

47 uses threat data received over the aircraft interfaces to assess the threat situation and to determine a response. Expendable routines tailored to the immediate aircraft and threat environment may be dispensed using one of four operational modes. The hardware, technical data, and documentation to be provided are Unclassified.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

* as defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Netherlands – Logistics Support for F-16 Aircraft

The Government of the Netherlands has requested a possible purchase of logistics support services/equipment for the F-16 aircraft including avionics/computer software support, aircraft engine services/modifications, publications and technical documentation, contractor technical services, spare and repair parts, depot level repair support and other related program elements of support to ensure aircraft operational availability. The estimated cost is \$150 million.

This proposed sale contributes to the foreign policy and national security objectives of the U.S. by improving the military capabilities of the Netherlands and enhancing standardization and interoperability with U.S. forces, as well as with the European Participating Group (EPG) countries in the F-16 Multi-National Fighter Program (MNFP).

The Netherlands needs this logistics support to maintain the operational level of its F-16 squadrons in support of organic and NATO mission commitments, such as its current operations in Afghanistan, continued contributions to the Global War on Terrorism, and possible future coalition operations. The Netherlands will have no difficulty absorbing these logistic support services and equipment.

The proposed sale of this equipment and support will not affect the basic military balance in the region.

The contractors expected to participate in this program are United Technologies Corporation, Pratt & Whitney, West Palm Beach, Florida; Lockheed Fort Worth Company, Fort Worth, Texas; and Westinghouse Electric Corporation, Baltimore, Maryland. There are no offset agreements proposed to be entered into in connection with this potential sale. There is no prime contractor involved in this program. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale may require the assignment of two U.S. Government personnel and one contractor representative in the Netherlands for a period of up to five years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
