

diabetic peripheral neuropathy. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for LYRICA (NDA 21-446) (U.S. Patent No. 6,197,819) from Warner-Lambert Company LLC, and the Patent and Trademark Office requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated February 24, 2006, FDA advised the Patent and Trademark Office that this human drug product had undergone a regulatory review period and that the approval of LYRICA (NDA 21-446) represented the first permitted commercial marketing or use of the product. Shortly thereafter, the Patent and Trademark Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for LYRICA (NDA 21-446) is 3,279 days. Of this time, 2,852 days occurred during the testing phase of the regulatory review period, while 427 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355(i)) became effective:* January 10, 1996. The applicant claims August 24, 1997, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND effective date was January 10, 1996, which was 30 days after FDA receipt of the initial IND.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the act:* October 31, 2003. The applicant claims October 30, 2003, as the date the new drug application (NDA) for LYRICA (NDA 21-446) was initially submitted. However, FDA records indicate that NDA 21-446 was initially submitted on October 31, 2003.

3. *The date the application was approved:* December 30, 2004. FDA has verified the applicant's claim that NDA 21-446 was approved on December 30, 2004.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 299 days of patent term extension.

Anyone with knowledge that any of the dates as published are incorrect may submit to the Division of Dockets

Management (see **ADDRESSES**) written or electronic comments and ask for a redetermination by November 27, 2006. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by March 26, 2007. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Division of Dockets Management. Three copies of any mailed information are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

Dated: September 15, 2006.

Jane A. Axelrad,

Associate Director for Policy, Center for Drug Evaluation and Research.
