The Commission has adjusted its burden and cost estimates in order to update the collection burdens necessary to implement a uniform registration process as well as safe and effective lighting procedures for owners of antenna structures.

Section 17.4 requires the owner of any proposed or existing antenna structure that requires notice of proposed construction to the Federal Aviation Administration (FAA) to register the structure with the Commission. Section 17.4 also requires antenna structure owners to provide their tenants with copies of the antenna structure registration. This includes those structures used as part of the stations licensed by the Commission for the transmission of radio energy, or to be used as part of a cable television head-end system. If a Federal Government antenna structure is to be used by a Commission licensee, the structure must be registered with the Commission. A registration number is issued to identify antenna structure owners in order to enforce the Congressionally-mandated provisions related to the owners.

Sections 17.48 and 17.49 contain reporting and recordkeeping requirements. Section 17.48 requires the notification of the FAA of any extinguishment or improper functioning of antenna structure lighting, and section 17.49 requires the recording of antenna structure light inspections in the owner's record.

The information collected is used by the Commission during investigations related to air safety and if the information were not collected, the Commission would not be able to adequately conduct these investigations. The information is also used to protect air safety by ensuring that pilots are adequately informed of lighting outages.
