**Notice of Lodging of Consent Decree Under the Resource Conservation and Recovery Act**

Notice is hereby given that on August 6, 2010, a proposed Consent Decree in *United States et al. v. CF Industries, Inc.*, Civil Action No. 8:10-CV-1756T24EAJ was lodged with the United States District Court for the Middle District of Florida.

In this action the United States sought injunctive relief and civil penalties for civil violations of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6901 to 6992k, together with its implementing regulations by CF Industries, Inc. ("CFI"). CFI manufactures phosphoric acid, sulfuric acid, and nitrogen and phosphate fertilizer products at a single production facility in Plant City, Florida that has been in operation at the current approximate 3,300 acre site since 1965.

The settlement reflected in the proposed Consent Decree will resolve the violations alleged in the Complaint of Sections 3004 and 3005 of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C.A. 6924 and 6925, and the implementing regulations at 40 CFR Parts 261, 262, 264, 265, 268 and 270 that govern the identification, treatment, storage and disposal of hazardous waste, and specifically involve the commingling of hazardous wastes with wastes exempted from RCRA under the Bevill Amendment for mineral processing wastes pursuant to 40 CFR 261.4(b)(7)(ii) (D) and (P).

Under the proposed settlement, CFI has re-engineered its plant to cease generating hazardous wastewater previously commingled with RCRA-exempt mineral processing wastes. CFI also will install a neutralization system to treat 6 million pounds per year of residual hazardous waste; implement a comprehensive leak detection and reduction program; install synthetic protective barriers beneath its production plants; provide \$163.5 million in financial assurance to guarantee appropriate closure and long term care of the facility; and pay a penalty of \$701,500. Florida is a co-plaintiff in this action, and will share in the penalty and coordinate with EPA to monitor and enforce compliance with the Consent Decree.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657).

The collections of information contained in the Mechanical Power Presses Standard for General Industry are necessary to reduce workers' risk of death or serious injury by ensuring that employers maintain the mechanical power presses used by the workers in safe operating condition.

The following section describes who uses the information collected under each requirement, as well as how they use it.

*Section 1910.217(e)(1)(i)*

Paragraph (e)(1)(i) requires employers to establish and follow a program of periodic and regular inspections of power presses to ensure that all their parts, auxiliary equipment, and safeguards are in safe operating condition and adjustment. Employers must maintain a certification record of inspections that includes the date of inspection, the signature of the person who performed the inspection, and the serial number, or other identifiers, of the power press that was inspected.

*Section 1910.217(e)(1)(ii)*

Paragraph (e)(1)(ii) requires employers to inspect and test each press no less

than weekly to determine the condition of the clutch/brake mechanism, antirepeat feature, and single-stroke mechanism. Employers must perform and complete necessary maintenance or repair or both before the press is operated. In addition, employers must maintain a record of inspections, tests, and maintenance work. The record must include the date of the inspection, test, or maintenance; the signature of the person who performed the inspection, test, or maintenance; and the serial number, or other identifiers, of the press that was inspected, tested, or maintained.

**II. Special Issues for Comment**

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

**III. Proposed Actions**

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Mechanical Power Presses Standard for General Industry (29 CFR 1910.217(e)(1)). There are no program changes or adjustments associated with the information collection requirements of the Standard; thus, the burden hours will remain at 1,373,054. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

*Type of Review:* Extension of a currently approved collection.

*Title:* Mechanical Power Presses (29 CFR 1910.217(e)(1)).

*OMB Number:* 1218-0229.

*Affected Public:* Business or other for-profits; Federal Government; State, Local, or Tribal Government.

*Number of Respondents:* 295,000.

*Frequency of Response:* On occasion, Weekly, Monthly.

*Average Time per Response:* Two minutes (.03 hour) to disclose the certification records to 20 minutes (.33 hour) to inspect the parts, auxiliary equipment, and safeguards of each press.

*Estimated Total Burden Hours:*  
1,373,054.

*Estimated Cost (Operation and Maintenance):* \$0.
