#### Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products From the Russian Federation; Final Results of the Expedited Sunset Review of Antidumping Duty Suspended Investigation

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of expedited sunset review of the suspended antidumping duty investigation of certain hot-rolled flat-rolled carbon-quality steel products from the Russian Federation; final results.

**SUMMARY:** On May 3, 2004, the Department of Commerce ("the Department") initiated a sunset review of the suspended antidumping duty

investigation of certain hot-rolled flat-rolled carbon-quality steel products ("hot-rolled steel") from the Russian Federation ("Russia").<sup>1</sup> On the basis of the notice of intent to participate, adequate substantive comments filed on behalf of the domestic interested parties, and inadequate response from respondent interested parties, the Department conducted an expedited sunset review of the suspended antidumping duty investigation pursuant to section 751(c)(3)(B) of the Act and section 351.218(e)(1)(ii)(C) of the Department's regulations. As a result of this sunset review, the Department determined that termination of the suspended antidumping duty investigation would likely lead to continuation or recurrence of dumping at the levels listed below in the section entitled "Final Results of Review".

**EFFECTIVE DATE:** September 9, 2004.

**FOR FURTHER INFORMATION CONTACT:** Martha V. Douthit, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, DC 20230; telephone: 202-482-5050.

#### SUPPLEMENTARY INFORMATION:

##### Background

On May 3, 2004, the Department initiated a sunset review of the suspended antidumping duty investigation on hot-rolled steel products from Russia in accordance with section 751(c) of the Tariff Act of 1930, as amended ("the Act"). See Notice of Initiation, 69 FR 24118 (2004).

Section 351.218(d)(1)(i) of the Department's regulations provides domestic interested parties opportunity to file a Notice of Intent to Participate in a Sunset Review within 15 days of initiation of review. The Department received notices of intent to participate within the applicable deadline specified in § 351.218(d)(1)(i) of the Department's regulations on behalf of Nucor Corporation ("Nucor"), United States Steel Corporation ("U.S. Steel"), International Steel Group, Inc. ("ISG"), Gallatin Steel Company ("Gallatin"), IPSCO Steel Inc. ("IPSCO"), and Steel Dynamics, Inc. ("SDI"), and Ispat Inland Inc. and its division Ispat Inland Flat Products ("Ispat Inland") (collectively "domestic interested parties"). The domestic interested parties claimed interested-party status as producers of subject merchandise in the United States as defined by section 771(9)(C) of the Act.

<sup>1</sup> See *Initiation of Five-Year ("Sunset") Reviews*, 69 FR 24,118 (May 3, 2004) ("Notice of Initiation").

The Department's regulations at § 351.218(d)(3)(i) states that all interested parties participating in a sunset review must submit a complete substantive response to a Notice of Initiation within 30 days of initiation of the sunset review. On June 2, 2004, the Department received complete substantive responses from the domestic interested parties within the 30-day deadline specified in the Department's regulations under § 351.218(d)(3)(i). However, the Department did not receive any responses from respondent interested parties to this proceeding. As a result, pursuant to section 751(c)(3)(B) of the Act and § 351.218(e)(1)(ii)(C)(2) of the Department's regulations, the Department conducted an expedited 120-day, sunset review of this suspended antidumping duty investigation.

This suspended antidumping duty investigation remains in effect for Russian producers and exporters of subject merchandise.

#### Scope of the Suspended Investigation

See Appendix 1.

#### Analysis of Comments Received

All issues raised in this sunset review are addressed in the Issues and Decision Memorandum ("Decision Memo") from Ronald K. Lorentzen, Acting Director, Office of Policy, Import Administration, to James J. Jochum, Assistant Secretary for Import Administration, dated August 31, 2004, which is hereby adopted by this notice. The issues discussed in the Decision Memo include the likelihood of continuation or recurrence of dumping and the magnitude of the margin likely to prevail if the suspended investigation were revoked. Parties can find a complete discussion of all issues raised in this sunset review and the corresponding recommendations in this public memo, which is on file in room B-099 of the main Commerce Building.

In addition, a complete version of the Decision Memo can be accessed directly on the Web at <http://ia.ita.doc.gov/frn>, under the heading "September 2004." The paper copy and electronic version of the Decision Memo are identical in content.

#### Final Results of Review

The Department determines that termination of the suspended antidumping duty investigation on hot-rolled steel from Russia would likely lead to continuation or recurrence of dumping at the following weighted-average margins:

Manufacturers/producers/exporter's	Weighted-average margin (percent)
JSC Severstal .....	73.59
Russia-Wide Rate .....	184.56

This notice also serves as the only reminder to parties subject to administrative protective orders ("APO") of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of the return or destruction of APO materials or conversion of APO is a violation which is subject to sanction.

We are issuing and publishing the results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act. p

**Appendix 1—Scope of the Suspended Investigation on Hot-Rolled Steel From Russia (A-821-809)**

For purposes of this sunset review, the products covered are certain hot-rolled flat-rolled carbon-quality steel products of a

rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers) regardless of thickness, and in straight lengths, of a thickness less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm but not exceeding 1250 mm and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this review. Specifically included in this scope are vacuum degassed, fully stabilized (commonly referred to as interstitial-free ("IF")) steels, high strength low alloy ("HSLA") steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium and/or niobium added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, titanium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum. Steel products to be included in the scope of this review, regardless of HTSUS definitions, are products in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the

elements listed below exceeds the quantity, by weight, respectively indicated:  
 1.80 percent of manganese, or 1.50 percent of silicon, or 1.00 percent of copper, or 0.50 percent of aluminum, or 1.25 percent of chromium, or 0.30 percent of cobalt, or 0.40 percent of lead, or 1.25 percent of nickel, or 0.30 percent of tungsten, or 0.012 percent of boron, or 0.10 percent of molybdenum, or 0.10 percent of niobium, or 0.41 percent of titanium, or 0.15 percent of vanadium, or 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this review unless otherwise excluded. The following products, by way of example, are outside and/or specifically excluded from the scope of this review: Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including *e.g.*, ASTM specifications A543, A387, A514, A517, and A506) SAE/AISI grades of series 2300 and higher. Ball bearing steels, as defined in the HTSUS. Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 1.50 percent. ASTM specifications A710 and A736.
