

Plan. The National Park Service agreed to prepare an ORV management plan as part of a settlement agreement negotiated in 1995 between the Florida Biodiversity Project and several Federal agencies and bureaus. The agreement settled a lawsuit which alleged failure by the agencies to comply with Federal statutes, including the Clean Water Act, the Endangered Species Act, and the National Environmental Policy Act.

The Off-Road Vehicle Management Plan, 2000 (p. 29) states "Under the proposed action, the National Park Service would establish an advisory committee of concerned citizens to examine issues and make recommendations regarding the management of ORVs in the Preserve. The establishment of the committee would meet the legal requirements of the 1972 Federal Advisory Committee Act (FACA) (Pub. L. 92-463, 1972, as amended). The advisory committee would provide access to the extensive knowledge available in the public arena and would offer advice to the National Park Service in the decision-making process in a manner consistent with FACA. This committee would be an element of the adaptive management approach that would be used to develop best management practices for ORV use."

As part of the ORV management plan, NPS committed to establishing the ORV Advisory Committee. In addition, the establishment of the Committee fulfills the agency's policy of civic engagement. It is envisioned that this committee will strengthen the relationship that the NPS has with its partners and communities. The Committee will be comprised of individuals that represent (1) Sportsmen/ORV users; (2) landowners; (3) academia; (4) environmental advocates; (5) the state government, and (6) Tribes.

Certification: I hereby certify that the administrative establishment of the Big Cypress Off-Road Vehicle Advisory Committee is necessary and in the public interest in connection with the performance of duties imposed on the Department of the Interior by the Act of August 25, 1916, 16 U.S.C. 1 *et seq.*, and other statutes relating to the administration of the National Park System.

Dated: June 14, 2007.

Dirk Kempthorne,

Secretary of the Interior.

This general management plan will guide the management of Saguardo National Park for the next 15 to 20 years. The general management plan considers three alternatives—a no-action and two action alternatives, including the National Park Service preferred alternative. Alternative 1, the no-action alternative, is a continuation of current management trends and serves as a basis of comparison with the action alternatives. Alternative 2, the preferred alternative, would emphasize protecting ecological processes and biological diversity by connecting wildlife and plan habitats with habitat corridors. The concept was developed to help protect biological and ecological diversity from being compromised by habitat fragmentation. Alternative 3 would emphasize providing a wider range of opportunities for visitors compatible with the preservation of park resources and wilderness characteristics. The concept was developed because the public wanted the park to expand programs and opportunities for a growing diverse visitor population.

The draft environmental impact statement assesses impacts to cultural resources (archeological resources, historic structures, cultural landscapes, ethnographic resources, and museum collections); natural resources (soils, soundscape, vegetation, wildlife, and threatened, endangered, and candidate species and species of special concern); visitor understanding and experience;

remoteness; the park's socio-economic environment; and park operations.

Dated: July 19, 2007.

Michael D. Snyder,

Director, Intermountain Region, National Park Service.

DEPARTMENT OF THE INTERIOR

National Park Service

Ellis Island Development Concept Plan, Final Environmental Impact Statement, Statue of Liberty National Monument and Ellis Island, New York and New Jersey

AGENCY: National Park Service, Department of the Interior.

ACTION: Notice of Availability of a Record of Decision on the Final Environmental Impact Statement for Ellis Island Development Concept Plan, Statue of Liberty National Monument and Ellis Island.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), the National Park Service announces the availability of the Record of Decision for the Final Environmental Impact Statement for the Ellis Island Development Concept Plan, Statue of Liberty National Monument and Ellis Island, New York and New Jersey. On May 14, 2007, the Director, Northeast Region approved the Record of Decision for this undertaking. As soon as practicable, the National Park Service will begin to implement the selected Alternative (i.e., the preferred alternative in the FEIS issued on April 6, 2007). The National Park Service will work with its nonprofit partner for the project, Save Ellis Island, Inc to develop the Ellis Island Institute as the primary adaptive reuse of the Island's remaining abandoned buildings. The Institute will provide cultural, interpretive, and educational programs and activities related to the park's historic themes. An associated small conference facility and overnight accommodations will be developed, financed and managed by a professional hospitality business partner working with the nonprofit partner. The facility would host meetings, retreats, and workshops that would primarily focus upon issues such as immigration, world migration, public health, culture and ethnic diversity. In accordance with the National Park Service's Partnership Construction Process, additional market analysis and feasibility studies will be completed to test and confirm the economic and programmatic viability of

the project. The primary purpose of this undertaking, having evaluated the full range of foreseeable environmental consequences of three (3) alternative management strategies presented in the FEIS, is to rehabilitate and adaptively reuse 30 deteriorating buildings on Ellis Island, and provide limited vehicular service and emergency access, while preserving cultural resource values and enhancing visitor appreciation of the immigration function and history pertaining to Ellis Island.

The Record of Decision includes a statement of the decision made, synopses of other alternatives considered, the basis for the decision, a finding on impairment of park resources and values, a listing of measures to minimize environmental harm, and an overview of public involvement in the decision-making process.

FOR FURTHER INFORMATION CONTACT: Superintendent, Statue of Liberty National Monument and Ellis Island, Ellis Island Receiving Office, Jersey City, NJ 07305. (212) 366-3206 (Ext. 100), *Cynthia_garrett@nps.gov*.

SUPPLEMENTARY INFORMATION: Copies of the Record of Decision may be obtained from the contact listed above or online at <http://www.nps.gov/elis/>.

Dated: May 14, 2007.
