

Waste Disposal Technical Assistance and Training grants; Emergency Community Water Assistance grants; System for Delivery of Certain Rural Development Programs panel grants; section 306C WWD loans and grants; and, in part 4284 of this title, Rural and Cooperative Development Grants, Value-Added Producer Grants and Agriculture Innovation Center Grants. Rural Development State Offices act on behalf of the Rural Utilities Service, the Rural Business-Cooperative Service and the Farm Service Agency as to loan and grant programs formerly administered by the Farmers Home Administration and the Rural Development Administration. Loans sold without insurance to the private sector will be serviced in the private sector and will not be serviced under this subpart. The provisions of this subpart are not applicable to such loans. Future changes to this subpart will not be made applicable to such loans.

Dated: June 5, 2003.

Thomas C. Dorr,

Under Secretary, Rural Development.

BILLING CODE 3410-XY-P

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Small Business Size Standards; Waiver of the Nonmanufacturer Rule

AGENCY: Small Business Administration.

ACTION: Notice of intent to grant the Nonmanufacturer Rule for Other Ordnance and Accessories Manufacturing.

SUMMARY: The U.S. Small Business Administration (SBA) is considering granting a waiver of the Nonmanufacturer Rule for Other Ordnance and Accessories Manufacturing. The basis for waivers is that no small business manufacturers are supplying these classes of products to the Federal government. The effect of a waiver would be to allow otherwise qualified regular dealers to supply the products of any domestic manufacturer on a Federal contract set aside for small businesses or awarded through the SBA 8(a) Program. The purpose of this notice is to solicit comments and potential source information from interested parties.

DATES: Comments and sources must be submitted on or before June 25, 2003.

Address Comments to: Edith Butler, Program Analyst, U.S. Small Business Administration, 409 3rd Street, SW.,

Washington, DC 20416, Tel: (202) 619-0422.

FOR FURTHER INFORMATION CONTACT: Edith Butler, Program Analyst, (202) 619-0422 FAX (202) 205-7280.

SUPPLEMENTARY INFORMATION: Public Law 100-656, enacted on November 15, 1988, incorporated into the Small Business Act the previously existing regulation that recipients of Federal contracts set aside for small businesses or SBA 8(a) Program procurement must provide the product of a small business manufacturer or processor, if the recipient is other than the actual manufacturer or processor. This requirement is commonly referred to as the Nonmanufacturer Rule. The SBA regulations imposing this requirement are found at 13 CFR 121.406(b). Section 303(h) of the law provides for waiver of this requirement by SBA for any "class of products" for which there are no small business manufacturers or processors in the Federal market.

To be considered available to participate in the Federal market on these classes of products, a small business manufacturer must have submitted a proposal for a contract solicitation or received a contract from the Federal government within the last 24 months. The SBA defines "class of products" based on six digit North American Industry Classification System (NAICS) and the four digit Product and Service Code established by the Federal Procurement Data System.

The U.S. Small Business Administration is currently processing a request to waive the Nonmanufacturer Rule for Other Ordnance and Accessories Manufacturing, North American Industry Classification System (NAICS) 332995. The public is invited to comment or provide source information to SBA on the proposed waiver of the nonmanufacturer rule for this NAICS code.

Barry Meltz,

Deputy Associate Administrator, Office of Government Contracting.

BILLING CODE 8025-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. NM81; Notice No. 25-03-04-SC]

Special Conditions: Boeing Model 777 Series Airplanes; Revision to Special Conditions 25-ANM-84

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes to revise Special Conditions 25-ANM-84, applicable to Boeing Model 777 series airplanes. The proposed special conditions revise the extended range operations with two-engine airplanes (referred to as "ETOPS") test requirements defined in the existing special conditions. These revisions include changing the airplane demonstration test requirement from a required 1000 flight cycles to a demonstration of capability in ETOPS flight conditions, and allowing more than one airplane to be used for the airplane demonstration test. In addition, the FAA proposes to add post-test inspection requirements for both the engine demonstration test and the airplane demonstration test articles.

DATES: Comments must be received on or before July 28, 2003.

ADDRESSES: Comments on this proposal may be mailed in duplicate to: Federal Aviation Administration, Transport Airplane Directorate, Attention: Rules Docket (ANM-113), Docket No. NM81, 1601 Lind Avenue, SW., Renton, Washington, 98055-4056; or delivered in duplicate to the Transport Airplane Directorate at the above address. Comments must be marked: Docket No. NM81. Comments may be inspected in the Rules Docket weekdays, except Federal holidays, between 7:30 a.m. and 4 p.m.

FOR FURTHER INFORMATION CONTACT: Steve Clark, FAA, ETOPS Project Manager, Seattle Aircraft Certification Office, Propulsion Branch, ANM-140S, Transport Airplane Directorate, 1601

Lind Avenue, SW., Renton, Washington, 98055-4056; telephone (425) 917-6496; facsimile (425) 227-1180.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data. We ask that you send us two copies of written comments.

We will file in the docket all comments we receive, as well as a report summarizing each substantive public contact with FAA personnel concerning these special conditions. The docket is available for public inspection before and after the comment closing date. If you wish to review the docket in person, go to the address in the **ADDRESSES** section of this preamble between 7:30 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

We will consider all comments we receive on or before the closing date for comments. We will consider comments filed late if it is possible to do so without incurring expense or delay. We may change these special conditions in light of the comments we receive.

If you want the FAA to acknowledge receipt of your comments on this proposal, include with your comments a pre-addressed, stamped postcard on which the docket number appears. We will stamp the date on the postcard and mail it back to you.

Background

Because of concerns over engine and airplane reliability, for many years, 14 CFR 121.161 has generally prohibited operations of two-engine airplanes on routes including segments that are more than one hour flight time from a suitable airport. This regulation contains an exception that allows such operations when specifically authorized by the Administrator. These extended range operations with two-engine airplanes are referred to as ETOPS. Advisory Circular (AC) 120-42A describes a method for obtaining ETOPS authorization if an operator can demonstrate sufficient engine and airplane reliability. This method is based on a combination of various design features and operational and maintenance procedures. The AC states that eligibility for 120-minute ETOPS authorization is normally based on a showing of reliable operation for a minimum of 250,000 engine hours of service in the world fleet. Eligibility for

180-minute ETOPS authorization is normally based on a showing of reliable operation for at least one year in 120-minute ETOPS. The AC also describes an option for reducing the number of hours of service if adequate compensating factors are identified to give a reasonably equivalent database.

On May 18, 1994, the FAA issued Special Conditions Number 25-ANM-84 for the Boeing Model 777 airplane (59 FR 28234). These special conditions define requirements for 180-minute ETOPS approval concurrent with basic type certification of the airplane without the service experience outlined in AC 120-42A that would normally be necessary. These special conditions define additional safety standards that the FAA considered necessary to establish a level of safety equivalent to that provided by the airworthiness standards for non-ETOPS airplanes.

The current 777 ETOPS special conditions consist of five main elements needed to provide adequate compensation for the service experience normally required for 180-minute ETOPS eligibility described in AC 120-42A. No single element is considered sufficient by itself, but the FAA has found that the five elements combined provide an acceptable substitute for actual airline service experience. The five elements are:

1. Design for reliability.
2. Lessons learned.
3. Test requirements.
4. Demonstrated reliability.
5. Problem tracking system.

A description of each of these five elements is contained in the preamble to the 777 ETOPS special conditions.

On December 13, 1999, Boeing Commercial Airplane Group applied for an amendment to Type Certificate No. T00001SE to include the new Model No. 777-200LR and 777-300ER airplanes. The Model No. 777-200LR, which is a derivative version of the existing Model 777-200 series airplanes, has the following differences from the 777-200:

- The wingspan is increased from 199 feet, 11 inches to 212 feet, 7 inches.
- Maximum intended takeoff weight is 750,000 pounds.
- It is capable of carrying from 301 to 440 passengers.
- It has provisions for overhead crew and attendant rest areas.
- Its range capability will be up to 8,800 nautical miles (16,298 kilometers).
- It has 110,100 pounds thrust GE90 engines.
- It has a supplemental electronic tail skid.
- It has provisions for up to 3 auxiliary fuel tanks in the forward area of the aft cargo bay.
