AGENCY: Nuclear Regulatory
Commission.

ACTION: Notice of Issuance and
Availability of Regulatory Guide (RG)
1.65, Revision 1, "Materials and
Inspections for Reactor Vessel Closure
Studs."

Commission, Washington, DC 20555-

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory
Commission (NRC) is issuing a guide in
the agency's "Regulatory Guide" series.
This series was developed to describe
and make available to the public
information such as methods that are
acceptable to the NRC staff for
implementing specific parts of the
agency's regulations, techniques that the
staff uses in evaluating specific
problems or postulated accidents, and
data that the staff needs in its review of
applications for permits and licenses.

RG 1.65, Revision 1, "Materials and
Inspections for Reactor Vessel Closure
Studs," was issued with a temporary
identification as Draft Regulatory Guide,
DG-1211. General Design Criterion
(GDC) 1, "Quality Standards and
Records," of Appendix A, "General
Design Criteria for Nuclear Power
Plants," to Title 10, of the *Code of
Federal Regulations*, part 50, "Domestic
Licensing of Production and Utilization
Facilities" (10 CFR part 50), requires, in
part, that "[s]tructures, systems, and
components important to safety shall be
designed, fabricated, erected, and tested
to quality standards commensurate with
the importance of the safety function to

be performed. Where generally
recognized codes and standards are
used, they shall be identified and
evaluated to determine their
applicability, adequacy, and sufficiency
and shall be supplemented or modified
as necessary to ensure a quality product
in keeping with the required safety
function."

GDC 30, "Quality of Reactor Coolant
Pressure Boundary," requires, in part,
that "[c]omponents that are part of the
reactor coolant pressure boundary shall
be designed, fabricated, erected, and
tested to the highest practical quality
standards."

GDC 31, "Fracture Prevention of
Reactor Coolant Pressure Boundary,"
requires, in part, that "[t]he reactor
coolant pressure boundary shall be
designed with sufficient margin to
assure that when stressed under
operating, maintenance, testing, and
postulated accident conditions (1) the
boundary behaves in a nonbrittle
manner and (2) the probability of
rapidly propagating fracture is
minimized."

Appendix B, "Quality Assurance
Criteria for Nuclear Power Plants and
Fuel Reprocessing Plants," to 10 CFR
part 50 requires, in part, that
"[m]easures be established to assure that
special processes, including welding,
heat treating, and nondestructive
testing, are controlled and accomplished
by qualified personnel using qualified
procedures in accordance with
applicable codes, standards,
specifications, criteria, and other special
requirements."

II. Further Information

In April 2009, DG-1211 was issued
for public comment. The public
comment period closed on June 12,
2009. The staff's responses to the public
comments received are located in the
NRC's Agencywide Documents Access
and Management System under

SUPPLEMENTARY INFORMATION:

Description of the SBDC Program

A partnership exists between SBA and an SBDC. SBDCs offer training, counseling and other business development assistance to small businesses. Each SBDC provides services under a negotiated Cooperative Agreement with SBA, the general management and oversight of SBA, and a state plan initially approved by the Governor. Non-Federal funds must match Federal funds. An SBDC must operate according to law, the Cooperative Agreement, SBA's regulations, the annual Program Announcement, and program guidance.

Program Objectives

The SBDC program uses Federal funds to leverage the resources of states, academic institutions and the private sector to:

- (a) Strengthen the small business community;
- (b) Increase economic growth;
- (c) Assist more small businesses; and
- (d) Broaden the delivery system to more small businesses.

SBDC Program Organization

The lead SBDC operates a statewide or regional network of SBDC service centers. An SBDC must have a full-time Director. SBDCs must use at least 80 percent of the Federal funds to provide services to small businesses. SBDCs use volunteers and other low cost resources as much as possible.

SBDC Services

An SBDC must have a full range of business development and technical assistance services in its area of

operations, depending upon local needs, SBA priorities and SBDC program objectives. Services include training and counseling to existing and prospective small business owners in management, marketing, finance, operations, planning, taxes, and any other general or technical area of assistance that supports small business growth.

The SBA district office and the SBDC must agree upon the specific mix of services. They should give particular attention to SBA's priority and special emphasis groups, including veterans, women, exporters, the disabled, and minorities.

SBDC Program Requirements

An SBDC must meet programmatic and financial requirements imposed by statute, regulations or its Cooperative Agreement. The SBDC must:

- (a) Locate service centers so that they are as accessible as possible to small businesses;
- (b) Open all service centers at least 40 hours per week, or during the normal business hours of its state or academic Host Organization, throughout the year;
- (c) Develop working relationships with financial institutions, the investment community, professional associations, private consultants and small business groups; and
- (d) Maintain lists of private consultants at each service center.

Dated: April 6, 2010.

Antonio Doss,
Associate Administrator for Small Business Development Centers.
