SUPPLEMENTARY INFORMATION:

Background and Need for the Proposed Rule

CEQ regulations at 40 Code of Federal Regulations (CFR) 1507.3 require Federal agencies to adopt procedures as necessary to supplement CEQ's regulations implementing NEPA and to consult with CEQ during their development and prior to publication in the **Federal Register**. The regulation further encourages agencies to publish agency explanatory guidance for CEQ's regulations and agency procedures.

The Department's procedures implementing NEPA as required by CEQ have been contained in chapter 516 of the DM. We revised these procedures and published the revisions in the **Federal Register** on March 8, 2004 (69 FR 10866) and June 6, 2005 (70 FR 32840). We have now decided to publish the procedures as rules to be codified in the CFR.

This proposed regulation supplements the CEQ regulations and must be used in conjunction with those regulations. The bureaus of the Department are required to use this regulation when meeting their responsibilities under NEPA.

This proposed regulation meets the intent of 40 CFR 1507.3 by placing agency-implementing procedures in a regulatory framework. We believe placing agency explanatory guidance (as distinguished from agency implementing procedures) into the DM, Environmental Statement Memoranda (ESM), which are Departmental guidance documents, and bureaus' NEPA handbooks, will facilitate quicker agency responses to new ideas and information, procedural interpretations, training needs, and editorial changes.

Reasons for an Improved Environmental Analysis Process

This proposed regulation is the culmination and natural progression of work begun in 2002 to improve our NEPA compliance process. Since the Department last updated its NEPA procedures, CEQ has issued guidance the Department wishes to incorporate in its regulations. The concepts described below are currently used, but there are no explicit provisions in the current procedures. This proposed regulation provides further guidance on NEPA by: (1) Integrating best practices elements described in the series of ESMs that were issued by the Department in 2003

and finalized in the DM in March 2004; and (2) addressing new NEPA-related policy issues. Specifically, they provide for, among others, greater public and stakeholders' participation in the NEPA process, collaborative NEPA planning, conflict avoidance, and use of adaptive management.

Finally, this proposal will allow for better integration of NEPA procedures and documentation into current Departmental decision-making processes, including collaborative and incremental decision-making.

In 2002, the Department undertook a review of its NEPA practices. This review was done at the practitioner level to obtain best practices in the field. In addition, the Department held four regional listening sessions open to the public, to assist in the identification of best NEPA practices that could be applied across the Department.

Following these public listening sessions, the Department promulgated best practices in two phases: first, through the issuance of five ESMs in 2003 (directives to bureaus on best practices); and second, through finalizing those NEPA best practices in the DM in March 2004. The five NEPA best practices that were first addressed in ESMs were:

ESM 03-3, Procedures for Implementing Tiered and Combined Analyses (<http://oepec.doi.gov/ESM/ESM03%2D3%2Epdf>)

Bureaus need to determine the sufficiency of existing environmental analyses. If an existing analyses is found to be sufficient, those documents should be cited in the Record of Decision (ROD) without doing additional and possibly duplicate analysis.

ESM 03-4, Procedures for Implementing Public Participation and Community-Based Training (<http://oepec.doi.gov/ESM/ESM03%2D4%2Epdf>)

Public participation is the involvement, as early as possible, in the NEPA process of persons and organizations having an interest in any Departmental activity, which must meet the requirements of NEPA. Public participation also includes the proactive efforts of Departmental personnel to locate and involve the public.

ESM 03-5, Procedures for Implementing Integrated Analyses in National Environmental Policy Act (NEPA) Process (<http://oepec.doi.gov/ESM/ESM03%2D5%2Epdf>)

The Department should integrate analyses using a single NEPA process to enable several agencies to satisfy multiple environmental requirements by
