DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

June 15, 2011.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Comments regarding these information collections are best assured of having their full effect if received within 30 days of this notification. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: Customer/Stakeholder Satisfaction Surveys

OMB Control Number: 0579–0339.

Summary of Collection: Collection and dissemination of animal health data and information is mandated by 7 U.S.C. 391, the Animal Industry Act of 1884, which established the precursor of the Animal and Plant Health Inspection Service (APHIS), Veterinary Services, the Bureau of Animal Industry. The collection, analysis and dissemination of livestock and poultry health information on a national basis are consistent with the APHIS mission of protecting and improving American agriculture's productivity and competitiveness. The National Animal Health Monitoring System (NAHMS) program relies heavily on producer and industry support. The NAHMS Program is committed to improving the value of studies for producers and industry, reducing the burden of these studies on respondents, and developing timely information of value to the American public. As part of this commitment, the NAHMS is seeking approval to perform customer/stakeholder satisfaction surveys for participants of NAHMS studies, user of NAHMS information as well as recipients of the U.S. Animal Health Report. Therefore, NAHMS needs to collect this type of feedback from producer and other to enhance future studies and ensure that the informational products are meeting their needs.

Need and Use of the Information: The information collected through the surveys will be analyzed and used for internal program adjustments and to tailor future NAHMS studies and reports.

The potential benefit to the industry from these surveys is feedback to improve the program, laboratory services and informational products by gathering relevant and timely information and opinion on the content and method of program or service delivery.

Description of Respondents: Business or other for-profit.

Number of Respondents: 21,300.

Frequency of Responses: Reporting; On occasion.

Total Burden Hours: 1,610.

[Document No. DA–10–03; AMS–DA–09–0053]

Milk for Manufacturing Purposes and Its Production and Processing; Requirements Recommended for Adoption by State Regulatory Agencies

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice.

SUMMARY: This document amends the recommended manufacturing milk requirements (Recommended Requirements) by raising the maximum allowable somatic cell count in producer herd goat milk from 1,000,000 cells per milliliter to 1,500,000 cells per milliliter. This action was initiated at the request of the National Association of Dairy Regulatory Officials (NADRO) and was developed in cooperation with NADRO, dairy trade associations, and producer groups. This will ensure that goat milk can continue to be shipped and recognizes that goats have a need for different regulatory limits for somatic cells than cows.

DATES: *Effective Date:* July 21, 2011.

FOR FURTHER INFORMATION CONTACT: Susan Sausville, Chief, Standardization Branch, Dairy Programs, AMS, USDA, telephone (202) 720–7473 or e-mail *Susan.Sausville@ams.usda.gov.*

SUPPLEMENTARY INFORMATION: Under the authority of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627), the United States Department of Agriculture maintains a set of model regulations relating to quality and sanitation requirements for the production and processing of manufacturing grade milk. These Recommended Requirements are developed by AMS and recommended for adoption and enforcement by the various States that regulate manufacturing grade milk. The purpose of the model requirements is to promote

uniformity in State dairy laws and regulations relating to manufacturing grade milk.

In consultation with representatives from NADRO, State regulatory agencies, FDA, and dairy industry trade associations, the Department prepared the Recommended Requirements to promote uniformity in State dairy laws and regulations for manufacturing grade milk. To accommodate changes that have occurred in the dairy industry, NADRO and various State officials have from time to time requested USDA to update the Recommended Requirements.

During its July 2009 annual meeting, NADRO passed a resolution requesting USDA to raise the maximum allowable somatic cell count for producer herd goat from 1,000,000 cells per milliliter to 1,500,000 cells per milliliter to provide consistency with the current requirements in place for Grade A producer herd goat milk. Due to inherent differences between cows and goats, goat milk with a somatic cell count of 1,500,000 million cells per milliliter can be produced from a healthy, non-mastitic udder and therefore, is quality milk. The need for a separate standard for goat milk was recognized by the National Conference on Interstate Milk Shipments (NCIMS) and was raised to 1,500,000 million cells per milliliter at their 2009 conference. This change will align the Recommended Requirements with the Grade A requirements for goat's milk. AMS reviewed this resolution and developed a draft that identified the changes associated with this request. This draft was provided to State regulatory officials and dairy trade association representatives for informal discussion prior to publication in the **Federal Register**.

The requirements of Executive Order 13132, Federalism, were considered in developing this notice, and it has been determined that this action does not have substantial effects on the States (the relationship between the National Government and the States or on the distribution of power and responsibilities among the various levels of government).

Public Comment

A Notice of Proposal to Change the document, ''Milk for Manufacturing Purposes and Its Production and Processing; Recommended Requirements for Adoption by State Regulatory Agencies,'' was published in the **Federal Register** on October 5, 2010 (75 FR 61418). The Notice of Proposal to Change the document provided for a 60-day comment period that ended December 5, 2010. Two comments were received. One from the membership of the Other Species Milk Committee of the National Conference on Interstate Milk Shipments (NCIMS) in support of the proposed amendment and one from an anonymous source in opposition of the amendment which provided no scientific justification to support their opposition.

Accordingly, the changes proposed in the Milk for Manufacturing Purposes and its Production and Processing; Recommended Requirements for Adoption by State Regulatory Agencies are incorporated in the revised Recommended Requirements.

The Recommended Requirements are available either from the above address or by accessing the information on the Internet at the following address: *http://www.ams.usda.gov/dairy/manufmlk.pdf*.
