

within 30 days of the FCC granting their application for an original construction permit, the consummation, pursuant to FCC consent, of a transfer of control or an assignment of license, and/or when they file their station's license renewal applications and every two years thereafter. A permittee/licensee must also file a report or to certify the accuracy of the current report on file, in lieu of filing a new report, when the permitted applies for a station license, or whenever there is a current and unamended FCC Form 323 on file at the FCC. Data on FCC Form 323 help to determine whether the licensee/permittee meets the FCC's multiple ownership requirements and complies with the Communications Act. The form's race/ethnicity/gender question indicates current minority and female ownership of broadcast facilities and the efficacy of FCC Rules to promote opportunities for small businesses and minority and female-owned businesses in the broadcasting industry.

Initial operation in a particular area may not commence until authorized by the FCC. The UWB operators must provide the name, address, and other pertinent contact information of the user, the desired geographical area of operation, the FCC ID number, time period during which operations will take place, and other nomenclature of the UWB device. The FCC collects this information and forwards it to the National Telecommunications and Information Administration (NTIA under the U.S. Department of Commerce). This information collection is essential to control potential interference to Federal radio communications. (Please note that on June 12, 2002, OMB approved this collection under the "emergency processing" provisions of the Paperwork Reduction Act of 1995, 44 U.S.C. 3507.)
