SUPPLEMENTARY INFORMATION:

PRA Approval of Forms Used by Individual Taxpayers

Under the PRA, OMB assigns a control number to each "collection of information" that it reviews and approves for use by an agency. The PRA also requires agencies to estimate the burden for each collection of information. The burden estimates for each control number are displayed in (1) the PRA notices that accompany collections of information, (2) **Federal Register** notices such as this one, and (3) in OMB's database of approved information collections.

The Individual Taxpayer Burden Model (ITBM) estimates the levels of burden experienced by individual taxpayers when complying with the Federal tax laws. This model reflects major changes over the past two decades in the way taxpayers prepare and file their returns; more than 85 percent of all individual tax returns are prepared

utilizing computer software, either by the taxpayer or a paid provider, and less than 15 are prepared manually. The ITBM's approach to measuring burden focuses on the characteristics and activities of individual taxpayers rather than the forms they use. Key determinants of taxpayer burden in the model are the way the taxpayer prepares the return, e.g. with software or paid preparer, and the taxpayer's activities, e.g. recordkeeping and tax planning.

Burden is defined as the time and out-of-pocket costs incurred by taxpayers to comply with the Federal tax system. The time expended and the out-of-pocket costs are estimated separately. The methodology distinguishes among preparation methods, taxpayer activities, types of individual taxpayer, filing methods, and income levels. Indicators of complexity in tax laws as reflected in tax forms and instructions are incorporated in the model. The preparation methods are:

- Self-prepared without software
- Self-prepared with software
- Used a paid preparer

The types of taxpayer activities measured in the model are:

- Recordkeeping
- Form completion
- Form submission (electronic and paper)
- Tax planning (this activity completed at individual taxpayer discretion)
- Use of services (IRS and paid professional)
- Gathering tax materials

The methodology incorporates results from a burden survey of 14,932 taxpayers conducted in 2000 and 2001, and estimates taxpayer burden based on those survey results. Summary level results using this methodology are presented in the table below.

Taxpayer Burden Estimates

The table below shows burden estimates by form type. Time burden is further broken out by taxpayer activity. The largest component of time burden is record keeping at 60 percent for all taxpayers, as opposed to form completion and submission at only 16 percent. In addition, the time burden associated with form completion and submission activities are closely tied to preparation method. That is, these time burden estimates fluctuate according to preparation method.

Both time and cost burdens are *national averages*, and do not necessarily reflect a "typical" case. The average time burden for all taxpayers filing a 1040, 1040A, or 1040EZ was 23.8 hours, with an average cost of \$204 per return. This average includes all associated forms and schedules, across all preparation methods and all taxpayer activities. Taxpayers filing Form 1040 had an average burden of about 30 hours, and taxpayers filing Form 1040A and Form 1040EZ averaged about 11 hours, respectively. However, within each of these estimates, there is significant variation in taxpayer activity. Similarly, tax preparation fees vary extensively depending on the taxpayer's tax situation and issues, the type of professional preparer and geographic area.

The data shown are the best estimates from tax returns filed for 2005 currently available as of July 11, 2006. The estimates are subject to change as new forms and data become available. The estimates do not include burden associated with post-filing activities. However, operational IRS data indicate that electronically prepared and e-filed returns have fewer errors, implying a lower overall post-filing burden.

DRAFT.—TABLE 1. ESTIMATED AVERAGE TAXPAYER BURDEN FOR INDIVIDUALS, BY ACTIVITY
