

experience with particular measures, such as tariff-rate quota administration, that might be addressed in the context of the new negotiations.

For services, topics for negotiating objectives include removal or reduction of barriers to U.S. services exports under existing GATS disciplines; establishment of new GATS disciplines to ensure effective market access, *e.g.*, proposed disciplines on domestic regulations on services, possibly addressing transparency and necessity; and clarification of sectoral definitions in the Agreement.

Services sectors under consideration in the negotiations include: (1) Business services, including professional and related services (including legal, accounting, auditing and bookkeeping, taxation, medical, dental, veterinary, engineering, architectural, and urban planning services), computer and related services, research and development services, real estate services, rental and leasing services, and advertising and management services; (2) communication services (including telecommunications services, audiovisual services, postal services, and express delivery or "courier" services); (3) construction and related engineering services; (4) distribution services (including wholesale, retail, and franchising services); (5) educational and training services; (6) environmental services; (7) energy services; (8) financial services, including insurance and insurance-related services, banking and securities services; (9) health-related and social services; (10) tourism and travel-related services; (11) recreational, cultural and sporting services; and (12) transport services.

Comments on broader negotiations on non-agricultural market access are welcome with as much specificity as the respondent can provide on general negotiating objectives and/or targets; country and product specific export interests or barriers; and experience with particular measures that might be improved in the context of the new negotiations.

The U.S. International Trade Commission has provided to the TPSC the public comments received on agricultural and non-agricultural products as part of its investigation No. 332-405, Probable Economic Effects on Reduction or Elimination of U.S. Tariffs (November 1999 (Confidential report)). Hence, these comments need not be resubmitted.

Comments should state clearly the objective(s) and should contain detailed information supporting the objective(s). Submissions should clearly indicate the

general topic (*i.e.*, agriculture, services or non-agricultural products). For agriculture and non-agricultural products, identification of country-specific export priorities on goods should, to the maximum extent possible, identify the item by Harmonized System nomenclature at the 6-digit level at a minimum and the country of interest. For services, the submissions should include, wherever appropriate, sector-specific export priorities by country.

Persons submitting written comments should provide twenty (20) copies no later than noon May 12, 2000, to Gloria Blue, Executive Secretary, Trade Policy Staff Committee, Office of the United States Trade Representative, Room 122, 600 17th Street Northwest, Washington, DC 20508. In addition, a helpful supplement to the written statement would be to provide a disk of the submission containing as much of the technical details as possible, either in a spreadsheet format or in a word processing table format, with each tariff line/services sector in a separate cell. The disk should have a label identifying the software used and the submitter.

Written comments submitted in connection with this request, except for information granted "business confidential" status pursuant to 15 CFR 2003.6, will be available for public inspection in the USTR Reading Room, Room 101, Office of the United States Trade Representative, 600 17th Street, NW., Washington, DC. An appointment to review the file may be made by calling Brenda Webb at 202-395-6186. The Reading Room is open to the public from 10:00 a.m. to 12 noon, and from 1 p.m. to 4 p.m. Monday through Friday.

Business confidential information, including any information submitted on disks, will be subject to the requirements of 15 CFR 2003.6. Any business confidential material must be clearly marked as such on the cover letter or page and each succeeding page, and must be accompanied by a non-confidential summary thereof. If the submission contains business confidential information, twenty copies of a public version that does not contain confidential information, must be submitted. A justification as to why the information contained in the submission should be treated confidentially must be included in the submission. In addition, any submissions containing business confidential information must be clearly marked "Confidential" at the top and bottom of the cover page (or letter) and each succeeding page of the submission. The version that does not contain confidential information should also be

clearly marked, at the top and bottom of each page, "public version" or "non-confidential."

Carmen Suro-Bredie,
Chair, Trade Policy Staff Committee.
