SUPPLEMENTARY INFORMATION: FERC-592 ("Standards of Conduct for Transmission Providers; and Marketing Affiliates of Interstate Pipelines," OMB No. 1902-0157) includes the reporting, recordkeeping, and posting requirements in:

- 18 CFR Part 358 (Standards of Conduct),
- 18 CFR 250.16, and
- FERC Form No. 592 log/format, that is posted at <http://www.ferc.gov/docs-filing/eforms.asp#592>.

Hereafter, this Notice will refer to this group of collections of information as "FERC-592."

Under section 4 of the Natural Gas Act (NGA), the Commission has the regulatory responsibility to ensure that pipeline rates and terms and conditions of service are just and reasonable and not unduly discriminatory. In order to ensure just and reasonable rates and services, the Commission must achieve two objectives: Prevent undue discrimination in natural gas markets, and promote competitive and efficient markets while mitigating market power. In short, the Commission's regulatory policy must seek to reconcile the objectives of fostering an efficient market that provides good alternatives to as many shippers as possible, while at the same time creating a regulatory framework that is fair and protects captive customers without good alternatives.

The "FERC-592" information (that is posted on the Web site, maintained, and/or provided by the respondents, as required) is used by the Commission to monitor the pipeline's transportation, sales, and storage activities for its marketing affiliate, and to deter undue discrimination by pipeline companies in favor of their affiliates. The information is also used by non-affiliated shippers, customers, and others (such as state commissions) to determine whether they have been harmed by affiliate preference and, in some cases, to prepare evidence for proceedings following the filing of a complaint or that address NGA section 4 rate cases.

Action: The Commission is requesting a three-year extension of the expiration date for the FERC-592, with no changes to the reporting requirements.

Burden Statement: Public reporting burden¹ for this collection is estimated as follows.

¹ The average number of hours an employee works per year is 2,080. The average employee costs \$128,297 per year.

Information collection "FERC-592" (OMB No. 1902-0157)	Number of respondents annually (1)	Number of responses per respondent (2)	Average burden hours per response (3)	Total annual burden hours (1) × (2) × (3)
18 CFR Part 358				
18 CFR 250.16				
FERC Form No. 592 log/format	85	1	116.62	9,913

[Note: These figures may not be exact, due to rounding.]

The total estimated annual cost burden¹ to respondents is \$611,446.22 [(9,913 hours/2,080 hours per year) × \$128,297/year]. The average annual cost per respondent is \$7,193.48.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The estimate of cost for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) Whether the proposed collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden of the proposed collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of

information technology, *e.g.* permitting electronic submission of responses.

Secretary.
