opportunity to amend its program, as appropriate to comply with the revised federal regulations. Until that time, the Secretary finds Utah's implementation acceptable based on his understanding that the stabilized fill will be compatible with the hydrology of the area, the approved past mining land use, aesthetics, and the need for fill at other locations.

The Secretary finds, however, that the state has not adequately addressed the concern in his initial decision that criteria be defined by the Division such that a carefully limited exception to highwall elimination is implemented consistent with SMCRA. The Secretary believes that environmental considerations, such as the following, that are applicable to Utah, should be specified in order to ensure approximate original contour is achieved and the environment is protected:

- The "reduced" highwall is not significantly greater in size or length than the cliffs in the surrounding area.
- The residual highwall is similar in structural composition to the preexisting cliffs in the surrounding area and is compatible with the visual attributes of the area.
- The residual highwall is compatible with the geomorphic processes of the area.

A condition of the Secretary's approval of the Utah program is the adoption by Utah of provisions that prescribe criteria that must be met before the Division will approve the "reduction" of highwalls rather than their elimination.

(c) In accordance with 30 CFR 732.15(b)(1), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Utah law and regulations, to implement, administer, and enforce all applicable requirements consistent with 30 CFR Chapter VII, Subchapter K. The Utah law and regulations on performance standards are consistent with SMCRA and those sections of 30 CFR Chapter VII, Subchapter K, except for the provisions discussed in 4(viii), (xv), (xx)(5), (xxix), (xxxi) below. Approval is based on the following findings or conditions of approval by the Secretary or representations made by Utah concerning the Utah law and regulations:

(i) On November 19, 1980, Utah adopted an amendment to the definition of "surface operations" in UMC/SMC 700.5. The amendment added to the definition the requirement for the "construction, use, maintenance and reclamation of roads". The Secretary finds that this change makes the state's definition consistent with the definition of "surface coal mining operations" in 30 CFR 701.5. Further, the Secretary finds that the state's adoption of an amendment on November 19, 1980, to the definition of "underground operations" in UMC/SMC 700.5, adding "the reclamation of shafts, adits, underground support facilities, in situ processing, underground mining, hauling, storage and blasting" to that term, makes the state definition consistent with the definition of "underground mining activities" in 30 CFR 701.5 which encompasses those activities.

(ii) Utah amended the definition of "coal exploration" in UMC/SMC 700.5 on November 19, 1980, to include the gathering of environmental data which would cause substantial disturbance to the earth's surface or subsurface. The Secretary finds Utah's definition to be consistent with and as stringent as the definition of "coal exploration" in 30 CFR 701.5 and that the state's definition provides Utah with the authority to guarantee the environmental protection standards of Sections 512 and 515 of SMCRA and Sections 40–10–8 UCA and 40–10–17 UCA of the Utah CMRA.

(iii) The Secretary finds that Utah's adoption of an amendment on August 20, 1980, to the definition of "topsoil" in UMC/SMC 700.5, deleting the phrase "and other materials as determined in accordance with UMC 817.22(e)/SMC 816.22(e)", makes that definition verbatim to the definition of "topsoil" in 30 CFR 701.5. With this modification, the Secretary finds that Utah's performance standards regulations for topsoil in UMC 817.22(e)/SMC 816.22(e) are internally consistent and met the requirements of 30 CFR 817/816.22(e).

(iv) Utah amended its definition of "coal" in UMC/SMC 700.5 on August 20, 1980, to include the reference to ASTM Standard D388.77, contained in the definition of "coal" in 30 CFR 701.5. The Secretary finds the state's definition of "coal" consistent with that of the federal regulations.

(v) On August 20, 1980, Utah amended its definitions of "head-of-hollow fill" and "valley fill" in UMC/SMC 701.5 to reflect verbatim the requirements of 30 CFR 701.5 for those definitions. Accordingly, the Secretary finds the Utah provisions consistent with those of the federal regulations.

(iv) The Secretary finds that Utah's August 20, 1980, amendment to the definition of "applicant" in UMC 701.5, changing the reference to "surface coal mining and reclamation activities" to "underground coal mining and reclamation activities," makes that definition consistent with the definition of "applicant" in 30 CFR 701.5.

(vii) The Secretary finds that the state's standards for topsoil storage as provided by an amendment to UMC 817.23(b)(1)(ii) and SMC 816.23(b)(1)(ii) adopted on August 20, 1980, are the same as the federal standards at 30 CFR 817/816.23(b)(1)(ii), and the Utah provisions are accordingly consistent with the federal requirements for topsoil storage.

(viii) 30 CFR 817.42(a)(3)(ii)(A) requires that "For drainage from areas affected by surface operations and facilities, an exemption (to the sedimentation pond requirements) may be authorized only if the disturbed surface area within the disturbed area is small and there is no mixture of surface drainage with a discharge from underground mine workings." The state, in UMC 817.42(a)(3)(ii), deletes this limiting language and therefore would allow exemptions to be granted which are prohibited by the federal rules. This is less stringent than the federal requirement. A condition of the Secretary's approval of the Utah program is the correction of this deficiency through adoption by Utah of a provision that would apply the sedimentation pond exemption in a manner consistent with the requirements of 30 CFR 817.42(a)(3).

(ix) 30 CFR 816.43(b) and 817.43(b) require that permanent diversions be constructed with "gently" sloping banks that are stabilized by revegetation. The state in its corresponding sections, SMC 816.43(b) and UMC 817.43(b), deletes the term "gently". As part of its December

23, 1980, resubmission, Utah explained that the state has limited precipitation and severe temperature extremes. As a result of these conditions, Utah considers any slope that is capable of substaining revegetation to be "gently" sloping. Further, Utah points out that its regulations require all permanent diversion banks to be stabilized by revegetation. Thus the state program requires that the banks of permanent diversions be sloped to be stable and to support vegetation. Based on these considerations, the Secretary finds that Utah's provisions for requiring the construction of diversions that are stable and compatible with the environment to be consistent with the requirements of 30 CFR 816/817.43(b), since "gentle slopes" serve no environmental or safety function given Utah's unique local conditions.

(x) On November 19, 1980, Utah amended its definition of "intermittent stream" in UMC/SMC 700.5 to mean "a stream or reach of a stream that is below the local water table for at least some part of the year, and that contributes to the stream and obtains its flow from both surface runoff and ground water discharge." Utah also amended UMC 817.44(a) and SMC 816.44(a) to include ephemeral streams with drainage areas greater than one square mile. The Secretary finds that these amendments make the Utah regulations consistent with and as stringent as the definition of "intermittent stream" in 30 CFR 701.5 and the stream channel diversion requirements of 30 CFR 816/817.44(a). This finding is based on the Secretary's understanding that the phrase "and that contributes to the stream" in UMC/SMC 700.5, refers the ground water associated with the local water table referred to in the definition of intermittent stream in 30 CFR 701.5.

(xi) On December 18, 1980, Utah amended its provisions for sedimentation control in UMC 817.45(a) and .46(a) and SMC 816.45(a) and .46(a) to be identical to the requirements of 30 CFR 817/816.45(a) and .46(a). Accordingly, the Secretary finds that these standards are consistent with those prescribed by the federal regulations.

(xii) 30 CFR 816.46(o) and 817.46(o) prescribe materials that may not be used as fill materials in sedimentation ponds. Federal regulations specifically prohibit the use of coal processing waste. The preamble to the Federal regulations explains the reason for the prohibition (44 FR 15166, March 13, 1979). The major problems cited are: (1) The difficulty in obtaining the required compaction needed to insure stability, (2) the potential for toxic drainage and (3) the potential for spontaneous combustion. Standards for using coal processing waste in dams and embankments are set forth in 30 CFR 817/816.91–.93. These standards prohibit the use of waste in dam construction, unless the waste is proven to be a suitable fill material in accordance with standard engineering practices. Utah has adopted provisions in UMC 817.46(o) and SMC 816.46(o) which allow the use of non-acid and non-toxic forming coal processing waste as a fill material in sedimentation pond embankments when the waste is determined to be of a quality suitable as a construction material for its intended use as demonstrated by standard engineering and chemical tests and the sedimentation pond dam or embankment is designed and constructed pursuant to UMC 817.91–.93 and SMC 816.91–.93. The Secretary believes that Utah has adequately addressed the concerns mentioned above which limited the use of coal processing waste in 30 CFR 816/817.46(o), and as such, the state's provisions provide protection of the environment equal to that guaranteed by the federal regulations. The Secretary's finding is based on his understanding that, in accordance with sound engineering practice, material which fails to exhibit the proper strength necessary to achieve stability will not be allowed in any dam construction.

(xiii) On August 20, 1980, Utah adopted amendments to UMC 817.49 and 816.49 that make those sections identical to the provisions of 30 CFR 817/816.49. Specifically, the state added the requirement in UMC 817.49(c) and SMC 816.49(c) that excavations that impound water have slopes not steeper than 2v:1h. In addition, in (o), the state incorporated the requirement that all dams and embankments be inspected by a "qualified registered professional engineer or someone under the supervision of a qualified registered professional engineer." The Secretary finds that these changes make the Utah regulations consistent with the federal regulations.

(xiv) The Secretary finds that Utah's verbatim adoption on August 20, 1980, of the requirements of 30 CFR 817/816.52(a)(1) for surface and ground water monitoring, in UMC 817.52(a)(1) and SMC 816.52(a)(1), makes the Utah regulations consistent with the federal regulations.

(xv) 30 CFR 816.53(c) provides that upon an approved transfer of a well, the transferor shall be secondarily liable for the transferee's obligations until release of the bond for the area in which the well is located. The state had omitted this provision from both its surface coal mining and underground operations in its initial submission. On August 20, 1980, the state adopted verbatim at SMC 816.53(c) the requirements of 30 CFR 816.53(c) regarding liability for a well on surface coal mining operations consistent with the federal regulations. However, the State of Utah did not adopt the parallel requirement of 30 CFR 817.53(c) in its underground regulation, UMC 817.53. The Secretary finds that this omission makes the state provision less stringent than the federal regulation.

Approval of the Utah program is conditional on the revision of the state program to be consistent with the federal regulation.

(xvi) On August 20, 1980, Utah amended UMC 817.57(a) and SMC 816.57(a), deleting the phrase "important to a downstream fishery". The Secretary finds that this revision to Utah's provision for the establishment of buffer zones for perennial and intermittent streams consistent with the requirements of 30 CFR 817/816.57(a). This finding is based on the Secretary's understanding that the phrase "and which contains a biological community" in the Utah regulations applies to both perennial and intermittent streams.

The Secretary also finds Utah's amendment to UMC 817.57(c) and SMC 816.57(c), which adopts, verbatim, the requirements of 30 CFR 817/816.57(c) for the determination of a biological community in a manner consistent with and as stringent as the federal regulations.

(xvii) Utah's amendments of August 20, 1980, to SMC 816.65 and UMC 817.65 make those sections the same as the federal requirement at 30 CFR 816/817.65. The amendments corrected several typographical errors in SMC 816.65 and UMC 817.65 and incorporated the following missing paragraphs of 30 CFR 817.65 in UMC 817.65: (i) Concerning maximum peak particle velocity, (j) concerning variance to maximum peak particle velocity and (l) concerning the maximum weight of explosives to be detonated. The Secretary finds that these state regulations are consistent with and as stringent as the federal regulations.

(xviii) The Secretary finds that Utah's adoption on August 20, 1980, of the requirement in 30 CFR 816.68(s)(2) that seismograph records contain the name of the person taking the seismograph reading, to make SMC 816.68(s)(2) consistent with the federal requirement.

(xix) On August 20, 1980, Utah amended UMC 817.93(a) and SMC 816.93(a) by adding the phrase "or intended to impound such waste" to those sections' standards for design and construction criteria for dams and embankments. The Secretary finds that this modification makes UMC 817.93(a) and SMC 816.93(a) identical to the requirements of 30 CFR 817/816.93(a) and, therefore, consistent with and as stringent as the federal provision.

(xx) On August 20, 1980, and November 19, 1980, Utah amended several provisions of UMC 817.71–.74 and SMC 816.71–.74. These sections prescribe procedures for the disposal of excess spoil. The amendments to these provisions and the Secretary's finding on each amendment is provided below:

(1)(a) SMC 816.71(f)/30 CFR 816.71(f)—Utah uses the term "fill material" in lieu of the term "spoil" used in the federal regulation in specifying the disposal requirements of the section. Both SMC 816.71 and 30 CFR 816.71 are entitled "Disposal of excess spoil: General requirements", and the use of the term "fill material" in the federal regulation is deemed by the Secretary to be equivalent to the state's use of the term "spoil" in SMC 816.71(a). Utah also modifed SMC 816.71(f) to specify that the "fill materials" (spoil) be covered "as necessary to establish revegetation. The Secretary understands this to be a clarification that excess spoil is not to be covered for the sake of covering but rather for the purpose of establishing vegetation to meet the revegetation requirements of the Utah regulations. The Secretary finds this clarification to be consistent with the requirements of 30 CFR 816.71(f) for protecting the environment from any adverse effects from the excess spoil disposal.

The Secretary finds that Utah's adoption on August 20, 1980, of an amendment to SMC 816.71(f) requiring that excess spoil fills be constructed to ensure a long term static safety factor of 1.5 makes the Utah regulation consistent with fill construction requirements of 30 CFR 816.71(f).

UMC 817.71(f)/30 CFR 817.71(f)—Utah amended its regulation on August 20, 1980, adopting the requirements of the federal regulation for requiring that excess spoil fills be constructed to ensure a long term static safety factor of 1.5. Utah also modified the section to clarify that the fill must be covered as necessary to meet revegetation and stability requirements. The federal regulation only requires that the fill be "covered" and does not specifically prescribe a standard. The Secretary finds that the Utah regulations are consistent with the federal regulations.

(1)(b) SMC 816.71(j) UMC 817.71(j)/30 CFR 816/817.71(k)—Utah has amended its provisions to explain specifically that while coal processing waste cannot be included in head-of-hollow and valley fills, it can be disposed of, in a prescribed manner in head-of-hollows or valleys. Utah requires that coal processing waste disposed in those areas be placed in a coal waste bank in accordance with SMC 816.85/UMC 817.85 or where there is the potential for the bank to impound water, disposed of in accordance with the dam or embankment standards of SMC 816.91–.93/UMC 817.91–.93. 30 CFR 816/817.71(g) and UMC 817.71(g)/SMC 816.716) prescribe that no permanent impoundments are to be allowed on the completed fill. As such, Utah addresses the potential for impoundment of water and also sets forth measures for insuring stability. The Secretary's approval of the Utah provisions is based on his understanding that the State's reference to the impoundment of water is provided to insure that in the event water is *temporarily* impounded, the stability of the disposed material will not be affected and that in no case is the disposed material intended to permanently impound water. The Secretary finds that Utah's provision is consistent with the federal regulations in ensuring protection of the environment.

(1)(c) SMC 816.72(a)/UMC 817.72(a)/30 CFR 816/817.72(a)—Utah amended SMC 816.72(a) and UMC 817.72(a) on August 20, 1980, adopting verbatim the requirements of 30 CFR 816/817.72(a) for prescribing that valley fills be designed to attain a long term static safety factor of 1.5. The Secretary finds that the Utah regulations at SMC 816.72(a)/UMC 817.72(a) are consistent with the federal regulations.

(1)(d) Utah amended UMC 817.74(b)(2) and SMC 816.74(b)(2) on August 20, 1980, adopting verbatim the requirements of 30 CFR 816/817.74(b)(2) for valley fill and head-of-hollow fill embankment factors of safety. Accordingly, the Secretary finds that these standards are consistent with those prescribed by the Federal regulations.

(2)(a) SMC 816.71(a)/30 CFR 816.71(a)—On August 20, 1980, Utah modified its regulation to specify that spoil not required to achieve approximate original contour within the area where overburden has been removed and "which is not used as backfill" shall be transported and placed in designated disposal areas. The Secretary understands Utah's addition of the phrase "which is not used as backfill" to mean that the spoil which is used as backfill will be graded to the approximate original contour (a.o.c.) and that any material not required to achieve a.o.c. will be disposed of in accordance with the requirements of the regulations. Accordingly, the Secretary finds that SMC 816.71(a) as amended on August 20, 1980, is consistent with and as stringent as 30 CFR 816.71(a).

Utah also amended this section on August 20, 1980, by deleting the provision that allowed the use of non-acid and non-toxic forming coal processing waste in excess spoil fills. The Secretary finds that this modification makes the Utah provision consistent with the Federal regulations.

(2)(b) UMC 817.71(a)/30 CFR 817.71(a)—Utah amended its regulation on November 19, 1980, by deleting the provision that allowed non-acid and non-toxic forming waste to be used in "excess spoil fills." The Secretary finds Utah's regulations for the disposal of underground development waste and spoil are consistent with the Federal regulations.

(2)(c) SMC 816.72(c)/UMC 817.72(c)/30 CFR 816/817.72(c); SMC 816.73/UMC 817.73/30 CFR 816/817.73—The Utah regulations were amended on August 20, 1980, by deleting the provision in those sections which allowed the use of non-acid and non-toxic forming coal processing waste in valley and head-of-hollow fills. The Secretary finds Utah's provisions for head-of-hollow valley fills consistent with the Federal regulations.

(3) On August 20, 1980, Utah adopted an amendment to UMC 817.71(g) and SMC 816.71(g) making those sections identical to the provisions of 30 CFR 816/817.71(g). Utah adopted the requirement that no depressions or impoundments are allowed on the completed fill. The Secretary finds that Utah's standards for final fill configuration are consistent with the Federal standards.

(4) Utah amended UMC 817.72(b) and SMC 816.72(b) on August 20, 1980, by adopting verbatim the requirements of 30 CFR 816/817.72(b) (2), (3) and (4) for valley fill underdrain construction. The Secretary finds that these modifications make the Utah provisions consistent with the Federal standards. Section 515(b)(22) of SMCRA and Section 40-10-17(2)(Z)UCA of the Utah CMRA prescribe the placement of "all excess spoil material resulting from coal surface mining and reclamation activities in such a manner that appropriate surface and internal drainage systems and diversion ditches are used so as to prevent soil erosion and movement." 30 CFR 816/817.72(b) and UMC 817.72(b)/SMC 816.72(b)

implement this statutory requirement. Utah has modified the Federal regulatory provision which always requires that a subdrain system be constructed for valley fills. Utah allows an exemption from this requirement when the operator can demonstrate, to the satisfaction of the Division, that the runoff, precipitation and ground water from springs or seeps will adequately drain from the fill such that the long term static safety factor of 1.5 will be maintained and the requirements for ensuring that the quality of the water drainage meets the standards of SMC 816.42 and UMC 817.42 and that acceptable quality will be maintained. By delineating these performance standards that must be met, the Secretary finds that Utah has set forth the conditions for identifying the "appropriate" or necessary subdrain systems for a valley fill which will meet the statutory mandate to prevent spoil erosion and movement. Further, the Secretary finds that Utah's provision for implementing the exception could provide appropriate criteria to ensure that the mass stability is maintained, mass movement is prevented, and contamination of drainage is avoided. However, the State presented no justification based on local conditions to support this variance from the requirements of 30 CFR Chapter VII, as required by 30 CFR 730.13. Accordingly, the Secretary conditions his approval on Utah amending its program to assure that the underdrain requirement is not waived in any instance except with the consent of the Director, after a demonstration that the waiver qualifies under the requirements for experimental practices found in Section 711 of SMCRA and 30 CFR 785.13. The Secretary expects OSM to approve a reasonable number of valley fills which can demonstrate eligibility for the waiver based on the criteria found in UMC 817.72(b)/SMC 816.72(b), to determine whether this approach should lead to a change in the Federal rule. Based on these findings, and subject to this condition, the Secretary considers the Utah regulation to provide environmental protection equal to that prescribed by the Federal regulations.

(5) SMC 816.72(c)/UMC 817.72(c)—30 CFR 816/817.72(c)—The Utah regulations allow the Division to authorize lifts greater than four feet for valley fills. The federal regulations allow lifts no greater than four feet in thickness or less, to achieve densities necessary to ensure mass stability, prevent mass movement, avoid contamination of fill drainage systems or the creation of voids. The Utah regulations are inconsistent with the federal regulations because they mandate less environmental protection in fill construction. Approval of the Utah program is conditioned on the revision of the Utah regulation to prescribe a lift thickness for valley fills consistent with the federal regulations.

(xxi) On August 20, 1980, Utah amended UMC 817.72 and SMC 816.72 deleting the provisions in those sections which allowed "non-acid and non-toxic coal processing waste" to be used in "valley fills." The Secretary finds that these amendments to the Utah regulations make the state's standards for defining "valley fill" materials consistent with and as stringent as the standards of 30 CFR 816/817.72.

(xxii) On August 20, 1980, Utah adopted an amendment to UMC 817.97(d)(10) and SMC 816.97(d)(10) which makes the state's requirements for the protection of fish, wildlife and related environmental values identical to the requirements of 30 CFR 817/816.97(d)(10). The Secretary finds the Utah provisions consistent with the federal provisions.

(xxiii) The Secretary finds that Utah's adoption on August 20, 1980, of an amendment to SMC 816.102(a)(2), making the state's provision identical to the requirement of 30 CFR 816.102(a)(2) for backfilling and grading performance standards, makes the Utah regulation consistent with the federal regulation.

(xxiv) Sections 30 CFR 816.103(a)(1) and 817.103(a)(1) require that all exposed coal seams remaining after mining and all acid-forming materials, toxic-forming materials, combustible materials or any other materials identified by the regulatory authority as exposed, used or produced during mining be covered with a minimum of 4 feet of the best available non-toxic and non-combustible material. The District Court for the District of Columbia remanded this provision to also allow the treatment of such materials in *In re: Permanent Surface Mining Regulation Litigation* Action No. 79–1144 (D.D.C., February 26, 1980, p. 17). Utah adopted an amendment on August 20, 1980, amending SMC 816.103(a)(1) and UMC 817.103(a)(1) to require that all debris, acid-forming materials, toxic materials, or materials constituting a fire hazard be treated or covered with a minimum of four feet of the best non-toxic and non-combustible material.

Based on the Secretary's decision, published in the October 24, 1980, **Federal Register** Notice (45 FR 47481–47510), Utah suspended, in accordance with the court order described above, SMC 816.103(a)(1) and UMC 817.103(a)(1) on December 18, 1980. The Secretary finds Utah's suspension consistent with the court order and will provide the state opportunity to revise its regulations once final federal regulations are promulgated for these sections.

(xxv) The Secretary finds that Utah's deletion on August 20, 1980, of the term "or reduce" in SMC 816.104(b)(1), makes the state's provision identical to the requirements of 30 CFR 816.104(b)(1), to "cover all acid-forming and toxic-forming materials." As such, the Utah standards for backfilling and grading are consistent with and as stringent as the federal standards. See **Federal Register** (45 FR 70488), October 24, 1980, Finding (c)(xxv).

(xxvi) On August 20, 1980, Utah adopted at SMC 816.105(b)(5) a provision identical to 30 CFR 816.105(b) for backfilling and grading thick overburden. The Secretary finds that the state's provision is consistent with and as stringent as the federal provision.

(xxvii) On August 20, 1980, Utah adopted at SMC 816.111(b)(1) a provision identical to 30 CFR 816.111(b)(1) regarding general revegetation standards. The Utah regulation is consistent with the federal regulation, Section 515(b)(19) of SMCRA and Section 40–10–17(2)(s) UCA of the Utah CMRA.

(xxviii) On August 20, 1980, Utah adopted an amendment to UMC 817.116(b)(1) and SMC 817.116(b)(1) making the state's standards for revegetation success identical to the federal standards in 30 CFR 817/816.116(b)(1). The Secretary finds the state regulation consistent with the comparable federal provision.

(xxix) On August 20, 1980, Utah amended UMC 817.124(b), (b) (1) and (3). Utah deleted the provision in (b) that allowed an operator to comply with the requirements of the section for surface land and structure protection "at his option". Utah added a provision to (b)(1) however, that requires the operator to restore, rehabilitate, or remove and replace materially damaged structures, features or values only "to the extent technologically and economically feasible." This limitation on the liability of the operator is inconsistent with the purpose of 30 CFR 817.124 which was to provide surface owner protection from the potential adverse effects of subsidence. By allowing an operator to "restore * * *" only to the extent "technologically and economically feasible", Utah fails to ensure the protection of the surface and compensation for the surface owner to the extent guaranteed by the federal regulations. For example, 30 CFR 817.124(b)(2) requires that a damaged

structure or feature be purchased for its pre-subsidence fair market value. Subsection 3 of that same section requires that the owner be compensated in the full amount of the decrease in value resulting from subsidence. Hence, under the federal regulations the surface owner is guaranteed that the value of his or her property interest will not diminish as a result of underground mining activities.

The federal regulations at 30 CFR 817.124(b)(3) require by contrast the purchase of a "noncancellable premium prepaid insurance policy". The Utah provisions at UMC 817.124(b)(3) allows the purchase of a "noncancellable renewable premium prepaid policy". The Secretary does not understand Utah's intent in providing for a policy that is both "noncancellable and renewable". If the policy is truly renewable then there is the possibility that it could expire thereby depriving the surface owner of the protection guaranteed by the federal rules. The Utah provision for renewable policies is less stringent than the federal provision to the extent that it allows a policy to be cancelled or expire. As a condition of the Secretary's approval of the Utah program is the revision of UMC 817.124 to guarantee surface owner protection equal to that prescribed by 30 CFR 817.124.

(xxx) On August 20, 1980, Utah amended UMC 817.126 (a) and (c), deleting the provision that limited the prohibition against conducting underground operations in certain areas to those operations "which will cause subsidence." The Secretary finds that this amendment makes UMC 817.126 (a) and (c) consistent with and as stringent as the requirements of 30 CFR 817.126 (a) and (c) for the establishment of buffer zones to protect areas from potential subsidence damage.

(xxxi) On November 18, 1980, Utah adopted UMC 817.101(c). In its December 23, 1980, resubmission, Utah explained that this provision is intended to parallel the requirements of 30 CFR 826.12(a) for preventing the placement of spoil, waste materials, debris and abandoned equipment on the downslope on steep slopes. UMC 817.101(c)(1) does not prescribe that spoil will not be placed on the downslope and further allows the placement of waste material, including waste mineral matter on the downslope if it is demonstrated to be "non-acid and non-toxic forming and to be compatible with the stability of the slope." The Secretary finds that this provision is inconsistent with and less stringent than the 30 CFR 826.12(a) because it would allow the dumping of materials on the downslope specifically prohibited, except under certain conditions, by the federal regulations. A condition of the Secretary's approval of the Utah program is the revision of the Utah regulation to ensure that materials are placed on the downslope in steep slope areas in a manner that provides protection of the environment equal to that provided by 30 CFR 826.12(a).

(xxxii) The federal regulation at 30 CFR 828.11(b)(3) requires that in situ processing activities be planned and conducted to minimize disturbance to the hydrologic balance by avoiding annular injections between the wall of the drill hole and the casings. On August 20, 1980, Utah adopted verbatim, at UMC/SMC 828.11(b)(3) the federal regulation. Accordingly, the Secretary finds that it is consistent with the federal regulations.

(xxxiii) On August 20, 1980, Utah amended SMC 816.97(d)(2), to include the construction of "overpasses and construct the necessary passages." The Secretary finds that this regulation is consistent with the federal amendment on June 5, 1980, (45 FR 37818) to 30 CFR 816.97(d)(2) which added the same requirement.

(xxxiv) On November 19, 1980, Utah amended its definition of "aquifer" in UMC/SMC 700.5, to be identical to the definition of that term at 30 CFR 701.5. By this action, the state is deleting its reference to the "quality" of the water as a criterion in defining a water supply as an aquifer. The Secretary finds the state's definition of aquifer to be consistent with the definition at 30 CFR 701.5.

(d) In accordance with 30 CFR 732.15(b)(2), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Utah law and regulations, and the Utah program includes provisions to implement, administer and enforce a permit system and prohibit surface coal mining and reclamation operations without a permit issued by the regulatory authority consistent with those sections of 30 CFR Chapter VII, Subchapter G that are not affected by the district court decision. Approval is based on the following findings or conditions of approval by the Secretary or representations made by Utah concerning the Utah law and regulations:

(i) On August 2, 1908, Utah amended SMC 779.19(a), to require that the permit application vegetation map include plant communities within any proposed reference area. The Secretary finds that Utah's amended rule is identical to and consistent with 30 CFR 779.19(a).

(ii) On August 20, 1980, Utah amended UMC 784.20(b)(3)(v) to eliminate the provision that had allowed the state to require subsidence monitoring in "only those areas that may be affected by subsidence if it occurred." The state further modified the section to provide that monitoring, if any, would not be imposed as a control measure in "those instances where the mining technology requires planned subsidence in a predictable and controlled manner: provided, that nothing in this subsection shall be construed to prohibit the standard methods of mining." The state's added provision is inconsistent with 30 CFR 784.20(b)(3)(v) insofar as it limits the state's discretion to require monitoring when the site conditions warrant monitoring. If the operator has represented that subsistence will be controlled and predictable, the regulatory authority must be in a position to verify this through monitoring. Approval of the Utah program is conditioned upon the state revising its regulation to be consistent with and as stringent as the federal provision for subsidence monitoring.

(iii) The Secretary finds that Utah's amendment to UMC/SMC 785.19(c)(1), adopted on August 20, 1980, which changes the phrase "*lack* of an alluvial valley floor" to "presence of an alluvial valley floor" makes the Utah provisions consistent with the federal rquirements for an alluvial valley floor determinations as set out at 30 CFR 785.19(c)(1).

(iv) On December 18, 1980, Utah adopted an amendment to UMC/SMC 785.19(c) deleting the provision which had allowed a waiver of the requirements of subsections (d) and (e) of that section (UMC/SMC 785.19) where the Division determined that the proposed surface operation would not adversely affect an alluvial valley floor. The state also adopted an amendment to subsection (d), to prescribe that the requirement that surveys and baseline data be "adapted to site-specific conditions and the degree of proposed disturbance." The Secretary finds that this phrase further clarifies the state's intent to parallel federal procedures in the determination and protection of alluvial valley floors as delineated in 30 CFR 785.13 (c)(1) and (d)(1). The Secretary finds that the adoption of these changes render Utah's regulations consistent with 30 CFR 785.19 (c) and (d).

(v) On December 18, 1980, Utah adopted an amendment to UMC/SMC 786.19(h), to require that all reclamation fees required by Subchapter R of CFR Chapter VII, be paid before a permit is issued. The Secretary finds that the adoption of this change makes Utah's

provisions consistent with the provisions of 30 CFR 786.19(h) that require payment of all reclamation fees before a permit application can be approved.

(vi) On August 20, 1980, Utah amended UMC/SMC 788.12 (a)(1)(i) by adding *surface or subsurface* before the words "area disturbed * * *". This amendment makes clear that an increase in an area disturbed encompasses the area both above and below ground. The state has also deleted section (iv) which allowed the Division to decide on a site-by-site basis, "reasonable" permit revisions. The Secretary finds that these changes make Utah's provisions consistent with the requirements of 30 CFR 788.12(a) for determining what changes constitute significant departures from the approved method of mining under the original permit and, therefore, require a permit revision.

(vii) Utah's amendment to UMC/SMC 788.18(b)(2), adopted on August 20, 1980, replaces the phrase "the time required by the regulations of the particular regulatory program" with "30 days from the date of publication as required in (b)(1) above." The Secretary finds that this change meets the federal requirements under 30 CFR 788.18(b)(2) for prescribing the time in which written comments may be submitted concerning requests for permit transfers, assignment or sale of permit rights.

(e) In accordance with 30 CFR 732.15(b)(3), the Secretary finds that Section 40–10–8 and 40–10–17 UCA of the Utah CRMA and the Utah regulations under UMC/SMC 776 and UMC/SMC 815, provide Utah with the authority to regulate coal exploration consistent with Sections 512 and 515 of SMCRA and to 30 CFR Parts 776 and 815 and to prohibit exploration that does not comply with 30 CFR Parts 776 and 815.

(f) In accordance with 30 CFR 732.15(b)(4), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Section 40–10–5 UCA of the Utah CMRA and the Utah regulations, UMC/SMC 707, and the Utah program includes provisions to require that persons extracting coal incidental to government-financed construction maintain information on-site consistent with Section 528 of SMCRA and with 30 CFR Part 707.

(g) In accordance with 30 CFR 732.15(b)(5), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Section 40–10–19 UCA of the Utah CRMA and the Utah program includes in UMC/SMC 840 of the regulations, provisions for entry, inspection and monitoring of all coal exploration and surface coal mining and reclamation operations on non-Indian and non-federal lands within Utah consistent with the requirements of Section 517 of SMCRA and Subchapter L of 30 CFR Chapter VII.

(h) The Utah Division of Oil, Gas and Conservation has the authority under Utah laws and the Utah program includes provisions for the implementation, administration and enforcement of a system of performance bonds and liability insurance, or other equivalent guarantees, consistent with 30 CFR Chapter VII, Subchapter J. The performance bond and liability insurance provisions of Sections 507(f), 509, 510 and 519 of SMCRA and 30 CFR Chapter VII, Subchapter J are incorporated in Sections 40–10–10(6) UCA, 40–10–15 UCA and 40–10–16 UCA of the Utah CMRA and in Parts 800–808 of the Utah regulations. Portions of the federal bonding regulations were proposed for amendment on January 24, 1980 (45 FR 6028–6042) and final regulations were published on August 6, 1980, (45 FR 52306–52324). Utah has incorporated those changes into its regulations and submitted those changes as part of its resubmission. The Secretary's finding on those changes in the Utah regulations is in finding 4(h)(iii). Approval is based on the following findings, or conditions of approval by the Secretary or representation made by Utah concerning the Utah law and regulations:

(i) the Secretary finds that Utah's verbatim adoption in UMC/SMC 800.5 of the definition of "current assets" contained in 30 CFR 800.5 makes the Utah regulation consistent with the federal regulation.

(ii) Utah has amended UMC/SMC 805.13(b), deleting the provision which allowed an exemption from the revegetation liability period standards. The Secretary finds that with this amendment, UMC/SMC 805.13(b) are identical to 30 CFR 805.13(b) and that the Utah standards are consistent with and as stringent as the federal standards.

(iii) Portions of the following federal bonding regulations were proposed for amendment on January 24, 1980 (45 FR 6028–6042); 30 CFR 800.5, 800.11(b)(1), 800.13, Part 801, 805.13, 805.14, 806.11, 806.12, 806.13, 806.14, 806.17, 807.12, 808.11, 808.12, and 806.13(a). Final federal regulations on these bonding sections were published on August 6, 1980, (45 FR 62306–62324). Utah has adopted these final provisions, verbatim, in its bonding regulations set forth in UMC/SMC Parts 800–808. In addition, Utah has deleted its definition of "accumulating fund bond" contained in UMC/SMC 800.5. The Secretary finds Utah bonding provisions consistent with the federal bonding regulations promulgated on August 6, 1980.

(iv) Utah amended UMC/SMC 806.12 (e)(2) and (e)(3) to delete the references in those sections to the "state law" for the establishment of bonding standards, because in Utah, no state law exists that is applicable to those provisions. Utah incorporated the analogous federal provisions of 30 CFR 806.12(e) (2) and (3) in UMC/SMC 806.12(e) (2) and (3). The Secretary accordingly finds that Utah's regulations for the establishment of a maximum single obligation for a company beyond which a surety is restrained from bonding, is consistent with the 30 CFR 806.12(e) (2) and (3).

Utah also amended UMC/SMC 806.12(g) by deleting subsection (g)(6). That subsection provided that the Division could require in the indemnity agreement that the amount of the letter of credit be confessed to judgment upon forfeiture, such a procedure was authorized by state law. Utah does not have an applicable law so the subsection is not applicable. The Secretary finds these changes of the state's regulations to be consistent with the bonding provisions of the federal regulations.

(v) On August 20, 1980, Utah amended SMC/UMC 807.11(h) to provide an objector the right to request that a bond release hearing be held, at the option of the objector, in the town or city nearest the permit area or in Salt Lake City, Utah. The Secretary finds that Utah's provisions for conducting the bond release hearing are consistent with the requirements of 30 CFR 807.11(h).

(i) In accordance with 30 CFR 732.15(b)(7), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Sections 40–10–21 and 22 UCA of the Utah CMRA and UMC/SMC 845 of the Utah regulations to provide for civil and criminal sanctions for violations of Utah law, regulations and conditions of permits and exploration approvals, including civil and criminal penalties, in accordance with Section 518 of SMCRA (30 U.S.C. 1268) and consistent with 30 CFR Part 845. Approval is based on the following findings by the Secretary or representations made by Utah concerning the Utah laws and regulations:

(i) Utah's amendment to UMC/SMC 845.20(c), which was adopted on November 19, 1980, added the phrase "or at the prevailing Department of the Treasury rate, whichever is greater." The Secretary finds that this change makes the State's regulation consistent with 30 CFR 845.20(c).

(ii) The Secretary finds that Utah's regulations, UMC/SMC 845.17(c), provides for a formal hearing on the fact of the violation or amount of penalty as required by 30 CFR 845.19(b) and the Utah provision is therefore consistent with its federal counterpart.

(iii) The Secretary finds that Utah's provisions for administrative adjudication of proposed civil penalties under Section 40–10–20 UCA and UMC/SMC 845 are consistent with the federal requirements. Under OSM's assessment conference procedure, 30 CFR 845.18, no more than 150 days will elapse between the initial proposal of a penalty and the conclusion of the first level of administrative review. At that time an operator wishing further review must request a formal adjudicatory hearing and place the full amount of the proposed penalty in escrow. Utah omits an assessment conference in favor of an administrative hearing as the first level of review. The Secretary believes that since Utah's hearing is sequentially similar to OSM's assessment conference, that the escrow requirement can be deferred to the second level of review as it is under federal procedure. Utah's second level of review is judicial review. The Utah statute provides that upon the filing of a petition for a hearing—"the hearing shall be held without undue delay" Section 40–8–8–(1) UCA. Utah has amended regulation, UMC/SMC 845.17(c), to further provide that upon a request for a formal hearing "(the order) will be set for hearing before the Board within 30 days of date of receipt of such request." Further, in a Utah Attorney General opinion submitted on December 23, as part of the Utah resubmission, the state presented that the hearing will be set and take place within 30 days of the request for the hearing. The Board is required to enter its order within sixty days after the hearing. The Secretary bases his approval of Utah's provisions for adjudication of civil penalties upon the understanding that the Board of Oil, Gas, & Mining will proceed in an expedient manner to hold a hearing and that the entire procedure before which payment of the proposed assessment into escrow is required, will not exceed 150 days.

(j) In accordance with 30 CFR 732.15(b)(8), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Section 40–10–22 UCA of the Utah CMRA and Sections 840 through 845 of the Utah regulations contain provisions to issue, modify, terminate and enforce notices of violation, cessation orders and show cause orders in accordance with Section 521 of SMCRA (30 U.S.C. 1271) and with 30 CFR Chapter VII, Subchapter L.

(k) In accordance with 30 CFR 732.15(b)(9), the Secretary finds that the Utah Division of Oil, Gas and Mining has authority under Section 40–10–24 UCA of the Utah CMRA and Sections UMC/SMC 760, 761, 762 and 764 of the Utah regulations, and the Utah program contains provisions for the designation of areas as unsuitable for surface coal mining consistent with 30 CFR Chapter VII, Subchapter F. Approval is based on the following findings by the Secretary or representations made by Utah concerning the Utah laws and regulations:

(i) On August 20, 1980, Utah amended UMC 761.11(a)(3) and SMC 761.11(c) to restrict mining on any lands that will "adversely affect" any public park or any place included on the National Register of Historic Places. The Secretary finds that this change makes the state's regulations consistent with the requirements of 30 CFR 761.11(c) and Section 522(e) of SMCRA for the protection of such lands.

(ii) Section 522(e)(5) of SMCRA and the regulations at 30 CFR 761.11(e) provide that no "surface coal mining operations" may be conducted within 300 feet measured horizontally from any occupied dwelling unless a written waiver is obtained from the owner of the dwelling. "Surface coal mining operations" includes surface mining and the surface effects of underground mining. Section 40–10–24(4)(d) UCA, of the Utah CMRA mirrors the mandate of SMCRA. On December 18, 1980, Utah amended UMC 761.11(b)(1), to require that the restriction apply to "underground mining and reclamation activities". With this change, protection of surface lands equal to that prescribed by 30 CFR 761.11(b)(1) is guaranteed by the Utah underground regulations. The Secretary finds Utah's provision consistent with and as stringent as the federal regulation.

(iii) Utah has amended the definition of "area" in UMC/SMC 762.5 to mean "a geographic unit defined by a legal subdivision (i.e., township, range, and section number)." The term "area" is not defined in the federal regulations. In its July 24, 1980, submission, Utah stated that it was defining the term "area" to clarify the location which the petition seeks to designate or un-designate as suitable for mining. Utah is a public lands state. As such the land has been surveyed and defined by township, range and section numbers. The state noted that this information is readily available from a U.S. Geological Survey topographic map or the county records office. Based on his understanding that the definition of the term "area" is only for clarifying purposes, and will not inhibit the designation process, the Secretary finds Utah's definition acceptable.

(iv) Utah has amended UMC/SMC 764.13 such that only the information required by 30 CFR 764.13 is required in a petition under the Utah program. However, the state also requests additional information, with the proviso that the petitioner may provide the information if it is available, but failure to provide the information will not jeopardize the review of the petition or constitute a reason for rejection of the petition. (See 45 FR 70493, Findings 4(k)(iv)) Utah states that it does not intend these discretionary items to be a burden to the petitioner and will clearly set forth in its Petition Assistance Package, as it has in the regulations, that the lack of information on those items will not adversely affect the review of the petition.

In addition, the State's promulgated regulations in UMC/SMC 764.13(b)(2) require a legal description of the area covered by the petition rather than the Federal requirement of the location and size. On November 18, 1980, the state amended this section to indicate that "legal description" means "township, range and section number." The Secretary finds that these changes make the Utah regulations consistent with the federal regulations. Further, Utah's regulations do not impose a burden on the petitioner because the state has made it clear that the additional information will not adversely affect the review of the petition.

(v) The Secretary finds that Utah's amendment to UMC/SMC 764.15(b)(2), deleting its reference to a state register for a petition completeness notice is consistent with 30 CFR 764.15(b)(2). There is no state register in Utah.

(vi) Utah has amended UMC/SMC 764.17(a) to require the Board to hold a public hearing on a petition in Salt Lake City, Utah, or, at the written request of any interested person, to appoint a hearing examiner for the purpose of taking evidence at a public hearing in the locality of the area covered by a petition and to recommend findings of fact and conclusions of law for ultimate disposition by the Board. The hearing will be legislative and fact finding in nature, without cross-examination of witnesses. The Secretary finds that Utah's provisions for conducting a petition hearing are consistent with the requirement of 30 CFR 764.17(a) for providing for a hearing in the locality of the petition area and the procedures to be followed in the course of the hearing.

(1) In accordance with 30 CFR 732.15(b)(10), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under the Utah Rules of Practice and Procedure, Utah laws and regulations and the Utah program to provide for public participation in the development, revision and enforcement of Utah regulations and program, consistent with the public participation requirements of SMCRA and 30 CFR Chapter VII. The Secretary finds that the public has had a meaningful opportunity to participate in the development of the state program submitted to OSM based on the information in the administrative record and the public hearings held in Salt Lake City, Utah on the adoption of regulations pursuant to the Utah (CMRA) and the Utah Rules of Practice and Procedure (June 26–27, 1979; July 26–27, 1979; August 23, 1979; January 9–10, 1980; January 24, 1980; February 14, 1980; August 20, 1980; November 19, 1980 and December 18, 1980). Further, the State on December 1, 1980 provided a summary of the proposed and adopted amendments to their regulations for public review and comment. Approval is based on the following findings by the Secretary or representations made by Utah concerning its laws and regulations:

(i) Utah's amendment to UMC/SMC 771.21(b)(1), adopted on November 19, 1980, provides a three month time limit for the acceptance of a complete permit application. The Secretary finds that Utah's time frame allows sufficient opportunity for review by the Division and the public, and is consistent with the intent of 30 CFR 771.21(b)(1). In addition, on December 18, 1980, Utah adopted an amendment to UMC 771.21(b)(1) changing "surface" to "underground" coal mining and reclamation activities. The Secretary finds that the adoption of this change to UMC 771.21(b)(1) makes the Utah underground regulation consistent with the federal regulations.

(ii) Utah's amendment to UMC/SMC 786.14, which was adopted on November 19, 1980, parallels the federal regulations by including the word "informal" before "conference" whenever referring to conferences on proposed permit applications in sections (a)(1), (a)(2), (b), (b)(2), (b)(3), (b)(4), (c), and (d). The state also deleted in section (b)(4) "Section 5 of the Administrative Procedures Act as amended (5 U.S.C. 544)" and inserted "the Board's Rules of Practice and Procedure." Utah's amended regulation 900(b)(ix) adopting the Board's Rules of Practice and Procedures contains amendments necessary to meet the requirements of 43 CFR 4 and the federal Administrative Procedure Act, 5 U.S.C. 551 et seq. The Secretary finds that Utah's changes are consistent with the requirements of 30 CFR 786.14 for prescribing procedures for requesting and conducting informal hearings on proposed permit applications.

(iii) Utah's amendment to UMC/SMC 700.14(b) which was adopted on August 20, 1980, deletes the provision referring to requests for records and documents under the federal provision 43 CFR Part 2 and the Freedom of Information Act. The Secretary finds Utah's policy of providing records and documents directly from the Division of Oil, Gas and Mining consistent with 30 CFR 700.14(b).

(iv) Utah's amendment to Rule B–1 of the Board's Rules of Practice and Procedure, which was adopted on August 20, 1980, defines "interested person" as "*any* person with an interest which is or may be adversely affected to bring action before the Board." UCA 63–46–8 provides that "an interested person may petition an agency requesting the promulgation, amendment or repeal of a rule" and UCA 40–6–3.3 further provides that "any person or the attorney general on behalf of the state may apply for a hearing before the board . . ." It therefore follows that if any person may petition the board for a hearing that any person may at that hearing also petition for a rule change. This interpretation was confirmed in a telephone conversation between a representative of OSM and the Utah Attorney General (See Administrative Record No. 183). Accordingly, the Secretary finds Utah's provisions under UMC/SMC 700.12 consistent with the intent to provide for public participation in the administration of the state program as found under 30 CFR 700.12.

(m) In accordance with 30 CFR 732.15(b)(11), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Utah law and the Utah program includes provisions to monitor, review, and enforce the prohibition against indirect or direct financial interests in coal mining operations by employees of the Utah Division of Oil, Gas and Mining consistent with 30 CFR Part 705.

These provisions are incorporated in UMC/SMC 705 of the Utah regulations. Approval is based on the following findings by the Secretary or representations made by Utah concerning the Utah laws and regulations:

(i) The Secretary finds that Utah's August 20, 1980, amendment to UMC/SMC 705.6 (a) and (b), which changes the state's reference to "30 CFR Part 705" to "Section 40–10–7 UCA of the Utah CMRA," makes the state provision consistent with the reference in 30 CFR 705.6(a) to Section 517(g) of SMCRA. 30 CFR 705.6 provides that any employee who fails to file a financial interest statement is in violation of SMCRA and is subject to removal.

(ii) The Secretary finds that Utah's adoption of the provisions of 30 CFR 705.21 (a) and (b) in UMC/SMC 705.21 (a) and (b) makes the state's procedures for employee and Division Director's appeals during the review of conflict of interest charges consistent with the federal requirements.

(n) In accordance with 30 CFR 732.15(b)(12), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Utah law to require the training, examination and certification of persons engaged in or responsible for blasting and the use of explosives in accordance with Section 719 of SMCRA. Utah currently has no regulations on the training, examination and certification of persons engaged in blasting because 30 CFR 732.15(b)(12) does not require a state to implement regulations governing such training, examination and certification until six months after federal regulations for these provisions have been promulgated.

On December 12, 1980, OSM published partial final rules establishing minimal requirements for training and certifying persons involved in blasting in surface coal mining operations (45 FR 82034–82100). These regulations are codified at 30 CFR Chapter VII, Subchapter M, Part 850. Subchapter M is now final and complete with the exception of four subsections concerning qualification requirements and experience requirements. These subsections will be reproposed and subject to public comment prior to their final promulgation. Once the complete Subchapter M is finally promulgated, Utah will have an additional six months to prepare and submit to OSM regulations consistent with the federal regulations.

(o) In accordance with 30 CFR 732.15(b)(13), the Secretary finds that the Utah Division of Oil, Gas, and Mining has the authority under Section 40–10–10 UCA of the Utah CRMA and UMC/SMC 795 of the regulations except as discussed in finding 4(o)(i) to provide for a small operator assistance program. Approval is based on the following findings or conditions of approval by the Secretary or representations made by Utah concerning the Utah laws and regulations:

(i) The Secretary finds that Utah's deletion, in UMC/SMC 795.3, of the

provision that limits the Small Operators Assistance Program (SOAP) to the receipt of funding "from the Office of Surface Mining specifically for SOAP," makes the state provision consistent with 30 CFR 795.3. A condition of the Secretary's approval of the Utah program is the deletion of the same phrase from Section 40–10–10(3) UCA of the Utah CMRA or other equivalent program revision so that the state statute will be consistent with the requirements of Section 705(c) of SMCRA for prescribing a Small Operators Assistance Program.

(ii) Utah has amended the definition of "probable hydrologic consequences" in UMC 795.5 to mean the "projected result of proposed underground coal mining and reclamation activities * * *." Utah also amended SMC 795.5 to include "reclamation" in the definition of "probable hydrologic consequences" for surface coal mining activities. The Secretary finds that these changes make the state's definition of "probable hydrologic consequences" consistent with the federal definition in 30 CFR 795.5.

(iii) Utah has amended UMC/SMC 795.14(f)(2) to provide for OSM right of entry to inspect lands to be mined or adjacent lands which may be affected in order to collect environmental data or to install necessary monitoring instruments on such lands as prescribed by 30 CFR 795.14(f)(2). The Secretary finds Utah's regulations consistent with the federal regulations which ensure this right of entry.

(p) In accordance with 30 CFR 732.15(b)(14), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Utah law and the Utah program contains provisions to provide for protection of employees of the Utah Division of Oil, Gas and Mining in accordance with the protection afforded federal employees under Section 704 of SMCRA. UMC/SMC 865 contains the provisions for protection of employees of the Utah Division of Oil, Gas and Mining.

(q) In accordance with 30 CFR 732.15(b)(15), the Secretary finds that the Utah Division of Oil, Gas and Mining has the authority under Section 40–10–22 UCA of the Utah CMRA and UMC/SMC 840, 842, 843 and 845 of the Utah regulations to provide for administrative and judicial review of state program actions in accordance with Sections 525 of SMCRA and 30 CFR Chapter VII, Subchapter L. Approval is based on the following findings or representations made by Utah concerning the Utah laws and regulations:

(i) Utah's amendment to UMC/SMC 840.15, which was adopted on August 20, 1980, deletes the reference to 30 CFR 842, 843, 845 and 43 CFR 4, and references UMC/SMC Part 842, 843, 845; the Board's Rules of Practice and Procedure; and Part 900(b)(ix). The Secretary finds that the state's amended regulations, UMC/SMC 900(b)(ix), which adopt the Board's Rules of Practice and Procedure contain amendments to Rule B–15 meet the federal requirements for discovery, intervention and award of attorney fees. He therefore finds that Utah's provisions are consistent with 43 CFR Part 4.

(ii) Utah's amendment to UMC/SMC 845.20(a), which was adopted on November 19, 1980, corrected a typographical error by adding a new section (a) that makes the state's provision identical to 30 CFR 845.20(a). The Secretary finds that Utah's regulations are consistent with and as stringent as the federal requirement which prescribes that if a person issued a proposed penalty fails to request a hearing, the proposed penalty is due and payable.

(iii) The Secretary finds that Utah's amendment to UMC 700.13 which was adopted on November 19, 1980, includes the term "underground coal mining and reclamation activities", and encompasses complaints on underground as well as surface mining activities, making the State's provisions consistent with 30 CFR 700.13(b).

(iv) On August 20, 1980, Utah amended UMC/SMC 840.15 by deleting the reference to federal regulations 30 CFR Parts 842, 843, 845 and 43 CFR Part 4, and referencing state provisions Part 842, 843, 845, the Board's Rules of Practice and Procedure; and Part 900(b)(ix). The Secretary finds that these changes make the state provisions for public participation valid and workable.

(v) Utah amended UMC/SMC 843.13(d), on November 19, 1980, to prescribe procedures for notice of the Board's order to show cause that are consistent with 30 CFR 843.13 (c) and (d). The Secretary finds that the State's procedures are as stringent as their federal counterpart in that the Board Rules of Practice and Procedure require publication in a newspaper of general circulation, and a statement of the procedure for intervention (Rule B2). Further, the state has amended UMC/SMC 843.13(d) on August 20, 1980 to provide 30 days written notice of the date, time and place of the hearing to the permittee, Division and any intervenor.

(vi) Utah's amendment to UMC/SMC 843.13(e), which was adopted on November 19, 1980, requires that a permittee immediately cease mining and fulfill certain other obligations after the Board determines that a pattern of violations exists. The Secretary finds that the State's amendment is verbatim to and consistent with 30 CFR 843.13(e).

(vii) The Secretary finds that Utah's amendment to UMC/SMC 843.14 which was adopted on November 19, 1980 is identical to 30 CFR 843.14 (a), (b), and (c). The State's omission of section (d), requiring the Division to make available copies of notices and orders is not significant since this requirement falls within UMC/SMC 700.14(b) (see finding 4(1)(iii)).

(viii) The Secretary finds that Utah's amendment to UMC/SMC 843.16, which was adopted on November 19, 1980, requires the Board to issue a decision within 30 days of receipt of a petition for the review of a cessation order, consistent with 30 CFR 843.16 and Section 525(b) of SMCRA.

(ix) Utah's amendment to UMC/SMC 700.5, which was adopted on August 20, 1980, provides that the state regulatory authority is the "Board and Division", as that term is used in the definition of "person having an interest which is or may be adversely affected or person with a valid interest * * *." The Secretary finds that Utah's provisions are consistent with 30 CFR 700.5.

(r) In accordance with 30 CFR 732.15(b)(16), the Secretary finds that the Utah Division of Oil, Gas and Mining has authority under Utah law and regulations, and the Utah program contains provisions to cooperate and coordinate with and provide documents and other information to the Office of Surface Mining under the provisions of 30 CFR Chapter VII.

(s) In accordance with 30 CFR 732.15(c), the Secretary finds that the Utah (CMRA) and regulations adopted thereunder and the other laws and regulations of Utah do not contain provisions that would interfere with or preclude implementation of the provisions of SMCRA and 30 CFR Chapter VII.

(t) The Division of Oil, Gas and Mining and other agencies having a role in the program have sufficient legal, technical, and administrative personnel and sufficient funding to implement, administer and enforce the provisions of the program, the requirement of 30 CFR 732.15(b), and other applicable state and federal laws.

The Secretary undertook an analysis of the proposed Utah staffing plan to assess Utah's ability to properly carry out inspection and enforcement activities and permitting functions as required by the Act. Based on this analysis, the Secretary found in his decision in the October 24, 1980, Federal Register Notice (45 FR 70481–70510), that

Utah needed additional staff. Utah indicated on December 15, 1980 in a discussion with OSM (Administrative Record No. 187), that it has requested funding from its legislature for three fulltime equivalents (FTEs) for inspection and enforcement and one FTE for permit review and administration. Utah expects these additional staff within six months of the Secretary's final decision. As such, Utah will have adequate staff to support its programs on non-federal and non-Indian programs within the initial eight month permit review requirement mandated by Section 506 of SMCRA.

In addition, Utah submitted to OSM for review, a proposed cooperative agreement, which, if entered into by the Secretary, would require necessary inspection and enforcement and permitting staff to carry out the program activities on mines which invoke federal lands. The adequacy of the Utah staffing and funding plan to undertake activities on federal lands will be examined during the review of the proposed cooperative agreement.

Secretary's Decision Background on Conditional Approval

The Secretary is fully committed to two key aims which underlie SMCRA. The Act calls for comprehensive regulation of the effects of surface coal mining on the environment and public health and safety and for the Secretary to assist the states in becoming the primary regulators under the Act. To enable the states to achieve that primacy, the Secretary has undertaken many activities of which several are particularly noteworthy.

The Secretary has worked closely with the Division of Oil, Gas and Mining, and the Utah Oil, Gas and Mining Board. OSM has frequently met with state regulatory authority personnel to discuss informally how the Act should be administered, with particular reference to unique circumstances in individual states. Often these meetings have been a way for OSM to explain portions of the federal requirements and how the state might meet them. Alternative state regulatory options, the "state window" concept, for example, were discussed at several meetings with the Division and Board.

The Secretary has dispensed over $6.9 million in program development grants and over $37.6 million in initial program grants to help the states to develop their programs, to administer their initial programs, to train their personnel in the new requirements, and to purchase new equipment. In several instances OSM detailed its personnel to states to assist in the preparation of their permanent program submissions. OSM has also met with individual states to determine how best to meet the Act's environmental protection goals.

Equally important, the Secretary structured the state program approval process to assist the states in achieving primacy. He voluntarily provided his preliminary views on the adequacy of each state program to identify needed changes and to allow them to be made without penalty to the state. The Secretary adopted a special policy to insure that communication between him and the states remained open and uninhibited at all times. This policy was critical to avoiding a period of enforced silence with a state after the close of the public comment period on its program and has been a vital part of the program review process (*see* 77 FR 54444, September 19, 1979).

The Secretary has also developed in his regulations the critical ability to approve conditionally a state program. Under the Secretary's regulations, conditional approval gives full primacy to a state even though there are minor deficiencies in a program. This power is not expressly authorized by the Act; it was adopted through the Secretary's rulemaking authority under sections 201(c), 503(b), and 503(a)(7) of SMCRA, 30 U.S.C. 1253(b), and 1253(a)(7).

The Act expressly gives the Secretary only two options—to approve or disapprove a state program. Read literally, the Secretary would have no flexibility; he would have to approve those programs that are letter-perfect and disapprove all others. To avoid that result and in recognition of the difficulty of developing an acceptable program, the Secretary adopted the regulation providing the authority to approve conditionally a program.

Conditional approval has a vital effect for programs approved in the Secretary's initial decision: it results in the implementation of the permanent program in a state months earlier than might otherwise be anticipated. While this may not be significant in states that already have comprehensive surface mining regulatory programs, in many states that earlier implementation will initiate a much higher degree of environmental protection. It also implements the rights SMCRA provides to citizens to participate in the regulation of surface coal mining through soliciting their views at hearings and meetings and enabling them to file requests to designate lands as unsuitable for mining if they are fragile, historic, critical to agriculture, or simply cannot be reclaimed to their prior productive capability.

The Secretary considers three factors in deciding whether a program qualifies for conditional approval. First is the state's willingness to make good faith efforts to effect the necessary changes. Without the state's commitment, the option of conditional approval may not be used.

Second, no part of the program can be incomplete. As the preamble to the regulations says, the program, even with deficiencies, must "provide for implementation and administration for all processes, procedures, and systems required by the Act and these regulations" (44 FR 14961). That is, a state must be able to operate the basic components of the permanent program: The designation process; the permit and coal exploration systems; the bond and insurance requirements; the performance standards; and the inspection and enforcement systems. In addition there must be a functional regulatory authority to implement the other parts of the program. If some fundamental component is missing, conditional approval may not be used.

Third, the deficiencies must be minor. For each deficiency or group of deficiencies, the Secretary considers the significance of the deficiency in light of the particular state in question. Examples of deficiencies that would be minor in virtually all circumstances are correction of clerical errors and resolution of ambiguities through attorney general's opinions, revised regulations, policy statements, changes in the narrative or the side-by-side.

Other deficiencies require individual consideration. An example of a deficiency that would most likely be major would be a failure to allow meaningful public participation in the permitting process. Although this would not render the permit system incomplete because permits could still be issued, the lack of any public participation could be such a departure from a fundamental purpose of the Act that the deficiency would most likely be major.

The use of a conditional approval is not and cannot be a substitute for the adoption of an adequate program. Section 732.13(i) of Title 30 of the regulations gives the Secretary little discretion in terminating programs where the state, in the Secretary's view, fails to fulfill the conditions. The purpose of the conditional authority power is to assist, not excuse, states from achieving compliance with SMCRA.

Conditional Approval

As indicated under "Secretary's Findings," there are minor deficiencies in the Utah program which the Secretary

requires be corrected. In all other respects, the Utah program meets the criteria for approval. The deficiencies identified in prior findings are summarized below.

1. A regulation which prescribes standards which a reduced highwall must achieve, in accord with Finding 4(b). Based on knowledge of current mining activities in Utah and the little, if any, potential for major environmental problems to occur before adoption of such standards, since (1) few, if any mines are scheduled for closure and final reclamation, and (2) new operations are required to retain materials necessary to grade to approximate original contour, the effect of the delayed promulgation of such standards is minimal.

2. A regulation which applies the exemption from the use of sediment ponds only to drainages from areas affected by surface operations and facilities where the disturbed surface drainage area within the total disturbed surface area is small and there is no mixture of surface drainage with a discharge from underground mine workings, in accord with Finding 4(c)(viii). All underground mines in Utah use sediment ponds as a sedimentation control measure (Administrative Record No. 168). Further, in not providing the small area exemption, the probability of a mine justifying not using sedimentation ponds to meet the effluent standard limitation is minimal. Finally, the Secretary's approval is conditioned upon Utah adopting revisions to its regulations before the eight month permit application and review deadline, prescribed by Section 506(a) of SMCRA and Section 40–10–9 UCA of the Utah CMRA and 30 CFR 771.13 and UMC/SMC 771.13.

3. A regulation which requires that upon an approved transfer of a well, the transferor is secondarily liable for the transferee's obligations until release of the bond or other equivalent guarantee for the area in which the well is located in accord with Finding 4(c)(xv). While there is no case law in Utah on secondary liability in the event of transfer of water wells, the state does not follow normal rules of liability. For example, in the area of negligence, the Utah Supreme Court stated that:

"* * * [W]e have indicated our agreement with the well established rule that where one is injured by the concurrent negligence of two wrongdoers he can recover from either or both; and this includes circumstances where one has previously created a dangerous condition, which combines with a later act of negligence, if the former is in fact a concurring proximate cause." (Footnote omitted.)

Anderson v. *Parson Red-E-Mix Paving Co.*, 24 Utah 2d 128, 467 P. 2d 45, 46 (1970)

Accordingly, it follows that if an operator negligently created an attractive nuisance with latent defects by drilling a water well, both the operator and his transferee may well be held liable under Utah tort law. As such, the effect of Utah not having a specific regulatory provision prescribing secondary liability in the event of water well transfer is minimal. The state has agreed to correct the regulation by July 1, 1981 as part of the Secretary's conditional approval of the Utah program. Further the likelihood that the State will approve such a transfer prior to the adoption of its proposed regulatory provision for this requirement is minimal.

4. A regulation which prohibits lifts for valley fills greater than four feet, in accordance with Finding 4(c)(xx)(5) and which requires federal approval for the waiver of the underdrain requirement in accordance with Finding 4(c)(xx)(4). Eighty percent of the permitted mining operations in Utah are considered to be on federal lands. The Secretary will have to approve any mine plan for such operations. Further, there are currently no pending new or revised permit applications on non-federal land that involve valley fills. The state has agreed to correct the regulation by July 1, 1980 as part of the Secretary's conditional approval of the Utah program.

5. A regulation which provides surface owner protection from the potential adverse effects of subsidence, in accordance with Finding 4(c)(xxix). Given that the Utah regulation is deficient on only one of three alternatives available to the operator, and the subsidence control measures must be approved as part of the permanent program permit, it is highly unlikely that the alternative would result in any adverse affect on surface owners or resources, before the regulation is revised. The state had agreed to correct the regulation by July 1, 1981 as part of the Secretary's conditional approval of the Utah program.

6. A regulation which prohibits the placement of certain materials on the downslope of steep slopes, in accordance with Finding 4(c)(xxxi). Because of the limited waste material from underground mines and the need for such materials to construct roads and portal embankments in steep slope areas, the probability of any material being deposited on the downslope, out of compliance, is negligible. This is reinforced by the fact that approximately 80% of the mines in Utah are on federal lands and must comply with the prohibition on downslope placement of materials under the interim cooperative agreement. The state has agreed to correct the regulation by July 1, 1981 as part of the Secretary's conditional approval of the Utah program.

7. A regulation that requires monitoring, as a possible subsidence control measure, in accord with Finding 4(d)(ii). Because monitoring is only one of several measures that may be taken to reduce the likelihood of future subsidence, from nearby mining, it is unlikely that this option will be used rather than the others available, in a subsidence control plan approved by the state. The state has agreed to correct the regulation by July 1, 1981 as part of the Secretary's conditional approval of the Utah program. As this date precedes the eight month permit application submission and review deadline prescribed by the Act and the regulations, it is highly unlikely a permit will be approved before a revised regulation is adopted.

8. A statutory amendment that provides for a Small Operator Assistance Program, in accord with Finding 1(a)(i). Utah has had no operators apply for assistance under the interim federal Small Operator Assistance Program, hence it is unlikely that there will be an application before an amendment can be adopted.

9. The statutory amendments correcting errors, in accord with Finding (1)(a). The state has proposed to adopt corrections to the noted typographical errors. The state's recognition of these inconsistencies insures that they will have no impact on the implementation of the law and the state program.

10. A statutory amendment which only allows a citizen suit against the Secretary in a federal court in accord with Finding (1)(a). The state has proposed a statutory amendment correcting this inconsistency. The state's corrective action, the limited probability that such a suit would be initiated before adoption of the amendment and the explicit reservation, hereby, of the right of the Secretary to remove to a Federal Court any suit brought against him in a state court, result in little, if any, effect of the deficiency.

11. A statutory amendment which recognizes "private" mineral estates, in accord with Finding 4(d)(viii). Based on the fact that the state has proposed such an amendment, and the fact that in Utah, the traditional dominance of the mineral estate over the surface estate with respect to private property exists, there will be little, if any, effect of the

state's variance before adoption of the statutory amendment.

12. Statutory amendments to provide that the dates for the determinations for alluvial valley floors, prime farmlands, valid existing rights and substantial legal and financial commitments reflect the dates of SMCRA, in accord with Finding (1)(a). Utah submitted on December 9, 1980, housekeeping amendments to the Utah Legislative Drafting Committee to make these statutory dates consistent with SMCRA. Utah's regulations reflect the dates of 30 CFR Chapter VII for these requirements. Based on the fact that the state expects adoption of these amendments before the eight month statutory and regulatory deadline for the submission and review of all permit applications, effects from the statutory date differences will be denoted or absent. Further, a condition of the Secretary's approval is that the revisions be implemented before the eight month deadline, which for Utah is September 15, 1981.

Given the nature of these deficiencies and their magnitude in relation to all the other provisions of the Utah program, the Secretary of the Interior has concluded they are minor deficiencies. Accordingly, the program is eligible for conditional approval under 30 CFR 732.13(i), because:

1. The deficiencies are of such a size and nature as to render no part of the Utah program incomplete since all other aspects of the program meet the requirements of SMCRA and 30 CFR Chapter VII, and these deficiencies, which will be promptly corrected, will not directly affect environmental performance at coal mines;

2. Utah has initiated and is actively proceeding with steps to correct the deficiencies; and

3. Utah has agreed, by letter dated January 13, 1981, to correct the regulation deficiencies by July 1, 1981 and the statutory deficiencies by December 1, 1981. Accordingly, the Secretary is conditionally approving the Utah program. This approval shall terminate if regulations correcting the deficiencies are not enacted by July 1, 1981, or if state legislation correcting the statutory deficiencies is not enacted by December 1, 1981. This conditional approval is effective January 21, 1981. Beginning on that date, the Division of Oil, Gas and Mining shall be deemed the regulatory authority in Utah for all surface coal mining and reclamation operations and for all coal exploration operations on non-federal and non-Indian lands in Utah shall be subject to the permanent regulatory program.

On non-federal and non-Indian lands in Utah, the permanent regulatory program consists of the state program as approved by the Secretary.

On federal lands, the permanent regulatory program consists of the federal rules made applicable under 30 CFR Chapter VII, Subchapter D, Parts 740–745. In addition, in accordance with Section 523(a) of the SMCRA, 30 U.S.C. 1273(a), the federal lands program in Utah shall include the requirements of the approved Utah permanent regulatory program. The approved state/federal cooperative agreement contained in 30 CFR Part 211 will terminate within 120 days of this approval of the Utah regulatory program. Utah and the Department of the Interior will have the opportunity to enter a revised cooperative agreement to include the requirements of the approved Utah permanent regulatory program.

The Secretary's approval of the Utah program relates at this time only to the permanent regulatory program under Title V of SMCRA. The approval does not constitute approval of any provisions related to implementation of Title IV of SMCRA, the abandoned mine lands reclamation program. In accordance with 30 CFR Part 884, Utah may submit a state reclamation plan now that its permanent program has been approved. At the time of such a submission, all provisions relating to abandoned mined lands reclamation will be revised by the Department of the Interior.

Public and Government Agency Comments

The Secretary received several comments from the public on Utah's program. There were no comments concerning outstanding issues by any of the federal agencies. All of the comments from the public were reviewed and considered by the Secretary in making the decision to conditionally approve the Utah program. The Secretary intends to publish in the **Federal Register** within the next few days, a summary of the comments received and his disposition of each significant issue they raise.

Additional Findings

The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this conditional approval.

The Secretary has determined that this document is not a significant rule under E.O. 12044 or 43 CFR Part 14, and no regulatory analysis is being prepared on this conditional approval.

Dated: January 15, 1981.

Joan M. Davenport,

Assistant Secretary of the Interior for Energy and Minerals.

A new Part, 30 CFR Part 944, is added to Subchapter T to read as follows:

Part 944—Utah

Sec.

944.1 Scope.
944.10 State Regulatory Program Approval.
944.11 Conditional State Regulatory Program Approval.
944.12 Provisions of State Regulatory Program Disapproved to Comply with the Order of the District Court.

Authority: Sec. 503, Pub. L. 95–87; 30 U.S.C. 1253.

§ 944.1 Scope.

This part contains all rules applicable only within Utah that have been adopted under the Surface Mining and Reclamation Act of 1977.

§ 944.10 State Regulatory Program Approval.

(a) The Utah State Program, as submitted on March 3, 1980, amended and clarified on June 16 and July 24, 1980, and resubmitted on December 23, 1980, is conditionally approved, effective January 21, 1981.

(b) Copies of the approved program, together with copies of the letter of the Division of Oil, Gas and Mining agreeing to the conditions in 30 CFR 944.11, are available at:

Division of Oil, Gas and Mining, 1588 West North Temple, Salt Lake City, Utah 80441, Telephone: (801) 533–5771.
Office of Surface Mining, Brooks Towers, Room 2115, 1020 15th Street, Denver, CO 80202, Telephone: (303) 837–5421.
Office of Surface Mining, Interior South Building, Room 153, 1951 Constitution Avenue, NW, Washington, DC 20240, Telephone: (202) 343–4728.

§ 944.11 Conditions of State Regulatory Program Approval.

The approval of the state program is subject to the following conditions:

(a) The approval found in Section 944.11 will terminate on December 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted statutes which delete the condition in Section 40–10–10(d) UCA of the Utah CMRA which limits the Small Operator Assistance Program to receipt of funding from the Office of Surface Mining, to be consistent with Section 517(c) of SMCRA, or otherwise amends its program to accomplish the same result.

(b) The approval in § 944.11 will terminate on December 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted statutes

revising the dates for the following determinations to be consistent with the dates of SMCRA, or otherwise amends its program to accomplish the same result:

(1) the date for the establishment of the "grandfathering" date of alluvial valley floors under Section 40–10–11(2)(e)(ii) UCA/Section 510(b)(5)(B) of SMCRA

(2) the dates for prime farmland permit application requirements under Section 40–10–11(4) UCA/Section 510(d)(2) of SMCRA.

(3) the date for the establishment of valid existing rights in Section 40–10–24(4) UCA/Section 522(e) of SMCRA.

(4) the date for the determination of substantial legal and financial commitments in Section 40–10–24(1)(e) UCA/Section 522(a)(6) of SMCRA.

(c) The approval in § 944.11 will terminate on December 1, 1981 unless Utah submits to the Secretary by the date copies of fully executed statutes correcting the errors in Sections 40–10–17(2)(j)(ii)(B) UCA and 40–10–16(4) UCA to be consistent with Sections 515(b)(10)(B)(ii) and 519(d) of SMCRA, or otherwise amends its program to accomplish the same result.

(d) The approval in § 944.11 will terminate on December 1, 1981 unless Utah submits to the Secretary by the date copies of fully executed statutes revising the jurisdiction of the Utah courts such that a suit against the United States cannot be conducted in a state court but only in a federal court under Section 40–10–21 UCA of the Utah CMRA, to be consistent with Section 520 of SMCRA, or otherwise amends its program to accomplish the same result.

(e) The approval in Section 944.11 will terminate on December 1, 1981 unless Utah submits to the Secretary by that date copies of fully enacted statutes recognizing "private" mineral estates under Section 40–10–11(f) UCA to be consistent with Section 510(b)(6) of SMCRA or otherwise amends its program to accomplish the same result.

(f) The approval in Section 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted regulations adopting standards for the reduction of highwalls in UMC 817.101(b)(1) to be consistent with 30 CFR 817.101 and Section 510 of SMCRA, or otherwise amends its program to accomplish the same result.

(g) The approval in Section 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted regulations adopting a sediment pond exemption provision in UMC 817.42(a)(3) consistent with 30 CFR 817.42(a)(3)(ii)(A), or otherwise amends its program to accomplish the same result.

(h) The approval in § 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary, by that date, copies of fully enacted regulations specifying that underdrains are required in all valley fills unless a waiver is granted in connection with an experimental practice approved by OSM, in UMC 817.72(b)/SMC 816.72(c) and specifying lifts for valley fills will not be greater than four feet, or less, if required by the regulatory authority, in UMC 817.72(c)/SMC 816.72(c) consistent with 30 CFR 817.72(c), or otherwise amends its program to accomplish the same result.

(i) The approval in § 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted regulations adopting well transfer liability provisions in UMC 817.53(c) consistent with 30 CFR 817.53(c), or otherwise amends its program to accomplish the same result.

(j) The approval in § 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted regulations providing for surface owner protection from the potential effects of subsidence in UMC 817.124(b) (1) and (3) consistent with 30 CFR 817.124(b) (1) and (3), or otherwise amends its program to accomplish the same result.

(k) The approval in § 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted regulations prohibiting the placement of certain materials on the downslope in steep slope areas in UMC 817.101(c) consistent with 30 CFR 826.12(a), or otherwise amends its program to accomplish the same result.

(l) The approval in § 944.11 will terminate on July 1, 1981 unless Utah submits to the Secretary by the date copies of fully enacted regulations which allow monitoring as a subsidence control measure in UMC 784.20(c)(3)(v) consistent with 30 CFR 784.20(c)(3)(v), or otherwise amends its program to accomplish the same result.

§ 944.12 Provisions of State Regulatory Program Disapproval to Comply with the Order of the District Court.

(a) The following provisions of the Utah permanent regulatory program submission are hereby disapproved to the extent indicated in compliance with the February 26, 1980, May 16, 1980, and August 15, 1980, opinions and orders of the U.S. District Court for the District of Columbia (*In re: Permanent Surface Mining Regulation Litigation* (Civ. Action No. 79–1144)).

(1) Sections UMC/SMC 700.5, the definition of "mine plan area," and the use of the term in Parts SMC 779, SMC 780, UMC 783 and UMC 784 to the extent that they require information outside the permit area that is not specifically articulated in Sections 507 and 508 and the corresponding Utah statutory provisions of 40–10–10 UCA.

(2) Sections UMC/SMC 701.11(d)(1) (i) and (ii), relating to exemptions for existing structures, to the extent that the exemptions are not mandatory after the appropriate findings are made.

(3) Sections SMC/UMC 761.5(a)(2)(i), the definitions of "valid existing rights," to the extent they do not allow recognition of such rights an operator may claim by having made a good faith effort to obtain all permits before 8/3/77 as stipulated by the court's decision.

(4) Sections SMC 761.11(c), 761.12(f)(1) and UMC 761.11(a)(3) and .12(b) to the extent that they prohibit or restrict mining near places eligible for listing on the National Register of Historic Places, and the words "or a statutory or regulatory responsibility for" in UMC/SMC 761.12(f)(1). Further, both provisions are disapproved to the extent that they apply to privately owned places listed on the National Register of Historic Places in addition to publicly owned places.

(5) Sections UMC/SMC 776.11(b)(3), concerning the requirements for maps of the proposed exploration area.

(6) Sections UMC/SMC 761.11(b)(5), concerning the requirements that operators explain their basis for the exploration area when the surface is owned by a person other than the operator.

(7) Sections SMC 779.20, SMC 780.16, UMC 783.20, and UMC 784.21 requiring a permit application to contain a study of fish and wildlife and to include a fish and wildlife reclamation plan.

(8) Sections 779.21 and UMC 783.21 to the extent they require a soil survey for lands other than those which a reconnaissance inspection suggests may be prime farmland.

(9) Sections UMC/SMC 785.17(b)(3) and SMC/UMC 823.14(c), concerning excessive soil compaction, pending OSM's promulgation of a standard for soil compaction.

(10) Sections SMC/UMC 785.17(b)(8), to the extent that they require prime farmland reclamation target yields to be based on estimated yields under a high level of management rather than a level of management equivalent to that used on prime farmlands in the surrounding area.

(11) Sections UMC/SMC 785.19(d)(2)(iii) and (iv) to the extent that the regulations do not allow an analysis from data collected over a period of less than one year or extrapolated from existing data if such shorter period or extrapolation process is sufficient to enable the regulatory authority to make a determination of the impact of the proposed operation on the hydrologic balance of the area.

(12) Sections UMC/SMC 785.19(3)(1)(ii) insofar as the regulations do not allow negligible farmland interruption and undeveloped range lands as exclusions to the hydrologic requirements of Section 40–10–11(2)(e) UCA of the Utah statute.

(13) Sections UMC/SMC 785.19(e)(2) insofar as they prohibit mining when the mining would create a negligible impact on the farm's productive capacity.

(14) Sections SMC/UMC 805.13(d) to the extent that the exception the regulatory authority may grant might be from all of Section 816.

(15) Sections UMC/SMC 806.12(e)(6)(iii), (g)(7)(iii) to the extent they require cessation of operations upon the insolvency of a surety.

(16) Sections UMC/SMC 807.11(e) to the extent they fail to provide for citizens' access to the mine site for performance bond release.

(17) Sections UMC/SMC 808.12(c) to the extent that they limit bond liability to protection of the hydrologic balance.

(18) Sections UMC/SMC 808.14(b) to the extent they allow the regulatory authority to forfeit and keep the entire amount of a bond where the entire amount is not needed to complete a reclamation plan.

(19) Sections SMC 816.42 (a)(1) and (a)(7) to the extent they apply effluent limitation standards to the reclamation phase of a surface coal mining operation.

(20) Sections SMC 816.42(b) and UMC 817.42(b), relating to effluent standard exemptions during major storm periods, pending OSM's promulgation of new sediment removal regulations.

(21) Sections SMC 816.46(b) and UMC 817.46(b), concerning sediment storage volume in sediment ponds, pending OSM's promulgation of new requirements.

(22) Sections SMC 816.46(c) and UMC 817.16.46(c), concerning detention time for water in sediment ponds, pending OSM's promulgation of new requirements.

(23) Sections SMC 816.46(d) and UMC 817.46(d) to the extent they require dewatering devices to have a discharge rate to achieve and maintain the theoretical detention time for sediment ponds.

(24) Sections SMC 816.46(h) and 817.46(h), concerning sediment removal from sediment ponds, pending OSM's promulgation of rules.

(25) Sections SMC 816.65(f), requiring special approval prior to blasting within 1,000 feet of certain buildings and 500 feet of other facilities and which restricts blasting at distances greater than 300 feet.

(26) Sections UMC 817.95 and SMC 816.95, concerning air resources protection, to the extent the control measures enumerated for control of fugitive dust are not directly related to control of soil erosion.

(27) Sections SMC 816.115 and UMC 817.115 to the extent they require an operator who proposes range or pasture as the post-mining land use to actually use the land for grazing for the last two years of bond liability.

(28) Sections UMC 817.116(b) and SMC 816.116(b) to the extent that they state that an operator's responsibility for successful revegetation does not begin until the vegetation reaches 90 percent of the natural cover in the area.

(29) Sections SMC 816.133(b)(1) and UMC 817.133(b)(1) to the extent they do not allow restoration of lands to the conditions they were capable of supporting prior to any mining.

(30) Sections SMC 816.133(c) and UMC 817.133(c) to the extent they require an operator to provide "letters of commitment" for proposed land use changes or for proposed cropland use.

(31) Sections UMC/SMC 823.11(c), 823.15(b), and 823.15(c) to the extent they require an operator on prime farmland to actually return the land to crop production. The land needs only to be "capable" of supporting the designated use.

(32) Sections UMC/SMC 845.13 and 845.14 to the extent they impose a civil penalty point system.

(33) Sections UMC 783.25(c), (h), and (i) to the extent that they require cross sections, maps and plans as part of the information requisite of an underground permit application.

(34) Section UMC 817.54 to the extent that it requires an underground operator to replace the water supply of landowners if the operation contaminates, diminishes or interrupts the supply.

(35) Sections UMC/SMC 823 to the extent that they do not allow an exemption to the performance standards of operations on prime farmlands for surface facilities used over extended periods of time but which effect a minimal amount of land.

(b) The court suspended the requirements of 30 CFR 816.83(a) and 30 CFR 817.83(a) to the extent that they would preclude an exemption from the underdrain requirements for coal processing waste banks where an operator could demonstrate that an alternative to the required subdrainage system would ensure structural integrity of the waste bank and protection of ground or surface water quality. The Utah regulations SMC 816.83(a) (1) and (2) and UMC 817.83(a) (1) and (2) provide for the exemption, as specified by the Court. Nevetheless, Utah's provisions for water control measures for coal processing waste banks would be disapproved to comply with the court's order. UMC 817.102 insofar as these sections do not provide some flexibility for settled fills that have become stabilized and revegetated.

[FR Doc. 81–2081 Filed 1–19–81; 8:45 am]

BILLING CODE 4310–05–M

---

30 CFR Part 948

Conditional Approval of the Permanent Program Submission From the State of West Virginia Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule.

SUMMARY: The State of West Virginia resubmitted to the Department of the Interior its proposed permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA), following an initial approval in part and disapproval in part. The notice announcing the initial decision was published in the **Federal Register** on October 20, 1980 (45 FR 69249–69271). The purpose of the resubmission is to demonstrate the State's intent and capability to administer and enforce the provisions of SMCRA and the permanent regulatory program regulations, 30 CFR Chapter VII.

After providing opportunities for public comment and conducting a thorough review of the complete program submission, the Secretary of the Interior has determined that the West Virginia program meets the requirements of SMCRA and the Federal permanent program regulations except for minor deficiencies discussed below. Accordingly, the Secretary of the Interior has conditionally approved the West Virginia program.

A new Part 948 is being added to 30 CFR Chapter VII to implement this decision.

EFFECTIVE DATE: This approval is effective January 21, 1981. This conditional approval will terminate as specified in 30 CFR 948.11 unless the deficiencies identified below have been corrected in accordance with the dates specified in 30 CFR 948.11, adopted below.

ADDRESSES: Copies of the West Virginia program and the administrative record on the West Virginia program, including the letter from the West Virginia Department of Natural Resources agreeing to correct the deficiencies which resulted in the conditional approval, are available for public inspection and copying during business hours at:

Office of Surface Mining, Reclamation and Enforcement, Region I, 603 Morris Street, Charleston, West Virginia 25301, Phone: (304) 342–8125.

West Virginia Department of Natural Resources, Division of Reclamation, Room 322, 1800 Washington Street, East, Charleston, West Virginia 25305, Phone: (304) 348–3267.

Office of Surface Mining, Reclamation and Enforcement, U.S. Department of the Interior, South Building, Room 153, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Phone: (202) 343–4728.

FOR FURTHER INFORMATION CONTACT:

Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining, Reclamation and Enforcement, U.S. Department of the Interior, South Building, 1951 Constitution Avenue, NW., Washington, D.C. 20240, Phone: (202) 343–4225.

SUPPLEMENTARY INFORMATION:

A. Background

The general background on the permanent program, the general background on the state program approval process, and the background on the West Virginia program submission were discussed in the initial decision published in the **Federal Register** on October 20, 1980 (45 FR 69249–69271). Also, in that notice the Secretary announced his partial approval and partial disapproval of the West Virginia program. The disapproved rules and legislative provisions were disapproved because: (1) the draft regulations submitted on June 16, 1980, had not been promulgated before the 104th day after program submission, as required by 30 CFR 732.11, and (2) the legislative provisions identified as deficient in the October 20, 1980, **Federal Register** notice were inconsistent with SMCRA and the regulations promulgated thereunder. Under 30 CFR 732.13(f), West Virginia had 60 days from the date of partial disapproval (October 20, 1980) to resubmit a revised program. Thus, the period allowed for resubmission ended December 19, 1980.

On December 19, 1980, West Virginia resubmitted its program, which contains proposed statutory amendments and regulations. Announcement of West Virginia's resubmission was made in newspapers of general circulation within the State of West Virginia and published in the **Federal Register** on December 19, 1980 (45 FR 83544–83546). A public comment period extending until January 6, 1981, was announced in the December 19 notice. A public hearing on the resubmission was also announced in that notice. The hearing was held in Charleston, West Virginia on January 5, 1981. In response to a request from a mining industry organization, the comment period was extended until January 9, 1981. This extension was announced in the **Federal Register** on January 6, 1981, (46 FR 1311). The resubmission public comment period ended at 4:00 p.m. on January 9, 1981. Public disclosure of comments by Federal agencies was made on January 15, 1981, in the **Federal Register** (46 FR 3560).

The Regional Director completed his program review on January 12, 1981, and forwarded the public hearing transcripts, written presentations, and copies of all comments to the Director together with a recommendation that the program be conditionally approved.

On January 15, 1981, the Director recommended to the Secretary that the West Virginia program be conditionally approved.

On January 14, 1981, the Administrator of the Environmental Protection Agency transmitted his written concurrence on approval of the West Virginia program.

The basis and purpose statement for the Secretary's decision to conditionally approve West Virginia's program consists of this notice, the other **Federal Register** notice cited above, and the October 20, 1980, **Federal Register** notice announcing the Secretary's initial decision. Throughout the remainder of this notice, the term "West Virginia program" or "West Virginia submission" is used to mean the resubmission together with those parts of the original partially approved on October 20, 1980. The term "State Regulation" or "West Virginia Regulation" refers to the regulations (Sections 2–16) submitted by West Virginia as part of the December 19 resubmission. The term "Technical Handbook" refers to the Technical Handbook which is referred to and incorporated as part of the State's regulations. The term "December 30, 1980, meeting" refers to a meeting held between OSM and the West Virginia Department of Natural Resources (DNR) (Administrative Record No. WV 313). The purpose of the meeting was to discuss apparent deficiencies which had been found in the State program submission.

The Secretary's Findings below are organized to follow the order set forth in Sections 503 of SMCRA and 30 CFR 732.15, respectively. These sections specify the findings which the Secretary must make before he may approve a regulatory program. Where appropriate, the reader is referred to specific paragraphs in the October 20, 1980, **Federal Register** notice for a complete discussion of the issues.

B. Secretary's Findings

Finding 1

The Secretary finds that Chapter 20, Article 6 of the Code of West Virginia, known as the West Virginia Surface Coal Mining and Reclamation Act (WV SCMRA), and the West Virginia Administrative Procedures Act provide, except as noted in subsequent Findings, for the regulation of surface coal mining and reclamation operations on non-Indian and non-federal lands in West Virginia in accordance with the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

This finding is based on the requirements of Section 503(a)(1) of SMCRA [30 U.S.C. 1253(a)(1)]. Analysis of the issues underlying this finding is found in Findings 12 through 30, below.

Finding 2

The Secretary finds that the WV SCMRA provides, except as noted in subsequent Findings, sanctions for violations of West Virginia laws, regulations or conditions of permits concerning surface coal mining and reclamation operations and that these sanctions meet, except as noted in subsequent Findings, the requirements of SMCRA, including civil and criminal actions, forfeiture of bonds, revocation of permits, withholding of permits, and the issuance of cessation orders by the Department of Natural Resources or its inspectors.

This finding is based on the requirements of Section 503(a)(2) of SMCRA [30 U.S.C. 1253(a)(2)]. Analysis of the issues underlying this finding is found in Findings 18, 19, and 20, below.

Finding 3

The Secretary finds that the Department of Natural Resources has

demonstrated that it has sufficient administrative and technical personnel and funds to enable West Virginia to regulate surface coal mining and reclamation operations in accordance with the requirements of SMCRA.

This finding is based on the requirements of Section 503(a)(3) of SMCRA [30 U.S.C. 1253(a)(3)]. An analysis of the issues underlying this finding is found in Finding 30, below.

Finding 4

The Secretary finds that West Virginia law provides, except as noted below, for the effective implementation, maintenance, and enforcement of a permit system that meets the requirements of SMCRA for the regulation of surface coal mining and reclamation operations on non-Indian and non-federal lands within West Virginia.

This finding is based on the requirements of Section 503(a)(4) of SMCRA [30 U.S.C. 1253(a)(4)]. An analysis of the issues underlying this finding is found in Finding 14, below.

Finding 5

The Secretary finds that West Virginia has established a process for the designation of areas as unsuitable for surface coal mining in accordance with Section 522 of SMCRA.

This finding is based on the requirements of Section 503(a)(5) of SMCRA [30 U.S.C. 1253(a)(5)]. An analysis of the issues underlying this finding is found in Finding 21, below.

Finding 6

The Secretary finds that West Virginia has established, for the purpose of avoiding duplication, a process for coordinating the review and issuance of permits for surface coal mining and reclamation operations with other federal and State permit processes applicable to the proposed operations.

This finding is based on the requirements of Section 503(a)(6) of SMCRA [30 U.S.C. 1253(a)(6)]. An analysis of the issues underlying this finding is found in Findings 13 and 14, below.

Finding 7

The Secretary finds that West Virginia has enacted a statute and regulations, except as noted in subsequent Findings, consistent with regulations issued pursuant to SMCRA.

This finding is based on the requirements of Section 503(a)(7) of SMCRA [30 U.S.C. 1253(a)(7)].

West Virginia has developed and submitted with the material provided on December 19, 1980, revised regulations to implement the WV SCMRA. These regulations are being enacted as temporary rules concurrent with the decision announced in this notice. This action is consistent with the requirements of SMCRA in that West Virginia has all necessary authority to enforce a permanent regulatory program at the time approval by the Secretary is effective. See State Administrative Procedures Act Section 29A–3–14 (Temporary Rules).

Finding 8

The Secretary has, through OSM, solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture, and the heads of other federal agencies concerned with or having special expertise pertinent to the proposed program.

This finding is based on the requirements of Section 503(b)(1) of SMCRA [30 U.S.C. 1253(b)(1)] and on the information contained in a **Federal Register** notice published January 15, 1981 (46 FR 3560). This notice identified the federal agencies from which comments were solicited, the agencies which responded and the offices of OSM and the West Virginia Department of Natural Resources at which copies of the comments were made available.

Finding 9

The Secretary has obtained the written concurrence of the Administrator of the Environmental Protection Agency with respect to those aspects of the West Virginia program which relate to air or water quality standards promulgated under the authority of the Clean Water Act, as amended (33 U.S.C. 1151–1175) and the Clean Air Act, as amended (42 U.S.C. 1857 *et seq.*).

This finding is based on the requirements of Section 503(b)(2) of SMCRA [30 U.S.C. 1253(b)(2)] and on the letter transmitted by the Administrator of EPA to the Secretary on January 14, 1981. A copy of this letter has been placed in the West Virginia Administrative Record.

Finding 10

The Secretary, through the OSM Regional Director for Region I, held a public meeting in Charleston, West Virginia, on April 9, 1980, to discuss the completeness of the West Virginia program submission, and held public hearings in Morgantown, West Virginia on July 14, 1980, and in Charleston, West Virginia on July 14, 1980, and January 5, 1981, to solicit public comments on the substance of the West Virginia program submission.

This finding is based on the requirements of Section 503(b)(3) of SMCRA [30 U.S.C. 1253(b)(3)].

Finding 11

The Secretary finds that the State of West Virginia has the legal authority and has demonstrated that it has sufficient qualified personnel necessary for the enforcement of the environmental protection standards of SMCRA and 30 CFR Chapter VII.

This finding is based on the requirements of Section 503(b)(4) of SMCRA [30 U.S.C. 1253(b)(4)]. Analysis of the issues underlying this finding is found in Findings 12 through 30, below.

Finding 12

The Secretary finds that the West Virginia program provides, except as noted below, for West Virginia to carry out the provisions and meet the purposes of SMCRA and 30 CFR Chapter VII.

This finding is made under the requirements of the first half of 30 CFR 732.15(a). Analysis of the issues underlying this finding is found throughout this **Federal Register** notice. Additional issues which arose during review of the program are as follows.

12.1 As discussed in Finding 12.2 of the October 20 **Federal Register** notice, Section 20–6–3(t) of the WV SCMRA defines "surface mining" in such a way that it could be interpreted to exempt certain permanent facilities which would be considered "surface coal mining operations" under Section 701(28) of SMCRA. However, in Regulation Section 8A.05, the State defines the permanent facilities which will not be subject to regulation under the State program. The regulation provides that the operator must show the location of the facility and his or her nearest permit area; must describe the use proposed for the facility during mining and its proposed use after mining as well as its present use; and must submit a verified statement that the facility will not be directly involved in the extraction, loading, storage or processing of coal. This regulation clarifies that the State statute is designed to exclude only offices and other permanent facilities not within the permit area. The Secretary finds that this clarification is consistent with the federal definition of surface coal mining operations.

12.2 Section 20–6–10(a)(13)(H) of West Virginia's statute provides that a surface mining permit application must contain maps depicting the location of any "significant aquifers," while Section 507(b)(14) of SMCRA requires that these maps reveal the location of aquifers,

without the qualifying adjective "significant." However, West Virginia Regulation Section 2.108 defines "significant aquifer" consistent with the 30 CFR 701.5 definition of "aquifer." Therefore, West Virginia's provision is equivalent to the federal provision.

12.3 Under 30 CFR 701.5, the definition of "prime farmland" includes the phrase "historically used for cropland," which in turn is defined to include land that has been used for cropland for any five years or more out of the ten years preceding the acquisition of the land for the purpose of mining or resale for mining. Section 4G.03a. of West Virginia's Regulations specifies five years out of the twenty years before the date of the permit application, rather than the date of acquisition. However, it also provides that for lands obtained after the passage of the West Virginia statute and retired from farming, the twenty years shall be calculated, using as an ending date, the date of acquisition for the purpose of mining. Thus, prime farmland bought for mining purposes cannot be exempted from the special requirements applicable to prime farmlands by actions of the purchaser to retire the land from farming. West Virginia's provision is consistent with the federal provision.

12.4 West Virginia defines "valid existing rights" in State Regulation Section 2.131 to include people who were mining coal as of August 2, 1977, people who had made a good faith effort to obtain all necessary permits by that date and people whose property rights would be unconstitutionally taken without compensation by the prohibitions of Section 22(d) of the State statute if they were not deemed to possess valid existing rights.

The federal requirements are different in several respects. First, under Section 522(e) of SMCRA and 30 CFR 761.11, operations which existed on August 3, 1977, are exempt from the prohibitions of Section 522(e). The Secretary interprets the language of State Regulation Section 2.131 which refers to persons mining coal on August 2, 1977, as having the same meaning as the federal provisions; that is, he assumes that West Virginia means only to exempt such persons with regard to the particular operation which existed on August 2, 1977, and not to create an across-the-board exemption covering any operation connected with a person who was mining coal anywhere on August 2, 1977.

The second difference between the West Virginia and federal definitions of valid existing rights is that the State refers to a good faith effort to obtain all permits while the federal rule originally required that such permits be actually issued. However, the court in Round I of *In re: Permanent Surface Mining Regulation Litigation,* Civil Action No. 79–1144 (D.D.C., February 26, 1980) at page 20 held that a good faith effort should suffice to meet the all permits test, and the Secretary is revising his rule accordingly. He assumes that West Virginia will interpret its good faith language consistent with the court's opinion. When the Secretary issues a final rule implementing the court's opinion, the State will, if necessary, have an opportunity to demonstrate that its interpretation of the good faith language is consistent with such a final rule.

The third difference between the State and federal definitions of valid existing rights is that the State definition refers to persons whose rights would be unconstitutionally taken unless they were treated as having valid existing rights. This concept is consistent with the federal provision. As discussed in the preamble to the federal rule, (44 FR 14992, March 13, 1979), the Secretary believes that the purpose of the valid existing rights language in Section 522(e) of SMCRA is to avoid unconstitutional takings, and the federal definition of valid existing rights is designed to protect those rights. Further, meeting the requirements in 30 CFR 761.5 is not the only way to establish valid existing rights, as "VER must be applied on a case-by-case basis, except that there should be no question about the presence of VER where an applicant had all permits for the area as of August 3, 1977" (44 FR 14993, March 13, 1979). As discussed in the meeting of December 30, 1980, West Virginia's rule is intended to mean that the Department of Natural Resources could determine that an applicant has valid existing rights only where it finds that he or she meets one of the first two criteria of the State's definition. If the DNR is unable to make such a finding, the applicant would have the option of asking a court to make the determination under the third criterion that he or she has valid existing rights because the designation would otherwise be an unconstitutional taking. The State does not believe that the DNR is legally authorized to make this consitutional determination. Thus, the third provision under State Regulation 2.131 would come into play only after a judicial determination had been made that the individual would suffer an unconstitutional taking of property unless VER was granted. The Secretary finds that West Virginia's definition is consistent with the federal requirements.

Finding 13

The Secretary finds that the Department of Natural Resources has, except as noted below, the authority under West Virginia laws to implement, administer, and enforce applicable requirements consistent with 30 CFR Chapter VII, Subchapter K (performance standards) and the West Virginia program includes, provisions adequate to do so, with the exceptions noted below. This finding is made under the requirements of 30 CFR 732.15(b)(1).

West Virginia incorporate provisions corresponding to Sections 515 and 516 of SMCRA and the provisions of Subchapter K of 30 CFR Chapter VII in Sections 13 and 14 of Chapter 20, Article 6 of the Code of West Virginia and throughout the body of the State's regulations. Section (g)(8) of the program narrative contains a discussion of West Virginia's administrative and enforcement procedures for performance standards.

Discussion of significant issues raised during the review of the West Virginia environmental performance standards follows.

13.1 As discussed in Finding 13.1 of the October 20, 1980 **Federal Register** notice, although the West Virginia statute is consistent with federal requirements concerning backfilling and grading, the regulations concerning auger mining on previously mined lands are inconsistent. State Regulation Section 6B.09f.3. only requires backfilling after augering on previously mined lands to a depth of four feet over the augered coal seam. Section 515(b)(3) of SMCRA, 30 CFR 816.102(a)(2) and the policy statement of Walter Heine of September 13, 1979, all require complete highwall elimination following augering, although deviations from approximate original contour may be allowed on previously mined lands. This interpretation is supported by the decision of the Interior Board of Surface Mining Appeals in *Miami Springs Properties,* IBSMA 80–76 (1980) which has been remanded for further hearings. Approval of West Virginia's program is conditioned upon amendment of the State regulation to require highwall elimination following auger mining of previously mined lands.

13.2 As discussed in Finding 13.2 of the October 20 **Federal Register** notice, State law (Section 20–6–13(b)(20)) holds the operator responsible for revegetation success for five growing seasons, while Section 515(b)(20) of SMCRA refers to five years. However, West Virginia Regulation Section 2.54 defines "growing season" to mean one year, thus making

the State program consistent with the federal requirements.

13.3 As discussed in Finding 13.3 of the October 20 **Federal Register** notice, Section 20–6–13(b)(21) of the State's law is inconsistent with Section 515(b)(22) of the SMCRA. State Regulation Section 6B.08f defines the conditions under which the Director, DNR, will exercise the discretion granted him by Section 20–6–13(b)(21) to allow disposal of excesss spoil outside a permit area for surface mining operations. These conditions restrict such areas to those under a different permit or under contract for reclamation pursuant to West Virginia SCMRA and regulations. The Secretary considers the existence of a contract for reclamation work performed under State law to be the equivalent of a permit and bond for the purposes of this section. Since the disposal area will either be under State permit or subject to a State abandoned mine lands reclamation project, the Secretary finds this provision of the State program is consistent with the requirements of Section 515(b)(22) of SMCRA.

The State regulations for underground mining and facilities incidental to mining do not have a similar provision. Instead, each requires that the disposal area must be within the permit area, State Regulation Sections 7B.09a. and 8B.10a. The Secretary interprets this omission to mean that the Director will not exercise his discretion to allow the variance with respect to underground mining and facilities incidental to mining. On this basis, the Secretary finds that the State provisions are consistent with the federal requirements.

13.4 As discussed in Finding 13.4 of the October 20 **Federal Register** notice, West Virginia's statute [Section 20–6–13(b)(25)] allows the use of constructed outcrop barriers to prevent slides and erosion, while Section 515(b)(25) of SMCRA requires retention of a natural barrier. As part of its resubmission, the State has submitted evidence (Dames & Moore study, *Alternate Practice for Outcrop Barriers)* which indicates that West Virginia's provision may be more stringent than the SMCRA requirement. After having reviewed the Dames & Moore study, the Secretary agrees that the State's alternative for a constructed outcrop barrier may be more stringent than its federal counterpart. However, the State submission does not contain specific criteria for design of constructed outcrop barriers that would ensure that their performance in preventing slides and erosion will be more effective than that of a natural barrier.

Approval of West Virginia's program is conditioned on amendment of the State program to include specific criteria for design of constructed outcrop barriers which will achieve better results than under Section 515(b)(25) of SMCRA when constructed outcrop barriers are approved by the regulatory authority.

13.5 As discussed in Finding 13.5 of the October 20 **Federal Register** notice, Section 20–6–13(d) of the West Virginia SCMRA contains a provision for spoil from the initial cut to be placed on the downslope with the approval of the Director of the Department of Natural Resources. This appears to conflict with Section 515(d)(1) of SMCRA, which forbids spoil on the downslope except where spoil not needed for restoration to approximate original contour is permanently stored in a fill under Section 515(b)(22). The Attorney General's opinion submitted with West Virginia's resubmission (Part A, response to Finding 13.5) refers to State Regulations Sections 6B.08, 7B.09 and 8B.10 for interpretation of the language of the State law. The Secretary finds that these sections require that all spoil not required to achieve the approximate original contour shall be disposed of in accordance with standards that are consistent with Section 515(b)(22) of SMCRA. On this basis, the Secretary finds that first cut material must be disposed of in accordance with requirements for excess spoil or used to return the site to its approximate original contour. Thus, the State requirements are found to be consistent with the federal requirements.

13.6 As discussed in Finding 13.6 of the October 20 **Federal Register** notice, West Virginia needed to enact regulations establishing jurisdiction over liquid waste consistent with Section 516(b)(5) of SMCRA. State Regulation Sections 6B.07c.3. and 7B.08c.3. provide such jurisdiction, rendering the State program consistent with the federal requirements.

13.7 As discussed in Finding 13.7 of the October 20 **Federal Register** notice, WV SCMRA Sections 20–6–13(b)(10)(B) and 20–6–14(b)(9)(B) regarding effluent standards do not alone meet all the requirements of Section 515(b)(10)(B)(i) of SMCRA and the federal regulations which implement this provision. State Regulation Sections 6B.04b., 7B.04b., 8B.04b., 9B.03b. and 10C.03c. include language consistent with the federal provisions. Further, the Attorney General's Opinion (Part A, response to Finding 13.7) points out that the West Virginia Code, Chapter 20, Article 5A, also requires all permittees to comply with applicable federal water quality standards and effluent limitations. The Secretary finds that the regulations cited above and the requirements of Chapter 20–5A of the WV Code make the program consistent with federal requirements.

The Attorney General also advised that additional language will be proposed to the West Virginia Legislature to make the WV SCMRA consistent with the SMCRA. The Secretary believes the additional language would be helpful in resolving any questions that may result from the differing construction of the two laws and urges that the change be made. A successful challenge to the authority of the DNR to promulgate or enforce the regulations being approved could result in the Secretary being forced to intervene in the administration of the West Virginia program. A statutory amendment would obviate this possibility.

13.8 As discussed in Finding 13.8 of the October 20 **Federal Register** notice, West Virginia allows woodlands as an alternative postmining land use in mountaintop removal operations. [WV SCMRA Section 20–6–13(c)(3)]. Section 2.133 of the State's regulations defines "woodlands" to include only *commercial* woodlands "where flat or gently rolling land is essential for the operation and harvesting: Provided that environmental benefits would occur from such a woodland, post-mining land use".

Finding 13.8 of the October 20 notice pointed out that the preamble to the federal rules, 44 FR 15288–15289 (March 13, 1979), states that flat or gently rolling terrain is not necessary for silviculture and therefore silviculture would not be an acceptable alternative postmining land use. However, by strictly limiting its definition of woodlands to require that the operator demonstrate that flat land is *essential* to the proposed *commercial* land use, West Virginia would permit such an alternative post-mining land use only where the concern discussed in the federal regulation preamble is met. Thus, although there may be no across-the-board need for flat areas for silviculture, there might in a specific case be special circumstances which would make flat land essential. The Secretary finds that West Virginia's provision for a *commercial* woodlands alternative post-mining land use is consistent with the federal provisions.

13.9 As discussed in Finding 13.9 of the October 20 **Federal Register** notice, West Virginia's program initially failed to require design and/or certification by a registered professional engineer (RPE) as required by Sections 515(b)(10) of

SMCRA with regard to siltation structures and 515(c)(3) with regard to the stability, drainage and configuration necessary for the intended alternative post-mining land use. West Virginia Regulation Section 3E.01 provides that an "approved person" for purposes of Sections 20–6–10(a)(13) of the State statute must be a registered professional engineer (RPE). Section 20–6–13(b)(10) of the State law covers siltation structures. RPE certification of fill stability is required by Chapters 8.10, 9.10, and 10.9 of West Virginia's Technical Handbook; RPE certification of drainage systems is required by Section 20–6–13(b)(10)(B) of the State statute; and RPE certification of the final surface configuration is required by Section 20–6–10(a)(13)(iv) of the State statute. The Secretary finds the West Virginia provisions are consistent with Sections 515(b)(10) and 515(c)(3) of SMCRA.

13.10 As discussed in Finding 13.10 of the October 20 Federal Register notice, WV SCMRA Section 20–6–14(b)(12) regarding the location of drift-mine openings in acid producing or iron producing coal seams is inconsistent with Section 516(b)(12) of SMCRA. The Attorney General's opinion (Part A) indicates that changes to this State section will be proposed to delete the Director's discretion with regard to the placement of these openings. The opinion also refers to State Regulation Section 7D, which limits the Director's discretion. However, this regulation still provides variances to Section 516(b)(12), which specifically requires "that openings for *all* new drift mines working acid-producing or iron-producing coal seams be located in such a manner as to *prevent* a gravity discharge of water from the mine." (Emphasis supplied) State Regulation Section 7B.05 also allows for gravity discharge from these types of mines. In view of this language, the Secretary finds that WV SCMRA Section 20–6–14(b)(12) and Regulation Sections 7B.05 and 7D are inconsistent with Section 516(b)(12) of SMCRA. Approval of the West Virginia program is conditioned on the State amending its statute and regulations or otherwise amending its program to prohibit gravity discharge consistent with Section 516(b)(12) of SMCRA.

13.11 As discussed in Finding 13.11 of the October 20 Federal Register notice, Section 20–6–3(e) of West Virginia's statute allows "minor deviations" in its definition of approximate original contour. In its resubmission (Attorney General's opinion, Part A), the State identifies Chapter 18.4.2 of the Technical Handbook as demonstrating consistency with SMCRA. This section of the Handbook discusses constructed drainage facilities near the tops of backfilled highwalls. In the meeting of December 30, 1980, the State confirmed that these drainage structures are the only minor deviations allowed under their statute and regulations. The structures allowed in Chapter 18.4.2 of the State's Technical Handbook are consistent with the Secretary's interpretation of approximate original contour and do not violate the requirement that the highwall be eliminated. The Secretary considers this official State interpretation to be a binding element of the State program and relies upon it in approving the State's provisions as consistent with the federal requirements.

13.12 As discussed in Finding 13.12 of the October 20 Federal Register notice, the State definition of "adequate treatment" in Section 20–6–3(a) of its statute states that treated water shall not lower the water quality standards established for the body of water concerned. Since lowering of water quality standards is an administrative process and not a function of a mining operation, the meaning of the State's definition is unclear. The Attorney General's opinion (Part A) indicates that changes will be proposed to the State Legislature to make this section of the law consistent with Section 515(b)(10) of SMCRA. Furthermore, as stated in Finding 13.7 above, State Regulation Sections 6B.04b, 7B.04b., 8B.04b., 9B.03b, and 10C.03c. are consistent with the federal rules. Approval of West Virginia's program is conditioned on amendment of its statute or other program amendment to meet the concerns discussed in the October 20 notice and make it consistent with Section 515(b)(10) of the SMCRA.

13.13 As discussed in Finding 13.13 of the October 20 Federal Register notice, the State's definition of "affected area" in Section 20–6–3(b) of its statute may not provide jurisdiction over ground water. The Attorney General's opinion (Part A, response to Finding 13.13) points to Section 20–6–14(b)(9) of the WV SCMRA which specifically requires protection of "* * * the quantity and the quality of water in surface and ground water systems * * *". This specific performance requirement establishes the necessary jurisdiction.

13.14 In Finding 13.14 of the October 20 Federal Register notice, the Secretary found that the definition of "disturbed area" in Section 20–6–3(j) of the State law is inconsistent with the federal definition in 30 CFR 701.5. This finding was based on two factors. First, the State definition fails to include areas upon which topsoil, spoil, coal processing waste, underground development waste or non-coal waste are placed. Second, the definition does not provide that the area is considered to be disturbed until the bond is released.

The first concern has been addressed by the requirements of State Regulation Sections 2.20 and 10B.03a, and Chapters 8.4 and 8.12 of the Technical Handbook, except for topsoil storage areas. Section 10B.03a provides that as a requirement of site development for coal mine waste piles, the area must first be cleared and grubbed. Chapter 8.4 and 8.12 of the Technical Handbook provides the same requirement for spoil disposal areas. This means that the area would be "disturbed" as defined by Section 20–6–3(j) of the West Virginia statute. Additionally, State Regulation Section 2.20 provides that "coal waste" is any waste coal, rock shale, slurry, culm, gob, boney, slate, clay or related materials associated with or near a coal seam. These two provisions would assure treatment of the areas which were of concern to the Secretary as "disturbed", except for topsoil storage areas. The Secretary is unable to find that a topsoil storage area would fall within the definition of "disturbed area". Thus, such areas would not be subject to provisions of the program, such as Section 6B.04a. of the State Regulations which requires all surface drainage from the disturbed area to pass through sediment control structures.

The second concern is addressed by the definition of the term "completion of reclamation" at State Regulation Section 2.31.

That definition provides that reclamation is incomplete until the total bond has been released.

Approval of the State's definition of "disturbed area" is conditioned upon inclusion of topsoil storage areas under this provision or other amendment of the State program to make its provisions consistent with the federal requirements.

13.15 As discussed in Finding 13.15 of the October 20 Federal Register notice, Section 711 of SMCRA provides for the use of experimental practices with the authorization of the regulatory authority and the approval of the Secretary, but Section 20–6–33 of the WV SCMRA fails to provide for the Secretary's approval. In the October 20 notice, OSM stated that this deficiency could be corrected by a regulation requiring that all proposed experimental practices receive approval of the Secretary prior to their initiation. State

Regulation Section 3H.04 requires that the Director of OSM approve any experimental practice authorized by the regulatory authority. Since the Secretary has delegated this authority to the Director of OSM, West Virginia's requirement is equivalent to the federal provisions.

13.16 As discussed in Finding 13.16 of the October 20 notice, the narrative discussion in the State's original submission was inadequate to demonstrate the State's capability of administering and enforcing its program. In the narrative discussion in the State's resubmission, the State provided more detailed information on the number, qualification and distribution of permanent program staff. This information is presented at several places in the narrative resubmission. The State describes the staffing of the District Review Teams for reviewing permit applications under the topic "Finding 14.5 Comment No. 25." The number, qualifications and distribution of its permanent program staff, together with estimates as to how existing and proposed staff can effectively administer the program, are identified under the topic "Finding No. 30." On the basis of this new information, the Secretary finds that the State has demonstrated that it has the capability for administering and enforcing its permanent program performance standards. Further discussion concerning these issues can be found in Findings 14, 20 and 30 below.

13.17 30 CFR 816.101(a) (1) and (3) provides that the time for backfilling and grading may be extended only where the permittee demonstrates through a "detailed written analysis" that more time is necessary. State Regulation Section 6B.09b.7 provides that extensions may be granted where the permittee "affirmatively demonstrates" necessity. The Secretary interprets this language to mean that the demonstration must be in writing and thus finds the State's regulations to be equivalent to the federal rule.

13.18 The Secretary finds that State Regulation Section 6B.02, which addresses the casing and sealing of holes for purposes of assuring that water pollution does not result, is not consistent with 30 CFR 816.13–15 because it does not contain provisions for protective devices and temporary sealing. The federal provisions provide for the protection of the public, livestock, wildlife and machinery for the potential harmful effects of exploratory and other holes which are not properly managed or plugged. Approval of West Virginia's program is conditioned upon the addition of language in its regulations or other program amendment providing the additional safeguards found in 30 CFR 816.13–15.

13.19 Federal rule 30 CFR 819.11(c)(1) requires that auger holes discharging water containing toxic-forming or acid-forming material be sealed or treated within 72 hours, while non-discharging holes must be sealed within 30 days. West Virginia's statute, Section 20–6–13(b)(9), require that all auger holes be sealed, but contains no time limit. State Regulation Section 6B.09.b.2. and .3. require that backfilling and grading follow augering within 30 days. Since auger holes would have to be sealed prior to backfilling and grading, this in effect requires that auger holes be sealed within 30 days. With regard to the 72-hour requirement, State Regulation Section 6B.02 provides that no discharge from an auger hole may violate water quality standards. West Virginia representatives stated at the December 30, 1980 meeting that they interpret their rules to require immediate treatment of leaking auger holes. This is more stringent than the federal 72-hour requirement. The Secretary considers this policy statement by West Virginia to be a binding and enforceable part of the State program, and finds the State provisions consistent with the federal provisions.

13.20 The Secretary finds that State Regulation Section 6B.07b., which deals with auger mining, does not meet the requirements of 30 CFR 819.11. First, the State has no counterpart to the requirement in 30 CFR 819.11(a) that auger mining be conducted to maximize recoverability of mineral reserves remaining after mining by providing undistributed areas for future underground entrances along augered highwalls. The requirement generally pertains to only those coal seams and areas where later recovery of remaining minerals would be practical by underground mining techniques.

The second inconsistency is that 30 CFR 819.11(e) provides that the regulatory authority "shall" prohibit auger mining under certain circumstances, including where a prohibition is necessary to maximize mineral recoverability, as well as where there are environmental problems. The State regulations and Section 20–6–13(b)(9) of the WV SCMRA provide that augering "may" be prohibited in order to maximize the utilization, recovery or conservation of the mineral and under certain other listed circumstances.

Approval of West Virginia's program is conditioned on the inclusion of provisions to maximize recoverability of mineral resources as required by Section 515(b)(9) of SMCRA and 30 CFR 819.11, and to make the prohibition of auger mining mandatory as in 30 CFR 819.11(e).

13.21 30 CFR 816.85(d) requires that coal refuse shall be covered with four feet of non-toxic and non-combustible material, except under specified conditions. While Section 8B.05.b of the West Virginia regulations provides for the four-foot cover for facilities incidental to coal mining, Section 10 of the regulations, which governs coal mine waste piles, does not. At the December 30, 1980, meeting, the State noted that omission of the four-foot standard was inadvertent. Approval of West Virginia's program is conditioned upon addition of corrective language in its regulations or other program amendment to provide standards consistent with the federal requirements.

13.22 30 CFR 816.85(a) requires that coal processing waste banks be constructed in compliance with the provisions of 30 CFR 816.71 and 816.72. State Regulation Section 10 fails to incorporate all provisions of 30 CFR 816.71 and .72. Specifically, the State has failed to include requirements consistent with the provisions of 30 CFR 816.71(j), which provides for inspections during construction and 816.72 (b)(1) and (b)(4), which pertain to the design of drainage structures. In addition, State Section 10C.08c.3.c. provides for approval of impoundments on the fill, while 30 CFR 816.71(g) provides that no impoundments shall be allowed. Approval of the West Virginia program is conditioned on amendment of Section 10 of the State regulations or other program amendment to make the State program consistent with these federal requirements.

13.23 30 CFR 816.74(c)(1) requires that fill underdrain design be based on the maximum anticipated discharge. Chapter 10.5.4 of West Virginia's Technical Handbook requires that the system be designed based on measured or anticipated flows, but does not specifically state that maximum flows must be anticipated. However, State Regulation Sections 6A.02.b.1 and 2 require that field flow data must be taken at regular monthly intervals for a period of at least six consecutive months before the permit application. Thus, as the State explained in the December 30, 1980, meeting, it would not be acceptable for an operator to measure or anticipate flow only during a dry season; he or she must anticipate maximum flows. The State provisions are equivalent to the federal rule.

13.24 State Regulation Section 6B.07e.1. provides for modification of backfilling and grading requirements for

special land use purposes. The language of the regulation appears to provide a broad variance from other requirements for backfilling and grading, including requirements for approximate original contour or highwall elimination. The State has provided no explanation of the variance and no criteria for its use. The Secretary cannot approve a provision which allows variances from approximate original contour requirements, except as authorized by Sections 515(c) and 515(e) of SMCRA and 30 CFR 824.11 and 826.15. The language of the West Virginia regulation does not include the criteria included in the federal law and regulations. Approval of the West Virginia program is, therefore, conditioned upon the exclusion of this provision as submitted from the program. If the State intends Regulation Section 6B.07e.1. to implement Section 20–6–13(e) of the WV SCMRA, revised regulations consistent with 30 CFR 824.11 and 826.15 should be proposed.

13.25 30 CFR 786.21(b) provides that existing structures which cannot be reconstructed without causing significant harm to the environment or public health and safety shall be abandoned. West Virginia has no regulation explicitly stating this requirement. However, as the State explained at the meeting of December 30, 1980, they interpret their rules to imply such a requirement. State Regulation Sections 3H.02 and 3H.03 and Chapter 21 of the Technical Handbook provide that all pre-existing structures must comply with all standards in order to be used. This implies that such structures must be abandoned if the standards cannot be met. The Secretary considers this interpretation to be a binding element of the State program and relies upon it in approving this provision as consistent with the federal requirement.

13.26 West Virginia Regulation Sections 6A.02.b.1. and 7A.02.b.1. do not require that permit applications contain water analyses related to total manganese, as required by 30 CFR 783.16(b)(2)(vi). However, WV SCMRA Section 20–6–10a(19) and State Regulation Section 6A.02b. grant the State the necessary authority to require this analysis. Approval of West Virginia's program is conditioned upon addition of a requirement consistent with 30 CFR 783.16(b)(2)(vi).

13.27 30 CFR 816.101(a)(3) requires that during area strip mining operations rough backfilling and grading (1) shall be completed *within 180 days* following coal removal, and (2) shall not be more than four spoil ridges behind the pit being worked. State Regulation Section 6B.09b.4., although it provides that backfilling and grading shall not be more than two spoil ridges or 3,000 feet behind the pit and is more stringent in this regard, is not as stringent overall as the federal rule because it omits the 180-day requirement. Accordingly, approval of the West Virginia program is conditioned upon a regulatory change that incorporates the 180-day requirement into the regulations for backfilling and grading in area strip mining.

13.28 Federal regulation 30 CFR 824.11(a)(7) requires a static safety factor of 1.5 or greater if the outslopes of the level plateau or rolling configuration created by mountaintop removal exceed a slope of lv:2h. West Virginia Regulation Section 6B.07c.2. fails to restrict slopes in excess of lv:2h to those having a static safety factor of 1.5 or greater. Accordingly, the Secretary finds this provision inconsistent with the federal requirements. Approval of the West Virginia program is conditioned upon an amendment which provides for the prohibition of outslopes greater than lv:2h unless a minimum static safety factor of 1.5 will be attained.

13.29 Section 515(d)(1) of SMCRA and 30 CFR 826.12(a)(i)(C) forbid placing or leaving debris on the downslope in areas of steep slopes. State Regulation Section 6B.07.a.2 allows the Director of the DNR to permit windrowing timber where the permittee makes certain showings. The Secretary considered and rejected a similar modification to the federal rule 44 FR 15291, (March 13, 1979). Approval of West Virginia's program is conditioned on amendment of the State program to forbid leaving any debris on the downslope consistent with the federal provisions.

13.30 State Regulation Section 4C.04g. allows a peak particle velocity of two (2) inches per second which shall not be exceeded at the nearest residence, building, or structure. This is inconsistent with 30 CFR 816.65(i), which requires that the maximum peak particle velocity shall not exceed 1 (one) inch per second at the location of any dwelling, public building, etc.

The first problem is that the State standard of two inches per second peak particle velocity is less stringent than the federal standard. The second problem is that the State states that the peak particle velocity shall not be exceeded at the *nearest* residence, building, etc. while the federal regulation says the peak particle velocity shall not be exceeded at the location of *any* dwelling, public building, etc. Ground motion resulting from a blast, depending upon location, topography, and geologic conditions may not be in excess at the nearest dwelling but be in excess at a more distant structure in another direction from the blast location. Therefore, the State regulation is less stringent than its federal counterpart.

Approval of the West Virginia program is conditioned upon amendment of State Regulation Section 4C.04g to reflect the requirements of 30 CFR 816.65(i) regarding peak particle velocity and the locations where the velocity is to be measured.

13.31 The Secretary finds that State Regulation Section 4D.04 does not provide for a 60 day period for alternate land use plan review by appropriate State and Federal fish and wildlife management agencies. This time period is found in 30 CFR 816.133(c)(8) and is designed to provide adequate review of the suitability of such proposed plans prior to the beginning of operations. Approval of West Virginia's program is conditioned upon the inclusion of a regulation or other program amendment to provide for a review period consistent with 30 CFR 816.133(c)(8).

13.32 State regulations addressing the transfer of exploratory or monitoring wells consistent with 30 CFR 816.53 and 30 CFR 817.53 have not been submitted. State Regulation Sections 6B.02, 7B.02 and 8B.02 provide for management, sealing, or casing, or use in groundwater monitoring, but do not contain criteria for transfer of such wells to a third party. Since the State Attorney General has indicated the transfer of wells could occur in West Virginia (Administrative Record No. WV *3236*), such regulations should be included. Approval of the West Virginia program is conditioned upon the addition of requirements consistent with 30 CFR 816.53 and 30 CFR 817.53.

13.33 The West Virginia program does not require that operators promptly notify the regulatory authority of slides which may have a potential adverse affect on public property, health, safety, or the environment or that the operator comply with remedial measures required by the regulatory authority when such slides occur as required by 30 CFR 816.99(b) and 30 CFR 817.99. Notification is important because it is the first in a sequence of events (e.g., emergency evacuations, traffic control, or entry for remedial measures by other than mine personnel) that might occur should the slide pose substantial threats or require more effective measures than those contemplated by the operator or within his power to effect. Approval of West Virginia's program is conditioned upon the inclusion of regulations or other program amendments to require

operators to notify the regulatory authority of slides and comply with any remedial measure required.

13.34 In accordance with 30 CFR 731.13 the State of West Virginia proposed in its resubmission of December 19, 1980 an alternative to the provisions of 30 CFR 816.72, 816.73, and 817.72 which provide for the design standards of valley and head-of-hollow fills. The legal authority for West Virginia's proposal is found in Section 20–6–13 of the West Virginia SCMRA and State Regulation Section 6B.08c. and Chapter 8 of the Technical Handbook.

The State proposal combines all federal requirements for valley and head-of-hollow fills with the exception of the requirements for diversions of water off or away from the fill in channels at the sides of the fill, 30 CFR 816.72 and 817.72. This combination of criteria would result in all West Virginia fills having a central rock core drain without the diversion of water provided in the federal valley fill requirements. The requirement found in 30 CFR 816.73(a), which assures that head of hollow fills are limited to a maximum 250,000 cubic yards if not constructed to the ridge line, would not be included. The State could approve exceptions to these requirements under State Regulation 6B.08c if the method of construction had been previously approved by OSM.

The limitation on the size of head of hollow fills that are not constructed at the ridge line was adopted in the federal regulations based upon evidence then available and expert opinion submitted to the Secretary. This data indicated that the central rock core drain system could be blocked or the flow of water entering the core impeded over time if the structure was situated so as to be subjected to the flow from a substantial upstream drainage area. This impeded flow or blockage could affect the water carrying capacity of the rock core system and eventually, the structural integrity of the fill. In addition, there was concern that the increased flow onto the face of the fill from the increased upslope drainage would erode the surface of the fill creating downstream pollution and surface instability and potentially saturate the fill so as to affect its integrity.

The State has provided two justification documents in support of its proposal: The West Virginia Section of the American Society of Civil Engineers, Committee on Surface Mining Regulations Report and a professional field evaluation of existing fills in West Virginia, conducted June 30 through July 2, 1980, by a committee composed of industry and State government officials representing a variety of disciplines. It is difficult to draw specific conclusions from these documents regarding long term effects of allowing run-off from upslope drainage areas through a rock core system in or over fills greater than 250,000 cubic yards. The documents do provide evidence and experience that West Virginia rock core fills are sound and may provide "* * * a higher factor of safety than natural hillsides * * *" The two studies take note of the fact that the rock core has a percentage of voids as high as 25 to 30% of total volume of the core and that the voids are substantial in relation to the amount of fines which would be transported through the core. Further infiltration of material from the face of the fill or to the core would be limited due to required revegetation and reclamation practices. These factors support a finding that the probability of blockage or impeded water flow is within acceptable limits.

The results of the American Society of Civil Engineers report are further verified by the field inspection and study of actual fills constructed in the 1970's in West Virginia under equivalent or very similar design criteria as that proposed. The observations indicate that the fills have remained stable in fact and show for all practical purposes that neither degradation in their integrity nor significant pollution from the flow through the core or from drainage transported across the face of the core have occurred.

The local geologic, topographic, and hydrologic conditions and industry familiarity with West Virginia rock core drainage systems establish the need for the modification of federal requirements proposed by West Virginia. These factors must be balanced against the complexity of designing, constructing and maintaining steep slope conveyances for drainage across natural ground required by the present valley fill requirements.

The Secretary finds that the materials provided by West Virginia support approval of the proposed "state window" but remains concerned about the potential impacts of substantial flows of water onto or over the fill from drainage areas above. In order to fully assure that substantial problems will not result, the Secretary's approval is conditioned on the State providing additional scientific data or studies to substantiate the capability of the rock core system to handle the long term excess run-off that can result from allowing uncontrolled drainage onto or over the fill without adverse effects. If the additional data provided by the State indicate that size changes in the drainage system or maximum fill limits are needed to insure long term water carrying capacity and integrity, such changes will be required of the State.

13.35 West Virginia Regulation Section 6B.05 allows spoil blending as a method of handling acid-producing or toxic-producing materials. Federal regulation 30 CFR 816.103(a)(1), which required burial in all cases, has been suspended and an amendment has been proposed. 45 FR 8241–8245 (February 6, 1980). Until this rule becomes final, States need only meet the requirement in the federal Act. Under Section 515(b)(14) of the Act, such materials must be treated, buried "or otherwise disposed of in a manner designed to prevent [water] contamination * * *" This would allow blending in circumstances where blending would be an effective method of preventing contamination. The Secretary assumes that the Department of Natural Resources will only allow blending where it will be effective, and accordingly finds the State provision consistent with the federal provision.

13.36 30 CFR 824.11(a)(8) requires that surface runoff from mountaintop removal operations be diverted away from valley or head-of-hollow fills. State Regulation Section 6B.07c.3. contains no such requirement. However, the State Regulation does require that the contour shall be graded to drain inward from the outslope except at specific points where it drains over the downslope in constructed channels. At the December 30, 1980, meeting, the State clarified that this provision was consistent with 30 CFR 824.11(a)(8) in that it would not allow drainage from the operation to be diverted through the associated fill. The Secretary considers this interpretation to be a binding element of the State program and relies upon it in approving the State's provision as consistent with federal requirements.

13.37 30 CFR 816.49(a) (1) and (4) and 817.49(a) (1) and (4) require that the quality of water in permanent impoundments be maintained and that discharges meet applicable water quality standards. West Virginia has no such explicit requirement. However, State Regulation Section 6B.07e.2. requires that the plan for an impoundment include data on water quality, and 6B.04b. requires that federal or State water quality and effluent limitations be met. Further, as the State explained in the December 30, 1980, meeting, the bond will not be released if these standards are not met. The Secretary considers this interpretation to be a binding element of the State program and relies upon it in approving

the State's provision as consistent with federal requirements.

Finding 14

The Secretary finds that the Department of Natural Resources has the authority under West Virginia laws and regulations and the West Virginia program includes, except as noted below, provisions to implement, administer and enforce a permit system consistent with 30 CFR Chapter VII, Subchapter G (permits). This finding is made under the requirements of 30 CFR 732.15(b)(2).

West Virginia incorporates provisions corresponding to Sections 506, 507, 508, 510, 511, and 513 of SMCRA and Subchapter G of 30 CFR Chapter VII in Chapter 20, Article 6, Sections 8, 9, 10, 11, and 18 of the Code of West Virginia and State Regulation Sections 3, 5A, 6A, 7A, 8A, 9A and 10A. Section (g)(1) of the State's program narrative contains discussions of the systems for (1) issuing permits, (2) incidental mining permits, (3) surface mining, underground mining and other operations permits, (4) permit revisions, (5) permit renewals and (6) transfer, assignment, and/or sale of permit rights.

Discussion of significant issues raised during the review of the West Virginia permit provisions follows.

14.1 As discussed in Finding 14.1 of the October 20, 1980 **Federal Register** notice, WV SCMRA Section 20–6–10(a)(3) is inconsistent with Section 507(b)(3) of SMCRA. The federal statute requires that a permit applicant submit with the application a statement of any current or previous surface coal mining permits or pending application for such a permit held by the applicant in the United States. West Virginia law requires only a statement of any current surface mining permits held by the applicant or pending application in West Virginia. The Attorney General's opinion refers to proposed statutory amendments to correct this deficiency. Approval of West Virginia's program is conditioned on statutory changes necessary to meet the requirements of 507(b)(3) of SMCRA as outlined above.

14.2 As discussed in Finding 14.2 of the October 20, 1980 **Federal Register** notice, Section 507(b)(5) of SMCRA requires that a permit applicant submit a statement of suspended or revoked mining permits for the previous five year period. WV SCMRA Section 20–6–10(a)(5) limits this requirement to "permanently" suspended permits which are, in effect, revoked permits. The Attorney General's opinion (Part A) indicates that legislative changes will be proposed to make the State program consistent with the federal sections. Approval of West Virginia's program is conditioned on amendment of its statute to correct this deficiency.

14.3 As discussed in Finding 14.3 of the October 20, 1980 **Federal Register** notice, Section 510(c) of SMCRA requires that the applicant file with his permit application a schedule listing any and all notices of violation pertaining to air or water environmental protection incurred by the applicant on any coal mining operation in the United States within the three-year period prior to the date of the application. WV SCMRA Section 20–6–10(f) requires this schedule only for bond forfeitures, permit revocation, cessation orders or permanent suspension orders. It does not require that other types of notices of violations be reported. In addition, Section 20–6–18(c) of the WV SCMRA allows the Director to consider only violations of West Virginia laws during the decision making process on permit applications. The Attorney General's opinion (Part A) states that a statutory change will be proposed to correct this deficiency.

Furthermore, State Regulation Section 3F.01b., which was submitted to partially correct this deficiency, has in fact complicated the issue. It requires reporting "violations of any law, rule, or regulation of West Virginia, or of any State law, rule, or regulation enacted pursuant to Federal law, rule or regulation. . . ." This means that violations of any federal law, rule or regulation would not have to be reported. Approval of West Virginia's program is conditioned on amendment of the State law and regulations to make them consistent with the requirements of Section 510(c) of SMCRA.

14.4 Under Section 20–6–31 of the WV SCMRA, special provisions exist under which a person involved in non-coal development of a property may obtain a special permit if, in the course of the non-coal development, coal will be removed from five acres or less. These provisions are implemented in Section 9 of the West Virginia Regulations.

The special provisions for these "incidental permits" apply to the development of land for commercial, residential, industrial or civic use. The purpose of the incidental permits is to expedite coal removal in instances where the primary purpose of the land development is not coal mining, but where a coal seam is or will be encountered in the course of the development.

West Virginia has had incidental permits as part of its regulatory scheme for the past three years. During that period, 35 incidental permits were issued for development affecting a total of 130 acres. Five of those permits affected two acres or less, which means they would have been exempt from the requirements of SMCRA. No special or severe environmental problems have been brought to the Secretary's attention by any member of the public in connection with any of these incidental permits. The Secretary specifically requested public comment on this provision of the State program in Finding 14.4 of the October 20, 1980, **Federal Register** notice. Incidental permits represent a particularly useful mechanism for expedited permitting in West Virginia, where commercial land development often occurs in areas underlain by coal and where coal is encountered in the course of unrelated construction projects. The statistics and other specific information presented to the Secretary on incidental permits are found in a December 1, 1980, letter from James Pitsenbarger to Paul Reeves, together with 100 pages of accompanying justification, copies of which were included in the West Virginia resubmission. (Administrative Record No. WV–261)

Under Section 528(2) of SMCRA and the implementing regulations, all operations affecting two acres or less are exempt from all requirements of the federal law. In addition, coal removal incidental to government financed construction is exempt from the substantive requirements of SMCRA, without regard to acreage affected. Accordingly, the only incidental permit operations required to comply with minimum Federal standards are those privately funded projects affecting between two and five acres.

The Secretary has examined the incidental permit provisions in West Virginia's law and regulations to determine whether they meet minimum requirements for permitting, bonding, performance standards and inspection and enforcement. With respect to the contents of the incidental permit application, there are detailed requirements for maps, ownership information, compliance history of the developer, site development plans, blasting plans and vegetation plans. Several specific requirements for permit contents found in Sections 507 and 508 of SMCRA are not explicitly required in SCMRA or State regulations. However, the State has assured the Secretary that it will require all additional information which may be appropriate to determine compliance with the performance standards applicable to the operation. Approval of the State provision is conditioned on the State demonstrating

that all applicable data will be included in the application.

The incidental permit regulations also include detailed performance standards, including signs and markers, top soil, water quality, acid-producing and toxic materials, monitoring, revegetation, backfilling and grading. In addition, there are special standards for projects located on steep slopes. While these requirements include most of the relevant performance standards of SMCRA and 30 CFR Chapter VII, some Federal requirements are not clearly included, such as prime farmlands requirements, requirements related to augering during construction, and the like. A complete list of these areas is found in Administrative Record No. WV-317. The State has agreed to provide further information to remedy deficiencies in the performance standards, or explain why the program is not deficient. Approval of this provision is conditioned on the State completing this demonstration.

Bonding of incidental permits is required at the rate of $2,000 per acre affected. This is in keeping with the bonding scheme for all West Virginia permits, where a general fund will be used to cover bond liability above a minimum amount. The State has assured the Secretary that this fund is available for incidental permit liability above the $2,000 otherwise posted by the developer. The State provisions allow the release of the bond at the conclusion of site preparation, rather than requiring the five-year revegetation responsibility found in Section 515(b)(20) of SMCRA. Since the permits are only issued where development would occur, revegetation will not normally be a problem. The State will, however, look to the general fund after the posted bond is released. (Administrative Record WV 318) Since Section 519(c) of SMCRA allows 85 percent of the bond to be released before the five-year revegetation responsibility period runs out, the Secretary deems the West Virginia provisions approvable as an alternative bonding system under Section 509(c) of SMCRA.

Section 20-6-31(c) of the WV SCMRA is somewhat ambiguous, in that it might be read to exempt developers holding incidental permits from periodic inspections and enforcement provisions applicable to all other permittees. The Office of the Attorney General has assured the Secretary that this section does not exempt incidental permittees from the inspection and enforcement provisions of the West Virginia program. (Administrative Record WV-318).

Finally, the program does not set forth in detail the public participation provisions applicable to these incidental permits, although State Regulation Section 9A.03 does require evidence of notification by the operator to owners of contiguous surface areas. The State has assured OSM that it will post all incidental permit applications for at least ten days in the DNR office nearest the development site.

The Secretary finds that the West Virginia provisions for public participation in issuance of incidental permits is inadequate, and conditions his approval upon the State adopting provisions to assure public notice of and opportunity to participate in decisions on incidental permits.

14.5 As discussed in Finding 14.5 of the October 20 Federal Register notice, many deficiencies existed in the State's permitting procedures, as addressed in a letter dated May 23, 1980, from OSM to the Department of Natural Resources. [Administrative Record No. WV 84] Additional program narrative (identified as "Finding 14.5, Response to Part II") resolved all of the concerns expressed in this letter.

14.6 Under 30 CFR 780.37 and 784.24, each permit application must describe each road, conveyor, or rail system in the permit area. State Regulation Section 4A.01 requires the same information, but subsection b. provides that it shall include only railroads over which the applicant has a reasonable opportunity to exercise control, and defines when such an opportunity will be considered to exist. The definition is narrowly drawn and assures that the operator cannot, by voluntarily transferring ownership of part of the operation, avoid the requirements otherwise applicable to a coal operation.

West Virginia's provision is as stringent as the federal provision because the Secretary does not interpret 30 CFR 780.37 to require that an operator submit information for portions of a railroad over which the operator could not possibly exercise any control. Such areas are not required to be within the permit area and need not be bonded. These areas are subject to the jurisdiction of other governmental agencies.

14.7 30 CFR 788.12(a)(3) requires that a permit revision shall be obtained in order to continue operation after the cancellation or material reduction of the liability insurance or performance bond upon which the original permit was granted. The State does not have a provision explicitly stating this requirement. However, as the State explained in the December 30, 1980, meeting, they interpret their rules to require that a permit be revoked if the operator loses or reduces his or her bond or insurance. This interpretation is based on State Regulation Section 3D.02, which requires that the insurance policy remain in effect during the life of the permit or any renewal, and on State Regulation Section 4H.03.a., which requires that liability under the bond continue until all reclamation is complete.

14.8 West Virginia regulations do not contain provisions for public and other notification by the regulatory authority as to the approval, modification or denial of a permit application, as required by 30 CFR 786.23(e). Under this provision, the regulatory agency's written findings regarding the permit application must be sent to the applicant and simultaneously to each person and government official who filed written objection or comment with respect to the application and to the Regional Director of (OSM). The regulatory authority must also publish a summary of its decision in a newspaper or similar periodical of general circulation in the general area of the proposed operation. Approval of West Virginia's program is conditioned on the adoption of a regulation or other program amendment consistent with 30 CFR 786.23(e) regarding public and other notification of permit application decisions.

14.9 The Secretary finds that West Virginia Regulation Section 12B.07b., possibly due to clerical error, could be construed to restrict the availability of boring and sampling analyses to the public in conflict with 30 CFR 786.15(a)(2) and Section 507(b)(17) of SMCRA. The State regulation is also inconsistent with WV SCMRA Section 20-6-11(a)(12). The State regulation would require only that information on potentially toxic materials be made available to the public and that all other information be kept confidential. Approval of West Virginia's program is conditioned upon the amendment of State regulation 12B.07b. to be consistent with Section 20-6-11(a)(12) of the WV SCMRA and 30 CFR 786.15(a)(2).

Finding 15

The Secretary finds that the Department of Natural Resources has, except as noted below, the authority to regulate coal exploration consistent with 30 CFR Parts 776 and 815 and to prohibit coal exploration that does not comply with 30 CFR Parts 776 and 815, and the West Virginia program includes provisions adequate to do so, except as noted below. This finding is made under the requirements of 30 CFR 732.15(b)(3).

The West Virginia program incorporates provisions corresponding to Section 512 of SMCRA and 30 CFR

Parts 776 and 815 (as related to coal exploration) in Chapter 2, Article 6, Section 8 of the WV Code of and State Regulation Section 5. Section (g)(1) of the program narrative includes discussion of the systems for exploration, review, and approval. In the West Virginia law and program, exploration is referred to as prospecting.

15.1 As discussed in Finding 15 of the October 20 **Federal Register** notice, West Virginia's program narrative discussing approval or denial of prospecting permits was inconsistent with Section 20–6–8 of the State law. The Secretary finds that Section (g)(1) of the State's narrative resubmission (identified as "Finding 14.5 Comment No. 6") now discusses State procedures for approval or denial of prospecting permits consistent with State statutory requirements.

15.2 30 CFR 776.12(a)(3)(i) and 30 CFR 776.12(a)(5) require that exploration applicants requesting approval to remove more than 250 tons of coal supply, among other information, a map and narrative describing the proposed area. WV SCMRA Section 20–6–8(b)(1) and State Regulation Section 5A.01b.12. also require a map and a narrative. However, the West Virginia program lacks provisions consistent with several of the federal requirements. Approval of the West Virginia program is conditioned on adoption of provisions consistent with the following: An additional provision as required by 30 CFR 776.12(a)(3)(i), requiring a description of surface topography, geology, surface water and other physical features, vegetative cover, and the distribution and important habitats of fish and wildlife; and a map, as required by 30 CFR 776.12(a)(5), identifying proposed trenches, roads, structures, land excavations, water and coal exploratory holes, wells, and earth and debris disposal areas, historic, cultural, and drainage features, and habitats of any endangered or threatened species listed pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.).

Finding 16

The Secretary finds that the Department of Natural Resources has the authority under West Virginia law and that the West Virginia program includes provisions to require that persons extracting coal incidental to government-financed construction maintain information on site consistent with 30 CFR Part 707. This finding is made under the requirements of 30 CFR 732.15(b)(4).

As discussed in Finding 16 of the October 20 **Federal Register** notice, West Virginia needed to enact regulations adequate to implement Section 20–6–29(3) of the WV SCMRA, concerning extraction of coal incidental to government-financed construction, in accordance with the requirement of 30 CFR Part 707 and 30 CFR 732.15(b)(4). The West Virginia program resubmission contains State Regulation Section 9C which is consistent with 30 CFR Part 707 and meets the requirements of 30 CFR 732.15(b)(4).

Finding 17

The Secretary finds that the Department of Natural Resources has the authority and the West Virginia program includes provisions to enter, inspect, and monitor all coal exploration and surface coal mining and reclamation operations on non-Indian and non-federal lands within West Virginia, consistent, except as noted below, with the requirements of Section 517 of SMCRA (inspections and monitoring) and 30 CFR Chapter VII, Subchapter L (inspection and enforcement). This finding is made under the requirements of 30 CFR 731.15(b)(5).

Provisions corresponding to Section 517 of SMCRA and Subchapter L of 30 CFR Chapter VII for inspection and monitoring are found in Chapter 20, Article 6, Section 15 of the Code of West Virginia and State Regulation Section 14 of the State Regulations. Section (g)(4) of the program narrative contains a discussion of West Virginia's inspection procedures. Discussion of significant issues raised during the review of the West Virginia inspection and enforcement procedures follows:

As discussed in Finding 17 of the October 20 **Federal Register** notice, Section 521(a)(1) of SMCRA grants authority to citizens to accompany an inspector during an inspection resulting from a citizen's complaint. Section 20–6–15(g) of the WV SCMRA provides, however, that neither the permittee nor his authorized agents or employees shall be liable for any injury sustained by a citizen accompanying the inspector onto the minesite except for willful and deliberate acts. The Secretary found in the October 20 **Federal Register** notice that this provision of the West Virginia SCMRA could operate as a constraint on citizens exercising their right to go to the mine site. Consequently, approval of the West Virginia program is conditioned upon the deletion of this provision from Section 20–6–15(g) of the WV SCMRA.

Finding 18

The Secretary finds that the Department of Natural Resources has the authority under the West Virginia law and the West Virginia program includes provisions to implement, administer, and enforce a system of performance bonds and liability insurance, or other equivalent guarantees consistent with the requirements of Sections 509 and 519 of SMCRA and 30 CFR Chapter VII, Subchapter J (performance bonds). The Secretary finds that the Department of Natural Resources has the authority under West Virginia law and the West Virginia program includes provisions to implement, administer, and enforce an alternative system of performance bonds consistent, except as noted below, with Section 509(c) of SMCRA. This finding is made under the requirements of 30 CFR 732.15(b)(6).

Provisions corresponding to Sections 509 and 519 of SMCRA and to Subchapter J of 30 CFR Chapter VII are incorporated in Chapter 20, Article 6, Sections 12 and 26 of the Code of West Virginia and State Regulation Section 4H. Section (g)(3) of the State program narrative contains descriptions of the State's process for implementing, administering, and enforcing a system of performance bonds and liability insurance or other equivalent guarantees.

Discussion of significant issues raised in the review of West Virginia's bonding and insurance provisions follows:

18.1 As discussed in Finding 18.1 of the October 20 **Federal Register** notice, West Virginia needed to submit additional information to demonstrate that its alternative bonding system will provide sufficient funds to allow the DNR to complete reclamation where necessary and that the system will provide an incentive for the operator to fulfill his or her obligations. Regulation 4H and the Attorney General's opinion (Part A, as Finding 18.1) address these concerns. The Secretary agrees that the approach taken by West Virginia is innovative and finds that the funding system is procedurally approvable.

The sole remaining concern of the Secretary is whether or not the State fund will always contain enough money to cover the demands made upon it. The materials submitted in the Attorney General's opinion, although they provide some information on the amount of money in the fund, are not sufficient for a final determination by the Secretary that projected fund balances will be either more or less than may be required under reasonably projectable conditions. The Secretary believes that such a determination, based on standard statistical and actuarial techniques, is required before the size of the fund is finally approved. Thus, approval of the State alternative bonding system is

conditioned on the State providing the Secretary within a reasonable period of time with the results of an analysis by a professionally qualified party using standard statistical and actuarial techniques, sufficient to demonstrate that the amount of money going into the fund will cover the demands likely to be placed upon it. Further, the State will have to modify the limits on the fund balance now included in West Virginia SCMRA if such changes are found necessary as a result of this study. OSM will assist the State in the design and conduct of the study if requested to do so by DNR.

18.2 Finding 18.2 of the October 20 **Federal Register** notice stated that Section 20–6–12(f) of the WV SCMRA was inconsistent with Section 509(a) of SMCRA because it could allow violation of federal water quality requirements. The West Virginia provision allows release of the bond if untreated drainage or discharge "is not lower than the water quality of the receiving stream." The Secretary's finding was in error to the extent it relied upon Section 509(a) since neither that section nor Section 519 of SMCRA restrict the release of the backfilling and grading portion of a bond on the basis of water quality. However, to the extent the State provision could be interpreted to allow discharges in violation of the water quality standards for the receiving stream it would violate the provisions of the Federal Water Pollution Control Act, as amended, and the requirements of Sections 510 and 515 of SMCRA regarding the protection of hydrologic resources. The Secretary finds that State Regulation Section 6B.04b. does require all discharges from the permit area to meet water quality standards. This provision and West Virginia Code, Chapter 20, Article 5A, resolves the concerns expressed by the Secretary in the October 20 notice. (See also the Attorney General's opinion Part A, response to Finding 13.7.)

18.3 As discussed in Finding 18.4 of the October 20 **Federal Register** notice, the narrative discussion in the State's original submission was inadequate in that it provided no information on the State procedures for filing bonds or insurance policies. The narrative resubmission relating to Finding 18.1 presents additional information on West Virginia's bonding and insurance provisions. This information together with State Regulation Sections 3 and 4H of the State's regulations demonstrates that the State's bonding and insurance procedures meet the requirements of 30 CFR Part 806. The Secretary finds these procedures acceptable.

18.4 Section 507(f) of SMCRA and 30 CFR 806.14(b) provide that the liability insurance policy must remain in force during the life of the permit, including reclamation operations. Section 20–6–10(a)(19)(d) of the WV SCMRA contains a similar provision, but State Regulation Section 3D.01 provides that blasting insurance need be in effect only as long as blasting activities occur. The Secretary finds this provision consistent with the federal provision. Section 507(f) of SMCRA and 30 CFR 806.14(b) do not require that the insurance policy continue to cover blasting when no blasting is occuring. However, the basic liability policy must remain in effect until reclamation activities are complete.

Finding 19

The Secretary finds that the Department of Natural Resources has, except as noted below, the authority and the West Virginia program provides, except as noted below, for civil and criminal sanctions for violations of West Virginia law, regulations and conditions of permits and exploration approvals including civil and criminal penalties consistent with Section 518 of SMCRA (penalties) including the same or similar procedural requirements. This finding is made under the requirements of 30 CFR 732.15(b)(7).

Provisions corresponding to Section 518 of SMCRA and to 30 CFR 845 are incorporated in Chapter 20, Article 6, Section 17 of the Code of West Virginia and in Section 14 of the State's Regulations. Section (g)(7) of the program narrative contains descriptions of the State's procedures for civil and criminal sanctions.

In Finding 19 of the October 20 **Federal Register** notice the Secretary found several provisions of State law unacceptable as being inconsistent with SMCRA and the regulations promulgated thereunder. Many of these problems involve statutory deficiencies which could not be addressed before the resubmission, because the State legislature did not convene until after resubmission. The State has submitted both revised and additional regulations which do modify the nature and extent of some deficiencies. Thus, the Secretary finds that State requirements and provisions remain inconsistent with federal requirements and provisions as set forth in the following findings. Approval of the West Virginia program is conditioned upon revisions which remedy these inconsistencies.

19.1 In Finding 19.2 of the October 20 **Federal Register** notice, the Secretary noted several inadequacies in the State's proposal for assessing, adjudicating, and collecting civil penalties. The areas of concern were (1) inadequate description of the procedures for proposing civil penalties; (2) lack of regulations pertaining to the administrative assessment of civil penalties; (3) use of the Magistrate Courts to impose civil penalties; (4) failure to provide for the prepayment of civil penalties into an escrow account; (5) failure to provide that findings of fact and a written decision shall be prepared after a public hearing; (6) no specific provision for public participation; and (7) provision for a jury trial in magistrate court. A detailed discussion of the issues involved with each of these considerations can be found in the October 20 **Federal Register** notice (45 FR 69258–69259).

With respect to the description of the procedures for proposing civil penalties and the development of regulations pertaining to the administrative assessment of civil penalties, the State's resubmission contains State Regulation Section 14A.02. This section provides that each reclamation inspector shall, within fifteen days of issuing a notice or order, confer with his reclamation supervisor or other duly authorized person, who shall determine the amount of penalty to be sought using the factors listed in WV SCMRA Section 20–6–17(c). This approach to making penalty assessments is sufficient to meet the Secretary's concerns in this regard with one exception. Section 518(b) of SMCRA envisions the administrative assessment of penalties. Section 20–6–17(c) of the WV SCMRA contains the same general criteria for assessing penalties as Section 518(a) of SMCRA, but the State program contains no regulations or other procedures which would give inspectors or magistrates any guidance as to how these general criteria would be applied in specific factual situations. Although the State cannot be required to develop any particular system for assessing civil penalties, some form of guidance is necessary. The failure to provide any regulations or guidelines for assessing penalties would almost certainly result in widely varying assessments under similar factual situations. In addition, without additional written guidance, magistrates could change the penalty proposed by the inspector with virtual impunity. This would, for all practical purposes, result in judicial determination of penalties, which is inconsistent with 518(b) of SMCRA. Accordingly, approval of West Virginia's procedures for proposing civil penalties is conditioned on the adoption of regulations, or other program amendment, which would provide

guidance to inspectors and magistrates for applying the general criteria of WV SCMRA Section 20–6–17(c).

The State's proposal for using the magistrate court to impose civil penalties contained in its original March 3, 1980 submission has been changed by virtue of proposed statutory amendments to WV SCMRA Section 20–6–17(d). These changes, as explained in the Attorney General's opinion (discussion at Part A, response to Findings 19.3 and 27.4) address the concerns of the Secretary previously set forth in Finding 19.2 of the October 20 Federal Register notice. The proposed statutory changes would make the magistrate judges similar to administrative law judges in all significant respects. Approval of this aspect of the West Virginia program is conditioned upon enactment of proposed statutory changes or other program amendments which meet the concerns of the Secretary expressed here and in Finding 19.2 of the October 20 Federal Register notice.

The State has proposed an amendment to WV SCMRA Section 20–6–17(d) which provides that an operator must place the amount of a proposed penalty in escrow if the operator wishes to challenge the penalty in magistrate court. Approval of the West Virginia program is conditioned upon the enactment of statutory language or other program changes which meet the prepayment requirement of Section 518(c) of SMCRA.

The State has proposed an amendment to Section 20–6–17(d) of the WV SCMRA that would provide citizens full access to the magistrate court, including intervention and recovery of attorney fees. Approval of the State program is conditioned upon the enactment of statutory changes or other program changes which address the concerns of the Secretary as set out here and in Finding 19.2 of the October 20 Federal Register notice. The State has proposed an amendment to Section 20–6–17(d) which makes clear that jury trials are not available in civil penalty proceedings in magistrate court. Approval of the West Virginia program is conditioned upon statutory or other program changes, which insure that jury trials will not be available in civil penalty proceedings.

19.2 In Finding 19.3 of the October 20 Federal Register notice, the Secretary found that West Virginia Code Ann. Section 50–5–12, which provides that appeals from the magistrate court to the county circuit court are *de novo*, is inconsistent with Section 525 of SMCRA. The Attorney General's opinion (Part A, response to Findings 19.3 and 27.4) states that a legislative change will be proposed to eliminate *de novo* review of magistrate decisions. Approval of the West Virginia program is conditioned on amendment of the State statute or other program change which corrects this deficiency.

19.3 In Finding 19.4 of the October 20 Federal Register notice, the Secretary found that Section 20–6–17(a) of the WV SCMRA, which provides that mandatory daily penalties for certain cessation orders terminate once corrective steps have been *initiated* to the satisfaction of the inspector, is inconsistent with 518(h) of SMCRA, which provides that the penalty shall be imposed for each day the violation continues unabated. The Attorney General's opinion (Part A, response to Finding 19.4) states that a legislative change will be proposed to correct this inconsistency. In the interim, State Regulation Section 14A.02c specifies that only when the violation is abated will corrective steps have been "initiated to the satisfaction of the reclamation inspector." While this regulation reduces the Secretary's concern, approval of the West Virginia program is conditioned on amendment of the State statute which corrects this deficiency.

19.4 In Finding 19.5 of the October 20 Federal Register notice, the Secretary found that the West Virginia program provides two independent avenues for appealing a notice of violation, which could lead to forum shopping and inconsistent interpretations of State law. The Attorney General's opinion (Part A, response to Finding 19.5) states that a legislative change will be proposed to place jurisdiction over civil penalty cases exclusively in the magistrate system. In the interim, the Reclamation Board will interpret the provisions of 20–6–17(d) of the WV SCMRA as removing appeals of civil penalty cases from board jurisdiction. While this regulation reduces the Secretary's concern, approval of the West Virginia program is conditioned upon revisions to the program which correct this deficiency.

Finding 20

The Secretary finds that the Department of Natural Resources has, except as noted below, the authority under West Virginia law to issue, modify, terminate and enforce notices of violation, cessation orders and show cause orders consistent with Section 521 of SMCRA (enforcement) and with 30 CFR Chapter VII, Subchapter L (inspection and enforcement), including the same or similar procedural requirements. This finding is made under the requirements of 30 CFR 732.15(b)(8).

Provisions corresponding to Section 521 of SMCRA and to Subchapter L of 30 CFR Chapter VII are included in Chapter 20, Article 6, Sections 16 and 17 of the Code of West Virginia and Section 14 of the State's Regulations.

In Finding 20 of the October 20, 1980 Federal Register notice, the Secretary found certain provisions of the West Virginia program unacceptable as inconsistent with SMCRA and the regulations promulgated thereunder. Several of the problems previously identified by the Secretary involve statutory deficiencies which could not be addressed before the State resubmission because the legislature does not convene until after the resubmission. However, West Virginia has made changes in its resubmission in several areas which address certain previously identified problems and minimize the effect of others.

The following constitute the Secretary's findings on this portion of the West Virginia resubmission. Approval of the West Virginia program is conditioned upon revisions to the State Program which remedy these inconsistencies.

20.1 As discussed in Finding 20.1 of the October 20 Federal Register notice, Section 20–6–16(a) of the WV SCMRA grants discretionary authority for an inspector to issue a cessation order in situations of imminent danger. Section 521(a)(2) of SMCRA mandates that such orders be issued.

State Regulation Section 14A.03a mandates that inspectors issue a cessation order in situations of imminent danger. The Secretary finds that with this revision the West Virginia program is consistent with the federal requirements.

The Secretary recommends that the West Virginia statute be changed to provide for mandatory issuance of cessation orders in these situations. A successful challenge to the authority of the Department of Natural Resources to promulgate or enforce the regulation might result in the Secretary being forced to intervene in the administration of the West Virginia program. A statutory amendment mandating the issuance of a cessation order in cases of imminent environmental harm or danger to persons would obviate this possibility.

20.2 As discussed in Finding 20.2 of the October 20 Federal Register notice, Section 20–6–17(a) of the WV SCMRA provides that if an operator affirmatively demonstrates that compliance with a notice of violation is unattainable due to conditions totally beyond the control of the operator, issuance of a cessation order for failure

to abate is not mandatory. As the Secretary noted in the October 20 **Federal Register** notice, this appears to be inconsistent with Section 521(a)(3) of the SMCRA, which provides for a maximum time limit of 90 days for abatement of violation and for immediate cessation where a violation is not timely abated.

The Attorney General's opinion explains that this exception applies only to (1) strikes which result in employees of the operator being completely excluded from taking steps to correct the problem, and (2) acts of God as that phrase is generally understood (i.e. cataclysmic events and not just heavy rain, *Adkins v. City of Hinton*, 142 S.E. 2nd 889 (1965)).

The Secretary believes that he has the authority to recognize legitimate, narrowly-drawn exceptions to the ninety-day abatement limitation, and that the State's exceptions meet this test. These exemptions in no way act as a deterrent to prompt remedial action and would never provide a defense to an operator whose negligence, tardiness or failure to anticipate foreseeable problems were a contributing factor in his failure to abate. The Secretary, therefore, finds that the exceptions to the ninety-day abatement limitation contained in Section 20–6–17(a) of the WV SCMRA, as limited by the Attorney General's opinion, are consistent with Section 521(a)(3) of SMCRA.

20.3 As discussed in Finding 20.3 of the October 20 **Federal Register** notice, Section 20–6–17(a) of the WV SCMRA provides that if any of the requirements of the law and regulations or permit conditions have not been complied with, the Director "may cause a notice of violation to be served on the operator". Section 521(a)(3) of the SMCRA requires mandatory issuance of a notice of violation when the Secretary or his authorized representative determines that any permittee is in violation of any requirement of the Act or any permit condition required by the Act. State Regulation Section 14A.04 requires each inspector to issue a notice of violation for all violations observed. The Secretary finds that this regulation makes West Virginia's program consistent with the Federal Act.

The Secretary recommends that Section 20–6–17(a) of the WV SCMRA statute be amended to provide for mandatory issuance of notices of violations for all observed violations. A successful challenge to the authority of the Department of Natural Resources to promulgate or enforce this regulation might result in the Secretary being forced to intervene in the administration of the West Virginia program. A statutory amendment mandating the issuance of a notice of violation would obviate this possibility.

20.4 As discussed in Finding 20.4 of the October 20 **Federal Register** notice, Section 521(a)(3) of SMCRA provides that a cessation order shall remain in effect until the Secretary determines that the violation has been abated. Section 20–6–17(a) of the WV SCMRA provides for a mandatory daily civil penalty only until corrective steps have been initiated. The Secretary finds this provision inconsistent with the Federal requirements. The Attorney General's opinion (Part A, response to Finding 20.4) states that a legislative change will be proposed to correct this inconsistency. In the interim, State Regulation Section 14A.03b specifies that the cessation order shall remain in effect until the violation is abated. While this regulation reduces the Secretary's concern, approval of the West Virginia program is conditioned on amendment of the State statute which corrects this deficiency.

20.5 As discussed in Finding 20.5 of the October 20 **Federal Register** notice, Section 20–6–16(a) of the WV SCMRA mandates that a cessation order shall expire twenty-four hours after the order becomes effective unless an informal conference is held by a reclamation supervisor at or near the mine site. Section 521(a)(5) of SMCRA states that a cessation order shall expire within thirty days unless a public hearing is held at or near the mine site. In Finding 20.5 of the October 20 **Federal Register** notice, the Secretary found that the State had not adequately demonstrated that it could conduct the required hearings in a timely manner. The Secretary requested the State to provide documentation that the State has adequate staff to insure that cessation orders will not expire because of insufficient personnel to conduct the hearings. In the revised program narrative provided with its resubmission, the State demonstrates that it has adequate staffing to conduct such hearings in a timely manner. Therefore, the Secretary finds this provision of WV SCMRA Section 20–6–26(a) is acceptable.

20.6 In Finding 20.6 of the October 20 **Federal Register** notice the Secretary found that the State failed to address the procedures for issuance of orders and notices in accordance with 30 CFR 731.14(g)(4). In the revised program narrative (identified as "Comment No. 30") the State described its procedure for the issuance of orders and notices. In addition, the State has provided regulations (Section 14) and proposed statutory amendments which further explain its inspection procedures. The Secretary finds that these procedures are the same or similar to those in SMCRA and the regulations promulgated thereunder.

20.7 State Section 20–6–16(c) of the WV SCMRA provides that an inspector shall be readily available to vacate a cessation order upon abatement of a violation. As the Secretary noted in Finding 20.7 of the October 20 **Federal Register** notice, this section could allow, or possibly require, the vacation rather than termination of such orders. Therefore, the Secretary finds that this provision of State law is less stringent than federal law. The Attorney General's opinion (Part A, response to Finding 20.7) states that a legislative change will be proposed to correct this inconsistency. In the interim, State regulation Section 14A.03d. specifies that the term "vacate" will not mean that the violation is to be treated as if it never existed, which is the meaning usually assigned to the term in the federal regulations. While this regulation reduces the Secretary's concern, approval of the West Virginia program is conditioned upon revisions to the statute which remedy this deficiency.

20.8 In Finding 20.8 of the October 20 **Federal Register** notice, the Secretary noted that Section 20–6–17(a) of the WV SCMRA omits the language in Section 521(a)(3) of SMCRA which states that in a cessation order issued for failure to abate a notice of violation, "the Secretary shall determine the steps necessary to abate the violation in the most expeditious manner possible, and shall include the necessary measures in the order." The Secretary finds the State provision inconsistent with SMCRA to the extent that the federal requirement is omitted. The Attorney General's opinion (Part A, response to Finding 20.8) states that a legislative change will be proposed to correct this inconsistency. In the interim, State Regulation Section 14A.03d. requires the inspector to identify the necessary steps to abate the violation in the most expeditious manner possible. While this regulation reduces the Secretary's concern, approval of the West Virginia program is conditioned upon revisions to the statute or other program amendments which remedy this deficiency.

20.9 State Regulation Section 14A.01 contains procedures for issuance of show cause orders similar to the requirements of 30 CFR 843.13. However, federal law provides that an unwarranted failure to comply exists where a permittee fails to prevent *or*

abate a violation due to indifference, lack of diligence, or lack of reasonable care. Although the State regulation is similar with respect to the failure to prevent a violation, it does not reference the failure to abate a violation. In some situations the failure to prevent a violation may be excusable whereas the failure to abate the violation is unwarranted, so it is important that both situations be covered in the State regulation. Also, the word "no" in State Regulation Section 14A.01.a.3 negates the meaning of the show cause regulations. This is an obvious clerical error (Administrative Record No. WV 313) which must be corrected. Approval of the program is conditional upon changes which correct these problems.

Finding 21

The Secretary finds that the Department of Natural Resources has the authority and the West Virginia program contains provisions to designate areas unsuitable for surface coal mining consistent, except as noted below in part, with 30 CFR Chapter VII, Subchapter F (designations of areas unsuitable for mining). This finding is made under the requirements of 30 CFR 732.15(b)(9).

Provisions corresponding to Section 522 of SMCRA and to Subchapter F of 30 CFR Chapter VII are included in 20–6–22 of the Code of West Virginia and in Sections 3 and 13 of the State regulations. Section (g)(11) of the West Virginia program narrative describes the system by which petitions for designating areas unsuitable for surface coal mining will be received and processed and the establishment of a data base and inventory system. A discussion of significant issues raised in the review of West Virginia's provisions concerning unsuitability designations follows.

21.1 As discussed in Finding 21.1 of the October 20 **Federal Register** notice, Section 20–6–22(d)(1) of the WV SCMRA allows the Director of DNR to issue variances to the prohibitions of Section 522(e)(1) of SMCRA which relate to mining within the boundaries of certain areas of national importance established by Congress. Approval of West Virginia's program is conditioned upon amendment of the State statute to eliminate the variance provision. In addition, the Director of DNR has agreed not to issue such a variance before the statute is amended.

21.2 As discussed in Finding 21.2 of the October 20 **Federal Register** notice, the State has proposed to use the West Virginia Heritage Trust Program to satisfy the requirements of a data base and inventory system under Section 522(2)(4)(B) of SMCRA. The original narrative did not include an adequate discussion work plan or methodology for developing the Trust Program to provide the required information, nor did the State identify local, State, or federal sources of information necessary for the process. The narrative resubmission contains a work plan for systematically developing an inhouse data base around the nucleus of the Heritage Trust data base. Local, State and federal sources of information are listed in the discussion. The program narrative resubmission also contains a description of the State's procedure for designating lands unsuitable for coal mining activity (identified as "Comment No. 42"). On the basis of this information, the Secretary finds the State's narrative describing its proposed data base system acceptable.

Finding 22

The Secretary finds that the Department of Natural Resources has the authority under West Virginia laws and the West Virginia program contains, except as noted below, provisions for public participation in the development, revision and enforcement of West Virginia's laws and regulations and the West Virginia program consistent with the public participation requirements of SMCRA and 30 CFR Chapter VII. This finding is made under the requirements of 30 CFR 732.15(b)(10).

Provisions corresponding to public participation requirements in SMCRA and in 30 CFR Chapter VII are included throughout the West Virginia statutes and rules submitted as part of the program. Revised Section (g)(14) of the program narrative describes the procedures for insuring that adequate public participation is provided throughout the development and functioning of the State program.

Discussion of significant issues raised in the review of West Virginia's public participation provisions follows:

22.1 In Finding 22.1 of the October 20, 1980 **Federal Register** notice, the Secretary found that Section 20–6–24(b) of the WV SCMRA was inconsistent with 43 CFR Part 4 to the extent that it provided for a determination of timeliness of intervention on a case by case basis. 43 CFR 4.1110(a) allows intervention at any stage in an enforcement proceeding. Part C of the Attorney General's opinion in the State program resubmission of December 19, 1980 explains that "an intervenor may intervene in any stage of the proceeding. Obviously once the hearing is started or ended an intervenor may be allowed to proceed only upon showing a reason for not appearing before and how his intervention and his evidence or brief will further the process." The Secretary finds that this legal interpretation of WV SCMRA Code Section 20–6–24 shows that it is consistent with the Federal intervention provision and bases his approval on the interpretation.

22.2 In Finding 22.2 of the October 20 **Federal Register** notice, the Secretary found that although the State submitted a listing in Section (g)(14) of the narrative of areas of public participation, he could not find that the State is capable of providing for public participation throughout the program because the program did not describe avenues of public participation. The narrative resubmission presents a more detailed list of areas for public participation than the original submission and presents a ten-point discussion of avenues for public participation. Accordingly, the Secretary finds that the public participation process is consistent with Federal requirements.

22.3 In Finding 22.3 of the October 20 **Federal Register** notice the Secretary found that Section 20–6–24(f) of the WV SCMRA provides that, with respect to appeals to the Reclamation Board of Review, all fees and mileage expenses incurred and the expense of preparing the record at the request of the appellant would have to be paid by the appellant. This Section and Section 20–6–25(c) require the appellant to bear the cost of preparing and transcribing the record. Section 29A–5–1(f) of the West Virginia Code appears to place the cost of preparing the transcript upon the agency. The Secretary found that the West Virginia procedures were inconsistent with SMCRA to the extent that appellants would be required to bear the cost of preparing the record of proceedings. Since the statute has not been amended to resolve this problem the Secretary finds that this provision is inconsistent with SMCRA. Approval of the State program is conditioned on amendment of the program to meet the requirements of SMCRA.

Finding 23

The Secretary finds that the West Virginia Department of Natural Resources has the authority under West Virginia laws, except as noted below, and the West Virginia program includes, except as noted below, provisions to monitor, review, and enforce the prohibition against indirect or direct financial interests in coal mining operations by employees of the West Virginia Department of Natural Resources or other State employees consistent with 30 CFR Part 705 (restrictions on financial interests of

State employees). This finding is made under the requirements of 30 CFR 732.15(b)(11).

Provisions corresponding to Section 517(g) of SMCRA are incorporated in Chapter 20, Article 6, Section 40 of the Code of West Virginia.

In Finding 23 of the October 20 Federal Register notice, the Secretary found the lack of conflict of interest requirements for the Reclamation Commission unacceptable. The revised Attorney General's opinion (Part A, response to Finding 23) states that an amendment will be proposed to the State Legislature to correct this deficiency. Approval of the State program is conditioned upon adoption of a provision subjecting all members of the Reclamation Commission to the provisions of Section 20–6–40 of the Code of West Virginia.

Finding 24

The Secretary finds that the West Virginia Department of Natural Resources has the authority under West Virginia laws and the West Virginia program includes provisions to require the training, examination, and certification of persons engaged in or responsible for blasting and the use of explosives in accordance with Section 719 of SMCRA to the extent required for approval of its program. This finding is made under the requirements of 30 CFR 732.15(b)(12).

Provisions corresponding to Section 719 of SMCRA are incorporated in Chapter 20, Article 6, Section 34 of the Code of West Virginia. Section (g)(13) of the West Virginia program narrative contains a description of the cooperative effort between the State Department of Mines and the Department of Natural Resources as it relates to blaster training and certification. West Virginia has no regulations on training, examination, and certification of persons engaged in blasting. However, under 30 CFR 732.15(b)(12) the State is not required to implement regulations governing such training, examination and certification until six months after complete federal regulations on those provisions have been promulgated. On December 12, 1980, OSM published partial final rules establishing minimum requirements for training and certifying persons involved in blasting in surface mining operations. 45 FR 82084–82100. These regulations are codified at 30 CFR Chapter VII, Subchapter M, Part 850. This portion of Subchapter M is now final. However, four subsections concerning qualification requirements and experience requirements remain to be promulgated. These subsections will be reproposed and subjected to public comment prior to their promulgation. Once the complete Subchapter M is finally promulgated, West Virginia will have an additional six months to prepare and submit to OSM regulations consistent with the federal regulations.

Finding 25

The Secretary finds that the West Virginia Department of Natural Resources has the authority under West Virginia laws and the West Virginia program contains provisions for small operator assistance consistent with 30 CFR Part 795 (small operator assistance). This finding is made under the requirements of 30 CFR 732.15(b)(13).

Provisions corresponding to Section 507(c) of SMCRA are incorporated in Chapter 20, Article 6, Section 10(19)(b) of the Code of West Virginia and Section 11 of the State Regulations. Section (g)(16) of the State program submission contains a description of the small operator assistance program within the State.

Only one significant issue was raised in the review of the West Virginia small operator assistance program. Section 20–6–10(b) of the WV SCMRA provides for the payment of costs associated with the determination of probable hydrologic consequences and the statement of the result of test borings and core sampling for operators producing less than one hundred thousand tons of coal annually. This section further provides that the cost "shall be assumed by the Department from funds provided by the United States Department of the Interior pursuant to Public Law 95–87." This has the effect of limiting funding for the small operator assistance program to federal funds. Such a limitation is inconsistent with Section 507 of the SMCRA. The federal funds currently available to West Virginia for small operator assistance are sufficient to meet the present needs of West Virginia. However, this may not be the case in the future, and thus the West Virginia law concerning small operator assistance does not fully comply with Section 507(c) of SMCRA.

The Attorney General's opinion has responded to this issue by preparing changes to WV SCMRA 20–6–10(b) which would delete the proviso stated above and which appear, subject to public comment, to make the WV SCMRA consistent with SMCRA. Furthermore, State regulations Sections 11C and 11C.01 provide that the "Division of Reclamation shall: select and *pay* a qualified laboratory * * *" When supported by statutory authority, this provision will make the State program consistent with SMCRA. Approval of the State program is conditioned upon amendment of the State statute or other program amendment to meet the requirements of Section 507(c) of SMCRA.

Finding 26

The Secretary finds that the West Virginia Department of Natural Resources has the authority under West Virginia law and the West Virginia program contains provisions to provide protection of employees of the Department of Natural Resources corresponding with the protection afforded federal employees under Section 704 of SMCRA. This finding is made under the requirements of 30 CFR 732.15(b)(14).

Provisions corresponding to Section 704 of SMCRA are incorporated in Chapter 20, Article 6, Section 17(i) of the West Virginia Code. The Secretary finds this is consistent with federal law.

Finding 27

The Secretary finds that West Virginia has, except as noted below, the authority under its laws and the West Virginia program contains, except as noted below, provisions for administrative and judicial review of State program actions in accordance with Sections 525 and 526 of SMCRA. This finding is made under the requirements of 30 CFR 732.15(b)(15).

Provisions corresponding to Sections 525 and 526 of SMCRA are incorporated in Chapter 6, Article 9A; Chapter 20, Article 6; Sections 24 and 25; and Chapter 29A of the Code of West Virginia. Section (g)(15) of the program narrative contains a description of the administrative and judicial procedures which are available for the review of administrative decisions, action, and refusals to act.

Discussion of significant issues raised in the review of West Virginia's public participation provisions follows.

27.1 In Finding 27.1 of the October 20 Federal Register notice, the Secretary found that Section (g)(15) of the West Virginia program narrative contained a seemingly erroneous statement that the administrative hearing before the Reclamation Board would be held within sixty days of the notice of filing. In the revised program narrative (Table G15–1), the State has corrected this error, stating that such hearing will be held within thirty days of the notice of filing as provided in Section 20–6–24(c) of the WV SCMRA.

27.2 In Finding 27.2 of the October 20 Federal Register notice, the Secretary requested that West Virginia submit its rules under the State Open Government Proceedings Law, which the State has

done in Section 15 of its regulations. However, these regulations do not state how much notice will be provided to the public in advance of a formal hearing as required in Section 525(a)(2) of SMCRA, which requires at least 5 days written notice. Approval of the West Virginia program is conditioned on a change in the State program which insures that 5 days notice will be provided to the public.

27.3 In Finding 27.3 of the October 20 Federal Register notice, the Secretary found that West Virginia had not demonstrated that a State court has authority to enter an order requiring payment of any civil penalty assessment enforced by its judgment. The State has submitted West Virginia Code 50–6–1, which contains such authority. The Secretary finds that State law is consistent with federal law on this matter.

27.4 In Finding 27.4 of the October 20 Federal Register notice, the Secretary noted several deficiencies in the State's provisions for administrative and judicial review, including (1) dual avenues of appeal for operators cited for a violation, (2) use of jury trials in magistrate court and (3) *de novo* review of magistrate decisions if appealed to circuit court.

These problems are discussed at Finding 19 above. Also, a detailed discussion of the problems with jury trials and *de novo* review is set forth at Finding 27.4 of the October 20 notice. 45 FR 69262. Approval of the program is conditioned upon the enactment of revisions making the State program consistent with the federal requirements.

Finding 28

The Secretary finds that the West Virginia Department of Natural Resources has the authority under West Virginia laws and the program contains provisions to cooperate and coordinate with and provide documents and other information to the Office of Surface Mining under the provisions of 30 CFR Chapter VII, except as noted in Finding 14.8. This finding is made under the requirement of 30 CFR 732.15(b)(16).

Chapter 20, Article 6, Section 20(a) of the Code of West Virginia provides for public notice of applications for permits, applications for permit revisions and actions to revoke permits. In addition, the West Virginia Administrative Procedures Act assures that information is publicly available.

Finding 29

The Secretary finds that the West Virginia laws and regulations and the West Virginia program contain no provisions which would interfere with or preclude implementation of the provisions of SMCRA and 30 CFR Chapter VII. This finding is made under the requirements of 30 CFR 732.15(c).

In West Virginia's permanent program submission, the following laws other than the West Virginia Surface Coal Mining Reclamation Act were referenced as legal authority for various sections of West Virginia's program:

Open Government Proceedings Law (Chapter 6, Article 9A)
Conflict of Interest Law (Chapter 6B, Article 1)
Administrative Procedures Law (Chapter 29A and Chapter 29B)
Civil Jurisdiction and Authority Law (Chapter 50, Article 2)

Other state laws and regulations directly affecting the regulation of surface coal mining and reclamation operations include:

Existing Chapter 20, Article 6 of the Code of West Virginia, Surface Mining and Reclamation
Enrolled H.B. 1404, Surface Mining and Reclamation
Existing Chapter 20–6, Series VII (1978) Rules and Regulations Draft Chapter 20–6, Series VII Rules and Regulations
Chapter 20, Article 5 of the Code of West Virginia, Water Resources
Administrative Regulations of the State of West Virginia for Water Quality Criteria on Inter- and Intrastate Streams, 1977
Proposed Administrative Regulations of the State of West Virginia for Water Quality Criteria on Inter- and Intrastate Streams, 1980
Chapter 19 Articles 12 D and 20 of the Code of West Virginia, Department of Agriculture
Chapter 22 of the Code of West Virginia, Underground Coal Mine Safety Laws
Chapter 38, Articles 3, 4, 5 and 6 of the Code of West Virginia, Liens
Judicial Code of Ethics, Appendix

In the substantive review of the program submission, these laws and regulations were reviewed as part of the adequacy analysis or reviewed for their potential for conflicting with the statutory and regulatory elements of the State program. No conflicts were found which might weaken those State laws and State regulations which form the basis for implementation of a program equal to or more stringent than SMCRA or 30 CFR Chapter VII.

The provisions in these laws and regulations which constitute West Virginia's requirements corresponding to the minimum standards found in SMCRA of 30 CFR Chapter VII are part of the State regulatory program being approved today.

Finding 30

The Secretary finds that the West Virginia Department of Natural Resources has demonstrated that it will have sufficient legal, technical, and administrative personnel, and sufficient legal, technical, and administrative personnel, and sufficient funds to implement, administer, and enforce the provisions of the program, the requirements of 30 CFR 732.15(b) (program requirements), and other applicable State and federal laws. This finding is made under the requirements of 30 CFR 732.15(d).

The Secretary finds that the West Virginia Department of Natural Resources had demonstrated that it will have sufficient funds to implement, administer, and enforce the provisions of the program, the requirements of 30 CFR 732.15(b) (program requirements), and other applicable State and federal laws. This finding is made under the requirements of 30 CFR 732.15(d), the narrative discussion in the program resubmission (identified as "Finding 30") and in memoranda provided by the West Virginia Department of Natural Resources in response to comments made at the public hearing on the resubmission. (Administrative Record No. WV 32). The State describes the proposed staff and demonstrates how such staff will be adequate to carry out the functions for the projected workload to ensure that coal exploration and surface mining and reclamation operations comply with the requirements of SMCRA and the federal regulations. This discussion also includes budget information which demonstrates that adequate funds are available.

C. Disposition of Public Comments

The Secretary received a number of public comments on the resubmitted West Virginia program. The disposition of these comments has been organized into categories to assist the reader. Comments from Federal agencies are addressed first; all other comments follow.

The disposition of public comments constitutes a part of the Secretary's basis and purpose in deciding to approve, with conditions, West Virginia's program. Comments with which the Secretary agrees have been incorporated directly into specific Findings and the Conditions stated in Section E of this notice, where appropriate.

Under Section 505(b) of SMCRA and 30 CFR 730.11, State provisions which provide more stringent environmental protection than the federal provisions shall not be construed to be inconsistent with SMCRA. The Secretary has no authority to disapprove State provisions which are more stringent than the

federal provisions. Thus, State provisions characterized by the Secretary in the disposition of public comments as "consistent with" federal provisions may be more stringent than the federal requirements.

I. General Comments

1. The West Virginia Coal Association (WVCA) and other industry commenters objected that the comment period was not long enough. They stated that they had difficulty in obtaining copies of the resubmission, that there were changes to the regulations after the resubmission, and that the holidays and vacations made it difficult for them to review the program. One of these commenters stated that it was difficult to encourage people to do the work required to review the program because some people believed that their comments would not receive serious consideration.

The comment period was originally set at eighteen days, and in response to an industry request (letter of December 29, 1980, from WVCA to OSM, Administrative Record No. WV 279), was extended to twenty-one days. The extra three days correspond to the three days of official holidays occurring during the comment period. This is consistent with 30 CFR 732.13(f), which states that in the resubmission process, the comment period may be shortened to 15 days. There were no adverse comments on this provision when it was promulgated in March, 1979, and no lawsuits were brought challenging it. The Secretary exercised his discretion in setting a comment period of twenty-one days, which he believes was sufficient to allow review of the program. This period was greater than that afforded in any other State resubmission, including that of Kansas, where the entire body of the regulations was withdrawn after the original submission, necessitating review of an entire set of new regulations on resubmission. [Kansas, 45 FR 74513 (November 10, 1980), 16 days—Oklahoma, 45 FR 80837 (December 8, 1980), 16 days—Utah, 45 FR 84824 (December 23, 1980), 15 days—Wyoming, 45 FR 49597 (July 25, 1980), 15 days—Mississippi, 45 FR 37223 (June 2, 1980), 18 days—Iowa, 45 FR 82276 (December 15, 1980), 16 days—Louisiana, 45 FR 58576 (September 4, 1980), 15 days].

The Secretary's belief that the 21-day comment period was adequate is largely based on the fact that the nature of the review required is narrow. The question the Secretary has considered in deciding whether to approve West Virginia's program and upon which he solicited public comments is whether the State program is consistent with the federal program. Comments attacking the wisdom of the State rules, rather than their consistency with the federal rules, should be directed to the State in its own public participation process, not to the Secretary. Thus, the reviewer's task in this procedure is identifying inconsistencies between the State and federal programs. Furthermore, since under Section 505 of SMCRA the Secretary has no power to disapprove a State provision which provides more stringent environmental protection than the federal rule, reviewers need only be concerned with those differing State provisions which are less stringent than the federal rules. Also see response to comment No. 2 for a further discussion of the narrow nature of the issues under consideration.

The adequacy of the comment period is further borne out by the extent and detail of the public comments received, including detailed comments submitted by several environmental groups on the date of the public hearing, January 5, 1981, four days before the close of the public comment period. One of these environmental groups commented that although they experienced "a slight amount" of hardship in reviewing the resubmission because of the holiday season, they felt that there was adequate time to review the program. They also stated that "by keeping up with the drafts as they were developed over the past two months, we were able to quickly analyze the relatively small volume of new material which was not first available for public inspection until December 19." (Testimony of Ed Light, Administrative Record No. WV 294).

In addition, the industry, as well as other members of the public, had and took advantage of numerous opportunities to familiarize themselves with the draft regulations and discuss them with OSM and the State well before the resubmission. Like the commenter quoted above they were in fact already familiar with many of the regulations in the resubmission. The State held a workshop on May 19, 1980, which was well attended by all facets of the industry, including WVCA and the West Virginia Surface Mining and Reclamation Association (WVSMRA), where the draft regulations were discussed. It was these draft regulations which, after incorporating industry comments, became the June 16, 1980, initial State program submission. The State also met with industry representatives on many occasions to discuss issues in the draft regulations. Industry representatives reviewed drafts of the regulations, discussed them with the State and presented the State with a list of items which they considered to be problems. They then met with OSM and the State on December 6, 1980, to review these items. At this meeting, the participants also discussed the list of issues presented to the State by OSM in letters dated November 19 and 20, 1980 (Administrative Record Nos. WV226 and WV227). Thus, the Secretary believes that the industry, like the environmental groups, was already familiar with most of the regulations in the resubmission and could have conducted a complete review of the program material within the time allowed.

Furthermore, several other factors convinced the Secretary that it would not be overly difficult to review the resubmission in the allotted time. There were several tools available to the public to assist in focusing on the new aspects of the resubmission and to otherwise aid review. Part B of the Attorney General's opinion in the resubmission contains a discussion of how each of the issues in the November 19 and 20, 1980, letters was resolved and cites the State and federal provisions involved. The opinion also contains in Part A a discussion of how each problem raised in the Secretary's October 20, 1980 partial approval/partial disapproval was resolved and citations to the parts of the program which the state felt resolved the problem. Thus, it should not have been difficult for the industry or any other commenters to focus on the program and identify any remaining problems. OSM itself relied heavily on these tools in its own review of the program.

Many of the regulations in the resubmission which differ from previously circulated drafts are nearly identical to the parallel federal regulations, making review of these provisions for consistency with the federal program relatively easy. In addition, in the December 19, 1980, notice announcing receipt of the resubmission and the public comment period the Secretary offered to assist the public in reviewing the program by keeping a list of those wishing to be kept apprised of changes in the resubmission and contacting these people when any such changes were made. 45 FR 83546 (December 19, 1980). Very few such changes were made and OSM received no requests for assistance from these commenters. Thus, the industry's complaint that it was too difficult to keep abreast of program amendments is without foundation.

With regard to the industry's complaints that they were not able to obtain copies of the program, the

Secretary's obligations under 30 CFR 732.12 are to make copies of the program available for inspection at the office of the Regional Director and at the central office and each field office of the State agency. In addition, any person who so requested could receive, free of charge, one copy of the State statutes and regulations (not the program narrative or Attorney General's opinion) from OSM.

In every case where a copy of the statutes and regulations was requested, it was sent by OSM within 24 hours. (Administrative Record No. WV300). Copies of the program were available for review in more than a dozen locations throughout the State. Although there were some minor delays in getting copies of the program to some field offices of OSM and the State, every field office reported that no one requested to see the program before the program was delivered. (Administrative Record No. WV296). In addition, the Federal Register notice announcing the public comment period, 44 FR 83544 (December 19, 1980), identified and provided the telephone number of the Public Affairs Officer at OSM in Charleston to provide further information about the submission. No one contacted this official with regard to difficulty in obtaining copies of the program.

Furthermore, in response to a request from WVCA to the State, OSM reproduced 75 copies of the program for WVCA to send to its members. WVCA, although based in Charleston, never picked up these copies from OSM's Charleston office.

In summary, the narrow nature of the review required and the many tools available to assist in that review should have made the comment period adequate. The industry's claims that they were unable to obtain or view copies of the State program or to keep abreast of changes in the program are unsubstantiated. The Secretary does not agree that the public comment period was too short, or that the holiday season unduly hampered the efforts of those who conscientiously worked to review the program under the applicable legal standards, since the three-day extension of the comment period more than made up for the holidays during the comment period. The extensive and detailed comments actually submitted by many commenters, including the coal industry, confirm the Secretary's view.

2. One commenter argued that the Secretary must specifically answer in detail all comments which "do not match the Federal Act." The Secretary interprets this to mean that the commenter wishes him to consider comments which criticize the wisdon of the State rules rather than comparing the State and federal rules to determine whether they are consistent.

However, under Section 503(a)(7) of SMCRA, the Secretary is authorized only to determine whether the State rules are consistent with the federal rules; furthermore, under Section 505, State provisions which are more stringent than the federal provisions may not be deemed inconsistent with the federal provisions. Thus, the Secretary may not disapprove State rules which impose requirements in addition to, or requirements which are more strigent than, the federal requirements; he also may not impose upon the States any requirements beyond those in the federal regulations. The public has already had an opportunity to comment on the wisdom of the federal rules themselves and to challenge in court those which they believe to be unwise or illegal. Further, the public will have an opportunity to comment on the wisdom of the State rules when the State completes its public participation requirements for its permanent regulations. If at that time the State decides in response to public comments to change any of its rules, it may do so under the program amendment provision, 30 CFR 732.17, as long as its rules do not become less stringent than the Federal program.

3. One commenter argued that West Virginia's submission fails to consider the distinct differences between surface and underground coal mining, as required by Section 516 of SMCRA and Section 20–6–14(a) of the State law. Although the commenter alleged that there are numerous problems presented by the State submission because of this alleged failure, no specific instances were identified. As discussed in the reponse to comment No. 2, the issue considered by the Secretary in deciding whether to approve State programs is whether a State's provisions are consistent with federal requirements. The commenter's specific allegations, if any, should be directed to the State in its permanent rulemaking procedures. With regard to the federal regulations on which the Secretary's review is based, the Secretary took the distinct differences between surface and underground mining into account and provided an opportunity for public comment when he promulgated the permanent federal regulations.

4. WVCA argued that the Federal regulations require that enacted State regulations be submitted but that West Virginia's regulations do not meet this requirement because they are in draft form with an additional process required before they can be enacted. WVSMRA also noted that the Federal Register notice of October 20, 1980, which partially approved the West Virginia program, stated that 30 CFR 732.11(d), as amended [45 FR 33927 (May 20, 1980)], requires that regulations be enacted by the 104th day after submission. WVCA and WVSMRA quoted portions of the October 20 notice which stated that the Secretary could not consider West Virginia's regulations because they were not enacted. They argued that because the State regulations were still not enacted as of the date of the public hearing, January 5, 1981, the Secretary cannot consider them.

The regulations which the Secretary is approving are being enacted as emergency regulations simultaneously with the Secretary's approval, a process which under W. Va. Code, Section 29A-3–14, is done immediately without further procedures (although hearings will be required to make the rules permanent). This meets the requirement of Section 503(a)(7) of SMCRA, which provides that in order for a State program to be approved, the State must be capable of carrying out the purposes of SMCRA through regulations consistent with the Secretary's regulations. There is no statutory requirement that the State regulations be enacted *before* approval.

The 104-day rule cited by WVSMRA, 30 CFR 732.11(d), as amended [45 FR 33927 (May 20, 1980)], governs the initial submission process, not the resubmission process. If the Secretary were to interpret the 104-day rule as applying to resubmissions, no State program which was initially disapproved because of failure to have enacted regulations by the 104th day after submission could ever receive approval on resubmission, since it would still fail to have had enacted regulations on the 104th day. The purpose of the 104-day rule was to assist commenters by insuring that the State program would be "fixed" at some point, rather than allowing it to change from day to day, which would make it difficult for commenters to keep up with program changes. This rule was not related to the requirement of Section 503(a)(7) of SMCRA that a State have effective regulations when the State program is approved. The policy of assisting commenters was met in the process of considering the West Virginia program by the Secretary's offer, 45 FR 83546 (December 19, 1980) to keep a list of anyone wishing to be kept apprised of changes to the program and to contact these people when changes were

made—an offer of which no one took advantage.

The language quoted by WVSMRA from the October 20 notice announcing the Secretary's initial decision does not support its allegation that the Secretary may not consider draft regulations which are enacted concurrently with conditional approval. That quoted language relates the application of the 104-day rule to the initial decision and in no way suggests that the rule would apply to the resubmission. Finding 7 of that notice, which WVSMRA cites as supporting its view, merely states that under Section 503(a)(7) of SMCRA the Secretary cannot approve a program which lacks enacted regulations. He is not doing so here, as the State rules are being enacted concurrently with this approval.

5. Several commenters stated that West Virginia violated the provisions of *W. Va. Code*, Section 20–6–23b by submitting a program to OSM which contained provisions which were more stringent than federal law and regulations. Section 23b was added to Chapter 20, Article 6, by H.B. 1404 in 1979. This section authorizes the DNR and the West Virginia Joint Committee on Government and Finance to develop a program which allows West Virginia to gain primacy under Section 503 of SMCRA. Subsections 23b (b), (c), and (d) expressed the legislature's disapproval of provisions in the State program which are more stringent than the federal law and required that any existing provisions which were more stringent be submitted to the Joint Committee by May 1979. Under Subsection 23b(e) the Joint Committee was required to insure that the intent of Section 23b was carried out and to recommend proposed surface mining legislation to the legislature by January 1980. All of these requirements were met. The legislation recommended by the Joint Committee became H.B. 1529, which is the effective West Virginia surface mining statute upon proclamation by the Governor that the West Virginia proposed program had been approved by the Secretary of the Interior.

It is DNR's position (Administrative Record No. WV 352) that to the extent that H.B. 1404 imposed any obligations on DNR and the Joint Committee, those obligations were fulfilled by the actions of May 1979 and January 1980. It is also DNR's position that its actions in program development were ratified as being in compliance with the entirety of Section 23b by the Joint Committee's recommendations to the legislature pursuant to Subsection 23b(e).

Based on the foregoing, the Secretary finds the provisions of the West Virginia program to be fully authorized by State law, even though some provisions may be classified as more stringent. As pointed out above in Part B, "Secretary's Findings," except for those provisions upon which a condition has been placed, the West Virginia program is consistent with and at least as stringent as the federal requirements. In addition, as discussed in response to comment 2 above, if any portions of the West Virginia program are more stringent than the federal rules, Section 505(b) of SMCRA makes it clear that they are to be construed as consistent with the federal requirements.

6. The following is OSM's response to comments made by WVSMRA and other commenters on the following definitions contained in the State regulations:

a. WVSMRA argued that the phrase "or the State as a result of bond forfeiture to reclaim it under State or Federal Law" contained in State Regulation Section 2.01 defining "Abandoned Coal Waste Disposal Area" is not accurate or necessary. However, this does not affect the consistency of the State regulation with the federal requirements in Section 404 of SMCRA, 30 CFR 816.81 and 816.87.

b. Several commenters argued that the listing of specific seam names in the definition of "Acid Producing Overburden" is misleading since "some of the seams in some areas of the state have differing characteristics." However, this has no effect on the consistency of the State Regulation Section 2.05 with the term "Acid Forming Materials" in 30 CFR 701.5, as used in 30 CFR 779.14. The Secretary has no power to require a change in this definition of acid-producing overburden.

c. WVSMRA argued that State Regulation Section 2.13, which defines "Best Technology Currently Available", is too broad because it gives the Director of the Department of Natural Resources discretion to require equipment, devices, systems methods or techniques. However, the provision is consistent with federal requirements in 30 CFR 701.5, and the Secretary has no authority to require the change.

d. It was argued that State Regulation Section 2.18, defining "Coal Processing Plant," should be rewritten because in West Virginia it is not possible to expect a coal processing plant to have control over all roads, railroads and other transportation facilities. The State regulation is identical to the definition in 30 CFR 701.5. However, see Finding 14.6.

e. A commenter stated that in State Regulation Section 2.49, "fragile lands" should be defined to be "what fragile lands actually are and not what the federal regulations say they are." The State regulations are identical to 30 CFR 762.5 and are consistent with federal requirements.

f. WVSMRA criticized the State's definition of "growing season" under State Regulation Section 2.54 and argued that it should be changed because in West Virginia a growing season is not one year. In finding 13.2 it is determined that the State regulations are consistent with federal requirements.

g. A commenter believed that State Regulation Section 2.56, the definition of "haulageway or access road," is too broad because it follows a federal definition which was designed to solve problems in states other than West Virginia. The West Virginia regulation is consistent with the federal definition in Section 701(28) of SMCRA and 30 CFR 701.5, and the Secretary has no authority to require this change.

h. A commenter stated that the West Virginia definition in State Regulation Section 2.60 of "historic lands" is too broad because it includes any land which is *eligible* for listing on a State or National Register of Historic Places instead of just lands which are actually *considered* historic. The State Regulation is identical to 30 CFR 762.5 and is consistent with federal requirements.

i. A commenter stated that in State Regulation Section 2.81, defining "Occupied Dwelling," dwellings occupied on a temporary basis should not be considered occupied and that "regular" basis should be defined using number of days. The State regulation is identical to 30 CFR 761.5 and is consistent with federal requirements. The Secretary has no authority to require this change.

7. The following is the Secretary's response to comments submitted by WVSMRA which address provisions of the WV SCMRA and generally do not address possible inconsistencies between the federal Act and the West Virginia law. The comments relating to the following West Virginia statute sections are merely objections to the federal requirements. Some are covered in Findings.

a. Section 20–6–17(d) of the WV SCMRA, governing the imposition of civil penalties by the magistrate courts. Finding 19.1.

b. Section 20–6–17(a) of the WV SCMRA, governing the issuance of notices of violation.

c. Section 20–6–18(a) of the WV SCMRA, governing the issuance of permits by the Director.

d. Section 20–6–22(d)(1) of the WV SCMRA, prohibiting surface mining activities in national parks, wildlife refuges, recreation areas, etc.

e. Section 20–6–3(2) of the WV SCMRA, defining "adequate treatment" of water. Finding 13.12.

f. Section 20–6–(a)(3) of the WV SCMRA, requiring for each permit application a statement of any current surface mining permits held by the applicant. Finding 14.1.

g. Section 20–6–10(a)(5) of the WV SCMRA, requiring from each permit applicant a statement of whether the applicant or any officer, partner, etc. has ever been an officer, partner, etc. in any company which has ever held a federal or State mining permit which in the previous five years has been suspended.

h. Section 20–6–10(b) of the WV SCMRA, governing the payment by the State for the cost of certain test data for small operators.

i. Section 20–6–10(f) of the WV SCMRA, requiring that the permit applicant file as part of his permit application a schedule listing all his or her bond forfeitures, permit revocations, cessation orders, etc. Finding 14.3.

j. Section 20–6–14(b)(12) of the WV SCMRA, which relates to the location of openings for all new drift mines in acid-producing or iron-producing coal seams. Finding 13.10.

k. Section 20–6–15(g) of the WV SCMRA providing for inspections following citizen complaints inspections.

l. Section 20–6–16(a) of the WV SCMRA, giving the inspector the authority to issue cessation orders. Finding 20.1.

m. Section 20–6–24(a) of the WV SCMRA, relating to the reclamation board of review.

n. Section 20–6–40(a) of the WV SCMRA, regarding conflict of interest. Finding 23.

8. The Carbon Fuel Company submitted comments on a number of West Virginia regulations which Carbon identified as being more stringent than the federal regulations. As discussed above in the response to comment 2 and in the general discussion under "Disposition of Public Comments," the Secretary may not disapprove State provisions that are more stringent than the federal requirements.

a. State Regulation Section 2.39, which defines "downslope" to include mining-related construction, is consistent with the federal definitions of 30 CFR 701.5.

b. State Regulation Section 3G.02a, which requires that the permit application include maps showing the location of all buildings on and within 1,000 feet of the proposed permit area, is consistent with 30 CFR 779.24.

c. State Regulation Section 3H.02a.2, which requires the applicant to specifically request for each existing structure an exemption from the design criteria required by SCMRA, is consistent with 30 CFR 780.12.

d. State Regulation Section 3H.02b., which requires the applicant to submit the necessary modifications in the event he fails to qualify for the exemption provided for existing structures, is consistent with 30 CFR 780.12.

e. State Regulation Section 4A.01a., which requires certain data in the description of transportation facilities, is consistent with 30 CFR 780.37.

f. State Regulation Section 4A.01d., which could, according to the comment, be read to cover existing railroad lines all the way to the market if under common ownership, is consistent with 30 CFR 701.5 and 30 CFR 780.37. (See comment No. 6d. and Finding No. 14.6.)

g. State Regulation Section 4A.02b., which provides the construction requirements for road fills, is consistent with 30 CFR 816.71.

h. State Regulation Section 4A.06, which requires dust control from the surface of haulageways or access roads, is consistent with 30 CFR 780.15.

i. State Regulation Section 4A.13d, which requires that other transportation facilities shall, unless exempted, be designed, constructed and maintained, and the area restored to control and minimize air pollution, is consistent with 30 CFR 780.15.

j. State Regulation Section 4B.06e.3., which requires that a request to leave a structure in place after the final release must contain a statement signed by the landowner and the operator, is consistent with 30 CFR 780.23.

k. State Regulation Section 4C.04c., which requires that the maximum air blast level of 128 decibel linear peak shall not be exceeded at any residence or occupied structure within one-half mile of the blast site, is consistent with 30 CFR 816.65.

l. State Regulation Section 4C.04f.1., which requires that, except under certain conditions, blasting shall not be conducted within 1,000 feet of any building used as a dwelling, school, church, hospital or nursing facility, is consistent with 30 CFR 816.65. (See discussion of remanded regulations in response to comment 9 below.)

m. State Regulation Section 5A.01a.1., which requires that the "Notice of Intent" shall identify the boundaries of the property to be prospected and the surface and mineral owners of the tract, is consistent with 30 CFR 776.11.

n. State Regulation Section 4A.11, which requires that existing roads used for access or haulage comply with certain regulations, is consistent with Section 701(28) and 515(b)(17) of SMCRA. (See response to Comment 9e. below.)

o. State Regulation Section 4A.07, requiring sediment control provisions for roads and other transportation facilities, is consistent with Sections 701(28) and 515(b)(17) of SMCRA. (See response to Comment 9d. below.)

p. State Regulation Section 4A, which applies to short term roads such as exploration roads, is consistent with Section 701(28) and 515(b)(17) of SMCRA and 30 CFR Part 776.

9. Consolidation Coal Company and the WVCA commented that several provisions of the State regulations contain requirements corresponding to federal provisions which had been remanded or suspended. While this is correct, the Secretary cannot require the State to delete these requirements. The court ruled in *In re: Permanent Surface Mining Regulation Litigation,* Civil Action No. 79–1144 (D.D.C., August 8, 1980) that regulations which a State promulgates after the court's decision or for which the State requests approval, are not to be disapproved. Since all of the West Virginia regulations were promulgated after May 16, 1980 and in addition, on September 4, 1980, Director David C. Callaghan of the West Virginia DNR requested approval of all State regulations which correspond to remanded or suspended federal regulations (Administrative Record No. WV–200), the Secretary has no authority to require that they be deleted from the program. Also see response to comment 2.

Below is a listing of State regulations included in the above comment:

a. State Regulation Section 2.51, which defines the term "fugitive dust" and is related to remanded regulation 30 CFR 816.95. (Note, however, that the federal definition of fugitive dust has not been remanded or suspended.)

b. State Regulation Section 2.60, which defines historic lands.

c. State Regulation Section 4A.03, regarding stream crossings.

d. State Regulation Section 4A.07, regarding sediment control for haulageways and access roads.

e. State Regulation Section 4A.11, regarding existing haulageways or access roads.

f. State Regulation Section 4B.06b, relating to sediment storage volume.

g. State Regulation Section 4D.02a, relating to the premining use of land.

h. State Regulation Section 4D.04d, relating to letters of commitment.

i. State Regulation Section 4E.01, relating to fish and wildlife information.

j. State Regulation Section 4F.09d.2, which relates to standards for evaluating vegetative cover.

k. State Regulation Section 46.03, regarding prime farmlands requirements for underground mines.

l. State Regulation Section 4G.05e.1, regarding compaction of soils for prime farmlands.

m. State Regulation Sections 4G.06b. and 4G.06c, relating to actual crop production on prime farmlands.

n. State Regulation Section 4H.02, addressing escrow accounts and self-bonding.

o. Chapter 3.5 of the Technical Handbook, relating to cleanout of sediment basins at the 60% level.

p. Chapter 3.6 of the Technical Handbook, addressing storage of sediment.

q. Chapter 4.8 of the Technical Handbook, relating to NPDES Standards.

r. Chapters 13.2, 13.4.2, 13.8.3, 13.10, 13.12, 13.15, 13.17, 13.19 and 13.21 of the Technical Handbook, addressing haulageways or access roads.

s. Chapter 13.8 of the Technical Handbook, which relates to culverts for haulageways and access roads.

10. One commenter pointed out that there are two titles numbered "4A" in the State's rules and recommended that the second title, "Transportation Facilities," be dropped. This error does not affect the consistency of the State program with the federal requirement.

11. One commenter stated that the titles of State Regulation Sections 4 and 4A are switched. This does not affect the consistency of the State rules with the federal provisions.

12. One commenter stated that State Regulation Section 4A.01c. is incoherent, conflicting and unintelligible because it is not a properly constructed sentence and refers to alternative specifications while stating that alternatives are not allowed. These editorial deficiencies do not interfere with the meaning or the consistency of the regulation with federal requirements.

13. Consolidation Coal Company and WVCA criticized various aspects of the State program. The following sections, alleged to be more stringent than federal law, have been reviewed and are found to be consistent with the SMCRA and 30 CFR chapter VII requirements or to impose a requirement not presently contained in federal law:

State Regulation Section 2.11, regarding the definition of buffer zone, the commenter states, should contain a clarification of intermittent stream. The definition is consistent with the requirements of 30 CFR 816.57 and a further clarification is not necessary.

State Regulation Section 2.18, which defines coal processing plants, is consistent with 30 CFR 701.5. The commenter request a clarification because "as currently written this could well include all the *rail* of the C & O railroad." However, further clarification is not necessary for consistency with the federal regulation.

State Regulation Section 2.51, which defines fugitive dust, is consistent with 30 CFR 701.5, for the reasons discussed in response to comment 9.

State Regulation Section 2.60, which defines historic lands, is consistent with 30 CFR 701.5, for the reasons discussed in the response to comment 9.

State Regulation Section 2.68, which defines intermittent streams, should not be changed as the commenter states because to do so would exclude all surface runoff intermittent streams.

Redefinition of State Regulation Section 2.92, to exclude the term "bond" from the pre-plan, is not necessary because it would merely be a clarification of a regulation that is consistent with federal requirements.

State Regulation Section 2.105, which defines sediment control structures, is consistent with 30 CFR 701.5. Language almost identical to that which the commenter wants deleted appears in the federal definition of "sedimentation pond."

The commenter asks for a clarification of State Regulation Section 3A.02, regarding the submission and approval of phased applications. This regulation meets the federal requirement of 30 CFR 771.21 and a mere clarification cannot be required.

The commenter requests that State Regulation Section 3A.02c., be reworded to require the director of the DNR to allow an operator to continue to operate after eight months from the date of approval of the state program if he or she has shown a good faith attempt to submit complete permit applications. The Director's discretionary authority is consistent with 30 CFR 701.11(a) and the State need not make the requested change.

The commenter states that state Regulation Section 3A.03, should be deleted because it has no basis in law or existing regulations. The legal basis is W. Va. Code Section 20–6–15(a)(1). The commenter further objects to the Director's requiring from operators a schedule for compliance with DNR regulations. While Section 3A.03 is not required by federal law, it is within the State's prerogative to require this.

The commenter request that State Regulation Section 3B.02c., addressing information to be contained in the public notice for filing of permit applications, be changed to require legal advertisements "in an abbreviated form". The regulation is consistent with 30 CFR 786.11(a) and the change requested is not necessary.

The commenter requests that State Regulation Section 3B.02e., regarding proof of public notices for the filing of permit applications, be deleted because it is not required in the Federal Act. This regulation is consistent with 30 CFR 778.21 and 782.21 and the fact that there is no comparable federal provision does not require deletion.

The commenter requests the deletion of a map scale requirement from State Regulation Section 3C.02, regarding final maps for prospecting operations because it is covered in another State regulation. This provision is consistent with 30 CFR 771.23 and a further clarification is not necessary.

The commenter requests in State Regulation Sections 3C.03, 7A.01c.1., 8A.01c.1., 9A.01a., 10B, and 10B.05b., regarding the size of maps, certain changes in size. This provision is consistent with 30 CFR 779.24 and 783.24 and it is within the states prerogative to establish map sizes.

The commenter objects to State Regulation Section 3E.02, regarding testing of engineers or surveyors, because the commenter believes State registration should be adequate proof of a person's qualifications. The State regulation is consistent with 30 CFR 780.14(c) and 783.23(c) and it is within the state's discretion to require additional proof of qualifications.

The commenter requests a clarification of State Regulation Section 3G.01, regarding permit application plans. The regulation is consistent with 30 CFR 780.11 and 784.11 and a mere clarification is not necessary.

The commenter requests a change in State Regulation Section 3G.02, regarding required maps to require *USGS* maps. The State regulation is consistent with 30 CFR 779.24 and 783.24 and the requested change is not necessary.

The commenter asked for an unspecified clarification of State Regulation Section 3G.03, regarding permit term information and general environmental resources information. The State regulation is consistent with 30 CFR 778.17(a), 779.12(a), 782.17(a) and 783.12(a), and the Secretary has no authority to require additional clarification.

The commenter requested deletion of the word "Premining" in State Regulation Section 3G.04, regarding cross-sections for existing *premining* surface configurations. The regulation is consistent with 30 CFR 779.25(k) and 783.15(k) and there is, thus, no basis for the requested change.

The commenter requested a clarification of "pre-existing" in State Regulation Section 3H.02, regarding pre-existing as opposed to existing in State regulation 2.45. The State regulation is consistent with 30 CFR 780.12(b) and 784.12(b) and there is no basis for requiring the clarification requested.

State Regulation Section 3H.04, regarding experimental practices, is consistent with 30 CFR 785.13(h)(3) for the reasons discussed in Finding 13.15.

The commenter stated that State regulation Section 3Q.06 does not provide the specific exemption of 30 CFR 761.13(b) for preventing lands unsuitable designation when a permit has been issued. The exemption, while not explicit in the State regulation, need not be further clarified because it is within the State's prerogative to provide a more narrow exemption than that of 30 CFR 761.13(b).

The commenter objected to State Regulation Section 4A.01a., concerning general permit application requirements, stating that this regulation must be affirmatively disapproved because it is more stringent and because the federal regulations contain no comparable provision. The provision is consistent with the federal program, and the Secretary has no authority to require this change.

State Regulation Section 4A.01c., regarding geotechnical analysis, was objected to as being unintelligible and incoherent. The State is permitted to establish its own requirements within the confines of the federal regulation. While parts of this regulation may be confusing, it is consistent with the requirements of 30 CFR 771.23(a) and there is no basis for rejecting it.

The commenter objected to State Regulation Section 4A.01d., addressing control of railroads. However, this provision is consistent with 30 CFR 780.37 and 784.24 for the reasons discussed in Finding 14.6.

State Regulation Section 4A.06, which addresses dust control from haulageways and access roads, is consistent with 30 CFR 816.95 and 817.95.

State Regulation Section 4A.13, which addresses railroad loops, spurs, sidings, surface conveyor systems, chutes and aerial tramways, is consistent with 30 CFR 816.180 and 817.180.

The commenter criticized State Regulation Section 4B.03, requiring "buffer zones" along intermittent streams. However, this provision is consistent with 30 CFR 816.57 and 817.57.

Although the commenter asked that State Regulation Section 4B.04, requiring that diversions be capable of diverting a 10-year, 24-hour precipitation event, be changed to include only permanent diversions, the West Virginia Regulation is consistent with 30 CFR 816.43(b) and 817.43(b) and there is no basis for requiring the change.

The commenter asked that State Regulation Section 4B.06, requiring runoff from disturbed areas to pass through a sedimentation pond, be changed to eliminate runoff from roads. This regulation is consistent with 30 CFR 816.42(a)(4) and 817.42(a)(4).

The commenter objected to State Regulation Section 4B.08, regarding intermittent streams. However, this provision is consistent with 30 CFR 816.57 and 817.57.

The commenter objected to State Regulation Section 5A.01b.3., regarding notice of intent to prospect, as being overly broad because it includes persons "associated with" the person filing the Notice of Intent. This regulation is consistent with 30 CFR 776.11.

The commenter objected to State Regulation Section 4C.02a., which limits the blasting notice to cover an area no larger than 300 acres. This requirement is consistent with 30 CFR 816.64(b)(2)(i) and need not be deleted.

The commenter stated that State Regulation Section 4C.04e. does not clearly indicate whether the State requires air blast monitoring by the operators. The State rule is consistent with 30 CFR 816.65(e)(4) and 817.65(e)(4).

The commenter stated that State Regulation Section 4C.04h., regarding blasting, does not meet the federal requirements. See Finding 13.30.

The commenter objected to West Virginia State Regulation Section 4D.02a., regarding postmining land use, alleging that it places an additional requirement for comparison to land that has been properly managed. This is consistent with 30 CFR 816.133(b).

The commenter objected to State Regulation Section 4F.01a., regarding revegetation, allegeding that it adds provisions for providing economic benefit and restoring aesthetic appeal. There is no basis for requiring the deletion of these provisions merely because there is no federal counterpart.

The commenter objected to State Regulation Section 4F.08, establishing mulching rates, because the commenter believes that a hydroseeder can not apply mulch so heavily. The State regulation is consistent with 30 CFR 816.114 and 817.114.

The commenter objected to State Regulation Section 4F.09f.2.a., because the State regulation requires 600 trees per acre, while 30 CFR 816.117(b)(1) and 817.117(b)(1) require only 450 trees per acre in stocking for commercial woodlands. The State provision is consistent with the federal rule.

The commenter objected to State Regulation Section 5B.01b.7. regarding drilling exemptions. See response to 5A.016.3., above as the same response applies.

The commenter stated that State Regulation Section 5B.02, regarding off road travel, is already covered by Section 5B.02a. This does not make the State rule inconsistent with any federal provision.

The commenter requested the exclusion of roads from State Regulation Section 5B.04, regarding drainage, arguing that prospecting roads are infrequently used. The State rule is consistent with the federal requirements. The commenter objected to the requirements in State Regulation Section 5B.05a. regarding prospecting on steep slopes. This regulation is consistent with 30 CFR 815.15.

The commenter objected to State Regulation Section 5B.05h., regarding revegetation of prospecting areas, arguing that future mining activities would render revegetation useless. This regulation is consistent with 30 CFR 815.15(f).

The commenter asked that State Regulation Section 5B.06(L) be deleted because registration requirements are already spelled out in Section 5B.07. This appears to be an improper cite, as there is no Section 5B.06(L).

The commenter asked for a definition of mine site in State Regulation Sections 6A.02a.5., 7A.02a.5. and 8A.02a.5., regarding the request for additional information by the Director on a permit application. These provisions are consistent with 30 CFR 779.15 and 783.15 and the definition need not be added to meet federal requirements.

The commenter asked that the State not consider potential uses of water in State Regulation Sections 6A.02a.6., 7A.02a.6., 8A.02a.6. and 8B.07b.2., regarding ground water analysis. These regulations are consistent with 30 CFR 779 and 783.

The commenter objected to the State's requirement for the use of rain gauges in State Regulation Sections 6A.02c., 7A.02c., and 8A.02c. This requirement is consistent with 30 CFR 779.18(a) and 783.18(a).

The commenter objected because 30 CFR 779.24(b)(1) allows for field estimates of compaction and erodibility while State Regulation Sections 6A.03a.3., 7A.03a.3. and 8A.03a.3., regarding overburden analysis, do not. The State regulations are consistent with the federal rules.

The commenter requested State Regulation Sections 6A.03b., 7A.03b. and 8A.03b., require a response by the Director to the operator within 10 days if data are available from previous investigations. The regulations are consistent with 30 CFR 779.14(b)(3) and 783.14(b), and the ten day limit need not be added.

The commenter requested that State Regulation Sections 6A.02, 7A.02, and 8A.02 include a definition of "mine site." There is no federal requirement for such a definition.

State Regulations Sections 6B.03b., 7B.03b., and 8B.03b., regarding topsoil segregation, require the segregation of subsoil. The commenter believes the Director should have discretion not to impose this requirement. This regulation is consistent with 30 CFR 816.22(c) and 817.22(a).

The commenter stated that State Regulation Section 6B.04a., regarding water quality control, should not require that water leaving the permit area shall not violate the water quality standards of the water into which it is discharged, arguing that OSM only applies this requirement to runoff from reclaimed areas. This provision is consistent with 30 CFR 816.42(a)(2) and 817.42(a)(2).

The commenter stated that State Regulation Section 6B.04b., regarding the discharge of water from a permit area, is unclear as to which standard applies. Such clarification is not necessary because the State regulation is consistent with 30 CFR 816.41(c).

The commenter requested that State Regulation Sections 6B.04b.1. and 9B.03b.1., regarding the discharge of water from a grade, be changed to allow for the consideration of existing background levels, in determining allowable effluent concentrations. The State regulation is consistent with 30 CFR 816.42 and 817.42.

The commenter objected because State Regulation Sections 6B.04f.2., 7B.04Af.2. and 8B.04f.2. do not allow the discharge of materials into underground workings, arguing that 30 CFR 816.55 and 817.55 allow such discharges. The State rules are consistent with the federal requirements.

The commenter argued that State Regulation Sections 6B.05b., 7B.06b. and 8B.05b. attempt to allow lesser amounts of cover than do 30 CFR 816.103(a) (1) and (4) and 817.103 (1) and (4) regarding the treatment of toxic materials. The State rules are consistent with the federal requirements.

The commenter stated that State Regulation Section 6B.06a.2., regarding the sampling of water discharged from a permit area, should not require *daily* sampling. This is consistent with 816.42 (a)(2) and 817.42(a)(2).

The commenter argued that State Regulation Section 6B.09b.9., regarding the variance from reclamation requirements, should give the Director discretion to allow underground mining to commence more than one year after the completion of surface mining activities. This regulation is consistent with 30 CFR 816.101, 816.102, 817.101 and 817.102.

The commenter criticized State Regulation Section 7A.01c.1., regarding the size of permit maps. However, the rule is consistent with 30 CFR 771.23(e).

The commenter states that State Regulation Section 7A.01c.2., which addresses the *preferred* scale of maps used in a permit application, should address only the *suggested* scale. This provision is consistent with 30 CFR 771.23(e)(1).

The commenter objected to State Regulation Section 7A.01c.12., requiring a map showing fish and wildlife facilities. This regulation is consistent with 30 CFR 779.24(1), 779.25(b), 783.24(1) and 783.25(b).

The commenter requested further guidance as to where signs may be required. State Regulation Section 7B.01a., regarding permanent monuments, is consistent with 30 CFR 816.11(c) and 817.11(c). The Secretary notes that the State rule clearly requires that a monument be posted at the entrances to public roads.

The commenter requested that State Regulation Sections 7B.01b., 8B.01b. and 10C.01b., regarding perimeter markers, be deleted. However, these regulations are consistent with 30 CFR 816.11(d) and 817.11(d).

State Regulation Section 7B.01f. concerns the marking of slope measurements. The commenter desires that this marking be restricted to within 300 feet of the face-up area for a deep mine. However, the regulation is consistent with 30 CFR 816.11 and 817.11.

The commenter stated State Regulation Section 7B.03e.2., regarding topsoil substitutes, should require approved methods rather than approved laboratories for certification of soil test. This requirement is consistent with 30 CFR 816.22 and 817.22.

The commenter requested that State Regulation Section 7B.04a., regarding water quality standards and the reference to "pit area", be deleted in part. However, this provision is consistent with 30 CFR 816.42 and 817.42.

The commenter requested that State Regulation Section 7B.04d.1., regarding the regulation of water breakthroughs, be deleted. However, this provision is consistent with 30 CFR 816.41 and 817.41.

The commenter requested that State Regulation Section 7B.04d.2., regarding breakthrough procedures, be deleted because it reiterates a previous regulation. This does not make the State rule inconsistent with the federal rules.

The commenter objected to State Regulation Section 7B.05a., regarding discharge from underground operations, arguing that it should be clarified. However, the rule is consistent with 30 CFR 817.50(c).

The commenter requested that State Regulation Section 7B.06a.1., regarding the disposal of acid-forming and toxic-forming material and the treating of such material to prevent adverse effects on water quality, be replaced by the language of 30 CFR 816.48 and 817.48. The State rule is consistent with the federal requirements.

The commenter desires the recording of only precipitation events in excess of 1." However, State Regulation Sections 7B.07a.1., 8B.06a.1. and 9B.05a.1. are consistent with 30 CFR 816.52(b) and 817.52(b). These federal rules authorize the regulatory authority to adopt standards on the nature of data requirements and frequency of collection.

The commenter requested that State Regulation Sections 7B.07b.3. and 8B.06b.3., regarding submission of monthly reports of records pertaining to testing dates and analytical data to the Director, be deleted. However, the State rule is consistent with 30 CFR 816.52(a) and 817.52(a).

The commenter desires the inclusion of a phrase concerning weather conditions in State Regulation Section 7B.10a.1., regarding temporary revegetation. However, the rule is consistent with 30 CFR 816.113 and 817.113.

The commenter requested a longer period of time to accomplish grading. However, State Regulation Section 7B.11b., regarding backfilling and grading, is consistent with 30 CFR 816.101 and 817.101.

The commenter asked for inclusion of a definition of "material damage" in State Regulation Section 7C.02, regarding subsidence and surface owner protection. However, the rule is consistent with 30 CFR 817.124.

The commenter desires that the State include a provision concerning valid existing rights in State Regulation Section 7C.02b., regarding standards for surface effects of underground mining, is consistent with 30 CFR 817.124.

The commenter objected to State Regulation Section 7C.03a., which

prohibits underground mining beneath perennial streams and impoundments unless the Director determines subsidence will not cause material damage. However, the existing state language is virtually identical to 30 CFR 817.126(a).

The commenter objected to State Regulation Section 7C.03c., which prohibits underground mining beneath public buildings without the Director's authorization. However, the rule is consistent with 30 CFR 817.126(c). The State rule authorizes the Director to provide the requested flexibility.

The commenter requested director discretion in State Regulation Section 7C.04, concerning subsidence control plans. This regulation is consistent with 30 CFR 784.20.

The commenter asked for a clarification of State Regulation Section 8A.01, regarding "at or near the mine site." This regulation is consistent with Section 701(28) of SMCRA and further clarification is not necessary.

State Regulation Section 8A.01c.2., which requests that maps be on a scale of 1:2400, is consistent with 30 CFR 771.23. See response to comment on State Regulation 7A.01c.2., above.

The commenter questioned the use of the word "premining" in State Regulation Section 8A.02b, regarding surface water requirements for incidental facilities. This usage is consistent with 30 CFR 779.16 and 783.16 and premining need not be changed to "existing" as the commenter suggests.

The commenter requested in State Regulation Section 8A.03a., concerning geological information, a reduction in the requirement for a description of the geology. The State Regulation is consistent with 30 CFR 779.14 and 783.14 and the change is not necessary for meeting federal requirements.

The commenter suggested that State Regulation Section 8B.05, regarding permanent facilities, provide certain exemptions for permanent facilities not involved in the excavation, loading, etc., of coal. This Section is consistent with SMCRA Section 701 and 30 CFR Part 827 and a broadening of the exemption is not required.

The commenter asked for a clarification of State Regulation Section 8B.01a., which addresses signs and markers. This regulation is consistent with 30 CFR 816.11 and 817.11 and a clarification is not necessary.

The commenter asked for a clarification regarding the certification of soil testing in State Regulation Section 8B.03e.2. The regulation is consistent with 30 CFR 816.22(e)(ii) and 817.22(e)(ii) and a clarification is not necessary.

The commenter asked for an addition to include sludged in State Regulation Section 8B.04f.2., regarding discharge of water into an underground mine. This regulation is consistent with 30 CFR 816.55(c)(4) and (c)(5) and 817.55(c)(4) and (c)(5) and the additions are not necessary.

State Regulation Section 8B.08a.1, regarding temporary revegetation, requires revegetation within 30 days. The commenter requested the beginning of the next growing season. The regulation is consistent with 30 CFR 816.113 and 817.113 and the change is not necessary.

The commenter in State Regulation Section 8B.09g.1. and 2., regarding remining of previously mined areas, requested that a change be made to require only *new* highwalls be elminated.

This regulation meets the requirement of 30 CFR 826.15 and no change is necessary.

The commenter requested the addition of a reference and language modification to allow flexibility in State Regulation Sections 10A and 10A.01b.3., regarding coal waste piles and impounding structures for coal mine waste piles. However, the State rule is consistent with 30 CFR 816.81, 816.91(b), 817.91(b), 816.92(b), 816.93 and 817.93.

The commenter requested that a reference to Technical Paper 40 be added to Section 10A. Such a change is not necessary for meeting the federal requirement.

The commenter stated that State Regulation Sections 10B.03, 10B.04a.1.a., 10B.04a.1.e. and 10B.04b.3., regarding coal waste piles, contain unnecessary language which should be deleted. These regulations are consistent with 30 CFR 816.82, 816.42, and 816.81. The commenter also recommended adding flexibility to the design standards in Section 10B.04a.1.e. This section is consistent with the federal requirement and no further change may be required.

The commenter stated that State Regulation Section 10B.04a.1., regarding permanent structures, should clarify the meaning of the word permanent. This section is consistent with 30 CFR 816.49 and 817.49. A mere clarification is not required.

The commenter requested a clarification of State Regulation Sections 10B.04c.6.a.(iii) and 10B.04d., regarding coal waste piles, to provide for flexibility in construction methods. These sections are consistent with 30 CFR 816.49, 817.49, 816.83(a) and 817.83(a) and no clarification is required.

The commenter suggested that State Regulation Section 10B.04d.3., regarding predominant type of fill material, be changed to allow use of coal refuse material in underdrains. Section 10B.04d.3 is consistent with 30 CFR 816.72(b)(3) and 817.72(b)(3), which specify that underdrains shall consist of durable rock free of coal.

The commenter recommended deletion of the last sentence of State Regulation Section 10B.05b.2., regarding coal waste piles. This section is consistent with 30 CFR 816.81 and 817.81, and the Secretary has no authority to require deletion unless a section is inconsistent with federal requirements. The commenter also recommended adding the words "or otherwise per good engineering standards" to Section 10C.09.b.6. This section is consistent with 30 CFR 816.81 and 817.81 and no further change is required.

The commenter suggested that State Regulation Section 10C.05a.9., concerning the use of concrete in spillways and diversion construction, delete the words "and diversion ditches" in the first sentence. This section is consistent with the federal requirements, and no further change is necessary.

The commenter requested clarification of State Regulation Section 10C.06a.1., addressing drainage from acid-forming and toxic-forming underground development waste. This section is consistent with 30 CFR 816.48(c) and 817.48(c), and no clarification is required.

The commenter suggested that Chapter 3.4 of the Technical Handbook, which addresses drainage area and site evaluation and limitations, delete the mandatory requirement to use "Water Management Practices." Chapter 3.4 is consistent with 30 CFR 816.46 and 817.46, and no change is required.

The commenter stated the requirements to clean sediment ponds when sediment reaches the 60% level should be eliminated from Chapter 3.5 of the Technical Handbook. See response to Comment Number 9.

The Commenter stated that the requirements of Chapters 3.5, 4.6, 5.6, 7.5 and 14.5 of the Technical Handbook, regarding sediment control on pre-mining disturbances, should be deleted. These requirements are consistent with 30 CFR 816.42 and 817.42.

The commenter stated that Chapters 3.8 and 3.9 of the Technical Handbook, specifying technical requirements for the design of principal and emergency spillways, should be revised to allow site-specific design. These chapters are consistent with 30 CFR 816.49 and 817.49.

The commenter stated that Chapter 3.8.5.1.1 of the Technical Handbook,

regarding the thickness of pipe conduits in sediment dams (embankment type), should be revised to allow the thickness of pipe to be determined on a case-by-case basis. This requirement is consistent with 30 CFR 816.46(d) and 817.46(d).

The commenter stated that Chapter 3.8.6.2 of the Technical Handbook requiring dewatering devices for structures, including sedimentation ponds, should be revised to delete this mandatory requirement. This requirement is consistent with 30 CFR 816.46(d) and 817.46(d).

The commenter suggested that the requirement in Chapter 3.8.6.3 of the Technical Handbook for anti-seep collars to prevent seepage should not be required for corrugated metal pipe and may not be needed for other types of conduits. This requirement is consistent with 30 CFR 816.45(b)(6) and 817.45(f).

The commenter stated that the requirement in Chapter 3.8.6.4 of the Technical Handbook, specifying two suitable anti-vortex devices for sediment dams (embankment type), should be expanded to allow other devices. This requirement is consistent with 30 CFR 816.46 and 817.46.

The commenter stated that the requirement in Chapter 3.9.4.2 of the Technical Handbook, regarding emergency spillways in rock, should allow greater maximum velocity than that specified. This requirement is consistent with 30 CFR 816.46(i) and 817.46(i).

The commenter stated that the requirement in Chapter 3.9.5 of the Technical Handbook specifying two conditions for use of concrete spillways should be amended to allow use of concrete in accordance with good engineering practices. This requirement is consistent with 30 CFR 816.46 and 817.46.

The commenter stated that Chapter 3.10.2 of the Technical Handbook, regarding minimum top width of embankments, should be modified to allow a lower minimum top width. Chapter 3.10.2 is consistent with 30 CFR 816.46(l) and 817.46(l).

The commenter stated that Chapters 3.10.7, 11.7.4, and 13.10 of the Technical Handbook, relating to mulching and vegetation requirements, should be modified to allow delayed seeding until a more favorable planting season. These requirements are consistent with 30 CFR 816.113, 152 (c)(3) and (d)(15) and 817.113, 152 (c)(3) and (d)(15).

The commenter stated that the requirement in Chapter 4.32.d of the Technical Handbook, that inspection reports on embankment type sediment dams must be provided, should be changed to required only that such reports be made available if requested. The requirement is consistent with 30 CFR 780.25 and 784.16.

The commenter stated that Chapters 4.10 and 5.10 of the Technical Handbook, addressing entrance channel side slope configuration, should not require a 1 to 1 slope because this serves no purpose when the pond is discharging. These requirements, however, are consistent with 30 CFR 816.46 and 817.46.

The commenter stated that Chapter 4.12.5 of the Technical Handbook, which requires a design height of 10% to allow for settlement, should be changed to 5%, the federal requirement. The West Virginia requirement is consistent with 30 CFR 816.46 and 817.46. The State can exercise its discretion to set different standards so long as they are consistent with federal requirements.

The commenter stated that Chapters 4.12.9, 5.17.14, 6.14.7 and 7.14.8 of the Technical Handbook, which address vegetation protection against erosion, should be modified to allow delayed seeding until a more favorable planting season. These requirements however, are consistent with 30 CFR 816.46(s) and 817.46(s).

Consolidation Coal Co. argued that the requirement in Chapter 5.17.3 of the Technical Handbook, that embankment materials contain a certain amount of moisture, should be deleted because it is allegedly not of a technical nature. This requirement is consistent with the federal requirements.

Consolidation Coal Co. argued that Chapters 8.4 and 9.4 of the Technical Handbook, should not require that all valley and head-of-hollow fills have rock toe buttresses. The commenter argued that fills can be designed to have a 1.5 static safety factor without such buttresses. However, this requirement is consistent with 30 CFR 816.71(i), 817.71(i), 816.71(j) and 817.71(j).

Consolidation Coal Co. argued that Chapter 8.5 of the Technical Handbook, which requires rock fill drains in valley fills, should allow constructed underdrains instead. However, this provision is consistent with the federal requirements.

Consolidation Coal Co. argued that Chapter 10.4 of the Technical Handbook, which defines materials greater than 6" in diameter as rock and materials less than 6" in diameter and soil, should be deleted. However, this requirement is consistent with 30 CFR 816.74 and 817.74.

Consolidation Coal Co. argued that Chapter 10.5.4 of the Technical Handbook, regarding internal drainage for rock fills, should be more flexible by reflecting various alternatives for underdrains. However, the state's provision is consistent with 30 CFR 816.74, 817.74, 816.71, 817.71, 816.72, and 817.72.

Consolidation Coal Co. argued that Chapter 10.7.3 of the Technical Handbook, should not require that soil materials in durable rock fills be compacted to a certain degree. The commenter argued that compaction occurs automatically, due to dumping. However, the state provision is consistent with 30 CFR 816.74(a)(1) and 817.74(a)(1).

Consolidation Coal Co. commented that all of Chapter 10.8 of the Technical Handbook, which requires a registered professional engineer or qualified person under the direct supervision of a registered professional engineer to be retained at the site during the construction of the rock fill, should be deleted. The commenter argued that this requirement is excessive because the construction specifications for durable rock fills are no more difficult than those for other fills. However, this provision is consistent with 30 CFR 816.71(i) and 817.71(i).

Consolidation Coal Co. argued that Chapter 12.4.2 of the Technical Handbook, addressing velocity in stream channel diversions, should not require riprap in every case. However, this requirement is consistent with 30 CFR 816.41(d)(2)(v), 817.41(d)(1)(v), 816.43(f)(1) and 817.43(f)(1).

Consolidation Coal Co. argued that Chapter 13.17 of the Technical Handbook, regarding sediment control, should not require runoff from roads to pass through sedimentation ponds. However, this regulation is consistent with 30 CFR 816.46 and 817.46.

Consolidation Coal Co. argued that Chapter 13.21(5)(d) of the Technical Handbook, regarding plan, design data and construction specifications, should require that motor graders be used only where necessary to maintain cross slopes. However, this provision is consistent with the federal requirements.

Consolidation Coal Co. argued that Chapter 14.4 of the Technical Handbook, which requires that the plan concerning drainage areas use the methods of "Water Management Practices" in Chapter 19, should be deleted. The commenter argued that it is questionable whether this guide includes the best technology currently available. However, the provision is consistent with 30 CFR 780.11(b)(3), 784.11(b)(1), (6), 780.18(b)(5), (9) and 780.21.

II. Performance Standards

1. One commenter questioned the lack of criteria for the design and construction of "alternative outcrop barriers" in the State submission. The Secretary agrees, as discussed in Finding 13.4, and has conditioned his approval of West Virginia's program accordingly.

2. One commenter stated that the State had not justified the use of woodlands as an acceptable alternative land use for mountaintop removal as required by the Secretary in Finding 13.8 of the October 20 Federal Register notice. The commenter pointed out that no showing had been made to demonstrate that flat or gently rolling terrain would be "essential" for the woodlands use. However, the State has limited its discretion to allow woodlands in State Regulation Section 2.133 by allowing only commercial woodlands where flat or gently rolling land is essential. This qualification of the State provision satisfies the concern expressed in the Secretary's original Finding of October 20, 1980. The use of this provision by the State will be reviewed by the Department during its oversight responsibilities under the permanent program. This issue is discussed further in Finding 13.8.

3. On commenter stated that although an amendment will be submitted to the West Virginia Legislature to remove the provision allowing gravity discharge in iron and acid producing coal seams, he was concerned that the measure would have no chance of approval in the Legislature unless detailed information is presented by well-informed experts on the subject. This issue is addressed in Finding 13.10 wherein approval of the West Virginia program is conditioned upon the State amending its statute. OSM will attempt to give any assistance requested by DNR in providing technical information to the Legislature on this issue.

4. One commenter stated that the State regulations do not provide for the use of protective devices and temporary sealing to prevent access to drill holes by the public, livestock, wildlife and machinery. This issue is discussed in Finding 13.18.

5. One commenter asked for clarification of State Regulation Section 6B.07c.3. in light of the requirements of 30 CFR 824.11(a)(8). It is not clear that the State regulation prohibits discharges from a mountaintop removal operation through a valley fill, although this is current practice in the State. This issue was identified by OSM in the review of the program and was discussed in the December 30, 1980 meeting with the State. (See Administrative Record No. WV 313). West Virginia representatives stated for the record that State Regulation Sections 6B.07c.3. and 7B.07c.3. do not allow mountaintop drainage into or through a fill. This issue is discussed further in Finding 13.36.

6. One commenter stated that State Regulation Section 6B.07b. does not provide that auger holes must be located so as to leave room for future deep mining operations. This issue is discussed in Finding 13.20.

7. One commenter noted that State Regulation Section 6B.07e.1. provides a very broad exemption from the regrading standards for special land use considerations. This issue is discussed in Finding 13.24.

8. One commenter suggested State Regulation Section 4C.04g which requires two (2) inch per second peak particle velocity be changed to reflect the standard of one (1) inch per second as found in 30 CFR 816.65(i) and 817.65(i). This issue is discussed in Finding 13.30.

9. One commenter noted the absence of State regulations containing provisions and criteria for transfer of wells as found in 30 CFR 816.53 and 817.53. This issue is discussed in Finding 13.32.

10. One commenter stated that the phrase "not permitted under a general Surface Mining Permit" should be added to State Regulation Section 10A. While the federal regulations do not require separate permits for coal waste piles, it is entirely within the discretion of the State to require additional permits. The State regulations are consistent with 30 CFR 780.25.

11. Consolidation Coal Company commented that West Virginia requirements on the construction of end-dump fills, Chapter 10 of Technical Handbook, are more stringent than federal requirements and therefore are not authorized by Section 20–6–23b of the WV Surface Mining and Reclamation Act.

General comments concerning the effect of Section 23b have been disposed of in response to comment 5 of Section I, above. The commenter did not provide any reference to the portions of Chapter 10 of the Technical Handbook concerning end-dump fills which were considered more stringent. However, a comparison of 30 CFR 816.71, 816.74, 817.71 and 817.74 with the requirements of Chapter 10 of the Technical Handbook reveals that West Virginia requirements are consistent with the federal requirements.

12. The West Virginia Coal Association (WVCA) suggested deletion of the last sentence in State Regulation Sections 10B.04c.2.b., 10B.04c.2.c.2. and 10B.04c.2.c.3. which require a dewatering device to maintain water in a slurry impoundment at the lowest practicable elevation. OSM regulations do not contain a comparable provision. However, the West Virginia regulations protect the integrity of the slurry impoundment, and thus provide additional protection for the public and the environment. The West Virginia regulations are consistent with the purposes of the federal requirements, and therefore acceptable.

13. The WVCA commented that State Regulation Section 10B.04c.6.a.iii., requiring grated drainpipes for ponds built without principal spillways, should be deleted because it conflicts with State Regulation Section 10B.04c.2., impoundment requirements. The comment does not specify in what manner these sections are in conflict, and a review of these regulations shows them to be consistent with federal requirements.

14. One commenter stated that the West Virginia regulatory program does not have a definition for permit area. Permit area as defined in Section 20–6–3(p) of the WV SCMRA is consistent with the federal requirements in 30 CFR 701.5.

15. One commenter argued that State Regulation Section 4A.04, which governs seeding of cut and fill slopes "in accordance with subsections 4F," must be changed to make the cross-reference more specific. The entirety of State Regulation Section 4F governs all requirements which must be met for revegetation. These requirements are consistent with the revegetation requirements of the 30 CFR 816.111–816.117 and 817.111–817.117.

16. One commenter objected to State Regulation Section 6A.03.a.4. limiting overburden analysis to the procedure in EPA manual 600/2–78–054 (Field and Laboratory Methods Applicable to Overburden Mine Soils). State Regulation Section 4F.02, however, does allow for "other methods." The State regulations, while not delineating "other methods," are consistent with 30 CFR 779.14.

17. The West Virginia Surface Mining and Reclamation Association (WVSMRA) commented that State Regulation Section 6B.06a.4., regarding surface water monitoring after grading approval, should be required "only if the discharge does not meet the quality of the receiving stream." Such monitoring is necessary in order to determine that discharges are not violating water quality standards. The State regulation is consistent with 30 CFR 816.52, and is acceptable.

18. One commenter questioned whether the use of the phrase "other approved sediment control structures" in State Regulation Section 6B.04a. would allow operators to avoid the requirement to pass all drainage through ponds as required by 30 CFR 816.42(a)(1). State Regulation Section 2.105 defines "sediment control structure" as a pond and specifically exludes secondary sediment control structures such as straw bale dikes, check dams, etc. In addition, State Regulation Section 4B.06 requires that "all runoff from the disturbed area shall pass through a sedimentation pond(s) * * *" These requirements make it clear that all surface drainage from West Virginia operations must be passed through sedimentation ponds. The State regulations are consistent with the requirements of 30 CFR 816.42(a)(1).

19. Several commenters stated that State Regulation Section 7B.04f improperly limits materials which could be disposed of in underground workings in such a way that would prohibit disposal of flue gas desulfurization sludge and acid mine drainage treatment sludge. 30 CFR 816.55 is a restrictive provision which allows the State regulatory authority to prohibit disposal of certain materials in any particular case. It is entirely within the proper discretion of the State to choose, *a priori*, which materials it will not allow to be disposed of in underground workings in any case. The State provision is consistent with federal requirements and, therefore, acceptable.

20. One commenter stated that the State Regulation Section 6B.04b. establishing "pH" water quality standards * * * is "unrealistic" because of environmental conditions in West Virginia. The State provision is consistent with 30 CFR 816.42(a)(7) and effluent limits for the coal mining industry established by EPA in 40 CFR Part 434.

21. One commenter noted that 30 CFR 816.52(a)(2), requiring monitoring of ground water "adequate to plan for modification of surface mining activities, if necessary, to minimize disturbance to the prevailing hydrologic balance," is more stringent than State Regulation Section 6B.06b. The State regulations provide for monitoring adequate to reflect "changes in groundwater quantity and quality" and are within the discretion given to States under 30 CFR 816.52. The State regulations are consistent with federal requirements.

22. The WVSMRA commented that State Regulation Section 4C.02, regarding information on obtaining a pre-blast survey, should be deleted. The State regulation is identical to 30 CFR 816.62 and 817.62 and is consistent with federal requirements.

23Several commenters stated that State Regulation Section 4C.04a. fails to require that the blasting schedule contain a list of foreseeable situations which might necessitate blasting outside the scheduled times as required by 30 CFR 816.64(b)(v). State Regulation Section 4C.04a does specify the emergency situations where deviation from the schedule may be permitted. This regulation provides ample notice to the public as to when an operator may deviate from the published schedule, and is consistent with federal requirements.

24. One commenter questioned the absence of West Virginia regulations which coincide with 30 CFR 816.65(c) requiring that persons who live or work within one-half mile of the permit area shall be instructed on the meaning of the blasting signal. State Regulation Section 4C.02 requires that public notice of blasting shall be published in a newspaper of general circulation in the county of the proposed permit area and the schedule mailed or delivered to each residence within one-half mile of the permit area at least every 12 months. Persons near the permit area are warned by signs required by State Regulation Section 6B.01e. to be posted at all entrances to the permit area. These State provisions for public warning and notification are consistent with 30 CFR 816.65(c).

25. The WVSMRA commented that State Regulations Section 4C.04f.1., regarding the prohibition of blasting, should be changed from 1,000 feet to 300 feet. Since in 30 CFR 816.65(f) and 817.65(f) which contain these provisions have been remanded, the State is free to adopt whatever limitations are reasonable. See response to Comment 9 of Section I, above.

26. The WVSMRA commented that State Regulations Section 4C.04h. regarding the formula for maximum weight of a detonation, should be changed from $W=(d/60)^2$ to $W=(d/50)^2$. The State regulation is identical to 30 CFR 816.65(l)(1) and 30 CFR 817.65(l)(1) and is consistent with federal requirements.

27. One commenter objected to the hazard classification system for embankments and impoundments found in State Regulation 10B.04.b.1. Although OSM does not utilize a hazard classification system, the State requirements for coal waste embankments and impoundments are consistent with federal requirements in 30 CFR 816.81–816.93 and 817.81–817.93 and are acceptable. The commenter also points out a difference between West Virginia requirements in 10B.04.d.3. which provide minimum size for shale underdrains and federal requirements in 30 CFR 817.72(b)(3) which also include minimum size requirements for sandstone underdrains. The West Virginia regulations provide that all drains are to be constructed of durable rock and provide criteria for durability. The West Virginia requirements are consistent with the federal regulations.

28. One Commenter questioned the absence of a requirement in State Regulation Section 10B.04d. preventing the use of acid-forming/toxic-forming rock in the construction of underdrain systems for valley fills as required in 30 CFR 816.72(b)(4) and 817.72(b)(4). State Regulation Section 10C.06a.2., however, requires that "acid-forming or toxic-forming material shall not be buried or stored in proximity to a drainage course * * *" This prohibition would apply for material used in the underdrain itself since such material is in proximity to a drainage course. The State provisions are consistent with federal requirements.

29. The WVCA and others also recommended deletion of State Regulations 10B.04.c.6.a.iv.8. which states that water may not be diverted under a coal refuse area by means of a pipe or conduit. The commenter stated that this practice was acceptable to MSHA and that any problems could be avoided by proper design. The West Virginia requirement is consistent with requirements of 30 CFR 816.72(d) and 816.83(b) which require that surface drainage be diverted off of and around a coal refuse area, rather than through it.

30. The WVCA recommended deletion of State Regulation 10B.05.a which requires that upon reprocessing of abandoned coal waste piles, the entire pile must be removed. Under 30 CFR 816.81(b), 816.87, 817.81(b) and 817.87, discretion is granted to State regulatory authorities in dealing with abandoned coal refuse piles. The West Virginia requirements are a proper exercise of that discretion and are consistent with federal requirements.

31. A commenter requests clarification of the term "qualified person" utilized in State Regulation 10C.08d.2. by proposing it be defined in the definitions section of the West Virginia regulations. 30 CFR 816.82(a) requires that inspections be made during construction of coal waste piles by an RPE or person approved by the regulatory authority. Discussion of the West Virginia system for "approved persons" is found in Finding 13.9. As stated therein, the West Virginia requirements are consistent with federal requirements. Placement of any

definitions is within the discretion of the State.

32. One commenter stated that Section 10 of the Technical Handbook is unclear in its application to impounding and non-impounding coal waste areas. The commenter suggested that the requirements for each type of area be separated for the sake of simplicity. This comment is not directed to the consistency of the West Virginia regulations. The organization of State regulations is entirely up to the State.

33. The same commenter also objected to the requirement in State Regulation Section 10C.08d. calling for weekly inspections of impoundments and embankments. 30 CFR 816.82(a) requires at least quarterly inspections, but vest State regulatory authorities with discretion to require more frequent inspections. The West Virginia requirement of weekly inspections is a consistent exercise of this discretion.

34. One commenter stated that State Regulation Section 10C does not include the requirement for keyway cuts or rock toe buttresses found in 30 CFR 816.85(a) and 816.71(i) for coal refuse piles on steep slopes. Chapter 8.4 of the Technical Handbook, requires these measures "in all cases" for valley-fills. Coal refuse pile construction is to be in accordance with modified valley fill standards, therefore the State provisions are consistent with the federal requirements.

35. One commenter objected to State Regulation Section 6B.05a.1. which allows blending as an appropriate means of handling toxic materials. The commenter stated that there is not an accurate correlation between total potential acidity and alkalinity in many instances. Blending is an acceptable method of handling toxic or acid-forming material, for the reasons discussed in Finding 13.35.

36. The WVSMRA commented that in State Regulation Section 4E.02c., regarding protection of fish, wildlife and related values, the reference of electric power lines should be deleted. The State regulation is identical to the relevant portions of 30 CFR 816.97(c) and 817.97(c) and is consistent with federal regulations.

37. The WVSMRA commented that State Regulation Section 4F.01a., regarding the purpose of revegetation requirements, should delete the reference to providing economic benefits and restoring esthetic appeal. The State regulation is consistent with 30 CFR 816.111 and 817.111.

38. The WVSMRA commented that State Regulation Section 4F.08 should only require mulch to be distributed on areas where it is needed instead of on "all" disturbed areas. The State regulation is consistent with 30 CFR 816.114(a) and 817.114(a).

39. The WVSMRA commented that State Regulation Section 4F.09 should require that perennials be planted after the last season instead of "after the last year." The State regulation is consistent with 30 CFR 816.116(b)(1) and 817.116(b)(1).

40. The WVSMRA commented that State Regulation Section 4D.04a.–j., regarding postmining land use should be changed to require reporting on future land use instead of specific plans and commitments. The State regulation is consistent with 30 CFR 816.133 and 817.133, which also require specific plans and commitments.

41. The WVSMRA commented that State Regulation Section 4D.02a. and 4D.02a.3., which governs the determination of premining land use, should regard previously mined land as an acceptable premining land use. The State regulation is identical to 30 CFR 816.133(b) and 30 CFR 817.133(b) and is consistent with federal requirements.

42. The WVSMRA commented that State Regulations 6B.04b.2., 7B.04b.2, 7B.07a.3., and 6B.04b.2., regarding the quality of water discharges from a grade release area, should be changed to require meeting only the quality of the receiving stream. The State regulation is consistent with 30 CFR 816.41(c), 816.42(a)(2), 817.41(c) and 817.42(a)(2), which require that all federal and State water quality statutes, regulations, standards and effluent limitations must be met.

43. The WVSMRA commented that the word "desirable" should be deleted from State Regulation Section 4A.05 regarding the materials used in surfacing of haulageways and access roads. The word "desirable" does not appear in this regulation. If the commenter meant to suggest that "durable" should be deleted, the Secretary does not have authority to require that this be done.

44. United States Steel Corporation (USSC) commented that it was of the opinion that State Regulation Sections 7B.04a., b., c. and 8B.04a., b., c. are inconsistent with 30 CFR 817.42 because the State regulations do not provide a variance for the utilization of sediment ponds as provided in the federal regulations. The Secretary has no authority to require this change, as the State rules are consistent with the federal rules.

45. The WVSMRA commented that State Regulation Section 8B.09b should not require that a permanent facility has to be removed. The State regulation is consistent with the federal rules.

46. The WVSMRA commented that State Regulation Section 8A.01, regarding permit requirements for facilities incidental to coal mining, should delete the reference to "mine buildings." The State regulation is consistent with 30 CFR 817.181(a), and 816.181(a) which also contains this phrase.

III. Permitting

1. The United States Fish and Wildlife Service commented that State Regulation Section 3Q.03 requiring the Director to make a written determination concerning threatened or endangered species should be amended to refer to Section 3J.02 rather than 3J.01. This appears to be a typographical error which does not obscure the meaning of the requirement and the Secretary assumes that this mistake will be corrected.

2. The United States Fish and Wildlife Service suggested that State Regulation Sections 6A.01c. and 7A.01c., specifying the maps which a permit shall contain, should also require a map to show the location of any unusual wildlife habitats including habitats for endangered or threatened species occurring within the areas to be mined and within the drainage areas to be affected by the proposed mining. The Secretary finds that Sections 6A.01c. and 7A.01c. regarding maps are consistent with 30 CFR 779.24 and 783.24. The requirements of 30 CFR 779.20 and 783.20 regarding fish and wildlife information have been remanded; therefore, no changes will be required in the West Virginia regulations.

3. The United States Fish and Wildlife Service suggested that State Regulation Section 13.07(a) regarding the criteria for designating lands as unsuitable for surface coal mining operations be expanded to include, upon petition, these areas where endangered or threatened species may be jeopardized or their critical habitats adversely affected. The Secretary finds that Section 13.07a. is consistent with 30 CFR 762.11, therefore, no changes will be required.

4. One commenter questioned the status of pending interim program permit applications following program approval. Specifically, this commenter requested that the State be required to conduct an inspection prior to the issuance of a permit and at the request of the applicant. While a pre-permit inspection may be desirable in some circumstances, there is no provision in SMCRA or the federal regulation for such an inspection, and the State cannot be required to make provision for this.

5. One commenter stated that the State should accept, as part of meeting the requirements for a permit, maps approved by the Mine Safety and Health Administration. Such maps are acceptable under federal requirements and the State program as long as they meet the standards of 30 CFR 779.24, 783.24 and Section 20–6–10 of the WV SCMRA and State Regulation Section 3.

6. One commenter stated that he did not believe that the State inquired into an applicant's legal right to mine coal prior to issuance of a permit. He also stated that he wanted the State to comply with 30 CFR 782.15 and 30 CFR 778.15. These Sections require an identification and description of the document upon which the applicant bases his or her legal right to enter and begin the underground or surface mining of coal. This information is also required by Section 20–6–10(a)(9) of the WV SCMRA and is consistent with the federal requirements.

7. One commenter referred to the lack of simultaneous notification to the public, State Regulation Section 3Q, regarding the determination made concerning a permit application, especially to those who filed written objections or comments. This issue is discussed in Finding 14.8.

8. One commenter identified an inconsistency between State Regulation Section 12B.07b. and 30 CFR 786.15(a)(2) as it relates to public availability of permit application information pertaining to overburden and soil sample analysis. This concern is addressed in Finding 14.9.

9. One commenter questioned several portions of State Regulation Section 4D.04, "Criteria for Approving Post-Mining Use of Land". The first concern was that specific criteria be used in approval of alternative post-mining land use. These criteria are provided in State Regulation Section 4D.04. The second concern was that the alternative use be approved prior to permit issuance. This is provided in the reclamation plan requirements of Section 20–6–11 of the WV SCMRA. The third concern was the omission of the words "financing" and "attainment" in the State regulations. Section 20–6–11(a)(4) of the WV SCMRA requires a detailed description of how the post-mining land use is to be achieved and the necessary support activities needed to achieve the proposed land use. These requirements are consistent with the Act.

10. One commenter referred to "written statements of the views of the authorities with statutory responsibilities" not being required in State Regulation Section 4D.04. The federal standard in 30 CFR 816.133(c)(1) and 817.133(c)(1) allows 60 days for such written statements, while the State requires such statements "accompany the request for (alternate post mining land use) approval." The State provision is consistent with the federal requirements.

11. One commenter indicated that the requirement for a 60 day alternate land use plan review period by State and federal fish and wildlife management agencies before surface mining activities begin as reflected in 30 CFR 816.133(c)(8) is not provided for in the State program. This issue is discussed in Finding 13.32.

12. One commenter objected to State Regulation Section 4E.01 in that it appears to mean that the submittal of a permit application triggers an evaluation by the Director as to whether or not that area is unsuitable for mining and whether fish and wildlife studies will be necessary. The Secretary finds that the lands unsuitability inquiry conducted by the Director is an informal process intended to assist the applicant in the permitting process. The Director's review of the environmental resources of the proposed permit area is only intended to alert the applicant to those resources which may need special consideration, and therefore, is found to be consistent with the federal requirements.

13. The West Virginia Society of Professional Engineers commented that the requirements of State Regulation Section 3E.02b. exceeds the requirements of the Act by requiring all persons who wish to qualify to prepare application and preplans to pass an examination administered by the Director. The commenter stated that this was unacceptable because of the provisions of Section 20–6–23(b), of the WV Surface Mining and Reclamation Act which the commenter stated forbid any regulations more stringent than the federal requirements.

General comments concerning the effect of Section 20–6–23(b) of the WV Surface Mining and Reclamation Act have been disposed of in number 5 Section I, above. In addition, the West Virginia provision concerning examinations for "approved persons" is consistent with federal requirements. [See Finding 13.9, above]

14. Carbon Fuel Company commented that State Regulation Section 3A.02c. which allows operators with interim program permits to continue operating without a permanent program permit past the eight month cut-off date set forth in State Regulation Section 3A.02 and Section 506(a) of SMCRA, must be construed to include permits issued by the West Virginia Department of Mines (DOM) for underground mines. These DOM permits, issued before 1977, are usually known as "D" numbers. These "D" permits, by themselves, cannot be construed as interim program permits because they do not incorporate the provisions required by Section 502(b) and (c) of SMCRA.

Since January, 1980, DNR has been accepting DR–14 and DR–23 forms from underground mines existing before the effective date of SMCRA. These DR–14 and DR–23 forms basically upgrade the existing permits to assure compliance with the interim standards. As stated in Carbon's comment, the industry obtained an injunction in Kanawha County Circuit Court, *Amherst Coal Corp. v. Callaghan*, Civil Action No. 80–701 (1980), prohibiting DNR from *requiring* all underground operators to submit DR–14 and DR–23 forms. However, DNR has continued to accept, process and approve those DR–14 and DR–23's which were voluntarily submitted.

Carbon has also argued that the Secretary's legal position in the case of *Union Carbide* v. *Andrus*, Civil Action No. 79–2182 (S.D.W.V. 1979), mandates that "D" numbers be considered interim program permits. This is not correct. In that case, the Secretary argued that DNR had jurisdiction over all underground mines by virtue of West Virginia statutes and Section 502(c) of SMCRA, even though all these mines did not have permits from DNR. This position was adopted by the Court. However, it does not follow that because DNR has jurisdiction over underground mines to enforce performance standards, that this automatically transforms "D" numbers into interim program permits. As stated above, this transformation can only be accomplished by a DR–14 and DR–23. The State may take the position that only those operators who have applied for DR–14 and DR–23's prior to the approval of the State program are eligible for extensions of time beyond the eight-month cut-off date.

15. The West Virginia Surface Mining and Reclamation Association (WVSMRA) commented that State Regulation Section 4E.01, regarding the determination of whether a study should be made on the impacts of fish and wildlife resources of the affected area, should not delay the issuance of a SMA number. This requirement is within the discretion of the State and is consistent with federal requirements.

16. The WVSMRA commented that State Regulation Sections 30.01 (e) and (f), in regard to the requirement of a progress map, should be deleted. This provision is consistent with Section 517(b)(1) of SMCRA.

17. The WVSMRA commented that State Regulation Section 4A.04, regarding the seeding of slopes, should not be "immediately" seeded, but "seeded in the first appropriate season." This section is consistent with the seeding requirements of 30 CFR 816.113 and 817.113.

18. The WVSMRA commented that the word "horizontal" should be deleted from State Regulation Section 3K.01, regarding the measurement of distance from an occupied dwelling to a coal mining operation. The State provision is consistent with 30 CFR 761.12(e).

19. The WVSMRA commented that State Regulation Section 3G.05, pertaining to the effective date of determining substantial, financial and legal commitments, should be changed from January 4, 1977, to August 3, 1977. The State regulation is consistent with Section 522(a)(6) of SMCRA and 30 CFR 778.16(b) and 782.16(b).

20. One commenter stated that State Regulation Section 6A.03, regarding the submission of a description of the geology within adjacent areas with a permit application, is unnecessary. The State regulation is consistent with 30 CFR 779.14.

21. The WVSMRA commented that State Regulation 5B.11, regarding newspaper advertisements for prospecting operations, should be deleted. The State regulation is consistent with 30 CFR 776.14(a).

22. The WVSMRA commented that the State Regulation Section 6A.03a.5., regarding the submission of a test for marcasite and clay content in the geologic description, should be deleted. The State regulation is consistent with 30 CFR 779.14(b)(1) (iii), (iv) and (v).

23. One commenter stated that the State Regulation Sections 6A.02, 6A.03, 7A.02 and 7A.03 and WV SCMRA Section 20–6–16(b)(3) require submission of hydrologic data with a permit application which is unnecessary and costly to the operator. The State requirements are consistent with SMCRA and 30 CFR 779.13, 779.14, 779.17, 783.13, 783.14, 783.17 and 786.19(c).

24. One commenter suggested that the requirement of State Regulation Sections 6A.02a. and 7A.02a., regarding the submission of groundwater information with a permit application, are unnecessary. The State regulations are consistent with 30 CFR 779.15 and 783.15.

25. The WVSMRA commented that State Regulation Section 3G.02a., requiring a permit application to contain information on buildings within 1,000 feet of the proposed permit area, should not be required if the building is not used by the mining operation. The State regulation is consistent with 30 CFR 779.24(d) and 783.24(d).

26. The WVSMRA commented that State Regulation Section 3G.02e., requiring information in the permit application on designated study rivers under Section 5(a) of the Wild & Scenic Rivers Act, should be deleted. The State regulation is consistent with 30 CFR 779.24(k) and 783.24(k).

27. The WVSMRA commented that State Regulation Section 6A.01c.9., requiring the measurement of slopes for a permit application, should be deleted. The State regulation is consistent with 30 CFR 779.25(k).

28. The WVSMRA commented that State Regulation Section 3F.016. requiring a permit application to contain a listing of any notice of violation, should be deleted. The State regulation is consistent with 30 CFR 778.14(c) and 782.14(c).

29. One commenter suggested that State Regulation Section 3H.03 should be disapproved to the extent that it is applicable to something other than existing structures. The Secretary finds that the West Virginia definition of existing structures includes facilities used in connection with or to facilitate surface coal mining and reclamation operations and is consistent with 30 CFR 780.12, 784.12 and 786.12.

30. One commenter stated that State Regulation Section 3H.03 (c) and (d) requires more than conformance with the performance standards of the WV SCMRA for existing roads and coal waste piles. The Secretary finds this provision of the West Virginia program is consistent with 30 CFR 780.12, 784.12 and 786.12.

31. One commenter stated that State Regulation Section 3D.01 is inconsistent with 30 CFR 782.18 because the West Virginia program does not provide the option for self insurance. The West Virginia personal injury and property damage provision is consistent with the federal requirements. The federal regulations provide the option for self insurance, but do not require this provision to be included in a State program.

32. The WVSMRA commented that State Regulation Section 7A.03a.5., regarding the analysis of the coal seam in the geology description, should be deleted. The State regulation is consistent with 30 CFR 783.14.

33. United States Steel Corporation (USSC) also commented that it was of the opinion that State Regulation Sections 7A.02b. and 8A.02b., concerning surface water information, are inconsistent with 30 CFR 783.16 because they do not provide that alternative methods of data collection may be employed. USSC continued that this section of the State regulations are also inconsistent with guidance provided to USSC by OSM and with other state programs which have been provided conditional program approval, because the state regulations require that water quality data be collected on a monthly basis for not less than six months, rather than on a quarterly basis for one year. The West Virginia provision is consistent with the federal requirements. The requirements in 30 CFR 783 do not provide a specific sampling frequency or duration for the hydrologic data to be included in the permit application, but require that it be sufficient to provide certain information. West Virginia has provided in State Regulation Section 3A.02 that permit applicants may submit partial or phased applications if such action is approved by the Director of DNR, provided that a complete application is submitted no later than eight months after approval of the permanent state program. Therefore, the applicant will have an ample opportunity to collect the additional water quality data which DNR requires to be a part of the permit application before the deadline for submitting a complete application.

34. The WVSMRA commented that State Regulation Section 4A.01c. and d., regarding the descriptions of coal transportation systems to be contained in the permit application, should only describe the transportation facilities under the control of the operator. The State regulation is consistent with 30 CFR 780.37 and 784.24. See Finding 14.6.

35. The WVSMRA commented that State Regulation Section 3H.04, requiring the Director of OSM to approve any experimental practices prior to the beginning of operation, should be changed giving the approval authority to DNR. Section 711 of SMCRA and 30 CFR 785.13 require the Director of OSM to approve all experimental practices. The State regulations are consistent with the federal requirements.

IV. Designating Lands Unsuitable

1. One commenter stated that he had been told that the State must deny a petition to designate a certain area as unsuitable for mining if any portion of the area was determined to be suitable for mining. This is incorrect. Section 20–6–22(a)(1) of the WV SCMRA, which is consistent with Section 522(a)(2) of SMCRA, places a mandatory responsibility upon the Reclamation Commission to designate an area as unsuitable if it determines that reclamation is not technologically or economically feasible. The Commission

is not required, however, to designate the entire petitioned area as unsuitable. They must designate only the areas where reclamation is not feasible.

V. Civil Penalties

The Tug Valley Recovery Center (TVRC) and other commenters submitted a number of comments pertaining to West Virginia's civil penalty procedure contained in Section 20–6–17 of the WV SCMRA (including the amendments proposed thereto) and State Regulation Section 14A.02. Disposition of these comments relates to Finding 19.

1. TVRC commented that use of an administrative hearing officer to review penalty assessments imposed by the DNR is preferable to the State's reliance on the magistrate court system because it is more likely that hearing officers would develop subject matter expertise than magistrates. Although it is possible that this observation is correct, the use of magistrates is acceptable because of their general experience in adjudication. Expertise in the specific area of surface mine assessments will develop over time. In addition, the State has traditionally utilized the magistrate courts to process criminal complaints against persons accused of violating the State's Surface Mining laws.

2. TVRC commented that delays in the imposition of civil penalties will occur because there are inadequate resources available to the magistrate courts. The State is proposing amendments to Section 20–6–17(d) of WV SCMRA which would require, among other things, that all such cases be heard by the magistrate within 60 days, that a written decision be entered within 10 days, and that preference be given to civil penalty cases. Enactment of this language would insure that such cases would be disposed of promptly, even if the resolution of other cases pending before the magistrate is delayed. Accordingly, approval of the State's submission has been conditioned upon amendment of the program to insure that disposition of civil penalty cases is accomplished in a timely fashion.

3. TVRC stated that the magistrate court in West Virginia was subject to political pressure and, therefore, would result in penalty decisions favorable to industry. Information in the Administrative Record (Administrative Record No. WV 165—Exhibit A submitted by Benjamin C. Green, President of the West Virginia Surface Mining Reclamation Association) showed 784 successful prosecutions before magistrates by DNR in 1979. This would tend to refute this contention. In addition, magistrates decisions would be subject to both judicial review and secretarial oversight.

4. TVRC comments that the failure of the State program to provide for an administrative hearing officer to adjudicate civil penalty matters will result in a lack of uniformity of assessment of penalties, especially since this function will be performed by magistrates who are spread across the State. This comment states that the problem is aggravated by the fact that, since the magistrate court system is independent of the regulatory authority, it would be acting without guidance from a policy making body such as the Reclamation Board of Review.

The Secretary believes that this comment somewhat misperceives the federal civil penalty process. In the federal system, penalties are proposed by OSM in accordance with a point system set forth at 30 CFR Part 845. (As discussed in detail in Finding 19 of the October 20, 1980, Federal Register Notice (45 FR 69258), the Secretary cannot require that states utilize any particular system for assessing penalties). Although the review of a proposed penalty is before an administrative law judge, the review is based on OSM compliance with the regulations; the judge is not bound by OSM policy.

The State system is similar in that the proposed amendment to Section 20–6–17(d) of WV SCMRA would require in Section 17(d)(2) that, "The magistrate shall be bound by the provisions of this Act, regulations promulgated pursuant thereto, and any decisions rendered by the Reclamation Board of Review pursuant to Section 20–6–24 of this Act."

However, the Secretary agrees that it is unlikely that uniform assessments will occur as the State program is now written. Although Section 20–6–17(c) of WV SCMRA contains the same general criteria for assessing penalties as Section 518(a) of SMCRA, there are no State regulations which provide guidance as to how these factors are to be applied. Without such guidance it is unlikely that any semblance of uniformity in civil penalties can be achieved. Of even more significance, however, is the fact that, with only the general statutory criteria to use in reviewing penalty assessments, the magistrates could substitute freely their judgment for that of the regulatory authority. Accordingly, approval of the State program has been conditioned on the promulgation of regulations or other program changes which provide guidance to DNR personnel and magistrate courts as to the application of the penalty criteria in Section 20–6–17(d) of WV SCMRA to factual situations.

5. TVRC stated that reliance on the magistrate system in the civil penalty process deprives citizens of the ability to review the effectiveness of the system and eliminates their ability to petition for rule changes that would adjust the process to make it effective and efficient. The Secretary believes that the West Virginia system does provide for the imposition of civil penalty assessments by the regulatory authority; the only function of the magistrate is to review the DNR's proposed penalty. Since citizens would have access to DNR's records, this information would be readily available. Citizens could always petition for changes if they felt the penalities were inadequate to deter violations.

6. TVRC stated that Section 518(d) of SMCRA demonstrates that Congress intended the courts to be involved solely in the collection of civil penalties and in appeals from initial assessments by an administrative agency. That section provides that "Civil penalties owed under this Act, may be recovered in a civil action brought by the Attorney General at the request of the Secretary in any appropriate district court of the United States." Although this language is written for the expressed purpose of collecting federally imposed penalties in the federal judicial system, Section 518(i) of the Act requires that State programs contain the same or similar procedural requirements but that additional enforcement procedures available under State law are not to be eliminated. The Attorney General's opinion states that magistrate courts have authority to enforce their judgments. One reason Section 518(d) is needed in the federal law is because administrative law judges cannot directly enforce their orders. Therefore, the Secretary concludes that use of the magistrate courts to perform the adjudicatory function of the administrative law judge is in accordance with the language of Section 518(i) because it provides a more direct way of enforcing penalty judgments than does the federal system.

7. TVRC stated that since Article III, Section 13 of the West Virginia Constitution provides for a trial by jury in civil matters where the value in controversy exceeds $20.00, the DNR proposal to amend Section 20–6–17(d) of the WV SCMRA to eliminate the availability of jury trials in civil penalty proceedings may conflict with the State Constitution. In response to this comment, the West Virginia Attorney General's office was contacted and

requested to offer an opinion on this issue. The Attorney General's office advised that State case law had clearly established that the constitutional provision for a jury trial was limited to those situations where jury trial was available at common law when the constitution was adopted in 1863 and did not preclude the legislature from providing that jury trials would not be available in the instant situation. [*State Human Rights Commission* v. *Pearlman Realty Agency*—W. Va.—, 239 S.E. 2nd 145, (1977); *Simms* v. *Dillon*, 119 W. Va. 284, 193 S.E. 331 (1937)]. The Secretary accepts this interpretation of State law and concludes that the legislature does have authority to preclude the use of jury trials in adjudicating civil penalty issues.

8. TVRC notes that Article VII, Section 10 of the West Virginia Constitution provides that magistrate courts "shall have original jurisdiction in all civil cases at law wherein the value or amount in controversy, exclusive of interest and costs, shall not exceed $1,500, unless such amount in value shall be increased by the legislature * * *." Therefore, the magistrate system would not have jurisdiction over any proposed penalty in excess of $1,500.

The Secretary notes that Section 20–6–17(d) of the WV SCMRA provides that, "notwithstanding the jurisdictional limitations contained in Article 2, Chapter 50 of the West Virginia Code, any such penalty may be imposed and collected by the magistrate courts which shall have jurisdiction over all civil penalty actions brought by the Director." (Slight changes to this language are being proposed). This provision would appear to give the magistrates legal authority to hear civil penalty cases involving more than $1500 because the Constitution on its face anticipates that the legislature may increase the $1500 limit.

9. One commenter stated that West Virginia Code Section 50–6–1 pertaining to enforcement of judgements was not consistent with the requirements of Section 526(a)(2) of SMCRA because the State section does not establish that State courts have jurisdiction to issue an order in *equity* requiring payment of civil penalties. Section 526(a)(2) of SMCRA states, "* * * the court shall have jurisdiction to enter an order requiring payment of any civil penalty assessment enforced by its judgment." There is no specific requirement in federal law that enforcement must be via the court's contempt power. Rather, federal law requires that the court have jurisdiction to enter an order requiring payment of the civil penalty. The actual enforcement of this order could equally be accomplished by use of contempt powers, liens, or any other mechanism that would enable the court to actually enforce its order. The Secretary finds that West Virginia Code Sections 50–6–1 and 20–6–17(d) are adequate in this regard.

10. One commenter stated that the magistrate courts are not subject to the conflict of interest provisions contained in Section 20–6–40 of the WV SCMRA and Section 517(g) of SMCRA. The commenter went on to state that although the magistrates are subject to the West Virginia judicial code of ethics under the West Virginia Code, there is no provision which would preclude a magistrate from presiding over a case where he had an interest in a surface mining operation although he does not have an interest in the particular operation which is presently a party before him. Furthermore, the commenter stated that the judicial code of ethics, unlike Section 20–6–40 of the WV SMCRA and Section 517(g) of SCMRA, does not provide for criminal sanctions.

The Secretary believes that nothing in SMCRA prevents a program function from being performed in a State agency that is different from the regulatory authority. Thus, the Secretary believes that nothing in SMCRA dictates *against* the West Virginia proposal to have the magistrate court system impose civil penalties. See Finding 19.1 for discussion of West Virginia's use of the magistrate system.

This being the case, it is necessary to address the conflict of interest provision that applies to magistrates in light of the conflict of interest provisions required by SMCRA to apply to regulatory authority personnel. SMCRA and 30 CFR Part 705 clearly provide that any administrative personnel are deemed to be within the regulatory authority (for conflict of interest purposes), and, therefore, are subject to the conflict of interest provisions of Section 517(g) of the Act. However, the Secretary has never taken the position that judicial personnel are subject to those same provisions. The Secretary believes this is not only a proper interpretation of SMCRA but also it is in keeping with traditional concepts of separation of power. For example, in the federal system, federal judges have never been considered federal administrative employees subject to the conflict of interest provisions for employees. Federal judges have always been subject to judicial codes of ethics and will continue to be so, although SMCRA's federal conflict of interest provisions apply to all federal employees. See Section 201(f) of SMCRA.

The Secretary does not believe that it is appropriate under SMCRA either to require that the magistrates be subject to an administrative code of ethics or that West Virginia devise new conflict of interest provisions for its judicial code. Therefore, the Secretary believes that the conflict of interest provisions of Section 517(g) of SMCRA dictate that Section 20–6–40 of WV SCMRA apply only to regulatory authority personnel.

As mentioned above, nothing in SMCRA prevents magistrates from imposing civil penalties. If West Virginia's purpose in placing this authority in the magistrate court system were to avoid the conflict of interest provisions of Section 517(g) of SMCRA, then the Secretary could not find approvable the magistrate court system for imposing civil penalties. However, this is not the case. The magistrate system has a long history in the imposition of penalties under West Virginia law. The Secretary believes that West Virginia is merely utilizing the magistrate court system in a manner that is in keeping with the routine operation of that State's government.

West Virginia Code Chapter 50–2–3 provides, and the practice is highly developed and utilized, for the transfer of pending cases from one magistrate to another where any of the parties or the magistrates would be unable to render a fair and impartial decision. Additionally, under the proposed West Virginia system the circuit courts of record could reverse any improper decision to transfer, or a decision on the merits of the case itself, where a fair and impartial decision is not made.

Because the court system is governed by a judicial code of ethics and provides for due process protection, OSM will not require that magistrates be determined to be administrative personnel subject to the code of ethics provisions of Section 517(g) or Section 20–6–40 of the WV SCMRA, or that West Virginia's judicial system revise its code of ethics.

11. TVRC stated that the State submission failed to make clear how penalty assessments for continuing violations would be handled. Presumably the commenter is concerned that this language might allow the assessment of penalties for only some days the violation is unabated, rather than imposing a penalty for each day the violation is unabated. State Regulation Section 14 A.02c. provides that civil penalties continue until the violation is corrected. State Regulation Section 14 also contains general procedures for assessing and collecting these penalties. The Secretary believes that the

regulations state clearly that assessments *shall* continue and that there is no question that the penalties would be imposed on a daily basis for every day the violation remains unabated. State law provides that a proposed assessment must be issued within 30 days after the violation is issued. Should a violation continue unabated beyond the 30 days, the regulatory authority should have some flexibility in deciding when to seek penalties for the additional days the operator is in violation. Accordingly, no change in the West Virginia program will be required.

12. One commenter expressed concern that the West Virginia proposed statutory amendment to Section 20–6–17(d) of the WV SCMRA does not make clear that attorney's fees could not be awarded against a participating party in civil penalty cases where it was determined a violation existed, even though the individual may have proceeded in bad faith and for the purposes of harassing or embarrassing the violator. The commenter notes that this language does appear in Section 17(d)(10)(d) of the proposed State statutory amendment which states when attorney fees can be awarded against the DNR. The Secretary believes that where a violation is determined to have existed, it is highly unlikely that a court would ever award attorney's fees to a violator against a participating party. In view of this, the Secretary finds that the change requested by this commenter would be superfluous because the concern expressed is at best theoretical and would in all likelihood never occur.

13. One commenter stated that there was a strong likelihood that the State's proposed use of the magistrate court system in the civil penalty process would be struck down by the West Virginia Supreme Court. The reason for this commenter's concern was that the magistrates would be acting in a fashion more closely akin to that of a hearing officer employed by the Executive Branch of the government than as a judicial officer employed by the Judicial Branch of government; therefore, the State's approach is inconsistent with the separation of powers doctrine. The Secretary notes that at the present time the magistrates have jurisdiction over criminal actions brought by the State Department of Natural Resources for violations of the State's Surface Mining Law. Even with the statutory changes proposed by West Virginia, the role of the magistrate court in making decisions on civil penalty cases would not change in any significant way. The magistrates would continue to adjudicate disputes between the DNR and operators concerning civil penalty assessments and the underlying fact of violation. Since the changes in the magistrate system proposed by the State appear to be well within the powers of the legislature (e.g., requiring a written decision, requiring a decision to be rendered within a specific period of time), the Secretary finds that the use of the magistrate system envisioned by the proposed statutory changes does not conflict with the separation of powers doctrine, nor is there a significant likelihood that the system would be struck down by the West Virginia Supreme Court of Appeals.

14. One commenter expressed concern that Section 20–6–16(a) of the WV SCMRA read in conjunction with Section 20–6–17(a) of the WV SCMRA might result in situations where no mandatory daily penalty would be assessed even though the violation had not actually been abated. The commenter notes as an example that the situation could occur where a cessation order expires because a hearing is not held within 24 hours after the order was issued, as required by Section 20–6–16(a). This concern is shared by the Secretary as reflected in Finding 19.1 of the October 20, 1980, **Federal Register** notice. At that time the Secretary required that the State demonstrate it had adequate personnel to conduct hearings within the 24-hour time period to insure that such cessation orders did not expire prematurely. The State has submitted the requested information in their program narrative. Further review and monitoring of the State's ability to conduct the required 24-hour hearings will occur during the Secretary's oversight of the West Virginia program.

VI. Inspection and Enforcement

1. One commenter noted that State Regulation Section 14A.01 defines "unwarranted failure to comply" as "the failure to prevent the occurrence of any violation." This is contrasted to 30 CFR 843.13 of the federal regulations, which provides that unwarranted failure to comply means the failure of the permittee to prevent the occurrence of any violation of the permit or any requirement of the Act *or the failure to abate any violation* (emphasis added). This issue is discussed further in Finding 20.9.

2. One commenter objected to the presence of the word "no" in State Regulation Section 14A.01a.3. which reads, "The director shall after hearing determine that a pattern of violations exists, if he finds that there were *no* violations of the same or related requirement of this Article * * *" The presence of the word "no" is clearly contrary to the purpose of this section. The State has advised the Secretary that this is a clerical error and that regulations promulgated to implement this section will have the word "no" deleted (Administrative Record No. WV 313). Approval of the State's program is with the understanding that this language will be corrected to reflect the intention of the State. This issue is discussed further in Finding 20.9.

3. One commenter stated that Section 20–6–17(a) of the WV SCMRA, which provides that a cessation order is not mandatory if the operator affirmatively demonstrates that compliance is unattainable due to conditions totally beyond the control of the operator, is inconsistent with Section 521(a)(3) SMCRA. Federal law provides for immediate cessation and a maximum time limit of 90 days for abatement. This section of the State's submission is discussed fully in Finding 20.2.

4. One commenter objected to the language in Section 20–6–15(g) of the WV SCMRA which provides that, "any such person accompanying an inspector on an inspection shall be responsible for supplying any safety equipment required for his use." This commenter is of the opinion that any requirement that a citizen provide his own hard hat and safety shoes would have a negative effect on the citizen's exercising his or her right to go onto the mine site. Section 521(a)(1) of SMCRA provides that any person providing information which results in an inspection is entitled to accompany an inspector during the inspection. The granting of this right to individuals does not also mean that the regulatory authority is legally obliged to provide a hard hat or safety shoes to the complainant. Furthermore, this comment relates to a provision in the West Virginia law that was approved in the Secretary's initial decisions published in the **Federal Register** on October 20, 1980.

5. One commenter stated that Section 20–6–17(h) of the WV SCMRA pertaining to the authority of the State to obtain injunctive relief for violations of the State program is not as broad as federal law. The commenter noted that 30 CFR 843.19 authorizes obtaining injunctive relief against any "person," whereas the State section references "permittee or his agent." 30 CFR 843.19 is derived from Section 521(c) of the Federal Act which also uses the phrase "permittee or his agent." The scope of West Virginia's authority to obtain judicial review is founded in the West Virginia SCMRA and Section 521(c) of SMCRA and Section 20–6–17(h) of WV SCMRA are the same.

VII. Citizen Participation

1. One commenter noted that Section 20-6-26(h) of the WV SCMRA provides that in a hearing regarding a proposed bond release, a verbatim record of each public hearing shall be made. The section goes on to state that the transcript will be made available on the motion of any party or by order of the Director at the cost of the person requesting the transcript. The commenter stated that the State should be required to change this language so as not to require the person requesting a transcript to bear the cost of preparing the record. This issue is discussed in Finding 22.3.

2. One commenter noted that the regulations issued pursuant to the State Open Governmental Proceedings Law submitted by the State did not state how much advance notice of meetings would be given to the public. Section 525(a)(2) of SMCRA requires at least five days. This issue is further discussed in Finding 27.2.

VIII. Bonding

1. One commenter stated that the West Virginia bonding discussion does not conclusively prove that there will be sufficient funds to reclaim all forfeited lands. This comment is correct. The Secretary has determined that the State has not conclusively demonstrated that its alternative bonding system is capable of providing the necessary funds under all possible situations. Approval of the alternative bonding system is conditioned upon the submission of an independent study demonstrating that the fund will contain, on a continuous basis, enough money to meet the demands placed upon it. See Finding 18.1.

2. The same commenter also requested that the Secretary consider requiring the removal of the two million dollar ceiling on the fund and an amendment to authorize the reclamation commission to adjust the per ton tax or per acre bond when necessary to keep the fund solvent. This aspect of the State bonding proposal is also discussed at Finding 18.1.

3. The West Virginia Surface Mining and Reclamation Association (WVSMRA) commented that State Regulation Sections 4H.07b.1.b. and 4H.08a.1., regarding combined surety/escrow bonding, should be changed from "total reclamation cost" to the "bonding rate." The State regulations are consistent with 30 CFR Part 806.17 and reflects the difference required to be covered by the total escrow balance.

4. The WVSMRA commented that State Regulation Section 4I.01a., regarding release of the performance bond, should be amended to delete "or part." State Regulation Section 4I.01a. is consistent with 30 CFR Part 807.12(a) which allows portions and does not require full phase release.

5. The WVSMRA commented that State Regulation Section 4I.01a.1., regarding evaluation of reclamation operations prior to bond release, should be deleted. State Regulation Section 4I.01a.1. is consistent with 30 CFR 807.11(a)(1) because it requires identification in the permit application of the time when an inspection is to be conducted.

D. Background on Conditional Approval

The Secretary is fully committed to two key aims which underlie SMCRA. The Act calls for comprehensive regulation of the effects of surface coal mining on the environment and public health and safety and for the Secretary to assist the states in becoming the primary regulators under the Act. To enable states to achieve that primacy, the Secretary has developed in his regulations the critical ability to conditionally approve a state program. Under the Secretary's regulations, conditional approval gives full primacy to a state even though there are minor deficiencies in a program. This power is not expressly authorized by the Act; it was adopted through the Secretary's rulemaking authority under 30 USC 201(c), 502(b), and 503(a)(7). The Act expressly gives the Secretary only two options—to approve or disapprove a state program. Read literally, the Secretary would have no flexibility; he would have to approve only those programs that are letter-perfect and disapprove all others. To avoid that result and in recognition of the difficulty of developing an acceptable program, the Secretary adopted the regulation providing the authority to approve conditionally a program.

Conditional approval has a vital effect for state programs. It results in the implementation of the permanent program in a state months earlier than might otherwise be possible. It also implements the rights SMCRA provides to citizens to participate in the regulation of surface coal mining through soliciting their views at hearings and meetings and enabling them to file requests to designate lands as unsuitable for mining if they are fragile, historic, critical to agriculture, or simply cannot be reclaimed to their prior productive capability.

The Secretary considers three factors in deciding whether a program qualifies for conditional approval. First is the state's willingness to make good faith efforts to effect the necessary changes. Without the state's commitment, the option of conditional approval may not be used.

Second, no part of the program can be incomplete. As the preamble to the regulations says, the program, even with deficiencies, must "provide for implementation and administration for all processes, procedures, and systems required by the Act and these regulations" (44 FR 14961, March 13, 1979). That is, a state must be able to operate the basic components of the permanent program: the designation process; the permit and coal exploration systems; the bond and insurance requirements; the performance standards; and the inspection and enforcement systems. In addition, there must be a functional regulatory authority to implement the other parts of the program. If some fundamental component is missing, conditional approval may not be used.

Third, the deficiencies must be minor. For each deficiency or group of deficiencies, the Secretary considers the significance of the deficiency in light of the particular state in question. Correction of clerical errors would be minor in virtually all circumstances. Other deficiencies require individual consideration. An example of a deficiency that would most likely be major would be a failure to provide a bonding system as required by Section 509 of SMCRA. The lack of such provisions would be such a departure from a fundamental purpose of the Act that the deficiency would most likely be major.

The use of a conditional approval is not and cannot be a substitute for the adoption of an adequate program. Section 732.13(i) of Title 30 of the regulations gives the Secretary little discretion in terminating programs where the state, in the Secretary's view, fails to fulfill the conditions. The purpose of the conditional authority power is to assist states in achieving compliance with SMCRA, not to excuse them from compliance.

E. The Secretary's Decision

As indicated in the Secretary's Findings, there are minor deficiencies in the West Virginia program which the Secretary requires be corrected. In all other respects, the West Virginia program meets the criteria for approval. The deficiencies identified in prior findings are summarized below and an explanation is given to show why each deficiency is minor, as required by 30 CFR 732.13(i).

(1) As discussed in Finding 13.1, the State program does not require highwall

elimination where auger mining is conducted at pre-existing highwalls. The environmental effect of this deficiency is minor, because augering represents only a small portion of mining conducted in West Virginia, and the deficiency will only affect sites where the augering occurs at a highwall created prior to the passage of West Virginia's statute. Finally, all the other permitting and performance standards which must be applicable to auger mining under Federal law, are required to be met by West Virginia's program.

(2) State law allows for the use of constructed outcrop barriers but fails to provide criteria for design of such barriers as discussed in Finding 13.4. This deficiency is considered minor because State law provides that barriers can be allowed only when natural barriers would result in future water quality deterioration and would conflict with the goal of maximum resource utilization. Furthermore, State law requires the stability factor of constructed barriers must be least equal that of the natural outcrop barrier. In view of these requirements it is unlikely that any environmental harm will result before the design criteria are developed.

(3) As discussed in Finding 13.10, the West Virginia program would allow drift mine openings to be located in a manner which might allow gravity discharges. The impact of this deficiency is minor because drift mines are located in only a limited part of the State, and only certain coal seams there are able to support a drift mine. In addition, the State may not allow openings which would lead to gravity discharges after consideration of safety and environmental factors.

(4) The State law definition of "adequate treatment" as discussed in Finding 13.12, does not accurately reflect the manner in which water quality standards for streams are set. This deficiency is minor because the state's regulations regarding water quality will provide guidance to applicants preparing permanent program permit applications during the period before the change is made.

(5) As discussed in Finding 13.14, the definition of "disturbed area" does not include topsoil storage areas. However, since topsoil storage areas are required to be on the permit area, and all drainage leaving the permit area must meet effluent limits this deficiency is considered minor. It is unlikely that any significant environmental harm would occur before the definition is revised.

(6) State regulations for protective devices and temporary sealing of exploratory and other holes are inadequate as discussed in Finding 13.18. This deficiency is minor because the casing and sealing requirements found in West Virginia Regulation Section 6B.02 aimed at preventing pollution, should result in most holes being adequately and promptly sealed. The Secretary expects this will significantly reduce the danger of injury to the public or wildlife from the dangers of exploratory holes during the period before the deficiency is corrected.

(7) As discussed in Finding 13.20, State Regulation Section 6B.07b does not include provisions for maximizing mineral resource recovery during augering operations. The deficiency is minor because of the limited amount of augering within the state, and because the State law grants the Director of DNR the authority to take the steps which SMCRA makes mandatory. The Secretary has no reason to believe that the Director will exercise this discretion in a manner inconsistent with maximum resource recovery.

(8) As discussed in Finding 13.21 and 13.22, West Virginia Regulations fail to include certain provisions relating to coal waste piles. Each of these omissions are minor for the following reasons.

a. The failure to provide for four feet of cover with non-toxic and non-combustible material on toxic or acid-forming spoil in coal mine waste piles as discussed in Finding 13.21 is minor because other state requirements relating to water quality will result in prevention of most of the environmental problems intended to be prevented by the four-foot cover.

b. As discussed in Finding 13.22, the State fails to require submission of a certified report to the regulatory authority within two weeks after inspection of waste piles. This is minor because West Virginia requires weekly inspections and reports must be prepared and made available on site. The only deficiency relates to submission of the reports to the Department of Natural Resources at critical construction stages.

c. As discussed in Finding 13.22, State Regulation 10C.08c.3.c allows for approval of impoundments on waste piles by the Director. The deficiency is minor because the deficiency must be corrected before any permit is likely to be issued authorizing an impoundment on a waste pile.

(9) The State regulations allow broad variances for special land use purposes at the Director's discretion, with no regulatory criteria for his exercising this discretion, as discussed in Finding 13.24. This deficiency is minor because the variance may only be granted when it is "consistent with the purposes of" the State Act (Regulation Section 6B.07e.1.), and thus the Director may only grant the variance in the limited circumstances where the variance doesn't jeopardize protection of the public or the environment, and where the variance is not used to allow mining where reclamation is not feasible. See State Act Section 20-6-2(b) (1) and (3).

(10) West Virginia regulations fail to require that permit applications contain water quality information relating to the manganese content, as discussed in Finding 13.26. The impact of this deficiency will be minor, since manganese represents only one of a large number of pollutants on which information is required, and since the deficiency should be corrected relatively soon. In addition, the performance standards regulate manganese pollution.

(11) The State regulations do not require that for area strip mining, rough backfilling and grading operations be completed within 180 days of coal extraction, as discussed in Finding 13.27. The deficiency is minor since the State does require that no more than two spoil piles may be allowed nor more than 3,000 linear feet of open pit. It is unlikely that situations will occur in area strip mining where operations would greatly exceed the 180 day limitation during the short period required to modify present State regulations, since these situations could only occur where mining proceeds on a sporadic basis.

(12) As discussed in Finding 13.28, the State regulations do not, due to an apparent clerical error, prohibit static safety factors of less than 1.5 on the outslopes of the plateau created by mountaintop removal where these slopes exceed lv:2h. This deficiency is minor because it is unlikely that any such steep slopes will be permitted without the required static safety factor during the brief period before the regulation is clarified.

(13) As discussed in Finding 13.29, the State Regulations allow the Director of DNR to permit windrowing timber on the downslope, which is contrary to the federal requirements. This deficiency is minor because under the State rule the Director may permit windrowing only where the permittee demonstrated that such placement will not reduce stability and it is unlikely that the amount of windrowing which might be allowed during the short period before their regulation is changed will cause significant water degradation.

(14) As discussed in Finding 13.30, the State regulations allow a peak particle velocity of two inches per second at the nearest residence from the blast contrary to the federal requirements.

This deficiency is minor because Section 4C.04h limits the weight of explosives consistent with the federal formula, which is based on meeting the federal one inch per second peak particle velocity requirement. It is unlikely that there will be many instances where measurement of peak particle velocity at the nearest residence, rather than at any dwelling, as under the federal rule, would be inadequate during the period before the regulation is changed. Further, this regulation should be changed before the deficient practice could be put into effect under the permanent program.

(15) As discussed in Finding 13.31, the State regulations do not require that fish and wildlife agencies be given 60 days to review alternate land use plans. This problem is minor because State Regulation 4D.04h requires that any necessary approvals from fish and wildlife agencies must be obtained before the plans can be approved. This will provide significant protection to fish and wildlife during the short period before the regulation is changed. Further, the normal opportunities for comment by government agencies will be provided, as for all permits.

(16) As discussed in Finding 13.32, the State rules do not contain the provisions for the transfer of wells equivalent to those under the federal program. Due to the infrequent use of wells by persons other than the permittee, this omission in the regulations will have little effect during the short period before the regulation is changed.

(17) As discussed in Finding 13.33, State regulations do not require that the operator immediately inform the regulatory authority of dangerous slides and comply with any remedial measures ordered. However, the State permit requires that the operator notify endangered parties and initiate self-imposed remedial measures. In addition, such slides are not likely to occur during the short period before the State program is changed, as the program already contains numerous measures designed to prevent slides.

(18) As discussed in Finding 13.34, the State provision which allows head-of-hollow fill, rock-core drain system design criteria to be used when the fill is not constructed at the ridge line could pose long term threats to integrity of the fills. This program is minor because, if the additional data being requested from the State substantiates a long term problem, surficial changes to the drainage pattern can be made with relative ease to divert water away from the fill. Few fills will be completed to the point of bond release in the time allowed for collection of the additional data. Further, there is substantial professional opinion in the administrative record that the potential problem will be found to be minimal when the additional data has been fully analyzed.

(19) As discussed in Findings 14.1, 14.2, 14.3, the State program fails to require all necessary information in permit applications relating to other operations of the applicant or the applicant's record of violations. This deficiency is minor because, as explained in the cited findings, only out-of-State operations are excluded from the requirement to identify other operations of the applicant, and only temporary suspensions are excluded from the requirement to report permit revocations and suspensions. While all violations of West Virginia environmental laws must be reported, violations of other laws need not be. The State and the public are likely to identify any applicant with a serious compliance problem with the information being required.

(20) As discussed in Finding 14.4, the State provisions for incidental permits are not completely consistent with the federal requirements. However, this deficiency is minor, as most of the federal environmental protection standards and permit information requirements are met and there is some opportunity for public participation. Further, as discussed in the Finding, only 35 of these permits have been granted in the last three years, and many of these involved areas under two acres, which would not be regulated at all under SMCRA. Finally, the fact that these permits must be under 5 acres makes it unlikely that any significant environmental harm will occur during the short period before the regulation is changed.

(21) As discussed in Finding 14.8, the State program omits the requirement that the State provide a copy of its written findings concerning permit approval, modification or denial to each person and government official who filed written objections or comment and the Regional Director and publish a summary of its decision in a newspaper of general circulation in the area of the coal mining operation. The effect of this deficiency is minor because the State does assist interested members of the public in keeping informed under Regulation Section 3Q.07, which requires that DNR notify the Clerk of the County Commission where the permit is located that a permit has been issued, and under Regulation Section 3Q.02, which requires that DNR send copies of renewal decisions to any person who filed comments on the renewal or was a party to any informal conference on the renewal.

(22) As discussed in Finding 14.9, due to an apparent clerical error the State regulations may be inconsistent with the federal program concerning public availability of borings and sampling analyses. The problem is minor because Section 20-6-11(a)(12) of SCMRA requires that this information be available.

(23) As discussed in Finding 15.2, West Virginia fails to include the requirement for a narrative description and map of the proposed exploration area consistent with the federal program. West Virginia law [Section 20-6-8(b)(1)] does require submission of a United States Geological Survey topographical map, and Regulation Section 5A.01b.12. requires submission of a map and narrative containing certain additional information. The amount of information required by West Virginia is adequate for the short period of time required to amend the State Regulations since exploration operations do not normally cause substantial problems.

(24) As discussed in Finding 17, the State law contains language which provides that, except for willful and deliberate acts, neither the permittee nor his authorized agents or employees shall be liable for any injury sustained by a citizen accompanying an inspector onto the minesite. This statutory problem is minor because it is very unlikely that anyone accompanying an inspector onto a minesite will be injured during the short period the Secretary has given the State to correct this provision. The Secretary is aware of no instance in which a citizen accompanying an inspector onto a minesite during the interim Federal program has been injured. Accordingly, few, if any citizens are likely to be deterred from exercising their statutory right to go onto a minesite pending resolution of this deficiency.

(25) As discussed in Finding 18.1, the State must provide an actuarial study of the funding mechanism for its alternative bonding system to insure that sufficient funds will be available to cover any necessary reclamation. This deficiency is deemed to be minor because, Section 20-6-12(h) of West Virginia SCMRA requires the net amount in the fund to equal or exceed one million dollars at all times. As explained in the Attorney General's opinion (Part A, response to Finding 18.1) the State utilizes this bonding procedure at the present time and has encountered no funding difficulties. The information in the Attorney General's

opinion pertaining to the State's past history of forfeitures, indicates the amounts in fund will be more than adequate pending completion of the actuarial study. This is especially true in view of the fact that the State requires a $1,000 per acre, $10,000 minimum bond from each operator in addition to the Special Reclamation Fund.

(26) State law fails to provide for the following civil penalty assessment requirements, as discussed in Finding 19.

(a) Adequate regulations or guidelines to insure (1) that penalties assessed in accordance with the State's broad statutory criteria will be uniform or consistent as applied to various factual situations, and (2) that the State's assessment procedures are adequate to constitute *administrative* assessment rather than judicial assessment. This deficiency is deemed to be minor because the Department of Natural Resources clearly has authority to assess and collect civil penalties during the short period allowed to develop guidelines for assessing penalties. The absence of guidelines will not preclude the State from implementing its civil penalty assessment authority during this period.

(b) Requirement that hearings in magistrate court be on the record, that Findings of Fact be made, that a written decision be entered, and that review in the circuit court be on the record. These deficiencies are deemed to be minor for several reasons: (1) the Department of Natural Resources has agreed to make a record of any magistrate proceedings to insure that a transcript is available; (2) since review of magistrate decisions by the circuit court will be *de novo* until the State statute is amended to provide for review on the record, preservation of the record presented in magistrate court is not vital; (3) relatively few notices are likely to be ripe for hearing, much less for circuit court review, before the required changes are made; and (4) although *de novo* review may be frustrating and cumbersome, it will not preclude the DNR from issuing and adjudicating civil penalty assessments during the period before the program is changed.

(c) Adequate provisions for citizen participation in magistrate court proceedings including provision for recovery of Attorney fees. This deficiency is deemed to be minor because, although it is an important provision, it is not utilized frequently.

(d) Provisions for timely resolution of disputes about civil penalty assessments. This deficiency is deemed to be minor because the State can, as a practical matter, insure that penalties for violations of the State law can be quickly resolved by exercising its criminal prosecution authority as it has in the past. As stated in the Attorney General's opinion, the State will continue to do this.

(e) Provisions for resolution of civil penalty issues without the availability of trial by jury. The possibility of an operator requesting a trial by jury is deemed minor because there should be relatively few instances where penalty assessments would be ripe for hearing during the period allowed for program amendment. Even if operators elect to utilize the present provision in State law which allows for a jury trial, the DNR would still be able to proceed with assessment and adjudication of civil penalties.

(f) Provision for payment into escrow as a condition precedent to contesting a proposed civil penalty assessment. This deficiency is deemed to be minor because, in the short period allowed for program change, the State can, and will, continue to utilize its authority to proceed against violators criminally. A criminal prosecution requires posting of a bond, which serves to some extent the same function as prepayment into escrow.

(g) Provisions in State law which clarify that an operator has only one avenue of appeal for challenging violations or penalty assessments, as discussed at Findings 19.4 and 20.4. This problem is deemed to be minor because it is unlikely that an appellant will have an opportunity to take advantage of the dual system before the problem is corrected by the State. Even if an operator seeks review of a notice of violation before the magistrate court and the Reclamation Board of Review simultaneously, a problem will arise only if different decisions are reached by the two bodies. In addition, the Attorney General's opinion states that the issuance of a civil penalty by the Department at any time before or after an appeal of a notice or order to the Reclamation Board of Review deprives the Board of Jurisdiction to hear the appeal. Although the law as it is now written does not, on its face, confirm this view, this interpretation can probably be utilized to avoid dual appeals pending the program revision.

As stated in a–g above each of the noted deficiencies is considered to be minor. In addition, the Secretary considers the cumulative effect of the deficiencies to be minor because they do not preclude the State from proposing, issuing, adjudicating or collecting civil penalty assessments for violations of the State program. In addition, the State has available very effective criminal prosecution authority to insure that monetary fines can be imposed swiftly against anyone who violates any provision of the program pending resolution of all the deficiencies identified by the Secretary.

(27) As discussed in Findings 19.4 and 20.4, State law does not require that daily civil penalties for cessation orders issued for failure to abate a notice of violation be imposed until the violation is abated. This problem is deemed to be minor because regulation 14A.03b. provides that any cessation order issued under Section 17(a) "shall remain in effect until the violation has been abated." This regulation should be sufficient to insure that, during the period allowed for a statutory amendment, no cessation order will be terminated before complete abatement is accomplished.

(28) As discussed in Finding 20.7, State law provides that cessation orders shall be "vacated" once remedial action has been accomplished. The Secretary deems this problem to be minor because a very short period of time has been allowed to correct this deficiency. Since Federal law provides up to 90 days to abate a violation before a cessation order must issue, relatively few cessation orders will be issued before the required change is made. Also, State Regulation 14A.03d provides that the word "vacate" means "terminate." In view of the legislative history of this particular section of State law as outlined in the Attorney General's opinion, it is possible that a challenge to the DNR's authority to promulgate regulation 14A.03d would be unsuccessful.

(29) As discussed in Finding 20.7 and Finding 20.8, State law does not clearly define vacation as opposed to termination and does not contain a provision which requires inspectors to determine the steps necessary to abate each violation. The Secretary deems this problem to be minor because State inspectors clearly have the authority to issue cessation orders and State Regulation Section 14A.03d. applies. Therefore, it is unlikely that many problems will occur. As far as determining abatement steps, the inspector can insist on specific or particular remedial steps to be taken by the operator. In addition, State Regulation 14A.03c. directs inspectors to include in the order the measures necessary to abate the cessation order. This regulation offers support for the inspector's authority to demand specific actions, should specific requirements for abatement contained in the order be challenged by the operator.

(*30*) State law fails to provide that an operator's unwarranted failure to abate a violation is to be considered in determining whether an operator should be issued an order to show cause why his permit should not be suspended or revoked, as discussed in Finding 20.9. Also, because of a clerical error, the word "no" appears in Regulation 14A.01.a.3, which negates the purpose of the regulation. The Secretary deems these deficiencies to be minor because it is highly unlikely that any operator would develop a pattern of violations before the deficiency is corrected.

(*31*) The State statute allows variances to certain of the prohibitions against mining contained in Section 522(e)(1) of SMCRA, as discussed in Finding 21.1. This deficiency is minor because 20-6-22(d)(2) of SCMRA restricts its use to cases where there is an affirmative finding that positive environmental benefits will result. This restriction assures that the variance will not be used frequently. Further, the required change is expected to have been made before any permits are issued which incorporate such a variance.

(*32*) State law imposes certain costs of taking an appeal on the appellant, as discussed in Finding 22.3. The Secretary deems this to be a minor problem because few appeals are likely to be taken during the short time period before the requisite statutory changes are accomplished. In addition, the Attorney General's opinion says that current practice is that appellants pay only for the cost of personal copies of the transcript, not the full cost of transcription.

(*33*) State law fails to make the Reclamation Commission subject to certain conflict of interest provisions, as discussed in Finding 23. Three of the four members of the Commission are subjected to these requirements by virtue of their employment with the Department of Natural Resources. The fourth member, the Director of the Department of Mines, is subject to a conflict of interest provision under Chapter 6B of the Code of West Virginia. These provisions will provide adequate protection against conflicts of interest during the short period before the statute is changed.

(*34*) State law limits the scope of Small Operator Assistance, discussed in Finding 25, by providing funds only as available from the U.S. Department of the Interior. Since it is not expected that the Small Operator Assistance Program is West Virginia will receive a substantial number of applications, and since federal funds will probably be adequate to fund the program during the period between the program approval and the legislative change, this deficiency is considered to be minor.

(*35*) As discussed in Finding 27.2, the State program does not provide for 5 days written notice of formal hearings. This deficiency is considered to be minor because the regulations promulgated pursuant to the Open Government Proceedings Law do require advance notice be given. In addition, since due process requires that adequate notice be given to parties to any litigation; ample notice will be provided as a matter of constitutional law.

Given the nature of the deficiencies set forth in the Secretary's Findings and their magnitude in relation to all the other provisions of the West Virginia program, the Secretary of the Interior has concluded they are minor deficiencies. Accordingly, the program is eligible for conditional approval under 30 CFR 732.13(i) because:

1. The deficiencies are of such a size and nature as to render no part of the West Virginia program incomplete since all other aspects of the program meet the requirements of SMCRA and 30 CFR Chapter VII and these deficiencies, which will be promptly corrected, will not directly affect environmental performance at coal mines;

2. West Virginia has initiated and is actively proceeding with steps to correct the deficiencies; and

3. West Virginia has agreed, by letter dated January 13, 1981, to correct the statutory and regulatory deficiencies by the dates specified in 30 CFR Part 948.

Accordingly, the Secretary is conditionally approving the West Virginia program. This approval shall terminate if regulations correcting the deficiencies are not enacted by the dates specified in 30 CFR Part 948.

This conditional approval is effective January 21, 1981. Beginning on that date, the West Virginia Department of Natural Resources shall be deemed the regulatory authority in West Virginia and all West Virginia surface coal mining and reclamation operations on non-federal and non-Indian lands in West Virginia shall be subject to the permanent regulatory program.

On non-federal and non-Indian lands in West Virginia, the permanent regulatory program consists of the state program approved by the Secretary.

The Secretary's approval of the West Virginia program relates at this time to the permanent regulatory program under Title V of SMCRA. The approval does not constitute approval of any provisions related to implementation of Title IV under SMCRA, the abandoned mine lands reclamation program. In accordance with 30 CFR Part 884, West Virginia may submit a state reclamation plan now that its permanent program has been approved. At the time of such a submission, all provisions relating to abandoned mined lands reclamation will be reviewed by officials of the Department of the Interior.

F. Additional Findings

The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 USC 1292(d), no environmental impact statement need be prepared on this conditional approval.

The Secretary has determined that this document is not a significant rule under E.O. 12044 or 43 CFR Part 14, and no regulatory analysis is being prepared on this conditional approval.

Dated: January 15, 1981.

Joan M. Davenport,

Assistant Secretary.

A new Part, 30 CFR Part 948, is adopted to read as follows:

PART 948—WEST VIRGINIA

Sec.

948.1 Scope.

948.10 State regulatory program approval.

948.11 Conditions of State regulatory program approval.

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977, (30 U.S.C. 1201 *et seq.*)

§ 948.1 Scope.

This Part contains all rules applicable only within West Virginia that have been adopted under the Surface Mining Control and Reclamation Act of 1977.

§ 948.10 State regulatory program approval.

The West Virginia State program, as submitted on March 3, 1980, as amended and clarified on June 16, 1980, and resubmitted December 19, 1980, is conditionally approved, effective January 21, 1981. Beginning on that date, the Department of Natural Resources shall be deemed the regulatory authority in West Virginia for all surface coal mining and reclamation operations and for all exploration operations on non-federal and non-Indian lands. Only surface coal mining and reclamation operations on non-federal and non-Indian lands shall be subject to the provisions of the West Virginia permanent regulatory program. Copies of the approved program, together with copies of the letter of the Department of Natural Resources agreeing to the conditions in 30 CFR 948.11, are available at:

(a) West Virginia Department of Natural Resources, Division of Reclamation, Room 322, 1800 Washington Street,

East, Charleston, West Virginia 25311; Telephone: (304) 348–3267.
(b) Office of Surface Mining, Region I, 603 Morris Street, Charleston, West Virginia 25301; Telephone: (304) 342–8125.
(c) Office of Surface Mining, Interior South Building, Room 153, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: (202) 343–4728.

§ 948.11 Conditions of State regulatory program approval.

(a) The approval of the West Virginia State program is subject to the State revising its program to correct the deficiencies listed in this section. The program revisions may be made, as appropriate, to the statute, the regulations, the program narrative, or the Attorney General's opinion. This section indicates, for the general guidance of the State, the component of the program to which the Secretary recommends the change be made.

(1) The approval found in § 948.10 will terminate on July 1, 1981, unless West Virginia submits to the Secretary by that date copies of an enacted law, and, if necessary, regulations requiring elimination of highwalls in all augering operations consistent with Section 515(b)(3) of SMCRA and 30 CFR 816.102(a)(2) or otherwise amends its program to accomplish the same result.

(2) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or otherwise amends its program to provide criteria for the design of constructed barriers which will assure protection of water quality and long term stability at least equal to that of natural barriers.

(3) The approval found in § 948.10 will terminate on April 1, 1982, unless West Virginia submits to the Secretary by that date copies of enacted law and regulations or other amendment to its program to prohibit updip mining consistent with Section 516(b)(12) of SMCRA.

(4) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of an enacted statutory changes which are consistent with Section 515(b)(10) of SMCRA and which clarify the definition of "adequate treatment".

(5) The approval found in § 948.10 will terminate on July 1, 1981, unless West Virginia submits to the Secretary by that date copies of fully enacted statutory or regulatory revisions or other program amendments that will result in inclusion of topsoil storage areas within the definition of "disturbed area" consistent with 30 CFR 705.1.

(6) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations which contain provisions that are the same or similar to 30 CFR 816.13 through 816.15 or other program amendments requiring the protection of the public, wildlife, and others from the dangers of exploratory or other bore holes which have not been properly managed or controlled.

(7) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations designed to maximize the ultimate mineral recoverability when augering operations are conducted consistent with 30 CFR 819.11(a) and to make the prohibition of auger mining mandatory as in 30 CFR 819.11(e).

(8) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of an enacted regulations which (i) require covering of coal mining waste banks with non-toxic and non-combustible material consistent with 30 CFR 816.85(d); (ii) specify construction criteria for subdrainage systems consistent with 30 CFR 816.72(b)(1) and (b)(4); (iii) prohibit the use of impoundments on constructed fills consistent with 30 CFR 816.71(g); and (iv) require inspection of coal refuse piles consistent with 30 CFR 816.71(j) or otherwise amends its program to accomplish the same results.

(9) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date enacted regulations which eliminate the broad variance now found in State Regulation 6B.07e.1. or define criteria for use of the variance consistent with Section 515(e) of SMCRA and 30 CFR 826.15.

(10) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or other program amendments requiring that permit applications contain water quality information on total manganese consistent with 30 CFR 783.16(b)(2)(vi).

(11) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations requiring completion of rough backfilling and grading in area strip mining operations within 180 days, consistent with 30 CFR 816.101(a)(3).

(12) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations containing a provision which prohibits a static safety factor of less than 1.5 on slopes greater than 1v:2h on the outslopes of the plateau created by mountaintop removal mining operations consistent with 30 CFR 824.11(a)(7).

(13) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations which prevent placing debris on the downslope consistent with Section 515(d)(1) of SMCRA and 30 CFR 826.12(a)(i)(C).

(14) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary on that date copies of enacted regulations which limit the maximum peak particle velocity to one (1) inch per second at *any* residence or other structure, consistent with 30 CFR 816.65.

(15) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or other program amendment which provide a minimum of 60 days for review of alternate land use proposals consistent with 30 CFR 816.133(c)(8).

(16) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or other program amendment containing provisions regarding the transfer of wells consistent with 30 CFR 816.53 and 30 CFR 817.53.

(17) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or other program amendment containing provisions requiring notification of the regulatory authority of slides and compliance with required remedial measues to mitigate the threat posed by such slides consistent with 30 CFR 816.99(b) and 30 CFR 817.99.

(18) The approval found in § 948.10 will terminate on April 1, 1982, unless West Virginia submits to the Secretary by that date additional data demonstrating that large volumes of water runoff will not damage the fills along with copies of enacted regulations or other program changes, if any, necessary to correct deficiencies identified by the data provided.

(19) The approval found in § 948.10 will terminate on July 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted statutes and regulations to require data on the applicant's past record of mining

consistent with Sections 507(b)(3), 507(b)(5) and 510(c) of SMCRA.

(20) The approval found in § 948.10 will terminate on July 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or other program amendments to show that applicable permit data, performance standards and public participation requirements of SMCRA are included in the State provisions for incidental permits.

(21) The approval found in § 948.10 willwill terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations regarding the type of boring and sampling analyses information to be made available to the public consistent with 30 CFR 786.15(a)(2) and the State law [20–6–11(a)(12)].

(22) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations regarding the type of boring and sampling analyses information to be made available to the public consistent with 30 CFR 786.15(a)(2) and the State law [20–6–11(a)(12)].

(23) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations or other program amendments which provide a narrative description and map of the proposed exploration area if more than 250 tons of coal will be removed consistent with 30 CFR 776.12.

(24) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which eliminates the provision that a permittee and his authorized agents and employees are not liable for any injury sustained by a citizen accompanying the inspector onto the minesite except for willful and deliberate acts.

(25) The approval found in § 948.10 will terminate on April 1, 1982, unless West Virginia submits to the Secretary by that date an actuarial study of the Fund, prepared by a qualified professional, that demonstrates the amount of money going into the Fund will cover the demands to be placed on it, along with copies of enacted law, or other program changes needed to redress any deficiencies identified by the actuarial study.

(26) The approval found in § 948.10 will terminate on July 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law and regulations which provide for a system for assessment, enforcement and collection of civil penalties the same or similar to Section 518 and the related provisions of Sections 525 and 526 of SMCRA.

(27) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which requires that civil penalties for cessation orders issued for failure to abate a notice of violation be imposed on a daily basis consistent with Section 518(h) of SMCRA.

(28) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which provides that the abatement for a validly issued cessation order does not result in the vacation of the order.

(29) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which provides that, in issuing cessation orders, inspectors specify the steps necessary to abate the violation in the most expeditious manner possible, including all necessary abatement measures, as is required by Section 521(a)(3) of SMCRA.

(30) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations which provide that an operator's unwarranted failure to abate will be considered in determining whether a show cause order should be issued and that other provisions of the State regulations are consistent with 30 CFR 843.13.

(31) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which does not allow mining to be approved within areas where mining is prohibited by Section 522(e)(1) of SMCRA.

(32) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which provides that the appellant does not have to bear the cost of transcribing the proceedings or pay the mileage or transportation expenses incurred by other parties consistent with 43 CFR Part 4.

(33) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted law which subjects all members of the Reclamation Commission to the conflict of interest provisions of Section 20-6-40 of the West Virginia law.

(34) The approval found in § 948.10 will terminate on April 1, 1982, unless West Virginia submits to the Secretary by that date copies of fully enacted law consistent with Section 507(c) of SMCRA which does not restrict assistance to small operators to funds provided by the federal government.

(35) The approval found in § 948.10 will terminate on May 1, 1981, unless West Virginia submits to the Secretary by that date copies of enacted regulations which provide for advance public notice of formal hearings consistent with Section 525 of SMCRA.

BILLING CODE 4310–05–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR 372a

[DoD Directive 5120.20][1]

American Forces Radio and Television Service

AGENCY: Office of the Secretary of Defense.

ACTION: Final rule.

SUMMARY: This rule defines the Department of Defense policy, responsibilities, information requirements, management and operations of the American Forces Radio and Television Service (AFRTS). It is issued in support of the provisions of PART 372 of this title.

EFFECTIVE DATE: December 23, 1980.

FOR FURTHER INFORMATION CONTACT: LTC C. William Duerre, Office of the Assistant Secretary of Defense (Public Affairs), American Forces Information Service (AFIS), The Pentagon, Washington, D.C. 20301, Telephone 202–694–4606.

Accordingly, 32 CFR is being amended by adding a new Part 372a, reading as follows:

PART 372a—AMERICAN FORCES RADIO AND TELEVISION SERVICE (AFRTS)

Sec.

372a.1 Purpose.
372a.2 Applicability.
372a.3 Policy.
372a.4 Responsibilities.
372a.5 Information Requirements.

Enclosure 1—AFRTS Management and Operations.

Authority: 10 U.S.C. 133.

§ 372a.1 Purpose.

This Rule:

---

1 Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, PA. 19120. Attention: Code 301.

(a) Reflects the AFRTS organization, states policy, and assigns responsibilities for the AFRTS.

(b) Authorizes the development and publication of DoD 5120.20–R, "Management and Operation of AFRTS," in compliance with DoD Directive 5025.1,[1] "DoD Directives System," October 16, 1980. Upon publication of DoD 5120.20–R, enclosure 1 of this Part will be canceled and any subsequent reference to enclosure 1 will be deemed a reference to the relevant provision of DoD 5120.20–R.

§ 372a.2 Applicability.

The provisions of this Part apply to the Office of the Secretary of Defense and its field activities, the Military Departments, the Organization of the Joint Chiefs of Staff and the Unified and Specified Commands, and the Defense Agencies (referred to herein as "DoD Components"). As used in this Part, the term "Military Services" refers to the Army, Navy, Air Force, and Marine Corps.

§ 372a.3 Policy

(a) The *American Forces Radio and Television Service,* an activity of the American Forces Information Service (AFIS), under the direction of the Assistant Secretary of Defense (Public Affairs) (ASD(PA)):

(1) Supports the internal information program of the Department of Defense, as stipulated in 32 CFR 372, by providing a broad range of information and entertainment programing, through the radio and television media, to overseas DoD personnel and their dependents. As used in this Directive, the term "overseas" refers to geographic locations outside of the contiguous United States including Navy ships at sea, Alaska, and Hawaii.

(2) Provides U.S. military commanders, worldwide, with unique means to communicate internal information directly to DoD personnel overseas.

(3) Assists in maintaining and enhancing the morale, readiness, and well-being of DoD personnel.

(4) Does not seek to compete for audiences with any other broadcast facility or organization. AFRTS broadcasts are directed toward DoD audiences overseas. The fact that others may receive these broadcasts is the result of electronic media characteristics.

(5) Does not endorse or imply DoD endorsement of any commercial product or service.

(6) Is part of the internal information program of the Department of Defense. Funds appropriated for AFRTS may not be used to support external information programs.

(b) *American Forces Radio and Television Service Outlets:*

(1) Operate under the centralized management and control of the Military Departments, in accordance with the policies and procedures developed by the Director, AFIS, under the provisions of this Part and 32 CFR 372.

(2) Adhere to AFIS broadcast policy, which prohibits censorship, propagandizing, or manipulation, and which mandates that overseas DoD personnel and their dependents are entitled to the same type of information and entertainment programing as their fellow citizens in the United States.

(i) This policy is subject to the following considerations:

(A) *Host Country Sensitivities.* AFRTS outlets operate in foreign countries with the approval of the host government which assigns broadcast frequencies. Program topics considered sensitive to a host country may be restricted from broadcast on an AFRTS outlet. Such restrictions shall be based soley on official determination by the U.S. Embassy or U.S. Country Team.

(B) *Area Restrictions.* When legal owners of programs prohibit AFRTS from broadcasting certain programs in specified geographic areas, these restrictions must be honored.

(ii) The above considerations do not permit the calculated withholding or editing of information and entertainment programing based on personal taste or preference. Such practices constitute censorship and are prohibited.

(3) Shall give maximum use to information and entertainment programing provided by the AFRTS Programing Center located in Los Angeles, California, and to Service-produced internal information programing distributed by the Military Departments. AFRTS outlets may produce local information, entertainment and religious programing to meet internal information objectives.

(4) May not produce news editorials, commentary, or analysis; engage in investigative reporting; or initiate political news coverage.

(5) Shall protect all programing and associated broadcast products from unauthorized use. These materials remain in the custody of the Department of Defense.

(6) May be advised by the Director, AFIS, to broadcast special programing on certain occasions. Failure to comply with this requirement must be justified to the ASD(PA).

(7) May not offer broadcasts in other than the English language, except as stated in subsection C.2., enclosure 1.

(8) May be used to promote military training or off-duty education. However, AFRTS facilities may not be used for training or educational purposes except at designated remote sites and aboard Navy ships, and as stated in paragraph C.2.b., enclosure 1. Further exceptions to this policy shall be considered by the Director, AFIS, on a case-by-case basis. In no instance shall the primary mission of AFRTS be jeopardized.

(9) May not use films and program materials from the Army and Air Force Exchange Service and the Navy Motion Picture Service.

(c) The *American Forces Radio and Television Service Programing Center,* a field activity of the AFIS:

(1) Provides information and entertainment programing for the exclusive use of AFRTS outlets.

(2) Is the only source authorized to negotiate for, procure, and distribute commercial and public broadcasting programing, except as stated in paragraph C.3.k., enclosure 1. Further exceptions to this policy will be considered by the Director, AFIS, on a case-by-case basis.

(3) Provides internal information programing and distributes radio and television spot announcements provided by the AFIS, in support of DoD internal information themes, goals, and objectives.

(4) Provides religious programing approved solely by the Armed Forces Chaplains Board, Office of the Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics).

(5) Establishes procedures to alert AFRTS outlets of specific entertainment programing containing discretionary subject matter including that considered sensitive to a host country.

§ 372a.4 Responsibilities

(a) The *Assistant Secretary of Defense (Public Affairs)* shall:

(1) Comply with 32 CFR 372.

(2) Provide policy and operational direction to the Director, AFIS, for the management and operation of AFRTS.

(3) Issue directive-type memorandums and provide policy guidance to AFRTS centralized management elements within the Military Departments.

(b) The *Director, American Forces Information Service,* shall:

(1) Comply with 32 CFR 372.

(2) Develop policies and procedures, and oversee their implementation, for the management and operation of the AFRTS radio and television broadcasting activities of the Department of Defense; and evaluate

[1] See footnote page 1.

and direct corrective action by the Military Departments to ensure AFRTS is properly structured and managed.

(3) Exercise AFRTS fiscal and personnel resource control through the Planning, Programing, and Budgeting System, and monitor the implementation of approved programs.

(4) Authorize the configuration and capabilities of AFRTS outlets.

(5) Ensure a free flow of information and entertainment programing to overseas DOD personnel and their dependents without censorship, propagandizing, or manipulation.

(6) Ensure that all AFRTS broadcast activities are in conformance with host country rules and regulations governing radio and television transmissions, and are guided by the applicable rules and regulations of the Federal Communications Commission (FCC), and the Radio and Television Codes of the National Association of Broadcasters (NAB).

(7) In coordination with the Military Departments, establish standards for the training of management, production, and technical staffs; and for the operation and maintenance of equipment at AFRTS outlets.

(8) Establish and develop policies for a worldwide radio and television satellite distribution system to designated AFRTS outlets.

(9) Oversee management of the AFRTS Programing Center.

(10) Issue instructional-type memorandums and provide policy guidance to the Military Departments for ASD(PA) approved programs.

(11) As appropriate, consult with and inform Unified/Specified Commands on matters that impact on their mission and responsibilities.

(c) The *Commanders of the Unified and Specified Commands* shall:

(1) Comply with 32 CFR 372.

(2) Provide the Director, AFIS, and the Military Departments with contingency plans to assume control of AFRTS outlets.

(3) Provide a list of subjects considered sensitive to host countries as related to AFRTS programing in accordance with § 372a.5(c) of this Part.

(4) Upon request of the Director, AFIS, negotiate agreements or memorandums with host countries authorizing the establishment and continuance of AFRTS outlets.

(5) Upon request of the Director, AFIS, negotiate agreements, contracts, and clearances with music and performing arts societies of host countries.

(6) Ensure that nothing inhibits the free flow of radio and television information and entertainment programing to overseas DoD personnel and their dependents.

(d) The *Secretaries of the Military Departments* shall:

(1) Comply with 32 CFR 372.

(2) Through their respective AFRTS centralized management elements, provide all personnel, financial, engineering, maintenance, and logistics resources to establish, centrally manage, control, operate, and maintain AFRTS outlets, in accordance with this Part, 32 CFR 372, 32 CFR 169, and 32 CFR 169a.

(3) Ensure that a U.S. citizen is designated as a commander or manager of an AFRTS outlet. This individual may be either military or civilian. Civilians must be employed by the U.S. Government, or a concern under contract to the U.S. Government. Exceptions may be granted when required by a host country agreement.

(4) Establish and maintain centralized equipment allowances and authorizations for AFRTS outlets, in accordance with DoD Directive 5040.2,[1] "Audiovisual Activities," July 23, 1979 and DoD 5040.2–R, "Management and Operation of DoD Audiovisual Activities," November 1979, and the provisions of the AFIS program for the standardization and certification of broadcast equipment.

(5) Ensure that nothing inhibits the free flow of radio and television information and entertainment programing to overseas DoD personnel and their dependents.

(6) Negotiate an Interservice Support Agreement, in accordance with Section D., enclosure 1, of this Part, and DoD Directive 4000.19,[1] "Interservice, Interdepartmental and Interagency Support," October 14, 1980, when an AFRTS outlet serves personnel of more than one Military Service. Normally, these agreements will be negotiated at the lowest feasible level. Differences in reaching agreements shall be adjudicated by the Director, AFIS.

(e) The *Secretary of the Army* shall designate the U.S. Army Materiel Development and Readiness Command (DARCOM) to provide support to the DoD-wide AFRTS mission. Responsibilities shall be delegated to the Television-Audio Support Activity (T–ASA), a DARCOM activity located at the Sacramento Army Depot, California. This is in accordance with DoD Instruction 4115.1,[1] "DoD Coordinated Procurement Program Purchase Assignments," September 1, 1972, and the policy direction provided by the Director, AFIS. T–ASA shall comply with the provisions of section E, enclosure 1.

(f) *Heads of DoD Components* shall follow the AFRTS management and operations procedures found in enclosure 1.

§ 372a.5 Information Requirements

(a) The Audiovisual (AV) Annual Report, DD Form 2054, Report Control Symbol DD–PA(A)1348 shall be completed in accordance with the provisions of DoD Directive 5040.2, and DoD 5040.2–R.

(b) The AFRTS Outlet/Network Registration, DD Form 2137, Report Control Symbol DD–PA(AR)1572, shall be submitted through channels to the Director, AFIS, at the time of initiation of a request for an AFRTS outlet and within 30 days of a substantive change affecting an AFRTS outlet.

(c) The AFRTS host country Sensitive Subject Summary Narrative Report, Report Control Symbol DD–PA(A&AR)1537, shall be submitted to: the Director, AFIS; the Director, AFRTS Programing Center; and the Commandant, DINFOS. Public Affairs Officers of Unified and Specified Commands, or other major commands having AFRTS outlets under their cognizance, shall forward this report annually and as changes, additions, and deletions occur. Annual reports are due September 15th of each year.

§ 372a.6 Definitions

(a) *AFRTS.* A worldwide broadcast organization that comprises: (1) An AFRTS headquarters element within AFIS; (2) the AFRTS centralized management elements within the Military Departments; (3) AFRTS outlets around the world; and (4) the AFRTS Programing Center in Los Angeles, California.

(b) *AFRTS Outlet.* Any facility authorized by the Director, AFIS, in accordance with policy to disseminate radio or television programing. An outlet includes AFRTS radio and television stations and networks, relay sites, translators, Navy ships using AFRTS program materials, mini-TV sites, and any other AFRTS broadcast facility.

(c) *AFRTS Network.* Two or more AFRTS stations, authorized by the Director, AFIS, to disseminate programing through interconnecting broadcast quality transmission circuits.

(d) *AFRTS Mini-TV.* A self-contained videotape playback system used in remote or isolated areas not accessible to a radiated AFRTS television signal.

(e) *AFRTS Programing Center.* A field activity of the AFIS located in Los Angeles, California, which provides

[1] See footnote page 1.

[1] See footnote page 1.

information and entertainment programing to AFRTS outlets.

(f) *Censorship.* The withholding or editing of information and entertainment programing, when such action is not supported by legitimate host country sensitivities or by broadcast restrictions imposed by program owners.

(g) *Host Country Sensitivities.* Topics that are restricted from broadcast on an AFRTS outlet when determined by the U.S. Embassy or U.S. country team, normally in writing, to be sensitive to the host country concerned.

(h) *Information Programing.* Radio and television programing that communicates knowledge and includes: world, national (U.S.), Service, major/local command, community, and host country news; sports news; analysis and commentary; public affairs; and spot announcements on internal information themes.

(i) *Entertainment Programing.* Radio and television programing that affords pleasure, diversion or amusement, such as comedy, drama, variety, play-by-play sports, and musical recordings.

Enclosure 1

AFRTS Management and Operations

A. Procedures

1. *Establishment of an AFRTS Outlet.* In accordance with responsibilities and policies established herein, an AFRTS outlet may be proposed for establishment wherever a requirement for such a communication medium can be demonstrated.

a. Upon determining that there is a need for an AFRTS outlet and before the investment of funds, the local command will forward a request to the appropriate Military Department with an information copy to the appropriate Unified/Specified Command. The Military Department will take steps to ensure that funds, personnel, administrative, and logistics support are available prior to submitting the request for the approval of the Director, AFIS. The Military Department will provide the following information for the consideration of the Director, AFIS, keeping the appropriate Unified/Specified Command informed:

(1) Number of military (by branch of Service) and civilian DoD personnel and dependents who will benefit from the outlet.

(2) Amount and format of English language programing currently available.

(3) Designation of the activity that will exercise immediate control over the outlet.

(4) Type of outlet and physical location.

(5) Staffing plan for the outlet, including the number of military and civilian spaces to be allocated.

(6) Financial plan to fund for the outlet, including the amount of investment, and operation and maintenance estimates.

(7) Estimated "on-air" date.

(8) Copy of frequency allocation authorization or other suitable documentation, if radiating.

(9) Copy of the agreement with the host government when the outlet is to be based in a foreign country. When no formal written agreement has been negotiated, a memorandum of understanding or record from the U.S. Embassy or U.S. Country Team will suffice.

(10) Appropriate documentation in compliance with 32 CFR 169, 32 CFR 169a when applicable.

b. In considering any request for a new AFRTS outlet, the following criteria will apply:

(1) An outlet in a foreign country will abide by existing treaties, agreements, or regulations. Outlets located in other than foreign countries will not cause interference, as determined under the rules of the FCC, to licensed broadcast stations.

(2) An outlet will not be operated within the United States, except in certain isolated areas or where the Director, AFIS, determines that U.S. commercial radio and television programs are inadequate.

(3) An outlet will not be established when the Director, AFIS, determines that English language commercial, public, or government radio and television programs are adequate.

c. With the exception of designated mobile stations during time of war and Navy ships at sea, the geographic location of authorized AFRTS outlets will not be changed without approval of the Military Department concerned. The Director, AFIS will be advised in advance of such proposed changes. The appropriate Unified/Specified Command will be informed.

d. Changes or modifications to equipment that will alter materially the type of broadcast, the broadcast coverage area, or will result in a condition contrary to host country agreements, will not be made without approval of the Military Department concerned in coordination with the appropriate Unified/Specified Command. The Director, AFIS, will be advised in advance of such proposed changes.

e. For new outlets requiring AFRTS program materials, the Military Departments will furnish the Director, AFIS, and the appropriate Unified/Specified Command, an advisory at least 90 days prior to the planned "on-air" date, and an updated advisory 30 days prior to the firm "on-air" date.

f. Frequency assignment parameters (frequency, emission, power, or time restrictions) will not be exceeded without the approval of the Director, AFIS, and the appropriate broadcast frequency assignment authority.

g. A request for the establishment of a relay station as an AFRTS outlet will be considered only if it is intended to relay programs from an existing AFRTS outlet.

2. *Disestablishment of an AFRTS Outlet.* When a need no longer exists for an AFRTS outlet, the responsibile Military Department in coordination with the appropriate Unified/Specified Command, will obtain the approval of the Director, AFIS, to disestablish and will:

a. Notify the appropriate U.S. Embassy or U.S. Country Team of the disestablishment, if the outlet is located in a foreign country, and forward a copy of the notification to the Director, AFIS.

b. Advise the JCS and the Office of the Assistant Secretary of Defense (Communications, Command, Control, and Intelligence) (ASD(C31)) when FCC jurisdiction is involved.

c. At least 60 days prior to disestablishment, request from the AFRTS Programing Center disposition instruction for program materials.

d. Determine equipment disposition and furnish appropriate instructions to the outlet.

e. Notify the appropriate broadcast frequency assignment authority.

3. *Station Identification*

a. AFRTS networks and stations will:

(1) Identify themselves at prescribed regular intervals in compliance with international and host country regulations. If call letters, an identifying phrase, or a local television on-air logo has been assigned by the appropriate Military Department with the approval of the Director, AFIS, they may be used. If call letters or an identifying phrase has not been assigned, the network or station identification will be made as follows: "This is the American Forces Radio and Television Service," followed by the city, geographical location, or name of the Navy ship.

(2) Identify themselves at least once daily, or at sign-on and sign-off, as "This is the American Forces Radio and Television Service."

(3) Play the National Anthem of the United States at the normal sign-on and sign-off times, if not in contravention with an existing agreement with a host country. Networks and stations operating 24 hours a day will play the National Anthem at least once a day at the most appropriate time.

b. Networks will not be identified as such unless they exist in fact, and then they will be identified as being operated for the benefit of the American Forces as a whole.

4. *Emergency Announcements.* AFRTS outlets may not broadcast emergency announcements without clearance from an appropriate local commander or the AFRTS outlet commander/manager, who must verify the requirement. Recall, alert, or maneuver announcements for training purposes are not considered emergency announcements and will not be broadcast.

B. AFRTS Program Materials

1. *Authorization.* AFRTS program service may be authorized only for approved AFRTS outlets. Requests for this service will be made to the Director, AFIS, through the appropriate Military Department, keeping the Unified/Specified Command informed.

2. *Ownership.* All AFRTS program materials remain in the custody of the DoD and are restricted for use on AFRTS outlets only. The use or reproduction of AFTS program materials, in whole or in part, for any other purpose is prohibited without specific authorization from the Director, AFIS, or as prescribed in paragraphs B.5.e. and B.5.f. of this enclosure.

3. *Disposition*

a. AFRTS program materials, including spot announcements, on hand at AFRTS outlets will be screened at least semi-annually to ensure that obsolete recordings, spot announcements, and films are removed from station libraries.

b. AFRTS outlets will obtain disposition instructions for outdated program materials from the AFRTS Programing Center.

c. When disposal has been authorized by the AFRTS Programing Center, the program materials will be disposed of in accordance with furnished instructions. Certified statements of such disposition will be forwarded to the Programing Center.

d. To meet emergency situations AFRTS outlets will develop contingency plans for removing or destroying AFRTS program materials.

4. *Restrictions*

a. AFRTS program materials will not be used:

(1) On foreign or domestic commercial, private, or government-owned broadcasting stations without specific authorization from the Director, AFIS.

(2) In a program originating from a military installation and broadcast by a commercial station.

(3) As a feed from a hospital program broadcasting system to provide entertainment for such nontherapeutic activities as service clubs, staff quarters, barracks, and offices.

(4) In any manner that constitutes competition with, or is detrimental to commercial artists, copyright owners, or other private interests determined to be competitive.

(5) For direct projection exhibitions.

(6) Aboard Navy ships, while the ships are in port and within range of U.S. commercial stations broadcasting or telecasting U.S. programs.

b. Program materials produced by AFRTS outlets will not be made available to commercial, private, or government-owned radio or television stations or networks, or their representatives, without approval through normal public affairs channels.

5. *Use*

a. AFRTS program materials will be broadcast as received from the AFRTS Programing Center. Editing, for any purpose, is prohibited without prior approval of the Programing Center, except as prescribed in paragraphs e. and f., below.

b. TV information programing designated as "priority" by the AFRTS Program Center will be aired by AFRTS outlets in local prime time. Requests for exceptions to this requirement will be submitted to the Director, AFIS. (This requirement does not apply to Navy ships, when such broadcasts would interfere with operational commitments.)

c. Program materials furnished by the AFRTS Programing Center may be taped for delayed broadcast only when authorized by the Programing Center. The same security measures will apply to duplicate copies as to original recordings. All copies will be erased as soon as operational requirements are met. None will be retained without authority from the Programing Center.

d. AFRTS outlets may excerpt individual musical recordings from AFRTS radio programs for continuing local use.

e. AFRTS outlets may delete material in entertainment programing to remove host country sensitivities. To facilitate this process outlets are authorized to reproduce (dub) the original program. Such reproductions will be erased immediately after airing. The AFRTS Programing Center will be notified when deletions for sensitivities are made.

f. AFRTS outlets may use short excerpts electronically edited (dubbed) out of television shows or feature films for the purpose of informing viewers of upcoming television programs. The use of these excerpts (for promotionals) will met specific criteria provided by the AFRTS Programing Center.

g. AFRTS outlets may not conduct fund-raising radiothons or telethons in support of the overseas Combined Federal Campaign. Outlets may conduct such fund-raising programs in support of commend relief, welfare, and organizational activities within the limits of DoD Directive 5035.1, "Fund-Raising Within the Department of Defense," April 7, 1978.

h. AFRTS outlets may use program materials furnished by the AFRTS Programing Center for broadcasts originating from remote locations providing the following criteria are met:

(1) Adequate justification exists to preclude broadcast of the program from the studios of the AFRTS outlet.

(2) The primary purpose of the remote broadcast is not to provide entertainment to an audience at the remote location.

(3) The preponderance of the audience at the remote location does not comprise foreign nationals.

(4) The length of the remote broadcast conforms to similarly formatted programs broadcast from the studios of the AFRTS outlet.

(5) Upon termination of the remote broadcast, AFRTS program materials will not continue to be used at the remote location.

(6) All agreements with host country organizations that have music rights are observed.

C. Programs

1. *Authorized Programs*

a. Except for those programs supplied or authorized by the AFRTS Programing Center and those specified in paragraph b., below, no AFRTS outlet may broadcast or rebroadcast any program produced in behalf of private or commerical interests or foreign governments without the approval of the Director, AFIS.

b. In certain instances, programs, events, or ceremonies broadcast by a foreign government or agency may be considered of sufficient cultural or informational value to warrent broadcast by AFRTS outlets. No broadcast of this nature may be made without the express permission of the originating or controlling foreign government or agency. Use of such programs requires the concurrence of the appropriate Military Department. The Director, AFIS, will be notified.

c. All requests for satellite program service will be submitted to the Director, AFIS, through the appropriate Military Department and with a copy to the appropriate Unified/Specified Command. The Director, AFRTS Programing Center, will effect coordination and circuit-order validation with communications carriers.

d. Military Departments may authorize AFRTS outlets under their command to produce local programing, including live broadcasts and spot announcements.

2. *Foreign Language Broadcasts.* Broadcasts in other than the English language may not be made without obtaining approval from the Director, AFIS, except as outlined below:

a. Those broadcasts designed to satisfy the needs of U.S. Forces speaking other than the English language.

b. Programs or announcements in the language of the host country, with adequate English translation, addressed specifically to DoD personnel to increase their knowledge of the language, and appreciation of the host country, its customs, background, and people.

c. Official requests by the host government to alert its civilian population of emergency conditions, such as storms, floods, and earthquakes. Such announcements must be confirmed and approved for broadcast by the U.S. Country Team or senior host command. The appropriate Unified/Specified Command, and the Director, AFIS, will be advised as soon as possible of the circumstances and action taken.

3. *News Programs*

a. The AFRTS Programing Center will provide a broad spectrum of news programs and materials from the major U.S. commercial and public broadcasting networks and wire services. This service provided by the Programing Center will be the principal source of world and national (U.S.) news for AFRTS outlets.

b. The DoD has assured the U.S. commercial and public networks that it will protect the integrity of all news programs and materials. No change will be made in the editorial content of any news programs and materials used. Radio news actualities and correspondents' reports may be excerpted from network newscasts, but must be excerpted in their entirely. Radio actualities presented within correspondents' reports may not be excerpted. Television news programing may not be excerpted in any manner unless specifically authorized by the AFRTS Programing Center. If television news programing is procured locally by an AFRTS outlet, as authorized in paragraph k. below, the provisions of the contract with the source of such programing will apply.

c. AFRTS outlets will use news analyses or commentaries provided by the AFRTS Programing Center only. Outlets will identify analyses or commentaries as such, distinguishing them from newscasts and straight news reporting.

d. The AFRTS Programing Center and AFRTS outlets' news policy is guided by the FCC's Fairness Doctrine. This doctrine requires that U.S. broadcast stations provide a significant cross section of opposing views on controversial issues. The Fairness Doctrine applies to issues rather than persons and does not require "equal opportunities." It does require U.S. broadcast stations to provide "reasonable opportunities" for the presentation of conflicting views on the important controversial public issues. All AFRTS news programing will be characterized by its fairness.

e. The AFRTS political broadcasting policy is based on the FCC's law of Political Broadcasting and Cablecasting, which does require "equal opportunities" for political candidates. For example, a U.S. broadcast

station may grant "equal opportunities" to a candidate to compensate for a speech or other appearance by a rival candidate. Accordingly, if an AFRTS outlet carries an original speech (or appearance), it is required to broadcast the answering response, which will also be made available from the AFRTS Programing Center. It is noted, however, the requirement for "equal opportunities" does not apply to four kinds of news programs: newscasts, news interviews, news documentaries, and spot coverage of news events. All AFRTS political programing will be characterized by its fairness.

f. The AFRTS Programing Center will provice a free flow of political programing from U.S. commercial and public networks. The Programing Center and AFRTS outlets will maintain the same "equal opportunities" balance offered by these sources. AFRTS outlets should make extensive use of such programing, especially during presidential election years, and should provide their audience with political analysis, commentary, and public affairs programs, in addition to political hard news.

g. AFRTS outlets may disseminate Service, major/local command, community, and host country news that is of special interest to DoD personnel and their dependents.

h. AFRTS outlets may routinely mention the name of a commercial sponsor, along with other pertinent facts, in news stories and local announcements concerning Armed Forces Professional Entertainment Programs.

i. The content, format, and presentation of local news programs will be carefully supervised to ensure that such programing is factual, fair, and unbiased, and is in compliance with all of the applicable provisions of this Directive. Equal care will be exercised in the selection of editors, newscasters, and supervisory personnel who direct and disseminate the news.

j. Locally produced newscasts will contain appropriate attribution at the beginning and end of each newscast. Normally, it is necessary to reattribute individual news items related to U.S. Government or DoD policies and operations. AFRTS outlets will not delete source attribution in news programs and materials provided by the AFRTS Programing Center.

k. To ensure complete and balanced news programing, AFRTS outlets have authority to contract for commercial news services, subject to normal budgeting and contracting procedures.

D. Interservice Support Agreements

1. When a proposed or existing AFRTS outlet serves personnel of more than one Military Service, an Interservice Support Agreement will be executed covering staffing, operations, support services, programing and internal information requirements. This agreement will be initiated by the responsible Military Service in accordance with DoD Directive 4000.19.[1] Normally this agreement is executed at the time establishment is requested. A copy of these Interservice Support Agreement will be provided to the appropriate Unified/Specified Command.

2. Budgeting and funding functions will be performed by the responsible Military Department. When a Military Department requests either a new service or an increase in present AFRTS service for an installation in another Military Department's geographical area of responsibility, the requester will fund the new service, reimbursing the geographical area manager for the balance of the current fiscal year, plus one additional fiscal year. Within this time frame, the geographical area manager will program and budget resources for the additional service. The pay, allowances (including subsistence), and permanent change of station expenses of military personnel permanently or temporarily assigned to assist in the management, operation, or engineering of the AFRTS outlet will be borne by the parent Military Department of those personnel. Where host-tenant support is provided by a command other than the one assigned control over the AFRTS outlet concerned, the requirement for reimbursement shall be determined in accordance with DoD Directive 4000.19.[1]

3. Military personnel authorizations for AFRTS outlets will be shared by the Military Services in proportion to the respective audience of each Service within the coverage area. For purposes of personnel authorizations, audience includes military, DoD civilians, and dependents. Where U.S. civilian personnel spaces are required, the proportionate share of these spaces and funds will be transferred to the operating Service from the other Services at the time of outlet establishment or transfer.

E. Television-Audio Support Activity (T-ASA) will:

1. Procure (based upon specified requirements and funds made available by the respective Military Departments), temporarily hold and issue, in accordance with DoD Instruction 4115.1,[1] nonstandard radio and television supplies and equipment requisitioned by AFRTS outlets. Minimum stocks (to include National Stock Numbers) of fast moving repetitive-demand type items, will be stocked to preclude the necessity for individual purchases for each requisition.

2. Process in-warranty and repair cycle float requirements for AFRTS outlets.

3. Review excess listings for feasibility of repair and redistribution to AFRTS outlets.

4. Provide engineering support for new and existing outlets when requested by other Military Departments. The requesting Service will be required to furnish travel and per diem funds.

5. Provide engineering expertise on the selection of replacement equipment to ensure maximum standardization.

6. Provide technical guidance on the maintenance and rehabilitation of existing AFRTS outlets.

7. Provide supervision and engineering expertise associated with the on-site survey, procurement, issuance and installation of nonstandard radio and television supplies and equipment upon request. The requesting Service will be required to furnish travel and per diem funds.

8. Conduct on-site maintenance advisory visits and provide on-the-job training as required/requested to AFRTS maintenance personnel.

9. Conduct on-site logistics advisory visits and provide supply procedure training as requested. Funding will be furnished by the requesting Service.

10. Provide Commodity Management for AFRTS outlets. This includes life cycle management for all systems, end items, repairables, consumables, and commercial technical literature in support of AFRTS outlets.

11. Develop, in coordination with the Military Departments and the Director, AFIS, specifications and standards for professional equipment for AFRTS outlets.

F. Telecommunications

1. Established military standards for long haul communications (strategic) are to be complied with when the use of Defense Communications System facilities is anticipated. This is necessary in order to provide appropriate interface and compatibility.

2. The ASD (C3I) is responsible for the coordination of AFRTS matters involving correspondence with the FCC and the National Telecommunications and Information Administration (NTIA).

3. Commanders will ensure required coordination, when applicable, with the Joint Frequency Panel of the U.S. Military Communications Electronics Board.

4. Early planning concepts, as well as requests for establishment of AFRTS facilities for broadcasting within the United States and possessions, will also be submitted through command channels to the ASD(C3I), who will effect necessary coordination with the NTIA and the FCC; and who will advise on consistency with national and departmental international telecommunications policy. The ASD(C3I) will advise the appropriate Military Department whether or not an application for frequency assignment may be processed to the NTA.

5. Frequency assignments will be obtained in accordance with established procedures and command responsibilities for frequency coordination and assignments.

G. Direct Communication

Direct communication is authorized between:

1. AFRTS outlets, Military Departments, Unified/Specified Commands, ASD(PA), and AFIS, concerning immediate operational matters only.

2. AFRTS outlets, Military Departments, and the T-ASA, Sacramento Army Depot, concerning routine supply matters, procurement actions, and technical engineering advice.

3. AFRTS outlets and the AFRTS Programing Center in Los Angeles on program matters such as new radio and television programs, program complaints, satellite transmissions, area program restrictions, and advisories on program sensitivities. Mini-TV outlets and Navy ships will channel such communications through the appropriate circuit manager to ensure proper coordination. All AFRTS outlets will channel communications concerning such matters as broadcast policy, or proposed changes in existing program services through the appropriate Military Department.

[1] See footnote page 1.

4. AFRTS outlets and host country commercial or government broadcasters, with the approval of the Director, AFIS. This direct link would be authorized for such local matters as lifting area program restrictions and the use of satellite broadcasters.

January 15, 1981.

M. S. Healy,

OSD Federal Register Liaison Officer
Washington Headquarters Services
Department of Defense.

[FR Doc. 81-2060 Filed 1-19-81; 8:45 am]

BILLING CODE 3810-70-M

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) to reflect that the Secretary of the Navy: (1) has determined that USNS MOHAWK (T-ATF 170) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with Annex I, section 2(f) of the 72 COLREGS without interfering with its special function as a naval fleet tug, and (2) has found that USNS MOHAWK (T-ATF 170) is a member of the T-ATF 166 Class of ships, certain exemptions for which have been previously granted under 72 COLREGS Rules 38(a), 38(b), and 38(d)(i). The intended effect of this rule is to warn mariners in waters where the 72 COLREGS apply.

EFFECTIVE DATE: January 7, 1981.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Charles Stanley Prentace, JAGC, USN, Admiralty Division, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, Virginia 22332, Telephone number: (202) 325-9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. § 1605 and Executive Order 11964, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USNS MOHAWK (T-ATF 170) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS Annex I, section 2(f), in that, during those situations when the USNS MOHAWK must simultaneously display masthead lights used for towing as required by Rule 24 and the task lights of a vessel restricted in its ability to maneuver as required by Rule 27, the masthead lights used for towing will not be located above and clear of the task lights. Full compliance with this provision would interfere with the special function of the ship. The Secretary of the Navy has also certified that the aforementioned masthead lights are located in closest possible compliance with the applicable 72 COLREGS requirement.

Notice is also provided to the effect that the Secretary of the Navy has previously authorized the use by T-ATF 166 Class of vessels of certain exemptions permitted by 72 COLREGS Rule 38. Specifically, the use of the exemptions has been authorized as allowed in Rule 38(a), pertaining to lights with ranges and intensities prescribed in Rule 22; Rule 38(b), pertaining to lights with color specifications prescribed in Annex I, section 7; and, Rule 38(d)(i), pertaining to the repositioning of masthead lights on vessels less than 150 meters in length required by Annex I, section 3(a).

The Secretary of the Navy has determined that USNS MOHAWK is a member of the T-ATF 166 Class, is in compliance with the 1960 Rules of the Road, and the keel of the T-ATF 166 Class lead ship was laid prior to July 15, 1977.

Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary and contrary to the public interest since it is based on technical findings that the placement of lights on this ship in a manner different from that prescribed herein will adversely affect the ship's ability to perform its military function. Accordingly, 32 CFR Part 706 is amended as follows:

§ 706.2 [Amended]

1. Table Four of § 706.2 is amended by adding the following note 14 which reflects the certification issued by the Secretary of the Navy:

* * * * *

14. On USNS MOHAWK (T-ATF 170), the masthead lights used for towing required by Rule 24 will be displayed approximately 4.1 meters below the lowest of the lights required to be displayed by Rule 27 when a vessel is not under command or is restricted in its ability to maneuver.

* * * * *

Dated: January 7, 1981.

Robert J. Murray,

Acting Secretary of the Navy.

[FR Doc. 81-2060 Filed 1-19-81; 8:45 am]

BILLING CODE 3810-71-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 3

[FRL AS-FRL 1728-8]

Employee Responsibilities and Conduct

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule revokes the procedures for filing public financial disclosure statements under the Toxic Substances Control Act, the Solid Waste Disposal Act, the Clean Air Act, and the Environmental Research, Development, and Demonstration Authorization Act of 1978. The Ethics in Government Act of 1978 (Pub. L. 95-521) supersedes financial disclosure requirements under these statutes. This rule also sets forth procedures for administrative enforcement of the post-employment restrictions of 18 U.S.C. 207, as required by the Ethics in Government Act and Office of Government Ethics regulations published February 1, 1980, at 45 FR 7402. This rule is intended to implement these requirements.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Donnell Nantkes, Office of General Counsel, Contract and General Administration Branch (A-134), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, telephone: 202-426-8830.

SUPPLEMENTARY INFORMATION: Four statutes under which the Environmental Protection Agency (EPA) conducts business contain provisions requiring certain EPA employees to file public reports of their financial interests in persons regulated under the statutes or persons receiving funds under the statutes. In response to these requirements, EPA promulgated regulations to implement the reporting of such financial interests. The procedures for filing such reports under section 26(e) of the Toxic Substances Control Act (15 U.S.C. 2625(e)) are contained in 40 CFR 3.305. Section 3.306 contains the procedures for filing such reports under section 1007 of the Solid Waste Disposal Act (also referred to as the Resource Conservation and Recovery Act, 42 U.S.C. 6906). Section 3.307 contains the procedures for filing such reports under section 218 of the Clean Air Act (42 U.S.C. 7618). Section 3.308 contains the procedures for filing such reports under section 12 of the Environmental Research, Development, and

Demonstration Authorization Act of 1978 (Pub. L. 95–155).

On October 26, 1978, the Ethics in Government Act (Pub. L. 95–521) became law. Section 207(c) of the Act provides in pertinent part:

The provisions of this title requiring the reporting of information shall supersede any general requirement under any other provision of law or regulation with respect to the reporting of information required for purposes of preventing conflicts of interest or apparent conflicts of interest.

On April 11, 1980, the Office of Legal Counsel of the Department of Justice rendered its opinion that section 207(c) has displaced the financial reporting requirements of the four specific statutes discussed above "and brought the provision of Title II of the Ethics Act into play in their stead." Accordingly, this rule revokes the reporting procedures under the four statutes.

The Ethics in Government Act contains certain amendments concerning post-employment restrictions for government employees and requires agencies to establish procedures for administrative enforcement of these restrictions. EPA drafted such procedures and, as required by the act, EPA sent these procedures to the Office of Government Ethics for review. On April 14, 1980, the Office of Government Ethics found that "EPA's proposed administrative procedures, implementing the provisions of 18 U.S.C. 207(j) conform with the law and the regulations promulgated by this Office on February 1, 1980, (45 FR 7402)." Accordingly, this rule establishes those procedures as a new Appendix C to Subpart A of the rules.

Dated: January 13, 1981.

(88 U.S.C. 301)

Douglas Costle,

Administrator.

40 CFR Chapter I, Part 3, is amended as follows:

1. The Table of Sections, Subpart A, is amended by adding Appendix C to read as follows:

Subpart A—General Provisions

Sec.

* * * * *

Appendix C—Procedures for Administrative Enforcement of Post-Employment Restrictions

2. The Table of Sections, Subpart C, is amended by Revising §§ 3.305, 3.306, 3.307 and 3.308, and Appendices D, E, F, G and H to read as follows:

Subpart C—Financial Interests and Investments

Sec.

* * * * *

3.305 Special requirements under the Clean Air Act.

* * * * *

3.306 3.308 [Reserved]

* * * * *

Appendix D—Employees exempt from special requirements under the Clean Air Act.

Appendices E—H [Reserved]

3. Subpart A is amended by adding the following new Appendix C after Appendix B:

Appendix C.—Procedures for Administrative Enforcement of Post-Employment Restrictions

1. Purpose

The purpose of this Appendix is to implement provisions of The Ethics in Government Act which concern restrictions on post-EPA employment. This Appendix contains procedures which EPA follows whenever it believes that a former EPA employee has violated 18 U.S.C. 207 (a), (b), or (c), as implemented by 5 CFR Part 737.

Authority: 18 U.S.C. 207 (a), (b), (c), as implemented by 5 CFR Part 737.

2. Delegation

The Administration delegates the authority to carry out this Appendix to the Inspector General, with the following exceptions:

(a) The General Counsel has the authority to appoint the presiding official of a hearing, as provided by paragraph (9)(a) of this Appendix;

(b) The Agency Ethics Official has the authority to designate the Agency Counsel, as provided by paragraph 9(b) of this Appendix;

(c) The Deputy Administrator has the authority to impose appropriate administrative sanctions, as provided by paragraph (15) of this Appendix.

3. Preliminary Review and Referral of Information About Violations

The Inspector General receives and reviews written or oral information concerning a possible violation of the post-employment restrictions of 18 U.S.C. 207 (a), (b), or (c) as implemented by 5 CFR Part 737. The Inspector General reviews the information to determine whether the matter is clearly frivolous and does not merit further action. If the Inspector General (IG) determines that the matter merits further action, the IG informs the Director of the Office of Government Ethics and consults with the Criminal Division of the Department of Justice regarding the conduct of an investigation. The purpose of the consultation is to avoid prejudicing any criminal proceeding that the Justice Department may have under consideration.

4. Investigation by the Inspector General

If the Criminal Division of the Justice Department agrees that EPA should handle the matter, the IG must conduct an investigation of the possible violation of the post-employment restrictions of 18 U.S.C. 207 (a), (b), or (c).

5. Initiating Process to Impose Sanctions: Notice

If the Inspector General's investigation establishes that there are reasonable grounds to believe that a former EPA employee has violated the post-employment restrictions of 18 U.S.C. 207 (a), (b), or (c), the IG may initiate the process of imposing sanctions under 18 U.S.C. 207(j). The Inspector General must send the former EPA employee a written notice of charges and a copy of this Appendix by certified mail, return receipt requested. The notice of charges must describe the allegations against the former employee in sufficient detail to enable the former employee to prepare an adequate defense and must contain the following final paragraph:

You must request a hearing by mailing or otherwise furnishing written notice of your request to me within 30 days after the date you receive this notice of charges. If you do not request a hearing within 30 days, the Agency may nonetheless determine that you have violated the provisions of 18 U.S.C. 207 (a), (b), (c) as implemented by 5 CFR Part 737 and impose administrative sanctions set forth in paragraph 15 of the enclosed Appendix to 40 CFR Part 3, Subpart A: You have a right to counsel, at your own expense, at all stages of this administrative enforcement proceeding. The procedures for administrative enforcement of the post-employment restrictions are set forth in the enclosed Appendix.

6. Request for a Hearing

A former EPA employee must request a hearing within 30 days after receiving the notice of charges. Otherwise, the initial determination of the charges is made without a hearing.

7. Initial Decision Without a Hearing

If a former EPA employee fails to make a timely request for a hearing, the Inspector General must prepare an initial decision in writing. The Inspector General must furnish this decision to the former employee by certified mail, return receipt requested within 60 days after the time for requesting a hearing expires. The initial decision must set forth the findings of fact and conclusions of law on which it is based.

8. Appeal of an Initial Decision Made Without a Hearing

A former employee may appeal an initial decision made without a hearing. The appeal must be submitted to the Deputy Administrator in accordance with paragraph (10)(b) of this Appendix.

9. Initial Decision After a Hearing

If the former employee requests a hearing, an initial decision is made after a hearing takes place.

(a) *Appointment of a Presiding Official*

The General Counsel must appoint an impartial examiner to preside over the hearing. The examiner must be an attorney and an employee of the Environmental Protection Agency. The General Counsel must promptly notify the former employee and the Inspector General of the examiner's name, address and telephone number.

The examiner shall preside at the hearing, conduct it in a fair and impartial manner, and issue an initial decision as promptly as possible after the record is complete, but in no event later than 60 days after the hearing is terminated. No person who has participated in any way in the investigation or in the decision to initiate administrative enforcement, or is a subordinate of the Agency Counsel, or who has had any connection or dealings with the former employee may serve as an examiner. The General Counsel may remove an examiner for cause.

(b) *Appointment of Agency Counsel*

The Agency Ethics Official shall designate an attorney to act as Agency Counsel. The Agency Ethics Official must notify the examiner and the former employee (or if the former employee is represented by counsel, his or her attorney) of the name, address and telephone number of the Agency Counsel.

(c) *Hearings*

Hearings will be held at EPA Headquarters in Washington, D.C., or at an EPA regional office or laboratory. After conferring with the parties, the examiner shall set a reasonable time, date and place for the hearing with due regard for the former employee's need for adequate time to prepare a defense and the need to expeditiously resolve allegations which may damage the former employee's reputation. At least 15 days before the date set for the hearing, the examiner shall notify the parties of the time, date and place by certified mail, return receipt requested. Hearings will be as informal as reasonably possible consistent with establishing an orderly record. Federal rules of evidence do not control the hearing, although the examiner may use these rules as guidance. The examiner generally will admit evidence unless it is clearly irrelevant, immaterial or unduly repetitious. The parties have the right to:

(i) Introduce and examine witnesses;

(ii) Offer documentary evidence;

(iii) Confront and cross-examine adverse witnesses; and

(iv) Present oral argument in the form of brief opening and closing statements.

In addition, the former employee has the right:

(i) To represent himself or herself or be represented by counsel at all stages of administrative enforcement; and

(ii) To require that all persons be excluded from the hearing room except the reporter, the examiner, the Agency Counsel and witnesses during the time they are actually testifying.

Witness shall testify under oath or affirmation administered by the examiner.

The examiner must arrange for a transcript of the hearing through the EPA Procurement and Contracts Management Division using the funds of the Office of Management and Agency Services. The former employee is entitled to a copy of the transcript at no charge, and the examiner must furnish it as soon as it is received from the reporter.

(d) *Burden of Proof*

The Agency has the burden of proof and must establish a violation by clear and convincing evidence.

(e) *Initial Decision*

The Examiner must make an initial decision exclusively on matters of record in the proceeding. The initial decision must be made within 60 days after the hearing and must set forth the findings of fact and conclusions of law on which it is based. The examiner must furnish this decision to the former employee by certified mail, return receipt requested to the Agency Counsel and to the Inspector General.

10. Appeal of an Initial Decision Made After a Hearing

(a) *Initial Decision After a Hearing*

The initial decision of the examiner becomes the final Agency decision unless, within 30 days after receiving the initial decision, either party appeals by mailing or otherwise furnishing to the Deputy Administrator written notice of appeal, with a copy to the opposing party. The notice of appeal may discuss the reasons why the party contends that the initial decision is erroneous, subject to the right of the opposing party to present a written response to the Deputy Administrator within 30 days after receiving a copy of the notice of appeal. Neither party may submit new evidence.

The Deputy Administrator must base his or her decision solely on the record of the proceedings or those portions cited by the parties to limit the issue, and the notice of appeal and response. If the Deputy Administrator modifies or reverses the initial decision, he or she must state in writing why the initial decision was erroneous.

(b) *Initial Decision Without a Hearing*

If the former employee did not request a hearing, the initial decision of the Inspector General will become the final Agency decision unless the former employee submits a written notice of appeal to the Deputy Administrator within 30 days after receipt of the initial decision, with a copy to the Inspector General. The notice of appeal may discuss reasons why the initial decision is erroneous, subject to the right of the Inspector General to present a written response to the Deputy Administrator within 30 days after receiving the notice of appeal. The Deputy Administrator's review will be based on an examination of the Inspector General's evidence and any legal arguments which the former employee or the Inspector General presents.

11. Exparte Communications (communications outside the record)

Neither an examiner nor the Deputy Administrator will receive from any person any written or oral communication outside the record about the merits of an administrative enforcement proceeding or appeal. This does not apply to exparte discussions concerning administrative functions or procedures under this Appendix, or to consultations between the Deputy Administrator and the judicial officer or other staff member who assists the Deputy Administrator.

12. Calculating Deadlines

If a deadline falls on a Saturday, Sunday or federal holiday, the next working day is considered the deadline.

13. Administrative Sanctions

Whenever a final determination is made that a former employee has violated 18 U.S.C. 207 (a), (b) or (c) as implemented by 5 CFR Part 737, the Deputy Administrator may impose an appropriate administrative sanction, which may include one or more of the following:

(i) Prohibiting the former employee from making, on behalf of any other person (except the United States) any formal or informal appearance before, or, with the intent to influence, any oral or written communication to, the U.S. Environmental Protection Agency on any matter of business for a period not to exceed 5 years. This will be accomplished by a memorandum to all EPA employees directing them to refuse to participate in any such appearance or to accept any such communication during the restriction period.

(ii) Debarring the former employee receiving any EPA contract, grant, cooperative agreement or loan for a period of up to 3 years, provided that the violation was committed in the context of seeking or performing a government contract, grant, cooperative agreement or loan.

(iii) A written reprimand with a copy to be placed in the former employee's official personnel file.

(iv) A written reprimand without a copy to the former employee's official personnel file.

The Deputy Administrator may confer with the parties before deciding upon an administrative sanction. The former employee must be notified of any administrative sanction by certified mail, return receipt requested.

14. Confidentiality

All records and information regarding administrative enforcement proceedings under this Appendix will be kept confidential and will not be disclosed except as required by law or regulation.

15. Judicial Review

Any person found to have violated 18 U.S.C. 207 (a), (b) or (c) as implemented by 5 CFR, Part 737, may seek judicial review of this administrative determination.

4. Subpart C is amended by revising §§ 3.305, 3.306, 3.307 and 3.308 and Appendices D, E, F, G and H to read as follows:

§ 3.305 Special requirements under the Clean Air Act.

(a) Notwithstanding the other provisions of this part, after August 7, 1978, no employee who is not listed in Appendix D as exempt may be employed by, serve as attorney for, act as consultant for, or hold any other official or contractual relationship to (other than ownership of stock, bonds, or other financial interest)—

(1) The owner or operator of any major stationary source or any stationary source which is subject to a standard of performance or emission standard under section 111 (42 U.S.C. 7411) or section 112 (42 U.S.C. 7412) of the Act;

(2) Any manufacturer of any class or category of mobile sources if such mobile sources are subject to regulation under the Act;

(3) Any trade or business association of which an owner or operator referred to in paragraph (h)(1) of this section or a manufacturer referred to in paragraph (h)(2) of this section is a member;

(4) Any organization (whether non-profit or not) which is a party to litigation, or engaged in political, educational, or informational activities, relating to air quality.

(b) In reviewing financial interest statements, Deputy Counselor and the Agency Counselor shall consider whether certain financial interests of non-exempt employees may be inconsistent with the particular employee's position and duties. In particular, any financial interest that presents a conflict of interest or an apparent conflict of interest with an employee's duties under the Act shall be resolved under § 3.203.

(c) Under § 318(d) of the Clean Air Act, any employee subject to this provision who knowingly violates the provisions of this section is subject to a fine of not more than $2500 or imprisonment for not more than one year, or both.

§ 3.306–3.308 [Reserved.]

Appendix D.—Employees Exempt From Special Requirements Under the Clean Air Act

The positions listed below have been determined to be of a non-regulatory or non-policymaking nature under section 318(d) of the Clean Air Act. Whenever the title of a position is listed, it includes any person who occupies the position as "acting" and any person who occupies a successor position under a subsequent reorganization.

Exemptions:

(1) All special government employees.

(2) Under the Office of the Administrator:

All employees except the Administrator, Deputy Administrator, General Counsel, Deputy General Counsel, Associate General Counsel for Air, Noise and Radiation and Director of the Science Advisory Board.

(3) Under the Office of Planning and Management:

All employees except the Assistant Administrator for Planning and Management, Associate Assistant Administrator for Planning and Management, Deputy Assistant Administrator for Planning and Evaluation and the Director of the Standards and Regulations Evaluation Division.

(4) Under the Office of Enforcement:

All employees except the Assistant Administrator for Enforcement, Deputy Assistant Administrator for General Enforcement, Director of the Stationary Source Enforcement Division and Director of the Mobile Source Enforcement Division.

(5) Under the Office of Air, Noise and Radiation:

All employees except the Assistant Administrator for Air, Noise and Radiation, Director of the Office of Policy Analysis, Director of the Office of Transportation and Land Use Policy, Deputy Assistant Administrator for Air Quality Planning and Standards and Division Directors reporting to this official, and the Deputy Assistant Administrator for Mobile Source Air Pollution Control and Division Directors reporting to this official.

(6) All other employees.

[A–9–FRL 1729–5]

South Coast Air Basin Nonattainment Area Plan; Approval and Promulgation of Implementation Plans

AGENCY: Environmental Protection Agency.

ACTION: Notice of Final Rulemaking.

SUMMARY: On April 1, 1980 (45 FR 21271), the Environmental Protection Agency (EPA) published a notice of proposed rulemaking for the South Coast Air Basin nonattainment area plan (NAP) for ozone, carbon monoxide (CO), particulate matter (PM), and nitrogen dioxide (NO_2). The April 1, 1980 notice proposed to disapprove the NAP because the lack of the following constituted major deficiencies with respect to Part D of the Clean Air Act, "Plan Requirements for Nonattainment Areas:"

1. For ozone, CO, PM, and NO_2, new source review (NSR) rules.

2. For ozone, rules reflecting reasonably available control technology (RACT) for certain volatile organic compound (VOC) sources.

3. For ozone and CO, legal authority to implement an inspection and maintenance (I/M) program.

The State has submitted the necessary VOC RACT and NSR rules and therefore has corrected two of the major deficiencies. However, the California State Legislature has not provided the necessary legal authority to implement and enforce an I/M program. Because the major deficiency of the lack of the I/M program has not been corrected, today's notice takes final action to disapprove the NAP for ozone and CO. Further, since the major deficiency concerning PM and NO_2 has been corrected and the State has provided assurances to correct the minor deficiencies in the NAP, today's notice takes final action to conditionally approve the NAP for PM and NO_2. These actions retain the prohibition on construction of certain major new or modified VOC and CO sources, but removes the prohibition for PM and oxides of nitrogen (NO_x) sources.

This notice also provides a brief summary of the proposed rulemaking notice, describes recent revisions which supplement the NAP, discusses public comments received, specifies deadlines by which the State is required to submit material to correct minor deficiencies in the NAP, and describes EPA's final action on the NAP.

DATES: This action is effective January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Louise P. Giersch, Director, Air and Hazardous Materials Division, 215 Fremont Street, San Francisco, CA 94105. Environmental Protection Agency, Region IX, Attn: Douglas Grano (415) 556–2938.

A copy of today's revision to the California State Implementation Plan (SIP) is located at: The Office of the Federal Register, 1100 "L" Street, N.W., Room 8401, Washington, D.C. 20408.

SUPPLEMENTARY INFORMATION:

Background

The Clean Air Act, as amended in 1977, requires states to revise their SIPs for all areas that have not attained the National Ambient Air Quality Standards (NAAQS). On July 25, 1979, the Executive Officer of the California Air Resources Board (ARB), the Governor's official designee, submitted revisions to the California SIP consisting of a control strategy and regulations for the South Coast Air Basin. These revisions, submitted as the South Coast Air Basin NAP, are intended to provide for the attainment of the ozone, CO, NO_2, and PM NAAQS in the South Coast Air Basin.

On April 1, 1980 (45 FR 21271), EPA published a notice of proposed rulemaking for the South Coast Air Basin NAP. That notice provided a description of the NAP, summarized the applicable Clean Air Act requirements into 14 criteria, compared the NAP to those criteria, and, as described below, proposed to approve, conditionally approve, or disapprove portions of the NAP. The April 1, 1980 notice should be used as a reference in reviewing today's action.

EPA proposed to approve the reasonable further progress, emissions growth, annual reporting, public and government involvement, and public hearing portions of the NAP for ozone, CO, NO_2, and PM because they were found to be consistent with Part D of the Clean Air Act. EPA also proposed to

approve the modeling portion of the NAP for CO and NO_2.

EPA proposed to conditionally approve the emission inventory, emission reduction estimates, attainment provision, and resources portions of the NAP for ozone, CO, NO_2, and PM because they were found to contain minor deficiencies with respect to Part D. EPA also proposed to conditionally approve the modeling portion of the NAP for ozone and PM.

EPA proposed to disapprove the legally adopted measures/schedules, permit program, extension requirements, and extension requirements for VOC RACT portions of the NAP. EPA proposed to disapprove these portions because the lack of an I/M program, NSR rules, and rules reflecting RACT for certain VOC sources constituted major deficiencies with respect to Part D. As a result of the absence of an I/M program, NSR rules, and nine VOC rules, the April 1, 1980 notice proposed to disapprove the overall South Coast Air Basin NAP with respect to Part D and continue the construction prohibition.

After publication of the April 1, 1980 notice, the State submitted the necessary VOC and NSR rules as SIP revisions. As a result of the State's submittal of these rules, two of the three major deficiencies in the NAP were corrected.

However, the California State Legislature has failed to provide the necessary legal authority to implement and enforce an I/M program. On September 8, 1980 (45 FR 59180), EPA published a rulemaking which proposed to limit certain Federal funding assistance for specific areas in the State of California, including the South Coast Air Basin. This action was proposed in response to Sections 176(a) and 316(b) of the Clean Air Act because the State has failed to submit or make a reasonable effort to submit an SIP revision containing an I/M program including the legal authority to implement and enforce the I/M program. On December 12, 1980 (45 FR 81746), EPA published a final rulemaking on the September 8, 1980 proposal. This rulemaking took action to limit certain Federal funding assistance for the South Coast Air Basin and other areas in California. These limitations apply to funds provided under the Clean Air Act (42 U.S.C. 7401 et seq.), the Clean Water Act (33 U.S.C. 1251 et seq.), and the Surface Transportation Act (23 U.S.C. 101 et seq.).

Supplemental Revisions

After EPA's review of the July 25, 1979 submittal, the State submitted revisions which correct some of the deficiencies noted in the April 1, 1980 notice. These revisions are discussed below.

New Source Review

As discussed in the April 1, 1980 notice, a legally enforceable NSR rule was not included in the NAP and this constituted a major deficiency. However, the State did submit a draft NSR rule. EPA reviewed the draft NSR rule (See EPA's Evaluation Report) and concluded that it contained only minor deficiencies with respect to the Part D requirements. Thus, EPA proposed that the permit program portion of the NAP could be conditionally approved if the State submitted an adopted NSR rule similar and equivalent to the draft rule.

On the dates noted below, the Governor's designee submitted the following NSR rules for the South Coast Air Quality Management District (AQMD):

Regulation XIII—New Source Review

April 3, 1980:

Rule 1301—General
Rule 1302—Definitions
Rule 1303—Applicability and Analysis
Rule 1304—Exemptions from Regulation XIII
Rule 1305—Special Permit Provisions
Rule 1306—Emission Calculations
Rule 1307—Emission Offsets
Rule 1308—Eligibility of Emission Offsets
Rule 1310—Analysis, Notice, and Reporting
Rule 1311—Power Plants
Rule 1313—Permits to Operate

August 15, 1980:

Rule 1302—Definitions
Rule 1308—Eligibility of Emission Offsets

Section 173 of the Act contains the requirements for approval of a permit program. EPA has established guidance based on Section 173 in: (1) EPA's Emission Offset Interpretative Ruling (January 16, 1979, 44 FR 3274) and (2) EPA's proposed amendments to regulations for NSR and the Emission Offset Interpretative Ruling (September 5, 1979, 44 FR 51924).

EPA has reviewed the South Coast AQMD's NSR rules with respect to both the draft NSR rule and to the guidance based on Section 173. The South Coast AQMD's NSR rules do contain differences from both the draft rule and the Section 173 guidance. The only significant differences are as follows:

1. Rule 1306, "Emission Calculations" does not count emission increases up to 100 lbs/day when the October 8, 1976 cutoff date is used and it allows company records to be used in some cases to calculate emissions for offsets using the highest three years of the past five year period.

2. Rule 1307, "Emission Offsets" does not require offsets for the first 150 lbs/day of emission increases for VOC, NO_x, and PM and for the first 750 lbs/day for CO.

An NSR permit program cannot be approved or conditionally approved with these deficiences, hence the two rules noted above are being disapproved. Aside from these disapproved portions, the South Coast AQMD's NSR rules contains only minor deficiencies with respect to the Section 173 requirements, including the definitions of "stationary source" and lowest achievable emission rate (LAER) (All of the deficiencies are described in EPA's Evaluation Report Addendum, which is available at the Region IX Office, the ARB, the South Coast AQMD, Southern California Association of Governments (SCAG), and the EPA Library in Washington, D.C.) Thus, the NSR rules being approved in this notice are (1) similar to the draft rule in that the definitions and requirements are substantially the same and are equivalent to the draft rule in that they are at least as effective in meeting the requirements of Section 173, and (2) contain only minor deficiences with respect to Section 173.

It should be noted that EPA has published two final rulemaking notices on the September 5, 1979 proposed amendments to EPA's NSR regulations and the Emission Offset Interpretative Ruling. These notices, published on May 13, 1980 (45 FR 31307) and August 7, 1980 (45 FR 52676), amend EPA's Interpretative Ruling and set out new requirements for NSR under Section 173. The State is required to comply with the August 7, 1980 requirements by May 7, 1981. In revising the South Coast AQMD's NSR rules, the State/AQMD must address (1) any new requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the AQMD rules do not currently satisfy and (2) those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in Document File NAP-CA-9 at the EPA Library in Washington D.C. and the Region IX Office).

VOC RACT Rules

As discussed in the April 1, 1980 notice, nine legally enforceable VOC rules were not included in the NAP and this constituted a major deficiency. However, the State did submit model VOC rules. EPA reviewed these model rules and concluded that they contained only minor deficiencies with respect to the Part D requirements. Thus, EPA proposed that the legally enforceable measures/schedules and extension requirements for VOC RACT portions of

the NAP could be conditionally approved if the State submitted legally adopted rules which were similar and equivalent to the model rules.

On the dates noted below, the State submitted the following VOC rules for the South Coast AQMD:

December 17, 1979:

Rule 1108—Cutback Asphalt
Rule 1108.1—Emulsified Asphalt
Rule 1128—Paper and Fabric Coating Operations
Rule 1107—Manufactured Metal Products and Coatings

April 2, 1980:

Rule 1122—Solvent Metal Cleaners (Degreasers)

April 23, 1980:

Rule 464—Wastewater Separators
Rule 465—Vacuum Producing Devices and Systems
Rule 1123—Refinery Process Turnaround
Rule 1125—Can and Coil Operations

EPA has reviewed each of these rules against both the applicable model rule and Control Technique Guideline document (CTG) (See Evaluation Report Addendum). EPA has concluded that the adopted rules (1) are similar to the model rules in that the definitions and requirements are substantially the same and are equivalent to the model rules in that they are at least as effective in meeting RACT and (2) are consistent with the applicable CTG. Therefore, all the deficiencies noted in the April 1, 1980 notice concerning these rules have been corrected.

Rule 461, "Gasoline Transfer and Dispensing" submitted on July 25, 1979 was proposed to be conditionally approved in the April 1, 1980 notice. However, in response to public comments (See *Public Comment* Section, Criterion 14), EPA has decided that rule 461 is fully approvable. On February 7, 1980 the ARB submitted a revised rule 461. This revised rule is being approved and incorporated into the SIP without further notice and comment because the revisions to the rule are minor (See 5 U.S.C. Section 553(b)(B), Administrative Procedure Act). Therefore, the minor deficiencies concerning Rule 461 has been corrected.

In addition, Rules 1122, 1125, and 1128 contain exemptions for the use of methylene chloride and methyl chloroform (1,1,1 trichloroethane). On May 16, 1980, EPA published a clarification of Agency policy concerning the control of methyl chloroform and methylene chloride in ozone SIPs (45 FR 32424). EPA explained that it cannot approve or enforce controls on either of these two compounds as part of a Federally enforceable ozone SIP because current information indicates that neither compound is an ozone precursor. Consequently, EPA is not disapproving California's exemption of methyl chloroform and methylene chloride.

This policy is in no way an expression of EPA's view on the desirability of controls on these compounds. States retain the authority to control these compounds under the authority reserved to them in Section 116 of the Clean Air Act. However, State officials and sources should be advised that there is a strong possibility of future regulatory action by EPA to control emissions of these two compounds (See Proposed New Source Performance Standards for Organic Solvent Cleaners, 45 FR 39766, June 11, 1980).

California Environmental Quality Act (CEQA)

The April 1, 1980 notice proposed to conditionally approve the NAP based upon the submittal of those portions of CEQA that relate to the requirement providing for an analysis of alternatives for new sources which demonstrates that the benefits of the source outweigh the environmental costs (Section 172(b)(11)(A) of the Clean Air Act).

On October 20, 1980, the State submitted the following portions of CEQA:

Sections 2100; 21001; 21002; 21002.1; 21061; 21063; 21065; 21080.1; 21080.4(a); 21080.5 (a), (b), (c) and (d); 21081; 21082; 21100; 21104; 21151; 21153; and 21160.

These portions of CEQA require all "State agencies, boards, and commissions" to certify the completion of an environmental impact report (EIR) on any project "which may have a significant effect on the environment." The EIR shall include "a detailed statement" setting forth, among other things, "alternatives to the proposed action." In order to approve a project under CEQA, the agency must find either (1) that changes have been required in the project "which mitigate or void the significant environmental effects thereof as identified in the completed environmental impact report" or (2) that "[S]pecific economic, social, or other considerations make infeasible mitigation measures or project alternatives identified in the environmental impact report.

EPA has determined that these portions of CEQA satisfy the requirements of Section 172(b)(11)(A) of the Clean Air Act and therefore this minor deficiency has been corrected.

Public Comments

Comments Specific to the South Coast Air Basin NAP

During the public comment period, EPA received numerous comments. The comments received were both general comments and comments related to EPA's criteria for approval which are described in the April 1, 1980 notice. In response to these comments, EPA has revised certain proposed actions. Each of the points raised by the commenters and EPA's responses follow.

I. General Comments

Comment: The ARB, SCAG, and the South Coast AQMD believe that EPA should modify the proposed conditions of approval because they will require them to take several actions that will impair their ability to develop an acceptable 1982 NAP.

Response: Because the South Coast Air Basin NAP did not satisfy all of the Part D requirements for the 1979 NAP, EPA cannot approve it. However, EPA believes that most of the materials that will be required to satisfy the conditions of approval are also necessary steps directed toward developing the 1982 NAP. Therefore, correcting the minor deficiencies should not significantly impair the development of the 1982 NAP.

Comment: The South Coast AQMD and SCAG commented that EPA's proposed dates for satisfying the conditions of approval should be revised as follows: (1) the minimum deadline should be 90 days after the final rulemaking is published, (2) the January, 1981 proposed deadline should be set at six months after the final rulemaking is published, and (3) the June and July 1981 proposed deadlines should be set at one year after the final rulemaking is published. The Federal Highway Administration (FHWA) commented that the dates of May 1, 1980 are almost impossible to meet because the proposal was published on April 1, 1980, and that the dates should be tied to ongoing work specified in the Overall Work Program (OWP).

Response: EPA is revising the dates as recommended by the South Coast AQMD, SCAG, and the ARB. However, EPA is extending certain dates recommended by these agencies so that there will be fewer deadlines. EPA is also making the dates consistent with the OWP, where possible.

Comment: The Western Oil and Gas Association (WOGA) commented that EPA should make every effort to allow State and local governments maximum flexibility in developing NAPs. WOGA further commented that EPA should not scrutinize the NAPs by a point-by-point

review, but should look at the NAP as a whole when determining compliance with the Clean Air Act.

Response: Throughout the NAP development process, EPA has encouraged State and local governments to initiate, study, develop, and adopt an attainment plan which reflects the unique characteristics of each nonattainment area. While the Clean Air Act allows for State and local governments to use unique approaches in satisfying NAP requirements, EPA does not have the flexibility to "trade-off" any of these requirements, because they all must be satisfied.

Comment: WOGA requested that EPA extend the public comment period.

Response: Prior to the May 1, 1980 deadline, the Regional Office contacted WOGA and informed them that all comments would be accepted until May 16, 1980. All the comments made during this period have been incorporated into this notice.

Comment: The Southern California Edison Company requested that a public hearing be held to provide a full examination of the actions taken by the ARB in submitting the NAP.

Response: A public hearing was held in January 1979, when the NAP was adopted by the South Coast AQMD and SCAG. The ARB held public hearings on April 26, 27, and 28, 1979. The NAP was adopted by the Board at a public hearing held on May 10, 1979. As a result, EPA believes that there has been adequate opportunity to orally comment on the NAP and that the requirements of Section 172(b) and 40 CFR 51.4 have been met.

Comment: The Urban Mass Transportation Administration (UMTA) commented that sub-regional plans (i.e., air quality plans prepared by a County) were apparently prepared by the four counties in the South Coast Air Basin and the City of Los Angeles, but were not made available for review nor effectively summarized in the NAP. They further commented that they must review these plans in order to provide informed comments on the NAP and its implications.

Response: EPA did not receive these plans with the NAP for the South Coast Air Basin. Therefore, these plans cannot be considered in EPA's evaluation of the NAP.

II. Comments on EPA's Criteria For Approval

1. Emission Inventory

Comment: The ARB stated that they disagreed with EPA's proposed conditions of approval which required that certain revisions be made to the CO, NO_x and PM emission inventories. The ARB stated that they are developing appropriate 1979 base year emission inventories for CO, NO_x and PM. The South Coast AQMD and SCAG agreed with EPA's proposed conditions.

Response: The 1979 base year emission inventories will satisfy the proposed conditions of approval concerning the submittal of an annual NO_x inventory, winter inventory for CO, and an inventory for PM which includes non-traditional emission sources.

Comment: The South Coast AQMD, SCAG, and the ARB commented that Tables VI–1 and VII–12 presented emission inventories that only include emissions from the South Coast Air Basin. The South Coast AQMD and SCAG also stated that no additional work should be done on the inventories in the 1979 NAP and that the conditions of approval concerning these inventories should be deleted. The ARB, however, also commented that they would submit an inventory that does not include emissions from Ventura County.

Response: While it appears that Tables V–1 and VII–12 included emissions from Ventura County, the 1979 base year inventories that will be submitted (see previous comment) can satisfy this condition of approval if the emissions from the South Coast Air Basin are specifically delineated.

Comment: WOGA commented that emissions from tankers and outer continental shelf (OCS) facilities should not be included in the emission inventories as proposed by EPA.

Response: EPA believes that emissions from OCS activities should be included in the inventories to improve the accuracy of the air quality analyses that will be conducted in the future.

2. Modeling

Comment: The ARB stated that the documentation and procedures needed to satisfy EPA's proposed condition of approval regarding ozone modeling is contained in the public hearing record.

Response: EPA has reviewed the information contained in the hearing record and concluded that it supports the hydrocarbon emission reduction estimate. EPA is therefore deleting this condition of approval.

Comment: The ARB commented that they will submit a revised modeling analysis for PM to satisfy EPA's proposed condition of approval concerning PM modeling. The South Coast AQMD and SCAG agreed with the proposed condition, but requested clarification from EPA on the input data required.

Response: As noted in the April 1, 1980 notice, an inventory which includes non-traditional source categories is necessary to use as input to the air quality model for PM. EPA has published many technical reports which provide emisson factors for non-traditional sources. Each factor specifies the input data needed for its emission calculation. With regard to secondary aerosols, emission inventories of the precursor pollutant emitting source categories need to be developed and used in the modeling. The simplest approach would be to assume that each precursor source contributes secondary aerosol to each downwind monitor in direct proportion to the level of secondary aerosol determined to be in the total suspended particulate (TSP) sample. Emission factors for each precursor source are also available in published EPA technical documents.

Comment: FHWA stated that the air quality base year in the modeling analyses must be consistent with the emissions inventory base year.

Response: Air quality concentrations are directly related to meteorological conditions as well as to the emission inventory. While meteorological conditions can vary considerably from year to year, the emission inventory is relatively stable. In order to account for this meteorological variability, it is not always appropriate to use the same base year air quality data and emission inventory data.

Comment: FHWA believes that it is not reasonable to require a state to submit a photochemical modeling analysis in the 1979 NAP. FHWA further commented that EPA should modify its statement concerning the State's use of an accurate photochemical model to assess the relationship between ozone and NO_x.

Responses: EPA did not require the State to submit a photochemical modeling analysis in the 1979 NAP. However, in the South Coast Air Basin, reductions in NO_x emissions are needed to attain the NO_2 NAAQS. Since NO_x emissions also affect ozone concentrations, EPA Region IX feels that a photochemical model is necessary to assess the relationship of VOC to NO_x in ozone formation, and to evaluate the effectiveness of varying degrees of VOC and NO_x controls.

3. Emission Reduction Estimates

Comment: The ARB, South Coast AQMD, and SCAG commented that they will submit revised emission reduction estimates for the pre-1982 stationary source and transportation control measures and thereby satisfy EPA's proposed condition of approval concerning emission reduction estimates.

Response: EPA believes that the ARB's submittal of the emission reduction estimates for the pre-1982 control measures will satisfy this proposed condition of approval.

Comment: The Southern California Edison Company believes that the NO_2 control strategy is misdirected. They believe that emphasis should be placed on controlling emissions from motor vehicles, rather than stationary sources, because they are the primary source of NO_x emissions in the South Coast Air Basin. The City of Newport Beach commented that the control of NO_x emissions from stationary sources is inadequate.

Response: As discussed in the April 1, 1980 notice and in today's notice, further air quality and emission reduction control strategy analyses are required as conditions of approval. These analyses will help identify the most effective control strategy for attaining the NO_2 and ozone NAAQS.

Comment: The Southern California Edison Company commented that Rule 475.1, "Controlling Emissions of Oxides of Nitrogen from Electric Power Generating Equipment" (submitted to EPA as Rule 1135.1) does not accurately reflect LAER nor best available control technology (BACT).

Response: The ARB has rescinded Rule 1135.1. Therefore, EPA cannot evaluate this rule. However, EPA cannot disapprove a rule because it is too stringent (See Section 116 of the Clean Air Act), and LAER and BACT refers to NSR and prevention of significant deterioration (PSD) provisions, respectively, while Rule 1135.1 is a rule for existing sources.

Comment: UMTA commented that the baseline data in the NAP reflect regional growth factors between 20%–35%, while the baseline transit system is projected to remain at the current level. UMTA feels that this constitutes a decrease in the level of transit service in view of the significant growth forecast. UMTA believes that the baseline assumption for transit should reflect service improvements between a "do nothing" situation and full RTP implementation.

Response: EPA agrees that the baseline assumption may not be appropriate. However, the assumption will be corrected in the 1982 NAP, which will discuss how the State and local agencies will use Federal, State, and local funds to implement public transportation programs to meet basic transportation needs.

Comment: UMTA stated that there was little documentation for control tactic H–13, "Trip Reduction Programs." UMTA further commented that they do not believe that this control tactic can reduce VMT by 5.8 percent.

Response: EPA has accepted this estimate for initial planning purposes, recognizing that a limited amount of data exist to make such an estimate. While EPA is approving this estimate, it should be noted that the Annual Reports submitted to EPA each year by the State will include verification of emission reductions by monitoring of transportation control measures and updated emission reduction estimates for the transportation control measures.

4. Attainment Provision

Comment: The ARB commented that the condition of approval concerning the inclusion of emissions from planned highway and freeway projects in the baseline inventory should be deleted for two reasons. First, it is not the intent of the State to preempt, preclude, or circumvent the federal process for determining consistency between the SIP and these projects. The identification and inclusion of these projects in the baseline inventory was to provide an estimate of the potential emissions which may require mitigation. Second, most of these projects have already moved through the federal approval process and have already been determined by FHWA to be consistent with the SIP.

SCAG and the Orange County Chapter of the Building Industry Association of Southern California, Inc. commented that EPA should agree that the baseline inventory documents SIP conformance for four reasons. First, the inclusion of these projects in the baseline inventory was an attempt to account for both mobility and air quality needs. Second, the emissions from these projects were mitigated by the control measures in the NAP and are therefore consistent with the SIP. Third, EPA staff has misinterpreted the status of the projects in that these measures are not placed in the same priority category as the transportation control measures. Fourth, their inclusion in the baseline inventory has removed SIP conformance as an issue that will unnecessarily block the implementation of these projects. FHWA commented that the air quality analyses included these projects and therefore their air quality impacts were considered. FHWA further commented that if the air quality analyses are found to be inadequate, they should be done over in the 1982 SIP revision.

Response: EPA agrees with the ARB in that the inclusion of these projects in the baseline inventory does not remove demonstration of SIP conformance as a necessary requirement. Therefore, based upon the ARB's clarification, EPA is deleting this condition of approval. Since the NAP does not demonstrate attainment, the claim that emissions from these projects have been mitigated is not acceptable. While EPA is deleting this as a condition of approval, a demonstration of SIP conformance remains a requirement for approval of any transportation project, program, or plan.

Comment: SCAG disagreed with EPA's statement that the NAP does not demonstrate a commitment to an emission reduction target for the transportation sector. SCAG stated that an emission reduction target is committed to in the NAP. The emission reduction target is the sum of all the adopted transportation control measures shown in Chapter IX. SCAG also stated that the local commitment is identified in Chapter I.

Response: EPA disagrees in that the NAP does not demonstrate attainment. Without such a demonstration, an acceptable target cannot be provided.

Comment: The ARB commented that the proposed condition of approval concerning the selection of a design value for PM should be deleted because additional study was necessary before either the annual geometric mean (AGM) or the 24-hour NAAQS could be projected to be attained.

The South Coast AQMD disagreed with this proposed condition of approval for three reasons. First, the Friedlander/Trijonis modified rollback model, which was used in the NAP, can only estimate reductions to meet the AGM NAAQS. Second, a simple linear rollback model is not appropriate for the South Coast Air Basin because a major portion of the PM concentration is aerosol. Third, there are no other PM air quality models that are valid or appropriate for the South Coast Air Basin.

Response: The selection of a design value does affect the projected attainment date, but only to the extent that it provides the means from which to calculate a first-order approximation for an emission reduction goal. It makes little difference whether a quantifiable amount of air quality improvement is achieved by eliminating the directly contributing PM or by eliminating a percentage of the precursor pollutant in proportion to the desired aerosol air quality improvement. In response to the South Coast AQMD's rationale: (1) the model used in the NAP is not an EPA approved model and any limitations inherent in its use are solely the responsibility of the user, (2) simple linear rollback can be adapted to TSP situations involving aerosol, and (3) EPA does not agree that "no other air quality models are valid or appropriate . . .;"

other models are appropriate for use and valid to varying degrees of accuracy within certain limitations.

Comment: The ARB commented that the proposed condition of approval regarding the submittal of a schedule and work program to study nontraditional control measures and a revised modeling work program for PM should be deleted in the final rulemaking notice. The ARB believes that this condition of approval should be deleted because they committed to study and adopt all measures found to be reasonably available and effective in reducing emissions from sources of precursors of secondary particulates. The ARB also provided a schedule that identifies the measures that will be studied and the time frame, and stated that they are developing a work plan that identifies the elements that will be submitted as part of the December 1981 SIP revision that will demonstrate attainment of the PM NAAQS.

Response: EPA disagrees and feels that a schedule and work program must be submitted. Further, EPA has determined that the schedule which identifies the non-traditional control measures that will be studied is adequate. However, the schedule must be submitted as an SIP revision. Therefore, to satisfy this condition of approval, the State must submit as an SIP revision the schedule and a revised modeling work program for PM.

Comment: The ARB commented that the date for submitting the material to satisfy the condition of approval regarding the estimation of the emission reduction needed to attain the NO_2 NAAQS should be extended at least 60 days beyond the final rulemaking notice. The South Coast AQMD commented that the material to satisfy this condition of approval should be submitted with the draft 1982 NAP.

Response: EPA has revised the deadline to May 20, 1981.

5. Reasonable Further Progress

Comment: The ARB commented that EPA should modify its comment on the annual reports because EPA/ARB guidance has been provided to the local agencies.

Response: The comment was modified in a letter dated February 29, 1980. This letter transmitted EPA's and the ARB's guidance on what is required to be contained in the Annual Reports to the South Coast AQMD and SCAG.

Comment: SCAG agreed with EPA's comments concerning the concept of a transportation monitoring program, but indicated that the date for a system to be in place should be submitted as part of the 1982 Annual Report.

Response: Although this is not a condition of approval, EPA policy requires that the transportation monitoring program be in place by 1980 as a basis for emission reduction credit and that the program be discussed in the 1980 Annual Report.

Comment: SCAG and the Orange County Chapter of the Building Industry Association of Southern California, Inc. commented that EPA should employ the criteria contained in the ARB resolution (79–27) for reviewing wastewater treatment facilities and not continue individual project review.

Response: Until the details of the air quality and water quality integration policy are reviewed and committed to by the implementing agencies and approved by EPA after public notice and review, the requirements of RFP concerning wastewater treatment facilities must be satisfied by individual project review. In addition, EPA's policy on Section 316 of the Clean Air Act was published on August 11, 1980 (45 FR 53382). This policy must also be followed in reviewing wastewater treatment facilities.

Comment: The South Coast AQMD commented that the proposed condition of approval requiring the submittal of a refined RFP assessment for non-traditional PM control measures should be deleted in the final rulemaking notice. The South Coast AQMD further commented that this information should be submitted in the draft 1982 NAP because no new information is currently available.

Response: This was not a condition of approval in the April 1, 1980 notice. However, based on the work being accomplished under the condition of approval in Criterion 4, "Attainment Provision," EPA feels that the next Annual Report must include a refined assessment of reasonable further progress for the PM non-traditional control measures.

6. Legally Adopted Measures

Comment: The ARB commented that all the applicable CTG Group I rules have been submitted as SIP revisions and therefore the major deficiency concerning the submittal of these rules has been corrected.

Response: EPA agrees and a discussion of these rules is contained in the April 1, 1980 notice, Supplemental Revisions section of this notice, and in EPA's Evaluation Report Addendum.

Comment: The ARB commented that EPA should structure its final rulemaking action such that the major deficiency is based solely on the failure of the State to submit evidence of legal authority to implement an I/M program and, upon correction of the major deficiency, the NAP could be automatically conditionally approved.

Response: EPA agrees that the only major deficiency remaining in the South Coast Air Basin NAP is the lack of legal authority to implement an I/M program. However, EPA believes that there must be an opportunity for public comment on the adequacy with respect to Part D of any I/M program authorized by the State before the NAP can be conditionally approved. Thus, the NAP cannot be automatically conditionally approved upon correction of the major deficiency.

Comment: The Sierra Club commented that the South Coast Air Basin NAP should not be approved until the legal authority to implement an I/M program has been provided by the State Legislature.

Response: EPA agrees.

Comment: WOGA believes that applying the construction prohibition to major sources which totally offset any emission increases goes beyond the requirements of the Act.

Response: This comment pertains to the question of which "sources" should be subject to the construction moratorium. This issue is addressed by EPA's regulations promulgated on August 7, 1980 (45 FR 52675), which define "source" for the purposes of the moratorium. Under those regulations, only significant net increases in emissions at a major source are covered by the moratorium. "Source" is defined as both an entire plant and a piece of process equipment. WOGA argues that EPA should look only at the entire plant. WOGA's comments therefore really go to EPA's August 7 rulemaking and not to EPA's proposal on the South Coast Air Basin NAP. In fact, similar comments were submitted when EPA proposed its definition of source on September 5, 1979 (44 FR 51924). EPA's rationale for its definition and its response to comments can be found at 45 FR 52696–98.

Comment: SCAG commented that they will continue to seek the general commitments from the responsible local jurisdictions to implement the six transportation control measures that are identified in the NAP to satisfy EPA's proposed condition of approval concerning the State's submittal of these commitments and schedules. SCAG further commented that the submittal of these commitments should be part of an ongoing Annual Reporting process. SCAG also stated that EPA must recognize the limits on local governments for providing legally enforceable schedules for an extended period.

Response: EPA feels that policy level commitments and schedules for implementation from the agencies and local jurisdictions responsible for implementing the six transportation control measures identified in the 1979 NAP must be submitted as SIP revisions to satisfy this condition of approval.

Comment: The South Coast AQMD and the ARB agreed with EPA's proposed condition of approval regarding the submittal of a schedule which identifies the dates that the non-CTG stationary source hydrocarbon control measures will be adopted and submitted to EPA. The South Coast AQMD and the ARB also commented that these measures will be adopted in accordance with the State-wide rule development schedule submitted to EPA with their public comments. The ARB also stated that this proposed condition of approval should be modified to (1) reflect that the schedules have been provided for most measures and (2) identify specifically the measures which EPA considers to have inadequate schedules.

Response: Because the State requested an extension of the attainment date to December 31, 1987, EPA feels that the schedule that was submitted satisfies this condition of approval. Therefore, the submittal of the schedule by the ARB satisfies the Part D requirements and the proposed condition of approval is being deleted.

Comment: The ARB commented that they are working with SCAG and the other transportation agencies to obtain the necessary commitments to evaluate and implement the transportation control measures contained in Section 108(f) of the Act that were not adopted in the 1979 NAP. SCAG commented that the Executive Committee and the South Coast AQMD Board committed to implement reasonably available control measures by 1982 and to study other measures for implementation after 1982. SCAG also commented that they cannot obtain commitments to implement further study measures as required by EPA until these measures are found to be "reasonable."

Response: EPA agrees that commitments for the further study measures should not be submitted at this time. The commitments and schedules for implementation must be submitted with the 1982 NAP for all measures found to be reasonably available between 1979 and 1982. Therefore, the condition of approval concerning the submittal of commitments to implement the further study measures is being deleted.

Comment: The ARB commented that the condition of approval regarding the submittal of a schedule to study non-traditional and secondary particulate control measures should be modified to (1) reflect that the schedules have been provided for most measures and (2) identify specifically which measures EPA considers to have inadequate schedules. The South Coast AQMD provided a schedule which identifies the dates by which the non-traditional control measures will be adopted. The South Coast AQMD also commented that additional measures will be adopted in accordance with the State-wide rule development schedule.

Response: EPA agrees that the schedule was provided by the ARB along with its comments on the April 1, 1980 notice. EPA has determined that this schedule will satisfy this condition of approval if it is submitted as an SIP revision.

Comment: The ARB commented that EPA's proposed condition of approval regarding the specific schedules for rule development and adoption of the NO_x control measures should be deleted for several reasons. First, Rule 1135.1, "Controlling Emissions of Oxides of Nitrogen from Electric Power Generating Equipment" submitted to EPA in April, 1980 will reduce NO_x emissions from power plants by approximately 90%. Second, schedules for the study of additional NO_x control measures have been established as part of the State-wide rule development schedule. Third, Table 18–3 of the NAP contains several measures identified for further study. Fourth, the ARB has committed to submit an SIP revision in 1981 that will demonstrate attainment of the NO_2 NAAQS by December 31, 1982.

Response: EPA agrees that the schedule was provided by the ARB along with its comments on the April 1, 1980 notice. EPA has reviewed this schedule and has determined that it is adequate. However, it must be submitted as an SIP revision to satisfy this condition of approval. Further, the ARB has requested EPA to delay its review of Rule 1135.1 until a rehearing is completed. EPA has delayed review, but notes that the Rule is still part of the control strategy in the NAP as submitted by the State.

Comment: UMTA commented that they could not conduct a thorough review of the NAP because no commitments for implementing the transportation control measures were included. UMTA further commented that they would like to review the commitments when they are submitted to EPA.

Response: These commitments will be available for review after they are submitted to EPA from the State in response to the conditions of approval.

Comment: Riverside County commented that they should not be penalized for not providing resolutions supporting the implementation of the six transportation control measures because they adopted the necessary resolutions. They further commented that no provision was made for review of sub-regional plans within the South Coast Air Basin.

Response: EPA can apply funding restrictions by geographic area if the NAP is disapproved because of the State's failure to satisfy Part D requirements. Because EPA did not receive the resolutions as part of the NAP, EPA cannot determine the adequacy of Riverside County's resolutions. Further, EPA must review the NAP for the South Coast Air Basin as a whole as submitted by the State and not by sub-region because sub-regional plans were not submitted by the State.

7. Emissions Growth

No comments were received.

8. Annual Reporting

No comments were received.

9. Permit Program

Comment: The ARB stated that EPA should be more specific in its final rulemaking notice with respect to identifying the deficiencies in the South Coast AQMD's NSR rules and how to correct the deficiencies.

Response: EPA's review of the NSR rules and the deficiencies found by EPA are summarized in the Supplemental Revisions section of this notice and are described in EPA's Evaluation Report Addendum.

Comment: Several commenters stated that the major deficiency concerning the submittal of legally adopted NSR rules has been corrected by the ARB's submittal of the South Coast AQMD's NSR rules.

Response: EPA agrees that the major deficiency concerning the submittal of legally adopted NSR rules for the South Coast AQMD has been corrected. EPA's evaluation of these rules is discussed in the Supplemental Revisions and EPA Actions sections of this notice.

Comment: The ARB commented that the deficiency cited by EPA (Number 2 in the April 1, 1980 notice) concerning the modeling requirement that oxides of sulfur (SO_x) PM, and CO show a net air quality benefit has been corrected because Regulation XIII allows offset credit without modeling only for sources of offsets located within a 5 mile radius of the new or modified source. (Note:

SO_x was inadvertently referred to in the April 1, 1980 notice.)

Response: EPA disagrees in that the 1 : 1.2 offset ratio will not provide a net air quality benefit in all cases within 5 miles of the new or modified source. The rules should be revised so that this determination will be based upon an air quality model or the State must demonstrate that this ratio will result in a net air quality benefit.

Comment: The ARB disagreed with EPA's statement that offsets must be made for the same pollutant. The ARB commented that a interprecursor offset should be acceptable when a decrease in one precursor can be shown to offset an increase in emissions of another precursor to the same pollutant so that the ambient levels of that pollutant do not increase.

The ARB further commented that (1) the South Coast AQMD's NSR rules are more restrictive than the draft rule in that it allows interprecursor offsets only for PM and only when the applicant demonstrates that reductions in directly emitted PM are not available, (2) this provision is based upon estimates calculated from air quality monitoring data, and (3) interprecursor offsets will result in a reduction of small particulates which will result in greater health and visibility benefits.

Response: EPA's offset guidance does not allow NO_x, SO_x, or hydrocarbon (HC) emissions to be used in lieu of PM offsets for a PM program. EPA interprets the rules to preclude such an occurrence and thus, based upon the ARB's three conditions, EPA feels that such offsets are warranted in this case.

WOGA and the Southern California Edison Company submitted several comments concerning EPA's review of the ARB's draft NSR rule for the South Coast AQMD. Each of the points raised and EPA's responses follow.

Comment: WOGA noted that since the South Coast AQMD's legally adopted NSR rule may differ substantially from the ARB's draft NSR rule, review of any other rule is meaningless.

Response: As discussed in the Supplemental Revisions and EPA ACTIONS sections, the South Coast AQMD's NSR rules differ significantly only with respect to certain requirements pertaining to emission calculations and offset provisions, which EPA is disapproving. Otherwise, EPA has found that the rules are similar and equivalent. Therefore, EPA's review of the draft rule was meaningful.

Comment: WOGA stated that EPA is ignoring the actual NSR rules adopted by the South Coast AQMD and is explicitly encouraging them to merely parrot the ARB, and not adopt rules adapted to their local needs.

Response: Prior to the time EPA published its notice of proposed rulemaking, the NSR rules had been adopted by the South Coast AQMD with the exception of a minor revision submitted to EPA on August 15, 1980. Thus, EPA's notice did not lead the South Coast AQMD to parrot the ARB's draft rule. In addition, the proposal clearly stated that it is EPA's policy to approve any NSR rules adopted by the South Coast AQMD that would meet the requirements of the January 16, 1979 Interpretative Ruling (44 FR 3274) or the criteria of the September 5, 1979 proposal (44 FR 51924). Therefore, the South Coast AQMD was provided the flexibility to adopt any NSR rules it chose, provided they satisfied either of EPA's two sets of criteria.

Comment: WOGA stated that in reviewing the South Coast AQMD's legally adopted NSR rules, EPA should look at the overall stringency of the rules, and not be concerned with a point-by-point check of isolated portions of the rules. WOGA also commented that EPA should consider that the ARB's draft rule is more stringent than EPA's criteria.

Response: EPA's policy regarding NSR programs allows states to develop rules which differ in some respects from EPA's criteria (44 FR 3280, January 16, 1979 and 44 FR 51924, September 5, 1979). EPA may approve such rules if the State submits a demonstration that the overall impact on emissions in the areas where the rules apply is at least as stringent as EPA's criteria. Since the State did not provide such a demonstration, EPA reviewed the South Coast AQMD's NSR rules by comparing them to both the January 16, 1979 and September 5, 1979 criteria.

Comment: WOGA argued that the ARB's requirement that a new onshore source offset emissions generated by associated tankers while they are loading, unloading, and operating on the outer shelf (OCS) constitutes regulation of such tankers and offshore facilities. This provision, according to WOGA, is beyond EPA, State, and local jurisdiction. In addition, WOGA cited two recent court cases, *California v. Kleppe*, 13 E.R.C. 1577 (9th Cir., August 2, 1979) and *California v. Exxon*, (U.S. District Court, Central District of California, No. 78-249 RMT, November 14, 1978), which held that neither EPA nor ARB have authority over sources on the OCS for the purpose of controlling air pollution.

Response: The ARB's draft NSR rule requires that a new *onshore* source offset emissions from tankers while they are operating on the OCS. Therefore, only the onshore source is regulated and the cases cited by WOGA are not applicable.

Comment: WOGA noted that a 1979 Court decision on EPA's regulations for Prevention of Significant Deterioration (PSD) of Air Quality affect EPA's NSR requirements for NAPs as well. WOGA stated that EPA should not require APCD's to adopt either (1) the September 5, 1979 regulations until they have been finalized or (2) "de minimis" significance levels until adequate scientific studies have been conducted.

Response: In the September 5, 1979 Proposal (44 FR 51924), EPA's views were presented on how the *Alabama Power* decision affects NSR requirements for NAPs. EPA also responded to WOGA's concerns in the May 13, 1980 (45 FR 31307) and August 7, 1980 (45 FR 52676) Federal Registers. Further, today's notice requires that the South Coast AQMD adopt rules that are consistent with EPA's final NSR requirements that were published on May 13, 1980 and August 7, 1980.

Comment: WOGA commented that the South Coast Air Basin is an attainment area for sulfur dioxide and therefore sulfur dioxide offsets should not be required as proposed by EPA in the April 1, 1980 notice.

Response: EPA inadvertently referred to sulfur dioxide in the April 1, 1980 notice.

Comment: WOGA noted that EPA objected to the provision in the draft rule which describes the areas in which offsets may be allowed. WOGA also noted that EPA indicated that EPA's criteria call for offsets to be made in the immediate vicinity of the site of increased emissions. WOGA commented that the draft rules' approach may be justified for site-specific pollutants (CO and PM), but that it is inappropriate for VOC and NO_x emissions which often do not form ozone or NO_2 until they are well away from the source.

Response: EPA agrees.

Comment: WOGA stated that EPA should disapprove the ARB's oxides of nitrogen (NO_x) offset requirement for ozone if EPA does not approve provisions allowing interpollutant offsets. WOGA further stated that EPA must disapprove this requirement because (1) EPA only requires VOC offsets as a precursor to ozone and (2) EPA's policy regarding the control of ozone is based in part on the belief that there is a substantial risk involved in controlling NO_x as a precursor to ozone. WOGA also submitted a modeling study for the Bay Area which showed that NO_x control would result in higher

ozone levels than would occur with a hydrocarbon only control strategy. The Southern California Edison Company commented that the ARB's definition of "precursors" is too broad and should be limited to NO as a precursor to NO_2 and VOC as a precursor to ozone.

Response: To meet the minimum Federal NSR requirements, only emissions of the nonattainment pollutants are subject to NSR requirements. For ozone, whose precursors are VOC and NO_x, federal requirements specify that, at a minimum, VOC emissions be offset. However, the State has the option of requiring offsets for NO_x in addition to VOC if they wish.

EPA's present policy requiring the control of ozone, as noted by WOGA, is based upon controlling VOC emissions. This strategy appears to reduce both maximum concentrations of ozone and area-wide exposure to ozone. The effectiveness of controlling NO_x emissions is not well known. The current research suggests that controlling NO_x will increase ozone concentrations near sources of NO, but this effect becomes less pronounced downwind. In addition, there is good reason to believe that a beneficial impact would be observed downwind and during multi-day stagnation periods if NO_x emissions were controlled. As a result, EPA is neither encouraging nor discouraging states to control NO_x as a precursor to ozone. However, EPA is recommending that states not ignore NO_x emissions growth and is encouraging that NO_x emissions remain at the same level, if possible. The ARB's requirement of NO_x offsets essentially accomplishes this in that it will help keep NO_x emissions at the same level.

In addition, the modeling study submitted by WOGA for the Bay Area is inconclusive in that it does not address the effect of controlling NO_x emissions on ozone concentrations downwind of the Bay Area or the effect of multi-day stagnation periods.

Comment: WOGA stated that the public should be given the opportunity to comment on EPA's evaluation of the South Coast AQMD's legally adopted NSR rules, and that failure to allow an opportunity to comment on these rules would be a violation of the Administrative Procedure Act.

Response: As stated in the SUPPLEMENTAL REVISIONS section, EPA has determined that the South Coast AQMD's NSR rules are similar and equivalent to the ARB's draft rule and Section 173 of the Act, with the exception of certain requirements pertaining to emission calculations and offset provisions. Since these requirements in the South Coast AQMD's NSR rules are not consistent with Section 173, EPA must disapprove them. As a result, the NSR rules being conditionally approved in this notice are similar and equivalent to the ARB's draft rule which are discussed in the April 1, 1980 notice. Therefore, EPA feels that the public has been provided adequate opportunity to comment on the approvability of the South Coast AQMD's NSR rules through EPA's evaluation and notice of proposed rulemaking on the ARB's draft rule.

Comment: The Southern California Edison Company commented that an exemption is needed for subparagraph B.4. of the draft rule to allow minor modifications to be made to obtain a marginal increase in the capacity of an electric generating unit. According to Southern California Edison, this is needed to forestall the building of new generating facilities where the BACT requirements would render the increase in capacity infeasible.

Response: EPA policy allows exemptions only for minor modifications where the increase in emissions is below EPA's "de minimis" levels (See August 7, 1980, 45 FR 52676).

Comment: The Southern California Edison Company believes that sections C and D of the draft rule should be completely revised because the requirements reflected in these provisions go beyond the intent of the Clean Air Act.

Response: The State's draft rule and Regulation XIII of the South Coast AQMD each contain provisions which are both more and less stringent then EPA's criteria. The rules must be corrected in those cases where it is less stringent, and Section 116 of the Clean Air Act allows the State to adopt more stringent regulations. Further, the State's draft rule and Regulation XIII serve not only as an NSR regulation but also as a control measure to attain the NAAQS. Therefore, Sections C and D of the State's draft rule are consistent with the overall intent of the Clean Air Act.

Comment: The Southern California Edision Company commented that the maximum impact of a new or modified facility should be based on the emission rates achieved at maximum designed capacity *or demonstrated capacity, whichever is greater.* Southern California Edison further commented that the emission offset requirements should be determined on the basis of annual average emissions because it is impossible to mitigate the impact of a new source upon pollutant concentrations under varying conditions as the draft rule attempts to do. They also commented that annual average emissions should be used because the net air quality benefit of emission changes can be considered "on balance" for the area affected by the source.

Response: EPA can only approve or disapprove revisions submitted by the State. EPA is approving the approach used in Regulation XIII because the impact of a new or modified source is based upon the emission rates achieved at maximum design capacity and because this approach is consistent with the Clean Air Act. Further, EPA feels that the approach taken by both the draft rule and Regulation XIII of mitigating seasonal emissions is better than using annual emissions.

Comment: The Southern California Edison Company commented that where more than one source is owned by an applicant, the effect of a new or modified source on emissions from the existing sources should be considered in determining offset requirements. They noted that this is particularly true for electric utilities, where the effect of operation of a new unit will have an immediate effect on the operation of and the emissions from all other units on the system. For this reason, they believe that section D.2.a.1. of the draft rule should be revised so that emission offset requirements are based on changes in basin-wide emissions for each basin within the system from the 3-year period to the in-service date and not the date of application. They further commented that if the new unit results in an emission reduction because of better controls, offsets should not be required until the years when system load increases to the point where the emissions from the electric generating system were projected to be above the base period for the air basin.

Response: Section D.2.a.1. of the draft rule refers to air quality and not establishing an emissions baseline. However, EPA cannot approve an approach such as the one recommended by Southern California Edision because EPA's criteria specifies that the emission baseline should be determined by using emissions data from one to two years prior to the date of application (See August 7, 1980, 45 FR 52676, 40 CFR 51.18(j)(1)(vii) and (xv)).

Comment: The Southern California Edison Company commented that emission offsets should not be restricted to 15 miles, and arbitrary offset ratios should not be included as requirements in the draft rule. They further commented that such ratios should be determined on a case-by-case basis, and there may very well be justifiable reasons where a 10% reduction in emissions would be more than adequate.

Response: Offsets are not restricted to 15 miles in either the draft rule or

Regulation XIII. In the draft rule when offsets are obtained outside of 15 miles the applicant shall conduct a modeling analysis to determine an offset ratio sufficient to show a net air quality benefit in the area affected by emissions from the new source or modification. For ozone and NO_2, Regulation XIII requires the ratio to be increased as the distance increases from the source. This approach is consistent with EPA's criteria. For CO and PM, EPA requires a case-by-case demonstration that offsets will provide a net air quality benefit. To the extent that Regulation XIII does so it is approvable.

Comment: The City of Newport Beach objected to the offset provision in the draft rule because there is no requirement that offsets be obtained directly upwind of a source.

Response: The NSR rules that were adopted by the South Coast AQMD are being conditionally approved. One of the conditions of approval is that the rules be revised to require that a net air quality benefit be obtained for ozone, CO, NO_2, and PM before a new source is built. For CO and PM, this net air quality benefit is based upon modeling. However, EPA allows offsets for VOC and NO_x emissions to be obtained within a broad area because area-wide ozone and NO_2 levels are generally not as dependent on specific VOC or NO_x source locations as they are on overall areawide emissions.

Comment: The Southern California Edison Company commented that the emission offset bank for electric utilities should not be site specific, but should be at least a basin-wide bank.

Response: Regulation XIII does not contain a banking provision.

Comment: The Southern California Edison Company stated that provisions for power plant siting are assigned to the Energy Commission by the Warren-Alquist Act and therefore the State and the South Coast AQMD should only serve as a reviewing agency for compliance with their rules and regulations.

Response: In the development of Regulation XIII, the ARB, South Coast AQMD, and the Energy Commission together established procedures for reviewing power plants. These procedures are consistent with the Warren-Alquist Act.

Comment: The Southern California Edison Company commented that the ARB uses BACT for its definition of LAER and this creates a confusing situation. Southern California Edison further commented that the definition of "stationary source" is *too* broad and should be made consistent with the Act.

Response: Although the definitions are somewhat different, EPA does not require the State to use identical wording. However, the definitions of BACT and "stationary source" in Regulation XIII are not fully consistent with the Act. Therefore, the State must correct these deficiencies.

Comment: The Southern California Edison Company commented that Section I.1.a. of the draft rule should be clarified to prevent requiring unproven emission control techniques when the LAER determination is made and that Section I.1.b. should be deleted as unnecessary given Section I.1.a.

Response: EPA feels that Section I.1.a. of the draft rule would not result in the application of unproven emission control techniques because the applicant is involved with negotiations when the LAER determination is made. Further, this points was clarified in Regulation XIII, which states that a specific control technique shall not apply if the owner or operator of the proposed source demonstrates to the satisfaction of the Executive Officer that such control techniques are not available. EPA also feels that Section I.1.b. is necessary because new information may be found which will result in a new LAER determination.

10. Resources

Comment: The ARB commented that the condition of approval requesting information identifying (1) the personnel and financial resources needed to implement the control measures and (2) the commitments which identify the resources necessary for implementation of the NAP should be deleted. The ARB requested that this condition of approval be deleted because it is not legally possible for California agencies to commit to multi-year budget commitments. The ARB commented that EPA's concerns regarding this issue can be addressed in the Annual Reports. SCAG also commented that resolutions which demonstrate commitments made by the major implementing agencies for the individual transportation control measures were submitted to the ARB on August 31, 1979.

Response: EPA agrees that it is not legally possible for California to provide multi-year budget commitments. Therefore, the identification of necessary resource commitments for implementation of the NAP for the future year as well as the South Coast AQMD and ARB identification of the personnel and financial resources needed to implement the control measures for the future year must be submitted by the State to EPA when the local budgets are adopted. The NAP must include a commitment to provide this information annually.

Comment: UMTA commented that attainment of the NAAQS will apparently require transportation control measures which will result in a funding shortfall. UMTA further commented that their analysis of the funding sources for the transportation control measures was hampered by the lack of any specific indication of the funding sources being considered.

Response: Because the NAP must provide reasonable assurances for implementation, the State and local agencies must obtain the necessary commitments and sources of funding, or new measures with more realistic assurances of funding must be developed. The funding sources for the transportation control measures will be provided with the commitments from the local agencies that will implement the transportation control measures. When the State submits this material in response to the conditions of approval, EPA will provide UMTA with a copy and request additional comments at that time.

11. Public and Government Involvement

No comments were received.

12. Public Hearing

No comments were received.

13. Extension Requirements

Comment: The ARB commented that the condition of approval regarding the submittal of the relevant portions of CEQA should be deleted in the final rulemaking because they have been submitted.

Response: As discussed in the SUPPLEMENTAL REVISIONS section, the CEQA provisions have been submitted by the State and they satisfy the Clean Air Act requirements providing for an analysis of alternative sites, sizes, processes, and controls which demonstrate that the benefits of the facility outweigh the environmental costs. Therefore, this condition is being deleted.

Comment: SCAG commented that EPA's proposed condition of approval requiring the submittal of a commitment to use federal grants and state and local funds as necessary to meet basic transportation needs has been substantially satisfied and that additional commitments should not be required until the plan to meet basic transportation needs is developed and adopted.

Response: EPA feels the existing commitments satisfy the requirements for the 1979 NAP for a commitment to meet basic transportation needs.

Comment: The ARB commented that the proposed condition of approval regarding the prioritization of federal funds for highway projects should be deleted. The ARB believes that this condition of approval should be deleted because (1) it is not the State's intent in submitting the NAP to reject the requirements of Section 176(d), (2) the policy of programming 50% of available funds for "air quality measures" constitutes a conceptual response to the requirements of Section 176(d), and (3) this issue should be directed toward the federally required transportation planning process and not the subject of a condition of approval on 1979 NAP.

SCAG commented that this condition of approval should be deleted because (1) this policy was adopted as a commitment to implement the transportation control measures in the NAP, (2) the transportation control measures contained in the NAP are given top priority in the programming policies and (3) the procedures and criteria adequately address the Section 176(d) procedures.

FHWA disagreed with EPA's critique of SCAG's programming an equal proportion of funding of "air quality projects" and "capital highway projects" as not meeting the prioritization requirement.

Response: EPA believes that the policy contained in the NAP may be in potential conflict with Section 176(d). Further, EPA feels that no commitment was adopted as part of the NAP which will ensure continued compliance with Section 176(d). Consequently, there is no assurance that priority will be given to the implementation of the transportation control measures. Also, EPA did not critique SCAG's programming an equal proportion of funding of "air quality projects" and "capital highway projects" because they were not included in the NAP as submitted by the ARB. This provision was developed at a later date and it has not been submitted to EPA as an SIP revision. Therefore, to satisfy this condition of approval, the State must submit SCAG's greater weight and equal proportion programming policy and procedures as they relate to prioritization and funding of "air quality projects" and "capital highway projects" and justification that the NAP provisions are consistent with Section 176(d) of the Clean Air Act.

Comment: SCAG commented that the procedures to ensure that priority be given to projects in the Transportation Improvement Plan (TIP) which have air quality benefits have been submitted.

Response: EPA agrees that SCAG has submitted draft procedures to EPA. However, these procedures must be submitted as an SIP revision in order to meet the requirements of the condition of approval concerning this issue.

14. Extension requirements for VOC RACT

Comment: The ARB commented that EPA's proposed condition of approval regarding exemptions from the Stage I Gasoline Vapor Recovery rule should be deleted in the final rulemaking because the cost of retrofitting the exempted tanks is prohibitive.

Response: EPA agrees.

Comment: The Can Manufacturers Institute commented that the ARB's model rule emission limitations for can manufacturing do not reflect current or near future RACT for the can coating industry. The Can Manufacturer's Institute recommended that EPA adopt Rule 1125 of the South Coast AQMD rather than the ARB's model rule.

Response: As discussed in the SUPPLEMENTAL REVISIONS section, Rule 1125 meets EPA's RACT requirements for can coating. Therefore, EPA is approving Rule 1125 of the South Coast AQMD.

National Comments

One commenter submitted extensive comments and requested that they be considered part of the record for each state plan. Another commenter, a national environmental group, discussed EPA's action on permit fee systems and the composition of state boards. Although some of the issues raised are not relevant to provisions in the South Coast Air Basin NAP, the November 10, 1980 Federal Register (45 FR 74480) should be referred to for a discussion of these comments and EPA's responses.

EPA Actions

Introduction

It is important for reviewers of this notice to understand the overall nature of NAPs and of EPA's review and approval role. Central to such an understanding is recognition that action may be taken on a portion of the NAP for a specific pollutant. Therefore, a portion of the NAP may be adequate for one pollutant but inadequate for others. It is EPA's policy to take final action on all portions of the NAP for each pollutant. As a result, this notice contains a series of actions for each pollutant and for each portion of the NAP rather than a single action. The following three actions are taken for each portion of the NAP:

1. Disapproval where the State does not agree to correct minor deficiencies or where deficiencies are of such magnitude as to significantly interfere with the basic objective; or

2. Approval where the portion of the NAP under consideration meets all requirements;

3. Approval with conditions where deficiencies exist, but where the effect of the deficiency is not judged to be major and where the State has agreed to take those steps necessary to correct the deficiency. In this case, it is EPA's intent that the State proceed expeditiously to correct the noted deficiency by certain dates.

EPA's final action on each portion of the NAP for each pollutant is based upon the proposed rulemaking notice, supplemental revisions submitted by the State, and public comments received by EPA. Each action is described below.

Disapproved Portions of the NAP

As proposed in the April 1, 1980 notice and as discussed in the BACKGROUND and PUBLIC COMMENTS sections of this notice, EPA has determined that the legally adopted measures/schedules for I/M and the extension requirements for I/M portions of the NAP for ozone and CO cannot be approved because of the State's failure to submit the necessary legal authority along with schedules and commitments to implement and enforce an I/M program. Therefore, EPA takes final action under Part D of the Clean Air Act to disapprove these two portions of the NAP for ozone and CO.

Approved Portions of the NAP

As proposed in the April 1, 1980 notice and as discussed in the Background and Public Comments sections of this notice, EPA has determined that the reasonable further progress, emissions growth, annual reporting, public and governmental involvement and public hearing portions of the NAP for ozone, CO, NO_2 and PM are consistent with the Part D requirements. Therefore, EPA takes final action under Part D to approve these portions of the NAP.

In addition, without legal authority to implement and enforce an I/M program, the NAP cannot demonstrate reasonable further progress for ozone and CO through 1987. However, at this time there is no point in disapproving the reasonable further progress portion of the NAP for ozone and CO since the key deficiency, the I/M portion of the NAP, is disapproved and causes disapproval of the overall NAP for ozone and CO. Once I/M legislation is passed, the State would be able to demonstrate reasonable further progress and the NAP could be approved. Therefore, EPA is approving the reasonable further progress portion of the NAP.

As proposed in the April 1, 1980 notice, EPA is taking final action under Section 110 of the Clean Air Act to approve Rule 461 (VOC rule) because it strengthens existing requirements. Also as proposed, EPA is taking final action under Section 110 and Part D to approve Rules 461, 462, 1104, 1115, and 1126 (VOC rules) because they satisfy the requirements for RACT.

The State did not officially submit nine VOC rules with the NAP in July 1979, but they did submit their model VOC rules and requested EPA to review them. As described in the April 1, 1980 notice, EPA reviewed these model rules, determined that they contained only minor deficiencies, stated that the NAP could be conditionally approved upon submittal of rules similar and equivalent to the model rules, and provided an opportunity for public comment on these actions. As stated in the SUPPLEMENTAL REVISIONS section, EPA has found that the South Coast AQMD's rules are (1) similar and equivalent to the State's model rules and (2) satisfy the RACT requirements of Part D. Therefore, EPA is taking final action under Section 110 and Part D to approve Rules 464, 465, 1107, 1108, 1108.1, 1122, 1123, 1125 and 1128 because they strengthen existing SIP requirements and satisfy the RACT requirements of Part D.

Conditionally Approved Portions of the NAP

Although the State did not officially submit the NSR rules with the NAP in July 1979, the State did submit their draft NSR rule and requested EPA to review this rule. As described in the April 1, 1980 notice, EPA reviewed the draft rule, determined that it contained only minor deficiencies with respect to Section 173, stated that the NAP could be conditionally approved upon submittal of an NSR rule similar and equivalent to the draft rule, and provided an opportunity for public comment on these actions. As stated in the SUPPLEMENTAL REVISIONS and PUBLIC COMMENTS sections, EPA has found that the South Coast AQMD's NSR rules (1) are similar and equivalent to the State's draft rule and (2) contain only minor deficiencies with respect to Section 173, with the exception of certain deficiencies pertaining to emission calculations and offset provisions. Further, EPA found that a NAP containing these deficiencies cannot be approved or conditionally approved. Therefore, EPA disapproves those provisions in the NSR rules that contain these deficiencies. As a result, the South Coast AQMD's NSR rules are conditionally approvable with respect to Section 173 and contain only insignificant differences which tend to make the rules more stringent, than the model rule, and since the rules which are being conditionally approved are similar and equivalent to the draft rule which was subject to public comment and since the effect of the conditional approval will be to lift the construction prohibition for PM and NO_x sources, EPA finds that good cause exists for taking action on the South Coast AQMD's NSR rules without additional comment on those rules (See 5 U.S.C. Section 553(b)(B), Administrative Procedure Act). Further, new rules will be submitted by May 7, 1981 which will be subject to notice and comment. Therefore, EPA takes final action to conditionally approve the South Coast AQMD's NSR rules (permit program portion of the NAP) with the exception of the provisions noted above which are disapproved.

The State, South Coast AQMD, and SCAG have assured EPA that they will submit the material to correct the minor deficiencies noted in the April 1, 1980 notice and discussed in the PUBLIC COMMENTS section of this notice. EPA therefore takes final action to conditionally approve the following portions of the South Coast Air Basin NAP:

1. For ozone, CO, PM, and NO_x, emission inventory, emission reduction estimates, attainment provision, permit program, and resources.
2. For ozone and CO, legally adopted measures and extension requirements.
3. For ozone, extension requirements for VOC RACT.
4. For PM, modeling.

To correct the minor deficiencies, the State must submit the following material as SIP revisions by the following dates:

New Source Review

1. By May 7, 1981, NSR rules must be revised and submitted as an SIP revision. The rules must satisfy Section 173 and 40 CFR 51.18, "Review of new sources and modifications." In revising the South Coast AQMD's NSR rules, the State/AQMD must address (1) any new requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the AQMD rules do not currently satisfy and (2) those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in Document File NAP–CA–9 at the EPA library in Washington D.C. and the Region IX Office).

Resources

1. By May 20, 1981, a commitment to submit annual implementing agency fiscal and personnel commitments to implement the South Coast Air Basin NAP.

Ozone and Carbon Monoxide

1. By May 20, 1981, a refined emission inventory for the South Coast Air Basin for (1) CO which is based upon winter emissions and (2) for VOC.
2. By May 20, 1981, revised emission reduction estimates for each year for the adopted control measures which are based upon the refined emission inventories.
3. By May 20, 1981, a schedule for the submittal of the revised emission reduction estimates for the pre-1982 control measures that are not yet adopted.
4. By May 20, 1981. Written evidence of local adoption of legally enforceable commitments and implementation schedules consistent with reasonable further progress for the six transportation control measures presently found to be reasonable.
5. By May 20, 1981. A schedule to analyze alternative packages of transportation control measures, including but not limited to those measures listed in Section 108(f)(1)(A) of the Clean Air Act.
6. By May 20, 1981. The Southern California Association of Governments (SCAG) greater weight and equal proportion programming policy and procedures as they relate to prioritization and funding of "air quality projects" and "Highway Projects" and justification that the NAP provisions are consistent with Section 176(d) of the Clean Air Act.

Particulate Matter

1. By December 31, 1981, a refined emission inventory which includes estimates of emissions from traditional and nontraditional (fugitive dust) sources for the South Coast Air Basin.
2. By December 31, 1981, documentation for the PM design value used to determine the allowable PM emission level, and a modeling analysis using the new emissions inventory data which shows the emission reductions necessary to provide for attainment of the PM NAAQS by December 31, 1982.
3. By December 31, 1981, revised emission reduction estimates per control measure for each year which are based upon the revised emission inventory.
4. By May 20, 1981. A work program for modeling, a commitment and schedule to study and adopt nontraditional PM control measures,

and a commitment to implement those control measures necessary to provide for attainment.

Nitrogen Dioxide

1. By May 20, 1981. An annual average emission inventory for the South Coast Air Basin.

2. By May 20, 1981. The results of an air quality analysis giving a preliminary quantification of the total emission reductions needed to attain the NO_2 NAAQS.

3. By May 20, 1981. Revised emission reduction estimates for each year which are based upon the revised emission inventory for the control measures that are adopted.

4. By May 20, 1981. A schedule and work program for the submittal of a detailed air quality analysis giving the final quantification of the needed emission reductions needed to attain the NO_2 NAAQS.

5. By May 20, 1981. A commitment and schedule to develop and adopt NO_2 control measures and a commitment to implement those control measures necessary to provide for attainment.

Final Action of the NAP

Since the major deficiency concerning I/M has not been corrected, EPA is taking final action to disapprove the NAP for ozone and CO. This action continues the construction prohibition for these two pollutants.

Since the major deficiencies noted in the April 1, 1980 notice for NO_2 and PM have been corrected and only minor deficiencies remain, EPA is taking final action to conditionally approve the NAP for PM and NO_2. As a result, the current prohibition on construction of certain major new or modified sources in the South Coast Air Basin is no longer in effect for NO_2 and PM sources.

In those areas for which the State of California has submitted approvable or conditionally approvable NAPs in accordance with the requirements of Part D of the Clean Air Act, EPA has a responsibility to take final action as soon as possible in order to lift the construction prohibition. Since the NO_2 and PM portions of the NAP are conditionally approvable for the South Coast Air Basin, EPA finds that good cause exists for making this action immediately effective. Under Section 307(b)(1) of the Clean Air Act, judicial review of today's final action is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Conditional Approval Procedure

A discussion of conditional approval and its practical effect appears in two supplements to the General Preamble (44 FR 38583, July 2, 1979 and 44 FR 67192, November 23, 1979). Conditional approval of the NAP requires the State to submit additional meterial by the deadlines specified in today's notice. There will be no extensions granted to the condition of approval deadlines being promulgated today. EPA will follow the procedures described below when determining if the State has satisfied the conditions.

1. If the State submits the required additional documentation according to schedule, EPA will publish a notice in the Federal Register announcing receipt of the material. EPA will also announce that the conditional approval is continued pending EPA's final action on the submittal.

2. EPA will evaluate the State's submittal to determine if the conditions are fully met. After EPA's review is completed, a Federal Register notice will be published proposing to either (1) find the conditions have been met and approve the submittal or (2) find the conditions have not been met and disapprove the submittal. If the submittal is disapproved, the Section 110(a)(2)(I) prohibitions on construction would be effective.

3. If the State fails to submit the required materials to meet a condition, EPA will publish a Federal Register notice shortly after the expiration of time limit for the submittal. The notice will announce that the conditional approval is withdrawn, the NAP is disapproved, and the Section 110(a)(2)(I) prohibition on construction is in effect.

Certain deadlines for satisfying conditions have been changed from those proposed and are being promulgated today without further notice and comment. EPA finds that for good cause additional notice and comment on these deadlines are unnecessary (see 5 U.S.C. Section 553(b)(B), Administrative Procedure Act). The State is the party responsible for meeting the deadlines and the State has agreed to the deadlines. In addition, the public has had an opportunity to comment generally on the concept of conditional approval and on what deadlines should apply for these conditions (44 FR 38583, July 2, 1979 and 45 FR 21271, April 1, 1980).

40 CFR Part 52 Rescissions

EPA is taking final action to rescind certain federally promulgated regulations from 40 CFR Part 52 as proposed. No supplemental revisions or public comments addressed EPA's proposed rescissions.

VOC RACT Requirements

The April 4, 1979 General Preamble (44 FR 20376) requires agencies to submit VOC RACT regulations for certain sources located in ozone nonattainment areas. The first set of RACT regulations were required for sources covered by the Group I CTG documents published before January 1978. Regulations for sources covered by the Group I documents were to have been submitted by January 1, 1979. A second set of RACT regulations are required for sources covered by the GROUP II CTG documents, published between January 1978 and January 1979. Regulations for sources covered by the Group II documents were to have been submitted by January 1, 1981 (45 FR 78121, November 5, 1980). Regulations must be submitted in order for the Part D requirements of the ozone portion of the South Coast Air Basin NAP to be fully approvable. Further, these requirements have been set forth in 40 CFR 52.223.

Attainment Dates

The 1979 edition of 40 CFR Part 52 lists, in the Subpart for California, the applicable deadlines for attaining the NAAQS (attainment dates) required by Section 110(a)(2)(A) of the Act. For each nonattainment area where a NAP provides for attainment by the deadlines required by Section 172(a) of the Act, the new deadlines are substituted on California's attainment date chart in 40 CFR Part 52. The earlier attainment dates will be referenced in a footnote to the chart. Sources subject to plan requirements and deadlines established under Section 110(a)(2)(A) prior to the 1977 Amendments remain obligated to comply with those requirements, as well as the new Section 172 requirements. Congress established new attainment dates under Section 172(a) to provide additional time for previously regulated sources to comply with new, more stringent requirements, and to permit previously uncontrolled sources to comply with the newly applicable emission limitations. These new deadlines were not included to give sources that failed to comply with pre-1977 plan requirements by the earlier deadlines more time to comply with those requirements. As noted by

Congressman Paul Rogers in discussing the 1977 Amendments.

Section 110(a)(2) of the Act made clear that each source had to meet its emission limits "as expeditiously as practicable," but not later than three years after approval of a plan. This provision was not changed by the 1977 Amendments.

It would be a perversion of clear Congressional intent to construe Part D to authorize relaxation or delay of emission limits for particular sources. The added time for attainment of the National Ambient Air Quality Standards was provided, if necessary, because of the need to tighten emission limits or bring previously uncontrolled sources under control. Delays or relaxation of emission limits were not generally authorized or intended under Part D (123 Cong. Rec. H 11958, daily ed. November 1, 1977).

To implement Congress' intention that sources remain subject to pre-existing plan requirements, sources cannot be granted variances extending compliance dates beyond the attainment dates established prior to the 1977 Amendments. EPA cannot approve such compliance date extensions, even though a NAP with a later attainment date has been approved. However, a compliance date extension beyond a pre-existing attainment date may be granted if it will not contribute to a violation of an ambient standard or a PSD increment (44 FR 20373–74, April 4, 1979).

In addition, sources subject to pre-existing plan requirements may be relieved of complying with such requirements if a NAP imposes new, more stringent control requirements that are incompatible with controls required to meet the pre-existing regulations. Decisions on the incompatibility of requirements will be made on a case-by-case basis.

Note.—EPA has determined that this action is "specialized," and therefore not subject to the procedural requirements of Executive Order 12044.

Authority: Sections 110, 129, 171–178, and 301(a) of the Clean Air Act, as amended [42 U.S.C. 7410, 7429, 7501–7508, and 7601(a)].

Dated: January 12, 1981.

Douglas M. Costle,

Administrator.

Note.—Incorporation by reference of the State Implementation Plan for the State of California was approved by the Director of the Federal Register on July 1, 1980.

Subpart F of Part 52 of Chapter I of Title 40 of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c) is amended by adding subparagraphs (47)(i)(B), (58)(ii), (63), (65), (66), (67), (68), (69,) and (70), as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(47) * * *

(i) * * *

(B) New or amended rules 462, 481, and 1104.

(58) * * *

(ii) South Coast AQMD.

(A) New or amended Rules 1107, 1108, 1108.1 and 1128.

* * * * *

(63) The following portions of the *California Environmental Quality Act* submitted on October 20, 1980, by the Governor's designee: Sections 21000; 21001; 21002; 21002.1; 21061; 21063; 21065; 21080.1; 21080.4; 21080.5 (a), (b), (c) and (d); 21081; 21082; 21100; 21104; 21151; 21153; 21160.

* * * * *

(65) The *South Coast Air Basin Control Strategy* (Chapter 18 of the Comprehensive Revision to the State of California Implementation Plan for the Attainment and Maintenance of Ambient Air Quality Standards), submitted on July 25, 1979 by the Governor's designee. Those portions of the *South Coast Air Basin Control Strategy* identified by Table 18–1, "Location of Plan Elements Which Meet Clean Air Act Requirements," together with Rules 1115 and 1126, comprise the submitted nonattainment area plan control strategy. The remaining portions are for informational purposes only.

(66) Revised regulations for the following APCD's, submitted on February 7, 1980, by the Governor's designee.

(i) South Coast AQMD.

(A) New or amended Rule 461.

(67) Revised regulations for the following APCD's, submitted on April 2, 1980, by the Governor's designee.

(i) South Coast AQMD.

(A) New or amended Rule 1122.

(68) Revised regulations for the South Coast AQMD, submitted on April 3, 1980, by the Governor's designee.

(i) New or amended Rules 1301, 1303, 1304, 1305, 1306, 1307, 1310, 1311, and 1313.

(69) Revised regulations for the South Coast AQMD submitted on April 23, 1980, by the Governor's designee.

(i) New or amended Rules 464, 465, 1123, and 1125.

(70) Revised regulations for the following APCD's submitted on August 15, 1980, by the Governor's designee.

(i) South Coast AQMD.

(A) New or amended Rules 1302 and 1308.

2. Section 52.222 is amended by adding subparagraph (b)(2), and removing and reserving paragraph (c), as follows:

§ 52.222 Extensions.

* * * * *

(b) * * *

(2) South Coast Air Basin for NO_2 and particulate matter (PM).

(c) [Reserved].

* * * * *

3. Section 52.223 is amended by adding subparagraphs (b)(3), (c), and (c)(1) as follows:

§ 52.223 Approval status.

* * * * *

(b) * * *

(3) South Coast Air Basin for NO_2 and PM.

* * * * *

(c) The Administrator finds that the plan does not satisfy all the requirements of Part D, Title I of the Clean Air Act as amended in 1977, for the nonattainment areas listed in this paragraph.

(1) South Coast Air Basin for ozone and CO.

4. In § 52.229, paragraph (a) is removed and reserved.

5. Section 52.223 is amended by adding subparagraph (a)(3), as follows:

§ 52.232 Part D conditional approval.

(a) * * *

(3) *The South Coast Air Basin portion of the California SIP.* The following material must be submitted as SIP revisions by the following dates.

(i) For ozone, CO, NO_2 and PM:

(A) By May 7, 1981, the NSR rules must be revised and submitted as an SIP revision. The rules must satisfy Section 173 of the Clean Air Act and 40 CFR 51.18, "Review of new sources and modifications." In revising the South Coast AQMD's NSR rules, the State/AQMD must address (1) any new requirements in EPA's amended regulations for NSR (45 FR 31307, May 13, 1980 and 45 FR 52676, August 7, 1980) which the AQMD rules do not currently satisfy and (2) those deficiencies cited in EPA's Evaluation Report Addendum which still apply despite EPA's new NSR requirements (contained in Document File NAP–CA–9 at the EPA Library in Washington, D.C. and the Regional Office).

(B) By May 20, 1981. A commitment to submit annual implementing agency fiscal and personnel commitments to implement the South Coast Air Basin NAP.

(ii) For ozone and CO:

(A) By May 20, 1981. A refined emission inventory for the South Coast

Air Basin for (1) CO which is based upon winter emissions and (2) for VOC.

(B) By May 20, 1981. Revised emission reduction estimates for each year for the adopted control measures which are based upon the refined emission inventories.

(C) By May 20, 1981. A schedule for the submittal of the revised emission reduction estimates for the pre-1982 control measures that are not yet adopted.

(D) By May 20, 1981. Written evidence of local adoption of legally enforceable commitments and implementation schedules consistent with reasonable further progress for the six adopted transportation control measures.

(E) By May 20, 1981. A schedule to analyze alternative packages of transportation control measures, including but not limited to those measures listed in Section 108(f)(1)(A) of the Clean Air Act.

(F) By May 20, 1981. The Southern California Association of Governments (SCAG) greater weight and equal proportion programming policy and procedures as they relate to prioritization and funding of "air quality projects" and "Highway Projects" and justification that the NAP provisions are consistent with Section 176(d) of the Clean Air Act.

(iii) For particulate matter:

(A) By December 31, 1981, a refined emission inventory which includes estimates of emissions from fugitive dust sources for the South Coast Air Basin.

(B) By December 31, 1981, documentation for the PM design value used to determine the allowable PM emission level, and a modeling analysis using the new emissions inventory data which shows the emission reductions necessary to provide for attainment of the PM NAAQS by December 31, 1982.

(C) By December 31, 1981, revised emission reduction estimates per control measure for each year which are based upon the revised emission inventory.

(D) By May 20, 1981. A commitment and schedule to study and adopt non-traditional PM control measures and a commitment to implement those control measures necessary to provide for attainment.

(iv) For nitrogen dioxide:

(A) By May 20, 1981. An annual average emission inventory for the South Coast Air Basin.

(B) By May 20, 1981. The results of an air quality analysis giving a preliminary quantification of the total emission reductions needed to attain the NO_2 NAAQS.

(C) By May 20, 1981. Revised emission reduction estimates for each year which are based upon the revised emission inventory for the control measures that are adopted.

(D) By May 20, 1981. A schedule and work program for the submittal of a detailed air quality analysis giving the final quantification of the needed emission reductions needed to attain the NO_2 NAAQS.

(E) By May 20, 1981. A commitment and schedule to develop and adopt NO_2 control measures and a commitment to implement those control measures necessary to provide for attainment.

6. Section 52.233 is revised by adding subparagraph (a)(3), as follows:

§ 52.233 Review of new source and modifications.

(a) * * *

(3) South Coast AQMD.

(i) In Rule 1306(a)(i), submitted on April 3, 1980, sentence 3 is disapproved.

(ii) In Rule 1306(d)(1)(B)(ii), submitted on April 3, 1980, the following portion of the rule is disapproved: "which have occurred during the highest three years of the last five year period, divided by three, provided the applicant demonstrates that such permit units have been operated at least 90 days during each of such three years."

(iii) In Rule 1307(a) submitted on August 15, 1980, the following portion of the rule is disapproved: "greater than 68 kilograms (150 pounds) per day, except carbon monoxide, for which the value is an increase greater than 340 kilograms (750 pounds) per day."

7. Section 52.237 is amended by adding subparagraph (a)(1), as follows:

§ 52.237 Part D disapproval.

(a) The following portions of the California SIP are disapproved because they do not meet the requirements of Part D of the Clean Air Act.

(1) The portions of the *South Coast Air Basin Control Strategy* that pertain to an I/M program.

8. Section 52.252 is amended by adding subparagraph (b)(2)(ii) to read as follows:

§ 52.252 Control of degreasing operations.

* * * * *

(b) * * *

(2) * * *

(ii) South Coast AQMD.

* * * * *

9. In § 52.238, the "Metropolitan Los Angeles Intrastate" line is revised to read as follows:

§ 52.238 Attainment dates for national standards.

* * * * *

Air quality control region and nonattainment area	Pollutants						
	TSP		SO_x		NO_x	CO	O_x
	Primary	Secondary	Primary	Secondary			
* * *	*	*	*	*	*		
South Coast Air Basin	h	c	d	e	h	i	i

10. Section 52.253 is amended by revising paragraph (b)(2) to read follows:

§ 52.253 Metal surface coating thinner and reducer.

* * * * *

(b) * * *

(2) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is either fully rescinded or partially rescinded subject to the conditions specified as follows:

(i) This section is fully rescinded for the Ventura County APCD.

(ii) This section is rescinded for magnet wire insulators, can and coil coaters, metal parts coaters, and auto assembly line coaters which are subject to and in full compliance with Rules 1107, 1115, 1125, and 1126 in the South Coast AQMD.

* * * * *

11. Section 52.255 is amended by removing and reserving paragraph (b)(1)(vii), and by adding paragraph (b)(3) to read as follows:

§ 52.255 Gasoline transfer vapor control.

* * * * *

(b) * * *

(3) The control requirements of this section are rescinded in the following air pollution control districts:

(i) South Coast AQMD.

* * * * *

12. Section 52.256 is amended by revising paragraph (b) to read as follows:

§ 52.256 Control of evaporative losses from the filling of vehicular tanks.

* * * * *

(b) This section is applicable in the Metropolitan Los Angeles, Sacramento

Valley and San Joaquin Valley Intrastate Air Quality Control Regions, except as follows:

(1) In the following portions of the Metropolitan Los Angeles Intrastate Region, this section is rescinded.

(i) South Coast AQMD.

BILLING CODE 6560-38-M

---

40 CFR Part 52

[A-1-FRL 1729-8]

Approval and Promulgation of Implementation Plans; Revision

AGENCY: Environmental Protection Agency.

ACTION: Final Rule.

SUMMARY: The Director of the Rhode Island Department of Environmental Management (DEM) submitted on August 28, 1980 a request for EPA approval of a revision to the Rhode Island State Implementation Plan (SIP). This revision constitutes a variance from Regulation 8, "Sulfur Content of Fuels" of DEM's Rules and Regulations for the Prevention, Control and Abatement, and Limitation of Air Pollution which requires fuel oil burning sources to use fossil fuel containing 0.55 pounds or less of sulfur per million Btu heat release (approximately equivalent to 1 percent by weight). The revision allows an alternative emission reduction option for control of sulfur dioxide in accordance with EPA's controlled trading policy (Federal Register Vol. 44, No. 239, Tuesday, December 11, 1979), commonly refered to as the "Bubble Policy." This revision allows the Narragansett Electric Company to increase its sulfur-in-fuel oil content from 1 percent to 2.2 percent at its electric power generating station on South Street in Providence during such times that it ceases operation or burns natural gas at its electric power generating station on Manchester Street in Providence. EPA published a proposed approval of this revision on October 24, 1980 (45 FR 70513). No letters of comment were received during the thirty (30) day comment period which ended November 24, 1980. EPA is today approving this revision.

EFFECTIVE DATE: January 21, 1981.

FOR FURTHER INFORMATION CONTACT: Marcia L. Spink, Air Branch, Environmental Protection Agency, Region I, Room 1903, J.F.K. Federal Building, Boston, Massachusetts 02203, (617) 223-4448.

ADDRESSES: Copies of the Rhode Island revision document, which is incorporated by reference, are available for public inspection during regular business hours at the Environmental Protection Agency, Region I, Room 1903, J.F.K. Federal Building, Boston, Massachusetts 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Room 8401, Washington, D.C. 20460; and the Rhode Island Department of Environmental Management, 75 Davis Street, Room 204, Cannon Building, Providence, Rhode Island 02908.

SUPPLEMENTARY INFORMATION: On October 24, 1980 (45 FR 70513) EPA proposed approval of a revision to the Rhode Island SIP which would allow the Narragansett Electric Company (NEC) to increase its sulfur-in-fuel oil limit from 1 percent to 2.2 percent at its electric power generating station on South Street in Providence when it ceases operation or burns natural gas at its electric power generating station on Manchester Street in Providence. This revision involves a variance from Regulation 8, "Sulfur Content of Fuels," of DEM's Rules and Regulation for the Prevention, Control and Abatement, and Limitation of Air Pollution and is being undertaken in accordance with EPA's controlled trading policy (Federal Register, Vol. 44, No. 239, Tuesday, December 11, 1979), commonly referred to as the "Bubble Policy."

The SIP revision and EPA's reasons for approving it were explained in the Notice of Proposed Rulemaking, cited above, and will not be repeated here. No comments having been received, EPA is now taking final action to approve the revision.

EPA finds good cause for making this revision immediately effective for the following reasons:

1. The revision to the SIP is already in effect under State law and EPA approval imposes no additional regulatory burden.

2. The NEC estimates fuel cost savings of 2.7 to 4 million dollars annually as a result of the revision.

3. The revision will result in a 600,000 barrel per year reduction of imported oil.

Under Section 307(b)(1) of the Clean Air Act, judicial review of (this action) is available *only* by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

After evaluation of the State's submittal, the Administrator has determined that the Rhode Island revision meets the requirements of the Clean Air Act and 40 CFR part 51. Accordingly, this revision is approved as a revision to the Rhode Island SIP.

(Sec. 110(a) of the Clean Air Act, as amended, 42 U.S.C. 7401 et seq.)

Dated: January 12, 1981.

Douglas M. Costle,

Administrator.

Note.—Incorporation by reference of the State Implementation Plan for the state of Rhode Island was approved by the Director of the **Federal Register** on July 1, 1980.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart 00—Rhode Island

1. Section 52.2070, paragraph (c) is amended by adding subparagraph (13) as follows:

§ 52.2070 Identification of plan.

* * * * *

(c) * * *

(13) A revision to Regulation 8, "Sulfur Content in Fuels," for the Narragansett Electric Company, Providence, submitted on August 28, 1980 by the Director of the Department of Environmental Management.

[FR Doc. 81-2072 Filed 1-19-81; 8:45 am]

BILLING CODE 6560-38-M

40 CFR Part 180

[PH-FRL 1731-4; PP 4F1514/R296]

Polyamide Polymer Derived From Sebacic Acid

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for polyamide polymer derived from sebacic acid, vegetable oil acids with or without dimerization, terephthalic acid and/or ethylenediamine when used as an encapsulating medium for methoprene only.

EFFECTIVE DATE: Effective on January 21, 1981.

ADDRESS: Written objections may be submitted to the: Hearing Clerk, Environmental Protection Agency, Rm. M-3708, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: John Shaughnessy, Registration Division (TS-767), Office of Pesticide Programs,

Environmental Protection Agency, Rm. E-229, 401 M St. SW., Washington, D.C. 20460, (202-426-9458).

SUPPLEMENTARY INFORMATION: EPA issued a notice that published in the Federal Register of November 18, 1980 (45 FR 76211) that the agency proposed deleting an inert ingredient from § 180.1001(d) where it is listed without restriction, and establishing an exemption from the requirement of a tolerance for polyamide polymer derived from sebacic acid, vegetable oil acids without dimerization, terephthalic acid and/or ethylenediamine when used as an encapsulating medium for methoprene only.

No comments or requests for referral to an advisory committee were received by the agency in response to this notice of proposed rulemaking.

It has been concluded, therefore, that the proposed regulation to 40 CFR Part 180 will protect the public health, and is established as set forth below.

Any person adversely affected by this regulation may, on or before February 20, 1981, file written objections with the Hearing Clerk, EPA, Rm. M-3708 (A-110), 401 M St. SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." This regulation has been reviewed and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective date: January 21, 1981.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)))

Dated: January 13, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Therefore, Subpart D of 40 CFR Part 180 is amended as follows:

§ 180.1001 [Amended]

1. By deleting "Polyamide polymer derived from sebacic acid, vegetable oil acids with or without dimerization, terephthalic acid and/or ethylenediamine" from the table under § 180.1001(d).

2. By adding a new § 180.1053 to read as follows:

§ 180.1053 Polyamide polymer derived from sebacic acid; exemption from requirement of tolerance.

Polyamide polymer derived from sebacic acid, vegetable oil acids with or without dimerization, terephthalic acid and/or ethylenediamine is exempted from the requirement of a tolerance when used as an encapsulating medium for methoprene only.

40 CFR Part 762

[OPTS-66005A; TSH-FRL 1681-1]

Fully Halogenated Chlorofluorocarbons; Exemption for Spinnerette Release Agents

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA proposed that the essential use exemption from the Agency's chlorofluorocarbon rule for spinnerette release agents be revoked. This proposal was published in the Federal Register of June 14, 1979 (44 FR 34167). EPA is now promulgating a final rule which revokes the essential use exemption effective March 1, 1982.

EFFECTIVE DATE: This rule becomes effective March 1, 1982.

ADDRESS: The official record of rulemaking is available from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays by contacting: Joni T. Repasch, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-447, 401 M St., SW., Washington, D.C. 20460, (202-755-8050).

FOR FURTHER INFORMATION CONTACT: John B. Ritch, Jr., Director, Industry Assistance Office, Office of Toxic Substances, (TS-799), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, Toll Free (800-424-9065), In Washington, DC: (554-1404).

SUPPLEMENTARY INFORMATION: EPA's chlorofluorocarbon rule (40 CFR 762) prohibits the manufacture, processing, and distribution in commerce of fully halogenated chlorofluoroalkanes (chlorofluorocarbons) for nonessential aerosol propellant uses, published in the Federal Register of March 17, 1978 (43 FR 11318). Section 762.21(b) contains an essential use exemption for "release agent for molds used in the production of plastic and elastomeric materials". EPA had interpreted this exemption to include spinnerette release agents.

A spinnerette is a metal plate with tiny holes (0.1-1.0 mm diameter) used in the formation of man-made fibers. By preventing filaments from adhering to the spinnerettes, release agents keep the spinnerettes clean, thereby ensuring the quality of the filaments.

EPA proposed to immediately revoke the exemption for spinnerette release agents, because of the Agency's belief that substitutes for chlorofluorocarbon-propelled spinnerette release agents had been developed. This proposal was published in the Federal Register of June 14, 1979 (44 FR 34167). Comments on that proposal have convinced EPA that the substitutes available as of the date of the proposed rule were not as effective as EPA had thought and that industry needs more time to develop a substitute. Therefore, EPA is revoking the essential use exemption for spinnerette release agents, but delaying the effective date of the action until March 1, 1982.

This change is based on comments submitted to EPA in response to the June 14, 1979 proposal and on information obtained as a result of a visit to a DuPont Corporation plant in Kinston, N.C. Comments on the June 14, 1979 proposal were received from fiber producers, producers of substitute products, a distributor for one of the producers, and a trade association.

Producers of substitute products reported that they needed more time to refine their product delivery system. At the same time fiber producers reported that, while substitute products were available, they were not completely satisfactory for all fibers and processes used.

Generally the problems encountered in developing a substitute can be summarized as follows: (1) Spinnerette release agents are used on many different types of fibers and in many different processes making it unlikely that one substitute product could service all of the industry's needs, (2) carbon dioxide-propelled products have unsatisfactory spray characteristics, (3) hydrocarbon-propelled products have flammability problems, and (4) there are potential toxicity problems from products containing methylene chloride or 1,1,1-trichloroethane.

EPA now recognizes that the spinnerette release agents marketed at the time the proposed rule was published were inadequate to serve all the needs of fiber producers. However, EPA believes that acceptable substitute products can be developed, and that the additional year extension granted under this rule will be sufficient time to complete the development of a substitute. This extension has the effect of actually allowing approximately two additional years from the original proposal date for development and testing of substitute products.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized". This proposed regulation has been reviewed and determined to be a specialized regulation not subject to the procedural requirements of Executive Order 12044.

The rulemaking record for this action consists of the rulemaking record for EPA's chlorofluorocarbon rule under 40 CFR Part 762 published in the Federal Register of March 17, 1978, and the following documents:

GENERAL SERVICES ADMINISTRATION

41 CFR Parts 5A-1, 5A-2

[APD 2800.3 CHGE 19]

Procurement Regulations; Miscellaneous Amendments

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: Chapter 5A, General Services Administration Procurement Regulations, is amended to (1) prescribe examples of "Age on Delivery" type clauses applicable to procurements of shelf-life items, and (2) update solicitation cover page notices and miscellaneous text provisions by deletion or revision. The purpose of these changes is to improve regulatory coverage of contract clauses and procurement procedures.

EFFECTIVE DATE: This regulation is effective February 13, 1981.

FOR FURTHER INFORMATION CONTACT: Philip G. Read, Director, Federal Procurement Regulations Directorate, Officer of Acquisition Policy (703-557-8947).

PART 5A-1—GENERAL

Subpart 5A-1.3—General Policies

1. In § 5A-1.370-3, paragraph (a) is revised and paragraph (c)(7) is added as follows:

§ 5A-1.370-3 Use of warranty.

(a) The procuring director shall approve the use of a warranty in supply contracts, except when the warranty is in the specification, or the contractor's commercial warranty is included, or a warranty is prescribed in the GSPR for specific situations. To the extent practicable, a clause substantially similar to that prescribed in § 5A-1.370-4 shall be used. Warranty clauses that differ substantially shall be approved or prescribed by the Assistant Administrator for Acquisition Policy.

* * * * *

(c) * * *

(7) Warranty clauses applicable to shelf-life items should, to the extent feasible, indicate the nature of and the degree to which deterioration will be permitted during the warranty period.

unless such factors are adequately covered in the product specification.

* * * * *

2. In § 5A–1.370–4, paragraph (a) of the "Warranty of Supplies" clause is revised to read as follows:

§ 5A–1.370–4 Warranty clause for supply contracts.

* * * * *

Warranty of Supplies

(a) Notwithstanding inspection and acceptance by the Government of supplies furnished under the contact or any provision of this contract concerning the conclusiveness thereof, the Contractor warrants that for *(enter specific warranty period such as "one year after specified date," or other applicable warranty provision) all supplied* furnished under this contract will be free from defects in material or workmanship and will conform with the specifications and all other requirements of this contract. Further, the Contractor certifies that the supplies will be suitable for their intended purpose. Unless otherwise provided, this warranty period shall begin 60 days after the date of shipment.

* * * * *

PART 5A–2—PROCUREMENT BY FORMAL ADVERTISING

The table of contents for Part 5A–2 is amended to delete § 5A–2.202–51 in its entirety.

Sec.

* * * * *

5A–2.202–51 [Deleted]

* * * * *

Subpart 5A–2.2—Solicitation of Bids

§ 5A–2.202–4 [Amended]

1. In § 5A–2.202–4, paragraphs (e) and (i) are amended by changing the words "Quality Control Division" to "quality assurance activity." In paragraph (k), the organizational title "Office of Standards and Quality Control (FM)" is changed to "Office of Engineering and Technical Management (FRE)."

§ 5A–2.202–51 [Removed]

2. Section 5A–2.202–51 is removed in its entirety.

3. Section 5A–2.202–70 is revised as follows:

§ 5A–2.202–70 Unsolicited samples, descriptive literature, or brand name references.

(a) The following clause shall be inserted in each solicitation (applicable to formally advertised procurements).

Unsolicited Samples, Descriptive Literature, or Brand Name References

When procurement is effected under specifications or purchase descriptions (other than "brand name or equal") and the Government does not specifically request bid samples, descriptive literature, or references to brand names, models, or part numbers as an integral part of the bid, bids which are accompanied by any of the foregoing will be rejected unless it is clear from the bid or accompanying papers that the samples, descriptive literature, or references to brand names, models, or part numbers are not intended to qualify the bid and that the bidder proposes to furnish items fully in accordance with the specifications or purchase descriptions. When offers contain unsolicited material such as samples, descriptive literature, or references to brand names, models, or part numbers, the Government will not be responsible in any way for determining whether the items which are offered meet the Government's requirements set forth in the applicable specifications or purchase descriptions.

(End of Clause)

(b) The following notice shall be included on GSA Form 1602, Notice Concerning Your Solicitation for Offers, except when "brand name or equal" items are being procured.

Unsolicited Material

Bidders are cautioned that the submission of unsolicited bid samples or descriptive literature, or references in the bid to brand names, models, or part numbers may cause rejection of the offer. The bidder's attention is directed to the clause entitled "Unsolicited Samples, Descriptive Literature, or Brand Name References."

(End of Notice)

§ 5A–2.203–1 [Amended]

4. Section 5A–2.203–1 is amended by removing the parenthetical statement at the end of paragraph (c).

5. Section 5A–2.203–70 is revised as follows:

§ 5A–2.203–70 Solicitation Copies clause.

The following clause shall be included in all solicitations (may be included as a notice on GSA Form 1602 if a cover page is used):

Solicitation Copies

To reduce costs, only a single copy of this solicitation is mailed to addressees on our bidders mailing list, except that complete bid sets are furnished to active bidders who responded to previous solicitations for similar commodities. If additional copies are required (see Block 9, page 1, for number of bid copies to be submitted), you may reproduce them yourself, provided they are complete in every respect, or you may obtain them from the GSA Business Service Center, *(insert address and phone number of the BSC serving the issuing office).*

(End of Clause)

PART 5A–7—CONTRACT CLAUSES

The table of contents for Part 5A–7 is amended to remove § 5A–7.103–58 and to add new § 5A–7.103–70, as follows:

Sec.

* * * * *

5A–7.103–58 [Deleted]

* * * * *

5A–7.103–70 Acceptable age of shelf-life items.

* * * * *

Subpart 5A–7.1—Fixed-Price Supply Contracts

1. Section 5A–7.103–57 is amended by removing paragraphs (c) and (d) in their entirety.

§ 5A–7.103–57 Standby-stock clauses.

* * * * *

(c) [Deleted]

(d) [Deleted]

§ 5A–7.103–58 [Removed]

2. Section 5A–7.103–58 is removed in its entirety.

3. Section 5A–7.103–70 is added as follows:

§ 5A–7.103–70 Acceptable age of shelf-life items.

In accordance with § 101–27.206–2 of the Federal Property Management Regulations, contractors are required to furnish shelf-life items within a specified number of months from the date of manufacture or production of the supplies.

(a) When the required shelf-life period is 12 months or less, the corresponding age-on-delivery period as suggested in FPMR 101–27.206–2 is relatively short (i.e., one or two months from date of manufacture). Consequently, if the supplies are to be laboratory tested by the Government prior to acceptance, the acceptable age period should stop at the time the supplies are offered for inspection and testing. Otherwise, contractors may be prejudiced by unusual delays on the part of the Government in completing the testing process. Accordingly, in these circumstances a clause substantially as follows shall be used:

Acceptable Age of Supplies

The supplies furnished under this contract shall not be more than ——— months old, beginning with the first full month after the date of manufacture marked on the container. For the purpose of this clause, supplies shall be considered to be furnished (1) when they are offered to the Government for inspection and testing, or (2) on the date of shipment if the supplies are shipped under a Quality Approved Manufacturer Agreement. If the age of the supplies furnished under this contract is greater than the specified number of months, the Government may exercise its rights under the Inspection clause of this contract (Article 5, Paragraph (b), Standard Form 32).

(End of Clause)

(b) If the minimum shelf-life period of the supplies being procured is more than 12 months and/or if lengthy testing is not involved, the end of the acceptable age period may be either the time of shipment or the time of delivery, as considered appropriate by the contracting officer. In these circumstances, a clause substantially as follows shall be used. (Note.—This example is applicable to procurements which cover both shelf-life and non-shelf-life items, or items with different shelf-life periods.)

Age on Delivery

Included in the item description of each shelf-life item covered by this procurement is a statement regarding the "age of delivery" of the item. The age of the item(s) shall not exceed the number of months shown in the item description, counted from the first day of the month following the month of manufacture to the date of actual delivery to the delivery point(s) specified herein. If the age of the supplies delivered under this contract is greater than the number of months shown, the Government may exercise its rights under the Inspection clause of this contract (Article 5, Paragraph (b), Standard Form 32).

(End of Clause)

4. Section 5A–7.103–71 is revised as follows:

§ 5A–7.103–71 Special discount terms.

(a) When inspection is at destination and laboratory testing is required prior to acceptance of the supplies, the following clause shall be used. The number of days to be entered in the blank space in the clause shall be the number of days needed for testing and/or analysis, including the time required for shipping samples of the supplies to the testing facility. The period entered shall not exceed 30 calendar days unless the quality assurance activity furnishes a written statement that additional time is absolutely necessary.

(b) If Standard Form 33–A is not incorporated as a part of the solicitation (as in the case of the small purchases), the parenthetical statement at the beginning of the clause shall be omitted.

Special Discount Terms

(Article 9, Discounts, of Standard Form 33–A, Solicitation Instructions and Conditions, is deleted and the following is substituted therefor.)

(a) Prompt payment discounts offered for payment within less than 20 calendar days will not be considered in evaluating offers for award. However, offered discounts of less than 20 calendar days will be taken if payment is made within the discount period, even though not considered in the evaluation of offers.

(b) Prior to final acceptance, the supplies described in this solicitation will be laboratory tested for conformance with the specifications cited. It is estimated that such testing will require a maximum of calendar days, and any discount period offered will begin that same number of calendar days after the date of arrival of the supplies at the destination or port of embarkation, or on the date a correct invoice or voucher is received in the office specified by the Government, if the latter date is later than the date of final acceptance. Payment is deemed to be made for the purpose of earning the discount on the date of mailing of the Government check.

(End of Clause)

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

Dated: December 18, 1980.

BILLING CODE 6820–61–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[Docket No. 20828; FCC 80–628]

Miscellaneous Rules Relating to Common Carriers

AGENCY: Federal Communications Commission.

ACTION: Reconsideration of Final Decision in Docket No. 20828 (Final Decision).

SUMMARY: The Reconsideration Order modifies and clarifies the Final Decision of the Second Computer Inquiry. It amends Rule 64.702(c) by modifying the structure under which certain communications common carriers may provide enhanced services and consumer premises equipment. The Order removes certain carriers from the list of those required to provide these services and equipment under that structure. It also adopts a bifurcated schedule for deregulation of consumer premises equipment.

DATES: Effective dates: Carrier provided customer premises equipment which is federally tariffed or not in service as of March 1, 1982 and is offered to consumers after that date must be detariffed prior to March 1, 1982. The date by which all other carrier provided customer premises equipment must be detariffed is undetermined; Rule Amendment effective February 3, 1981.

ADDRESS: Federal Communications Commission, 1919 M Street NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen B. Levitz, Common Carrier Bureau, (202)632–9342.

In the matter of amendment of § 64.702 of the Commission's rules and regulations (second computer inquiry), Docket No. 20828. *Memorandum Opinion and Order* (45 FR 31319).

Adopted: October 28, 1980.

Released: December 30, 1980.

By the Commission: Chairman Ferris issuing a separate statement; Commissioners Quello, Fogarty and Jones concurring and issuing a statement.

1. On April 7, 1980 the Commission adopted its *Final Decision* in the Second Computer Inquiry. 77 FCC 2d 384 (1980). Petitions seeking reconsideration of this decision were filed by 34 parties, including those filing oppositions to the petitions and replies. Appendix A contains a list of all parties filing pleadings on reconsideration. The pleadings focus on four general areas: network services, carrier provision of customer-premises equipment (CPE), corporate separations requirements, and legal considerations. We will consider each of these areas in turn.

I. Network Services

a. Summary of Comments

2. In the *Final Decision* we adopted a regulatory scheme under the Communications Act of 1934, as amended, that distinguishes between the common carrier offering of basic transmission services and the provision of enhanced services. This scheme is embodied in Section 64.702 of the Commission's Rules, 47 CFR § 64.702. Under this decision basic services are common carrier communications services and regulated as such under Title II of the Act, whereas enhanced services are not. Our action in this regard represents an adjustment of the regulatory demarcation adopted over a decade ago in the *First Computer Inquiry*[1] required by technololgical developments that have occurred since then and the resulting need to establish more clearly the parameters of regulation under Title II of the Act.

3. In petitions for reconsideration various parties have focused on the basic/enhanced dichotomy. Generally, the parties seek either clarification or expansion of the definition of basic service. For its part, Tymnet requests that the Commission confirm that Tymnet's Tariff FCC No. 2 is an enhanced service offering.[2] American Telephone and Telegraph Co. (AT&T) and GTE Service Corp. (GTE) requests that the Commission expand the definition of basic service in order to permit telephone companies to offer voice and data storage and retrieval applications as part of basic service. In particular, AT&T is concerned that the restrictions on storage and retrieval applications could prevent the offering of the call answering and advance calling features of its Custom Calling II Service. AT&T submits that basic service must not be construed so narrowly as to limit the technological capabilities and evolution of the network, and that services that can be more effectively provided by the network should be so provided. It also asserts that mass calling services (e.g. "Dial-It") must be provided through the network as part of basic service. In addition, AT&T requests that the Commission modify the *Final Decision* to permit basic service to include information storage, so long as "once information is given to the communications facility, its progress towards the destination is subject to only those delays caused by congestion within the network or transmission priorities given by the originator *or the called party.*" (AT&T Comments at 38.) AT&T and GTE also contend that code and protocol conversion should be permitted as part of a basic service. In addition, while the Commission stated its intent to institute an inquiry in this regard, GTE contends that it is procedurally incorrect for the Commission to prohibit the provision of code and protocol conversion as a part of basic service before the Commission initiates the proposed inquiry.

4. A number of parties have urged the Commission to reject the arguments of the petitioners seeking modification of the basic/enhanced dichotomy.[3] These parties argue that the distinction drawn in the *Final Decision* between basic and enhanced services is reasonable and workable. Moreover, they claim that not only would further attempts at clarification prove futile, such attempts would create uncertainty in the marketplace as to which services could be provided without regulation and could lead to the eventual regulation of the enhanced service market. Additionally, they argue that the parties seeking modification of the *Final Decision* have offered no new evidence that warrants revisiting these issues.

5. With respect to the information storage issues, the parties opposing modification of the *Final Decision* contend that such applications are properly classified as enhanced and that to permit them to be offered as part of a basic service would completely blur the distinction between basic and enhanced service. The parties further argue that any demarcation between basic and enhanced service other than the one adopted would lead to burdensome *ad hoc* determinations. Rebutting AT&T's contentions, parties claim that storage services such as call answering and advance calling are enhanced as these services allow customers to store and retrieve information for purposes other than to facilitate the transmission of information and perform the same function as existing telephone answering equipment.

6. Similarly, the parties assert that "Dial-It" goes far beyond the ancillary functions which may be offered with traditional telephone service. They reject AT&T's argument that these services must be provided through the network, pointing out that these services cannot readily be distinguished from a number of voice or simulated voice services already ubiquitously available from unregulated data-base storage companies. (CBEMA Opposition at 43.)

7. In response to AT&T's proposal to allow information storage based on priorities established by the called party, CBEMA states that the Commission should make clear that all voice storage systems are enhanced regardless of whether the storage is accomplished by the originator or the called party. Moreover, parties such as ADAPSO state that if telephone companies were permitted to offer voice storage services as part of basic service, the monopoly ratepayer will bear the expense of switching equipment designed and installed with extra capacity needed only to compete with existing enhanced services and CPE. The parties also assert that the threat of voice storage and retrieval as part of a basic service would establish carrier dominance over such offerings and force heretofore unregulated vendors to seek regulated status to offer the same degree of service.

8. Taking issue with the proposal that carriers be permitted to offer code and protocol conversion as part of basic service, various parties contend that to permit such conversions would totally distort the basic/enhanced dichotomy. These parties reject the argument that code and protocol conversion must be provided within the carrier's network as part of basic service and point out the current availability of these services in the marketplace, none of which is provided within the network. Finally,

concern is expressed that significant anticompetitive abuses could arise from allowing carriers to offer code and protocol conversion as part of their basic service offerings.

b. Discussion

9. The arguments summarized above essentially address the issue of whether we have drawn a reasonable boundary between basic and enhanced services or whether we should have drawn the basic/enhanced demarcation at some other point. Those requesting modification would seek to have us expand the basic category to include services that fall within the enhanced category as set forth in our *Final Decision*. In assessing the merits of these arguments it is important to understand the underpinnings of our basic/enhanced dichotomy. First, the decision is premised on our factual determination that under Title II of the Act basic services are regulated as common carrier communications services whereas enhanced services are not. Second, the record supported our conclusion that the distinction set forth in the *Final Decision* between basic and enhanced services constituted the most enduring demarcation which could be established as to those services which when offered by common carriers are regulated under Title II and those which are not. At the same time numerous reasons were given as to why this demarcation should not be contaminated by subjecting some enhanced services to Title II regulation, but not others. See *Final Decision* at paras. 106–113. Under this structure "the scope of Commission regulation is focused on those services which are clearly within the contemplation of the Communications Act and which serve as the foundation for all enhanced services . . . . This structure enables us to direct our attention to the regulation of basic services and to assuring non-discriminatory access to common carrier telecommunications facilities by all providers of enhanced services." *Id.* at para. 116.[4]

10. A basic transmission service is the common carrier offering of transmission capacity for the movement of information between two or more points. Various basic services are offered depending upon the amount of bandwidth employed, the analog or digital characteristics of the transmission medium, and other line conditioning parameters that affect overall transmission quality. In providing such services a carrier offers to the public channel(s) of communications with associated network switching and routing. In this sense, a basic service is the offering of a "transmission pipeline" in contrast to the myriad services that are dependent upon, but different in kind, from the pipeline service. This is reflected in our basic service category and forms the underlying premise for the demarcation between basic and enhanced services. The basic services category therefore must be broad enough to insure our ability to carry out our statutory mandate as set forth in Section 1 of the Act and our concamitant responsibilities under Title II, but narrow enough to exclude other services that are separate from the common carrier offering.

11. In this context, we are asked to reassess our demarcation between basic and enhanced services. AT&T and GTE contend that various information storage and "mass calling" services should be included within the basic category. In considering these contentions, we must distinguish between two separate and very different considerations. The first is whether the proposed services fall within the transmission pipeline concept which we have described as basic service. The second is whether the proposed services, even if enhanced, cannot be offered apart from intergration within the communications network which provides basic service. The former implicates the scope of Title II regulation. The latter implicates the requirement that AT&T engage in the provision of enhanced services only through a separate subsidiary utilizing separate computer facilities.

12. Upon review and consideration of the pleadings filed on reconsideration, we are of the view that the classification scheme for basic and enhanced services as set forth in the *Final Decision* should be affirmed. In the *Final Decision* we noted that many enhanced services feature voice or data storage and retrieval applications, and thus in an enhanced service the content of the information need not be changed but may simply involve subscriber interaction with stored information. *Id.* at para. 97. The information storage and mass calling services raised by petitioners fall into this category. These are services that are dependent upon the availability of common carrier facilities, but the end product is not the offering of a common carrier communication service. Moreover, to include voice or data information storage services within the ambit of a basic service would be to destroy any meaningful regulatory boundary that otherwise exists and unduly expand the common carrier offering beyond one of providing the appropriate communications pipeline for the transmission of information to services in which communications is merely a factor of production.

13. These conclusions are reinforced when we examine the specific concerns which AT&T has raised, such as its "Dial-It," and "Custom Calling II" offerings.[5] AT&T markets "Dial-It" as a "mass calling service" which can be subdivided into public announcement services (PAS) and media stimulated calling (MSC) services. Under PAS, information such as news, stock prices, sports reports, etc. is recorded or stored within the carrier's network for retrieval by a subscriber to the service. MSC also involves the storage of recordings or information within the network, but is promoted through such media as radio or television to produce highly concentrated, peaked, calling patterns, unlike PAS. For example, the public might be invited to call different specified numbers to register their approval or disapproval of policy position on a given public issue. AT&T analogizes such services to time and weather information as support for their classification as basic services. Moreover AT&T argues that classifying voice storage services as enhanced could prevent the offering of various features of its Custom Calling II service, which involves storage of telephone messages in the network for subsequent sending or retrieval—commonly referred to as "advanced calling" and "call answering".

14. As presently structured, Dial-It and Custom Calling II constitute enhanced services under our *Final Decision*. They constitute more than the common carrier offering of a channel of communication and clearly fall outside the scope of a basic service. See *Final Decision* at paras. 93–98. Needless to say these offerings present only a small sample of the type of voice storage related services that may be offered consumers. AT&T notes that it may introduce additional offerings which involve the storage of information. (AT&T comments at 35.) To alter the basic category as suggested by AT&T and GTE would be to bring within the scope of basic service as host of

[4] The basic/enhanced dichotomy is applicable to both domestic and international services provided over common carrier facilities.

[5] On August 27, 1980, special permission No. 80-440 was issued under delegated authority whereby AT&T was authorized to advance the effective date of tariff revisions for "Dial-It" service, on the condition that the tariff have an expiration date of no later than March 1, 1982, without prejudice to the Commission ordering an earlier expiration date. While this service was viewed as enhanced, the staff was also aware of its pendency before the Commission on reconsideration in this proceeding, and thus did not reject the tariff.

computer-based voice storage and retrieval applications and customer-interactive services that far exeed basic transmission and related switching and routing functions. Not only might this require common carrier regulation of such services under Title II, but it would undermine any workable demarcation as to the boundary between basic and enhanced services. Technological advances are negating network differentiation of voice and non-voice transmissions. Customers can technically use Custom Calling II to store data now; as networks become increasingly digital, there will be no way to distinguish between voice storage and other types of information storage services. This compels that any enduring and workable demarcation between basic and enhanced services exclude information storage and retrieval services—both voice and data—from the basic category.

15. The parameters of a basic service should be dictated by the purposes of the Act and the statutory scheme set forth in Title II for the regulation of common carrier communications services. Our affirmance of the regulatory demarcation set forth in the *Final Decision* recognizes this and the corresponding need for regulatory stability and greater certainty in the marketplace. To impose regulation over some enhanced services, in light of our determination that information storage and retrieval services are not common carrier communications services, would be to impose a scheme of Title II regulation that attempts to distinguish regulated and unregulated enhanced services. This we specifically rejected in our *Final Decision* at paras. 102–113. Evidence has not been submitted on reconsideration to warrant a contrary conclusion.

16. AT&T's attempts to classify these services as basic by analogizing to its time and weather recordings also must be rejected. The provision of time and weather information has never been determined to be a common carrier communictions service. Their availability may, in fact, be noted in a given tariff for informational purposes, but these offerings are not regulated and are not marketed as discrete common carrier services pursuant to tariff.[6] AT&T is seeking to have Dial-It and Custom Calling II regulated as common carrier communications services, *i.e.*, separately offered pursuant to tariffed charges as discrete services. The PAS portion of Dial-It represents the offering of an information retrieval service whereby a subscriber pays to obtain information, whether it be news, stock reports, or other matters of broad interest. That which is being offered to the public as a common carrier communication service is not a transmission service; only the transmission component of the service is tariffable. The same is true for the messages and recordings stored within the network for MSC services and the advanced calling and call answering features of Custom Calling II.

17. While Dial-It as currently structured is an enhanced service, there are network control features that are properly associated with a basic service and tariffable as part of a common carrier service. For example, "choke" techniques are built into the network to block excessive calls and to avoid congestion and interference with other network traffic that is not MSC. The ability of a carrier to include capabilities within a basic service to handle peaked demands on the network or to accommodate special signalling needs associated with a given vendor's enhanced service offerings was clearly provided for in our *Final Decision*. We stated that "we are in no way restricting the carrier's ability to take advantage of advancements in technology in designing its telecommunications network." *Id.* at para. 96. Moreover, nothing in this proceeding precludes a carrier from imposing the costs of such capabilities on those users of the service. Because AT&T's "Dial-It" offering is an enhanced service, it must be offered on a nonregulated basis through a separate corporate entity. To allow an appropriate transition period, AT&T must detariff "Dial-It" by March 1, 1982. This transition period is consistent with that allowed other carriers for the detariffing of their enhanced services. *See Memorandum Opinion and Order*, FCC 80–425, released July 22, 1980.

18. Aside from the arguments which suggest that various enhanced services are common carrier communications services, the argument is made that certain services should be provided as part of an integrated basic transmission network on the theory that they must be offered in the network to be efficiently offered or ubiquitously available. Thus a separate issue is whether compelling reasons exist for allowing various services, even though enhanced, to be offered through network computer facilities of those carriers that would otherwise be subject to the separate subsidiary requirement. Based on the record in this proceeding, we conclude that evidence has not been presented that warrants such a determination. To the contrary, parties such as Delphi Communications Corp., IBM and CBEMA demonstrate that current voice storage services, and specifically AT&T's Custom Calling II features, actually employ entirely separate computer facilities which need not be co-located with the carrier's central office facilities to be provided or ubiquitously available on an economic basis.[7]

19. No evidence has been submitted to warrant departure from our conclusion in the *Final Decision* regarding the requirement that AT&T offer enhanced services only through a separate corporate entity. (As discussed below, we are removing from GTE the separate subsidiary requirement.) At the same time we recognize that strict adherence to such structural separation may foreclose the availability to consumers of certain enhanced services if, for example, state of the art technology dictates that only through the use of network facilities could the carrier provide a given enhanced service, or if complying with the separate subsidiary requirement results in the imposition of unreasonable costs upon consumers. Should such situations arise we are prepared to assess the merits of granting a waiver of our separation requirement for a specific service after notice and opportunity to comment on the request is afforded interested parties.

20. It is not our desire to impose unnecessarily increased costs upon consumers, or to cause them to pay unreasonable prices for a specific enhanced service in order to preserve the integrity of structural separation. In order to assess the economic costs of maintaining structural separation for a given enhanced service, we must determine whether the offering of an enhanced service through the subsidiary's facilities would impose upon consumers unreasonable costs outweighing the benefits which we have herein identified as underlying our adaption of the separate subsidiary requirement in the first instance. In so doing, we recognize that the calculus for assessing the merits of any waiver required for existing or future services must be premised on the existence of the separate subsidiary and its computer facilities, and must include not only the costs of not waiving the separate facilities requirement but also the potential for cross-subsidization and

[6] To the extent time and weather recordings continue to be offered as a public service, we are not foreclosing any carrier from continuing to offer these features on a non-regulated basis.

[7] See IBM's Opposition at 21–24, Delphi's Opposition at 9–12, CBEMA Reply at 26–28.

other unacceptable effects upon ratepayers.

21. At this time AT&T's arguments to justify the provision of certain enhanced services through its common carrier network facilities are too generalized to warrant our granting a waiver. Its arguments seek to expand the parameters of a basic service, an action we have rejected. Reclassification of services is not a proper subject for consideration in determining whether a particular requirement, for example, facilities separation, should be waived. Petitioners carry the burden of demonstrating that concerns about any cross-subsidization or other anticompetitive effects which may arise from grant of a waiver are outweighed by the possibility of imposition of unreasonable costs upon consumers, or unavailability of an enhanced service, if the waiver is not granted. As part of a waiver request, a petitioner will be expected to provide detailed economic and technical information to support its assertions. The Commission, in its discretion, may give notice and opportunity for comment on the request, and will make every effort to act on petitions for waiver within 90 days of the expiration of any ordered pleading cycle. Where opportunity for comment is afforded, parties generally will be given 30 days after release of the public notice to file comments and 15 days thereafter for the filing of reply comments.

22. AT&T suggests that paragraph 95 of the *Final Decision* should be modified to permit within a basic service the originator "or the called party" to control the progress of information through the network. It perceives an artificial distinction being created between storage within the network that occurs at the direction of the called party from that storage which takes place at the direction of the originating party (e.g. the difference between call answering and advance calling). As to the storage of information within the network, however, there was no intent to distinguish basic services on such a basis. We stated: "[T]hus in a basic service, once information is given to the communications facility, its progress toward the destination is subject to only those delays caused by congestion within the network or transmission priorities given by the originator" *Id.* at para. 95. The phrase "transmission priorities given by the originator" was intended to focus on consumer options in obtaining different levels of service quality, for example, if subscribing to a relatively inferior grade of service affected transmission priorities within the network.[8] There was no intention to include within a basic service the ability of the originator of a message to control storage within the network. Services involving storage or retrieval of information within the network are enhanced—independent of the actions of the sender or recipient. This is reflected in the language of Section 64.702(a).[9] The phrase "or involve subscriber interaction with stored information" makes no distinction between the originator and intended recipient.

23. In addition to those issues involving storage within the network; various parties have proposed alternative definitions for enhanced service. NTIA argues that the definitions of basic and enhanced are imprecise and proposes that an "encryption" test be used to distinguish these services. IBM, the original proponent of the encryption test, argues that the test was suggested "simply to demonstrate a characteristic of pure transmission"; but is incomplete for classifying basic and enhanced service. (IBM Reply at 5) It notes for example that storage and retrieval and other programmed actions on user's information would satisfy the encryption criterion, but would be enhanced under our definition. Tymnet, on the other hand, proposes that the Commission classify as enhanced all "service offerings in which computer processing power is dynamically applied to a bit stream during transmission." (Tymnet Opposition at 8).

24. It is essential that the delineation between basic and enhanced service comport with the statutory scheme established by Congress. This entails the identification of common carrier services from other services provided over a carrier's network. Within this framework we have set forth a classification scheme which adjusts the regulatory parameters of the service categories established in the *First Computer Inquiry*, while not restricting a carrier's ability to take advantage of advancements in technology in designing its telecommunications network. Neither NTIA's nor Tymnet's proposals are sufficient in this regard. NTIA's "encryption" test identifies a characteristic of a common carrier communications service; but, as NTIA itself recognizes, it is also descriptive of various information storage retrieval services which are enhanced. Nor does Tymnet's result in an understandable demarcation; it may, moreover, impair a carrier's ability to employ computer technology in providing basic services. The demarcation between basic and enhanced services set forth in the *Final Decision* comports with our congressional mandate and, while not conferring absolute precision as to the bounds of regulation, is a reasonable and workable regulatory demarcation. It draws as clear a line as is probably possible in a rapidly changing technological environment and will permit businesses to plan, invest, and innovate more free from uncertainty than would any of the other proposals which have been advanced during the four year course of this proceeding.

Protocol Conversion

25. As to our conclusion that code and protocol conversion services are enhanced, AT&T and GTE contend they should be able to offer them as part of their basic services. AT&T argues that the Commission should differentiate for regulatory purposes between various levels of protocol conversion. Other parties express total disagreement with the merits of their contentions, while still others suggest that the Commission should initiate the proceeding indicated at footnote 37 of the *Final Decision* if further examination is warranted.

26. To clarify any misconceptions about the scope of our determination, the *Final Decision* is not intended to restrict protocol conversion capabilities a carrier may employ internal to its own network. In a basic service, while various conversions may take place within the network, the result of the common carrier offering is not a change in protocol. For example, if information enters a carrier's network on protocol "A", it must exit the network on the same protocol, even though within the network it could be converted to "x", "y" or "z" protocols for network traffic management or security purposes. Nor does our prohibition prevent multiplexing of protocol "A" for output. The record on reconsideration does not support modification of our determination that the offering of code and protocol conversion capabilities external to the carrier's network transmission function is an enhanced service. Evidence is lacking to support the proposition that protocol conversion

[8] We do not intend to foreclose the use of message switching in which the progress of information, either voice or data, from origination to destination, is a function of both the priority chosen by the user and internal congestion within the network.

[9] Section 64.702 reads: (a) For the purpose of this Subpart, the term "enhanced service" shall refer to services, offered over common carrier transmission facilities used in interstate communications, which employ computer processing applications that act on the format, content, code, protocol or similar aspects of the subscriber's transmitted information; provide the subscriber additional, different, or restructured information; or involve subscriber interaction with stored information. Enhanced services are not regulated under Title II of the Act.

must be performed as part of a basic service. The market-place to date demonstrates that users are able to choose among an increasing number of alternatives—all of which are external to the basic transmission network—for performance of all levels of protocol conversion. These include providers of enhanced services, equipment manufacturers, and firms that provide specialized protocol converters. Moreover, to conclude that these activities constitute basic service would be to cloud the regulatory boundary that we have established and to disregard the fact that protocol conversions capabilities are now being offered completely external to the basic transmission network of underlying carriers.

27. At the same time we must reject GTE's argument that it is procedurally incorrect for the Commission to prohibit the provision of code and protocol conversion as part of a basic service prior to further examination in a separate inquiry. The thrust of this argument is based on the false premise that if a determination is made that it is in the public interest to have various protocol conversion services performed in conjunction with the basic transmission network of a carrier bound by the separate subsidiary requirement, the resulting service must therefore be basic. Needless to say, even in the event such a determination were made, the Commission has discretion to determine the terms and conditions under which code and protocol conversion may be incorporated into the underlying network, short of classifying the offering as a basic service. Thus we have not prejudged further consideration in a separate proceeding of the limits of permissible protocol conversion that may be employed within a given network, along with concomitant public interest considerations. We therefore affirm the basic/enhanced classification scheme as set forth in the *Final Decision*.

II. Customer-Premises Equipment (CPE)

a. Summary of the Final Decision

28. In the *Final Decision* we determined that the provision of customer-premises equipment (CPE) [10] was not communications common carriage. We determined that CPE offered by communications common carriers should be unbundled from charges for transmission service and that CPE should be provided on a non-tariffed basis. We provided for a transition period, lasting until March 1, 1982, during which this Commission, the Joint Board, state commissions and the carriers would complete transitional activities. We required that unbundled rates be filed by March 1, 1981 with the respective state commissions and that all carrier terminal equipment be detariffed by March 1, 1982. We further provided that, once unbundled, carrier provided residential CPE (including maintenance) be offered at pre-deregulation rates that would be fixed for the life of the instrument in order to insulate residential subscribers from any significant dislocations resulting from deregulation.

29. We further observed that it would be necessary to address a number of related issues during the transition, including depreciation rates, investment recovery and "prices at which terminal equipment is removed from carriers' rate bases." *Id.*, para. 166. We anticipated the need to initiate a "proceeding that would examine into possible changes to depreciation schedules and also address the basis upon which unsold equipment should be removed from a carrier's regulated rate base and books of account." *Id.*

b. Summary of Comments

30. Commenting parties addressed both our transition proposal—in some cases suggesting alternate approaches—and the desirability of including or excluding one or more elements within CPE.

31. Eleven parties argued for a longer transition period. Several parties suggested that the deadline for CPE deregulation be postponed until the Joint Board, or the Commission in a full hearing, considers the broad public interest implications of deregulation. WUI asked that the effective date of the transition be deferred until we have acted upon the various requests for clarification and provided an opportunity for comment. United, on the other hand, favored the earliest practicable date for detariffing of CPE, and suggested retention of the March 1, 1982, implementation date to assure the necessary proceedings are concluded as quickly as possible.

32. Four parties—GTE, NTIA, Centel and USITA—put forth alternative transition plans. Centel's plan would have the transition proceed in two stages. During the first stage, encompassing twelve to twenty-four months, Commission and Joint Board proceedings would lay the groundwork for the second stage. The length of the second stage, estimated to be between thirty-six and sixty months, would be established at the end of the groundwork phase. Carriers would be given flexibility in the sequence and timing of implementation. Carriers could choose to make transfers all at once or in stages, so long as the transition was completed by the Commission-prescribed deadline. Centel suggests that its transition plan could be implemented along with or could incorporate other transition alternatives. These would include a gradual reduction of the obligation to provide service to particular groups or classes of customers, and a freeze upon all additions to FCC accounts 231 (Station Apparatus) and 234 (Large Private Branch Exchanges) as of a fixed date, followed by amortization of the investment in those accounts over a fixed period.

33. USITA's alternative transition plan, like those suggested by NTIA and the GTE telcos, prescribes separate treatment for new and embedded CPE. On a specified date, the investment in the CPE accounts, including inside wiring, would be capped. The capped investment would be amortized over a period selected by the telephone company, not to exceed ten years. A two-year transition period would be provided. During this period, new CPE would be separately identified, accounted for and unregulated. Embedded CPE would continue under flexible regulation during this period while companies unbundled CPE from related services, and then transferred prices, revenues, investment and expenses relating to CPE to non-regulated accounts. Regulation would continue as to terminal equipment and related services associated with multi-party lines, pending further study.

34. NTIA's transition proposal would include inside wiring as part of CPE. Only new CPE would be detariffed by March 1, 1982 (or, alternatively, two years after the decision on reconsideration). Installations of CPE (and wiring) already in place on the specified date would continue under state tariff until retired or until some time limit set by the state commission, but not in excess of eight years. NTIA's plan requires unbundling of rates for embedded CPE prior to the specified date. NTIA's plan describes the manner in which sales of embedded CPE and wiring might take place during transition. It further provides that, at the

[10] Customer-premises equipment includes all equipment provided by common carriers and located on customer premises except over voltage protection equipment, inside wiring, coin operated or pay telephones, and multiplexing equipment to deliver multiple channels to the customer. This decision applies to CPE provided in the fifty states, the District of Columbia, Puerto Rico, and the Virgin Islands, as did the *Final Decision* (footnote 57 inadvertently was printed without listing the District of Columbia). *See also* fn. 12.

end of the transition period, those customers who had paid the full book value through amortization charges under the unbundled tariff rates would own the CPE and inside wiring.

35. The GTE telephone companies propose that new CPE be offered on a completely unregulated basis, subject only to separate accounting, beginning on the effective date of the decision on reconsideration. Old CPE, in place on the effective date of the reconsideration decision, would be removed from regulation over a transition period of three to five years to be determined by a Joint Board. Recovery of capital investment in embedded CPE would be permitted through accelerated depreciation or other modes of capital recovery. To the extent necessary to achieve recovery, increases in both interstate and intrastate CPE-related rates are contemplated under the GTE plan. Embedded CPE would continue to be provided on a bundled basis during the transition period. Revenues, investment and expenses associated with the embedded investment in CPE would remain in the regulated portion of the business during transition and would be subject to review by the appropriate commission.

36. In addition to those parties proposing a bifurcated transition approach to CPE deregulation, other parties identified transition issues which pertain solely to embedded CPE. Numerous parties asserted that unbundling of rates for embedded CPE cannot be accomplished by March 1, 1981. Many state commissions would soon be inundated with revised local exchange tariffs, which state commission staff would be required to review. Other parties note that we have neither required that the instrument charge, once unbundled, be cost-based, nor prescribed an unbundling methodology. Several parties contend that a transition period of less than eight years may result in increased revenue requirements for some telephone companies as a result of recapture of accelerated depreciation and of investment tax credits. Increased costs could be avoided by permitting a longer transition period for embedded CPE. In addition, arguments are advanced that any necessary rate changes and changes in separations or access charges should be phased in gradually, minimizing any dislocation which might result from an abrupt detariffing of all CPE. Uncertainty was also expressed as to the status of telephone cooperatives and municipally-owned telephone companies exempt by law from state commission regulation.

37. AT&T opposed a bifurcated transition, arguing that any such plan would create operational difficulties for the Bell System, because of the separate subsidiary requirement. Embedded CPE would remain with the regulated entity, while the new CPE would be provided by a separate subsidiary on an unregulated basis. This, it was argued, would inevitably lead to wasteful duplication of facilities and confusing treatment of customers.

38. CBEMA and IDCMA urged prompt completion of transition activities. CBEMA urged that unbundling be required as soon as possible, while recognizing that detariffing may not be feasible by March 1, 1982. IDCMA urged prompt transfer of all data communications CPE, both new and embedded, to AT&T's separate subsidiary, to prevent AT&T from using the transition period to reduce book value of CPE in preparation for a transfer at less than fair market value.

39. Our rate proposal for residential subscribers was criticized by numerous parties who asserted that the proposal prescribed local exchange rates in violation of Sections 2(b) and 221(b). It was also argued that, by failing to make allowance for increasing labor and transportation costs over time, frozen rates would be confiscatory. Some commenters asserted that prescription of frozen rates for CPE affiliates after March 1, 1982, runs counter to our basic premise that CPE should be provided on an unregulated, competitive basis.

40. A number of parties would have us take various actions which would limit the scope of future action by state commissions. Both AT&T and United would have us convey to the states our expectation that increased intrastate rates will be necessary to permit recovery of increased costs of more rapid depreciation. AT&T would have us announce our intention to preempt the state commissions as to valuation and transfer pricing of CPE and Centel would favor a similar announcement as to depreciation. AT&T asked that we consider steps to ensure uniformity in rate structures after CPE is unbundled. Centel urged us to preempt state action that would require formation of separate subsidiaries within a given state.

41. Several parties asserted that restrictions should be placed upon activities of one or more carriers during transition. Datapoint urged us to reconsider our finding that AT&T should be permitted to provide enhanced services and CPE through a subsidiary, and to bar AT&T from providing CPE on a competitive basis. NATA argued that telephone companies should be prohibited from offering CPE on a nonregulated basis during the transition. REA and the Alaska petitioners (Alaska PUC, ATA, ATU), asked that small and municipally-owned telephone companies be exempted from unbundling and detariffing.

42. A number of parties asked that we expedite consideration of issues pending in other dockets, or consolidate those issues in this proceeding for resolution. Among the proceedings mentioned were: CC Docket No. 79–105, on station connection accounting; CC Docket No. 78–196, revision to the Uniform System of Accounts; Amendments to Part 68 of the Commission's Rules to include inside wiring and party line equipment within the registration program; and the Joint Board proceeding in CC Docket No. 80–286.

43. Several parties suggested that inside wiring be deregulated along with CPE. Some commenters asserted that, absent deregulation of inside wiring, customers might be required to obtain private branch exchanges and associated instruments from an unregulated provider while the inside wiring would remain regulated.

44. A number of commenters argued that multi-party service is not insubstantial, especially in rural areas, and that some means should be provided whereby telephone companies could continue to provide such service notwithstanding general deregulation of CPE. One alternative suggested by the commenters was to amend Part 68 of the Commission's rules to bring CPE attached to multi-party lines within the registration program and subsequently deregulate such CPE. A related concern was that the *Final Decision* was silent on the status of CPE used with multi-party lines in connection with business and "farmer" services.

45. Motorola requested that we amend Section 64.702 specifically to exclude all mobile radio equipment from the definition of CPE. Both AT&T and SBS asked that we address the issue of whether earth stations are to be considered CPE. SBS argued that, at least in its own system, the earth station is an essential system component and should be provided under tariff. On the other hand, AT&T asserted that its enhanced service and CPE subsidiary or subsidiaries should be permitted to own and operate earth stations, in order to be fully competitive.[11]

[11] AT&T raised the issue in the context of the bar on ownership of "transmission facilities" by the separate subsidiary, suggesting that there are difficult questions involved in establishing the boundary between CPE and "transmission facilities" in the case of satellite earth stations. SBS, in its opposition, suggested that classification of all or a portion of a satellite earth station as CPE would

c. Discussion

46. In conferring jurisdiction upon this agency over "all instrumentalities . . . incidental to . . . transmission," Congress intended ". . . to give the FCC ability to regulate any charge or practice associated with a common carrier service in order to insure that the carrier operated for the public benefit." *Final Decision*, at para. 170. We affirm our determination that the provision of CPE is not communications common carriage and should be offered separate and apart from a carrier's tariffed services. The continued provision of CPE by common carriers under regulation impedes the evolution of a truly competitive CPE market. *Id.* at paras. 144–159. Although some of the commenting parties believe that one or more of the potential competitors should be barred from full competition, or subject to more stringent structural or accounting requirements, there is generally no dispute that CPE should be provided on a competitive basis. Given this, the issue before us, and the one receiving substantial comment on reconsideration, is the manner in which CPE should be deregulated.

47. In this regard we perceive three basic alternatives available to us. We could elect to proceed along the path delineated in the *Final Decision*, hoping to resolve the remaining issues in time for a single transition at March 1, 1982. On the other hand, we could eliminate the date certain for CPE deregulation and allow interested parties to submit transition plans as soon as practicable, with implementation of a given plan conditioned on regulatory determinations of depreciation, capital recovery and corresponding rate issues. Alternatively, we could bifurcate the transition and separately address here the deregulation of that CPE which does not result in the substantial dislocations alleged by various petitioners while designating implementation issues as to other CPE for further comment and study.

48. In weighing the comments and alternatives proposed, we conclude that modifications of our previous determinations are warranted. The transition mechanism outlined in the *Final Decision* required that CPE first be unbundled from local exchange rates and then removed from regulation by March 1, 1982. In order to insulate residential ratepayers from significant dislocation, we required carriers and affiliates to offer a CPE lease option to existing residential subscribers at unbundled, fixed rates. As we indicated above, both aspects received substantial criticism. However, various petitioners have suggested a bifurcated transition plan that would enable regulators to address separately equipment which is embedded in the separations process and tariffed with the various States. We find this approach to be reasonable. It would allow for an orderly transition to deregulation of that equipment where significant dislocations are alleged to arise if detariffing is to occur by March 1, 1982. Moreover it would not foreclose this Commission from proceeding with the deregulation of non-embedded CPE and that equipment tariffed at the federal level when offered in conjunction with interstate or foreign communications. The difficult transitional issues arise not in connection with the provision of new CPE, but in connection with the necessity to make adjustments to existing arrangements involving allocations of costs, investments and revenues associated with embedded equipment jointly used for both intrastate and interstate or foreign services. Deregulation of such existing or "embedded" CPE gives rise to different concerns from those associated with that CPE investment which is either not factored into the separations process or directly assigned to interstate services. A bifurcated approach would avoid the significant dislocations of an abrupt transition that are alleged to occur if all CPE is deregulated and removed from separations as of March 1, 1982.

49. Accordingly, for transitional purposes we will distinguish new CPE and federally tariffed CPE from that CPE which is tariffed at the state level and subject to the separations process. The latter we shall refer to as embedded CPE. On the other hand, "new CPE" is that equipment which is not in service as of March 1, 1982 and is offered to consumers after this date. For accounting purposes and compliance with the corporate structure requirements, therefore, new CPE is that equipment not in the subscriber's possession as of March 1, 1982. As of this date new CPE and associated maintenance must be separated from a carrier's basic service and offered on a nonregulated basis. Moreover, all equipment tariffed with this Commission in conjunction with interstate or foreign communications shall likewise be detariffed as of this date.[12] Under this scenario we are maintaining our implementation date set forth in the *Final Decision* of March 1, 1982 for new CPE and also that CPE which is tariffed at the federal level. To the extent that unbundling and detariffing of embedded CPE tariffed at the state level and subject to the separations process is not required as of March 1, 1982, the immediacy of the need for regulatory commissions to address all the relevant regulatory implications of such deregulation is diminished. As to embedded CPE we intend to institute a separate "implementation proceeding" to address the transitional mechanisms for deregulating this equipment.[13]

50. We recognize that a bifurcated approach requires that carriers subject to the resale structure make some operational changes. We do not believe, despite AT&T's assertion, that duplication of facilities will result from a bifurcation of the transition. One option, which we intend to address in the implementation proceeding, is the provision of maintenance and other related services for embedded CPE on an unregulated basis, after March 1, 1982. Under this approach there would be no real need for separate maintenance for regulated and nonregulated CPE. One carrier-affiliated installation and maintenance force could provide service for all CPE after that date.

51. We also recognize that under a bifurcated approach some customers may pay more than other for equivalent CPE, depending upon the date service was instituted, and that a single customer, ordering the same equipment and service both before and after the transition date, might be required to deal with different entities or pay different rates. Absent such an approach, however, the progress towards a more competitive equipment environment and the promise of a more efficient and reasonably priced service mandated by Section I, 47 U.S.C. § 151, would be postponed. Offerings of new carrier-provided equipment would continue to be subject to suspicions of subsidy as a result of opportunities for pricing variations which inhere in the separations process. The bifurcation plan we have set forth freezes growth in CPE investment that is subject to the separations process as of March 1, 1982. Carrier-provided equipment offered

be equivalent to an exception from the transmission ownership bar.

[12] Excluded from the requirement is telex terminal equipment provided by the international record carriers which is being addressed separately in Docket No. 21005.

[13] Under this bifurcated approach, customers would continue their relationship with the telephone company as to their embedded CPE under local regulation until they terminated service, returned the equipment or until the end of the transition period. Any accounting changes required for the disposition of inventory as of March 1, 1982 will be addressed in the implementation proceeding.

after this date can be competitively provided relative to other equipment vendors. The advantages of such a plan are such that, on balance, we believe the public interest would best be served by the detariffing of CPE under a bifurcated plan.

d. Other Proceedings

52. As noted in paragraph 166 of the *Final Decision*, detariffing of CPE requires consideration not only of transition procedures, but also of separations implications, depreciation rates, investment recovery, asset valuation and transfer pricing. Efforts have begun in several areas. We recently appointed the members of the Joint Board in CC Docket No. 80–286, FCC 80–543, released September 25, 1980 which will consider, among other things, the separations implications of detariffing CPE. Moreover, in a separate proceeding, we have prescribed revised depreciation rates for eleven telephone companies which reflect, among other things, the effect of competition on terminal equipment lives.[14]

53. As part of Docket No. 20188 we have authorized carriers to employ the equal life group method of computing depreciation expense with respect to plant additions commencing in 1981. Alternative methods, including the use of capital recovery schedules, which allocate investment recovery on a straight line basis may also be employed for new additions. As to embedded investment, we permit the use of remaining life methods of calculating depreciation charges, subject to certain conditions. In order to implement these changes, a disaggregation of book reserves to plant categories may be required for some companies. These changes not only address a number of concerns the carriers have raised in the capital recovery area, but also facilitate identification of asset book values.

54. In CC Docket No. 79–105 we have prescribed accounting rules governing the sale of new CPE. These operations will be accounted for as non-telephone activities in separately identified sub-accounts by all carriers under the new rules. In addition, we conclude that existing accounting rules appropriately address sales of in-place CPE and maintenance of existing customer-owned terminal equipment pending the completion of transitional activities. We further amended the accounting rules to require expensing of inside wiring. The issue of whether the inside wiring portion of station connections should be detariffed is to be addressed in the next phase of that proceeding.

55. In the implementation proceeding which we will initiate shortly, we will address issues of capital recovery [15] and asset valuation, alternative mechanisms by which transition to an unregulated CPE environment may be achieved, and the appropriate time period for removal of embedded CPE investment from separations and a carrier's rate base. We will also address the potential deregulation of maintenance for embedded CPE as of March 1, 1982. Due consideration will be given to the views of consumers, carriers, state commissions and other interested parties. Because the implementation proceeding will address the manner in which embedded CPE tariffed at the state level is deregulated, we are modifying the *Final Decision* insofar as it required (a) that new state tariffs showing an unbundled charge for embedded CPE, (b) that rate levels for residential service be no higher following unbundling than before, and (c) that existing residential customers be offered an option to continue to lease the instrument(s), including maintenance, at pre-deregulation rates for a fixed period. These requirements are eliminated.

e. Applicability

56. *Inside Wiring.* Commenting parties are divided on the issue of whether inside wiring should be included within CPE and deregulated. The issue was not addressed in the earlier phases of this proceeding, and we believe that further comment is warranted before we determine whether, and to what extent, inside wiring should be deregulated. Accordingly, we will address this issue in a further notice of proposed rulemaking in CC Docket No. 79–105.

57. *Party Line.* In the *Final Decision*, at para. 161, n. 57, we excluded "CPE attached to residential party line service because such CPE cannot currently be registered under Part 68 of the Rules." Absent a control mechanism for connection to the network, there would be no institutional assurance that connection of non-carrier-provided terminal equipment to party lines would not cause harm to the telephone network,[16] or substantially disrupt service to other subscribers.

58. Both REA and RTC submitted comments in opposition to our exclusion of CPE attached to party lines. These parties note that the percentage of party line service is quite substantial in areas served by small companies, and that party line service is provided, on a functionally identical basis, to both business and residential subscribers. Moreover, practical problems arise if a regulatory scheme is imposed on party line CPE, but not other equipment. For some carriers a substantial portion of their equipment would continue to be regulated and subject to the separations process. In addition, carriers subject to the separate subsidiary requirement for the provision of CPE might also be required to separately offer and maintain regulated equipment. Upon reconsideration, we conclude that our definition of CPE subject to the *Final Decision* principles should be revised to include party line CPE. While such equipment is not registered under Part 68, we intend to examine in a separate proceeding what network and subscriber safeguards may be necessary to accommodate direct multi-vendor provision of CPE used in conjunction with multiparty service. Any necessary adjustments to the timing of party line CPE deregulation can be made in light of determinations made in that proceeding.

59. *Mobile Telephone Equipment.* The *Final Decision* did not expressly exclude all mobile radio equipment from the definition of CPE. At paragraph 161, n. 57, we noted that the status of mobile telephone equipment is currently being examined in the Cellular Mobile Radio proceeding, CC Docket No. 79–318, 77 FCC 2d 984 (1980). That proceeding only addresses mobile equipment used in conjunction with cellular systems. Motorola, suggesting that nothing in the rationale of the *Final Decision* indicates that such equipment be included in CPE, asks that we amend Section 64.702 expressly to exclude mobile radio equipment. Since this equipment can be provided on a competitive basis, there may be no reason for applying different policies. However, because the status of some mobile telephone equipment will be addressed in CC Docket No. 79–318, we believe that any determination with respect to such equipment should await final Commission action in that

[14] The studies underlying these rates were completed prior to the *Final Decision*. Although these rates do not explicitly consider the impact of this decision, they do reflect the growth of terminal equipment competition over the past several years. Pending before the Commission is a request filed by AT&T on behalf of the Bell System companies that we prescribe new depreciation rates for accounts 231 (station apparatus) and 234 (large private branch exchanges), which accounts contain the vast majority of terminal equipment affected by the *Final Decision*.

[15] Represcription of depreciation rates for terminal equipment is expected to proceed on a parallel course, utilizing the existing processes. We believe this course to be desirable because of the need to closely coordinate our represcription of depreciation rates for jointly-used plant with affected state commissions. See 47 U.S.C. Sec. 220(i).

[16] For a definition of harm, see 47 C.F.R. Sec. 68.2(g).

proceeding, regardless of whether or not it is used solely with cellular systems.

60. *Satellite Earth Stations.* We have been asked to address the status of satellite earth stations when they are located on the customer's premises. Receive-only earth stations, since the adoption of the First Report and Order in CC Docket 78-374, 77 FCC 2d 205 (1979) need not be licensed. These earth stations, like CPE in general, are manufactured and sold by a number of carriers (including carrier affiliates) and independent entities. We believe that such stations are appropriately classified as CPE. Transmit earth stations that are located on the customer's premises present a different situation. In the offering of integrated satellite systems, such a transmit earth station could constitute a necessary component of the transmission offering for network control purposes. This may not be the case, however, for those entities desiring merely to offer transponder capacity to providers of other services. Whether transmit earth stations should be accorded a different status in such situations may warrant further consideration. However, this matter is more appropriately addressed in a separate proceeding. Accordingly, earth station equipment that requires licensing under Title III of the Act is not considered CPE under the *Final Decision.*

III. Structural Separation

a. Introduction

61. In the *Final Decision* we addressed the structure under which various communications common carriers may engage in the provision of enhanced services and CPE. In essence, we removed for all carriers, except AT&T and GTE, the requirement established in the First Computer Inquiry that certain non-regulated services be offered to the public through a separate corporate entity. In the case of AT&T and GTE, we specified that enhanced services and CPE must be provided through a separate subsidiary. Various conditions affecting the degree of separation between the present organizational structures of AT&T and GTE, and their separate subsidiaries were set forth to protect the communications rate-payer. Many of the conditions were designed to reflect the degree of separation established in the First Computer Inquiry.

62. Numerous petitions for reconsideration have been submitted addressing both the determination as to which carriers should be subject to the separate subsidiary requirement and the degree of separation imposed on those carriers that are so subject. AT&T and GTE have petitioned for more lenient separation conditions, including a request by GTE that the separate subsidiary requirement not apply to it. Other parties have petitioned that this requirement should be applied to other carriers and that more stringent separation conditions be imposed, including a request for a complete ban on AT&T's entry into the enhanced service market.

63. We believe our general approach to the provision of enhanced services and CPE in the *Final Decision* is a moderate one and one that serves the public interest. Consumers and the public in general will benefit from the fullest exploitation of common carrier facilities in the provision of enhanced services by all entities. Given the structural safeguards we have imposed, no statutory objective is gained in foreclosing any carrier from providing enhanced services or CPE. Nor do we believe that structural separation is warranted where the potential costs of separation exceed the benefits and where other regulatory tools are available to aid in the exercise of our statutory responsibilities. Within these parameters we will address those arguments that question the extent to which the separate subsidiary requirement is imposed. We will also consider concerns as to the degree of separation required. However, we approach this with the view that our separation conditions will evolve over time as we gain more experience in this very complex area of communications regulation and as the marketplace continues to evolve. See *Final Decision* at para. 207. Neither absolute precision nor a complete permanence in establishing the degree of separation is a realistic objective. Our goal nevertheless is, to the extent possible given present levels of experience with the separate subsidiary regulatory mechanism, to specify the degree of separation between regulated and unregulated activities of a given carrier that maximizes consumer welfare, within the parameters of our overall statutory mandate.

b. Applicability

64. Several parties have criticized the criteria and/or analysis used in determining that AT&T and GTE alone must form separate subsidiaries to provide CPE and enhanced services. For example, NTIA proffers an alternative method to identify carriers that should be subject to the separate subsidiary requirements based on the revenues generated from interexchange services.[17] GTE argues that it is nondominant and therefore should not be required to form a separate subsidiary. Others claim that many independent telephone companies satisfy the criteria necessitating separation and therefore should be subject to the requirement. Still others assert that the specialized common carriers can cross-subsidize their enhanced services and deny equal access to their basic services.

65. In assessing the need to maintain structural separation, consideration was given to the following factors: (a) a carrier's ability to engage in anticompetitive activity through control over "bottleneck" facilities, i.e., local exchange and toll transmission facilities, on a broad national geographic basis; (b) a carrier's ability to engage in cross-subsidization to the detriment of the communications ratepayer; (c) the integrated nature of the carrier and affiliated entities, with special emphasis upon research and development and manufacturing capabilities that are used in conjunction with, or are supported by, communications derived revenues; and (d) the carrier's possession of sufficient resources to enter the competitive market through a separate subsidiary. In weighing these factors, we took the view that consumers would be best served if the separate subsidiary mechanism were imposed only where essential to assure the objectives of the Act. As to other carriers, where the risk of serious harm to statutory values appeared less, we thought it better to wait to see if competitive abuses develop which warrant further application of our separation conditions for the carrier provision of either enhanced services or CPE. See *Final Decision* at para. 223.

66. On reconsideration we conclude that GTE should be excluded from the separate subsidiary resale structure of the *Final Decision.* GTE has advanced persuasive arguments as to why it should not be subject to the separate subsidiary requirement for either enhanced services or CPE. Concerning enhanced services, the most compelling arugment tendered is that GTE is dependent upon AT&T for the vast majority of its interstate transmission needs. GTE-Telenet has also argued that the separation condition barring ownership of transmission facilities by the subsidiary would deprive it of the ability to construct its own transmission plant if AT&T facilities are either unavailable or inadequate for its service needs.

[17] Petition of NTIA at p. 10.

67. The fact that GTE has relied heavily upon AT&T toll facilities militates against its receiving the same treatment as AT&T. In fact, in our GTE-Telenet merger decision, 72 FCC 2d 111 (1979), we authorized GTE to acquire Telenet Corporation subject to several structural separation conditions which sought to ensure Telenet's position as an alternative supplier of nationwide data communications service. In that decision we stated that "our greatest concern in this matter is whether GTE will actually compete with AT&T." *Id.* at 117. The Merger decision placed on the GTE-Telenet subsidiary responsibility for providing augmented data services, and the thrust of the decision was to maintain Telenet's incentive to develop and exploit fully its packet switched technology. The *Final Decision* could restrict GTE-Telenet's potential as an alternative supplier to AT&T if GTE-Telenet were to be prevented from providing basic services or if the proscription against the GTE subsidiary's owning transmission facilities is maintained. In all likelihood GTE-Telenet would have been GTE's vehicle for providing enhanced services because various of the former's augmented data services fall within the enhanced service category established in the *Final Decision.* This combined with GTE-Telenet's continuing, substantial reliance on AT&T's transmission facilities warrants, on balance, that the separate subsidiary requirement of the *Final Decision* not apply to GTE for enhanced services. We wish to make clear, however, that in this proceeding we are not modifying in any way the conditions imposed upon the GTE-Telenet merger. These conditions are now the subject of reexamination in a separate proceeding, Docket No. 80-197, 78 FCC 2d 403 (1980). We point out, however, that should GTE engage in conduct detrimental to the interests of the communications ratepayer recourse is available under Section 208 of the Act.

68. With respect to CPE, GTE states that over 90 percent of its 2200 exchanges have fewer than 7500 main stations and that only 1.1 percent of these exchanges have over 50,000 main stations. Given that GTE's operating territories are predominantly rural, it is questionable whether the costs of separation outweigh the benefits. Based on the above-stated facts, it is not at all clear that structural separation for GTE's provision of CPE is warranted. Absent more compelling facts, we conclude that the public will be better served if the separate subsidiary requirement is removed for GTE for its provision of CPE.

69. Moreover, subjecting other independent telephone companies or specialized common carriers to the separate subsidiary requirement is not warranted at this time, based on the factors we have set forth and the regulatory concerns they address. Specialized carriers do not have captive monopoly ratepayers to whom they can pass the costs of competitive services nor do they have control of bottleneck facilities which could be employed to deny competitors entry into the market. Enhanced service providers always have the option of alternative basic transmission facilities from AT&T, for example, at cost-based prices. The need for structural solutions to stem potential anticompetitive behavior is not as great where such behavior is constrained by marketplace forces. Moreover, other regulatory tools, such as the complaint process under Section 208 of the Act, are available to the Commission where abuses do occur.

70. In a similar vein, arguments are advanced that the regulatory problems posed by the joint provision of CPE and enhanced services are common to all telephone companies, including the "leverage to manipulate customers' preferences" in these areas.[18] However, the ability of a telephone company "to manipulate customer preferences" is not a regulatory concern which the structural separation we are imposing seeks to remedy. More generally, there are fundamental aspects of the market that counsel us to draw the line right below AT&T with respect to telephone companies. First, because the enhanced service and CPE markets generally are national in scope, the ability of AT&T to cross subsidize these services is much larger than that of the independent telephone companies. Such cross-subsidization redounds to the detriment of the communications ratepayer. Second, the costs of separation are borne disproprotionately by smaller companies due to indivisibilities. These additional costs may foreclose entry into the enhanced service or CPE market for some carriers. Thus both the costs and benefits of imposing separation requirements on telephone companies are related to both firm and market size. There is no dispute in the record as to the relative size of AT&T compared to the independent telephone companies. We believe this disparity in size leads to the result that the benefits of structural separation for AT&T are greater than the costs, while this calculus is reversed for the independent telephone companies. In addition AT&T has enormous research and development and manufacturing capabilities, which greatly complicates assessing allegations of cross-subsidy.

71. In this proceeding we have performed a careful analysis of the communications industry to determine which carriers possess the ability and incentive either to cross-subsidize the provision of CPE and enhanced services or to engage in anticompetitive conduct through their control over bottleneck facilities. We have then determined for each of these carriers, or for each similarly situated group of these carriers, whether the benefits to consumers from reducing the risk of undetected cross-subsidization or discriminatory access by imposing structural remedies would be greater or less than the costs imposed by the separation requirements. We recognize the possibility of undetected cross-subsidization and other anticompetitive conduct by carriers that are not subject to the separation requirement. For purposes of this proceeding, however, we have concluded that maintaining the separate subsidiary requirement for carriers other than AT&T does not outweigh other public interest considerations.

c. Separation Conditions

72. Having modified the *Final Decision* so that the separate subsidiary requirement applies only to AT&T we now analyze those arguments addressing the degree of separation imposed on its operations.

Resale Structure

73. In the *Final Decision* we adopted a resale structure for the provision of enhanced services. Under the resale structure AT&T is required to form a separate subsidiary for the provision of enhanced services and "[i]nherent in the resale structure is the fact that the separate corporate entity may not construct, own, or operate its own transmission facilities. In essence, the resale subsidiary must acquire all its transmission capacity from an underlying carrier pursuant to tariff." *Id.* at para. 229.[19]

[18] Petition of IDCMA at p. 41.

[19] Those carriers not subject to the separate subsidiary requirement, when employing their own common carrier transmission facilities in the provision of enhanced services, must obtain transmission capacity pursuant to the terms and conditions embodied in their tariff. This proceeding does not remove a carrier's obligation to provide basic services, nor does this proceeding alter existing policies and rules under which carriers are certificated, or transmission facilities are owned or constructed. The Commission is reviewing whether various currently regulated entities are properly classified as common carriers and whether their

74. AT&T objects to the prohibition on the ownership of transmission facilities by its separate subsidiary. AT&T argues that such a restriction will prevent the subsidiary from operating as an economically viable competitor. AT&T believes the restriction will prevent the subsidiary from "meeting customers' specialized needs for transmission services, developing CPE and transmission facilities concurrently to achieve synergy and optimal price/performance, and integrating transmission facilities into a total system design in which the location of intelligence and other functions are matched to the user's special requirements." (AT&T Petition at p. 8).

75. AT&T also provides numerous reasons to support its belief that the restriction on the ownership of transmission facilities by the separate subsidiary is not necessary. It argues that "nondiscriminatory access to existing underlying facilities is already assured by their availability for resale on equal terms to affiliated and nonaffiliated suppliers of enhanced services; continued access to improved transmission facilities is assured because the supply of technological improvements to transmission facilities will not be controlled by underlying carriers, but will be provided by all who can profit from such innovation; and the potential for cross-subsidization of enhanced services by basic services is eliminated through separation of joint ownership of underlying facilities." (AT&T Petition at p. 9).

76. Before addressing AT&T's arguments, it would be helpful to set forth the scope of the proscription against ownership of transmission facilities by the subsidiary as required under Section 64.702(c)(1). In this context we are referring to that transmission medium, whether it be "radio" or "wire," 47 U.S.C. § 152, that constitutes the communications "pipeline" over which information is tranmitted. The enhanced service subsidiary need only acquire communications links pursuant to tariff, but is otherwise free to utilize its own switching equipment, network nodes, and other computer facilities necessary for the provision of its enhanced services. For example, if the enhanced services subsidiary needed a communications link between two centralized computers, or between a computer and a network node, that link must be acquired from a common carrier pursuant to tariff. Once having obtained that link, however, the subsidiary is free to add channelizing or concentrating equipment, etc. to tailor the transmission capacity to its own needs as dictated by the requirements of the enhanced services provided. The subsidiary is not precluded from constructing tranmission facilities for a third party, as long as the facilities are not owned or operated by the subsidiary. Nor do we intend that the bar on transmission facility ownership or operation encompass facilities that link various operations of a customer where its communication needs are spread among multiple buildings at a common location, such as an industrial park.

77. Within this framework, we believe AT&T's arguments that the proscription against ownership of transmission facilities will prevent the subsidiary from operating as an economically viable competitor are without merit. Marketplace developments since our *First Computer Inquiry* nearly a decade ago indicate otherwise. There are many enhanced service providers that do not own transmission facilities, yet integrate transmission facilities into a total system design that meets the needs of their customers with high quality service and at competitive prices. There is no reason to expect otherwise for AT&T's separate subsidiary. For example, using the underlying network as a basic building block, the subsidiary is permitted to aid intelligence of its own to perform enhanced services. The subsidiary is not restricted in its ability to design its services, including the ability to place intelligence either within its network components or within equipment located on the customers' premises. Neither is an underlying carrier affiliated with the subsidiary restricted in its use of packet switch technology in applications that constitute basic services. *See Final Decision* at para. 95.

78. Imposition of the facility ownership bar upon AT&T's subsidiary arises from our recognition that most enhanced service providers are and will remain dependent upon AT&T's common carrier facilities. AT&T controls the vast majority of interstate transmission facilities and local exchanges in a substantial number of major metropolitan areas. Thus several regulatory objectives assume paramount importance in affirming the proscription against the subsidiary's owning transmission facilities. First, it is crucial that AT&T make adequate transmission capacity available to enhanced service vendors on a non-discriminatory basis. Second, it is imperative that access to and use of this transmission capacity is afforded all enhanced service providers under equal terms and conditions. By establishing a structure in which the subsidiary must acquire needed transmission capacity from a carrier exercise of our powers under Sections 201–205 of the Act can ensure that all enhanced service vendors, including AT&T's subsidiary, obtain access to and use of this transmission capacity on fully equal terms and conditions. Third, the benefits of any improvements introduced into AT&T's transmission facilities to accommodate the needs of the subsidiary would become available to all users of the underlying facility. In addition, the bar against the subsidiary's owning transmission would provide an important incentive to AT&T to continue to improve its common carrier network and to assure an adequate supply of basic services compatible with enhanced service use. Such continuing improvement of this network is clearly in the public interest.

79. Thus, the facility ownership bar is fundamental to our resale structure. "Requiring the subsidiary to acquire its transmission capacity from other sources pursuant to tariff provides a structural constraint on the potential for abuse of the parent's market power through controlling access to and use of the underlying transmission facilities in a discriminatory and anticompetitive manner." *Final Decision* at para. 229. In addition, the construction authorization for common carrier facilities is premised on the licensee's providing a basic common carrier communications service, which an enhanced service is not. "Thus the subsidiary may not provide basic transmission services, for to do so would subject it to regulation and negate the structural separation of regulated and nonregulated activities." *Id.* at para. 230. We have required the separation of AT&T's nonregulated enhanced services from its regulated basic services "thereby lessening the potential that the communications ratepayer will be subsidizing its unregulated ventures." *Id.* at para. 230. AT&T controls more than 80% of the private line market. The subsidiary's ownership of transmission facilities would enable AT&T to shift some or all of its private line services to the separate subsidiary, and its dominance in this market could lead to improper cross-subsidization to the detriment of the communications ratepayers.

80. The *Final Decision* established a resale structure whereby AT&T's enhanced services subsidiary must acquire all its transmission capacity from an underlying carrier pursuant to

services must be provided pursuant to tariff. *See* Second Report and Further Notice of Proposed Rulemaking (Docket No. 79-252), FCC 80-742, adopted December 16, 1980.

tariff, and no new evidence has been submitted to warrant a different conclusion.[20] Accordingly we affirm the resale structure as set forth for AT&T in the *Final Decision*.

81. As to those contentions that the subsidiary must be able to construct its own transmission facilities if suitable facilities are not available, we would merely note that under this structure meeting the transmission needs of consumers and enhanced service vendors is the responsibility of the communications common carrier, not the enhanced service provider. The parent or carrier affiliated with the subsidiary has the option of seeking appropriate authorization to construct the requisite facilities. Indeed, the resale structure imposed here is premised upon the hope that it would encourage underlying carriers to have sufficient capacity, appropriately configured, to meet the needs of enhanced service firms without requiring our intervention under Section 214. It is anticipated that more transmission alternatives will be available to all enhanced service providers as new carriers enter the communications arena and as existing carriers provide additional capacity.

82. We recognize, as we must, that our requirement precluding AT&T's enhanced service subsidiary from owning or controlling transmission facilities would have to give way if the subsidiary could not obtain adequate transmission capacity for a highly specialized service. Thus we do not intend to imply that we would not consider granting a waiver of the facility proscription to allow the subsidiary to own or operate its own transmission facilities. Should a need develop for the subsidiary to construct or operate a specialized transmission network for a given customer, other than at a common business location (cf. para. 76 *supra*), we will consider on a case-by-case basis, requests for waiver of the facility ownership proscription imposed on the enhanced service subsidiary. Moreover, waiver requests will be considered should the subsidiary desire to obtain under contract (as opposed to under tariff) from a third party the total output of a given transmission system. In such a situation, the public-interest concerns which may arise from precluding other service vendors access to the system must be considered.

[20] AT&T cites a study by MARTECH STRATEGIES Inc. That was entered into the record in this proceeding subsequent to our *Final Decision* as support for its position. However, the primary focus of this study was not the facility ownership issue and the study fails to adequately consider the limits of the proscription as we have more clearly delineated here.

83. In determining whether to grant such a request, petitioners carry the burden of demonstrating that any negative effects on ratepayers which may arise from grant of a waiver are outweighed by the possibility of imposition of unreasonable costs upon consumers, or unavailability of an enhanced service if waiver is not granted. Such a consideration of negative effects should include, but not necessarily be limited to, those possibilities discussed in paragraphs 78 and 79 above. The Commission, in its discretion, may give notice and opportunity for comment on the request, and we will make every effort to act on petitions for waiver within 90 days of the expiration of any ordered pleading cycle. Where opportunity for comment is afforded, parties generally will be given 30 days after release of the public notice to file comments and 15 days thereafter to file reply comments.

Research and Development

84. The *Final Decision* permits the sharing, on a cost compensatory basis, of research and development work products in the area of hardware, firmware, and generic software. We required the subsidiary to perform its own design and development work for non-generic software, or applications programs. Several parties, including CBEMA,[21] question the lack of an objective standard for "compensatory," while AT&T, ADAPSO, NTIA,[22] and others are convinced we have assumed a hopeless definitional burden in attempting to distinguish among software, firmware, and hardware.

85. CBEMA's concern about the definition of "compensatory" is not surprising. It is probably not possible to clarify this term to the satisfaction of all the parties concerned.

86. We have not required third-party transactions in every area where the compensatory nature of parent-subsidiary transactions might be at issue. In particular, we have not established such a requirement with respect to research and development. We also will not attempt to anticipate all the forms that such intracorporate transactions might take, so the specificity of the term "compensatory" is necessarily limited. Still, this does not mean that we cannot offer some clarification. Our use of "compensatory" in this proceeding means that for each transaction, the parent corporation or affiliated entity must recover from its subsidiary the full cost of the transferred goods or services at the same terms, prices, and conditions that would be available to a nonaffiliated purchaser if third-party transactions were required. Since the parent would expect to earn reasonable profits on third-party transactions, it will be expected to earn similar profits on intracorporate transfers. Since it would expect to recover transaction costs and overhead loadings in its third-party transactions, it will be expected to make similar recoveries in its intracorporate transfers.

87. We realize, as IBM has pointed out,[23] that standard accounting procedures presently in use in the regulated telecommunications industry may not be sufficient to insure the compensatory nature of such intracorporate transactions where neither party is a regulated common carrier, but potential burdens on the communications ratepayer still exists. In such circumstances, it may be necessary to require the creation of additional accounting records to enable us to monitor more accurately the cost allocations within the manufacturing or research affiliates.

88. There is substantial agreement among diverse interests that the distinctions we have attempted to draw among software, firmware, and hardware are unworkable. AT&T tells us, "The technology is rapidly evolving, and the technical distinction is perishing. In the future, manufacturers will have greater capability to develop all of what is now regarded as applications software together with the hardware." [24] Others agree, although they disagree on how we should respond to such a definitional quandry. ADAPSO, for example, would have us expand our prohibition against joint work to encompass all research and development, while AT&T would have us remove any such prohibition. AT&T argues that software restrictions would leave its subsidiary at a competitive disadvantage, and deprive users of highly integrated hardware-software designs for communications equipment.

89. In the *Final Decision* we did not foreclose the subsidiary from sharing research and development capabilities with affiliated entities. At the same time we stated that "we intend to examine into the license contract arrangements and other issues generic to the use of monopoly revenues to support competitive research and development." *Id.* at para. 248. Such a proceeding is being initiated and at its conclusion we

[23] Opposition of IBM, at 29–30.

[24] Petition of AT&T, at 48.

are free to take whatever action may be appropriate, but we will not here modify our decision in this regard. It is not our intention to forestall technological contributions on the part of AT&T to the extent such contributions require some joint research and development work.

90. At the same time, we cannot permit the entry of AT&T into new markets under conditions that would expose the communications consumer to unacceptable risks of anti-competitive activity, either through cross-subsidization or through its control over access to the underlying transmission facilities. Software also is a significant cost element in developmental efforts for the competitive markets and, thus, is an area where established carriers could gain a substantial competitive advantage through misallocation of joint and common costs if joint work were allowed. AT&T does not dispute our conclusion that software costs are a large and growing part of development costs, or our conclusion that joint development work would be susceptible to cost misallocations. Beyond this, however, is the more important fact that joint software development for CPE and computer facilities of the subsidiary can also affect the manner in which information about network interfacing is conveyed to the subsidiary. First, the subsidiary may be privy to interconnection information, or information as to the technical parameters of affiliated carriers' facilities that might not be available to the general trade. Second, such joint cooperation could result in the subsidiary's obtaining advance information of changes being made to the underlying network. The separate subsidiary structure is, in part, aimed at insuring non-discriminatory access to underlying transmission facilities of the parent. At the same time the record indicates that we made unworkable distinctions as to permissible activity in the area of joint software development. We, therefore, conclude that modification of our *Final Decision* is warranted as to joint software development.

91. We remain convinced that some restrictions on joint software development are essential. We believe the best resolution of the problem is to follow the approach we have taken in our GTE/Telenet merger authorization, requiring the separated subsidiary or its outside contractors to perform all software development, including firmware, while allowing the subsidiary either to contract with affiliated or non-affiliated entities for research and develop equipment into which such software might be inserted, or to develop equipment on its own.[25] The subsidiary may purchase any equipment its parent sells to the general trade so long as any software, or firmware, contained therein is not customized, but is generic. Software may only be considered generic if it is contained, in standard form, within equipment that is sold "off the shelf" to any interested purchaser. The subsidiary is free to contract with its manufacturing affiliate to perform research and development on an exclusive basis on products and processes that do not use software. Moreover, we believe it is reasonable to expect the manufacturer, at its option, to be responsible for the installation and maintenance of its own equipment. Thus, we will not prohibit such an arrangement unless we discover evidence that the burden of misallocated installation and maintenance costs is being borne by the ratepayer. However, installation and maintenance performed by the parent or its unseparated affiliates may extend only to that hardware and software actually provided.

Information Flow Restrictions

92. Three areas of information flow were addressed in the *Final Decision*. The first consists of information relating to the basic network, including information concerning network design and technical standards, information affecting changes which are being contemplated to the telecommunications network that would affect either intercarrier interconnection or the manner in which interconnected CPE must operate, and information concerning construction plans. This information must be disclosed by AT&T to all interested parties, including its separate subsidiaries, at the same time and under the same terms and conditions. The second area of information flow relates to information dealing with research and development. This information must be transferred between parent and subsidiary on a fully compensatory basis. Finally we required that customer proprietary information acquired through the normal course of the parent's business activities must be disclosed to all interested parties at the same time and under the same terms and conditions that it is disclosed to the separate subsidiary, if disclosed at all.

93. Several parties have petitioned the Commission to reconsider its rules for each of the areas of information flow. ADAPSO, for example, seeks expansion of the requirements relating to disclosure of network information between affiliated entities. IDCMA suggests that all carriers should be required to make timely disclosures of network information. AT&T requests both a reduction in the recording and filing of information between its carriers, affiliates and subsidiaries and a provision for filing summary reports in lieu of the contracts, agreements and other arrangements. Finally several parties requested modification of the Commission's rules concerning customer proprietary information so that the confidentiality of that information could be protected.

94. We do not believe that additional information flow restrictions are warranted between entities affiliated with separate subsidiaries. Paragraph 246 of the *Final Decision* sets forth in unambiguous terms the requirement that network information must be disclosed to competitors of the subsidiaries at the same time and under the same terms and conditions as it is disclosed to the subsidiaries, if it is made available at all.

95. IDCMA submits that all carriers should be required to make timely disclosures of network information.[26] We believe this submission has some merit. We note that the absence of a requirement for structural separation does not imply that a firm does not have the incentive to behave anticompetitively. It merely signifies that we believe the costs of separation exceed the benefits. However it is clear that carriers providing basic network service, whether they must enter a competitive market through a separate subsidiary or not, have the incentive and ability to withhold information to the detriment of competition and the communications ratepayer in that competitive market. Therefore we will extend to all carriers owning basic transmission facilities the requirement that all information relating to network design be released to all interested parties on the same terms and conditions, insofar as such information affects either intercarrier interconnection or the manner in which interconnected CPE operates.

96. AT&T has requested that the rules requiring recording of transactions should be modified to include only transactions between subsidiaries and affiliated manufacturers or other transactions relating to manufacturing, purchasing of products or product research and development. Similarly AT&T believes that contracts, agreements or other arrangements

[25] Memorandum Opinion and Order, 72 FCC 2d 526.

[26] Petition of IDCMA at n. 21.

between a separate subsidiary and the carrier or its affiliates should be filed with the Commission only for these same transactions. Finally AT&T would prefer to file summary reports as a basis for on-premises auditing of such records by the Commission staff or an independent auditing staff in lieu filing all contracts with the Commission.[27]

97. We believe that such modifications to our *Final Decision* are unwarranted. The ability and incentive of AT&T to cross-subsidize competitive services need not be re-emphasized here. It is imperative, however, that all parties to this proceeding understand that the primary method to detect and police cross-subsidization and other anticompetitive behavior, once the structural safeguards for AT&T have been erected, is to have a written account of all transactions, agreements and other arrangements between the parent, affiliates and separate subsidiaries. This affords the Commission and interested parties the ability to analyze the firms' behavior to ascertain whether they are performing within permissible guidelines. We believe the framework established in the *Final Decision* with respect to the recording and filing of all arrangements between parent, affiliates and separate subsidiaries is a crucial aspect of our structural safeguards and one that is necessary to allow AT&T to enter the enhanced service and CPE markets.

98. Several parties object to the rule requiring that AT&T not provide to its separate subsidiary any customer proprietary information unless such information is available to any member of the public under the same terms and conditions. ADAPSO, for example, has argued that a carrier's customers who are also competitors of the carrier's separated subsidiary could be disadvantaged by information disclosures concerning their contractual arrangements with the parent, even if the disclosures are made publicly.[28] We believe this requirement has been misinterpreted. We are not requiring unauthorized disclosures. Our decision assumes that disclosures of customer information will take place only with the approval of the affected customers, thus obviating ADAPSO's objection.

Marketing of Network Equipment by the Separate Subsidiary

99. The *Final Decision* barred a separate subsidiary providing both CPE and enhanced services from marketing any transmission or other network equipment because of the potential of the communications ratepayer bearing the cost of non-compensatory intracorporate transfer pricing that may inure to the benefit of the subsidiary. *Id.* at para. 253. AT&T disputes this restriction, claiming that nowhere in the *Final Decision* does the Commission explain how the communications ratepayers might be injured by the subsidiary's marketing of other equipment, or how the subsidiary would unfairly benefit, or how this condition guards against the potential injury.

100. The concept of intracorporate transfer pricing for vertically integrated, rate-of-return regulated, dominant firms is a simple one. Specifically, AT&T's telephone companies have the incentive to purchase equipment from their affiliates, even if that equipment is not completely competitive with that of the general trade, because as a general proposition the affiliates are not subject to a rate of return constraint. This, then, is just a specific example of the broad proposition that firms subject to public utility regulation have an incentive to transfer costs to jurisidictional activities and profits to non-jurisdictional activities. In the present context, the incentive may be manifested by the subsidiary's serving as a conduit, buying equipment from the company's manufacturing affiliate and marking up the equipment for sale to the operating companies.

101. In addressing AT&T's argument, our concerns are limited to the potential impact on the communications ratepayer from intracorporate transfer pricing. The stated prohibition appears too broad in that it would foreclose the subsidiary from marketing equipment to non-affiliated entities. These concerns can be met by revising the proscription and merely restricting affiliated entities from acquiring such equipment from the separate subsidiary if the equipment is not manufactured by the subsidiary. This more appropriately guards against the potential injury to the ratepayer, and we so modify the *Final Decision.*[29]

Administrative Services

102. With respect to the degree of separation required for administrative services, ADAPSO has requested two specific clarifications.[30] Regarding our statement in para. 255 of the *Final Decision* that parent and subsidiary will be allowed to share administrative services on a cost reimbursable basis, ADAPSO has asked for a listing of the services included. In this area we will follow the pattern established by the Bureau Audit Report for GTE/Telenet, permitting the sharing of the following administrative services: accounting, auditing, legal services, personnel recruitment and management, finance, tax, insurance, and pension services. *See GTE/Telenet Merger,* 78 FCC 2nd at 427. The sharing of physical space should be confined to that used for joint administrative services, as listed above.

Advertising

103. The propriety of joint advertising has been questioned by IDCMA.[31] In the *Final Decision* we prohibit the parent corporation from engaging in "the sale or promotion of enhanced services or customer-premises equipment, on behalf of the separate corporation."[32] This means that entities affiliated with the subsidiary may not engage in advertising that is product or service specific on behalf of the subsidiary. Since institutional advertising is not product or service specific, it will be permitted on a joint basis. There is no harm to the communications ratepayer in letting the parent take advantage of its good will. Cf. *GTE Service Corp.* v. *FCC,* 474 F.2d 724, 732–736 (2d Cir. 1973).

Financing and Transitional Reporting

104. In our *Final Decision* we rejected a requirement of outside financing, pending a review of the subsidiary's capitalization plans, partly because "the corporate and regulatory implications of outside financing have not been addressed in any significant detail in the course of this proceeding. Prior to imposing such a requirement we believe these areas deserve further exploration." *Id.* at para. 257. In subsequent filings this subject has received more attention and substantial questions have been raised. The record is still not adequate to support a conclusive finding prior to our review of capitalization plans, but other issues that have been raised deserve some immediate attention. Earnings of the subsidiary from unregulated activities shall not be imputed to the parent's regulated activities or serve to alter the parent's revenue requirements.

105. We required that the separate subsidiaries obtain Commission approval as to capitalization. Several parties have voiced the concern that the Commission will not be in a position to examine capitalization plans adequately

[27] Petition of AT&T at pp. 52–54.

[28] Petition of ADAPSO at p. 20.

[29] Absent practices which adversely affect communications consumers, anticompetitive concerns should be left to the antitrust authorities and the antitrust laws. Where the factual premise of harm to communications customers can be established, however, we would continue to exercise our jurisdiction in aid of the goals of the Communications Act.

[30] Petition of ADAPSO, at 23–27.

[31] Petition at IDCMA at p. 21.

[32] Appendix, para. 64.702(d)(1).

without information on the expenses incurred by AT&T in the interim period before structural separation occurs. We believe these parties have demonstrated a need for a mechanism to control, and to hold AT&T accountable for, the expenses incurred in the interim period. These expenses relate to the costs of setting up the separate subsidiaries and to the costs of developing the CPE and the enhanced services that will be offered by the unregulated subsidiaries after separation. Therefore, we are requiring AT&T to 1) account for all expenses incurred to date relating to existing and future enhanced service offerings; 2) account for all expenses incurred to date that directly relate to the separate subsidiary; and 3) submit a plan describing accounting methodology for the interim expenses relating to the provision of enhanced services.[33] Such a plan should include a breakdown of all major categories of expenses. This information shall be filed within 30 days from the release of this order and an update provided every six months thereafter to reflect additional expenses incurred. Finally, the capitalization plans for the separate subsidiary must be filed with the Commission at least 120 days prior to the formation of the separate subsidiary in order to allow time for public comment.

IV. Legal Considerations

a. Introduction

106. Our *Final Decision* in the Second Computer Inquiry is the culmination of a comprehensive examination of regulatory issues raised by the ever-increasing use of computer processing technology and by the interdependence of this technology and common carrier communications services. On reconsideration of this decision, petitioners have challenged our authority to: a) adopt the basic/enhanced classification scheme for services provided over the telecommunications network; b) preempt the states and deregulate CPE in the manner proposed; c) impose structural separation limitations on certain carriers possessing monopoly control over a significant portion of the telecommunications network; and d) construe the 1956 Western Electric Consent Decree [34] as not foreclosing AT&T's participation in the enhanced services and CPE markets.

[33] It is also our intent that no earnings of the subsidiary be imputed to the regulated activities of affiliates for determining either their revenue requirements or their proper return on investment.

[34] United States v. Western Electric Co., 1956 Trade Cas. 71,134 (D.N.J. 1956).

b. Jurisdiction

107. *The Final Decision, 77* FCC 2d 384 (1980), draws a distinction between basic transmission services, which encompass traditional common carrier communications services, and enhanced services. 77 FCC 2d at paras. 90–94, paras. 114–18. There we rejected a proposal set forth in the *Tentative Decision* to break the enhanced services category into subcategories based on services' communications or data processing nature. *Id.* at paras. 102–10. In so doing, we eliminated the concepts of "hybrid communications" and "hybrid data processing" developed in the *First Computer Inquiry*. Cognizant of the rapid development of computer and communications technology and their concomitant market applications in a distributed data processing environment, we concluded that any refinement of enhanced services into subcategories would soon become obsolete.

108. We determined in the *Final Decision* that enhanced services are subject to the Commission's ancillary jurisdiction. The decision indicates that this agency receives subject matter jurisdiction over enhanced services under Section 2(a), 47 U.S.C. § 152(a), which states that the provisions of the Communications Act "shall apply to all interstate and foreign communication by wire or radio and all interstate and foreign transmission of energy by radio, which originates and/or is received within the United States. . . ". The *Final Decision* supports this jurisdictional assertion by reference to our mandate in 47 U.S.C. § 151 and the use of "communication" and "transmission" in 47 U.S.C. § 153(a) and (b). *Id.* at paras. 124–125. Having asserted Section 2(a) jurisdiction, we found, on the basis of the detailed record developed in this proceeding, that extensive regulation of enhanced services is unnecessary at present. *Id.* at paras. 127. We did conclude, however, that our jurisdiction over enhanced services allows us to impose cetain separate subsidiary requirements where necessary. *Id.* at para. 132.

109. In the *Final Decision* we recognized that our demarcation of the basic/enhanced services boundary, as well as our view of agency jurisdiction over these services and their providers, would give rise to significant debate. We discuss issues raised in the Petitions for Reconsideration on these topics in three section belows. These sections deal with the line which we draw between basic and enhanced services, with our jurisdiction over enhanced services and with our power to impose separate subsidiary requirements on certain providers of enhanced services and CPE. We briefly address questions of adequate notice under the Administrative Procedure Act in a fourth section below.

110. (1) *Line of demarcation between basic and enhanced services.* Petitioners disagree about the propriety of our basic/enhanced distinction. ARINC, CBEMA and IBM specifically endorse the manner in which we distinguished between Titles II regulated basic services and enhanced services. GTE Telcos, Telenet/CNS and Xerox object to the approach taken in the *Final Decision.* Telenet argues that enhanced communications services meet what it terms "the appropriate tests of common carrier status". Telenet contends that the Commission has in the past classified services as common carrier services which would now be reclassified "enhanced". Telenet and the GTE Telcos maintain that Commission characterization of these services as enhanced is an unlawful withdrawal of Title II jurisdiction. They state that this Commission lacks the authority to "forbear" from regulation of enhanced services under Title II. Xerox states that the Commission has historically recognized entities providing "hybrid communications services" as common carriers and has regulated them as such.

111. Having studied petitioners' arguments, we remain convinced that the distinction drawn in the *Final Decision* between basic common carrier services and enhanced services is a reasonable and valid one. We foresaw that any boundary which we set between basic and enhanced services would be questioned. We stated:

> We appreciate there can be disagreement as to the line we have drawn between basic and enhanced services. Plausible arguments can be tendered for drawing it elsewhere. At the margin, some enhanced services are not dramatically dissimilar from basic services or dramatically different from communications as defined in *Computer Inquiry I.* But any attempt to draw the line at this margin potentially could subject both the enhanced services providers and us to the prospect of literally hundreds of adjudications over the status of individual service offerings. We have noted the danger that such proceedings could lead to unpredictable or inconsistent regulatory definitions. See para. 107 *supra.* Such proceedings also could consume a very significant proportion of the resources of this agency. The requirement to devote significant resources to try to make individual service distinctions would necessarily reduce the resources available for regulating basic services and ensuring non-discriminatory access to common carrier telecommunications facilities. *Final Decision* at para. 130.

112. We note that even if we shift somewhat the boundary between Title II regulated services and other services as delineated by the *First Computer Inquiry* we have acted within our discretion as an administrative agency. If an administrative body acts based on "reasoned analysis" consistent with the language and intent of its statutory mandate, "[a]n agency's view of what is in the public interest may change, either with our without a change in circumstances." *Greater Boston Television Corp.* v. *FCC*, 444 F.2d 841, 852 (D.C. Cir. 1970), *cert. denied*, 403 U.S. 923 (1971). As the Second Circuit stated very recently, "[t]he FCC's own construction of its enabling statute, even if it is a changing one, is entitled to deference from the courts." *New York Telephone Co.* v. *FCC*, No. 1137, slip. op. at 5642 (2d Cir. Sept. 17, 1980). We have articulated a reasoned analysis for our action in the *Final Decision*. We noted that, "the reality that technology and consumer demand have combined to so overrun the definitions and regulatory scheme of the *First Computer Inquiry* that today no comparable, minimally enduring line of demarcation can be drawn." *Id.* at para. 120.[35]

113. Furthermore, in our decisions in both the *First Computer Inquiry* and in *Resale and Shared Use* we recognized that any boundary then drawn between common carrier communications services and other services with a communications component was tentative. We were aware that we might need to realign our distinction as technology and services developed. The result of such a shift could be that certain services which had previously been on the "common carrier" side of the regulatory boundary would no longer be regulated under Title II. In our *Resale and Shared Use* decision on reconsideration we specifically stated:

> Thus if what is ultimately offered to the public is "data processing" or anything other than "communications", this proceeding is not applicable to such activity. The question as to what is "data processing" or "communications" is at issue in docket No. 20828. This proceeding is not concerned with the definitions of those terms, and we assume herein that our jurisdiction attaches only to the activities which are found to be "communications."

62 FCC 2d at 600. *See also First Computer Inquiry Final Decision*, 28 FCC 2d at pp. 296–298.

114. We have in the past decided admittedly close factual questions about whether particular services, with some similarities to common carrier services, fall within our Title II jurisdiction. The Courts have recognized our expertise in making such determinations. *FCC* v. *Midwest Video Corp.*, 440 U.S. 689 (1979) (cable television systems); *AT&T v. FCC*, 572 F.2d 1725 (2d Cir. 1978) (shared use of communications services); *American Civil Liberties Union v. FCC*, 523 F.2d 1344 (9th Cir. 1975) (cable television access channels); *NARUC v. FCC*, 525 F.2d 630 (D.C. Cir. 1976) (specialized mobile radio); *Philadelphia Television Broadcasting Co.* v. *FCC*, 358 F.2d 282 (D.C. Cir.), *cert. denied*, 325 U.S. 837 (1966) (cable television systems).

115. In their petitions Xerox and Telenet contend that we cannot forbear from regulating enhanced services under Title II of the Act. These petitioners have misapprehended our factual conclusion in the *Final Decision* that enhanced services are not common carrier services. *Id.* at paras. 121–23. Hence, forbearance from Title II regulation of enhanced services is not an issue in this proceeding.[36]

116. Any argument which leads to the conclusion that all the myriad types of services provided over common carrier facilities are necessarily Title II services must fall of its own weight. As we indicated in the *Final Decision* at para. 109: "(T)here are literally thousands of unregulated computer service vendors offering competing services connected to the interstate telecommunications network." This Commission has never regulated all the services provided over common carrier facilities. As an evolution of determinations made in the *First Computer Inquiry*, we have in this proceeding delineated those services which are outside the scope of Title II. Basic services are regulated under Title II, and the basic service category includes those kinds of services that have traditionally been regulated under Title II. See para. 10, *supra*, and *Final Decision* at paras. 93–96. On the other hand our enhanced category reflects services which are different in kind from basic services and for the most part have not been regulated under Title II. In addition, we have, in a factual context analyzed the characteristics of enhanced services within the framework of our overall statutory mandate and have rejected further classification of different enhanced services for purposes of Title II regulation. *Final Decision* at paras. 107–113. Under this structure a workable and reasonably enduring demarcation is established as to the scope of Title II jurisdiction.

117. As noted in our *Final Decision*, para. 123, we believe that the critical regulatory line we have drawn between basic and enhanced services is fully consistent with *NARUC I, supra*. As discussed in our *Final Decision*, enhanced services do not fall within the criteria set forth in *NARUC I* for determining what is a common carrier offering; that is, enhanced services are specialized services not offered on an indifferent basis. We also expressed, in our *Final Decision*, reservations about certain aspects of the Court's opinion which attempted to focus more on an *a priori* definition of common carriage (based on historical or common law interpretations), rather than on the specific factual nature of the service offered and on a demonstrated need for the Commission to impose common carrier obligations on such service providers. We believe that in our current determinations, we are free, and perhaps required, to consider empirically-derived distinctions between different types of activities and to implement such destinctions in a principled manner that is consistent with our statutory goals. The regulatory treatment of any particular activity must thus be derived from a calculus which considers whether a statutory purpose is served by such treatment. *See Philadelphia Television, supra*.

118. In dealing with the question of which entities were to be regulated as common carriers, *NARUC I* focused on historically derived criteria relating to how a particular service is offered to the public as well as on the Commission's determination as to whether Title II obligations should be imposed. In our *Final Decision*, we pointed out some of the deficiencies of a "holding out" test which focuses only on the intentions of

---

[35] A general principle of administrative law is that regulatory agencies may alter their interpretation or application of their governing statute. For example, the Supreme Court sustained an Interstate Commerce Commission decision in which that agency changed its views of its jurisdiction over trailer-on-flatcar services. The Court concluded:

> [T]he Commission, faced with new developments or in light of reconsideration of the relevant facts and its mandate, may alter its past interpretation and overturn past administrative rulings and practice. In fact, . . . this kind of flexibility and adaptability to changing needs and patterns of transportation is an essential part of the office of a regulatory agency. Regulatory agencies do not establish rules of conduct to last forever; they are supposed, within the limit of the law and of fair and prudent administration, to adapt their rules and practices to the Nation's needs in a volatile, changing economy.

American Trucking Ass'n., Inc. v. Atchinson, Topeka & Santa Fe Railway Co., 387 U.S. 397, 416 (1967). *See also* Andrus v. Sierra Club, 442 U.S. 347, 358 (1979); NIRB v. J. Weingarten, Inc., 420 U.S. 151, 184–66 (1975); Public Interest Reserach Group v. FCC, 522 F.2d 1060, 1065–66 (1st Cir.), *cert. denied*, 424 U.S. 965 (1975).

[36] For the record, we disagree with the view that we lack the authority in proper circumstances to forbear from the application of Title II regulatory mechanisms to acknowledged communications common carriers. We are addressing this issue in a separate proceeding. *See* Second Report and Further Notice of Proposed Rulemaking, Docket No. 79–252.

a service provider and could leave to such an entity's discretion whether or not an obligation to serve on a nondiscriminatory basis will be imposed. Moreover, it is clear that to the extent *NARUC I* considered questions only with regard to the nature of the service *provider*, rather than the nature of the *service*, it does not answer the question in this proceeding. We believe, therefore, that the second prong of the *NARUC I*, test, i.e., the Commission's determination of the need to impose an obligation to serve the public indifferently is critical to our discussion here. 525 F.2d at 642–43. In this respect, we believe that our approach in this proceeding draws on, and can be reconciled with the D.C. Circuit's *NARUC I* decision.

119. We are not persuaded of by the argument GTE Telcos and Telenet/CNS that the line of cases beginning with *Packet Communications, Inc.*, 43 FCC 2d 922 (1973), obliges us to retain former classifications in the communications/data processing area. To speed processing of its application, the applicant in *Packet Communications, Inc.*, PCI, was " . . . willing to have itself treated as a traditional common carrier, whether or not the Commission [would] ultimately determine that such service should be regulated by it as common carriage." 43 FCC 2d at 922–23. PCI indicated that it was ". . . not now proposing to offer hybrid data processing service, but rather is proposing to offer a pure communication service". 43 FCC 2d at 924. Furthermore, the applicability of Title II was generally assumed, rather than focused precisely upon, in the ensuing decisions, *Graphnet Systems, Inc.*, 44 FCC 2d 800 (1974), and *Telenet Communications Corp.*, 46 FCC 2d 680 (1974). The fact that parties to earlier proceedings and the Commission assumed certain findings without discussing the point does not confer common carrier status for all time.

120. (2) *Jurisdiction over enhanced services.* The preponderance of petitions for reconsideration addressing the question of our jurisdiction over enhanced services contend that the Commission does not have jurisdiction over all enhanced services or all enhanced service providers. Petitioners state that this Commission should narrow the focus of its jurisdictional assertion either by stating that we do not have authority over enhanced services which are primarily data processing services or that we have no jurisdiction over certain classes of service providers and the services offered by them. ANPA, ARINC and Xerox maintain that services which are primarily data processing in nature or "hybrid data" services are outside our reach. ADAPSO, IBM and IDCMA argue that this Commission should only extend its jurisdiction to enhanced services offered by common carriers and their affiliates. CBEMA and Sperry Univac suggest that we only assert jurisdiction over enhanced services provided by dominant carriers or their affiliates. On the other hand, AT&T and NTIA support the jurisdictional claim made in the *Final Decision.*

121. After review of petitioners' arguments we conclude that clarification of our assertion of jurisdiction over enhanced services would be helpful. Various statements in the *Final Decision* may reasonably be read as asserting jurisdiction over all enhanced services. We seek to make clear on reconsideration that it is not our intent in this proceeding to assert that *any* service or activity in which communications is a component is within the subject matter jurisdiction of Section 2(a) of the Communications Act. On the other hand, we do not here exclude *a priori* all enhanced services from within the scope of Section 2(a) of the Act either. The question of whether a specific activity is "communications" is a mixed question of fact and law, and thus one which, we believe, is most appropriately left for a case-by-case determination when the necessary facts are before us. Thus, we need not and should not resolve in the abstract questions of whether any enhanced services, while clearly not within our Title II jurisdiction, may be otherwise within our jurisdiction.

122. At the outset we note that some petitioners urge a delineation of jurisdiction which would render either all enhanced services within the Commission's jurisdiction or all enhanced services beyond our jurisdiction. We reject this categorical approach. As has often been recognized by the courts and by this agency, the Communications Act does not rigidly compartmentalize our jurisdiction. The Act includes only imprecise definitions of our mandate in Section 2(a) and the definitions of wire and radio communications in Section 3(a) and (b). As the Supreme Court has recognized repeatedly, the imprecision which necessarily accompanies any broad conferral of legislative authority serves an important purpose of permitting the Commission to deal with a dynamic and constantly changing industry through case-by-case evolution and delineation of agency authority. *NBC* v. *United States*, 319 U.S. 190, 219 (1943). Since such fully delineated jurisdicitional grant—based on specifically delineated inclusions and exclusions of authority—is not the general thrust of the Act, we see no reason to conclude that in delegating authority to the Commission, Congress intended that we delineate Commission jurisdiction over enhanced services on a rigid categorical basis. While identifying the dividing line between services for purposes of determining the relevant regulatory scheme under Title II or Title III is appropriate when that precise issue is before us, as was the case in creating the basic/enhanced classification scheme, the establishment of rigid categories that go to the essence of Commission jurisdiction under Title I would be inappropriate and unwarranted.

123. Moreover, even if we were capable of making findings in a generic context on the question of whether any enhanced service is within the scope of Congress' jurisdictional grant to the Commission, more would be required before any action on our part would be sustainable. Recent Supreme Court and federal appellate court decisions relating to the Commission's ancillary jurisdiction show plainly that beyond the threshold 2(a) finding, we must also determine whether a proposed exercise of agency jurisdiction would serve a relevant statutory purpose and whether there is an adequate factual predicate shown for the proposed agency action. *United States* v. *Southwestern Cable Co.*, 392 U.S. 157, 173 (1968); *Midwest Video Corp.* v. *FCC*, 406 U.S. 649, 659–60 (1972); *Home Box Office* v. *FCC*, 567 F.2d 9, 36, 4043 (1977).

124. Under this three prong test, assertion of Commission jurisdiction, and determinations of the limits of our ancillary jurisdiction, require a more pragmatic response; such issues must be dealt with in a specific, factual, and individualized context. Whether a given activity falls within or outside Section 2(a) of the Act is a factual determination which cannot be divorced from the concrete matter in dispute or from consideration of the relevant statutory purpose to be served by any assertion of jurisdiction. Moreover, assuming the statutory jurisdictional nexus exists, the exercise of such jurisdiction through specific agency action must be predicated on the need to satisfy an overall statutory purpose or objective.

125. Within this context we conclude that such a statutory nexus exists for the assertion of Commission jurisdiction over the provision of enhanced services by communication common carriers. We now assert jurisdiction over the terms and conditions of a common carrier or

its affiliate's provision of enhanced services but only insofar as such offerings affect our traditional Title II concerns that there be no unjust or unreasonable discrimination in the offering of Title II services and that such regulated services not cross-subsidized enhanced services or otherwise negatively affect communications ratepayers. We are entitled to some leeway in choosing which jurisdictional base will most effectively advance those congressional objectives, such as effective rate supervision, embodied in the Communications Act. *Philadelphia Television, supra* at 284.

126. We have concluded that we have jurisdiction to regulate a carrier's participation in the provision of enhanced services under *GTE Service Corp.* v. *FCC*, 474 F.2d 724, 731 (1973) (hereinafter *GTE Service*), because these carriers' enhanced services activities "may substantially affect the efficient provision of reasonably priced communications service". In *GTE Service* the Second Circuit found that the Commission had authority to promulgate rules governing common carrier entry into data processing services because these rules were designed to ensure that communications services be provided efficiently and at reasonable rates. 474 F.2d at 731–32. It stated:

> The rules we are now considering are generically based upon the primary charge of the Commission that its carriers provide efficient and economic service to the public. The burgeoning data processing activities of the common carrier pose, in the view of the Commission's a threat to efficient public communications services at reasonable prices and hence regulation is justified under its broad rulemaking authority. 474 F.2d at 730.

127. In *GTE Service*, the court reasoned that the rules which it had upheld were "supported by the Commission; concern that its regulated carriers continue to provide the public with efficient and economic telephone service." 474 F.2d at 733. The court stated:

> The *media via* approach of "maximum separation" of services is logically directed at eliminating the potential hazards to efficient and economic phone service which is clearly the Commission's primary responsibility and interest here. Specifically, the Commission was concerned that data processing costs would be passed on directly or indirectly to the public consumer of telephone services and that revenues derived from common carrier services would be used to subsidize data processing services. This concern is met by rules 64.702(b), (c)(1), (2) and (3). . . . These rules effectively reduce the possibility of shifting costs, hiding operating or advertising expenses or any juggling of accounts which might otherwise occur. The efficiency of carrier service presumably is maintained and secured by the corporate, physical and financial separation prescribed by the regulation. 474 F.2d at 732.

128. Furthermore, the Second Circuit sustained a rule prohibiting common carrier leasing or selling of computer system components or extra capacity because of the effect which these activities could have on common carrier facilities provisioning, regulated under Section 214. The court found that this rule ". . . is aimed at the protection of efficient telephone service to the public by eliminating the possibility of a diversion of facilities to other purposes". 474 F.2d at 732.

129. The import of the holding in *GTE Service* is that this Commission can regulate a common carrier's provision of enhanced services because the provision of such services by a carrier may affect the carrier's Title II regulated services.

> While these cases [prior Communications Act jurisdiction cases] do not deal with the precise issue here under consideration, they nevertheless point the direction that must be followed in interpreting the Commission's authority under the Communications Act. The plain implication of these precedents is that, even absent explicit reference in the statute, the expansive power of the Commission in the electronic communications field includes the jurisdictional authority to regulate carrier activities in an area as intimately related to the communications industry as that of computer services, where such activities may substantially affect the efficient provision of reasonably priced communications service. We so hold. 474 F.2d at 731.

130. As we noted above, at present only enhanced services provided by common carriers or their affiliates for whom the Commission already has Title II responsibility seem likely to affect the efficient provision of reasonably priced communications service. The Commission is legitimately concerned that cross-subsidization of enhanced services by basic common carrier services can influence the rates for basic services regulated under Sections 201 through 205. *GTE Service* also indicates that the Commission can regulate the use of carrier facilities to make certain that facilities subject to Title II regulation not be diverted to use in the data services area. Again, the basis for governing use of facilities either for data processing or for communications services is that the Commission has broad jurisdiction to regulate common carrier activities.

131. Precedent dealing with the authority of other regulatory agencies reinforces our view that the Commission can regulate a carrier's participation in activities which otherwise might not be within its jurisdiction when these activities are engaged in by carriers and when they have a potential impact on regulated activities. The Supreme Court has held that the Interstate Commerce Commission is empowered by a combination of Interstate Commerce Act provisions, including its public interest mandate, to regulate motor carrier equipment leasing practices in order "to protect the industry from practices detrimental to the maintenance of sound transportation services consistent with the regulatory system" in *American Trucking Association* v. *United States*, 344 U.S. 298, 310 (1953). Furthermore, the D.C. Circuit found that the Civil Aeronautics Board could rely on "a combination of sections of the Federal Aviation Act", including its public convenience and necessity mandate, to regulate "the actions of air carriers and their affiliates in order to protect the finanical integrity of the carriers so as to foster sound economic conditions in air transportation" in *United Air Lines, Inc.* v. *C.A.B.*, 569 F.2d 640, 649 (1977). Here the D.C. Circuit supported the CAB's conclusions that the acquisition of control by holding companies over air carriers presents a "substantial danger of harm to the carriers' ability to serve the public convenience and necessity" and that this formed a "sufficient basis for the Board to take preventive measures." 569 F.2d at 653. The court stated:

> What is involved in this case is neither an attempt by the Board to prohibit holding companies from acquiring air carriers nor an attempt to "control the financial structure" of air carriers. Rather, the Board is seeking to regulate financial activities by air carriers that affect the ability of the carriers efficiently to serve the public convenience and necessity. This is one of the most basic powers of the Board.

569 F.2d at 640.

132. Thus, we believe that we have properly declined various petitioners' requests that we make "final" determination of the precise contours of our jurisdiction in this broad policy making proceeding rather than in particular contexts when the specific facts of the matter would be before us. Moreover, we have not found, as we have clearly stated, and here reiterated, that any relevant statutory purpose would be served by regulating such activities. On the other hand, both in the *Final Decision*, and here on reconsideration, we have pointed out that we could regulate the carrier's participation in the very same activities when offered in connection with other currently regulated activities. The definitions of wire and radio communications in Section 3 (a) and (b)

which include reference to "all instrumentalities, facilities, apparatus and services . . . incidental to such transmission" lend credence, we believe, to focusing the agency's regulatory powers only on those activities with respect to which a clear nexus with specifically conferred responsibilities can be demonstrated. We, therefore, see no reason to enter at this time the jurisdictional thickets presented by Section 2(a) together with Sections 3 (a) and (b) insofar as the activities of those who are neither licensed under Title III or certificated under Title II are concerned.

133. Thus we have in this proceeding established several demarcations in assessing the parameters of jurisdiction under the Act. First, we have classified network services as either basic or enhanced for purposes of delineating the scope of Title II. Under this scheme common carrier regulation addresses the manner in which transmission capacity is made available for the movement of information. Excluded from common carrier regulation are services where communications is only a component of a service which is different in kind from the offering of transmission capacity. Second, a further distinction has been made relative to the scope of Commission jurisdiction over a carrier's participation in the provision of enhanced services. We have not addressed the extent, if any, of our jurisdiction over enhanced services. We have asserted jurisdiction only where a statutory nexus exists. This approach is reasonable and consistent with our statutory purpose, since it is the role of this Commission to apply regulatory mechanisms where warranted. In this regard, specific attention is given to the manner in which enhanced services are provided by common carriers.

134. (3) *Jurisdiction to order the establishment of separate subsidiaries.* In the *Final Decision* we removed the maximum separation requirements established in the *First Computer Inquiry* from all carriers except AT&T and GTE. We concluded that maintaining the requirement that AT&T and GTE offer enhanced services and CPE on a resale basis through a fully separated subsidiary was necessary to guard against potential abuses which would disserve the interests of the communications rate payer. On reconsideration we have decided that GTE need not offer enhanced services through a fully separated subsidiary. See para. 63 *supra.*

135. In its petition, AT&T "reserves" its position that the Commission generally lacks authority to require structural separation. In any case, it states that it could adjust to the separation scheme proposed with modifications. AT&T Petition at pp. 6–9. GTE and Telenet/CNS maintain that imposition of the separation requirement on only two carriers is deficient constitutionally and under the Communications Act. USITA lauds the Commission for removing the separation requirement from all telephone companies except AT&T and GTE. RTC also approves of our removal of the separation requirement from most telephone companies. RTC states that our broad authority under Title II to enforce interconnection and nondiscrimination requirements on telephone companies operating on an integrated basis should amply protect the communications consumer. ADAPSO and ICDMA assert that we acted within our statutory mandate and constitutional bounds when we imposed the separation requirements on AT&T and GTE. They suggest that we consider placing these requirements on additional telephone companies as well. Finally, ANPA alleges that we committed a "legal error" by not undertaking a "cost/benefit" analysis to decide whether to impose additional structural restrictions on AT&T and GTE. Having reviewed the petitions, we conclude that we have jurisdiction under the Act to impose structural separation on AT&T. Furthermore, we have determined that subjecting AT&T and not others to structural separation does not amount to unlawful discrimination under the Communications Act or the Constitution. Our decision on reconsideration not to impose structural separation on GTE moots GTE's arguments that since GTE itself is not a common carrier it cannot be subjected to structural separation and that such structural separation is a violation of equal protection guarantees.

136. We have authority under the Act to impose structural safeguards on communications carriers to fulfill our regulatory responsibilities. See *Southwestern Cable* and *GTE Service.* In *GTE Service,* the Second Circuit upheld our authority to require that communications carriers offer data processing services only through a maximally separated subsidiary. Structural remedies have been repeatedly utilized by us as a regulatory tool and have been recognized by the courts as serving an important statutory purpose. *See United States* v. *FCC,* (D.C. Cir. No. 77–1249, Mar. 7, 1980) and *Final Decision* at fn. 103.

137. Our imposition of separation requirements on AT&T is not unlawfully discriminatory under the Communications Act. In our *Final Decision* we evaluated carriers' ability to engage in anticompetitive activity and their ability to absorb the costs of separation and still find it worthwhile to enter the competitive, and thus riskier, enhanced services market. We concluded, based on the relative size of AT&T and GTE as well as the diverse national markets which they serve, that we needed only to impose a resale structure on AT&T and GTE. *Id.* at paras. 215–232. We ruled that all other entities providing basic services were subject to the full range of Title II regulation. *Id.* at para. 264. We reevaluate today our assessment in the *Final Decision* of GTE's ability to engage in anticompetitive activity and conclude that changing GTE's corporate structure is not now necessary. Our assessment of the need to impose structural separation on AT&T remains valid. We can continue to enforce our interconnection and nondiscrimination requirements where structural separation is not warranted. *Bell Telephone of Pennsylvania* v. *FCC,* 503 F.2d 1250, 1273 (3d Cir. 1974), *cert. denied sub nom., AT&T* v. *FCC,* 422 U.S. 1076 (1975).

138. *Philadelphia Television* establishes our broad discretion to determine the choice of regulatory tools applicable to particular services in general; and *GTE Service* establishes our broad discretion to choose between structural remedies or solely conduct regulation in the communications/data processing area. 474 F.2d at 731. Furthermore, the *First Computer Inquiry* separation rules upheld in *GTE Service* did not apply to all carriers. These rules exempted carriers with operating revenues not in excess of $1,000,000 annually. 474 F.2d at 730, n.7. A regulatory scheme marked by traditional Title II regulation of all carriers and imposition of a separate subsidiary structure on AT&T is within our "broad discretion in choosing how to regulate" under *AT&T* v. *FCC,* 572 F.2d 17, 28 (2d Cir. 1978). We reject ANPA's contention that we failed to undertake a "cost/benefit" analysis of whether to impose other structural restrictions and that this amounts to legal error. Our discussion in the *Final Decision* demonstrates that we carefully assessed the need for structural limitations imposed. *Id.* at paras. 233–60. Moreover, we noted that there must be a recalculation from time to time "to ensure in the first instance, that the balance was correctly struck here and, second, that important events have not caused a disequilibrium to develop". *Id.* at para. 207.

139. (4) *Notice.* We reject the argument by some parties that the Commission did not provide adequate notice, under Section 553(c) of the Administrative Procedure Act, of its intent to assert jurisdiction over all enhanced services and to order the unbundling of all CPE. ANPA states that notice about assuming jurisdiction over all enhanced services was not given. Xerox questions the adequacy of notice about Commission jurisdiction over hybrid data processing and all CPE. ATA, ATU and NARUC maintain that they were not properly notified of CPE unbundling and detariffing. In fact, the public received adequate notice and a "fair opportunity to present their views on the contents of the final regulatory plans proposed". *BASF Wyandote* v. *Costle,* 598 F.2d 637, 643–46 (1st Cir. 1979). We specifically solicited comments in the *Tentative Decision and Further Notice of Inquiry and Rulemaking,* 72 FCC 2d 358 (1979), on the "deregulation of . . . all customer-premises equipment". *Id.* at para. 65. Additionally, throughout this document we discussed our resolve to establish valid categories for communications and data services. We were forthright in asserting that certain services might be subjected to different regulation depending upon which side of the Title II margin they fell. *See Tentative Decision,* 72 FCC 2d at paras. 65–88, paras. 165–73. Moreover, we have clarified here any confusion concerning the reach of our jurisdiction over enhanced services.

d. Jurisdiction over Customer-Premises Equipment

140. In the *Final Decision* we determined that the provision of stand-alone CPE is not a common carrier activity and that the objectives of the Communications Act would best be fulfilled by deregulating all CPE. We concluded that we have jurisdiction over terminal equipment, that we have the authority to order carriers to unbundle and detariff it, that we can forbear from regulation of CPE and that our preemption of state authority over CPE does not violate the Communications Act or any other laws. We found that carriers' bundling of CPE and services "has a direct effect on the rates charged for interstate service". *Id.* at para. 146. It produces "distortions in interstate rates which would be difficult to remedy without requiring unbundling". *Id.* at para. 154. We found that the bundling of non-usage sensitive CPE into usage-sensitive rates for service is very likely to result in misallocation of costs among services and facilities offerings. This in turn increases the potential for cross-subsidization of competitive CPE offerings from monopoly service revenues.

141. In the *Final Decision* we determined that CPE must also be detariffed because otherwise the carrier could distort either the price for CPE or the charges for basic service through the allocation of joint and common costs on which we set a rate of return. We reasoned, ". . . it is important that the costs attributable to the regulated utility service be separated from competitive provision of equipment used in conjunction with the service by the removal of such equipment from a carrier's rate base". *Id.* at para. 156. The present system discriminates against subscribers who purchase and use non-carrier CPE in making MTS calls but pay the same charge, including an element of cost for carrier-provided CPE, as the subscriber using a carrier-provided terminal equipment. We concluded that deregulation of CPE and removal of related investment from separations were required to eliminate this discrimination between customers.

142. Certain petitioners seek to characterize the order to unbundle and detariff CPE as an unlawful forbearance from its regulation. We disagree. The choice of a proper regulatory approach is within this agency's broad discretion. *United States* v. *Southwestern Cable Co.,* 392 U.S. 157, 173 (1968); *National Broadcasting Co.* v. *United States,* 319 U.S. 190, 219 (1943). We recognize that we have significant flexibility in determining how to regulate terminal equipment offered by carriers separately from transmission service. *Final Decision* at para. 181. Under the "all instrumentalities" provision of Section 3 of the Act the Commission receives permissive authority over CPE, as discussed in our Tentative Decision at paras. 115–118. We have the authority under Section 205 to require the unbundling of CPE from transmission service, even if the provision of such equipment together with transmission service is characterized as common carrier service. Furthermore, Sections 203(b)(2) and 203(c) confer on us the authority to order the detariffing of terminal equipment.

143. (1) *Commission jurisdiction over CPE.* Our general assertion that carrier provision of equipment as part of an end-to-end offering has traditionally been subject to Title II regulation was not challenged on reconsideration. We have frequently in the past asserted jurisdiction over carrier-provided CPE when used with an interstate communications service.[37] As indicated in *North Carolina Utilities Commission* v. *F.C.C.,* 552 F.2d 1036, 1050 (4th Cir. 1976) (hereinafter *NUUC II*), our jurisdiction extends to CPE used for both intrastate and interstate communications should the need for federal action arise.[38] We noted in the *Final Decision* that, while such terminal equipment is within our subject matter jurisdiction, the Act does not mandate its regulation. Under *Permian Basin Area Rate Cases,* 390 U.S. 747 (1968); *United States* v. *Southwestern Cable Co.,* 392 U.S. 157 (1968) and *HBO* v. *F.C.C.,* 567 F.2d 9, (D.C. Cir.) *cert. denied,* 434 U.S. 829 (1977), any regulation by tariff or otherwise must be demonstrated to be reasonably ancillary to the effective performance of the Commission's responsibilities.

144. IDCMA, Motorola, Telenet/CNS, WUI and Xerox question, however, whether we have jurisdiction over non-carrier-provided CPE. Cognizant of the serious concerns voiced by several petitioners about the breadth of the *Final Decision's* holding of ancillary jurisdiction over stand-alone CPE, and based on our view that no statutory purpose would be served by regulating non-carrier-provided CPE, on reconsideration we need only conclude that the provision of CPE by carriers or their affiliates subject to our Title II jurisdiction is within our jurisdiction. We do not reach the issue of whether other CPE falls within our jurisdiction under Title I. We have discussed several general aspects of our ancillary jurisdiction in paras. 121–125 *supra,* and we believe that analysis is relevant as well to our consideration here of the scope of our jurisdiction over non-carrier provided CPE. To the extent that all carriers become involved in competitive CPE provisioning they must of course comply with antitrust standards. *See Cantor v. Detroit Edison Co.,* 428 U.S. 579, 596 (1976).

145. *GTE Service* teaches that common carrier offering of even stand-alone CPE is within our jurisdiction because it can affect the cost of and

[37] Department of Defense v. General Telephone Co., 38 FCC 2d 803 (1973), *review denied,* FCC 73-654, *aff'd per curian sub nom.,* St. Joseph Telephone & Telegraph Co. v. FCC, 505 F.2d 976 (D.C. Cir. 1974); AT&T "Foreign Attachment" Tariff Revisions, 15 FCC 2d 605 (1968); *reconsideration denied,* 18 FCC 2d 871 (1969); Hush-a-Phone Corp. v. United States, 238 F.2d 266 (D.C. Cir. 1956), *decision on remand,* 22 FCC 112 (1957); Jordaphone Corp. v. AT&T, 18 FCC 644 (1954); Katz v. AT&T, 43 FCC 1328 (1953); Use of Recording Devices, 11 FCC 1033 (1947).

[38] RTC has questioned whether we have the authority to enforce our decision on non-fully subject Section 2(b)(2) carriers. We need only note that such carriers' CPE is subject to the separation process and raises the same regulatory concerns.

efficient provisioning for common carrier services. For example, we imposed structural separation on AT&T in part because of our concern that AT&T can cross-subsidize between competitive CPE sales and Title II regulated basic transmission services. Such separation is well within the bounds of our jurisdiction under *GTE Service*.

146. (2) *Jurisdiction to implement the specific CPE regulatory scheme mandated.* Petitioners assumed differing positions on our authority to order the unbundling and detariffing of CPE and the rate freeze. Among the parties questioning our jurisdiction to order the deregulation of CPE were APUC and USITA. CBEMA, Centel and REA maintain that the Commission does have authority to order unbundling and detariffing in certain circumstances. ATU and ATA recommend that we convene a Joint Board pursuant to 47 U.S.C. § 410(c) to consider CPE removal from the separations process. Xerox questions whether, having taken jurisdiction over CPE, we can then forbear from its regulation. AT&T, Centel, GTE, NTIA, RTC, United and USITA question whether our paragraph 165 guidelines for the pricing of local exchange service are equivalent to prescription of a rate, to be accomplished only pursuant to a hearing under Section 205. United maintains that the freeze of a rate for the life of the instrument by the Commission violates Section 203 of the Act because it precludes affected carriers from filing new rates when justified. Requiring certain rate levels after detariffing CPE exceeds the subject matter jurisdiction of this Commission, according to ATU. Centel argues that the rate freeze is possibly an unconstitutional taking of property without just compensation. AT&T and GTE add, in a related argument, that the extraction of CPE from the state and federal rate bases has a retroactive effect and is confiscatory under the Fifth Amendment and the APA.

147. Our decision on reconsideration to defer the unbundling and detariffing of embedded CPE pending the outcome of a further proceeding moots petitioners' arguments addressed to our power to deregulate embedded CPE as outlined in the *Final Decision*. However, we discuss here our authority to order the prospective unbundling and detariffing of CPE because our decision today will ultimately have this result.

148. We find the authority to require carriers to unbundle and detariff CPE in Sections 4(i), 203 and 205 of the Act. Unbundling and detariffing are the most effective ways to control charges for terminal equipment used in interstate commerce. Section 205 authorizes us to establish ". . . what classification, regulation, or practice is or will be just, fair, and reasonable . . .". As stated in the *Final Decision*, we have in the past exercised our Section 205 power broadly in the areas of customer/provided equipment and interstate transmissions service. *See First Report and Order in Docket No. 19528*, 56 FCC 2d 593 (1975), *on reconsideration*, 57 FCC 2d 1216 (1976), 58 FCC 2d 716 (1976) and 59 FCC 2d 83 (1976); *Second Report and Order in Docket No. 19528*, 58 FCC 2d 736 (1976), *aff'd sub nom., North Carolina Utilities Commission* v. *FCC*, 552 F.2d 1036 (4th Cir.), *cert. denied*, 434 U.S. 874 (1977); *Regulatory Policies Concerning Resale and Shared Use of Common Carrier Services and Facilities*, 60 FCC 2d 261 (1976), *on reconsideration*, 62 FCC 2d 588 (1977), *aff'd sub nom., AT&T* v. *FCC*, 572 F.2d 17 (2d Cir.), *cert. denied*, 439 U.S. 875 (1978).

149. In the *Final Decision* we pointed out that the current regulatory approach, which involves tariff review of CPE charges only to the extent that they are bundled into changes for interstate transmission services, provides "little or no effective oversight over the offering of terminal equipment utilized jointly for interstate and intrastate communications". *Id.* at paras. 177, 178. In contrast, we found that "the provision of terminal equipment on an unbundled and detariffed basis should enhance significantly or flexibility to assure cost-based provision of transmission services in an increasingly competitive market place". *Id.* at para. 179. We expressed our strong conviction that terminal equipment charges made in connection with interstate service should be offered on a cost-related, not a usage-sensitive, basis and on a separate, not a bundled, basis. *Id.* at para. 177. Unbundling CPE would explicitly identify to a customer the cost of the terminal equipment service component. In the *Final Decision* we also make known our intention to require certain carriers to offer terminal equipment through an entity separate from the company providing transmission services. This would, we concluded, more effectively assure against cross-subsidization of essentially competitive services by distinct and separate transmission services than present practices do. *Id.* at para. 177.[39]

150. We scrutinized different approaches to assuring that communications customers have access to CPE at reasonable, cost-based rates in the *Final Decision*. Having done so, we concluded that by unbundling and not tariffing individual equipment offerings we could more effectively meet our responsibilities under the Communications Act than under present arrangements. We summarized our conclusion in paragraph 178: "[f]aced with this choice between alternative regulatory approaches, we believe that there are extraordinarily compelling reasons for adopting a new regulatory approach to the interstate provision of terminal equipment". In reliance on our broad Section 205 power we chose unbundling and detariffing as a "different set of regulatory tools" better designed to insure reasonable, efficient communications service in the developing competitive marketplace. We found that our mandating interconnection in *Carterfone* and our subsequent establishment of technical standards in this area have helped create the conditions for a strong market for equipment which assures users a wide range of competitive alternatives. *Id.* at para. 179.

151. On reconsideration we rely additionally on our Section 203(b)(2) and 203(c) powers to order the prospective detariffing of terminal equipment. Section 203(b)(2) grants this Commission the authority "in its discretion and for good cause shown" to "modify any requirement made by or under the authority of this section either in particular instances or by general order applicable to special circumstances". Section 203(c), coupled with Section 4(i), Section 205, and Section 211, provides us with significant discretion on how to regulate tariffed service.[40]

152. (3) *State Preemption.* Certain petitioners challenge our CPE regulatory scheme by stating that it preempts areas of regulation reserved to the states by

[39] Our decision to order the unbundling and detariffing of CPE was based on our independent assessment of the record in this proceeding and of all factors which would serve the public interest in efficient communications service at reasonable rates. Our assessment of market conditions is one such factor. *See* FCC v. RCA Communications, Inc., 346 U.S. 86, 94 (1953).

[40] Section 203(c) provides that:

No carrier, unless otherwise provided by or under authority of this Act, shall engage or participate in such communication unless schedules have been filed and published in accordance with the provisions of this Act and with the regulations made thereunder; and no carrier shall (1) charge, demand, collect, or receive a greater or less or different compensation, for such communication, or for any service in connection therewith, between the points named in any such schedule than the charges specified in the schedule then in effect, or (2) refund or remit by any means or device any portion of the charges so specified, or (3) extend to any person any privileges or facilities, in such communication, or employ or enforce any classifications, regulations, or practices affecting such charges, except as specified in such schedule.

the Act. State preemption arguments are directed to our order unbundling and detariffing CPE as well as to our rate guidelines set forth in paragraph 165 of the *Final Decision*. Our decision on reconsideration moots arguments directed to the formerly mandated tariff filing and rate freeze. Our requirement today that embedded CPE used solely in conjunction with interstate or foreign transmission offerings and associated maintenance be detariffed not later than March 1, 1982 deals solely with equipment within our jurisdiction. It cannot give rise to state preemption claims. Embedded CPE employed in both interstate and intrastate service will be addressed in a separate implementation proceeding.

153. In their petitions, APUC, ATU, GTE, NARUC and USITA contend that our decision to order the unbundling and detariffing of CPE treads on state prerogatives. They contend that our action is prohibited by Section 2(b), which excludes "charges, classifications, practices, services, facilities, or regulations for or in connection with intrastate communication service by wire or radio of any carrier . . ." from our jurisdiction.

154. We are aware that requiring carriers to unbundle and detariff CPE used jointly in the provision of interstate and intrastate service has the practical effect of eviscerating state jurisdiction to establish charges for this terminal equipment in a manner that conflicts with federal interests. But, we preempt the states here only to the extent that their terminal equipment regulation is at odds with the regulatory scheme set forth. We do not assess here the legaility under the Communications Act of future attempts by the states to regulate CPE in ways which they perceive to be consistent with this decision. We shall address such regulatory attempts, should they present themselves, on an *ad hoc* basis.

155. Section 2(b) does not preclude us from exercising our conceded section 2(a) regulatory authority over terminal equipment as part of an interstate service in ways which may result in the displacement of state authority to regulate intrastate rates. In the *Final Decision* we found that current bundling of non-usage sensitive CPE with usage-sensitive service rates and its incorporation in the separations process produces price distortions among interstate and intrastate customers. We stated that, ". . . it is important that the costs attributable to the regulated utility service be separated from the competitive provision of equipment used in conjunction with the service by the removal of such equipment from a carrier's rate base". *Id.* at para. 156. We do not unduly infringe on the states' Section 2(b)(1) jurisdiction by requiring that new terminal equipment not be tariffed as of March 1, 1982. While this requirement may impair the states' ability to establish charges for intrastate service, we have imposed it only to best implement our jurisdiction under Sections 1 and 2(a) over interstate service. When the exercise of our jurisdiction over interstate services requires the imposition of requirements for unbundling and nonusage sensitive charges, however, inconsistent state regulations must yield to preeminant claims of the federal regulatory scheme.

156. Section 2(b)(1) does not reserve authority over carrier offered CPE solely to the states. This section reserves to the states jurisdiction over classifications, practices, services, facilities or regulations for or in connection with *intrastate* communication service by wire or radio. Under *North Carolina Utilities Commission* v. *F.C.C.*, 537 F.2d 787, 793 (4th Cir. 1976) (hereinafter *NCUC I*), Section 2(b) only prevents Commission regulation of "local services, facilities and disputes that in their nature and effect are separable from and do not substantially affect the conduct or development of interstate communications". Furthermore, in ruling on this Commission's terminal equipment registration program, the Fourth Circuit found that Section 2(b)(1) "does not deny the Commission jurisdiction with respect to intrastate facilities used for interstate communications". *NCUC II*, 552 F.2d at 1046.

157. NARUC and the RTC maintain that *NCUC II* distinguishes between federal preemption of contrary state regulation "where the efficiency or safety of the national communications network is at stake" and federal preemption of "state ratemaking prerogatives". *NCUC II* at 1046–1048. We reiterate that it is not our desire to infringe on purely local rates, but to ensure economic interstate service. According to *NCUC II*, " . . . once it is recognized that FCC regulations may preempt any contrary state regulations where the efficiency or safety of the national communications network is at stake, there can be little argument that FCC regulation of jointly used terminal equipment for the purpose of improving interstate communications service may not also displace conflicting state regulations". *NCUC II* at 1046. In *NCUC II* the court stated: "[r]ecognition of federal primacy in the regulation of jointly used terminal equipment no more curtails state ratemaking *as a matter of jurisdiction* than would the denial of state authority to set rates for interstate calls in order to subsidize local exchange and intrastate services." *NCUC II* at 1048.[41]

158. Finally, a few parties contend that the Commission should refer the issue of whether removal of all CPE from the separations process is warranted to a Federal/State Joint Board convened under Section 410(c) of the Communications Act. This argument is moot as to embedded CPE because we do not today propose to remove such CPE from the separations process. A Joint Board is considering the effect of removing all embedded CPE from the separations process. We are, furthermore, aware of no precedent which would require us to convene a Joint Board prior to ordering that as of March 1, 1982, new CPE must be offered on an unbundled and detariffed basis. Section 410(c) was not intended to hamstring this Commission in the formulation of its long range policies by requiring that every decision which could have a wholly prospective impact on the size of the separations pool be referred to a Joint Board.

e. 1956 Western Electric Decree

159. We set forth our reading of the 1956 Western Electric Decree in the *Final Decision*. We determined that excluding CPE from tariff-type regulation would not forclose Bell System participation in the CPE market under Section IV; that enhanced services are "incidental to" the provision of common carrier communications services under Section V(g); and that Section II(i), which defines the activities which the Bell System can engage in under the decree, does not specify more than that the

[41] We are unconvinced by the contention of NARUC that Congress in enacting Section 2(b)(1) denied us jurisdiction over the CPE regulatory scheme proposed because it did not want this Commission to exercise the type of ICC jurisdiction upheld in the *Shreveport Rate Cases, Houston, East & West Texas Railway* v. *I.C.C.* 234 U.S. 342 (1914). These cases do not circumscribe our authority to regulate directly rates for interstate communications services. While in the *Schreveport Rate Cases* the ICC ordered a change in intrastate rates solely because of their indirect effect on interstate commerce, here we do not seek to set rates for local services. Rather, we have ordered the unbundling of CPE at the local level because of the direct effect of CPE inclusion in end-to-end service on interstate service rates. NARUC mischaracterizes CPE provision and maintenance as "exclusively local services", NARUC Petition at page 8. Separations and settlements from interstate revenues currently partially subsidize CPE. Furthermore, when a local carrier offers CPE it intends to provide the customer with access to the interstate and intrastate switched networks alike.

regulation of charges required be "public" and "under the Communications Act of 1934." *Id.* at para. 277. The petitions for reconsideration present us with challenges to our authority to interpret the decree and questions about the validity of the interpretation presented.

160. ANPA, CCIA, GTE, IDCMA, WUI and Xerox argue that we cannot "modify" the 1956 Western Electric Decree. GTE, IDCMA and Telenet/CNS state that the judgement court is the appropriate forum to definitively construe or modify it. AT&T and NTIA maintain that an administrative agency's interpretation of a judicial decree which has far-reaching implications in its area of expertise should be accorded substantial deference.

161. We believe that we can and, in fact, are obligated by our public interest mandate to assess the impact of the Final *Decision* upon the Bell System's activities under the decree. In the *Final Decision* we expressly stated that "no attempt is being made to render a definitive construction of the decree." *Id.* at para. 275. We conceded that the judgment court with jurisdiction over the decree is the appropriate body to render a conclusive construction of it. *Id.* We stated that it was AT&T's responsibility to approach the judgment court should it seek such a definitive construciton. *Id.* at para. 280. We assessed the meaning of the decree for our regulatory purposes in the *Final Decision.* We believe the existence and meaning of the decree to be relevant facts, like any others, to be considered in our effort to locate the public interest in the extraordinarily important and complex communications policy matters being considered in this proceeding. Indeed, we would have been remiss had we not assessed the impact of the comprehensive regulatory scheme established in this proceeding on the largest company in the telecommunications industry. Our action here is not an attempt to usurp judicial power. It represents an effort to weigh the effects of a comprehensive industry regulatory scheme on the industry's donimant participant.

162. Much debate focuses on our interpretation of the 1956 Western Electric Decree. ADAPSO and Telenet/CNS argue that the regulation referred to in Section II(i) of the decree must be tariff-type regulation.[42] CCIA, Datapoint and IDCMA maintain that regulation specified under Section II(i) is either tariff-type regulation or the imposition of stronger structural separation on AT&T's enhanced services and CPE subsidiary. NTIA contends that our interpretation of Section II(i) is correct. According to NTIA, services referred to under Section II(i) need only be subject to ongoing surveillance and protection of the public interest, provided under the *Final Decision.* AT&T holds the opinion that the regulatory regime for enhanced services and CPE in the *Final Decision* does in fact regulate "charges" under Section II(i). CCIA does not accept our reading of Section IV of the decree. ANPA, CCIA, GTE and IDCMA contend that enhanced services are not "incidental to" communications under Section V(g). CBEMA "questions" this characterization of enhanced services. AT&T and NTIA agree with it.

163. On reconsidering we adhere to our reading of the 1956 Western Electric Decree in the *Final Decision.* We do not interpret the decree as foreclosing AT&T involvement in enhanced services and CPE subject to proper structural safeguards. The consent decree clearly does not address the evolution of a more competitive communications equipment market by breaking the monopoly hold of AT&T's communications services affiliates. Rather, it is premised upon constraining the equipment prices which can be charged by Western Electric and accumulated as part of the operating affiliates' public utility rate bases. The decree's purpose is to protect monopoly ratepayers from inflated charges through rate base padding.

164. While we believe that a simple assessment of the terms of the decree itself makes this plain enough, there is collateral evidence which puts this beyond dispute. The Department of Justice concluded the decree only after soliciting this agency's expert advice as to our ability, and that of similarly chartered state public utility commissions, to prevent the imposition of excessive charges for Western Electric products upon the Bell operating companies. The point of requiring in Section II(i) that the "charges" for services and facilities be "subject to public regulation" was to guarantee that costs of a non-jurisdictional nature not be attributed to public utility service and that profits in fact generated by utility service not escape regulatory constraints by being funneled to a non-regulated manufacturing affiliate.

165. The Commission's advice to the Department of Justice that we could in fact protect the monopoly ratepayer from excessive prices for goods and services obtained from affiliated entities through traditional regulatory mechanisms such as disallowances led the Department to enter into the decree. We feel very confident in attesting that the separate subsidiary form of regulation imposed here promises far greater protection for the monopoly ratepayer, and concomitantly for AT&T's competitors, than the more traditional public utility approaches comprehended by those who would insist upon a narrow reading of "charges" in Section II(i).

166. In dealing with Section II(i) as well as other provisions of the decree, we have noted the breadth and ambiguity of the decree's language. Section II(i) in particular invites resort to this agency's expertise in delineating the particular forms of public regulation available under the 1934 Act. We note that the decree makes no explicit reference to the Commission's Title II or tariff-related powers; and, therefore, we believe that it would be unreasonable to view the form of "public regulation" referred to in the decree as so narrowly limited. In fact, we believe that our requirement for a separate subsidiary for the provision of terminal equipment and enhanced services—with various competitive safeguards imposed in this proceeding—constitutes a more effective form of public regulation than is available under a tariff-oriented regulatory scheme. Indeed, over the past twenty years of the development of a competitive terminal equipment market, our affirmative scrutiny of terminal equipment prices has been very limited.[43] Moreover, different states have greatly varying degrees of resources to be dedicated to examination of terminal equipment prices to protect monopoly ratepayers against cross-subsidization. As a legitimate regulatory tool, the establishment of a subsidiary will provide a coordinated focus for dealing on an accounting basis with cross subsidy problems and provides checks on anticompetitive behavior. In the case of enhanced services, a subsidiary is being required for services that are not to a significant degree being provided by AT&T. That subsidiary must obtain its transmission services under tariff, cannot obtain certain software from affiliated entities and cannot obtain other competitive advantages as a result of its affiliations. We believe that all these regulatory requirements should be

[42] Section II(i) states, "'[c]ommon carrier communications services' shall mean communications services and facilities, other than message telegram service, the charges for which are subject to public regulation under the Communications Act of 1934. . . ."

[43] See Docket No. 19419, 33 FCC 2d 578; 36 FCC 2d 498 (1972); 39 FCC 2d 837 (1973); 42 FCC 2d 647 (1973); Dataspeed 40/4, 62 FCC 2d 21 (1977), aff'd sub nom. International Business Machines Corp. v. FCC, 570 FCC 2d 452 (2d Cir. 1978); IRC Telex Equipment, CC Docket No. 80-339, 79 FCC 2d 173 (1980).

regarded as fully effectuating the basic goals and objectives of Section II(i).[44]

167. In the *Final Decision* we interpreted the decree based on a full-scale analysis of antitrust concerns and of the public interest in general. We concluded that our reading of the decree is compatible with antitrust principles favoring open entry. *See Northern Pacific Railway v. U.S.*, 356 U.S. 1, 4 (1958). Accordingly, we indicated: "[w]hen an unstrained interpretation of the decree, holding out some reasonable promise both of avoiding such an anticompetitive result and of preventing possible controversies regarding AT&T's competitive activities from spreading beyond the range of markets 'incidental' to common carrier communications is available, we believe it would be unreasonable to adopt rules premised upon the assumption that either the Justice Department or the District Court in New Jersey would subscribe to a less attractive interpretation." *Id.* at fn. 117.

168. Our jurisdictional determinations on reconsideration in no way affect our discussion of the Bell System's opportunities to participate in the enhanced services and CPE markets under the decree. We perceive that enhanced services are incidental to the provision of common carrier communications services described by Section V(g) of the consent decree because they presuppose the use of common carrier telecommunications facilities. We maintain that any enhanced services provided by the separate Bell subsidiary would remain subject to our jurisdiction under *GTE Service*. In addtion, as we indicated in the *Final Decision*, our jurisdictional assertion and our interpretation of the 1956 Western Electric Decree stand independently. We reserve the right to inquire closely, and even to prescribe price levels within the fully separated subsidiary if violations of basic separations safeguards are made out and such remedial action is necessary to protect the statutory rights of the monopoly ratepayer.

V. Conclusion

169. In acting on the petitions for reconsideration we have attempted to clarify various points raised, and we have modified the *Final Decision* where appropriate. We recognize that a fair number of issues remain for resolution. Some will be addressed as part of on going proceedings such as Docket 79-105 and Docket No. 20188. We are also instituting proceedings to examine the implications of various license contract arrangements and to implement the deregulation of embedded CPE. Thus, the *Second Computer Inquiry* may be viewed as an on-going proceeding.

170. We have attempted to make our determinations as clear as possible. In addition to those issues which remain for resolution in separate proceedings, some ambiguity may exist in our decision. This may be inevitable. considering the scope of the proceeding, it may be difficult to cover all related areas. The Commission intends to give expeditious consideration to those matters that bear on the effective implementation of the *Final Decision*, as modified herein, and to render advice when necessary.

171. CWA has filed comments in this proceeding which express its concern about the effects of the proceeding upon its members. We expect that AT&T will make every effort to accommodate the impact of the *Final Decision* on its employees in terms of wage structures, benefits, pension rights, and senority and collective bargaining rights within the prescribed period. We continue to believe that a cooperative approach among all affected parties is essential if significant institutional and personal dislocations are to be avoided. It is important that the transition be accomplished in a manner which will not disadvantage the affected carriers, their employees or their shareholders. We continue to believe, however that "the burdens of working out the transition must be borne in the largest measure by the affected carriers." *Final Decision* at para. 266.

VI. Ordering Clauses

172. Accordingly, IT IS ORDERED pursuant to Sections 4(i), 4(j), 201-205, 403 and 404 of the Communications Act of 1934, as amended, that the *Final Decision* adopted in this proceeding is modified to the extent set forth herein.

173. *It is further ordered* that petitions for reconsideration are granted to the extent set forth herein, and are otherwise denied.

174. *It is further ordered* that Section 64.702 of the Commission's Rules and Regulations is amended as set forth below effective February 3, 1981.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Section 64.702(c)(4) is amended to read as follows:

§ 64.702 Furnishing of data processing services.

* * * * *

(c) * * *

(4) Any research or development performed on a joint or separate basis for the subsidiary must be done on a compensatory basis. Except for generic software within equipment, manufactured by an affiliate, that is sold "off the shelf" to any interested purchaser, the separate corporation must develop its own software, or contract with non-affiliated vendors.

[44] In paragraph 17 we have proposed certain transitional arrangements under which existing AT&T "enhanced" services could be offered pending the establishment of a fully separated subsidiary. We regard these "transitional" measures as an adequate mechanism for public oversight of such activities for the limited transition period anticipated. Parenthetically, as to the acceptability of nontariff oversight under the consent decree, we have noted the Department of Justice acquiescence in numerous unregulated Bell System activities. See *Final Decision* at fn. 116 and *Tentative Decision* at paras. 142-144. By contrast, we have here implemented a scheme which establishes both a separate subsidiary and a set of competitive safeguards or separation requirements. Except to the extent that certain more limited transitional arrangements are afforded for certain existing AT&T enhanced services on a short-term basis, as noted above, we regard these separation requirements as integral and essential to our conclusion that the AT&T activities in question—and indirectly, of course, the charges for such activities—are subject to a scheme of public regulation at least as effective if not more effective in our view than traditional tariff regulation.

Separate Statement of Charles D. Ferris, Chairman

Re: Reconsideration of the *Final Decision* in the *Second Computer Inquiry.*

We have modified our *Final Decision* in the *Second Computer Inquiry* in several important respects. First, the pleadings have demonstrated that the complexities of deregulating embedded terminal equipment require a separate proceeding, so we are modifying our Decision to reflect that fact. Second, we are now convinced that imposing the same separation requirements on GTE as on AT&T is not justified in light of their differing circumstances. Third, we have refined our legal analysis to clarify our jurisdiction with respect to enhanced services.

I am gratified that the structural safeguards we have placed on the American Telephone and Telegraph Company have survived intact. These regulatory safeguards are absolutely necessary if we are to carry out our responsibility under the *Communications Act* to protect ratepayers from cross-subsidy and ensure non-discriminatory access to underlying basic transmission facilities by all participants in the evolving enhanced communications industry.

Guaranteeing non-discriminatory access is, in my view, the most important goal of the structure we have established. If AT&T, with its overwhelming share of both the local distribution and intercity transmission markets, is allowed to combine both basic transmission facilities and enhanced services in the same organizational and operational structure, we could never be certain that competitors would receive non-discriminatory access to the building blocks upon which all of the evolving communications markets are based.

These regulatory safeguards take on added significance in light of the 1956 Consent Decree. I am satisfied that substituting structural regulation for our traditional Title II regulation satisfies both the public interest and the requirements of the Decree. Anything less, however, would serve neither.

I hope that in the future this Commission will evaluate requests for waivers of this structure in light of the compelling need to satisfy our obligations to consumers and competitors, as well as the constraints imposed on AT&T by virtue of the Consent Decree. Evisceration of this regulatory structure would not only defeat the fundamental policy premises of the *Second Computer Inquiry*, it would expose the decision to unnecessary risks in the New Jersey court, which has responsibility for construing the Decree that AT&T voluntarily entered into in 1956.

Let me emphasize, however, that while providing for AT&T's participation in these evolving markets is very important, removing needless, wasteful regulation from *all* competitors is even more important. If faced with the choice of regulating all competitors or keeping AT&T out, I would vote to guarantee that these markets could grow and prosper free from traditional regulation.

Concurring Statement of Commissioner James H. Quello

Re: Reconsideration of Final Decision in Docket No. 20828—Second Computer Inquiry.

I believe that this decision, as it has evolved, is a good one which will contribute to the offering of more and better telecommunications service for the American public. The Commission, upon reconsideration, has wisely eliminated some of the more burdensome aspects of the *Final Order* and has clarified some of its provisions.

While I wholeheartedly support the main thrust of this order, I continue to have concerns that it might be overly restrictive particularly with regard to ownership of transmission facilities by AT&T's subsidiary. Only time will tell whether the waiver standards we have adopted are capable of providing relief where such relief is necessary and desirable as a matter of public policy.

I am hopeful that over time this decision will continue to evolve and that we will have encouraged development of a telecommunications system that will truly meet the needs and interests of the public.

Therefore, I concur.

Statement of Commissioner Joseph R. Fogarty

Concurring in Part

In Re: *Computer Inquiry II*—On Reconsideration

When the Commission adopted the *Final Decision* in its Second Computer Inquiry on April 7, 1980, I described that action as a "landmark" in the history of telecommunications, observing that no other decision since the passage of the Communications Act of 1934 and the creation of this Commission is so momentous in terms of impact on industry, regulation, and the public interest. I believe that the *Final Decision*, as amended along the lines I proposed, represents significant progress and accomplishment in resolving the critical issues of telecommunications regulation in the computer age which have confronted the Commission now for well over a decade. In particular, the essential concept of a basic/enhanced service dichotomy and resale structure, together with dominant carrier structural regulation and forbearance from regulation for the rest of the enhanced service competitors, is wise, pragmatic, and supported by a strong policy foundation. The unbundling and detariffing of customer premises equipment (CPE) is also premised on sold legal and policy considerations.

The Commission's *Final Decision*, as refined in this order, will, for the most part, bring the benefits of competition to the American consumer. Our decision will permit AT&T to offer enhanced services for the first time. This entry is long overdue and, because of AT&T's tremendous research and development potential, the Commission's action should result immediately in benefit to consumers in terms of innovative, widely-available, and low cost enhanced services. AT&T, however, will

not be the only competitor to benefit from this decision. Pursuant to the policy enunciated in our *Computer II* rulings, a number of companies, who are not traditional common carriers, will now be permitted to provide a wide range of services, including communications components, without being constrained to limit the nature and scope of their offerings in order to avoid Commission regulation. Moreover, our decision will permit a myriad of common carriers, other than AT&T, to expand their offerings to include enhanced services without being constricted by burdensome regulation in general, and the separate subsidiary requirement in particular. In the long run, these actions encouraging competition in the enhanced services market by non-AT&T companies will prove to be the more important consequence of our *Computer II* decisions. As a result of this new and expanded competition, I foresee truly dynamic growth in the number of low-cost and innovative services and equipment products available to the consumer in the future.

During the course of this proceeding, I have questioned the adequacy and wisdom of various proposals considered by the Commission in several critical areas. Central to my partially dissenting views [1] has been the concern that while the Commission has attempted to implement an almost pristine devotion to economic theories of "marketplace competition," the actual effect of such actions would be anti-competitive in terms of denying certain entities and most importantly, the public they serve, the benefits of "full and fair" competition. I have also been troubled that in certain key areas the real-world consequences of the Commission's actions have been only dimly perceived or wholly unanticipated with no assurance that the public interest will be served in fact, as well as in theory. This has been my primary and vital concern, for under our existing statutory mandate, it is the public interest—the interest of consumers, ratepayers, and end users—and not the interest of particular competitors, which must command the Commission's paramount attention and responsibility.

Many of the issues which I raised have been addressed and resolved over the long and somewhat tortuous course of this proceeding, and the decision which we adopt here represents a vast improvement over the *Tentative Decision* and the *Final Decision*. In particular, although I agreed in principle with the position reached in the *Final Decision* on customer premises equipment (CPE), I questioned whether the Commission had properly addressed the serious problem of the upward rate pressures on local exchange rates which would result from the removal of terminal equipment revenue requirements from the separations process.[2] I was also concerned that the March 1, 1982 implementation date for the deregulation of CPE was totally unrealistic.[3] The bifurcated approach with respect to new and imbedded CPE and the proposed implementation proceeding which we have adopted in this decision go a long way toward easing my concerns.[4] In my judgment, it is critical that the Commission not deregulate in-place CPE until the numerous rate issues have been addressed and satisfactorily resolved. In light of the Commission's recognition of these issues, my concerns regarding the March 1, 1982 implementation deadline have been mooted. I suggest that in order to speed our consideration of these issues, the implementation proceeding should be promptly instituted as a Notice of Inquiry and Proposed Rulemaking. The rate issues not addressed in this implementation proceeding should be dealt with by the Joint Board recently convened in Docket 80-286, and as a member of this Joint Board, I intend to see that this responsibility is met.

With respect to both the *Tentative Decision* and the *Final Decision*, I observed that the Commission had never assessed the critical cost benefit trade offs inherent in the various degrees of separation proposed for "dominant" carriers. Here, I have been especially concerned that we have never examined the question of whether the economies which might flow to the ratepayer from vertical integration may outweigh any potential abuses.[5] Again, many of my concerns have been met. On reconsideration, I argued that GTE should not be subject to the separate subsidiary requirement. In fact, GTE should never have been considered a dominant carrier for the purposes of the *Computer II* resale requirements. The record in this proceeding is clear that GTE does not have sufficient market power to allow it to engage in the cross-subsidization of enhanced services. In this order, the Commission has relieved GTE of the burden of the resale requirement, and GTE may now provide CPE and enhanced voice services directly. However, on its face, this order still leaves GTE subject to the conditions imposed in the *GTE Telenet Merger* decision.[6] I believe this result is inconsistent with the plain effect and rationale of the Commission's decision lifting the separate subsidiary requirement from GTE. In essence, the Commission has overruled the GTE Telenet merger conditions. However, a question has been raised as to whether parties have had sufficient notice of this action, and I will defer to the need for procedural certainty on this point. The Commission should move quickly on the rulemaking proceeding which will address this issue with the requisite finality.

This order also represents an improvement over the *Final Decision* and *Tentative Decision* with respect to the basic/enhanced service dichotomy and its application. My partial dissent to the *Final Decision* emphasized that this dichotomy and its accompanying restrictions, as adopted in that order, would preclude AT&T from offering a number of important services via the core network. On reconsideration, certain modifications have been made which substantially lessen these concerns.

Under the standard adopted in this order, AT&T will be able to petition the Commission for waiver permitting it to offer enhanced services directly upon a public interest showing. I concur in this standard. I would have preferred, however, that the Commission amend the definition of basic service to include the offering of voice storage, forward and retrieval services, such as AT&T's Custom Calling II and Dial-It services and Plantronics' CentraVox. I believe that by precluding the offering of these services as a part of basic service, the Commission has sacrificed the public interest to preserve an allegedly "bright and enduring" line between basic and enhanced services.[7] Any line which attempts to distinguish between AT&T's Custom Calling I offering, which is permitted as a part of basic service,[8] and Custom Calling II, Dial-It and CentraVox, which are not, is neither

[1] See, e.g., *Second Computer Inquiry—Final Decision*, Statement of Commissioner Joseph R. Fogarty Dissenting in Part, 77 FCC 2d 505 (1980).

[2] *Id.* at 513.

[3] *Id.* at 517.

[4] See Notice of Proposed Rulemaking and Order Establishing a Joint Board, (Docket No. 80-288, FCC 2d (1980)). I note that this Joint Board has already held one meeting in Houston, Texas on November 12, 1980.

[5] See Separate Statement of Commissioner Joseph R. Fogarty, *Tentative Decision*, 72 FCC 2d 358, 452 (1979); Separate Statement of Commissioner Joseph R. Fogarty, 77 FCC 2d 384, 508 (1980).

[6] *GTE Telenet Merger*, 72 FCC 2d 111 (1979).

[7] I cannot accept the argument that the impact of this is somehow lessened because only AT&T is affected. AT&T serves 81.3 percent of this nation's telephones. Therefore, the vast majority of consumers will be potentially affected.

[8] See, Final Decision at para. 98.

"bright" nor "enduring," nor in the public interest. If all consumers, particularly residential or occasional users and the less affluent in our society in the ghetto and rural areas, are ever to be able to obtain the full benefits of modern telecommunications technology, AT&T must be permitted to offer these services as a part of basic service. The criterion separating basic from enhanced services should be whether the content of the information is altered during transmission not the obsolete "real time," "human-to-human" concept adopted by the *Final Decision*. The Commission is not mandated simply to promote competition in and of itself nor to promote a particular economic theory, but rather to regulate "so as to make available, so far as possible to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges." [9] This mandate may well mean that the distinction between basic and enhanced services will have to be blurred, but if the public interest requires such a blurring, then blurred it should be.

Although I concur in the network services waiver standard adopted by the majority, I am not completely satisfied with the language contained in paragraphs 19–21 of this order. My main difficulty with the language on this point is that while it would properly identify "unreasonable costs" as a ground for a waiver request, it overlooks other possible grounds for waiver, namely, technological inefficiencies, transitional factors, and national defense or security considerations, and thus may limit our discretion to too rigid an application of the separate subsidiary requirement. For these reasons, I proposed that paragraphs 19–21 be amended to indicate that the Commission would consider granting a waiver in the following circumstances:

(1) Where it is technologically impossible to provide the service as an enhanced service through the separate subsidiary as opposed to its being offered as a part of the basic network;

(2) Where the provision of the service as enhanced instead of basic would result in an unreasonably higher economic burden or significantly greater costs to be borne by consumers of the service;

(3) Where transitional considerations require that existing or soon to be offered services be given a reasonable period of time to comply with the separation requirement; or

(4) Where other public interest factors, such as national defense or security, require that a particular enhanced service be offered as basic.

[9] 47 U.S.C. § 151.

I withdrew my proposed amendment after I was assured during the course of the Commission's discussion that these circumstances were covered by language extant in the Order.

I also concur in the standard which would permit AT&T's subsidiary to seek a waiver of the Rules in order to construct or operate a specialized transmission network for a given customer, other than at a common business location.[10] As originally drafted, the proposed *Reconsideration* order would have affirmed the *Final Decision's* flat prohibition on construction, ownership, or operation of transmission facilities by the dominant carrier's enhanced service and CPE separate subsidiary. The subsidiary would not have been permitted even to build a customized network for a particular customer. I believe that such a broad prohibition would be anti-competitive in effect, overly restrictive in terms of preserving the basic/enchanced service dichotomy, and unnecessary in terms of essential regulatory policy. On reconsideration, I argued that the separate subsidiary should be allowed to construct, own, or operate its own transmission facilities to optimize the flexibility, innovation, and cost economy of its enhanced service and CPE offerings. The potential competitors of the dominant carrier separate subsidiary—e.g., Exxon, Xerox, IBM/SBS, Comsat—will have these clear and advantageous benefits of joint facilities/enhanced service-CPE planning, marketing, control, and operation, and I see no sound reason to deny these same competitive benefits to the dominant carrier separate subsidiary. I believe that any legitimate—as opposed to illusory—concerns about the integrity of that basic/enhanced service dichotomy could be met through the Section 214 process which would require prior Commission authorization of any separate subsidiary construction or ownership of transmission facilities. This process would provide a fully adequate safeguard against any abuse by the parent of its "market power" with respect to basic underlying transmission facilities or any neglect of its "building block" responsibilities with respect to the adequacy of the basic core network. Although I would have preferred that the transmission facilities bar be eliminated, I believe that the waiver standard adopted in this order will permit AT&T's subsidiary to be fully competive.

This order is also vast improvement over the *Tentative Decision* and the *Final Decision* with respect to the treatment of code and protocol conversion. The *Final Decision* would have precluded code and protocol conversion by AT&T within the core network. If that had occurred, it would have meant the end of telephone service as we know and need it. This *Reconsideration* order makes clear the AT&T may perform code and protocol conversion within the core network. We have recently adopted a Notice of Inquiry seeking comment as to whether AT&T should be permitted to offer code and protocol conversion services without being subjected to the separation requirement.[11] We should pursue the important issues of core network flexibility and utility which are raised in this proceeding as expenditiously as possible.

In conclusion, I firmly believe that the competitive forces we have now unleashed are the best means of stimulating technological innovation and of ensuring the highest quality service at the lowest cost to the consumer. This is, however, no time for complacency. The newly created competitive market will require continuing surveillance by the Commission to ensure that real-world performance matches theoretical promise. The Joint Board convened in Docket No. 80–286 to examine separations impacts has only recently begun its deliberations. The proceeding to study whether AT&T should be permitted to offer code and protocol conversion service offerings as a part of the core network has just been initiated, while the proceeding to work out the details for implementing the deregulation of in-place CPE has not yet been established. The Commission must promptly address the large number of issues remaining so that we may continue the positive progress achieved in this proceeding thus far—progress which will mean a dramatic improvement in telecommunications service and equipment offerings to the American people.

December 16, 1980.

Statement of Commissioner Anne P. Jones—Reconsideration of the Final Decision in the Second Computer Inquiry

I believe that the Commission's action on Reconsideration in the Second Computer Inquiry has gone a long way towards alleviating the concerns which I have previously expressed regarding the Final Decision. The modification we have adopted should provide a sound

[10] See, *supra*, para. 82.

[11] Digital Communications Protocols, Notice of Inquiry, ——FCC 2d ——, FCC 80–702 (Adopted On December 4, 1980; Released on December 8, 1980).

structural framework for service providers, allowing them to bring innovative and diverse services and products to the marketplace to the benefit of users and consumers.

In my statement on the Final Decision, I expressed some reservations regarding the degree of structural separation imposed upon both AT&T and GTE, prior to any clear and convincing evidence that anticompetitive abuse would take place in the provision of enhanced services and customer premises equipment (CPE). However, I am now convinced that AT&T's sheer size, and its potential for either inhibiting or harming competition before there could be effective regulatory intervention, argues for the imposition of the structural separation measures adopted by the Commission.

By the same token, I feel that the gamble of not requiring the original structural separation provisions set out in the Final Decision is worth taking in the case of GTE, since, due to its smaller relative size, the same potential for harm does not exist. In addition, GTE is highly dependent on AT&T's toll facilities in order to provide its own enhanced services. Therefore, unlawful cross subsidization of enhanced services is much less likely to occur than in the case of AT&T itself.

While I believe that the structural separation requirements imposed upon AT&T are justified, I also believe that there may be specific situations in which the benefits to consumers due to reducing the potential for anticompetitive abuse are outweighed by the extra costs which the separation requirements may cause. It is for this reason that I suggested the creation of an explicit waiver process specifically designed to deal with two such situations: problems arising from the Basic/Enhanced definition, and problems arising from the prohibition on the ownership of transmission facilities by a separate subsidiary.

I believe that our Basic/Enhanced definitional structure draws a bright line in the correct place between basic services, which we may continue to regulate, and enhanced services, which will be provided on an unregulated basis. Since I believe that competition should be relied upon to the fullest extent possible to meet the telecommunication needs of this country, I believe that a heavy burden of proof should be placed upon any carrier which wishes to modify any of the separation requirements imposed on the provision of enhanced services because such modifications would result in more services being subjected to varying degrees of regulation rather than being subjected to the test of the marketplace.

The prohibition on the ownership of transmission facilities by a separate subsidiary was one of the most troublesome issues faced by the Commission on Reconsideration. Valid arguments have been made on both sides of this issue but on balance I am now convinced that the prohibition on AT&T should be sustained. At present virtually all enhanced service providers are dependent upon AT&T for underlying basic services. I believe the prohibition on ownership of transmission facilities in AT&T's separate subsidiary will provide the proper incentive for AT&T to continue to upgrade its underlying basic service network, since its own subsidiary will be dependent upon it. Such an incentive will stimulate the introduction of new technologies into the basic service network, will help insure the provision of adequate capacity for all enhanced service providers, and will help guarantee that complex interfaces into the basic service network will be available to all enhanced service providers on an equitable basis.

As in the case of the Basic/Enhanced definition, in certain circumstances the prohibition on the ownership of transmission facilities may cause undue hardship to consumers or users of telecommunication services. In such circumstances a waiver may be required.

Further, as I suggested, the subsidiary will not be precluded from constructing transmission facilities for a third party as long as these facilities are not owned or operated by the subsidiary. Moreover, the bar on transmission facilities ownership will not encompass facilities "that link various operations of a customer where its communication needs are spread among multiple buildings at a common location".

Another concern that I raised in my previous statement on the Final Decision was that the March 1, 1982 deadline for CPE deregulation was too early. We have now adopted a bifurcated approach to the deregulation of CPE. The more complex problems associated with embedded CPE will be resolved in a subsequent proceeding. I hope that this approach will permit an adequate transition for the deregulation of embedded CPE and its resulting impact upon local ratepayers. However, I still feel that the March 1, 1982 deadline for the deregulation of new CPE may be unrealistic.

Few if any deicisions made by this Commission or during my tenure as a Commissioner will influence this nation's telecommuncation services and products more than the decision made in the Second Computer Inquiry. I believe the foundation has been laid for the growth of innovative and diverse services free from the constraints of unnecessary regulation, and, as a result, the nation's telecommunications industry will better be able to meet the needs of the future.

BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

[OST Docket No. 1; Amdt. 1]

Organization and Delegation of Powers and Duties; Order of Secretarial Succession

AGENCY: Department of Transportation.

ACTION: Final rule.

SUMMARY: This amendment adds the Administrator of the Saint Lawrence Seaway Development Corporation to the list of Department of Transportation officials who succeed to the Office of Secretary of Transportation in the case of disability or absence of the Secretary, or vacancy in the Office of Secretary.

EFFECTIVE DATE: January 15, 1981.

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Office of the General Counsel, 202-426-4723.

SUPPLEMENTARY INFORMATION: Since this amendment relates to Departmental management, procedures, and practices, notice and public procedure on it are not required and it may be made effective in fewer than thirty days after publication in the Federal Register.

In consideration of the foregoing, § 1.26 of Title 49, Code of Federal Regulations, is amended by adding a new subparagraph (7) at the end of paragraph (a), to read as follows:

§ 1.26 Secretarial succession.

(a) The following officials, in the order indicated, shall act as Secretary of Transportation, in case of the absence or disability of the Secretary, until the absence or disability ceases, or, in the case of a vacancy, until a successor is appointed:

* * * * *

(7) Saint Lawrence Seaway Development Corporation Administrator.

(Sec. 9(e), Department of Transportation Act, 49 USC 1657(e).)

Issued in Washington, DC, on January 15, 1981.

William J. Beckham, Jr.,

Acting Secretary of Transportation.

[FR Doc. 81-2121 Filed 1-16-81; 8:45 am]

BILLING CODE 4910-62-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 32

Hunting; Opening of Wildlife Refuges in Arkansas and Mississippi

AGENCY: Fish and Wildlife Service.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of certain national wildlife refuges in Arkansas and Mississippi is compatible with the objectives for which the areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public. In addition, managed big game hunts are designed to keep population levels compatible with habitat capabilities. This document establishes special regulations effective for the upcoming hunting seasons for certain big game species.

DATES: Period covered—March 21, 1981 to May 3, 1981.

FOR FURTHER INFORMATION CONTACT: The Area Manager or appropriate refuge manager at the address or telephone number listed below:

Gary L. Hickman, Area Manager, 200 E. Pascagoula St., Suite 300, Jackson, Mississippi 39201, Telephone (601) 960-4900.

Raymond McMaster, Refuge Manager, White River National Wildlife Refuge, Box 308, DeWitt, Arkansas 72042, Telephone 501/946-1468.

George Chandler, Acting Refuge Manager, Panther Swamp National Wildlife Refuge, P.O. Box 107, Yazoo City, Mississippi 39194, Telephone 601/746-8511.

Supplementary Information

Alton Dunaway is the primary author of these special regulations.

General Conditions

1. Hunting is permitted on national wildlife refuges indicated below in accordance with 50 CFR Part 32, all applicable state regulations, the general conditions, and the following special regulations:

The Refuge Recreation Act of 1963 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires: (a) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (b) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which these refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November, 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

2. A list of special conditions applying to individual refuge hunts and a map of the hunt area(s) are available at each refuge headquarters. Portions of refuges which are closed to hunting are designated by signs and/or delineated on maps.

3. Access points on certain refuges are limited to designated roads or other specified areas. Vehicle use on all refuge areas is restricted to designated roads and lanes.

4. Persons under 16 must be under the close supervision of an adult. For safety reasons each adult may not have more than two juveniles under his supervision.

5. Dogs are not permitted on refuge areas during hunts.

§ 32.22 Special regulations; big game hunting for individual wildlife refuge areas.

Arkansas—White River National Wildlife Refuge

(1) Turkey hunting is permitted Wednesday through Saturday as follows: April 1, 1981 through April 4, 1981; April 8, 1981 through April 11, 1981; April 15, 1981 through April 18, 1981; April 22, 1981 through April 25, 1981; and April 29, 1981 through May 2, 1981.

(2) Loaded firearms are not allowed in boats, vehicles, or on campgrounds.

(3) Boats may be used to reach hunting areas. Roads will be closed if too wet for traffic.

(4) Permit is required and will be made available at State license dealers near the refuge in DeWitt, Elaine, Mellwood, Tichnor, St. Charles, Marvell, and Helena.

(5) All turkey killed must be checked at one of the following check stations: Wild Goose Bait Ship, Rush's Bait Shop—Tichnor, Rush's Sport Shop—DeWitt, O.B.'s Catfish Farm—Ethel, White River Bait Shop—St. Charles, Singleton's Bait Shop—Indian Bay, or Davis Grocery—Mellwood.

Mississippi—Panther Swamp National Wildlife Refuge

(1) Turkey hunting will be permitted throughout the State spring season. No Sunday hunting.

The provisions of these special regulations supplement the regulations which generally govern hunting on wildlife refuge areas and which are set forth in Title 50, *Code of Federal Regulations*, Part 32. The public is invited to offer suggestions and comments at any time.

Dated: January 7, 1981.

Gary L. Hickman,

Area Manager.

BILLING CODE 4310-55-M

Proposed Rules

Federal Register
Vol. 46, No. 13
Wednesday, January 21, 1981

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 211

[Docket Nos. ERA-R-80-09A; ERA-R-80-36]

Alaska North Slope Crude Oil Entitlement Adjustment; Domestic Crude Oil Entitlements

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of intent to defer issuance of final rules.

SUMMARY: On September 8, 1980, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) issued a further notice of proposed rulemaking and public hearings (45 FR 61268, September 15, 1980) to reduce the entitlement obligation on controlled Alaska North Slope (ANS) crude oil by $2.00 per barrel. In a separate notice of proposed rulemaking issued on October 24, 1980 (45 FR 72552, October 31, 1980), ERA proposed amendments to the entitlements program in 10 CFR 211.67 to reduce post-entitlement cost differences between equivalent price-controlled and uncontrolled domestic crude oil by establishing separate entitlement obligations for refineries in PADDs I–IV and refineries in PADD V. An adjustment to reflect the differential between high and low sulfur controlled crude oil also was proposed. Public hearings were held on both proposals and written comments were received.

The purpose of this notice is to advise the public that ERA has evaluated the written and oral comments and has assessed the current crude oil market, and as a result of this analysis has determined at this time to defer issuance of final rules with respect to both proposals.

William L. Webb (Office of Public Information), Economic Regulatory Administration, Room B–110, 2000 M Street NW., Washington, D.C. 20461, (202) 653–4055

David A. Welsh (Office of Petroleum Operations), Economic Regulatory Administration, Room 6208, 2000 M Street NW., Washington, D.C. 20461, (202) 653–3459

Daniel J. Thomas (Office of Petroleum Price Regulations), Economic Regulatory Administration, Room 7116, 2000 M Street NW., Washington, D.C. 20461, (202) 653–3271

William Funk or Peter Schaumberg (Office of General Counsel), Department of Energy, Room 6A–127, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–6736 or 252–6754.

SUPPLEMENTARY INFORMATION: We have decided to defer action on our proposal to reduce the entitlement obligation imposed upon controlled ANS crude oil for several reasons. First, recent changes in prices for crude oils indicate that any price disadvantage of price-controlled ANS crude oil in comparison with alternative sour crude imports at the Gulf Coast has been reduced significantly so as to restore the competitiveness of the post-entitlement price of controlled ANS. Second, because of the increasing effect of the phased decontrol of domestic crude oil prices, the amount of ANS crude oil that may to some extent be disadvantaged has diminished substantially. Finally, at the public hearing on our proposal in this proceeding, the ANS producers reaffirmed our opinion that retention of the existing ANS entitlement obligation would not adversely affect North Slope production.

The decision to defer adoption of the other proposed changes to the entitlements program also was based upon several factors. First, the post-entitlement cost differential between controlled and equivalent exempt domestic crude oils in PADDs I–IV has diminished significantly. As a result, many commenters were of the view that the additional reporting and administrative burdens associated with the proposed changes outweighed any anticipated benefits at this time. Also, as with the ANS proposal, the diminishing volume of controlled crude oil each month is ameliorating the effects of any remaining disparities between controlled and exempt domestic crude oil.

Therefore, the proposed changes for ANS crude oil will not be made effective for crude oil runs-to-stills beginning October 1, 1980, and the other proposed changes for domestic crude oil entitlements will not be made effective for crude oil runs-to-stills beginning January 1, 1981. Until further notice, refiners and producers should continue to base their business decisions on the existing entitlement regulations.

Issued in Washington, D.C., January 9, 1981.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 811 0015]

Godfrey Company; Proposed Consent Agreement with Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order, accepted subject to final Commission approval, would require, among other things, a Waukesha, Wis. operator of a retail grocery chain to divest, within six months from the effective date of the order, seven specified retail grocery stores located in "The Milwaukee SMSA." Such divestiture would have to be made to an acquirer or acquirers approved in advance by the Commission. The company would also be prohibited for a period of ten years from making any acquisition in the retail grocery store business involving four or more stores without prior Commission approval.

DATE: Comments must be received on or before March 23, 1981.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th St. and Pennsylvania Ave., N.W., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: FTC/C, E. Perry Johnson, Washington, D.C. 20580. (202) 523–3601.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

United States of America Before Federal Trade Commission

In the matter of Godfrey Company, a corporation; file No. 811–0015, agreement containing consent order to divest and other relief.

The Federal Trade Commission having initiated an investigation of the proposed acquisition by Godfrey Company, a corporation, of certain assets of Jewel Companies, Inc., a corporation, and it now appearing that Godfrey Company, a corporation, hereinafter sometimes referred to as Godfrey, is willing to enter into an agreement containing an Order to Divest and Other Relief:

It is hereby agreed by and between Godfrey Company, a corporation, but its duly authorized officer and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Godfrey Company is a corporation organized, existing and doing business under and by virtue of the laws of the State of Wisconsin with its principal executive offices located at 1200 West Sunset Drive, in the City of Waukesha, State of Wisconsin 53187.

2. Godfrey admits all of the jurisdictional facts set forth in the draft of the complaint here attached.

3. Godfrey waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of the complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify Godfrey in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by Godfrey that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to Godfrey, (1) issue its complaint corresponding in form and substance with the draft of the complaint here attached and its decision containing the following Order to Divest and Other Relief in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the Order to Divest and Other Relief shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to Godfrey's address as stated in this agreement shall constitute service. Godfrey waives any right it might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or to contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

8. This agreement is conditioned in its entirety on the consummation of the acquisition of Jewel assets pursuant to the agreement dated October 13, 1980 between Godfrey and Jewel. If for any reason such acquisition shall be cancelled and not occur, this agreement shall thereafter be of no effect.

ORDER TO DIVEST AND OTHER RELIEF

I.

As used in this order:

(A) "Godfrey" means Godfrey Company, a corporation organized under the laws of Wisconsin with its principal executive offices at 1200 West Sunset Drive, Waukesha, Wisconsin 53187 and its directors, officers, agents and employees, and its subsidiaries, successors and assigns.

(B) "Jewel" means Jewel Companies, Inc., a corporation organized under the laws of New York with its principal executive offices at 5725 East River Road, Chicago, Illinois 60631.

(C) "Retail grocery stores" are retail stores presently classified under Bureau of Census Industry Classification No. 541, including supermarkets, convenience stores and delicatessens, which primarily sell a wide variety of canned or frozen foods, such as vegetables, fruits and soups; dry groceries, either packaged or in bulk, such as tea, coffee, cocoa, dried fruits, processed food, and non-edible grocery items. In addition, these stores often sell smoked and prepared meats, and fresh fish and poultry, fresh vegetables and fruits, and fresh or frozen meats.

(D) "The Milwaukee SMSA" means the Milwaukee Standard Metropolitan Statistical Area, consisting of the four Wisconsin counties of Milwaukee, Waukesha, Washington and Ozaukee.

(E) "Godfrey stores" means those retail grocery stores in the Milwaukee SMSA owned by or operated by Godfrey.

(F) "Jewel stores" means those retail grocery stores in the Milwaukee SMSA owned or operated by Jewel.

(G) The "disposition stores" means the following Godfrey ("G") stores and Jewel ("J") stores:

1. G–427 (3045 S. 13th St., Milwaukee, WI.)
2. G–607 (6077 S. Packard Ave., Cudahy, WI.)
3. G–810 (3939 S. 76th St., Milwaukee, WI.)
4. J–1201 (1201 N. 35th St., Milwaukee, WI.)
5. J–729 (729 S. Layton Blvd., Milwaukee, WI.)
6. J–15182 (N81 W15182 Appleton Ave., Menomonee Falls, WI.)
7. J–6251 (6251 S. 27th St., Greenfield, WI.)

(H) "Acquisition", "acquire", "merger", or "merge with" includes al other forms of arrangement by which Godfrey may obtain, directly or indirectly, all or any part of the stock or assets, both tangible and intangible, of any other retail grocery store or stores.

II.

It is ordered that within six months from the date on which this order becomes final, Godfrey shall divest itself absolutely and in good faith of all of its right, title and interest in the disposition stores; provided, however, that Godfrey may, if so required by the lessor(s) of any one or more of the disposition stores, remain a party to its lease with such lessor(s) and may take possession of any of the disposition stores upon default under the lease or sublease for such store by the sublessee which acquired such disposition store from Godfrey. In the event of such reacquisition of any of the disposition stores, Godfrey shall divest the reacquired disposition store in accordance with the terms of this order within six (6) months of the date of reacquisition of any such store. Until approval of divestiture, Godfrey shall continue to operate disposition stores G–427, G–607 and G–810 as retail grocery stores. Divestiture shall be made only to an acquiror or acquirors approved in advance by the Federal Trade Commission. The purpose of

the divestiture required by this paragraph is to assure the continued operation of the disposition stores as retail grocery stores and their survival as viable competitors in the Milwaukee SMSA.

III.

It is further ordered that for a period of ten (10) years from the date on which this order becomes final, Godfrey shall not merge with or acquire, or merge with or acquire and thereafter hold, as corporately operated or as franchised retail grocery stores, directly or indirectly through subsidiaries or in any other manner, without the prior approval of the Federal Trade Commission, the whole or any part of the stock or assets of any individual, firm, partnership, corporation or other legal or business entity which directly or indirectly owns or operates any retail grocery store, where such acquisition or merger involves four or more such retail grocery stores; provided, however, that nothing in this order shall be construed to prevent Godfrey from being or becoming a guarantor of lease obligations of any Godfrey franchisee.

IV.

It Is Further Ordered that within sixty (60) days from the date on which this order becomes final and every sixty (60) days thereafter until the divestiture required by paragraph II of this order is completed, Godfrey shall submit to the Federal Trade Commission a written report setting forth in detail the manner and form in which Godfrey intends to comply, is complying, and has complied with the terms of this order and such additional information relating thereto as may from time to time be required. In addition, upon written request of the staff of the Federal Trade Commission, Godfrey shall submit such reports in writing with respect to the other requirements of this order as may from time to time be requested.

V.

It Is Further Ordered that Godfrey notify the Federal Trade Commission at least thirty (30) days prior to any proposed corporate changes, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation, which may affect compliance with the obligations arising out of this order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Godfrey Company.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments from interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Commission's investigation in this matter concerned the November, 1980 acquisition by Godfrey Company ("Godfrey") of the assets of eleven retail grocery stores operated by Jewel Companies, Inc. ("Jewel") in the Milwaukee, Wisconsin Standard Metropolitan Statistical Area (SMSA). Godfrey is a retail grocery chain which does business in the Milwaukee area as well as in other parts of Wisconsin. The Commission complaint accompanying the proposed consent order charges that Godfrey's acquisition of Jewel's assets in Milwaukee violated section 7 of the Clayton Act and section 5 of the Federal Trade Commission Act. The complaint alleges that there may be anticompetitive effects of the acquisition in the Milwaukee SMSA, a highly concentrated market. The alleged anticompetitive effects include (a) the elimination of actual competition between Godfrey and Jewel in the Milwaukee SMSA; (b) increased concentration in the retail grocery store business in the Milwaukee SMSA; and (c) the encouragement of further acquisitions and mergers by and among other leading firms in the retail grocery store business in the Milwaukee SMSA.

The proposed order contains provisions requiring divestiture and imposing limitations on Godfrey's future acquisitions. Under the order Godfrey will be required to divest seven retail grocery stores in the Milwaukee SMSA, within six months of the date the order becomes effective. Divestiture will be made to an acquirer or acquirers approved in advance by the Federal Trade Commission. The proposed order states that the purpose of this divestiture is to assure that the divested retail grocery stores continue to operate as such, and as viable competitors in Milwaukee. The proposed order also requires that for a period of ten years from the effective date of the order, Godfrey will not be permitted to make any acquisitions in the retail grocery store business involving four or more stores without prior Commission approval.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Carol M. Thomas,

Secretary.

BILLING CODE 6750-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1406

Provision of Performance and Technical Data for Coal and Wood Burning Appliances

AGENCY: Consumer Product Safety Commission.

ACTION: Extension of comment period on proposed rule.

SUMMARY: The Commission extends the period for submitting written data, views, and arguments on its proposed rule that would require certain performance and technical data to be supplied with coal and wood burning stoves, free-standing fireplaces and similar appliances. The period is extended one month, from January 2, 1981, to February 2, 1981. The extension was made in response to requests from groups representing the interests of retailers and distributors of the affected products.

DATES: The comment period is extended to February 2, 1981.

ADDRESSES: Written comments, preferably in five copies, should be submitted to the Secretary, Consumer Product Safety Commission, Washington, D.C., 20207, and should be titled *Coal and Wood Stoves, Proposed Labeling Rule.*

All materials the Commission has that are relevant to this proceeding, including any comments that may be received on the proposal, may be seen in, or copies obtained from the Office of the Secretary, Third Floor, 1111 18th Street, N.W., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT: Stan Morrow, Project Manager, Fire and Thermal Burn Hazards Program, Office of Program Management, Consumer Product Safety Commission, Washington, D.C., 20207, phone (301) 492-6453.

SUPPLEMENTARY INFORMATION: On November 17, 1980, the Commission proposed a rule that would require that certain performance and technical data be supplied with coal and wood burning stoves, free-standing fireplaces, and similar appliances in order that consumers will be aware of important safety information concerning the installation, operation, and maintenance of these appliances (45 FR 76018). Part of the required data would be in the form of a permanent, conspicuous written notice on the device that would provide the following information:

a. Appropriate minimum clearances between the stove and chimney

connector and combustibles to avoid the occurence of fire.

b. Type of chimney and connector appropriate for use with the appliance and identification of parts or precautions required for passing the chimney or connector through combustible walls or ceilings.

c. Type and dimensions of floor protection, if necessary to protect combustible floors.

d. Information to prevent overfiring of the appliance.

e. A statement of how often the chimney and chimney connector should be inspected and cleaned.

f. A statement that local building or fire officials should be contacted about restrictions and installation inspection in the owner's area.

g. The name and address of the manufacturer or private labeler, and the model designation of the appliance.

Items (d) and (e) and the appropriate distance to be maintained from furnishings in the room would be placed so that they are readily visible during normal use of the appliance.

The proposed rule would also require that complete installation, operation, and maintenance directions be provided with the appliance. The appliance's packaging would bear a statement referring to the installation directions. Sales catalogs and other point of sale literature would contain the information required by items (a) and (f) above. To facilitate the Commission's confirmation that manufacturers are adequately complying with the rule, manufacturers must provide copies of the notice on the appliance, and of the directions, to the Commission.

The proposal provided for the submission of written comments to the Commission by January 2, 1981.

By letter dated December 1, 1980, Marcus J. Smith of the National (Wood Stove & Fireplace) Journal requested an extension of the comment period. He stated that it was impossible for his magazine to notify its readers, who make, distribute, and retail stoves, before January 2, 1981.

On December 23, 1980, the Commission received additional requests for an extension of the comment period from the American Retail Federation and the National Retail Merchants Association. These requests cited the difficulty of formulating comments by January 2 because the comment period extended through the retailers' busiest season.

After considering these requests, the Commission extended the time for submitting data, views, and arguments on the proposal until February 2, 1981.

Dated: January 13, 1981.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 653

Fiscal Year 1981 Level For Veterans Preference Indicators of Compliance

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed Rule.

SUMMARY: The Employment and Training Administration of the Department of Labor is proposing to update the levels for the veterans preference indicators of compliance for fiscal year 1981 as it is required to do on an annual basis under 20 CFR 653.230(c) (e) and (j). The veterans preference indicators of compliance are used by the Department to monitor State employment service agencies to insure that veteran applicants receive priority service as required by 38 U.S.C., Chapters 41 and 42 and by 20 CFR 653, Subpart C. The Department does not propose any change in the structure of the indicators of compliance. Changes are limited to adjustments in the floor levels for job placement in several States.

DATES: Comments addressing the proposed changes to the veterans preference indicators of compliance for fiscal year 1981 are due by February 20, 1981. Comments directed to the basic structure of the veterans indicator system are due by April 21, 1981.

ADDRESSES: Comments on the proposed rule should be sent to: David O. Williams, Administrator, U.S. Employment Service, Room 8000, 601 D Street, NW., Washington, D.C. 20213.

FOR FURTHER INFORMATION CONTACT: Gilbert Apodaca, Acting Director, Office of Program Review, U.S. Employment Service, Room 8208, 601 D Street, NW., Washington, D.C. 20213, 202-376-6755.

SUPPLEMENTARY INFORMATION: The Department has issued regulations to implement 38 U.S.C. Chapters 41 and 42 at 20 CFR Part 653, Subpart C. These regulations set forth requirements concerning services to veterans by State employment service agencies. Sections 653.221-226 set forth standards of performance governing State agency service to veterans, and § 653.230 sets forth veterans preference indicators of compliance for use in determining whether the performance standards have been met. Under 20 CFR 653.230(c), (e), and (j) the Employment and Training Administration is required to update the numerical values for the veterans preference indicators of compliance on an annual basis and to publish such values in the **Federal Register.**

Indicators of Compliance

In accordance with 20 CFR 653.230(a), (c) and (e) and (j), the performance of each State agency and factors outside of each agency's control were considered in developing the proposed fiscal year 1981 veterans preference indicators and appropriate numerical values for each indicator. Historical performance data examined covered six months of fiscal year 1980 as well as fiscal years 1979, 1978 and 1977.

As a result of the above review process, changes to the fiscal year 1980 compliance indicators for fiscal year 1981 are limited to changes in the floor level indicators for several States as discussed below. The Department proposes no change in the computational method used in fiscal year 1980. While alternatives incorporating significant revisions to the particular indicators and numerical standards were considered, such changes to the present set of indicators and required levels were judged not to be appropriate at this time.

A review of job service performance shows that substantial progress in service provision to all applicants was made during the 1977-79 period. This period was characterized by expanding employment opportunities in the regular unsubsidized job market and a sharp increase in the number of subsidized jobs available to unemployed job seekers unde the President's Economic Stimulus Program. State agencies took full advantage of these opportunities by expanding their contacts with the business community and providing strong support to the Economic Stimulus Program. As reflected by State agency performance on the veterans preference indicators during these years, these efforts were particularly beneficial to veterans as their numbers served rose in abosolute terms and on a preferential basis.

A number of factors indicate that the expanding employment opportunities that characterized most of the 1977-1979

period have been reversed during fiscal year 1980, with recovery not anticipated until the second quarter of fiscal year 1981. The effect of the decline in economic activity has been to significantly increase the number of job applicants while concurrently producing a sharp reduction in job opportunities available to ES applicants, including veterans. Accordingly, State agency performance data through the first half of fiscal year 1980 show declines in service levels particularly in the area of placements. For fiscal year 1981, expectations for the overall condition of the economy including employment prospects are uncertain. In addition, State agencies will again be operating with budget levels similar to those of previous years with no reasonable expectation for additional resources.

The Department believes that the above consideration represent "other appropriate factors" under 20 CFR 652.230(c) for use in computing State agency floor levels. Therefore, based on recent State agency performance, reduced availability of job opportunities for ES applicants, uncertain economic conditions for fiscal year 1981 and the lack of increases in State agency resources, the Department has determined with few exceptions (described below) to propose in fiscal year 1981 the same floor level and preference level service indicators and corresponding numerical values established in fiscal year 1980.

Based on the above considerations, ETA proposed to limit changes lto the veterans preference indicators of compliance to revision of the placement floor level indicator as follows:

West Virginia, 19%.
Indiana, 16%.
Michigan, 14%.
Ohio, 16%.

These States all have serious unemployment problems. Michigan has the highest unemployment rate in the nation with Indiana second, Ohio fourth and West Virginia fifth. Michigan, Indiana and Ohio have also had the largest increase in unemployment from May 1979 to May 1980, while West Virginia has been beset by a sluggish coal industry. These levels recognize the impact of adverse economic conditions but are not so low as to guarantee achievement.

Comments of the Structure of the Indicators of Compliance System

ETA invites comments from federal, State and local government units, veterans organizations and other interested persons on ways to improve the veterans perference indicator system to make it more effective, manageable and usabale in promoting services to veterans. All aspects of the veterans preference indicator system can be addressed. Comments received on the structure of the system will be carefully considered and analyzed and, if appropriate, provide the basis for changes in the current veterans preference indicators for future years.

Comments on the structure of the system should be submitted by April 21, 1981. However, commenters may submit system related comments in conjunction with comments to the proposed indicator levels for fiscal year 1981 February 20, 1981.

The proposed regulation is neither a "significant" nor a "major" regulation under the criteria set forth in the Department of Labor's guidelines under Executive Order 12044 which were published on January 26, 1979 at 44 FR 5570. Consequently, neither an action plan, which is required for significant regulations, nor a regulatory analysis, which is required for major regulations has been prepared.

Accordingly, it is proposed that in 20 CFR 653.230(c)(1)(iii) the state values in the following four states be revised to read as follows:

§ 653.230 Veterans preference indicators of compliance for fiscal year 1981.

BILLING CODE 4830-01-M

DEPARTMENT OF LABOR

Office of the Secretary

29 CFR Part 8

Practice Before the Board of Service Contract Appeals

Note.—This document originally appeared in the Federal Register for Monday January 19, 1981. It is reprinted in this issue to meet requirements for publication on the Tuesday-Friday schedule assigned to the Department of Labor.

AGENCY: Office of the Secretary, Labor.

ACTION: Withdrawal of proposed regulations.

SUMMARY: It had been proposed to create a new Board of Service Contract Appeals and to give it broad jurisdiction to hear the various kinds of issues which can arise under the Service Contract Act. The appeals would arise from either rulings of the Wage and Hour Administrator or from the decisions of the administrative law judges. Because of concerns expressed during the notice and comment period, this proposal is now withdrawn. An appeal to the Secretary of Labor has been substituted as Subpart F of the revision of 29 CFR Part 6.

FOR FURTHER INFORMATION CONTACT: Gail V. Coleman, Counsel for Contract Labor Standards, General Legal Services, Office of the Solicitor, Department of Labor Building, 200 Constitution Avenue, NW, Washington, D.C. 20212. Phone 202-523-8268.

SUPPLEMENTAL INFORMATION: On April 22, 1980, a proposal was published (45 FR 27410) to create a Board of Service Contract Appeals to hear appeals from rulings of the Wage and Hour Division and from decisions by administrative law judges involving Service Contract Act matters and related Contract Work Hours and Safety Standards Act matters. Great concern was expressed in the comments received that such a formal appeal mechanism would create unacceptable delays in areas of procurement requiring quick decisions, such as wage determinations. There was also concern expressed regarding the creation of another formal review body.

Upon reflection, the Department has decided to withdraw the proposal and to substitute what should be a more expeditious appeal to the Secretary. These regulations are being published as a new Subpart F to 29 CFR Part 6.

Signed at Washington, D.C. this 14th day of January, 1981.

Ray Marshall,

Secretary of Labor.

40 CFR Part 762

[OPTS-62010; TSH-FRL 1681-2]

Fully Halogenated Chlorofluoroalkanes; Proposed Essential Use Exemption for Pharmaceutical Rotary Tablet Press Punch Lubricants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to amend its chlorofluorocarbon rule to add a new essential use exemption for pharmaceutical rotary tablet press punch lubricants.

DATES: All comments and requests for a public hearing must be submitted by February 20, 1981.

ADDRESS: Written comments should be addressed to the Document Control Officer for this proposed rulemaking and should bear the identifying notation "OPTS-62010." Joni T. Repasch, Technical Information Specialist, Office of Pesticides and Toxic Substances (TS-793), Environmental Protection Agency, Rm. E-447, 401 M St., SW Washington, D.C. 20460, (202-755-8050).

Requests for public hearing should be submitted, in writing, by the end of the comment period. These requests should include: (1) A brief statement of the interest of the person or organization in the proceeding; (2) a brief outline of the points to be addressed; (3) an estimate of the time required; and, (4) a nonbinding list of the persons to take part in the presentation. Requests should be directed to the Record and Hearing Clerk: Gordon McCurdy, Record and Hearing Clerk, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Room E-529A, 401 M St., SW, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: John B. Ritch, Jr., Director, Industry Assistance Office, Office of Pesticides and Toxic Substances, (TS-799), Environmental Protection Agency, 401 M ST., SW, Washington, D.C. 20460, Toll Free: (800-424-9065). In Washington, DC: (554-1404).

SUPPLEMENTARY INFORMATION: EPA promulgated a rule under 40 CFR Part 762 (43 FR 11318) which prohibited almost all manufacture, processing and distribution in commerce of fully halogenated chlorofluoroalkanes (hereinafter referred to as chlorofluorocarbons or CFCs) for those aerosol propellant uses which are subject to the Toxic Substances Control Act (TSCA) (15 U.S.C. 2601 et. seq.),

published in the Federal Register of March 17, 1978 (43 FR 11318). EPA provided exemptions from this general prohibition for uses determined to be "essential" according to certain criteria. EPA is now proposing to amend the rule in order to add and essential use exemption for pharmaceutical rotary tablet press punch lubricants.

Pharmaceutical rotary tablet press punch lubricants are used to lubricate various moving parts of machines which make medicine tablets. Punches and dies are used in the press to form solid tablets. Since the punches are located in punch sockets which have a clearance of only .002 inches, lubrication is considered critical.

EPA is aware of two different types of lubricants which are used on pharmaceutical rotary tablet press punches. One is grease; the other is Teflon Only Teflon lubricants are propelled by chlorofluorocarbons.

The primary area of lubrication is the side or shank area of the punches. The lubricant is not placed on the surface which actually touches the tablet. Therefore, these lubricants are not mold release agents which have previously been granted and essential use exemption.

A request for this exemption was made before EPA promulgated the final rule on March 17, 1978. EPA denied the request on the grounds that nonaerosol application of the lubricants was feasible and that carbon dioxide-propelled products should be suitable alternatives. Information submitted since promulgation of the final rule has led EPA to reevaluate this determination.

The process EPA has used in evaluating applications for essential use exemptions is described in "Essential Use Determinations—Revised", a support document to the March 17, 1978 rule. In making these determinations, EPA considers the availability or nonavailability of substitutes, the possibility of severe economic hardship if the use of CFC is not allowed, and the health and environmental consequences of use of another product in place of CFCs. Decisions to grant or deny exemptions are based on all these criteria. In particular, the nonavailability of an alternative by itself is not a basis for finding that a product is essential.

In evaluating this exemption request, EPA considered potential alternatives to chlorofluorocarbon-propelled Teflon lubricants, including grease and other methods for application of Telflon .

Grease is not a suitable lubricant for newer machines which run at greater speeds than the older machines. The increased speed causes the grease to fall down the shank of the punch and contaminate the medicine tablet.

In theory, Teflon lubicants can be applied by brush by aerosol. However, brush application is not considered to be safe. Punches must be moved during lubrication so that all surfaces requiring lubrication are exposed. In the past employees would lubricate the machines while they were moving. This procedure was a safety hazard and is currently prevented by OSHA regulations which require placement of a guard under 29 CFR 19.10 212(a)(3)(i). Employees can stop the machines to lubricate them. However, they must move the punches by hand in order to lubricate them thoroughly, and this is a safety hazard. Brush application has an additional disadvantage in that bristles may break off and contaminate the medicine tablets. Because of the difficulties with brush application, EPA does not consider it a suitable alternative to aerosol application.

Finally, EPA considered the use of alternative propellants for application of Teflon lubricants, including carbon dioxide and hydrocarbons. Carbon dioxide does not offer adequate performance characteristics. The CO_2 spray is much colder than the F–12 chlorofluorocarbons spray and creates the condensation when the spray touches the steel punches. The water Mixes with the Teflon® and causes a smearing effect in the punch socket and eventual binding of the punch in the socket. Furthermore, some parts of the machinery are cast iron, and the water causes rusting. Hydrocarbon sprays cannot be used because they create a flammability hazard. Thus, only CFCs of the major aerosol propellants have been proved to be technically effective and generally safe.

On the basis of the above, EPA believes that there is no safe and effective alternative to CFC propellants in the lubrication of newer, high-speed pharmaceutical rotary tablet press punches. EPA has not performed a detailed assessment of the economic impact of not using newer machines because of a lack of an acceptable lubricant. However, EPA believes that denial of the exemption would lead to a slowdown of tableting operations, and a greater probability of product contamination. Particular problems might result in operation of the most modern high speed machines without Teflon.® The overall result would mean substantially increased cost to the manufacturer, and eventually to the consumer.

The detriment to public health resulting from unavailability of adequate lubricants is unknown. Presumably, a cessation of the use of newer machines could result in at least a short-term shortage of necessary medicinal products. On the other hand, continued production of aerosol products for this use would not have a significant impact on the environment. The annual production of this product by the company which dominates the market amounts to 6,000 cans, containing 3,000 pounds of CFCs.

Therefore, on the basis of the lack of alternatives to the use of CFCs, the economic and potential health impacts of nonavailability of such products, and the fact that the release of CFCs into the environment would be small, EPA has concluded that the use meets the criteria for an essential use, and is proposing to amend § 762.21 to provide for an exemption on this basis. This exemption would become effective upon final promulgation of the rule.

EPA has established a public record for this rulemaking, (OPTS docket number 62010) that is available for inspection in Rm. E–447, Environmental Protection Agency, 401 M St., SW, Washington, D.C., during the hours from 8:00 a.m. until 4:00 p.m., Monday through Friday, except for legal holidays. This record includes all information considered by the Agency in developing this proposal. EPA will supplement the record with additional information as it is received. The record includes the following categories of information:

1. The exemption applications from Key Industries (February 20, 1979);
2. "Essential Use of Determinations—Revised", EPA, March 17, 1978.
3. Records of all communications and meetings between EPA personnel and persons outside the Agency pertaining to the development of this rule.
4. Any factual information considered by the Agency.
5. Comments received on this notice.

Under Executive Order 12044, EPA must determine whether a regulation is "significant" and therefore subject to the procedure requirements of the order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." This rule has been reviewed and determined to be a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(Sec. 6, Pub. L. 94–469, 90 Stat. 2020 (15 U.S.C. 2065))

EPA proposes to amend 40 CFR Part 762 by adding a new paragraph (h) to § 762.21 to read as follows:

§ 762.21 Essential use exemptions.

* * * * *

(h) pharmaceutical rotary tablet press punch lubricants.

Dated: January 12, 1981.

[A-10-FRL 1724-1]

Availability of Implementation Plan Revision; State of Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability and Advance Notice of Proposed Rulemaking.

SUMMARY: EPA announces today receipt of four (4) revisions submitted by the Department of Environmental Quality in fulfillment of a condition on the approval of this portion of the Oregon Part D SIP revision.

The public is invited to submit written comments to the record which will be held open for a period of thirty (30) days.

A Notice of Proposed Rulemaking describing the rules and the action that EPA intends to take regarding them will be published in the **Federal Register** after the initial thirty (30) day public comment period has closed. A second period for the submittal of written comments will extend for thirty (30) days after the publication of the Notice of Proposed Rulemaking.

DATE: Comments will be accepted up to February 20, 1981.

ADDRESSES: The related material in support of this revision may be examined during normal business hours at the following locations:

Central Docket Section (10A-70-2), West Tower Lobby, Gallery I, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460

Air Programs Branch, Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington, 98101

State of Oregon, Department of Environmental Quality, 522 S.W. 5th Avenue, Yeon Building, Fourth Floor, Portland, OR 97207

COMMENTS SHOULD BE ADDRESSED TO: Laurie M. Kral, Air Programs Brauch, M/S 629, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Michael Gearheard, Air Programs Branch, M/S 625, Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington 98101 (206) 442-1226.

SUPPLEMENTARY INFORMATION: On June 24, 1980 EPA published in the **Federal Register** (45 FR 42265) final rulemaking on Part D revision to the Oregon SIP. As part of this action, EPA conditioned various portions of the Part D SIP pending revisions. The state responded to these conditions by submitting four (4) revisions. They are:

(1) September 8, 1980—Certain aspects of RACT determinations for OAR 340-22-170.

(2) October 16, 1980—revision and additions to the Volatile Organic Compounds rules.

(3) December 17, 1980—draft new source review rules.

(4) December 19, 1980—source testing procedures.

The October 16, 1980 Volatile Organic Compound (VOC) rules include revised rules for both Group I and Group II VOC sources. Only the Group I VOC rules were subject to EPA's June 24, 1980 conditional SIP approval. EPA will proceed with a separate rulemaking action for the Oregon VOC rules applicable to Group II sources.

The purpose of this notice is to call the public's attention to the fact that these rules have been formally submitted to EPA and are available for public inspection at the locations noted above. The public is encouraged to submit written comments regarding the proposed rules and thus participate in this rulemaking activity.

A more detailed description of the proposed Oregon SIP revisions will be published in the **Federal Register** at a later date as part of a Notice of Proposed Rulemaking.

Pursuant to the provisions of 5 U.S.C. § 605(b) I hereby certify that the attached rule will not if promulgated have a significant economic impact on a substantial number of small entities. This action only approves state actions. It imposes no new requirements. Moreover, due to the nature of the federal-state relationship, federal inquiry into the economic reasonableness of the state actions would serve no practical purpose and could well be improper.

(Sec. 110, 172, Clean Air Act (42 U.S.C. 7410 and 7502))

Dated: January 13, 1981.

Donald P. Dubois,

Regional Administrator.

[OPTS-50013A; TSH-FRC 1732-4]

N-Methanesulfonyl-p-Toluenesulfonamide; Public Meeting on Proposed Significant New Use Determination

AGENCY: Environmental Protection Agency (EPA).

ACTION: Public Meeting.

SUMMARY: EPA proposed that certain uses of the chemical substance N-methanesulfonyl-p-toluenesulfonamide be designated as "significant new uses" under section 5(a)(2) of the Toxic Substance Control Act (TSCA) (15 U.S.C. 2604) in the **Federal Register** of November 26, 1980 (45 FR 78970). The comment period for written comment to the proposed rule ended on January 12, 1981. The Chemical Manufacturers Association (CMA) requested an opportunity to convey comments orally to EPA. EPA grants the request and is holding a meeting, open to the public, to receive comments on the proposal from CMA.

DATE: The public meeting will begin at 2:00 p.m. on February 17, 1981.

ADDRESS: The meeting will be held in Washington, D.C. at: EPA Headquarters, Rm. 3908, Waterside Mall, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

John B. Ritch, Jr., Director, Industry Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-429, 401 M St. SW., Washington, D.C. 20460, Toll-Free (800-424-9060), In Washington, D.C. (554-1404).

SUPPLEMENTARY INFORMATION: EPA will hold a meeting, open to the public, concerning the N-Methanesulfonyl-p-Toluenesulfonamide significant new use proposal from 2:00 p.m. to 4:00 p.m. on Tuesday, February 17, 1981, to obtain oral comments from the Chemical Manufacturers Association. Participation in the meeting will be limited to representatives of CMA. As a standard operating policy, the Office of Toxic Substances offers an opportunity for oral comment that is not duplicative of written commentary after the close of written comment periods. This scheme allows EPA to review in advance the written commentary of those who have some additional material or interpretation to communicate which is better conveyed orally in a face-to-face, roundtable type of session. The meeting with CMA falls within this policy. The Agency will include a transcript of the session in the official public record.

Dated: January 12, 1981.

Edward A. Klein,

Director, Chemical Control Division, Office of Toxic Substances.

OFFICE OF PERSONNEL MANAGEMENT

41 CFR Ch. 16

Procurement Regulations for Federal Employees Health Benefit Plans

AGENCY: Office of Personnel Management (OPM).

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: OPM is drafting proposed regulations to apply to the negotiation and administration of contracts between OPM and carriers for Federal Employees Health Benefit Plans. This Advance Notice explains the major concepts that OPM intends to place in the proposed regulations, and invites comments from all interested persons.

DATE: Comments must be received on or before March 23, 1981.

ADDRESS: Office of Personnel Management, Compensation Group, Office of Pay and Benefits Policy, P.O. Box 57, Washington, D.C. 20044.

FOR FURTHER INFORMATION CONTACT: Ms. Mary Ann Mercer, Telephone (202) 632-4634.

SUPPLEMENTARY INFORMATION: Pursuant to the Federal Employees Health Benefits Act (FEHBA), Pub. L. 86-362, 73 Stat. 708 (1959), as now amended and codified in Chapter 89 of Title 5, United States Code, Federal employees and annuitants may purchase health insurance as a fringe benefit of their Government employment. The Government does not act as an insurer. Rather, in accordance with FEHBA, the Health Benefits Program consists of a group of "health benefit plans." These plans are group insurance policies, contracts or similar group arrangements with nongovernmental organizations, called "carriers," established for the purpose of "providing, paying for or reimbursing expenses for health services." Title 5, United States Code, Subsections 8901 (6) and (7).

Chapter 89 of Title 5 designates the Office of Personnel Management (OPM) as the agency responsible for the administration of the Federal Employees Health Benefits Program. OPM is authorized by the statute to enter into contracts with carriers to make available four categories or types of health benefit plans: (a) one Government-wide service benefit plan; (b) one Government-wide indemnity benefit plan; (c) employee organization plans available only to members of the organization and their families; and (d) comprehensive medical plans, wherein the plan itself provides health care to enrollees on a prepaid basis. 5 U.S.C. 8903. There are now over 100 plans participating in the program, including the two Government-wide plans and 18 employee organization plans.

FEHBA also provides that the Government will pay part of the cost of coverage for each employee, with the employee assuming the remainder. Currently, for all employees except those in the Postal Service, the Government pays a contribution of up to 60 percent of the average charge made by six plans designated by criteria set forth in Section 8906 of Title 5.

Under Subsection 8905(a) of Title 5, each employee is permitted to choose to enroll in one of the health benefit plans approved by OPM. Under Sections 8905(e) and 8913 of Title 5, OPM has, by regulation, designated an "open season" during each year when an employee may make changes in enrollment, including transferring from one plan to another. 5 CFR 890.301(d).

The National Treasury Employees Union v. Campbell Lawsuit

OPM entered into a contract with the Blue Cross Association and the Blue Shield Association to establish the Government-wide Service Benefit Plan authorized by 5 U.S.C. 8903. This contract is known as "Contract No. CS 1039."

On September 18, 1980, the United States District Court for the District of Columbia issued its order in the case of *National Treasury Employees Union* v. *Campbell*, C.A. No. 75-2173. The Court held that Contract No. CS 1039 is a Government procurement contract, and that therefore the Federal Procurement Regulations (FPR's) must, in part, be applied to Contract No. CS 1039. The FPR's are regulations issued by the General Services Administration; the FPR's consist of uniform policies and procedures applicable to Federal agencies in the procurement of, among other things, nonpersonal services. See 41 CFR 1-1.002. The FPR's are set forth in 41 CFR Chapter 1.

The District Court further held that while the FPR's are applicable in general to Contract No. CS 1039, "their specific application necessarily differs because of the distinctive nature of the service involved." *National Treasury Employees Union* v. *Campbell*, Slip Opinion, at 6. The District Court stated that OPM is obligated to issue regulations which inform contractors and employees of which portions of the FPR's are applicable, and of the extent to which OPM policies deviate from the FPR's. The District Court therefore ordered OPM to issue such regulations.

Purpose of This Notice

OPM believes that comments from interested parties and the public would be helpful in drafting the contemplated regulations which will define the applicability of the FPR's to the contracts between OPM and health benefits carriers for Federal employees health benefit plans. OPM anticipates that the final regulations will apply to all such contracts.

The FPR's contain in their provisions numerous Government-wide policies on the negotiation and administration of procurement contracts. OPM believes that this is an appropriate time to reexamine the manner in which these Government-wide policies apply to the rather unique form of procurement that contracts between OPM and health benefit carriers constitute. OPM has therefore set forth for comment the major concepts and policies which OPM contemplates its regulations will embody.

Material for Comment

The FPR's provide a format for each Federal agency to publish "implementing regulations deemed necessary for business concerns, and others properly interested to understand basic and significant agency procurement policies and procedures which implement, supplement or deviate from the FPR." 41 CFR 1-1.008. Such implementing and supplementing material is to be published in the **Federal Register** and then incorporated into succeeding chapters of Title 41, Code of Federal Regulations. 41 CFR 1-1.006-1. In order to carry out the order of the District Court in *National Treasury Employees Union* v. *Campbell*, OPM proposes to follow the FPR format and establish a new chapter in Title 41, Code of Federal Regulations. OPM will describe in that chapter the applicability of the FPR's to contracts between OPM and health benefit carriers, including any OPM deviations from the FPR's.

OPM proposes to generally define the applicability of the FPR's to contracts with health benefit carriers as follows: "The Federal Procurement Regulations set forth in Chapter 1 of Title 41, Code of Federal Regulations are applicable to contracts between the Office of Personnel Management (OPM) and health benefits carriers which establish health benefit plans for Federal employees and annuitants, except to the

extent that this chapter indicates that a part of the Federal Procurement Regulations is inapplicable, or that OPM has determined to deviate from a part of the Federal Procurement Regulations."

OPM proposes to then implement the particular parts of the FPR's applicable to the contracts for health benefit plans through a series of more specific regulations dealing with those parts requiring supplementation or modification. Those numerous parts of the FPR's which, by their own terms, have no apparent application to these contracts, will not be referenced in the OPM regulations. For example, part 1–2, "Procurement by Formal Advertising," has no application because FEHBA exempts these contracts from formal advertising. Similarly, parts 1–5, "Special and Directed Sources of Supply;" 1–6, "Foreign Purchases;" 1–9, "Patents, Data and Copyrights;" 1–10, "Bonds and Insurance;" 1–14, "Inspection and Acceptance;" 1–17, "Extraordinary Contractual Actions to Facilitate the National Defense;" 1–18, "Procurment of Construction;" and 1–19, "Transportation" have no apparent relevance to these contracts. This list is illustrative and not intended to be complete. In addition, parts 1–1 and 1–7 contain numerous contract clauses which the contracting officer will have to determine the applicability of on an individual basis for each contract.

Part 1–1. This part contains general procurement policies. Subpart 1–12 deals with determination of responsible prospective contractors. OPM has previously issued regulations which specifically set minimum standards for health benefit plans and carriers for participation in the Federal Employees Health Benefits Program, thereby implementing statutory requirements set forth in Section 8902 of Title 5. These regulations, 5 CFR 890.201–890.202, will continue to govern admission to the program.

Part 1–3. Contracts between OPM and health benefit carriers are exempted by 5 U.S.C. 8902 from any requirements for formal advertising for bids. Contracts between OPM and health benefit carriers are consequently procured by negotiation, and thus are generally subject to part 1–3 of the FPR's. OPM proposes to implement part 1–3 of the FPR's, "Procurement by Negotiation," by defining the types of contracts involved, by describing how subpart 1–3.8, "Price Negotiation Policies and Techniques," applies to these types of contracts, and by stating the extent of applicability of subpart 1–3.12, "Cost Accounting Standards."

OPM's proposed definitions of the types of contracts are as follows:

"Contracts between OPM and health benefit carriers are of two principal types:

(a) Community rated contracts: The subscription charge per subscriber is fixed for the term of the contract and is not subject to any redetermination. The contract is with a health benefit carrier which offers a single basic benefit package to all of its subscribers (including Federal employees and annuitants) at the same basic subscription rate. The community rate per subscriber is calculated to produce sufficient revenue to cover the cost of benefits delivered to all enrollees as well as the overhead costs of delivering the benefits. The rate charged to Federal subscribers may differ somewhat from the community rate because: (1) certain additional benefits above the basic package may be provided to Federal subscribers (this cost is referred to as a "benefit loading"); and (2) minor adjustments from the basic community rate may be made in the rate charged to Federal subscribers to cover unique requirements of the Federal Employees Health Benefits Program (this cost is referred to as a "standard loading"). Where, because of lead-time requirements in rate negotiations, an estimated community rate is used, and subsequently the actual community rate turns out to differ from the estimated rate, some readjustment may be made.

(b) Experience rated contract: In this contract, the subscription charge per subscriber is set at the beginning of the contract term, and a fixed service charge (fee) to the carrier may be set. Administrative expenses of the carrier are subject to a negotiated limitation.

At the end of the contract term, any surplus of the subscription charges collected by the carrier over the cost of providing the benefits is carried forward to the next contract term as a positive balance in an account called the "special reserve;" conversely, any shortfall where cost of providing the benefits exceeded rates collected is carried forward as a negative special reserve balance. The special reserve balance becomes a factor in determining subscription charges for the next contract term. See 5 CFR 890.201(a)(8)."

OPM proposes to describe the applicability of subpart 1–3.8 of the FPR's to the process of negotiating health benefit plan contracts in the following manner: "Application for approval of, and proposal of amendments to, health benefit plans should be made according to the procedures set out in 5 CFR 890.203. OPM applies the requirements of Subpart 1–3.8 of 41 CFR, "Price Negotiation Policies and Techniques," to such proposals for a plan subscription charge during a contract term as follows:

(a) For a community-rated health benefit plan contract, the carrier is required to demonstrate to the contracting officer that the base community rate is in fact a true community rate offered to non-Federal subscribers. The Office of Actuary, Compensation Group, OPM, will assist the contracting officer in analyzing the proposed rate, and the Office of Actuary may request that the carrier provide appropriate supporting data or documentation. The Office of Actuary will examine any standard and benefit loadings.

(b) For an experience-rated plan, the carrier is required to demonstrate to the contracting officer that the proposed rate reasonably and equitably reflects the costs of the benefits to be provided. The Office of Actuary will assist the contracting officer in analyzing the proposed rate, and the Office of Actuary may request that the carrier provide appropriate supporting data or documentation on the costs to be incurred by the carrier under the proposal.

Each experience-rated plan is required to submit, with its rate proposal, a projection of its operations for the current and succeeding years, and to explain the derivation of each item in the projection. Data supplied by the plan is checked against statements filed by the plan showing monthly paid claims by incurred quarter of each year. The data in these reports are also verified by comparison to the plan's annual accounting statement filed with OPM. The Office of Actuary will review the information filed by the plan and compare the plan's data with an independent projection developed by the actuary.

(c) Each health benefit plan is audited by the Audit Division, Compensation Group, OPM, on a periodic basis according to a schedule determined by the Audit Division in consultation with the contracting officer. The Audit Division prepares audit reports which are supplied to the contracting officer and the Office of the Actuary. The contracting officer utilizes these audit reports in evaluating the validity and accuracy of data submitted by the carriers, in conducting negotiations on rates proposed by carriers, and in evaluating the efficiency and effectiveness of carrier operations.

(d) Carriers are required to submit a "Certificate of Current Cost on Pricing Data" in a format designated by OPM. For community-rated carriers, this certificate will require the carrier to

certify that the base community rate is a true community rate. The certificate will, with respect to experience rates, require the carrier to certify that to the best of the carrier's knowledge and belief, the data is accurate, complete and current.

OPM also proposes to explain its policy relating to a service charge (fee or profit) for health benefit carriers. OPM proposes the following statement of its policies on this subject:

"(a) Community-rated contracts with health benefit carriers include a fee, if any, as part of the overall subscription charge, and there is no separately negotiated fee item.

(b) Experience-rated contracts with health benefit carriers may contain an item called the "service charge," which is analogous to a fee. The amount of the service charge is determined by negotiation between the contracting officer and the carrier. In addition to the factors set forth in 41 CFR 1–3.808, the following types of factors may be considered in negotiating the amount of a service charge:

(1) Underwriting risk;

(2) Size of enrollment in plan;

(3) Level of capital investment by plan in facilities;

(4) Plan efforts and effectiveness in containment of health care costs;

(5) Quality of plan service to subscribers;

(6) Plan participation in or sponsorship of subscriber and provider education, and other community service programs;

(7) Unrecovered costs to carrier for enrollees converting from enrollment in plan to individual coverage;

(8) Changes in the Consumer Price Index; and

(9) For plans sponsored by employee organizations, the amount of associate membership dues, if any, received by the organization.

Subpart 1–3.12 of the FPR's sets forth a series of Cost Accounting Standards issued by the Cost Accounting Standards Board. OPM proposes to define the extent of the applicability of the Cost Accounting Standards through the following statement: "Experience-rated contracts between OPM and health benefit carriers will include the 'modified contract coverage clause' set forth in 41 CFR 1–3.1204–2(b). This clause, entitled 'Consistency of Cost Accounting Practices-Nondefense Contract,' requires compliance with 41 CFR 1–3.1220–1, 'Consistency in Estimating, Accumulating and Reporting Costs,' and 41 CFR 1–3.1220–2, 'Consistency in Allocating Costs incurred for the Same Purpose.'"

Although application of the remaining cost accounting standards (41 CFR 1–3.1220–3 to 1–3.1220–14) is not required by the modified contract coverage clause, OPM believes that these standards represent the application of sound cost accounting theory which, if adhered to by carriers, would result in an equitable and reasonable allocation of expenses to the health benefit plans. Consequently, OPM plans to review the other cost accounting standards for possible future application to the health benefit plan contracts, and OPM requests comments regarding the appropriateness of applying each standard.

Part 1–8. This part contains procedures for termination of procurement contracts. The procedures for withdrawal of approval of a health benefit plan are governed by specific program regulations set forth at 5 CFR 890.205 and are implemented by provisions in each of these contracts.

Part 1–11. This part concerns Federal, State and local taxes. The contracts between OPM and health benefit carriers contain specific provisions governing taxes.

Part 1–12. This part deals with general policies concerning labor. In subpart 1–12.1, "Basic Labor Policies," certain requirements for prospective and retroactive approvals of overtime premiums and shift premiums are set forth at 41 CFR 1–12.102–4. OPM will not require any agency approval of overtime or shift premiums.

OPM contracts with health benefit carriers will contain appropriate clauses to implement the subparts of Part 1–12 which relate to restrictions on use of convict labor and to equal opportunity in employment.

Part 1–15. This part of the FPR's contains general cost principles and procedures for the negotiation and administration of several types of contracts. OPM has maintained that the cost principles set forth in subpart 1–15.2 apply to experience-rated contracts with health benefit carriers, and OPM proposes to so state through the following language:

"The Contract Cost Principles and Procedures set forth in 41 CFR Subpart 1–15.2, entitled "Contracts with Commercial Organizations," apply to all experience-rated contracts between OPM and health benefit carriers. Allowable costs under such experience-rated contracts will be determined according to Subpart 1–15.2."

OPM is studying the "selected costs" principles set forth in § 1–15.205, and welcomes comments regarding particular cost items. In particular, OPM has the option, pursuant to FPR Temporary Regulation 40, 41 Federal Register 44475 (October 8, 1976), of implementing Cost Accounting Standard No. 414, "Cost of Money as an Element of the Cost of Facilities Capital."* Interested parties should be aware that if OPM determines to issue regulations allowing the imputed cost of money in facilities capital as an allowable administrative cost, OPM expects that, consistent with General Services Administration guidance, the service charge paid to the carrier would no longer reflect the level of investment by the carrier, and would be correspondingly reduced.

At this time OPM is proposing several clarifications of the selected costs subsections. These proposals are as follows: "The 'Selected Costs' set forth in 41 CFR 1–15.205 are supplemented or modified to the following extent:

(1) Advertising costs (§ 1–15.205(1)). Advertising includes any message in the media which identifies the name of the carrier or of its Federal Employees Health Benefit plan, and which is directed at either the plan's current subscribers, Federal employees and annuitants, providers of medical services, or the general public. Media messages with an asserted "educational" content or purpose are deemed advertising when the above circumstances exist, regardless of the fact that the messages may include information related to health care or cost containment. The expense of advertising is not allowable as a cost; however, the expense of plan educational efforts may be a factor to be considered by the contracting officer in negotiating the "service charge."

(2) Compensation for personal services (§ 1–15.205–6(b)). OPM approval of overtime is not required for overtime premiums, extra-pay shifts and multi-shift work premiums to constitute allowable costs.

"(3) Professional and consultant service costs—legal, accounting, engineering and other (§ 1–15–205–31(d)). Expenses incident to carrier appeals under the disputes clause of a contract from final decisions of the contracting officer are not allowable costs."

Part 1–16. This part prescribes various forms for use in procurement actions. OPM generally uses forms it has developed for use within the Federal Employees Health Benefits Program, and which serve comparable functions to the forms set forth in Part 1–16.

---

* FPR Temporary Regulation 40 may be rescinded in the near future pursuant to Policy Letter 80–7 of the Office of Federal Procurement Policy (December 9, 1980). Should FPR Temporary Regulation 40 be revoked, OPM will evaluate the situation in the light of whatever future provisions are inserted into the FPR's concerning cost of money.

Part 1–20. This section prescribes requirements for records retention. This part applies to contracts between OPM and health benefit carriers, except that 16–20.202(a), "Other record retention requirements," will be modified to ensure consistency among all FEHBP contracts. OPM will require retention of records and accounts for 5 years after the end of the contract year to which they relate, except that claims records shall be maintained for 3 years after the end of the contract year to which they relate.

Part 1–30. This part concerns contract financing. The contracts between OPM and health benefit carriers contain specific provisions defining the method of payment from the Federal Employees Health Benefit Fund to the carrier.

This advance notice of proposed rulemaking is issued under the authority of 40 U.S.C. 486(c) and 5 U.S.C. 8913.

Office of Personnel Management.

BILLING CODE 6523–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 63

[CC Docket No. 78–72—Phase II]

MTS and WATS Market Structure; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Report and Third Supplemental Notice of Inquiry and Proposed Rule; Extension of comment and reply period.

SUMMARY: This Order grants Alascom, Inc., a one month extension of time in which to file comments in CC Docket 78–72–Phase II relating to MTS and WATS market structure. The extension is granted to give Alascom additional time to complete market studies and to prepare comments.

DATES: Initial comments are now due on or before January 8, 1981, and reply comments are due on or before February 16, 1981.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Douglas Slotten, Policy and Program Planning Division, Common Carrier Bureau, 202–632–9342.

SUPPLEMENTARY INFORMATION:

Order Extending Time for Filing Comments and Reply Comments (45 FR 55777); August 21, 1980

Adopted: December 4, 1980.

Released: December 5, 1980.

By the Chief, Common Carrier Bureau:

1. On December 1, 1980, Alascom, Inc., filed a petition for an extension of time to file comments to the Commission's *Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking* in *CC Docket No. 78–72 Phase II,* FCC 80–463 (released August 25, 1980).[1] The *Third Supplemental Notice* separated the question of competitive versus monopoly supply of telecommunications services in the Alaska submarket from the consideration of that issue for the remainder of the United States. In so doing, it provided Alascom with a further opportunity to support its argument that Alaska should be served on a sole source basis. On December 3, 1980, General Communications Inc. (GCI), filed an opposition to Alascom's petition.

2. Alascom seeks an extension of time until January 8, 1981, in which to file initial comments, and until February 14, 1981, in which to file reply comments. In support of its request, Alascom states that the month extension to December 8 was the minimum necessary if everything happened without delay. It states that it has made considerable progress in preparing its studies but needs an additional month to complete the studies and to prepare its comments. Alascom states that it does not believe the Commission or other parties will be injured by a short delay.

3. GCI argues that Alascom has failed to justify its request for an extension of time in which to file comments, and that the Commission should deny, or severely limit, any extension of the due date. In support of its position, GCI submits that it and other carriers desire an early confirmation that an open entry policy in the MTS–WATS market is applicable to Alaska as well as the other 49 states; that Alascom has already had 90 to 120 days to develop a study methodology and prepare its comments; and that this is the third 30 day extension requested by Alascom.

4. The Commission is cognizant of the uncertainty engendered by the existence of an outstanding docket which is inquiring into the question of whether an open entry policy for the MTS–WATS market in Alaska is in the public interest. To reach a decision, the Commission must develop a record on which a decision can be made. Based on Alascom's representation that considerable effort has been expended in preparing market studies and that significant progress has been made, the Commission finds that the grant of an additional month in which to file comments is in the public interest. This should provide the Commission with a complete record upon which to base its decision. We would emphasize, however, that the Commission will not look with favor on further requests for extension of time by Alascom in the absence of compelling circumstances. Reply comments will be due on February 16, 1981, since the fourteenth is a Saturday.

5. Accordingly, it is ordered, pursuant to Sections 4(i), 5(d)(1) and 303(f) of the Communications Act, as amended, and Section 0.291 of the Commission's Rules, that the dates for filing comments in response to the *Report and Third Supplemental Notice of Inquiry and Proposed Rulemaking* IS EXTENDED to and including January 8, 1981, and the date for filing reply comments IS EXTENDED to and including February 16, 1981.

Federal Communications Commission.

William B. Ginsberg,

Deputy Bureau Chief (Policy).

[FR Doc. 81–2032 Filed 1–19–81; 8:45 am]

BILLING CODE 6712–01–M

[1] That Order initially established filing dates of October 17, 1980, for initial comments and November 17, 1980, for reply comments. Because of Commission delays in issuing the Order, the Common Carrier Bureau extended the dates at Alascom's request until November 10, 1980, and December 10, 1980, respectively. See Mimeo No. 35462. Subsequently, the Commission granted an additional extension of time to December 8, 1980, and January 14, 1981, respectively. See Mimeo No. 01146 (released November 4, 1980).

47 CFR Part 76

[CT Docket No. 79–193; RM–3115; FCC 80–754]

Television Broadcasting; Television Broadcasting; Cable Television; Addition to Huntsville-Decatur, Alabama, Market

AGENCY: Federal Communications Commission.

ACTION: Denial of proposed rule.

SUMMARY: The Commission does not adopt a proposed amendment to its list of the top 100 television markets utilized in the cable television rules (47 CFR 76.51) to add Florence, Alabama to the hyphenated market now designated as Huntsville-Decatur, Alabama (#96). Inclusion of Florence in the market would have made Florence televison stations "must-carry signals" for cable systems within the Grade B contour of Huntsville and Decatur television stations. The Commission finds that

Florence is not part of the Huntsville-Decatur viewing market; that there is no public need to include Florence in the market; and that the burden would be too great on Huntsville and Decatur cable systems to require them to carry the Florence station under the mandatory signal carriage rules.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Deborah L. Stuehrmann, Cable Television Bureau, (202) 632-6468.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 76.51 of the Commission's rules and regulations, CT-Docket NO. 79-193, RM-3115.

Report and Order

Adopted: December 18, 1980.
Released: January 14, 1981.

By the Commission: Commissioners Quello and Jones absent.

1. Television Muscle Shoals, Inc., ("TMS"), licensee of Station WOWL-TV (NBC, channel 15), Florence, Alabama, has requested that the Commission revise its list of the top 100 television markets utilized in the cable television rules (47 CFR 76.51), to add Florence, Alabama to the hyphenated market now designated as Huntsville-Decatur, Alabama (#96). TMS originally filed its request as a petition for special relief pursuant to § 76.7 of the Commission's Rules. Objections to that petition were filed by Teleprompter Southeast, Inc., and Decatur TeleCable Corp., both operators of cable systems that would be required to carry the signal of WOWL-TV if the market designation were changed. When TMS replied to these objections, it became clear that what TMS sought was in fact a change in § 76.51(a)(96) of the Rules, rather than special relief. TMS's pleading was thus converted to a petition for rulemaking and in response the *Notice of Proposed Rule Making in CT Docket 79-193,* FCC 79-484, FCC 2d , 44 FR 48997 (1978), was issued proposing the change in market designation urged by TMS. Comments and Reply Comments were filed by Teleprompter Southeast, Inc., Rocket City Television, Inc., American Valley Broadcasting Company, Decatur TeleCable Corporation, Television Muscle Shoals, Inc., and Athens TV Cable of Alabama, Inc. In addition all pleadings in the special relief proceeding have been considered in the present rulemaking.

Comments

2. The Comments in support of the proposed rulemaking argue: (1) That it is unfair to exclude Florence from the Huntsville-Decatur market when, in fact, the Florence population was included in the calculation of the market rank in 1970; (2) that Florence is a part of the Huntsville-Decatur community due to the amount of advertiser support in that market from Florence viewers; and (3) that the inclusion of Florence in the market could be accomplished without undue economic hardship to existing cable systems. Athens TV Cable of Alabama, operator of a cable television system in Athens, Alabama, supports the change since in its absence it is prohibited from carrying the signal of WOWL-TV.

3. The cable television system comments in opposition to the proposed change argue: (1) That Florence is a community separate and distinct from Huntsville-Decatur, such that there is no integration of economic and social units to justify including it in the market; (2) that the petition is actually based upon a conflict between TMS and Arbitron such that the Commission should not be "used" to settle their dispute; and (3) that to include Florence in the Huntsville-Decatur market would force cable operators to carry Station WOWL-TV and that such a requirement would be costly to cable systems already carrying a full complement of signals. The cable system in Decatur, for example, estimates that carriage of WOWL-TV would require an upgrading of its plant and the installation of converters involving an initial capital outlay of $641,050 and annual operating costs of $40,520. The change is also resisted by American Valley Broadcasting, Inc., the licensee WAFF, a Huntsville, Alabama television station, which states that the communities in question are geographically and economically separate and that while it has audience in the Florence area it does not rely on the area for advertising support or attempt to ascertain or serve the needs and interest of that area. It claims that what is really involved, is a dispute between the Florence television station and ARB, that ARB's decision to include Florence in the market is erroneous, and that the Commission should not permit itself to be used to resolve this private dispute.

Discussion

4. The presence or absence of a community on the major (top 100) market list has a number of consequences for television stations licensed to that community: (1) It determines whether the station obtains the benefits of smaller or major market network nonduplication protection (smaller market stations receive a large zone of protection), (2) it determines whether the station receives syndicated program exclusivity and the type of protection from distant signal carriage to which it is entitled (the Commission in its *Report and Order in Docket 20988 and 21284,* FCC 80-443, 45 FR 60186 (1980) has voted to eliminate these rules), and (3) it determines the scope of a station's mandatory cable television carriage rights (a station is entitled to mandatory carriage throughout the market with which it is identified). The Commission originally based it major market list on the American Research Bureau's (now Arbitron) 1970 primetime households ranking, although it made minor adjustments to this list. Para. 75, *Cable Television Report and Order,* FCC 72-108, 36 FCC 2d 143, 171-172 (1972). Arbitron's 1970 market rankings refer to the "Huntsville-Decatur-Florence" market. However, when the list was incorporated into Section 76.51 of the rules, the market was designated "Huntsville-Decatur." The absence of Florence from this list is unexplained in the *Cable Television Report and Order, supra.*

5. In the present context what is in issue is the mandatory carriage rights of WOWL-TV. It would like to have such rights on additional cable systems, including particularly those in Huntsville and Decatur. The cable systems are resisting such carriage on the grounds of inadequate channel capacity, technical unavailability of the WOWL-TV signal, unnecessary duplication of signal carriage from stations that might be subject to deletion under the network nonduplication rules, and a desire for freedom from governmental interference in the broadcast signals distributed to their subscribers. The change would also create additional competition for the stations in Huntsville and is resisted by one of the stations there.

6. In the *Cable Television Report and Order, supra,* at 176, the subject of "hyphenated markets" was discussed. The Commission said:

> In such markets, characterized by more than one major population center supporting all stations in the market but with competing stations licensed to different cities within the market area, we will permit and, on request of the station involved, require carriage of all stations licensed to designated communities in the market. Because of the structure of these markets, including the terrian and the population distribution, portions of the market are occasionally located beyond the Grade B contours of some market station. Consequently, we are adopting this rule in order to help equalize competition between stations in markets of this type, and to assure that stations will have access to cable subscribers in the market and that cable subscribers will have access to all stations in the market. (Footnote omitted).

7. The term "market" as it is used in the cable television rules, and indeed as it is used by the audience rating services and the broadcasting industry generally, is not without certain ambiguities. Since the term is used in a number of different contexts and in particular has been used to perform a number of functions in the regulation of cable television, certain compromises inevitably have been incorporated into the definition. For purposes of the cable television syndicated program exclusivity rules the definition was intended to be a partial reflection of the manner in which television programming was sold; for purposes of protecting television stations from distant signal competition it was intended to define a core area on which the stations in question principally relied for their economic support; and for purposed of the mandatory carriage rules it was intended as an area on which the stations in the market actually relied or could logically rely on for economic support. For all of these purposes the greater the separation between cities, involved, the thinner the common bond allowing both to be considered part of the same market.[1]

8. Our research has failed to produce any definitive answer to the question of why Florence was eliminated from the Arbitron list which was used as the basis for the 1972 cable television top 100 market list. Although the *Notice of Proposed Rulemaking* in this proceeding refers to the absence of Florence from the major market list as "inadvertent error" (para. 4), further investigation suggests that while unexplained in the *Cable Television Report and Order*, the absence of Florence from the list was probably not inadvertent. As that *Report* explains, the list used by the Commission was not identical to that used by Arbitron. Certain changes were made as the result of the Commission's own experience with the various market situations involved and it appears that the decision had been made prior to the *Cable Television Report and Order* that the Florence and Huntsville-Decatur areas were separate, at least for some purposes, such as the Commission's reporting of aggregate market-by-market television station financial data. See, for example, "TV Broadcast Financial Data—1970," Sept. 7, 1970, mimeo 71434 which lists the Huntsville-Decatur market separately.

9. Regardless of the historical reasons for the market list created in 1972, the question to be resolved now is whether, in terms of the functions of the cable television rules, the areas here involved should be one market or two. What is involved in the present proceeding is a situation in which the two cities in question—Florence and Huntsville—are some 75 miles apart. Both Huntsville and Decatur are outside the Grade B contour of the station in Florence and Florence is outside of the Grade B contours of the stations licensed to Huntsville. Although stations from Huntsville have a considerable viewing audience in the Florence area and are carried on the Florence cable television system, the Florence station has little if any off-air audience in the Huntsville area and historically has not been available for cable television carriage on the Decatur or Huntsville cable television systems because of the operation of the Commission's cable television rules. A review of recent Arbitron county coverage audience surveys shows that WOWL–TV has very little over-the-air audience in any part of the 35-mile zone around Huntsville and Decatur where cable carriage would be mandatory if the proposed rule were adopted.[2] The lack of cable television carriage thus cannot be said to be impeding the station from reaching its natural over-the-air audience. Nor has TMS offered any other persuasive evidence of a *public* need to include Florence in the Huntsville-Decatur market. It has rather simply asserted that it is prejudiced by *Arbitron's* list through impacts on its advertising rates.[3] TMS has not brought forth any facts indicating a public desire for reception of WOWL–TV in the Huntsville-Decatur area. Our conclusion is that, in terms of the cable television rules, a strong case has not been to merge these two markets into one.

10. Besides the lack of evidence of any public benefits to be derived from the proposed rule change, it could involve significant costs. Mandatory carriage of several television signals in areas far beyond their Grade B contours would be required if the rule change were adopted. For example, a cable system in Scottsboro, Alabama, within the 35 miles zone and Grade A contour of Huntsville, would be forced, under the mandatory carriage rules, to carry the Florence station, which is approximately 100 miles away. The same would be true of cable systems in Mississippi, just outside the Grade A contour of Florence but within its 35 mile zone, which would have to carry the Huntsville stations, again approximately 100 miles away. It is impossible to justify such carriage as necessary to assure these stations access to the audience they are licensed to serve given the distances involved. Moreover, the cable systems involved would be required to carry an NBC affiliated station, largely duplicative of stations already carried, from communities with little immediate economic or social relationship to them. In sum, given the distances involved, the fact that most of the area in which this change would afford WOWL–TV expanded carriage rights is outside its Grade B service area, and the absence of any clear showing or particularized need by the station requesting the change, or indication of how the public would benefit from the change, we have concluded that it should not be adopted. It should be emphasized, however, that this market definition is for purposes principally of enforcing the cable television mandatory cable television signal carriage rules and should not be taken as automatically applicable as a market definition for other purposes.

11. The *Notice of Proposed Rule Making* in this proceeding also proposed the elimination of Decatur from the Huntsville-Decatur designated market

[1] It should be acknowledged that market definitions are also reflections of economic decisions made by the three major national television networks. The three networks attempt to provide coverage of the entire nation through the broadcasts of their affiliates but at the same time reduce their costs by minimizing diplication of coverage. Thus, the presence of two affiliates of the same network in an area suggests that two markets are present since two affiliates are required to provide adequate coverage of the area. It not infrequently occurs, however, that for various reasons, including particularly differences in the transmission capabilities between UHF and VHF stations, that one network can obtain full coverage of an area with one station while another network will require more than one affiliate. Thus, the area is one "market" for some networks and two "markets" for others. The Commission and the rating services may then be required to chose one or the other categorization depending upon the purposes the market definition or list is to be used for.

[2] According to Arbitron's *1979 County Coverage Survey, CATV-Controlled*, WOWL–TV receives no measurable share of off-air viewing in Marshall County where Huntsville is located and only a 1 share in Morgan County where Decatur is situated. However the Huntsville stations do receive a respectable portion of the off-air viewing in Colbert and Lauderdale counties where Florence is located. WAFF–TV, the Huntsville-Decatur NBC affiliate, receives a 6 share in Colbert county and an 8 share in Lauderdale. WAAY–TV's (ABC, Huntsville-Decatur) off-air share is 25 in both counties. WHNT–TV (CBS, Huntsville) receives viewing shares of 42 and 39 in Colbert and Lauderdale counties, respectively.

[3] Various commenting parties have argued that this controversy is really between *Arbitron* and TMS, and that the Commission should not be "used" as an arbitrator of an essentially private matter. It is not clear, however, just how this dispute would be resolved by a Commission ruling nor what its impact would be on the advertising rates charged by TMS. Nor is it sufficiently clear what the basis would be for any court action by TMS against *Arbitron*. In any event, it is not the Commission's responsibility to settle disputes of this kind, nor will our decision be influenced by the existence of this private controversy.

because there is no station licensed to that community. Since there is no station licensed to Decatur no "specified zone" (see 47 CFR 76.5 (f)) exists around it and its inclusion has no regulatory consequence. Its deletion from the list was therefore proposed. Compare *Order,* FCC 74–1126, 49 FCC 2d 198 (1974) deleting Jacksonville from the Springfield-Decatur-Champaign, Illinois market. We are cited to a number of other situations by commenting parties in which communities on the major market list have no commercial stations licensed to them. Since the inclusion of these cities on the list has no regulatory consequence we do not believe that by themselves they provide justification for continuing the existing confusion with respect to Decatur. However, in § 73.606 (the broadcast table of assignments), channel 54 has been allocated to the hyphenated Huntsville-Decatur community and it is evident that should a station on that channel be activated that this would be the appropriate market designation. Therefore, in order to avoid the necessity of further proceedings if that channel is activated we have decided to leave the list as it is in its present form. it should be understood, however, that until a station comes on the air in Decatur, there is no station there to have a "specified zone" § 76.5(f)) and therefore the inclusion of this community on the list has no immediate regulatory consequence.

Authority for the action taken herein is contained in Sections 2, 3, 4 (i) and (j), 301, 303, 307, 308, and 309 of the Communications Act of 1934 as amended.

Accordingly, it is ordered, that the rule change proposed in CT Docket 79–193 is denied.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712–01–M

Notices

Federal Register
Vol. 46, No. 13
Wednesday, January 21, 1981

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Food Stamp Program: Fiscal Year Funds for Demonstration, Research, and Evaluation Projects; Grant Availability

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of grant availability.

SUMMARY: The Food and Nutrition Service (FNS) gives notice of the availability of Fiscal year 1981 funds for demonstration, research, and evaluation grants related to Food Stamp Program operations. The grants are authorized under Section 17 of the Food Stamp Act of 1977, as amended (7 U.S.C. 2026). This Notice provides general background information on the types of grant proposals which are being solicited and describes how grantee selections will be made.

DATE: The cutoff date for receipt of applications is March 23, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. Claire Lipsman, Director, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Room 672 GHI Building, Washington, D.C. 20250, (202) 447-8325.

SUPPLEMENTARY INFORMATION:

Background and Objectives

With the growth of the Food Stamp Program, both Congress and the Administration recognized the importance of earmarking special funds which could be used to gain increased program knowledge. This recognition was translated into legislative and budgetary authority for the operation of research, evaluation, and demonstration projects. With the initiation of those projects mandated by the 1977 Act, FNS has turned its attention to the development of a systematic mechanism for improving program operations through research activities. This announcement marks the first step in implementing an on-going mechanism for such research.

FNS intends, at least annually, to solicit proposals for the conduct of demonstration, research, and evaluation projects. Such initiatives will be undertaken with the purpose of gaining specific knowledge which would lead to the improvement of program administration and/or service delivery. For FY 1981, FNS intends that project and research proposals focus on priority policy areas such as program simplification; reduction of error, fraud, waste, and abuse; and strengthened program management.

FNS proposes the conduct of demonstration projects and research studies. While it is expected that many demonstration projects will come from State welfare agencies, given their role as program administrators, other public agencies or non-profit organizations may be more inclined to submit proposals related to the research topics listed in this notice. Universities and colleges are particularly encouraged to respond to this solicitation. This latter emphasis is reinforced through a recent Executive Order which mandates a governmentwide commitment to enlarge the role of historically Black colleges and universities in Federally funded research and evaluation projects.

Funding

Depending on the nature and objective of the research or demonstration project, FNS will pay up to 100% of the total cost. In other instances, grantees may be asked to share the expenses at a rate not to exceed 25% of total costs. Grantees' portion of funds may be in either cash or in-kind contributions which meet the Department's definition of "allowable" under appropriate financial regulations.

Areas of Research and Demonstration Projects

FNS wishes to encourage applicants to develop proposals which reflect creative and innovative approaches to Food Stamp Program administration and service delivery. Such creativity need not necessarily be a totally new idea or concept, but could be the application of an existing concept to Food Stamp Program operations Proposals should not, however, alter recipient eligibility and benefit level standards but rather explore the adaptation of alternative management techniques or modified procedures that can be cost effective and result in program improvement.

Presented below is a compilation of project and research ideas which have emerged from discussions regarding the Agency's objectives/priorities. This list is intended to provide examples of the types of projects or research in which the Department is interested. This list is not intended to be limiting, but to present an idea of the scope and variety of topics. Issuance project/research proposals have intentionally been omitted from the following listing as these issues will be requested under a separate solicitation.

(1) Effects of refining specific certification and recertification procedures—introducing modifications and measuring costs and impacts of processes such as the application cycle, recipient information and face-to-face interviews.

(2) Effects of current and alternative appeals procedures—how to best accommodate recipient appeal rights in a more timely and cost effective manner.

(3) Analysis of patterns of Food Stamp Program participation—relating recipient characteristics to benefits and benefit duration.

(4) Effects of standardizing Food Stamp and AFDC procedures.

(5) Impacts of caseload management alternatives—experimenting with various approaches to local Food Stamp office organization, procedures and staffing.

(6) Participant and cost effects of methods of allocating resources to accomplish verification requirements while reducing errors.

(7) Effects of different methods of local office organization and procedures on meeting expedited service standards, and impacts on participants and costs of alternative expedited service processing standards.

(8) Effects of alternative procedures for detecting program fraud and abuse—exploring specific measures such as matching computer records, using special investigative teams, etc.

(9) Techniques for State and local caseload projections for planning, budgeting and management purposes.

(10) Information dissemination—how to best communicate new information to and within State agency structures.

Selection Process

In response to this announcement, FNS invites potential grantees to submit a pre-application, using Form AD–625. By requesting pre-applications rather than full applications as original submissions, FNS hopes to keep to a minimum the costs involved in initial proposal preparation.

Upon receipt of the pre-applications, FNS will convene a panel to review all project submissions received to date. The panel will be composed of FNS representatives and representatives of other Agencies if project ideas impact their areas of operation. Organizations submitting ideas which are selected for further review will be subsequently contacted and asked to submit full proposals. At the same time, FNS will inform the potential grantees of any modifications to the project scope which are considered necessary. Full proposals shall be submitted in accordance with all appropriate requirements as established under OMB Circular A–95 and other applicable OMB Circulars, and shall be signed by representatives of the applicant agency with the authority to commit the agency to the project. Final proposals will be evaluated based on criteria discussed under Proposal Evaluation.

Successful negotiations on project operations will result in the issuance of a Notice of Grant Award. The Grant Notice will set forth the amount of the grant, the purpose of the grant, the terms and conditions of the grant, the grantee's level of financial participation, the effective date of the grant, and the budget period of the grant. Unsuccessful applicants will be notified in writing that their proposals have either not been selected for funding or are being held for consideration at a future date.

The grant awards resulting from this notice will be awarded in Fiscal Year 1981. It is recognized that the operational period for the majority of such grants may extend beyond FY 1981.

Proposal Contents

The *Program Narrative* section of the pre-application form (AD–625) should provide sufficient information to allow FNS to make a judgement on how the research or the demonstration project will add to program knowledge, the proposer's ability to conduct the project, and the project's potential cost. At a minimum, the following information will be required:

(1) The added knowledge and/or the objectives of the research or demonstration project, or problem(s) which the project is intended to address;

(2) A brief description of the demographic and administrative characteristics for the proposed demonstration project site;

(3) A description of the project or research design and/or operation in sufficient detail to demonstrate the proposer's development of the concept;

(4) A brief description of the qualifications of the staff which will be responsible for the development and conduct of the research or demonstration project; and

(5) Estimated project cost, including an identification of that portion of the cost the potential grantee would be willing to share.

Applicants selected for further negotiation would be expected to submit full applications for project operations within 45 days from the date of notification. Additional time allotted for submission will depend upon the scope of the research or demonstration project and the time judged necessary for preparation of a full application.

The full application would be expected to contain, at a minimum, the following information:

(1) A detailed research/project design statement which would include:

(a) A statement of goals;

(b) A description of project or research scope;

(c) A description of the operational procedures;

(d) Identification of regulatory waivers necessary for project operation; and

(e) A description of data used in the research or the evaluation procedures used to judge the project's success.

(2) A work plan describing specific tasks for project implementation and operation, including timeframes for task accomplishment;

(3) A management plan, which would include the identification of all groups or agencies to be involved in the research/project, the names of persons and/or job descriptions for key personnel, and a description of all facilities, equipment and other resources available to the applicant;

(4) A brief economic and demographic profile of the project jurisdiction, including the characteristics of persons currently participating in the Program and an estimate of potential eligibles; and

(5) A budget summary and justification.

Proposal Evaluation

Pre-applications will be judged on how well project ideas conform to the priority policy areas mentioned in this announcement, the research/project design, the proposer's ability to conduct the research/project, and the cost.

Final applications will be evaluated using the following criteria:

(1) Suitability of the research/project in relation to current agency objectives/priorities;

(2) The degree to which economic and demographic characteristics meet the requirements for a successful testing environment;

(3) The applicant's understanding of the research/project to be undertaken and ability to accomplish the objectives;

(4) The reasonableness of the budget and justification thereof;

(5)(a) For a demonstration project, a sound evaluation component which should include a description of data collection and the analysis procedure that will be used to assess quantitatively the achievement of project objectives;

(b) For research, a description of data, data collection and the procedure(s), used to analyze data; and

(6) The qualifications of key personnel and the applicant's accessibility to adequate facilities and other resources.

The Application Proposal Process

Applicants are requested to submit pre-applications, using Form AD–625 in response to this Notice. The AD–625 may be obtained by writing: PRAB, Program Development Division, Family Nutrition Programs, Food and Nutrition Service, USDA, Room 672, GHI Building, Washington, D.C. 20250 or calling (202) 447–8332.

The pre-application should be submitted in an original and two copies to Dr. Claire Lipsman, Director, Program Development Division, Family Nutrition Programs, at the above address.

Forest Service

Gila National Forest Grazing Advisory Board; Meeting

The Gila National Forest Grazing Advisory Board will meet at 2:00 P.M., February 12, 1981 in large Conference Room, Federal Building, 2610 North Silver Street, Silver City, New Mexico.

The agenda for this meeting is:

1. Review of Carrizo Allotment Management Plan.

2. Election of Officers.

The meeting will be open to the public.

Dated: January 12, 1981.

Kenneth C. Scoggin,

Forest Supervisor.

BILLING CODE 3410-11-M

Office of the Secretary

Human Nutrition Board of Scientific Counselors; Intent To Establish an Advisory Board

Notice is hereby given that the Secretary of Agriculture intends to establish a Human Nutrition Board of Scientific Counselors. The purpose of this Board is to review and advise the Department as to the scope and quality of the research carried out at the Human Nutrition Research Centers in Houston, Texas; Boston, Massachusetts; San Francisco, California; Grand Forks, North Dakota; Beltsville, Maryland; and Hyattsville, Maryland. Members will review the research activities of each center on site, and in addition will meet as a Board at least once per year. The Board will prepare and submit to the Director, SEA, no later than September 30 of every year, a report which shall include its evaluation and recommendations.

It has been determined that the establishment of this Board is in the public interest in connection with the work of the U.S. Department of Agriculture.

Interested parties are invited to submit written comments, views, or data concerning this proposal to D. Mark Hegsted, Administator, Human Nutrition, Science and Education Administration, USDA, Washington, D.C. 20250, by February 5, 1981.

Done at Washington, D.C., this 14th day of January, 1980.

Joan S. Wallace,

Assistant Secretary for Administration.

BILLING CODE 6320-01-M

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket S-684]

Aeron Marine Shipping Co., Aries Marine Shipping Co., Atlas Marine Co., Aquarius Marine Co., American Shipping, Inc., Pacific Shipping, Inc., Worth Oil Transport Co.; Joint Application

The subject companies—parties to long-term operating-differential subsidy contracts in the foreign bulk trade of the United States—are affiliates of Anndep Steamship Corp. (Anndep), Archon Shipping, Inc. (Archon) and Arcturus Shipping, Inc. (Arcturus). Archon and Arcturus may become the bareboat charterers, respectively, of the 225,000 DWT tankers, BROOKLYN and WILLIAMSBURGH, and Anndep may become the operator of the vessels. The BROOKLYN and the WILLIAMSBURGH, built with construction-differential subsidy (CDS) are under long-term time charter to American Petrofina, Inc. (Fina). Both vessels have operated in the domestic Alaskan oil trade under waivers granted pursuant to section 506 of the Merchant Marine Act, 1936, as amended (the Act), and may operate in the domestic trade in the future. Application has been made for the total repayment of CDS on the BROOKLYN in exchange for the removal of domestic trading restrictions. If the application for total repayment of CDS on the BROOKLYN is denied or if the pendency of that application continues, it is anticipated that applications will be filed periodically under section 506 of the Act for the temporary employment of the vessel in the domestic trade. Future applications under section 506 are also anticipated for the WILLIAMSBURGH.

The subject companies request written permission under section 805(a) of the Act for Archon and Arcturus to be the bareboat charterers of the BROOKLYN and WILLIAMSBURGH, respectively, and for Anndep to be the operator of the two vessels.

Any person, firm, or corporation having any interest in such application (within the meaning of section 805(a)) and desiring to submit comments concerning the application must file written comments in triplicate with the Secretary, Maritime Administration, by close of business on January 26, 1981 together with petition for leave to intervene. The petition shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) will result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS))

By order of the Assistant Secretary for Maritime Affairs.

Dated: January 15, 1981.

Robert J. Patton, Jr.,

Secretary.

BILLING CODE 3510-15-M

COMMODITY FUTURES TRADING COMMISSION

Proposed Futures Contracts; Proposed Rules of Major Economic Significance: Terms and Conditions of the 20-Year United States Treasury Bond Futures Contract of the Chicago Mercantile Exchange

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed rules of contract markets.

SUMMARY: The Chicago Mercantile Exchange ("CME") has applied for designation as a contract market in $100,000 20-year United States Treasury bonds ("U.S. T-bonds"). The Commodity Futures Trading Commission ("Commission") has determined that the proposed terms and conditions of this proposed futures contract are of major economic significance and that, accordingly, publication of the proposed terms and conditions is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before March 23, 1981.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to CME 20-Year U.S. T-Bond Futures Contract.

FOR FURTHER INFORMATION CONTACT: George Garrow, Staff Attorney, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581; Telephone: (202) 254-8955.

SUPPLEMENTARY INFORMATION: The terms and conditions of CME's proposed 20-Year U.S. T-Bond futures contract are as follows:

Chapter —

20-Year U.S. Treasury Bonds

—00. Scope of Chapter.—This chapter is limited to futures trading in 20-year U.S. Treasury Bonds. The procedures for trading, clearing, settlement, and any other matters not specifically covered herein shall be governed by the rules of the Exchange.

—01. Commodity Specifications.—Each futures contract shall be valued at the current market value of United States Treasury bonds maturing in 20 years with a face value at maturity of $100,000 and a ten percent (10%) coupon.

—02. Futures Call.—

A. Trading Months and Hours.—Futures contracts shall be scheduled for trading during such hours and for delivery in such months as may be determined by the Board of Governors.

B. Trading Unit.—The unit of trading shall be $100,000 U.S. Treasury bonds of twenty (20) years maturity.

C. Minimum Increments.—Bids and offers shall be quoted in terms of the value of 10% coupon U.S. Treasury bonds with exactly twenty years to maturity, expressed as a percentage of par. The minimum fluctuation of the futures contract will be one thirty-second (1/32) of one percentage point, or $31.25 per contract.

D. Daily Limits.—There shall be no trading at a level more than ^{6}4/32, equivalent to $2,000 per contract, above or below the preceding day's settlement except as provided by Rule —08.

E. Discretionary Position Limits.—The Board may in its sole and complete discretion impose limits upon an individual or related accounts.

F. Termination of Trading.—No trades in long-term U.S. Treasury bond futures in the spot month shall be made during the last seven business days of that month.

G. Contract Modifications.—Specifications shall be fixed as of the first day of trading of a contract. If any U.S. governmental agency or body issues an order, ruling, directive or law that conflicts with the requirements of these rules, such order, ruling, directive or law shall be construed to take precedence and become part of these laws.

—03. Deliveries.—The following shall specifically apply to the delivery of twenty-year U.S. Treasury bonds.

A. Delivery Days.—Delivery may be made on the business day selected by seller and satisfying Rule —03.C.

B. Registered Banks and Other Facilities.—The Board shall establish such requirements and preconditions for registration as a facility for the delivery of Treasury bonds as it deems necessary.

C. Seller's Duties.—The clearing member representing the seller shall deliver to the Exchange Clearing House by 2:00 p.m. (Chicago time) on any business day of the spot month, two business days before the seller's chosen delivery date, or on the last day of trading, a seller's delivery commitment indicating a Chicago Bank, registered with the Exchange and a member of the Federal Reserve System, and the name of the account from which the delivery unit will be transferred. By 12:45 p.m. (Chicago time) on the day of delivery, the seller shall deliver to a Chicago bank, registered with the Exchange and a member of the Federal Reserve System, selected by the buyer, a deliverable U.S. Treasury bond. Delivery shall be made no later than the fifth business day immediately preceding the last business day of the spot month.

D. Buyer's Duties.—The clearing member representing the buyer shall deliver to the Clearing House by 12 noon (Chicago time) on the delivery date assigned to him by the Clearing House, or on the last day of trading, a buyer's delivery commitment that includes: the buyer's name and account number, and the name of a Chicago bank registered with the Exchange and a member of the Federal Reserve System to which the delivery unit should be transferred. The clearing member representing the buyer shall, by payment against delivery on the day of delivery, present to the selling clearing member's bank or its designated agent a wire transfer of Federal funds for the net invoicing price.

E. Matching Longs and Shorts.—The Clearing House shall pair Seller's and Buyer's Delivery Commitments by matching the oldest long positions with the Seller's Delivery Commitments as received. The Clearing House shall, as soon as practicable thereafter, present to make known the Buyer's Delivery Commitment to the appropriate, paired clearing member.

F. Payment.—The Clearing House shall monitor the delivery procedure to ensure proper transfer of Treasury bonds from the seller to the buyer and correct payment by the buyer to the seller. The net invoicing price shall be determined on the basis of the settlement price on the day seller submits his delivery commitment, or the last day of trading after adjustment for any accrued interest (which shall be computed in accordance with Department of the Treasury Circular 300) and after adjustment by an appropriate factor reflective of the actual coupon rate and maturity length of the bond being transferred which equates the yields of deliverable bonds to a 10% coupon bond selling at par.

The formula for this computation shall be as follows: Net invoice price = (settlement price × conversion price) + accrued interest. The conversion price is the price at which a deliverable bond with a particular coupon rate and maturity length has a yield of 10% according to bond tables prepared by the Financial Publishing Company of Boston, Massachusetts.

Interest accrued on the bonds shall be charged to long's clearing member by short's clearing member in accordance with Department of Treasury Circular 300, Subpart P.

—04. Par Delivery.—

A. Par Delivery.—A delivery unit shall be composed of a United States Treasury bond maturing 20 years hence with a face value of $100,000 at maturity.

B. Delivery Points.—Delivery shall be made to a Chicago or New York bank, registered with the Exchange and a member of the Federal Reserve System, specified by the buyer's clearing member. All banks selected by the buyer and by the seller to effectuate delivery must be members of the Federal Reserve System.

—05. Deliverable Bonds.—Bonds suitable for delivery on U.S. Treasury bond futures contracts shall be U.S. Treasury bonds which if callable are not callable for at least 15 years, or if not callable, have a maturity of at least 15 years from the delivery date.

All bonds deliverable against a contract must be of the same issue. For settlement, the time to maturity of a given issue is calculated in complete three-month increments (i.e., 15 years and 5 months = 15 years and one quarter) from the first day of the delivery month.

—06. Emergencies, Acts of God, Acts of Government.—If delivery or acceptance or any precondition or requirement of either is prevented by strike, fire, accident, act of government, act of God, or other emergency the seller or buyer shall immediately notify the Exchange President. If the President determines that emergency action may be necessary, he shall call a special meeting of the Board of Governors or the Business Conduct Committee and arrange for the presentation of evidence respecting the emergency condition. If the Board or the Committee determines that an emergency exists, it shall take such action as it deems necessary under the circumstances and its decision shall be binding upon all parties to the contract. For example, and without limiting the Board's or Committee's power, it may: determine and assess losses in accordance with the procedures specified in Rule —07; extend delivery dates; and designate alternate delivery points in the event of conditions interfering with the normal operations of approved facilities.

In the event that the Board of Governors or Business Conduct Committee determines that there exists a shortage of deliverable U.S. Treasury bonds, it may upon a two-thirds vote of the members present or upon a two-thirds vote of the members who respond to a poll take such action as may in the Board's or Committee's sole discretion appear necessary to prevent, correct, or alleviate the condition. Without limiting the foregoing, the Board or Committee may: (1) designate as deliverable any specified U.S. Treasury bonds otherwise meeting the specifications and requirements stated in Rule —01; (2) designate as deliverable one or more issues of U.S. Treasury bonds having maturities shorter than 15 years or longer than 20 years and otherwise meeting the specifications and requirements stated in Rule —01 above; and/or (3) determine a cash settlement based on the current cash value of 10% coupon rate, 20-year U.S. Treasury bond as determined by using the current cash market yield curve for U.S. Treasury securities on the last day of trading.

—07. Failure to Perform.—If the clearing member with a delivery commitment fails to perform all acts required by this chapter, then that clearing member shall be deemed as failing to perform, which may be punishable as a major violation. A clearing member failing to perform shall be liable to the clearing member to which it was matched on the failing transaction for any loss sustained. The Board shall determine and access losses sustained, taking into account the settlement price, interest earnings foregone, and such other factors as it deems appropriate. The Board may also assess such penalties as it deems appropriate in addition to damages.

—08. Expanded Daily Limits.—Whenever on two successive days any contract month closes at the normal daily limit in the same direction (not necessarily the same contract month on both days) an expanded daily limit schedule shall go into effect as follows:

1. The third day's limit in all contract months shall be 150% of the normal daily limit.

2. If any contract month closes at its expanded daily limit on the third day in the same direction, then the fourth day's expanded daily limit shall be 200% of the normal daily limit.

3. If any contract month closes at its expanded daily limit on the fourth day in the same direction then there shall be no daily limit for said contract on the fifth day.

4. On the sixth day of the foregoing progression, the normal daily limit shall be reinstated.

5. Whenever the foregoing daily limit schedule is in effect and no contract month closes at the limit in the same direction which initiated the expanded schedule, then the normal daily limit shall be reinstated on the following day.

* * * * *

The Commission also will make available any other materials submitted by the CME in support of its application for contract market designation to the extent that such materials are not entitled to confidential treatment under Part 145 of the Commission's regulations (17 CFR Part 145). Copies of such materials submitted by the CME in support of its application for designation will be available through the Commission's Secretary or its offices in Washington, New York, Chicago, Minneapolis, Kansas City and San Francisco.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CME in support of its application for contract market designation, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, by March 23, 1981.

Issued in Washington, D.C., on January 14, 1981.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF ENERGY

Past Due Accounts; Assessment of Interest Charges

AGENCY: Department of Energy.

ACTION: Notice of Change in Interest Rates.

SUMMARY: The U.S. Department of Energy (DOE) hereby announces a change in the method of assessing interest charges for overdue accounts.

This notice supercedes a similarly entitled notice published in the Federal Register of November 19, 1973.

Background

The Department of Treasury revised its Treasury Fiscal Requirement Manual to reflect changes in the cash managment regulations, (Section 8070, "Billings and Collections" of Chapter 8000 "Cash Management"). The revision is a direct result of the findings of a Government wide task force on debt collection which stated that in order for the Federal Government to management its accounts receivables more efficiently, interest should be collected on all overdue accounts. The rate at which the interest is assessed should be representative of current economic conditions.

In order to comply with Treasury guidelines, the Department of Energy is proposing to change the rate at which interest on delinquent accounts will be

assessed. The rate will be based on percentage rates published quarterly in Treasury Fiscal Requirements bulletins by the Department of Treasury. This annualized percentage rate determined by the Treasury represents the average of the current value of funds to the Treasury for a recent three month period.

Use of this rate enables the government to recoup the approximate value that has been lost by the delayed receipt of funds rather than to penalize the debtor. Assessment of interest on overdue accounts will be vigorously pursued by the Department. Interest will also be assessed on deferred payments.

Notice

The Department of Energy shall assess interest charges on all overdue accounts owed the Department, both foreign and domestic, but exclusive of other Federal agencies. The rate of interest will be based on percentage rates published quarterly by the Department of Treasury in the Treasury Fiscal Requirements bulletin. This rate can be obtained from the Cash Management Regulation and Compliance Staff, Bureau of Government Financial Operations, Department of Treasury, Washington, D.C.

In the absence of a different rule prescribed by existing contract, statue or regulation, interest on delinquent debts will be assessed in conformance with Treasury Fiscal Requirements Manual Volume 1, Part 6 Section 8020.20. Deferrals of payment beyond a due date for specified time periods will similarly be assessed interest, regardless of amount.

Reference: Treasury Fiscal Requirements Manual, Volume 1, Part 6, Section 8020.20 Charges for Late Payments.

DATES: Comments must be received on or before February 20, 1981.

ADDRESS: Send comments on this proposal to: Mark D. Loop, Cash Management Specialist, Office of the Controller, Department of Energy, Washington, D.C. 20545, (301) 353–4581.

Issued in Washington, D.C., January 14, 1981.

Clarence E. Mahan,

Acting Controller.

BILLING CODE 6450–01–M

Office of Assistant Secretary for International Affairs

Proposed Subsequent Arrangement

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval for supply of 175 grams of normal uranium oxide to France, for use as standard reference material at the EURODIF facility at Tricastin.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material under Contract Number S–EU–675 will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: January 14, 1981.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

BILLING CODE 6450–01–M

Proposed Subsequent Arrangement

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the Government of Switzerland Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreements involves approval for the retransfer from the Federal Republic of Germany to Switzerland of 24,500 kilograms of uranium, containing 810.950 kilograms of U–235 (3.31% enrichment), in the form of fuel elements to be used for the third reload of the Kernkraftwerk Gosgen power reactor.

In accordance with Section 131 of the Atomic Energy act of 1954, as amended, it has been determined that the approval of this retransfer, designated as RTD/SD(EU)–34 will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: January 14, 1981.

Harold D. Bengelsdorf,

Director for Nuclear Affairs, International Nuclear and Technical Programs.

Meeting of the Coordinating Subcommittee of the Committee on Emergency Preparedness of the National Petroleum Council

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Meetings.

SUMMARY: The National Petroleum Council (NPC), an advisory committee to the Department of Energy (DOE), provides technical advice and information to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries. The NPC Committee on Emergency Preparedness is currently undertaking an analysis of issues bearing on emergency preparedness planning and the ability of the refining industry to respond to energy emergencies. NPC's Coordinating Subcommittee will hold two meetings to review and discuss study modules of this analysis. Because the need for these meetings was determined within the last week, and the timing can not be altered, the DOE is unable to provide the customary 15 days notice prior to the January 29, 1981, meeting.

DATE AND LOCATION: The Coordinating Subcommittee of the NPC's Committee on Emergency Preparedness will meet:

- Thursday, January 29, 1981, starting at 9:00 a.m., Exxon Building, Room 3920, 800 Bell Avenue, Houston, Texas.

FOR FURTHER INFORMATION CONTACT:

Mr. David A. Eaton, Office of Energy Contingency Planning, 2000 M Street, N.W., Room 7302, Washington, D.C. 20461, Telephone: (202) 653–3202.

Ms. Joan Walsh Cassedy, National Petroleum Council, 1625 K Street, N.W., Washington, D.C. 20006, Telephone: (202) 393–6100.

SUPPLEMENTARY INFORMATION:

Items for discussion and review at the meeting will include:

1. Review and comment on drafts of individual sections of the study.

2. Review and discuss the overall schedule of Subcommittee activities.

3. Discuss any other matters pertinent to the overall assignment from the Secretary.

All meetings are open to the public. The Chairman of the Subcommittee is empowered to conduct the meetings in a fashion that will, in his judgement, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements at the meeting should inform Joan Walsh Cassedy, National Petroleum Council, (202) 393–

6100, prior to the meeting, and provisions will be made for their appearance on the agenda. A transcript of the Coordinating Subcommittee meeting will be available for public review at the Freedom of Information Public Hearing Room, Room 5B–180, Department of Energy, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m., and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., on January 14, 1981.

Barton R. House,

Deputy Administrator for Operations and Emergency Management, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Energy Information Administration

Publication of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Public Law 95–621), signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate cost of gas to the industrial facility does not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA of 1978, Section 204 (e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and a high cost gas incremental pricing threshold which are to be effective February 1, 1981. These prices are based on the prices of alternative fuels.

For further information contact: Leroy Brown, Jr., Energy Information Administration, Federal Building, 12th & Pa. Ave., N.W., Rm 4121, Washington, D.C. 20461, (202) 633–9710.

Section I. Alternative Fuel Price Ceilings

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC also by Interim Rule, issued on December 24, 1980, in Docket No. RM81–9 amended price ceilings for Kentucky for the months following January 1981 to be set at the price ceiling at the Region D price until the Commission takes final action on its generic rulemaking in Docket No. RM79–21.

The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

State	Dollars per million BTU's
Alabama	4.40
Arizona	3.81
Arkansas	4.61
California	3.75
Colorado	3.57
Connecticut	4.61
Delaware	5.07
Florida	4.58
Georgia	4.55
Idaho	3.90
Illinois	2.91
Indiana	3.71
Iowa	4.32
Kansas	4.10
Kentucky[1]	3.48
Louisiana	4.11
Maine	4.48
Maryland	4.81
Massachusetts	4.50
Michigan	4.26
Minnesota	4.02
Mississippi	4.40
Missouri	4.04
Montana	3.65
Nebraska	4.14
Nevada	3.81
New Hampshire	4.69
New Jersey	4.36
New Mexico	4.79
New York	4.06
North Carolina	4.80
North Dakota	4.82
Ohio	3.36
Oklahoma	3.95
Oregon	4.00
Pennsylvania	4.25
Rhode Island	4.52
South Carolina	4.79
South Dakota	4.14
Tennessee	4.49
Texas	3.47
Utah	4.26
Vermont	4.87
Virginia	4.71
Washington	3.91
West Virginia	4.04
Wisconsin	3.67
Wyoming	3.32

[1] Region based price as required by FERC Interim Rule, issued on December 24, 1980 in Docket No. RM81–9.

Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during

November 1980 was $35.53 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, Section 203(a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective February 1, 1981, is $7.76 per million BTU's.

Section III. Method Used to Compute Price Ceilings

The FERC, by Order No. 50, issued on September 28, 1979, in Docket No. RM79–21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 81, issued in the same docket on May 7, 1980, established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings until November 1, 1981.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the months of September 1980, October 1980, and November 1980.[2] All reports of volume sold and price were identified by the State into which the oil was sold.

B. Method Used to Determine Alternative Price Ceilings

(1) *Calculation of Volume-Weighted Average Price.* The prices which will become effective February 1, 1981, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, September 1980, October 1980, and November 1980. Reported prices for sales in September 1980 were adjusted by the percent change in the nationwide volume-weighted average price from September to November 1980. Prices for October 1980 were similarly adjusted by the percent change in the nationwide volume-weighted average price from October to November 1980. The volume-weighted 3-month average of the adjusted September 1980 and October 1980, and the reported November prices were then computed for each State.

(2) *Adjustment for Price Variation.* States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B.(1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) *Calculation of Ceiling Prices.* The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B.(1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III.B.(2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State's alternative fuel price ceiling base. The appropriate lag adjustment factor (as discussed in Section III.B.4.) was then applied to the alternative fuel price ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million BTU's).

(4) *Lag Adjustment.* The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 21 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending January 14, 1981, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of November 1980. A regional lag adjustment factor was similarly calculated for four regions. These are: One for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price base for each State in a given region as calculated in Section III.B.(3).

C. Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A

Connecticut
Maine
Massachusetts
New Hampshire
Rhode Island
Vermont

Region B

Delaware
Maryland
New Jersey
New York
Pennsylvania

Region C

Alabama
Florida
Georgia
Mississippi
North Carolina
South Carolina
Tennessee
Virginia

Region D

Illinois
Indiana
Kentucky
Michigan
Ohio
West Virginia
Wisconsin

PRegion E

Iowa
Kansas
Missouri
Minnesota
Nebraska
North Dakota
South Dakota

Region F

Arkansas
Louisiana
New Mexico
Oklahoma
Texas

Region G

Colorado
Idaho
Montana
Utah
Wyoming

Region H

Arizona
California
Nevada
Oregon
Washington

Issued in Washington, D.C. on January 15, 1981.

Albert H. Linden, Jr.,

Acting Administrator, Energy Information Administration.

[FR Doc. 81–1971 Filed 1–19–81; 8:45 am]

BILLING CODE 6450–01–M

[2] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for consumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State or Local) and the military are excluded.

Federal Energy Regulatory Commission

[Docket No. ER81-203-000]

Arizona Public Service Co.; Proposed Tariff Change

January 12, 1981.

The filing company submits the following:

Take notice that on January 5, 1981, Arizona Public Service Company (APS) tendered for filing a proposed Letter Agreement amending APS–FPC Rate Schedule No. 52 by decreasing the contract demand for the sale of firm power with the Papago Tribal Utility Authority.

Waiver is requested under the provisions of Section 35.11 so that the said decrease would become effective on December 16, 1980, simultaneously with the requested effective date of service in the filing with FERC of APS' Agreement with Washington Water Power Company.

A copy of the filing was served upon the Arizona Corporation Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-1984 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER81-204-000]

Arizona Public Service Co.; Proposed Tariff Change

January 12, 1981.

The filing company submits the following:

Take notice that on January 1, 1981, Arizona Public Service Company (APS) tendered for filing a Power Agreement between APS and Washington Water Power Company for the sale of power and energy. The filing is made pursuant to § 35.1 of the Commission's Regulations.

The parties request waiver under the provision of § 35.11 so that service could be commenced on December 16, 1980.

A copy of the filing was served upon the Arizona Corporation Commission.

Any person desiring to be heard or to protest said aplication should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. QF81-6-000]

Canners Steam Co.; Application for Commission Certification of Qualifying Status as a Cogeneration Facility

January 12, 1981.

On November 12, 1980, Canners Steam Company filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a proposed facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The proposed facility is a topping-cycle cogeneration facility which will be located at Terminal Island, California. Canners Steam Company states that is is a customer owned and operated central steam generating facility which provides process steam to the fish canneries, and related industries, within the environs of Fish Harbor, Port of Los Angeles, California. The primary fuel to be used will be natural gas with No. 2 distillate as an alternate. The generator output for the facility will be 2600 kilowatts.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed on or before February 20, 1981, and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Docket No. ER81-200-000]

Central Illinois Light Co.; Filing

January 12, 1981.

The filing company submits the following:

Take notice that on January 6, 1981, Central Illinois Light Company (CILCO) tendered for filing Modification No. 2, dated December 23, 1980 to the Interconnection Agreement between CILCO and the city of Springfield, Illinois (Springfield) (CILCO Rate Schedule FERC No. 21).

Modification No. 2 increases the demand rates for Scheduled Maintenance, Short-Term Firm and Short-Term Non-Firm Power in Service Schedules C, E and F to the Interconnection Agreement, and effects certain other changes in the terms and conditions of the Service Schedules to Interconnection Agreement. CILCO has requested waiver of § 35.3 of the Commission's regulations in order to permit Modification No. 2 to become effective in accordance with its terms on December 1, 1980.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 31, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No 3672-000]

Columbia Irrigation District; Application for Preliminary Permit

January 12, 1981.

Take notice that Columbia Irrigation District (Applicant) filed on November 7, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. § 791(a)–825(r)] for proposed Project No. 3672 to be known as Horn Rapids Water Power Project located on Yakima River in Benton County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: I. J. Sunford, Manager, Columbia Irrigation District, 10 East Kennewick Avenue, Kennewick, Washington 99336. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of: (1) Horn Rapids Dam, a 4–foot high rock filled timber crib weir structure approximately 500–feet long; (2) a 170–acre reservoir; and (3) a powerhouse with a turbine and 3 generating units rated at 465 kW each.

The Applicant estimates that the average annual energy output would be 7,200,000 kWh.

Purpose of Project—The power produced by the proposed project would be sold to the City of Richland's Energy Services Department.

Proposed Scope and Cost of Studies under Permit—The Applicant seeks issuance of preliminary permit for a period of 36 months during which time they would secure hydrologic and geologic data, assess environmental impacts, and make a feasibility study. The Applicant estimates the cost of the studies to be $40,000 to $50,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 2, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than May 1, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before March 2, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protest, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of aplication for preliminary permit for Project No. 3672. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-1988 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3717-000]

Continental Hydro Corp.; Application for Preliminary Permit

January 12, 1981.

Take notice that Continental Hydro Corporation (Applicant) filed on November 13, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3717 to be known as the Ringold Wasteway Project located on the Ringold Wasteway in Franklin County, Washington. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. A. Gail, 141 Milk Street, Suite 1143, Boston, Massachusetts 02109. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of: (1) an intake structure; (2) a penstock approximately 1,100 feet long; (3) a powerhouse containing a single generating unit with a maximum capacity rating of 3.1 MW; and (4) a 3-mile long transmission line.

The Applicant estimates that the average annual energy output would be 10,760 MWh.

Purpose of Project—Project power would be sold to Pacific Power and Light Company or other appropriate purchaser.

Proposed Scope and Cost of Studies under Permit—Applicant would conduct a feasibility study including data acquisition and analysis, technical studies, energy production and capacity evaluation, project design, construction options, and financial and economic examinations. Applicant estimates the cost of performing these studies at $45,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives

the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 12, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than May 11, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirments of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before March 12, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTESTS", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3717. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-1989 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ES81-21-000]

Edison Sault Electric Co.; Application

January 12, 1981.

Take notice that on December 23, 1980, Edison Sault Electric Company (Applicant) filed an application seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance and sale from time to time on or before December 31, 1981, of Promissory Notes to commercial banks purchasing such notes as a financial institution and to residents of the State of Michigan, up to but not exceeding $2,300,000 in aggregate principal amount.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 25, 1981, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). The application is on file with the Commission and available for public inspection.

Henwood Associates, Inc. and William Symons, Jr.; Application for Preliminary Permit

January 12, 1981.

Take notice that Henwood Associates, Inc. and William Symons, Jr. (Applicants) filed on August 28, 1980 and September 22, 1980, respectively, competing applications for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project Nos. 3413 and 3497 to be known as Millner Creek located on Millner Creek in Mono County, California. The applications are on file with the Commission and are available for public inspection. Correspondence with the Applicants should be directed to: Dr. Kenneth Henwood, Henwood Associates, Inc., P.O. Box 7, Smartville, California 95977, and John Symons, P.O. Box 1267, Bishop, California 93514. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The project proposed by Henwood Associates, Inc. would consist of: (1) a concrete diversion dam, approximately 8' high × 14' wide; (2) a perforated 12" horizontal pipe tapping the creek underflow; (3) a 12" diameter steel penstock approximately 23,000-feet long; (4) a powerhouse containing an impulse turbine and gererating unit, having a total installed capacity of 700 kW; (5) a switchyard; and (6) 3,700 feet of transmission line. Henwood Associates, Inc. estimates that the average annual energy output would be between 1.5 and 3.5 million kWh.

The project proposed by William Symons, Jr. would consist of: (1) a 22,000-foot long penstock with a minimum diameter of 12"; (2) a powerhouse containing a Pelton-type turbine and generating unit, having a total installed capacity of 658 kW; (3) an intake structure; (4) a 2,500 cubic foot capacity off stream storage reservoir; (5) a pipeline connecting the stream diversion structure with the settlement reservoir; and (6) approximately one mile of 12.5 kVA transmission line. The Applicant estimates that the average annual energy output would be between 4 and 5 million kWh.

Purpose of Project—Each Applicant plans to sell the power generated by the project to Southern California Edison Company.

Proposed Scope and Cost of Studies Under Permit—Henwood Associates, Inc. seeks issuance of a preliminary

permit for a period of two years, during which time it would conduct hydrologic investigations, carry out technical and economic analyses, collect environmental data, and prepare a FERC license application. The cost of these activities is estimated by the Applicant to range from $30,000–$50,000.

William Symons, Jr. seeks issuance of a preliminary permit for a period of 15 months, during which time hydrologic investigations and economic, technical, and environmental studies would be carried out; necessary agencies would be contacted; and a FERC license application would be prepared. The cost of the activities is estimated by the Applicant to be $30,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 23, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than May 22, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before March 23, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project Nos. 3413 and 3497. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.W., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, N.W., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. ER81-201-000]

Illinois Power Co.; Filing

January 12, 1981.

The filing company submits the following:

Take notice that on January 2, 1981, Illinois Power Company ("Illinois Power") tendered for filing proposed Modification No. 2, dated November 25, 1980, to the Interchange Agreement, dated January 17, 1956, between Central Illinois Public Service Company ("CIPS") and Illinois Power.

The parties propose that effective December 1, 1980, with respect to said Modification, Section 3 of the current Emergency Interchange Agreement be modified and supplemented by the deletion therefrom of the cents quantity 1¾ and by substitution, therefore, the cents quantity 3.

Illinois Power states that a copy of the filing was served upon CIPS and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said filing should file comments or protests with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with §§ 1.8 or 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such comments or protests should be filed on or before January 30, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Docket No. RA80-103]

Jeffrey Moore, d.b.a. Moore's Arco; Filing of Petition for Review Under 42 U.S.C. 7194

January 12, 1981.

Take notice that Jeffrey Moore, d.b.a. Moore's Arco on August 29, 1980, filed a Petition for Review under 42 U.S.C. § 7194(b) (1977) Supp.) from an order of the Secretary of Energy (Secretary).

Copies of the petition for review have been served on the Secretary and all participants in prior proceedings before the Secretary.

Any person who participated in the prior proceedings before the Secretary may be a participant in the proceeding before the Commission without filing a petition to intervene. However, any such person wishing to be a participant is requested to file a notice or participation on or before February 2, 1981, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. Any other person who was denied the opportunity to participate in the prior proceedings before the Secretary or who is aggrieved or adversely affected by the contested order, and who wishes to be a participatnt in the Commission proceeding, must file a petition to intervene on or before February 2, 1981,

in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.40(e)(3)).

A notice of participation or petition to intervene filed with the Commission must also be served on the parties of record in this proceeding and on the Secretary of Energy through John McKenna, Office of General Counsel, Department of Energy, Room 6H–025, 1000 Independence Avenue, S.W., Washington, D.C. 20585.

Copies of the petition for review are on file with the Commission and are available for public inspection at Room 1000, 825 North Capitol St., N.E., Washington, D.C. 20426.

Kenneth F. Plumb,

Secretary.

[Docket No. ER81–193–000]

Northern States Power Co.; Filing

January 12, 1981.

The filing company submits the following:

Take notice that Northern States Power Company, on December 29, 1980, tendered for filing a Notice of Cancellation dated December 15, 1980, terminating the Firm Power Service Resale Agreement dated March 11, 1970, with Valley Springs, South Dakota.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450–85–M

[Docket No. ER81–202–000]

Pacific Gas and Electric Co; Filing

January 12, 1981.

The filing company submits the following:

Take notice that on January 5, 1981, Pacific Gas and Electric Company (PG and E) tendered for filing a contract dated October 8, 1980. The contract specifies rates to be charged to the United States Department of Energy, Western Area Power Administration (WAPA) for transmission service rendered by PG and E to WAPA between Tracy Switchyard and the Delta Pumping Plant of the California Department of Water Resources. The service will be provided from the proposed date of December 1, 1980 until the contract is terminated, or similar transmission service is provided under United States Power Contract No. 14–06–200–2948A.

Copies of this filing were served upon the California Public Utilities Commission and the California Department of Water Resources.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450–85–M

[Docket No. QF81–8–000]

Sea World; Application for Commission Certification of Qualifying Status as a Cogeneration Facility

January 13, 1981.

On December 18, 1980, Sea World filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a cogeneration facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The facility is located at 1720 South Shores Road, San Diego, California. Sea World states that the existing capacity of the facility is 1.2 megawatts. The facility is privately owned with no utility participation.

The facility consists of two natural gas-fired engines with heat recovery equipment on exhaust gases and engine jacket water. The fuel input per engine is equal to 7,540,000 Btu's/hour. The electrical output per engine equals 630 kilowatts or 2,150,442 Btu's/hour. The steam per engine equals 3,429,240 Btu's/hour. The fuel input for the total facility is 15,080,800 Btu's/hour. The electrical output for the total facility is 4,300,884 Btu's/hour. The useful thermal energy for the total facility is 6,858,480 Btu's/hour.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed on or before February 20, 1981, and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER81–194–000]

Mississippi Power Co.; Proposed Tariff Change

January 12, 1981.

The filing company submits the following:

Take notice that Mississippi Power Company on December 29, 1980, tendered for filing proposed agreement with Municipal Energy Agency of Mississippi for bulk power transmission services. The filed agreement and rate will provide charges for bulk power service performed by Mississippi Power Company for Municipal Energy Agency of Mississippi for the period from December 1, 1980 through November 30, 1981.

This filing is an initial filing for a new service. At the request of the customers, the service has already commenced.

Posting of the filing has been accomplished with notice to Municipal Energy Agency of Mississippi, the only affected customer.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the

Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1981. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

BILLING CODE 6450-85-M

[Project No. 3699-000]

Mitchell Energy Company, Inc.; Application for Preliminary Permit

January 12, 1981.

Take notice that Mitchell Energy Company, Inc. (Applicant) filed on November 7, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 3699 to be known as Palo Verde Diversion Dam Project located on Colorado River in Riverside County, California. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Mitchell L. Dong, President, Mitchell Energy Company, Inc., 173 Commonwealth Avenue, Boston, Massachusetts 02116. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would utilize an existing government dam owned by the United States Water and Power Resources Service and would consist of a powerhouse with a total installed capacity of 8,700 kW.

The Applicant estimates that the average annual energy output would be 53,000,000 kWh.

Purpose of Project—Power generated by the project would be sold to Southern California Edison Company or another local utility.

Proposed Scope and Cost of Studies Under Permit—The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of the studies, Applicant would decide whether to proceed with more detailed studies and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the studies to be performed under the preliminary permit would be $50,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 12, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than May 11, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before March 12, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3699. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-1999 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3708-000]

Mitchell Energy Company, Inc.; Application for Preliminary Permit

January 12, 1981.

Take notice that Mitchell Energy Company, Inc. (Applicant) filed on November 10, 1980, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. 791(a)-825(r)] for proposed Project No. 3708 to be known as the Navajo Project located on the San Juan River in San Juan County, New Mexico. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. Mitchell L. Dong, President, Mitchell Energy Company, Inc., 173 Commonwealth Avenue, Boston, Massachusetts 02116. Any person who wishes to file a response to this notice should read the

entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed run-of-the-river project would utilize the existing United States Water and Power Resources Service's Navajo Dam (almost 4,000-feet long, including a 138-foot wide spillway, and 400 feet high) and Lake and would consist of: (1) a new powerplant just below the dam; (2) new turbine/generator units with a total capacity of 325 MW; and (3) transmission and appurtenant facilities.

The Applicant estimates that the average annual energy output would be 855 GWh.

Purpose of Project—Project power would be sold to Public Service Company of New Mexico, or another local utility.

Proposed Scope and Cost of Studies under Permit—Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would perform surveys and geological investigations, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the cost of studies under the permit would be $50,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 23, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than May 22, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protests about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules or Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before March 23, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTESTS", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3708. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street, NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

BILLING CODE 6450-85-M

[Docket No. QF81-7-000]

Occidental Geothermal, Inc.; Application for Commission Certification of Qualifying Status as a Small Power Production Facility

January 12, 1981.

On November 21, 1980, Occidental Geothermal, Inc. filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The facility is located in Bakersfield, California. Occidental Geothermal, Inc., states that the facility will generate electric power solely through the utilization of geothermal steam from wells located in Lake and Sonoma Counties in the "geysers" geothermal area of Northern California. The facility will have a net power production capacity of 80 megawatts.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed on or before February 20, 1981, and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-2001 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-85-M

[Project No. 3726-000]

South Carolina Electric and Gas Co.; Application for Preliminary Permit

January 12, 1981.

Take notice that South Carolina Electric and Gas Company (Applicant) filed on November 13, 1980, an application for preliminary permit

[pursuant to the Federal Power Act, 16 U.S.C. 791(a)–825(r)] for proposed Project No. 3726 to be known as Lower Saluda River Project located on the Saluda River in Richland and Lexington Counties, South Carolina. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: E. H. Crews, Jr., Vice President and Group Executive, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, S.C. 29218. Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—The proposed project would consist of: (1) a concrete dam, approximately 1,250 feet long and 70 feet high, with an integral powerhouse containing 3—6,000 kW generating units; (2) a 115-kV transmission line, approximately 1.5 miles long, and (3) appurtenant facilities.

The Applicant estimates that the average annual energy output would be 48,000,000 kWh.

Purpose of Project—All of the energy generated would be transmitted into the Applicant's system to supply customer loads and contract obligations to other utilities.

Proposed Scope and Cost of Studies under Permit—The Applicant seeks issuance of a preliminary permit for a period of 36 months. During this time, Applicant proposes to carry out field surveying, studies of the hydrology, right-of-way requirements, conceptual design and locations and geology, preliminary design and locations, economic evaluations, an environmental impact assessment and preparation of license application. The estimated cost of these studies is $105,000.

Pupose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before March 23, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than May 22, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1980). A competing application must conform with the requirements of 18 CFR 4.33 (a) and (d) (1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in § 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be received on or before March 23, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project No. 3726. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First Street NW., Washington, D.C. 20426. A copy of any notice of intent, competing application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

[Project No. 3483 and Project No. 3508]

City of Shawano, Wis., North American Hydro, Inc., Application for Preliminary Permit

November 18, 1980.

Notice that City of Shawano, Wisconsin (Shawano), and North American Hydro, Inc. (NAHI), (Applicant) filed on September 18, 1980, and September 29, 1980, respectively, an application for preliminary permit [pursuant to the Federal Power Act, 16 U.S.C. §§ 791(a)—825(r)] for proposed Project No. 3483 and 3508 respectively to be known as Hayman Falls Dam located on the Hayman Falls Dam on the Embarass River near Pella in Shawano County, Wisconsin. The application is on file with the Commission and is available for public inspection. Correspondence with the Applicant should be directed to: Mr. J. Leroy Thilly, Attorney for the City of Shawano, P.O. Box 9927, Madison, Wisconsin 53701. Correspondence with NAHI should be sent to: Mr. Jerry Donohue, North American Hydro, Inc., P.O. Box 11578, Fond du Lac, Wisconsin 54935.

Any person who wishes to file a response to this notice should read the entire notice and must comply with the requirements specified for the particular kind of response that person wishes to file.

Project Description—Shawano's proposed project would consist of: (1) an existing concrete dam, approximately 115 feet long and 13 feet high; (2) an existing reservoir with a storage capacity of 414.8 acre-feet at normal pool elevation of 881 feet m.s.l. and an approximate area of 79.5 acres; (3) a proposed one-quarter mile long steel penstock; (4) an existing reinforced concrete powerhouse located on the east bank of the river; (5) proposed transmission lines; and (6) appurtenant facilities. Shawano estimates the capacity of the project to be 780 kW

with an annual energy output of 3,400,000 kWh.

NAHI's proposed project would consist of: (1) an existing concrete dam, approximately 13.8 feet long with a hydraulic head of 14 feet; (2) an existing reservoir with a storage capacity of 80 acres; (3) a proposed penstock approximately 1,100 feet long; (4) a proposed reinforced concrete powerhouse located on the east bank of the river; (5) proposed transmission lines; and (6) appurtenant facilities. NAHI estimates the capacity of the project to be 750 kW with an annual energy output of 2,500,000 kWh.

Purpose of Project—Both Shawano and NAHI would sell its project power to either Wisconsin Power and Light Company or Wisconsin Public Service Corporation.

Proposed Scope and Cost of Studies under Permit—Both Applicants have requested 36-month permits to prepare definitive project reports, including preliminary design and economic feasibility studies, hydrological studies, environmental and social studies, and soils and foundation data. The costs of the aforementioned activities along with obtaining agreements with other Federal, State, and local agencies are estimated by Shawano to be 40,000 while NAHI's costs are estimated to be from $30,000 to $35,000.

Purpose of Preliminary Permit—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for the power, and all other information necessary for inclusion in an application for a license.

Agency Comments—Federal, State, and local agencies that receive this through direct mailing from the Commission are invited to submit comments on the described application for preliminary permit. (A copy of the application may be obtained directly from the Applicant.) Comments should be confined to substantive issues relevant to the issuance of a permit and consistent with the purpose of a permit as described in this notice. No other formal request for comments will be made. If an agency does not file comments within the time set below, it will be presumed to have no comments.

Competing Applications—Anyone desiring to file a competing application must submit to the Commission, on or before January 21, 1981, either the competing application itself or a notice of intent to file a competing application. Submission of a timely notice of intent allows an interested person to file the competing application no later than March 23, 1981. A notice of intent must conform with the requirements of 18 CFR 4.33(b) and (c)(1980). A competing application must conform with the requirements of 18 CFR 4.33(a) and (d)(1980).

Comments, Protests, or Petitions to Intervene—Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1980). Comments not in the nature of a protest may also be submitted by conforming to the procedures specified in 1.10 for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any comments, protest, or petition to intervene must be filed on or before January 21, 1981.

Filing and Service of Responsive Documents—Any comments, notices of intent, competing applications, protests, or petitions to intervene must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "PETITION TO INTERVENE", as applicable. Any of these filings must also state that it is made in response to this notice of application for preliminary permit for Project Nos. 3483 and 3508. Any comments, notices of intent, competing applications, protests, or petitions to intervene must be filed by providing the original and those copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street., NE., Washington, D.C 20426. An additional copy must be sent to Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208, 400 First St., NW., Washington, D.C 20426. A copy of any notice of intent, competing application, application, or petition to intervene must also be served upon each representative of the Applicant specified in the first paragraph of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 81-1997 Filed 1-19-81; 8:45 am]

BILLING CODE 6450-85-M

[Docket No. ER81-105-000]

Indiana & Michigan Electric Co.; Order Granting Waiver of Filing Requirements, Denying Waiver of Notice, Accepting for Filing and Suspending Proposed Rates, Consolidating Dockets, Directing Summary Disposition, Granting Intervention, and Establishing Procedures

Issued: January 9, 1981.

On November 10, 1980, Indiana & Michigan Electric Company (IME) tendered for filing revised tariffs proposed to become effective November 1, 1980, which provide for an increase in jurisdictional revenue from its municipal wholesale customers of approximately $209,635 based on the twelve month period ending December 31, 1979.[1] IME proposes to increase its demand charge from $8.60/kWh to $9.14/kWh, to decrease its energy charge from 9.60 mills/kW to 9.41 mills/kW, and to decrease its monthly customer charge from $385.05 to $221.93. In addition, the base cost of fuel will be increased from 6.9109 mills/kWh to 7.5945 mills/kWh and the loss factor will be decreased from 3.547% to 2.975%. IME also proposes to eliminate the currently specified 60% billing demand ratchet.

Notice of the filing was issued on November 18, 1980, with responses due on or before December 5, 1980. Petitions to intervene were filed on December 5, 1980, by the Cities of Anderson and Auburn, Indiana (Anderson), and on December 5, 1980, as amended on December 19, 1980, by the Cities of Avilla, Bluffton, Columbia City, Frankton, Garrett, Gas City, Mishawaka, New Carlisle, and Warren, Indiana, and the Cities of Niles, South Haven, and Sturgis, Michigan together with the Indiana and Michigan Municipal Distributors Association (IMMDA). On December 17, 1980, IME filed its response.

Anderson and IMMDA argue that the rate increase is, in actuality, substantially larger than IME suggests. Anderson urges that the filing be rejected. Anderson, in the alternative, and IMMDA seek a maximum five month suspension and an order instituting a hearing concerning the

[1] See Attachment for rate schedule designations.

lawfulness of the proposed rate increase. In addition, Anderson and IMMDA raise a variety of cost of service issues.

Both Anderson and IMMDA also allege that the proposed rates will result in a price squeeze, and they request that the Commission institute price squeeze procedures.

Discussion

Initially, we find that participation by each of the petitioners is in the public interest. Consequently, we shall grant the petitions to intervene.

In Order No. 91, Docket No. RM79–64, issued June 27, 1980, the Commission indicated that until revised filing requirements became effective, the Commission would waive the filing requirements of the then current section 35.13 for those utilities that seek to implement the revised cost of service format. Although IME has not specifically requested such waiver, our review of its filing indicates that IME tendered its revised rates in accordance with the filing requirements of section 35.13, as revised by Order No. 91, and we thus shall regard such a request as implicit in IME's filing. Accordingly, we find that waiver of the filing requirements of section 35.13 at the time of IME's filing is warranted and the motion to reject will be denied.

IME has requested waiver of the 60-day notice requirement of section 35.3 of the Commission's regulations in order to allow an effective date of November 1, 1980. IME states that the proposed rates represent a nominal increase, and constitute only a technical filing designed to create a locked-in period with respect to rates which have been in effect, subject to refund, since December 23, 1978. According to IME, the purpose for creating such a locked-in period is to limit IME's exposure to refunds which might result if a recent initial decision[2] respecting the earlier rates is affirmed by the Commission. As indicated above, Anderson and IMMDA contend that the Commission should deny IME's request because the increase in rates is not minimal, but rather is substantial in comparison to rates which might be expected on the basis of the pending initial decision. Upon consideration, the Commision finds that IME's arguments do not constitute the requisite showing of good cause for waiver of the notice requirements, as required by section 35.11 of the Commission's regulations. The request will therefore be denied.

[2] *Indiana & Michigan Electric Co.*, Docket Nos. ER78–379, *et al.*, Initial Decision, issued June 18, 1980.

Considering the allegations raised by the intervenors, we find that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory, preferential, or otherwise unlawful. Accordingly, we shall accept the proposed rates for filing and suspend them as ordered below.

In a number of suspension orders,[3] we have addressed the considerations underlying the Commission's policy regarding rate suspensions. For the reasons given there, we have concluded that rate filings should generally be suspended for the maximum period permitted by statute where preliminary study leads the Commission to believe that the filing may be unjust and unreasonable or that it may run afoul of other statutory standards. We have acknowledged, however, that shorter suspensions may be warranted in circumstances where suspension for the maximum period may lead to harsh and inequitable results. Such circulmstances have been presented here. The Commission notes that a variety of substantive contentions have been raised by the intervenors, but that our preliminary analysis indicates that the proposed rates may not yield excessive revenues. We therefore believe that a five month suspension is unnecessary and may be inequitable to IME. However, in order to ensure refund protection for the affected customers pending further review, we believe we should exercise our discretion to suspend the rates for only one day from sixty days after filing, permitting the rates to take effect subject to refund thereafter on January 11, 1981.

Both IME and Anderson request that the instant docket be consolidated with the proceedings in Docket Nos. ER81–46–000 *et al.* These dockets, involving revised rates filed on October 24, 1980, for three other wholesale customer classes, were suspended for one day from sixty days after filing to become effective on December 25, 1980, were set for hearing, and were consolidated for hearing and decision thereon.[4] Because the instant docket and these dockets present common questions of law and fact, we shall consolidate Docket No. ER81–105–000 with these dockets for purposes of hearing and decision.

[3] *E.g., Boston Edison Co.*, Docket No. ER80–508 (August 29, 1980) (five month suspension); *Alabama Power Co.*, Docket Nos. ER80–506, *et al.* (August 29, 1980) (one day suspension); *Cleveland Electric Illuminating Co.*, Docket No. ER80–488 (August 22, 1980) (one day suspension).

[4] *Indiana and Michigan Electric Company*, Docket Nos. ER81–46–000 *et al.*, order issued December 18, 1980.

Anderson and IMMDA correctly note that IME has reflected accumulated deferred investment tax credits (ADITC) in its capitalization at the company's claimed overall rate of return. The Commission has previously determined that summary disposition is appropriate under these circumstances,[5] and we shall so resolve the issue in this docket. However, the Commission notes that the revenue impact of this summary disposition is relatively small in relation to the proposed rate increase. Moreover, as noted above, our preliminary analysis has indicated that IME's proposed rates may not produce excessive revenues. As a result, we shall not require IME to refile its cost of service and rates at this time. Nonetheless, summary disposition of the ADITC issue shall be reflected in any rates finally approved by the Commission.

The Commission observes that IME's proposed rate schedules for Anderson and IMMDA contain a tax adjustment clause. We shall not reject the tax adjustment clause, but we note that implementation of the clause will constitute a change in rate necessitating a timely filing with the Commission pursuant to section 35.13 of the regulations.

The Commission further observes that IME's proposed rates incorporate by reference the curtailment provision at issue in Docket Nos. E–9548 and E–9549, currently awaiting Commission action. We note that the curtailment provision shall remain subject to the outcome of the proceedings in those dockets.

In accordance with the Commission's policy established in *Arkansas Power & Light Company*, Docket No. ER79–339, order issued August 6, 1979, we shall phase the price squeeze issue. As we have noted in previous orders, this procedure will allow a decision first to be reached on the cost of service, capitalization and rate of return issues. If, in the view of the intervenors or staff, a price squeeze persists, a second phase of the proceeding may follow.

The Commission Orders:

(A) The requirement of section 35.13 of the Commission's regulations at the time of IME's filing that cost of service data, Period I, end no earlier than seven months prior to the date of the filing is hereby waived. The motion to reject is hereby denied.

(B) IME's request for waiver of the Commission's notice requirements is denied.

(C) IME's proposed rates tendered for filing on November 10, 1980, are

[5] *E.g., El Paso Electric Co.*, Docket No. ER79–526, order issued September 24, 1979.

accepted for filing and suspended for one day from sixty days after filing, to become effective on January 11, 1981, subject to refund pending hearing and decision thereon.

(D) The proceedings in Docket No. ER81–105–000 are hereby consolidated with the proceedings in Docket Nos. ER81–46–000 *et al.* for purposes of hearing and decision thereon.

(E) IME's inclusion of ADITC in its capitalization at the claimed overall rate of return is summarily rejected. This determination shall be reflected in any rates ultimately approved by the Commission in this docket.

(F) IME is hereby advised that implementation of its tax adjustment clause will require timely filing in accordance with the provisions of section 35.13 of the Commission's regulations.

(G) IME is hereby advised that the curtailment provision incorporated by reference in the instant filing is subject to the outcome of the proceedings in Docket Nos. E–9548 and E–9549.

(H) We hereby order initiation of price squeeze procedures in Docket No. ER81–105–000 and further order that the proceeding be phased so that the price squeeze procedures begin after issuance of a Commission opinion establishing the rate which, but for a consideration of price squeeze, would be just and reasonable. The presiding judge may order a change in this schedule for good cause. The price squeeze portion of this case shall be governed by the procedures set forth in section 2.17 of the Commission's regulations as they may be modified prior to the initiation of the price squeeze phase of this proceeding.

(I) The petitions to intervene are granted subject to the rules and regulations of the Commission; *Provided, however,* that participation by the intervenors shall be limited to matters set forth in their petitions to intervene; and *Provided, further,* that the admission of the intervenors shall not be construed as recognition by the Commission that they might be aggrieved because of any order or orders by the Commission entered in this proceeding.

(J) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the DOE Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I (1980)], a public hearing shall be held concerning the justness and reasonableness of IME's proposed rates.

(K) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately ten (10) days of the service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE, Washington, D.C. 20426. The designated law judge is authorized to establish procedural dates, and to rule on all motions (except motions to consolidate or sever and motions to dismiss), as provided for in the Commission's Rules of Practice and Procedure.

(L) The Commission staff shall serve top sheets in this proceeding on or before January 9, 1981.

(M) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf). An (*) preceding the control number indicates that other purchasers are listed at the end of the notice.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission within fifteen (15) days after the date of publication of this notice in the **Federal Register.**

Please reference the FERC Control Number (JD No.) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-C

The above notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" after the section code. Estimated annual production (PROD) is in million cubic feet (MMcf). An (*) preceding the control number indicates that other purchasers are listed at the end of the notice.

The applications for determination in these proceedings together with a copy or description of other materials in the record on which such determinations were made are available for inspection, except to the extent such material is treated as confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426.

Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 18 CFR 275.204, file a protest with the Commission on or before February 5, 1981.

Please reference the FERC Control Number (JD No.) in all correspondence related to these determinations.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6450-85-M

ENVIRONMENTAL PROTECTION AGENCY

[OPP-180547; PH-FRL 1723-8]

California; Issuance of Specific Exemption for Benomyl on Crucifer Seeds

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted a specific exemption to the California Department of Food and Agriculture (hereafter referred to the "Applicant") to use benomyl on 56,000 pounds of crucifer seeds (cabbage, cauliflower, broccoli, and Brussels sprouts) to control blackleg disease (*Phoma lingam*). The specific exemption is issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

DATE: The specific exemption expires on July 1, 1981.

FOR FURTHER INFORMATION CONTACT: Edward Gross, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, Rm. E-124, 401 M St., SW., Washington, D.C. 20460 (202-426-0223).

SUPPLEMENTARY INFORMATION: According to the Applicant, *P. linam* reduces germination and can devastate a field by killing the plants or severely stunting their growth and yield. The organism is often present on crucifer seed or weed hosts of the genus *Brassica* that are already at the planting site. Spores of *P. lingam* can remain viable on infected debris for up to 4 years, and uninfected fields can be infected by the introduction of contaminated seed. The Applicant claimed that effective disease control requires treatment of seed stock used for seed production as well as the treatment of commercial seed lots.

The Applicant estimates that California growers can expect to lose $21 million, with major losses in other States, without the use of benomyl. The Applicant claimed that there is no pesticide registered for this use, nor are there any successful cultural practices to control blackleg.

The Applicant proposed using a maximum of 140 pounds of Benlate (0.005.0.01 pound of the active ingredient benomyl per acre) to treat 56,000 pounds of seed as a slurry application in combination with Arasan or Captan. One application is to be made per seed lot.

EPA has determined that residues of benomyl are not likely to exceed 0.2 part per million (ppm) in cabbage and cauliflower and 0.4 ppm in broccoli and Brussels sprouts from this use. These levels have been judged adequate to protect the public health. No adverse effects to the environment are anticipated from this specific exemption.

It should be noted that a rebuttable presumption against registration (RPAR) of pesticide products containing benomyl was published in the Federal Register on December 6, 1977 (42 FR 61788). On Thursday, August 30, 1979 (44 FR 51186), EPA published in the Federal Register a preliminary notice of determination concluding the RPAR against benomyl. As developed in the position document, EPA has determined that benomyl poses risks of mutagenicity (as a spindle poison), tertogenicity, and spermatogenic depression to humans, and acute toxicity to aquatic organisms. EPA determined that other areas of concern had been successfully rebutted. EPA will require modification of labeling of benomyl pesticide products packaged in 5-pound or larger bags with aerial application directions. EPA has reflected this preliminary determination in imposing appropriate precautions in the specific exemption to protect employees working with benomyl.

After reviewing the application and other available information, EPA has determined that the criteria for an exemption have been met. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until July 1, 1981, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The product Benlate 50 Percent Wettable Powder (EPA Registration No. 352-354) will be used.

2. Benlate will be applied at a maximum rate of 8 ounces formulation (4 ounces benomyl active ingredient) in sufficient water to treat 100 pounds of seed.

3. Each seed lot may receive no more than a single application of benomyl. Benomyl may be used in combination with Arsan or Captan products, which are registered for use as crucifer seed treatments, providing such combinations are not prohibited by the various product labels.

4. Application of benomyl will be restricted to seeds on which infestations have been confirmed or to seeds from areas where *Phoma lingam* is known to be present.

5. A maximum of 56,000 pounds of seeds may be treated.

6. Treated seeds will not be used for food, feed, or any other use except planting, and all shipments of seed must be so labeled.

7. Residues of benomyl, in the raw agricultural commodities, which result from treatment of the seeds are not likely to exceed 0.2 ppm in cabbage and cauliflower and 0.4 ppm in broccoli and Brussels sprouts. Cabbage, cauliflower, broccoli, and Brussels sprouts with residue levels not exceeding these levels may be shipped in interstate commerce. The Food and Drug Administration, U.S. Department of Health and Human Services, has been advised of this action.

8. Only seeds intended for commercial planting may be treated with benomyl. Benomyl-treated seeds will be clearly labeled as such.

9. The EPA has determined that benomyl causes birth defects and reduced sperm production in laboratory animals. Exposure to benomyl during pregnancy should be avoided. Exposure to benomyl might cause a depressed sperm count. In case of accidental spills or other unusual exposure, work must cease immediately and directions for contact with benomyl must be followed.

10. The Applicant is responsible for insuring that the restrictions of this specific exemption are met, and must

submit a report summarizing the results of this program by December 31, 1981.

11. All applicable directions, restrictions, and precautions on the EPA-registered label must be followed.

12. The EPA shall be immediately informed of any adverse effects resulting from the use of benomyl in connection with this exemption.

13. All applications will be made by, or under the direct supervision of, State-certified applicators. Applicators must wear dust masks when treating crucifer seeds with benomyl.

(Sec. 18 as amended 92 Stat. 819; (7 U.S.C. 136))

Dated: January 9, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-32-M

[OPP-180552; PH-FRL 1731-3]

California; Issuance of Specific Exemption for Fenvalerate on Tomatoes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted a specific exemption to the California Department of Food and Agriculture (hereafter referred to as the "Applicant") to use fenvalerate (Pydrin) on a maximum of 3,800 acres of tomatoes in Fresno, San Diego, and Tulare Counties in California to control the tomato pinworm. The applicant had previously availed itself of a crisis exemption for this purpose. The specific exemption is issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

DATE: The specific exemption expires on January 15, 1981.

FOR FURTHER INFORMATION CONTACT: Libby Welch, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, Rm. E-124, 401 M St. SW., Washington, D.C. 20460 (202-426-0223).

SUPPLEMENTARY INFORMATION: On August 29, 1980, the Applicant initiated a crisis exemption for the use of Pydrin (EPA Reg. No. 201-401), for control of the tomato pinworm on fresh market tomatoes in San Diego County, and so notified the Administrator. The Applicant submitted a request for a continuation of that program and later requested that the specific exemption be amended to include Fresno and Tulare Counties also.

According to the Applicant, a very heavy population of pinworms emerged in these counties this season as a result of a very wet and warm winter. Growers could not get into the wet fields last year to disk under the old tomato plants which contained overwintering pinworms. Many of the overwintering pinworms survived and emerged this season. Although the pest is a problem to a small degree every year, this year is proving to be a very severe pinworm year, according to the Applicant. Damage is caused by the pinworm's holes and secondary bacteria and fungi infections. Tomatoes with excessive pinworm damage do not meet the quality standards established by the California Administrative Code and are not marketable. The Applicant estimates that without the use of fenvalerate to control this pest, tomato growers face a potential loss of $5 million.

The Applicant proposed to make 10 applications of the active ingredient (a.i.) fenvalerate (cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate) on fresh market tomatoes using ground and air equipment.

The Applicant indicates that none of the registered alternatives are controlling this pest. Light infestations of pinworm can be controlled with at least four applications of either methomyl or azinphosmethyl; heavy investations cannot be controlled. In addition, the Applicant states, several applications of methomyl lead to a secondary outbreak of the vegetables leafminer which then requires applications of oxamyl for control of this pest. Also, azinphosmethyl requires a 14-day preharvest interval which is not practical in Fresno, San Diego, and Tulare Counties where tomatoes are harvested every 1 to 3 days.

According to the Applicant, the other alternatives, parathion, methyl parathion, toxaphene, endosulfan, cryolite, carbaryl, and pyrethrin have been ineffective for years and are no longer recommended for this use. A temporary tolerance for fenvalerate in or on fresh market tomatoes at 1 part per million (ppm) is currently in effect. Residues of fenvalerate from the proposed use should not exceed 1 ppm in or on fresh market tomatoes. This level has been judged adequate to protect the public health. EPA has determined that the proposed use should not pose an unreasonable hazard to the environment.

After reviewing the application and other available information, EPA has determined that the criteria for an exemption have been met. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until January 15, 1981, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. The product Pydrin 2.4 E.C., manufactured by Shell Chemical Co., may be used.

2. A total of not more than 3,800 acres of tomatoes may be treated.

3. A maximum of 7,700 pounds of a.i. may be applied at a maximum rate of 0.1 to 0.2 pound a.i. per acre.

4. A maximum of 10 applications are authorized.

5. A 2-day preharvest interval is imposed.

6. All applications must be made by State-certified applicators or persons under their direct supervision.

7. Treated acreage may not be planted to root crops for 12 months after the last application. Treated acreage may not be planted to any other crop for 60 days after the last application.

8. Fenvalerate will be applied by ground equipment in a minimum spray volume of 20 gallons of water per acre or by air in a minimum spray volume of 5 gallons of water per acre.

9. Fenvalerate may be applied to fields only when fields are to be harvested within 14 days and a State entomologist has determined that (a) a major infestation of pinworms exists; (b) registered pesticide are not controlling the pest; and (c) significant economic losses to fresh market tomatoes will occur.

10. It is recommended that fenvalerate not be applied any closer to fish-bearing freshwaters than 200 feet by ground and 750 feet by air at the 0.1 pound a.i. rate, and 300 feet by ground and 1,250 feet by air at the 0.2 pound a.i. rate. Applications closer than these may result in fish and/or other aquatic organism kills.

11. Participants are to be notified of their obligation to report any adverse effects on nontarget organisms arising from the use of Pydrin. The EPA shall be immediately informed of any adverse effects resulting from the proposed use.

12. Precautions must be taken to avoid or minimize spray drift to nontarget areas. It is recommended that pesticide application be made when wind speeds are between 2 and 5 miles per hour. No pesticide applications are to be made when wind speed exceeds 10 miles per hour.

13. Pydrin is highly toxic to bees exposed to direct treatment or to residues on crops or weeds. It may not be applied or allowed to drift to weeds or crops in bloom if bees are actively visiting the treatment area. Protective information may be obtained from the

State Cooperative Agricultural Extension Service.

14. Fenvalerate is extremely toxic to fish and aquatic invertebrates. It may not be applied directly to any body of water and drift reduction precautions must be observed. It may not be applied where excessive runoff is likely to occur. Care must be taken to prevent contamination of water by the cleaning of equipment or disposing of waste or excess pesticides.

15. Fresh market tomatoes with residues of fenvalerate not exceeding 1 ppm may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health and Human Services, has been advised of this action.

16. Treated tomatoes may not be used for animal feed, byproducts, or processing.

17. All applicable directions, restrictions, and precautions on the EPA-registered product label must be followed.

18. The Applicant is responsible for assuring that all of the provisions of this specific exemption are met and must submit a final report summarizing the results of this program by June 30, 1981.

(Sec. 18 as amended 92 Stat. 819; (7 U.S.C. 136))

Dated: January 13, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-32-M

[PF-212; PH-FRL 1731-6]

Certain Pesticide Chemicals; Filing of Pesticide Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces that certain companies have filed pesticide petitions with the EPA proposing that tolerances be established for certain pesticide chemicals in or on certain raw agricultural commodities.

ADDRESS: Written comments to the product manager given in each petition at the address below: Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

Written comments may be submitted while a petition is pending before the agency. The comments are to be identified by the document control number "[PF-212]" and the specific petition number. All written comments filed pursuant to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager given in each specific petition at the telephone number cited.

SUPPLEMENTARY INFORMATION: EPA gives notice that the following pesticide petitions have been submitted to the agency to establish tolerances for certain pesticide chemicals in or on certain raw agricultural commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each specific petition.

PP 1F2447. Monsanto Co., 1101 17th St., Washington, D.C. 20036, proposes to amend 40 CFR 180.249 by establishing tolerances for the combined residues of the herbicide alachlor (2-chloro-2',6'-diethyl-*N*-(methoxyethyl)acetanilide) and its metabolities (calculated as alachlor) in or on the raw agricultural commodity sunflower seed at 0.5 part per million (ppm). The proposed analytical method for determining residues is gas chromatography with a nitrogen specific detector. (PM 25, Robert J. Taylor, Rm. E-359, 202-755-2196.)

PP 1F2449. Chevron Chemical Co., 940 Hensley St., Richmond, CA 94804, proposes to amend 180.108 by establishing a tolerance for the combined residues of the insecticide acephate (*O-S*-dimethyl acetylphosphoramidothioate) and its cholinesterase-inhibiting metabolite *O,S*-dimethyl phosphoramidothioate in or on the raw agricultural commodity grass (pasture and range) at 3.0 ppm. The proposed analytical method for determining residues is a gas chromatographic procedure utilizing a thermionic detector. (PM 16, William H. Miller, Rm. E-343, 202-426-9458.)

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 135))

Dated: January 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-32-M

[OPP-180541; PH-RL 1732-6]

Connecticut; Issuance of Specific Exemption for Mesurol on Grapes

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA granted a specific exemption to the Connecticut Department of Environmental Protection (hereafter referred to as the "Applicant") to use Mesurol to control depredating birds on approximately 45 acres of grapes in Connecticut. The specific exemption was issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

DATE: The specific exemption expired on November 15, 1980.

FOR FURTHER INFORMATION CONTACT: Edward Gross, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, Rm. E-124, 401 M St. SW., Washington, D.C. 20460, (202-426-0223).

SUPPLEMENTARY INFORMATION: According to the Applicant, birds can seriously reduce the crop of marketable grapes. The amount of injury varies from year to year, reflecting bird populations and availability of alternative food sources. Grapes are generally harvested after other berry crops and thus can become a major food source for birds. Grapes are subject to feeding at all times after the fruit has begun to ripen.

There are currently no pesticides registered for bird control in grapes. There are two types of alternative control available: (a) scare devices, and (b) exclusion devices. According to the Applicant, scare devices do not prevent, but only reduce, feeding injury; some birds quickly adapt to these devices, while residents nearby are extremely discomforted. The Applicant claimed that exclusion devices are prohibitively expensive. Mesurol is currently registered as a bird repellent on cherries.

The Applicant proposed to apply 2.67 pounds of Mesurol, which contains the active ingredient (a.i.) 3,5-dimethyl-4-(methylthio) phenyl methylcarbamate, per acre up with to three applications. The Applicant anticipated that grape growers in Connecticut could lose from $750 to $1,600 per acre, depending on grape variety and expected yield, if Mesurol were not available.

EPA has determined that residues of the a.i. and its cholinesterase-inhibiting metabolites would not exceed 10 parts per million (ppm) in or on grapes, 20 ppm in or on raisins, and 50 ppm in or on grape pomace and raisin waste, from the proposed use. These residue levels have been judged adequate by EPA to protect the public health. EPA has also determined that the proposed use should not present an undue hazard to the environment.

After reviewing the application and other available information, EPA determined that the criteria for an

exemption had been met. Accordingly, the Applicant was granted a specific exemption to use the pesticide noted above until November 15, 1980, to the extent and in the manner set forth in the application. The specific exemption was also subject to the following conditions:

1. The product Mesurol 75 percent WP insecticide-bird repellent, EPA Reg. No. 3125–288, might be used. An unregistered label used in this connection was required to contain the identical, applicable precautions and restrictions which appeared on the registered label.

2. Mesurol was to be applied by ground equipment at a rate of 2.67 pounds (2.0 pounds a.i.) per acre. No more than three applications were to be made per season.

3. A 7-day preharvest interval was imposed.

4. A total of 360 pounds of Mesurol 75 percent WP were authorized to treat up to 45 acres of grapes.

5. Mesurol is toxic to fish and other aquatic organisms. It was not to be applied directly to any body of water, and drift precautions were to be observed. It was not to be applied where excessive runoff was likely to occur. Water was not to be contaminated by cleaning of equipment or disposal of wastes or excess pesticide.

6. Mesurol is highly toxic to bees exposed to direct treatment or residues on crops or blooming weeds. It was not to be applied or allowed to drift to crops or weeds when bees were actively visiting the area.

7. All applicable precautions, restrictions, and directions on the registered label were to be followed.

8. Residues of the a.i. and its cholinesterase-inhibiting metabolites not exceeding the following levels may enter into interstate commerce: grapes—10 ppm; raisins—20 ppm; raisin waste—50 ppm; grape pomace—50 ppm. The Food and Drug Administration, U.S. Department of Health and Human Services, was advised of this action.

9. The Applicant was responsible for ensuring that all of the provisions of this specific exemption were met and must submit a final report summarizing the results of this program by April 1, 1981.

(Sec. 18 as amended 92 Stat. 819; (7 U.S.C. 136))

Dated: January 9, 1981.

BILLING CODE 6560–32–M

[OPP–30194; PH–FRL 1731–8]

Dow Chemical Co.; Application To Register Pesticide Product Containing a New Active Ingredient

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Dow Chemical Co., has submitted an application to register the pesticide product LONTREL 205 HERBICIDE, which contains the active ingredient 2,4-dichlorophenoxyacetic acid as alkanolamine (salts of the ethanol and isopropanol series) at 32.2 percent and 3,6-dichloro-2-pyridinecarboxylic acid as alkanolamine (salts of the ethanol and isopropanol series) at 8.5 percent. The latter has not been included in any previously registered pesticide product.

DATE: Written comments must be received on or before February 20, 1981.

ADDRESS: Written comments to: Richard F. Mountfort, Product Manager (PM) 23, Registration Division (TS–767), Office of Pesticide Programs, Rm. E–351, 401 M St. SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Richard F. Mountfort (202–755–1397).

SUPPLEMENTARY INFORMATION: Dow Chemical, USA, Agricultural Products Dept., P.O. Box 1706, Midland, MI 48640, has submitted an application to register the herbicide product LONTREL 205 HERBICIDE (EPA File Symbol 464–LAG) containing the active ingredient 2,4-dichlorophenoxyacetic acid as alkanolamine (salts of the ethanol and isopropanol series) at 32.2 percent and 3,6-dichloro-2-pyridinecarboxylic acid as alkanolamine (salts of the ethanol and isopropanol series) at 8.5 percent. The proposed classification is for general use.

The application is made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136) and the regulations thereunder (40 CFR 162.6). Notice of receipt of this application does not indicate a decision by the agency on the application. Interested persons are invited to submit written comments on the application referred to in this notice.

Notice of approval or denial of this application will be announced in the **Federal Register**. Except for such material protected by section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136) and the regulations thereunder (40 CFR 162.6), the test data and other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedure for requesting such data will be given in the **Federal Register** if an application is approved.

(Sec. 3(c), 86 Stat. 972; (7 U.S.C. 136a))

Dated: January 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–32–M

[OPTS—62011; TSH FRL 1681–3]

Fully Halogenated Chlorofluorocarbons; Denial of Exemption for the Propellant Use of Chlorofluorocarbons in Spray Adhesives

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is denying a request for an essential use exemption to the chlorofluorocarbon (CFC) rule for the use of CFCs in spray adhesives.

FOR FURTHER INFORMATION CONTACT: John B. Ritch, Jr., Director, Industry Assistance Office, Office of Toxic Substances, (TS–799), Environmental Protection Agency, 401 M St., SW, Washington, D.C. 20460, Toll Free (800–424–9065), In Washington, DC: (554–1404).

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency (EPA) promulgated a rule under 40 CFR Part 762, which prohibited almost all manufacturing, processing, and distribution in commerce of fully halogenated chlorofluoroalkanes (hereinafter referred to as chlorofluorocarbons) for aerosol propellant uses, published in the Federal Register of March 17, 1978 (43 FR 11318). The Agency granted exemptions for aerosol propellant uses which were determined to be essential.

The manufacturer of "Tax Wax Spray Adhesive," an aerosol propellant used in the graphic arts industry, has petitioned EPA to grant an essential use exemption for his product. The manufacturer contends that the product is a unique spray wax adhesive used in the graphic arts and further contends he cannot produce the spray wax without CFCs. Because hot wax is used in the formulation of "Tax Wax," a nonflammable proellant must be used; the manufacturer has not been able to adapt his formulation to any propellant besides chlorofluorocarbons.

The process EPA uses in evaluating applications for essential use exemptions is described in "Essential Use Determinations—Revised", a support document to the March 17, 1978 rule. In making these determinations, EPA considers the availability or nonavailability of substitutes, the possibility of severe economic hardship if the use of CFC is not allowed, and the health and environmental consequences of use of another product in place of CFCs. Decisions to grant or deny exemptions are based on all these criteria. In particular, the nonavailability of an alternative by itself does not qualify a product for an essential use exemption.

There are a number of aerosol spray adhesives and nonaerosol wax coaters currently on the market. Although these adhesives may not be perfect substitutes for "Tax Wax," EPA cannot grant an exemption on that basis. For EPA to grant an essential use exemption in this case, removal of the product would have to result in adverse economic, environmental or human health impacts. However, there is no evidence that adverse impacts are occurring or that they will occur if the product remains off the market.

For the above reasons, the request is denied.

Dated: January 12, 1981.

Douglas M. Costle,

Administrator.

[FR Doc. 81-2031 Filed 1-19-81; 8:45 am]

BILLING CODE 6560-31-M

[OPTS-62012; TSH-FRL 1681-4]

Fully Halogenated Chlorofluorocarbons; Denial of Exemption for Use of Chlorofluorocarbons in Aerosol Sprays To Produce Smoke or Fog

AGENCY: Environmental Protection Agency, (EPA).

ACTION: Notice.

SUMMARY: EPA is denying a request for an essential use exemption to the chlorofluorocarbon (CFC) rule for the use of CFCs in aerosol sprays to produce smoke or fog.

FOR FURTHER INFORMATION CONTACT: John B. Ritch, Jr., Director, Industry Assistance Office, Office of Toxic Substances, (TS-799), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, Toll Free (800-424-9065), In Washington, D.C.: (554-1404).

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency (EPA) promulgated a rule, under 40 CFR Part 762, which prohibited almost all manufacturing, processing, and distribution in commerce of fully halogenated chlorofluoroalkanes (hereinafter referred to as chlorofluorocarbons) for aerosol propellant uses, published in the Federal Register of March 17, 1978 (40 CFR 762; 43 FR 11318). The Agency granted exemptions for aerosol propellant uses which were determined to be essential.

The distributor of "Fog Juice", an aerosol propellant used to generate fog for theatrical productions, has petitioned EPA to grant an essential use exemption for this use. EPA previously considered this use before publishing the final rule and determined that the use was not essential. EPA had denied this request on the basis that removal of this product without replacement by an alternative would have no known adverse impacts on environmental quality, human health, and safety. Also, EPA believed that an acceptable carbon dioxide-propelled product could be developed and that the economic impact of substitution of another product would be slight. (See "Essential Use Determinations—Revised", p. C-9.) After reevaluation, the Agency still considers the use to be nonessential.

"Fog Juice" is a mixture of chlorofluorocarbon aerosol propellant and mineral oil. The aerosol can is connected to a machine containing a hot plate. The mineral oil is propelled into the hot plate where it is vaporized and becomes smoke. The equipment can be operated by remote control.

Companies supporting the exemption request contend that the theatrical industry needs the fog machine for their special effects, that the industry would sustain sizable costs in set redesign if they could not use the fog machines, and that the available alternatives are not adequate substitutes. The fog machine has the unique characteristics of being portable, capable of being operated by remote control, and capable of dissipating a fine mist that rises quickly.

The two available alternatives, the "Mole-Richardson" machine and dry ice, are either expensive and nonportable in the former instance, or create a different low level fog effect unlike that achieved with the fog machine in the latter instance. A third alternative which was cited in EPA's "Essential Use Determinations—Revised" was that of a carbon dioxide-propelled product. However, the aerosol filler of "Fog Juice" was unable to pressurize the Fog Juice aerosol product with carbon dioxide.

Because the development of the carbon dioxide substitute did not occur as EPA thought, the company requested that EPA reconsider this request on the basis of the essential use criteria defined in the "Essential Use Determinations—Revised," the support document to the March 17, 1978 rule. The review process described in this document is as follows. EPA first considers whether or not an alternative propellant or nonaerosol product is available. If an alternative propellant is available, the use is determined to be nonessential. If an adequate alternative product is not available, which the company requesting the exemption contends in the instance, EPA then asks whether the environmental/health and economic impacts of its removal are acceptable. If they are, the use is determined to be nonessential. It is important to note that the absence of an available alternative does not alone qualify a product for an essential use exemption.

Although the carbon dioxide-propelled substitute could not be developed, alternative products do exist. These may not be perfect substitutes. However, even if no substitute existed, EPA would grant the exemption only if the health, environmental and economic impacts of its removal were unacceptable. EPA indicated in denying the original request that use of substitute products would have no known impacts on environmental quality, human health and safety. No new evidence has been presented that would lead EPA to revise this conclusion. In addition, since fog scenes are used infrequently in theater productions, there is no reason to believe that the economic impact of set redesign will result in significant overall injury to these productions.

For the above reasons, the request is denied.

Dated: January 12, 1981.

Douglas M. Costle,

Administrator.

BILLING CODE 6560-31-M

[OPP-180550; PH FRL 1732-7]

Idaho and Oregon; Issuance of Specific Exemptions for Napropamide on Mint

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions to the Idaho and Oregon Departments of Agriculture (hereafter referred to as "Idaho," "Oregon," or the "Applicants") to use napropamide on up to 10,000 acres of mint in Idaho and

3,000 acres of mint in Oregon. The specific exemptions are issued under the Federal Insecticide, Fungicide, and Rodenticide Act.

DATE: The specific exemptions expire on March 1, 1981.

FOR FURTHER INFORMATION CONTACT: Libby Welch, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Rm. E-124, Washington, D.C. 20460 (202-426-0223).

SUPPLEMENTARY INFORMATION: According to the Applicants, annual grasses are serious weed pests in mint. Weed competition during the growing season reduces yields and the quality of the oil and affects recovery of the mint after harvest to the extent that the crop is weakened. This results in winter kill and poor stands of mint the succeeding year. The Applicants state that populations of annual grasses increased dramatically in 1979. The Applicants claim that currently registered herbicides either provide inadequate control or are phytotoxic to the furrow-irrigated mint grown in these areas. Data indicate that napropamide would be an effective alternative for control of annual grasses in mint.

Idaho estimates that uncontrolled annual grass infestations could result in a loss of $1 million to Idaho mint growers and Oregon estimates losses of from $300,000 to $1.5 million without the use of napropamide.

The Applicant plans to make a single application of Devrinol 50-WP (napropamide) using ground equipment. 40,000 lbs. active ingredient (a.i.) in 20 to 100 gallons of water per acre will be used to treat approximately 10,000 acres of furow-(rill) irrigated mint in Idaho and 12,000 lbs. a.i. to treat 3,000 acres of furrow-irrigated mint in Malheur County, Oregon.

EPA has determined that residues of napropamide (N,N-diethyl-2-(1-naphthalenyloxy)propionamide) from the proposed use are not expected to exceed 0.1 part per million (ppm) in the fresh mint hay, oil, and spent mint hay. This residue level has been judged adequate to protect the public health. While EPA is unable to evaluate the hazard to applicators because of existing data gaps, it has been determined that there will be negligible incremental risk associated with this specific exemption since: (1) Devrinol 50-WP has been registered for a number of years for use on citrus, nuts, pome fruits, small fruits, stone fruits, vegetables, and tobacco without development of any known applicator hazards; (2) most registered uses involve the same rates and mixing and application technique as recommended in this requested use on mint; (3) the product is not restricted; and (4) treatment of the requested acreage will result in negligible applicator exposure when compared to the acreage planted to crops for which Devrinol 50-WP is registered. The proposed use should not pose an unreasonable hazard to the environment.

After reviewing the applications and other available information, EPA has determined that the criteria for exemptions have been met. Accordingly, the Applicants have been granted specific exemptions to use the pesticide noted above until March 1, 1981, to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. Use of the product Devrinol 50-WP, EPA Reg. No. 476-2108, manufactured by Stauffer Chemical Co., is authorized. If an unregistered label is used, it must contain the identical applicable precautions and restrictions which appear on the registered label.

2. A single application of Devrinol will be made by ground equipment at a maximum rate of 4 pounds a.i. in 20 to 100 gallons of water per acre in Idaho and 3 to 4 pounds a.i. in 25-100 gallons of water per acre in Oregon.

3. A maximum of 10,000 acres may be treated in Idaho and 3,000 acres in Oregon.

4. A maximum of 40,000 pounds a.i. may be applied in Idaho and 12,000 in Oregon.

5. All applications will be made by State-licensed commercial applicators or certified growers.

6. All applicable directions, restrictions, and precautions on the EPA-registered product label must be followed.

7. Devrinol 50-WP must be kept out of lakes, streams, and ponds. It may not be applied where excessive runoff is likely to occur. Care must be taken to prevent contamination of water by the cleaning of equipment or disposal of wastes and excess pesticides.

8. This pesticide may not be applied in the vicinity of apiaries nor may it be allowed to drift to weeds in bloom on which significant numbers of bees are actively foraging.

9. Treatment of mint as proposed should not result in residues of napropamide exceeding 0.1 ppm in or on fresh mint hay, oil, and spent mint hay. These commodities with residues not exceeding that level may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health and Human Services, has been advised of this action.

10. The EPA shall be immediately informed of any adverse effects resulting from the use of this pesticide in connection with these exemptions.

11. Each of the Aplicants shall be responsible for assuring that all provisions of its specific exemption are met and must submit a report summarizing the results of this program by September 1, 1981.

(Sec. 18 as amended 92 Stat. 819; (7 U.S.C. 136))

Dated: January 9, 1981.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

BILLING CODE 6560-32-M

[A-10-FRL 1730-7]

Issuance of PSD Permit to the Weyerhaeuser Company

Notice is hereby given that on January 5, 1981, the Environmental Protection Agency issued a Prevention of Significant Deterioration (PSD) permit to the Weyerhaeuser Company for approval to construct a coal/wood-fired power boiler at the Longview, Washington facility.

This permit has been issued under EPA's Prevention of Significant Air Quality Deterioration (40 CFR Part 52.21) regulations subject to certain conditions, including:

1. Emissions of nitrogen oxides (NO_x) shall not exceed the following:

Emission Limitations

Source and concentration	Tons/year
Power boiler No. 12—0.6 lb/10^6 Btu on a 30-day rolling average	3,260

2. With the exception of NO_x, increases in potential emissions of any pollutant regulated under the Clean Air Act resulting from this operation will be less than 250 tons per year.

Under section 307(b)(1) of the Clean Air Act, judicial review of the PSD Permit is available *only* by the filing of a petition for review in the Ninth Circuit Court of Appeals within 60 days of today. Under Section 307(b)(2) of the Clean Air Act, the requirements which are the subject of today's notice may *not* be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

Copies of the permit are available for public inspection upon request at the following location EPA, Region 10, 1200 Sixth Avenue, Room 11C, Seattle, Washington 98101.

Dated: January 12, 1981.

Donald P. Dubois,

Regional Administrator.

BILLING CODE 6560-38-M

[OPP-50518; PH-FRL 1732-2]

Extension of Experimental Use Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA has issued extensions of experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product Manager (PM) 25, Registration Division, (TS-767), Office of Pesticide Programs, Environmental Protection Agency, Rm. E-359, 401 M St. SW., Washington, D.C. 20460 (202-755-2196).

SUPPLEMENTARY INFORMATION: EPA has extended the following experimental use permits:

524-EUP-47. Monsanto Co., 1107 17th St. NW., Washington, D.C. 20036. This experimental use permit allows the use of the remaining amount of glyphosate on stone fruit to evaluate control of weeds. A total of 2,080 acres are involved. This program is effective from April 16, 1981 to April 16, 1982. The program is authorized only in the States of Alabama, Arkansas, California, Georgia, Idaho, Illinois, Indiana, Michigan, Missouri, New Jersey, New York, North Carolina, Ohio, Oregon, Pennsylvania, South Carolina, Tennessee, Utah, Virginia, Washington, West Virginia, and Wisconsin. A permanent tolerance for residues of glyphosate on stone fruit has been established (40 CFR 180.364).

21137-EUP-3. EM Laboratories, Inc., Elmsford NY 10523. This experimental use permit allows the use of 75 pounds of the plant growth regulator methyl 2-chloro-9-hydroxyfluorene-9-carboxylate, methyl-9-hydroxyfluorene-9-carboxylate, and methyl 2, 7-dichloro-9-hydroxyfluorene-9-carboxylate on cucumbers to evaluate its ability to induce seedless fruit in all-female cultivars of pickling cucumbers. A total of 750 acres are involved. The program is authorized only in the States of Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Maryland, Massachusetts, Michigan, Minnesota, New York, North Carolina, Ohio, South Carolina, Texas, and Wisconsin. The program is effective from March 19, 1981 to March 19, 1982. A temporary tolerance for residues of the plant growth regulator has been extended.

Persons wishing to review the experimental use permits are referred to the Product Manager's office. Inquiries regarding these permits should be directed to the person givern above. It is suggested that persons call before visiting the EPA headquarters office, so that the appropriate file may be made available for inspection from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

(Sec. 5, 92 Stat. 819 as amended, (21 U.S.C. 136))

Dated: January 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-32-M

[OPTS-51202; TSH—FRL 1732-3]

1,6-Hexanediamine, Distillation Residues—Amines, C_{4-6} Alkyl Di—and C_6Cyclic Di—Dichloroethane—Epichlorohydrin Polymer; Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the Federal Register certain information about each PMN within 5 working days after receipt. This Notice announces receipt of a PMN and provides a summary.

DATE: Written comments by February 15, 1981.

ADDRESS: Written comments to: Document Control Officer (TS-793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-447, 401 M St., SW., Washington, D.C. 20460, (202-755-8050).

FOR FURTHER INFORMATION CONTACT: Kirk Maconaughey, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-240, 401 M St., SW., Washington, D.C. 20460, (202-426-3936).

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA (90 Stat. 2012 (15 U.S.C. 2604)1, requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notices of availability of the Inventory were published in the Federal Register of May 15, 1979 (44 FR 28558—Initial) and July 29, 1980 (45 FR 50544—Revised). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the Federal Register issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the Federal Register of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the Federal Register nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the Federal Register.

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended Federal Register notice. EPA

immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) **Federal Register** notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the **Federal Register.**

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance, he must report to EPA, and the Agency will add the substance to the Inventory. After the substance is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

Interested persons may, on or before January 30, 1981, submit to the Document Control Officer (TS–793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–447, 401 M St., SW., Washington, D.C. 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS–51202]". Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: January 14, 1981.

Edward A. Klein,

Director, Chemical Control Division.

PMN 80–343

The following information is taken from data submitted by the manufacturer in the PMN.

Close of Review Period. March 1, 1981.

Manufacturer's Identity. Monsanto Company, 800 N. Lindbergh Boulevard, St. Louis, MO 63166.

Specific Chemical Identity. Claimed confidential business information. Generic name provided: 1,6-Hexanediamine, distillation residues—amines, C_{4-6} alkyl di- and C_6 cyclic di—dichloroethane—epichlorohydrin polymer.

Use. Corrugated medium in paperboard manufacture.

Production Estimates

1981—300,000 kg.
1982—450,000 kg.
1983—700,000 kg.

Physical/Chemical Properties

Viscosity—40–80 cps, typical.

Freezing point—25°F (−4°C) freeze/thaw stable.

Weight per gallon—9.25 lb/gal.

Solids—35±1%.

pH—4.5±0.5

Molecular weight—10–40K estimates.

Toxicity Data

Oral LD_{50}, single (rabbit)—6,060 mg/kg.

Dermal LD_{50}, single (rabbit)—5,000 mg/kg.

Skin irritation (rabbit)—Non-irritating. Irritation score of 0.6 on a scale of 8.

Eye irritation (rabbit)—Slightly irritating. Score of 5.2 on a scale of 110.

LC_{50} acquatic species:

Rainbow trout, 96 hr—0.26 mg/1.

Bluegill sunfish, 96 hr—0.24 mg/1.

Daphnia magna, 48 hr—0.26 mg/1.

Exposure. The manufacturer states that the manufacturing process will be in a closed system and no worker exposure is anticipated.

Users' sites. Monsanto estimates 15–20 users with 20–30 workers each site will be involved. The submitter states that dermal exposure as a result of spills, and inhalation due to evaporation of vapors of the impurities from closed storage tanks may be possible.

Environmental Release/Disposal. The manufacturer states that assuming no inadvertent spills occur, there is no disposal of the new polymer at the manufacturing site and that an environmentally insignificant amount of the polymer will be released into settling ponds after use of the product in paper manufacture.

[FR Doc. 81–2024 Filed 1–19–81; 8:45 am]

BILLING CODE 6560–31–M

[PP 1G2431/T280; PH FRL 1731–7]

Rohm and Haas Co.; Establishment of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice establishes a tolerance for residues of the chemical hybridizing agent potassium (1-(p-cholorphenyl)-1,4-dihydro-6-methyl-4-oxopyridazine-3-carboxylate and related metabolites in or on wheat (second generation; grown-out of the hybrid seed) at 1 part per million (ppm).

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, Rm. E–359, 401 M St. SW., Washington, D.C. 20460, (202–755–2196).

SUPPLEMENTARY INFORMATION: EPA has established a temporary tolerance for the chemical hybridizing agent potassium (1-(p-cholorphenyl)-1,4-dihydro-6-methyl-4-oxopyridazine-3-carboxylate and related metabolites in or on wheat (second generation; grown-out of the hybrid seed) at 1 part per million. This tolerance was requested by Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105 (PP 1G2431).

This temporary tolerance will permit the marketing of the above raw agricultural commodity treated in accordance with the experimental use permit 707–EUP–95, which is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and all other relevant material have been evaluated, and it has been determined that the temporary tolerance will protect the public health. Therefore, the temporary tolerance is being established on the condition that the experimental use permit and temporary tolerance be used with the following provisions:

1. The total amount of the pesticide to be used must not exceed the amount authorized in the experimental use permit.

2. Rohm and Haas Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company will also keep records of production, distribution, and performance, and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary tolerance expires on October 18, 1981. Residues not in excess of the amount remaining in or on the raw agricultural commodity after the expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary

tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health.

(Sec. 408(j), 68 Stat. 561, (21 U.S.C. 346a(j)))

Dated: January 13, 1981.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[FR Doc. 81-2020 Filed 1-19-81; 8:45 am]

BILLING CODE 6560-32-M

[PP 7G1939/T279; PH FRL 1731-5]

Uniroyal Chemical; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for residues of the defoliant and dessecant 2, 3-dihydro-5, 6-dimethyl-1, 4-dithiin-1, 1, 4, 4-tetraoxide in or on cotton at 0.2 part per million (ppm) and potatoes at 0.1 ppm.

FOR FURTHER INFORMATION CONTACT: Robert J. Taylor, Product manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, Rm. E-359, 401 M St. SW., Washington, D.C. 20460, (202-755-2196).

SUPPLEMENTARY INFORMATION: Uniroyal Chemical, Division of Uniroyal Inc., 74 Amity Rd., Bethany, CT 06525, submitted a pesticide petition (PP 7G1939) to the EPA. The petition requested that temporary tolerances be established for residues of the defoliant and dessicant 2, 3-dihydro-5, 6-dimethyl-1, 4-dithiin-1, 1, 4, 4-tetraoxide in or on cotton at 0.2 ppm and potatoes at 0.1 ppm.

These tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit (400-EUP-53) which has been issued under the Federal Insecticide, Fungicide, and Rodenticide Act (92 Stat. 819, 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerances would protect the public health. The temporary tolerances have been established on the condition that the experimental use permit be used with the following provisions:

1. The total amount of the active defoliant to be used will not exceed the quantity authorized by the experimental use permit.

2. Uniroyal Chemical will immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company will also keep records of production, distribution, and performance, and on request make the records available to any authorized officer of employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire July 8, 1981. Residues not in excess of the temporary tolerances remaining in or on the above raw agricultural commodities after expiration of these tolerances will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health.

(Sec. 408(j), 68 Stat. 561, (21 U.S.C. 346a(j)))

Dated: January 13, 1981.

FEDERAL DEPOSIT INSURANCE CORPORATION

Farmers Bank of the State of Delaware; Dover, Delaware; Suspension of Trading

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Order.

DATES: Effective Midnight (E.S.T.) January 14, 1981 through Midnight January 15, 1981.

FOR FURTHER INFORMATION CONTACT: Patrick J. Moses, Chief, Registration and Disclosure Section, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429. (202) 389-4651.

SUMMARY: It appearing to the Federal Deposit Insurance Corporation that the summary suspension of trading in the common stock of the Farmers Bank of the State of Delaware, Dover, Delaware being traded otherwise than on a national securities exchange, is required in the public interest and for the protection of investors;

Therefore, pursuant to Sections 12(i) and 12(k) of the Securities Exchange Act of 1934, trading in such securities otherwise than on a national securities exchange is suspended for the period beginning at Midnight (E.S.T.) on January 14, 1981 through Midnight January 15, 1981, unless earlier terminated.

By order of the Board of Directors, January 14, 1981.

Federal Deposit Insurance Corporation.

BILLING CODE 6714-01-M

FEDERAL RESERVE SYSTEM

Hawkeye Bancorporation; Acquisition of Bank

Hawkeye Bancorporation, Des Moines, Iowa, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of Cedar River Bancorporation, Cedar Rapids, Iowa, a one bank holding company which owns 91.35 percent of the voting shares of United State Bank, Cedar Rapids, Iowa. Applicant will also acquire directly 8.65 percent of the voting shares of United State Bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than February 9, 1981. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, January 12, 1981.

Jefferson A. Walker,

Assistant Secretary of the Board.

[FR Doc. 81-1658 Filed 1-19-81; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The bank holding company listed in this notice has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been

determined by the Board of Governors to be closely related to banking.

With respect to this application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on this application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for the application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than February 9, 1981.

A. *Federal Reserve Bank of Atlanta* (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

First Mississippi National Corporation, Hattiesburg, Mississippi (finance company activities; Mississippi): to engage through *de novo* offices of its subsidiary Bienville Finance Company, in the making of loans to persons, partnerships, corporations and other legal entities, taking security therefor as appropriate, such as would be done by a finance company. These activities will be conducted from offices in Hattiesburg, Jackson, and Biloxi, Mississippi, serving Mississippi.

B. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, January 14, 1981.

Jefferson A. Walker,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Transmittal Rules; Early Termination of the Waiting Period of the Premerger Notification Rules

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the waiting period of the premerger notification rules.

SUMMARY: El Corte Ingles, S.A. is granted early termination of the waiting period provided by law and the premerger notification rules with respect to the proposed acquisition of all stock of the Harris Corporation. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by both. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: January 7, 1981.

FOR FURTHER INFORMATION CONTACT: Roberta Baruch, Senior Attorney, Premerger Notification Office, Bureau of Competition, Room 303, Federal Trade Commission, Washington, D.C. 20580 (202-523-3894).

SUPPLEMENTARY INFORMATION: Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

By direction of the Commission.

Carol M. Thomas,

Secretary.

[FR Doc. 81-2102 Filed 1-19-81; 8:45 am]

BILLING CODE 6750-01-M

GENERAL ACCOUNTING OFFICE

Regulatory Reports Review; Receipt of Report Proposal

The following request for clearance of report intended for use in collecting information from the public was accepted by the Regulatory Reports Review Staff, GAO, on January 13, 1981. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the **Federal Register** is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FCC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before February 9, 1981, and should be addressed to Mr. John M. Lovelady, Senior Group Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, N.W., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

Federal Communications Commission

The FCC requests clearance of a new, voluntary Form 201 on Emergency Broadcast System Activation which will be sent to a possible 10,000 broadcasters. The form seeks information regarding when broadcast stations activate the Emergency Broadcast System and for what reason. The FCC states that the information will be used to assess the success of the Emergency Broadcast System Activation Program and will pinpoint what areas of the country need further assistance to develop their local Emergency Broadcast System. The form is a postcard. The card provides space for multiple entries in cases where several activations may occur within one day or other short periods of time, enabling the station to submit only one card. The FCC estimates approximately 5 minutes will be the average time required to complete the form.

Norman F. Heyl,

Regulatory Reports, Review Officer.

BILLING CODE 1610-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources Administration

Advisory Council and Subcommittee; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of February 1981:

Name: National Guidelines and Technology Subcommittee of the National Council on Health Planning and Development.

Date and Time: Thursday, February 5, 1981; 9:00 a.m.-5:00 p.m.

Place: Conference Rooms 308A-305A, H. H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

Open for entire meeting.

Purpose: The mission of the National Guidelines and Technology Subcommittee is to advise the Council on the formulation, adjustment, and refinement of the National Guidelines for Health Planning. The Guidelines include standards respecting the appropriate supply, distribution, and organization of health resources and a statement of national health planning goals. In the formulation of its recommendations to the Council, the Subcommittee will take into consideration National Health Priorities outlined in Pub. L. 96-79, include an evaluation of the implications of new medical technology for the organization, delivery and distribution of health care services, and evaluate factors related to improved productivity of the health care delivery system.

The Subcommittee will study the experience nationwide in the public and private sectors with the adoption and/or adjustment of the National Guidelines; study the experience of HSAs and SHPDAs in implementation of high priority goals and subgoals; investigate and coordinate information on relevant demonstrations by provider, reimbursement, regulatory, labor,

industry and community groups such as those on alcoholism and prevention; study, investigate and identify research needs; study and develop improved indicators to assess the impact of the guidelines and the need for revisions; and review technology assessment activities related to productivity in the health care field in order to assure they are relevant to the HSAs and are useful in the development and implementation of the National Guidelines.

Agenda: Update on data collection and reporting activities relating to the National Guidelines on Health Planning; review of comments on the National Health Planning Goals issuance of November 25, 1980; consideration of revisions in resource standards, including proposed standard on psychiatric services and others under study; and follow-up on the Institute of Medicine Study on National Guidelines development.

Name: Implementation and Administration Subcommittee of the National Council on Health Planning and Development.

Date and Time: Thursday, February 5, 1981; 9:30 a.m.–5:00 p.m.

Place: Room 1137, HHS North Building, 330 Independence Avenue, S.W., Washington, D.C. 20201.

Open for entire meeting.

Purpose: The objective of the Implementation and Aministration Subcommittee is to study and make recommendations in the implementation and administration of Titles XV and XVI: of the Public Health Service Act. Specific areas for the Subcommittee's consideration are (1) the impact of HHS's implementation and administration on the effectiveness of Health Systems Agencies (HSA) and State Health Planning and Development Agencies (SHPDA); (2) the effectiveness of the interrelationships between health planning agencies and HHS, Central and Regional Offices; (3) the timing and strategy of implementation and of the dissemination and distribution of regulatory and technical material; (4) how to better meet the needs of HSAs and SHPDAs; (5) the review of the Council's responsibilities under section 1122 of the Social Security Act; and (6) the review of the Council's responsibilities related to proposed terminations and/or non-renewals of HSAs and SHPDAs under sections 1515(c) and 1521(b) of the PHS Act.

Agenda: Section 1122 review; consideration of paper on consumer participation in health planning; and discussion of the health planning program of the future.

Name: National Council on Health Planning and Development.

Date and Time: Friday, February 6, 1981; 8:45 a.m.–3:30 p.m.

Place: Auditorium, H. H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

Open for entire meeting.

Purpose: The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to (1) the development of national guidelines under section 1501 of Pub. L. 93–641, (2) the implementation and administration of Title XV and XVI of Pub. L. 93–641, and (3) an evaluation of the implications of new medical technology for the organization, delivery and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that health care facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda: Status reports from Health Resources Administration officials; reports and recommendations from the Subcommittee on National Guidelines and Technology and the Subcommittee on Implementation and Administration; and consideration of the health planning program of the future.

Anyone requiring information regarding the subject Council should write to or contact Mrs. S. Judy Silsbee, Executive Secretary, National Council on Health Planning and Development, Health Resources Administration, Room 10–27, Center Building, 3700 East-West Highway, Hyattsville, Maryland 20782. Telephone (301) 436–7175.

Agenda items are subject to change as priorities dictate.

Dated: January 14, 1981.

Irene D. Skinner,

Advisory Committee Management Officer, HRA.

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Clinical Cancer Program Project and Cancer Center Support Review Committee (Cancer Center Support Review Subcommittee), National Cancer Institute, March 19-20, 1981, Building 31C, Conference Room 6, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public on March 19, from 8:30 a.m. to 10:00 a.m., to review administrative details. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, the meeting will be closed to the public on March 19, from 10:00 a.m. to 6:00 p.m., and on March 20, from 8:30 a.m. to adjournment, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20205 (301/496-5708) will provide summaries of the meetings and rosters of committee members, upon request.

Dr. Robert L. Manning, Executive Secretary, National Cancer Institute, Westwood Building, Room 803, National Institutes of Health, Bethesda, Maryland (301/496-7721) will furnish substantive program information.

(Catalog of Federal Domestic Assistance Number 13.397, project grants in cancer center support, National Institutes of Health.)

(NIH programs are not covered by OMB Circular A-95 because they fit the description of "programs not considered appropriate" in section 8(b) (4) and (5) of that Circular.)

Dated: January 13, 1981.

Suzanne L. Fremeau,

Committee Management Officer, NIH.

BILLING CODE 4110-08-M

General Clinical Research Centers Committee; Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the General Clinical Research Centers Committee, Division of Research Resources, February 23-24, 1981. The meeting will be held in Conference Room 8, Building 31, National Institutes of Health, Bethesda, Maryland 20205.

The meeting will be open to the public on February 23, 1981, from 9:00 a.m. to approximately 11:00 a.m., to discuss administrative matters. Attendance by the public will be limited to space available. In accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub L. 92-463, the meeting will be closed to the public on February 23, 1981, from approximately 11:00 a.m. to recess and on February 24, 8:30 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mr. James Augustine, Informatin Officer, Division of Research Resources, Bldg. 31, Rm. 5B-13, National Institutes of Health, Bethesda, Maryland 20205, (301) 496-5545 will provide summaries of the meeting and rosters of the Committee members. Dr. Ephraim Y. Levin, Executive Secretary of the General Clinical Research Centers Review Committee, Bldg. 31, Rm. 5B51 National Institutes of Health, Bethesda, Maryland 20205, (301) 496-6595, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program No. 13.333, Clinical Research, National Institutes of Health)

(NIH programs are not covered by OMB Circular A-95 because they fit the description of "programs not considered appropriate" in section 8(b)(4) and (5) of the Circular.

BILLING CODE 4110-08-M

Minority Access to Research Careers Review Committee; Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Minority Access to Research Careers Review Committee, National Institute of General Medical Sciences, National Institutes of Health, Building 31-C, Conference Room 7, on March 5-6, 1981, 9:00 a.m.

This meeting will be open to the public on March 5, 9:00 a.m. to 12:00 p.m. The meeting will consist of opening remarks and discussion of procedural matters. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463, the meeting will be closed to the public for approximately the last four hours of the day on March 5, and approximately four hours on March 6. It is estimated that this will occur from 1:00 p.m. to 5:00 p.m., on March 5, and on March 6 from 9:00 a.m. until adjournment for the review, discussion and evaluation of institutional and individual grant applications. These applications and the discussions could reveal personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Ellen Casselberry, Public Information Officer, NIGMS, Westwood Building, Room 9A-10, 5333 Westbard Avenue, Bethesda, Maryland 20205, telephone (301) 496-7301, will furnish summary minutes of the meeting and a roster of committee members.

Substantive program information may be obtained from Harriet L. Gordon, M.D., Executive Secretary, Westwood Building, Room 949, Bethesda, Maryland 20205, telephone (301) 496-7585.

(Catalog of Federal Domestic Assistance Program 13.880, Minority Access to Research Careers (MARC), National Institutes of Health, Department of Health and Human Services.)

(NIH programs are not covered by OMB Circular A-95 because they fit the description of "program not considered appropriate" in section 8(b) (4) and (5) of that Circular.)

BILLING CODE 4110-08-M

Research Grants; Division Meetings

Pursuant to Pub. L. 92-463, notice is hereby given of the meetings of the following study sectons for February through March 1981, and the individuals

from whom summaries of meetings and rosters of committee members may be obtained.

These meetings will be open to the public to discuss administrative details relating to Study Section business for approximately one hour at the beginning of the first session of the first day of the meeting. Attendance by the public will be limited to space available. These meetings will be closed thereafter in accordance with the provisions set forth in Sections 552b(c)(4) and 552(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Ms. Marian Oakleaf, Acting Chief, Grants Inquiries Office, Division of Research Grants, Westwood Building, National Institutes of Health, Bethesda, Maryland 20205, telephone area code 301–496–7441 will furnish summaries of the meetings and rosters of committee members. Substantive program information may be obtained from each Executive Secretary whose name, room number, and telephone number are listed below each study section. Anyone planning to attend a meeting should contact the Executive Secretary to confirm the exact meeting time. All times are A.M. unless otherwise specified.

Study section	February–March 1981 meetings	Time	Location
Allergy & Immunology: Dr. Morton Reitman, Rm. 320, Tel. 301–496–7380.	Mar. 21–14	8:30	Marriott Hotel, Bethesda, MD.
Applied Physiology & Orthopedics: Ms. Ileen E. Steward, rm. 350, Tel. 301–496–7581.	Mar. 11–14	1:00 p.m	Room 9, Bldg. 31C, Bethesda, MD.
Bacteriology & Mycology: Dr. Milton Gordon, Rm. 304, Tel. 301–496–7340.	Feb. 26–28	8:30	Holiday Inn, Bethesda, MD.
Behavorial Medicine: Dr. Joan Rittenhouse, Rm. 203, Tel. 301–496–7109.	Mar. 4–6	9:00	Georgetown Holiday Inn, Washington, DC.
Biochemical Endocrinology: Dr. Norman Gold, Rm. A–17, Tel. 301–496–7430.	Feb. 23–25	8:30	In-Town Motel, Chevy Chase, MD.
Biochemistry: Dr. Adolphus P. Toliver, Rm. 318, Tel. 301–496–7516	Mar. 4–7	8:30	Marriott Hotel, Bethesda, MD.
Bio-Organic & Natural Products Chemistry: Dr. Michael Rogers, Rm. A–27, Tel. 301–496–7107.	Feb. 23–25	9:00	Marriott Hotel, Bethesda, MD.
Biophysics & Biophysical Chemistry A: Dr. James C. Cassatt, Rm. 236, Tel. 301–496–7060.	Feb. 20–22	9:00	Hyatt House, Arlington, VA.
Biophysics & Biophysical Chemistry B: Dr. John B. Wolff, Rm. 236, Tel. 301–496–7070.	Feb. 18–20	8:30	Room 7, Bldg. 31C, Bethesda, MD.
Bio-Psychology: Dr. A. Keith Murray, Rm. 220, Tel. 301–496–7058	Feb. 23–26	9:00	Maryland Inn, Annapolis, MD.
Cardiovascular & Pulmonary: Dr. Constance E. Weinstein, Rm. 2A–04, Tel. 301–496–7316.	Mar. 4–6	8:00	Georgetown Holiday Inn, Washington, DC.
Cardiovascular & Renal: Dr. Rosemary S. Morris, Rm. 321, Tel. 301–496–7901.	Feb. 18–20	8:30	Holiday Inn, Bethesda, MD.
Cell Biology: Dr. Gerald Greenhouse, Rm. 306, Tel. 301–496–7681	Feb. 18–20	8:30	Room A, Landow Bldg., Bethesda, MD.
Chemical Pathology: Dr. Edmund Copeland, Rm. 353, Tel. 301–496–7078.	Feb. 17–19	8:00	Holiday Inn., Bethesda, MD.
Communicative Sciences: Dr. Michael Halasz, Rm. 226, Tel. 301–496–7550.	Mar. 4–6	8:30	Connecticut Inn., Washington, DC.
Diagnostic Radiology: Dr. Catherine Wingate, Rm. 219, Tel. 301–496–7650.	Feb. 23–25	8:30	Marriott Hotel, Bethesda, MD.
Endocrinology: Mr. Morris M. Graff, Rm. 333, Tel. 301–496–7346	Feb. 23–25	7:00 p.m.	Linden Hill Hotel, Bethesda, MD.
Epidemiology & Disease Control: Dr. Ann Schruederberg, Rm. 234, Tel. 302–496–7246.	Feb. 26–27	8:30	Ramada Inn, Bethesda, MD.
Experimental Cardiovascular Sciences: Dr. Richard Peabody, Rm. 310, Tel. 301–496–7940.	Feb. 24–26	8:00	Holiday Inn, Bethesda, MD.
Experimental Immunology: Dr. David Lavrin, Rm. 222, Tel. 301–496–7238.	Feb. 26–28	8:30	Marriott Hotel, Bethesda, MD.
Experimental Therapeutics: Dr. Anne R. Bourke, Rm. 319, Tel. 301–496–7839.	Feb. 25–28	12:30 p.m	Marriott Hotel, Bethesda, MD.
Experimental Virology: Dr. Eugene Zebovitz, Rm. 206, Tel. 301–496–7474.	Feb. 22–25	2:00 p.m	Room 8, Bldg. 31C, Bethesda, MD.
General Medicine A: Dr. Harold Davidson, Rm. 354, Tel. 301–496–7797.	Feb. 26–27	8:30	Room 8, Bldg. 31C, Bethesda, MD.
General Medicine B: Dr. Mischa Friedman, Rm. 322, Tel. 301–496–7730.	Mar. 4–7	8:30	Georgetown Holiday Inn, Washington, DC.
Genetics: Dr. David Remondini, Rm. 349, Tel. 301–496–7271	Feb. 19–21	9:00	Room 6, Bldg. 31C, Bethesda, MD.
Hematology: Dr. Clark Lum, Rm. 355, Tel. 301–496–7508	Feb. 26–28	8:30	In-Town Motel, Chevy Chase, MD.
Human Development: Dr. Miriam Kelty, Rm. 303, Tel. 301–496–7025	Mar. 8–11	8:30	Gramercy Inn, Washington, D.C.
Human Embryology & Development: Dr. Arthur Hoversland, Rm. 221, Tel. 301–496–7597.	Mar. 3–6	6:00 p.m	Ramada Inn, Bethesda, MD.
Immunobiology: Dr. William Stylos, Rm. 226, Tel. 301–496–7780	Mar. 4–6	8:30	Linden Hill Hotel, Bethesda, MD.
Immunological Sciences: Dr. Lottie Kornfeld, Rm. 233, Tel. 301–496–7179.	Feb. 25–27	8:30	Linden Hill Hotel, Bethesda, MD.
Mammalian Genetics: Dr. Halvor Aaslestad, Rm. 349, Tel. 301–496–7271.	Feb. 26–28	9:00	Room 6, Bldg. 31C, Bethesda, MD.
Medicinal Chemistry A: Dr. Ronald Dubois, Rm. A–27, Tel. 301–496–7107.	Feb. 25–27	9:00	Holiday Inn, Chevy Chase, MD.
Metabolism: Dr. Robert Leonard, Rm. 334, tel. 301–496–7091	Feb. 26–28	8:30	Room 10, Bldg. 31C, Bethesda, MD.
Metalliobiochemistry: Dr. Marjam Behar, Rm. 310, Tel. 301–496–7733	Feb 26–28	9:00	Rosslyn Westpark Hotel, Arlington, VA.
Microbial Physiology: Dr. Martin Slater, Rm. 238, Tel. 301–496–7183	Feb. 25–27	8:30	Ramada Inn, Bethesda, MD.
Molecular Biology: Dr. Donald Disque, Rm. 338, Tel. 301–496–7830	Feb. 19–21	8:30	United Inn, Bethesda, MD.
Molecular Cytology: Dr. Ramesh Nayak, Rm. 283, Tel. 301–496–7149	Feb. 26–28	8:30	Room 7, Bldg. 31C, Bethesda, MD.
Neurological Sciences: Dr. Edwin Bartos, Rm. 207, Tel. 301–496–7000.	Feb. 26–28	8:30	Sheraton Inn, Silver Spring, MD.
Neurology A: Dr. William Morris, Rm. 326, Tel. 301–496–7095	Mar. 11–14	9:00	Executive House Hotel, Washington, D.C.
Neurology B: Dr. Willard McFarland, Rm. A–25, Tel. 301–496–7422	Feb. 25–28	8:30	Mayflower Hotel, Washington, D.C.
Nutrition: Dr. John R. Schubert, Rm. 204, Tel. 301–496–7178	Feb. 25–27	8:30	Room 9, Bldg. 31C, Bethesda, MD.

Study section	February–March 1981 meetings	Time	Location
Oral Biology & Medicine: Dr. Thomas Tarpley, Jr., Rm. 325, Tel. 301–496–7818.	Feb. 23–26	8:30	Marriott Hotel, Bethesda, MD.
Pathobiological Chemistry: Dr. Clarice E. Gaylord, Rm. A–26, Tel. 301–496–7820.	Mar. 2–5	8:30	Room 8, Bldg. 31C, Bethesda, MD.
Pathology A: Dr. Harold Waters, Rm. 337, Tel. 301–496–7305	Mar. 10–13	8:00	Shoreham-Americana Hotel, Washington, DC.
Pathology B: Dr. Earl Fisher, Rm. 352, Tel. 301–496–7244	Mar. 11–13	8:30	Holiday Inn, Bethesda, MD.
Pharmacology: Dr. Joseph Kaiser, Rm. 206, Tel. 301–496–7408	Feb. 24–26	8:30	Holiday Inn, Bethesda, MD.
Physical Biochemistry: Dr. Jeanne Ketley, Rm. 218, Tel. 301–496–7120.	Feb. 26–28	9:00	Georgetwon Holiday Inn, Washington, DC.
Physiological Chemistry: Dr. Harry Brodie, Rm. 440, Tel. 301–496–7837.	Feb. 26–28	8:30	Rosslyn Westpark Hotel, Arlington, VA.
Physiology: Dr. Martin Frank, Rm. 209, Tel. 301–496–7878	Mar. 6–8	9:00	Sheraton Inn, Silver Spring, MD.
Radiation: Dr. Robert L. Straube, Rm. 219, Tel. 301–496–7073	Mar. 2–4	9:00	Holiday Inn, Chevy Chase, MD.
Reproductive Biology: Dr. Dharam Dhindsa, Rm. 307, Tel. 301–496–7318.	Feb. 17–20	8:30	Ramada Inn, Bethesda, MD.
Social Sciences & Population: Ms. Carol Campbell, Rm. 210, Tel. 301–496–7906.	Feb. 20–22	9:00	Georgetown Holiday Inn, Washington, DC.
Surgery, Anesthesiology & Trauma: Dr. Keith Kraner, Rm. 336, Tel. 301–496–7771.	Feb. 19–21	8:30	Holiday Inn, Bethesda, MD.
Surgery & Bioengineering: Dr. Joe Atkinson, Rm. 303, Tel. 301–496–7506.	Feb. 19–21	8:30	Holiday Inn, Bethesda, MD.
Toxicology: Dr. Raymong Bahor, Rm. 205, Tel. 301–496–7570	Feb. 25–27	8:30	Holiday Inn, Washington, DC.
Tropical Medicine & Parasitology: Dr. Betty June Myers, Rm. 203, Twl. 301–496–7494.	Feb. 26–28	8:30	Connecticut Inn, Washington, DC.
Virology: Dr. Claire Winestock, Rm. 309, Tel. 301–496–7605	Mar. 5–7	8:30	Room 6, Bldg. 31C, Bethesda, MD.

BILLING CODE 4110–08–M

Public Health Service

National Toxicology Program Board of Scientific Counselors; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Toxicology Program Board of Scientific Counselors, U.S. Public Health Service, in Building 31C, National Institutes of Health, Bethesda, Maryland, on February 18, 1981.

The meeting will be held in Conference Room 6, and will be open to the public from 9 a.m. until adjournment for the purpose of completing external peer reviews on draft technical reports of bioassays from the National Toxicology Program (NTP) Carcinogenesis Testing Program. Reviews will be conducted by the Technical Reports Review Subcommittee of the Board in conjunction with an *ad hoc* panel of experts.

Draft technical reports will be peer reviewed February 18 on the following chemicals (and routes of administration):

Chemical	Route
C.I. Acid Orange 10	Dosed feed.
11-Aminoundecsnoic acid	Do.
C.I. Disperse Yellow 3	Do.
D and C Red No. 9	Do.
C.I. Solvent Yellow 14	Do.
Eugenol	Do.
Vinylidine chloride	Gavage.
Agar agar	Dosed feed.
Guar gum	Do.
Gum Arabic	Do.
Gum Tara	Do.

The Executive Secretary, Dr. Larry G. Hart, Office of the Director, National Toxicology Program, P.O. Box 12233, Research Triangle Park, North Carolina 27709, telephone (919) 541–3989, FTS 629–3989, will furnish summary minutes of the reviews, rosters of Subcommittee and panel members, and other program information.

Dated: January 6, 1981.

David P. Rall, M.D., Ph.D.,

Director, National Toxicology Program.

BILLING CODE 4110–08–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N–81–1053]

Privacy Act of 1974; Proposed Amendment to System of Records

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of proposed amendment to existing system of records.

SUMMARY: The Department is giving notice that it intends to amend the following Privacy Act system of records: HUD/DEPT–64, Congregate Housing Services Program Data Files.

EFFECTIVE DATE: The amendment shall become effective without further notice 30 calendar days from the publication of this notice unless comments are received on or before that date which would result in a contrary determination.

ADDRESS: Rules Docket Clerk, Room 5218, Department of Housing and Urban Development 451 Seventh Street, SW., Washington, D.C. 20510.

FOR FURTHER INFORMATION CONTACT: Robert English, Department Privacy Act Officer, Telephone: 202–557–0605. This is not a toll free number.

SUPPLEMENTARY INFORMATION. The Department is modifying the Congregate Housing Services Program (CHSP) Data Files (HUD/DEPT–64). The system is being expanded to increase the categories of individuals covered to include: (1) A sample of individuals residing in non-grantee public housing and Section 202 projects; and (2) a

random sample of individuals residing in CHSP grantee projects who did not apply for CHSP. The proposed modification also increases the categories of records maintained on all individuals. The modification is being made to allow an evaluation of the program as requested by OMB and Congress. The evaluation will not affect the privacy of any individual and will not release information on individuals or provide information which identifies any individual in any way. Previously, the system was published at 45 FR 67621 (October 10, 1980). Appendix A, which lists the addresses of HUD's offices was published at 45 FR 67626 (October 10, 1980). A report of intent to amend this system of records was filed with the Speaker of the House, the President of the Senate, and the Director, Office of Management and Budget on December 16, 1980.

HUD/DEPT-64

System Name:

Congregate Housing Services Program Data Files.

System Location:

Headquarters and Offices of HUD Contractor.

Categories of Individuals Covered by System:

Congregate Housing Services Program (CHSP) participants and selected applicants and non-applicants residing in grantee public housing and Section 202 (elderly) projects; and selected individuals residing in non-grantee public housing and Section 202 projects.

Categories of Records in the System:

The files will contain the following records on CHSP participants: Name, project, file number, race/ethnic background, birthdate, sex, marital status, residential history and current living arrangement, number of minors residing, number of children/relatives nearby and family relationships, education, socioeconomic status (occupation/income), total housing expense, characteristics (special features) of the Housing unit, size of unit, sources of income and medical coverage, handicap type, disability type, medical status (recurrent/chronic medical problems) and hospitalization in past year, scores on activiites of daily living tests, level of informal service supports (family, friends, etc.), current and previous services received by program type (formal services), dates of services receipt, service needs assessment, moral scale and satisfaction with services and residential arrangements, mental status (primarily, disorientation for elderly and cognitive functioning for mentally retarded), emotional status, social interaction assessment (participation in formal and informal activities, and interpersonal skills), cost and usage of CHSP and other services, project admission date, CHSP application date, physical functioning/health status when entered project, current physical functioning/health status, physical functioning/health status at entry to CHSP, Professional Assessment Committee (PAC) determinations and recommended services, physical functioning/health status when left CHSP, date moved out of project, physical functioning/health status when moved out of project, new address/telephone (or contact person), name/telephone of physician, legal guardian, or family member.

The files will contain the following records on CHSP applicants who were not selected as participants: Name, project, file number, race/ethnic background, birthdate, sex, marital status, resident history and current living arrangement, number of minors residing, number of children/relatives nearby and family relationships, education, socio-economic status (occupation/income), total housing expense, characteristics (special features) of the housing unit, size of unit, sources of income and medical coverage, handicap type, disability type, medical status (recurrent/chronic medical problems) and hospitalization in past year, scores on activities of daily living tests, level of informal service supports (family, friends, etc.), current and previous services received by program type (formal services), dates of service receipt, service needs assessment, morale scale and satisfaction with services and residential arrangements, mental status (primarily, disorientation for elderly and cognitive functioning for mentally retarded), emotional status, social interaction assessment (participation in formal and informal activiites, and interpersonal skills), cost and usage of services, project admission date, physical functioning/health status when entered project, current physical functioning/health status, PAC determinations, date moved out of project, physical functioning/health status when moved out of project, new address/telephone (or contact person), name/telephone of physician, legal guardian, or family member.

The files will contain the following records on residents of CHSP projects who did not apply to the program and residents of non-CHSP projects: name, project, file number, race/ethnic background, birthdate, sex, marital status, residential history and current living arrangement, number of minors residing, number of children/relatives nearby and family relationships, education, socio-economic status (occupation/income), total housing expense, characteristics (special features) of the housing unit, size of unit, sources of income and medical coverage, handicap type, disability type, medical status (recurrent/chronic medical problems) and hospitalization in past year, scores on activities of daily living tests, level of informal service supports (family, friends, etc.), current and previous services received by program type (formal services), dates of service receipt, service needs assessment, morale scale and satisfaction with services and residential arrangements, mental status (primarily, disorientation for elderly and cognitive functioning for mentally retarded), emotional status, social interaction assessment (participation in formal and informal activities, and interpersonal skills), cost and usage of services, project admission date, physical functioning/health status when entered project, current physical functioning/health status, date moved out of project, physical functioning/health status when moved out of project, new address/telephone (or contact person), name/telephone of physician, legal guardian, or family member.

Authority for Maintenance of the System:

Title IV, Housing and Community Development Amendments of 1978 (Congregate Housing Services Act of 1978).

Routine Uses of Records Maintained in the System Including Categories of Users and the Purposes of Such Uses:

To HUD Contractor for conducting the evaluation.

Policies and Practices for Storing, Retrieving, Accessing, Retaining and Disposing of Records in the System:

Storage:

In file folders and on magnetic tape/disc/drum.

Retrievability:

Name, project, file number, race/ethnic background, birth date, sex, marital status, residential history and current living arrangement, number of minors residing, number of children/relatives nearby and family relationships, education, socio-economic

status (occupation/income), total housing expense, characteristics (special features) of the housing unit, size of unit, sources of income and medical coverage, handicap type, disability type, medical status (recurrent/chronic medical problems) and hospitalization in past year, scores on activities of daily living tests, level of informal service supports (family, friends, etc.), current and previous services received by program type (formal services), dates of service receipt, service needs assessment, morale scale and satisfaction with services and residential arrangements, mental status, emotional status, social interaction assessment (participation in formal and informal activities, and interpersonal skills), cost and usage of CHSP and other services, project admission date, CHSP application date, physical functioning/health status when entered project, current physical functioning/health status, physical functioning/health status at entry to CHSP, PAC determinations and recommended services, physical functioning/health status when left CHSP, date moved out of project, physical functioning/health status when moved out of project, new address/telephone (or contact person), name/telephone of physician, legal guardian, or family member.

Safeguards:

Manual files will be kept in lockable cabinets in a secured area, computer records will be maintained in a separate secured area. Access to either type of record will be limited to authorized personnel.

Retention and Disposal:

Manual and automated records are retained in accordance with officially approved mandatory standards contained in HUD handbooks 2225.6 and 2228.2.

System Manager and Address:

Director, Office of Consumer Affairs, NVACP, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410.

Notification Procedure:

For information, assistance, or inquiry about existence of records, contact the Privacy Act Officer at the Headquarters location, in accordance with 24 CFR Part 16. This location is given in Appendix A.

Record Access Procedures:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Act Officer at Headquarters. This location is given in Appendix A.

Contesting Record Procedures:

The Department's rules for contesting the contents of records and appealing initial denials, by the individual concerned, appear in 24 CFR Part 16. If additional information or assistance is needed, it may be obtained by contacting: (i) In relation to contesting contents of records, the Privacy Act Officer at the Headquarters location. This location is given in Appendix A; (ii) in relation to appeals of initial denials, the HUD Departmental Privacy Appeals Officer, Office of General Counsel, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410.

Record Source Categories:

Subject individuals, Professional Assessment Committee, Project Managers.

Authority: 5 U.S.C. 552a, 88 Stat. 1896; Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d))

Issued at Washington, D.C., January 12, 1981.

Vincent J. Hearing,

Deputy Assistant Secretary for Administration.

BILLING CODE 4310-84-M

INTERSTATE COMMERCE COMMISSION

Minority Participation in the Motor Carrier Industry

AGENCY: Interstate Commerce Commission.

ACTION: Notice of public meeting and issue paper.

SUMMARY: Among several new objectives, it is now a goal of the National Transportation Policy (Section 10101(a)(7)(g) of the Interstate Commerce Act as amended by the Motor Carrier Act of 1980) to promote greater participation by minorities in the motor carrier industry. Pursuant to the Act the Interstate Commerce Commission will hold public hearings in seven cities throughout the nation (1) to identify the nature and magnitude of the problems facing minorities seeking to obtain ICC authority or expand their operations, and (2) to assess any relationship between minority business under-representation within the surface transportation industry and lack of employment opportunities. An issue paper prepared by the Commission is included in this notice and describes the major issues involved in our inquiry. In addition to the public meetings written comments are also invited.

DATES: Written comments should be submitted on or before 60 days after the publication of this notice. An original and 15 copies (if possible) should be submitted to: Bernard Gaillard, Room 3385, Interstate Commerce Commission, Washington, D.C. 20423.

The schedule for the public hearings is as follows.

February 5, 1981

Baltimore, MD

Holday Inn Downtown, 301 West Lombard Street, Baltimore, MD 21201
ICC Contact Person: William Hughes, (301) 922–2560
Time: 10:30 a.m.

February 10, 1981

Cleveland, OH

Hotel Bond Court, 777 St. Clair Avenue, Cleveland, OH 44114
ICC Contact Person: Martin Monaghan, (216) 522–4000
Time: 9:00 a.m.

February 17, 1981

Chicago, IL

Best Roberts Motel, 301 63rd Street, Chicago, IL 60637
ICC Contact Person: Betty Gilliland, (312) 886–6463
Time: 9:00 a.m.

March 5, 1981

Newark, NJ

Robert Treat Hotel, 50 Park Place, Newark, NJ 07101
ICC Contact Person: Millie Stovall, (201) 645–3550
Time: 9:00 a.m.

March 13, 1981

Atlanta, GA

Admiral Benbow by the Airport, 1419 Virginia Avenue, Atlanta, GA 30337
ICC Contact Person: Sara Davis, (404) 881–2167
Time: 9:00 a.m.

April 3, 1981

New Orleans, LA

Fountain Bay, 4040 Tulane Avenue, New Orleans, LA 70119
ICC Contact Person: Bob Kirspel, (504) 682–6102
Time: 9:00 a.m.

April 6, 1981

Oakland, CA

California Public Utilities Commission, 111 Jackson Street, Assembly Room, Oakland, CA 94607
ICC Contact Person: Marga Deminne, (415) 764–7181
Time: 9:00 a.m.

PROCEDURE: The meetings will be conducted in an informal manner under the supervision of representatives from the ICC. Those wishing to speak should inform the appropriate ICC contact person as soon as possible. Copies of prepared statements to be delivered at the hearing will be appreciated.

FOR FURTHER INFORMATION CONTACT: Mr. Bernard Gaillard, (202) 275–7597, Rm. 3385, Director, Small Business Assistance Office, Interstate Commerce Commission, 12th and Constitution Avenue, N.W., Washington, D.C. 20423.

Issued: January 15, 1981.

Agatha L. Mergenovich,

Secretary.

Issue Paper on Minority Participation in Interstate Surface Transportation

Statement of the Problem

Historically, no established regulatory mechanism existed to measure the level of minority participation in the regulated motor carrier industry or in any other segment of interstate surface transportation.

Recent surveys have indicated that minorities are under-represented in all facets of the transportation industry. The Commission estimates that of the 21,000 motor carriers holding ICC certificates and permits today only 144 are minority-owned firms.

In recognition of the problem, Congress amended the National Transportation Policy when it enacted the Motor Carrier Act of 1980 to include promotion of greater minority participation as one of the mandates to be followed by the Commission in its regulation of motor carriers of property. Our preliminary review of the kinds of actions that should be taken to implement this Congressional directive reveals an absence of critical knowledge by the Commission about minority involvement in surface transportation. For example, although the Commission has some estimation of the number of minority firms involved in regulated transportation and related businesses generally, a more precise and comprehensive evaluation is needed. Secondly, since minorities appear clearly to be under-represented in all facets of the industry, the specific causes of the problems being experienced by minorities must be explored to assist the Commission in determining how best to increase the level of minority participation in the regulated sector. In order to develop a complete record on these issues, hearings are scheduled around the country to gather information from minorities in or seeking to enter the transportation field and to receive recommendations on what further action the Commission should take.

Background

In the broadest context of minority participation in the transportation industry there are at least two indentifiable problem areas: (1) inadequate opportunities to become an ICC regulated carrier, and (2) the lack of employment opportunities within the industry. These areas, though apparently separate, may be facets of the same problem. We know, for example, that many owner-operators were formerly city or long-haul company drivers. Later, some of these same owner-operators formed companies and eventually obtained ICC authority in their own name. Correspondingly, many small local trucking firms progressed through a period of agency relationship with regional and national long-haul interstate carriers to become effective competitors with formerly associated firms. With the exception of primarily

family-owned companies which were formed and expanded slowly over time and others which resulted from mergers, founders of motor carrier firms to a large extent appear to have evolved through a kind of uninstitutionalized but patterned system of apprenticeship. Our focus, therefore, will encompass both the areas of carrier entry and expansion as well as employment.

The Commission's estimate of minority-owned firms graphically illustrates the low level of participation by minorities in the regulated industry sector. There are at least two generally accepted historical explanations for this. In 1935 some individuals engaged in the trucking business were able, after passage of the first Motor Carrier Act, to receive "grandfather" certificates. Of course, just as there were fewer minority banks, retail stores, and insurance companies in 1935 in proportion to the general population, there were also disproportionately fewer minority truckers. In addition, the Commission's post 1935 entry standard for a grant of operating authority, i.e., that existing service be proven inadequate, served as a barrier to subsequent significantly minority entry.

There have been a number of governmental efforts in the past which sought either to define the problem or to find solutions to some part of the minority transportation issue. In 1975, and again in 1980, the Task Force on Minority Enterprise of the Subcommittee on General Oversight and Minority Enterprise of the House Committee on Small Business held hearings on the role of minority carriers in the regulated transportation industry. Commission witnesses at the Subcommittee hearings cited administrative actions which could have the potential for increasing minority participation. Examples included the establishment of the Small Business Assistance Office, streamlining the application process, eased entry standards, Ex Parte No. 373, *Impact of Commission Decisions on Small Businesses*, and Ex Parte No. MC 107, *Transportation of Government Traffic*. Subcommittee Chairman Congressman Parren J. Mitchell and others cited chronic complaints from minorities in this area and urged the Commission to take more definitive actions.

In 1979, the General Accounting Office issued a report, which discussed ways the federal government could increase opportunities for minority motor carrier participation in the government's transportation programs.[1] The report recommended that the Secretary of Commerce work with individual agencies to develop affirmative action programs which would (1) set specific objectives, goals, and methodologies for increasing the use of minority motor carriers, and (2) provide for a periodic evaluation process and a monitoring procedure to insure attainment of goals. GAO also issued a report with similar recommendations to the Department of Defense.[2]

In 1972, the Commission instituted an investigation into (a) the employment practices of and minority participation within the surface transportation industry, (b) the industry's compliance with applicable civil rights statutes and Executive Orders, and (c) the proper role to be assumed by the Commission in regard to these matters.[3]

In its report, the Commission found that unlawful discriminatory employment practices did exist in the industry but concluded that visible efforts were being made by the industry, including legal action by the U.S. Department of Justice, to correct these problems. In its decision the Commission, nevertheless, reaffirmed its commitment to assist and participate in programs designed to enhance and encourage greater minority participation in surface transportation.

An attempt to deal with the issue of greater minority participation in Federal procurement programs resulted in Congress' "enactment of Public Law No. 95–507."[4] Here, Congress amended the Small Business Act and the Small Business Investment Act of 1958 by establishing that small business concerns generally, and those owned and controlled by socially and economically disadvantaged individuals, shall have the maximum practicable opportunity to participate in the performance of contracts let by any Federal Agency.[5] In effect, government contractors were required to include in their bids details for subcontracting with minority firms. In spite of Public Law No. 95–507, minority transportation firms continue to complain of difficulties in participating effectively in government contracts. Some of the reasons given are a lack of good faith on the part of many contractors and Federal agencies, and barriers to obtaining appropriate ICC authority to become participants in government transportation procurement contracts.

Issues for Consideration

In the backdrop of these governmental actions, Congress has now included increased minority participation as a goal of the National Transportation Policy. We hope the scheduled hearings will provide the Commission with information on specific problem areas and shed light on potential solutions. The following is an inexhaustive list of the issues the Commission wants the participants to address at the hearing:

1. What specific types of problems or difficulties are minorities experiencing in getting, maintaining, or expanding ICC operating authority?

2. Is the application process for the type of authority you desire fully understood? If not, in what respects is it confusing?

3. Does the requirement for shipper support in some applications pose special problems for minority firms? If so, what kind, and have those problems ever precluded the filing of an application?

4. Is the cost of legal fees prohibitive to entry or expansion. In this context, would some form of legal assistance help alleviate this burden, or would you make some other recommendation?

5. Is the application filing fee itself prohibitive to entry or expansion? Would elimination of all filing fees, reduced fees, or some type of sliding-scale fee system based on ability to pay be helpful?

6. What is your general understanding of the Commission's financial fitness requirements? Are these requirements viewed as an obstacle to entry?

7. Do you believe it is easier to purchase ICC authority than to obtain it by application? If so, please explain why.

8. What investment capital problems have you had? Is the interest cost of loans prohibitive? Are loans available at *any* rate?

9. In what ways and to what extent do compliance and recordkeeping requirements imposed by the Commission create financial burdens to existing firms?

10. The Motor Carrier Act of 1980 requires motor carriers of property to maintain $750,000 public liability, property damage, and environmental restoration insurance. What is the impact, in terms of cost or otherwise, of this requirement on your ability to enter the motor carrier transportation field or expand your operations? Does the requirement amount to an entry barrier?

11. Have you missed opportunities to obtain ICC authority in the past because of a lack of information? Which ones? What recommendations would you

[1] *Federal Agencies Can Provide More Opportunities for Minority Motor Carriers*, LCD–79–208, April 25, 1979.

[2] *Minority Motor Carriers Can Be Given More Opportunities to Participate In Defense Transportation*, LCD–78–213, June 6, 1978.

[3] Ex Parte No. 278, *Equal Opportunity In Surface Transportation*, 353 I.C.C. 425 (1977).

[4] 92 Stat. 1757.

[5] 92 Stat. 1767.

make to the Commission to improve communication to minorities in the future?

12. Have you experienced any difficulties in obtaining support from other government agencies for ICC authority in the past? What were the nature of those difficulties?

13. Have you as a minority ever experienced employment discrimination by the ICC regulated carrier? What were the circumstances involved?

14. Have you or your firm ever been refused any association or affiliation with an ICC carrier on racial grounds?

Conclusion

The purpose of these hearings is to find the answers to these and other questions concerning the problems you have in entering the field and in expanding your operations. We want to explore the reasons for the small number of minorities in this industry and to develop politices and strategies for overcoming the obstacles. Bring your ideas, problems and solutions to the hearings. Testify! Fill our the questionnaire attached to this issue paper and help us to continue to raise the level of minority participation in the surface transportation industry. All interested parties are invited to participate in these hearings.

Minority Trucker Questionnaire

The Interstate Commerce Commission is seeking to develop more information about minority involvement in the interstate motor carrier transportation industry. This questionnaire is designed to assist us in developing specific strategies to increase minority participation. It is divided into five sections (A–E). Sections A and B apply to all persons. Section C relates to employee situations; Section D to transportation of government traffic; and Section E to owner-operators. To insure that we properly pursue our minority efforts, please complete all applicable sections of the questionnaire and return it to the ICC, Small Business Assistance Office, Room 3385, Washington, DC 20423.

The collection, use, and maintenance of the data requested here is in conformity with the Privacy Act of 1974, 5 U.S.C. 552a. Since compliance with this request is voluntary, the failure to provide all or any part of the information will have no adverse effect on any individuals' rights, benefits, or privileges under Federal programs.

Section A (to be completed by all):

1. Name and address:
(Name) _____
(Street) _____
(City) _____
(State) _____
(ZIP code) _____

2. Minority status:
Black———
Spanish origin———
Aleutian———
Asian American———
American Indian———
Female———
Other (specify)———

3a. Type of transportation business:
Motor carrier
—general freight———
—household goods———
—passengers———
—Freight forwarder———
—Household goods agent———
—Property broker———
Water carrier———
Passenger borker———
Intrastate carrier———
Owner-operator———
Other (specify)———

b. Position held (i.e., owner, manager, driver, etc.)———

4. Number of years in transportation business:
0–5——— 6–20——— 20 or more———

5. Scope of transportation operations (number of States served) 1——— 2–5——— 6–20——— 20 or more———

6a. Do you hold ICC authority? Yes——— No———

b. If yes, indicate MC No.:———

c. Type of authority: Common carrier——— Contract carrier——— General freight——— Household goods——— Passenger——— Permanent authority——— Temporary authority———

d. Scope of regulated authority (number of States served):———

e. Did you use an attorney or ICC practitioner? Yes——— No———

7a. If you do not hold ICC authority, why not? Fearful of ICC rules and procedures——— No desire——— Lack of shipper support——— Unsuccessful application——— Too expensive——— Other (specify)———

b. Are you interested in obtaining ICC authority? Yes——— No———
What type (commodities and territory) ——

Section B (to be completed by all):

1. What are your primary sources of information about the transportation industry? The ICC——— Minority transportation associations——— Trade journals——— Other minority businessmen——— Attorney or practitioner——— Other (specify):———

2. What do you believe the ICC can do to best improve communications? Develop minority mailing list——— Distribute booklets/literature——— Conduct seminars/meetings——— Other (specify)———

3. Are you familiar with transportation terms as used by the ICC (such as common and contract carriage or radial and non-radial authority)? Yes——— No———

4. Are you familiar with the provisions of the Motor Carrier Act of 1980? Yes——— No———

5a. Do you have access to technical and managerial assistance? Yes——— No———

b. If no, do you believe the lack of this type of assistance has been an obstacle to successful competing in the transportation industry? Yes——— No———

6a. Are financing sources readily available to your firm? Yes——— No———

b. What is the primary source of your financing? Commercial institutions——— Direct loans from banks, loan companies, etc.——— Guaranteed government loans——— Government grants——— Other (specify)———

c. What are your major financing problems? Inability to secure loans——— Interest rates——— Length of loans——— Collateral required——— Other (specify)———

7a. Do you hold State motor carrier authority? Yes——— No———

b. Are you familiar with the State transportation licensing regulations of States other than where your business is located? Yes——— No———

c. Has compliance with these regulations created serious burdens on your firm? Yes——— No———

8. What is your perception about the dollar cost of acquiring ICC authority? $———

9a. Do you believe legal assistance is required to file for ICC authority? Yes——— No———

b. If desired, is legal assistance available to you? Yes——— No———

c. Would some form of government legal assistance program eliminate any problems you have had in securing legal advice? Yes——— No———

10. Are you familiar with ICC's rate filing requirements? Yes——— No———

11. Are you familiar with ICC's requirements that a regulated carrier designate process agents (persons upon whom legal papers may be filed on your behalf) in each State through which operations are conducted? Yes——— No———

12. Are you familiar with ICC reporting and recordkeeping requirements? Yes——— No———

13a. Are you familiar with DOT and ICC insurance requirements? Yes——— No———

b. What impact does the $750,000 minimum insurance requirement have on your ability to operate as an ICC carrier, in terms of increased cost or otherwise (as provided for in the Motor Carrier Act of 1980)? Cost $——— Barrier to acquiring authority: Yes——— No——— Other (specify) ———

14a. What is your estimate of the time required to obtain an initial decision from the ICC on a permanent motor carrier application?
(Time)———

b. Has your perception of regulatory delay at the ICC ever prevented you from filing for authority? Yes——— No———

15a. Have you ever filed an appliation for ICC authority? Yes——— No———

b. If yes, how many permanent ——— Number approved ———
How many temporary ——— Number approved ———

16a. Is the $350 permanent authority filing fee prohibitive to entry or expansion in

regulated interstate operations? Yes——— No———

b. Would elimination of filing fees, reduced fees, or some form of sliding-scale fee system (based on ability to pay), enable you to file more applications with the ICC? Yes——— No———

17a. Does the shipper support requirement associated with some application filings present any special problems? Yes——— No———

b. If yes, specify what kind: ———

c. Have those problems ever prevented you from filing for authority? Yes——— No———

Section C (to be completed by job applicant and by past or present employees of a transportation business):

1a. Have you ever experienced employment discrimination with an ICC regulated carrier? Yes——— No———

b. If yes, identify type of problem: ———

c. Do you believe that past employment discrimination contributed to any lack of opportunity by you in gaining experience in the transportation industry? Yes——— No———

2. Have you ever filed (individually or as a member of a class of individuals) a formal complaint with the Equal Employment Opportunity Commission? Yes——— No———

3a. Have you ever encountered problems in gaining knowledge about the industry in areas other than employment? Yes——— No———

b. If yes, what type? ———

4. Are vocational and other educational courses on transportation available to you? Yes——— No———

Section D (to be completed by persons interested in transporting government traffic):

1. Are you familiar with federal government procurement procedures? Yes——— No———

2a. Have you ever filed a bid to transport government traffic? Yes——— No———

b. If yes, list government agencies ———

3a. Have you ever had difficulty in obtaining support for ICC authority from government agencies? Yes——— No———

If yes, list government agencies ———

4a. Have you ever encountered other types of problems in dealing with government agencies? Yes——— No———

If yes, explain ———

5a. In 1979 the ICC established special, simplified licensing procedures for handling government traffic (Ex Parte No. MC–107). Were you aware of these procedures? Yes——— No———

b. If yes, did you file a request for authority under these special procedures? Yes——— No———

c. If no application was filed, explain why not: ———

Section E (to be completed by owner-operators):

1. Are you: leased to an ICC carrier ——— an exempt hauler ———

2. If leased to an ICC carrier, are you familiar with ICC's leasing regulations? Yes——— No———

3. Have you ever been refused any association with an ICC carrier on what you believe to be racial grounds? Yes——— No———

4a. Have you ever encountered other problems as an owner-operator based on what you feel were racial grounds? Yes——— No———

b. If yes, explain: ———

BILLING CODE 7035–01–M

Motor Carrier Temporary Application

Correction

In FR Doc. 80–34509, published at page 73543, on Wednesday, November 5, 1980, on page 73544, in the third column, the fifth line "points in Guernsey City, OH and Kanawha City, WV" should be corrected to read "points in Guernsey County, OH and Kanawha County, WV".

BILLING CODE 1505–01–M

Motor Carriers; Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). An interim proposed final Rule 240 reflecting changes to comport with the Motor Carrier Act of 1980 was published in the July 3, 1980, Federal Register at 45 FR 45529 under Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*. These rules provide, among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the Federal Register. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 240(C) of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.240(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.240(A)(h).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: January 12, 1981.

By the Commission, Review Board Number 5, Members Krock, Taylor and Williams. (Member Krock not participating).

MC F 14528F, filed December 17, 1980. CARDINAL TRANSPORT, INC. (Cardinal) (1830 Mound Road, Joliet, IL

60463)—Purchase—WILLIAM T. AUSTIN (Trustee) d.b.a. AUSTIN TRUCKING COMPANY (Austin) (P.O. Box 306, Decatur, AL 35602). Representative: Fred H. Daly, 2550 M Street, NW., Washington, D.C. 20037. Cardinal seeks authority to purchase the interstate operating rights of Austin. John M. Riley, the sole stockholder of Cardinal, seeks authority to acquire control of said rights through this transaction. Cardinal is purchasing the interstate operating rights of Austin evidenced by permit No. MC 143423 (Sub-Nos. 2, 3, 4, 7, and 8), which authorizes the transporation, as a motor contract carrier, of (1) *sugar* (except in bulk), (a) from Gramercy, LA, to Decatur, AL, and (b) from Decatur, AL, to those points in the United States in and east of TX, OK, KS, NE, SD, and ND, under continuing contract(s) with Contract Packaging International, Inc., of Decatur, AL, (2)(a) *paint coatings, resing, and adhesives* (except commodities in bulk, in tank vehicles), from the facilities of Whittaker Coatings and Chemicals, at Chicago and Rockdale, IL, Los Angeles, and Gardena, CA, West Alexandria and Wooster, OH, Decatur, IL, Lenior, NC, and Minneapolis, MN, to points in AL, AR, CA, CT, FL, GA, IL, MD, MA, MN, MS, NH, NJ, NY, NC, OH, PA, SC, TN, TX, and VA, and (b) *raw materials used in the manufacture of the above-described commodities* (except commodities in bulk, in tank vehicles), from points in AL, AR, CA, CT, FL, GA, IL, MD, MA, MN, MS, NH, NJ, NY, NC, OH, PA, SC, TN, TX, and VA, to the facilities of Whittaker Coatings and Chemicals, at Chicago and Rockdale, IL, Los Angeles and Gardena, CA, West Alexandria and Wooster, OH, Decatur, AL, Lenoir, NC, and Minneapolis MN, (3) *insulated copper wire*, from the facilities of Cerro Wire and Cable Company at Hartselle, AL, to points in GA, IN, LA, MS, NC, TN, SC, FL, KY, MI, PA, and NY, under continuing contract(s) with Cerro Wire and Cable Company of Decatur, AL, (4) *copper rods*, from the facilities of Cerro Wire and Cable Company, at Syosset, NY, to the facilities of Cerro Wire and Cable Company at Hartselle, AL, under continuing contract(s) with Cerro Wire and Cable Company at Hartselle, AL, (5)(a) *generators, motors, and internal combustion engines*, and (b) *parts* for the commodities named in (5)(A) above, between the facilities of Onan Corporation at Huntsville, AL, on the one hand, and, on the other, points in AZ, CO, CA, GA, KS, KY, MO, NM, NC, OH, OK, OR, PA, SD, TN, TX, VT, WA, and IL, under continuing contract(s) with Onan Corporation of Minneapolis, MN, and certificate No. MC 143423 (Sub-No. 11), which authorizes *household refrigerators*, from the facilities of General Electric Company of Decatur, AL, to Little Rock, AR, and points in the United States on and east of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, MN, then northward along the western boundaries of Itasca and Koochiching Counties, MN, to the international boundary line between the United States and Canada. Cardinal is authorized to operate as a common carrier pursuant to certificates issued in MC 142059 and sub-numbers thereunder.

Note.—(1) An application for temporary authority has been filed. (2) A directly related conversion application was filed in MC 142059 (Sub-No. 148F) published in this same Federal Register issue.

Decision-Notice

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR 1100.247). Special Rule 247 was published in the Federal Register of July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed on or before March 9, 1981 (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. On or before March 23, 1981 an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice by effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Dated: January 12, 1981.

By the Commission, Review Board Number 5, Members Krock, Taylor, and Williams (member Krock not participating).

MC 142059 (Sub-148F), filed December 17, 1980. Applicant: CARDINAL TRANSPORT, INC.—conversion and extension—1830 Mound Road, Joliet, IL 60463. Representative: Fred H. Daly, 2550 M Street NW., Washington, D.C. 20037. Authority is sought to convert contract carrier authority to common carrier authority in Docket No. MC 143423 (Sub-Nos. 2, 3, 4, 7F, and 8F). The authority being converted is as follows: (1) *sugar* (except in bulk), (a) from Gramercy, LA, to Decatur, AL, and (b) from Decatur, AL, to those points in the United States in and east of TX, OK, KS, NE, SD, and ND, (2)(a) *paint coatings, resins, and adhesives* (except commodities in bulk, in tank vehicles), from Chicago and Rockdale, IL, Los Angeles and Gardena, CA, West Alexandria and Wooster, OH, Decatur, IL, Lenoir, NC, and Minneapolis, MN, to points in AL, AR, CA, CT, FL, GA, IL, MD, MA, NM, MS, NH, NJ, NY, NC, OH, PA, SC, TN, TX, and VA, and (b) *raw*

materials used in the manufacture of the above-described commodities (except commodities in bulk, in tank vehicles), from points in AL, AR, CA, CT, FL, GA, IL, MD, MA, MN, MS, NH, NJ, NY, NC, OH, PA, SC, TN, TX, and VA, to Chicago and Rockdale, IL, Los Angeles and Gardena, CA, West Alexandria and Wooster, OH, Decatur, AL, Lenoir, NC, and Minneapolis, MN, (3) *insulated copper wire*, from Hartselle, AL, to points in GA, IN, LA, MS, NC, TN, SC, FL, KY, MI, PA, and NY, (4) *copper rods*, from Syosset, NY, to Hartselle, AL, and (5) *generators, motors, and internal combustion engines*, and (b) *parts* for the commodities named in (5)(a) above, between Huntsville, AL, on the one hand, and, on the other, points in AZ, CO, CA, GA, KS, KY, MO, NM, NC, OH, OK, OR, PA, SD, TN, TX, UT, WA, and IL. Applicant seeks to broadened the scope of authority in the conversion application. The authority being broaden is as follows: (1) *sugar* (except in bulk), between points in Morgan County, AL, and Orleans County, LA, on the one hand, and, on the other, those points in the United States in and east of TX, OK, KY, NE, SD, and ND, (2) *paint, coatings, resins, and adhesives*, and *raw materials* used in the manufacture thereof, between points in Cook County, IL, Will County, IL, Los Angeles County, CA, Wayne County, OH, Preble County, OH, Morgan County, AL, Caldwell County, NC, and Hennepin County, MN, on the one hand, and, on the other, points in the United States, (3) *copper wire*, between points in Morgan County, AL, on the one hand, and, on the other, points in GA, IN, LA, MS, MO, SC, TN, FL, KY, MI, PA, and NY, (4) *copper rods*, between points in Nassau County, NY, on the one hand, and, on the other, points in Morgan County, AL, and (5) *electrical generation and internal combustion engines, and parts and accessories* related thereto; and *materials, equipment and supplies* used in the manufacture thereof, between points in Madison County, AL, on the one hand, and, on the other, points in the United States. Condition: Since the above authority is broadening the authority sought in the directly related conversion application, we will require an additional $350 filing fee as a condition to the approval of this application.

Note.—This application in part, is directly related to MC–F–14528F, published in this same **Federal Register** issue.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 81–2090 Filed 1–19–81; 8:45 am]

BILLING CODE 7035–01–M

Motor Carrier Decision-Notice

The following applications, filed on or after July 3, 1980, seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by Special Rule 240 of the Commission's Rules of Practice (49 CFR 1100.240). An interim proposed final Rule 240 reflecting changes to comport with the Motor Carrier Act of 1980 was published in the July 3, 1980, **Federal Register** at 45 FR 45529 under Ex Parte 55 (Sub-No. 44), Rules Governing Applications filed By Motor Carriers Under 49 U.S.C. 11344 and 11349. These rules provides among other things, that oppostiion to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 240(C) of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.240(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1100.240(A)(h).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authoriuzed as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: January 10, 1981.

By the Commission, Review Board Number 5, Members Krock, Taylor and Williams. (Board Member Krock not participating).

MC–F 14467F, filed December 17, 1980. MID-CITY FREIGHT LINES, INC. (Mid-City) (Route 1, Sibley, MO 64088)—Puchase (portion)—THUNDERBIRD MOTOR FREIGHT LINES, INC. (Thunderbird) (1473 Ripley, P.O. Box 5216, Lake Station, IN 46405). Representative: Wendell G. Rinacke, Route 1, Sible, MO 64088. Mid-City seeks authority to purchase a portion of the interstate operating rights of Thunderbird. Wendell G. Rinacke, who controls Mid-City through 100% of capital stock, as a condition to the approval of this transaction, will be required to join in the application. Mid-City is purchasing that portion of Thunderbird's Certificate No. MC–125708 (Sub-No. 104), which authorizes the transportation, as a motor common carrier, over irregular routes, of (1) *fertilizer equipment, fertilizer implements parts and accessories*, from the plant site and warehouse facilities of Clark Mfg. Co. (now Lely Independent Mfg. Co.) at Atherton, MO, to points in the U.S. (except AK and HI), and (2) *materials and supplies* used in the manufacture of fertilizer equipment, implement parts, and accessories, in the reverse direction. Mid-City is authorized to operate as a motor common carrier pursuant to authority issued in MC–138218 and sub-numbers thereunder. Condition: Approval and authorization of this transaction is conditioned upon

the prior receipt by the Commission of an affidavit signed by Wendell G. Rinacke, stating that he is in control of Mid-City Freight Lines, Inc., through stock ownership, that he joins in this application, and furnishing all information required by the application, form OP–F–44, to be submitted by an individual in control of an acquiring carrier.

MC–F 14527F, filed December 17, 1980. WOOSTER MOTOR WAYS, INC. (Wooster) (1357 Mechanicsburg Road, Wooster, OH 44691)—Purchase—BEAVERSON TRUCKING, INC. (Beaverson) (1752 Locust Street, Wooster, OH 44691). Representative: David A. Turano, 100 East Broad Street, Columbus, OH 43215. Wooster seeks authority to purchase the interstate operating rights of Beaverson. Kenneth E. Beaverson, the sole stockholder of Wooster, seeks authority to acquire control of said rights through the transaction. Wooster is purchasing those rights contained in Beaverson's Permits in MC–88621 and sub-numbers thereunder, which authorize the transportation, as a motor contract carrier, over irregular routes, of: (1) *truck bodies,* assembled and unassembled, and *parts, materials, and accessories* used in the assembly and sale of truck bodies when transported therewith, from Wooster and Akron, OH, to points in CT, DE, IL, IA, IN, KY, MD, MA, MI, MN, MO, NE, NJ, NY, PA, TN, VA, WV, and WI; (2) *supplies and materials* used in the manufacture, assembly and sale of truck bodies, from the above-specified destination points to Wooster and Akron, OH; (3) *unfinished sheet-metal stampings,* from Wooster, OH, to points in IN and to points in MI (except Willow Run, MI); (4) *paper and paper products* and *materials and supplies* used in the manufacture and sale thereof, between Wooster, OH, on the one hand, and, on the other, points in IL, IN, KY, MI, NJ, NY, OH, PA, and WV; (5) *paper and paper products,* and *equipment, materials and supplies* used in the manufacture, distribution, and sale of paper and paper product (except commodities in bulk, and except machinery, which by reason of size or weight requires the use of special equipment), between points in Sewickley Township, Westmoreland County, PA, on the one hand, and, on the other, points in IN, KY, MD, NJ, NY, PA, OH, VA, WV, and DC, under continuing contract with International Paper Company; and (6) *machinery, equipment, materials, and supplies* used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and pertroleum and their products and by-products (except commodities in bulk), between points in IL, IN, KY, MI, NY, OH, PA, and WV, under continuing contract with Cofsco, Inc., of Wooster, OH. Wooster is a common carrier operating under certificates issued in MC–145194, transporting specified commodities in described areas involving the States of MI, IL, IN, OH, NY, PA, MA, CT, RI, NJ, MD, DE, WV, VA, NC, SC, GA, and AL.

Note.—Application for TA has been filed.

MC F 14534F, filed December 18, 1980. JOHNSON'S BUS SERVICE, INC. (Johnson) (704 Main Street, Mt. Joy, PA 17552)—Purchase(portion)—BROWN'S BUS SERVICE, INC. d.b.a. CAN-AM TOURS, (Brown) (Coatesville, PA 19320). Representative: J. Bruce Walter, P.O. Box 1146, Harrisburg, PA 17108. Johnson seeks authority to purchase a portion of the interstate operating rights of Brown. Robert E. Johnson, sole stockholder of Johnson, as a condition to the approval and authorization of this transaction, will be required to join in this application as person in control. Johnson seeks to purchase the interstate operating rights contained in Brown's certificates which authorize the transportation, as a motor common carrier, over regular routes, as follows: MC–94774 (Sub-No. 2), *passengers, and their baggage* in the same vehicle with passengers, between Chester, PA, and Camden, NJ, serving all intermediate points; from Chester over U.S. Hwy 13 to junction PA Hwy 420, then over PA Hwy 420 to Essington, PA, then over PA Hwy 291 to Philadelphia, PA, then over the Walt Whitman Bridge and city streets to Camden, and return over the same route, service over the above-described route is restricted to the transportation of passengers who are picked up or discharged at the site of the plant of the New York Ship Building Corporation at Camden; and MC–94774 (Sub–No. 5), *passengers and their baggage* in the same vehicle with passengers, between Chester PA, and Gloucester City, NJ, serving all intermediate points except that no service shall be provided in the city of Philadelphia, PA, at points north of Interstate Hwy 676 or west of PA Hwy 291; from Chester over PA Hwy 291 to junction Interstate Hwy 676, then over Interstate Hwy 676 and the Walt Whitman Bridge to Camden, NJ, then over city streets and connecting hwys to Glucester City, and return over the same route. Johnson presently holds no authority from the Commission. Robert E. Johnson, sole stockholder of Johnson, controls 33% of Executive Coach (MC–144620F). Condition: Authorization and approval of this transaction and the issuance of an effective notice is conditioned upon the prior receipt by the Commission of an affidavit signed by Robert E. Johnson, stating that he is the person in control of Johnson's Bus Service, Inc., through stock ownership, and that he joins in this application.

[FR Doc. 81–2091 Filed 1–19–81; 8:45 am]
BILLING CODE 7035–01–M

Motor Carrier Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special Rule 247 was published in the **Federal Register** of July 3, 1980, at 45 FR 45539. For compliance procedures, refer to the **Federal Register** issue of December 3, 1980, at 45 FR 80109.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings:

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient interest in the form of verified statements filed on or before March 9, 1981, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains

appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

On or before March 23, 1981, applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Volume No. OP1–007

Decided: January 14, 1981.

By the Commission, Review Board No. 3, Members Parker, Fortier, and Hill. (Member Hill dissenting.)

MC 33641 (Sub-156F), filed November 16, 1980, and previously noticed in FR issue of December 11, 1980, as MC 33541 (Sub-156F). Applicant: IML FREIGHT, INC., P.O. Box 30277, Salt Lake City, UT 54130. Representative: Eldon E. Bresee (same address as applicant). Transporting *general commodities* (except household goods as defined by the Commission and classes A and B explosives), between points in the U.S.

Note.—This republication deletes the condition previously imposed and corrects the docket number.

Volume No. OP2–154

Decided: January 14, 1981.

By the Commission, Review Board No. 2, Members Chandler, Eaton, and Liberman.

MC 144303 (Sub-26), (correction), filed November 5, 1980, published in the **Federal Register**, issue of December 10, 1980, and republished, as corrected, this issue. Applicant: YOUNGBLOOD TRUCK LINES, INC., P.O. Box 1048, Fletcher, NC 28732. Representative: Charles Ephraim, 406 World Center Bldg., 918 16th St., NW., Washington, D.C. 20006. Transporting *general commodities* (except household goods as defined by the Commission and classes A and B explosives), between points in the U.S., under continuing contract(s) with Franklin Chemical Industries, Inc., of Columbus, OH, and its subsidiaries and affiliates. The purpose of this republication is to correct the territorial description by adding "and its subsidiaries and affiliates". This application was originally published under sub 23, which has been re-numbered to sub 26 this publication.

Agatha L. Mergenovich,
Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 29455 (Sub-Nos. 1-5)]

Norfolk and Western Railway Co; Purchase, Illinois Terminal Railroad Co.; Decision and Notice

AGENCY: Interstate Commerce Commission.

ACTION: Applications accepted for consideration.

SUMMARY: The Commission is accepting for consideration the application of Norfolk and Western Railway Company to purchase the assets of the Illinois Terminal Railroad Company. The proposed transaction is found not to constitute one of regional or national transportation significance within the meaning of the Staggers Rail Act of 1980. The Commission is also accepting related applications concerning certain trackage rights agreements with the Illinois Central Gulf Railroad Company and the Chicago and North Western Transportation Company, and the assumption of bonds of Illinois Terminal Railroad Company.

DATES: Written comments must be filed no later than February 20, 1981.

FOR FURTHER INFORMATION CONTACT: Ellen Hanson (202) 275–7245 or Ernest B. Abbott (202) 275–3002.

ADDRESS: An original and 10 copies of all statements should be sent to: Section of Finance, Room 5414, Interstate Commerce Commission, Washington, D.C. 20423.

SUPPLEMENTARY INFORMATION: Finance Docket No. 29455 (Sub-No. 1), Norfolk and Western Railway Company—Purchase—Illinois Terminal Railroad Company; Finance Docket No. 29455 (Sub-No. 2), Norfolk and Western Railway Company—Assumption and Obligation of Bonds of Illinois Terminal Company; Finance Docket No. 29455 (Sub-No. 3), Norfolk and Western Railway Company—Trackage Rights—Illinois Central Gulf Railroad Company; Finance Docket No. 29455 (Sub-No. 4), Norfolk and Western Railway Company—Trackage Rights—Illinois Central Gulf Railroad Company; Finance Docket No. 29455 (Sub-No. 5), Norfolk and Western Railway Company—Trackage Rights—Chicago and North Western Transportation Company.

On December 22, 1980, NORFOLK AND WESTERN RAILWAY COMPANY (N&W) and ILLINOIS TERMINAL RAILROAD COMPANY (IT) jointly filed an application under 49 U.S.C. 11343 seeking authority for N&W to purchase the assets and equipment of IT. A number of related applications were also filed on December 22, 1980, including three trackage rights applications (two involving the Illinois Central Gulf Railroad Company (ICG) and one with the Chicago and North Western Transportation Company (C&NW)) and an application for approval for N&W to assume obligation and liability of bonds of IT.

All of the applications have been consolidated for handling by the Commission.

These applications were filed under our current consolidation regulations, 49 CFR Part 1111, as modified in Ex Parte No. 282 (Sub-No. 3) [45 FR 62991, September 23, 1980], *Railroad Consolidation Procedures*, 363 I.C.C. 200 (1980). Applicability of these regulations was established in our decision in this proceeding served December 11, 1980. These regulations, subject to the waivers granted in our December 11, 1980 decision, apply to all other persons who may become parties to these proceedings.

We are accepting these applications for consideration because they substantially comply with the applicable regulations and the waivers granted in this proceeding.

The applications and exhibits are available for inspection in the Public Docket Room at the offices of the Interstate Commerce Commission in Washington, D.C. In addition, they may be obtained from applicants' representatives upon request.

Description of the Transaction

The proposed transaction involves the purchase by N&W, a Class I rail carrier, of the principal assets and equipment of IT, a Class II rail carrier. The transaction is governed by 49 U.S.C. § 11343 and the time limits of 49 U.S.C. 11345, as those sections are modified by Section 228 of the Staggers Rail Act of 1980, Public Law 96–448, October 14, 1980.

The rail carrier subsidiaries of N&W are set forth in the Appendix. IT has no rail carrier subsidiaries.

N&W operates a system comprised of 7,454 miles of railroad in IL, IN, IA, KY, MD, MI, MO, NE, NY, NC, OH, PA, VA, and WV, and in the Province of Ontario, Canada. N&W also operates in KS pursuant to trackage rights.

The principal lines of N&W extend from the eastern points of Norfolk, VA, Hagerstown, MD, and Buffalo, NY, westward to Kansas City, KS, and

Omaha, NE, and serve Detroit, MI, Cleveland, Toledo, Akron, Columbus and Cincinnati, OH, Ft. Wayne, Muncie, and Indainapolis, IN, Chicago and Decatur, IL, St. Louis, MO, and Pittsburgh, PA. N&W also provides north-south service between Chicago and St. Louis, between the upper midwest and western VA, and through the Shenandoah Valley of Va.

IT operates in Illinois and Missouri, with a system comprising 420.45 miles of main track of which 149.18 miles are owned and the remainder operated under trackage rights agreements. The principal line of IT extends from St. Louis, MO to Springfield, Decatur and Champaign, IL. IT also has a line that extends from Decatur to Peoria, IL.

If the transaction is approved N&W will operate over former IT lines as a single carrier. IT will be dissolved as a corporate entity.

Presently pending before the Commission is an application by NWS Enterprises, Inc., a holding company, to control both N&W and the Southern Railway Company. F.D. 29430 (Sub-No. 1). *See* 46 FR 173 (January 2, 1981). Should both applications be approved by the Commission, IT's lines would be incorporated in the new NWS system.

Statutory Standards

Under the Staggers Rail Act, if a proceeding does not involve the merger or control of at least two class I railroads, we must approve the application unless we find:

(1) As a result of the transaction there is likely to be a substantial lessening of competition, creation of a monopoly, or restraint of trade in freight surface transportation in any region of the United States; and

(2) The anticompetitive effects of the transaction outweigh the public interest in meeting significant transportation needs.

49 U.S.C. 11344(d). Parties filing comments are cautioned and urged to address these statutory criteria.

The Staggers Rail Act requires us to indicate in this notice whether the proposed transaction is of "regional or national transportation significance."[1] Our interim regulations state that a Section 11343 transaction between a Class I railroad and a Class II railroad is of regional or national transportation significance if it is a "control or merger" proceeding, or if it is a "major market extension" resulting from, *inter alia*, an acquisition or purchase. 49 CFR 1111.5(a), *as amended by* Ex Parte No. 282 (Sub-No. 8) [45 FR 74488, November 10, 1980], *supra*.

N&W's application does not appear to constitute a major market extension. First, the transaction does not give N&W access to any new market. N&W already serves IT's principal market area (St. Louis, MO). With one exception (Delany, IL), all IT terminal points connect with N&W. N&W and IT essentially operate parallel lines and N&W will gain access to only a few additional points, such as Morton and Mackinaw, IL. While the transaction arguably gives N&W access to new through routes from St. Louis to Peoria and from St. Louis to Champaign (both via Springfield and Decatur), IT's route is approximately equal in length to that of N&W, consists of relatively light weight rail, and is in poor condition; it does not provide N&W with an opportunity to improve its service time significantly.

The competitive insignificance of the transaction is reflected by the vote of IT's shareholders approving N&W's proposal. These shareholders are the 8 principal carriers serving the midwest area, and are N&W's principal competitors in the region. Yet all but the trustee of the Chicago, Rock Island, and Pacific Railroad Company, which is no longer in rail operations, voted for the proposal.

Finally, the price to be paid for the extensive mileage involved does not seem to reflect any major competitive benefits. The principal consideration for N&W's acquisition of all of IT's assets is the assumption by N&W of IT's first mortgage in the amount of $5.3 million.

For all of these reasons, we believe the proposed transaction is not a major market extension. Moreover, we believe that our "major market extension" analysis demonstrates directly that the transaction is not of regional or national transportation significance. Indeed, the purpose of our major market extension rules is to identify those transactions which will likely have a significant impact. See 49 CFR 1111.3(c).

We believe, on further reflection, that our statement in our interim regulations that a proceeding is of regional or national transportation significance if it involves the "merger or control"—as opposed to the "acquisition"—of a Class I and a Class II carrier is unduly restrictive. The form of the transaction—merger, control, or acquisition of assets and assumption of obligation—should not affect the substance of the transaction or its significance to the regional and national transportation systems.

Accordingly, whether or not N&W's purchase of substantially all assets of IT should be construed as, in essence, a "merger or control", we hereby find that the proposed transaction is not one of regional or national transportation significance.

Participation in the Proceeding: Comments

Any interested person may participate in this proceeding by submitting written comments regarding the applications. An original and 10 copies must be filed with the Section of Finance, Room 5414, Interstate Commerce Commission, Washington, DC 20423, no later than February 20, 1981. Written comments shall be concurrently served by first-class mail on the United States Secretary of Transportation, the Attorney General of the United States, and the applicants' representatives: Robert J. Cooney, Senior General Attorney, Norfolk and Western Railway Company, 1660 Railway Exchange Bldg., St. Louis, MO 63101 and Steven J. Anthony, Secretary and General Counsel, Illinois Terminal Railroad Company, 710 Tucker Boulevard, St. Louis, MO 63177.

Written comments must also be served upon all parties of record within 10 days of service of the service list by the Commission. We plan to issue that service list by March 2, 1981. All persons who file timely written comments may be considered as parties of record, but only if they so indicate in their comments. In this event no petition for leave to intevene need be filed.

Written comments must contain:

(1) The docket number and title of the proceeding;

(2) The name, address and telephone number of the commenting party and its representative upon whom service shall be made;

(3) The commenting party's position, *i.e.* whether it supports or opposes the proposed transactions;

(4) A statement of whether the commenting party intends to participate formally in the proceeding or merely comment upon the proposal;

(5) A list of all information sought to be discovered from applicant carriers;

(6) An initial list of specific protective conditions sought; and

(7) Any request for oral hearing that the commenting party will make with reasons supporting the request. Particular attention should be given to

[1] This finding determines the time frames applicable to the proceeding. If the transaction is not of regional or national transportation significance, we must issue a final decision within 150 days from the date of publication of this notice in the Federal Register; otherwise, we have 270 days in which to issue a final decision.

Furthermore, there is no provision for the filing of inconsistent applications if the transaction is not of regional or national transportation significance. See Ex Parte No. 282 (Sub-No. 8), *Railroad Consolidation Procedures—Time Revisions*, (decided October 29, 1980) 45 FR 74488 (November 10, 1980).

Ex Parte No. 282 (Sub-No. 3A), *Railroad Consolidation Proceedings, Expedited Processing*, (served December 17, 1980, 45 FR 84803 (December 23, 1980).

We advise interested person to direct their comments to the statutory criteria discussed above.

Preliminary comments from the Secretary of Transportation and the Attorney General must be filed with the Commission by March 9, 1981.

Responsive Applications

The Staggers Rail Act of 1980 contains no provision for inconsistent applications in connection with a transaction which is not of regional or national significance. Our interim regulations implementing the Act expressly prohibit such responsive application. Ex parte No. 282 (Sub-No. 8), *supra*. Thus, none will be entertained.

Procedural Information

Applicants are directed to respond no later than March 25, 1981, to any information request contained in the written comments of other parties. We encourage response to discovery requests as soon as possible in order to expedite the proceeding. Applicants' responses should indicate what information will be voluntarily supplied and the reasons why the remainder will not be voluntarily supplied. We warn parties now that we will not tolerate dilatory tactics in response to reasonable discovery requests designed to elicit relevant evidence. A refusal voluntarily to supply information will be treated as an objection to the request for discovery. Responses should be served upon all parties of record, and 10 copies of those responses should be concurrently filed with the Commission.

The original and 10 copies of all documents in this proceeding should be filed directly with the Section of Finance, Office of Proceedings, Interstate Commerce Commission, Room 5414, Washington, DC 20423.

Formal hearing are not contempleted at this time. On or before April 4, 1981, if hearings or other evidentiary proceedings are deemed necessary, we will issue a further order to that effect.

By statute, the evidentiary phase of the proceeding must be concluded by May 6, 1981. Service of an initial decision will be waived, and determination on the merits of the applications will be made in the first instance by the entire Commission, under 49 U.S.C. 11345, by June 20, 1981.

It is ordered:

1. The applications in Finance Docket No. 29455 (Subs. 1–5) are accepted for consideration.

2. The parties shall comply with all provisions as stated above.

3. This decision is effective on January 21, 1980.

Decided: January 14, 1981.

By the Commission, Chairman Gaskins, Vice Chairman Alexis, Commissioners Gresham, Clapp, Trantum, and Gilliam.

Agatha L. Mergenovich,

Secretary.

Motor Carrier Temporary Authority Application

Correction

In FR Doc. 80-36060, published at page 76538, on Wednesday, November 19, 1980, on page 76549, in the second column, in the fourth paragraph "MC 124078 (Sub-4-44TA)", in the ninth line, "Baton Rouge, IA" should be corrected to read "Baton Rouge, LA".

BILLING CODE 1505-01-M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F-87

The following applications were filed in region I. Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

MC 140267 (Sub-1-2TA), filed January 8, 1981. Applicant: R. A. TRANSPORTATION, INC., Six Connerty Court, East Brunswick, NJ 08816. Representative: Thomas J. Beener, 67 Wall Street, Suite 2510, New York, NY 10005. *Contract carrier:* irregular routes: *Paint, stains, varnishes, liquid and dry*, from Parlin, NJ, to points in New York, NY. Supporting shipper: E. I. Dupont de Nemours & Co., Inc., 1000-1007 Market Street, Wilmington, DE 19898.

MC 8973 (Sub-1–8TA), filed January 8, 1981. Applicant: METROPOLITAN TRUCKING, INC., 75 Broad Avenue, Fairview, NJ 07022. Representative: Morton E. Kiel, Suite 1832, Two World Trade Center, New York, NY 10048. *Such commodities as are manufactured, dealt in or used by a manufacturer or distributor of chemicals, plastic materials (except in bulk),* between points in the US. Supporting shipper(s): Amoco Chemicals, 200 E. Randolph Drive, Chicago, IL 60601. Dow Chemical USA, P.O. Box 150, Building 3302, Plaquemine, LA 70764. B. F. Klein, 1101 Connecticut Avenue N.W., Washington, DC 20036. *Contract carrier:* irregular routes: *Frozen food products* between points in the US, under continuing contracts with Lenders Bagel Bakery. Supporting shipper: Lender's Bagel Bakery Inc., Post Road, West Haven, CT 06516.

MC 106748 (Sub-1–2TA), filed December 31, 1980. Applicant: GODDARD'S TRANSPORTATION, INC., Route 4, Fair Haven, VT 05743. Representative: John P. Monte, P.O. Box 568, Barre, VT 05641. *Ground limestone,* from Florence VT to Franklin, PA. Supporting shipper: Omya, Inc., 61 Main Street, Proctor, VT 05765.

MC 150121 (Sub-1–1TA), filed December 30, 1980. Applicant: DVJ TRUCK LINES, INC., 1 Ridge Road, Monmouth Junction, NJ 08852. Representative: Henry J. Capro, 1585 Morris Avenue, Union, NJ 07083. *Contract carrier:* irregular routes: *Toilet Preparations, bandages or dressings, soap and shampoo, swabs, diapers or diaper liners, baby gift sets, powder, baby talc and related raw materials,* between Somerset, North Brunswick, Linden, NJ; NJ TOFC ramps, Port Jervis, NY, Philadelphia TOFC ramps, Westchester, PA, and Harrisburg, PA. Supporting shipper: Johnson & Johnson Baby Products Company, 220 Centennial Avenue, Piscataway, NJ 08854.

MC 22988 (Sub-1–3TA), filed January 8, 1981. Applicant: K. G. MOORE, INC., 9 Park Ave., Hudson, NH 03051. Representative: Robert G. Parks, 20 Walnut St., Suite 101, Wellesley Hills, MA 02181. *General commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading)* (1) between points in CT, ME, MA, NH, RI and VT, and (2) between points in CT, ME, MA, NH, RI and VT, on the one hand, and, on the other, points in the U.S. (except HI). There are fourteen (14) certificates of support submitted with this application which may be examined at the I.C.C. Regional Office at Boston, MA.

MC 16872 (Sub-1–3TA), filed January 7, 1981. Applicant: WILLIAM MIRRER, d.b.a. MIRRER'S TRUCKING, 100 E. 25th Street, Paterson, NJ 07514. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. *(1) Plastic and metal articles, and (2) materials, equipment and supplies used in the manufacture and sale of the commodities named in (1) above,* (1) between Carlstadt, NJ, on the one hand, and, on the other, Sarasota, FL, and (2) between Carlstadt, NJ, on the one hand, and, on the other, points in TX. Supporting shipper: Atlantic Can Company, 101 7th St., Passaic, NJ 07055.

MC 153294 (Sub-1–2TA), filed January 6, 1981. Applicant: A YANKEE LINE, INC., 25 Chestnut Street, Cambridge, MA 02138. Representative: Michael Eby, Esq, Gilman, McLaughlin & Hanrahan, 10 Post Office Square, Boston, MA 02109. *Passengers and their baggage, in the same vehicle, in charter and special operations,* between Boston, MA, on the one hand, and, on the other, points in the US (excluding AK and HI). Supporting shippers: There are 6 statements in support attached to this application which may be examined at the I.C.C. Regional Office in Boston, MA.

MC 136366 (Sub-1–2TA), filed January 7, 1981. Applicant: BEE LINE INC., 17 Commerce Road, Fairfield, NJ 07006. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. *(1) Paper and paper articles, (2) plastic and plastic articles, and (3) materials, equipment, and supplies used in the manufacture and sale of the commodities named in (1) and (2) above (except commodities in bulk),* between Mechanic Falls, ME and Elmwood Park, NJ, on the one hand, and, on the other, points in the US. Supporting shipper: Marcal Paper Mills, Inc., 1 Market Street, Elmwood Park, NJ 07407.

MC 145829 (Sub-1–12TA), filed January 7, 1981. Applicant: ETI CORP., P.O. Box 1, Keasbey, NJ 08832. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. *Contract carrier:* irregular routes: *General commodities (except commodities in bulk, household goods, classes A and B explosives, and commodities which because of size and weight require special handling),* between points in the US, under continuing contract(s) with ABC–TNT and Acme Fast Freight. Supporting shipper: ABC–TNT and Acme Fast Freight, 2110 Alhambra Avenue, Los Angeles, CA 90031.

MC 153449 (Sub-9–1TA), filed January 6, 1981. Applicant: FRANK P. PITTS, INC., Route 104, Williamson, NY 14589. Representative: John F. O'Donnell, Barrett and O'Donnell, 60 Adams St., P.O. Box 238, Milton, MA 02187. *Contract carrier:* irregular routes: *Metals, metal products, plastics, plastic products, and containers,* between Rochester, NY, Chicago, IL, Philadelphia, PA, and Jackson, MS, under contract(s) with Caldwell Manufacturing Company, Rochester, NY. Supporting shipper: Caldwell Manufacturing Company, Rochester, NY 14602.

MC 153337 (Sub-1–1TA), filed December 30, 1980. Applicant: FLUTONVILLE PLASTICS, INC., 1 Union Street, Fultonville, N.Y. 12072. Representative: Robert Dorfman, Comrie Ave., Johnston, N.Y. 12072. *Contract carrier, irregular routes, containers, glass with or without caps, stoppers or covers* from Clarion, PA to Canajoharie, NY under a continuing contract with Beech Nut Foods Corp., Canajoharie, NY. Supporting Shipper: Beech Nut Foods Corporation, Church Street, Canajoharie, NY 13317.

MC 145829 (Sub-1–11TA), filed January 6, 1981. Applicant: ETI CORP., P.O. Box 1, Keasbey, NJ 08832. Representative: George A. Olsen, P.O. Box 357, Gladstone, NJ 07934. *Contract carrier:* irregular routes: *(1) Cleaning compounds, disinfectants, softeners, and insecticides; and (2) materials, equipment, and supplies used in the manufacture and distribution of the commodities named in (1) above (except in bulk),* between points in the U.S. Supporting shipper: Texize, Division of MortonNorwich, P.O. Box 368, Greenville, SC 29602.

MC 145468 (Sub-1–4TA), filed January 6, 1981. Applicant: KSS TRANSPORTATION CORP., Route 1 and Adams Station, P.O. Box 3052, North Brunswick, NJ 08902. Representative: Arlyn L. Westergren, Westergran & Hauptman, P.C., Suite 201, 9202 West Dodge Road, Omaha, NE 68114. *Meat and packinghouse products,* between Seward County, KS, on the one hand, and, on the other, points in the U.S. Supporting shipper: National Beef Packing Co., Inc., P.O. Box 1358, Liberal, KS 67901.

MC 109725 (Sub-1–2TA), filed January 6, 1981. Applicant: K. F. CROCKER TRANSPORTATION CO., INC., Jewell Hill Road, Ashby, MA 01431. Representative: James M. Burns, 1383 Main Street, Suite 413, Springfield, MA 01103. *Liquid sweeteners in bulk, in tank vehicles,* between Boston, MA and points east of the Mississippi River. Supporting shipper: Ingredient Technology Corp., Boston Molasses Division, 920 East First Street, South Boston, MA 02127.

MC144710 (Sub-1–1TA), filed January 6, 1981. Applicant: MONROE CONTRACTORS EQUIPMENT, INC., 1640 Penfield Road, Rochester, NY 14625. Representative: S. Michael Richards, P.O. Box 225, Webster, NY 14580. *Carbon electrodes, furnace or electrolytic bath and carbon plugs, carbon or graphite scrap, coke flour, machinery and machinery parts, and materials, equipment and supplies used in the manufacture, sale and distribution of carbon electrodes,* between points in Erie, Niagara and St. Lawrence Counties, NY and Elk County, PA, and points in AL, AZ, AR, CA, CO, DE, DC, ID, IA, KS, LA, ME, MD, MI, MN, MS, MO, MT, NE, NV, NH, NM, NY, ND, OK, OR, RI, SD, TX, UT, VT, WA and WY. Supporting shipper: Airco Speer, Carbon Graphite Div., Airco, Inc., 4861 Packard Rd., Niagara Falls, NY 14302.

MC 148155 (Sub-1–1TA), filed January 6, 1981. Applicant: TRANS COASTAL CORPORATION, P.O. Box 116W, Winslow, ME 04902. Representative: John C. Lightbody, Esq., Murray, Plumb & Murray, 30 Exchange Street, Portland, ME 04101. *General commodities (except household goods as defined by the Commission, explosives and commodities of unusual value),* between points in ME, GA, and CA, on the one hand, and, on the other points in the U.S. Supporting shipper(s): There are 17 statements in support attached to this application which may be examined at the I.C.C. Regional Office in Boston, MA.

MC 153232 (Sub-1–1TA), filed January 6, 1981. Applicant: DAVID D. SALKA FREIGHT LINES, 59 Valley View Drive, Meriden, CT 06450. Representative: John E. Fay, Esq., 663 Maple Avenue, Hartford, CT 06114. *Contract carrier:* irregular routes: *Raw materials and finished goods suitable for the manufacture and processing of soft drinks and production and distribution of same,* between Meriden, CT, on the one hand, and, on the other hand, points in MA, RI, NH, VT, ME, NY, NJ, PA, and MD, for account of Connecticut Seven-Up Bottling Co., Inc. Supporting shipper: Connecticut Seven-Up Bottling Co., Inc., 127 Pomeroy Ave., Meriden, CT 06450.

BILLING CODE 7035-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Museum Panel (Museum Purchase Plan); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Museum Panel (Museum Purchase Plan) to the National Council on the Arts will be held February 10, 1981, from 9:00 a.m.-5:30 p.m. in room 1422 of the Columbia Plaza Office Complex, 2401 E Street, Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

January 14, 1981.

[Docket No. 50-142 OL (Proposed Renewal of Facility License)]

The Regents of the University of California (UCLA Research Reactor); Order (Scheduling a Prehearing Conference)

January 12, 1981.

In a conference call on December 12, 1980, it was determined that February 4 and 5, 1981, were the first dates convenient to the parties and the Board for a prehearing conference. The purpose of the conference is to consider those contentions which are still in dispute.

The prehearing conference will begin at 9:30 a.m. (local time) on February 4, 1981, in the New Yorker Room in the Los Angeles Hilton, 930 Wilshire Boulevard, Los Angeles, California. Assuming that the conference will not be concluded in one day, it will be continued on

February 5 in the Patio Room in the Hilton.

The public is invited to attend. No limited appearance statements will be accepted at the prehearing conference. A time for limited appearance statements will be scheduled at a later date.

It is so ordered.

For the Atomic Safety and Licensing Board.

Elizabeth S. Bowers,

Administrative Judge.

Advisory Panel for the Decontamination of Three Mile Island, Unit 2; Meetings

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel for the Decontamination of Three Mile Island, Unit 2, will hold three meetings during the month of February. The meetings will be open for public observation.

The meetings will be on February 4, February 11, and February 19 from 7:00 p.m. to 10:30 p.m. in The Forum of the Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania.

Since these will be working meetings to develop Advisory Panel advice to the Commission, there are no specific meeting agenda.

Further information on the meetings may be obtained from Dr. William Travers, Three Mile Island Program Office, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301-492-7811.

Dated: January 14, 1981.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards; Subcommittee on Reactor Radiological Effects; Meeting

The ACRS Subcommittee on the Reactor Radiological Effects will hold a meeting at 1:00 p.m. on February 5, 1981 in Room 1167, 1717 H Street, NW, Washington, D.C. to review and comment on the NRC Staff's paper to the NRC Commissioners on the current status of thinking and research related to iodine releases and accident source terms.

In accordance with the procedures outlined in the **Federal Register** on October 7, 1980 (45 FR 66535), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance.

The agenda for subject meeting shall be as follows:

Thursday, February 5, 1981

1:00 p.m. until 7:00 p.m.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, will exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to Mr. Garry G. Young (telephone 202/634-1414) between 8:15 a.m. and 5:00 p.m., EST. The cognizant Designated Federal Employee for this meeting is Mr. John C. McKinley.

Dated: January 15, 1981.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 11554; (811-1511)]

Hamilton High Yield Fund, Inc., (Formerly Hamilton Bond Fund, Inc.); Filing of Application Pursuant to Section 8(f) of the Investment Company Act of 1940 for an Order of the Commission Declaring That Applicant Has Ceased to be an Investment Company

January 14, 1981.

Notice is hereby given that Hamilton High Yield Fund, Inc. (formerly Hamilton Bond Fund, Inc.) ("Applicant"), 3600 South Yosemite Street, Denver, Colorado 80237, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on November 28, 1980, pursuant to Section 8(f) of the Act, for an order of the Commission declaring that Applicant has ceased to be an investment company as that term is defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized under the laws of the State of Delaware on May 1, 1967, as International Income Fund, Inc., and registered with the Commission under that name on July 10, 1967. Applicant effected numerous name changes after registering with the Commission, including the name change from Hamilton Bond Fund, Inc., to Hamilton High Yield Fund, Inc., on February 3, 1978. An application for a limited exemption from the provisions of Sections 10(a), 15(a), 15(c), 30(b), 30(d), and 32(a) of the Act was filed with the Commission on behalf of Applicant by its investment adviser, Hamilton Management Corporation, presently called Oppenheimer Asset Management Corporation ("Oppenheimer"), which the Commission granted by order dated September 1, 1967 (Investment Company Act Release No. 5074). Hamilton Futura Fund, Inc. (former name used by Applicant) filed a registration statement (File No. 2-33588) under the Securities Act of 1933 ("1933 Act") to make a public offering of shares of its capital stock on June 20, 1969. This registration statement did not become effective, and on May 3, 1972, the Commission issued an order allowing withdrawal of such registration statement pursuant to Rule 477 under the 1933 Act. Subsequently, on November 22, 1972, a registration statement under the 1933 Act was filed by American Future Fund, Inc. (File No. 2-46411), another of Applicant's former names. According to the application, this registration statement was never declared effective. Thus, the application represents that Applicant has not made a public offering of its securities.

Applicant states that its sole shareholder, Oppenheimer, has been reimbursed for its initial investment, and that Applicant's shares which it held, representing the total number of Applicant's outstanding capital stock, have been retired with the exception of

one share of $1.00 par value stock which Oppenheimer still holds. Applicant further states that it presently has no assets; that it has no outstanding debts or other liabilities; that it is not a party to any litigation or administrative proceeding; and that it has not, for any reason, transferred any of its assets to a separate trust, the beneficiaries of which were or are securityholders of Applicant. Applicant also states that it is not now engaged, and does not propose to engage, in any business activities other than those necessary for the winding-up of its affairs. Finally, Applicant states that it has filed a Certificate of Dissolution with the Secretary of State of the State of Delaware, and that such filing terminates Applicant's existence under Delaware state law.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the effectiveness of such order the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than February 16, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 11548; (812–4779)]

McDonald Money Market Fund, Inc., Filing of Application for an Order Pursuant to Section 6(c) of the Act Exempting Applicant From the Provisions of Section 2(a)(4) of the Act and Rules 2a–4 and 22c–1 Thereunder

January 13, 1981.

Notice is hereby given that McDonald Money Market Fund, Inc. ("Applicant"), 2100 Central National Bank Building, Cleveland, Ohio 44114, an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on December 5, 1980, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit Applicant to compute its net asset value per share using the amortized cost method of valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contined therein, which are summarized below.

Applicant states that it is a "money market" fund designed as an investment vehicle for investors who desire to place assets in money market investments where the primary considerations are safety, liquidity and, to the extent consistent with these objectives, a high income return. According to the application, Applicant's portfolio may be invested in a variety of short-term money market instruments consisting of marketable securities issued by the United States government or its agencies or instrumentalities; certificates of deposit; bankers' acceptances; repurchase agreements; and high grade commercial paper. Applicant further states that all its investments will consist of obligations maturing wihtin one year from the date of acquisition, and the average maturity of all its investments will be 120 days or less on a dollar-weighted basis.

As here pertinent, Section 2(a)(41) of the Act defines value to mean: (1) with respect to securities for which market quotations are readily available, the market value of such securities, and (2) with respect to other securities and assets, fair value as determined in good faith by the board of directors. Rule 22c–1 adopted under the Act provides, in part, that no registered investment company or principal underwriter therefor issuing any redeemable security shall sell, redeem or repurchase any such security except at a price based on the current net asset value of such security which is next computed after receipt of a tender of such security for redemption or of an order to purchase or to sell such security. Rule 2a–4 adopted under the Act provides, as here relevant, that the "current net asset value" of a redeemable security issued by a registered investment company used in computing its price for the purposes of distribution and redemption shall be an amount which reflects calculations made substantially in accordance with the provisions of that rule, with estimates used where necessary or appropriate. Rule 2a–4 further states that portfolio securities with respect to which market quotations are readily available shall be valued at current market value, and that other securities and assets shall be valued at fair value as determined in good faith by the board of directors of the registered company. Prior to the filing of the application, the Commission expressed its view that, among other things: (1) Rule 2a–4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and (2) it would be inconsistent, generally, with the provisions of Rule 2a–4 for a "money market" fund to value its portfolio instruments on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977).

Applicant states that experience indicates that two qualities are helpful in order to attract investment: (1) stability of principal and (2) steady flow of investment income. Applicant asserts that by utilizing high quality money market instruments of short maturities combined with a stable net asset value, it would be possible to provide these features to investors. Applicant represents that its board of directors has determined in good faith that in light of the characteristics of Applicant, the amortized cost method of valuing portfolio securities is appropriate and preferable for Applicant and reflects fair value of such securities. According to the application, experience has shown that given the nature of Applicant's policies and operations, there will be a relatively negligible discrepancy between prices obtained by market value methods and amortized cost valuation. accordingly, Applicant requests exemptions from Section 2(a)(41) of the Act and Rules 2a–4 and

22c-1 thereunder to the extent necessary to permit Applicant to value its portfolio by means of the amortized cost method of valuation.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision under the Act or any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant expressly consents to the imposition of the following conditions in any order granting the relief it requests:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's board of directors undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase at $1.00 per share.

2. Included within the procedures to be adopted by Applicant's board of directors shall be the following:

(a) Review by the board of directors, as it dems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $1.00 amortized cost price per share, and maintenance of records of such review.[1]

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds ½ of 1%, the board of directors will promptly consider what action, if any, should be initiated.

[1] To fulfill this condition, Applicant will use actual quotations or estimates of market value reflecting current market conditions selected by its board of directors in the exercise of its discretion to be appropriate indicators of value. The quotations or estimates utilized may include, *inter alia*, (1) quotations or estimates of market value for individual portfolio instruments or (2) values obtained from yield data relating to classes of money market instruments furnished by reputable sources.

(c) Where the board of directors believes the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redemption of shares in kind; the sale of portfolio securities prior to maturity to realize capital gains or losses, or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity at the date of acquisition of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity in excess of 120 days. In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, the Applicant will invest its available cash in such a manner as to reduce its dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

4. Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, main ain and preserve for a period of not less han six years (the first two years in the easily accessible place) a written record of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the board of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements if any, to those United States dollar-denominated instruments which the board of directors determines present minimal credit risks, and which are of high quality as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the board of directors.

6. Applicant will include in each quarterly report, as an attachment to Form N-1Q, a statement as to whether any action pursuant to condition 2(c) was taken during the preceding fiscal quarter, and, if any action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person may, not later than February 6, 1981, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Aplicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81-2009 Filed 1-19-81; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 17433; (SR-PSE-80-22)]

Pacific Stock Exchange; Order Approving Proposed Rule Change

January 9, 1981.

On November 17, 1980, the Pacific Stock Exchange, Incorporated ("PSE"), 301 Pine Street, San Francisco, CA

94104, filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) ("Act") and Rule 19b–4 thereunder, copies of a proposed rule change which modify the PSE's four existing XYZ agreement forms designed for use between an applicant for PSE membership and the applicant's financial backer.[1] The modifications would permit the use of XYZ agreements for financing equity floor memberships, as well as for financing options floor memberships.[2] Further, under the terms of the XYZ forms, the period of time that the PSE could extend deadlines for the orderly closing of an applicant's business or its transfer from an applicant to a backer would be increased from 30 to 60 days. The PSE's present requirement that all agreements between an applicant and a backer must be approved by the PSE would be rescinded.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 17349, December 1, 1980) and by publication in the **Federal Register** (45 FR 80624, December 5, 1980). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 81–2012 Filed 1–19–81; 8:45 am]

BILLING CODE 8010–01–M

[1] The four XYZ agreements, while containing the same general language, have variations depending on whether an applicant or a backer is a sole proprietorship or a member organization.

[2] Presently, XYZ forms are available only for financing options floor memberships, but under the proposed rule change they would also be available for financing equity floor memberships. This would be achieved by deleting from each of the XYZ forms certain language that has always been interpreted by the PSE as barring the use of the forms for equity floor memberships.

[Release No. 11549; (812–4330)]

Twentieth Century Investors, Inc. and Investors Research Corporation; Application for a Conditional Order Pursuant to Section 6(c) of the Act Exempting Certain Transactions and Classes of Transactions from the Provisions of Section 17(e)(1) of the Act

January 13, 1981.

Notice is hereby given that Twentieth Century Investors, Inc. ("Twentieth Century"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, and Investors Research Corporation, ("Research") (collectively with Twenieth Century, "Applicants"), 605 West 47th Street, Kansas City, MO 64112, an investment adviser registered under the Investment Advisers Act of 1940, filed an application on July 3, 1978, with amendments on April 23, November 5, and December 26, 1979, and March 24, June 6, and December 1980, for a conditional order of the Commission pursuant to Section 6(c) of the Act, exempting certain past transactions and proposed classes of transactions from the provisions of Section 17(e)(1) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Twentieth Century is a series company with two series of shares, one seeking capital appreciation and the other current cash distributions. Research is investment adviser to Twentieth Century. Applicants state that in 1973 Research developed computer programs that enable it to analyze the revenues and earnings over the past twenty quarters of over 6,000 publicly held companies, and that classify the companies according to their earnings and revenue characteristics. According to the application, the computer programs develop information which is applied to certain ideas, theories, concepts and techniques of stock selection developed by Research in conjunction with Richard H. Driehaus ("Driehaus"), currently an employee of Jessup & Lamont, Inc., a registered broker-dealer. Applicants argue that the information developed through the use of the computer programs is extremely valuable in managing Twentieth Century's two portfolios and that those programs have enabled Twentieth Century to enhance substantially its investment performance.

According to Administrative Proceeding File No. 3–4669 (incorporated by reference in the application), from August, 1973 to September, 1975 Research received payments from two broker-dealers for use of the computer programs developed by Research. During that period, a substantial portion of Twentieth Century's portfolio brokerage business was directed to those broker-dealers. In 1975, the Commission instituted administrative proceedings (the "Enforcement Proceeding") against the two broker-dealers, Research, Driehaus and James E. Stowers, Research's chief executive officer and principal owner, and president, director and portfolio manager of Twentieth Century. On May 1, 1978, the Commission found, *inter alia*, that Research had violated Section 17(e)(1) of the Act and, as a result, censured Research (*Investors Research Corporation*, Investment Company Act Release No. 10223). The Commission found that the leasing arrangement created a conflict of interest, giving Research an incentive to churn Twentieth Century's two portfolios and making it less likely that Research would be aggressive in negotiating with broker-dealers concerning best price and execution of portfolio transactions on behalf of Twentieth Century. Research appealed the Commission's decision, and the United States Circuit Court of Appeals for the District of Columbia affirmed the Commission's censure of Research (*Investors Research Corporation* v. *SEC*, [Current] Fed. Sec. L. Rep. (CCH) ¶97,526 (D.C. Cir. 1980).

Applicants state that, during the pendency of the Enforcement Proceeding, Research permitted Thomson & McKinnon Securities, Inc. ("Thomson & McKinnon"), to use its programs. Thomson & McKinnon paid $1,000 per month into an escrow account for a period of eight months and then ceased all payments when the administrative law judge entered his initial decision in which he found that the prior similar arrangements violated Section 17(e)(1) of the Act.

Applicants state that Research currently directs almost all of the portfolio brokerage business of Twentieth Century to Driehaus, that information from the computer programs is furnished to Driehaus because he utilizes the information to give investment advice to Research, and that Research finds Driehaus' advice useful in managing Twentieth Century's portfolios. Applicants further state that Driehaus utilizes the information in recommending securities transactions to his other customers and thereby enjoys for his own use and profit proprietary information which belongs to Research.

Applicants represent that Driehaus is willing to pay for the information, but that because of the Commission's decision in the Enforcement Proceeding, Driehaus is unable to pay, and Research is unable to accept, payment for the use of the programs.

Section 17(e)(1) of the Act provides, in part, that it shall be unlawful for any affiliated person of a registered investment company, acting as agent, to accept from any source any compensation for the purchase or sale of any property to or for such registered company, except in the course of such person's business as an underwriter or broker.

Section 6(c) of the Act provides, in part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, transaction, or any class or classes of persons or transactions, from any provision of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Without admitting that past or proposed payments violate any provisions of the Act, Applicants request a conditional order pursuant to Section 6(c) of the Act exempting from the provisions of Section 17(e)(1) of the Act, to the extent necessary, the future receipt by Research of payments for the use of its computer programs by brokers to whom portfolio brokerage of Twentieth Century is directed. Applicants suggest several conditions to such an order that they assert will respond to the Commission's concerns in the Enforcement Proceeding. Applicants argue that the following conditions would fulfill the prophylactic purpose of Section 17(e)(1) of the Act and would make the granting of the application by the Commission appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act:

(1) The aggregate of all payments to Research from participating brokers will be limited to an amount that will not exceed the out-of-pocket cost to Research and its affiliates for the computer hardware and attendant system software needed for the operation of its programs.[1]

(2) Research will submit quarterly reports to the board of directors of Twentieth Century. These reports will include: (a) the portfolio turnover rate in the preceding quarter for each of Twentieth Century's two portfolios, as compared with their respective rates for the preceding three years and an identification and explanation of any portfolio transaction during the quarter where a security was sold within sixty days of its purchase; (b) the brokerage commission rates paid in the preceding quarter to participating brokers, together with the brokers' rates charged other customers (and an annual letter from the independent auditors of participating brokers affirming that Twentieth Century had received "most favored customer" treatment from the participating brokers); (c) an evaluation of the quality of execution provided by the participating brokers, including identification and explanation of any portfolio transaction where a participating broker failed to comply with special instructions, where there was an unauthorized material delay in executing an order, where a sale was made at a price less than 95% of the price at the time of placing a sell order, or where a purchase was made at more than 105% of the price of the security at the time of placing a buy order.

(3) Twentieth Century's board of directors will review the quarterly reports and will evaluate Research's performance in dealing on behalf of Twentieth Century with the participating brokers. After the review of each report, the board will vote on whether to approve Research's actions. Approval by a majority of Twentieth Century's full board of directors and by a majority of its disinterested directors will be required in order that the leasing arrangements continue without compensation for harm.

(4) Research agrees to reimburse Twentieth Century for any harm to Twentieth Century that might result from the leasing arrangements between Research and the participating brokers as a result of excessive portfolio turnover, excessive brokerage expenses, or poor execution of portfolio transactions. To obtain reimbursement for harm, a majority of Twentieth Century's disinterested directors must request it. Research will pay, without recourse, any such requested amounts that do not exceed amounts it received from participating brokers during the quarter or quarters for which reimbursement is sought. With regard to claims for reimbursement in excess of leasing payments received from participating brokers in the quarter in question, Research reserves the right to present a good faith defense to a court of competent jurisdiction.

(5) Research will lease its computer programs only to brokers that agree to provide brokerage services to Twentieth Century at commission rates that are (a) at least as favorable as those charged their most favored customers on transactions of similar magnitudes to those of Twentieth Century and (b) no greater than usual and customary brokerage commission rates.

Applicants also request an order pursuant to Section 6(c) of the Act exempting from the provisions of section 17(e)(1) of the Act the receipt by Research of the payments (with interest) made into escrow by Thomson & McKinnon for use of the computer programs during the pendancy of the administrative hearing in the Enforcement Proceeding. Applicants represent that those payments were $1,000 per month and that Research's out-of-pocket costs for computer hardware and system software during that period were approximately $6,000 per month. Applicants further represent that, during the period covered by the escrowed payments, the portfolio turnover rates for each of Twentieth Century's two portfolios were less, on an annualized basis, than they had been in each of the three prior calendar years. Applicants further represent that the brokerage services provided by Thomson & McKinnon during the period of the escrowed payments were of acceptable quality and at a reasonable price. Applicants assert that an order pursuant to Section 6(c) of the Act permitting Research to receive the escrowed payments would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than February 9, 1981, at 5:30 p.m., submit to the Commission in writing, a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and

[1] Applicants represent that such costs were $8,217 in the month of July, 1979.

Regulations promulgated under the Act, an order disposing of the application herein will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion.

Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SELECTIVE SERVICE SYSTEM

Privacy Act of 1974; Notice of Systems of Records, Proposed Revision of System of Records

AGENCY: Selective Service System.

ACTION: Proposed Revision of System of Records.

SUMMARY: The Selective Service System proposes to revise its system of records SSS-8 necessitated by the resumption of registration under the Military Selective Service Act (50 U.S.C. App. 453). The system that will be revised pertains to suspected violators of the Military Selective Service Act.

COMMENT DATE: Comments are due on or before February 20, 1981.

ADDRESS: Selective Service System, ATTN: Records Manager, 600 E Street, NW., Washington, D.C. 20435.

FOR FURTHER INFORMATION CONTACT: C. E. Boston, Records Manager, Selective Service System, 600 E Street, NW., Washington, D.C. 20435. Phone (202) 724-0419.

SUPPLEMENTARY INFORMATION: The system of records, SSS-8, that will be revised appears at 41 FR 53965.

Bernard Rostker,

Director of Selective Service.

January 15, 1981.

SSS-8 as revised is:

SSS-8

SYSTEM NAME:

Suspected Violator Inventory System (SVIS)—SSS.

SYSTEM LOCATION:

National Headquarters, Selective Service System, 600 E Street, NW., Washington, D.C. 20435.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Alleged violators of the Military Selective Service Act (50 U.S.C. App. 451 et seq.).

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains the name, Selective Service Number (if any), Social Security Account Number (if any), report of, and disposition data of, alleged violations of the Military Selective Service Act.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 10(b)(3) of the Miltary Selective Service Act (50 U.S.C. App. 460(b)(3)).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Exchange of information with the Department of Justice respecting alleged violations of the Military Selective Service Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

The records are maintained in file folders, on tape, input forms and computer printouts.

RETRIEVABILITY:

Indexed by Selective Service Number, Social Security Account Number, and name.

SAFEGUARDS:

a. Records are available to authorized SSS personnel only.

b. Office is locked when authorized personnel are not on duty.

c. Periodic security checks.

RETENTION AND DISPOSAL:

Upon final disposition of violator case.

The input forms are destroyed by maceration, shredding or burning immediately after the information has been recorded in SVIS.

Computer printouts distributed to National Headquarters are destroyed when they have served their temporary purposes by maceration, shredding or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Selective Service, National Headquarters, Selective Service System, 600 E Street, NW., Washington, D.C. 20435.

NOTIFICATION PROCEDURE:

Same as the above. It is necessary to furnish the following information in order to identify the individual whose records are requested:

a. Full name.

b. Date of birth.

c. Selective Service Number or Social Security Account Number.

d. Mailing address to which the reply should be mailed.

RECORD ACCESS PROCEDURES:

An individual can obtain information on the procedures for gaining access to and contesting records through: Director of Selective Service, National Headquarters, Selective Service System, 600 E Street, NW., Washington, D.C. 20435, Attn: Records Manager.

CONTESTING RECORD PROCEDURES:

Same as the above.

RECORD SOURCE CATEGORIES:

Information concerning name of alleged violator is recorded in file folders by Records Manager and input documents are prepared by him.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 8015-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 04/04-5092]

Filing of Application for Approval of Conflict of Interest Transaction

Notice is hereby given that Vanguard Investment Company, Inc., (VICI), 309 Pepper Building, Fourth & Liberty Streets, Winston-Salem, N.C. 27101 a Federal Licensee under the Small Business Investment Act of 1958 Section 301(d) as amended has filed an application with the Small Business Administration, pursuant to Section 312 of the Act and covered by § 107.1004(b)(1) of the SBA Rules and Regulations, governing Small Business Investment Companies (13 CFR 107.1004(1980)) for approval of the Conflict of Interest transaction falling within the scope of the above Sections of the Act and Regulations.

Subject to such approval VICI proposes to invest $124,500 in A & B Fast Foods, Inc. of Charlotte, N.C. The purpose of the small business concern is to operate a Burger King restaurant in Charlotte, N.C. The principals are Mr. Lee D. Andrews (49%) and Mr. Matthew Beatty (51%).

The proposed financing is brought within the purview of § 107.1004 of the SBA Regulations because Mr. Andrews is an officer, director and 10 percent stockholder of the licensee.

Notice is hereby given that any interested person may not later than

February 2, 1981, submit written comments on the proposed investment to the Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

(Catalog of Federal Domestic Assistance Program No. 59,011 Small Business Investment Companies.)

Dated: January 12, 1981.

Michael K. Casey,

Associate Administrator for Investment.

BILLING CODE 4710-01-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

Privacy Act of 1974; Revised System of Records

AGENCY: Office of the Secretary, Department of Treasury.

ACTION: Notice of Intent to Revise Privacy Act System of Records, Treasury/OS 00.190, General Allegations and Investigative Records System, as last published at 45 FR 18690, March 21, 1980.

SUMMARY: The above referenced system of records is being revised as follows:

System number:

Administrative change due to typographical error.

Categories of individuals:

Correct reference to Civil Service Merit System. Administrative change due to reorganization.

Authority for maintenance of the system:

Administrative update of citation.

Routine uses including categories of users and purposes of such uses:

Amended to add Special Counsel to the Merit Systems Protection Board; GAO Fraud Task Force, state and local licensing boards; and Intelligence Oversight Board, pursuant to requirements of Executive Order 12036 relating to the oversight of foreign intelligence activities in Treasury.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Amended to update system description to include automated indexing.

Safeguards:

Reworded for clarity.

System exempt:

Administrative change to reinstate this data item which was inadvertently omitted from the previous printing of the system description.

The intended effect of the action is to provide more efficient and accurate retrieval of information due to the growth of the system files.

DATES: Public comment on this proposed revision must be received not later than February 20, 1981. Unless nonconcurrence of the report of this proposed revision by the Office of Management and Budget, or unless this Department publishes further notice of change or receipt of public comments, this proposed system will become effective on March 23, 1981.

ADDRESSES: Office of the Inspector General, Main Treasury Building, Washington, D.C. 20220.

FOR FURTHER INFORMATION CONTACT: Mrs. Carol Jolliffe, Office of the Inspector General, Main Treasury Building, Washington, D.C. 20220, 202-566-8900.

Dated: January 9, 1981.

Walter J. McDonald,

Assistant Secretary (Administration).

TREASURY/OS 00.190

SYSTEM NAME:

General Allegations and Investigative Records—Treasury/OS

SYSTEM LOCATION:

Office of the Inspector General, Main Treasury Building, Washington, D.C. 20220

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

(A) Current and former employees of the Department of Treasury and such other persons whose association with current and former employees relate to the alleged violations of the Department's rules of conduct, the Office of Personnel Management merit system, or any other criminal or civil misconduct, which affects the integrity or facilities of the Department of Treasury. The names of individuals and the files in their names may be:

(1) received by referral; or

(2) initiated at the discretion of the Office of the Inspector General in the conduct of assigned duties.

(B) Individuals who are: witnesses; complainants; confidential or non-confidential informants; suspects; defendants; parties who have been identified by the Office of the Inspector General or by other agencies; constituent units of the Department of Treasury and members of the general public in connection with the authorized functions of the Inspector General.

(C) Current and former senior Treasury and bureau officials who are the subject of investigations initiated and conducted by the Office of the Inspector General.

CATEGORY OF RECORDS IN THE SYSTEM:

Letters, memoranda, and other documents citing complaints of alleged criminal or administrative misconduct. Investigative files which include: reports of investigations to resolve allegations of misconduct or violations of law with related exhibits, statements, affidavits, records or other pertinent documents obtained during investigations; transcripts and documentation concerning requests and approval for consensual (telephone and consensual non-telephone) monitoring; reports from or to other law enforcement bodies; prior criminal or noncriminal records of individuals as they relate to the investigations; reports of actions taken by management personnel regarding misconduct and reports of legal actions resulting from violations of statutes referred to the Department of Justice for prosecution.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Reorganization Plan No. 26 of 1950, Treasury Department Order No. 256, dated July 18, 1978, Treasury Department Order No. 101-4, dated April 13, 1979, Treasury Department Order No. 101-14, dated February 20, 1980, and Treasury Department Order No. 101-15, dated February 27, 1980.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Routine disclosure of information contained in this system may be made to appropriate officials of the Treasury Department and the Department of Justice in connection with actual or potential criminal prosecution or civil litigation and to the Office of the General Counsel in connection with requests for legal advice; Special Counsel to the Merit Systems Protection Board; GAO Fraud Task Force; state and local licensing boards; Intelligence Oversight Board, pursuant to requirements of Executive Order 12036 relating to the oversight of foreign intelligence activities in Treasury; and to authorized investigative offices of the Treasury Department constituent units. Disclosure may be made during judicial proceedings and administrative hearings. Routine disclosure may be made (to the extent provided by law or regulation and as necessary) to report apparent violations of law to appropriate law enforcement agencies. Routine disclosure may be made to authorized investigative offices of other Federal Agencies in connection with security procedures. Disclosures may be made to those offices and employees of the Treasury Department who have a need for the records such as those disclosures required by the Freedom of Information Act (5 U.S.C. 522) as amended. For additional routine uses see Appendix AA entitled "Department of the Treasury Appendix Additional Routine Uses".

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Paper records in file jackets and word processing discs maintained in locked safes.

RETRIEVABILITY:

By name and case number. Access to the physical files containing records is by case number obtained from alphabetized card indices and word processing discs.

SAFEGUARDS:

Records and word processing discs are maintained in locked safes and all access doors are locked when office is vacant. The records are available to Office of the Inspector General personnel who have an appropriate security clearance.

RETENTION AND DISPOSAL:

Investigative files are stored on-site for 3 years and indices to those files are stored on-site for 5 years. The word processing discs will be retained indefinitely, however they will be reviewed on a periodic schedule and will be purged when the information is no longer required. Upon expiration of their respective retention periods, the investigative files and their indices are transferred to the Federal Records Center for retention and in most instances destroyed by burning, maceration or pulping when 20 years old.

SYSTEM MANAGER(S) AND ADDRESS:

Inspector General, Main Treasury Building, Washington, D.C. 20220.

NOTIFICATION PROCEDURE:

Pursuant to 5 U.S.C. 552a(j)(2) and (k)(2), this system of records may not be accessed for purposes of determining if the system contains a record pertaining to a particular individual.

RECORDS ACCESS PROCEDURES:

See Notification Procedures above.

CONTESTING RECORD PROCEDURES:

See Notification Procedures above.

RECORDS SOURCE CATEGORIES:

See Categories of Individuals above. This system contains investigatory material whose sources need not be reported.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

As authorized by 5 U.S.C. 552a(j)(2) and (k)(2), this system is exempt from the various provisions of the Privacy Act enumerated in 31 CFR 1.36.

[FR Doc. 81-2007 Filed 1-19-81; 8:45 am]
BILLING CODE 4810-25-M

VETERANS ADMINISTRATION

Education Benefits; Policies and Procedures

AGENCY: Veterans Administration.

ACTION: Request for public comments.

SUMMARY: The Veterans Administration is publishing for public comment statements of procedures which have been adopted by the agency in order to implement some of the provisions of the Veterans' Rehabilitation and Education Amendments of 1980. These statements will better acquaint veterans, eligible persons, educational institutions and the public at large with the way these provisions will be implemented.

DATE: Comments must be received on or before February 19, 1981.

ADDRESS: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, N.W., Washington, D.C. 20420.

Comments will be available for inspection at the above address during normal business hours until March 2, 1981.

FOR FURTHER INFORMATION CONTACT: June C. Schaeffer, Assistant Director for Policy and Program Administration, Education Service, Department of Veterans Benefits, Veterans Administration, 810 Vermont Avenue, NW., Washington DC 20420 (202-389-2092).

SUPPLEMENTARY INFORMATION: This publication contains DVB Circular 22-80-39 and Appendix B to that circular. This circular and appendix implement the provisions of the Veterans' Rehabilitation and Education Amendments of 1980, especially those provisions dealing with flight training and payment of educational assistance allowance to veterans and eligible persons in correspondence training.

This circular and appendix have been distributed through the normal channels. The Veterans Administration is implementing the procedures contained in the circulars. All comments received will be reviewed and used in changing the circular and appendix, if necessary.

Additional Comment Information

Interested persons are invited to submit written comments, suggestions or objections regarding this document to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays) until March 2, 1981. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to a VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: January 13, 1981.

By direction of the Administrator.

Rufus H. Wilson,

Deputy Administrator.

Educational Provisions of the Veterans' Rehabilitation and Education Amendments of 1980 (PL 96–466)

[DVB Circular 22–80–39]

November 4, 1980.

1. *General:* H.R. 5288 was enacted as Pub. L. 96–466 on October 17, 1980. Some major provisions of the law are a 10% two-part increase in chapters 34 and 35 educational assistance, a reduction in the amounts VA can reimburse for correspondence and flight training, and changes to chapters 32, 34, 35, and 36. Provisions of the new law are arranged by effective dates. Those provisions for which more detailed instructions will be issued later are clearly indicated. Changes in the law concerning vocational rehabilitation (chapter 31 of title 38) and veterans' employment provisions (chapters 41 and 42 of title 38) will be covered in separate publications.

2. *Provision Effective January 1, 1977:* Title 38 U.S.C. 1602(1)(A) has been amended to allow participation in the chapter 32 VEAP Program by persons with a prior period(s) of military service, but who are ineligible for chapter 34 educational assistance. Although entry into active duty must still be January 1, 1977 or later, the amendment eliminates the requirement that it be the "initial" entry into military service.

Example: A person first entered into active military service on August 1, 1976 and received a hardship discharge on December 8, 1976 (130 days). He reenlisted on October 22, 1977 and is to be discharged on October 21, 1981. Prior to enactment of this law, he would not have been eligible for chapter 34 or chapter 32 benefits. He did not meet the 181 continuous days active service requirement for chapter 34. He also did not meet the "initial" period of service after January 1, 1977 for chapter 32. However, this law eliminates the "initial" entry requirement and he can now participate in the chapter 32 program.

3. *Provisions Effective October 1, 1980, Chapters 34 and 35:*

Note.—Some portions of provisions listed are effective on different dates. They are included here with the major subjects for clarity. Differing effective dates are clearly identified.

a. *Rates.* Chapters 34 and 35 benefit rates have been increased by 5% effective October 1, 1980. (The remainder of the 10% increase is effective January 1, 1981, as discussed in paragraph 6a of this circular.) The charge against entitlement for correspondence training is at the rate of $327 per month. The charge against entitlement for flight training is at the rate of $302 per month. The October 1, 1980, rates are shown in paragraph 8 a and b of this circular. The following sections of title 38, U.S.C., have been amended to reflect the new rates:

(1) Sections 1682 (a), (b) and (c); and 1787(b)—chapter 34 rates.

(2) Sections 1732(b) and 1742(a)—chapter 35 rates.

(3) Section 1786(a)(2)—correspondence rates.

(4) Section 1677(b)—flight rates.

b. *Tutorial Assistance.* Amendments to 38 U.S.C. 1692(b) increase the tutorial assistance rate and disqualify certain family members as tutors.

(1) The rate of tutorial assistance is increased to $72 per month with a maximum of $869. Payments for tutoring provided on or after October 1, 1980, will be computed at the new rate and will be subject to the new maximum.

(2) Legislation has confirmed VA policy to prohibit payment of tutorial assistance to a veteran for tutoring by his or her own parent, spouse, child (whether or not married or over 18 years of age), brother, or sister.

c. *SAA Reimbursement.* Title 38 U.S.C. 1774(b) is amended to increase the allowance for administrative expenses paid to State approving agencies by 5%. The new allowances range from $662 to $14,288 base. The administrative allowances for expenses incurred on or after October 1, 1980, will be computed on the basis of the following rate chart:

Total salary cost reimbursable	Allowance for administrative expenses
$5,000 or less	$662.
Over $5,000 but not exceeding $10,000.	$1,191.
Over $10,000 but not exceeding $35,000.	$1,191 for the first $10,000 plus $1,103 for each additional $5,000 or fraction thereof.
Over $35,000 but not exceeding $40,000.	$7,205.
Over $40,000 but not exceeding $75,000.	$7,205 for the first $40,000 plus $953 for each additional $5,000 or fraction thereof.
Over $75,000 but not exceeding $80,000.	$14,288.
Over $80,000	$14,288 for the first $80,000 plus $833 for each additional $5,000 or fraction thereof.

d. *Education Loans*

(1) Title 38 U.S.C. 1798(b)(3) is amended to increase the maximum amount a veteran or eligible person may borrow for an education loan to $327 multiplied by the number of months of remaining entitlement. This change applies to loans made on or after October 1, 1980. However, the maximum loan amount for a regular academic year remains $2,500 with corresponding amounts for loans for specific enrollment periods also remaining in effect.

(2) Title 38 U.S.C. 1798(c) is amended to allow education loans for flight training. Pending further instructions regarding this provision, all applications for loans based on flight training will be held.

e. *Extension of Delimiting Date Based on Disability*

(1) Title 38 U.S.C. 1662(a)(1) and 1712(b)(2) are amended to require that an application for an extension of delimiting date based on disability be made within 1 year of the following dates, whichever is latest:

(a) The delimiting period otherwise applicable; or

(b) The termination of the mental or physical disability; or

(c) The effective date of this law.

(2) This amendment codifies the procedures now applied when considering the timeliness of applications for delimiting date extensions. The only change to existing procedures is that the effective date of the provision of the law has been changed from November 23, 1978 (1 year from date of enactment of Pub. L. 95–202) to October 17, 1981 (1 year from date of enactment of Pub. L. 96–466). No review will be conducted of claims previously denied based on the earlier date (November 23, 1978) unless requested by the claimant.

f. *Clarification of Administrator's Authority to Disapprove an Application for Benefits.* Title 38 U.S.C. 1671 and 1721 are amended to provide express authority for disapproving applications for educational benefits filed by a veteran or eligible person if the enrollment would be precluded under any of the provisions of chapter 36 of title 38, U.S.C. This change involves no change in existing procedures.

g. *Elimination of Prohibition Against Sales and Sales Management Courses.* Specific reference concerning the approval of sales and sales management courses has been deleted from 38 U.S.C. 1673 and 1723. Approval of such courses will be treated the same as any other vocational course. Further instructions concerning this change will be provided by a separate circular.

h. *Modification of 50% Employment Reporting for Vocational Programs*

(1) In order to satisfy the 50% employment requirement (38 U.S.C. 1673 and 1723), at least half the persons who completed a program over the preceding 2-year period who are available for employment, must have been employed in the occupational category for which the program was designed to provide training. The law now also requires that the graduate work in the training-related

occupation for an average of 10 hours per week before he/she may be considered *employed* in a related occupation.

(2) The requirement for submission of recurring employment reports is not applicable if:

(a) The institution offering the program has had 35% or fewer of its students enrolled under chapter 34 or 35 during the preceding 2 years; *and*

(b) The program has met all provisions of the 50% employment requirement, including the provision for a *weekly average* of 10 hours training-related employment, for a 2-year period that ends on or after the enactment date of Pub. L. 96–466. Schools that are not currently collecting information on their graduates' *monthly hours* of employment should immediately begin to do so.

(3) The requirement for submission of recurring employment reports may be waived if the Administrator determines the submission of an employment report causes an undue hardship on the institution because only a small percentage of persons enrolled in the institution are receiving chapter 34 or 35 benefits.

(4) Detailed instructions concerning the changes in 50% employment reporting will be provided by a separate circular.

i. *85–15% Ration Computations.* Confirming VA policy, a change to 38 U.S.C. 1673(d) eliminates persons receiving Federal grants such as BEOG (Basic Educational Opportunity Grant) and SEOG (Supplemental Educational Opportunity Grant) from 85–15% ratio computations.

j. *Standards for Determining Satisfactory Progress.* Title 38 U.S.C. 1674 and 1724 are amended to remove the VA standard of progress based on rate of completion. However, the requirement remains that an institution have and enforce its own standards of progress. The provisions of appendix M, Revised, of DVB Circular 20–76–84, concerning courses not counted to satisfy graduation requirements, remain in effect.

k. *Education Outside the United States.* The definition of institution of higher learning in 38 U.S.C. 1652(f) and 1701(a)(10) has been amended to include a foreign institution which offers a course leading to a standard college degree, or the equivalent, and which is recognized as such by the appropriate foreign education authority of the country or other jurisdiction in which the institution is located. This amendment does not involve any change in existing procedures.

1. *Independent Study.* Section 1682(e) is amended to revise the method of computing educational assistance when a student takes a combination of resident training and independent study. This change will greatly simplify the current method for paying these courses which is described in VAR 14280(C) (38 CFR 21.4280(c)).

(1) If independent study is combined with resident training, the total training time will be determined by adding the number of semester hours (or the equivalent) of resident training to the number of semester hours (or the equivalent) of independent study. However, the number of independent study hours that may be counted may not exceed the *maximum* number of hours required for "less than half-time" training (i.e., 5 hours if 12 hours is required for full-time).

Example: A student is enrolled in 4 resident hours and 8 independent study hours in a school where 12 hours are required for full-time measurement. The training time will be determined by adding the 4 resident hours to 5 independent study hours (the maximum that may be counted) for a total of 9 hours or ¾ training time. The student will be paid at the ¾ time rate and entitlement will also be charged at the ¾ time rate.

(2) No general review will be made to identify cases that might receive a higher rate as the result of this change in subparagraph (1) above. However, if such cases are identified in the normal course of adjudicating claims, award adjustments will be made effective October 1, 1980.

Note.—This change should never result in a lower rate.)

(3) If the entire enrollment is by independent study, the VA will continue to measure these courses as less than half-time training as provided in VAR 14280(B) (38 CFR 21.4280(b)). Entitlement will continue to be charged at the one-quarter time rate for these cases.

m. *Courses Offered Through Open-Circuit Television.*

(1) For a course pursued in part by open-circuit television, the law no longer requires that a *major* portion of the credit hours be taken through resident training (38 U.S.C. 1673(c) and 1723(c)). However, a student will always be required to take at least one subject concurrently by resident training in order to receive payment for any open-circuit TV subjects.

(2) Amendments to 38 U.S.C. 1682 and 1732(c) provide the rate of educational assistance allowance payable for a course pursued in part by open-circuit television will be computed in the same manner as for a combined resident/independent study program. (See subparagraph 1(1) above.)

(3) Award adjustments will be handled in the same manner as for independent study. (See subparagraph 1(2) above.)

n. *Charge of Entitlement for Training Taken on a Less Than Half-Time Basis or While on Active Duty.* Title 38 U.S.C. 1682(b) is amended to state that, for institutional courses, entitlement will be charged based upon the monthly training time rates determined under 38 U.S.C. 1788. (This merely codifies the existing practice of charging entitlement based on training time.)

o. *Secondary Education Programs.* Title 38 U.S.C. 1691(a) is amended to provide entitlement-free certain secondary education training for inservice persons as well as for veterans. In addition, veterans not on active duty and eligible spouses enrolled in a program of secondary education will be reimbursed for tuition and fees or the training time rate, whichever is the lesser instead of the former rule allowing payment at the appropriate institutional rate based on training time.

(1) Effective October 1, 1980, no entitlement is charged an *inservice* person pursuing a secondary high school diploma (or equivalency certificate) program. It will continue to be charged for any other secondary program, however.

(2) The rate of educational assistance allowance payable is the lesser of the cost of tuition and fees or the single veteran's institutional rate for the particular training time.

(3) Application of the 85–15% requirement shall be in accordance with 38 U.S.C. 1673(d). Approvals for courses offering a program of secondary education under a contract with the Department of Defense which is given on or adjacent to a military base will be reviewed by regional offices for completeness and then forwarded to Central Office (223) for final approval (38 U.S.C. 1789(b)(6)).

(4) Any veterans enrolled as of October 1, 1980, will continue to receive educational assistance based on training time and number of dependents until interruption or termination of the program.

(5) Additional instructions on this change will be printed as an appendix.

p. *Repeal of Mandatory Counseling for Chapter 35 Dependents.* Title 38 U.S.C. 1720(a) is amended to eliminate mandatory counseling for an eligible child who selects a program other than a standard college degree for his or her original program under chapter 35. Accordingly, claims by eligible sons and daughters will be processed in the same

manner as claims filed by veterans under chapter 34, except that the eligible son or daughter (or parent/guardian) will still be required to furnish information on the educational plan. However, claims filed by: (1) eligible sons or daughters who are identifiable as having a mental or physical disability or handicap; and (2) applicants for a course of specialized vocational training (38 U.S.C. 1736) or for special restoration training (38 U.S.C. 1740–1743); should continue to be referred to the VR&C (Vocational Rehabilitation and Counseling) Division for review by counseling psychologist.

q. *SRT (Special Restorative Training).* Title 38 U.S.C. 1740 is amended to specify that SRT is available only to eligible chapter 35 children. Any spouse currently in training will be allowed to continue until interruption or completion.

r. *Extension of Chapter 35 Child's Period of Eligibility in Certain Cases.* Title 38 U.S.C. 1712(a) is amended to provide an 8-year delimiting date for a chapter 35 dependent child when eligibility arises after the child's 18th birthday (but before age 26) based upon the serviceperson's POW, MIA, or forcibly detained status. However, the delimiting period cannot extend beyond the child's 31st birthday.

s. *Payment of Chapter 35 Benefits.* Title 38 U.S.C. 1731(b) has been reworked to confirm existing policy on paying chapter 35 benefits in accordance with chapter 36 of title 38. No changes in current procedures are necessary.

t. *Periods of Payment.* Language is added to section 1780(a) which clarifies the proper payment period. Payment may only be made for the actual period of pursuit of one or more unit subjects even though this period is shorter than the usual enrollment period. This change confirms existing VA practice.

Example: A student completes an entire semester's work in a 6-week accelerated term which falls within the regular semester. The VA will pay for the 6-week term but not for the entire semester.

u. *Changes in Absence Accounting for NCD (Noncollege Degree) Programs*

(1) Title 38 U.S.C. 1780(a)(2) is amended to provide that, in addition to weekends and legal holidays, up to 5 days in a 12-month period will not be counted as absences if the institution is not in session on those days due to teacher conferences or teacher training sessions, and regularly scheduled classes would otherwise have been held.

(2) ELR's (Education Liaison Representatives) should promptly inform schools that offer NCD programs of this change, and should identify such days on VA Form 22–1998b, Approval Information—Accredited and Nonaccredited NCD Progams and Nonaccredited IHL Programs.

v. *Reports by Veterans, Eligible Persons, and Educational Institutions to the Veterans Administration.* The title of section 1784 of 38 U.S.C. is changed to "Reports by veterans, eligible persons, and institutions; reporting fee."

(1) Title 38 U.S.C. 1784(a) is amended to require both the veteran or eligible person and the institution to promptly report unscheduled terminations or interruptions of training.

(2) Prior to issuance of the annual reporting fee payment, an educational institution must certify that it has exercised reasonable diligence in meeting all applicable requirements of chapters 34, 35, and 36 and will promptly report to the VA any failure to meet such requirements. Compliance with this requirement will necessitate the installation of a computer bar to prevent the release of a reporting fee payment until the regional office received acceptable certification from the school.

w. *School Liability.* Section 1785 was rewritten to clarify the responsibilities and liabilities of trainees and schools. No change in current VA policies or procedures will be required.

(1) The liability of the veteran or eligible person for an overpayment is now made explicit in this section of the law.

(2) A school may be liable for an overpayment resulting from a "willful or negligent false certification." The prior language referred simply to "false certification." This distinction was already made by the VA in DVB Circular 22–79–6, appendix C.

(3) A school is not relieved of liability if the overpayment to the veteran or eligible person is waived. This change codifies the rule contained in VA Regulation 14009(F) (38 CFR 21.4009(f)).

x. *Standard Class Sessions.* Section 1788 is amended to require the VA to consider standard class sessions as well as credit hours in determining the proper training time for resident undergraduate college courses. This change confirms existing VA policy (see DVB Circular 20–77–16) but allows for monthly averaging of standard class sessions in certain cases. The following is a summary of the new language:

(1) Full-time measurement normally will require one standard class session per week for each quarter or semester hour of credit attempted.

(2) A standard class session is defined as 1 hour (or 50-minute period) of academic instruction, 2 hours of laboratory instruction, or 3 hours of workshop training.

(3) However, a course will be measured as full-time if:

(a) It is considered to be full-time for all administrative purposes; and

(b) Less than 50% of the persons enrolled in the course are receiving educational assistance under title 38; and

(c) The course meets all requirements for full-time measurement except for weekly class instruction; and

(d) The course requires that at least one standard class session be scheduled every 2 weeks for each credit hour; and that the monthly total number of standard class sessions must equal the same number that would be required if the student were training full-time on a regular weekly basis.

(4) Detailed instructions for implementing this provision will be issued as an appendix. No change in existing procedures will be attempted until the appendix is published. Cases that might be affected by this liberalization will continue to be processed under existing instructions but will be diaried for future review.

y. *Limitation on Payment of Educational Assistance Allowances to Incarcerated Veterans and Eligible Persons.* Effective October 1, 1980, the rates of educational assistance allowance payable to an *incarcerated* veteran or eligible person are changed. Any incarcerated felon pursuing a program of education on or after this date can be reimbursed for the lesser of cost of tuition, fees and necessary supplies, books and equipment, or the maximum chapter 34/35 rate payable for the particular training time (no dependents). These provisions will also apply if the person is an incarcerated felon residing in a halfway house or participating in a work-release program and has all of his or her living expenses defrayed by a Federal, State, or local government. This provision is included under 38 U.S.C. 1682. There are also restrictions to payment of benefits when any chapter 32, 34 or 35 veteran or eligible person is incarcerated and is having his or her tuition and fees paid by the local, State, or Federal Government (38 U.S.C. 1780(a)). Detailed instructions are forthcoming.

z. *Reduction in Educational Assistance Allowance for Correspondence and Flight Training.*

(1) Effective October 1, 1980, the reimbursement rates for flight and correspondence training are changed. Anyone enrolled in flight or correspondence training on September 1, 1980, will continue to be reimbursed

at the 90% rate as long as he or she is continuously enrolled in that program.

(2) Anyone entering into training between September 2 and September 30, 1980 (inclusive), will be reimbursed at the 90% rate for lessons completed that month. For lessons completed on or after October 1, 1980, the reimbursement rate will be 70% for correspondence (38 U.S.C. 1786(a)(1)) and 60% for flight (38 U.S.C. 1677(b)).

(3) Anyone entering into training October 1, 1980, or later, will be reimbursed at the 70% rate for correspondence and 60% rate for flight. Detailed instructions will be issued as an appendix.

4. Provisions Effective October 1, 1980, Chapter 32

a. *Refund of Contributions in Death Cases*

(1) Section 1624 has been revised to greatly simplify the refund procedure when there is no designated SGLI (Serviceman's Group Life Insurance) beneficiary(ies). Previously, the VA was required to pay the veteran's estate in such cases.

(2) The new wording is as follows:

"In the event of a participant's death, the amount of such participant's unused contributions to the fund shall be paid to the living person or persons first listed below:

"(1) The beneficiary or beneficiaries designated by such participant under such participant's Servicemen's Group Life Insurance policy.

"(2) The surviving spouse of the participant.

"(3) The surviving child or children of the participant, in equal shares.

"(4) The surviving parent or parents of the participant, in equal shares.

"If there is no such person living, such amount shall be paid to such participant's estate."

(3) Detailed instructions will be issued as a revision to DVB Circular 20–77–25, appendix D. In the interim, Adjudication personnel should continue to call Central Office (224B) at FTS 389–2829 for assistance in processing these cases.

b. *Entitlement—Free Pursuit of Secondary Education Programs Under Chapter 32*

(1) Title 38 U.S.C. 1631(b) has been amended to eliminate the approval of PREP courses under chapter 32. However, those courses have been replaced by the approval of pursuit of secondary level programs.

(2) This amendment provides for secondary level courses to be taken by *enlisted persons* during the last 6 months of the participant's first enlistment and at any time thereafter. Note this provision applies only to current and former enlisted members. It does not apply to officers. If the participant is a veteran, it will be necessary to review the DD Form 214 to insure that he/she was an enlisted person before approving the application for benefits. The monthly payments will be calculated as currently done in chapter 32 cases, but the banking record will not be adjusted since there is no charge to entitlement. Tuition and fees are not a factor in determining the monthly rate for these cases. For application of the 85–15% requirement see paragraph 3o(3).

c. *Limitation on Entitlement Under Two or More Programs*

(1) Title 38 U.S.C. 1631(a)(1) has been amended to include chapter 32 in the section of the law (1795) that limits the aggregate period for which a person may receive educational assistance under two or more laws to 48 months (or the part-time equivalent thereof).

(2) DOD (Department of Defense) is being requested to revise their application for chapter 32 documents to include a block requesting the participant to indicate any VA training pursued under prior laws. DOD will notify the VA if such prior training is indicated. Adjudication will then be responsible for notifying the applicable Service Department of the maximum number of months to which the participant is entitled under chapter 32. This is done so that the participant will not be contributing for a longer period than he/she will be entitled.

(3) Detailed instructions will follow as a revision to DVB Ciruclar 20–77–25, Appendix C.

d. *Counseling for Chapter 32.* Title 38 U.S.C. 1641 has been amended to include section 1663 as being applicable to chapter 32. That section provides for counseling upon the veteran's request. Previously, chapter 32 recipients were only provided counseling if it was mandatory (unsatisfactory progress, second change of program, etc.)

e. *Amendments Relating to Monthly Contributions*

(1) Title 38 U.S.C. 1622 has been amended to allow for participant contributions to chapter 32 in the amounts ranging from $25 to $100 per month. Previously, the range was from $50 to $75. Any contribution must still be divisible by five.

(2) This amendment also provides for the applicable department to be able to pay all or part of the participant's monthly contribution in order to encourage persons to enter or remain in the Armed Forces. Prior to enactment of this law, the department were allowed to make a lump-sum DOD contribution on behalf of the participant upon completion of his/her enlistment, but were not allowed to pay the monthly contibutions.

(3) This amendment also permits a participant, while on active duty, to make lump-sum contributions to the fund. In the past, only monthly contributions were permitted, except in exceptional circumstances. Any lump-sum payment is not to exceed a total contribution of $2,700 and can be made in addition to or in lieu of monthly deductions. This lump-sum payment will be considered to have been made by monthly deductions in the amount of $75 per month or in such lesser amount as may be specified by the participant.

5. Miscellaneous Provisions Effective October 1, 1980

a. *Elimination of PREP Programs.* Title 38 U.S.C. 1695 through 1698 have been deleted to omit chapter 34 and chapter 32 PREP. (Pub. L. 94–502 enacted October 15, 1976, eliminated PREP for chapter 34 students.)

b. *Advisory Committee for Veterans' Educational Assistance Programs.* Since a separate advisory committee for rehabilitation is now established under 38 U.S.C. 1521, the Advisory Committee for Veterans' Educational Assistance Programs is now only concerned with the Administration of chapters 32, 34, 35, and 36. The Committee, which includes a veteran representative of the post-Vietnam era, will remain in existence until December 31, 1989.

6. Provisions Effective January 1, 1981, Chapters 34 and 35

a. *Rates.* Chapters 34 and 35 benefit rates will be increased by 4.7% effective January 1, 1981. The charge against entitlement for correspondence training will be at the rate of $342 per month. The charge against entitlement for flight training will be at the rate of $317 per month. The January 1, 1981 rates are shown in paragraph 9a and b of this circular. The following sections of title 38, U.S.C. will be amended to reflect the new rates:

(1) Sections 1682(a), (b) and (c); and 1787(b)—chapter 34 rates.

(2) Sections 1732(b) and 1742(a)—chapter 35 rates.

(3) Section 1786(a)(2)—correspondence rates.

(4) Section 1677(b)—flight rates.

b. *Tutorial Assistance.* The rate of tutorial assistance is increased to $76 per month with a maximum of $911. Payments for tutoring provided on or after Janaury 1, 1981, will be computed at the new rate and will be subject to the new maximum.

c. *SAA Reimbursement.* Title 38 U.S.C. 1774(b) is amended to increase the allowance for administrative expenses paid to State approving agencies by 4.7%. The new allowances range from

$693 to $14,969 base. The administrative allowances for expenses incurred on or after January 1, 1981, will be computed on the basis of the following rate chart:

Total salary cost reimbursable	Allowance for administrative expenses
$5,000 or less	$693.
Over $5,000 but not exceeding $10,000.	$1,247.
Over $10,000 but not exceeding $35,000.	$1,247 for the first $10,000 plus $1,155 for each additional $5,000 or fraction thereof.
Over $35,000 but not exceeding $40,000.	$7,548.
Over $40,000 but not exceeding $75,000.	$7,548 for the first $40,000 plus $999 for each additional $5,000 or fraction thereof.
Over $75,000 but not exceeding $80,000.	$14,969.
Over $80,000	$14,969 for the first $80,000 plus $872 for each additional $5,000 or fraction thereof.

d. *Education Loans.* Title 38 U.S.C. 1798(b)(3) is amended to increase the maximum amount a veteran or eligible person may borrow for an education loan to $342 multiplied by the number of months of remaining entitlement. This change applies to loans made on or after January 1, 1981. However, the maximum loan amount for a regular academic year remains $2,500 with corresponding amounts for loans for specific enrollment periods also remaining in effect.

7. *Miscellaneous Provisions*

a. Title 38 U.S.C. 220 has been amended to expand the responsibilities of the VA Administrator to include advocacy on behalf of veterans.

b. This law also amends certain sections of other laws and amendments regarding the VA that do not pertain to the adjudication of an education claim.

Chief Benefits Director.

Appendix B—Flight and Correspondence Award Processing

[DVB Circular 22–80–39]

November 4, 1980.

1. General

a. Pub. L. 96–466 has increased the entitlement charge rate (legislative rate) and decreased the percent reimbursed to claimants (reimbursement rate) for flight and correspondence courses.

b. There are two increases to the entitlement charge rates: A 5 percent increase effective October 1, 1980, and an additional 4.7 percent increase effective January 1, 1981.

c. Paragraph 2 presents instructions for processing cases under the new entitlement charge rates. Paragraphs 3 through 7 describe how cases which receive the lower reimbursement rates will be handled.

d. Flight and correspondence awards and certifications being held in stations per previous Central Office instructions can be processed according to the following procedures.

e. These provisions apply to chapters 34–35 cases only; chapter 32 flight and correspondence awards are not affected.

2. Entitlement Charge Rates

a. *Correspondence.* Effective October 1, 1980, entitlement will be reduced at the rate of 1 month for each $327 paid for correspondence lessons serviced by schools on or after that date. Effective January 1, 1981, this amount will be increased to $342.

(1) Program modifications have been installed to charge entitlement at the old rate of 1 month for each $311 paid if the commencing date of the certification period on which payment is based is prior to October 1, 1980. If the certification period begins on or after October 1, 1980, entitlement will be charged at the rate of 1 month for each $327 paid.

(2) Since October 1, 1980 marks the beginning of a new certification quarter for correspondence courses, a proper entitlement charge will be effected as a result of routine processing of the computer-generated VA Form 22–6553b, Certification of Lessons Completed. Care must be taken, however, when processing a 35C transaction via other than a computer-generated VA Form 22–6553b to ensure that the certification period does not overlap legislative rates. If certification must be processed for lessons serviced both before and after October 1, 1980, submit two 35C transactions: The first, for those lessons completed prior to October 1; the second, for lessons serviced on or after October 1. Transmittal of these transactions must be controlled to ensure proper sequential processing.

(3) Stations are reminded that the legislative rate date now becomes October 1, 1980, and that supplemental award actions (14C) taken on correspondence awards will reject if their effective date is earlier than October 1, 1980.

b. *Flight.* Effective October 1, 1980, entitlement will be reduced at the rate of 1 month for each $302 paid for hours of flight training received on or after that date. Effective January 1, 1981, this amount will be increased to $317.

(1) Program modifications have been installed to charge entitlement at the old rate of 1 month for each $288 paid if the commencing date of the certification period on which payment is based is prior to October 1, 1980. If the certification period begins on or after October 1, 1980, entitlement will be charged at the rate of 1 month for each $302 paid.

(2) If certification must be processed for training completed both before and after October 1, 1980, submit two 35F transactions: The first, for training completed prior to October 1; the second for training completed on or after October 1. Transmittal of these transactions must be controlled to ensure proper sequence processing.

c. *January 1, 1981 Increase.* The same basic procedures outlined in subparagraphs a and b above will also be followed for the entitlement charge rate increase due January 1, 1981. This can be done by substituting the new rates and dates where appropriate.

3. Reimbursement Rates (Percent of Reimbursement)

a. *Program Begins On or Before September 1, 1980.* Any person entering into a program of education in flight or correspondence training on or before September 1, 1980, will continue to be reimbursed at the 90% rate for completed training. This 90% rate will apply to subsequent courses provided (1) that they are part of the same program of education, and (2) that enrollment is continuous. (See definitions in par. 4.)

b. *Program Begins September 2, 1980 Through September 30, 1980.* Any person entering into a program of education in flight or correspondence training between September 2, 1980 and September 30, 1980, inclusive, will be reimbursed as follows:

(1) Flight instruction completed prior to October 1, 1980, will be reimbursed at the 90% rate. Instruction completed on or after October 1, 1980, will be reimbursed at a *60%* rate.

(2) Correspondence lessons serviced by the school prior to October 1, 1980, will be reimbursed at the 90% rate. Lessons serviced by the school on or after October 1, 1980, will be reimbursed at a *70%* rate. If a certification is received which overlaps October 1, 1980, the school should be contacted to determine the actual dates the lessons were serviced.

c. *Program Begins On or After October 1, 1980*

(1) Flight instruction will be reimbursed at the 60% rate.

(2) Correspondence lessons serviced will be reimbursed at the 70% rate.

4. Concepts

a. *Protection of the 90% Rate.* Any person enrolled in a vocational program of flight or correspondence training prior to September 2, 1980, will continue to receive the 90% reimbursement rate for subsequent courses provided:

(1) A change of program is not chargeable under current regulations, and

(2) Enrollment remains continuous.

b. A person will be considered to be continuously enrolled as long as there is no period greater than 6 months between the exact date the last correspondence lesson was serviced or last flight instruction was received and the date the next correspondence lesson is serviced or flight instruction is received. A change of schools will not break the continuity of enrollment unless a change of program is also involved.

Note.—The Date Last Certified in the master record is not necessarily the date the last correspondence lesson was serviced or the date the last flight instruction was received. If this ending date is not in either the claims folder or Finance activity records then it should be requested from the school if it is needed in order to make a determination under this subparagraph.

c. *Beginning Date of Enrollment.* The effective date of a flight or correspondence award will be determined in accordance with current VA regulations and directives. However, for the purposes of determining if a program of flight or correspondence began on or before September 1, 1980, and therefore qualifies for the 90% reimbursement rate, the following rules apply:

(1) A flight training beginning date can be either the date a contract to pursue training was signed, the date training began, or the date an application to

pursue training was received in VA, whichever is earlier.

(a) If the flight school requires a formal contract to be signed by the student in order to pursue training it can be used to establish the beginning date of enrollment.

(b) To qualify under this provision, the veteran must have signed an individual, *written agreement* to pursue training. Statements merely expressing interest in the program or verbal agreements are not acceptable.

(c) A photocopy of the agreement must be submitted by the school to document these claims.

(d) Actual flight instructions must have been received within 6 months of the date of the agreement or date of receipt by VA of an application for flight training, whichever is earlier.

(2) The correspondence training beginning date will be the date the contract was signed (Item 4 on VA Form 22–1999c, Certification of Affirmation of Enrollment Agreement—Correspondence Course). It must be stressed that this date is to be used only to determine if the program began on or before September 1, 1980; it is *not* to be used as the effective date of the award.

5. Flight and Correspondence Award Processing

Until computer programing can be changed, special procedures will be required to enter flight and correspondence awards reimbursable at the lower rates. Awards which will be reimbursable at the 90 percent rate can continue to be entered normally.

a. *Correspondence—Reduced Reimbursement Cases (70 percent).* In order to have current computer programing issue the correct reimbursement rate for correspondence lessons serviced, the following procedures should be followed:

(1) Both the Total Charges and the Rate Per Lesson for the course should be multiplied by a factor of .778. The products of these calculations must be coded in on the award instead of the approved rates. When completed lessons are certified by the school and processed for payment into the computer, the actual payment issued will automatically equal the (correct) 70 percent rate. Fractional cents should be rounded to the nearest cent.

Example: The approved rates for a correspondence course are:

Total Charges	$1,000
Rate Per Lesson	10
Lessons	100

When multiplied by the (.778) factor, the new rates to be entered on the award are:

Total Charges	$778.00
Rate Per Lesson	7.78
Lessons	100

When the computer issues payment (temporarily using the old formula for a 90 percent reimbursement rate), it will pay at the correct current 70 percent reimbursement rate of $7 for each lesson for which payment is due.

(2) The award letter will be suppressed and a dictated letter patterned after the correspondence award letters shown in M22–2, part IV, chapter 11, must be sent informing the claimant of the award of benefits and the reimbursement rate(s). The reduced reimbursement rates (70 percent) will be inserted in lieu of the 90 percent figures.

(3) The folder should be "flashed" and the Target File Pull Indicator set to indicate that a lower reimbursement rate is being paid and that the Total Charges and Rate Per Lesson were reduced.

(4) A copy of the award should be routed to the Finance activity with a covering VA Form 3230 indicating that the reimbursement rate is lower.

(5) Finance should maintain these award copies for future computer adjustment actions and payment of certifications.

(b) *Flight—Reduced Reimbursement Cases (60 percent).* Flight awards which are reimbursable at the reduced rate may be entered normally except that:

(1) The award letter will be suppressed and a dictated flight letter patterned after the letters shown in M22–2, part IV, chapter 11, should be sent to the veteran informing him or her of the award of benefits and the reimbursement rate(s).

(2) The procedures outlined in subparagraph a(3), (4) and (5), will also be followed for flight cases.

(3) The actual payment of the reduced rate will be accomplished by adjusting certification processing (see par. 6b).

c. *Combination of Reimbursement Rates Cases*

(1) If a *flight* award is reimbursable at both the 90 percent rate and the reduced rate (see par. 3b), then the procedures outlined in subparagraph b should be followed.

(2) If a *correspondence* award is reimbursable at both rates then two awards should be prepared.

(a) One will show the actual (September) beginning date of the award, and will be entered normally (no reduction of Rate Per Lesson or Total Charges as required in subparagraph a above) except that the award letter will be suppressed.

(b) The second award will be coded per subparagraph a, on VA Form 22–1997S, and will show an October 1, 1980 beginning date. In addition, a "stop payment" date of October 1, 1980, will also be coded on this award. Both the original (OCR sheet) and carbon copy of this award will be forwarded to the finance activity along with a copy of the September award. A VA Form 3230 will also be sent to Finance stating that September training will be reimbursed at the 90 percent rate and all subsequent training will be reimbursed at the 70 percent rate. (See par. 6a.) The award letter will also be suppressed for this award.

(c) A dictated letter will be sent to the claimant explaining the dual reimbursement rate provisions.

6. Certification Processing

Until further notice, all flight and correspondence certifications (VA Forms 22–6553c, Monthly Certification of Flight Training, and 22–6553b) for periods on or after October 1, 1980, must be reviewed in the Finance activity before processing, to identify certifications payable at a reduced rate.

a. *Correspondence Certifications* for either the 90% reimbursement rate or the 70% reimbursement payments will have already been made to the award (see par. 5a). However, if certification is received for an award which is to be reimbursed under both rates (see par. 5c), the following additional steps should be taken:

(1) Enter a certification transaction (35C) for the lessons completed during September only.

(2) Submit the stop pay/reentrance award with the October 1, 1980 effective dates (being held in the Finance activity per par. 5c(2)) for entry into the next cycle. Any lessons completed during September must be withheld from this award (see M22–2, pt. IV, par. 4.14e(1)). When this award processes, it will terminate the previous 90% reimbursement) award and begin issuing payments at the reduced rate.

(3) Enter the remaining certifications with an effective date of October 1, 1980.

b. *Flight Certification* for awards reimbursable at the 90% rate can be entered normally. However, certifications (35 F transactions) reimbursable at the 60% rate must be entered as follows:

(1) The charges for the flight training to be certified must be multiplied by a factor of (.667). Fractional cents should be rounded to the nearest cent.

(2) The product of this calculation will be entered into the transaction in lieu of the actual charges certified by the school.

(3) When the computer issues payment for this certification (at the current 90% rate), the actual payment received by the veteran will be 60% of the charges certified by the school.

(4) Accurate records of the amount of flight instruction certified by the school must be maintained. Since the amount entered into the computer has been factored-down, there will be no automatic termination of the award when all the charges have been certified. When the school has certified the entire approved charges for the course, the award should be terminated with a "Quit Cert" or stop-payment.

7. Notice to Schools

It is very important that all schools which offer flight and correspondence awards are notified of the change to the reimbursement rates. The station Education Liaison representative should forward a letter to all affected schools, highlighting the new reimbursement rate provisions and VA policies for implementing these provisions.

8. Summary

It is very important that flight and correspondence cases which are to be reimbursement at a reduced rate are identified and controlled until programing for automatic adjustments are installed. This will require coordination between Adjudication Divisions and Finance activities. When the computer programing has been changed, additional award actions will have to be taken on these reduced reimbursement rate cases. Stations should attempt to centralize the award and certification activities involved in these types of training as much as possible.

9. Any problems or questions concerning these instructions should be referred to Central Office at FTS 389–3150.

Dorothy L. Starbuck,

Chief Benefits Director.

[M-304, Jan. 14, 1981]

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 9:30 a.m., January 21, 1981.

PLACE: Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notation.
2. Northwest Airlines, Inc., credit card refund practices. (Memo No. 202, BCCP, BDA)
3. Docket 37313, *Air Florida* v. *Eastern Air Lines*—petition for review of BCP dismissal of third-party complaint alleging predatory conduct. (Memo No. 203, OGC)
4. Dockets 38948, 38900, *Muse Air Corporation Fitness Investigation, Application of Muse Air Corporation.* (OGC)
5. Docket 30310, Certification of Commuter Air Carriers. (Memo No. 223, OGC)
6. Dockets 33361 and 32502, *Former Large Irregular Air Service Investigation, Application for Air Specialities Corp.* (Memo No. 211, OGC)
7. Dockets 35392, 38468, 38494, 38564, 38533, 38595, 38612, 38619, 38636, 38655, 38691, 38715, 38777—Applications for exemptions from section 401 and 403 of the Act in order to resell air transportation obtained in a barter transaction with an airline. (Memo No. 210, OGC, BDA)
8. Docket 38907, Amendment to conform the air taxi operator rules in Part 298 to the new data requirements for fitness determinations in Part 204. (Memo No. 207, OGC, BDA)
9. Docket 38022, Petition by the Performance Incentives Company for rulemaking to remove the limitation on the commission that carriers can pay to travel agents for pro rate and single entity charters. (Memo No. 208, OGC, BDA)
10. Transfer to GPO of responsibility for distribution of CAB publications. (OGC, OASO, BIA)
11. Dockets EAS-416, 417, 418, 419, 420, 422, 423, 424, 425, 426, Appeal of the Essential Air Transportation Determinations of the Cities of Dodge City, Garden City, Goodland, Great Bend, Hays, Independence/Coffeyville/Parsons, Liberal/Guymon, Manhattan/Junction City/Ft. Riley, Salina, and Topeka, Kansas. (Memo No. 204, OGC, OCCR, BDA)
12. Docket EAS-521, Applications of Air Vectors and Courtesy Air Service to provide essential air transportation, with subsidy, to Glens Falls, New York. (Memo No. 212, BDA, OCCR)
13. Dockets 37501, EAS-565, and 38224, Essential Air Service at Hazleton, PA and notice of Perkiomen Airways to terminate service at Hazleton. (Memo No. 012-C, BDA, OCCR)
14. Docket 37720, Notice of intent of Aspen Airways to terminate service at Montrose, Colorado. (Memo No. 224, BDA, OCCR)
15. Dockets 38968, 38971, 39016 and 39031—Republic Airlines' notice to suspend service at Devils Lake, North Dakota, in 18 nonstop or single-plane markets, and application for an exemption. (BDA, OCCR)
16. Dockets 37972, 38706 and 38705, Cascade's petition for reconsideration and clarification of Order 80-11-73. (Memo No. 063-A, BDA, OCCR)
17. Docket EAS-667, Appeal of Essential Air Service Determination for Erie, Pa, filed by USAir. (OGC, BDA, OCCR)
18. Procedures for Handling Section 419 Subsidy Rates at the End of the Current Subsidy Rate Periods: Request for instructions. (Memo No. 198, BDA, OCCR, OGC, OEA)
19. Docket 35035, Application and petition of Cochise Airlines to remove the subsidy limitation condition from its section 401 certificate. (Memo No. 209, 209-A, BDA, OCCR)
20. Docket 38108, Application of Part 250 to Operators of Small Aircraft. (BDA, OGC)
21. Docket 33789, Petition of Air Florida, Inc. for reconsideration of Order 79-11-103. (Memo No. 205, BDA)
22. Docket EAS-633, Renewal appeal of essential air service determination of Pago Pago filed by the Government of American Samoa. (OGC, OCCR, BDA)
23. Docket 38608, Petition of Aerolineas Nacinonales del Ecuador, S.A., (ANDES) for reconsideration of Order 80-10-179, granting Aeroservicios Ecquatorianos, C.A. (AECA) a limited exemption to operate nonscheduled cargo flights between the United States and Colombia. (Memo No. 021-A, BIA, BCP, OGC)
24. Docket 38999, Application of Guy-America Airways, Inc. for a certificate of public convenience and necessity pursuant to section 401 of the Act to engage in foreign air transportation of persons, property and mail (New York-Georgetown, Guyana) (Memo No. 213, BIA, OGC, BALJ)

STATUS: Open.

3

FEDERAL DEPOSIT INSURANCE CORPORATION.

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:10 p.m. on Thursday, January 15, 1981, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider the following matters:

Recommendation regarding the liquidation of assets acquired by the Corporation from Franklin National Bank (In Liquidation), New York, New York (Case No. 44,653-L).
Personnel matters.

In calling the meeting, the Board of Directors determined, on motion of Chairman Irvine H. Sprague, seconded

by Director William M. Isaac (Appointive), concurred in by Mr. H. Joe Selby, acting in the place and stead of Director John G. Heimann (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the meeting was exempt from the open meeting requirements of the "Government in the Sunshine Act" by Authority of subsections (c)(2), (c)(6), (c)(8), and (c)(9)(B) thereof (5 U.S.C. 522b (c)(2), (c)(6), (c)(8), and (c)(9)(B)).

Dated: January 15, 1981.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL ENERGY REGULATORY COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 46 FR 2767, January 12, 1981.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 10 a.m., January 14, 1981.

CHANGE IN THE MEETING: The following item has been added:

Item No., Docket No., and Company

CP-7: CP81-139-000, Southern Energy Company, Southern Natural Gas Company and Boston Gas Company.

Lois D. Cashell,

Acting Secretary.

[S-100-81 Filed 1-16-81; 3:57 pm]

BILLING CODE 6450-85-M

5

FEDERAL ENERGY REGULATORY COMMISSION.

TIME AND DATE: 10 a.m., January 22, 1981.

PLACE: Room 9306, 825 North Capitol Street NE., Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Acting Secretary; telephone (202) 357-8400.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the Division of Public Information.

Power Agenda—477th Meeting, January 22, 1981, Regular Meeting (10 a.m.)

CAP-1. Docket No. ER81-151-000, Iowa Utilities Co.
CAP-2. Docket No. ER81-146-000, New England Power Co.
CAP-3. Docket Nos. ER77-354 and ER78-14, Missouri Utilities Co.
CAP-4. Docket Nos. ER80-116 and ER80-511, Niagara Mohawk Power Co.
CAP-5. Docket No. ER80-298, El Paso Electric Co.
CAP-6. Docket No. ER80-473, Duke Power Co.
CAP-7. Docket No. ER80-2, Consolidated Edison, Co. of New York
CAP-8. Docket No. EL81-5-000, Edison Electric Institute
CAP-9. Docket No. EF80-3041, Southeastern Power Administration—Kerr-Philpott Projects

Miscellaneous Agenda—477th Meeting, January 22, 1981, Regular Meeting

CAM-1. Docket No. QF80-25, Granite City Steel
CAM-2. (a) Docket No. RM79-76 (Wyoming—3), high-cost gas produced from tight formations; (b) Docket No. RM79-76 (Louisiana—1), high-cost gas produced from tight formations
CAM-3. Docket No. GP81- , USGS New Mexico, South Central Region, Section 108 NGPA Determination, AMOCO Production Co., L.C. Kelly No. 1 Well USGS Docket No. NM-4304-79, FERC Control No. JD80-11312

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 46 FR 2453, January 1, 1986.

STATUS: Closed meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Wednesday, January 7, 1981.

CHANGES IN THE MEETING: Additional meeting. The following items were considered at a closed meeting scheduled for Thursday, January 15, 1981, at 9:15.

Regulatory matter regarding financial institutions.
Consideration of *amicus* participation.

Chairman Williams and Commissioners Loomis, Evans, and Friedman determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Paul Lowenstein at (202) 272–2092.

January 15, 1981.

[S–98–81 Filed 1–16–81; 3:47 pm]

BILLING CODE 8010–01–M

19

SECURITIES EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of January 19, 1981, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meeting will be held on Monday, January 19, 1981, at 10:00 a.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 522b(c)(4)(8)(9)(A) and (10) and 17 CFR 200.402(a)(4)(8)(9)(i) and (10).

Chairman Williams and Commissioners Loomis, Evans, and Friedman determined to hold the aforesaid meeting in closed session.

The subject matter of the closed meeting scheduled for Monday, January 19, 1981, at 10:00 a.m., will be:

Freedom of Information Act appeal.
Freedom of Information Act appeals and Confidential treatments.
Regulatory matter bearing enforcement implications.
Consideration of *amicus* participation.
Insitution of an administrative proceeding of an enforcement nature.
Institution of injunctive actions.
Settlement of injunctive actions.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Bruce Mendelsohn at (202) 272–2091.

January 15, 1981.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/FSQS		DOT/FAA	USDA/FSQS
DOT/FHWA	USDA/REA		DOT/FHWA	USDA/REA
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/NHTSA	LABOR		DOT/NHTSA	LABOR
DOT/RSPA	HHS/FDA		DOT/RSPA	HHS/FDA
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	
CSA			CSA	

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.
Comments on this program are still invited.
Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408

NOTE: As of September 2, 1980, documents from the Animal and Plant Health Inspection Service, Department of Agriculture, will no longer be assigned to the Tuesday/Friday publication schedule.

REMINDERS

The "reminders" below identify documents that appeared in issues of the **Federal Register** 15 days or more ago. Inclusion or exclusion from this list has no legal significance.

Rules Going Into Effect Today

AGRICULTURE DEPARTMENT

Food Safety and Quality Service—

65515 10–3–80 / Meat grading standards; beef carcass handling

[*See also* 45 FR 51757, 8–5–80]

JUSTICE DEPARTMENT

Immigration and Naturalization Service—

84011 12–22–80 / Applications for certificates of citizenship; witness requirements

84010 12–22–80 / Petition to classify alien as immediate relative of a U.S. citizen or as a preference; passport as evidence of citizenship

Occupational Safety and Health Administration

Occupational Exposure to Lead; Supplemental Statement and Amendment of Standard; Final Rule

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H-004E]

Occupational Exposure to Lead; Supplemental Statement of Reasons; and Amendment of Standard

AGENCY: Occupational Safety and Health Administration (OSHA), U.S. Department of Labor.

ACTION: Final Rule; Supplemental Statement of Reasons; and Amendment of Standard.

SUMMARY: This supplemental statement of reasons sets forth OSHA's reasoning and conclusions with regard to the technological and economic feasibility of meeting the permissible exposure limit (PEL) for lead of 50 micrograms per cubic meter ($\mu g/m^3$) as an 8-hour time weighted average for 46 specified industries or occupations. The statement is made in response to an order of the U.S. Court of Appeals for the D.C. Circuit which required OSHA to reconsider the question of feasibility for these industries. For most of the 46 categories, the supplemental record demonstrates that the standard is feasible either because exposure levels do not generally exceed the PEL, thus requiring minimal or no compliance actions, or because exposure levels above the PEL can be controlled by available and affordable engineering controls or work practices within the time periods permitted for compliance. Additionally, for a few industry categories, the record shows that feasible control measures are available, but that an extension in the compliance schedule is needed to assure the feasibility of their implementation. For some operations within certain industries, respiratory protection *may* be the only technologically feasible means of compliance.

EFFECTIVE DATE: February 20, 1981.

FOR FURTHER INFORMATION CONTACT: Dr. Robert P. Beliles, Occupational Safety and Health Administration, Room N3718, U.S. Department of Labor, Washington, D.C. 20210, 202-523-7081.

SUPPLEMENTARY INFORMATION:

A. Regulatory and Judicial History

On October 3, 1975, OSHA proposed a standard for occupational exposure to lead (40 FR 45934) to replace the permissible exposure limit which had been adopted from a national consensus standard pursuant to § 6(a) of the Occupational Safety and Health Act (Act). A lengthy informal hearing was held in Washington, D.C. and two regional hearings were held in St. Louis, Missouri, and San Francisco, California, in the spring of 1977. In the fall of the same year, hearings were held for the receipt of additional information on certain specific issues, including medical removal protection. The hearing record was closed in January of 1978. On November 14, 1978, a final standard which limited occupational exposure to airborne concentrations of lead to 50 $\mu g/m^3$ (micrograms per cubic meter) based on an 8-hour time weighted average (TWA) was published in the **Federal Register** (43 FR 52952). Additional protective provisions included environmental monitoring, recordkeeping, employee education and training, medical surveillance, medical removal protection, hygiene facilities, and other requirements. Supplemental attachments were published November 21, 1978 (43 FR 54354).

Immediately after promulgation, the lead standard was challenged by both industry and labor in several U.S. Courts of Appeals. All cases were transferred and consolidated in the U.S. Court of Appeals for the District of Columbia Circuit. Simultaneously, various parties sought administrative reconsideration and stays of the regulation, one of which was granted. On March 1, 1979, the D.C. Circuit partially stayed the lead standard by delaying the requirement for installing engineering controls and instituting work practices. However, enforcement of the PEL and provisions for environmental monitoring, recordkeeping, employee education and training, medical surveillance, and medical removal protection was permitted to begin on March 1, 1979.

In a lengthy opinion issued on August 15, 1980, the United States Court of Appeals for the District of Columbia Circuit, per Chief Judge Wright, upheld the validity of OSHA's lead standard in most respects. However, the court found that OSHA failed to present substantial evidence or adequate reasons to support the feasibility of the standard with respect to certain industries, and remanded the standard to the Agency for reconsideration of the question of the technological and economic feasibility of the standard for those industries.

With respect to the following industries, the court found OSHA's analysis of the feasibility of the standard to be adequate and upheld the validity of the entire standard: primary smelting; secondary smelting; printing; can manufacturing; battery manufacturing; paint and coatings manufacturing; ink manufacturing; wallpaper manufacturing; electronics manufacturing; and gray-iron foundries.

The court also found that:

> OSHA failed to present substantial evidence or adequate reasons to support the feasibility of the standard for the following industries: Nonferrous foundries; pigment manufacture; shipbuilding; auto manufacture; solder manufacture; wire patenting; pottery; brick manufacture; agricultural pesticides manufacture; leather manufacture; pipe galvanizing; gasoline additives manufacture; linoleum-rubber-plastics manufacture; paint spraying; ammunition manufacture; smelting and refining of zinc, silver, gold, platinum, copper, and aluminum; machining; lead burning; glass manufacture; textile manufacture; book binding; steel alloy manufacture; terne metal manufacture; glass polishing and spinning; cutlery manufacture; diamond processing; plumbing; jewelry manufacture; pearl processing; casting; cable coating; electroplating; explosives manufacture; lamp manufacture; sheet metal manufacture; tin rolling; telecommunications; and independent collecting and processing of scrap lead (excluding collecting and processing that is part of a secondary smelting operation): (*United Steelworkers of America* v. *Marshall*, No. 79-1048 (D.C. Cir. Aug. 15, 1980), slip opinion, pg. 245).

The court did not vacate any portion of the lead standard. Rather, it stayed the enforcement of 29 CFR 1910.1025(e)(1) (requiring compliance with the PEL through engineering controls and work practices alone) for those industries for which OSHA failed to present substantial evidence or adequate reasons to support the feasibility of the standard. The court gave OSHA 6 months in which to complete its reassessment of the feasibility issue.

Accordingly, on September 24, 1980, OSHA published a **Federal Register** notice (45 FR 63476) which reopened the rulemaking record and scheduled a hearing for the limited and express purpose of soliciting and receiving additional information pertaining to the technological and economic feasibility of meeting the 50 $\mu g/m^3$ PEL solely by engineering controls and work practices. To supplement the notice, OSHA mailed nearly 200 letters urging participation in the rulemaking to representative business concerns, trade associations and unions so that the record might be more fully developed. Enclosed with the letters were copies of the notice. The notice requested information only for those industries for which the court ruled that OSHA had failed to present substantial evidence or adequate reasons to support feasibility, or for any other industry not heretofore identified as involving lead exposure. To help facilitate the formulation of comments, OSHA included in the notice a list of 30 specific questions pertaining to

feasibility. OSHA indicated that it expected to submit additional information to the record.

In attempting to meet the remand deadline set by the court, OSHA set October 27, 1980, as the date by which all comments must be received and notices of intention to appear at the hearing filed—a 33-day period. While this time period constituted legally adequate notice (see 29 U.S.C. 655(b)), the Agency recognized that it was a relatively short time period in which to conduct an OSHA rulemaking. The time allowed was nonetheless considered necessary if the rulemaking were to be completed in accordance with the court's deadlines. In the view of the Agency, the scheduled hearing together with the posthearing comment period would provide additional opportunity for input from interested parties.

To further develop the record, OSHA conducted several research efforts. Computer and other types of literature searches were conducted to find control technology studies relevant to these industries. NIOSH Health Hazard Evaluations concerning lead exposure were researched for relevant feasibility evidence. EPA environmental emission identification and control studies and other EPA data were searched for relevant evidence. In an attempt to obtain data from its own collective experience, OSHA researched several enforcement case files using MIS (Management Information System) data. Looking for relevant economic feasibility data, OSHA economists culled large amounts of publicly available economic and financial data—e.g., SEC 10–K reports and FTC quarterly financial reports. Additionally, a contractor, Radian Corporation, was employed to generate data by contacting industry sources.

During this concerted data collection effort OSHA looked for all relevant evidence and did not exclude from the record any documents relating to technological or economic feasibility. This information generated and collected by OSHA, which consists of approximately 500 entries, was compiled and presented to the OSHA Docket Office by October 27, 1980, receiving the exhibit number, 476.

In response to the notice, OSHA received 41 timely comments (Exhibit 475) and 9 late comments (Exhibit 478). Additionally, 28 interested parties filed timely notices of intention to appear at the hearing (Exhibit 477). The informal public hearing ran from the fifth to the seventh of November and was recorded by 800 pages of transcript. OSHA presented six expert witnesses who were vigorously cross examined. Although 28 parties had filed intentions to appear, only two industry presentations were made and were subject to questioning. Both unions who had filed appeared and, following their testimony, answered questions.

The record remained open for the receipt of additional comment and data until December 1, and, for posthearing argument until December 10, 1980. Thirty-four such submissions were received. Final certification of the record was completed on December 17, 1980, by Administrative Law Judge Feirtag.

In light of the above efforts to obtain all available evidence, any absence of evidence in the record cannot be due to the lack of notice or an opportunity to submit it or to any deficiencies in the agency's efforts. Where the record has factual gaps, it is because there is no additional evidence or because parties uniquely in possession of certain information have chosen not to submit it.

B. Decision by the U.S. Court of Appeals and the Remand Order

A brief review of the court's decision will assist in an understanding of these remand proceedings. By a 2–1 vote, the court rejected substantive and procedural challenges to the standard's validity, and except for the application of the engineering control provision to specified industries, affirmed the standard and lifted the partial stay in effect since March 1, 1979. In responding to a variety of arguments against the validity of the standard, the court concluded:

> 1. The rulemaking leading to the new lead standard was free of procedural error.
>
> 2. The substantive provisions of the lead standard, including the medical removal protection program, the multiple physician review program, and the rules governing access to medical records, fall within the scope of OSHA's statutory power and are reasonable exercises of that power.
>
> 3. OSHA presented substantial evidence for its decision that a Permissible Exposure Limit of 50 $\mu g/m^3$ was necessary to prevent material impairment of employees' health.
>
> 4. OSHA presented substantial evidence for the feasibility of the lead standard for the following industries: primary lead smelting, secondary lead smelting, battery manufacture, electronics, gray iron foundries, ink manufacture, paints and coatings manufacture, wallpaper manufacture, can manufacture, and printing. For these industries the standard shall go fully into effect.
>
> *Ibid.*, p. 244.

With respect to certain other industries, the court found that OSHA failed to present substantial evidence or adequate reasons to support the feasibility of the standard. These industries are listed above.

For these industries, the court remanded the rulemaking record and gave OSHA 6 months to reconsider the feasibility of the standard with instructions to "return the record * * * with sufficient evidence and fuller explanation * * *" *Ibid.*, p. 245. During this 6 month period the court stayed the effectiveness of a single provision (section (e)(1) which requires compliance with the PEL by engineering controls and work practices) for these industries. All other provisions were immediately put into effect.[1]

In deciding the feasibility issues presented in the case, the court provided detailed guidelines against which the feasibility of the standard for the industries covered by the remand order will be judged. These are briefly discussed here as a framework for the specific industry discussions which follow. For the most part, the court affirmed the guidelines OSHA had used for its initial feasibility determinations in Attachment D to the preamble (43 FR 54474–54476). The court concluded:

> First, within the limits of the best available evidence, and subject to the court's search for substantial evidence, OSHA must prove a reasonable possibility that the typical firm will be able to develop and install engineering and work practice controls that can meet the PEL in most of its operations. OSHA can do so by pointing to technology that is either already in use or has been conceived and is reasonably capable of experimental refinement and distribution within the standard's deadlines.
>
> The effect of such proof is to establish a presumption that industry can meet the PEL without relying on respirators, a presumption which firms will have to overcome to obtain relief in any secondary inquiry into feasibility in any of the proceedings we discuss below.
>
> * * * * *
>
> Second, as for economic feasibility, OSHA must construct a reasonable estimate of compliance costs and demonstrate a reasonable likelihood that these costs will not threaten the existence or competitive structure of an industry, even if it does portend disaster for some marginal firms.
>
> *Ibid.*, p. 159.

Of significant note, the court ruled that feasibility will be reviewed on an industry-by-industry basis, therefore requiring OSHA to "examine the feasibility of each industry individually" *Ibid.*, p. 223. OSHA's failure to include in the preamble separate industry-by-

[1] On December 8, 1980, the Supreme Court stayed additional provisions of the standard for all affected industries pending the filing and disposition of petitions for certiorari in the Supreme Court. The Supreme Court's stay is identical to the one originally imposed by the Court of Appeals on March 1, 1979, and supersedes the Court of Appeal's limited stay.

industry analyses of all relevant factors led the court to reject the Agency's general finding of feasibility. Of the 38 industries which the court remanded, only four (nonferrous foundries, pigment manufacture, shipbuilding, and auto manufacture) had any individual discussions of both technological and economic feasibility. The court rejected OSHA's attempt to infer that a 1-year compliance period would be feasible for a large class of diverse industries whose only common characteristics were that exposure levels were generally low and that conventional engineering controls and work practices could probably be utilized at small cost. *Ibid.*, p. 218–224.

The court however, did not require that OSHA

> always present a detailed analysis for individual operations in supporting the feasibility of the standard. In industries where lead exposures are generally very low, or where strong evidence shows the standard to be technologically practicable for the most troublesome parts of the industry, OSHA can find the standard generally feasible and allow the variance process to account for unanticipated difficulties in isolated operations. But such an operation-by-operation analysis seems crucial in an industry where the evidence clearly suggests impracticality in important stages of the industrial process.
> *Ibid.*, p. 214, n. 155.

The court also reaffirmed the often-stated view that the OSH Act is a "technology-forcing" statute, *ibid.*, p. 142, and found that in proving technological feasibility

> [the court] cannot require of OSHA anything like certainty. Since "technology-forcing" assumes the agency will make highly speculative projections about future technology, a standard is obviously not infeasible solely because OSHA has no hard evidence to show that the standard has been met. More to the point here, we cannot require OSHA to prove with any certainty that industry will be able to develop the necessary technology, or even to identify the single technological means by which it expects industry to meet the PEL. OSHA can force employers to invest all reasonable faith in their own capacity for technological innovation, *Society of Plastics Industries, Inc.* v. *OSHA, supra,* 509 F. 2d at 1309, and can thereby shift to industry some of the burden of choosing the best strategy for compliance. *OSHA's duty is to show that modern technology has at least conceived some industrial strategies or devices which are likely to be capable of meeting the PEL and which the industries are generally capable of adopting.*
> *Ibid.*, p. 145 (emphasis added).

Reliance on "technology forcing" to achieve compliance with the PEL must however recognize the need to allow an industry adequate time for technological development. In sustaining the 10-year compliance schedule for the primary smelting industry, the court affirmed OSHA's application of this principle, and it is applied again here in the analysis of, for example, the automobile industry.

In proving the economic feasibility of the standard, the court ruled that cost estimates are generally required but that exact compliance costs are not. OSHA need only provide a reasonable assessment of the likely range of costs attributable to the regulation and evaluate the effect of those costs on the industry. *Ibid.*, p. 147. The costs will e examined "in relation to the financial health and profitability of the industry and the likely effect of such costs on unit consumer prices," *ibid.*, p. 144, taking into account industries' ability to pass regulatory costs forward onto purchasers or backward onto suppliers. *Ibid.*, p. 147. However, actual cost estimates and assessments of economic impact were not provided for certain industries and yet the Agency's conclusions on economic feasibility were affirmed. For example, in the electronics industry, the court ruled that "the ease with which this industry can adapt to the standard technologically essentially moots the economic question." *Ibid.*, p., 225. Similarly, in the wallpaper manufacturing industry where the "paucity of evidence [was] likely due to the industry itself," *Ibid.*, p. 229, OSHA's adaptation of the Short Reports conclusion was found to have been based on the "best available evidence."

In the manufacture of inks, the court upheld OSHA's determination of economic feasibility based on an inference from cost estimates for the proposed 100 $\mu g/m^3$ limit "in the absence of contrary evidence or argument." *Ibid.*, p. 227. Where similar circumstances exist, OSHA has used this mode of analysis in responding to the remand order.

When estimating costs, OSHA need not blindly rely on cost estimates submitted to the record by industry or by the Agency's own consultants. Citing Judge Bazelon's opinion in the cotton dust case, the court said that where the Agency finds specific faults in cost estimates, it "can produce its 'own' estimate" by making modifications, so long as the source and magnitude of the overestimates are identified and the Agency offers a counterestimate of costs which thoroughly and precisely explains its revisions. *Ibid.*, pp. 147–148. It also concluded that "OSHA can revise any gloomy forecast that estimated costs will imperil an industry by allowing for the industry's demonstrated ability to pass costs through to consumers." *Ibid.*, p. 147. It was precisely these actions the court upheld in affirming OSHA's conclusions regarding the standard's feasibility in the primary and secondary smelting industry.

C. Remand proceedings—Legal issues

In response to the remand order, OSHA reopened the rulemaking record to obtain additional evidence. To assure optimal procedural and due process rights to individuals interested in providing information to the record, the reopening was announced in a detailed notice in the **Federal Register** and actual notice was given to nearly 200 interested persons. A 30-day period for written comments was established, and a public hearing, although not required, was held.

During the remand proceedings several questions arose concerning the procedures employed by OSHA. Specifically, several industry parties contended that OSHA denied rulemaking participants the right to effective cross-examination (*see,* for example, the LIA posthearing brief, Ex. 516) by three alleged actions: (1) the remand proceedings, particularly the hearing, were scheduled without providing participants enough time for adequate preparation of comments, testimony and cross-examination; (2) OSHA's Docket Office was unable to provide copies of documents in the record on request because of mechanical breakdowns, further hampering the participants' ability to effectively cross-examine OSHA's witnesses, and (3) OSHA's failure to produce all consultants whose feasibility studies are included in the record denied participants the right to cross-examination on "crucial issues."

OSHA believes each of these claims is without merit. First, in an effort to maximize public participation and to avoid further procedural obstacles to implementation of the standard, OSHA decided that notice and public comment on remand would be the fairest and most effective course. Accordingly, OSHA reopened the lead record, allowing 30 days for written comments, and at the same time established a timetable which afforded interested parties an opportunity to participate in the hearing (45 FR 63881). This schedule allowed an initial comment period of 30 days and a posthearing comment period of 30 days. The procedure exceeds the requirements of the OSH Act, 29 U.S.C. 655(b) and the Administrative Procedure Act, 5 U.S.C. 553, and has enabled OSHA to meet the Court's 6-month remand deadline. OSHA believes that this schedule did not hamper the ability of affected parties to participate

meaningfully in the remand proceeding. Much of the information OSHA requested from the participants was already in existence and within industry's possession; e.g., job classifications for exposed employees, air monitoring data collected pursuant to 29 CFR 1910.1025(d), and industrial assets and net worth, although few of these data were actually submitted to the record.

Second, although OSHA's Docket Office experienced certain mechancial problems during the week of the remand hearings, no participants were prejudiced as a result. As soon as OSHA's staff was advised of copying difficulties, every effort was made to provide the participants with the requested documents. (Tr. 184, 250–57, 297, 315, 322, 262–63). In fact, no one was required to question any witnesses without the benefit of first reviewing the accompanying documentary evidence.

Third, the American Iron and Steel Institute (AISI) reiterated a claim rejected by the Court of Appeals, Opinion, pp. 59–62, that unless Dr. John Short was produced as a witness and subjected to cross-examination, OSHA should not be allowed to rely on the Short Report in its assessment of technological feasibility. (Tr. 38, 90). Moreover, although during the original lead proceedings AISI was unaware of the fact that David J. Burton had actually prepared the technological assessment within the Short Report, *see Ibid.*, p. 60, it now had this information and had the opportunity to cross-examine him during the remand. OSHA produced Mr. Burton as a witness and AISI chose not to question him concerning his earlier conclusions. It is OSHA's view, confirmed by the court's decision, that it clearly was not required to produce John Short at these proceedings. Also the Lead Industries Association (LIA) contended (Ex. 516, p. 6; Tr. 17) that representatives of Charles River Associates (CRA) should have been subjected to cross-examination during the remand hearing. CRA did no work for OSHA on remand (Tr. 27, 68); no useful purpose could have been served by CRA's appearance at the hearings.

Finally, it has been suggested during these proceedings that OSHA is required to (1) make a threshold finding under Section 3(8) of the Act that a "significant risk of harm" from lead exposure exists in each of the remand industries and (2) that the benefits to be derived from application of the standard exceed its costs. The Court of Appeals has already ruled on both points. The court found that "OSHA has carried its burden under Section 3(8)," in finding that lead poses a significant risk of harm to workers, opinion, p. 112, and "that in fact cost-benefit analysis would contravene the Congressional goal of protecting worker health and safety within the limits of economic possibility." *Ibid.*, p. 140, n. 102. Furthermore, OSHA has made it clear from the beginning of these proceedings that the record was reopened for the "limited and express purpose" of soliciting information relevant to feasibility. No information on issues other than feasibility was requested. (45 FR 63476).[2]

D. Conclusions

I. *Generally.* The Court of Appeals remanded the record to OSHA to reconsider the feasibility of the standard in 38 specific industrial or occupational categories. These categories were listed in the Short report (Ex. 22) as having potential lead exposure. For the purpose of the remand, OSHA has additionally considered the standard's feasibility for industries or occupations where lead exposure is present, but which were not included in the group of 38 (e.g., stevedoring), and has in some cases modified the category to better describe the actual processes. The final list has 46 categories; each is discussed in detail below.

For most of the 46 categories, the supplemented record demonstrates that the standard is feasible either because exposure levels do not generally exceed the PEL, thus requiring minimal or no compliance actions, or because exposure levels above the PEL can be controlled by available and affordable engineering controls or work practices within the time periods permitted for compliance.

For a few industry categories, the record supports the availability of feasible control measures, but indicates that an extension in the compliance schedule is necessary to assure the feasibility of their implementation. This is true, for example, in the primary steel manufacturing and automobile manufacturing industries.

[2] Several industry participants have suggested that "significant risk" must be established for each industry where lead exposures occur. (Ex. 475–22; Ex. 499; Ex. 500; Ex. 517). OSHA disagrees with this view. The "significant risk" findings OSHA has made, and which have been upheld by the D.C. Circuit, are equally applicable to the remand industries. In any event, the evidence submitted by some parties in an effort to demonstrate the absence of significant risk in their industries is without merit and does not detract from the earlier conclusion that employees exposed to lead even in the workplace circumstances presented by these industries, face a significant risk of material impairment of health.

An interpretation of the standard, initially made by the Agency in response to a petition by Ethyl Corporation in 1979, will achieve the same result for a few other industries, thereby enhancing their capability to comply in a feasible manner. This interpretation construed the term "secondary lead production" in Table I of Section (e)(1) of the standard to apply to all operations in any industry in which new or used scrap or waste materials were smelted through a chemical reduction process and refined to produce lead metal, whether the operation was performed by a firm whose primary purpose was to produce lead metal or was a captive process in the manufacture of other products (Ex. 476–74).

Ethyl Corporation manufactures tetraethyl lead, a chemical additive used in gasoline. As part of the process, it recycles a sludge-like waste and smelts it in a reverberatory furnace to return unused lead to the process stream. Similar activities may occur, for example, in the manufacture of solder and ammunition. Where an operation can be described as secondary lead production, the appropriate compliance period is 3 years for the interim 100 $\mu g/m^3$ limit and 5 years for the PEL. This interpretation covers only those operations and equipment pertinent to the secondary lead production operation. (This interpretation has been incorporated into OSHA's compliance directive for the lead standard; see OSHA Instruction CPL 2–2.8A, page A–3.)

Another interpretation of the standard may be required in some cases. Where one process within a facility is within the zone of contamination of another process and one of the two processes has an extended compliance period, the one with the shorter time may require the longer time period to achieve full compliance. This is necessary because contamination of one process by the other would preclude effective engineering solutions.

For example, Bunker Hill's zinc fuming furnace is within the confines of its primary lead smelter: the zinc operation has one year to achieve compliance, the primary smelter 10 years. However, due to cross contamination, complete control of the zinc operation may not be possible until emissions from the primary smelter have been controlled. The entire facility, therefore, may realistically require 10 years to comply with the standard, although all feasible engineering controls and work practice are still required to be used in the interim even if

they are not capable of reaching ultimate compliance. Where similiar compliance problems arise, the affected employer should incorporate this information into its compliance plans or seek an official interpretation from OSHA.

For some limited operations within certain industries, respiratory protection *may* be the only technologically feasible means of compliance with the PEL in light of known or currently available technology. These cases, discussed in more detail in the industry-by-industry analysis below, include certain spray painting operations, activities in certain confined spaces (e.g., in some areas inside ship hulls), activities at non-fixed worksites or workstations (e.g., repair and manintenance), and excursions in exposure caused by unpredictable and uncontrollable changes in conditions (e.g., spills, equipment failure). In these specific but limited instances, the presumption in favor of the feasibility of engineering controls and work practices would not be applicable and would not support a violation of section (e)(1). However, as the court stated:

> Insufficient proof of technological feasibility for a few isolated operations within an industry, or even OSHA's concession that respirators will be necessary in a few such operations, will not undermine this general presumption in favor of feasibility (for that industry). Rather, in such operations firms will remain responsible for installing engineering and work practice controls to the extent feasible, and for using them to reduce lead exposure as far as these controls can do so. In any proceeding to obtain relief from an impractical standard for such operations, however, the insufficient proof or conceded lack of proof will *reduce* the strength of the presumption a firm will have to overcome in justifying its use of respirators.
>
> Opinion, page 159.

It should be noted that many workers in occupations or industries listed in the remand order will be excluded from coverage because of the exemption for the construction industry from the standard. 29 CFR 1910.1025(a)(2), as corrected in 44 FR 50338, August 28, 1979. This exemption would apply, for example, to welders, lead burners, painters, and plumbers employed by the construction industry. Accordingly, this preamble only addresses nonconstruction aspects of those occupations.

II. Industry-by-industry Analyses

The following is a discussion of the general principles of control of hazardous materials, the specific application of these controls to lead exposures, the cost of implementing these controls and the economic impact on the industries affected. Each of the individual industry analyses includes a section on the use of the particular industrial commodities; a description of the processes and the areas where lead exposure may occur; the control technology currently being used by the industry; the current exposure levels in the industries; the population exposed; the additional controls needed to comply with 50 $\mu g/m^3$; the summary of the technological findings; the cost of compliance with paragraph (e) of the standard; an economic profile of the affected industry; and finally a summary of the Agency's economic feasibility findings.

TABLE OF CONTENTS

A. General Feasibility

B. Specific Industries

1. Agricultural Pesticides

(a) Uses

A. General Feasibility

OSHA has determined that compliance with the standard may be generally achieved by the application of existing methods of exposure control. In this section OSHA presents the basic principles on which its conclusions regarding feasibility for each industry are based.

There are several methods available to control a worker's exposure to lead. These approaches include isolation, enclosure, the use of ventilation, and process or product changes. These principles were discussed at length in the original preamble, 43 FR 54476–54479, and will not be reiterated here. OSHA reaffirms and adopts the general principles concerning feasibility discussed therein.

Isolation consists of the construction and use of primary, secondary, or tertiary barriers or containments around the process, the operation, or the equipment for the purposes of containing material, minimizing the release of airborne contaminants to the workplace, and minimizing, limiting, or otherwise preventing access to the area near the contaminant (Ex. 487).

Enclosure includes construction of a partial barrier around the process or operation (usually with access from one side), typically represented by a paint spray booth or a laboratory fume hood, and accompanied by directed air movement to control dispersion of the contaminant. (Id.) Ventilation is the engineered application of air motion and direction to capture, contain, and convey contaminants from the source at the workplace, away from the worker into the ventilation system. (Id.) Industrial ventilation is a widely used and effective method of control of workplace airborne contamination. Local exhaust ventilation is usually more effective and less costly than general ventilation.

Product or process changes may be used for specific problems and are usually central to a structural change in the industry involving new plant and larger capital investment. Elimination is the removal or replacement of the hazardous substance or condition from the work environment. Both types of changes may result in a change in the manufacturing method or machine, or the process or operation to reduce or eliminate hazards, and both represent permanent solutions to the occupational health problem. Substitution usually involves removal (elimination) of one component and its replacement in the process by another less or non-toxic substance.

During the initial lead hearing, Dr. First discussed at length the use of these methodologies in achieving control in any industrial setting. His testimony was relied upon initially; OSHA continues to find his reasoning persuasive and applicable to the remand industries. (See 43 FR 54477; Ex. 270)

Dr. First's testimony, echoed by many engineers and industrial hygienists during the first lead rulemaking (e.g., Schneider, Tr. 2957–2100; Stewart, Tr. 2577–2619), leads to the conclusions that rigorous and innovative application of basic engineering and industrial hygiene techniques will, in almost all cases,

enable employers to comply with the standard.

When one correctly applies principles of engineering control, an operation or a machine is totally controlled. That is to say, when an operation or a machine is properly enclosed, it no longer discharges lead dust to the workroom atmosphere; when an operation or a machine is properly exhaust ventilated, it no longer is capable of discharging lead dust or fumes into the workroom; when a process has been automated, no worker is in the vicinity to be exposed to lead emissions. Therefore, as a practical matter, machines and processes are "controlled" or they are "not controlled"; there are no way-stations on the road to process control. You either do it or you don't (Ex. 270, pp. 23–24).

Schneider added:

My contention is that with proper engineering control coupled with good maintenance and good work practices; proper design of process to minimize emissions, and education of workers and good hygiene that we can today achieve levels in the atmosphere of less than 50 micrograms per cubic meter of air. (Tr. 2065–66).

Dr. Billings of the Johns Hopkins School of Public Health reaffirmed and reiterated the views of Dr. First and others concerning the use of engineering controls to achieve compliance with the lead standard, and stated:

There appears to be no technological limitation to application of engineering control technology to most manufacturing technologies and operations. There may be limiting economic constraints in certain specific applications, but these are usually structural to the industry in question. (Ex. 487, p. 13)

Dr. Billings also stressed the importance of housekeeping (e.g., to prevent the redispersion of contaminants or to eliminate personal contacts); dust suppression (e.g., wetting down dusty sources, wet drilling, use of soil, stock or waste pile stabilizers, windbreaks and the like); maintenance (e.g., continued maintenance of effective control system performance, as well as of process, operation, or manufacturing equipment to reduce or eliminate inadvertent releases of hazardous materials); sanitation (e.g., use of hygienic principles to reduce or eliminate hazardous materials from the person as with clothing changes, shower-in or shower-out, sterilization chlorination, pasteurization, and so on); work practices (e.g., specification of proper work procedures to reduce or control release, dissemination, or inadvertent exposure to hazardous substances or conditions); education (of worker and managment, and of the public, to the nature of a hazard and how properly to minimize risk and most importantly, education of engineers to discover, develop, and design products, processes and systems with minimum hazard to workers and users); and administrative control to achieve compliance.

Dr. Billings stated that the engineering controls he discussed were relevant to the industries under consideration in this proceeding. Dr. Billings further testified:

Any defined industrial health hazard can be controlled to any degree required with creative innovative ingenuity, experience, and resources adequate to develop cost-effective control measures.

Some industrial processes lend themselves more readily to applications of conventional control technology, most commonly those processes that contain continuous, repetitive, or automated operations.

Other processes are less amenable to simpler solutions and may require somewhat greater effort to solve satisfactorily, such as, e.g.; spray painting in confined spaces, shot blasting of lead-based paints on large structures, and possibly welding, lead burning maintenance tasks, or similar transient, intermittent, or mobile operations. Effective technical solutions in these instances may require some worker participation. (Ex. 487 p. 20)

Dr. First also testified that the time required for a conscientious employer to comply can vary from 9 to 12 months for the design, construction, and installation of relatively simple and conventional systems, such as exhaust ventilation hoods and associated dust systems, enclosed automatic conveyors, and central vacuum cleaning systems, to approximately 4 to 5 years for the construction of an entirely new modern plant that incorporates innovative, mechanized, and automated production and materials handling systems and processes. (Tr. 2309). DBA's estimates of the time frames were similar. David J. Burton of DBA states that as a general matter the implementation of simple controls could take as little as "several months: while a very complex system could take as much as 40 months". (Tr. 1025) Dr. First (Tr. 2310; 2328, 2382) and Knowlton Caplan of IHE (Tr. 3931–33) also noted time limitations on obtaining equipment parts, and adequate engineering assistance. These factors are incorporated into the implementation schedule provided in the standard so that many firms need not apply for a temporary variance.

Given the myriad of controls available to the industry, compliance with the standard appears readily feasible. As Dr. First testified, drastic reductions in exposure to coal dust, vinyl chloride monomer, and asbestos fibers were achieved very rapidly where the effort was made (Ex. 270, pp. 18–19). The union representatives from the URW also testified that changes in the rubber and plastics industry were made readily when OSHA citations indicated such were necessary. (Tr. 740). However, for some firms in some industries (for example in the manufacture of lead pigment, the steel industry, and the auto industry), compliance with the 50 $\mu g/m^3$ standard will require reliance upon technological change. The extended compliance deadlines granted these industries have been provided so that these changes may be implemented.

In establishing the requirements of this standard and evaluating whether compliance is feasible, OSHA has identified affected industries and investigated the available technology in those industries based on the best available evidence. It has attempted to estimate the length of time necessary to implement the technology required, taking into account firms' need to plan, construct, test and refine their efforts, as well as the economic factors involved. The result is that OSHA has incorporated into its compliance scheme an implementation schedule based on OSHA's judgment in view of the record evidence, of the time each industry, as a whole, will need to effect the technological changes necessary for compliance. Interim milestones are required for some industries where ultimate compliance will take several years and where significant protection can be accomplished in a shorter period. The time limits also take economic factors into account in that they are expected to enable firms in the industry to implement these changes without serious economic repercussions to the industry as a whole. In some cases, the implementation schedules take into account the industries' modernization plans, etc., in planning compliance activities.

The implementation schedule represents a merging of both economic and technological factors used to evaluate feasibility. Firms can choose from an array of technical solutions over a time frame sufficient for long-run economic optimization. The implementation schedule is incorporated into the "methods of compliance" parargaph of the standard, and the basis for the time limit for each industry is explained in the industry-by-industry analysis below.

After analyzing the techological feasibility of compliance with an OSHA regulation, the Agency estimates the costs of controlling the workplace hazard at issue. Given an estimate of compliance costs, OSHA then assesses the economic feasibility of compliance with the regulations. Thus, compliance

costs link the technological and economic aspects of feasibility and are fundamental to determining feasibility.

Several methods can be used to estimate compliance costs. The methods vary in reliability and are largely dependent on the type of data available. For example, in decreasing order of accuracy, there are piece or component estimates, unit cost estimates, experience estimates, and hypothetical cost estimates (Tr. 418–419).

Piece estimates are compiled by actually summing the individual costs of the components of a control system. For instance, the cost of a ventilation system can be broken down into the separate costs for fans, ductwork, hoods, other materials, labor require for installation, and routine maintenance (Ex. 482). Unit cost estimates are developed by applying publicly available costs for items or approaches that can be used to control hazardous exposures (Ex. 482); for example, dollars per cubic foot per minute of ventilation, average costs of installing hygiene facilities, or costs of personal protective equipment, such as gloves, safety shoes, or respirators, can be used to determine compliance costs. Where detailed engineering estimates or unit costs are unavailable, the professional judgment and experience of labor and industry experts in the field may be relied on to develop experience cost estimates (Ex. 482). Finally, a hypothetical model of a production process and necessary control requirements may be costed out, thereby generating hypothetical cost estimates (Tr. 419).

In the analyses of feasibility in these industries, OSHA has primarily relied on unit cost and experience estimates. These estimates constitute the best available evidence and were provided by OSHA's contractor and by industry. Industry submissions from previous rulemaking and new data submitted in response to the **Federal Register** notice of September 24, 1980, were included in OSHA's consideration of costs.

Most of the industry estimates are experience estimates that are not supported by detailed engineering studies. In these cases, OSHA has adjusted some of these estimates downward on the basis of Agency experience. Where the estimates appear to overstate compliance costs, OSHA's reasons for rejecting these estimates are explained. The sources of overestimates are summarized below.
