

been understood at the time, the cause of the issue, and why the licensee did not identify the issue.

In all such cases when a licensee determines that an unplanned change during construction associated with a violation of requirements meets the above-outlined criteria and timely submits the necessary information for NRC evaluation, the licensee's continued failure to meet the current licensing basis will not be treated as a willful or continuing violation while NRC reviews the submittal. (Note: If NRC subsequently denies a requested license amendment change, or if the NRC requires additional measures to be taken for the change to be considered acceptable, then a separate NOV or order may be issued to ensure appropriate corrective actions, including restoring the configuration to the current licensing basis are taken).

The staff is currently developing the CdC PAR process including the development of interim staff guidance and the endorsement of industry guidance. The purpose of the CdC PAR process is, as an elective precursor to the license amendment review established by a condition of license, to determine if the NRC has any objection to the licensee proceeding with construction activities different from the licensing basis while the NRC is evaluating the related license amendment request. The NRC will not issue violations for licensee-planned changes properly entered into the CdC PAR process. Comments on CdC are being solicited under a separate FRN and will not be addressed under this FRN.
