### [Docket No. 318]

### Baltimore Gas and Electric Company; Calvert Cliffs Nuclear Power Plant Unit No. 2, Environmental Assessment and Funding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of exemptions from Facility Operating License No. DPR-69, issued to Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Power Plant, Unit No. 2 (CC2) located in Calvert County, Maryland.

#### Environmental Assessment

##### Identification of the Proposed Action

This Environmental Assessment has been prepared to address potential environmental issues related to the licensee's application of February 24, 1995. The proposed action would exempt the licensee from: (1) The requirements of 10 CFR Part 50, Appendix J, Paragraph III.D.1.(a), to permit a one-time interval extension between the first and second Type A test (containment integrated leak rate test) for approximately 24 months from the spring 1995 refueling outage to the spring 1997 refueling outage and, (2) would extend the second 10-year service period to 12 years allowing the third Type A test to be performed during the spring 1999 refueling outage.

##### The Need for the Proposed Action

The proposed action is needed to permit the licensee to defer the Type A test from the spring 1995 refueling outage to the spring 1997 refueling outage, which will also result in extending the second 10-year service period to 12 years to allow the third Type A test to be performed, thereby deferring the cost of performing the tests and elimination the time required to perform the test from the critical path schedule during the upcoming spring
