SUPPLEMENTARY INFORMATION:

A. Purpose

Presolicitation notices are used by the Government for several reasons, one of which is to aid prospective contractors in submitting proposals without undue expenditure of effort, time, and money. The Government also uses the presolicitation notices to control printing and mailing costs. The presolicitation notice response is used to determine the number of solicitation documents needed and to assure that interested offerors receive the solicitation documents. The responses are placed in the contract file and referred to when solicitation documents are ready for mailing. After mailing, the responses remain in the contract file and become a matter of record.

Value engineering is the technique by which contractors (1) voluntarily suggest methods for performing more economically and share in any resulting savings or (2) are required to establish a program to identify and submit to the Government methods for performing more economically. These recommendations are submitted to the Government as value engineering change proposals (VECP's) and they must include specific information. This information is needed to enable the Government to evaluate the VECP and, if accepted, to arrange for an equitable sharing plan.
