

Settling Parties' case or requesting an adjustment to the discovery schedule to make up for the lost time. She chose not to file such a motion, however, because she believed that "the Copyright Office would (not) strike the case of the Settling Parties and leave only the two individual claimants in the case." Evelyn's Proposed Findings of Fact and Conclusions of Law at 3. Consequently, the Office had no reason to address the issue because Evelyn did not request any relief from the Office at the appropriate time. Furthermore, her continued involvement in the proceeding supports the Panel's conclusion that she did not suffer any undue harm because of the delay in the delivery of the direct case.

Another procedural irregularity raised by Evelyn concerns the return of her rebuttal case. She filed it with the Copyright Office on November 24, 1999, during the 45-day precontroversy discovery period. By Order, dated November 24, 1999, the Office rejected the pleading except for a single sentence which addressed a motion for a partial distribution then under consideration. The Order stated that "[n]o provision is made in the rules or the Library's scheduling order for the filing of rebuttal cases at this stage of the proceeding. Rebuttal cases, if required at all, are filed with the CARP after consideration of the written direct cases." Evelyn refiled her rebuttal case on July 28, 2000, and it was considered by the CARP at that time. Consequently, Evelyn suffered no prejudice from the Office's decision to strike her rebuttal case when it was first filed prematurely.

Evelyn makes one additional procedural challenge in her petition. She contends that the Settling parties did not provide sworn testimony to establish a universe of sales. Evelyn Petition at 8. Specifically, she objects to the inclusion of Michael Fine's prior testimony from the 1992-1994 DART distribution proceedings on the SoundScan data. This testimony established the basis for determining total record sales and record sales for Curry and Evelyn. CARP Report ¶ 32. She states that there were problems with his testimony in the 1992-1994 DART distribution proceedings but does not discuss what these problems were or why they have a bearing on the current proceeding. In any event, no problem was identified in the last proceeding concerning this testimony; thus, under the CARP rules, the Settling Parties were free to designate a portion of past records to be included in their direct case. 37 CFR 251.43. Had the Panel not allowed the incorporation of Fine's past testimony, it would have acted contrary

to the law, unless it had reason to strike the testimony for good cause shown.

Evelyn's final challenge focuses on the Settling Parties' methodology. She, like Curry before her in the 1992-1994 DART distribution proceeding, objects to the use of a methodology that only requires a showing of the number of record sales for the individual claimants. She contends that no claim can be termed a "de minimus claim" until it is measured against the entitlement of others. Evelyn Petition at 3. In response, the Panel noted that the courts have repudiated as wasteful a requirement that all claimants in a given distribution proceeding prove their entitlement through the presentation of detailed data for every individual work. CARP Report ¶ 76. In *National Association of Broadcasters v. Copyright Royalty Tribunal*, 772 F.2d 922, 939 (D.C. Cir. 1985), the case cited by the Panel in its report, the court wisely noted that to do otherwise would effectively eliminate the likelihood of settlements because a single claimant—no matter how modest that claimant's likely share under even the most sanguine review—could choose not to settle with the other claimants and require a full hearing on all claims, even those not in controversy.

For all the reasons set forth in the prior discussion, the Register concludes that the Panel did not act arbitrarily or contrary to the provisions of the Copyright Act in determining the value of Curry's and Evelyn's DART claims and recommends that the Librarian adopt without amendment the Panel's Report and recommendation for the allocation of the 1995, 1997 and 1998 Musical Works Funds.

Order of the Librarian of Congress

Having duly considered the recommendation of the Register of Copyrights regarding the report of the Copyright Arbitration Royalty panel concerning the distribution of the 1995, 1997 and 1998 Musical Works Funds, the Librarian of Congress fully endorses and adopts her recommendation to accept the Panel's decision. For the reasons stated in the Register's recommendation, the Librarian is exercising his authority under 17 U.S.C. 802(f) and is issuing an order announcing the allocation of the royalty fees in the 1995, 1997 and 1998 Musical Works Funds.

Wherefore, it is ordered that the royalty fees in the 1995, 1997 and 1998 Musical Works Funds shall be distributed according to the following percentages:

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Privacy Act of 1974; Transfer of Records

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of transfer of records subject to the Privacy Act to the National Archives.

SUMMARY: Records retrievable by personal identifiers which are transferred to the National Archives of the United States are exempt from most provisions of the Privacy Act of 1974 (5 U.S.C. 552a) except for publication of a notice in the **Federal Register**. NARA publishes a notice of the records newly

transferred to the National Archives of the United States which were maintained by the originating agency as a system of records subject to the Privacy Act.

FOR FURTHER INFORMATION CONTACT: Dr. Michael Kurtz, Assistant Archivist for Records Services, Washington, DC, on (301) 713-7000.

SUPPLEMENTARY INFORMATION: In accordance with section (l)(1)(3) of the Privacy Act, archival records transferred from executive branch agencies to the National Archives of the United States are not subject to the provisions of the Act relating to access, disclosure, and amendment. The Privacy Act does require that a notice appear in the **Federal Register** when executive branch systems of records retrievable by personal identifiers are transferred to the National Archives of the United States. After transfer of records retrievable by personal identifiers to the National Archives of the United States, NARA does not maintain these records as a separate system of records. NARA will attempt to locate specific records about an individual in any system of records described in a Privacy Act Notice as being part of the National Archives of the United States. Furthermore, records in the National Archives of the United States may not be amended, and NARA will not consider any requests for amendment.

Archival records maintained by NARA are arranged by Record Group depending on the agency of origin. Within each Record Group, the records are arranged by series, thereunder generally by filing unit, and thereunder by document or groups of documents. The arrangement at the series level or below is generally the one used by the originating agency. Usually, a system of records corresponds to a series.

In this notice, each system is identified by the system name used by the executive branch agency that accumulated the records. That system name is followed by information in parentheses about the National Archives Record Group to which records in the system have been allocated. In the section of the notice covering categories of records in the system, the specific segment of the system transferred to the National Archives of the United States is identified by the accession number assigned to the system segment when it was transferred to the National Archives and the series title associated with the system in the National Archives. The following systems of records, or parts thereof, retrievable by personal identifiers have been transferred to the National Archives since the last notice

published at 61 FR 36573, (December 8, 1998):

Appendix*General Statement About Uses and Restrictions*

A record from an accessioned system of records may be made available to any person who has applied for and received a researcher identification card. No special qualifications are required in order to use the records of the National Archives. Rule governing the use of records and procedures for applying for research cards are found in 36 CFR part 1254. However, the use of some of the records is subject to restrictions imposed by statute or Executive order, or by the restrictions specified in writing in accordance with 44 U.S.C. 2108 by the transferring agency. Restrictions currently in effect on access to particular records that have been specified by the transferring agency are known as "specific restrictions." Restrictions on access that may apply to more than one record group are termed "general restrictions." They are applicable to the kinds of information or classes of accessioned records designated regardless of the record group to which they have been allocated or the specific system of records in which they are contained. The restrictions are published in the "Guide to the National Archives of the United States" and supplemented by restriction statements approved by the Archivist of the United States and set forth in 36 CFR part 1256.

BILLING CODE 7515-01-P

NUCLEAR REGULATORY COMMISSION**Biweekly Notice Applications and Amendments to Facility Operating Licenses Involving No Significant Hazards Considerations****I. Background**

Pursuant to Public Law 97-415, the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this regular biweekly notice. Public Law 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any

amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from January 29, 2001, through February 9, 2001. The last biweekly notice was published on January 24, 2001 (66 FR 7667).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide an opportunity for a
