Title: NSPS for Kraft Pulp Mills (Renewal).

ICR Numbers: EPA ICR Number 1055.10, OMB Control Number 2060-0021.

ICR Status: This ICR is schedule to expire on April 30, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The affected entities are subject to the General Provisions of the NSPS at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subpart BB.

Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are also required, at a minimum, semiannually.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart BB as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information estimated to average 37 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose and provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology

and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information. All existing ways will have to adjust to comply with any previously-applicable instructions and requirements that have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities:
Owners and operators of kraft pulp mills.

Estimated Number of Respondents:
106.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden:
16,086.

Estimated Total Annual Cost:
\$5,723,477, which is comprised of \$1,541,377 in labor costs, \$344,900 in capital/startup costs, and operation and maintenance (O&M) costs of \$3,837,200.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to two adjustments: (1) There is an increase in the average number of respondents expected to become subject to the standards over the next three years; and (2) this ICR uses updated labor rates for each of the three labor categories.

The increase in O&M costs is due to an increase in the average number of respondents expected to become subject to the standards over the next three years.

There is also an increase in Agency costs, which is due to the use of the most updated labor rates.

Director, Collection Strategies Division.

Title: NESHAP for Natural Gas Transmission and Storage (Renewal).

ICR Numbers: EPA ICR Number 1789.07, OMB Control Number 2060–0418.

ICR Status: This ICR is scheduled to expire on April 30, 2012. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Natural Gas Transmission and Storage (40 CFR part 63, subpart HHH) were proposed on February 6, 1998, and promulgated on June 17, 1999. These regulations apply to existing facilities and new facilities that are major sources of hazardous air pollutants (HAP) and that either transport or store natural gas prior to entering the pipeline to a local distribution company or to a final end user (if there is no local distribution company).

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. This information is being collected to assure compliance with 40 CFR part 63, subpart HHH, as authorized in section 112 and 114(a) of the Clean Air Act. The required information consists of emissions data

and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Number for the EPA regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 15 hours per response. "Burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously-applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or operators of natural gas transmission and storage facilities.

Estimated Number of Respondents: 836.

Frequency of Response: Initially, occasionally, and semiannually.

Estimated Total Annual Hour Burden: 950.

Estimated Total Annual Cost: \$91,018, which includes \$91,018 in labor costs, no capital/startup costs, and no operation and maintenance (O&M) costs.

Changes in the Estimates: There is an increase in labor hours and costs for both the respondents and the Agency from the most recently approved ICR. This is due to two considerations. First, the estimated number of respondents subject to the standard has increased due to industry growth in the past three years. Second, this ICR uses updated labor rates to reflect the most recent data from the Bureau of Labor Statistics.
