SUPPLEMENTARY INFORMATION: This
proposal addresses the approval of local
SJVUAPCD Rules 1080, 1081, and 4693.
In the Rules section of this **Federal
Register**, we are approving these local
rules in a direct final action without
prior proposal because we believe these
SIP revisions are not controversial. If we
receive adverse comments, however, we
will publish a timely withdrawal of the
direct final rule and address the
comments in subsequent action based
on this proposed rule. We do not plan
to open a second comment period, so
anyone interested in commenting
should do so at this time. If we do not
receive adverse comments, no further
activity is planned. For further
information, please see the direct final
action.

Revisions to the California State Implementation Plan, South Coast Air Quality Management District

AGENCY: Environmental Protection
Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve
revisions to the South Coast Air Quality
Management District (SCAQMD) portion
of the California State Implementation

Plan (SIP). These revisions concern
volatile organic compound (VOC)
emissions from several source categories
such as aerospace manufacturing and
coating, metal parts coating, wood
products coating, and fiberglass
composite manufacturing. We are
proposing to approve a local rule to
regulate these emission sources under
the Clean Air Act as amended in 1990
(CAA or the Act).

DATES: Any comments on this proposal
must arrive by May 26, 2004.

ADDRESSES: Send comments to Andy
Steckel, Rulemaking Office Chief (AIR-
4), U.S. Environmental Protection
Agency, Region IX, 75 Hawthorne
Street, San Francisco, CA 94105-3901,
or e-mail to steckel.andrew@epa.gov, or
submit comments at [http://

Effluent Limitations Guidelines and New Source Performance Standards for the Construction and Development Category

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; Withdrawal.

SUMMARY: On June 24, 2002, EPA published a proposal that contained several options for the control of storm water discharges from construction sites, including effluent limitations guidelines and new source performance standards. We have selected the option in that proposal that continues to rely on the range of existing programs, regulations, and initiatives at the Federal, State, and local level for the control of storm water discharges from construction sites rather than a new national effluent guideline or other new rule. EPA determined that uniform national technology-based standards are not the most effective way to address storm water discharges from construction sites at this time. Instead, EPA believes that it is better at this time to rely on the existing National Pollutant Discharge Elimination System (NPDES) storm water program, which requires permit coverage for discharges associated with construction activity disturbing at least one acre of land, and also requires municipalities to reduce

their stormwater discharges of pollutants to the maximum extent practicable, which can include implementation of tailored local programs to reduce pollutant discharges from construction sites.

DATES: For judicial review purposes, this action is considered issued as of 1 p.m. eastern daylight time (e.d.t.) on May 10, 2004, as provided in 40 CFR 23.2. Under section 509(b)(1) of the Clean Water Act, judicial review of the Administrator's action regarding effluent limitations guidelines and standards can only be had by filing a petition for review in the United States Court of Appeals within 120 days after the decision is considered issued for purposes of judicial review.

ADDRESSES: The docket for today's action is available for public inspection at the Water Docket in the EPA Docket Center, (EPA/DC) EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: For technical information regarding today's action, please contact Mr. Jesse W. Pritts at (202) 566-1038 or send e-mail to: pritts.jesse@epa.gov.
