

Services Program (Adult), and approximately \$8,138 of these funds is available for the Supplemental (Youth) Services Program. The SGA contains the procedures by which the Department will select and designate the WIA section 166 grantees for PY 2012 and 2013 (July 1, 2012 through June 30, 2014).

As a general matter, the Department is required to select grantees, on a competitive basis, every two years. However, the Secretary of Labor (the Secretary) has the authority (WIA section 166(c)(2)) to waive the requirement for competition where current grantees are performing satisfactorily. Further, based on our observance of the principles of self-determination embodied in section 102 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450a), as implemented by 20 CFR 668.120, entities that have legal jurisdiction over their requested geographic service areas receive the highest priority for designation (20 CFR 668.210(a)). Such tribal entities will be awarded the grants for their geographic service areas without competition provided that they are found responsible to manage federal funds and meet all other designation requirements.

The complete SGA and any subsequent SGA amendments, in connection with this solicitation are described in further detail on ETA's Web site at <http://www.doleta.gov/grants/> or on <http://www.grants.gov>. The Web sites provide application information, eligibility requirements, review and selection procedures and other program requirements governing this solicitation.

II. Further Information

The NRC is issuing for public comment a draft guide in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide, entitled, “Initial Test Program of Condensate and Feedwater Systems for Light-Water Reactors” is temporarily identified by its task number, DG–1265. The DG–1265 is proposed revision 2 of Regulatory Guide 1.68.1, dated January 1977.

This guide describes the methods that the staff of the NRC considers acceptable to implement Appendix A, “General Design Criteria for Nuclear Power Plants,” to Title 10, of the *Code of Federal Regulations* (CFR), Part 50, “Domestic Licensing of Production and Utilization Facilities” (10 CFR Part 50), including, but not limited to, Criterion 4, “Environmental and Dynamic Effects Design Basis,” Criterion 11, “Reactor Inherent Protection,” Criterion 14, “Reactor Coolant Pressure Boundary,” and Criterion 15, “Reactor Coolant System Design” regarding the initial test program (ITP) for condensate and feedwater (FW) systems, including condensate storage and supply, for light-water reactors (LWRs) and for startup feedwater (SFW), auxiliary feedwater (AFW) or emergency feedwater (EFW) systems for pressurized-water reactors (PWRs). This guide also describes methods that the NRC staff finds acceptable for testing condensate, FW, SFW/AFW/EFW (PWR only) structures, systems, and components (SSCs) in

accordance with Subpart B, “Standard Design Certifications,” and Subpart C, “Combined Licenses,” of 10 CFR Part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants.”

For the Nuclear Regulatory Commission.
