

POSTAL SERVICE**39 CFR Part 111****New Standards for Domestic Mailing Services****AGENCY:** Postal Service.**ACTION:** Proposed rule.

SUMMARY: On May 3, 2006, the Postal Service filed a request with the Postal Rate Commission to change prices for virtually all domestic mailing services. The Commission designated the filing as Docket No. R2006-1. This proposed rule provides the mailing standards that would accompany the new prices if the R2006-1 price change proposal is adopted.

DATES: We must receive your comments on or before November 13, 2006.

ADDRESSES: Mail or deliver written comments to the Manager, Mailing Standards, U.S. Postal Service, 475 L'Enfant Plaza SW., Room 3436, Washington DC 20260-3436. You may inspect and photocopy all written comments at USPS Headquarters Library, 475 L'Enfant Plaza SW., 11th Floor N, Washington DC between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Joel Walker, 202-268-7266.

SUPPLEMENTARY INFORMATION: The Postal Service's request in Docket No. R2006-1 includes mail classification changes, new pricing structures, and price changes for most domestic mailing services. This proposed rule contains the revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM) that we would adopt to implement the R2006-1 price change proposal. We summarize our revisions by class of mail and extra service, and we provide our proposed changes to the mailing standards in the DMM. We invite your comments on all aspects of our proposed standards.

We also provide the proposed prices, price categories, and price structures that are currently under review by the Postal Rate Commission. The pricing proposal is subject to separate Commission proceedings. For more information visit <http://www.prc.gov>.

This is the first time since 2001 that we have proposed any restructuring to our prices. We adjusted prices in January 2006 solely to fund a \$3.1 billion escrow account required by federal law. When our new prices are implemented in 2007, postage prices will have grown at or below the Consumer Price Index since 1971.

Overview

Our pricing proposal reflects changes in operations and the marketplace. Our proposal would enhance efficiency, offer more choices, and ensure that all types of mail cover their costs. We include incentives to create mailpieces compatible with our processing systems and deposit flats and parcels closer to where they are delivered.

Our proposed prices recognize that each shape of mailpiece—letter, flat, and parcel—has substantially different processing costs that need to be covered. Our current prices do not distinguish between shapes as much as they could. For example, in First-Class Mail, our current price is 63 cents for a 2-ounce piece regardless of whether it is a letter, flat, or parcel.

We also provide opportunities to mitigate the impact of price increases. If the contents of a First-Class Mail flat are folded and placed into a letter-size envelope, the mailer could save as much as 20 cents. If a parcel is reconfigured as a flat, the mailer could save up to 38 cents.

To better align mail preparation with our processing capabilities and to maximize access to lower rates for mailers, we propose to require scheme preparation wherever appropriate. We define the terms “5-digit/scheme” and “3-digit/scheme” as the preparation of bundles and containers for 5-digit and 3-digit ZIP Code combinations in any of our scheme labeling lists, and single 5-digit and 3-digit ZIP Codes not on these lists. We also propose to require all flat-size pieces to be uniformly thick.

First-Class Mail

Our proposal introduces prices based on the shape of mail and our relative costs, with separate prices for letters, flats, and parcels. As shape becomes more important, weight becomes less important, and our proposal reduces prices for many pieces over 1 ounce.

First-Class Mail Retail Letters, Flats, and Parcels

The single-piece 1-ounce First-Class Mail letter price would increase \$0.03, to \$0.42, and the single-piece card price also would increase \$0.03, to \$0.27. The additional-ounce price would decrease \$0.04, to \$0.20.

We propose a “forever stamp” to make future price changes more convenient for consumers. The postage value of the forever stamp would equal the First-Class Mail single-piece 1-ounce letter rate at any time in the future, without the addition of extra postage.

Our pricing proposal would eliminate the nonmachinable surcharge. Instead, a

letter-size mailpiece with nonmachinable characteristics would pay the flat-size price. Our additional handling costs are included in the proposed 1-ounce flat-size price, so no surcharge is necessary. To qualify for letter rates, the maximum weight for letter-size pieces would be 3.5 ounces.

First-Class Mail Discount Letters and Flats

The additional-ounce price for automation letters would decrease from \$0.237 to \$0.155. We would maintain the 150-piece minimum tray preparation requirement for automation First-Class Mail letters and cards. Sort levels would be 5-digit/scheme, 3-digit/scheme, 3-digit origin, automation area distribution center (AADC), and mixed AADC. We propose a simplified preparation to allow mailers of machinable letters to sort only to the AADC and mixed AADC levels. We would eliminate the carrier route automation preparation and discounts. The maximum weight for letter rates, including automation pieces, would be 3.5 ounces.

We would expand the current requirement for pieces to be rectangular to all flats. The physical standards for automation flats would be the current criteria for AFSM 100 pieces, with new standards for flexibility. We also propose to lessen the deflection standard.

Our proposal would eliminate the nonmachinable surcharge. Instead, letter-size mailpieces with nonmachinable characteristics would pay flat-size prices. Presorted prices would be available for machinable letters sorted to the 3-digit origin, AADC, and mixed AADC levels.

To help reduce the costs of handling mail in letter trays, we propose a no-overflow tray option for automation letters. In addition, to encourage fuller trays, we propose to change our definition of a “full letter tray” to one in which the pieces fill the length of the tray between 85 percent and 100 percent full.

First-Class Mail Discount Parcels

The structure for discount parcels includes new workshare prices. The proposed rate levels are 5-digit, 3-digit, ADC, and single piece. At least 10 pounds of parcels would be required for 5-digit sacks, 3-digit sacks, and ADC sacks. Remaining pieces sorted to a mixed ADC sack would pay the single-piece First-Class Mail parcel price.

Discount parcels would require a 5-digit UCC/EAN 128 or POSTNET barcode. Unless prepared in 5-digit containers or paid at the single-piece

rates, a surcharge would apply to all parcels that are not barcoded or weigh less than 2 ounces, or to irregularly shaped parcels such as triangles, tubes, rolls, and similar pieces.

Standard Mail

Our proposed prices encourage mail that is compatible with our operations and drop shipped closer to its destination. As in First-Class Mail, Standard Mail pricing has greater recognition of shape and reduced reliance on weight.

Standard Mail Letters

Automation letter sort levels would be 5-digit/scheme, 3-digit/scheme, AADC, and mixed AADC. We propose a simplified preparation to allow mailers of machinable letters to sort only to the AADC and mixed AADC levels.

Nonmachinable letter sort levels would be 5-digit, 3-digit, ADC, and mixed ADC, for which there would be separate rates. We would replace the nonmachinable surcharge with a separate rate structure for nonmachinable letters up to 3.3 ounces. Nonmachinable letters over 3.3 ounces would pay the flat-size rate or the Not Flat-Machinable rate.

Destination delivery unit (DDU) drop shipment entry rates would not be available for letters. However, destination sectional center facility (DSCF) entry rates would be allowed for DDU entry of some Enhanced Carrier Route letters, including letters with simplified addresses. Enhanced Carrier Route automation basic rates would be eliminated.

To help reduce the costs of handling mail in letter trays, we propose a no-overflow tray option for automation letters. In addition, to encourage fuller trays, we propose to change our definition of a "full letter tray" to one in which the pieces fill the length of the tray between 85 percent and 100 percent full.

Standard Mail Flats

The physical standards for automation flats would be the criteria for AFSM 100 pieces, with new standards for flexibility. This change would maximize the number of flats we can process in automated operations and deliver as flats. We also propose to lessen the deflection standard.

We propose to increase the maximum size for carrier route flats so that the same standards apply to all flats, regardless of the rate paid. We would expand the current requirement for pieces to be rectangular to all flats, except Customized MarketMail.

Standard Mail Not Flat-Machinable Pieces

Our proposal includes a new Not Flat-Machinable (NFM) classification for rigid flat-size pieces and for pieces that are currently automation-compatible only by meeting UFSM 1000 standards. We propose no bundling requirement for most NFMs and to have mailers prepare pieces in 5-digit/scheme, 3-digit, ADC/BMC, and mixed ADC/BMC containers. We propose allowing a DDU entry discount for NFMs sorted to 5-digit destinations when drop shipped directly to the DDU. There would be no minimum for NFMs drop shipped to DDUs. Unless prepared in 5-digit/scheme containers, a surcharge would apply to all NFMs that are not barcoded.

Standard Mail Parcels

We propose to eliminate the residual shape surcharge for Standard Mail parcels. We would no longer offer a \$0.03 machinable barcode discount. Instead, parcel prices would include a requirement for barcodes. Unless prepared in 5-digit containers, a surcharge would apply to all parcels that are not barcoded.

We would rename "irregular" parcels as "nonmachinable" parcels and remove the bundling requirement for all Standard Mail nonmachinable parcels except enhanced carrier route pieces. We propose to reduce the required minimum quantity of nonmachinable parcels in sacks to 10 pounds per sack.

We would allow mailers to commingle machinable parcels, nonmachinable parcels, and the new Not Flat-Machinable pieces when they are able to combine them in 5-digit containers. We would allow mailers to combine certain ZIP Codes for Standard Mail parcels, machinable Parcel Select, and Bound Printed Matter parcels when prepared in 3-digit containers and entered at designated SCFs.

We propose to allow a DDU entry discount for parcels sorted to 5-digit destinations when drop shipped directly to the DDU. There would be no minimum for the amount of parcels drop shipped to a DDU. The DDU discount is currently available only for pieces sorted to carrier routes.

Customized MarketMail

Rates for Customized MarketMail would equal the 5-digit rate for Not Flat-Machinable pieces, and mailers would still be required to drop ship Customized MarketMail pieces to DDUs.

Detached Address Labels

Our proposal includes a new \$0.015 charge for detached address labels with Enhanced Carrier Route saturation flat-

size pieces. Mailers who prepare mail with addresses on their mailpieces could avoid the new charge.

Periodicals

Our proposed Periodicals prices encourage mailers to use pallets rather than sacks, and to fill sacks with more mail. We also enhance drop ship incentives to encourage mailers, including publishers of high editorial content publications, to enter Outside-County mail closer to its destination.

The pricing proposal includes a new \$0.85 Outside-County Container Rate. The container rate would apply to pallets, sacks, or trays of Outside-County Periodicals mail. We also propose new drop ship prices based on nonadvertising pounds, in addition to increased per-piece drop ship discounts.

To encourage fuller letter trays, we propose to change our definition of a "full letter tray" to one in which the pieces fill the length of the tray between 85 percent and 100 percent full.

Package Services

Package Services includes Parcel Post, Bound Printed Matter, Media Mail, and Library Mail. Our proposal simplifies Package Services offerings and moves toward more efficient handling of parcels.

Parcel Post

Currently, parcels weighing less than 15 pounds and measuring more than 84 inches in combined length and girth are charged the 15-pound rates (the "balloon rate"). Under our proposal, parcels weighing less than 20 pounds and measuring more than 84 inches in combined length and girth would be charged the 20-pound rates.

The current \$0.03 barcode discount available for machinable Parcel Select destination bulk mail center (DBMC) entry mail would be incorporated into the price and a barcode would be required. Nonbarcoded machinable pieces could claim only the applicable Intra-BMC/ASF rate.

We do not propose any changes to mail preparation standards for Parcel Post.

Bound Printed Matter

Single-piece Bound Printed Matter would be renamed "nonpresorted" Bound Printed Matter and would be eliminated as a retail option. The \$0.08 discount off the parcel price for flat-size pieces increases to \$0.16. The \$0.03 per piece POSTNET barcode discount for flat-size mail and the \$0.03 per piece barcode discount for machinable parcels would remain the same.

We propose to require 5-digit/scheme and 3-digit/scheme bundles and 5-digit/scheme sacks for presorted flat-size Bound Printed Matter. We propose to require 5-digit/scheme bundles for nonmachinable parcels weighing less than 10 pounds and 5-digit/scheme sacks for machinable and nonmachinable parcels.

Media Mail and Library Mail

We propose to require 5-digit/scheme and 3-digit/scheme bundles and 5-digit/scheme sacks for presorted flat-size Media Mail and Library Mail. We propose to require 5-digit/scheme bundles for nonmachinable parcels and 5-digit/scheme sacks for machinable and nonmachinable parcels.

Priority Mail

We continue to offer convenience in Priority Mail. The USPS-produced flat-rate envelope still would pay the 1-pound price, \$4.65 under the proposal, regardless of weight or destination. USPS-produced flat-rate boxes would pay \$8.80 under the proposal, regardless of weight or destination, and would become a permanent offering. Prices for all Priority Mail pieces weighing over 25 pounds would decrease for all zones, many by as much as 20 percent.

Currently, Priority Mail pieces weighing less than 15 pounds and measuring more than 84 inches in combined length and girth are charged the 15-pound rates (the "balloon rate"). Under the proposal, Priority Mail pieces weighing less than 20 pounds and measuring more than 84 inches in combined length and girth would be charged the 20-pound rates. The new balloon rate would apply only to pieces addressed for local delivery and to zones 1–4.

Priority Mail pieces that exceed 1 cubic foot and are addressed to zones 5–8 could be subject to a new dimensional weight price. Postage for these pieces would be rated at the greater of their actual weight or their dimensional weight. In general, if a piece is relatively light for its size, it may be subject to a dimensional weight price. Dimensional weight is calculated using one of two formulas, one for rectangular and one for nonrectangular pieces.

Express Mail

Express Mail pieces often contain material that ranges from a half pound to 2 pounds. Currently, these pieces pay the 2-pound price. To keep Express Mail a viable, low-cost alternative for mailers, the pricing proposal would add a new 1-pound price.

The flat-rate envelope would continue to pay the half-pound price, regardless of weight.

Extra Services

Our proposal keeps insured mail reliable, easy, and affordable. All insured pieces would have a barcoded label and receive a delivery scan. We would not require a signature for insured items with an indemnity of \$200 or less.

We propose new prices for Bulk Parcel Return Service, Business Reply Mail, Certificate of Mailing, Certified Mail, Collect on Delivery, Delivery Confirmation, Bulk Insurance, Express Mail Insurance, Merchandise Return Service, Money Orders, Parcel Airlift, Parcel Return Service, Registered Mail, Restricted Delivery, Return Receipt, Return Receipt for Merchandise, Signature Confirmation, and Special Handling.

Other Services

Our proposal seeks to modernize our services, improve address quality, and reduce undeliverable-as-addressed mail.

The Address Change Service electronic option for First-Class Mail would decrease from \$0.21 to \$0.06. All other classes of mail would increase from \$0.21 to \$0.25. Manual Address Correction Service for all classes of mail would decrease from \$0.75 to \$0.50.

A new automated option for Address Change Service would allow First-Class Mail letters to receive the first two notices at no charge, then each additional notice for \$0.05 each. Standard Mail letters would receive the first two notices at \$0.02, then each additional notice for \$0.15 each. This new option would require mailers to use the new 4-State Customer Barcode.

Our proposed standards recognize the value of address matching software by encouraging mailers of all discount letters and flats to match their addresses using a Coding Accuracy Support System (CASS)—certified address matching process and the correct ZIP+4 code on each piece in their mailings. Because smaller mailers may need time to initiate such a change, we propose to implement this requirement in July 2009.

The fee structure for Confirm service would change from the Silver, Gold, and Platinum tiers to a unit-based structure. Customers would pay standardized annual fees and purchase blocks of units that are redeemed for Confirm scans. Units are redeemed at the rates of one unit per First-Class Mail scan or five units per scan for any other class of mail. The cost per block of units

declines as volume thresholds are reached.

On-site meter services are no longer offered. The fees associated with on-site meter service, meter resetting, examination, and checking meters in and out of service would be eliminated.

Individual post office box holders at different locations may experience varying price changes as we continue to align prices with our costs for each location. Our proposal would also align the Caller Service fees.

We propose price changes for Address Sequencing Service, Mailing List Service, Permit Imprint fees, Pickup on Demand service, Premium Forwarding Service, Shipper Paid Forwarding, Stamped Cards, Stamped Envelopes, and all annual mailing fees.

Although we are exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 410 (a)), we invite comments on the following proposed revisions to *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations. See 39 CFR part 111.

Accordingly, 39 CFR part 111 is proposed to be amended as follows:

PART 111—[AMENDED]

c. Flexible (see 1.3).

- d. Rectangular.
e. Uniformly thick (see 1.4)

* * * * *

[Insert new 2.2 through 2.4 as follows:]

2.2 Flexibility

Flat-size pieces must meet minimum flexibility criteria. Test flexibility as follows:

- a. For pieces 10 inches or longer:
1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece 5 inches off the surface.
2. Press down on the piece at a central point about an inch off the edge of the surface, exerting a steady pressure.
3. The piece is flexible if it can bend at least 2 inches without being damaged.
- b. For pieces less than 10 inches long:
1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece one-half of its length off the surface.
2. Press down on the piece at a central point about an inch off the edge of the surface, exerting a steady pressure.
3. The piece is flexible if it can bend at least 1 inch without being damaged.

2.3 Uniform Thickness

The contents of a flat-size mailpiece must remain uniformly thick so that the dimensions of the envelope, wrapper, or sleeve remain constant. If the contents are of irregular thickness or significantly smaller than the envelope, wrapper, or sleeve, those contents must be secured to prevent shifting within the wrapping during processing and surrounded with material or padding to ensure that the mailpiece remains uniformly thick.

2.4 Flat-Size Pieces Not Eligible for Flat-Size Rates

Mailpieces that do not meet the standards in 2.1 through 2.3 are not eligible for flat-size rates and must pay applicable parcel rates.

1.2 Express Mail Rate Application

[Revise 1.2 as follows:]

Except under 1.4, Flat-Rate Envelope, Express Mail items are charged the 0.5-pound rate for items up to 0.5 pound. Items over 0.5 pound are rounded up to the next whole pound. For example, if a piece weighs 0.25 pound, the weight (postage) increment is 0.5 pound; if a piece weighs 0.75 pound, the weight

(postage) increment is 1 pound; if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds.

* * * * *

1.2 Priority Mail Rate Application

[Revise 1.2 as follows:]

Except under 1.3, 1.4, and 1.5, Priority Mail rates are charged per pound; any fraction of a pound is rounded up to the next whole pound. For example, if a piece weighs 1.2 pounds, the weight (postage) increment is 2 pounds. The minimum postage amount per addressed piece is the 1-pound rate. The Priority Mail rate up to 1 pound is based on weight only; rates for pieces weighing more than 1 pound are based on weight and zone. Other charges may apply. See Exhibit 1.2, *Priority Mail Rates*.

1.3 Minimum Rate for Parcels to Zones 1–4

[Revise 1.3 as follows:]

Parcels addressed for delivery to Zones 1–4 (including Local) that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable zone rate for a 20-pound parcel (balloon rate).

[Delete 1.6 and 1.7; renumber 1.4 and 1.5 as new 1.6 and 1.7. Insert new 1.4 and 1.5 as follows:]

1.4 Dimensional Weight Rate for Low-Density Parcels to Zones 5–8

Postage for parcels addressed for delivery to Zones 5–8 and exceeding 1 cubic foot (1,728 cubic inches) is charged based on the actual weight or the dimensional weight (as calculated in 1.4.1 or 1.4.2), whichever is greater.

1.4.1 Determining Dimensional Weight for Rectangular Parcels

Follow these steps to determine the dimensional weight for a rectangular parcel:

- Measure the length, width, and height in inches. Round off each measurement.
- Multiply the length by the width by the height.
- If the result exceeds 1,728 cubic inches, divide the result by 194 and round up to the next whole number to

determine the dimensional weight in pounds.

1.4.2 Determining Dimensional Weight for Nonrectangular Parcels

Follow these steps to determine the dimensional weight for a nonrectangular parcel:

- a. Measure the length, width, and height in inches at their extreme dimensions. Round off each measurement.
b. Multiply the length by the width by the height.
c. Multiply the result by an adjustment factor of 0.785.
d. If the result exceeds 1,728 cubic inches, divide the result by 194 and round up to the next whole number to determine the dimensional weight in pounds.
e. If the dimensional weight exceeds 70 pounds, the parcel pays the 70-pound rate.

1.5 Flat-Rate Boxes and Envelopes

Any amount of material may be mailed in a USPS-produced Priority Mail flat-rate box or flat-rate envelope. When sealing a flat-rate box or flat-rate envelope, the container flaps must be able to close within the normal folds. Tape may be applied to the flaps and seams to reinforce the container, provided the design of the container is not enlarged by opening the sides, and the container is not reconstructed in any way.

1.5.1 Flat-Rate Boxes—Rate and Eligibility

Each USPS-produced Priority Mail flat-rate box is charged \$8.80, regardless of the actual weight of the piece or its destination. Only USPS-produced flat-rate boxes are eligible for the flat-rate box rate.

1.5.2 Flat-Rate Envelopes—Rate and Eligibility

Each USPS-produced Priority Mail flat-rate envelope is charged \$4.65, regardless of the actual weight of the piece or its destination. Only USPS-produced flat-rate envelopes are eligible for the flat-rate envelope rate.

[Revise the weight limit in item b as follows:]

b. The letter rate applies to letter-size pieces that meet the standards in 101.1.1 and weigh 3.5 ounces or less, and that are not eligible for and claimed at the card rate.

[Insert new items c and d as follows:]

- c. The flat rate applies to flat-size pieces that meet the standards in 101.2.1 and letter-size pieces with one or more of the nonmachinable characteristics in 101.1.2.
d. The parcel rate applies to parcel-size pieces under 101.3.0 and to flat-size pieces that do not meet the standards in 101.2.0.

1.9 Keys and Identification Devices

[Revise renumbered 1.9 to remove references to nonmachinable surcharge in the first three sentences as follows:]

Keys and identification devices (such as identification cards and uncovered identification tags) that weigh 13 ounces or less are returned at the applicable single-piece First-Class Mail parcel rate plus the fee. Keys and identification devices that weigh more than 13 ounces but not more than 1 pound are returned at the 1-pound Priority Mail rate plus the fee. Keys and identification devices weighing more than 1 pound but not more than 2 pounds are mailed at the 2-pound Priority Mail rate for zone 4 plus the fee.

1.8 Inter-BMC/ASF Nonmachinable Parcel Post

[Revise the first three sentences in 1.8 as follows:]

Rates include the \$3.62 nonmachinable surcharge. Regardless of weight, a parcel that meets any of the criteria in 101.7.2, Nonmachinable Parcel Post Standards, must pay the rate listed in Exhibit 1.9. Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 20-pound parcel (balloon rate).

1.10 Local and Intra-BMC/ASF Machinable Parcel Post

[Revise the third sentence in 1.10 as follows:]

* * * Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 20-pound parcel (balloon rate).

1.11 Local and Intra-BMC/ASF Nonmachinable Parcel Post

[Revise the first three sentences in 1.11 as follows:]

Rates include the \$1.85 nonmachinable surcharge. Regardless of weight, a parcel that meets any of the criteria in 101.7.2, Nonmachinable Parcel Post Standards, must pay the rates in Exhibit 1.12. Parcels that weigh less than 20 pounds but measure more than 84 inches (but not more than 108 inches) in combined length and girth are charged the applicable rate for a 20-pound parcel (balloon rate).

[Revise the text in 3.6.1 as follows:]

The ZIP Code accuracy standard is a means of ensuring that the ZIP+4 or 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, *address* means a specific address associated with a specific ZIP+4 or 5-digit ZIP Code. Effective July 2009, mailers of all discount letters, flats, and parcels must properly code and match their address lists using one of the CASS-certified address matching methods in 708.3.0 and use the correct ZIP+4 code on each mailpiece. Mailers are encouraged to begin this practice immediately. Addresses used on pieces claiming discount rates must meet these requirements:

a. Each address and associated ZIP+4 or 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in 3.6.2.

b. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate.

[Revise the introductory text and item a in 3.8.1 as follows:]

Mailers are encouraged to begin this practice immediately. Except for mail bearing a simplified address, addresses used on pieces claiming discount rates must meet these requirements:

Mailers preparing automation-compatible, barcoded ECR letters that weigh up to 3 ounces for ZIP Codes identified with a “C” or a “D” in the Carrier Route indicators in the USPS City State Product must make full carrier route and 5-digit carrier routes trays. Except for card-size pieces, pieces must not be bundled. Group pieces together by carrier route in 5-digit and 3-digit carrier routes trays. If pieces for one carrier route do not result in a full tray, mailers must combine pieces for more than one route to make full 5-digit carrier routes trays, grouping pieces together by carrier route. If pieces for multiple carrier routes do not result in a full 5-digit tray, mailers must combine pieces for more than one 5-digit ZIP Code to make 3-digit carrier routes trays, grouping pieces together by carrier route. If pieces fill more than one tray but do not fill an additional tray, mailers must place excess pieces in a tray at the next sortation level. Preparation sequence, tray size, and labeling:

4.2 Eligibility

[Revise 4.2 to allow pieces placed in AADC trays in lieu of in 3-digit trays under 245.7.5 to be eligible for DSCF rates, as follows:]

Pieces in a mailing that meet the standards in 2.0 and 4.0 are eligible for DSCF rates when deposited at a DSCF (or USPS-designated facility); addressed for delivery within that SCF's service area; and placed in a tray that is labeled to that DSCF, to the AADC that includes that DSCF under the preparation option in 245.7.5, or to a postal facility within its service area. 300 Discount Mail: Flats

301 Physical Standards

1.0 Physical Standards for Flats

1.1 General Definition of Flat-Size Mail

* * * * *

[Add an exception for Periodicals mail in item b as follows:]

b. Not more than 15 inches long, or more than 12 inches high, or greater than 3/4 inch thick, except for Periodicals mail under 707.25.3.

[Replace items c and d with new items c and d as follows:]

c. Rectangular.

d. Other size or weight standards may apply to mail claimed at certain rates, mail addressed to certain APOs and FPOs, and mail sent by the Department of State to U.S. government personnel abroad.

* * * * *

[Insert new 1.3 through 1.6 as follows:]

1.3 Shape

Each flat-size piece must be rectangular. See 2.0 for additional standards by class of mail.

1.4 Flexibility

Flat-size pieces must meet minimum flexibility criteria. Test flexibility as follows:

a. For pieces 10 inches or longer:

1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece 5 inches off the surface.

2. Press down on the piece at a central point about an inch off the edge of the surface, exerting a steady pressure.

3. The piece is flexible if it can bend at least 2 inches without being damaged.

b. For pieces less than 10 inches long:

1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece one-half of its length off the surface.

2. Press down on the piece at a central point about an inch off the edge of the surface, exerting a steady pressure.

3. The piece is flexible if it can bend at least 1 inch without being damaged.

[Insert new 1.5 as follows:]

1.5 Uniform Thickness

The contents of a flat-size mailpiece must remain uniformly thick so that the dimensions of the envelope, wrapper, or sleeve remain constant. If the contents are of irregular thickness or significantly smaller than the envelope, wrapper, or sleeve, those contents must be secured to prevent shifting within the wrapping during processing and surrounded with material or padding to ensure that the mailpiece remains uniformly thick.

[Insert new 1.6 as follows:]

1.6 Flat-Size Pieces Not Eligible for Flat-Size Rates

Mailpieces that do not meet the standards in 1.3 through 1.5 are not eligible for flat-size rates and must pay applicable rates as follows:

a. First-Class Mail—parcel rates.

b. Standard Mail—Not Flat-Machinable or parcel rates.

c. Bound Printed Matter—parcel rates.

[Revise the heading of 2.0 to delete "Presorted."]

2.0 Physical Standards for Nonautomation Flats

2.1 First-Class Mail

[Revise 2.1 as follows:]

These additional standards apply to First-Class Mail flat-size pieces:

a. First-Class Mail cannot exceed 13 ounces. First-Class Mail weighing more than 13 ounces is Priority Mail.

b. Flat-size pieces that do not meet the standards in 1.3 through 1.5 must be prepared as parcels and pay the applicable parcel rate.

* * * * *

2.2 Standard Mail

[Delete item b. Insert new item b as follows:]

b. Flat-size pieces that do not meet the standards in 1.3 through 1.5 must be prepared as parcels or Not Flat-Machinable pieces and pay the parcel or Not Flat-Machinable rates (see 401).

* * * * *

[Delete current Exhibit 2.2.1b.]

2.3 Bound Printed Matter

2.3.1 General Standards

[Delete item c in 2.3.1. Renumber items a and b as new items b and c. Revise

the introductory text and insert new item a as follows:]

These additional standards apply to Bound Printed Matter:

a. Flat-size pieces that do not meet the standards in 1.3 through 1.5 must be prepared as parcels and pay the applicable parcel rate.

* * * * *

2.4 Media Mail

3.0 Physical Standards for Automation Flats

3.1 Basic Standards for Automation Flats

[Revise 3.1 as follows:]

Flat-size pieces claimed at automation rates must meet the standards in 3.0 and the eligibility standards for the class of mail and rate claimed. Pieces prepared with polywrap film must meet the standards in 3.4.

* * * * *

[Revise heading of 3.3 as follows:]

3.3 Additional Criteria for Automation Flats

[Revise the title and text of 3.3.1 as follows:]

3.3.1 Address Placement on Folded Pieces

Mailers must design folded pieces so that the address is in view when the final folded edge is at the bottom of the piece and any intermediate bound or folded edge is to the right.

3.3.2 Shape and Size

[Revise 3.3.2 to specify the minimum and maximum dimensions as follows:]

Each flat-size piece must be rectangular. The following minimum and maximum dimensions apply to First-Class Mail, Standard Mail, Periodicals (except under 707.25.3), and Bound Printed Matter pieces:

1. Minimum height is 5 inches. Maximum height is 12 inches.

2. Minimum length is 6 inches.

Maximum length is 15 inches.

3. Minimum thickness is 0.009 inch.

Maximum thickness is 0.75 inch.

* * * * *

[Revise heading and text of 3.3.4 to delete standards for turning ability and add new standards for flexibility as follows:]

3.3.4 Flexibility

An automation flat-size mailpiece must be flexible (see 1.4) and must meet maximum deflection standards. Test deflection as follows:

a. For pieces 10 inches or longer:

1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece 5 inches off the surface.

2. The piece is automation-compatible if it does not droop more than 4 inches.

b. For pieces less than 10 inches long:

1. Place the piece with the length perpendicular to the edge of a flat surface and extend the piece one-half of its length off the surface.

2. The piece is automation-compatible if it does not droop more than 2 inches.

[Delete 3.4 to remove the standards for UFSM 1000 flats. Renumber 3.5 through 3.9 as new 3.4 through 3.8.]

3.4 Polywrap Coverings

[Revise heading and text of renumbered 3.4.1 as follows:]

3.4.1 Polywrap Films and Similar Coverings

When mailers use polywrap film or similar material to enclose flat-size mailpieces claimed at automation rates, the material must meet the standards in 3.4. Film approved for use under 3.4.5 must meet the specifications in Exhibit 3.4.1 as follows:

a. Films or similar coverings must meet all eight properties in Exhibit 3.4.1.

b. If the address label is affixed to the outside of the polywrap, the haze property (property 2) does not apply.

3.4.2 Wrap Direction and Seam Placement

* * * * *

[Revise item a as follows:]

a. The wrap direction must be around the longer axis of the mailpiece, with the seam parallel to that axis. The longer axis is always parallel to the length of the mailpiece.

[Revise the first sentence in item b as follows:]

b. The preferred seam placement is on the nonaddressed side of the mailpiece.

* * *

3.4.3 Overhang

[Revise 3.4.3 by deleting item b and restructuring the text as follows:]

For purposes of the polywrap standards for overhang (selvage) only, the top edge of the mailpiece is one of the two physically longer edges of the piece, regardless of address orientation and whether bound or unbound. Any polywrap overhang (selvage) around the four edges of the mailpiece (top, bottom, and left and right sides) must meet these standards:

a. When the mailpiece contents are totally positioned at the bottom of the polywrap, the overhang must not be more than 0.5 inch at the top of the mailpiece.

b. When the mailpiece contents are totally positioned to the left or to the right side of the polywrap, the overhang must not be more than 1.5 inches on the opposite side.

c. The polywrap covering must not be so tight that it bends the mailpiece.

[Delete 3.4.4.]

* * * * *

3.8 Uniformity and Exterior Format

3.8.1 General

[Revise 3.8.1 by adding a reference to 1.5 in the first sentence as follows:]

A flat-size mailpiece prepared and claimed at automation rates must be uniformly thick (see 1.5). * * *

2.0 Placement and Content of Mail Markings

2.1 First-Class Mail and Standard Mail Markings

2.1.1 Placement

* * * * *

[Revise items b and b3 as follows:]

b. Other Markings. Mailers may place rate-specific markings as follows:

* * * * *

3. If preceded by two asterisks (**), the "AUTO," "PRESORTED" (or "PRSRT"), "CUSTOMIZED MARKETMAIL" (or "CUST MKTMAIL" or "CMM"), or "Single-Piece" (or "SNGLP") markings also may be placed on the line directly above or two lines above the address in a mailer keyline or a manifest keyline, or it may be placed above the address and below the postage

in an MLOCR ink-jet printed date correction/meter drop shipment line.

* * * * *

2.1.2 Exceptions to Markings

* * * * *

[Delete "AUTOOCR" in item b as follows:]

b. Manifest Mailings. The basic marking must appear in the postage area on each piece. The two-letter rate category code required in the keyline on manifest mailing pieces prepared under 705.2.0 meets the requirement for other rate markings.

3.6 ZIP Code Accuracy

3.6.1 Basic Standards

[Revise 3.6.1 as follows:]

The ZIP Code accuracy standard is a means of ensuring that the ZIP+4 or 5-digit ZIP Code in the delivery address correctly matches the delivery address information. For the purposes of this standard, address means a specific address associated with a specific ZIP+4 or 5-digit ZIP Code. Effective July 2009, mailers of all discount letters, flats, and parcels must properly code and match their address lists using one of the CASS-certified address matching methods in 708.3.0 and use the correct ZIP+4 code on each mailpiece. Mailers are encouraged to begin this practice immediately. Addresses used on pieces claiming discount rates must meet these requirements:

a. Each address and associated ZIP+4 or 5-digit ZIP Code used on the mailpieces in a mailing must be verified and corrected within 12 months before the mailing date with one of the USPS-approved methods in 3.6.2.

b. If an address used on a mailpiece in a mailing at one class of mail and rate is verified and corrected with an approved method, the same address

may be used during the following 12 months to meet the ZIP Code accuracy standard required for mailing at any other class of mail and rate.

f. A 5-digit scheme sort for flats meeting the automation-compatibility standards in 301.3.0 yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in L007 and 5-digit bundles for other ZIP Codes. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme bundles and sacks of flats, then prepare all possible 5-digit bundles and sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. Label mailpieces using an optional endorsement line (OEL) under 708.7.0. Place bundles in appropriate containers using the OEL "label to" 5-digit ZIP Code.

When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme bundles of flats, then prepare all possible 3-digit bundles. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. * * * * *

1.4 Preparation Definitions and Instructions

* * * * *

[Revise item e for 5-digit scheme sort as follows:]

e. A 5-digit scheme sort for flats meeting the automation-compatibility standards in 301.3.0 yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in L007 and 5-digit bundles for other ZIP Codes. When standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme bundles and sacks of flats before preparing 5-digit bundles and sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation required. Bundles prepared for a 5-digit scheme destination that contain pieces for only one of the schemed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly. Label mailpieces using an optional endorsement line (OEL) under 708.7.0. Place bundles in appropriate containers using the OEL "label to" 5-digit ZIP Code.

* * * * *

[Revise item g for 3-digit scheme sort as follows:]

g. A 3-digit scheme sort for flats meeting the automation-compatibility standards in 301.3.0 yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in L008. When standards require 3-digit/scheme sort, mailers must prepare all possible 3-digit scheme bundles of flats before preparing 3-digit bundles. The 3-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume, with no further separation by 3-digit ZIP Code required. Bundles prepared for a 3-digit scheme destination that contain pieces for only one of the schemed 3-digit ZIP Codes are still considered 3-digit scheme sorted and are labeled accordingly. Mailpieces must be labeled using an optional endorsement line (OEL) under 708.7.0. Three-digit scheme bundles are placed in 3-digit through mixed ADC containers, as applicable, using the OEL "label to" 3-digit ZIP Code.

445 Mail Preparation

1.0 General Information for Mail Preparation

* * * * *

1.4 Preparation Definitions and Instructions

* * * * *

[Revise item c to require 5-digit/scheme sort for rate eligibility as follows:]

c. A 5-digit/scheme sort for Standard Mail parcels yields 5-digit scheme sacks or pallets for those 5-digit ZIP Codes listed in L606 and 5-digit sacks or pallets for other ZIP Codes. When

standards require 5-digit/scheme sort, mailers must prepare all possible 5-digit scheme sacks, then prepare all possible 5-digit sacks. The 5-digit ZIP Codes in each scheme are treated as a single presort destination subject to a single minimum volume (if required), with no further separation by 5-digit ZIP Code required. Sacks or pallets prepared for a 5-digit scheme destination that contain pieces for only one of the scribed 5-digit ZIP Codes are still considered 5-digit scheme sorted and are labeled accordingly.

* * * * *

2.0 Bundles

2.1 Definition of a Bundle

[Add a new fifth sentence to restrict bundling as follows:]

* * * Bundling under 445 is allowed only for carrier route bundles of parcels and 5-digit bundles of Not Flat-Machinable pieces placed on pallets or in pallet boxes (see 6.0). * * *

* * * * *

5.0 Preparation for Presorted Parcels

* * * * *

5.3 Preparation of Machinable Parcels

5.3.1 5-Digit Sacks

[Revise 5.3.1 to change the preparation of 5-digit/scheme sacks containing both machinable and nonmachinable parcels (or also containing Not Flat-Machinable pieces) to be that for machinable parcels, and to require 5-digit scheme sorting when claiming 5-digit rates, as follows:]

Mailers must prepare all possible 5-digit/scheme sacks in a mailing that includes pieces claimed at the 5-digit rate. If mailers do not prepare all 5-digit/scheme sacks when there are 10 pounds or more of mail for a destination, they may not claim the 5-digit rate for any part of the mailing. Mailers choosing to combine the preparation of either nonmachinable parcels or Not Flat-Machinable pieces (see 401.2.2.3) weighing 6 ounces or more with machinable parcels placed in 5-digit/scheme sacks must prepare those sacks under 5.3.2. Mailers choosing to combine the preparation of Not Flat-Machinable pieces weighing 6 ounces or more with machinable parcels placed in ASF, BMC, or mixed BMC sacks must prepare the sacks under 5.3.2. There is no minimum for parcels prepared in 5-digit/scheme sacks entered at a DDU.

5.3.2 Sacking and Labeling

* * * * *

[Revise item a to add the requirement of 5-digit/scheme sorting for pieces claiming the 5-digit rate as follows:]

a. 5-digit/scheme (optional, but required for 5-digit rate), see definition in 1.4c; 10-pound minimum except under 5.3.1; labeling:

1. Line 1: For 5-digit scheme sacks, use L606, Column B. For 5-digit sacks, use city, state, and 5-digit ZIP Code destination on pieces (see 4.0 for overseas military mail).

2. Line 2: "STD MACH 5D SCHEME" or "STD MACH 5D SCH."

[Delete item b; renumber items c through e as new items b through d.]

* * * * *

5.4 Preparation of Nonmachinable Parcels

[Delete 5.4.1 and 5.4.2; renumber 5.4.3 through 5.4.8 as new 5.4.1 through 5.4.6. Revise heading and text of renumbered 5.4.1 to restrict bundling of nonmachinable parcels as follows:]

5.4.1 Bundling

Bundling is not permitted, except for bundles of carrier route parcels under 6.0.

* * * * *

5.4.3 Loose Packing

[Revise renumbered 5.4.3 to delete the advance approval requirement to loose pack as follows:]

When placing nonmachinable parcels in sacks, mailers must face and pack the parcels to maintain their orientation in transit.

5.4.4 Required Sacking

[Revise renumbered 5.4.4 to change the minimum quantity per sack from 15 pounds to 10 pounds and to add NFM as follows:]

Mailers must prepare a sack when the quantity of mail for a required presort destination reaches 10 pounds of parcels. There is no minimum for parcels prepared in 5-digit/scheme sacks entered at a DDU. Mailers choosing to combine the preparation of nonmachinable parcels with machinable parcels placed in 5-digit/scheme sacks must prepare those sacks under 5.3.2.

Mailers may not prepare sacks containing nonmachinable and machinable parcels to other presort levels. Mailers may combine nonmachinable parcels with Not Flat-Machinable pieces weighing less than 6 ounces in sacks under 5.4.6.

* * * * *

2.0 Rate Application and Computation

2.1 Rate Application

2.1.1 Rate Elements

[Revise 2.1.1 to reflect the new Outside-County container rate and the new nonadvertising rate structure as follows:]

Postage for Periodicals mail includes a pound rate charge, a piece rate charge, an Outside-County container rate charge, and any discounts for which the mail qualifies under the corresponding standards.

2.1.2 Applying Pound Rate

[Revise 2.1.2 to reflect the new Outside-County container rate and the new nonadvertising rate structure as follows:]

Pound rates are applied to the weight of the pieces in the mailing as follows:

a. Outside-County pound rates are based on the weight of the advertising portion sent to each postal zone (as computed from the entry office) or delivery unit zone, and the weight of the nonadvertising portion to a delivery unit zone.

b. Science-of-Agriculture Outside-County pound rates are based on the weights of the advertising portion and the nonadvertising portion of the mail sent to each postal zone (as computed from the entry office) or delivery unit zone.

c. In-County pound rates consist of a delivery unit zone rate and an unzoned rate for all other eligible copies delivered within the county of publication.

2.1.3 Computing Weight of Advertising and Nonadvertising Portions

[Revise 2.1.3 to reflect the new Outside-County container rate and the new nonadvertising rate structure as follows:]

The pound rate charge is the sum of the charges for the computed weight of the advertising portion of copies to each zone, plus the sum of the charges for the computed weight of the nonadvertising portion of copies to each zone. The following standards apply:

a. The minimum pound rate charge for any zone to which copies are mailed

is the 1-pound rate. For example, three 2-ounce copies for a zone are subject to the minimum 1-pound charge.

b. Authorized Nonprofit and Classroom publications with an advertising percentage that is 10% or less are considered 100% nonadvertising. When computing the pound rates and the nonadvertising adjustment, use "0" as the advertising percentage. Authorized Nonprofit and Classroom publications claiming 0% advertising must pay the nonadvertising pound rate for the entire weight of all copies to all zones.

For example, if, due to the inclusion of a Ride-Along piece, an automation letter-size host piece can no longer be processed as an automation letter, then that piece must pay the Periodicals nonautomation rate for the host piece plus the Ride-Along rate or the Standard Mail rate for the attachment or enclosure.

17.7 Additional Standards

* * * * *

*[Insert new 17.7.4 as follows:]***17.7.4 Outside-County Container Rate Documentation**

A complete, signed postage statement, using the correct USPS form or an approved facsimile, must accompany each mailing, supported by standardized documentation meeting the basic standards in 708.1.0. The documentation must show how many trays, sacks, or pallets are required for the rates and discounts claimed, even when the mailing is presented under 707.23.4, *Exception to Sacking*, or is otherwise presented by the mailer. Documentation of postage is not required if each piece in the mailing is of identical weight and the pieces are separated when presented for acceptance by rate, by zone, and by entry discount (such as DDU and DSCF). If standardized documentation is not presented, the container charge is determined by dividing the total number of Outside-County pieces in the mailing by 24, and multiplying the result by the container rate charge.

* * * * *

e. 5-digit scheme (bundles and sacks) for flats prepared according to 301.3.0: the ZIP Code in the delivery address on all pieces is one of the 5-digit ZIP Codes processed by the USPS as a single scheme, as shown in L007.

18.4 Mail Preparation Terms

* * * * *

[Revise items i and r as follows:]

i. A 5-digit scheme sort for flats prepared according to 301.3.0 yields 5-digit scheme bundles for those 5-digit ZIP Codes identified in L007. Presorting must be performed using L007. Pieces

prepared in scheme bundles must meet the automation flat criteria in 301.3.0.

* * * * *

r. A 3-digit scheme sort for flats prepared according to 301.3.0 yields 3-digit scheme bundles for those 3-digit ZIP Codes identified in L008. The 3-digit scheme sort is optional, except under 705.12.0 and 705.13.0. For 705.12.0 and 705.13.0, presorting must be performed using L008. Pieces prepared in scheme bundles must meet the automation flat criteria in 301.3.0.

22.0 Preparing Presorted Periodicals

* * * * *

22.2 Bundle Preparation*[Revise the introductory text of 22.2 as follows:]*

Only pieces meeting the criteria in 301.3.0 may be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in L007 and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in L008. Bundling is required before traying or sacking. A bundle must be prepared when the quantity of addressed pieces for a required presort level reaches the minimum bundle size. Smaller volumes are not permitted except mixed ADC bundles and 5-digit/scheme and 3-digit/scheme bundles prepared under 22.4. Bundling is also subject to 19.0, *Bundles*. Preparation sequence, bundle size, and labeling:

[Renumber item b as item c. Insert new item b as follows:]

b. 5-digit scheme (optional); six-piece minimum; red Label 5 or OEL.

* * * * *

[Renumber items d through f as new items e through g. Insert new item d as follows:]

d. 3-digit scheme (optional); six-piece minimum; green Label 3 or OEL.

* * * * *

22.6 Sack Preparation—Flat-Size Pieces and Irregular Parcels

* * * * *

[Renumber items a through g as items b through h. Insert new item a as follows:]

a. 5-digit scheme; optional; for pieces meeting the standards in 301.3.0; 24-piece minimum, fewer pieces not permitted.

1. Line 1: L007, Column B.

2. Line 2: "PER" or NEWS" as applicable, followed by "FLTS 5D SCH NON BC."

* * * * *

22.7 Optional Tray Preparation—Flat-Size Nonautomation Pieces*[Revise the first sentence in 22.7 as follows:]*

As an option, mailers may place in trays the automation-compatible flat-size pieces prepared under 301.3.0 that would normally be placed in ADC, origin mixed ADC, or mixed ADC sacks.

* * *

* * * * *

25.0 Preparing Flat-Size Automation Periodicals**25.1 Basic Standards****25.1.1 General***[Revise 25.1.1 as follows:]*

Each piece must meet the weight and size standards in 301.3.0 or in 25.3. Bundle, sack, and tray preparation are also subject to 18.0 through 21.0. Trays and sacks must bear the appropriate barcoded container labels under 708.6.0.

* * * * *

25.1.5 Bundle Preparation

* * * * *

[Revise the items a, c, and d as follows:]

a. Pieces that meet the standards in 301.3.0 must be prepared in separate bundles from pieces that meet the standards in 25.3.

* * * * *

c. Each bundle of pieces prepared under 301.3.0 and each bundle of pieces prepared under 25.3 must separately meet the bundle minimums in 25.4.

d. Presort destination bundles may contain fewer than six pieces when the mailpieces are too thick or too heavy to create a six-piece bundle. Rate eligibility is not affected if the total number of pieces bundled for a presort destination meets or exceeds the minimum for rate eligibility under 14.0.

25.1.6 Scheme Bundle Preparation*[Revise 25.1.6 as follows:]*

Pieces meeting the criteria in 301.3.0 must be prepared in 5-digit scheme bundles for those 5-digit ZIP Codes identified in L007 and in 3-digit scheme bundles for those 3-digit ZIP Codes identified in L008. These bundles must meet the additional standards in 18.4i or 18.4r. Pieces meeting the alternate criteria in 25.3 must not be prepared in scheme bundles.

25.1.7 Sack Preparation*[Revise 25.1.7 as follows:]*

Mailers may combine bundles of pieces prepared under 301.3.0 and bundles of pieces prepared under 25.3 in the same sack.

25.1.8 Exception—Automation and Nonautomation Pieces on Pallets

[Revise the first sentence of 25.1.8 as follows:]

When the physical dimensions of the mailpieces in a Periodicals mailing meet the definition of both a letter-size piece and an automation flat-size piece, the entire job may be prepared, merged, and palletized under 705.9.0 through 705.13.0 if the applicable standards are met.* * *

* * * * *

[Rename 25.2 and 25.3 as new 25.4 and 25.5. Insert new 25.2 and 25.3 as follows:]

25.2 Physical Standards

Each flat-size piece must be rectangular and must meet the standards in 301.3.0 or the alternative criteria in 25.3.

25.3 Alternative Criteria

25.3.1 General

Mailers may prepare automation flat-size pieces that differ in weight and thickness from the criteria in 301.3.0 according to 25.3.2 and 25.3.3. Pieces prepared under 25.3 and pieces prepared under 301.3.0 may not be combined in the same bundle. Determine length and height according to 301.3.2.

25.3.2 Weight and Size

The maximum weight for each piece is 6 pounds. The following minimum and maximum dimensions apply:

- a. Minimum height is 5 inches. Maximum height is 12 inches.
- b. Minimum length is 6 inches. Maximum length is 15 inches.
- c. Minimum thickness is 0.009 inch. Maximum thickness is 1.25 inches.

25.3.3 Address Placement on Folded Pieces

Mailers must design folded pieces so that the address is in view when the final folded edge is to the right and any intermediate bound or folded edge is at the bottom of the piece. Unbound flat-size pieces must be at least double-folded.

25.4 Bundling and Labeling

* * * * *

[Revise items a and c in renumbered 25.4 to require scheme bundling as follows:]

- a. 5-digit scheme (required for pieces meeting the standards in 301.3.0); six-piece minimum (fewer pieces permitted under 25.1.9); optional endorsement line (OEL) required.

* * * * *

- c. 3-digit scheme (required for pieces meeting the standards in 301.3); six-piece minimum (fewer pieces permitted under 25.1.9); OEL required.

* * * * *

25.5 Sacking and Labeling

* * * * *

[Revise item a in renumbered 25.5 as follows:]

- a. 5-digit scheme (for pieces meeting the standards in 301.3.0 only), required at 24 pieces, fewer pieces not permitted; may contain 5-digit scheme bundles only; labeling:

* * * * *

25.6 Optional Tray Preparation—Flat-Size Barcoded Pieces

[Revise the first sentence in renumbered 25.6 as follows:]

As an option, mailers may place in trays the automation-compatible flat-size pieces prepared under 301.3.0 that would normally be placed in ADC, origin mixed ADC, or mixed ADC sacks.* * *

26.0 Combining Multiple Editions or Publications

[Reorganize and revise 26.0 to add the definition and standards for copalletized mailings. The experimental copalletization drop-ship classifications in 709.3.0 and 709.4.0 expire, and all mailers may copalletize under 26.0 as follows:]

26.1 Description

Mailers may prepare Periodicals publications as a combined mailing by merging copies or bundles of copies to achieve the finest presort level possible or to reduce the per piece or the Outside-County container rate charge. Mailers may use one of the following methods:

- a. Mailers may merge and sort together (“comail”) individually addressed copies of different editions of a Periodicals publication (one title) or individually addressed copies of different Periodicals publications (more than one title) to obtain a finer presort level.

- b. Mailers may place two or more copies of different Periodicals publications (two or more titles), and/or multiple editions of the same publication in the same mailing wrapper or firm bundle and present it as one addressed piece to a single recipient to reduce the per piece charge.

- c. Mailers may copalletize separately presorted bundles of different Periodicals titles and editions to achieve minimum pallet weights. Mailers do not

have to achieve the finest pallet presort level possible.

26.2 Authorization

26.2.1 Basic Standards

Each publication in a combined mailing must be authorized (or pending authorization) to mail at Periodicals rates. A mailer preparing comailed or copalletized mailings under 26.1a and 26.1c must be authorized to do so by Business Mailer Support (see 608.8.1 for address). For copalletization, each mailer that sends mail to the copalletization facility also must be authorized. Requests for authorization must show:

- a. The mailer’s name and address.
- b. The mailing office.
- c. Procedures and quality control measures for the combined mailing.
- d. The expected date of the first mailing.
- e. A sample of the standardized documentation.

26.2.2 Denial

If the application is denied, the mailer or consolidator may file at a later date, or submit additional information needed to support the request.

26.2.3 Termination

An authorization may not exceed 2 years. Business Mailer Support may take action to terminate an authorization at any time, by written notice, if the mailer does not meet the standards.

26.3 Minimum Volume

The following minimum volume standards apply:

- a. For combined mailings prepared under 26.1a, more than one Periodicals publication, or edition of a publication, are combined to meet the required minimum volume per bundle, sack, or tray for the rate claimed.
- b. For combined mailings prepared under 26.1b, the minimum volume requirements in 22.0, 23.0, 201.3.0, or 25.0 apply for the rate claimed.
- c. For copalletized mailings prepared under 26.1c, the minimum volume requirements for pallets in 705.8.5.3 apply for the rate claimed.

26.4 Labeling

Mailers must label all containers in a combined mailing as either “NEWS” (see 21.1.3) or “PER” as follows:

- a. If at least 51% of the total number of copies in the combined mailing can qualify for “NEWS” treatment then all containers in the mailing are labeled “NEWS,” unless the mailer chooses to use “PER.”
- b. If less than 51% of the total number of copies in a combined mailing can

qualify for "NEWS" treatment then all containers in the mailing are labeled "PER."

26.5 Documentation

Each mailing must be accompanied by documentation meeting the standards in 17.0, as well as any additional mailing information requested by the USPS to support the postage claimed (such as advertising percentage and weight per copy). The following additional standards apply:

a. Presort documentation required under 708.1.0 must show the total number of addressed pieces and total number of copies for each publication and each edition in the combined mailing claimed at the carrier route, 5-digit, 3-digit, and basic rates. The mailer also must provide a list, by 3-digit ZIP Code prefix, of the number of addressed pieces for each publication and each edition claimed at any destination entry discount.

b. Copalletized mailing documentation must be presented by each title and version, segment, or edition in the mailing, or by codes representing each title and version, segment, or edition. The documentation must include presort and pallet reports showing how the copalletized pieces are prepared and where they will be entered.

26.6 Postage Statements

Mailers must prepare postage statements for a combined mailing as follows:

a. Copy weight and advertising percentage determine whether separate postage statements are required for editions of the same publication:

1. If the copy weight and advertising percentage for all editions of a publication are the same, mailers may report all the editions on the same postage statement or each edition on a separate postage statement.

2. If the copy weight or the advertising percentage is different for each edition of a publication, mailers must report each edition on a separate postage statement.

b. For a combined mailing prepared under 26.1a, mailers must prepare a separate postage statement that claims all applicable per piece and per pound charges for each publication or edition except as provided in 26.2.5a. The mailer must annotate on, or attach to, each postage statement, the title and issue date of each publication or edition and indicate that the pieces were prepared as part of a combined mailing under 26.1a.

c. For mailings under 26.1b, mailers must prepare a separate postage

statement claiming the applicable per pound charges for each publication or edition in the combined mailing except as provided in 26.2.5a. The mailer must annotate on, or attach to, each postage statement, the title and issue date of each publication or edition and indicate that the copies were prepared as part of a combined mailing under 26.1b. The per piece charges must be claimed as follows:

1. If all copies in the combined mailing are eligible for the Classroom or Nonprofit discount, or if all copies are not eligible for the Classroom or Nonprofit discount, mailers may claim the per piece charges only on the postage statement for the publication that contains the highest amount of advertising.

2. If a portion of the copies in the combined mailing are eligible for the Classroom or Nonprofit discount and a portion are not eligible, mailers may claim the per piece charges only on the postage statement for the publication that contains the highest amount of advertising and is not eligible for the Classroom or Nonprofit discount. The Classroom or Nonprofit per piece discount must not be claimed.

d. For copalletized mailings under 26.1c, mailers must prepare a separate postage statement for each publication in the mailing. Mailings consisting of different editions or versions of the same publication must be accompanied by one consolidated postage statement and a register of mailings.

26.7 Postage Payment

Each mailing must meet the postage payment standards in 16.0. For copalletized mailings under 26.1c, mailers must pay postage at the post office serving the facility where consolidation takes place, except that postage for publications authorized under the Centralized Postage Payment (CPP) system may be paid to the Pricing and Classification Service Center (see 608.8.4.1 for address).

26.8 Deposit of Mail

Each publication in a combined mailing must be authorized for original entry or additional entry at the post office where the mailing is entered. For copalletized mailings under 26.1c, mailers must enter each mailing at the post office serving the facility where consolidation takes place.

28.0 Destination Entry Rate Eligibility

28.1 Basic Standards

28.1.1 Rate Application

[Revise 28.1.1 to eliminate the pallet discounts and add the new container rate as follows:]

Outside-County addressed pieces may qualify for destination area distribution center (DADC) or destination sectional center facility (DSCF) rates under 28.2 or 28.3. Carrier route rate addressed pieces may qualify for destination delivery unit (DDU) rates under 28.4. Outside-County pieces are subject to the Outside-County container rate in 1.1.3 or 1.2.3. For all destination entry rate pieces:

a. Only one destination entry discount may be claimed for each addressed piece.

b. An individual bundle, tray, sack, or pallet may contain pieces claimed at different destination entry rates.

c. In-County carrier route rate addressed pieces may qualify for the DDU discount under 28.4.

d. The advertising and nonadvertising portions may be eligible for DADC, DSCF, or DDU pound rates based on the entry facility and the address on the piece.
