

proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

n. **Competing Development Application**—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

o. **Notice of Intent**—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

p. **Proposed Scope of Studies under Permit**—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

q. **Comments, Protests, or Motions to Intervene**—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the

Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

r. **Filing and Service of Responsive Documents**—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. An additional copy must be sent to Director, Division of Hydropower Administration and Compliance, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

s. **Agency Comments**—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Philis J. Posey,

Deputy Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2007-0286; FRL-8302-2]

Agency Information Collection Activities; Proposed Collection; Comment Request; EPA's In-Use Vehicle Testing Programs; EPA ICR No. 0222.08, OMB Control No. 2060-0086

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to

submit a request to renew an existing approved Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR is scheduled to expire on September 30, 2007. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before June 19, 2007.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2007-0286, by one of the following methods:

- www.regulations.gov: Follow the on-line instructions for submitting comments.

- *Fax:* (202) 566-1741

- *Mail:* EPA-HQ-OAR-2007-0286, Environmental Protection Agency, Mailcode: 6102T, Docket1200 Pennsylvania Ave., NW., Washington, DC 20460.

- *Hand Delivery:* Docket Center, (EPA/DC), EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC. 20460. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-HQ-OAR-2007-0286. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or e-mail. The www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through www.regulations.gov your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification,

EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

FOR FURTHER INFORMATION CONTACT:

Lynn Sohacki, Compliance and Innovative Strategies Division, Office of Transportation and Air Quality, U.S. Environmental Protection Agency, 2000 Traverwood, Ann Arbor, Michigan 48105; telephone number: 734-214-4851; fax number: 734-214-4869; e-mail address: sohacki.lynn@epa.gov.

SUPPLEMENTARY INFORMATION:

How Can I Access the Docket and/or Submit Comments?

EPA has established a public docket for this ICR under Docket ID No. EPA-HQ-OAR-2007-0286, which is available for online viewing at www.regulations.gov, or in person viewing at the Air Docket in the EPA Docket Center (EPA/DC), EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room is open from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is 202-566-1744, and the telephone number for the Air Docket is 202-566-1742.

Use www.regulations.gov to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the docket ID number identified in this document.

What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.

2. Describe any assumptions that you used.

3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are owners of motor vehicles.

Title: EPA's In-Use Vehicle and Engine Testing Programs.

ICR numbers: EPA ICR No. 0222.08, OMB Control No. 2060-0086.

ICR status: This ICR is currently scheduled to expire on September 30, 2007. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in

certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA has ongoing programs to evaluate the emission performance of in-use light-duty (passenger car and light truck) motor vehicles, heavy-duty trucks, and nonroad vehicles and engines. These are referred to collectively as EPA's in-use vehicle testing programs. They operate in conjunction with testing of prototype vehicles prior to use (manufacturer and EPA confirmatory testing for certification) and the mandatory manufacturer's in-use testing program (IUV) for light-duty vehicles. They derive from the Clean Air Act's charge that EPA insure that motor vehicles comply with emissions requirements throughout their useful lives. The primary purpose of the program is information gathering. Nevertheless, EPA can require a recall if it receives information, from whatever source, including in-use testing, that a "substantial number" of any class or category of vehicles or engines, although properly maintained and used, do not conform to the emission standards, when in actual use throughout their useful life.

The program has two components: Light-duty, and heavy-duty and nonroad. The light-duty component can be broken down into three closely-related headings. The first is a surveillance program that selects approximately 50 classes of passenger cars and light trucks for in-use testing, at EPA's testing facility, of approximately 150 vehicles (three in each class on average). In rare cases surveillance testing may be followed by compliance testing (only one such class in the last five years). The purpose of a compliance phase is to develop additional information related to test failures observed in a class during surveillance testing. The second heading is testing of a subset of approximately 35 vehicles from the surveillance recruitment for operation of on-board diagnostics (OBD) systems. The third category is special investigations involving testing of vehicles to address specific issues. The number of vehicles procured under this category varies widely from year to year, but this request asks for approval of the information burden corresponding to 25 such vehicles per year for the next three years.

Participation in the light-duty surveys, as well as the vehicle testing, is strictly voluntary. A group of 25 to 50 potential participants is identified from state vehicle registration records. They are asked to return a postcard indicating their willingness to participate and if so,

to verify some limited vehicle information. Three of those who return the card are called and asked about a half dozen questions concerning vehicle condition, and operation and maintenance. Additional groups of potential participants may be contacted until a sufficient number of vehicles has been obtained. Owners verify the survey information when they deliver their vehicles to EPA, voluntarily provide maintenance records for copying, and receive a loaner car or a cash incentive.

Procurement and testing are different for the heavy-duty and nonroad in-use testing program. All testing is done by installing "Rover" portable emissions monitoring devices on the vehicle or engine during a period of operation. Heavy-duty trucks, those commonly referred to as over ¾ ton capacity, are usually employed commercially; typically they are part of a fleet of identical (or very similar) vehicles. Consequently, EPA employs a slightly different method to obtain them. Potential owners/lessees can be found in registrations lists; engine manufacturers will also supply identities of their customers. In addition, EPA has a network of entities who have shown a willingness to participate over the years. Once a potential source is identified, EPA will make a brief telephone call to the fleet manager to ascertain if they wish to participate. If the response is positive, EPA's contractors will frequently visit the fleet to install the testing instruments at the company's service facility or government garage. Otherwise, the lessee will be within driving distance of the testing grounds and the devices will be installed there. The procedure for nonroad vehicles and engines (e.g., farm tractors, compressors) is similar; in some cases the vehicle or engine may be rented for the day. Therefore, EPA makes far fewer inquiries than with individual owners of light vehicles in the process of procuring an estimated 126 vehicles and engines a year for this program. As with the light-duty component, all participation is strictly voluntary.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.15 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR Supporting Statement provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: Approximately 4,411 owners/lessees receive EPA's solicitations to participate and approximately 336 do participate.

Frequency of response: On Occasion.

Estimated total average number of responses for each respondent: One.

Estimated total annual burden hours: 658.

Estimated total annual costs: \$49,320. This includes an estimated burden cost of \$49,320 and an estimated cost of \$0 for capital investment or maintenance and operational costs.

Are There Changes in the Estimates From the Last Approval?

There is an increase of 58 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's updating of burden estimates based upon historical information on the scope of EPA's in-use testing programs and the number of vehicles and engines tested. **Note:** This ICR was previously titled, "Investigation into Possible Noncompliance of Motor Vehicles".

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: April 16, 2007.

Margo Tsirigotis Oge,

Director, Office of Transportation and Air Quality.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-6686-2]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at 202-564-7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in the **Federal Register** dated April 6, 2007 (72 FR 17156).

Draft EISs

EIS No. 20060469, ERP No. D-FHW-D40338-00, U.S. 301 Project Development, Transportation Improvements from MD State Line to DE-1, South of the Chesapeake and Delaware Canal, New Castle County, DE.

Summary: EPA expressed environmental concerns about wetland impacts and requested additional wetlands mitigation.

Rating EC2.

EIS No. 20070014, ERP No. D-FHW-F40439-WI, WI-15 Expansion, from New London to Greenville, Funding, U.S. Army COE 404 Permit, Outagamie County, WI.

Summary: EPA expressed environmental concerns about wetland and water quality impacts, air toxics, and noise exposure.

Rating EC2.

EIS No. 20070030, ERP No. D-IBR-J28022-00, Red River Valley Water Supply Project, Development and Delivery of a Bulk Water Supply to meet Long-Term Water Needs of the Red River Valley, Implementation, ND and MN.

Summary: EPA expressed environmental concerns about potential impacts of Missouri River Basin depletion and ecological impacts from potential introduction of invasive species. EPA provided recommendations for biota transfer water treatment, adaptive management, and drought contingency measures.

Rating EC1.

EIS No. 20070050, ERP No. D-FRC-G02015-00, East Texas to Mississippi Expansion Project, Construction and Operation of 243.3 miles Natural Gas Pipeline to Transport Natural Gas
