refrigerant that had not leaked previously was properly evacuated); (3) require its suppliers to use the verification statement provided in Appendix A that contains the information required by the regulations, unless it has an existing written agreement with that supplier regarding verification; and (4) keep a refrigerant recovery log to document details regarding refrigerant that is recovered by Defendant in the form provided in Appendix B.

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Consent Decree Under the Clean Air Act

Notice is hereby given that on December 2, 2011, a proposed Consent Decree in *United States v. Rentech Nitrogen, LLC*, Civil Action No. 3:11-CV-50358, was lodged with the United States District Court for Northern District of Illinois.

The Consent Decree would resolve claims for injunctive relief and the assessment of civil penalties asserted by the United States (Plaintiff), against Rentech Nitrogen, LLC (Defendant) pursuant to Sections 113(b) and 167 of the Clean Air Act ("CAA"), 42 U.S.C. 7413(b) and 7477.

Defendant produces nitric acid, which is used in the production of ammonium nitrate and other fertilizers and explosives. The nitric acid process results in the emissions of regulated air pollutants, including nitrogen oxides ("NO<sub>x</sub>"). The Plaintiff's complaint, filed concurrently with the Consent Decree, alleges that Defendant violated the Prevention of Significant Deterioration ("PSD") provisions of the CAA, 42 U.S.C. 7470-7492, and the implementing regulations at 40 CFR part 52; the New Source Performance Standards ("NSPS") provisions of the CAA, 42 U.S.C. 7411, and the implementing regulations at 40 CFR part 60, subpart G; Title V of the CAA, 42 U.S.C. 7661 *et seq.*; and the State Implementation Plan for the State of Illinois promulgated pursuant to Section 110 of the CAA, 42 U.S.C. 7410, to the extent it incorporates and/or implements the above-listed federal requirements. Specifically, the complaint alleges that Defendant operated a nitric acid plant since inception without a required PSD permit and without using the best available control technology ("BACT") required under the PSD regulatory framework. Additionally, the complaint alleges that Defendant's Title V operating permit is deficient for the same reason. Finally, the complaint alleges that Defendant exceeded emission limits for NO<sub>x</sub>, violating the NSPS.

The Consent Decree would require Defendants to achieve BACT level emissions for NO<sub>x</sub>, comply with the Nitric Acid NSPS, and incorporate these requirements into its Title V permit. The Consent Decree would also provide for a civil penalty of \$108,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comment relating to the Consent Decree.
