

industry regulated by multiple agencies? If so, how?

5. What are the biggest challenges to successful implementation of performance-based regulations in the U.S. oil and gas industry?

6. How can risk assessment best be used in performance-based regulations while still ensuring adequate levels of safety? If risk assessments are used in a performance-based regulation, should acceptable risk levels be established?

7. How have authorities that currently use performance-based regulatory models ensured effective oversight (e.g., use of metrics, audit programs)?

8. Are there limits to the use of performance-based regulatory models? For example, do performance-based regulatory models increase or decrease challenges for small businesses in comparison to prescriptive models? Are prescriptive components needed/desirable, and if so, under what situations?

III. Meeting Format

The meeting will include opening remarks, presentations by the agencies and expert speakers, time for public comments, and closing remarks. The agencies will discuss their areas of jurisdiction, regulations and standards, and efforts in the oil and gas industry. Expert speakers will discuss the topics for consideration and issues related to performance-based regulations. In the time designated for public comments, meeting attendees will have an opportunity to make comments that provide the agencies with additional information that may assist them with their future performance-based regulatory efforts.

OFFICE OF PERSONNEL MANAGEMENT

Street NW., Washington, DC 20415, Attention: Lisa Loss or sent via electronic mail to FISFormsComments@opm.gov.

SUPPLEMENTARY INFORMATION: This notice announces that OPM submitted to OMB a request for review and clearance of the revised information collection of information, Questionnaire for Public Trust Positions, SF 85P and Supplemental Questionnaire for Selected Positions, SF 85P-S, which are housed in a system named e-QIP (Electronic Questionnaires for Investigative Processing) and are information collections completed by applicants for, or incumbents of, Federal Civilian Government positions, or positions in private entities performing work for the Government under contract. The collections are used as the basis of information for background investigations to establish that such persons are: Suitable for appointment to or retention in Federal employment in a public trust position; fit for employment or retention in Federal employment in the excepted service when the duties to be performed are equivalent in degree of trust reposed in the incumbent to a public trust position;

fit to perform work on behalf of the Federal Government pursuant to a Government contract, when the duties to be performed are equivalent in degree of trust reposed in the individual to a public trust position; or eligible for physical and logical access to federally controlled facilities or information systems, when the duties to be performed by the individual are equivalent to the duties performed by an employee in a public trust position. For applicants, the SF 85P and SF 85P-S are to be used only after a conditional offer of employment has been made. The SF 85P-S is supplemental to the SF 85P and is used only as approved by OPM, for certain positions such as those requiring carrying of a firearm.

It is estimated that the total number of respondents for the SF 85P is 112,894 annually. The electronic application includes branching questions and instructions which provide for a tailored collection from the respondent based on varying factors in the respondent's personal history. The burden on the respondent will vary depending upon how the information collected relates to the respondent's personal history. In an empirical study, the median of participant time spent completing the SF 85P was 155 minutes. Accordingly, OPM estimates that the annual burden is 141,118 hours. It is estimated that the total number of respondents for the SF 85P-S is 11,717 annually. Each SF 85P-S form takes an estimated 10 minutes to complete. Accordingly, the estimated annual burden is 1,953 hours. e-QIP (Electronic Questionnaires for Investigations Processing) is a web-based system application that houses the SF 85P and SF 85P-S. This internet data collection tool provides faster processing time and immediate data validation to ensure accuracy of the respondent's personal information. The e-Government initiative mandates that agencies utilize e-QIP for all investigations and reinvestigations. A variable in assessing burden hours is the nature of the electronic application. The electronic application includes branching questions and instructions which provide for a tailored collection from the respondent based on varying factors in the respondent's personal history. Because the question branches, or expands for additional details, only for those persons who have indicated, by their previous answers, that a particular topic is relevant to them, the burden on the respondent is reduced when the respondent's personal history demonstrates that he or she has no pertinent information to provide regarding that line of questioning.
