

Routers are required to report the percent of switches with mostly physically diverse connections to their primary access points. For those switches for which they have not provided or made arrangements for mostly physically diverse connections to their primary access points, they must discuss the circumstances including why mostly physically diverse connections are not provisioned and any plans to provide mostly physically diverse connections in the future.

Responding LECs, CMRS providers and interconnected VoIP service providers must also provide information regarding disaster planning for the resiliency and reliability of 911 architecture. All respondents must state whether they have a contingency plan that addresses the maintenance and restoration of 911/E911 service during and following disasters. If the answer is "yes," the respondent will be asked to describe its contingency plan including those elements that address the maintenance and restoration of 911/E911 service. If the answer is "no," the respondent will be asked to discuss the circumstances including why it does not have a contingency plan that addresses 911/E911 maintenance and restoration and any plans to develop such a contingency plan in the future.

Respondents that do have a contingency plan that addresses the maintenance and restoration of 911/E911 service must state whether they regularly test their plan. If respondents answer "yes" to this question, they must describe the program for testing their contingency plan, including the extent to which they periodically test to ensure that the critical components (e.g., automatic re-routes, PSAP Make Busy Key) included in contingency plans work as designed and the extent they involve PSAPs in tests of their contingency plan. Respondents that answer "no" will be asked to discuss the circumstances including why they do not test their contingency plan and any plans to test their plan in the future.

All respondents must state whether they have a routing plan so that, in the case of a lost connection of dedicated transport facilities between the originating switch/MSO and the Selective Router, 911 calls are routed over alternate transport facilities. Respondents that answer "yes" must describe their routing plan. Respondents that answer no must discuss the circumstances and any plans to develop such a plan in the future.

All responding LECs, CMRS providers and interconnected VoIP service

providers must state whether, in cases where 911 service is disrupted, they make test calls to assess the impact as part of the restoration process. If the answer is "no," respondents must discuss the circumstances including why they do not make test calls as part of the restoration process and any plans to do so in the future. Respondents must also state whether their company makes additional test calls when service is restored and, if not, they must discuss why they do not make additional test calls.

All respondents must describe any current plans they have to migrate to next generation 911 (NG911) architecture once a standard for NG911 has been developed. Finally, respondents are asked to provide any additional relevant information regarding steps they have taken to ensure redundancy, resiliency and reliability of their 911/E911 facilities.

Federal Communications Commission.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirement Submitted to OMB for Review and Approval, Comments Requested

February 22, 2008.

SUMMARY: The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden, invites the general public and other Federal agencies to take this opportunity to comment on the following information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimate; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of

information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written Paperwork Reduction Act (PRA) comments should be submitted on or before March 31, 2008. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicholas A. Fraser, Office of Management and Budget, via Internet at Nicholas_A_Fraser@omb.eop.gov or via fax at (202) 395-5167 and to Cathy Williams, Federal Communications Commission, Room 1-C823, 445 12th Street, SW., Washington, DC, or via Internet at Cathy.Williams@fcc.gov or PRA@fcc.gov. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page <http://www.reginfo.gov/public/do/PRAMain>, (2) look for the section of the Web page called "Currently Under Review," (3) click on the downward-pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, (6) when the list of FCC ICRs currently under review appears, look for the title of this ICR (or its OMB control number, if there is one) and then click on the ICR Reference Number to view detailed information about this ICR.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection(s), contact Cathy Williams at (202) 418-2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-0311.

Title: 47 CFR 76.54, Significantly Viewed Signals, Method to Be Followed for Special Showings.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 500.

Frequency of Response: On occasion reporting requirement; Third party disclosure requirement.

Estimated Time per Response: 1-60 hours.

Total Annual Burden: 20,610 hours.

Total Annual Costs: \$200,000.

Nature of Response: Required to obtain or retain benefits.

Confidentiality: No need for confidentiality required.

Privacy Impact Assessment: No impact(s).

Needs and Uses: 47 CFR 76.54(b) states significant viewing in a cable television or satellite community for signals not shown as significantly viewed under 47 CFR 76.54(a) or (d) may be demonstrated by an independent professional audience survey of over-the-air television homes that covers at least two weekly periods separated by at least thirty days but no more than one of which shall be a week between the months of April and September. If two surveys are taken, they shall include samples sufficient to assure that the combined surveys result in an average figure at least one standard error above the required viewing level. 47 CFR 76.54(c) is used to notify interested parties, including licensees or permittees of television broadcast stations, about audience surveys that are being conducted by an organization to demonstrate that a particular broadcast station is eligible for significantly viewed status under the Commission's rules. The notifications provide interested parties with an opportunity to review survey methodologies and file objections. 47 CFR 76.54(e) and (f), are used to notify television broadcast stations about the retransmission of significantly viewed signals by a satellite carrier into these stations' local market.

OMB Control Number: 3060-0991.

Title: AM Measurement Data.

Form Number: Not applicable.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents: 1,900.

Estimated Hours per Response: 0.50-25 hours.

Frequency of Response:

Recordkeeping requirement; Third party disclosure requirement; On occasion reporting requirement.

Total Annual Burden: 29,255 hours.

Total Annual Cost: \$73,000.

Nature of Response: Required to obtain or retain benefits.

Confidentiality: No need for confidentiality required.

Privacy Impact Assessment: No impact(s).

Needs and Uses: In order to control interference between stations and assure adequate community coverage, AM stations must conduct various engineering measurements to demonstrate that the antenna system operates as authorized. The following rule sections are included with this collection.

47 CFR 73.54(c) requires that AM licensees file a letter notification with

the FCC when determining power by the direct method. In addition, Section 73.54(c) requires that background information regarding antenna resistance measurement data for AM stations must be kept on file at the station.

47 CFR 73.54(d) requires AM stations using direct reading power meters to either submit the information required by (c) or submit a statement indicating that such a meter is being used.

47 CFR 73.61 requires that each AM station using directional antennas make field strength measurement as often as necessary to insure proper directional antenna system operation. Stations not having approved sampling systems make field strength measurements every three months. Stations with approved sampling systems must make field strength measurements as often as necessary. Also, all AM stations using directional antennas must make partial proofs of performance as often as necessary.

47 CFR 73.62(b) requires an AM station with a directional antenna system to measure and log every monitoring point at least once for each mode of directional operation within 24 hours of detection of variance of operating parameters from allowed tolerances.

47 CFR 73.68(b) requires that licensees of existing AM broadcast stations with antenna monitor sampling systems meeting the performance standards specified in the rules may file informal requests for approval of their sampling systems.

47 CFR 73.68(d) requires that a request for modification of the station license be submitted to the FCC on FCC 302-AM when the antenna sampling system is modified or components of the sampling system are replaced.

Immediately prior to modification or replacement of components of the sampling system and after a verification that all monitoring point values and operating parameters are within the limits or tolerances, the licensee is required to record certain indications for each radiation pattern.

47 CFR 73.69(c) requires AM station licensees with directional antennas to file an informal request to operate without required monitors with the Media Bureau in Washington, DC, when conditions beyond the control of the licensee prevent the restoration of an antenna monitor to service within a 120 day period. This request is filed in conjunction with Section 73.3549.

47 CFR 73.69(d)(1) requires that AM licensees with directional antennas request to obtain temporary authority to operate with parameters at variance

with licensed values when an authorized antenna monitor is replaced pending issuance of a modified license specifying new parameters.

47 CFR 73.69(d)(5) requires AM licensees with directional antennas to submit an informal request for modification of license to the FCC within 30 days of the date of antenna monitor replacement.

47 CFR 73.154 requires the result of the most recent partial proof of performance measurements and analysis to be retained in the station records and made available to the FCC upon request. Maps showing new measurement points shall be associated with the partial proof in the station's records and shall be made available to the FCC upon request.

47 CFR 73.158(b) requires a licensee of an AM station using a directional antenna system to file a request for a corrected station license when the description of monitoring point in relation to nearby landmarks as shown on the station license is no longer correct due to road or building construction or other changes. A copy of the monitoring point description must be posted with the existing station license.

47 CFR 73.3538(b) requires a broadcast station to file an informal application to modify or discontinue the obstruction marking or lighting of an antenna supporting structure.

47 CFR 73.3549 requires licensees to file with the FCC requests for extensions of authority to operate without required monitors, transmission system indicating instruments, or encoders and decoders for monitoring and generating the Emergency Alert System codes. Such requests must contain information as to when and what steps were taken to repair or replace the defective equipment and a brief description of the alternative procedures being used while the equipment is out of service.

Federal Communications Commission.
