

Will the Agency Consider Late Comments?

NHTSA will consider all comments that Docket Management receives before the close of business on the comment closing date indicated above under **DATES**. To the extent possible, the agency will also consider comments that Docket Management receives after that date. If Docket Management receives a comment too late for NHTSA to consider it in developing a final rule (assuming that one is issued), the agency will consider that comment as an informal suggestion for future rulemaking action.

How Can I Read the Comments Submitted by Other People?

You may read the comments received by Docket Management at the address given above under **ADDRESSES**. The hours of the Docket are indicated above in the same location.

You may also see the comments on the Internet. To read the comments on the Internet, take the following steps:

1. Go to the Docket Management System (DMS) Web page of the Department of Transportation (<http://dms.dot.gov/>).
2. On that page, click on "search."
3. On the next page (<http://dms.dot.gov/search/>), type in the four-digit docket number shown at the beginning of this document. *Example:* If the docket number were "NHTSA-1998-1234," you would type "1234." After typing the docket number, click on "search."
4. On the next page, which contains docket summary information for the docket you selected, click on the desired comments. You may download the comments. Although the comments are imaged documents, instead of word processing documents, the "pdf" versions of the documents are word searchable.

Please note that even after the comment closing date, NHTSA will continue to file relevant information in the Docket as it becomes available. Further, some people may submit late comments. Accordingly, the agency recommends that you periodically check the Docket for new material.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

In consideration of the foregoing, NHTSA proposes to amend 49 CFR part 571 as follows:

PART 571.223—[AMENDED]

1. The authority citation for part 571 would continue to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117, and 30166; delegation of authority at 49 CFR 1.50.

2. Section 571.223 would be amended by revising the third sentence of S5.3 as follows:

§ 571.223 Standard No. 223; Rear impact guards.

* * * * *

S5.3 *Labeling.* * * * The label shall be placed on the forward or rearward facing surface of the horizontal member of the guard, provided that the label does not interfere with the retroreflective sheeting required by S5.7.1.4.1(c) of FMVSS No. 108 (49 CFR 571.108), and is readily accessible for visual inspection.

* * * * *

Issued: March 22, 2002.

Stephen R. Kratzke,

Associate Administrator for Safety Performance Standards.

BILLING CODE 4910-59-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AH95

Endangered and Threatened Wildlife and Plants; Designation of Critical Habitat for the Newcomb's Snail, Extension of Comment Period, Notice of Public Hearing, and Notice of Availability of the Draft Economic Analysis

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; extension of comment period, notice of public hearing, and notice of availability of draft economic analysis.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), provide notice that a public hearing will be held on the proposed determination of critical habitat for the Newcomb's snail (*Errina newcombi*) and that the comment period on this proposal is extended; we also announce the availability of the draft economic analysis of this proposed designation of critical habitat. Newcomb's snail is found on the island of Kauai, Hawaii. We are extending the comment period for the proposal to designate critical

habitat for this species to hold the public hearing and to allow all interested parties to comment simultaneously on the proposed rule and the associated draft economic analysis. Comments previously submitted need not be resubmitted as they will be incorporated into the public record as part of this extended comment period and will be fully considered in the final rule.

DATES: The public hearing will be held from 6 p.m. to 8 p.m. on April 17, 2002, in Lihue, HI. Prior to the public hearing, the Service will be available from 3:30 p.m. to 4:30 p.m. to provide information and to answer questions. Registration for the hearing will begin at 5:30 p.m. The comment period, which originally closed on March 29, 2002, will now close on April 29, 2002.

ADDRESSES: The public hearing will be held at the Radisson Kauai Beach Resort, 4331 Kauai Beach Drive, Lihue, Kauai, HI. The draft economic analysis is available from, and written comments and information should be submitted to, Field Supervisor, Pacific Islands Fish and Wildlife Office, U.S. Fish and Wildlife Service, 300 Ala Moana Boulevard, Room 3-122, Box 50088, Honolulu, HI 96850. Comments and materials received will be available for public inspection during normal business hours, by appointment, at the above address.

FOR FURTHER INFORMATION CONTACT: Paul Henson, Field Supervisor, Pacific Islands Fish and Wildlife Office, at the above address (telephone: 808/541-3441; facsimile: 808/541-3470).

SUPPLEMENTARY INFORMATION:

Background

Newcomb's snail is a type of freshwater snail belonging to the lymnaeid family of snails. Adult Newcomb's snails are approximately 6 millimeters (mm) (0.25 inches (in)) long and 3 mm (0.12 in) wide in size. Its shell is smooth and black, formed by a single, oval whorl, about 6 mm (0.25 in) long. The tentacles of Newcomb's snail, like other lymnaeids, are flat and triangular, rather than conical or filament-shaped as found on other freshwater snails. Newcomb's snails feed upon algae and other material growing on submerged rocks. Eggs are attached to underwater rocks or vegetation and the entire life cycle is tied to the stream system in which the adults live.

Populations of Newcomb's snail are currently found in small areas within the Kalalau, Lumahai, Hanalei, Waipahee, Makaleha, and North Wailua stream systems on the Hawaiian island of Kauai. Historically, Newcomb's snail

was found in Hanakoa, Hanakapiai, and Wainiha streams, but these populations are thought to be extirpated. The known populations of Newcomb's snail have a total of approximately 6,000 to 7,000 individuals.

Some of the suspected historical decline of the snail may be attributed to habitat loss and degradation through water diversion and well drilling. Currently, predation by alien species, natural disasters and habitat alteration are threats that imperil Newcomb's snail. The rosy glandina snail (*Euglandina rosea*) is an introduced snail that preys mostly on other snails. Two species of non-native marsh flies prey upon eggs and adults of Hawaiian freshwater snails. These flies were introduced in 1955 and 1966 as bio-control agents for a non-native snail that hosts a cattle parasite. Other introduced predators include introduced fish and frogs. Presently, Newcomb's snail faces an increased likelihood of extinction from naturally occurring events such as hurricanes due to the small number of remaining populations and their limited distribution.

Pursuant to the Endangered Species Act of 1973, as amended (Act) (16 U.S.C. 1531 *et seq.*), *Errina newcombi* was listed as a threatened species on January 26, 2000 (65 FR 4162). On January 28, 2002, we published a proposed rule in the **Federal Register** (67 FR 3849) to designate critical habitat for Newcomb's snail. Section 4(b)(5)(E) of the Act requires that a public hearing be held if requested within 45 days of the proposal's publication in the **Federal Register**. We received 2 requests for a public hearing during this time period. In response to these requests, we will hold a public hearing on the date and location described in the **DATES** and **ADDRESSES** section above.

Anyone wishing to make an oral statement for the record is encouraged to provide a written copy of their statement to the Service at the start of the hearing. In the event there is a large attendance, the time allotted for oral statements may have to be limited. Oral and written statements receive equal consideration. There are no limits to the length of written comments presented at this hearing or mailed to the Service. Legal notices announcing the date, time, and location of the hearing are being published in newspapers concurrently with this **Federal Register** notice.

We propose to designate critical habitat in nine critical habitat units that total 26.29 kilometers (km) (16.33 miles (mi)) of main stream channel; in total, these areas encompass approximately 2,109 hectares (ha) (5,212 acres (ac)). Six of these sites are located on state lands,

and three of these sites are on lands that are privately owned. Critical habitat units are proposed for reaches of stream main channel that range in length from 0.8 km (0.5 mi) to 7.58 km (4.71 mi); the units range in size from 35 ha (86 ac) to 876 ha (2165 ac).

Critical habitat receives protection from destruction or adverse modification through required consultation under section 7 of the Act with regard to actions carried out, funded, or authorized by a Federal agency. Section 4(b)(2) of the Act requires that we designate or revise critical habitat based upon the best scientific and commercial data available, after taking into consideration the economic impact of specifying any particular area as critical habitat. Based upon the previously published proposal to designate critical habitat for Newcomb's snail, we have prepared a draft economic analysis of the proposed critical habitat designation. The draft economic analysis is available from the Pacific Islands Fish and Wildlife Office (see **ADDRESSES** section).

The original comment period was due to close on March 29, 2002. In order to accommodate the hearing and to provide the public with the opportunity to comment on the draft economic analysis of this proposed critical habitat designation as well as the proposed rule, we also extend the comment period. Written comments may now be submitted until April 29, 2002, to the Service office in the **ADDRESSES** section.

Public Comments Solicited

We will accept written comments and information during this extended comment period. If you wish to comment, you may submit written comments and information to the Field Supervisor, Pacific Islands Fish and Wildlife (see **ADDRESSES** section). Alternatively, you may hand-deliver comments to our Pacific Islands Fish and Wildlife Office at the above address.

Comments and materials received, as well as supporting documentation used in preparation of the proposal to designate critical habitat, will be available for inspection, by appointment, during normal business hours at the address above. Copies of the draft economic analysis are available by writing to the Field Supervisor at the address above.

Author

The primary author of this notice is Gordon Smith, Fish and Wildlife Biologist, Pacific Islands Fish and Wildlife Office (see **ADDRESSES** section).

Authority: The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*).

Dated: March 26, 2002.

Craig Manson,

Assistant Secretary for Fish and Wildlife and Parks.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 222, 223, and 224

[Docket No.020319061-2061-01; I.D. 031402B]

RIN 0648-AP81

Sea Turtle Conservation; Restrictions to Fishing Activities

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to prohibit the use of all pound net leaders measuring 12 inches (30.5 cm) and greater stretched mesh and all pound net leaders with stringers in the Virginia waters of the mainstem Chesapeake Bay from May 8 to June 30 each year. The affected area includes all Chesapeake Bay waters between the Maryland and Virginia state line (approximately 38 N. lat.) and the COLREGS line at the mouth of the Chesapeake Bay, and the waters of the James River, York River, and Rappahannock River downstream of the first bridge in each tributary. This action, taken under the Endangered Species Act of 1973 (ESA), is necessary to conserve sea turtles listed as threatened or endangered and aid in the enforcement of the prohibition on takes.

DATES: Comments on this action are requested, and must be received at the appropriate address or fax number (**ADDRESSES**) by no later than 5 p.m., eastern daylight time, on April 15, 2002.

ADDRESSES: Written comments on this action or requests for copies of the literature cited, the draft Environmental Assessment (EA)/ Regulatory Impact Review (RIR) should be addressed to the Assistant Regional Administrator for Protected Resources, NMFS, One Blackburn Drive, Gloucester, MA 01930. Comments and requests for supporting documents may also be sent via fax to 978-281-9394. Comments will not be
