### Effluent Limitations Guidelines and New Source Performance Standards for the Construction and Development Category

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule; Withdrawal.

**SUMMARY:** On June 24, 2002, EPA published a proposal that contained several options for the control of storm water discharges from construction sites, including effluent limitations guidelines and new source performance standards. We have selected the option in that proposal that continues to rely on the range of existing programs, regulations, and initiatives at the Federal, State, and local level for the control of storm water discharges from construction sites rather than a new national effluent guideline or other new rule. EPA determined that uniform national technology-based standards are not the most effective way to address storm water discharges from construction sites at this time. Instead, EPA believes that it is better at this time to rely on the existing National Pollutant Discharge Elimination System (NPDES) storm water program, which requires permit coverage for discharges associated with construction activity disturbing at least one acre of land, and also requires municipalities to reduce

their stormwater discharges of pollutants to the maximum extent practicable, which can include implementation of tailored local programs to reduce pollutant discharges from construction sites.

**DATES:** For judicial review purposes, this action is considered issued as of 1 p.m. eastern daylight time (e.d.t.) on May 10, 2004, as provided in 40 CFR 23.2. Under section 509(b)(1) of the Clean Water Act, judicial review of the Administrator's action regarding effluent limitations guidelines and standards can only be had by filing a petition for review in the United States Court of Appeals within 120 days after the decision is considered issued for purposes of judicial review.

**ADDRESSES:** The docket for today's action is available for public inspection at the Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC.
