

Federal Register (65 FR 19477, Apr. 11, 2000). This statement is also available at <http://DocketInfo.dot.gov>.

Background

On December 7, 2007, FMCSA published a notice of receipt of Federal diabetes exemption applications from twenty-nine individuals, and requested comments from the public (72 FR 69280). The public comment period closed on January 7, 2008, and no comments were received.

FMCSA has evaluated the eligibility of the twenty-nine applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to, or greater than, the level that would be achieved by complying with the current regulation, 49 CFR 391.41(b)(3).

Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current standard for diabetes in 1970 because several risk studies indicated that diabetic drivers had a higher rate of crash involvement than the general population. The diabetes rule provides that "A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control" (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled "A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century." The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible. The 2003 notice in conjunction with the November 8, 2005 (70 FR 67777) **Federal Register** Notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These twenty-nine applicants have had ITDM over a range of 1 to 41 years. These applicants report no hypoglycemic reaction that resulted in loss of consciousness or seizure, that required the assistance of another person, or resulted in impaired cognitive function without warning symptoms in the past 5 years (with one year of stability following any such episode). In each case, an endocrinologist has verified that the driver has demonstrated willingness to properly monitor and manage their diabetes, received education related to

diabetes management, and is on a stable insulin regimen. These drivers report no other disqualifying conditions, including diabetes-related complications.

The qualifications and medical condition of each applicant were stated and discussed in detail in the December 7, 2007, **Federal Register** Notice (72 FR 69280). Therefore, they will not be repeated in this notice.

Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the diabetes standard in 49 CFR 391.41(b)(3) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. The exemption allows the applicants to operate CMVs in interstate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered medical reports about the applicants' ITDM and vision, and reviewed the treating endocrinologist's medical opinion related to the ability of the driver to safely operate a CMV while using insulin.

Consequently, FMCSA finds that exempting these applicants from the diabetes standard in 49 CFR 391.41(b)(3) is likely to achieve a level of safety equal to that existing without the exemption.

Conditions and Requirements

The terms and conditions of the exemption will be provided to the applicants in the exemption document and they include the following: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not they are related to an episode of hypoglycemia; (3) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized

Federal, State, or local enforcement official.

Discussion of Comments

FMCSA received no comments in this proceeding.

Conclusion

There were no comments to the docket, therefore, based upon its evaluation of the twenty-nine exemption applications, FMCSA exempts, Douglas D. Aure, Bruce E. Bivins, Steven G. Boggs, Jessie L. Brock, II, Francis C. Coryea, Challis J. Crismore, Colin M. Forer, Kevin D. Hewston, Daniel C. Horvat, Richard L. Jarvi, David J. Jansen, Lawrence A. Kibler, Richard H. Kruse, Dan A. McGee, Arthur J. Medrano, Florindo G. Mercado, Brian D. Morin, Mark R. Perkins, Amy L. Polovino, William H. Reinhart, Daniel J. Russell, Christopher C. Schuch, Timothy Short, Wayne Skiles, Gregory B. Valentine, Sr., James J. Walsh, Uve J. Witsch, Steven G. Woltman, and John T. Yocum from the ITDM standard in 49 CFR 391.41(b)(3), subject to the conditions listed under "Conditions and Requirements" above.

In accordance with 49 U.S.C. 31136(e) and 31315 each exemption will be valid for two years unless revoked earlier by FMCSA. The exemption will be revoked if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315. If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.

Issued on: January 28, 2008.

Larry W. Minor,

Associate Administrator for Policy and Program Development.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket ID. FMCSA-2007-0070]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA).

ACTION: Notice of applications for exemptions from the diabetes standard; request for comments.

SUMMARY: FMCSA announces receipt of applications from 66 individuals for exemptions from the prohibition against persons with insulin-treated diabetes mellitus (ITDM) operating commercial motor vehicles (CMVs) in interstate commerce. If granted, the exemptions would enable these individuals with ITDM to operate commercial motor vehicles in interstate commerce.

DATES: Comments must be received on or before March 3, 2008.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA-2007-0070 using any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue, SE., West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.
- *Hand Delivery:* West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* 1-202-493-2251.

Each submission must include the Agency name and the docket ID for this Notice. Note that DOT posts all comments received without change to <http://www.regulations.gov>, including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to <http://www.regulations.gov> at any time or Room W12-140 on the ground level of the West Building, 1200 New Jersey Avenue, SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review the DOT's complete

Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477-78; Apr. 11, 2000). This information is also available at <http://Docketinfo.dot.gov>.

FOR FURTHER INFORMATION CONTACT: Dr. Mary D. Gunnels, Director, Medical Programs, (202) 366-4001, fmcamedical@dot.gov, FMCSA, Department of Transportation, 1200 New Jersey Avenue, SE., Room W64-224, Washington, DC 20590-0001. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption for a 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption." The statutes also allow the Agency to renew exemptions at the end of the 2-year period. The 66 individuals listed in this notice have recently requested an exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by the statutes.

Qualifications of Applicants

William E. Amidon

Mr. Amidon, age 71, has had ITDM since 1982. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Amidon meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Florida.

Jack H. Badger, Jr.

Mr. Badger, 67, has had ITDM since 2004. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the

past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Badger meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Florida.

Richard L. Burwell

Mr. Burwell, 42, has had ITDM since 2007. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Burwell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Ohio.

Scott A. Campbell

Mr. Campbell, 42, has had ITDM since 2004. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Campbell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Pennsylvania.

David Clemente, Sr.

Mr. Clemente, 51, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Clemente meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist

examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Jersey.

Mark D. Cleveland

Mr. Cleveland, 52, has had ITDM since 1995. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cleveland meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from Washington.

Timothy M. Collier

Mr. Collier, 39, has had ITDM since 1995. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Collier meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from New York.

Danny R. Combs

Mr. Combs, 52, has had ITDM since 2004. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Combs meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy.

He holds a Class A CDL from Minnesota.

Robert S. Crawford

Mr. Crawford, 60, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Crawford meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Anthony S. Cruise

Mr. Cruise, 37, has had ITDM since 2002. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cruise meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a chauffeur's license from Indiana.

James D. Daly

Mr. Daly, 56, has had ITDM since 1992. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Daly meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class C operator's license from Pennsylvania.

James Davis

Mr. Davis, 68, has had ITDM since 1989. His endocrinologist examined him

in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Davis meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from New Jersey.

William M. Dement

Mr. Dement, 27, has had ITDM since 2007. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Dement meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Missouri.

Lizzie L. Dixon

Ms. Dixon, 36, has had ITDM since 2006. Her endocrinologist examined her in 2007 and certified that she has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Dixon meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her optometrist examined her in 2007 and certified that she does not have diabetic retinopathy. She holds a Class D operator's license from New Jersey.

Nathan J. Donley

Mr. Donley, 27, has had ITDM since 1999. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes

management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Donley meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Ohio.

Billy R. Echols

Mr. Echols, 56, has had ITDM since 2007. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Echols meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Alabama.

Jonathan B. Estridge

Mr. Estridge, 28, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Estridge meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Arizona.

Gregory A. Fisher

Mr. Fisher, 48, has had ITDM since 2004. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Fisher meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have

diabetic retinopathy. He holds a Class A CDL from Ohio.

Linda G. Flock

Ms. Flock, 64, has had ITDM since 1995. Her endocrinologist examined her in 2007 and certified that she has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Flock meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her ophthalmologist examined her in 2007 and certified that she has stable nonproliferative diabetic retinopathy. She holds a Class B CDL from California.

Kurt D. Genat

Mr. Genat, 35, has had ITDM since 2003. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Genat meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Texas.

Kerri J. Gibson

Ms. Gibson, 34, has had ITDM since 1994. Her endocrinologist examined her in 2007 and certified that she has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Gibson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her optometrist examined her in 2007 and certified that she does not have diabetic retinopathy. She holds a Class F operator's license from Missouri, which allows her to drive any motor vehicle with a gross vehicle rating of less than 26,001 pounds.

Carlos F. Gonzales

Mr. Gonzales, 58, has had ITDM since 2007. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gonzales meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Texas.

Larry D. Goughnour

Mr. Goughnour, 49, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Goughnour meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Ronald G. Gross

Mr. Gross, 67, has had ITDM since 1999. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gross meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

James O. Hamilton

Mr. Hamilton, 57, has had ITDM since 2003. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the

assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hamilton meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Ohio.

Chester C. Holland

Mr. Holland, 63, has had ITDM since 2007. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Holland meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Florida.

Justin J. Hughes

Mr. Hughes, 27, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hughes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from California.

Phillip R. Hutchinson

Mr. Hutchinson, 30, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes

using insulin, and is able to drive a CMV safely. Mr. Hutchinson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Oregon.

Bradley J. Ingemann

Mr. Ingemann, 29, has had ITDM since 1996. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ingemann meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Minnesota.

Robert M. Jasuta

Mr. Jasuta, 38, has had ITDM since 1989. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Jasuta meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Pennsylvania.

William B. Jenks, Jr.

Mr. Jenks, 58, has had ITDM since 1994. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Jenks meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does

not have diabetic retinopathy. He holds a Class A CDL from Utah.

Timothy L. Johnson

Mr. Johnson, 37, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Johnson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Daniel R. Jones

Mr. Jones, 52, has had ITDM since 2001. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Jones meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Glenn R. Kerns

Mr. Kerns, 58, has had ITDM since 2001. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kerns meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Michigan.

Kenneth M. Kostelny

Mr. Kostelny, 53, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss

of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kostelny meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New York.

Douglas O. Krosch

Mr. Krosch, 57, has had ITDM since 2000. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Krosch meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

John Lewis, Jr.

Mr. Lewis, 68, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Lewis meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from California.

Robert E. Martin

Mr. Martin, 23, has had ITDM since 1987. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using

insulin, and is able to drive a CMV safely. Mr. Martin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Missouri.

Henry M. McCurdy

Mr. McCurdy, 63, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McCurdy meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Mississippi.

Thomas J. Montgomery

Mr. Montgomery, 54, has had ITDM since 1996. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Montgomery meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Michigan.

Robert L. Morden

Mr. Morden, 54, has had ITDM since 1986. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Morden meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have

diabetic retinopathy. He holds a Class A CDL from Arkansas.

Jerry L. Morris

Mr. Morris, 54, has had ITDM since 2004. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Morris meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Mississippi.

Michael D. Mumma

Mr. Mumma, 44, has had ITDM since 1999. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mumma meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Harold R. Newton

Mr. Newton, 37, has had ITDM since 1998. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Newton meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Arizona.

Clayton W. Noe

Mr. Noe, 25, has had ITDM since 2006. His endocrinologist examined him

in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Noe meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Derek J. Page

Mr. Page, 39, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Page meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New York.

Garrett A. Phillips

Mr. Phillips, 23, has had ITDM since 1991. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Phillips meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from New York.

Gary P. Pitts

Mr. Pitts, 60, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has

stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pitts meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Texas.

Bruce P. Quaintance

Mr. Quaintance, 57, has had ITDM since 2007. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Quaintance meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Jersey.

Randy L. Quattlebaum

Mr. Quattlebaum, 47, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Quattlebaum meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Texas.

Curtis L. Reed, Jr.

Mr. Reed, 53, has had ITDM since 2001. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Reed meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy.

He holds a Class D operator's license from Mississippi.

Everette W. Roberts

Mr. Roberts, 55, has had ITDM since 2003. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Roberts meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class D operator's license from Alabama.

Mark C. Smith

Mr. Smith, 43, has had ITDM since 2002. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Smith meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Nebraska.

Ryan B. Smith

Mr. Smith, 32, has had ITDM since 1988. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Smith meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Alabama.

Billy J. Stamper

Mr. Stamper, 29, has had ITDM since 2006. His endocrinologist examined him

in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Stamper meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Oklahoma.

Ralph J. Sternhagen

Mr. Sternhagen, 45, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Sternhagen meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Iowa.

Robert E. Tauriainen

Mr. Tauriainen, 46, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Tauriainen meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Oregon.

David B. Tomlin

Mr. Tomlin, 50, has had ITDM since 1992. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the

past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Tomlin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Alabama.

Brian T. Tow

Mr. Tow, 49, has had ITDM since 1990. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Tow meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Washington.

Larry N. Trimble

Mr. Trimble, 55, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Trimble meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class D operator's license from Arizona.

Frederick J. Van Aken, III

Mr. Van Aken, 32, has had ITDM since 1993. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Van Aken meets the requirements of the vision standard at

49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from California.

Roger K. VanDenbark

Mr. VanDenbark, 62, has had ITDM since 2003. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. VanDenbark meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds an operator's license from Indiana.

Kenneth D. Wallace

Mr. Wallace, 56, has had ITDM since 1999. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wallace meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class C operator's license from Georgia.

Kelly A. Walling

Mr. Walling, 64, has had ITDM since 2005. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Walling meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A operator's license from South Carolina.

Gary J. Weiss

Mr. Weiss, 44, has had ITDM since 1993. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Weiss meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2007 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from South Carolina.

Danny L. Wood

Mr. Wood, 58, has had ITDM since 2006. His endocrinologist examined him in 2007 and certified that he has had no hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 5 years; understands diabetes management and monitoring; and has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wood meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2007 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Oregon.

Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated in the dates section of the Notice.

FMCSA notes that Section 4129 of the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) requires the Secretary to revise its diabetes exemption program established on September 3, 2003 (68 FR 52441).¹ The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section

4018 of the Transportation Equity Act for the 21st Century (49 U.S.C. 31305).

Section 4129 requires: (1) The elimination of the requirement for three years of experience operating CMVs while being treated with insulin; and (2) the establishment of a specified minimum period of insulin use to demonstrate stable control of diabetes before being allowed to operate a CMV.

In response to section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 Notice. FMCSA discontinued use of the 3-year driving experience and fulfilled the requirements of section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the requisite level of safety required of all exemptions granted under 49 U.S.C. 31136 (e).

Section 4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and medical requirements that are deemed medically necessary. FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003 Notice, except as modified, were in compliance with section 4129(d). Therefore, all of the requirements set out in the September 3, 2003 Notice, except as modified by the Notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

Dated: January 28, 2008.

Larry W. Minor,

Associate Administrator for Policy and Program Development.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION**Federal Railroad Administration**

[Docket No. FRA-2000-7257]

[Notice No. 45]

Railroad Safety Advisory Committee; Notice of Meeting

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Announcement of Railroad Safety Advisory Committee (RSAC) meeting.

SUMMARY: FRA announces the 34th meeting of the RSAC, a Federal advisory committee that develops railroad safety regulations through a consensus process. The RSAC meeting topics will

include opening remarks from the FRA Administrator, presentations on railroad bridge safety, the Volpe final report on private crossings, the FRA Research and Development Program, and the Risk Reduction Program. Status reports will be provided by the Passenger Safety, Locomotive Safety Standards, Medical Standards, Railroad Operating Rules, and Track Safety Standards Working Groups. The Committee will be asked to vote on recommendations on proposed Emergency Preparedness Rule text, a Vehicle Track Interaction Rule change, regulatory changes, and recommended practices related to the management of continuous welded rail, and station platform gap management guidance. Additionally, FRA may offer for RSAC vote a task on bridge safety. This agenda is subject to change.

DATES: The RSAC meeting is scheduled to commence at 9:30 a.m., and will adjourn at 4 p.m., on Wednesday, February 20, 2008.

ADDRESSES: The RSAC meeting will be held at the National Housing Center, 1201 15th Street, NW., Washington, DC 20005. The meeting is open to the public on a first-come, first-served basis, and is accessible to individuals with disabilities. Sign and oral interpretation can be made available if requested 10 calendar days before the meeting.

FOR FURTHER INFORMATION CONTACT: Larry Woolverton, RSAC Coordinator, FRA, 1200 New Jersey Avenue, SE., Mailstop 25, Washington, DC 20590, (202) 493-6212 or Grady Cothen, Deputy Associate Administrator for Safety, FRA, 1200 New Jersey Avenue, SE., Mailstop 25, Washington, DC 20590, (202) 493-6302.

SUPPLEMENTARY INFORMATION: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), FRA is giving notice of a meeting of the RSAC. The RSAC was established to provide advice and recommendations to FRA on railroad safety matters. The RSAC is composed of 54 voting representatives from 31 member organizations, representing various rail industry perspectives. In addition, there are nonvoting advisory representatives from the agencies with railroad safety regulatory responsibility in Canada and Mexico, the National Transportation Safety Board, and the Federal Transit Administration. The diversity of the Committee ensures the requisite range of views and expertise necessary to discharge its responsibilities. See the RSAC Web site for details on pending tasks at <http://rsac.fra.dot.gov/>.

Please refer to the notice published in the **Federal Register** on March 11, 1996,

¹ Section 4129(a) refers to the 2003 Notice as a "final rule." However, the 2003 Notice did not issue a "final rule" but did establish the procedures and standards for issuing exemptions for drivers with ITDM.
